¹ The relative importance of a component of the PPI represents its value weight that is allocated to a particular stage-of-processing (SOP) category—finished goods, intermediate materials, or crude materials. This value is expressed as a percentage of the total weight of the SOP category. The "Revised" column shows relative importance figures for December 1999, based on 1992 shipment values from the *Census of Manufactures* and other sources, and reflects all sample revisions effective

January 2000. The "Former" column provides relative importance figures for the same month before any sample revisions. Groupings and sub-totals may not add exactly to totals because of rounding. A dash in the "Former" column indicates that the series was introduced in January 2000, and a dash in the "Revised" column indicates that the series was discontinued as of January 2000. The value "0.000" represents any percentage less than 0.0005.

¹ The relative importance of a component of the PPI represents its value weight that is allocated to a particular stage-of-processing (SOP) category--finished goods, intermediate materials, or crude materials. This value is expressed as a percentage of the total weight of the SOP category. The "Revised" column shows relative importance figures for December 2000, based on 1992 shipment values from the *Census of Manufactures* and other sources, and reflects all sample revisions effective January 2001. The "Former" column provides relative importance

figures for the same month before any sample revisions. Groupings and sub-totals may not add exactly to totals because of rounding. A dash in the "Former" column indicates that the series was introduced in January 2001, and a dash in the "Revised" column indicates that the series was discontinued as of January 2001. The value "0.000" represents any percentage less than 0.0005.

Table 9. Relative importance of subproduct classes in the producer price index by detailed stage-of-processing category, December 2001¹

¹ The relative importance of a component of the PPI represents its value weight that is allocated to a particular stage-of-processing (SOP) category--finished goods, intermediate materials, or crude materials. This value is expressed as a percentage of the total weight of the SOP category. The "Revised" column shows relative importance figures for December 2001, based for the first time on 1997 shipment values from the Census of Manufactures and other sources, and reflects all sample revisions effective January 2002. The "Former" column provides

relative importance figures for the same month, since 1996, on 1992 shipment values, before the 2002 sample revisions effective January 2002. A dash in the "Former" column indicates that the series was introduced in January 2002 and a dash in the "Revised" column indicates that the series was discontinued as of January 2002. Individual items and subtotals may not add exactly to totals because of rounding differences. The value "0.000" represents a percentage less than 0.0005.

Table 9. Relative importance of subproduct classes in the producer price index by detailed stage-of-processing category, December 2002¹

SOP code	Commodity code	Index	Relative importance		SOP code	Commodity code	Index	Relative importance

¹ The relative importance of a component of the PPI represents its value weight that is allocated to a particular stage-of-processing (SOP) category--Finished Goods, Intermediate Materials, or Crude Materials. This value is expressed as a percentage of the total weight of the SOP category. The "Revised" column shows relative importance figures for December 2002, based on 1997 shipment values from the *Census of Manufactures* and other sources, and reflects all sample revisions effective January 2003. The "Former" column provides relative importance

figures for the same month, before any sample revisions. Groupings and sub-totals may not add exactly to totals because of rounding. A dash in the "Former" column indicates that the series was introduced in January 2003, and a dash in the "Revised" column indicates that the series was discontinued as of January 2003. The value "0.000" represents any percentage less than 0.0005.

Table 9. Relative importance of subproduct classes in the Producer Price Index by detailed stage-of-processing category, December 2003¹

	119408	Diesel, semidiesel, & dual fuel, auto.	0.012	0.012		143203	Inboard-outdrive boats, except housebo	0.012	0.012
	119411	Gas engines, except turbines	0.001	0.001		143204	All other boats	0.003	0.003
	119414	Tank & converted internal combustion engines	0.001	0.001		144104	Locomotives and locomotive parts	0.124	0.097
	119601	Steam, gas, and hydraulic turbines	---	0.026		144204	Railroad cars	0.163	0.159
	119701	Turbine and turbine generator sets	0.134	0.110		149111	Transportation equipment, n.e.c.	0.111	0.095
	121101	Metal household furniture	0.005	0.005		151201	Sporting and athletic goods	0.065	0.059
	121204	Other wood household furniture	0.036	0.037		154107	Photographic equipment, excluding phot	0.139	0.130
	121301	Upholstered household furniture	0.043	0.046		155503	Mobile buildings, nonresidential	---	0.028
	121401	Bedding	0.019	0.019		156201	Medical instruments and equipment	0.522	0.517
	121501	Porch and lawn furniture	0.003	0.003		156301	Surgical appliances	0.095	0.098
	122101	Wood office furniture and store fixtures	0.353	0.390		156501	Dental equipment and supplies	0.060	0.060
	122202	Filing cabinets and cases	0.100	0.099		159A04	Signs and advertising displays	0.059	0.063
						159A09	Other miscellaneous products, n.e.c.	0.004	0.004

¹ The relative importance of a component of the PPI represents its value weight that is allocated to a particular stage-of-processing (SOP) category—Finished Goods, Intermediate Goods, or Crude Materials. This value is expressed as a percentage of the total weight of the SOP category. The "Revised" column shows the relative importance figures for December 2003, based on 1997 shipment values from the *Census of Manufactures* and other sources, and reflects all sample revisions effective January 2004. The "Former" column provides relative

importance figures for the same month, before any sample revisions. Groupings and subtotals may not add exactly to totals because of rounding. A dash in the "Former" column indicates that the series was introduced in January 2004, and a dash in the "Revised" column indicates that the series was discontinued as of January 2004. The value "0.000" represents any percentage less than 0.0005.
