[1] Monthly data and annual averages have been revised to reflect the availability of late reports and corrections by respondents.

[2] Industry and product class indexes may include products not shown separately.

[3] This index was introduced in midyear, and has been linked backward with a rebased PPI series. The annual average is computed from both the PPIR series and the corresponding rebased indexes for the PPI series.

[4] Not available.

n.e.c = Not elsewhere classified.

mfpm = Made from purchased materials.

n.s.k. = Not specified by kind.

Note: Indexes in this table are calculated by a revised methodology. See "Technical Note on Data from the Producer Price Index Revision" at the back of this publication. The annual average calculation method for the PPIR differs from that of the PPI (table 4). The PPIR method averages the unrounded monthly indexes, and also includes unpublished monthly data. Therefore, the annual averages may not agree with those computed by averaging the monthly indexes as shown above.

[1] Monthly data and annual averages have been revised to reflect the availability of late reports and corrections by respondents.

[2] Industry and product class indexes may include products not shown separately.

[3] This index was introduced in midyear, and has been linked backward with a rebased PPI series. The annual average is computed from both the PPIR series and the corresponding rebased indexes for the PPI series.

[4] Not available.

n.e.c = Not elswhere classified.

mfpm = Made from purchased materials.

n.s.k. = Not specified by kind.

Note: Indexes in this table are calculated by a revised methodology. See "Technical Note on Data from the Producer Price Index Revision" at the back of this publication. The annual average calculation method for the PPIR differs from that of the PPI(table 3). The PPIR method averages the unrounded monthly indexes, and also includes unpublished monthly data. Therefore, the annual averages may not agree with those computed by averaging the monthly indexes as shown above.
