Treasury Financing Operations

Treasury Bill Retirements Resumed in July

After an interval of two months during which all maturing Treasury bills were refunded in full, weekly retirements of bills again were made in July. The five issues maturing during the month totaled \$5.4 billion and the amount refunded was \$4.9 billion. Each offering, beginning with that dated July 1, was \$100 million less than the amount of the maturing issue. The average rate of discount for all offerings was 0.997 percent.

Note: Historical details of Treasury market financing operations are shown in the tables on "Offerings" and "Disposition", respectively, of marketable issues of bonds, notes, and certificates of indebtedness, and the table "Offerings of Treasury Bills", in this issue of the Treasury Bulletin.

- 1/ Beginning with July 1948, figures on both budget receipts and expenditures exclude inter-agency transactions involving repayment of capital stock and earnings by wholly owned corporations to the Treasury; such transactions included in prior years amounted to \$209 million in 1947 and \$260 million in 1948.
- 2/ Gross receipts less amounts appropriated to Federal Old-Age and Survivors Insurance Trust Fund.
- 3/ Figures for fiscal year 1948 include \$3,000 million transfer to Foreign Economic Cooperation Trust Fund; figures for fiscal year 1949 exclude expenditures from this Fund. Figures exclude amounts for public debt retirement which are chargeable to the sinking fund, etc., under special provisions of law, and include other transfers to trust accounts, and net expenditures of Government corporations wholly owned, etc., except as indicated in footnote 1.

4/ Established in accordance with the Economic Cooperation Act of 1948; positive figures indicate receipts and negative figures indicate expenditures.

5/ Comprises all trust accounts other than Foreign Economic Cooperation Trust Fund; sales and redemptions of securities of Government corporations, etc., in the market (net); increment on gold; seigniorage on silver; and miscellaneous funds and accounts. Figures exclude retirement of national bank notes chargeable against increment on gold (fiscal years 1937-39).

6/ Clearing account for outstanding checks and telegraphic reports from Federal Reserve Banks; excess of receipts, or expenditures (-).

7/ For data on guaranteed securities and total Federal securities outstanding, see Table 1 under "Debt Outstanding" in the current issue of the "Treasury Bulletin"; for earlier data, see issue of July 1948, page 1.

1/ Includee transfer of \$3,000 million in June 1948 from General Fund to Foreign Economic Cooperation Trust Fund established in accordance with the Economic Cooperation Act of 1948. Expenditures from this transferred amount are shown in Table 4 as cash expenditures of trust accounts in fiscal year 1949.

2/ Accrued discount on savings bonds and bills less interest paid on savings bonds and bills redeemed.

3/ Interest payments to wholly owned Government corporations are not deducted because they are treated as negative expenditures when received by corporations.

tions; hence payment and receipt offset each other in the expenditure series.

4/ Budget expenditures involving the issuance of Federal securities are treated as noncash at the time of original payment and as cash expenditures at the time of redemption. The figures shown are net issuances, or net redemptions (-).

2/ Total includes notes issued by the Virgin Islands Company in the amount of \$250,000 beginning September 1947, and \$350,000 in July 1948.

3/ Notes issued by the Reconstruction Finance Corporation and outstanding in the amount of \$9,314 million were canceled on June 30, 1948, pursuant to the Government Corporation Appropriation Act, 1949.

STATUTORY DEBT LIMITATION

1/ Original call and maturity dates are used.

2/ Prior to the refunding operations of March 1, 1946, maturing issues were either paid off in full or the holders were given the privilege of exchange into another security in full. Beginning with that operation, some maturities have been split by the Treasury into a stated portion for cash retirement with the remainder covered by an offering of an exchange security.

3/ Beginning with the November 1947 operation, arrangements were made between the Treasury and the Federal Reserve System whereby all or a part of the System's holdings of certain maturing and called securities would be presented for cash redemption.

4/ Refunding operation was announced August 9, 1948. Details will be released later.

UNITED STATES SAVINGS BONDS

United States savings bonds were first offered for sale in March 1935. Series A-D were sold from March 1935 to April 1941. Series E, F, and G bonds have been on sale since May 1, 1941. For information on the terms and conditions of these bonds, see "Treasury Bulletin" issues for December 1947, page 31, and October 1935, pages A-4 and A-5. Sales and redemptions data by States are published at the end of each calendar and each fiscal year after June 30, 1947. Sales by denominations are also published semiannually after December 31, 1947.

In the following tables sales figures are quoted at issue price, and redemptions and amounts outstanding at current redemption values. Amounts of Series G outstanding are quoted at par. Matured bonds which have been redeemed are included in the figures on redemptions. Matured bonds outstanding are reflected in the interest-bearing debt until all bonds of the series have matured, when they are transferred to matured debt upon which interest has ceased.

1/ Beginning with June 1947, Series E sales include small amounts of unclassified sales consisting of Series E, F, and G. These amounts are substantially less than the sales reported as unclassified in the Daily Treasury Statement. The greater part of that item consists of sales for which information is available as to the series but not the year of issue. On the basis of that information such sales are included in this table according to series. Prior to June 1947, it was possible to distribute by series all sales re-

ported as unclassified in the Daily Treasury Statement.

2/ Series E redemptions include small amounts of unclassified Series A-D redemptions beginning with October 1944, and small amounts also of unclassified F and G redemptions, beginning with June 1947.

3/ Not calculated for matured series.

n.a. Not available.

TREASURY SAVINGS NOTES

Treasury savings notes have been issued in three series: Series A from August 1, 1941, through June 22, 1943; Series B from August 1, 1941, through September 12, 1942; and Series C on continuous sale since September 14, 1942. For details concerning terms and conditions, investment yields, and tax payment or redemption values of Series C notes, see "Treasury Bulletin" for October 1945, pages A-4 and A-5. For similar information regarding Series A and B notes, see "Annual Report of the Secretary of the Treasury" for 1942, pages 207 and 220. For sales and redemptions of Series A and B notes by fiscal years

and months, see "Treasury Bulletin" for February 1946, pages 42 and 43.

In the following tables sales and redemptions of Treasury savings notes are shown at par value. Matured notes redeemed (either for cash or for tax payment) are included in the figures on redemptions. Matured notes outstanding are reflected in the interest-bearing debt until all notes of the series have matured, when they are transferred to matured debt upon which interest has ceased, in accordance with the practice of the Daily Treasury Statement.

^{1/} United States savings bonds, Series A-D, E, and F, are included at current redemption values.^{2/} Includes all securities issued or guaranteed by the U. S. Government, but excludes guaranteed securities held by the Treasury. In the April 1948 issue of the "Treasury Bulletin" figures in this table were revised to include matured debt and debt bearing no interest, as well as interest-bearing debt. For all practical purposes the addition of these items to the former series affects only the holdings by "Individuals" and by "Other corporations and associations", since other investors hold negligible amounts.^{3/} Consists of commercial banks, trust companies, and stock savings banks in the United States and in Territories and insular possessions. Figures exclude securities held in trust departments.^{4/} Includes partnerships and personal trust accounts.^{5/} Includes savings and loan associations, dealers and brokers, and investments of foreign balances and international accounts in this country. Beginning with December 1946, figures include investments by the International Bank for Reconstruction and Development and International Monetary Fund in special noninterest-bearing notes issued by the U. S. Government.^{6/} Holdings by Federal land banks are included under "Private Investors" instead of "U. S. Government agencies and trust funds" beginning with June 30, 1947, since the proprietary interest of the United States in these banks ended June 26, 1947.^{7/} Comprises trust, sinking, and investment funds of State and local governments and their agencies, and Territories and insular possessions.

TREASURY SURVEY - ANALYSIS OF BANK OWNERSHIP, JUNE 30, 1948

The tables which follow provide an analysis of the security holdings of commercial banks reporting in the Treasury survey of ownership of the securities issued by the United States Government and by Federal agencies. They show the total holdings distributed according to Federal Reserve member-bank classes and nonmember banks.

This analysis of bank ownership was first published in the March 1944 issue of the "Treasury Bulletin", based on the survey data for December 31, 1943. It has appeared at semiannual or quarterly intervals since that time, and is now being published for the June 30 and December 31 survey data.

1/ Includes trust companies but excludes securities held in trust departments.

2/ United States savings bonds, Series C-1938, D, and F, are shown at current redemption value. They were reported at maturity value by the banks included in the Treasury Survey but have been adjusted to current redemption value for use in this statement.

3/ Excludes C.C.C. demand obligations in the amount of \$42 million, all held by commercial banks; data for reporting banks are not available.

4/ Issues which commercial banks may not acquire prior to a specified date (with minor exceptions); see footnotes to Table 2 under "Debt Outstanding".

5/ Federal securities fall into three broad classes with respect to the imposition of Federal income taxes on income derived from them. "Wholly" tax-exempt securities are those with the income exempt

from both normal tax and surtax. "Partially" tax-exempt securities are those with the income exempt from the normal tax except that in the case of partially tax-exempt Treasury and savings bonds, interest derived from \$5,000 of principal amount owned by any one holder is also exempt from the surtax. "Taxable" securities are those with the income subject to both normal tax and surtax.

6/ Includes F.H.A. debentures; see footnote 7.

7/ A small indeterminate amount of these debentures is partially tax-exempt.

8/ United States savings bonds sold prior to March 1, 1941, are partially tax-exempt; those sold on and after that date are taxable.

9/ The proprietary interest of the United States in these banks ended on June 26, 1947.

* Less than \$500,000.

1/ Prices represent the mean of closing bid and ask quotations in the over-the-counter market, except that prices of Treasury bonds for the period prior to October 1, 1939, represent closing prices on the New York Stock Exchange. "When issued" prices are included in history beginning October 1, 1939. Dates of highs and lows, in case of recurrence, are the latest dates.

2/ Included in the average yield of long-term taxable Treasury bonds as shown under "Yields of Treasury and Corporate Bonds".

3/ Issues which commercial banks may not acquire prior to a specified date (with minor exceptions).

4/ All partially tax-exempt except Panama Canal bonds, which are wholly tax-exempt.

5/ These securities are not shown until date of issue.

6/ Not quoted on July 30, 1948.

7/ Excludes issues completely held by Farm Credit Administration agencies. The proprietary interest of the United States in the Federal land banks ceased on June 26, 1947.

8/ Yield to maturity. Market convention treats the yield to earliest call date as more significant when an issue is selling above par; the yield to maturity as more significant when an issue is selling at or below par.

YIELDS OF TREASURY SECURITIES JULY 30, 1948

Based on Mean of Closing Bid and Ask Quotations

Explanation: The points represent yields to call when prices are above par, and to maturity date when prices are at par or below. The smooth curves for the various classes of points are fitted by eye. Issues for which an exchange offer has been made or which are due or callable in less than 3 months are excluded.

Note: Treasury bonds included in the averages, beginning with December 1935, are those neither due nor callable for fifteen years. Prior to that time, for years shown in this table, the bonds included were neither due nor callable for twelve years. For a discussion of the composition of these averages, see the "Treasury Bulletin" for March 1944, page 58; for the composition of the high-grade corporate bond average, see the "Treasury Bulletin" for July 1947, page 59, and January 1945, page 56. Treasury bond yields are computed on the basis of the mean of closing bid and ask quotations in the over-the-counter market, beginning September 2, 1941. Prior to that time, yields were computed on the basis of closing prices on the New York Stock Exchange, except that on days when an issue did not sell the yield was computed on the mean of closing bid and ask quotations on the Exchange. Corporate bond yields are computed on the basis of closing prices on the New York Stock

Exchange and the New York Curb Exchange; on days when an issue does not sell, the price of the last preceding sale is used.

- 1/ For definition of taxable and partially tax-exempt bonds, see footnotes to the "Treasury Survey of Ownership" in this issue of the "Treasury Bulletin". The partially tax-exempt series was discontinued on December 15, 1945, because there were no longer any bonds in this category with fifteen or more years to maturity or first call.
- 2/ Average revised beginning November 1, 1944. Old average for November 1944 was 2.56%.
- 3/ Average revised beginning April 1, 1947. Old average for April 1947 was 2.47%.
- 4/ Market closed.

CAPITAL MOVEMENTS

Information relating to capital movements between the United States and foreign countries is presented in four sections. Section I contains the principal types of data on capital movements by years from 1935, and currently by months. Each type of data is then broken down into its chief components in the same chronological detail.

Section II supplies a geographic breakdown by principal countries for recent months. The total net capital movement is given first and then the principal categories are shown separately. In addition, at this point, the total outstanding claims on and liabilities to foreign countries are each presented.

Section III presents details with respect to capital movements and short-term claims and liabilities as

of the latest month for which the data are available.

Section IV contains data for recent months on outstanding contracts of banks for forward purchases and sales of foreign exchange.

The data in these four sections are based on reports filed each month by banks, bankers, and brokers throughout the United States. The reports are collected, checked, and tabulated by the twelve Federal Reserve Banks. The totals are then forwarded to the Treasury Department for consolidation and publication.

Publication of detailed figures on capital movements was discontinued between the March 1942 and the November 1945 issues of the "Treasury Bulletin", but data omitted during that period were supplied in the November 1945 issue and supplement.
