Treasury Financing Operations

January Certificate Maturity

A one-year issue of 7/8 percent certificates of indebtedness outstanding in the amount of \$3,134 million matured on January 1, 1948. On December 19, 1947, the Secretary of the Treasury announced the offering of a new 12-month 1-1/8 percent certificate of indebtedness in exchange, par for par, for the maturing certificates. Cash subscriptions were not received. The new certificates are dated January 1, 1948, and bear interest from that date at the rate of 1-1/8 percent per annum. Interest will be paid in full with the principal on the maturity date, January 1, 1949. The certificates were issued in bearer form only, in denominations of \$1,000, \$5,000, \$10,000, \$100,000, and \$1,000,000.

Reports to the Treasury on the ownership of Government securities indicate that on November 30, 1947, about 66 percent of the \$3,134 million of certificates maturing January 1, 1948, were owned by commercial banks and Federal Reserve Banks. The ownership figures for November 30 are the latest which are available for holdings of both commercial banks and Federal Reserve Banks.

Subscription books were opened on December 19 and were closed at the close of business on December 23. Four hundred million dollars of the Federal Reserve Bank holdings of the maturing certificates of indebtedness were redeemed for cash. Exchange subscriptions for the new issue amounted to \$2,592 million, leaving \$142 million to be paid in cash to holders other than Federal Reserve Banks.

Treasury Bills Retired and Refunded in December

Additional reductions in Treasury bills outstanding were made in the first two weeks of December. The four issues maturing weekly during the month totaled \$5.0 billion and the total refunded was \$4.8 billion. Each of the first two maturing issues was reduced by \$100 million. The

first three maturities were for \$1.3 billion each, and the fourth for \$1.1 billion. Bill retirements from April 17, 1947, when the first bill reduction was made, through December 26 have totaled \$1.9 billion. The average rates of discount for the four December offerings, beginning with that dated December 4, were 0.944 percent, 0.948 percent, 0.949 percent, and 0.951 percent, respectively.

Reinvestment of Proceeds of Maturing Savings Bonds

Announcement was made by the Treasury Department on December 31, 1947, that in furtherance of the campaign to increase the sale of savings bonds, individual holders of Series C-1938 savings bonds, which started to mature January 1, 1948, would be permitted to reinvest the proceeds, as they mature, in Series E savings bonds currently on sale, without regard to the \$5,000 (maturity value) annual limitation on E bond holdings. Since Series E bonds may be purchased only in the names of individuals, only those Series C-1938 savings bonds held by individuals are eligible for this privilege.

Any issuing agent qualified to cash savings bonds can accomplish this exchange by redeeming matured bonds and applying the proceeds to the purchase of new Series E bonds. Holders are permitted to reinvest any part of the proceeds of their maturing bonds to the extent of such denominational amount as the proceeds fully cover. The bonds may be exchanged also, of course, at any Federal Reserve Bank or branch, or at the Treasury Department.

The new bonds will be dated as of the first day of the month in which the matured Series C-1938 savings bonds are presented for payment. In order to preserve the continuity of the investment, holders of the maturing bonds should present them for exchange during the month in which they mature.

Note: Historical details of Treasury market financing operations are shown in the tables on "Offerings" and "Disposition", respectively, of marketable issues of

bonds, notes, and certificates of indebtedness, and the tables on "Offerings and Maturities of Treasury Bills", in this issue of the "Treasury Bulletin".

• Less than \$500,000.

^{1/} Figures have been revised, beginning with the fiscal year 1940, in accordance with present classification of these items. Reimbursements for those administrative expenses which are not paid directly from the Federal Old-Age and Survivors Insurance Trust Fund (cost of collecting employment taxes, etc.) are now classified as trust fund expenditures rather than the former treatment as a deduction from trust fund receipts. Total budget receipts are increased by this revision since the reimbursements for administrative expenditures are reflected in miscellaneous receipts. Set budget receipts

are unaffected, however, since the appropriation to Federal Old-Age and Survivors Insurance Trust Fund is now stated on a gross basis rather than net after reimbursement.

^{2/} Includes Government retirement funds, etc. (See footnote 3.)

^{3/} Comprises Public Works Administration revolving fund, special deposits (net), and, during the fiscal years 1940 through 1945, transactions in commodity feed stamps by the Department of Agriculture. Commencing July 1, 1945, such transactions are classified as "Other trust accounts."

^{4/} Set receipts in this column constitute net sales, and net expenditures constitute net redemptions of obligations.

- ^{1/} Accrued discount on savings bonds and bills less interest paid on savings bonds and bills redeemed.
^{2/} Interest payments to wholly owned Government corporations are not deducted because they are treated as negative expenditures when received by corporations; hence payment and receipt offset each other in the expenditure series.

- ^{3/} For detail, see Table 5 under "Budget Receipts and Expenditures".
^{4/} Budget expenditures involving the issuance of U. S. securities are treated as noncash at the time of original payment and as cash expenditures at the time of redemption. The figures shown are net issuances, or net redemptions (-).

• Less than \$500,000.

1/ Issuances of U. S. securities resulting from budget expenditures are treated as noncash at the time of issuance and as cash budget expenditures at the time of redemption. The figures shown are net issuances, or net redemptions (-).

2/ Expenditures for U. S. subscriptions to the capital of the International Monetary Fund and the International Bank for Reconstruction and Development require special explanation. United States payments to the Fund in fiscal year 1947, for example, consisted of \$1,800 million paid from the Exchange Stabilization Fund (Table 1) and \$950 million paid as budget expenditures. Of this total, \$1,724 million (net) was invested in noninterest-bearing U. S. notes thereby making this amount noncash expenditures during the fiscal year. Of the \$1,026 million cash portion of the expenditures, \$958 million came from the initial Exchange Stabilization Fund payment

and the remaining \$58 million represented redemption later in the fiscal year of notes assumed to have been acquired through the Exchange Stabilization Fund payment. Accordingly, the non-cash payments to the Fund are made up of \$774 million from the Exchange Stabilization Fund payment and \$950 million from the budget payment. In the case of the International Bank, a total of \$476 million was paid during fiscal 1947 - all in the form of budget expenditures. On net balance, \$416 million occurred as a noncash expenditure because of the issuance of noninterest-bearing U. S. notes. Table 5 thus shows a total of \$2,140 million (net) of such notes issued to the two institutions in the fiscal year 1947. Budget estimates show that \$916 million of these notes will be redeemed in the fiscal year 1948, thereby increasing cash expenditures.

3/ Accrued discount on savings bonds and bills less interest paid on savings bonds and bills redeemed.

4/ Includes borrowing through Postal Savings System.

of Government Securities"; for tax status, see chapter on "Ownership of Government Securities".

^{3/} Bank restricted issues may not be acquired by commercial banks (with minor exceptions) prior to a specified date. See footnote to tables on "Public Debt and Guaranteed Obligations of the United States Government Outstanding".

1/ Original call and maturity dates are used.

2/ Prior to the refunding operation of March 1, 1946, maturing issues were either paid off in full or the holders were given the privilege

of exchange into another security in full. Beginning with that operation, some maturities have been split by the Treasury into a stated portion for cash retirement with the remainder covered by an offering of an exchange security.

Sales and Redemptions of United States Savings Bonds

United States savings bonds were first offered for sale in March 1935. Series A-D were sold from March 1935 to April 1941. Series E, F, and G bonds have been on sale since May 1, 1941. For information on the terms and conditions of these bonds, see "Treasury Bulletin" issues for December 1947, page 31, and October 1935, pages A-4 and A-5. Sales and redemptions data by States are published at the end of each calendar and each fiscal year after June 30, 1947. Sales by denominations are also published semi-annually after December 31, 1947.

In the following tables sales figures are quoted at issue price, and redemptions and amounts outstanding at current redemption values. Amounts of Series G outstanding are quoted at par. Matured bonds which have been redeemed are included in the figures on redemptions. Matured bonds outstanding are reflected in the interest-bearing debt until all bonds of the series have matured, when they are transferred to matured debt upon which interest has ceased.

1/ Beginning with June 1947, Series E sales include small amounts of unclassified sales consisting of Series E, F, and G. These amounts are substantially less than the sales reported as unclassified in the Daily Treasury Statement. The greater part of that item consists of sales for which information is available as to the series but not the year of issue. On the basis of that information such sales are included in this table according to series. Prior to

June 1947, it was possible to distribute by series all sales reported as unclassified in the Daily Treasury Statement.

2/ Series E redemptions include small amounts of unclassified Series A-D redemptions beginning with October 1944, and small amounts also of unclassified F and G redemptions, beginning with June 1947.

3/ Not calculated for matured series.

Note: It should be noted that State figures presented in this table are not necessarily comparable with sales data by States inasmuch as bonds which have been purchased in one State may have been redeemed in another. Moreover, the figures shown in this table are based on

current redemption values, whereas the sales figures are shown at issue price. Data on redemptions by States are not available prior to October 1944.

1/ Beginning with June 1947 includes small amounts of unclassified redemptions of Series F and G bonds.

Sales and Redemptions of Treasury Savings Notes

Treasury savings notes have been issued in three series: series A from August 1, 1941, through June 22, 1943; series B from August 1, 1941 through September 12, 1942; and series C on continuous sale since September 14, 1942. For details concerning terms and conditions, investment yields, and tax payment or redemption values of series C notes, see "Treasury Bulletin" for October 1945, pages A-4 and A-5. For similar information regarding series A and B notes, see "Annual Report of the Secretary of the Treasury" for 1942, pages 207 and 220. For sales and redemptions of series A and B notes by fiscal years

and months, see "Treasury Bulletin" for February 1946, pages 42 and 43.

In the following tables sales and redemptions of Treasury savings notes are shown at par value. Matured notes redeemed (either for cash or for tax payment) are included in the figures on redemptions. Matured notes outstanding are reflected in the interest-bearing debt until all notes of the series have matured, when they are transferred to matured debt upon which interest has ceased, in accordance with the practice of the Daily Treasury Statement.

• Less than \$500,000.

^{1/} Excludes obligations held by the Treasury.

^{2/} Holdings by Federal land banks are included under "Private investors" instead of "U. S. Government agencies and trust funds" beginning with June 30, 1947, since the proprietary interest of the United States in these banks was ended June 26, 1947, with

the repayment of the last of its investment. On May 31, 1947, the Federal land banks held \$134 million of securities issued or guaranteed by the United States.

^{3/} The total amount of securities held by private investors is calculated by deducting from the total amount of securities outstanding, the securities held by U. S. Government agencies and trust funds and by Federal Reserve Banks.

^{4/} Includes United States savings bonds, Series A-F at maturity value.
^{5/} Consists of Commodity Credit Corporation demand obligations stated as of the close of the previous month, in accordance with the Daily Treasury Statement.

**Treasury Survey of Ownership of Securities Issued by the United States
and by Federal Agencies, November 30, 1947**

The Treasury Survey of Ownership covers securities issued by the United States Government and by Federal agencies. The banks and insurance companies included in the Survey account for approximately 95 percent of such securities held by all banks and insurance companies in the United States.

Information on the distribution of ownership by types of banks and insurance companies is published each month. Additional information showing the holdings of commercial banks distributed according to Federal Reserve member-bank classes and nonmember banks has been published at less frequent intervals. Currently,

this information is published for June 30 and December 31.

The Survey began with data for March 31, 1941, which appeared in the "Treasury Bulletin" for May of that year. Revisions of data on insurance companies for May 31, 1943, and prior months appeared in the November 1943 issue; reclassification of data on banks for the period November 30, 1943, through February 29, 1944, appeared in the May 1944 issue; and revisions of data for September 30, 1944, appeared in the February 1945 issue.

• Less than \$500,000.

1/ Excludes trust departments.

2/ Includes trust companies.

3/ Includes those banks and insurance companies not reporting in the Treasury Survey.

4/ U.S.C. demand obligations in the amount of \$51 million, all held by commercial banks, are shown only in the total amount outstanding; data for reporting banks are not available.

5/ Excludes guaranteed securities held by the Treasury.

6/ Issues which commercial banks may not acquire prior to a specified date (with minor exceptions); see footnotes to tables on "Public Debt and Guaranteed Obligations Outstanding".

7/ Federal securities fall into three broad classes with respect to the imposition of Federal income taxes on income derived from them. "Wholly" tax-exempt securities are those with the income exempt from both normal tax and surtax. "Partially" tax-exempt securities are those with the income exempt from the normal tax except that in

the case of partially tax-exempt Treasury and savings bonds, interest derived from \$5,000 of principal amount owned by any one holder is also exempt from the surtax. "Taxable" securities are those with the income subject to both normal tax and surtax. Includes F. M. A. debentures; see footnote 9.

8/ A small indeterminate amount of these debentures is partially tax-exempt.

9/ United States savings bonds, Series C, D, E, and F, are shown at current redemption values. They were reported at maturity value by the banks and insurance companies included in the Treasury Survey but have been adjusted to current redemption values for use in this statement.

10/ Savings bonds sold prior to March 1, 1941, are partially tax-exempt; those sold on and after that date are taxable.

11/ The proprietary interest of the United States in these banks ended on June 26, 1947, with the repayment of the last of its investment.

Note: Treasury bond yields are computed on the basis of the mean of closing bid and ask quotations in the over-the-counter market, beginning September 2, 1941; previously, closing prices on the New York Stock Exchange were used on days when sales took place on the Exchange in a particular issue and the mean of closing bid and ask quotations on the New York Stock Exchange on days when no sales took place. Corporate bond yields are computed on the basis of closing prices on the New York Stock Exchange and the New York Curb Exchange; on days when an issue does not sell, the price of the last preceding sale is used. Monthly and weekly (old series) data for the period January 1933 through March 1944 appeared in the "Treasury Bulletin" for April 1944, pages 57-61.

1/ Average of Treasury bonds neither due nor callable for fifteen years. For discussion of composition of average see "Treasury Bulletin" for March 1944, page 58. The partially tax-exempt series was discontinued on December 15, 1945 because there were no longer any bonds of this classification due or callable in 15 or more years. Partially tax-exempt bonds are those the interest on which is exempt from the normal

rates of the Federal income tax, except that in the case of partially tax-exempt Treasury and United States savings bonds, interest derived from \$5,000 of principal amount owned by any one holder is also exempt from the surtax rates of the Federal income tax. Taxable bonds are those the interest on which is subject to both the normal and surtax rates of the Federal income tax.

2/ For discussion of present composition of high-grade corporate bond average, see "Treasury Bulletin" for July 1947, page 59; for discussion of its previous composition, see "Treasury Bulletin" for January 1945, page 56.

3/ Average revised beginning July 1, 1941. Old average for July 1941 was also 2.66%.

4/ Average revised beginning November 1, 1944. Old average for November 1944 was 2.56%.

5/ Average revised beginning April 1, 1947. Old average for April 1947 was 2.47%. See footnote 2.

CAPITAL MOVEMENTS BETWEEN THE UNITED STATES
AND FOREIGN COUNTRIES AND NET POSITION
IN FOREIGN CURRENCIES

Capital Movements Between the United States and Foreign Countries, and Net Position in Foreign Currencies

This chapter on Capital Movements between the United States and Foreign Countries and Position in Foreign Currencies is divided into four main groups. Section I of Capital Movements, the Historical Summary, contains data regarding capital movements by the principal types of data, and by years from 1935, and currently by months. Each type of data is then broken down into its chief components in the same chronological detail.

Section II supplies a geographic breakdown by principal countries on a monthly basis. The total capital movements are given first and then the principal categories are shown separately. In addition, at this point, the total outstanding claims on and liabilities to foreign countries are each presented.

Details with respect to capital movements and short-term claims and liabilities are presented in Section III as of the latest month for which the data are available.

The last group contains monthly data regarding the

net position in foreign currencies of United States banks and brokers, their outstanding foreign exchange contracts, and purchases and sales of foreign exchange, both spot and forward.

These data are based on reports filed each month by banks, bankers, and brokers throughout the United States. The reports are collected, checked, and tabulated by the twelve Federal Reserve Banks. The totals are then forwarded to the Treasury Department for consolidation and publication.

Figures for previous periods may be obtained from the following sources:

Supplement to the "Treasury Bulletin" on "Capital Movements between the United States and Foreign Countries, January 1942 through April 1945", for details during that period.

"Treasury Bulletin", November 1945, for capital movements, and position in foreign currencies by months, 1942-1945.

"Treasury Bulletins", March 1942 and earlier, for details covering years back to January 2, 1935.
