¹ The relative importance of a component of the PPI represents its value weight that is allocated to a particular stage-of-processing (SOP) category—Finished Goods, Intermediate Goods, or Crude Materials. This value is expressed as a percentage of the total weight of the SOP category. The "Revised" column shows the relative importance figures for December 2004, based on 1997 shipment values from the *Census of Manufactures* and other sources, and reflects all sample revisions effective January 2005. The "Former" column provides relative

importance figures for the same month, before any sample revisions. Groupings and subtotals may not add exactly to totals because of rounding. A dash in the "Former" column indicates that the series was introduced in January 2005, and a dash in the "Revised" column indicates that the series was discontinued as of January 2005. The value "0.000" represents any percentage less than 0.0005.
