Treasury Market Financing

Historical details of Treasury market financing operations involving bonds, notes, and certificates of indebtedness, beginning with the Fifth War Loan, are published in the tables on pages 30 and 31. Details of weekly Treasury bill offerings are shown on pages 32 and 33.

Refunding During December

On December 18, 1946, Secretary of the Treasury Snyder announced the offering of a new one-year 7/8% certificate issue in exchange, par for par, for an issue of 7/8% certificates of indebtedness maturing on January 1, 1947, outstanding in the amount of \$3,330 million. Cash subscriptions were not received.

The new certificates were dated January 1, 1947 and will mature January 1, 1948. They will bear interest at the rate of 7/8% per annum which will be subject to all Federal income taxes. Interest will be payable with the principal at maturity.

Subscription books were opened on December 18 and closed at the end of business on December 20, except for the receipt of subscriptions from holders of \$25,000 or less of the maturing certificates, for which they were held open through December 23. The certificates were issued in bearer form only in denominations of \$1,000, \$5,000, \$10,000, \$100,000, and \$1,000,000.

Exchanges amounted to \$3,134 million, leaving \$196 million to be paid in cash.

Reports to the Treasury on the ownership of Government securities indicate that on November 30, 1946 about 70% of the maturing issue was owned by banks.

Payment of 3% Conversion Bonds

On January 1, 1947, there was also a maturity of 3% conversion bonds in the amount of \$13 million. These bonds were issued in 1917 and were exempt from all Federal income taxes. The issue was paid off in cash.

Calendar Year 1946 Summary

Financing operations in the calendar year 1946 followed two distinct trends, divided between a small increase in the public debt until February 28, and a steady decline in the debt from March 1 through December 31. The change in trend from an increasing to a declining debt reflected primarily the introduction by the Treasury of a debt pay-off program on March 1, 1946.

On December 31, 1945, when the Victory Loan was closing, the total public debt, including guaranteed obligations, stood at \$278.7 billion ¹/₂. By the end of the calendar year 1946 the debt was reduced by \$19.2 billion to \$259.5 billion.

There follows an analysis of the financing operations in (1) the first two months of the year, January and February 1946, when the debt increased, and (2) the last ten months of the year, March through December 1946, when the debt was reduced.

Period of increasing debt, January-February 1946. During the first two months of the calendar year 1946 the public debt increased from \$278.7 billion to \$279.8 billion. The outstanding debt on February 28, the end of the two-month period, represented the all-time peak. This increase in the debt was made up of final payments on deferred institutional purchases in the Victory Loan, as well as the continuing sale of savings bonds and the sale of special issues to Federal agencies and trust funds.

There was a maturity of 0.90% Treasury notes in January and of 7/8% certificates of indebtedness in February for which exchange offerings of new 7/8% one-year certificate issues were made. The notes were actually a part of the regular series of 7/8% certificates maturing on the last of each month, but were issued for a 13-month period to prevent two issues from maturing on the same date. The exchanges in these two months accounted for 98% of the total maturities of \$8.5 billion, with \$.2 billion paid in cash. There was also a maturity in January 1946 of a 3% conversion bond issue outstanding in the amount of \$16 million which was paid in cash.

Period of reduction in the debt, March-December 1946. On February 28, 1946, when the peak of the debt was reached, the cash balance of the Treasury stood at \$26.0 billion, having been

¹/₂ Throughout this article, guaranteed securities in the hands of the public (amounting to \$339 million on December 31, 1946) are included with the figures on direct public debt.

built up to this total from over-subscriptions to Victory Loan securities. Meanwhile, the budgetary outlook of the Government reached a more favorable status than was expected on V-J Day, as expenditures of the Federal Government declined sharply while receipts were maintained at a level almost as high as that of the war period.

The Treasury Department at this time introduced a program of paying in cash some part of the securities maturing in each month, using the cash balance as the source of funds. From March 1, when the program was started, through December 31, the Treasury paid in cash \$23.2 billion, or more than half, on the maturities totaling \$44.9 billion. Exchange offerings of new issues of one-year 7/8% certificates were made for the remainder.

In all, five small issues (about \$1½ billion or less) and one large issue (\$3.3 billion) were paid off in full. Another large issue (\$3.8 billion) was offered an exchange security in full. The eight remaining maturities (ranging from \$2.5 billion to \$4.9 billion) were divided between limited amounts of exchanges and cash pay-offs.

The determination of the particular treatment in each case was based on such factors as (1) the size of the issue, (2) its ownership distribution between bank and nonbank investors, (3) the condition of the Government securities market, and (4) the probable effect of the handling on the volume of bank reserves. Cash pay-offs resulted in a strain on bank reserves in varying amounts depending on the distribution of pay-offs between Federal Reserve Banks, commercial banks, and nonbank investors. Pay-offs to the Federal Reserve Banks withdrew reserves of commercial banks dollar for dollar (unless offset by market purchases of securities by the Federal Reserve); while pay-offs to nonbank investors increased reserve requirements to the extent the funds were placed in commercial bank deposits. Pay-offs to commercial banks did not affect aggregate bank reserves either way.

The following table presents details on the maturities each month from March 1, 1946 through the end of the calendar year.

From February 28, 1946 to December 31, 1946 the public debt had been reduced by the net amount of \$20.3 billion - to \$259.5 billion at the end of the calendar year from the peak of \$279.8 billion. The difference between this decline in the debt and the total of cash payments of \$23.2 billion was accounted for by other public debt transactions such as the sale of savings bonds and special issues.

Composition of the debt - December 1945 and December 1946. During the calendar year 1946, the composition of the public debt showed significant changes, primarily because of the debt pay-off program but also as a result of other public debt operations. The following table shows the composition of the debt as of December 31, 1945, February 28, 1946, and December 31, 1946

Outstanding certificates and 0.90% notes declined from \$46.5 billion on December 31, 1945 to \$30.0 billion on December 31, 1946, reflecting the fact that most of the maturing issues on which payments were made in cash were certificates of indebtedness. While certificates were declining due to the program of cash payments, some other securities, particularly savings bonds and special issues, were increasing. The growth in savings bonds represented the continuing sale of savings bonds which exceeded redemptions by a good margin. Sales of special issues to Federal agencies and trust funds continued at a rate comparable to that of the war period due to the growth of various insurance funds during the calendar year 1946.

The fact that the securities maturing during 1946 were largely certificates of indebtedness (\$46.5 billion or 87% of \$53.4 billion) has contributed to furthering the Treasury policy of

^{1/} Includes guaranteed securities in the hands of the public.

^{2/} Bank restricted issues may not be acquired by commercial banks (with minor exceptions) prior to specified dates. See footnote 2 on page 21 of this issue.

^{3/} On September 15, 1946, a bank restricted Treasury bond, in the amount of \$3.3 billion, became eligible for bank ownership.

minimizing bank ownership of the debt while emphasizing ownership by nonbank investors. The maturing certificates were to a large extent held by banks, and the cash payments have thus had the direct effect of lowering commercial bank ownership of securities. At the same time, banks have sold additional securities in the market in order to maintain reserve balances.

Ownership of the debt. The distribution of the ownership of the debt indicates further the effect of the debt pay-off program. Ownership estimates for November 30, 1946, the latest date for which complete ownership data are available, show that 96% of the decline in the interest-bearing debt from December 31, 1945, occurred in the holdings of Federal securities by commercial banks and Federal Reserve Banks. The following table presents ownership figures as of December 31, 1945, February 28, 1946, and November 30, 1946. The table on page 48 of the statistical section of this issue presents further historical data.

The table shows that three of the nonbank investor groups, namely, individuals, State and local governments, and other corporations and associations, showed declines in their holdings since December 31, 1945. While the decline for the first two groups was negligible, that for

other corporations and associations is estimated at \$5.3 billion. This decline reflected corporate needs for funds for reconversion purposes and the payment of 1945 taxes.

Three of the nonbank groups, on the other hand, showed increases in their holdings of Federal securities. These groups were insurance companies, mutual savings banks, and Federal agencies and trust funds. The growth in holdings of insurance companies and mutual savings banks was made up of deferred purchases in the Victory

Loan and purchases of securities from other investors in the market.

Federal agencies and trust funds continued to show increases in their holdings, mostly of special issues from the Treasury. These special issues are, for the most part, provided by statute as investments for Federal trust funds. Social insurance and military insurance funds account for more than $\frac{4}{5}$ of the total holdings of securities by Federal agencies and trust funds.

Comparison of Individual Income Tax Effective Rates and Liabilities Revenue Acts of 1913-1945

The following tables present comparisons of Federal individual income tax liability and effective rates of tax for selected levels of net income under the Revenue Acts of 1913 through 1945, and brief historical summaries covering the relevant statutory changes affecting the computations. Tables 1 and 2 compare effective rates of individual income tax and tax liabilities for selected amounts of net income under the Revenue Acts of 1913-1945, for a single

person with no dependents, a married person with no dependents, and a married person with two dependents. Table 3 shows the personal exemptions and credits for dependents under the various revenue acts. Table 4 gives summary information with respect to the normal tax rates, and Table 5 shows the surtax rates and cumulative surtax by net income classes under the Revenue Acts of 1913-1945. Table 6 shows the earned income credit allowed.

Note: Maximum net income assumed.

- 1/ Includes defense tax.
 2/ Tax liabilities for the years 1942 and 1943 are unadjusted for transition to current payment basis.
 3/ Includes net Victory tax. Computed by assuming that deductions are 10% of Victory tax net income; i.e., that Victory tax net income is ten-ninths of selected

net income.

- 4/ Individual Income Tax Act of 1944.
 5/ Taking into account maximum effective rate limitation of 90%.
 6/ Taking into account maximum effective rate limitation of 85.5%.

1/ Subsequent to the Revenue Act of 1913, and prior to the Individual Income Tax Act of 1944, the personal exemption allowed to married persons was also allowed to heads of families.

2/ For net incomes in excess of \$5,000, personal exemption was \$2,000.

3/ Individual Income Tax Act of 1944.

4/ Surtax exemptions. For surtax, each taxpayer was al-

lowed an exemption of \$500, plus \$500 for his spouse, and \$500 for each dependent. The normal-tax exemption was \$500. However, if husband and wife combined their income in a joint return, the normal-tax exemption was \$500 plus the amount of the smaller of the two incomes, but not more than \$1,000 for both.

5/ The Revenue Act of 1945 made the surtax exemptions applicable to the normal tax.

1/ Tax for 1923, computed at these rates, was reduced 25% by credit or refund under Section 1200 (a), Revenue Act of 1924.

2/ Rates for 1929 reduced to 1/2%, 2%, and 4%, respectively, by Joint Resolution of Congress, No. 133, approved by the President December 16, 1929.

3/ For 1940 the sum of the normal tax and surtax was increased by the defense tax of 10% of the amount of the tax limited, however, to 10% of the excess of the net income over the sum of the normal tax and surtax.

4/ For 1943 individuals were also subject to the Victory tax. For Victory tax, every individual taxpayer was allowed an exemption of \$624, regardless of marital status. However, in the case of a husband and wife filing a joint return, if the Victory tax net income of one

spouse was less than \$624, the total exemption was limited to \$624 plus the Victory tax net income of such spouse. The tax was 5% of Victory tax net income, less a credit of 25% of the tax if single, or 40% if married, plus in either case 2% for each dependent. The amount of the credit was limited, however, to \$500 if single, or \$1,000 if married, plus in either case \$100 for each dependent. As a means of effecting an annual limitation of 90% on the combined individual income tax and Victory tax, the gross Victory tax (before deduction of credits against the tax) was limited to the amount by which 90% of net income exceeded the regular income tax liability. Tax for 1946, computed at this rate, was reduced by 5% under the Revenue Act of 1945.

1/ For 1913 through 1917, the surtax was called "additional tax." Prior to 1934, the entire net income was subject to surtax; for 1934 and thereafter, there is allowed as a credit in arriving at net income subject to surtax, the sum of the personal exemption and credit for dependents.

2/ These rates are a combination of the additional tax rates provided by the Revenue Acts of 1916 and 1917.

3/ Tax for 1923, computed at these rates, was reduced 25% by credit or refund under section 1200 (a), Revenue Act of 1924.

4/ For 1940 there is superimposed upon the total tax, the defense tax, which is 10% of the total tax. The de-

fense tax is computed on the total tax before applying any credits, and is limited to an amount not more than 10% of the net income in excess of the total tax computed without regard to the defense tax.

5/ Individual Income Tax Act of 1944.

5/ The combined normal tax and surtax (before deduction of credits for foreign taxes, taxes withheld at source, and taxes withheld on wages) was limited to 90% of net income for the taxable years 1944 and 1945 and to 85.5% for the taxable year 1946.

1/ The total tentative surtax is reduced by 5% to determine the surtax.

Table 6.- Earned Income Credit under the Revenue Acts of 1913-1945

^{1/} "Earned income" means wages, salaries, professional fees, and other amounts received as compensation for personal services actually rendered; and in the case

of a taxpayer engaged in trade or business, a reasonable allowance as compensation, not in excess of 20% of his share of the net profits.

^{1/} Treasury bills are included in interest-bearing debt figures at face amount, but for purposes of calculating the computed annual interest charge and the computed rate of interest, the discount value is used. For the purposes of computing the annual interest charge and rate of

interest on United States savings bonds, Series A-E are considered to yield 2.90% per annum and Series F is considered to yield 2.53%. ^{2/} Guaranteed securities held by the Treasury, and securities guaranteed as to interest only, are not included in this table.

Statutory Limitation on the Public Debt

Section 21 of the Second Liberty Bond Act, as amended, provides that the face amount of obligations issued under authority of that Act, and the face amount of obligations guaranteed as to principal and interest by the United States (except guaranteed obligations held by the Secretary of the Treasury), shall not ex-

ceed in the aggregate \$275 billion outstanding at any one time. Obligations issued on a discount basis, and subject to redemption prior to maturity at the option of the owner, are included in the statutory debt limitation at current redemption values.

^{1/} Excludes (1) postal savings bonds and (2) Federal Housing Administration debentures (the only interest-bearing public marketable guaranteed securities outstanding).^{2/} It should be noted that callable issues appear twice in this column, once in the year of first call and again in the year of final maturity. Callable issues with respect to which a definite notice of call has been made, however, are listed as fixed maturities.^{3/} Federal securities fall into three broad groups with respect to imposition of Federal income taxes on income derived therefrom.

"Wholly" tax-exempt securities are exempt from both the normal and surtax rates. "Partially" tax-exempt securities are exempt from the normal rates except that in the case of partially tax-exempt Treasury and savings bonds, interest derived from \$5,000 of principal amount owned by any one holder is also exempt from the surtax rates.

^{4/} "Taxable" securities are subject to both normal and surtax rates. Bank restricted issues may not be acquired by commercial banks (with minor exceptions) prior to a specified date. See footnote 2. page 21.

p Preliminary.

1/ Original call and maturity dates are used.

2/ Bank restricted issue.

3/ Prior to the refunding operation of March 1, 1946, maturing

issues were either paid off in full or the holders were given the privilege to exchange into another security in full. Beginning with that operation, some maturities have been split by the Treasury into a stated portion for cash retirement with the remainder covered by an offering of an exchange security.

Sales and Redemptions of United States Savings Bonds

United States savings bonds were first offered for sale in March 1935. Bonds of series A-D were sold between March 1935 and April 1941. Series E, F, and G bonds have been on sale since May 1, 1941.

Series A-E bonds are 10-year discount bonds sold at 75% of maturity value, and yield 2.90% per annum if held to maturity. Series F bonds are 12-year discount bonds sold at 74% of maturity value, and yield 2.53% per annum if held to maturity. Series G bonds are 12-year current income bonds, sold at par, bearing interest at 2-1/2% per annum, and redeemable at par at maturity or at stated prices less than par before maturity.

Purchases of series A-D bonds were limited to \$7,500 issue price in any one calendar year. These bonds were available to all subscribers prior to April 1, 1940, and to individuals only after that date. Purchases of series E bonds are limited to \$3,750 issue price in any one calendar year, and may be made only by individuals (defined as natural persons only). The limit for series F and G combined is \$100,000 issue price in any one calendar year (\$50,000 in calendar year 1941). Series F and G bonds are available to all

subscribers except commercial banks. Commercial banks, however, were permitted to purchase these bonds during certain periods and with certain restrictions. For details concerning these periods and restrictions see "Treasury Bulletin" for December 1944, page 36, footnote 9, and "Treasury Bulletin" for February 1946, page 37, footnote 9, and page A-22. For details concerning features, investment yields, and redemption values see "Treasury Bulletin" for October 1945, pages A-4 and A-5.

Series A bonds matured in 1945, and series B bonds in 1946. Series C bonds began to mature in January 1947. Matured bonds turned in for redemption are included in the figures on redemptions. Matured bonds outstanding are reflected in the interest-bearing debt until all bonds of the series have matured, when they are transferred to matured debt upon which interest has ceased, in accordance with the practice of the Daily Treasury Statement.

In the following tables sales figures are quoted at issue price, and redemptions and amounts outstanding at current redemption values. Amounts of series G outstanding are quoted at par.

current redemption values, whereas the sales figures are shown at issue price. Data on redemptions by States are not available prior to October 1944.

p Preliminary.

Note. It should be noted that State figures presented in this table are not necessarily comparable with sales data by States inasmuch as bonds which have been purchased in one State may have been redeemed in another. Moreover, the figures shown in this table are based on

Sales and Redemptions of Treasury Savings Notes

Treasury savings notes were issued in three series, series A from August 1, 1941 through June 22, 1943, series B from August 1, 1941 through September 12, 1942, and series C which have been on continuous sale since September 14, 1942. All of series A and B and some of series C notes have matured.

Series C notes are sold at par, and accrue in value each month, yielding 1.07% per annum if held to maturity (3 years from date of issue). These notes may be used in payment of taxes any time after 2 months after issue, or may be redeemed for cash any time after 6 months after issue. For details concerning features, investment yields, and tax payment or redemption values, see "Treasury Bulletin" for October 1945, pages A-4 and A-5. For details concerning the features of series A

and B notes, see "Annual Report of the Secretary of the Treasury" for 1942, pages 207 and 220.

In the following tables sales and redemptions of Treasury savings notes are shown at par value. Matured notes turned in for redemption (either for cash or for tax payment) are included in the figures on redemptions. Matured notes outstanding are reflected in the interest-bearing debt until all notes of the series have matured, when they are transferred to matured debt upon which interest has ceased, in accordance with the practice of the Daily Treasury Statement. For sales and redemptions of series A and B notes by fiscal years and months, see "Treasury Bulletin" for February 1946, pages 42 and 43.

Note: Treasury bond yields are computed on the basis of the mean of closing bid and ask quotations in the over-the-counter market, beginning September 2, 1941; previously, closing prices on the New York Stock Exchange were used on days when sales took place on the Exchange in a particular issue and the mean of closing bid and ask quotations on the New York Stock Exchange on days when no sales took place. Corporate bond yields are computed on the basis of closing prices on the New York Stock Exchange and the New York Curb Exchange; on days when an issue does not sell, the price of the last preceding sale is used. Monthly and weekly data for the period January 1933 through March 1944 appeared in the "Treasury Bulletin" for April 1944, pages 57-61.

1/ Average of Treasury bonds neither due nor callable for fifteen years. For discussion of composition of average see "Treasury Bulletin" for March 1944, page 58. The partially tax-exempt series was discontinued on December 15, 1945 because there were no longer any bonds of this classification due or callable in 15 or more years. Partially tax-exempt bonds are those the interest on which is exempt from the normal rates of the Federal income tax, except that in the

case of partially tax-exempt Treasury and United States savings bonds, interest derived from \$5,000 of principal amount owned by any one holder is also exempt from the surtax rates of the Federal income tax. Taxable bonds are those the interest on which is subject to both the normal and surtax rates of the Federal income tax.

2/ For discussion of present composition of high-grade corporate bond average, see "Treasury Bulletin" for January 1945, page 56; for discussion of its previous composition, as well as the considerations underlying its construction, see "Treasury Bulletin" for April 1943, page 61.

3/ Monthly averages of daily figures. Prior to April 1, 1938, corporate bonds are averages of Saturday figures.

4/ The composition of the high-grade corporate bond average was revised commencing with November 1, 1944. The old average for November 1944 was 2.56%. See footnote 2.

5/ On days when the exchanges are closed, the date and prices of the previous day are used.

CAPITAL MOVEMENTS BETWEEN THE UNITED STATES
AND FOREIGN COUNTRIES AND NET POSITION
IN FOREIGN CURRENCIES

Capital Movements Between the United States and Foreign Countries

This chapter on Capital Movements between the United States and Foreign Countries and Position in Foreign Currencies is divided into four main groups. Section I of Capital Movements, the Historical Summary, contains data regarding capital movements, by the principal types of data and by years, starting with 1935. The last thirteen months are also shown. Each type of data is then broken down into its chief components in the same chronological detail.

Section II supplies a geographic breakdown by principal countries for the last thirteen months. The total capital movements are given first and then the principal categories are shown separately. In addition, at this point, the total outstanding claims on and liabilities to foreign countries are each presented.

Details with respect to capital movements and short-term claims and liabilities are presented in Section III as of the latest month for which the data are

available.

The last group contains information regarding the net position in foreign currencies of United States banks and brokers, their outstanding foreign exchange contracts and purchases and sales of foreign exchange, both spot and forward. This section covers a twelve-month period.

Figures for previous periods may be obtained from the following sources:

Supplement to the "Treasury Bulletin" on "Capital Movements between the United States and Foreign Countries, January 1942 through April 1945", for details during that period.

"Treasury Bulletin", November 1945, for capital movements, and position in foreign currencies by months, 1942-1945.

"Treasury Bulletins", March 1942 and earlier, for details covering years back to January 2, 1935.
