PROGRAM AND PERFORMANCE

Fees and expenses are paid to witnesses who appear on behalf of the Government in all cases in which the United States is a party.

1. *Fact witnesses.*—These witnesses provide testimony to assist the Government in litigation. Fees and expenses are paid in the increased rates established in 1949. The estimate includes provision for approximately 85,000 witness days.

2. *Expert witnesses.*—Witnesses whose services in behalf of the Government entail the use of special training or information are compensated at rates individually negotiated.

Japanese and Nisei because of their forced removal from Hawaii, Alaska, and the far-western States early in 1942. Awards in excess of $2,500 are to be submitted to Congress for separate appropriation.

1. *Adjudication expenses.*—Staff reviews the records and interviews claimants both in Washington and in the field. Offices have been opened in Los Angeles and San Francisco. Twenty-three thousand, six hundred and eighty-nine claims have been filed before the closing date of January 2, 1950. Total claims filed aggregate $131,949,176.68.

2. *Payment of claims.*—Approximately 1,200 claims are expected to be awarded in 1952 with an average cost of $320 per claim.

FEDERAL BUREAU OF INVESTIGATION

SALARIES AND EXPENSES

Salaries and Expenses, Federal Bureau of Investigation—

For expenses necessary for the detection and prosecution of crimes against the United States; protection of the person of the President of the United States; acquisition, collection, classification and preservation of identification and other records and their exchange with the duly authorized officials of the Federal Government, of States, cities, and other institutions; and such other investigations regarding official matters under the control of the Department of Justice and the Department of State as may be directed by the Attorney General, including [personal services in the District of Columbia;] purchase (not to exceed five hundred for replacement only) and hire of passenger motor vehicles; purchase at not to exceed $10,000, for replacement only, of one armored motor vehicle; firearms and ammuniton; not to exceed $10,000 for taxicab hire to be used exclusively for the purposes set forth in this paragraph; not to exceed $4,500 for expenses of attendance at meetings of organizations concerned with the purposes of this appropriation; [not to exceed $3,000 for membership in the International Commission of Criminal Police;] payment of rewards when specifically authorized by the Attorney General for information leading to the apprehension of fugitives from justice; and not to exceed $70,000 to meet unforeseen emergencies of a confidential character, to be expended under the direction of the Attorney General and to be accounted for solely on his certificate; [$57,400,000] *$63,867,000*: *Provided*, That of the amount herein appropriated $100,000 is to be held as a reserve for emergencies arising in connection with kidnaping, extortion, and bank robbery, to be released for expenditure in such amounts and at such times as the Attorney General may determine: *Provided further*, That the compensation of the Director of the Bureau shall be $20,000 per annum so long as the position is held by the present incumbent.

[For an additional amount for "Salaries and expenses", Federal Bureau of Investigation, $6,000,000, including the purchase of two hundred additional passenger motor vehicles.] (*5 U. S. C. 300, 340; sec. 5 of the Act of July 28, 1950, Public Law 626; Department of Justice Appropriation Act, 1951; Supplemental Appropriation Act, 1951.*)

Annual definite appropriation:

Appropriated 1951, [a] **$63,400,000** Estimate 1952, **$63,867,000**

[a] Includes $6,000,000 appropriated in the Supplemental Appropriation Act, 1951, Public Law 843.

Total obligations	53,201,217	64,495,142	64,465,560

PROGRAM AND PERFORMANCE

The Federal Bureau of Investigation, as the investigative arm of the Department of Justice, obtains evidence for use in prosecution of violations of Federal law. By statute and Executive order it is also charged with primary responsibility in matters related to the Nation's internal security.

1. *Security and criminal investigations.*—In addition to conducting investigations and maintaining appropriate records and communications systems, the Bureau coordinates and supervises broad investigative programs, particularly in internal security. During 1950, 423,761 investigative matters of all types were referred to the Bureau; during 1952 it is expected that the number will exceed 500,000.

2. *Identification by fingerprints.*—The Identification Division acquires, classifies, and preserves criminal records, including fingerprints, and exchanges them with other law enforcement agencies. The fingerprint collection is expected to exceed 116,000,000 by the close of 1951.

3. *Operation of criminal and scientific laboratory.*—About 25 percent of the laboratory's services are performed for other law enforcement agencies, amounting in 1950 to 25,919 examinations. In 1952 an increase of 22 percent over the total volume of work for the 1950 budget is anticipated.

4. *Training schools and inspectional services.*—The Bureau conducts instructional courses for its personnel and that of other law enforcement agencies covering a comprehensive program to improve all aspects of law enforcement activities, including management, administration, and investigative techniques.

5. *Executive direction.*—The Director, under the direction of the Attorney General, provides over-all supervision of the activities of the Bureau.

6. *Administrative services.*—These consist of all functions of an administrative character bearing upon the Bureau's operations.

7. *Emergencies in connection with kidnaping and bank robbery.*—A fund of $100,000, regularly provided for this Bureau, is held in reserve until released by the Attorney General for use in emergencies related to kidnaping, extortion, or bank robbery.

IMMIGRATION AND NATURALIZATION SERVICE

SALARIES AND EXPENSES

Salaries and Expenses, Immigration and Naturalization Service—

For expenses, not otherwise provided for, necessary for the administration and enforcement of the laws relating to immigration, naturalization, and alien registration, including [personal services in the District of Columbia;] advance of cash to aliens for meals and lodging while en route; payment of allowances (at a rate not in excess of $1 per day) to aliens, while held in custody under the immigration laws, for work performed; payment of rewards for information leading to the apprehension or conviction of violators of the immigration laws; not to exceed [$20,000] *$50,000* to meet unforeseen emergencies of a confidential character, to be expended under the direction of the Attorney General and accounted for solely on his certificate; not to exceed $5,000 for expenses of attendance at meetings of organizations concerned with the purposes of this appropriation; purchase (not to exceed [one hundred and fifty] *two hundred and twelve* for replacement only) and hire of passenger motor vehicles; purchase (not to exceed four for replacement only) and maintenance and operation of aircraft; firearms and ammunition; [free distribution of citizenship textbooks;] refunds of head tax, maintenance bills, immigration fines, and other items properly returnable, except deposits of aliens who become public charges and deposits to secure payment of fines and passage money; [services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a);] operation, maintenance, remodeling, and repair of buildings and the purchase of equipment incident thereto; reimbursement of the General Services Administration for security guard services for protection of confidential files; and maintenance, care, detention, surveillance, parole, and transportation of alien enemies and their wives and dependent children, including return of such persons to place of bona fide residence or to such other place as may be authorized by the Attorney General; [$31,400,000: *Provided*, That the Commissioner of Immigration and Naturalization may contract with officers and employees for the use, on official business, of privately owned horses: *Provided further*, That provisions of law prohibiting or restricting the employment of aliens in the Government service shall not apply to the employment of interpreters in the Immigration and Naturalization Service (not to exceed ten permanent and such temporary employees as are required from time to time) where competent citizen interpreters are not available] *$36,700,000. (8 U. S. C. 100–102; sec. 6 of the Act of July 28, 1950, Public Law 626; Department of Justice Appropriation Act, 1951.)*

PROGRAM AND PERFORMANCE

The Service administers and enforces the laws relating to immigration, naturalization, and registration of aliens.

The over-all program will be augmented in 1952 as a result of the Internal Security Act.

1. *Inspection for admission into the United States.*— The Service maintains stations at border points, seaports, and airports to ascertain from all persons seeking to enter the United States whether they are citizens or aliens; and, if aliens, whether they are admissible under the immigration laws. The work is expected to be in about the same volume in 1952. It will be more time-consuming because of broadened restrictions imposed by the Internal Security Act.

WORKLOAD

	1950 actual	1951 estimate	1952 estimate
Aliens admitted	676,024	770,000	635,000
Stowaways found	591	550	800
Citizens arrived	663,567	660,000	660,000
Alien seamen examined	861,827	875,000	875,000
Reentry permits issued or extended	75,367	75,600	75,600
Total entries over international borders	87,510,056	89,000,000	89,000,000

2. *Detention and deportation.*—Hearings are accorded aliens alleged to be in the United States unlawfully, warrants of arrest and deportation are issued and served, and detention facilities are operated and maintained, including the custody of persons held in detention. New classes of deportable aliens added by the Internal Security Act will increase the work volume.

WORKLOAD

	1950 actual	1951 estimate	1952 estimate
Hearings	22,675	35,000	43,700
Arrests	40,616	41,000	49,700
Aliens deported	6,628	10,000	12,400
Average number of aliens held in detention	1,840	2,000	3,000

3. *Naturalization.*—The Service conducts examinations of aliens to determine the qualifications for naturalization, including applicants for derivative citizenship. Representatives of the Service appear before naturalization courts to present facts and recommendations with respect

IMMIGRATION AND NATURALIZATION SERVICE—Continued

SALARIES AND EXPENSES—continued

Salaries and Expenses Immigration and Naturalization Service—Continued

to the applications of the aliens. The work will be more time consuming in 1952 because of broadened restrictions imposed by the Internal Security Act.

WORKLOAD

	1950 actual	1951 estimate	1952 estimate
Examinations	259,207	291,000	300,500
Court appearances	69,573	75,000	80,000

4. *Patrol for prevention and detection of illegal entry.*—A patrol is maintained by the Service for the prevention of smuggling and other unlawful entry of aliens into the United States, the apprehension of aliens guilty of such violations, the guarding of the international boundaries, and the operation and maintenance of facilities and equipment.

WORKLOAD

	1950 actual	1951 estimate	1952 estimate
Miles patrolled	10,279,154	10,300,000	10,300,000
Conveyances examined	2,235,076	2,300,000	2,300,000
Persons questioned	7,223,069	7,300,000	7,300,000
Persons apprehended	469,581	500,000	500,000

5. *Investigating aliens' status.*—Investigations are made in connection with suspension of deportation and before warrants of arrest are issued for cases involving subversive and other charges, such as smuggling, alleged overstaying of period for which admitted, and cancellation of citizenship. Broadened restrictions imposed by the Internal Security Act upon immigration, naturalization, and alien residents will increase the volume and complexity of the work.

WORKLOAD

Investigations and warrants of arrest	1950 actual	1951 estimate	1952 estimate
Suspension of deportation	15,004	15,000	25,000
Smuggling	1,489	1,500	1,500
Citizenship and naturalization	17,519	17,600	18,900
Warrants of arrest	109,372	122,500	129,500
Failure to report address			18,750

6. *Alien registration.*—The Internal Security Act requires all resident aliens to report current addresses within 10 days following January 1 of each year. An estimated 4 million reports must be recorded and made usable for internal-security purposes.

7. *Executive direction.*—The Commissioner, under the direction of the Attorney General, has the primary responsibility for the over-all supervision and management of the Service.

8. *Central administrative services.*—These comprise all administrative matters in the Service.

FEDERAL PRISON SYSTEM

INTRODUCTORY STATEMENT

The Federal Prison System consists of the Bureau of Prisons and Federal Prison Industries, Inc. The Bureau provides for the safekeeping, care, protection, instruction, and discipline of all persons placed under its control and has charge of the management and regulation of all Federal penal and correctional institutions. Federal Prison Industries, Inc., manufactures articles for use by Federal agencies and conducts inmate vocational trade training programs.

SALARIES AND EXPENSES, BUREAU OF PRISONS

Salaries and Expenses, Bureau of Prisons—

For expenses necessary for the administration, operation, and maintenance of Federal penal and correctional institutions, including not to exceed [$425,000] *$490,000* for departmental personal services; not to exceed $13,500 for expenses of attendance at meetings of organizations concerned with the purposes of this appropriation; purchase of not to exceed [nineteen] *fourteen* passenger motor vehicles for replacement only, including two busses at not to exceed $20,000 each; [services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a);] compilation of statistics relating to prisoners in Federal and non-Federal penal and correctional institutions; furnishing of insignia, uniforms, and other distinctive wearing apparel necessary for employees in the performance of their official duties; payment pursuant to law of claims of employees for loss, damage, or destruction of personal property ([63 Stat. 167] *31 U. S. C. 238*); firearms and ammunition; payment of rewards for the apprehension, or for information leading to the recapture, of escaped prisoners; purchase and exchange of farm products and livestock; construction of buildings at prison camps; and [not to exceed $35,000 for] acquisition of land [adjacent to any Federal penal or correctional institution when in the opinion of the Attorney General the additional land is essential for health or safety] *as authorized by section 7 of the Act of July 28, 1950 (Public Law 626)*; [$21,730,000] *$22,966,000*: *Provided*, [That collections in cash for meals, laundry, barber service, uniform equipment, and any other items for which payment is made originally from appropriated funds may be deposited in the Treasury to the credit of this appropriation: *Provided further*,] That there may be transferred to the Public Health Service such amounts as may be necessary, in the discretion of the Attorney General, for direct expenditure by that Service for medical relief for inmates of Federal penal and correctional institutions. (*18 U. S. C. 4001, 4005, 4007, 4008, 4041, 4042, 4081, 4082, 4281; sec. 8 of the Act of July 28, 1950, Public Law 626; Department of Justice Appropriation Act, 1951.*)

PROGRAM AND PERFORMANCE

1. *Custody, care, and treatment of prisoners in Federal institutions.*—The program for 1952 contemplates an average inmate population of 18,500, an increase of 800 over the estimated average for 1951. Funds required, exclusive of salaries, are in direct relation to the average inmate population, and the increase in cost per inmate per day to 64.5 cents in 1952, as compared with actual costs of 64.3 cents in 1950. A supplemental appropriation in 1951 is anticipated.

2. *Maintenance and operation of institutions.*—The Bureau of Prisons operates 25 institutions throughout the United States (6 penitentiaries, 3 reformatories, 1 institution for women, 1 medical center, 3 juvenile institutions, 7 correctional institutions, 1 jail, and 3 camps.)

3. *Central supervision of field operations.*—Supervision of the institutional program activities and inspection of non-Federal jails for Federal use are provided centrally.

4. *Executive direction.*—Over-all direction is provided for the Federal Prison System.

5. *Departmental administrative service.*—Emphasis will be placed on management improvement.

6. *Medical services (allocation to Public Health Service).*—Formerly reported under the Federal Security Agency, these services provide for medical attention to prisoners.

Total obligations	910,148	463,000	467,000

PROGRAM AND PERFORMANCE

The estimated cost of the program for replacement and construction of buildings and facilities is $42,000,000; it would extend over a period of approximately 20 years. A substantial part of the construction work is performed by inmate labor. In 1952 it is planned to complete the shops at Tallahassee, the heating plant at Atlanta farm, and the power plant at Leavenworth; and to begin a sewage disposal plant at Chillicothe. The latter will be constructed and used jointly with the Veterans Administration.

PROGRAM AND PERFORMANCE

The Bureau of Prisons contracts with State and local jails for short-term boarding of Federal prisoners and maintains seven permanent jails in the Territory of Alaska. A supplemental appropriation is anticipated for 1951. An average of approximately 3,000 offenders are boarded daily. The figure is expected to increase slightly in 1952.

PROGRAM AND PERFORMANCE

The Office of Alien Property exercises the functions of the Attorney General under the Trading With the Enemy Act, as amended.

1. *Vesting of certain enemy-owned property.*—It is planned to complete the work of discovery, investigation, establishment of proof of ownership, and preparation of vesting orders.

SUMMARY OF VESTING ORDERS ISSUED

	1950 actual	1951 estimate	1952 estimate
Number	1,364	3,000	500
Value	$9,623,000	$23,198,000	$3,857,000

2. *Management and liquidation.*—Includes the management of such properties as interests in business enterprises, patents, copyrights, trade-marks, real estate, mortgages, and other interests in real property, securities, mortgages, notes, credits, bank balances, life insurance, annuities, estates and trusts, and miscellaneous tangible personal property. The management function cannot be limited because of the provisions of the Trading With the Enemy Act which require that property be held pending a final determination of any section 9 (a) suit or title claim filed for the return of such property. As of July 1, 1951, it is estimated that there will be 85 active business enterprises, with assets of over $200,000,000, to be managed and supervised. The total number of accounts established and maintained by the Office covering enemy assets has increased substantially from 45,800 in 1946 to 66,000 in fiscal year 1950. Furthermore, during 1951 and 1952 the Office will be engaged in releasing or vesting many millions of dollars of blocked assets in this country.

3. *Administrative adjudication of claims.*—Involves the adjudication of 43,809 debt claims and 9,953 title claims filed against the Attorney General in respect to vested property.

SUMMARY OF CASE LOAD

Number of claims	1950 actual	1951 estimate	1952 estimate
Pending:			
Beginning of fiscal year	43,398	53,762	55,262
Received	13,236	4,000	3,000
Closed	2,872	2,500	3,500
End of fiscal year	53,762	55,262	54,762

4. *Litigation.*—Defense is provided in proceedings brought against the Attorney General for the return of vested property. During the past years, the value of property in litigation has increased more than $275,000,000.

SUMMARY OF CASE LOAD

Number of cases	1950 actual	1951 estimate	1952 estimate
Pending:			
Beginning of fiscal year	1,858	1,957	1,707
Received	643	550	275
Closed	544	800	900
End of fiscal year	1,957	1,707	1,082

5. *Executive direction.*—The Assistant Attorney General directs the operation of the Office.

6. *Central administrative services.*—The Office's administrative staff performs all housekeeping functions, except those services rendered by the administrative division of the Department of Justice.

GENERAL PROVISIONS—DEPARTMENT OF JUSTICE

SEC. 202. Not to exceed $350,000 in the aggregate from the appropriations made in this title for general administration, general legal activities, and United States attorneys and marshals shall be available, without regard to the Classification Act of 1949, for compensation (not to exceed $11,000 per annum) of special attorneys and special assistants to the Attorney General and to United States, attorneys not otherwise provided for: *Provided*, That reports be submitted to the Congress on the 1st of July and January showing the names of the persons employed under the foregoing limitation, the annual rate of compensation or amount of any fee paid to each, together with a description of their duties.

SEC. 203. None of the funds appropriated by this title may be used to pay the compensation of any person hereafter employed as an attorney (except foreign counsel employed in special cases) unless such person shall be duly licensed and authorized to practice as an attorney under the laws of a State, Territory, or the District of Columbia.

SEC. 204. Sixty per centum of the expenditures for the offices of the United States attorney and the United States marshal for the District of Columbia from all appropriations in this title shall be reimbursed to the United States from any funds in the Treasury of the United States to the credit of the District of Columbia.

[SEC. 205. Appropriations and authorizations made in this title for salaries and expenses shall be available for payment of tort claims pursuant to law (28 U. S. C. 2672).]

[SEC. 206. Appropriations and authorizations made in this title for salaries and expenses shall be available for a health service program as authorized by law (5 U. S. C. 150).]

[SEC. 207. Appropriations and authorizations made in this title for salaries and expenses shall be available for printing and binding.]

SEC. [208] *205*. Appropriations and authorizations made in this title which are available for expenses of attendance at meetings shall be expended for such purposes in accordance with regulations prescribed by the Attorney General.

SEC. 206. Appropriations and authorizations made in this title for salaries and expenses shall be available for services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a.) (Department of Justice Appropriation Act, 1951.)

FEDERAL PRISON INDUSTRIES, INC.

[Submitted under the Government Corporation Control Act]

PROGRAM HIGHLIGHTS

	1950 actual	1951 estimate	1952 estimate
Sales to Government agencies	$16,234,337	$18,000,000	$18,500,000
Net earnings	$1,860,920	$2,105,500	$2,110,274
Dividends paid into Treasury	$400,000	$2,500,000	$2,147,774
Number of inmates employed full time	3,381	3,450	3,500
Number of inmates for whom vocational training was provided	9,256	9,300	9,500

PURPOSE AND ORGANIZATION

The corporation is authorized to establish and operate industries in the penal and correctional institutions of the United States for the following purposes: (*a*) to provide employment for inmates and (*b*) to give the inmates opportunities to acquire a knowledge and skill in trades and occupations so as to minimize the numbers returning to the institutions.

Since the corporation was organized in 1935, $13,900,000 of the earnings have been paid into the United States Treasury.

ANALYSIS OF PROGRAMS

During the year employment was provided for 3,381 inmates and no substantial change is anticipated for 1951 or 1952. Inmates employed by the corporation earned total wages amounting to $795,531 of which approximately 75 percent was paid to dependents, or saved and paid to the inmates upon discharge. In addition, $79,932 was paid as compensation for extra-meritorious services to inmates not on industrial assignments.

Industrial program.—Two additional shops were established during the year, the tobacco factory at Ashland, Ky., and the dental laboratory at Springfield, Mo. This made 44 shops operated in 25 lines of industry in 19 locations. Some small production was resumed in the shipbuilding yard at McNeil Island, Wash. Initial sales of $145,721 were also reported this year from the new woolen mill at Terre Haute, Ind. A new glove factory is currently being established at Alcatraz Island to offset a reduction in employment in the laundry. Increased production is anticipated in 1951 at the woolen mill, the tobacco factory, the machine, die and tool shop at El Reno, Okla., and the dental laboratory at Springfield, Mo. Full production should be achieved during fiscal year 1952.

Vocational training.—Vocational training will be provided for 9,500 inmates in 1952 as compared with 9,300 in 1951 and 9,256 in 1950. The training actually provided during 1950 is shown by the following table:

Type of training	Number of training fields or shops	Number of enrollees	Number completing training
Agriculture	48	974	574
Industrial (on the job)	131	2,359	1,296
Maintenance (on the job)	212	3,772	1,537
Trade classes	42	1,498	570
Special	69	653	2,626
Total	502	9,256	6,603

During the past year 1,085 released inmates were placed in jobs in private industry. It is expected that 1,200 men will be placed this year and 1,400 in 1952.

Administrative expense.—Administrative expenses for 1950 were $299,010, and are estimated to be $327,000 for 1951 and 1952.

FINANCIAL REVIEW

Effect on budgetary expenditures.—Application of the corporation's funds as provided by operations, including a dividend payment to the United States Treasury, resulted in an expenditure credit of $1,770,790 in 1950; and it is expected that the effect on budgetary expenditures in 1951 will be a minus expenditure credit of $1,723,536 and $2,147,774 in 1952.

FEDERAL PRISON INDUSTRIES, INC.—Continued

Income.—Net sales of commodities produced by the corporation of $16,234,337 in the fiscal year 1950 resulted in net earnings of $1,860,920 which is a reduction of $769,958 from 1949. This reduction is caused primarily by reduced net markups and decreased production. It is anticipated that the net sales in 1951 will be $18,000,000 and $18,500,000 in 1952 thereby resulting in estimated net earnings of $2,105,500 and $2,110,274, respectively.

Expenses.—The cost of sales in 1950 of $13,424,690 is $1,046,852 less than 1949. It is anticipated that these expenses will amount to approximately $15,281,000 or 82.6 percent, of sales in 1951 and 1952. Revised depreciation rates resulting in reduced charges have been adopted.

Earned surplus.—As a result of operations and an adjustment due to a write-off on an asset resulting from General Accounting Office audit recommendation, earned surplus was increased $1,437,837 after a dividend payment of $400,000 to the United States Treasury in 1950. Dividends of $2,500,000 in 1951 and $2,147,774 in 1952 are expected to be paid, resulting in balances of earned surplus of $12,790,670 and $12,753,170 in 1951 and 1952 respectively.

Investment of United States Government.—The Government's investment, all of which is noninterest bearing, consists of contributed capital and earnings retained to conduct the corporation's operations. The net investment of the Government is $18,125,490 in 1950 and anticipated to be $17,730,990 in 1951 and $17,693,490 in 1952.

Salaries and expenses, Office of Alien Property.	1	1,400	1	400	1,000	3	----------	In the transaction of official business 1 car will be used by the assistant attorney general and 3 automobiles will be used by the staff in Germany.
Total, Department of Justice	733	1,086,700	733	300,150	786,550	2,580	500	

[1] 1 bus for District of Columbia at $15,000 and 1 van for southern district of New York at $2,500.
[2] 12 passenger cars at $1,400 each, with trade-in allowance of $400 each, and 2 buses, 1 for Leavenworth and 1 for Chillicothe, at $20,000 each, with trade-in allowance of $500 each.

Statement of proposed obligations for purchase, maintenance, and operation of aircraft for the fiscal year 1952

DEPARTMENT OF JUSTICE

Appropriation	Aircraft to be purchased		Aircraft to be exchanged		Net cost of aircraft to be purchased	Old aircraft still to be used	Cost of maintenance and operation of aircraft	Public purpose and users
	Number	Gross cost	Number	Allowance (estimated)				
IMMIGRATION AND NATURALIZATION SERVICE								
Salaries and expenses, Immigration and Naturalization Service.	4	$32,000	4	$4,000	$28,000	8	$19,000	Used by border patrol pilots and patrol inspectors for maintaining air-ground liaison for prevention of illegal entries, pursuit of suspected violators, transfers of small task groups of patrol inspectors to points of emergency.

PROPOSED FOR LATER TRANSMISSION

Salaries and expenses, general administration, Department of Justice.—A supplemental appropriation for 1951 is required for the Board of Parole in the amount of $55,000, of which $43,000 is to increase the personnel and related costs of the Board to comply with the provisions of Public Law 864 in the treatment and rehabilitation of youth offenders and $12,000 to provide for increased costs of stenographic reporting.

Salaries and expenses, general legal activities, Department of Justice.—A supplemental appropriation is required for 1951 in the amount of $100,000 for printing briefs of the Texas City explosion case.

Fees and expenses of witnesses.—A supplemental appropriation is required for 1951 in the amount of $200,000, of which $150,000 is to provide for increased fees and expenses of witnesses for regular program and $50,000 for fees and expenses of witnesses testifying in trials of subversive organizations under the Internal Security Act of 1950.

Salaries and expenses, Bureau of Prisons.—A supplemental appropriation for 1951 is required because current experience indicates that the average inmate population will be 700 greater than the 17,000 contemplated by the 1951 appropriation.

Support of United States prisoners.—A supplemental appropriation for 1951 is required because the number of prisoners currently boarded in contract jails exceeds the original estimate on which the appropriation was based.

PROGRAM AND PERFORMANCE

The Office of the Secretary is responsible for the formulation of governmental policy in all matters affecting labor and for the administration and executive supervision of the various programs or functions assigned to the Department by statute.

1. *Executive direction and program coordination.*—The Secretary, with the advice of his aides and assistants, attends to matters of labor policy, and exercises general control over the Department to insure that its programs are effective and coordinated with one another.

2. *International labor affairs—direction of departmental programs and interagency coordination.*—Provision is made for integration of the international activities of the Department and for coordination of its relations on international matters with other agencies, trade unions, and management groups. The Department collaborates with the Department of State and exercises primary responsibility under the latter's over-all policy guidance for United States participation in the activities of the International Labor Organization.

3. *Administrative services.*—Central services are rendered to the operating bureaus in such fields as information, personnel administration, and business management.

PROGRAM AND PERFORMANCE

The Office of the Solicitor serves as legal counsel to the Department and examines the legal aspects of its programs.

1. *Interpretation, adjudication, and enforcement of regulatory labor laws.*—The major work program is the interpretation and enforcement of Federal wage, hour and child-labor laws. Several new or revised interpretative bulletins are planned for 1951 which will provide authoritative reference and informational material to reflect accurately the law as interpreted by court decisions. It is planned to complete in 1952 a program relating to the revision of minimum wage rate determinations under the Public Contracts Act.

2. *Predetermination of minimum wage rates for public construction and repair contracts.*—Minimum prevailing rates are set for laborers and mechanics on Federal public construction contracts and for several grant-in-aid construction programs. Wage determinations and modifications in 1950 totaled 14,758; for 1951 and 1952 the volume of such determinations is estimated at 15,000.

3. *Advisory services on legislation affecting workers.*—Analyses and interpretation of existing legislation, drafts of proposed legislation affecting labor, and analyses and reports on other labor subjects are prepared.

4. *Legal services on employment security matters.*—Interpretation of laws relating to labor supply and employment security functions is the principal area of work, together with the interpretation of international agreements affecting temporary employment of foreign workers and legal assistance to State agencies on employment security.

5. *Legal services on international labor affairs.*—Reports are prepared on conventions and recommendations of the International Labor Organization.

6. *Legal services on employees' compensation matters.*—The main work consists of the interpretation and application of the Federal Employees' Compensation Act and the Longshoremen's and Harbor Workers' Compensation Act. An expected increase of nonclerical workers in Government arsenals, docks and yards, and of longshore workers, ship repairmen, and other harbor workers will increase the number of compensation cases and the need for legal advice.

7. *Other legal services to the Department and the public.*—Additional legal advice is rendered to the bureaus of the Department on matters of concern to them. Assistance and advice are also given the public on inquiries related to the work programs of the Department.

8. *Executive direction and management services.*—Management services such as those of the stenographic pool, legal library, and mail and files are included.

PROGRAM AND PERFORMANCE

The Bureau of Labor Standards develops and encourages the adoption of sound labor standards. It designs and promotes programs aimed at the reduction of industrial accidents, serves as a clearinghouse for pertinent information, and administers the union registration functions of the Labor-Management Relations Act of 1947.

1. *Development and promotion of sound labor laws and labor practices.*—(*a*) *Safe working conditions.*—In cooperation with State labor departments, labor organizations, management, and other interested groups, steps are taken to reduce industrial accidents. Training courses are conducted for State factory safety inspectors, and State agencies are assisted in planning industry-wide safety programs in expecially hazardous industries. Such programs are being carried on in 26 States in 1951 and are planned in 25 States in 1952. Additional safety engineering studies are to be made, and hazardous occupation orders under the child labor provisions of the Fair Labor Standards Act are to be issued. The Bureau provides service for the President's Conference on Industrial Safety and cooperates with State agencies on State-wide conferences. Similar work is carried on with Federal agencies and maritime employers under provisions of the Federal Employees' Compensation Act and the Longshoremen's and Harbor Workers' Compensation Act.

(*b*) *Youth employment.*—The child labor and youth employment research program aims to meet the needs of young people in relation to child labor protection and employment. Child labor regulations are developed under the Fair Labor Standards Act for the Secretary of Labor.

(*c*) *International labor.*—The Bureau participates in the preparation of reports by the United States Government to the International Labor Organization on compliance with that organization's conventions and recommendations, and channels information to the States on such conventions and methods for achieving compliance.

(*d*) *Employment of physically handicapped.*—Staff assistance is provided to the President's Committee on National Employ the Physically Handicapped Week. The Committee stimulates cooperative action by Governors of States, mayors of cities, private organizations, and employers to promote the employment of the physically handicapped.

(*e*) *Other labor legislation and administration.*—Through publications and sponsorship of annual conferences, clearinghouse service is provided for information on labor law. Advice is given the States in applying such data to their own problems. Cooperative agreements are negotiated under which the States make safety inspections under the Walsh-Healey Contracts Act. Proof-of-age certificates are issued under the Fair Labor Standards Act.

2. *Registration of labor union data.*—A file is maintained of union financial and organizational data required by the Labor-Management Relations Act of 1947 as a condition to use of the facilities of the National Labor Relations Board. As of June 30, 1950, 26,073 unions had completed one or more annual registrations. Workload for 1952 is expected to continue at the same rate.

3. *Executive direction and management services.*—The Director and his division chiefs provide general policy formulation and program direction. Central administrative services are included.

PROGRAM AND PERFORMANCE

Besides working toward an adequate and competent skilled labor force, the Bureau, in cooperation with State agencies, promulgates uniform standards for the development of skills through planned job experience.

1. *Development and promotion of national apprenticeship programs.*—The Bureau secures the adoption of apprenticeship policies by major industrial, occupational, and trade groups and assists them in developing and promoting apprenticeship programs. National policies have been adopted and standards promulgated jointly by national management and labor groups in 16 trades and by either management or labor organizations in 14 additional trades. During 1951 and 1952 major emphasis will be placed on development of national policies in critical occupations and essential industries.

2. *Cooperation on State apprenticeship standards and development and maintenance of local apprenticeship programs.*—The field staff of the Bureau encourages the voluntary development of apprenticeship programs at the local level. Field representatives assist with operating problems and make periodic visits to see to it that the programs produce an adequate number of skilled workers. Of the 31 States and Territories that have established apprenticeship councils or agencies, more than two-thirds have adopted apprenticeship laws. When the State employs apprenticeship representatives, joint working arrangements are developed by the field staff to prevent duplication of work. At the end of 1950, 57,000 programs were registered with the Bureau or cooperating State agencies. These programs employed 214,901 apprentices.

3. *Executive direction and management services.*—Provision is made for over-all planning and direction of work of the Bureau, together with the necessary management services.

PROGRAM AND PERFORMANCE

The Bureau of Employment Security carries out the Federal responsibilities in the administration and allocation of funds to the States for the Federal-State system of public employment services and unemployment insurance. In 1952 emphasis will be placed on meeting special problems in supplying manpower for defense and essential civilian production.

1. *Veterans' placement service.*—Veterans' employment representatives provide specialized supervision to local employment offices in counseling and placement of veterans and promote the interest of employers in employing veterans.

2. *Farm placement service.*—This service guides and aids in the orderly interstate movement of migratory workers in cooperation with the farm placement activities of the States. It certifies to the Immigration and Naturalization Service needs for importation of foreign labor when adequate domestic labor is not available, and arranges employment contracts for Mexican nationals under an agreement between the United States and Mexico. To meet the increasingly tighter agricultural labor market resulting from defense activity, the Bureau will intensify recruitment from newer domestic sources, as well as greater importation of foreign labor.

3. *Collection and interpretation of labor market information.*—Facts and figures are reported and analyzed on (*a*) the administrative operations of the unemployment insurance and employment service programs; (*b*) supply and demand and utilization of labor by areas, industries, and occupations. Analysis will be directed towards labor supply and demand relationships for use in making placements, locating plants, awarding defense contracts, discovering training needs, determining critical occupations, and other defense manpower programs.

4. *Assistance in maintaining public employment services.*—Effective employment service is promoted by assistance to States on (*a*) improved organization and management of public employment services; (*b*) adequate counseling and testing service to veterans, handicapped workers, and others in need of occupational adjustment; and (*c*) effective employer contact programs designed to increase placements through occupational information, job analysis, and other services of the employment offices. Increased workloads will occur in the interstate labor clearance system maintained and coordinated by the Bureau for locating and referring workers from other States to jobs that cannot be filled locally.

5. *Unemployment insurance service.*—The Bureau reviews State laws and interpretations to assure that each State unemployment insurance law as interpreted and administered conforms with the requirements of Federal law and thus qualifies for tax offset and for grants of administrative funds under Federal law. Through surveys of specific operations in the 51 jurisdictions administering unemployment insurance laws, the Bureau certifies as to the proper and efficient administration of the State laws and seeks to improve performance and reduce cost. It develops proposals for improving the existing programs.

6. *Field guidance, financing, and auditing of State operations.*—Through its regional offices the Bureau guides

Federal Reserve Bank of St. Louis

BUREAU OF EMPLOYMENT SECURITY—Continued

Salaries and Expenses, Bureau of Employment Security, Department of Labor—Continued

and renders technical assistance to the State agencies. The Bureau also reviews and evaluates the needs of the States for administration of their unemployment insurance and employment service programs; grants are made to the States based on their needs. Annual audits of these grants are made by the Bureau.

7. *Executive direction and management services.*—This covers the over-all planning and direction together with the magamenent services.

Grants to States for Unemployment Compensation and Employment Service Administration, Bureau of Employment Security, Department of Labor—

Grants to States for unemployment compensation and employment service administration: For grants [to the several States (including Alaska and Hawaii)] in accordance with the provisions of the Act of June 6, 1933, as amended (29 U. S. C. 49–491, *Public Law 775, approved September 8, 1950*), for carrying into effect section 602 of the Servicemen's Readjustment Act of 1944, for grants to the States as authorized in title III of the Social Security Act, as amended (42 U. S. C. 501–503), including, upon the request of any State, the purchase of equipment and the payment of rental for space made available to such State in lieu of grants for such purpose, and for necessary expenses in connection with the operation of employment office facilities and services in the District of Columbia and [for use] in carrying into effect section 602 of the Servicemen's Readjustment Act of 1944 in Puerto Rico[, $178,500,000] *(until compliance by Puerto Rico with the Act of June 6, 1933, as amended), $169,560,000,* of which [$8,500,000] *$10,000,000* shall be available only to the extent that the Secretary finds necessary to meet increased costs of administration resulting from changes in a State law or increases in the numbers of claims filed and claims paid or salary costs over those upon which the State's basic grant (or the allocation for the District of Columbia [or Puerto Rico]) was based, which increased costs of administration cannot be provided for by normal budgetary adjustments: [*Provided,* That no State shall be required to make any appropriation as provided in section 5 (a) of said Act of June 6, 1933, prior to July 1, 1952:] *Provided* [*further*], That, notwithstanding any provision to the contrary [in section 5 (a) or section 6 of the Act of June 6, 1933, or] in section 302 (a) of the Social Security Act, as amended, the Secretary of Labor shall from time to time certify to the Secretary of the Treasury for payment to each State found to be in compliance with the requirements of the Act of June 6, 1933, and with the provisions of section 303 of the Social Security Act, as amended, such amounts as he determines to be necessary for the proper and efficient administration of its unemployment compensation law and of its public employment offices: *Provided further,* That such amounts as may be agreed upon by the Department of Labor and the Post Office Department shall be used for the payment, in such manner as said parties may jointly determine, of postage for the transmission of official mail matter in connection with the administration of unemployment compensation systems and employment services by States receiving grants herefrom.

In carrying out the provisions of said Act of June 6, 1933, the provisions of section 303 (a) (1) of the Social Security Act, as amended, relating to the establishment and maintenance of personnel standards on a merit basis, shall apply.

None of the funds appropriated by this title to the Bureau of Employment Security for grants-in-aid of State agencies to cover, in whole or in part, the cost of operation of said agencies including the salaries and expenses of officers and employees of said agencies, shall be withheld from the said agencies of any States which have established by legislative enactment and have in operation a merit system and classification and compensation plan covering the selection, tenure in office, and compensation of their employees, because of any disapproval of their personnel or the manner of their selection by the agencies of the said States, or the rates of pay of said officers or employees.

Grants to States, next succeeding fiscal year: For making, after May 31 of the current fiscal year payments to States under title III of the Social Security Act, as amended, and under the Act of June 6, 1933, as amended, for the first quarter of the next succeeding fiscal year, such sums as may be necessary, the obligations incurred and the expenditures made thereunder for payments under such title and under such Act of June 6, 1933, to be charged to the appropriation therefor for that fiscal year. (*38 U. S. C. 695b; Department of Labor Appropriation Act, 1951.*)

PROGRAM AND PERFORMANCE

These funds are granted to the States for administration of the State unemployment compensation programs—designed to sustain the wage earner during limited periods of unemployment—and the employment service programs—designed to bring together workers and jobs. Grants are based on State average annual salary rates which are expected to increase from $2,949 in 1951 to $3,003 in 1952.

1. *Unemployment compensation activities.*—This activity makes it necessary to: (*a*) Determine the tax liability of each employer, collect the taxes, maintain employer accounts, and audit the employer's records, for which a small increased workload is anticipated; (*b*) maintain a record of each employee's wages from which the weekly amount and duration of his benefits can be computed—a 4 percent workload increase over 1951 is anticipated in 1952; (*c*) accept initial claims for unemployment benefits from wage earners, for which a 17 percent decline from the 1951 workload is anticipated; (*d*) process claims to determine eligibility or ineligibility for benefits and if eligible the amount and duration of benefits, for which a 17 percent decline from the 1951 workload is anticipated; (*e*) take continued claims from those determined to be eligible for benefits and verify claimant's continuing eligibility, for which a 22 percent decline from 1951 workloads is anticipated; (*f*) make benefit payments to the individual, which requires bookkeeping, check writing, and auditing operations to insure proper payment to the entitled person, for which a 25 percent decline from the 1951 workload is anticipated; (*g*) conduct hearings and make decisions on appeals filed by the claimant or the employer on the claimant's right to draw benefits, for which a 23 percent decline from the 1951 workload is anticipated.

The basic workloads for the operations described above are given in the following table:

UNEMPLOYMENT COMPENSATION ACTIVITIES—WORKLOADS

Basic workload	1950 actual	1951 estimate	1952 estimate
Employer tax returns processed	6,070,000	6,130,000	6,200,000
Employee wage items recorded	140,000,000	152,000,000	158,000,000
Initial claims taken	15,750,000	10,200,000	8,480,000
Continued claims taken	89,925,000	47,000,000	36,600,000
Claims processed	9,650,000	6,200,000	5,150,000
Benefit payments made	81,717,000	40,000,000	29,830,000
Appeals	270,000	210,000	161,000

2. *Employment service activities.*—This program makes it necessary to: (*a*) Register persons seeking jobs, for which a 12 percent decline in the workload is anticipated; (*b*) provide testing and counseling services to people needing these services for placement—funds requested for 1952 will cover the testing of 6 percent more individuals than in 1951 offset by a decline in the unit time and a 10 percent reduction in the number of counseling interviews; (*c*) make placements by selecting applicants suitably qualified for job openings and referring them to the employer—during 1952 greater emphasis on farm placement and an 11 percent increase in the number of nonagricultural placements partially offset by a reduction in the unit time is anticipated; (*d*) develop job opportunities by visiting employers to explain or emphasize the services offered by local offices and to provide assistance to employers, including information on uses of job analysis, staffing schedules, and turnover analysis—by concentrating on defense and essential civilian industries a decline is expected in 1952 in the number of nonagricultural employer visits but there will be an increase in technical assistance given to these employers to resolve their employment problems.

The basic workloads for these employment service operations are given in the following table:

EMPLOYMENT SERVICE ACTIVITIES—WORKLOADS

Basic workload	1950 actual	1951 estimate	1952 estimate
Applications for work taken	8,253,000	8,000,000	7,000,000
Counseling interviews	1,186,000	1,500,000	1,350,000
Placements made, nonagricultural	4,727,000	6,500,000	7,250,000
Employer visits, nonagricultural	2,195,000	2,250,000	2,000,000

3. *State administration.*—Leadership and planning are provided for the unemployment compensation and employment service activities in central and local offices as well as legal, fiscal, personnel, training, and research services. Despite a slightly smaller staff in 1952 than in 1951, there is an increase in cost due to estimated higher State salary rates.

4. *Retroactive retirement contributions.*—Payments were made to three State retirement systems in 1950 to cover employees who served during the wartime period of Federal operation of the United States Employment Service. This service was recognized by the State retirement systems upon the return of the employment service to the States. No such expenditure is estimated for 1951. The request for 1952 is to purchase retirement rights retroactively in one State for current employees eligible by virtue of prior service when such contributions were not paid.

5. *Contingency fund.*—The employment security program is extremely sensitive to economic fluctuations and it is impossible to estimate accurately in advance the number of claims that will be filed and paid. State salary rates and changes in unemployment compensation laws are also factors beyond the control of the State agencies. The experience of 1950 in the operation of the contingency fund indicates, in the event of a rise in unemployment, the need for an amount approximating 7 percent of the base appropriation or $10,000,000.

OBLIGATIONS BY ACTIVITIES

Description	1950 actual	1951 estimate	1952 estimate
Direct Obligations			
1. Unemployment compensation activities:			
(*a*) Tax collecting and auditing	$20,125,900	$21,435,400	$22,181,300

BUREAU OF EMPLOYEES' COMPENSATION

INTRODUCTORY STATEMENT

The Bureau administers the Federal Employees' Compensation Act (including the civilian war benefits program), the Longshoremen's and Harbor Workers' Act, and the War Risk Hazards Act. In addition it administers, on a reimbursable basis, certain provisions of the War Claims Act of 1948, and also the District of Columbia Workmen's Compensation Act, with expenses paid from funds carried in the annual appropriation for the District of Columbia.

Salaries and Expenses, Bureau of Employees' Compensation, Department of Labor—

Salaries and expenses: For necessary administrative expenses[, including personal services in the District of Columbia] and not to exceed [$49,600] *$46,000* for the Employees' Compensation Board of Appeals; [$1,935,000] *$1,973,000*, together with not to exceed [$119,000] *$122,000* to be derived from the War Claims Fund created by section 13 (a) of the War Claims Act of 1948 (50 U. S. C. 2012). *(5 U. S. C. 751–800; 33 U. S. C. 901–950; 42 U. S. C. 1651–1659, 1701–1717; Reorganization Plan No. 2 of 1946, 11 F. R. 7873; Reorganization Plan No. 19 of 1950, 15 F. R. 3178; Federal Security Agency Appropriation Act, 1951.)*

Appropriated 1951, **$1,935,000** Estimate 1952, [a] **$1,973,000**
Appropriated (adjusted) 1951, **$1,881,680**

[a] Excludes $29,107 for activities transferred in the estimates to the following appropriations:

"Salaries and expenses, Office of Secretary of Labor"	$18,307
"Salaries and expenses, Bureau of Labor Standards, Department of Labor"	10,800

The amounts obligated in 1950 and 1951 are shown in the schedule as comparative transfers.

Reimbursable Obligations			
Reimbursements for services performed: Administration of District of Columbia Workmen's Compensation Act	132,200	148,000	157,000
Administrative expenses, War Claims Act	115,000	119,000	122,000
Unobligated balance, estimated savings	−39,636		
Total reimbursable obligations	207,564	267,000	279,000
Total obligations	1,852,220	2,113,777	2,252,000

PROGRAM AND PERFORMANCE

1. *Disposition of compensation claims.*—With workloads of the Bureau bearing a direct relationship to the volume

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

of covered employment, the proposed increase for 1952 is based on higher case volumes.

(*a*) *Federal employees.*—Covered employment is estimated to increase to 2,500,000.

Workload	1950 actual	1951 estimate	1952 estimate
New injuries reported	81,165	83,000	96,000
Continuing open cases	35,191	34,191	33,191
Total cases	116,356	117,191	129,191
Claims subject to investigation	25,412	26,100	28,500
Investigations made	1,096	1,800	2,040

(*b*) *Longshore and harbor workers.*—In addition to adjudication of maritime and defense base claims presented to employers or their insurance carriers, hearings and conferences are held under the Longshoremen's and Harbor Workers' Act for the purpose of determining the rights of interested parties. A substantial increase in injury cases is anticipated under an expanded national-defense program.

Workload	1950 actual	1951 estimate	1952 estimate
New injuries reported	70,532	90,000	121,000
Formal hearings	642	700	800
Informal conferences	30,052	33,000	36,000

(*c*) *Executive direction and management service.*—Executive direction and general administrative services are provided.

2. *Appeals from determinations of Federal employee claims.*—The Employees' Compensation Appeals Board hears and finally decides appeals taken from the final decisions of the Director of the Bureau, either upon question of fact or question of law arising under the Federal Employees' Compensation Act and any extensions of that act.

Workload	1950 actual	1951 estimate	1952 estimate
Appeals docketed	125	188	200
Hearings held	84	132	132
Appeals closed	115	140	140
Opinions written	78	98	98
Backlog of cases, end of year	98	146	206

Employees' Compensation Fund, Bureau of Employees' Compensation, Department of Labor—

Employees' compensation fund: For the payment of compensation and other benefits and expenses (except administrative expenses) authorized by law and accruing during the current or any prior fiscal year, including payments to other Federal agencies for medical and hospital services pursuant to agreement approved by the Bureau of Employees' Compensation; continuation of payment of benefits as provided for under the head "Civilian War Benefits" in the Federal Security Agency Appropriation Act, 1947; the advancement of costs for enforcement of recoveries in third-party cases; the furnishing of medical and hospital services and supplies, treatment, and funeral and burial expenses, including transportation and other expenses incidental to such services, treatment, and burial, for such enrollees of the Civilian Conservation Corps as were certified by the Director of such Corps as receiving hospital services and treatment at Government expense on June 30, 1943, and who are not otherwise entitled thereto as civilian employees of the United States, and the limitations and authority of the Act of September 7, 1916, as amended (5 U. S. C. 796), shall apply in providing such services, treatment, and expenses in such cases; [$25,000,000] *$31,000,000,* together with not to exceed $5,000,000 to be derived from the War Claims Fund created by section 13 (a) of the War Claims Act of 1948 (50 U. S. C. 2012) and to be available for payments pursuant to sections 4 (c) and 5 (f) of such Act, which amounts may be accounted for as one fund. (*5 U. S. C. 785; 42 U. S. C. 1701; 50 U. S. C. 2001–2013; Federal Security Agency Appropriation Act, 1951.*)

Appropriated 1951, **$25,000,000** Estimate 1952, **$31,000,000**

PROGRAM AND PERFORMANCE

Employees' compensation fund.—Benefit payments are made to civil employees of the United States disabled

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

BUREAU OF EMPLOYEES' COMPENSATION—Con.

Employee's Compensation Fund, Bureau of Employees' Compensation, Department of Labor—Continued

as a result of injuries sustained in the performance of duty, or to their dependents in case of death. Payments are also made for benefits extended to employees on Federal work-relief projects in operation from 1933 to 1941; certain war-risk benefits and other civilian war benefits.

Workload	1950 actual	1951 estimate	1952 estimate
Long-term injuries compensated	12,252	12,600	13,500
New injuries reported	81,163	83,000	96,000
Number of payments	270,124	294,000	310,000

The recommended increase of $6,000,000 above this year's appropriation is equal to a net increase of $3,000,000 over estimated costs for the current year; based on present indications it will be necessary to request a supplemental appropriation of $3,000,000 for the current year. The net increase of $3,000,000 for 1952 results from (1) the continued increase of long-term compensated cases; and (2) the unanticipated increase in the number of short-term disability claims.

Funds are supplemented by transfer from the War Claims Fund established under the War Claims Act of 1948 for payment of certain claims covering employees of Government contractors and civilian American citizens who were captured by the Japanese. The former are now being paid benefits, while the latter are expected to have their claims adjudicated beginning in fiscal year 1951.

OBLIGATIONS BY ACTIVITIES

Description	1950 actual	1951 estimate	1952 estimate

Reimbursements for services performed	$61,910	$15,000	
Payments received from non-Federal sources	3,681	5,000	
Total reimbursable obligations	65,591	20,000	
Total obligations	5,568,702	5,705,700	$5,935,000

PROGRAM AND PERFORMANCE

The Bureau is the principal fact-finding agency of the Department. It develops a variety of economic data affecting labor, including basic industrial and economic facts, for use in policy determinations by the Department, other agencies, and the Congress and for the use of business, labor, and other parts of the public.

1. *Collection, analysis, and publication of labor and economic statistics.*—A wide variety of purposes is served by the information obtained. Wage-rate and earnings data, cost-of-living figures, and summaries of provisions contained in collective-bargaining agreements are utilized in labor-management contract negotiations. Statistics on prices, employment, hours of work, and analyses of changes in the size and composition of the labor force indicate current developments and emergency problems in the national economy. Information on injury rates and the causes of accidents contribute to better industrial safety programs. Construction statistics provide data on supply and demand for housing and value of Federal construction. Productivity rates indicate direction and rate of growth of industrial efficiency.

The program in 1951 is being directed toward greater service for defense purposes. Programs to be introduced in 1952, while not designed solely to this end, will provide basic economic data bearing on defense problems. The program of occupational wage studies will be expanded to provide wage data for 30 major cities annually as compared to 5 cities in 1951. The coverage on injury statistics will be expanded to provide greater reliability of the severity and frequency rates, more adequate and extensive State data for local accident prevention purposes, and greater industrial detail, particularly for defense industries. The program covering labor conditions in foreign countries will be expanded by analyzing conditions in countries not covered in 1951, particularly in those where knowledge is important to American foreign policy and interests.

2. *Executive direction and management services.*—Provision is made for policy and program planning, over-all direction of activities, and the staff functions necessary to program management.

OBLIGATIONS BY ACTIVITIES

Description	1950 actual	1951 estimate	1952 estimate
Direct Obligations			
1. Collection, analysis, and publication of labor and economic statistics:			
(*a*) Employment, payrolls, hours, and earnings	$1,472,803	$1,570,931	$1,557,544

BUREAU OF LABOR STATISTICS—Continued

Revision of Consumers' Price Index, Bureau of Labor Statistics, Department of Labor—Continued

PROGRAM AND PERFORMANCE

The consumers' price index for moderate-income families in large cities is being revised to meet demands for its present-day use. In 1952, tabulations will be completed for the consumer expenditure survey, and expenditure weighting patterns will be determined. Analysis of the special pricing will be completed, and the design of the revised index will be determined. Finally, compilations will be completed for cities that are to be included in the new index.

OBLIGATIONS BY ACTIVITIES

Revision of consumers' price index—1950, $972,531; 1951, $2,000,000; 1952, $1,250,000.

PROGRAM AND PERFORMANCE

The Bureau establishes standards and policies mainly to promote women's opportunities for profitable employment. The Bureau also investigates and reports on all matters pertaining to the welfare of women workers. The

Digitized for FRASER

Federal Reserve Bank of St. Louis

more than 18 million working women constitute nearly one-third of the labor force of the United States.

1. *Investigating and reporting on conditions affecting women workers.*—Most of the resources of the Bureau are devoted to continuous collection and analysis of basic economic data relating to women workers; planning and conducting studies on special problems affecting women workers; and preparation of reports on all findings.

2. *Promotion of standards and policies to advance the welfare of women workers.*—The Bureau's special knowledge and advice is made available, on a continuous basis, to those who can make the most effective use of it.

3. *Advisory services on legislation affecting the welfare of women.*—Technical and advisory services are furnished to State labor law administrators, Federal agencies, the International Labor Organization, women's organizations, civic groups, and individuals in the various fields of women's labor law and women's civil and political status. Replies are prepared to United Nations questionnaires for the United States Government on the legal status and treatment of women.

4. *Executive direction and management services.*—This activity consists of general direction and policy formulation, together with the necessary management services.

PROGRAM AND PERFORMANCE

The Division administers the Fair Labor Standards Act and the Walsh-Healey Public Contracts Act to obtain compliance with minimum standards respecting wages, hours, and other employment conditions in industries engaged in interstate commerce or the production of goods for commerce and in establishments furnishing goods to the Federal Government.

1. *Promotion of compliance and enforcement.*—Working toward full compliance, the Division: (*a*) utilizes informational media to tell workers and employers of their rights and responsibilities under the law in order to minimize unintentional violations; and (*b*) inspects employing establishments in order to assist employers in meeting legal requirements, correct conditions in violation of the law, and assist workers in recovering wages unlawfully withheld.

Exclusive of agricultural employers subject only to the child-labor provisions, there are an estimated 715,000 establishments whose employees are protected by the law. A selective inspection program, carried out by local investigators, aims to promote voluntary compliance with the law as well as to disclose willful violations.

During 1950, 26,189 establishments were investigated, with much additional staff time going into explaining the amendments to the Fair Labor Standards Act which became effective on January 25, 1950. Investigations made since that date reflect high violation ratios. The volume of investigations proposed for 1952 is at the same annual level as 1951 and approximates 50,000.

2. *Wage standards and determinations.*—Prevailing wage determinations are being made or planned in 16 industries in 1951 and in 20 industries in 1952. Wages in Puerto Rican industries are to be reviewed during 1952 as a basis for revision of legal minimum wage rates under the Fair Labor Standards Act.

Regulations are formulated governing the approval of subminimum wages for learners, apprentices, messengers, and handicapped workers. Under these regulations employer petitions for industry regulations or exemptions or applications for subminimum wage rates are acted upon after investigation and analysis, frequently including a show-cause hearing. Over 6,000 learner applications were acted upon in 1950; the same workload is estimated for 1951 and 1952. The Administrator's advisory committee on sheltered workshops cooperates

Federal Reserve Bank of St. Louis

WAGE AND HOUR DIVISION—Continued

Salaries and Expenses, Wage and Hour Division, Department of Labor—Continued

in determining policies and procedures for certifying such nonprofit rehabilitation workshops as eligible to pay subminimum wages.

3. *Regulations and interpretations.*—Regulations are formulated to give effect to the Fair Labor Standards Act, except for setting wage rates. In addition, recommendations on administrative policy and interpretations of the act are prepared.

4. *Executive direction and management services.*—Besides planning, policy determination, and administrative direction, provision is made for the necessary management services.

INTRODUCTORY STATEMENT

Postal business reflects every change in the economic and social life of the Nation; it is the largest communications agency, and it has become the largest parcel forwarding operation, with nearly 50,000 offices. The recent marked upturn in the national economy has generated a large increase in mail volume, and the trend is expected to accelerate. Amounts have been included in these estimates to care for the expanded volume of business, increased rates and prices, and replacement of outworn and obsolete equipment.

The operation of the postal service is financed from postal revenue plus an additional amount from general funds of the Treasury equal to the difference between appropriations for operations and the estimated aggregate postal revenue. Specific authority to incur obligations for operation is contained in four Post Office Department appropriations: General Administration, Postal Operations, Transportation of Mails, and Claims.

The accepted basis for estimating the revenues and expenses of the postal service is the estimated volume of mail and special service transactions. A summary statement relating revenue and expenses to the volume of business for the budget year, the prior years, and the 1935–39 average is presented in the following tabulation:

[In millions]

Description	1935–39 average	1949	1950	1951 estimate	1952 estimate
Postal obligations or estimates of appropriation	$758	[1] $2,163	[1] $2,268	[1] $2,285	$2,361
Percent of increase over—					
Prior year			4.9	0.6	3.3
1935–39 average		185.4	199.2	201.5	211.5
Postal revenue	$699	$1,572	$1,677	$1,774	[2] $1,840
Percent of increase over—					
Prior year			6.7	5.8	3.7
1935–39 average		124.9	139.9	153.8	163.0
Contribution from general fund of the Treasury for deficiency of postal revenue	$58	[1] $591	[1] $591	[1] $512	$521

[In millions

Description	1935–39 average	1949	1950	1951 estimate	1952 estimate
Mail volume and special services [3]	25,369	44,494	46,749	48,040	49,821
Percent of increase over—					
Prior year			5.1	2.8	3.7
1935–39 average		75.4	84.3	89.4	96.4
Average cost per million pieces	$29,879	$48,613	$48,472	$47,565	$47,390
Percent of increase over—					
Prior year			−0.3	−2.0	−0.4
1935–39 average		62.9	62.2	59.2	58.6
Average revenue per million pieces	$27,553	$35,331	$35,872	$36,928	[2] $36,932
Percent of increase over—					
Prior year			1.5	2.9	(4)
1935–39 average		28.2	30.2	34.0	34.0
Average deficiency per million pieces	$2,326	$13,282	$12,642	$10,658	[2] $10,458

[1] Includes pro rata part of $312 million increase in rail mail pay rates ordered by Interstate Commerce Commission on Dec. 4, 1950: 1949, $40 million; 1950, $42 million; 1951, $23 million; and also includes $22 million for increase in postal volume in 1951.
[2] Excluding proposed increase in postal rates.
[3] Units are pieces of mail and special service transactions.
[4] Less than one-tenth of 1 percent.

The total deficiency of postal revenue for 1951, including over $22 million to meet the additional cost of the increased volume, is expected to reach nearly $512 million. In 1952, due primarily to the anticipated increase in volume of mail, revenues are expected to increase $66 million, or 3.7 percent over 1951, while costs are expected to increase $76 million, or 3.3 percent over 1951. With no change in postal rates the deficiency of postal revenue would be over $521 million. Postal rates should reflect the increased cost of handling mail; average mail costs in 1952 are estimated to be 58.6 percent above the 1935–39 average while average revenue is only 34.0 percent above the 1935–39 average. The budget for 1952 contemplates legislation to increase postal rates sufficient to reduce the postal deficiency to about $160 million which represents the estimated cost of services not properly chargeable to regular postal patrons.

Information basic to postal service budget estimates is presented in the following schedules:

Post Office Department: Mail volume and postal revenue

Classification	Fiscal year 1950 (unaudited)			Fiscal year 1951 (estimate)			Fiscal year 1952 (estimate)

NOTE.—Legislation is proposed to increase postal revenue in 1952 which will reduce the contribution from the General Fund of the Treasury. (See the statement on proposed legislation at the end of this chapter.)

For administration and operation of the Post Office Department and the postal service, there is hereby appropriated the aggregate amount of postal revenues for the fiscal year ending June 30, [1951] *1952*, as authorized by law (5 U. S. C. 380; 39 U. S. C. 786), together with an amount from any money in the Treasury not otherwise appropriated, equal to the difference between such revenues and the total of the appropriations hereinafter specified and the sum needed may be advanced to the Post Office Department upon requisition of the Postmaster General, for the following purposes, namely: (*Post Office Department Appropriation Act, 1951.*)

GENERAL ADMINISTRATION

General Administration, Post Office Department—

For expenses necessary for general administration of the postal service, operation of the inspection service, and the conduct of a research and development program, including [personal services in the District of Columbia and elsewhere; printing and binding;] services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a); [a health service program as authorized by law;] $250,000 to be available exclusively for procurement by contract of things and services related to design, development, and construction of equipment used in postal operations, and for contracts for management studies; rewards for information and services concerning violations of postal laws and regulations, current and prior fiscal years, in accordance with regulations of the Postmaster General in effect at the time the services are rendered or information furnished; *purchase of one passenger motor vehicle for replacement only at not to exceed $4,500*; and expenses of delegates designated by the Postmaster General to attend meetings and conventions for the purpose of making postal arrangements with foreign governments pursuant to law; [$16,000,000] *$21,224,000*: *Provided*, That expenses of delegates provided for herein, and not to exceed $20,000 for rewards as provided for herein, shall be paid in the discretion of the Postmaster General and accounted for solely on his certificate. *(5 U. S. C. 3, 22, 22a, 43, 116a, 133z–15, 150, 361, 364, 364a, 366, 369, 372, 374, 388, 1111, 1112, 1113; 39 U. S. C. 826, 847, 865, 885–887; Act of May 3, 1950, Public Law 500; Act of Aug. 17, 1950, Public Law 712; Act of Sept. 12, 1950, Public Law 784; Post Office Department Appropriation Act, 1951.)*

Appropriated 1951, [a] **$16,100,000** Estimate 1952, **$21,224,000**
Appropriated (adjusted) 1951, [b] **$17,855,000**

[a] Includes $100,000 appropriated in the Supplemental Appropriation Act, 1951.
[b] Includes $1,755,000 transferred from "General Accounting Office" in accordance with Public Law 712.

PROGRAM AND PERFORMANCE

A supplemental estimate of appropriation for 1951 in the amount of $35,500 is excluded from the obligation schedules, but it has been included in the following discussion of performance to provide a realistic means for comparison between years.

1. *Coordination and control*—(*a*) *Executive direction and staff services.*—Over-all direction of the postal service and related staff services are included in this activity. Staff services are furnished by the Advisory Board, the Office of the Administrative Assistant to the Postmaster General, the Departmental Personnel Office, and the Office of the Solicitor. The increase in 1952 reflects the annualization of the cost of the Advisory Board, the research and development program, and establishment of the postal rate study program.

(*b*) *Financial administration and accounting.*—The Department supervises all financial transactions of the postal service, such as the distribution and sale of stamps, postal savings, the money order and postal note systems, and other special financial services; maintains records of appropriations, obligations, revenue, and expenditures; and administers the cost ascertainment system, the classification of mail matter, the second-class mailing privilege, and the examination of postmasters' accounts. About $18 billion in financial transactions, including receipts and payments of all types, flow through the Postal Service annually. The major increase in 1952 is for annualization of the transfer of the Postal Accounts Division of the General Accounting Office to the Post Office Department as provided in the Post Office Department Financial Control Act (Public Law 712).

(*c*) *Inspection service.*—Periodic and special inspections of post offices are made to determine the state of the efficiency and adequacy of the postal service, and to assure that postal funds and the mails are properly protected. Investigations of complaints, claims, robberies, and depredations, and (when requested by postal officials) management surveys and special investigations of any other matters pertaining to the postal service are made.

The 1952 estimate provides for 200 new inspectors and the expenses incidental to this increase in staff.

2. *Direction of postal operations*—(*a*) *Mail services.*—General direction of postal operations is furnished 41,302 post offices, including authorizations for changes in the collection, dispatch, delivery, and local transportation of mails, involving budgetary authorizations for more than 437,000 employees. Each year, thousands of changes and requests for extension of city, rural delivery services, and clerical service to meet current local needs, are reviewed and authorized. New housing developments in suburban areas and the increasing volume of mail require continuous expansion of services.

(*b*) *Transportation of mails.*—This comprises the general administration of mail transportation, involving supervision of about 36,700 postal transportation clerks who handle mail in railway and highway post offices and terminals; negotiation of postal conventions and agreements with foreign countries, and the administration of international postal services; approval of contracts for mail transportation; technical representation in transportation rate actions before the Civil Aeronautics Board and the Interstate Commerce Commission. The anticipated completion of the rail mail pay case before the Interstate Commerce Commission is reflected in the 1952 estimate for personal services.

(*c*) *General services.*—This comprises the general administration over the maintenance of Government-owned post office buildings; procurement of rented quarters; procurement and maintenance of Government-owned motor vehicles; negotiations concerning rental of motor vehicles and pneumatic tube services; manufacture and repair of mail bags and locks; procurement, inspection, and distribution of supplies and equipment; traffic management relating to transportation of equipment and supplies; the production and distribution of Post Route maps; and engineering services relating to the use of space and equipment. The estimate for 1952 includes an increase for personal services incident to reorganizing the Bureau of Facilities.

OBLIGATIONS BY ACTIVITIES

Description	1950 actual	1951 estimate	1952 estimate
1. Coordination and control:			
(*a*) Executive direction and staff services	$1,389,550	$1,614,264	$1,718,900
(*b*) Financial administration and accounting	4,571,208	4,698,098	4,814,200

PROGRAM AND PERFORMANCE

This program is for supervision and operation of post offices, including collection, dispatch, local transportation, and delivery of mail; performance of special services; distribution of mail in transit; leasing, operation, and care of buildings and grounds used by the postal field service; and procurement, manufacture, and repair of mail bags and locks. A supplemental estimate of appropriation for 1951 of $22,100,000 for increased postal volume is excluded from the obligation schedules for this appropriation, but it has been included in the following discussion and tables on performance so that a realistic comparison may be drawn between the last actual year and the budget year.

1. *Administration of post office operations.*—Local administration of post offices is the responsibility of postmasters and assistant postmasters whose salaries comprise the principal part of the cost of this activity.

Their salaries are determined with reference to the amount of postal receipts of their respective post offices, and are adjusted each fiscal year to reflect any change in the receipts of the calendar year just preceding. The increase for 1952 reflects estimated adjustments effective in that year.

CALENDAR YEAR POSTAL RECEIPTS AND POST OFFICES BY CLASSES

	1950 actual	1951 estimate	1952 estimate
Postal receipts (preceding calendar year) in millions [1]	$1,414	$1,578	$1,630
Number of post offices on June 30:			
First-class	2,520	2,732	2,867
Second-class	5,777	5,911	5,860
Third-class	12,787	12,813	12,909
Fourth-class	20,380	19,887	19,666
Total post offices, June 30	41,464	41,343	41,302

[1] Gross postal receipts on which salaries of postmasters are determined.

Except during short periods of unusually heavy mail volume or periods of official absences, no clerical assistance is provided postmasters at fourth-class post offices. While many have rural carriers operating from their offices, generally their administrative responsibilities are very light. However, as the office increases in size, postmasters have a progressively greater responsibility for administering the service and supervising personnel employed by their respective post offices. The estimate for 1952 will provide assistant postmasters at less than 44 percent of the first- and second-class post offices.

AVERAGE EMPLOYMENT AT FIRST- AND SECOND-CLASS POST OFFICES

	Postmasters	Assistant postmasters	Average number of personnel [1]	Administrative ratio
1948	7,954	3,415	322,589	1:28
1949	7,963	3,377	349,008	1:31
1950	8,297	3,540	350,042	1:30
1951 estimate	8,643	3,668	[2] 344,410	1:28
1952 estimate	8,727	3,753	357,483	1:29

[1] Excludes rural carriers.
[2] Includes comparative estimated supplemental for 1951.

2. *Mail handling and window services at post offices.*—This provides for the handling of incoming and outgoing mail, window services to the public, and the performance of administrative services in first-, second-, and third-class post offices. Further, the cost of printing, supplies, and equipment used in the operation of post offices is included.

An increase of about 2.8 percent in volume of postal business is expected in 1951 over 1950, and an increase of 3.7 percent is expected in 1952 over 1951. Curtailment of service and increased efficiency is reflected by some improvement in the hourly production rate. The 1952 estimate will provide for the same level of service as 1951. The cost per productive man-hour decreases in 1952 due to increased personnel turn-over savings.

COMPARISON OF AVERAGE EMPLOYMENT, PRODUCTIVE MAN-HOURS, AND WORKLOAD

	Average paid employment	Total productive man-hours (in thousands)	Workload (in millions) [1]	Average units per man-hour	Average salary per productive man-hour
1948	192,678	359,702	41,147.7	114	$1.4824
1949	206,465	386,533	44,529.2	115	1.7311
1950	208,278	388,239	46,749.2	120	1.8260
1951 estimate [2]	209,810	391,080	48,040.0	123	1.8598
1952 estimate	217,730	405,849	49,821.1	123	1.8554

[1] Workload consists of mail and special service transactions.
[2] Includes comparative estimated supplemental for 1951.

http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

3. *Mail collection and delivery*—(*a*) *Collection, delivery, and local transportation.*—Payments are included for city delivery services, mail and messenger service, truck fleet operation and maintenance, pneumatic tube service, and incidental expenses. Although there is no general workload factor which is equally applicable to all the delivery services and local transportation, the volume of mail is believed to be the best single factor for measurement of need. Curtailment of city delivery service, from two to one delivery a day in residential areas, largely accounts for the marked increase in the productive rate.

COMPARISON OF AVERAGE EMPLOYMENT, PRODUCTIVE MAN-HOURS, AND WORKLOAD

	Average paid employment	Total productive man-hours (in thousands)	Workload (in millions)[1]	Average units per man-hour	Average salary per productive man-hour
1948	118, 409	221, 395	40, 624. 7	183	$1. 4800
1949	130, 856	245, 198	43, 925. 1	179	1. 6976
1950	128, 747	240, 162	46, 193. 8	192	1. 7999
1951 estimate[2]	125, 015	233, 220	47, 468. 8	204	1. 8517
1952 estimate	130, 482	243, 415	49, 251. 0	202	1. 8475

[1] Workload consists of pieces of mail and the number of registered, insured, and collect-on-delivery transactions.
[2] Includes comparative estimated supplemental for 1951.

The increase for 1952 is to provide for handling the greater volume of mail, at the 1951 level of service, and for purchasing additional equipment. The estimate includes $11,579,000 for the purchase of 6,357 trucks for replacement of all overage and outworn vehicles, subject to a limitation of 17,500 on the over-all number of Government-owned trucks.

(*b*) *Special-delivery service.*—About 92 percent of all special-delivery articles are delivered at first-class post offices by salaried special-delivery carriers, and the remainder are delivered by messengers paid on a fee basis. In addition, vehicle maintenance allowances are provided for some salaried carriers at 90 cents per hour. The increase in the estimate for 1952 provides for the estimated increase in volume for this class of mail.

COMPARISON OF AVERAGE EMPLOYMENT, PRODUCTIVE MAN-HOURS AND WORKLOAD

	Average paid employment	Total productive man-hours (in thousands)	Number of units delivered (in thousands)[1]	Average units per man-hour
1948	5, 432	10, 112	107, 017	10. 6
1949	5, 098	9, 526	110, 454	11. 6
1950	4, 841	9, 024	106, 090	11. 8
1951 estimate	4 896	9, 126	118, 331	13. 0
1952 estimate	5, 063	9, 438	120, 788	12. 8

[1] Excludes units delivered at second-, third-, and fourth-class post offices on a fee basis.

(*c*) *Rural delivery service.*—A rural carrier's compensation is based on annual mileage plus years of service, and includes vehicle maintenance allowances at 8 cents a mile. The increase in the estimate for 1952 provides for normal extensions of service.

COMPARISON OF ROUTES, MILES, AND PERFORMANCE

	Number of routes	Average miles per route	Average number of families per mile	Annual salary and equipment maintenance cost per route mile	Annual average cost per family
1948	32, 412	45. 19	5. 5	$90. 20	$16. 31
1949	32, 559	45. 48	5. 5	103. 19	18. 65
1950	32, 623	45. 78	6. 0	108. 72	17. 99
1951 estimate	32, 723	46. 40	6. 0	111. 07	18. 53
1952 estimate	32, 856	46. 60	6. 0	111. 25	18. 59

4. *Mail handling in transit.*—Postal employees handle and distribute mail while it is being transported between post offices on railroads and in highway post office busses. The increase in the 1952 estimate will provide additional personal services to care for the estimated increase in the volume of nonlocal mail.

COMPARISON OF AVERAGE EMPLOYMENT, PRODUCTIVE MAN-HOURS, AND CUBIC FEET OF NONLOCAL MAIL

	Average paid employment	Total productive man-hours (in thousands)	Cubic feet of nonlocal mail (in thousands)	Average cubic feet per man-hour	Average salary per productive man-hour
1948	32, 070	59, 902	721, 295	12. 04	$1. 7740
1949	33, 977	63, 611	774, 162	12. 17	2. 0047
1950	34, 546	64, 346	748, 883	11. 64	2. 0795
1951 estimate[1]	35, 458	66, 064	817, 825	12. 38	2. 1061
1952 estimate	36, 729	68, 431	838, 670	12. 26	2. 0912

[1] Includes comparative estimated supplemental for 1951.

5. *General services*—(*a*) *Operation and care of buildings.*—Post office operations in the field occupy space in 3,169 Government-owned public buildings and 22,436 leased and rented buildings. Reorganization Plan No. 18 transferred the operation of 93 Government-owned public buildings from the Post Office Department to the General Services Administration. The increase in the estimate for 1952 will provide for badly needed space for post offices, railway and airport post office terminals, for additional supplies for post office buildings, and for additional mechanics.

DATA RELATING TO OPERATION OF GOVERNMENT-OWNED BUILDINGS

	Number of Government-owned buildings	Number of cubic feet (in millions)	Operating expenditures per cubic foot (in cents)	
			Payroll	Supplies
1948	3, 262	1, 285	3. 43	0. 58
1949	3, 262	1, 285	4. 14	. 64
1950	3, 262	1, 285	4. 33	. 63
1951 estimate	3, 169	1, 029	4. 42	. 66
1952 estimate	3, 169	1, 029	4. 44	. 67

No significant workload data concerning space or the number of custodial employees in rented or leased quarters are available. However, the size of this operation is indicated by the following:

NUMBER OF LEASED AND RENTED POST OFFICE QUARTERS, INCLUDING GARAGES[1]

	Number	Rent	Average rent per unit
1948	20, 610	$15, 454, 056	$750
1949	20, 000	16, 456, 289	784
1950	21, 342	20, 328, 083	952
1951 estimate	21, 984	24, 277, 987	1, 104
1952 estimate	22, 436	27, 674, 229	1, 233

[1] Excludes allowances and space occupied by fourth-class offices, terminal space, and the cost thereof.

(*b*) *Acquisition and repair of mail bags and locks.*—Mail bags and locks needed for the transportation of the mails are either purchased, or manufactured in the Department's equipment shop.

MAIL BAG AND LOCK PRODUCTION DATA

	Total productive man-hours	Production program				Units per productive man-hour
		Mail bags		Locks manufactured	Total	
		Manufactured	Repaired			
1948	943, 900	705, 080	5, 864, 432	488, 933	7, 058, 445	7. 478
1949	972, 518	1, 132, 203	5, 405, 560	656, 331	7, 194, 094	7. 415

TRANSPORTATION OF MAILS

Transportation of Mails, Post Office Department—

For payments for transportation of domestic and foreign mails by air, land, and water transportation facilities, including current and prior fiscal years settlements with foreign countries for handling of mail; and for expenses, exclusive of personal services, necessary for operation of Government-owned highway post office transportation service; [$400,000,000] *$467,539,000. (5 U. S. C. 372; 39 U. S. C. 424, 434, 470, 481, 483, 484, 485, 486, 487, 487a, 488, 488a, 489, 493, 494, 505, 539, 540, 541, 565, 569, 651, 669, 802; 49 U. S. C. 481, 485, 485b, 486; Act of June 27, 1950, Public Law 577; Post Office Department Appropriation Act, 1951.)*

Appropriated 1951,[a] **$438,000,000** Estimate 1952, **$467,539,000**

[a] Includes $38,000,000 appropriated in the Supplemental Appropriation Act, 1951.

FUNDS AVAILABLE FOR OBLIGATION

	1950 actual	1951 estimate	1952 estimate
Appropriation or estimate		$438,000,000	$467,539,000
Comparative transfer from—			
"Detroit River service"	$12,500		
"Star route service"	33,103,602		
"Powerboat service"	2,591,681		
"Railroad and messenger service"	227,456,750		
"Electric car service"	257,473		
"Foreign mail transportation"	11,602,993		
"Amounts due foreign countries"	27,484,500		
"Foreign air mail service"	60,999,100		
"Domestic air mail service"	68,531,245		
Total obligations	432,039,844	438,000,000	467,539,000

PROGRAM AND PERFORMANCE

Authority is provided for all payments on contracts for transportation of the mails and for expenses, excluding personal services, of Government-owned highway post office busses. A supplemental estimate of appropriation for 1951 of $152,000,000 to cover increased railroad rates granted by the Interstate Commerce Commission is included in the discussion and tables on performance but is not included in the obligation schedules.

1. *Domestic transportation of mail—(a) Transportation by powerboat.*—The powerboat service provides for transportation of mail by boat to Alaska, Hawaii, and to post offices located on inland waters of the United States and Territories. Most of this service is paid for under pound-mile rate contracts, and the remainder is covered by trip-mileage contracts.

DATA RELATING TO TRANSPORTATION BY POWERBOAT[1]

	Mail carried at pound rates (to Hawaii and Alaska)			Mail carried at trip-mileage rates		
	Pounds (in thousands)	Payments	Average per pound (cents)	Miles of travel (in thousands)	Payments	Average per mile (cents)
1948	29,121	$1,476,685	5.07	1,357	$764,077	56.31
1949	22,467	1,193,588	5.31	1,298	711,584	54.83
1950	33,582	1,759,710	5.24	1,260	831,971	66.04
1951 estimate	34,490	1,779,534	5.16	1,223	803,902	65.73
1952 estimate	35,669	1,840,300	5.16	1,202	825,077	68.64

[1] Excludes Detroit River service.

(b) Transportation by star routes.—This service is maintained primarily for post offices which are without adequate railroad service; it also supplements highway post office service. Star route contracts are generally awarded for 4-year terms to the lowest responsible bidder tendering performance guaranties. Air star-route service may be established where ground transportation is impracticable, but only with due consideration for cost and speed. The increase in the estimate for 1952 is due largely to the establishment of new routes at higher rates.

Federal Reserve Bank of St. Louis

DATA RELATING TO TRANSPORTATION BY STAR ROUTE [1]

	Number of routes	Annual miles traveled (in thousands)	Payments	Average per route	Average pay per mile (in cents)
1948	11,356	213,857	$22,803,725	$2,008	10.66
1949	11,471	219,654	27,865,431	2,429	12.69
1950	11,597	229,108	31,651,254	2,729	13.81
1951 estimate	11,897	238,986	34,265,900	2,880	14.34
1952 estimate	12,174	250,697	36,903,000	3,031	14.72

[1] Although star route service, Alaska, was not combined with general star route service until 1949, for purposes of comparison it has been included in 1948.

(*c*) *Transportation by railroad, electric car, and highway post offices.*—The estimates for 1952 will provide for increased mail volume and the annualization of highway post-office routes established in 1951.

The number of cubic-foot-miles has increased very rapidly because of the increase in the number of pieces and the package size of parcel post following the increase in express rates. Obligations shown in the obligation schedules include the 25-percent interim rate increase granted the railroads by the Interstate Commerce Commission but do not include the Commission's settlement order for an additional $152,000,000 to cover the period February 19, 1947, to December 31, 1950. The table of performance below includes both the 25-percent interim increase and the $152,000,000. A new rate structure will be established to be effective from January 1, 1951. The estimates for January–June 1951 and for the fiscal year 1952 have been developed on the basis of the present rates.

DATA RELATING TO TRANSPORTATION BY RAILROAD AND ELECTRIC CAR [1]

	Cubic-foot-miles of nonlocal mail (in millions)	Obligations (in thousands)			Average per million cubic-foot miles
		Railroad	Electric car	Total	
1947	315,755	[2] $148,746	$217	$148,963	$471.77
1948	375,284	[2] 224,813	210	225,023	599.61
1949	425,901	[2] 261,035	272	261,307	613.54
1950	413,188	[2] 269,502	257	269,759	652.87
1951 estimate	452,005	[2] 261,227	217	261,444	578.40
1952 estimate	463,532	253,592	196	253,788	547.51

[1] Excludes all air mail and incoming foreign mail.
[2] Includes estimated supplemental appropriation for rate increase ordered on Dec. 4, 1950, by the Interstate Commerce Commission for the period Feb. 19, 1947, through Dec. 31, 1950.

The highway post office service has been expanded rapidly where mail distribution en route is deemed necessary and where railroad service has been discontinued, or has never been available.

	Government operated highway post offices			Contract highway post offices		
	Miles	Operation and maintenance expenses [1]	Average per mile (cents)	Number of contracts	Contract payments	Average per route
1948	390,524	$43,325	11.09	1	$30,096	$30,096
1949	2,253,349	231,923	10.29	3	44,569	14,856
1950	4,929,705	560,975	11.38	16	265,831	16,614
1951 estimate	6,811,250	783,772	11.51	16	478,428	29,902
1952 estimate	7,185,500	881,972	12.27	16	481,028	30,064

[1] Excludes personal services, depreciation of equipment, and administrative expenses.

(*d*) *Domestic air mail.*—Rates of pay to air carriers, as prescribed by the Civil Aeronautics Board, have been rising for several years, and estimates for the 5 years shown below are still subject to revision, because they are based on temporary rates pending establishment of permanent rates by the Civil Aeronautics Board. The general increase in the volume of mail will be reflected in air mail volume with a resulting decrease in cost per piece.

ESTIMATED DATA RELATING TO THE DOMESTIC AIR MAIL SERVICE

	Pieces of mail (in thousands)	Payments to carriers	Average per piece (cents)
1948	796,448	$47,434,000	5.96
1949	856,419	63,257,536	7.38
1950	852,706	68,531,245	8.04
1951	1,061,700	72,713,699	6.85
1952	1,231,000	74,065,000	6.02

2. *Foreign transportation of mail*—(*a*) *Surface transportation.*—This activity includes the transportation of mail by ocean vessel to Puerto Rico, to the Virgin Islands, and to foreign countries.

	Number of pounds (in thousands)	Payments to carriers	Average per pound (cents)
1948	577,646	$27,887,138	4.83
1949	474,843	13,663,999	[1] 2.88
1950	352,720	11,602,993	[1] 3.29
1951 estimate	295,611	13,298,232	4.50
1952 estimate	295,635	13,306,000	4.50

[1] The lower average cost per pound reflects the reimbursement to the Post Office Department by the Economic Cooperation Administration for a portion of the transportation cost of gift parcels.

(*b*) *Amounts due foreign countries.*—Payment of amounts due foreign countries for the transportation and handling of mail of United States origin is made in accordance with international postal conventions or agreements.

(*c*) *Foreign air mail.*—The United States pays air carriers for the transportation of air mail to foreign countries. Rates are fixed by the Civil Aeronautics Board either on a pound-mile basis or on an airplane-mile basis, with provision for additional compensation per pound-mile when the mail load exceeds specified weights. Obligations for all years shown below are based on temporary rates only and are subject to change when Civil Aeronautics Board establishes permanent rates.

ESTIMATED DATA RELATING TO THE FOREIGN AIR MAIL SERVICE

	Pieces (in thousands)	Payments to carriers	Average per piece (cents)
1948	120,779	$45,378,000	37.57
1949	120,163	60,365,840	50.02
1950	121,925	60,999,100	50.03
1951	119,851	65,530,000	54.68
1952	132,201	72,381,000	54.75

OBLIGATIONS BY ACTIVITIES

Description	1950 actual	1951 estimate	1952 estimate
1. Domestic transportation of mail:			
(*a*) Transportation by powerboat	$2,604,181	$2,623,500	$2,705,500

"Indemnities, international mail"	50,000		
"Indemnities, domestic mail"	4,574,640		
"Unpaid money orders"	627,506		
Total obligations	5,835,025	5,500,000	5,807,000

PROGRAM AND PERFORMANCE

1. *Personal and property damage claims.*—Claims under $1,000 and compromise settlements, approved by a Federal court in any amount, arising from the damage to persons and property in the operation of the Post Office Department, are provided for under this activity.

	Number of claims paid	Amount	Average amount per claim
1948	3,773	$270,000	$72
1949	5,931	588,125	99
1950	5,368	507,879	95
1951 estimate	5,582	528,000	95
1952 estimate	5,582	528,000	95

2. *Adjustments of losses in the accounts of postmasters and others.*—The Postmaster General is authorized to pay postmasters and others for the amount of public funds and stamp stock lost through burglary, fire, or other unavoidable casualty when the loss does not exceed $10,000. Funds needed for this purpose depend upon unpredictable events, and as the funds available in 1951 will not allow the payment of all claims arising in that year, the estimate for 1952 has been increased to the 1950 level.

	Number of claims paid	Amount	Average amount per claim
1948	339	$129,832	$383
1949	214	75,000	350
1950	353	75,000	212
1951 estimate	311	66,000	212
1952 estimate	353	75,000	212

3. *Indemnities for losses of registered, insured, and c. o. d. domestic mail.*—Indemnities are paid to postal users for damage or loss of paid registered, insured, or collect-on-delivery mail, and for failure on the part of the Post Office to remit collect-on-delivery charges. Because it is estimated that the funds available in 1951 will not allow the payment of all claims arising in prior years, some of these deferred claims were paid from the funds available in 1950. The 1952 estimate reflects the number of claims arising from the higher estimated volume of mail.

	Registered, insured and c. o. d. transactions (in thousands)	Claims per million transactions	Total amount paid for claims	Number of claims paid	Average amount per claim
1948	321,575	1,234	$3,520,073	396,884	$8.87
1949	347,301	1,532	4,587,476	532,031	8.62
1950	329,063	1,687	4,574,640	555,054	8.24
1951 estimate	334,390	1,537	4,240,000	513,880	8.25
1952 estimate	340,450	1,613	4,532,000	549,143	8.25

4. *Indemnities for losses of registered, insured, and c. o. d. international mail.*—Limited indemnities are paid for the loss or damage of international registered, insured, and collect-on-delivery mails as provided by convention, treaty, or agreement.

	Number of claims paid	Amount	Average amount per claim
1948	2,465	$30,000	$12.17
1949	3,257	41,371	12.70
1950	4,848	50,000	10.31
1951 estimate	4,268	44,000	10.31
1952 estimate	4,848	50,000	10.31

5. *Claims for money orders invalid by reason of age.*—Reimbursements are made to holders of money orders which are not paid within one year after the month of issue. It is, in effect, an authorization to make payment out of money held in trust but which has become part of postal funds.

	Number of money orders paid	Amount	Average amount per claim
1948	39,596	$1,296,425	$32.74
1949	46,243	836,026	18.08
1950	38,659	627,506	16.23
1951 estimate	38,478	622,000	16.16
1952 estimate	38,478	622,000	16.16

GENERAL PROVISIONS

SEC. 202. Appropriations made in this title for general administration and for postal operations shall be available for examination of estimates of appropriations in the field.

SEC. 203. Appropriations made in this title, except those for payment of claims, shall be available for expenditures in connection with accident prevention.

Sec. 204. Appropriations made in this title available for expenses of travel shall be available, under regulations prescribed by the Postmaster General, for expenses of attendance at meetings of technical, scientific, professional, or other similar organizations concerned with the function or activity for which the appropriation concerned is made.

SEC. [204] *205.* The Postmaster General may authorize the sale of post route and rural delivery maps, opinions of the Solicitor, and transcripts of hearings before trial examiners at such rates as he determines to be fair and reasonable.

This title may be cited as the "Post Office Department Appropriation Act, [1951] *1952*".

PROPOSED FOR LATER TRANSMISSION

General administration.—A supplemental appropriation of $35,500 is estimated for 1951 to provide for the increased cost and volume of printing and supplies.

Postal operations.—A supplemental appropriation of $22.1 million is estimated for 1951 to meet the increased cost of handling an unanticipated increase in volume of mail and special services.

Transportation of mails.—A supplemental appropriation for 1951 of $152 million is included in the budget to cover the estimated increase in rail mail pay rates ordered by the Interstate Commerce Commission for the period February 19, 1947, through December 31, 1950.[1] No amount has been included for 1951 to cover an increase in the volume of mail because the rail mail pay rates to be effective after January 1, 1951, have not been fixed by the Interstate Commerce Commission.

Postal rate increase.—The Postmaster General has requested the Interstate Commerce Commission for an increase in parcel post rates. Legislation is also proposed to increase other postal rates to the extent required to reduce the contribution from the general fund for the deficiency of postal revenue to about $160 million, such increases to be effective July 1, 1951. The contribution thereafter will be restricted to the financing of estimated cost of services, such as penalty mail and subsidies to air carriers, not properly chargeable to regular postal patrons.

[1] The Interstate Commerce Commission order dated Dec. 4, 1950, increased rail-mail pay rates $312,000,000 over the level in effect Feb. 19, 1947, including the 25 percent interim rate increase authorized Dec. 4, 1947, under which $160,000,000 will have been paid through Dec. 31, 1950, leaving $152,000,000 for which the supplemental is estimated.

SALARIES AND EXPENSES

Salaries and Expenses, Department of State—

For necessary expenses of the Department of State not otherwise provided for, including [personal services in the District of Columbia;] expenses authorized by the Foreign Service Act of 1946, as amended (22 U. S. C. 801–1158), not otherwise provided for; expenses of the National Commission on Educational, Scientific, and Cultural Cooperation as authorized by sections 3, 5, and 6 of the Act of July 30, 1946 (22 U. S. C. 287o, 287q, 287r); expenses of attendance at meetings concerned with activities provided for under this appropriation; *purchase (not to exceed four) and* hire of passenger motor vehicles; maintenance and operation of aircraft outside the continental United States; [printing and binding, including] printing and binding outside the continental United States without regard to section 11 of the Act of March 1, 1919 (44 U. S. C. 111); services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a); [not to exceed $1,000 for payment of tort claims pursuant to law (28 U. S. C. 2672); health service program as authorized by law;] purchase of uniforms; insurance of official motor vehicles in foreign countries when required by law of such countries; dues for library membership in organizations which issue publications to members only, or to members at a price lower than to others; rental of tie lines and teletype equipment; employment of aliens, by contract, for services abroad; refund of fees erroneously charged and paid for passports; establishment, maintenance, and operation of passport and despatch agencies; examination of estimates of appropriations in the field; ice and drinking water for use abroad; excise taxes on negotiable instruments abroad; loss by exchange; radio communications; payment in advance for subscriptions to commercial information, telephone and similar services abroad; relief, protection, and burial of American seamen, and alien seamen in foreign countries and in the United States Territories and possessions; expenses incurred in acknowledging services of officers and crews of foreign vessels and aircraft in rescuing American seamen, airmen, or citizens from shipwreck or other catastrophe abroad; rent and expenses of maintaining in Egypt, Morocco, and Muscat, institutions for American convicts and persons declared insane by any consular court, and care and transportation of prisoners and persons declared insane; expenses, as authorized by law (18 U. S. C. 3192), of bringing to the United States from foreign countries persons charged with crime; and procurement by contract or otherwise, of services, supplies, and facilities, as follows: (1) translating, (2) analysis and tabulation of technical information, (3) preparation of special maps, globes, and geographic aids, (4) maintenance, improvement, and repair of diplomatic and consular properties in foreign countries, including minor construction on Government-owned properties, (5) not to exceed $200,000 for maintenance and operation of commissary and mess services, (6) fuel and utilities for Government-owned or leased property abroad, and (7) rental or lease, for periods not exceeding ten years, of offices, buildings, grounds, and living quarters for the use of the Foreign Service, for which payments may be made in advance; [$77,800,000] *$77,400,000*: *Provided*, That pursuant to section [8 of the Act of August 2, 1946 (5 U. S. C. 118d–1)] *201 (c) of the Act of June 30, 1949 (41 U. S. C. 231c)*, passenger motor vehicles in possession of the Foreign Service abroad may be exchanged or sold and the exchange allowances or proceeds of such sales shall be available without fiscal year limitation for replacement of an equal number of such vehicles and the cost, including the exchange allowance, of each such replacement shall not exceed $3,000 in the case of the chief of mission automobile at each diplomatic mission [and $1,400 in the case of all other such vehicles except station wagons: *Provided further*, That of the amount appropriated herein, not to exceed $30,000 shall be expended for carrying out the provisions of the Act of July 31, 1945 (5 U. S. C. 168d)]. (*Department of State Appropriation Act, 1951.*)

Appropriated 1951, [a] **$78,600,000** Estimate 1952, [b] **$77,400,000**
Appropriated (adjusted) 1951, [a] **$78,547,600**

[a] Includes $800 600 appropriated in the Supplemental Appropriation Act, 1951.

[b] Excludes $3,779,733 for activities transferred in the estimates to appropriations as follows:

"International information and educational activities, Department of State"	$3,624,000
"Operating expenses, General Services Administration"	50,726
"General supply fund, General Services Administration"	3,207
"Missions to international organizations, Department of State"	28,800
"Expenses, Displaced Persons Commission"	73,000

The amounts obligated in 1950 and 1951 are shown in the schedule as comparative transfers.

NOTE.—Whenever the Secretary of State, in his discretion, procures information on behalf of corporations, firms, and individuals, the expense of cablegrams and telephone service involved may be charged against the respective appropriations for the service utilized; and reimbursement therefor shall be required from those for whom the information was procured and, when made, be credited to the appropriation under which the expenditure was charged (5 U. S. C. 169).

PROGRAM AND PERFORMANCE

Separately financed programs of the Department such as international information and education and certain foreign-aid programs receive some program and administrative support from activities conducted under this appropriation. The cost of such support, however, is included in the appropriation for the applicable program and does not appear as a direct obligation against this appropriation.

1. *Executive direction and policy formulation.*—The Secretary is assisted in formulation of policy and direction of the Department's activities by the Under Secretary, Legal Adviser, Deputy Under Secretary, and the offices for economic and intelligence functions.

2. *Conduct of diplomatic and consular relations with foreign countries.*—The increase in 1952 over 1951 in direct obligations is principally for the following items in this activity: (1) Transfer of nonoccupation expenses of United States consular activities in Germany from the German economy to this appropriation; (2) expansion of the operations of the Bureaus of European Affairs, Far Eastern Affairs, and Near Eastern, South Asian, and African Affairs; (3) additional costs due to revaluation of the Polish zloty; and (4) increased telegraphic expense. Four regional bureaus and the Bureau of German Affairs, with the assistance of the Office of Consular Affairs, directly or through our foreign missions, conduct foreign relations with the countries in their respective areas. Activities abroad include the representation of the United States and its citizens, political and economic negotiations and reporting; issuance of passports and visas; shipping, veterans, and citizenship services; and personal and property protection and welfare activities for American citizens.

3. *Conduct of diplomatic relations with international organizations.*—This activity involves the development and coordination, in collaboration with other interested

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

Government agencies, of United States policy on political and security issues and in such specialized fields as world health, education, labor, and refugee activities.

4. *Domestic public information and liaison.*—Through such media as the press, radio, motion pictures, television, and lectures, information is disseminated to the public on the foreign affairs of the United States. Provision is also made for analyzing and interpreting public sentiment for use in policy formulation.

5. *Central program services.*—World-wide administrative and staff services are provided for the Department. These comprise cryptographic services; translating and interpreting services; coordination of politico-economic reporting; acquisition and administration of physical properties of the United States abroad; training of personnel, particularly for service abroad; formulation and implementation of policies governing the administration of the Foreign Service; and developing security policy and prescribing security measures for the Department.

SELECTED WORKLOADS

	1950 actual	1951 estimate	1952 estimate
Politico-economic reports	44,726	50,000	52,000
Translation services (words)	6,951,000	7,600,000	8,000,000
Number of trainees	3,096	3,539	3,714
Hours of instruction for trainees	427,175	496,275	514,275
Personnel investigations	7,818	10,025	10,039

6. *Administrative and staff activities.*—Provides world-wide budgetary, fiscal, organizational, personnel, and other administrative services for the Department; and the over-all direction of a global communication system for all civilian activities of the Government. In addition, the direction of procurement and distribution of all materials and nonpersonal services is included in this activity.

occasions of visits of prominent citizens or American vessels or aircraft; (2) entertainment necessary in the conduct of official duties; and (3) purchase of flowers, wreaths, and similar tokens for presentation in accordance with local custom on appropriate occasions. Allowances for official representation, together with other similar measures, are designed to remove personal wealth as a virtual prerequisite to appointment in the Service.

OBLIGATIONS BY ACTIVITIES

Representation by the Foreign Service of the United States abroad—1950, $642,952 1951, $675,000; 1952, $1,000,000.

OBLIGATIONS BY OBJECTS

07 Other contractual services—1950, $642,952; 1951, $675,000; 1952, $1,000,000.

PAYMENT TO FOREIGN SERVICE RETIREMENT AND DISABILITY FUND

Payment to Foreign Service Retirement and Disability Fund—

For financing the liability of the United States, created by the Foreign Service Act of 1946 (22 U. S. C. 1061–1116), $4,627,000, which amount shall be placed to the credit of the "Foreign Service retirement and disability fund."

Estimate 1952, **$4,627,000**

FUNDS AVAILABLE FOR OBLIGATION

Appropriation or estimate—1950, $2,187,000; 1952, $4,627,000.

PROGRAM AND PERFORMANCE

These funds are paid into the Foreign Service retirement and disability trust fund, established to provide annuities for Foreign Service officers.

OBLIGATIONS BY ACTIVITIES

United States contribution to the Foreign Service retirement and disability fund—1950, $2,187,000; 1952, $4,627,000.

OBLIGATIONS BY OBJECTS

11 Grants, subsidies, and contributions (payment to trust funds)—1950, $2,187,000; 1952, $4,627,000.

ACQUISITION OF BUILDINGS [FUND] *ABROAD*

Acquisition of Buildings Abroad—

For carrying into effect the Act of July 25, 1946 (22 U. S. C. 295b), including the initial alterations, repair, and furnishing of buildings acquired under said Act, [$6,500,000] *$9,000,000*, which is exclusively for expenditure under the provisions of said Act which relate to payments representing the value of foreign property or credits: *Provided*, That, when specifically authorized by the Secretary of State or such Assistant Secretary as he may designate, section 6 of the Act of May 7, 1926, may be construed as including leaseholds of not less than ten years. (*Department of State Appropriation Act, 1951.*)

Appropriated 1951, **$6,500,000** Estimate 1952, **$9,000,000**

PROGRAM AND PERFORMANCE

This program is for acquisition and construction of office buildings and living quarters abroad for the United States Government. Living quarters are purchased either where necessary for representational purposes or where special housing problems exist.

The use of foreign currency credits held by the United States (representing payments resulting from lend-lease and surplus property settlements) is contemplated for the entire 1952 estimate.

PROGRAM AND PERFORMANCE

Funds are provided to pay the United States share of the expenses of the international organizations in which it participates.

Contributions are made to the United Nations, 6 specialized agencies, 7 inter-American organizations, 13 other international organizations, and 2 activities of a non-organizational character (Gorgas Memorial Laboratory and payment to the Government of Panama). This estimate represents an over-all decrease of approximately $24,000,000 from the estimated requirements for fiscal year 1951, primarily the result of the completion by the International Refugee Organization of the major part of its responsibilities in the settlement and repatriation of its displaced persons and the withdrawal of the United States from the International Office of Public Health, the International Penal and Penitentiary Commission, and the Inter-American Radio Office.

OBLIGATIONS BY ACTIVITIES

Total obligations	1,425,696	1,441,082	1,570,000

PROGRAM AND PERFORMANCE

The need for missions of this character varies with each of the organizations. The missions (1) insure effective participation and presentation of United States viewpoints in the organizations, (2) provide continuous reporting on the activities and program progress of the organizations, (3) facilitate contacts between organizations and individuals in the United States and the international secretariats, and (4) maintain relationships with delegations of other governments.

Two new missions, to represent the United States in the Inter-American Juridical Committee and in the Council of the Organization of American States, are included for the first time. In the interest of greater efficiency and economy, a number of existing activities located in Geneva have been consolidated into one mission, the United States mission to international organizations, resident in Geneva.

OBLIGATIONS BY ACTIVITIES

Description	1950 actual	1951 estimate	1952 estimate
1. United States mission to the United Nations	$1,127,123	$1,121,082	$1,140,500

PROGRAM AND PERFORMANCE

This provides for expenses of United States participation in international activities which arise from time to time in the conduct of foreign affairs and for which specific appropriations have not been provided. It is used to finance (1) participation in international conferences; (2) United States missions on special assignment; and (3) participation in new or temporary international organizations.

OBLIGATIONS BY ACTIVITIES

Description	1950 actual	1951 estimate	1952 estimate
1. Participation in international conferences:			
(a) Meetings of international organizations	$1,160,370	$1,300,000	$1,534,000
(b) Other international conferences	264,817	500,000	400,000
Total, participation in international conferences	1,425,187	1,800,000	1,934,000
2. United States missions on special assignment:			
(a) Organization of Consultation Investigating Committee, Organization of American States	2,000		
(b) Italian-United States Conciliation Commission	72,643		
(c) Provisional Frequency Board, International Telecommunication Union	47,000

INTERNATIONAL BOUNDARY AND WATER COMMISSION, UNITED STATES AND MEXICO

INTRODUCTORY STATEMENT

The Commission consists of a United States section, with headquarters at El Paso, Tex., and a Mexican section, with headquarters at Ciudad Juarez, Mexico, and has the status of an international body. It was created by the Governments of the United States and Mexico to provide a means for the practical solution of boundary problems, requiring joint action by the two Governments.

For expenses necessary to enable the United States to meet its obligations under the treaties of 1884, 1889, 1905, 1906, 1933, and 1944 between the United States and Mexico, and to comply with the [Act approved August 19, 1935, as amended] *other laws applicable to the United States Section, International Boundary and Water Commission, United States and Mexico,* [(22 U. S. C. 277–277d)] including operation and maintenance of the Rio Grande rectification, canalization, flood control, bank protection, boundary fence, and sanitation projects; [examinations, preliminary surveys, and investigations;] detailed plan preparation and construction (including surveys and operation and maintenance and protection during construction); Rio Grande emergency flood protection; *expenditures for the purposes set forth in sections 101 through 104 of Public Law 786, approved September 13, 1950;* [construction and operation of gaging stations; purchase and exchange of map-reproduction machines and other equipment and machinery; personal services in the District of Columbia; services in accordance with section 15 of the Act of August 2, 1946 (5 U. S. C. 55a), at rates for individuals not in excess of $100 per diem; travel expenses, including, in the discretion of the Commissioner, expenses (not to exceed $500) of attendance at meetings of organizations concerned with the activities of the International Boundary and Water Commission which may be necessary for the efficient discharge of the responsibilities of the Commission; printing and binding;] purchase of four passenger motor vehicles for replacement only; [hire, with or without personal services, of work animals, and animal-drawn and motor-propelled vehicles and aircraft and equipment; acquisition by donation, purchase, or condemnation, of real and personal property, including expenses of abstracts and certificates of title; purchase of ice and drinking water; inspection of equipment, supplies, and materials by contract; drilling and testing of foundations and dam sites, by contract if deemed necessary,] purchase of planographs and lithographs; and leasing of private property to remove therefrom sand, gravel, stone, and other materials, without regard to section 3709 of the Revised Statutes, as amended (41 U. S. C. 5); [payment of tort claims pursuant to law (28 U. S. C. 2672), and the Act of August 27, 1935, as amended (22 U. S. C. 277e); and payment of official telephone service in the field in case of official telephones installed in private houses when authorized under regulations established by the Commissioner;] as follows: (*Department of State Appropriation Act, 1951.*)

Total obligations	1,102,182	900,000	1,200,000

PROGRAM AND PERFORMANCE

This appropriation finances the nonconstruction activities of the United States section of the Commission.

1. *Preliminary surveys and investigations.*—Preliminary studies are made prior to authorization of the preparation of detail plans which when authorized are financed under the construction appropriation.

2. *Operation and maintenance.*—This consists of operation and maintenance of completed projects or segments of projects under construction. The lower Rio Grande flood control project, the El Paso rectification and canalization projects, and portions of the western land boundary fence project are passing from construction to the operation and maintenance phase. Under the obligations of the water treaty, gaging stations on the international rivers and their tributaries are being rehabilitated. The Morelos Dam will be placed in operation by Mexico, supervision of which by the United States section is obligatory under the water treaty, and, further, the Commission will assume operation and maintenance of the Douglas-Agua Prieta sanitation project and of the Alamo Canal and its appurtenant facilities.

3. *General administration and engineering.*—This consists of administration of treaties and laws; studies of river boundary changes; stream flow measurement and accounting for water usage; general supervision of all activities, and administrative services.

CONSTRUCTION

Construction, International Boundary and Water Commission, United States and Mexico—

For detail plan preparation and construction of projects authorized by the Convention concluded February 1, 1933, between the United States and Mexico, the Acts approved August 19, 1935, as amended (22 U. S. C. 277–277[d]*f*), August 29, 1935 ([Public Law 392] *49 Stat. 961*), June 4, 1936 ([Public Law 648] *49 Stat. 1463*), June 28, 1941 (22 U. S. C. 277f), *September 13, 1950* (*Public Law 786*), and the projects stipulated in the treaty between the United States and Mexico signed at Washington on February 3, 1944, [$3,000,000] *$16,200,000*, to remain available until expended: *Provided*, That no expenditures shall be made for the lower Rio Grande flood-control project for construction on any land, site, or easement in connection with this project except such as has been acquired by donation and the title thereto has been approved by the Attorney General of the United States: *Provided further*, That expenditures for the Rio Grande bank-protection project shall be subject to the provisions and conditions contained in the appropriation for said project as provided by the Act approved April 25, 1945 (59 Stat. 89): *Provided further*, That unexpended balances of appropriations for construction under the International Boundary and Water Commission available for the next preceding fiscal year shall be merged with this appropriation and shall continue available until expended. (*Department of State Appropriation Act, 1951.*)

Appropriated 1951, **$3,000,000** Estimate 1952, **$16,200,000**

PROGRAM AND PERFORMANCE

1. *Rio Grande dams.*—Plans and specifications for Falcon Dam, located near the boundary line between Starr and Zapata Counties, Tex., have been agreed to by the two sections of the Commission. Construction has been initiated and will be carried on during all of fiscal year 1952. The estimated United States share of the cost is $36,000,000. The water treaty of February 3, 1944, requires that the dam be completed by November 8, 1953. Detailed studies will be continued on the proposed dam in the Big Bend area.

2. *Lower Rio Grande flood control.*—The work on floodways and levees in the United States, initiated in 1933, will continue at the 1951 level.

3. *Rio Grande bank protection.*—This work, closely related to the lower Rio Grande flood-control project, consists of the construction of revetments to protect Federal levees and other public property. Twenty-five percent of the cost is contributed by local interests.

4. *Rio Grande rectification.*—Due to degrading of the river channel, grade-control devices will be installed below one of the river structures used to divert water for irrigation from the river, and rock revetments will be placed along those reaches of the low-flow channel where serious erosion has occurred.

5. *Rio Grande canalization.*—Control and canalization of the river for a distance of 100 miles from Caballo Dam in New Mexico to the international boundary at El Paso, Tex., is required for the delivery of water to Mexico under the terms of the Convention of 1906. River channel degradation requires the installation of grade-control devices below two river structures and rock revetment of many reaches of the low flow channel in order to prevent serious erosion.

6. *Western land boundary fence.*—Further work on this project will be deferred in 1952.

7. *Detail plans preparation.*—Plans for projects not yet under construction include two projects specifically provided for in the water treaty of 1944: lower Colorado River flood control and the Tijuana River development.

OBLIGATIONS BY ACTIVITIES

AMERICAN SECTIONS, INTERNATIONAL COMMISSIONS

Salaries and Expenses, American Sections, International Commissions—

For expenses necessary to enable the President to perform the obligations of the United States pursuant to conventions between the United States and Canada signed May 26, 1930 (50 Stat. 1355) and January 29, 1937 (50 Stat. 1351), [and] treaties between the United States and Great Britain, in respect to Canada, signed January 11, 1909 (36 Stat. 2448) and February 24, 1925 (44 Stat. 2102), *and Convention between the United States and Costa Rica signed May 31, 1949,* including [personal services in the District of Columbia;] stenographic reporting services by contract; [printing and binding;] hire of passenger motor vehicles; the United States share of the expenses of the International Pacific Salmon Fisheries Commission [and], the International Fisheries Commission, *and the Inter-American Tropical Tuna Commission,* which except for the expenses of the members, may be advanced to the respective Commissions; [$508,000] *$870,000,* to be disbursed under the direction of the Secretary of State and to be available also for additional expenses of the American Sections, International Commissions, as hereinafter set forth:

International Joint Commission, United States and Canada, the salary of one Commissioner on the part of the United States who shall serve at the pleasure of the President (the other Commissioners to serve in that capacity without compensation therefor); salaries of clerks and other employees appointed by the Commissioners on the part of the United States with the approval solely of the Secretary of State; travel expenses and compensation of witnesses in attending hearings of the Commission at such places in the United States and Canada as the Commission or the American Commissioners shall determine to be necessary; and special and technical investigations in connection with matters falling within the Commission's jurisdiction, including purchase [for replacement only] of [two] *one* passenger [automobiles] *automobile*: *Provided,* That the Secretary of State is authorized to transfer to any department or independent establishment of the Government, with the consent of the head thereof, funds from this appropriation for direct expenditure by such department or establishment for such investigations.

International Boundary Commission, United States, Alaska, and Canada, the completion of such remaining work as may be required under the award of the Alaskan Boundary Tribunal and the existing treaties between the United States and Great Britain; commutation of subsistence to employees while on field duty, not to exceed $6 per day each (but not to exceed $3 per day each when a member of a field party and subsisting in camp); hire of freight and passenger motor vehicles from temporary field employees; and payment for timber necessarily cut in keeping the boundary line clear. (*Department of State Appropriation Act, 1951.*)

Appropriated 1951, **$508,000** Estimate 1952, **$870,000**

PROGRAM AND PERFORMANCE

1. *International Joint Commission.*—Investigations and recommendations are made to both governments regarding water and other problems along the United States-Canadian boundary.

2. *International Fisheries Commission.*—Biological investigations are conducted on the halibut fishery, and fishing for halibut in the North Pacific Ocean and the Bering Sea is regulated.

3. *International Pacific Salmon Fisheries Commission.*—The sockeye salmon fishery of the Fraser River system is regulated and investigations and projects leading to the rehabilitation and perpetuation of the salmon are conducted.

4. *International Boundary Commission, United States, Alaska, and Canada.*—The demarcation of the boundary is maintained in accordance with existing treaties.

5. *Inter-American Tropical Tuna Commission.*—Under the agreement of March 3, 1950, with Costa Rica, this Commission carries on scientific investigation of tuna and tuna-bait fishes in the Eastern Pacific Ocean. This is the first time the Commission is included in this appropriation.

INTERNATIONAL CLAIMS COMMISSION

Salaries and Expenses, International Claims Commission, Department of State—

For expenses necessary to enable the Commission to settle certain claims of the Government of the United States on its own behalf and on behalf of American nationals against foreign governments as authorized by Public Law 455, approved March 10, 1950, including expenses of attendance at meetings of organizations concerned with the purpose of this appropriation; hire of passenger motor vehicles for field use only; services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a); payment of rent abroad in advance; and employment of aliens; $265,000.

Estimate 1952, **$265,000**

FUNDS AVAILABLE FOR OBLIGATION

	1950 actual	1951 estimate	1952 estimate
Appropriation or estimate	$240,000		$265,000
Prior year balance available		$240,000	
Total available for obligation	240,000	240,000	[265,000
Balance available in subsequent year	−240,000		
Unobligated balance, estimated savings		−40,000	
Total obligations		200,000	265,000

PROGRAM AND PERFORMANCE

This provides for the administrative expenses of the International Claims Commission. The Commission examines, adjudicates, and pays those claims of United States nationals which come under claims agreements between the United States and foreign governments with which the United States was not at war during World War II. The claims cover damages arising out of the nationalization or other taking of property by a foreign government, which pays a lump-sum settlement to the United States. Three percent is deducted from each claim paid and deposited in the Treasury to cover administrative expenses incurred by the United States Government. Pursuant to the Yugoslav claims agreement of 1948, the Government of Yugoslavia has deposited with the United States $17,000,000 to cover claims of this nature.

OBLIGATIONS BY ACTIVITIES

Adjudication of claims—1951, $200,000; 1952, $265,000.

PROGRAM AND PERFORMANCE

The International Information and Educational Exchange program (USIE) promotes the foreign policy of the United States through the creation of a better understanding abroad of this country, its people, and policies. As a part of this country's heightened defense effort, the program projected for 1952 continues the shift in program effected in 1951 toward creating greater psychological strength and resistance to communism and Soviet imperialism in critical areas and countries.

1. *Radio broadcasting.*—Radio programs are developed, produced, and transmitted from 38 transmitters in the United States and from overseas relay stations. Transcriptions of programs are shipped to USIE missions overseas for use on local radio stations. The 1951 "Campaign

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

of Truth" appropriation provided additional language broadcasts, a new program to increase audiences by furnishing radio receivers to individuals in certain foreign countries, and additional broadcasting facilities in the United States and overseas. It is expected that by June 30, 1951, the daily broadcast schedules will total 56⅔ program hours in 40 languages, with an anticipated increase in 1952 to an average of 61⅔ program hours per day in 46 languages and dialects. It is further anticipated that in fiscal year 1952 a substantial portion of the improved and new radio facilities provided for in previous years will be completed and in operation. Additional construction funds are being requested in a 1951 supplemental to improve and extend medium wave coverage of target areas.

2. *Press and publications.*—In 1952, provision will be made for the production of millions of pamphlets, leaflets, posters, and magazines covering timely information on world and local issues for critical overseas areas, specialized daily news bulletins to missions on each continent, the magazine "Amerika," and feature articles, press photographs, display photos, and film strips on more than 1,000 individual subjects per month.

3. *Motion pictures.*—Documentary films explaining the United States and its policies are produced, films produced by others are purchased and adapted, text and sound tracks are translated into many languages, and prints are distributed to overseas missions. The motion-picture program, intensified in 1951, will come to 572 reels on 342 new subjects in 1952. About 125,220 print reels in an average of 33 languages will be shown to an estimated audience of 500,000,000. Regional film production centers at Bombay, Manila, and Rome are being established in 1951 to facilitate and produce effective films for target areas.

4. *Office of director of international information activities.*—These activities are directed by a small headquarters staff, which includes the secretariat for the Advisory Commission on Information.

5. *Libraries and institutes.*—Information centers are maintained in 60 countries and assistance is provided to 35 binational American centers in 23 countries. Through these centers, the Department (*a*) makes available, without charge, collections of American books, documents, periodicals, and Government pamphlets, both in English and in translation; (*b*) cooperates with publishers in each country to stimulate the translation of American books; (*c*) makes long-term loans of books or special collections to local groups; (*d*) encourages community participation by special programs utilizing exhibits, lectures, and group discussions; and (*e*) stimulates knowledge of English through courses, seminars for teachers, distribution of mass audio-visual material, and the development of English language textbooks.

6. *Exchange of persons.*—Students, teachers, and leaders, chosen for their influence in forming public opinion, are exchanged between the United States and other countries, from both appropriated funds and foreign currencies received from the sale of surplus war property. In addition, services are provided for a large number of exchanges carried out under other than governmental auspices. In 1951, the exchange of leaders and specialists will increase from 128 to 372, and the Fulbright program will be made more effective by provision of dollar support for 25 percent of the foreign currency grants. The 1952 request represents (*a*) 5,411 grants as compared with 3,868 for 1951, (*b*) increased dollar supplementation for the Fulbright program, and (*c*) additional emphasis on grants for leaders and specialists.

7. *Office of director of educational exchange activities.*—The libraries and institutes and the exchange of persons programs are directed by a small headquarters staff, which includes the secretariat for the Advisory Commission on Educational Exchange.

8. *USIE mission staffs overseas.*—USIE mission staffs have been established in embassies and consulates to carry out the field work tailored to local needs, and to supply information on the effectiveness of USIE activities and media in their respective countries. In 1952, a total of 209 posts will be in operation in 84 countries.

9. *Policy advisory staff.*—This staff aids the Assistant Secretary for Public Affairs in formulating and recommending USIE objectives and policies and advising him on program considerations that should enter into the formulation of United States foreign policy.

10. *Interdepartmental foreign information staff.*—This staff works to obtain effective utilization and coordination of the Government's current foreign information facilities.

11. *General manager.*—The general manager works with the Assistant Secretary in the establishment of broad USIE policies, and within this framework formulates and manages the execution of the world-wide plan of operations.

12. *Public affairs regional bureau staffs.*—USIE public affairs staffs in regional bureaus of the Department give policy and program guidance on area matters and administer the overseas program.

13. *Scientific and technical (noneconomic).*—The Department makes available to foreign countries assistance in these fields. Other Federal agencies operate this program on advances from this appropriation. All activities of an economic or technical nature were transferred in 1951 to the Technical Cooperation Administration (Point IV). The remaining educational phases of the scientific and technical programs were financed by this appropriation in 1951.

14. *Administrative support.*—World-wide administrative and staff services are performed for USIE by the regular staffs of the Department. The USIE share of the Department's total administrative cost is budgeted under this appropriation and made available by reimbursement for services performed.

OBLIGATIONS BY ACTIVITIES

Description	1950 actual	1951 estimate	1952 estimate
Direct Obligations			
1. Radio broadcasting:			
(*a*) Program operations:			
(1) Appropriated dollars	$8,855,162	$11,781,167	$25,164,655
(2) Counterpart funds		4,393,000	
(*b*) Establishment of radio facilities:			
(1) Appropriated dollars	1,882,252	32,617,068	15,763,680
(2) Counterpart funds		1,500,000	
2. Press and publications:			
(*a*) Appropriated dollars	2,739,273	4,006,953	11,952,304

FUNDS AVAILABLE FOR OBLIGATION

	1950 actual	1951 estimate	1952 estimate
Amount available (dollar equivalent of foreign currencies)	$5,715,000	$7,936,212	$9,667,879
Unobligated balance, estimated savings	−1,271,212	−1,271,212	−1,271,212
Total obligations	4,443,788	6,665,000	8,396,667

PROGRAM AND PERFORMANCE

Educational foundations authorized by the Fulbright Act have been established under 19 executive agreements for periods ranging from 1 to 20 years. Programs of educational exchange are under way in 18 countries, the China program being inactive. Grants have been made to professors, research scholars, teachers, and students for study in the United States and abroad. It is anticipated that negotiations with six additional countries will be completed during 1951.

The programs are financed by foreign currencies received for World War II surplus property. The foreign currencies to be used in this program are shown in the accompanying schedules in dollar equivalents. The amounts shown as becoming available are the maximum which can be drawn down in any 1 year under the terms of the agreements.

FULBRIGHT EDUCATIONAL EXCHANGE PROGRAMS

[*Executive agreements negotiated and pending as of Sept. 1, 1950*]

Country	Amount of agreement	Annual limitation	Period of agreement	Date of agreement
Austria	$1,250,000	$250,000	5 years	June 6, 1950.
Australia	5,000,000	250,000	Indefinite	Nov. 26, 1949.

GOVERNMENT IN OCCUPIED AREAS OF GERMANY

Salaries and Expenses, Government in Occupied Areas of Germany, Department of State—

[For expenses, not otherwise provided for, necessary to meet the responsibilities and obligations of the United States in connection with the government, occupation, and control of occupied areas of Germany, under such regulations as the Secretary of State may prescribe, including personal services in the District of Columbia; one deputy to the United States High Commissioner for Germany at a salary of $17,500; tuition, personal allowances (not to exceed $10 per day), travel expenses (not to exceed those authorized for United States civilian personnel), health and accident insurance, and fees incident to instruction in the United States or elsewhere, of such persons as may be required to carry out the provisions of this appropriation; actual expenses of preparing and transporting to their former homes the remains of persons who may die away from their homes while participating in activities authorized under this appropriation; services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a), at rates not in excess of $50 per diem for individuals; health service program as authorized by law (5 U. S. C. 150); payment of tort claims pursuant to law (28 U. S. C. 2672) and payment of tort claims in the manner authorized in the first paragraph of section 2672, as amended, of title 28 of the United States Code when such claims arise in foreign countries; expenses for translation and reproduction rights; acquisition, maintenance, operation, and distribution of educational, informational, reorientation, and rehabilitation materials and equipment for Germany, including grants; medical and health assistance for the civilian population of Germany; expenses incident to the operation of schools for American children who are dependents of Government personnel; expenses incident to maintaining discipline and order in occupied areas (including trial and punishment by courts established by or under authority of the President); printing and binding, including printing and binding outside continental United States without regard to section 11 of the Act of March 1, 1919 (44 U. S. C. 111); purchase, rental, operation, and maintenance of printing and binding machines, equipment, and devices abroad; purchase and hire of passenger motor vehicles; transportation to occupied Germany of property donated for the purposes of this appropriation; unforeseen contingencies (not to exceed $100,000) for the United States High Commissioner for Germany, to be accounted for pursuant to the provisions of section 291 of the Revised Statutes (31 U. S. C. 107); and representation allowances (not to exceed $20,000) similar to those authorized by section 901 (3) of the Foreign Service Act of 1946 (22 U. S. C. 1131); $27,000,000: *Provided*, That provisions of law, including current appropriation Acts, applicable to the Department of State shall be available for application to expenditures made from this appropriation: *Provided further*, That when section 601 of the Economy Act of 1932, as amended (31 U. S. C. 686), is employed to carry out the purposes of this appropriation the requisitioned agency may utilize the authority contained in this appropriation: *Provided further*, That expenditures from this appropriation may be made outside the continental United States, when necessary to carry out its purposes, without regard to sections 355 and 3648, Revised Statutes, as amended: *Provided further*, That the Department of State is authorized to utilize for carrying out the purposes of this appropriation, including unforeseen contingencies, without dollar reimbursement from this or any other appropriation (1) currencies deposited in Germany by the Federal Republic of Germany in accordance with section 115 (b) (6) of the Economic Cooperation Act of 1948, as amended, and which may be made available by the Economic Cooperation Administration, (2) currencies otherwise deposited in Germany by the Federal Republic of Germany and which become available for use of the Government of the United States, its representatives or agencies in Germany, in such quantities and under such terms and conditions as may be determined by the Secretary of State after consultation with the Administrator for Economic Cooperation, and (3) other currencies derived from activities carried on under this appropriation: *Provided further*, That civilian employees of the United States serving in Germany who received appointments in October 1949 to the Foreign Service of the United States for service in Germany shall, for the purposes of section 625 of the Foreign Service Act of 1946, be considered to have been in class on September 30, 1949: *Provided further*, That for the purposes of this appropriation appointments may be made to the

PROGRAM AND PERFORMANCE

1. *Government in occupied areas of Germany.*—The United States participates as a member of the Allied High Commission in control of the development of the German economy, review of German legislation for constitutionality, protection of individual rights, control over German defense and foreign relations, and surveillance to insure conformance with the directives of the Allied High Commission. The United States also participates in the Military Security Board, the Combined Travel Board, the Civil Aviation Board, the steel and coal control organizations, and many other tripartite organizations in Germany. In view of the decisions at the September meeting of the Foreign Ministers to revise the Occupation Statute, emphasis is now being placed on preparation for the future reorganization of the occupation under policies announced by the occupying powers.

2. *Public affairs program.*—The purposes of United States information, education, and cultural relations activities are to further the democratization of the German people, facilitate the integration of Germany with western Europe, counteract the effects of hostile propaganda, and make available to the Germans information about the United States, its people, attitudes, culture, and institutions. These activities include (*a*) the operation of a major radio station; (*b*) publication of a daily newspaper and of specialized magazines and pamphlets; (*c*) furnishing materials for use by German press, film, and radio facilities; (*d*) operation of information centers, reading rooms, mobile libraries, exhibits, discussion programs, and educational film programs; (*e*) exchange of persons between Germany and the United States, and between Germany and the democratic countries of western Europe; and (*f*) special programs designed to reach influential groups in German society.

Emphasis is now being placed on (*a*) the development of increasingly effective information techniques to counter Communist propaganda and to support the objectives of the western democracies; (*b*) further extension in the British and French zones of occupation, on a reciprocal basis, of the United States public affairs program; and (*c*) stimulation of greater democratization efforts by German individuals, groups, and institutions.

3. *Administration.*—Provision is made for administrative and other common services. Emphasis is being placed on releasing military personnel from the conduct of administrative services formerly provided by the Army.

The funds in this appropriation do not cover all expenses of the United States. Local currency expenses are met mainly from occupation cost charges on the German Government, counterpart funds arising from United States aid programs in Germany, and local currencies derived from occupation activities. The expenses of the military occupation forces and of the Economic Cooperation Administration, the salaries of military personnel assigned to the Office of the High Commissioner, the salaries and expenses of Department of State consular staff and of certain other Foreign Service career employees are met from the appropriations of the respective agencies. Relief supplies and materials in 1950 were paid from the appropriation "Government and relief in occupied areas," and economic recovery supplies are now being paid from "Foreign assistance, Executive Office of the President."

The requirements for 1952 are taken up in an anticipated supplemental under "Government in occupied areas, Department of State," because of uncertainty with respect to various factors having an effect upon financial needs, especially (*a*) operations under a revised occupation statute; (*b*) recommendations soon to be presented by the Intergovernmental Study Group for Germany, established to prepare specific plans for the implementation of new policies; (*c*) the strengthening of Allied military forces in Western Germany; and (*d*) possible participation of Western Germany in the defense of western Europe.

GOVERNMENT IN OCCUPIED AREA OF AUSTRIA

Salaries and Expenses, Government in Occupied Area of Austria, Department of State—

Appropriated (adjusted) 1951, **$2,243,760**

FUNDS AVAILABLE FOR OBLIGATION

	1950 actual	1951 estimate	1952 estimate
Adjusted appropriation or estimate: Transferred from "Government and relief in occupied areas, Department of the Army," pursuant to Public Law 759		$2,243,760	
Comparative transfer from—			
"Government and relief in occupied areas, Department of the Army"		1,877,040	
"Government in occupied areas of Germany, Department of State"		77,088	
Total obligations		4,197,888	

PROGRAM AND PERFORMANCE

Effective October 16, 1950, the President transferred to the Department of State civilian occupation functions in Austria formerly exercised by the Department of the Army. These funds provide for (*a*) expenses of the Office of the United States High Commissioner, (*b*) a public affairs program, and (*c*) administrative support of United States responsibilities both in Austria and in the Department.

1. *Government in occupied area of Austria.*—The Office of the United States High Commissioner expresses the policies and interests of the United States to the Austrian Government and in the Allied Council, and insures the execution of the decisions of the Allied Council as they apply to the Austrian Government or to the United States zone of occupation.

2. *Public affairs.*—The public-affairs program fosters among the Austrian people the democratic point of view in both world and local affairs and represents to the Austrians information regarding the United States, its people, its attitudes, its culture, and its institutions. These activities include the publication of a daily newspaper and several magazines, the operation of a radio network, the production and distribution of films, the operation of five information centers, and of student and national leader exchanges. Costs are met, in part, from schilling receipts from the sale of newspapers and from radio fees.

3. *Administration.*—Provision is made for necessary operating facilities, as well as administrative and security services.

Because of the uncertainties in occupation policy for both Austria and Germany, the 1952 requirements are shown as an anticipated supplemental under "Government in occupied areas, Department of State."

PROGRAM AND PERFORMANCE

This program is conducted by various United States Government agencies and coordinated by the Department of State. The activities of this program include the reconstruction of public facilities, rehabilitation of certain essential Government services, and training Filipino nationals in various fields of endeavor.

All rehabilitation projects will be physically completed by June 30, 1951. The 1952 estimate provides funds to liquidate contracts entered into in previous years by the Bureau of Public Roads. The maritime training activity carried on by the Department of Commerce will continue and will be financed by reappropriation of prior year balances.

MISCELLANEOUS—Continued

Loan to the United Nations for Construction and Furnishing of Permanent Headquarters in New York City, Department of State—Con.

PROGRAM AND PERFORMANCE

In order to assist the United Nations in constructing and furnishing its headquarters building in New York City, a loan agreement was made with the United Nations on an interest-free basis. Public Law 119, Eighty-first Congress, appropriated $65,000,000, to remain available to June 30, 1955, for this purpose. Advances are made to the United Nations as required by engineering, construction, and purchase schedules.

The loan will be repaid over a period of 30 years starting July 1, 1951.

OBLIGATIONS BY ACTIVITIES

Loan to United Nations for construction—1950, $26,227,300; 1951, $23,000,000; 1952, $4,858,205.

OBLIGATIONS BY OBJECTS

16 Investments and loans—1950, $26,227,300; 1951, $23,000,000; 1952, $4,858,205.

Payment to Government of Finland—

THE INSTITUTE OF INTER-AMERICAN AFFAIRS

[Submitted under the Government Corporation Control Act]

NOTE: The estimate of appropriations and expenses for 1952 is included in the item for "Mutual assistance, economic and military" under proposed legislation.

PROGRAM HIGHLIGHTS

[Dollars in thousands]

	1950 actual	1951 estimate	1952 estimate
Contributions to cooperative programs:			
Institute (cooperative project funds and technical assistance)	$4,725	$5,419	
Cooperating governments	18,742	19,000	
Number of cooperative programs	25	27	

PURPOSE AND FINANCIAL ORGANIZATION

The objectives of the Institute of Inter-American Affairs are to further the general welfare of the American republics by carrying out cooperative programs in the fields of public health, agriculture, and education. In addition to funds appropriated to the Institute, participating countries contribute to the cooperative programs.

Digitized for FRASER

Federal Reserve Bank of St. Louis

THE INSTITUTE OF INTER-AMERICAN AFFAIRS—Continued

The major activities of the Corporation are conducted in accordance with the terms of agreements entered into with the governments of the other American republics. These agreements provide for program operation by a cooperative service, which is a part of the appropriate ministry (health, agriculture, or education) of the host government and is headed by the chief of the Institute's field party. Both the cooperating republic and the Institute contribute funds, materials, services, and facilities.

Analysis of Budget Programs

During 1950, the Institute operated 25 country-programs (14 in health and sanitation, 4 in agriculture, and 7 in education). During 1951, these programs are continued with the exception of one education country-program, and it is estimated that 3 country-programs can be added within funds appropriated directly for the Institute, making a total of 27 country-programs expected in 1951.

The Institute's health work is primarily in the fields of preventive medicine and sanitation. Its agriculture programs include extension services, establishment of machinery and equipment pools, assistance in the planning and organization of rural credit programs, and marketing and storage facilities. The education programs relate to elementary and vocational education and include assistance in school administration, development of community-centered schools, introduction of improved curricula, teaching methods, teaching material, and teacher training.

Administrative expenses of the Corporation include salaries of the Washington supervisory staff concerned with program operations, salaries of employees providing housekeeping services, cost of the required audit, rental and building maintenance costs, and incidental expenses.

Financial Review

Expenditures shown below exclude contributions from the other cooperating governments, representing only those of the United States Government. The Government's investment in the Corporation, all of which is non-interest bearing, consists of cumulative grants-in-aid from the former Office of Inter-American Affairs and the Department of State, less expenditures attendant to program operations. Cumulative total grants-in-aid, including the 1951 appropriation, are $82,741,608.

Although the Institute has authority to operate until 1955, the estimate for its 1952 programs is included with that for other foreign assistance under proposed legislation.

An indication of the Institute's 1952 program plans will be submitted at a later date.

[The Institute of Inter-American Affairs: Not to exceed $600,000 of the funds available to the Corporation shall be available during the current fiscal year for its administrative expenses, including administrative services performed for the Corporation by other Government agencies.] (*Federal Prison Industries, Incorporated, and The Institute of Inter-American Affairs Appropriation Act, 1951.*)

Total, Department of State, general and special appropriations:

Appropriated 1951, **$326,919,927** Estimate 1952, **$283,646,376**
Appropriated (adjusted) 1951, **$326,574,287**

GENERAL PROVISIONS—DEPARTMENT OF STATE

SEC. 102. Contracts entered into in foreign countries involving expenditures from any of the appropriations under this title shall not be subject to the provisions of section 3741 of the Revised Statutes (41 U. S. C. 22).

SEC. 103. The provision of law prescribing the use of vessels of United States registry by any officer or employee of the United States (46 U. S. C. 1241) shall not apply to any travel or transportation of effects payable from funds appropriated, allocated, or transferred to the Secretary of State or the Department of State.

SEC. 104. The exchange of funds for payment of expenses in connection with the operation of diplomatic and consular establishments abroad shall not be subject to the provisions of section 3651 of the Revised Statutes (31 U. S. C. 543).

SEC. 105. Appropriations under this title available for expenses in connection with travel of personnel outside the continental United States, including travel of dependents and transportation of personal effects, household goods, or automobiles of such personnel, shall be available for such expenses when any part of such travel or transportation begins in the current fiscal year pursuant to travel orders issued in that year, notwithstanding the fact that such travel or transportation may not be completed during the current fiscal year.

SEC. 106. Notwithstanding the provisions of section 16a of the Act of August 2, 1946 (5 U. S. C. 78 (a)), Government-owned vehicles may be used in foreign countries for transportation of United States Government employees from their residence to the office and return when public transportation facilities are unsafe or are not available: *Provided*, That each Chief of Mission shall have prior authority from the Secretary of State to approve such transportation.

SEC. 107. During the current fiscal year and when purchases are made with foreign currencies, the Department of State is authorized to purchase for use abroad any passenger motor vehicle (exclusive of busses, ambulances, and station wagons) at a cost of not to exceed the equivalent of $2,200 for each such vehicle.

SEC. [107] *108.* Appropriations under this title for "Salaries and expenses", "International contingencies", and "Missions to international organizations" are available for reimbursement of the General Services Administration for security guard services for protection of confidential files. (*Department of State Appropriation Act, 1951.*)

Total	102	148,100	98	71,176	76,924	850	1,200	

[1] Station wagons. [2] Busses. [3] Chiefs of mission vehicle.

Statement of proposed obligations for purchase, maintenance, and operation of aircraft for the fiscal year 1952

DEPARTMENT OF STATE

Appropriation	Aircraft to be purchased		Aircraft to be exchanged		Net cost of aircraft to be purchased	Old aircraft still to be used	Cost of maintenance and operation of aircraft	Public purpose and users
	Number	Gross cost	Number	Allowance (estimated)				
Salaries and expenses, Department of State.						1	$3,200	Used by air attaché at American Embassy at Rio de Janeiro in connection with official duties.

PROPOSED FOR LATER TRANSMISSION

International information and educational activities.—A supplemental of $100,000,000 for 1951 is required to provide funds for construction of radio facilities necessary for the expanded "Campaign of truth" program.

Government in occupied areas.—Uncertainties in occupation policy for both Austria and Germany make it necessary to handle the 1952 requirements as a $30,000,000 supplemental under "Government in occupied areas, Department of State."

Total obligations	2,770,956	2,754,162	2,794,000

PROGRAM AND PERFORMANCE

The Office of the Secretary of the Treasury aids the Secretary in the direction and administration of the Treasury Department. The appropriation "Salaries and expenses, Office of Secretary of the Treasury," represents a consolidation of the following appropriations: "Salaries, Office of Secretary of the Treasury"; "Health service programs, Treasury Department"; "Salaries, Office of General Counsel"; "Salaries, Office of Administrative Services"; and "Miscellaneous expenses, Treasury Department."

1. *Executive direction.*—The Under Secretary, Assistant Secretaries, and other staff assistants advise and assist the Secretary of the Treasury in carrying out his responsibilities in connection with the formulation of tax and fiscal policies, the management of the public debt, the collection of revenue, the printing of currency, the manufacture of coins, and the central management of the Department. This staff also provides leadership and coordination of the management improvement, budgetary, personnel, and other programs of a Department-wide nature. The international situation has greatly increased the responsibilities of the Secretary in the financial and taxation fields.

2. *Administration and coordination of legal services.*—The General Counsel, as the chief law officer of the Department, administers and coordinates its legal services. The work performed is connected with the broad financial and economic programs carried on at the departmental level and includes all legislative matters in which the Department is interested, service for those bureaus and offices which do not maintain legal staffs, and supervision and coordination of the legal activities in those bureaus which maintain separate legal staffs.

3. *General administrative services.*—These services are performed for the staff offices of the Office of the Secretary and the departmental headquarters, including the control, assignment, and utilization of space.

4. *Operation and maintenance of Treasury buildings.*—The main Treasury building and the Treasury annex are operated and maintained.

5. *Emergency first-aid services.*—Four health units are to be maintained for employees of the Department located in Washington, D. C.

OBLIGATIONS BY ACTIVITIES

FISCAL SERVICE

BUREAU OF ACCOUNTS

INTRODUCTORY STATEMENT

The Bureau maintains the central revenue, appropriation, and expenditure accounts of the Government for all Federal agencies and is responsible for other fiscal functions, including the supervision of Treasury accounting systems and joint participation in accounting and reporting improvement with the General Accounting Office and the Bureau of the Budget. The Bureau also discharges the disbursing and collection functions for the civil establishments of the executive branch of the Government, except the Post Office Department.

SALARIES AND EXPENSES

Salaries and Expenses, Bureau of Accounts, Treasury Department—

For necessary expenses [in the District of Columbia], including contract stenographic reporting services [and printing and binding, $2,100,000] *$2,095,000*: *Provided*, That Federal Reserve banks and branches may be reimbursed for [printing and binding and other] necessary expenses incident to the deposit of withheld taxes in Government depositories. (*5 U. S. C. 133t, 133u; Treasury Department Appropriation Act, 1951.*)

Appropriated 1951, **$2,100,000** Estimate 1952, **$2,095,000**

Total obligations	1,888,378	2,090,000	2,095,000

PROGRAM AND PERFORMANCE

1. *Supervision of withheld taxes depositary system.*—Employers who withhold $100 or more monthly in taxes from the wages of employees must deposit such amounts to the credit of the Treasurer of the United States. The greater part of the work of collecting withheld taxes is performed by the Federal Reserve banks acting as fiscal agents of the Treasury Department. The proportionate share of the expense relating to withheld social security taxes is charged against the Federal old-age and survivors insurance trust fund. The workload is estimated at 5,200,000 depositary receipts in 1951 and 1952 as compared with 4,481,451 in 1950. The increase is attributable to the increase in the income tax rates and to the extension of the withheld tax plan to include social security taxes.

2. *Maintenance of the Government's central accounts.*—The central accounting system includes control accounts on appropriations, receipts and expenditures, and provides financial data for the Treasury daily statement and other financial compilations and reports.

3. *Preparation of financial statements of the Government.*—Financial reports of the Government's fiscal operations are prepared and published regularly. These include the annual combined Statement of Receipts, Expenditures and Balances of the United States Government; Monthly Report of Appropriations, Expenditures, and Balances; and the Secretary's annual report.

4. *Administration of reporting and accounting.*—Technical advice and assistance in the accounting field is furnished all bureaus and offices of the Treasury. In addition, the Treasury is participating in a broad program of general accounting improvement jointly with the General Accounting Office and the Bureau of the Budget.

5. *Processing of investments, loans, claims, and collections.*—Investments in interest-bearing securities of certain funds such as the Federal old-age and survivors insurance trust fund, the unemployment trust fund, veterans insurance funds and various Government retirement funds are processed under this activity. The work includes purchase and disposal of securities, processing capital stock subscriptions of specified Government corporations, international claims, loans to Government agencies and collections under lend-lease agreements.

6. *Supervision of the Federal depositary system.*—Banking facilities are provided all agencies of the Government through the designation of selected institutions to act as official depositaries for the receipt and safekeeping of Government funds and for other essential services. The number of depositaries and the supervision of the system is expected to increase in 1952 to meet defense needs.

DEPOSITARIES SUPERVISED

	1950 actual	1951 estimate	1952 estimate
Number of depositaries	2,994	3,110	3,250
Authorizations end of year	5,832	6,475	7,300
Changes in authorizations during year	3,172	3,600	5,000

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

7. *Supervision and control of surety bonding.*—Surety bonds in favor of the United States can be accepted on behalf of the United States only from surety companies holding certificates of authority from the Secretary of the Treasury. The underwriting qualifications of surety companies are determined by detailed examination of the financial condition of the companies and of the bonds running in favor of the United States.

	1950 actual	1951 estimate	1952 estimate
Bonds and agreements	47,124	48,000	48,000
Surety companies authorized	116	120	120

8. *Executive direction.*—This provides for the management of the Bureau.

Total obligations	11,955,053	11,310,649	12,614,543

PROGRAM AND PERFORMANCE

The Division of Disbursement makes payments, receives and deposits collections for civilian Federal agencies, except the Post Office and certain Government corporations, and issues United States savings bonds for Federal employees under the payroll-savings plan. The regional offices serve approximately 2,500 civilian agencies and their branch offices.

The funds required are determined by the volume of work or number of units to be processed multiplied by the unit cost per item. The work volume, unit costs, and total obligations for the fiscal years 1951 and 1952 are compared to the actual for 1950 in the following tables:

FUNDS AVAILABLE FOR OBLIGATION

Appropriation or estimate—1950, $4,224,655; 1951, $7,207,905; 1952, $4,900,705.

PROGRAM AND PERFORMANCE

This fund was established to record interest payable from the general fund of the Treasury pursuant to various permanent appropriations made by law in connection with certain trust funds. Under the terms and conditions provided by law creating the trust in each case, interest accruing and payable from the general fund of the Treasury will be appropriated and recorded in this account for transfer to the proper trust fund receipt account.

The following schedule details the interest obligations under this account:

	1950 actual	1951 estimate	1952 estimate
Bequest of Gertrude M. Hubbard, Library of Congress	$800	$800	$800
Library of Congress, trust fund	87,983	89,905	89,905
Expenses of Smithsonian Institution	60,000	60,000	60,000
National Gallery of Art trust fund	200,000	200,000	200,000
Payment of interest on deposits of public moneys of Philippine Islands	1,543,370	2,907,200	650,000
Education of the blind	10,000	10,000	10,000
Soldiers' Home permanent fund	1,065,228	1,190,000	1,190,000
Indian trust funds	1,257,274	2,750.000	2,700,000
Total obligations	4,224,655	7,207,905	4,900,705

OBLIGATIONS BY ACTIVITIES

Payment of interest—1950, $4,224,655; 1951, $7,207,905; 1952, $4,900,705.

OBLIGATIONS BY OBJECTS

14 Interest—1950, $4,224,655; 1951, $7,207,905; 1952, $4,900,705.

Payment of Certified Claims—

	1950 actual	1951 estimate	1952 estimate
Balance of prior year appropriations available for settlement of claims		$551,009,960	$793,363,715
Credits from appropriations expiring at end of the preceding year	$599,300,669	292,353,755	300,000,000
Total available for settlement of claims	599,300,669	843,363,715	1,093,363,715
Balance available for settlement of claims in subsequent year	−551,009,960	−793,363,715	−1,043,363,715
Total settlement of claims	48,290,709	50,000,000	50,000,000

PROGRAM AND PERFORMANCE

Under the act of July 6, 1949, when general-fund appropriations expire the balances remaining are consolidated in an account available for payment of claims which would be charged to the respective appropriations if they were still open.

Recoinage of Danish West Indian Coins of Virgin Islands—

FUNDS AVAILABLE FOR OBLIGATION

Appropriation or estimate—1950, $2,027,755; 1951, $2,000,000; 1952, $2,000,000.

PROGRAM AND PERFORMANCE

Certificates of settlement, approved by the General Accounting Office, are paid for amounts which Federal agencies have erroneously deposited into the Treasury as miscellaneous receipts but should have been deposited into other accounts or returned to the payees (63 Stat. 358).

OBLIGATIONS BY ACTIVITIES

Payment of claims—1950, $2,027,755; 1951, $2,000,000; 1952, $2,000,000.

OBLIGATIONS BY OBJECTS

13 Refunds, awards, and indemnities—1950, $2,027,755; 1951, $2,000,000; 1952, $2,000,000.

Total, Bureau of Accounts, general and special appropriations:

Appropriated 1951, **$58,731,162** Estimate 1952, **$20,997,325**

BUREAU OF THE PUBLIC DEBT

ADMINISTERING THE PUBLIC DEBT

Administering the Public Debt—

For necessary expenses connected with any public-debt operations authorized by the Second Liberty Bond Act, as amended (31 U. S. C. 760–762), and with the administration of any public debt or currency issues of the United States with which the Secretary of the Treasury is charged, [$50,505,000] *$52,900,000,* to be expended as the Secretary of the Treasury may direct, and the Secretary is authorized to accept services without compensation: *Provided,* That Federal Reserve banks and branches may be reimbursed for expenditures as fiscal agents of the United States on account of public-debt transactions for the account of the Secretary of the Treasury, and advances to the Postmaster General may be made in accordance with the provisions of section 22 (e) of the Second Liberty Bond Act, as amended (31 U. S. C. 757c (e)): *Provided further,* That the indefinite appropriation provided by section 10 of said Act, as amended, shall not be available for obligation during the current fiscal year. (*Treasury Department Appropriation Act, 1951.*)

Annual definite appropriation:

Appropriated 1951, **$50,505,000** Estimate 1952, [a] **$52,900,000**

[a] Includes $320,274 formerly appropriated under "Salaries and expenses, Bureau of Engraving and Printing," and $272,326 formerly appropriated under "Distinctive paper for United States currency and securities."

PROGRAM AND PERFORMANCE

The Bureau of the Public Debt exercises general supervision over all public debt operations. These operations involve the administrative handling of all transactions in United States Government securities. This appropriation also covers the cost of the promotion of the sale of United States savings bonds. The program in 1952 contemplates an increase in requirements to meet the increasingly heavy maturities of savings bonds issued in the early days of World War II.

1. *Issuance, servicing, and retirement of savings bonds.*—Administration of the United States savings bond program involves (1) the cost of manufacture, receipt, custody, and distribution of bond stocks; (2) the cost of issuance and the maintenance of issue records; (3) the cost of adjudicating claims for the replacement of lost, stolen, or mutilated bonds, handling reissues, and other transactions incident to servicing outstanding bonds; (4) the cost of retiring bonds; and (5) the payment of interest by check on series G savings bonds.

UNITED STATES SAVINGS BONDS, SERIES A THROUGH G

	1950 actual	1951 estimate	1952 estimate
Issues:			
Sales, original issue	65,062,933	68,200,000	86,200,000
Reissues, exchanges, and claims	2,828,545	2,900,000	2,900,000
Total	67,891,478	71,100,000	89,100,000
Retirements:			
Redemptions	79,768,133	79,200,000	94,200,000
Reissues, exchanges, claims, and spoils	5,184,638	4,700,000	4,700,000
Total	84,952,771	83,900,000	98,900,000

2. *Issuance, servicing, and retirement of other Treasury securities.*—Transactions in all United States Government securities other than United States savings bonds are processed under this activity. These transactions involve (1) the cost of manufacture, receipt, custody, and shipment of security stocks; (2) the cost of issuance and maintenance of issue records; (3) the cost of adjudicating claims for lost, stolen, or mutilated securities; (4) the cost of maintaining registered accounts and the payment of interest; (5) the cost of retiring securities either on exchange transactions or at maturity, and the maintenance of retirement records; and (6) the payment of fees to authorized agents for the redemption of Armed Forces Leave bonds.

REGULAR TREASURY ISSUES

	1950 actual	1951 estimate	1952 estimate
Issues:			
Original issues	1,063,451	2,000,000	2,500,000
Exchange transactions	1,015,814	1,100,000	1,100,000
Retirements:			
Redemptions at maturity	2,068,355	3,000,000	2,800,000
Exchange transactions	1,045,695	1,100,000	1,100,000

3. *Verification and destruction of unfit United States currency.*—United States currency, which is unfit for further circulation, is forwarded to the Bureau of the Public Debt for audit and destruction.

CURRENCY

	1950 actual	1951 estimate	1952 estimate
United States currency audited and delivered for destruction (number of pieces)	1,328,780,000	1,438,892,000	1,434,160,000

4. *Maintenance and audit of public debt accounts.*—Control accounts are maintained over all transactions affecting the public debt and over distinctive fiber paper in stock and in process. This activity also includes the audit and verification of security stocks.

5. *Promotion of the sale of savings bonds.*—The sale of United States savings bonds is promoted through periodic drives, using press, radio, and other advertising media, and the maintenance of organized sales and promotional groups of volunteer and paid representatives.

6. *Executive direction.*—The over-all administration and supervision of the Bureau includes the technical analysis of the security markets and the establishment of policies based thereon and the determination of the terms, nature, and types of new offerings of securities.

accounts; directs the activities of Federal Reserve banks when they act as agents of the Treasurer in paying Government checks; and performs certain functions in connection with claims relating to lost, stolen, destroyed, and fraudulently negotiated checks. The funds needed to carry on this activity are determined by applying the unit costs to the check workload estimates submitted by the spending agencies. During 1950, 269,321,000 checks were processed, and it is estimated that 261,498,000 will be processed in 1951 and 276,478,000 in 1952.

2. *General banking services.*—General banking services are provided for Government accountable officers and for banks in the District of Columbia, including procurement, custody, issue, and accounting for all new United States paper currency; the receipt and deposit of funds; cashing of Government checks; collection of checks, drafts, and money orders; and other similar banking services.

WORKLOAD OF MEASURABLE OPERATIONS

	1950 actual	1951 estimate	1952 estimate
Treasury checks and other obligations paid in cash	501,451	510,000	510,000
Deposits received and accounted for	183,410	190,000	190,000
Commercial checks, drafts, and money orders processed for collection	3,519,872	3,600,000	3,600,000
Pieces of paper currency issued	1,326,672,000	1,560,000,000	1,500,000,000

3. *Retirement of currency.*—Currency no longer fit for circulation is withdrawn by the Federal Reserve banks and forwarded to the Treasurer of the United States where it is examined and destroyed.

CURRENCY RETIRED (PIECES)

[In millions]

	1950 actual	1951 estimate	1952 estimate
United States currency retired	1,328	1,376	1,428
Federal Reserve currency retired	460	482	498

4. *Maintenance of the Treasurer's accounts.*—Controlling accounts covering receipts and disbursements are maintained for all funds placed in the custody of the Treasurer. Various reports are prepared, including the Daily Statement of the United States Treasury and a monthly statement of classified receipts and expenditures. The Treasurer also authorizes and directs shipments of coin between Treasury offices, Federal Reserve banks, and the mints.

5. *Payment and custody of securities.*—This activity provides for the operations involved in (*a*) the payment of principal and interest on Government securities and (*b*) the provision of safekeeping facilities for securities, trust funds, and savings bonds.

PROGRAM AND PERFORMANCE

This appropriation covers expenses incident to collecting, safekeeping, transferring, or disbursing the public moneys; the cost of transportation of currency and coin and securities of the United States; and the purchase of supplies, such as coin bags and webbing straps. Accelerated defense and related industrial programs are expected to increase these requirements.

OBLIGATIONS BY ACTIVITIES

Collecting, safekeeping, transferring, and disbursing public moneys of the United States—1950, $456,062; 1951, $475,000; 1952, $500,000.

OBLIGATIONS BY OBJECTS

Object classification	1950 actual	1951 estimate	1952 estimate
03 Transportation of things:			
Express	$26,725	$27,000	$30,000
Postage, parcel post	405,941	418,000	440,000

07 Other contractual services	509	500	500
08 Supplies and materials	13,332	18,000	18,000
Total obligations	456,062	475,000	500,000

Total, Office of the Treasurer, general appropriations:

Appropriated 1951, **$5,675,000** Estimate 1952, **$21,600,000**

Total, Fiscal Service, Treasury Department, general appropriations:

Appropriated 1951, **$114,911,162** Estimate 1952, **$95,497,325**

BUREAU OF CUSTOMS

SALARIES AND EXPENSES

Salaries and Expenses, Bureau of Customs—

For expenses necessary for collecting the revenue from customs, enforcement of navigation laws under section 102, Reorganization Plan Numbered III of 1946, and of other laws enforced by the Bureau of Customs, and the detection and prevention of frauds, including not to exceed $100,000 for the securing of information and evidence; transportation and transfer of customs receipts from points where there are no Government depositories; examination of estimates of appropriations in the field; expenses of attendance at meetings of organizations concerned with the purposes of this appropriation; [not to exceed $12,000 for maintenance and improvement of buildings and sites, acquired under the Act of June 26, 1930 (19 U. S. C. 68); printing and binding;] purchase of one hundred passenger motor vehicles for replacement only; expenses of seizure, custody, and disposal of property; arms and ammunition; *and* not to exceed [$1,070,000] *$1,111,500* for personal services in the District of Columbia exclusive of ten persons from the field force authorized to be detailed under law (19 U. S. C. 1525); [$36,600,000] *$38,300,000*. *(5 U. S. C. 118a, 118b, 281a; 19 U. S. C. 1524, 1619, 1701a, 1701b; 31 U. S. C. 529b; 46 U. S. C. 1–1334; Treasury Department Appropriation Act, 1951.)*

Appropriated 1951, **$36,600,000** Estimate 1952, [a] **$38,300,000**

[a] Includes $28,500 for activities previously carried under "Miscellaneous expenses, Treasury Department." The amounts obligated in 1950 and 1951 are shown in the schedule as comparative transfers. Also includes $91,600 for services performed by the Bureau of Engraving and Printing previously carried under appropriations as follows: "Salaries and expenses, Bureau of Engraving and Printing," $90,500; "Salaries and expenses, Guard Force, Secret Service Division," $1,100.

Total obligations	41,036,534	42,528,500	44,400,000

PROGRAM AND PERFORMANCE

1. *Assessment and collection of duties, taxes, and fees.*—The collectors of customs classify imported merchandise; assess and collect duties; inspect all traffic entering the United States; administer certain marine statutes concerning the registry, licensing, etc., of vessels; and perform other related functions.

SUMMARY OF SELECTED WORKLOAD DATA

	1950 actual	1951 estimate	1952 estimate
Formal entries accepted	986,977	1,283,100	1,411,400
Carriers of persons and mechandise entering the United States	22,415,050	24,650,000	25,883,000
Persons entering the United States	86,956,174	88,700,000	90,500,000

2. *Appraisal of imported merchandise.*—The customs appraisers of merchandise determine the dutiable value of imported merchandise and establish that such merchandise has been properly invoiced.

SUMMARY OF SELECTED WORKLOAD DATA

	1950 actual	1951 estimate	1952 estimate
Packages examined at public stores	529,167	705,000	783,000
Invoices processed	1,190,982	1,490,000	1,639,000

3. *Investigations of violations of customs and related laws and regulations.*—Investigations are conducted concerning (*a*) smuggling and other violations of customs and related laws and regulations; (*b*) valuation, classification, and invoicing of imported merchandise; (*c*) drawback; (*d*) thefts from customs custody; and (*e*) alleged derelictions of customs personnel. In the fiscal year 1950 a total of 17,183 investigations were made. The estimates for 1951 and 1952 are 17,520 and 17,780, respectively.

4. *Audit of collection and merchandise accounts.*—The comptrollers of customs are responsible for (*a*) establishing the accountability of collectors for the proper and complete collection of duties, taxes, and fees; and (*b*) accounting for the final disposition of all imported merchandise. Verification of collectors' liquidations of entries is the only measurable item of comptrollers' workload and represents approximately 50 percent of the total operation. The remaining 50 percent consists of audits of schedules, manifests, and accounts.

SUMMARY OF SELECTED WORKLOAD DATA

	1950 actual	1951 estimate	1952 estimate
Liquidations verified	1,980,855	2,000,000	2,000,000
Comptrollers' verifications pending at close of year	147,536	150,000	300,000

5. *Analysis and identification of merchandise for tariff purposes.*—The customs laboratories perform scientific analysis and identification of merchandise not susceptible to analysis by inspection. In 1950, 83,429 samples were tested, and it is estimated that this number will increase to 90,250 in fiscal year 1951 and to 96,000 in fiscal year 1952.

6. *Executive direction.*—This activity includes over-all management and direction of the customs service in Washington and the field.

PROGRAM AND PERFORMANCE

Customs officers required to work overtime to perform special customs services are entitled to extra compensation which must be borne by the master, owner, agent, or consignee requesting such services. Similarly, overtime services and salaries of customs employees assigned to bonded warehouses must be reimbursed by the proprietors of such warehouses. This fund permits the Bureau to make payments to the customs employees concerned for these services when they are performed, and the fund is subsequently reimbursed in full after billing and collection for the services from the parties in interest.

Permanent indefinite appropriation:

Refunds and Drawbacks, Customs—

Appropriated (est.) 1951, **$16,000,000** Estimate 1952, **$16,000,000**

BUREAU OF INTERNAL REVENUE

SALARIES AND EXPENSES

Salaries and Expenses, Bureau of Internal Revenue—

For necessary expenses in assessment and collection of internal-revenue taxes; administration of the internal-revenue laws; discharge of functions imposed upon the Commissioner of Internal Revenue by or pursuant to other laws; investigations concerning the enrollment or disbarment of practitioners before the Treasury Department in internal-revenue matters; and acquisition, operation, maintenance, and repair of property under title III of the Liquor Law Repeal and Enforcement Act (40 U. S. C. 304f–m), including [personal services in the District of Columbia, and elsewhere;] expenses, when specifically authorized by the Commissioner, of attendance at meetings of organizations concerned with internal-revenue matters; purchase (not to exceed [one hundred and thirty-four] *three hundred* for replacement only) and hire of passenger motor vehicles; [printing and binding;] examination of estimates of appropriations in the field; services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a), and of expert witnesses at such rates as may be determined by the Commissioner of Internal Revenue; [not to exceed $1,500,000 for stationery;] expenses of seizure, custody, and disposal of property; purchase of chemical analyses and expenses of testimony thereon; ammunition; securing of information and evidence; and not to exceed $500,000 for detecting and bringing to trial persons guilty of violating the internal-revenue laws or conniving at the same, as authorized by law (26 U. S. C. 3792); [$245,547,500] *$255,500,000*: *Provided*, That the amount for personal services in the District of Columbia shall not exceed [$17,800,000] *$17,773,760*.

[For an additional amount for "Salaries and expenses", Bureau of Internal Revenue, $2,500,000; and the limitation under this head in the Treasury Department Appropriation Act, 1951, and the amount available for stationery is increased from "$1,500,000" to "$1,573,680".] *(5 U. S. C. 132; 26 U. S. C. 1342, 1540, 1700–1701, 1705–1706, 1710–1711, 1715–1717, 1725, 1730–1731, 1734–1735, 1770–1775, 1801–1812, 3900; 42 U. S. C. 1001–1011, 1101–1110; Treasury Department Appropriation Act, 1951; Supplemental Appropriation Act, 1951.)*

Appropriated 1951, [a] **$248,047,500** Estimate 1952, [b] **$255,500,000**

[a] Includes $2,500,000 appropriated in Supplemental Appropriation Act, 1951.

[b] Includes $2,358,200 for services performed by Bureau of Engraving and Printing previously carried under appropriations as follows:

"Salaries and expenses, Bureau of Engraving and Printing"	$2,328,300
"Salaries and expenses, guard force"	27,800
"Health service programs, Treasury Department"	2,100

Total obligations	230,408,200	246,820,000	255,500,000

PROGRAM AND PERFORMANCE

The Bureau of Internal Revenue is responsible for the determination, assessment, and collection of all internal-revenue taxes; the enforcement of the internal-revenue laws; the refunding or crediting of any overpayment of tax or erroneous collections; and the preparation and distribution of tax instructions, regulations, forms, and stamps. It is also charged with certain duties under statutes that do not impose taxes but which are related directly to internal revenue; for example, the Federal Alcohol Administration Act, as amended, the Liquor Enforcement Act of 1936, and the Federal Firearms Act.

1. *Interpretation of revenue laws and ruling services.*—Internal-revenue laws are interpreted, regulations are prepared and promulgated, and rulings are made on issues involving questions of statutory interpretation or application. Services are rendered to congressional committees in the analysis and drafting of proposed tax legislation.

WORKLOAD DATA

	1950 actual	1951 estimate	1952 estimate
Regulations, interpretative rulings, and legislative reports prepared	24,252	27,660	28,430
Specific case rulings and advisory opinions	51,186	58,440	60,000

2. *Investigation and audit of tax returns.*—This represents the primary enforcement work of the Bureau. It consists of all examinations, audits, and investigations for checking the factual correctness and completeness of taxpayers' returns and claims, and for determining the correct tax liability if error in reporting is found; review in field offices of examining officers' reports; post-audit coordination work; obtaining delinquent returns; and conducting special confidential character investigations.

WORKLOAD DATA

	1950 actual	1951 estimate	1952 estimate
Office audits	2,366,078	2,769,500	2,784,000
Field audits and investigations	1,960,808	2,383,300	2,403,400
Cases post-reviewed (income, estate, and gift)	1,122,531	1,132,600	1,141,500
Delinquent returns obtained	2,452,709	2,650,000	2,825,000
Fraud investigations closed	10,704	15,000	13,800
Character and personnel investigations	17,724	17,500	17,500

3. *Collection of delinquent tax accounts.*—The primary measures taken to collect delinquent tax accounts are (*a*) preparation and issuance of prewarrant notices, (*b*) serving and follow-up on warrants, (*c*) administering offers in compromise, and (*d*) performing legal work in support of these functions.

WORKLOAD DATA

	1950 actual	1951 estimate	1952 estimate
Delinquent tax notices and bills prepared	17,007,153	18,178,000	18,428,000
Warrants for distraint closed	1,802,341	1,840,000	1,997,000
Case dispositions of offers in compromise and closing agreements	5,143	5,900	7,400
Claims prosecuted against taxpayers' estates, insolvent taxpayers, etc	7,002	8,880	11,270

4. *Taxpayer conferences and appeals.*—This activity covers all phases of appellate work and associated legal work relating to taxpayers' appeals from findings with respect to tax liability, including the preparation of cases for settlement or trial.

WORKLOAD DATA

	1950 actual	1951 estimate	1952 estimate
Taxpayer conferences held	41,750	46,900	48,900
Case disposals of appeals to technical staff	11,572	12,420	13,100
Docketed appeals (case disposals by office of Chief Counsel)	6,482	6,500	6,500
Penal case disposals	1,404	1,400	1,400

BUREAU OF INTERNAL REVENUE—Continued

SALARIES AND EXPENSES—continued

Salaries and Expenses, Bureau of Internal Revenue—Continued

5. *Regulatory, control, and inspection work.*—This activity provides for the determination of tax liability, the regulation of trade practices, and the detection of violations under the alcoholic beverage and firearms laws.

WORKLOAD DATA

	1950 actual	1951 estimate	1952 estimate
Inspection of plants and permittees other than wholesale and retail dealers	44,629	45,000	45,000
Inspections of wholesale and retail dealers, including investigations of applicants for wholesalers' permits	288,223	300,000	300,000
Number of plants for which operations are supervised	890	925	950
Stills seized	10,029	10,500	10,500
Investigations and violations	29.906	31,400	31,400

6. *Processing returns, remittances, information documents, and claims.*—This consists of all the operations incident to the handling of remittances, tax accounting, and bookkeeping. It includes such tasks as the preparation of bills for current accounts, arithmetic verification of tax returns, computing and scheduling of refunds, determination of tax liability in respect to Form 1040A returns, the filing and storage of returns and records, the matching of information returns, correspondence with taxpayers regarding their returns and remittances, printing and distribution of tax forms and instructions, and stationery costs.

WORKLOAD DATA

	1950 actual	1951 estimate	1952 estimate
Tax returns received and processed	89,132,146	83,515,000	90,072,000
Tax determinations made for taxpayers	16,677,666	17,000,000	17,000,000
Arithmetic verifications of returns and related documents	13,799,242	25,556,000	29,558,000
Refunds and credits scheduled	30,688,938	29,000,000	31,000,000
Excess profits postwar refunds processed	7,091	4,868	4,868
Overassessments and adjustments scheduled	2,337,217	2,407,000	2,407,000

7. *Statistical reporting.*—The Bureau prepares annual statistics relating to income and profits taxes as required by section 63 of the Internal Revenue Code and compiles statistics covering collections, refunds, additional assessments, warrants for distraint, and other data for public release or inclusion in the annual reports of the Secretary and the Commissioner.

8. *Executive direction.*—This consists of the broad management, policy, planning, and coordination work done by the Commissioner and the Assistant Commissioners and the small staffs attached to their immediate offices.

OBLIGATIONS BY ACTIVITIES

Comparative transfer from "Miscellaneous expenses, Treasury Department"	1,000		
Total obligations	1,649,700	1,855,000	2,115,000

PROGRAM AND PERFORMANCE

The Bureau investigates, detects, and prevents violations of the Federal narcotic and marihuana laws and related statutes. In the past 2 years there has been a marked increase in illicit supplies of narcotics; prices are declining and addiction is spreading. Some expansion is contemplated in the 1952 program to meet this situation.

OBLIGATIONS BY ACTIVITIES

Description	1950 actual	1951 estimate	1952 estimate
1. Administering and enforcing the Federal narcotic and marihuana laws	$1,600,935	$1,802,635	$2,061,780

Total costs	$26,780,177	$32,205,445	$31,036,485

Purpose and Financial Organization

The Bureau of Engraving and Printing designs, engraves, and prints currency, bonds, stamps, commissions, certificates, and various other forms of engraved documents.

Prior to fiscal year 1952, the Bureau was financed by direct appropriations and reimbursements. Beginning with fiscal year 1952, the Bureau will be financed under a fund as provided by Public Law 656, enacted August 4, 1950. All operations will henceforth be on a completely reimbursable basis, and business-type accounting and budget procedures will be employed.

Analysis of Budget Program

1. *Engraving and printing.*—Estimated production is based on estimates of requirements submitted by the agencies served.

(*a*) *Currency.*—Demands upon the Treasurer for issuance of currency have exceeded production, with the result that the Treasurer's reserve stocks are below normal requirements. To meet the situation, a higher level of production is planned for 1951 and 1952.

(*b*) *Stamps.*—The total anticipated workload for 1952 is slightly under 1951, due primarily to a decrease in the production of postal note stamps.

(*c*) *Paper checks, commissions, certificates, etc.*—A small increase is anticipated for 1952 due to larger orders from the Department of Defense.

(*d*) *Securities.*—The anticipated increase in production is principally due to requirements for 18,600,000 more United States savings bonds over 1951.

PRODUCTION AND COSTS

	1950 actual	1951 estimate	1952 estimate
Currency:			
United States (units)	1,260,000,000	1,560,000,000	1,500,000,000
Cost per thousand	$10.75659	$10.87	$10.68431
Total cost	$13,553,305	$16,957,198	$16,026,469
Currency—Continued			
Federal Reserve notes (units)	383,724,000	468,000,000	396,000,000
Cost per thousand	$11.18906	$12.00290	$11.94676

Other (units)	6,940,000		
Cost per thousand	$17.16239		
Total cost	$119,107		
Stamps:			
Internal Revenue (units)	21,217,152,390	23,943,800,600	23,943,800,600
Cost per thousand	$0.10581	$0.09976	$0.09801
Total cost	$2,244,970	$2,388,619	$2,346.626
United States postage (units)	20,883,126,204	20,223,288,000	20,196,788,000
Cost per thousand	$0.14055	$0.13997	$0.13993
Total cost	$2,935,143	$2,830,668	$2,826,137
Other (units)	289,270,900	336,835,000	235,620,000
Cost per thousand	$0.67483	$0.87121	$1.11487
Total cost	$195,209	$293,455	$262,686
Paper checks, commissions, certificates, etc. (units)	57,738,930	76,938,569	77,714,452
Cost per thousand	$9.10252	$10.93649	$10.55307
Total cost	$525,570	$841,438	$820,126
Securities (units)	79,312,519	86,939,550	106,319,450
Cost per thousand	$25.85988	$28.29565	$30.02094
Total cost	$2,051,012	$2,460,011	$3,191,810
Total engraving and printing costs	$25,917,828	$31,388,748	$30,204,771

2. *Operation and maintenance of incinerator and space utilized by other agencies.*—An incinerator is operated for the disposal of mutilated and redeemed currency, etc. The cost of maintenance services provided other agencies occupying space in Bureau of Engraving and Printing buildings is also included under this activity.

3. *Purchase of card checks.*—The Bureau is not equipped to manufacture punch-card check forms; therefore, purchases are made from commercial sources. Estimated procurement is based on estimates of requirements submitted by agencies served.

PROCUREMENT AND COST

	1950 actual	1951 estimate	1952 estimate
Card checks purchased	240,049,993	213,998,385	220,527,973
Unit cost per thousand	$2.30	$2.30	$2.30
Total cost	$552,119	$492,197	$507,214

Financial Results

Operations under the working capital fund will start in 1952 with net capital of $4,886,235, primarily in the form of fixed assets, inventories, and accounts receivable. An appropriation of $3,800,000 is required to provide necessary cash to operate. It is expected that operating costs will be completely financed by reimbursements for services rendered.

[SALARIES AND EXPENSES]

Salaries and Expenses, Bureau of Engraving and Printing—

[For expenses necessary for engraving and printing (exclusive of repay work), United States currency and internal-revenue stamps, opium orders and special-tax stamps required under the Act of December 17, 1914 (26 U. S. C. 1040, 1383), checks, drafts, and miscellaneous work, including the Director, two Assistant Directors, and other personal services in the District of Columbia; wages of rotary press plate printers at per diem rates and all other plate printers at piece rates to be fixed by the Secretary of the Treasury, such rates not to exceed those usually paid for such work; engravers', printers', and other materials, including distinctive and nondistinctive paper not otherwise specifically provided for; purchase of card and continuous form checks; equipment of, repairs to, and maintenance of buildings and grounds and minor alterations to buildings; not to exceed $500 for periodicals, examples of engraving and printing, including foreign securities and stamps, and books of reference; not to exceed $1,500 for travel; printing and binding; and not to exceed $15,000 for transfer to the Bureau of Standards for scientific investigations; $16,835,000: *Provided*, That during the current fiscal year proceeds derived from work performed by direction of the Secretary of the Treasury but not covered in this appropriation, instead of being covered into the Treasury as miscellaneous receipts as provided by the Act of August 4, 1886 (31 U. S. C. 176), shall be credited to this appropriation.] *(31 U. S. C. 171–178, 415–417; Treasury Department Appropriation Act, 1951.)*

Appropriated 1951, [a] **$18,835,000**

[a] Includes $2,000,000 appropriated in the Supplemental Appropriation Act, 1951.

NOTE.—For 1952, the activities previously carried under this title will be financed from the "Bureau of Engraving and Printing fund," which will receive reimbursements from the appropriations of the Treasury and other departments receiving its services. The amounts thus transferred in the estimates to other appropriations of the Treasury Department are as follows:

"Salaries and expenses, Office of Treasurer"	$13,801,479
"Salaries and expenses, Bureau of Internal Revenue"	2,328,300
"Salaries and expenses, Division of Disbursement"	454,000
"Administering the public debt"	320,274
"Salaries and expenses, Bureau of Customs"	90,500

[DISTINCTIVE PAPER FOR UNITED STATES CURRENCY AND SECURITIES]

Distinctive Paper for United States Currency and Securities—

[For expenses necessary for distinctive paper for United States currency and securities, including personal services and allowance, in lieu of expenses, not to exceed $50 per month each when actually on duty, of officers detailed from the Treasury Department, $1,845,000: *Provided*, That in order to foster competition in the manufacture of distinctive paper for United States securities, the Secretary of the Treasury is authorized, in his discretion, to split the award for such paper for the current fiscal year between the two bidders whose prices per pound are the lowest received after advertisement.] *(31 U. S. C. 759–761, Treasury Department Appropriation Act, 1951.)*

Appropriated 1951, [a] **$2,420,000**

[a] Includes $575,000 appropriated in the Supplemental Appropriation Act, 1951.

NOTE.—Pursuant to Reorganization Plan No. 26 of 1950, this appropriation was transferred from the Bureau of the Public Debt to the Bureau of Engraving and Printing. The appropriation for 1951 included $104,173 for activities previously carried under "Administering the public debt." For 1952, the activities previously carried under this title will be financed from the "Bureau of Engraving and Printing fund," which will receive reimbursements from the appropriations receiving its services. The amounts thus transferred in the estimates to other appropriations of the Treasury Department are as follows:

"Salaries and expenses, Office of Treasurer"	$1,882,886
"Administering the public debt"	272,326

PROGRAM AND PERFORMANCE

1. *Suppressing counterfeiting and investigating check and bond forgeries.*—The Secret Service Division investigates counterfeiting of United States currency, specie, and securities, the forgery and conversion of Government checks and bonds, the loss of valuables in shipment by Government agencies, and noncriminal cases as directed by the Secretary of the Treasury. The Service also protects the President of the United States, his immediate family, and the Vice President.

2. *General administrative services.*—This activity covers the operation of headquarters in Washington and the general direction and administration of the Service throughout the field, including the White House Police and Treasury Guard Force.

3. *Executive direction.*—Funds for this activity provide over-all direction of the Service.

PROGRAM AND PERFORMANCE

This appropriation finances the manufacture of coins; the receipt of deposits of gold and silver bullion; the safeguarding of the Government's holdings of monetary metals, including coins in processing stages until finished and issued; and the refining of gold and silver bullion.

1. *Manufacture of coins (domestic).*—The manufacture of coins constitutes about 50 percent of the total work program of the Bureau of the Mint. The production program for 1952 contemplates the manufacture of 675 million pieces, compared to 650 million in 1951 and 497 million in 1950. Deliveries are estimated at 850 million pieces in each of the years 1952 and 1951 compared with actual deliveries of approximately 500 million in 1950. Deliveries for the 3 years will exceed production by 375 million pieces. The deficiency will be met by a reduction in inventory on hand from 416 million pieces to 41 million pieces at the close of 1952. The demand for coins increased sharply during the first quarter of 1951, at which time approximately 50 percent of the deliveries estimated for the entire year were ordered.

DOMESTIC COINAGE WORKLOAD BY PIECES

Denomination	1950 actual	1951 estimate	1952 estimate
1 cent	365,655,416	432,000,000	443,000,000
5 cents	70,976,554	72,000,000	74,000,000
10 cents	28,582,573	95,000,000	100,000,000
25 cents	15,938,994	43,000,000	48,000,000
50 cents	16,118,222	8,000,000	10,000,000

TOTAL COSTS BY DENOMINATIONS

Denomination	1950 actual	1951 estimate	1952 estimate
1 cent	$714,126	$842,400	$846,100
5 cents	299,063	303,100	305,600
10 cents	92,798	308,700	320,000
25 cents	120,017	323,800	356,200
50 cents	191,175	94,900	116,900
Total	1,417,179	1,872,900	1,944,800

2. *Processing deposits and issues of monetary metals and coins.*—The Bureau of the Mint is the depository for gold and silver bullion and coin held by the Government and is responsible for the receipt, custody, and movement thereof. These functions are expected to continue at relatively the same level in the budget year.

SELECTED UNITS OF MEASURABLE WORKLOAD

Description	1950 actual	1951 estimate	1952 estimate
Number of deposit transactions	10,589	10,600	10,600
Silver receipts—fine ounces	40,888,086	40,900,000	40,900,000
Gold receipts—value	$484,747,261	$485,000,000	$485,000,000
Gold disbursements—do	$720,280,002	$720,000,000	$720,000,000
Sales of gold bars for industrial, professional, and artistic use—value	$82,724,086	$83,000,000	$83,000,000
Uncurrent coins received and melted pieces	58,580,118	58,600,000	58,600,000

3. *Protection of monetary metals and coins.*—Protection of the Government's holdings of gold and silver bullion and coin located at seven different mint institutions throughout the United States is maintained by armed guards and various types of modern protective devices. The values protected amount to approximately $26 billion.

4. *Refining gold and silver bullion.*—Gold and silver bullion deposited with the mint service must be refined in order to facilitate accountability, protection, and storage and to bring the bullion up to the degree of purity suitable for use in the world markets. Charges are made against the depositors for refinery services; however, the fees are deposited as miscellaneous receipts and are not available for payment of refining costs. The refinery activity, which was operated on a reduced basis during the fiscal year 1950, will be further reduced in 1951 in order to provide additional resources for coinage. The 1952 program contemplates operations at about the same level as during 1950.

5. *Executive direction.*—This activity covers the over-all management of the mint service.

NOTE.—Pursuant to the Treasury Department Appropriation Act, 1951, obligated appropriation balances as of July 1, 1950, were transferred to this title from the following accounts:

"Salaries, Office of the Commandant, Coast Guard"	$145,591
"Pay and allowances, Coast Guard"	5,284,172
"General expenses, Coast Guard"	10,408,254
"Civilian employees, Coast Guard"	85,050

PROGRAM AND PERFORMANCE

The Coast Guard enforces maritime law, saves life and property, provides navigational aids to maritime commerce and to air commerce over the ocean, promotes the efficiency and safety of the American merchant marine, and contributes to military readiness as a part of the Navy in time of war or national emergency.

1. *Search, rescue, and law enforcement.*—The Coast Guard maintains vessels on patrol, rescue vessels, lifesaving stations, and aircraft at strategic points along the coasts and inland waterways, and assists in rescue and relief operations during floods and hurricanes in inland areas. An international ice patrol and ice-observation service is maintained in the North Atlantic Ocean and ice breaking is performed to keep navigation open on inland lakes, rivers, and canals and in harbors on the Atlantic coast. The Coast Guard also administers laws and issues regulations relating to inspection, safety equipment, and licensing and certification of officers and crews, and reviews plans for construction or alteration of merchant vessels. It investigates marine casualties and accidents, holds hearings on disciplinary cases, and assists other agencies in the performance of law enforcement functions. It provides instruction in the principles and practices of safe navigation and sponsors the Coast Guard Auxiliary, a voluntary organization of boat owners who assist in time of distress.

SUMMARY OF SELECTED WORKLOAD DATA

	1950 actual	1951 estimate	1952 estimate
Assistance cases	10,440	11,000	11,000
Lives saved or persons rescued	7,619	8,000	8,000
Vessels refloated	1,929	2,000	2,000
Vessels towed to port	4,334	4,500	4,700
Vessels boarded and papers examined	20,137	20,000	21,000
Vessels reported for violations	3,367	4,000	5,000
Marine officer licenses issued	31,620	31,000	31,000
Seamen documents and certificates issued	41,866	41,000	41,000
Crews signed on and off	13,774	13,500	13,500
Marine casualty investigations	2,239	2,300	2,300
Vessels inspected	14,164	15,600	15,600
Vessel plans and blueprints reviewed	13,388	11,000	11,000
Items of marine equipment inspected at factory	439,897	475,000	475,000
Registration of undocumented vessels	452,327	460,000	468,000

2. *Operation of aids to navigation.*—Buoys, lighthouses, lightships, fog signal stations, radiobeacons, and loran stations are maintained in the navigable waters of the United States, its Territories and possessions, and military bases overseas.

SUMMARY OF SELECTED WORKLOAD DATA

	1950 actual	1951 estimate	1952 estimate
Lightships (including relief lightships)	37	36	36
Lights, radiobeacons, and fog signals (manned)	519	513	513
Shore aids (unmanned)	14,791	14,831	14,943
Buoys	22,843	22,535	23,062
Loran transmitting stations	29	29	29

3. *Operation of ocean stations for meteorological and other services.*—Ocean station vessels are maintained and operated which serve as platforms for weather observations and provide communication facilities for transmitting weather reports. They also serve as aids to navigation by providing check points for aircraft flying transoceanic routes and offer rescue facilities for both aircraft and surface vessels.

SUMMARY OF SELECTED WORKLOAD DATA

	1950 actual	1951 estimate	1952 estimate
Ocean stations operated by Coast Guard	8⅔	8⅔	8⅔
Ocean weather reports	56,456	57,000	58,000
Airplane contacts	19,660	22,500	25,000

4. *Port security.*—Anchorage areas are controlled, critical waterfront areas patrolled, loading and unloading of dangerous cargoes are supervised, and subversives are screened from among merchant seamen and longshoremen employed to handle certain critical cargoes. This activity was authorized by Public Law 679, Eighty-first Congress, and a supplemental request for fiscal year 1951 has been submitted.

PROGRAM AND PERFORMANCE

Provision is made for capital investment such as the establishment and improvement of aids to navigation, the acquisition of aircraft, the replacement or improvement of vessels, and the replacement or improvement of shore structures.

1. *Search, rescue, and law enforcement.*—This part of the program provides funds for replacement of aircraft and patrol craft, improvements or alterations at lifeboat stations and other supporting shore units, and a site survey for the development of an air station.

2. *Operation of aids to navigation.*—This part of the program provides funds for establishment or improvement of aids to navigation to mark channel and harbor improvements, and for other necessary aids.

3. *Operation of ocean stations.*—No new capital investment is anticipated in 1952.

OBLIGATIONS BY OBJECTS

12 Pensions, annuities, and insurance claims—1950, $13,861,010; 1951, $15,575,000; 1952, $16,647,000.

RESERVE TRAINING

Reserve Training, Coast Guard—

For all necessary expenses for the Coast Guard Reserve, as authorized by law (14 U. S. C. 751–762; 37 U. S. C. 321–319), including expenses for regular personnel, or reserve personnel while on active duty, engaged primarily in administration of the reserve program; purchase of not to exceed eleven passenger motor vehicles; and the maintenance, operation, and repair of aircraft; $2,000,000.

Estimate 1952, [a] **$2,000,000**

[a] Estimate is for activities previously carried under "Operating expenses, Coast Guard." The amount obligated in 1951 is shown in the schedule as a comparative transfer.

FUNDS AVAILABLE FOR OBLIGATION

	1950 actual	1951 estimate	1952 estimate
Appropriation or estimate			$2,000,000
Comparative transfer from "Operating expenses, Coast Guard"		$1,000,000	
Total obligations		1,000,000	2,000,000

PROGRAM AND PERFORMANCE

The Coast Guard Reserve training program provides trained officer and enlisted personnel for war or national emergency. In initiating the program in 1951, emphasis has been placed on port security duties. In 1952 it is planned to extend the port security program and, in general, to gear training to wartime missions.

The wartime duties for which reserve training is required and the number of officers and enlisted men to be trained in 1951 and 1952 are as follows:

Wartime duties for which Reserve training is required	Number to be trained, 1951		Number to be trained, 1952	
	Officers	Enlisted	Officers	Enlisted
Search, rescue, and law enforcement	394	2,378	650	4,024

PROGRAM AND PERFORMANCE

The Coast Guard supply account fund (14 U. S. C. 650) is a revolving fund established to finance the procurement of general stores material, uniform clothing, and commissary supplies. It is credited with receipts for the value of items issued or sold and of commissary supplies consumed; the values are so determined as not to increase the capital of the fund.

ANALYSIS OF BUDGET PROGRAMS

1. *General stores materials.*—The income from the sale of general stores materials during 1950 was $2,411,048; it is estimated to be $2,750,000 in 1951 and $3,200,000 in 1952.

2. *Commissary supplies.*—The income from the sale and consumption of commissary supplies during 1950 was $5,001,975; it is estimated to be $5,000,000 in 1951 and $5,025,000 in 1952.

3. *Uniform clothing.*—The income from the sale of uniform clothing during 1950 was $771,499; it is estimated to be $1,270,000 in 1951 and $1,500,000 in 1952.

FINANCIAL RESULTS

During fiscal year 1950, a net revenue of $78,529 resulted. During 1951 and 1952, it is estimated that income from sales will be entirely offset by cost of goods sold. The estimated net reduction of $731,748 in total liabilities during 1951 reflects repayment of an advance from the appropriation "Pay and allowances, Coast Guard," in the amount of $750,000, offset by a $18,252 increase in accounts payable.

PROGRAM AND PERFORMANCE

The Coast Guard yard fund is a special deposit account established by the Secretary of the Treasury (14 U. S. C. 648), effective July 1, 1950, to account for costs of industrial work performed at the Coast Guard Yard, Curtis Bay, Md. Data for fiscal year 1950 is included in the schedules for comparative purposes. Charges made for work performed cover all costs except depreciation for replacement of structures. The net capital of the fund on July 1, 1950, was $10,161,514, consisting of $1,402,141 in inventories, $9,259,921 in fixed assets, and liabilities of $500,548.

Industrial operations.—The industrial operations at the yard comprise five general activities: vessel construction, repair, and alteration; small-boat construction; buoy manufacture; electronics maintenance; and miscellaneous manufacturing. During 1951 and 1952, it is estimated that income from industrial work orders will total $7,000,000 and, from the sale of scrap, $100,000 each year. As indicated on statement B, the estimated expenses of the fund for 1951 and 1952, exclusive of replacement of structures, total $7,100,000 each year.

Administrative expenses.—These expenses are estimated at $1,031,841 for 1951 and $1,031,331 for 1952, covering the costs of the military and civilian personnel and related expenses.

FINANCIAL RESULTS

Increases in capital assets of $121,815 in 1951 and $121,815 in 1952 represent additions of equipment and plant improvements. The accumulated deficit of $225,412 in 1951 and $451,824 in 1952 represents depreciation of buildings not covered in charges for services.

EXPLANATORY STATEMENT

General Statement

The District of Columbia constitutes a political entity in which are exercised not only municipal but also county and State functions, such as public education, administration of justice, maintenance of a unit of the National Guard, promotion of family welfare, care of the indigent, custody of mental defectives and delinquents, protection of the interests of labor, metropolitan area planning, etc. While the municipal functions are administered principally by the Board of Commissioners, District of Columbia, most of the county and State functions are carried on by other agencies, some local and some Federal in character.

In contrast to this diversity in the administration of District functions under the Constitution, Congress is empowered "to exercise exclusive legislation in all cases whatsoever" on behalf of the District of Columbia as the seat of government of the United States. Congress acts in municipal matters as a city council, and in dealing with the broader aspects of the local government, as a county board and a State legislature. In this connection, Congress enacts the District's revenue measures and appropriates the money thus raised to carry on the government of the District of Columbia. District revenues from all sources are covered into the United States Treasury and credited either to the general fund, the highway fund, the water fund, or a trust fund, and no expenditure can be made from any of these funds, other than trust funds, without specific appropriation by Congress.

Under the law, the District estimates of appropriation are submitted to the Bureau of the Budget for incorporation in the Budget of the United States. The Bureau, however, does not examine the estimates of the District in minute detail, but confines its attention more to matters of policy which concern the Federal Government and present and proposed revenue measures required to balance the District budget.

The estimates of revenues for the general, highway, water, and trust funds are found in supporting statement No. 1. Estimates of appropriations for the same funds are shown in supporting statement No. 2. Attention is also directed to the summary table at the beginning of this chapter.

GENERAL FUND

Revenues accruing to the general fund of the District of Columbia are used to finance the administrative offices, schools, libraries, police, health, recreation, sanitation, welfare, corrections, certain public works, and other operating activities. These revenues are realized from real, personal, and other property taxes; sales and gross receipts taxes on alcoholic beverages, cigarettes, insurance, motor vehicles, public utilities, gross sales, and other sources; licenses and permits; individual and corporation income taxes; inheritance and estate taxes; certain earnings and miscellaneous revenues; and the Federal payment. The largest item of revenue in the general fund comes from realty and personal property taxes, and amounts to approximately 41 percent of the total. The levy is based on an estimated assessed valuation of $1,978,000,000, taxed at the rate of $2.15 per $100 for realty and $2 per $100 for personal property. The estimated valuation is $39,000,000 higher in 1952 than for the current year. The Federal payment is estimated at $12,000,000, which is in accordance with existing law, and represents an increase of $1,200,000 over the fiscal year 1951. Of this amount, $11,000,000 will be credited to the general fund and $1,000,000 to the water fund.

The estimate of general-fund revenue availability on the present tax base for the fiscal year 1952, including the Federal payment of $11,000,000 and a surplus of $10,297,613 from 1951, totals $114,182,613, which amount is $614,942 greater than the estimated funds required for 1952.

General-fund estimates of appropriation for 1952 show an over-all increase of $11,376,935 or approximately 9 percent over 1951 estimates. Of this increase $6,221,925 is for capital outlay, leaving $5,155,010 for operating expenses or approximately 5 percent. Furthermore, $2,691,260 of the increase for capital is for construction for which funds will not be required until 1953. The increase in operating expenses is reflected largely in retirement funds, welfare, corrections, health, police, and public-works programs. The largest increase in capital outlay is for a new Industrial Home School at Laurel, Md.

HIGHWAY FUND

Highway-fund revenues are realized from a gasoline tax, automotive registration and weight tax, motor-vehicle fees of various types, and paving assessments. The estimated revenues from these sources for the fiscal year 1952, plus available surpluses, total $12,728,065, which will be $113,396 in excess of the estimated obligations.

Estimates of appropriation chargeable to the highway fund for 1952 show an over-all increase of 32 percent over 1951 estimates. This increase is reflected largely in capital outlay for the Street and Bridge Division, the

http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

Department of Vehicles and Traffic, and police control of highway traffic.

WATER FUND

Water-fund revenues are derived from the sale of water to residents of the District of Columbia and to Arlington County, Va.; from the Federal payment of $1,000,000 provided for under the District of Columbia Revenue Act of 1947; from water-main assessments; from interest on investments; and from miscellaneous receipts. Total revenues for the fiscal year 1952, including surplus funds, Federal loans and sale of investment securities, are estimated at $9,946,121, which will be $41,121 in excess of the estimated obligations for 1952.

The estimates of appropriation for fiscal year 1952 from the water fund amount to $9,905,000, which are $1,850,086 above the estimates for the fiscal year 1951, for an increase of approximately 23 percent.

Capital outlays amounting to $6,438,000 account for approximately 65 percent of the fiscal year 1952 estimates, as compared with 51 percent of the 1951 estimates. These capital outlay projects will provide important improvements in the District water distribution system and the Washington Aqueduct.

SUMMARY OF OPERATIONS

[For the fiscal years 1950, 1951, and 1952]

Classification	1950 actual	1951 estimate	1952 estimate
I. GENERAL FUND:			
Surplus at beginning of year	[1] $1,273,155	$10,577,609	$10,297,613
Unobligated balances of prior year appropriations released to surplus	1,818,308	1,200,000	1,400,000
Revenues (including Federal payment)	104,209,578	102,752,000	102,485,000
Total availability	104,754,731	114,529,609	114,182,613
Obligations (funds required)	92,970,742	104,231.996	113,567,671
Unobligated balances of appropriations not yet released to surplus	1,206,380		
Total appropriations available for expenditure	94,177,122	104,231,996	113,567,671
Surplus at end of year	10,577,609	10,297,613	614,942
II. HIGHWAY FUND:			
Surplus at beginning of year	101,173	813,636	1,818,065
Unobligated balances of prior year appropriations released to surplus	265,533	106,000	100,000
Revenues	10,278,544	10,485,000	10,810,000
Total availability	10,645,250	11,404,636	12,728,065
Obligations (funds required)	9,685,846	9,586,571	12,614,669

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That there are appropriated for the District of Columbia for the fiscal year ending June 30, [1951] *1952,* out of (1) the general fund of the District of Columbia, hereinafter known as the general fund, such fund being composed of the revenues of the District of Columbia other than those applied by law to special funds, (2) highway funds, established by law (D. C. Code, title 47, ch. 19), and (3) the water fund, established by law (D. C. Code, title 43, ch. 15), sums as follows:

From the general fund: All sums appropriated under the following heads *unless otherwise specifically provided*: General administration, fiscal service, compensation and retirement fund expenses, District debt service, regulatory agencies, public schools, Public Library, Recreation Department, Metropolitan Police, Fire Department, [policemen's and firemen's relief,] Veterans' Services, courts, Health Department, Department of Correction, public welfare, public works (excluding those items designated as payable from the highway and water funds), National Guard, National Capital Parks, National Capital Park and Planning Commission, and National Zoological Park;

From the highway fund: All sums appropriated under public works designated as payable from the highway fund; and

From the water fund: All sums appropriated under public works and Washington aqueduct, designated as payable from the water fund; namely:

GENERAL ADMINISTRATION

For expenses necessary for the offices named under this general head: (*District of Columbia Appropriation Act of 1951.*)

Salaries and Expenses, Executive Office, District of Columbia—

Executive office, plus so much as may be necessary to compensate the Engineer Commissioner at a rate equal to each civilian member of the Board of Commissioners of the District of Columbia, hereafter in this Act referred to as the Commissioners; [six] *compensation of* members of the Apprenticeship Council; [at $120 per annum each; $250 to] aid in support of the National Conference of Commissioners on Uniform State Laws; general advertising in newspapers and legal periodicals in the District of Columbia but not elsewhere, unless the need for advertising outside the District of Columbia shall have been specifically approved by the Commissioners, including notices of public hearings, publication of orders and regulations, tax and school notices, and notices of changes in regulations; services as authorized by section 15 of the Act of August 2, 1946 (5. U. S. C. 55a); and [$10,000 for] expenses in case of emergency, such as riot, pestilence, public insanitary conditions, flood, fire, or storm, and for expenses of investigations; [$284,450] *$293,700: Provided,* That the certificate of the Commissioners shall be sufficient voucher for the expenditure of $1,500 of this appropriation for such purposes as they may deem necessary. (*1 D. C. Code 201–250; District of Columbia Appropriation Act of 1951.*)

Appropriated 1951, [a] **$289,950** Estimate 1952, **$293,700**

[a] Includes $5,500 appropriated in the Supplemental Appropriation Act, 1951.

Capital Outlay, Street and Bridge Divisions, Highway Fund, District of Columbia—

Capital outlay, Street and Bridge Divisions (payable from highway fund): For expenses necessary for the grading, surfacing, paving, repaving, widening, altering, and otherwise improving streets, avenues, roads, and alleys, including curbing and gutters, directional and pedestrian islands at various intersections to permit of proper traffic-light control and channelization of traffic, drainage structures, culverts, suitable connections to storm-water sewer system, retaining walls, replacement and relocation of sewers, water mains, fire hydrants, traffic lights, street lights, fire-alarm boxes, police-patrol boxes, and curb-line trees, when necessary, Federal-aid highway projects under section 1 (b) of the Federal Aid Highway Act of 1938, and highway structure projects financed wholly from the highway fund upon the approval of plans for such structures by the Commissioners; for carrying out the provisions of existing laws which authorize the Commissioners to open, extend, straighten, or widen streets, avenues, roads, or highways, in accordance with the plan of the permanent system of highways for the District of Columbia, and alleys and minor streets, and for the establishment of building lines in the District of Columbia, including the procurement of chains of title; and for assessment and permit work, paving of roadways under the permit system, and construction of sidewalks and curbs around public reservations and municipal and United States buildings, including purchase or condemnation of streets, roads, and alleys, and of areas less than two hundred and fifty square feet at the intersection of streets, avenues, or roads in the District of Columbia, to be selected by the Commissioners, [$4,746,000] *$7,050,000*, to remain available until June 30, [1952] *1953*: *Provided*, [That appropriations contained in this Act for highways, sewers, Division of Sanitation, and the Water Division shall be available for snow removal when ordered by the Commissioners in writing: *Provided further*,] That in connection with the purchase and installation of a municipal asphalt plant on District-owned property the Commissioners are authorized to make expenditures from this appropriation in an amount not exceeding $150,000 for the preparation of the site, including the construction of sea walls, dock facilities, and a railroad siding: *Provided further*, That in connection with the highway-planning survey, involving surveys, plans, engineering, and economic investigations of projects for future construction in the District of Columbia, as provided for under section 10 of the Federal Aid Highway Act of 1938, and in connection with the construction of Federal-aid highway projects under section 1 (b) of said Act, and highway-structure projects financed wholly from the highway fund, this appropriation shall be available for the employment of engineering or other professional services by contract or otherwise, and without regard to section 3709 of the Revised Statutes and the civil-service and classification laws, and section 15 of the Act of August 2, 1946 (5 U. S. C. 55a), and for engineering and incidental expenses: *Provided further*, That [this appropriation and the appropriation "Operating expenses,] *hereafter appropriations for* Street and Bridge Divisions, highway fund, ["] shall be available for the construction and repair of pavements of street railways, in accordance with the provisions of the Merger Act (47 Stat. 752), and the proportion of the amount thus expended which under the terms of the said Act is required to be paid by the

NATIONAL CAPITAL PARKS

National Capital Parks, District of Columbia—

For expenses necessary for the National Capital Parks, including maintenance, care, and improvement of public parks, grounds, fountains, and reservations, propagating gardens and greenhouses, and the tourists' camp on its present site in East Potomac Park under the jurisdiction of the National Park Service; placing and maintaining portions of the parks in condition for outdoor sports, erection of stands, furnishing and placing of chairs, and services incident thereto in connection with national, patriotic, civic, and recreational functions held in the parks, including the President's Cup Regatta, and expenses incident to the conducting of band concerts in the parks; such expenses to include pay and allowances of the United States Park Police force; per diem employees at rates of pay approved by the Secretary of the Interior, not exceeding current rates of pay for similar employment in the District of Columbia; uniforming and equipping the United States Park Police force; the purchase, issue, operation, maintenance, repair, exchange, and storage of revolvers, uniforms, ammunition, and radio equipment and the rental of teletype service; and the purchase of passenger motor vehicles, bicycles, motorcycles, and self-propelled machinery; the hire of draft animals with or without drivers at local rates approved by the Secretary of the Interior; the purchase and maintenance of draft animals, harness, and wagons; [$1,747,200] *$1,881,000, of which $25,000 shall be payable from the highway fund: Provided,* That not to exceed $10,000 of the amount herein appropriated may be expended for the erection of minor auxiliary structures: *Provided further,* That funds appropriated under or transferred to this head for services rendered by the National Park Service shall be expended by expenditure warrant as an advance to said service and shall be credited as a repayment and maintained in a special account. The amounts so advanced will be available for the objects specified herein or in the appropriation from which such funds are transferred, any unexpended balance to be returned to the appropriation concerned not later than two full fiscal years after the close of the current fiscal year. *(4 D. C. Code 201–207; 8 D. C. Code 108; District of Columbia Appropriation Act of 1951.)*

Appropriated 1951, [a] **$1,787,200** Estimate 1952, [b] **$1,881,000**

[a] Includes $40,000 appropriated in the Supplemental Appropriation Act, 1951.
[b] Includes $25,000 for activities previously carried under "Reimbursement of other appropriations from highway fund, District of Columbia." The amounts obligated in 1950 and 1951 are shown in the schedule as comparative transfers.

NATIONAL ZOOLOGICAL PARK

National Zoological Park, District of Columbia—

For expenses necessary for the National Zoological Park, including erecting and repairing buildings; care and improvement of grounds; travel, including travel for the procurement of live specimens; purchase, care, and transportation of specimens; purchase of motorcycles and passenger motor vehicles; revolvers and ammunition; purchase of uniforms and equipment for police, and uniforms for keepers and assistant keepers; [$573,000] *$591,000: Provided,* That funds appropriated under this head shall be expended by expenditure warrant as an advance to the National Zoological Park and shall be credited as a repayment and maintained in a special account. The amounts so advanced will be available for the objects herein specified, any unexpended balance to be returned to this appropriation not later than two full fiscal years after the close of the current fiscal year. (*20 U. S. C. 81; District of Columbia Appropriation Act of 1951.*)

Appropriated 1951, [a] **$636,000** Estimate 1952, **$591,000**

[a] Includes $63,000 appropriated in the Supplemental Appropriation Act, 1951.

GENERAL PROVISIONS

SEC. 2. Except as otherwise provided herein, all vouchers covering expenditures of appropriations contained in this Act shall be audited before payment by or under the jurisdiction only of the Auditor for the District of Columbia and the vouchers as approved shall be paid by checks issued by the Disbursing Officer without countersignature.

SEC. 3. No part of any appropriation contained in this Act or authorized hereby to be expended shall be used to pay the compensation of any officer or employee of the Government of the United States, or of the District of Columbia unless such person is a citizen of the United States[, or a person in the service of the United States or the District of Columbia on the date of the approval of this Act who being eligible for citizenship had theretofore filed a declaration of intention to become a citizen or who owes allegiance to the United States]. This section shall not apply to citizens of the Commonwealth of the Philippines or nationals of those countries allied with the United States in the prosecution of the war effort.

SEC. 4. No part of any appropriation contained in this Act shall be used to pay the salary or wages of any person who engages in a strike against the Government of the United States or the government of the District of Columbia, or who is a member of an organization of Government employees that asserts the right to strike against the Government of the United States or the government of the District of Columbia, or who advocates, or is a member of an organization that advocates, the overthrow of the Government of the United States by force or violence: *Provided*, That for the purposes hereof an affidavit shall be considered prima facie evidence that the person making the affidavit has not contrary to the provisions of this section engaged in a strike against the Government of the United States or the government of the District of Columbia, is not a member of an organization of Government employees that asserts the right to strike against the Government of the United States or the government of the District of Columbia, or that such person does not advocate, and is not a member of an organization that advocates, the overthrow of the Government of the United States by force or violence: *Provided further*, That any person who engages in a strike against the Government of the United States or the government of the District of Columbia or who is a member of an organization of Government employees that asserts the right to strike against the Government of the United States or the government of the District of Columbia, or who advocates, or who is a member of an organization that advocates, the overthrow of the Government of the United States by force or violence, and accepts employment the salary or wages for which are paid from any appropriation contained in this Act shall be guilty of a felony and, upon conviction, shall be fined not more than $1,000 or imprisoned for not more than one year, or both: *Provided further*, That the above penalty clause shall be in addition to, and not in substitution for, any other provisions of existing law.

SEC. 5. Whenever in this Act an amount is specified within an appropriation for particular purposes or object of expenditure, such amount, unless otherwise specified, shall be considered as the maximum amount which may be expended for said purpose or object rather than an amount set apart exclusively therefor.

SEC. 6. Work performed for repairs and improvements under appropriations contained in this Act may be by contract or otherwise, as determined by the Commissioners; and the Commissioners are authorized to establish a working fund for such purposes without fiscal year limitation, said fund to be reimbursed for repairs and improvements performed under that fund from available appropriations contained in this Act, and payments are authorized to be made to said fund in advance if required by the Director of Construction, subject to subsequent adjustment, from appropriations contained in this Act for repairs and improvements, and such working fund shall be available for necessary expenses including personal services, allowances for privately owned automobiles, and printing and binding.

SEC. 7. Appropriations in this Act shall be available, when authorized by the Commissioners, for allowances for privately owned automobiles used for the performance of official duties at 7 cents per mile but not to exceed [$264 per annum] *$22 a month* for each automobile, unless otherwise therein specifically provided: *Provided*, That the total expenditures for this purpose shall not exceed [$51,000] *$55,000*, excluding the automobile allowances for the deportation of nonresident insane, the transportation of indigent persons, and the placing of children by the Board of Public Welfare.

SEC. 8. Appropriations in this Act shall be available for the payment of dues and expenses of attendance at meetings of organizations concerned with the work of the District of Columbia government, when authorized by the Commissioners: *Provided*, That the total expenditures for this purpose shall not exceed [$13,700] *$14,200*.

SEC. 9. [The] *Hereafter the* Commissioners are hereby authorized in their discretion to invest and reinvest at any time in United States Government securities, with the approval of the Secretary of the Treasury, any part of the general fund, highway fund, water fund, or trust funds, of the District of Columbia, not needed to meet current expenses [during the fiscal year], to deposit the interest accruing from such investments to the credit of the fund from which the investment was made, and the Secretary of the Treasury is authorized to sell or exchange such securities for other Government securities, and deposit the proceeds to the credit of the appropriate fund.

SEC. 10. Appropriations [for necessary expenses] *in this Act* shall be available for personal services [and printing and binding] and, when authorized by the Commissioners or by the purchasing officer and the auditor, acting for the Commissioners, printing and binding may be performed by the District of Columbia Division of Printing and Publications without reference to fiscal-year limitations.

SEC. 11. Appropriations in this Act shall be available, when authorized by the Commissioners, for stenographic reporting service as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a).

SEC. 12. The disbursing officer of the District of Columbia is authorized to advance to officials upon requisitions previously approved

Federal Reserve Bank of St. Louis

by the Auditor of the District of Columbia, not to exceed at any one time sums of money as follows:

Director of Weights, Measures, and Markets, $400, to be used exclusively in connection with investigation of short weights and measures.

Librarian of the Public Library, $50 at the first of each month; for the purchase of certain books, pamphlets, periodicals, newspapers, or other printed materials.

Superintendent of recreation, $4,000, to be used for the expense of conducting activities of the Recreation Board under the trust fund created by the Act of April 29, 1942 (56 Stat. 261).

Superintendent of Police, $5,000, to be used in the prevention and detection of crime.

Chief probation officer of the juvenile court, $50, upon requisition previously approved by the judge of the juvenile court, to be expended for travel expenses to secure the return of absconding probationers.

Director, Department of Corrections, $750, to be used only in returning escaped prisoners, conditional releasees, parolees, and for the payment of cash gratuities to prisoners on release.

Director of Public Welfare, $2,000, to be used for placing and visiting children, returning parolees and wards of the Board of Public Welfare, and deportation of nonresident insane and indigent persons including maintenance pending transportation.

SEC. 13. Appropriations in this Act shall not be used for or in connection with the preparation, issuance, publication, or enforcement of any regulation or order of the Public Utilities Commission requiring the installation of meters in taxicabs, or for or in connection with the licensing of any vehicle to be operated as a taxicab except for operation in accordance with such system of uniform zones and rates and regulations applicable thereto as shall have been prescribed by the Public Utilities Commission, but this shall not be construed to prevent the Public Utilities Commission from holding a hearing upon any application that may be made for the installation of meters in taxicabs.

SEC. 14. Appropriation in this Act shall not be available for the payment of rates for electric street lighting in excess of those authorized to be paid in the fiscal year 1927, and for payment for electric current for new forms of street lighting shall not exceed 2 cents per kilowatt-hour for current consumed.

SEC. 15. All motor-propelled passenger-carrying vehicles (including watercraft) owned by the District of Columbia shall be operated and utilized in conformity with section 16 of the Act of August 2, 1946 (5 U. S. C. 77, 78), and shall be under the direction and control of the Commissioners, who may from time to time alter or change the assignment for use thereof, or direct the alteration or interchangeable use of any of the same by officers and employees of the District, except as otherwise provided in this Act. "Official purposes" shall not apply to the Commissioners of the District of Columbia or in cases of officers and employees the character of whose duties makes such transportation necessary, but only as to such latter cases when the same is approved by the Commissioners. No motor vehicles shall be transferred from the police or fire departments to any other branch of the government of the District of Columbia.

SEC. 16. Appropriations contained in this Act for highways, sewers, Division of Sanitation, and the Water Division shall be available for snow removal when ordered by the Commissioners in writing. (District of Columbia Appropriation Act of 1951.)

Annual definite appropriation, general account:

INTRODUCTION TO PART III

Part III of the Budget presents three summary tables which pertain to the trust funds and deposit funds held by the Government. Following these tables there are presented the detailed schedules of the transactions of those trust funds which do not require annual congressional action.

TYPES OF TRUST AND DEPOSIT FUNDS

Trust funds which are permanently appropriated.—The receipts of most trust funds are appropriated by permanent law for the purposes of the fund without further specific action by Congress. In such cases, the appropriations each year are usually equal to the receipts of the year. Sometimes, however, the amount appropriated may differ slightly from the receipts in any given period, due to a time lag between the crediting of the receipt and the recording of the appropriation. Examples of such funds are the civil service retirement and disability fund and the unemployment trust fund.

Trust funds requiring congressional action.—In a few cases, receipts of trust funds can be spent only in accordance with appropriations or other authorizations enacted by Congress from year to year. Receipts and appropriations of such funds are not necessarily equal to each other in any one year. Examples of such funds are the Soldiers Home fund, the war claims fund, and the municipal revenues of the District of Columbia. In the case of the railroad retirement account, and the Federal old-age and survivors insurance trust fund, the amounts available for administrative expenses are subject to annual action by Congress.

Deposit funds.—Moneys paid into official deposit accounts, which the Government holds in suspense or holds as fiscal agent, are not subject to formal appropriation action. Examples of deposit funds are the deposits of the Republic of the Philippines, the sums withheld at their direction from employees' pay for the subsequent purchase of bonds, and collections which may be subject to later determination as to whether they are for the Treasury or for refunds. Such collections are not reported as Treasury receipts. The net excess of payments out of such accounts over their collections in any year is reported as an expenditure, and any excess of collections over payments is reported as a negative figure. Net expenditures are a charge to balances built up in previous years; negative figures serve to increase the balances carried forward to the following year.

TABLES 8, 9, AND 10

These tables relate to all trust and deposit funds, whether they require congressional action or not. Table 8 is a summary, setting forth by item the largest funds and grouping the remainder. Tables 9 and 10 list the receipts, appropriations, and expenditures of the various trust funds by organization unit. In addition, the net expenditures of deposit funds are shown at the end of table 10.

Like the chapter summaries of part II, table 10 contains the functional code numbers which indicate the classification to which the expenditures of these funds are assigned in the preparation of table A in part IV.

DETAIL OF ESTIMATES

This part of the Budget contains the detailed schedules of trust funds which do not require annual congressional action (those requiring such action are in part II). The material here follows the general format of the details of part II. However, no appropriation language is necessary here, and, in the case of trust funds which are expendable solely for refunds, no narrative statement of program and performance is used. The schedules presented here show the amounts available, a breakdown of the obligations by activity, the numbers of positions and personnel employed, and the breakdown of obligations by uniform object class.

INVESTMENTS IN UNITED STATES GOVERNMENT SECURITIES

The larger trust funds invest their accumulated balances in United States Government securities. Some of the smaller trust funds also do so. In this Budget, the obligations and expenditures of trust funds are reported exclusive of such investments. In the schedules of obligations, the investments on hand as well as the investment transactions for the year are shown in a separate section under the appropriate fund. For these purposes, the investments are shown at par value; premiums and discounts are treated as adjustments in obligations and expenditures.

Total obligations	531,476	550,300	536,700

PROGRAM AND PERFORMANCE

Gift funds are contributed for immediate disbursement by the Librarian in the interest of the Library, its collections, or its service for the purposes specified in each case (2 U. S. C. 160; 31 U. S. C. 725s). The two principal purposes are: Additions to the collections and providing reader and reference service.

1. *Acquisitions of library materials.*—During 1950, this included the procurement of library materials, manuscripts, rare prints and photographs, classification and listing of these materials; recording folk music; the preparation of check lists; and the distribution of duplicates.

2. *Reader and reference service.*—This service included the preparation of bibliographies; lectures; the preparation of indexes; photographic exchange; surveys of bibliographic services; editing scientific papers; musical concerts; and recording and furtherance of musical research, composition, performance, and appreciation. (Photoduplication Service and Recording Laboratory, which operate on revolving funds with the initial capital contributed as gifts, accounted for $386,922 in 1950 and an estimated $445,000 in 1951 and 1952.)

LEGISLATIVE BRANCH—Continued

LIBRARY OF CONGRESS—Continued

Library of Congress Trust Fund, Permanent Loan—Continued

PROGRAM AND PERFORMANCE

This fund represents gifts or bequests of which the principal sums, in cash, have been deposited by the Board with the Treasurer of the United States as a permanent loan to the United States, the interest upon which, at 4 percent per annum, payable semiannually, is subject to disbursement by the Librarian for the purposes in each case specified: *Provided, however,* That the total of such principal sums at any one time so held by the Treasurer under this authorization shall not exceed the sum of $5,000,000 (2 U. S. C. 158; 31 U. S. C. 725s). Of the total principal funds amounting to $2,247,624, $924,650 is for music activities, $382,777 for fine arts, $307,609 for American history, $162,052 for Hispanic activities, and the remaining $470,536 for miscellaneous purposes.

Library of Congress Trust Fund, Income From Investment Account—

Appropriated (estimate) 1951, **$12,026** Estimate 1952, **$12,000**

FUNDS AVAILABLE FOR OBLIGATION

	1950 actual	1951 estimate	1952 estimate
Appropriation or estimate	$12,147	$12,026	$12,000
Prior year balance available	5,863	4,208	2,234

Balance available in subsequent year	−4,208	−2,234	−1,234
Total obligations	13,802	14,000	13,000

PROGRAM AND PERFORMANCE

Income from investments held by the Treasury for the benefit of the Library of Congress is subject to disbursement by the Librarian for the purposes in each case specified (2 U. S. C. 157; 31 U. S. C. 725s). The purposes are in general: (1) Acquisitions and (2) reader and reference services.

1. *Acquisitions.*—Provides for the purchase of fine arts materials.

2. *Reader and reference service.*—Maintains the Hispanic Room, the chair in English poetry, and furthers musical composition, performance, and appreciation ($9,618 of the $10,340 obligated in 1950 was used to maintain the Hispanic Room and consultanship in English poetry).

Balance available in subsequent year	−113,087	−117,992	−117,897
Total obligations	76,025	85,000	90,000

PROGRAM AND PERFORMANCE

The act of March 3, 1925, appropriates a sum equivalent to interest at the rate of 4 percent per annum on a trust fund (the principal of which shall not exceed $5,000,000) composed of gifts or bequests for the benefit of the Library. Moneys so appropriated become available semiannually for disbursement by the Librarian of Congress for the purposes specified (2 U. S. C. 156–158). The interest credited is utilized in general for (1) acquisition of library materials, and (2) reader and reference services.

1. *Acquisitions.*—Provides for the purchase of materials such as Hispanic, fine arts, American history, and European archival materials related to American history.

2. *Reader and reference services.*—Aids in the development, study, and appreciation of music, and maintains the chairs in American history, fine arts, aeronautics, and geography. In 1950, music accounted for $29,752 of the $57,176 obligated under this category.

PROGRAM AND PERFORMANCE

This fund is used to pay annuities to retired employees or their survivors, to make refunds to former employees who have left the service, and to pay claims for employees who have died before their annuities are paid in full. Included in this fund are the amounts formerly in the Canal Zone retirement and disability fund and the Alaska Railroad retirement and disability fund. It is estimated that as of June 30, 1952, there will be 223,529 persons on the annuity roll, compared with 198,872 as of June 30, 1951, and 175,234 as of June 30, 1950.

PROGRAM AND PERFORMANCE

Under the railroad retirement system, workers and their employers make annual contributions in the form of taxes on wages toward the benefits which will be payable when the worker reaches 65, becomes disabled, or when he dies. These annual contributions are appropriated to this trust fund and invested in special Government securities carrying an interest rate of 3 percent. Annuity and benefit payments are paid from this account and annual administrative expenses are derived therefrom. The excess of income over outgo together with annual interest on invested funds are accumulated to provide for the future annuities and benefits being currently earned by workers. When the system reaches maturity, some years hence, the interest on the accumulated investments in the trust fund, together with annual contributions, should be sufficient to pay the annual cost of earned benefits and the annual administrative cost of operating the system.

The present status of the fund is as follows:

	1950 actual	1951 estimate	1952 estimate
Investments in United States securities at beginning of year	$1,720,000,000	$2,057,600,000	$2,398,600,000

Net investments during the year	−313,000	−300,000	−250,000
Total investments held at end of year	5,250,000	4,950,000	4,700,000

PROGRAM AND PERFORMANCE

This fund was established in order that adjusted service certificates issued to veterans of World War I could be paid at maturity. The law was subsequently modified to provide for payment before maturity, and only a small proportion of the certificates remain unpaid (38 U. S. C. 646–647).

OBLIGATIONS BY ACTIVITIES

Payment of World War I adjusted service certificates—1950, $556,228; 1951, $550,000; 1952, $500,000.

OBLIGATIONS BY OBJECTS

12 Pensions, annuities, and insurance claims—1950, $556,228; 1951, $550,000; 1952, $500,000.

Investments during the year	197,000		
Investments held at end of year	2,143,000	2,143,000	2,143,000

PROGRAM AND PERFORMANCE

This fund represents accumulated benefits of operations of stores, hotels, restaurants, and canteens and rental from concessions; gifts and bequests and proceeds of property left in the care of the homes by former members; unpaid pension money standing to the credit of members of the homes who die leaving no heirs or next of kin and without having disposed of their estate by will. Such funds are available for construction of chapels, amusement halls, and for other purposes designed to promote the comfort and welfare of the veterans at the various hospitals and homes in cases where no general appropriation is available (24 U. S. C. 111, 136, 139; 31 U. S. C. 725s; 38 U. S. C. 14–14e; 17–17j).

OBLIGATIONS BY ACTIVITIES

Recreational and entertainment—1950, $631,949; 1951, $600,000; 1952, $600,000.

OBLIGATIONS BY OBJECTS

12 Pensions, annuities, and insurance claims—1950, $631,949; 1951, $600,000; 1952, $600,000.

PROGRAM AND PERFORMANCE

All premiums paid for national service life insurance and interest earned on investment of these moneys are deposited in this fund. The fund is reimbursed from the national service life insurance appropriation for payments on death or disability claims which are traceable to the extra hazard of military or naval service. To the extent consistent with special provisions of law, the fund is operated on a commercial basis, and all expenses except administrative expense are paid by it. Financial statements for the 1949 calendar year are as follows:

NATIONAL SERVICE LIFE INSURANCE TRUST FUND

Balance sheet as of Dec. 31, 1949

Assets:	
Investments (U. S. Treasury notes, 3 percent)	$7,695,685,000

Total obligations	69,718	261,270	516,140

PROGRAM AND PERFORMANCE

Under the provisions of the Servicemen's Readjustment Act of 1944, the Administrator is given authority to effect administrative determinations necessary to safeguard the interest of the Government in the guaranteeing of loans, the payment of claims arising from these, and the disposition of properties acquired. On all sales of acquired property for less than full-cash consideration, the contract of sale must provide for periodic collection of tax and insurance accruals. Such collections are deposited in this fund and subsequently used to defray tax and insurance charges as they mature.

OBLIGATIONS BY ACTIVITIES

Payment of taxes and insurance premiums—1950, $69,718; 1951, $261,270; 1952, $516,140.

PROGRAM AND PERFORMANCE

All moneys received as contributions for cooperative work in forest investigations, protection and improvement of the national forests, and protection, reforestation, and administration of private lands are used to defray the expenses of the Forest Service in performing this work for contributors. Except for deposits by purchasers of national forest timber under 16 United States Code 576b, this fund is also available for refunds to the contributors of amounts paid in by them in excess of their share of the cost of such expenses (16 U. S. C. 498, 572, 572a, 576b, 581; 31 U. S. C. 725s).

Balance available in subsequent year	−168,505	−179,505	−190,405
Total obligations	30,149	15,000	8,100

PROGRAM AND PERFORMANCE

These funds consist of receipts derived from the leasing of lands on water conservation and utilization projects owned either jointly or separately by the United States and State rural rehabilitation corporations. Such funds are available for payments in lieu of taxes to States, political subdivisions thereof, and local taxing units, and for payment of operation and maintenance costs of the resettlement features of the projects (40 U. S. C. 431–434).

OBLIGATIONS BY ACTIVITIES

Payments in lieu of taxes and operation and maintenance costs—1950, $30,149; 1951 $15,000; 1952, $8,100.

Balance available in subsequent year	−68,132	−50,000	−50,000
Total obligations	40,101	218,132	200,000

PROGRAM AND PERFORMANCE

From funds which would otherwise be paid by the Production and Marketing Administration for carrying out conservation practices, amounts are allotted to the Soil Conservation Service on the basis of specific agreements with individual Production and Marketing Administration State and county committees to provide farmers and ranchers in participating counties with technical and other assistance. The assistance is over and above that furnished normally under the regular Soil Conservation Service program to soil conservation districts.

OBLIGATIONS BY ACTIVITIES

Providing technical and other assistance to farmers and ranchers in participating counties pursuant to agreements executed with individual Production and Marketing Administration State and county committees—1950, $40,101; 1951, $218,132; 1952, $200,000.

OBLIGATIONS BY OBJECTS

Total obligations	6,041,131	6,113,335	6,100,000

PROGRAM AND PERFORMANCE

An inspection and grading service for farm products is provided, upon the application of interested parties. This service is supported in part by the appropriation "Marketing services" and in part by fees. This schedule reflects the amount of fees received which are held in special trust accounts for the payment of salaries and other necessary expenses (7 U. S. C. 91–99, 1621–1627).

Balance available in subsequent year	−246,079	−211,079	−181,079
Total obligations	665,325	35,000	30,000

PROGRAM AND PERFORMANCE

This fund is advanced by Commodity Credit Corporation for the classification of cotton, and the grading and appraisal of wool or mohair offered for loan or purchase to the Corporation. In the 1950 fiscal year, 496,655 bales of cotton were classed. It is estimated that the amount of cotton offered for Commodity Credit Corporation price-support loans in 1951 will be too small to justify the use of this fund to cover the classing costs incident thereto. It is estimated that price-support loans will increase somewhat during 1952, but that the volume of cotton to be classed with these funds will be much smaller than in 1950. Present indications are that no wool or mohair will be graded and appraised under this item in either 1951 or 1952. Costs reflected in 1951 in connection with these commodities are for liquidation of the activity.

OBLIGATIONS BY ACTIVITIES

Description	1950 actual	1951 estimate	1952 estimate
1. Classification of cotton	$257,116		$30,000
2. Grading of wool and mohair	408,209	35,000

Total obligations	12,649,835	1,150,000	850,000

PROGRAM AND PERFORMANCE

These funds are held in trust with the Department pending determination of their disposition. The various trusts were created under individual agreements with 43 State rural rehabilitation corporations, originally established through grants made by the Federal Emergency Relief Administration. Public Law 499, Eighty-first Congress, approved May 3, 1950, provides for the return to the States of the assets held in trust upon application to the Secretary of Agriculture. The act further provides that agreements may be entered into between the Secretary and individual States for the Secretary to administer the assets in behalf of the States. It is not possible at this time to say what States will apply for return of their assets or will enter into agreements for their administration by the Secretary.

OBLIGATIONS BY ACTIVITIES

Description	1950 actual	1951 estimate	1952 estimate
1. Salaries and expenses	$1,267,775	$1,116,350	$821,350

Total obligations	308,613	557,905	250,000

PROGRAM AND PERFORMANCE

The Bureau performs special statistical work, at cost, for individuals and firms requesting such data. In addition, the Bureau furnishes age and citizenship data from past census records on a fee basis. These fees range from $1 to $3, depending on the type of handling required. Funds received for these purpose are used to pay the salaries of special temporary employees and for related expenses.

DEPARTMENT OF THE INTERIOR—Continued

BUREAU OF RECLAMATION—Continued

Reclamation Trust Funds—Continued

PROGRAM AND PERFORMANCE

The funds advanced by water users' associations are used to operate and maintain, in part or whole, the projects providing water to those associations. Beginning in 1951, funds advanced by water users for operation and maintenance services are credited directly to the appropriation "Operation and maintenance, Bureau of Reclamation." Funds are also advanced by State, city, or other governments and are used for investigations and construction requested by those governments.

OBLIGATIONS BY ACTIVITIES

Description	1950 actual	1951 estimate	1952 estimate
1. Operation and maintenance:			
(a) Yuma project, Arizona	$986,469	$224,489

PROGRAM AND PERFORMANCE

The National Park Trust Fund Board was established for the purpose of receiving, holding, and administering gifts of personal property for the benefit of, or in connection with, the National Park Service. The corpus of the fund is comprised of investments in United States Treasury bonds. Interest accruals or donations to the fund are used for current needs or invested. No obligations are anticipated during 1951 or 1952 (16 U. S. C. 6a, 19).

PROGRAM AND PERFORMANCE

Commissaries operated in the Federal prisons sell their merchandise to prisoners only. Items made available are cigarettes, smoking tobaccos, packaged candies, toiletries, magazines, and certain hobby-craft materials, and the like.

The total sales for the fiscal year 1950 were $986,773, and profits totaled $40,015. From 1931 through the end of the fiscal year 1950, the commissary earned surplus was $673,248. Of that amount, $110,785 has been distributed for benefits to prisoners in the form of certain equipment and expansion of the recreational program facilities.

PROGRAM AND PERFORMANCE

This fund is for the payment of annuities to retired Foreign Service officers and the refund of contributions made by officers who leave the Foreign Service before retirement. The fund is maintained through (1) contribution of 5 percent of the basic annual salaries of all Foreign Service officers; (2) interest on investments; and (3) appropriated funds. It is estimated that approximately 371 annuitants will be paid retirement benefits in 1952.

OBLIGATIONS BY ACTIVITIES

Payments to beneficiaries—1950, $1,163,512; 1951, $1,255,000; 1952, $1,355,000.

Total obligations	2,586,321	2,663,679	2,500,000

PROGRAM AND PERFORMANCE

The Settlement of Mexican Claims Act of 1942 (22 U. S. C. 661) established a commission to adjudicate claims of American nationals against the Government of Mexico. To pay the claims, the act provided for a Mexican claims fund into which would be deposited $40,533,658.95, consisting of $40,000,000 from the Government of Mexico (payable in 16 annual installments) and $533,658.95 appropriated by the Congress of the United States.

OBLIGATIONS BY ACTIVITIES

Payment of claims—1950, $2,586,321; 1951, $2,663,679; 1952, $2,500,000.

OBLIGATIONS BY OBJECTS

13 Refunds, awards, and indemnities—1950, $2,586,321; 1951, $2,663,679; 1952, $2,500,000.

Total investments held at end of year	12,639,137,250	14,378,937,250	16,365,937,250

PROGRAM AND PERFORMANCE

Under the Federal old-age and survivors insurance system, workers and their employers make annual contributions in the form of taxes on wages toward the benefits which will be payable when the worker reaches 65 or when he dies. An amount equal to the annual contributions, including interest and penalties, is appropriated to this trust fund for benefit payments and administrative expenses. The excess of income over outgo and annual interest on invested funds are invested in Government securities.

OBLIGATIONS BY ACTIVITIES

Administration, investment, and benefit payments—1950, $783,799,210; 1951, $1,673,726,449; 1952, $2,177,023,961.

PROGRAM AND PERFORMANCE

Represents grants made to the Commissioners of the District of Columbia by the Social Security Board for old-age assistance.

OBLIGATIONS BY OBJECTS

12 Pensions, annuities, and insurance claims—1950, $905,801; 1951, $999,955; 1952, $1,100,000.

Permit Fund, District of Columbia—

Appropriated (estimate) 1951, **$500** Estimate 1952, **$500**

FUNDS AVAILABLE FOR OBLIGATION

	1950 actual	1951 estimate	1952 estimate
Appropriations or estimate		$500	$500
Prior year balance available	$1,897	1,897	2,000
Total available for obligation	1,897	2,397	2,500
Balance available in subsequent year	−1,897	−2,000	−2,000
Total obligations		397	500

PROGRAM AND PERFORMANCE

This fund is derived from deposits made by property owners for various improvements, sewers, etc., of which half the cost is paid by said owners (28 Stat. 247).

OBLIGATIONS BY OBJECTS

07 Other contractual services—1951, $397; 1952, $500.

Property Redemption Fund, District of Columbia—

Appropriated (estimate) 1951, **$150,000** Estimate 1952, **$150,000**

FUNDS AVAILABLE FOR OBLIGATION

	1950 actual	1951 estimate	1952 estimate
Appropriation or estimate	$156,580	$150,000	$150,000
Prior year balance available	26,822	25,402	30,000
Total available for obligation	183,402	175,402	180,000
Balance available in subsequent year	−25,402	−30,000	−30,000
Total obligations	158,000	145,402	150,000

PROGRAM AND PERFORMANCE

This fund is derived from collections on account of payments made by persons redeeming their property which had been previously sold for taxes. Payments from this fund are made to the various holders of certificates representing purchases of such unpaid taxes (20 Stat. 102–108, sec. 1–15).

OBLIGATIONS BY OBJECTS

13 Refunds, awards, and indemnities—1950, $158,000; 1951, $145,402; 1952, $155,000.

Public Health Work, Social Security Act, Grants by Public Health Service, District of Columbia—

Appropriated (estimate) 1951, **$60,000** Estimate 1952, **$60,000**

INTRODUCTION TO PART IV

Part IV of the Budget presents 10 supplementary tables and explanatory analyses. These are listed separately and discussed below.

SPECIAL ANALYSIS A.—RECEIPTS FROM AND PAYMENTS TO THE PUBLIC

This statement presents information on the flow of money between the Government as a whole, including both Federal funds and trust funds, and the public. The public is defined to include individuals, banks (including the Federal Reserve System and the Postal Savings System), partnerships, private corporations, State and local governments, foreign governments, and international organizations. Intragovernmental transactions, such as contributions from Federal funds to trust funds, are excluded. Also excluded are noncash borrowing items, such as the interest accruing on savings bonds.

SPECIAL ANALYSIS B.—NEW OBLIGATIONAL AUTHORITY AND EXPENDITURES (BY FUNCTION AND AGENCY)

This statement indicates the derivation of the functional breakdown of authorization and expenditure figures appearing in tables 1 and 2 of part I and in the Budget Message. It has been compiled from authorization and expenditure figures appearing in the chapter summaries of part II, rearranged by function and agency. The detailed items making up the agency figures used here can be found under the appropriate code numbers in those chapter summaries.

SPECIAL ANALYSIS C.—BUDGET RECEIPTS (BY SOURCE)

This table presents the details of Budget receipts which are summarized in table 1. Accompanying it is a statement prepared by the Treasury Department discussing the basis of estimates, particularly with reference to the receipts from taxes and customs.

SPECIAL ANALYSIS D.—INVESTMENT, OPERATING, AND OTHER BUDGET EXPENDITURES

This special analysis repeats, with minor modifications, the classification of Budget expenditures which appeared for the first time in the 1951 Budget. Its major purpose is to show, on the one hand, the amount of Federal expenditures to acquire assets or to give assistance which yield benefits beyond the current fiscal year and, on the other hand, the amount of expenditures which provide current benefits or represent other operating expenses. The major categories of the classification are explained in the narrative statement.

SPECIAL ANALYSIS E.—FEDERAL CREDIT PROGRAMS

This new analysis, not appearing in previous Budgets, provides detailed information on the expenditures for loans shown in the preceding analysis. In addition, it summarizes commitment authority and commitments for both direct loan programs and loan insurance and guarantee programs. Coverage includes both wholly owned Government corporations and noncorporate lending agencies.

SPECIAL ANALYSIS F.—FEDERAL ACTIVITIES IN CIVIL PUBLIC WORKS AND OTHER CONSTRUCTION

This analysis provides information on the authorizations and expenditures for construction. Included are direct Federal works, grants and loans to States and local governments for public works, and financial assistance for private construction.

SPECIAL ANALYSIS G.—FEDERAL AID TO STATE AND LOCAL GOVERNMENTS

Grants-in-aid and shares of certain Federal revenues which are paid to the States and their subdivisions, and loans and repayable advances to State and local governments, are brought together in a special analysis.

SPECIAL ANALYSIS H.—CERTAIN INVESTMENT AND INTERFUND TRANSACTIONS

This new table sets forth several types of transactions which are not included in the regular statements of receipts and expenditures, due to their intragovernmental character. Figures here on investments and on the borrowing of Government-owned corporations are a part of the computation of the public debt in table 3 of part I.

SPECIAL ANALYSIS I.—PERMANENT AND INDEFINITE BUDGET AUTHORIZATIONS

The first part of this table shows the permanent authorizations (appropriations and other types) for obligation and expenditure of general and special funds. These authorizations are renewed each year, either over a specified period of years or until the law is changed, without annual action by Congress. The second part of this table shows the nonpermanent appropriations which are indefinite in amount.

SPECIAL ANALYSIS J.—TEN-YEAR COMPARISON OF BUDGET RECEIPTS AND EXPENDITURES

This statement presents a historical comparison of Budget receipts and expenditures. The receipts are classified by source and the expenditures by function. A note indicates the changes in classification from the last Budget to this one.

Special Analysis A

RECEIPTS FROM AND PAYMENTS TO THE PUBLIC

The accompanying table presents a picture of the flow of money between the Federal Government as a whole and the public. The public is defined to include individuals; banks, including the Federal Reserve and Postal Savings Systems; businesses; private corporations; State, local, and foreign governments; and international organizations.

Financial transactions of the Federal Government as shown in this table include transactions of trust funds as well as those of Federal funds (see introduction to part I, page A3, for definitions). The receipts and expenditures of Federal funds and of trust funds as reported in other tables in the Budget, however, include a number of intragovernmental transfers. These intragovernmental transfers are eliminated in this special analysis. Also eliminated are certain noncash items which represent an obligation of the Government to make a cash payment in the future. Receipts of the Government from the exercise of its monetary authority (mainly seigniorage on silver) are also excluded, because they are not cash received from the public.

The intragovernmental transactions excluded from the figures in this table are: (1) Expenditures from Federal funds which are receipts in other Federal funds, such as interest on capital investment paid by wholly owned Government corporations to the Treasury; (2) expenditures from Federal funds which are receipts in trust funds, such as the contribution of the Government to the Civil Service retirement and disability fund and the interest paid on United States securities held by trust funds; (3) expenditures from trust funds which are receipts in Federal funds, such as the payment by the old age and survivors insurance trust fund to the Treasury as reimbursement for expenses incurred in the financial management of that trust fund; and (4) expenditures from trust funds which are receipts in other trust funds, such as the payment made by the District of Columbia to the Civil Service retirement and disability fund.

The noncash items (generally reported as expenditures) which are eliminated in obtaining the figures shown in the accompanying table consist mostly of: (1) Interest being accrued on savings bonds which will not be paid in cash until the bonds are redeemed; and (2) United States securities issued in payment of an obligation which will be redeemed for cash at a later date. When the savings bonds are redeemed, the amount of interest actually paid to the public is then included. Likewise, when the noncash securities are redeemed (such as those Armed Forces leave bonds issued in 1947 which are currently being cashed), these cash payments are then included in payments to the public.

The accompanying table is, in effect, a consolidated cash statement of Federal nonborrowing transactions with the public. This can be illustrated by summarizing the adjustments made in deriving the statement of Federal cash transactions with the public for the fiscal year 1950. Complete detail of all the individual adjustments made to the accounts of Federal funds and trust funds can be obtained upon request from the Bureau of the Budget.[1]

[1] Supporting Tables, Receipts From and Payments to the Public, January 1951.

DERIVATION OF FEDERAL CASH TRANSACTIONS WITH THE PUBLIC

[Fiscal year 1950. In millions]

Transaction	Federal funds	Trust funds	Clearing account for outstanding checks, etc.	Total
Receipts:				
Total (from other Budget tables)	$37,045	$6,669		$43,714
Less:				
Intragovernmental transactions	120	2,622		2,742
Noncash transactions	1			1
Receipts from exercise of monetary authority	25			25
Equals:				
Receipts from public	36,899	4,047		40,946
Expenditures:				
Total (from other Budget tables)	40,156	6,948	−$483	46,621
Less:				
Intragovernmental transactions	2,725	17		2,742
Noncash transactions	637	82		719
Equals:				
Payments to public	36,794	6,849	−483	43,160

Consistent with the concept of receipts from and payments to the public is the concept of borrowing from the public. This differs from the change in public debt held by the public as shown in table 3 of part I. The difference is almost entirely attributable to the adjustments made for noncash items in deriving receipts from and payments to the public.[2] For example, interest accruing on savings bonds increases the value of those bonds and thus increases the amount of public debt held by the public; this increase is therefore included in table 3 of part I. On the other hand, such accruals of interest do not increase the amount of cash the Government is borrowing from the public currently; therefore, they are not included in cash borrowing from the public.

The excess of payments to the public over receipts from the public (and net borrowing from the public) is typically less than the budget deficit (and the increase in public debt). This is mainly the result of trust fund transactions. The trust funds, particularly the social security funds, are currently accumulating reserves for the payment of future benefits. Since the cash accumulations in the trust funds are invested in United States securities (and this has the result of increasing the public debt), the increase in the total public debt would normally be greater than the cash borrowed from the public.

The estimated excess of payments to the public in fiscal year 1952 is less than the estimated budget deficit by $3.7 billion. In 1950, this difference was much smaller, somewhat less than $1 billion. The principal reason for the relatively small difference in 1950 was the payment that year of over $2.5 billion to veterans in the form of insurance dividends. This payment was made from the national service life insurance trust fund, and thus did not enter into budget (i. e., Federal fund) expenditures. The amount paid represented dividends accumulated over a number of years, and therefore had an unusual effect on the difference between budget expenditures and total payments to the public.

[2] Sale and redemption of securities of Government corporations in the market are also taken into account in computing borrowing from the public. Increases or decreases in the amount of these securities outstanding, however, do not affect the public debt. In 1950, almost $8 million (net) of securities of wholly owned Government corporations were redeemed.

Total, enacted or recommended	6,598	5,653	4,426	6,627	5,659	4,911

[a] Deduct, excess of repayments and collections over expenditures.

[b] Less than one-half million.

[1] Because of recent material changes in military requirements, the proposed authorizations in detail for the fiscal year 1952 will be submitted to the Congress in the spring of 1951. However, there is herewith set forth an estimate of total military authorizations and expenditures for the fiscal year 1952 as well as for the fiscal year 1951.

Special Analysis C

EXPLANATION OF THE ESTIMATES OF RECEIPTS

ON THE BASIS OF EXISTING LEGISLATION

The estimates of receipts from taxes and customs for the current and ensuing fiscal years under existing legislation are prepared in December each year by the Treasury Department. The estimates of miscellaneous receipts in general are prepared by the agency depositing the receipts in the Treasury.

TOTAL RECEIPTS

Total receipts (daily Treasury statement basis), before deductions for refunds and appropriation to the Federal old-age and survivors insurance trust fund, are estimated in the amounts of $49,807.5 million in the fiscal year 1951 and $61,664.3 million in the fiscal year 1952. Both figures represent substantial increases over actual total receipts of $41,310.6 million in 1950. The total of $61,664.3 million for the fiscal year 1952 represents an all-time high and is $13,914.0 million greater than the previous high of $47,750.3 million in the fiscal year 1945.

The details of the estimated and actual receipts are shown in pages 965–968. Throughout the tables shown in this exposition the figures are rounded and will not necessarily add to totals. This material utilizes the Budget classification of receipts.

Percentage distribution of total receipts (by source)

Source [1]	Actual		Estimate	
	1949	1950	1951	1952
Direct taxes on individuals	43.8	43.8	44.8	43.5
Direct taxes on corporations	27.0	26.3	27.2	32.4
Excise taxes	17.7	18.4	16.5	13.3
Employment taxes	5.8	7.0	7.6	7.6
Customs	.9	1.0	1.2	1.0
Miscellaneous receipts	4.8	3.5	2.7	2.2
Total receipts	100.0	100.0	100.0	100.0

[1] The Budget classification of taxes differs in several respects from the classification used by the Treasury Department in the daily Treasury statement.

Actual amounts shown for the individual income tax withheld are on the daily Treasury statement basis. Employment taxes, customs, and refunds of receipts are on the warrants issued basis. Detail concerning income taxes not withheld is on the warrants issued basis which, in the case of these taxes, is the same as the collections basis. The detail of excise taxes is on the collections basis and the detail of miscellaneous receipts is on the warrants issued basis. Receipts from the Railroad Unemployment Insurance Act are on the daily Treasury statement basis, which for this tax is the same as the warrants issued basis. Adjustment in all cases is to the daily Treasury statement basis, but, since the Budget classification does not correspond exactly to the daily Treasury statement classification, it is necessary to allocate arbitrarily some of the adjustments to the daily Treasury statement basis. The adjustment from the collections basis to the daily Treasury statement basis for "miscellaneous internal revenue" is contained in "excise taxes," and the adjustment for "income tax: other" (other than withheld by employers) is contained in "direct taxes on individuals."

Direct taxes on individuals and direct taxes on corporations continue to be by far the two most important sources of receipts. The corporation tax remains the lesser of the two but shows a decided gain in the fiscal year 1952. As a result of the large increases in receipts from individuals and corporations, the excise taxes show a decline percentagewise in fiscal year 1951, although they increase in absolute amount. In the fiscal year 1952, excise taxes decline both in absolute amounts and as a percentage of total receipts. Employment taxes show a steady increase from the fiscal year 1949 principally as a result of increases in tax rates and coverage. Customs receipts, although increasing in absolute amounts, are estimated to decline as a percentage of total receipts in the fiscal year 1952. Miscellaneous receipts are expected to continue their steady decline percentagewise.

FISCAL YEAR 1951

Actual receipts in the fiscal year 1950 and estimated receipts in the fiscal year 1951 are compared by major sources in the following table:

Budget receipts (by source)

[In millions of dollars]

Source	1950 actual	1951 estimate	Increase (+) or decrease (−), 1951 over 1950
Direct taxes on individuals	18,114.5	22,309.0	+4,194.5
Direct taxes on corporations	10,854.4	13,560.0	+2,705.6
Excise taxes	7,596.8	8,240.0	+643.2
Employment taxes	2,892.0	3,773.8	+881.8
Customs	422.7	600.0	+177.3
Miscellaneous receipts	1,430.2	1,324.7	−105.5
Total receipts	41,310.6	49,807.5	+8,496.9
Deduct:			
(*a*) Appropriation to Federal old-age and survivors insurance trust fund	2,106.4	2,960.0	+853.6
(*b*) Refunds of receipts	2,159.5	2,335.5	+176.0
Budget receipts	37,044.7	44,511.9	+7,467.2

Budget receipts in the fiscal year 1951 are estimated to amount to $44,511.9 million, an increase of $7,467.2 million over actual budget receipts in the fiscal year 1950. All major tax sources of receipts contribute to the increase. The largest increases are in "Direct taxes on individuals" and "Direct taxes on corporations."

Direct taxes on individuals.—The yields of direct taxes on individuals are shown in the following table:

[In millions of dollars]

Source	1950 actual	1951 estimate	Increase (+) or decrease (−), 1951 over 1950
Individual income tax:			
Withheld	10,073.2	13,202.0	+3,128.8
Not withheld	7,335.1	8,397.0	+1,061.9
Total individual income tax	17,408.3	21,599.0	+4,190.7
Estate tax	657.4	660.0	+2.6
Gift tax	48.8	50.0	+1.2
Total direct taxes on individuals	18,114.5	22,309.0	+4,194.5

Receipts from income tax withheld are estimated to increase sharply as a result of an estimated increase in salaries and wages and the increased withholding tax rates enacted by the Revenue Act of 1950 which were increased effective October 1, 1950. Receipts from income tax not withheld are estimated to increase as a result of expected higher levels of income and the increased tax rates effective on calendar year 1950 incomes under the Revenue Act of 1950.

The Revenue Act of 1950 increases individual income tax liabilities substantially for calendar year 1951 and increases calendar year 1950 liabilities by approximately one-quarter of this amount. Individual income tax receipts not withheld for the fiscal year 1951 represent principally calendar year 1950 liabilities and therefore do not reflect the full effect of the Revenue Act of 1950.

Direct taxes on corporations.—Corporation income and excess profits taxes in the fiscal year 1950 reflect incomes

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

of calendar years 1948 and 1949, while receipts in the fiscal year 1951 reflect incomes of the calendar years 1949 and 1950.

The substantial increase in receipts estimated for fiscal year 1951 of $2,705.6 million over actual collections in fiscal year 1950 of $10,854.4 million is attributable to several factors. Corporation incomes in the calendar year 1950 were at a very high level. In addition, several changes in the laws affecting income and excess profits taxes on corporations will result in increased collections from this source.

The Revenue Act of 1950 increases tax rates on incomes for the taxable year 1950 by up to four percentage points. It also provides for an acceleration in corporation tax payments, which will result in a larger proportion of the 1950 tax liability being collected in fiscal year 1951. A second revenue measure, the Excess Profits Tax Act of 1950, reinstitutes an excess profits tax, which will affect approximately one-half of 1950 income.

Excise taxes.—Receipts from this source by major groups are listed in the table below:

[In millions of dollars]

Source	1950 actual	1951 estimate	Increase (+) or decrease (−), 1951 over 1950
Liquor taxes	2,219.2	2,396.0	+176.8
Tobacco taxes	1,328.5	1,365.0	+36.5
Stamp taxes	84.6	107.0	+22.4
Manufacturers' excise taxes	1,826.7	2,088.0	+261.3
Retailers' excise taxes	409.1	455.0	+45.9
Miscellaneous excise taxes	1,721.2	1,829.0	+107.8
Adjustment to daily Treasury statement basis	+7.5		−7.5
Total excise taxes	7,596.8	8,240.0	+643.2

The large increase in receipts in fiscal year 1951 over actual receipts in fiscal year 1950 reflects anticipated higher levels of income. Contributing to the increase are the war-scare purchases at the outbreak of the Korean conflict, especially in the manufacturers' excise taxes and liquor taxes. Collections from the other taxes reflect current consumption trends.

Employment taxes.—Receipts from the various employment taxes are summarized in the table below:

[In millions of dollars]

Source	1950 actual	1951 estimate	Increase (+) or decrease (−), 1951 over 1950
Federal Insurance Contributions Act	2,106.4	2,960.0	+853.6
Federal Unemployment Tax Act	226.3	239.0	+12.7
Railroad Retirement Tax Act	550.2	565.0	+14.8
Railroad Unemployment Insurance Act	9.1	9.8	+.7
Total employment taxes	2,892.0	3,773.8	+881.8
Deduct appropriation to Federal old-age and survivors insurance trust fund	2,106.4	2,960.0	+853.6
Net employment taxes	785.6	813.8	+28.2

The increase in employment tax receipts in fiscal year 1951 is attributable primarily to the increase in receipts under the Federal Insurance Contributions Act. Receipts from this tax reflect the full-year effect of the increase in the tax rate from 1 percent to 1½ percent each on employer and employee, effective January 1, 1950, and, in addition, collections in the latter part of fiscal year 1951 will be affected by two important changes effective January 1, 1951. These are an increase in the tax-base limitation from $3,000 to $3,600 and a significant extension of coverage. Receipts from all employment taxes are expected to increase because of anticipated higher salaries and wages.

Customs.—Customs receipts are estimated to amount to $600.0 million in fiscal year 1951, an increase of $177.3 million over actual receipts of $422.7 million in fiscal year 1950.

Miscellaneous receipts.—Miscellaneous receipts are estimated to be $1,324.7 million in fiscal year 1951, a decrease of $105.5 million from fiscal year 1950.

Refunds of receipts.—Refunds of receipts are estimated to be $2,335.5 million in fiscal year 1951 as compared with $2,159.5 million in fiscal year 1950.

FISCAL YEAR 1952

Estimated receipts in the fiscal years 1951 and 1952 are compared by major sources in the following table:

Budget receipts (by source)

[In millions of dollars]

Source	1951 estimate	1952 estimate	Increase (+) or decrease (−), 1952 over 1951
Direct taxes on individuals	22,209.0	26,780.0	+4,471.0
Direct taxes on corporations	13,560.0	20,000.0	+6,440.0
Excise taxes	8,240.0	8,222.0	−18.0
Employment taxes	3,773.8	4,709.0	+935.2
Customs	600.0	620.0	+20.0
Miscellaneous receipts	1,324.7	1,333.3	+8.6
Total receipts	49,807.5	61,664.3	+11,856.8
Deduct:			
(*a*) Appropriation to Federal old-age and survivors insurance trust fund	2,960.0	3,823.0	+863.0
(*b*) Refunds of receipts	2,335.5	2,702.9	+367.4
Budget receipts	44,511.9	55,138.4	+10,626.5

Budget receipts in the fiscal year 1952 are estimated to amount to $55,138.4 million, an increase of $10,626.5 million over 1951 and $10,376.8 million greater than the previous peak year of receipts, 1945. All major sources of receipts except excise taxes contribute to the increase, with the largest increases appearing in direct taxes on individuals and direct taxes on corporations.

Direct taxes on individuals.—The yields of direct taxes on individuals are shown in the following table:

[In millions of dollars]

Source	1951 estimate	1952 estimate	Increase (+) or decrease (−), 1952 over 1951
Individual income tax:			
Withheld	13,202.0	16,358.0	+3,156.0
Not withheld	8,397.0	9,667.0	+1,270.0
Total individual income tax	21,599.0	26,025.0	+4,426.0
Estate tax	660.0	700.0	+40.0
Gift tax	50.0	55.0	+5.0
Total direct taxes on individuals	22,309.0	26,780.0	+4,471.0

Receipts from income tax withheld are estimated to increase by $3,156.0 million. Principally responsible is an estimated increase in the level of salaries and wages for the fiscal year 1952. In addition, fiscal year 1952 reflects a whole year of withholdings at the increased rates of the Revenue Act of 1950 which are effective for approximately three quarters of the fiscal year 1951. Income tax

900000—51——61

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

not withheld increases as a result of the higher level of income and the higher rates imposed by the Revenue Act of 1950, which are fully effective on the incomes reflected in fiscal year 1952 receipts.

Direct taxes on corporations.—Corporation income and excess profits taxes are estimated to amount to $20,000.0 million in the fiscal year 1952, an increase of $6,440.0 million over 1951. The large increase in receipts arises from the higher level of corporate profits and from the progressively greater effects of changes embodied in the Revenue Act of 1950 and the Excess Profits Tax Act of 1950.

The Revenue Act of 1950 increases the combined normal and surtax rates on calendar year corporations from 42 percent of 1950 net income to 45 percent of 1951 net income. The Excess Profits Tax Act of 1950 increases the corporation surtax rate by an additional 2 percent for taxable years beginning on or after July 1, 1950.

The impact of the excess profits tax will also become progressively greater on calendar year 1951 incomes. In the calendar year 1950 the tax is proportionate to the part of the taxable year after June 30, 1950, whereas all income for the calendar year 1951 is taxable.

Collections from both the income tax and the excess profits tax in the fiscal year 1952 will also be increased by the continued acceleration of installment payments provided in the Revenue Act of 1950.

Excise taxes.—Receipts from the major groups of excise taxes are summarized in the table below:

[In millions of dollars]

Source	1951 estimate	1952 estimate	Increase (+) or decrease (−), 1952 over 1951
Liquor taxes	2,396.0	2,569.0	+173.0
Tobacco taxes	1,365.0	1,391.0	+26.0
Stamp taxes	107.0	107.0	
Manufacturers' excise taxes	2,088.0	1,757.0	−331.0
Retailers' excise taxes	455.0	497.0	+42.0
Miscellaneous excise taxes	1,829.0	1,901.0	+72.0
Total excise taxes	8,240.0	8,222.0	−18.0

Decreases in collections from manufacturers' excise taxes, reflecting material shortages, are responsible for the decrease in total excise tax receipts in the fiscal year 1952. Other excise tax groups increase generally as a result of an anticipated increase in levels of income.

Employment taxes.—The yields of the various employment taxes under existing legislation are shown in the table below:

[In millions of dollars]

Source	1951 estimate	1952 estimate	Increase (+) or decrease (−), 1952 over 1951
Federal Insurance Contributions Act	2,960.0	3,823.0	+863.0
Federal Unemployment Tax Act	239.0	263.0	+24.0
Railroad Retirement Tax Act	565.0	613.0	+48.0
Railroad Unemployment Insurance Act	9.8	10.0	+.2
Total employment taxes	3,773.8	4,709.0	+935.2
Deduct appropriation to Federal old-age and survivors insurance trust fund	2,960.0	3,823.0	+863.0
Net employment taxes	813.8	886.0	+72.2

Receipts in the fiscal year 1952 are estimated to increase over fiscal year 1951 receipts as a result of higher levels of salaries and wages and the full-year effect of the increase in the tax base limitation from $3,000 to $3,600 and the extended coverage under the Federal Insurance Contributions Act effective January 1, 1951. An additional factor is that receipts in the fiscal year 1952 will reflect for the first time collections from the self-employed category of the new coverage.

Customs.—Customs receipts are estimated to be $620.0 million in the fiscal year 1952, an increase of $20.0 million over the fiscal year 1951.

Miscellaneous receipts.—Miscellaneous receipts are estimated as $1,333.3 million in the fiscal year 1952.

Refunds of receipts.—Refunds of receipts in the fiscal year 1952 are estimated to increase to $2,702.9 million from $2,335.5 million in the fiscal year 1951 as a result of the higher level of withholding tax receipts in the calendar year 1951.

Cigarettes (small)	1,242,844,932	1,280,000,000	1,306,000,000
Tobacco (chewing and smoking)	35,069,748	34,000,000	34,000,000
Cigars (large)	42,112,339	43,000,000	43,000,000
Snuff	7,388,534	7,000,000	7,000,000
Cigarette papers and tubes	983,936	900,000	900,000
All other	64,857	100,000	100,000
Total, tobacco taxes	1,328,464,346	1,365,000,000	1,391,000,000
Stamp taxes:			
Issues of securities, bond transfers, and deeds of conveyance	50,156,133	60,000,000	60,000,000
Stock transfers	23,823,427	35,000,000	35,000,000
Playing cards	10,546,118	11,400,000	11,400,000
Silver bullion sales or transfers	122,521	600,000	600,000
Total, stamp taxes	84,648,199	107,000,000	107,000,000
Manufacturers' excise taxes	1,826,702,567	[1] 2,088,000,000	[1] 1,757,000,000

[1] No detail is shown in the manufacturers' excise tax group because it has been necessary to make arbitrary assumptions regarding the amount and timing of material shortages as they affect the production of specific taxable commodities. In view of this, it is felt that only the total could be estimated with a reasonable degree of accuracy.

SPECIAL ANALYSIS D

INVESTMENT, OPERATING, AND OTHER BUDGET EXPENDITURES

This special analysis continues, with one major exception, the classification first appearing in the 1951 Budget document. Because the details of expenditures for military services will be presented in a later supplement to the Budget, all expenditures for military services are shown in this analysis as a one-line item, adding to total Budget expenditures. This year's classification, therefore, is an investment-operating classification of the civil expenditures of the Federal Government. By "civil" is meant expenditures which are classified functionally in categories other than "military services," although many of these expenditures, as explained in the Budget Message, are defense-related or facilitate the defense effort.

The purpose of this analysis is to segregate expenditures for assets and other developmental purposes, which yield benefits for more than 1 year, from expenditures which in the main yield current benefits. Expenditures of an investment type are shown in two major categories—one for acquisition or improvement of assets by the Federal Government and one for other broad developmental purposes, such as improvements to State, local, and private assets and expenditures for research, education, and health which contribute to the development of the physical productivity of the economy or increase the technical skills and knowledge of individuals. Expenditures which yield benefits currently are also grouped in two major categories—one for aids and services to special groups and one for other current operating expenditures.

The analysis is not a substitute for agency and functional classifications used in other parts of the Budget. Rather it provides an additional presentation of Federal expenditures to aid in the over-all appraisal of Government programs. Just as the functional classification of Federal expenditures brings together programs of various agencies to indicate the major purposes of the total Federal program, so the present classification views Federal expenditures in terms of the duration and nature of the benefits flowing from such activities.

The purposes of this analysis and of a so-called capital budget are different. As generally used, the term "capital budget" refers to a separate accounting and often separate financing for capital outlays as distinct from expenditures for current operating expenses. For example, traditionally in capital budgeting, allowance would be made in the current budget for all of the current costs, including depreciation and obsolescence on existing physical assets and anticipated losses on loan programs. In this analysis, no attempt has been made to indicate the depreciation or obsolescence on existing assets of the Federal Government, nor have possible future losses on loans or other investments been shown.

Also the classification of items has not been guided by their financial recoverability. A significant portion of Federal expenditures, however, is financially recoverable in future years. Most of the amount returned to the Treasury comes from collections on loans, from the sale of commodity inventories, from revenues from the sale of public power, or from amortization payments on other public works projects. Some additional collections arise from licenses and fees charged for various special services, and a part of the operating expenditures of certain programs are financed by the appropriation of special receipts from these programs.

Many expenditures of the Federal Government, such as grants to States for highways, are not expected to be specifically recovered by future repayments to the Treasury. Rather, they are intended to build up the productivity of the economy. Indirectly, of course, Federal tax revenues will expand as various investment and other developmental expenditures have the effect of increasing the wealth and income of the Nation.

The analysis is intended to throw more light on the nature of Federal programs and to aid in the appraisal, by the Congress and by the public generally, of their long-range effects on the economy and on the fiscal position of the Federal Government. Other approaches are of course required, for example, to appraise the impact of the Budget on the current level of business activity.

SUMMARY

Federal civil expenditures for additions to Federal assets and for other developmental purposes will be $1.6 billion higher in the fiscal year 1952 than in 1951, and $594 million higher than in 1950. The increase in these investment expenditures in 1952 will be predominantly for physical assets owned by the Federal Government, such as commodity inventories, public works, and equipment for defense production. There will also be some increase in expenditures for State and local physical assets. Net loan expenditures, on the other hand, are expected to decline. The following tabulation shows the major investment-operating categories for the fiscal years 1950, 1951, and 1952.

TABLE 1.—*Summary of investment, operating, and other Budget expenditures*

[Fiscal years. In millions]

	1950 actual	1951 estimate	1952 estimate
Civil:			
Additions to Federal assets:			
Loans	$1,135	$1,263	$671
Physical assets	3,016	1,744	3,751
Expenditures for other developmental purposes:			
Physical assets (non-Federal)	880	1,059	1,169
Research and development and surveys	354	425	440
Education, training, and health	1,114	997	1,064
Current expenses for aids and special services:			
Veterans	5,583	4,765	4,263
International	4,392	4,218	7,008
Other	2,771	3,328	2,666
Other current operating expenses:			
Interest	5,817	5,722	5,897
Other	1,896	2,076	2,446
Noncost payments	563	572	623
Total, civil expenditures	27,523	26,171	29,998
Military services	12,303	20,994	41,421
Reserve for contingencies		45	175
Adjustment to daily Treasury statement basis	+330		
Total, Budget expenditures	40,156	47,210	71,594

In the fiscal year 1952, civil expenditures are estimated to be $30 billion. Of this amount, $4.4 billion or 15 percent will be additions to Federal assets. Expenditures for acquisition, construction, or improvement of Federal physical assets will be $3.8 billion in 1952, compared to $1.7 billion in 1951. Budget net expenditures for loans will decline to $671 million in 1952, largely because of sub-

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

stantial sales of housing mortgages purchased in earlier years.

In addition to expenditures on Federal assets, civil expenditures include $2.7 billion or 9 percent for other developmental purposes. This amount includes $1.2 billion for construction or improvement of assets owned either by State and local governments or by individuals and organizations, $440 million for research and development and engineering and natural resource surveys, and $1.1 billion for education, training, and health.

Of the remaining civil expenditures in 1952, $13.9 billion or 46 percent represent current expenses for aids and special services for particular groups or for international security; and $8.3 billion or 28 percent are for other current operating expenses, including $5.9 billion for interest. Finally, $623 million or 2 percent of nondefense expenditures are shown in a category of noncost payments. This item is mainly the proceeds of special payroll taxes paid over to the railroad retirement trust fund.

The major categories of the special analysis are explained in the following discussion.

ADDITIONS TO FEDERAL ASSETS

Loans.—The activities of the Federal Government include a variety of direct loans and loan guarantee and insurance programs, most of which are intended to aid private economic activity in the fields of agriculture, housing, industry, and finance. Expenditures for most loan programs are shown in the Budget on a net basis; i. e., expenditures reflect new loans less collections on old loans. However, the loans of the Rural Electrification Administration and the Farmers' Home Administration and a number of smaller loan programs are included in the Budget on a gross basis, with collections on old loans going directly to miscellaneous receipts of the Treasury. In this analysis, loans are shown on the same basis as they appear in Budget expenditures.

Detailed information on loans is contained in a separate special analysis of "Federal Credit Programs," immediately following the investment-operating analysis. In the separate analysis of credit programs, loan expenditures are shown net of all receipts including collections going directly to miscellaneous receipts.

In both analyses, Federal loan expenditures exclude the price support loans of the Commodity Credit Corporation. These nonrecourse loans normally extend only for the duration of the marketing season, and if not redeemed by the farmer, the collateral is taken into Commodity Credit Corporation inventories at the time the loan matures. For this reason, such loans are regarded as intermediary to the acquisition of commodities, and the net change in loans has been included in the net change in major commodity inventories shown under Federal physical assets.

Loans and repayments of the Federal intermediate credit banks have also been excluded, since their lending operations are carried on through private checking accounts and, therefore, are not reflected in Budget expenditures. Similarly loans of mixed ownership corporations are excluded because their operations do not appear in Budget expenditures.

Federal physical assets.—Expenditures in this category include (1) the acquisition of sites and the direct construction of Federal civil public works projects, (2) the net increase or decrease in commodity inventories for agricultural price support and for defense production, (3) outlays for major civil equipment, and (4) other expenditures for acquisition of land and improvement of physical assets which do not fall in the public works category. In this tabulation, Federal expenditures on physical assets, in the main, represent gross rather than net additions to the stock of existing assets. They do not allow for collections going directly into miscellaneous receipts from the sale of Government property. They also do not allow for depreciation on existing physical assets.

TABLE 2.—*Expenditures for Federal physical assets (civil)*

[Fiscal years. In millions]

	1950 actual	1951 estimate	1952 estimate
Public works—sites and direct construction	$1,560	$2,130	$2,593
Major commodity inventories—net change	1,253	−748	342
Major equipment	17	84	488
Other physical assets—acquisition and improvement	186	278	327
Total, Federal physical assets (civil)	3,016	1,744	3,751

Federal expenditures for civil physical assets are estimated at $3.8 billion in the fiscal year 1952, over twice as large as in 1951. Much of the increase is due to the fact that expenditures for commodity inventories are net of receipts from sales. In fiscal year 1951, there is a net liquidation of nearly 3.5 million bales of cotton acquired by the Commodity Credit Corporation in prior years. Other increases will be mainly for expenditures on the atomic energy program, and expenditures under the Defense Production Act of 1950.

EXPENDITURES FOR OTHER DEVELOPMENTAL PURPOSES

Certain Federal expenditures which do not add to Federal assets do contribute to the physical assets and other resources of the Nation as a whole. Some of these expenditures are for assets owned by State and local governments to which the Federal Government contributes chiefly through grants-in-aid. Some expenditures are for improvement or development of assets held by individuals or organizations, such as Federal programs assisting farmers in soil conservation. Some expenditures are for research and development either carried on by the Federal Government or by Federal grants to States. And some, either as grants-in-aid or direct Federal expenditures, are to improve the health and education of citizens or to develop productive skills.

These expenditures are set apart in a separate category because the duration of benefits goes beyond the current fiscal year. At the same time, the concept of what is developmental is narrowly defined. Many other programs with some developmental aspects are classified under current expenses for aids and special services or under other current operating expenses. Also, figures for developmental expenditures exclude, so far as feasible, expenditures to preserve or maintain existing assets or other resources.

TABLE 3.—*Expenditures for other developmental purposes (civil)*

[Fiscal years. In millions]

	1950 actual	1951 estimate	1952 estimate
Physical assets:			
State and local	$478	$507	$687
Private	401	551	482
Education, training, and health	1,114	997	1,014
Research and development	311	375	391
Engineering and natural resources surveys	43	50	49
Total, expenditures for other developmental purposes (civil)	2,348	2,481	2,673

Expenditures for other developmental purposes are estimated to be $2.7 billion in fiscal 1952. Of this amount, $1.2 billion is for construction or improvement of State and local and private physical assets and $1.1 billion is for promotion and improvement of the education, training, and health of individuals, the largest part of which is for veterans' education. The figures included here for veterans' education represent payments for tuition, supplies, and equipment and exclude the subsistence allowances which are classed as current expenses for aids and special services. Expenditures for research and development are predominantly for atomic energy, agriculture, public health, and mineral resources.

CURRENT EXPENSES FOR AIDS AND SPECIAL SERVICES

A large part of the expenditures of the Federal Government are primarily to benefit particular economic groups or individuals or to promote international security. While these expenditures, of course, are necessarily current expenditures, they differ materially from operating expenses of a private business or general overhead expenses of the Government. For this reason, they are set out separately as a major category, with subcategories according to the ultimate recipient of the aid or service. Most of these expenditures consist of transfer payments to individuals, grants to States for the benefit of individuals or economic groups, subsidies for various economic groups, payments for goods procured for aid programs, and expenses of performing special services. Also included are expenditures for operation and maintenance of those physical assets which provide aids or services to particular groups.

This category is not intended to cover all aids and services. Substantial benefits also accrue to various economic groups and private individuals from Federal expenditures for loans, for physical assets, and for other developmental purposes such as education and scientific research and development.

TABLE 4.—*Current expenses for aids and special services*

[Fiscal years. In millions]

	1950 actual	1951 estimate	1952 estimate
Agriculture	$601	$890	$673
Business	789	876	412
Labor	228	180	180
Home owners and tenants	−111	−47	−52
Veterans	5,583	4,765	4,263
General aids	1,264	1,429	1,454
International	4,392	4,218	7,008
Total, current expenses for aids and special services	12,746	12,311	13,937

Of the total estimated expenditures of $13.9 billion in the fiscal year 1952 for current expenses for aids and special services, 81 percent will be for international aids and aids to veterans. International aids will rise sharply under the proposed military and economic assistance program, and veterans' aids will decline. Current expenses for aids to agriculture, business, labor, and home owners and tenants total $1.2 billion. The 1952 estimate of aids to business assumes adoption of the proposed increase in postal rates.

OTHER CURRENT OPERATING EXPENSES

Civil expenditures of $8.3 billion are classified as other current operating expenses. These expenditures are chiefly for interest. Other expenditures include repair, maintenance, and operation of physical assets, economic regulation and other law enforcement, and general operating expenses such as payments to Federal employees' retirement funds, Federal financial management, and foreign relations. Expenditures for economic regulation will increase with the expansion in the defense program.

TABLE 5.—*Other current operating expenses (civil)*

[Fiscal years. In millions]

	1950 actual	1951 estimate	1952 estimate
Repair, maintenance, and operation of physical assets	$276	$311	$335
Regulation and control	342	408	672
General operation and administration	1,278	1,357	1,440
Interest	5,817	5,722	5,897
Total, other current operating expenses (civil)	7,713	7,798	8,343

NONCOST PAYMENTS

Noncost payments included in Budget expenditures amount to $623 million in 1952, $572 million in 1951, and $563 million in 1950. These expenditures include the payments to the railroad retirement and unemployment insurance trust funds and the administrative expenses of the railroad unemployment insurance administration fund, all paid from the proceeds of special payroll taxes. These items do not represent costs to the Government, nor do the receipts represent revenues available to the Government. Not included here, however, are various other intragovernmental transfers such as payments to the civil-service retirement trust fund and to the veterans' insurance trust funds. These transfers represent true Budget costs and have, therefore, been included either as current expenses for aids and special services or as other operating expenses of the Government.

RELATIONSHIP TO OTHER SPECIAL ANALYSES

The information shown in the present analysis is of a summary character. The three special analyses following the investment-operating analysis in part IV of the Budget document present additional detailed information on loans, public works, and Federal aid to State and local governments.

Federal credit programs.—Commitments on both direct loan programs and loan guarantee and insurance programs are shown in Special Analysis E on Federal Credit Programs. In addition, disbursements, collections, and status of credit authority are presented for individual programs. In the investment-operating analysis, however, only the budgetary effects of these loan programs are summarized in the category of loans under additions to Federal assets.

Treatment of public works.—In the present analysis, the public-works activities of the Federal Government do not appear in one category. Some expenditures for public works, such as Reconstruction Finance Corporation loans to public agencies, are included under Federal loans; other

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

public works, largely acquisition of sites or direct Federal construction, are included under Federal physical assets; and still others, grants-in-aid to State and local governments, are included under expenditures for development of non-Federal physical assets. The public-works figures both in this classification and in Special Analysis F on civil public works exclude, so far as feasible, expenditures for repair and maintenance, although, of course, these may entail the employment of construction workers.

Expenditures for public-works activities are summarized in the following tabulation according to the major categories of the present classification.

TABLE 6.—*Summary of Federal expenditures for civil public works*

[Fiscal years. In millions]

Public works listed under—	1950 actual	1951 estimate	1952 estimate
Additions to Federal assets:			
Loans to State and local governments (excluding slum clearance)	$15	$220	$73
Public works—sites and direct construction	1,560	2,130	2,593
Expenditures for other developmental purposes: State and local physical assets	478	507	687
Total, public works	2,053	2,857	3,353

Treatment of Federal aid to State and local governments.—Grants to States and shared revenues represent a method of payment, rather than a basic category of the present classification. Some grants are made for construction of physical assets; some are for aids to individuals or particular economic groups; and others are for operating expenses of specific programs. Because of the great interest in these and other intergovernmental payments, loans to State and local governments and grants in aid and shared revenues have been set out separately as subcategories in the various parts of this special analysis to which they relate. Details appear in Special Analysis G.

The following tabulation summarizes the items of Federal aid to State and local governments according to the major categories of the present classification.

TABLE 7.—*Summary of Federal expenditures for aid to State and local governments*

[Fiscal years. In millions]

Federal aid listed under—	1950 actual	1951 estimate	1952 estimate
Additions to Federal assets—loans	$15	$230	$138

Special Analysis E

FEDERAL CREDIT PROGRAMS

This special analysis, appearing for the first time in the Budget document, summarizes new commitments, expenditures, and status of credit authority of major Federal credit programs. It provides supporting detail for the loan section of the preceding analysis of investment, operating, and other Budget expenditures. In addition, it gives a broad picture not only of direct Federal loans and investments but also of Federal loan insurance and loan guarantee programs, which have been of major importance in recent years.

Federal credit programs, in the main, are designed to supplement or reinforce private financing. Most lending agencies either by law or by administrative policy limit direct loans to cases where the borrowers cannot obtain credit on reasonable terms from private financial institutions. Under loan insurance and guarantee programs, the Government agency shares the risk and thus encourages private financing.

The relative importance of Federal credit programs varies for different types of credit. Business loans made or insured by Government agencies currently account for about 1 percent of the outstanding obligations of corporate business. On the other hand, 40 percent of the home mortgage debt is insured or guaranteed by Federal agencies. Governmental loans also represent a large share of international loans made in recent years.

Summary

Total new commitments for all of these types of programs for the fiscal year 1952 are estimated at $13.3 billion. Of this total, credit aids for housing and community development programs account for commitments of $9.8 billion, or 73 percent. Increases in commitments under the Defense Production Act and international-aid programs will largely offset declines in commitments under other programs.

Net expenditures for Federal credit programs in the fiscal year 1952 are estimated at $451 million. This is less than half the net expenditures now estimated for the current fiscal year. The sharp decline reflects primarily the substantial net sales of housing mortgages forecast for the Federal National Mortgage Association.

Table 1.—*Commitments and expenditures for Federal credit programs classified by major function*

[Fiscal years. In millions]

Function	New commitments			Net expenditures		
	1950 actual	1951 estimate	1952 estimate	1950 actual	1951 estimate	1952 estimate
International security and foreign relations	$559	$480	$816	$206	$270	$63
Housing and community development	10,237	11,657	9,765	349	375	−357
Agriculture and agricultural resources	554	542	456	286	301	234
Finance, commerce, and industry	608	925	2,295	153	119	522
Other	8	9	8	−29	−4	−11
Total	11,967	13,613	13,340	965	1,061	451

The relatively small budgetary impact of Federal credit programs arises from three unique aspects of these programs. The most important is the predominance of Federal insurance and guarantees of private loans in recent years, discussed more fully later in this analysis. Such programs normally involve little or no Budget expenditures except in cases when defaults cause the guaranteeing or insuring agencies to take over the private loan. Secondly, a substantial share of the new commitments, both for insurance and guarantees and for direct loans, are canceled or expire without being used by the lending institution or the borrower. Finally, collections in most cases are directly offset against disbursements on new loans, with the result that net expenditures are much less than gross expenditures; often net receipts occur.

Coverage of Analysis

The analysis covers credit programs of all wholly owned Government enterprises, whether corporate or noncorporate, which affect either Budget expenditures or Budget receipts. Included also are all credit operations of established departments and agencies, even though incidental to other functions, e. g., the State Department loan to the United Nations for the construction of its headquarters in New York City. It excludes operations of mixed-ownership corporations and other Government agencies operating in part or in whole with private funds (e. g., the Federal home-loan banks, banks for cooperatives, Federal land banks, Federal Reserve banks, and the Federal Deposit Insurance Corporation). As in the case of the other special analyses, this analysis omits the military housing insurance program classified under military services.

Activities of the Commodity Credit Corporation and of the Federal intermediate credit banks are also omitted. As indicated in the preceding analysis, the price-support loans of the former corporation are short-term, nonrecourse loans which do not possess the normal attributes of other public- and private-lending programs. Loans and repayments of the Federal intermediate credit banks are excluded, because their operations are carried on through private checking accounts and, therefore, are not reflected in Budget expenditures. Gross loans of the banks in 1952 are estimated at $1.7 billion, but repayments will offset all except $47 million.

New Commitments

New commitments provide the best single measure of the trends in most Federal credit programs. In this study, commitments are defined as approvals by the Federal agencies of direct loans or of insurance or guarantees of private loans. They are shown on a gross basis, without deductions for commitments not subsequently utilized. The amounts included are the principal amounts of the loans themselves, even though in the case of some guarantee and insurance programs this exceeds the Government's contingent liability.

Table 2 breaks down new commitments between direct loans and investments and guarantees and insurance.

Direct loans and investments.—New commitments for direct loans and investments are estimated at $3,493 million in the fiscal year 1952. While the total represents a decline of only $175 million from 1951, it reflects sharp differences in trend between the nondefense programs and defense-related programs. The most rapid expansion occurs in the new commitments of the Export-Import Bank and in loans for expansion of capacity under the Defense Production Act.

Reconstruction Finance Corporation	459	116	253	58	253	58
Other		34		34		34
Other functions	8		9	(b)	7	(b)
Total	3,543	8,424	3,668	9,945	3,493	9,847

b Less than $500,000.

Over the 2-year period, the most substantial declines are shown in the new commitments of the Federal National Mortgage Association, the Rural Electrification Administration, and in the peacetime business lending program of the Reconstruction Finance Corporation. These curtailments reflect the restrictive credit policy adopted on nondefense credit programs following the attack on Korea. On three programs subject to section 1214 of the General Appropriation Act, reserves of $125 million were established, reducing the amounts available for obligation during the fiscal year 1951. Equal or greater reductions are reflected in the authority requested for the fiscal year 1952.

Guarantees and insurance.—New commitments for Federal guarantees and insurance of private loans will amount to an estimated $9,847 million in the fiscal year 1952. Increased commitments on defense-related programs will largely offset reductions in other programs.

The decline in insurance commitments for housing programs will amount to $1,299 million, mostly on commitments of the Federal Housing Administration. Under the Housing Act of 1950, however, a large share of the housing mortgages guaranteed by the Veterans Administration will finance housing initially constructed with the aid of mortgage insurance commitments by the Federal Housing Administration. Hence, particularly in the fiscal year 1952, the total commitments for guarantees and insurance substantially overstate the amount of private loans actually resulting from insurance and guarantee commitments.

Estimates of the volume of commitments for guarantees of defense production loans under section 301 of the Defense Production Act are tentative. The estimated magnitude of $1.5 billion in the fiscal year 1952 compares with aggregate commitments of $4.4 billion during the fiscal year 1943, the first full year of operation under a similar World War II program.

DISBURSEMENTS AND COLLECTIONS

Most loan programs are shown in the Budget on a net basis, i. e., expenditures reflect new loans less collections on old loans. In the detailed table in this special analysis, loans are shown on a net basis. However, to show more clearly the total volume of loans, they are summarized here on a gross basis. Two columns are shown for each fiscal year. The first column shows gross loan disbursements during the year, and the second column shows repayments (including collections going directly to miscellaneous receipts of the Treasury). The difference between these two columns then represents the net addition or reduction (excluding charge-offs) during the fiscal year in Federal loan assets. After this net total a one-line adjustment is added for repayments going directly to miscellaneous receipts, bringing the total expenditures for loans into line with the Budget expenditure concept.

In the summary table and in the later detail, the loan figures represent disbursements and collections on principal account and exclude all income and expense items. They also make no allowance either for write-offs of old loans or for possible future losses or recoveries. Consistent with the general definition of Budget expenditures, they exclude investments in United States Government securities.

In the fiscal year 1952, gross loan disbursements are estimated at $2,077 million, and collections at $1,627 million. Thus the gross level of activity will be roughly four times as high as the net expenditures. Of the total collections, $220 million goes directly to miscellaneous receipts, chiefly repayments on loans of the Farmers' Home Administration and the Rural Electrification Administration and on the Treasury loan to the United Kingdom. Net Budget expenditures for loans, therefore, will amount to an estimated $671 million.

TABLE 3.—*Disbursements and collections classified by functions*

Status of Credit Authority

Unlike most other Government programs, commitment authority for the major credit programs is not normally provided for a single year, but remains available in most instances until utilized or until the statutory authority for the program expires. Hence, with only a few exceptions, the existing authority represents the cumulative total of amounts made available in prior years.

Net authority available.—Three major types of commitment authority have been provided for Federal credit programs. A majority of the major programs operate on a revolving fund basis, i. e., collections on outstanding loans and expirations of insurance or guarantee commitments permit reuse of the original authority. Limitations on such programs are ordinarily in terms of maximum amounts of loans outstanding, maximum borrowings from the Treasury, or maximum insurance or guarantee liability. Major examples include lending programs of almost all Government corporations and the majority of the mortgage insurance programs under the Federal Housing Administration.

In the case of several noncorporate lending programs, the maximum limitation is placed upon the total volume of loans and commitments to lend. Funds collected on such loans and expirations on such insurance are not available for reuse. Typical examples are the direct loan programs of the Rural Electrification Administration and the Farmers' Home Administration and the war housing mortgage insurance program under title VI of the National Housing Act.

A few programs are not governed by any specific dollar limitation. These are limited only indirectly by the provisions of the statute or of the agency's regulations governing eligibility for Federal credit assistance. The amount committed depends primarily on the volume of applications. The most notable examples are the loan guarantee and insurance programs of the Veterans Administration. The new loan guarantees authorized under section 301 of the Defense Production Act of 1950 are also not specifically limited.

As the accompanying table indicates, credit authority available under existing legislation will amount to $56 billion by the end of the fiscal year 1952. The proposed additional authority of $5.5 billion is mainly to provide for the mortgage insurance programs of the Federal Housing Administration, the international lending program of the Export-Import Bank, and loan and guarantee commitments under the Defense Production Act.

Charges against authority.—Outstanding loans and investments by the end of the fiscal year 1952 are estimated at $12.9 billion. Half of these represent loans to foreign governments, including the $3,750 million loan to the United Kingdom, on which principal and interest payments begin next December. Of the undisbursed commitments of $5.9 billion, nearly half represents the $2,540 million commitment to purchase additional stock in the International Bank for Reconstruction and Development.

Guarantees and insurance in force will continue to increase to an estimated total of $26.5 billion at the end of the fiscal year 1952. Mortgage insurance by the Federal Housing Administration and guarantees by the Veterans Administration account for almost all of the total amount.

The amounts shown represent, with one minor exception, the estimated contingent liability of the Federal Government, rather than the principal amounts of the loans partly or wholly guaranteed. The major program on which the contingent liability differs materially from the principal amount of the loan is the veterans loan guarantee program. By the end of the fiscal year 1952, the outstanding amount of such loans will be at least $6 billion higher than the Government liability.

Uncommitted authority.—For Federal credit programs as a whole, commitment authority at the end of the fiscal year 1952 will be $12.6 billion more than the charges against the authority. Of this total, $4,750 million represents stand-by borrowing authority of the Federal Deposit Insurance Corporation, the Federal home-loan banks, and the Federal Savings and Loan Insurance Corporation, none of which is likely to be required except in the event of a financial emergency. Of the remainder, the yield insurance program under title VII of the National Housing Act and the uncommitted mortgage purchase authority of the Federal National Mortgage Association account for $3 billion. No allowance is made for the indefinite authority under the Veterans Administration loan guarantee program and similar programs not specifically subject to over-all limitations.

Programs by Major Functions

The major Federal credit programs are concentrated in four functional areas. Key facts about each of these major programs are summarized in the following paragraphs:

INTERNATIONAL SECURITY AND FOREIGN RELATIONS

Export-Import Bank.—During the fiscal year 1952, the Export-Import Bank will roughly double its recent rate of new commitments as it undertakes additional projects to develop sources of strategic materials abroad. Under the legislative program proposed by the President, the Bank's lending authority would be increased by $1 billion to a total of $4.5 billion.

Loans to the United Kingdom.—In the fiscal year 1952, the United Kingdom will make the first of the scheduled repayments on the credit of $3,750 million extended by the Treasury Department in the fiscal years 1947 and 1948. At the same time, final repayments will be made on the credit of $390 million extended in the early years of World War II by the Reconstruction Finance Corporation.

HOUSING AND COMMUNITY DEVELOPMENT

Veterans Administration.—Under the Servicemen's Readjustment Act of 1944, as amended, the Administrator of Veterans' Affairs guarantees loans to veterans for purchase or construction of housing. In the fiscal year 1952, guarantee or insurance of 500,000 loans will be approved (including 250,000 for newly constructed houses). This compares with an estimated 541,000 loans approved in the fiscal year 1951 (including 300,000 loans to finance newly constructed houses). During the fiscal year 1951, the Administrator will also make direct loans of $75 million to veterans unable to obtain private financing on a guaranteed basis; this program expires June 30, 1951.

Slum clearance and urban redevelopment.—The Housing Act of 1949 authorized a 5-year program of $1 billion in loans and $500 million in capital grants for slum clearance and community development and redevelopment. Loans of $10 million in 1951 and $65 million in 1952 will initiate planning and acquisition of urban sites for clearance, redevelopment, and eventual construction, including public housing and community projects. No projects in the future will go beyond the site acquisition stage, except where express approval is given that the actual redevelopment will be consistent with defense requirements.

Housing loans to educational institutions.—The newly authorized program of housing loans to educational institutions has been restricted to housing directly contributing to defense, with total commitments of $40 million, compared to $300 million provided in the statute.

Federal National Mortgage Association.—By purchasing insured and guaranteed mortgages from financial institutions, the Association assures the availability of funds for housing construction and purchase. Under the Housing Act of 1950, advance commitments for future mortgage purchases were prohibited. As a result of this step and increased sales of mortgages previously purchased, net receipts of $512 million are anticipated in the fiscal year 1952.

900000—51——62

Home Owners' Loan Corporation.—The Corporation is completing liquidation of $3.5 billion in mortgages acquired in refinancing of private home mortgage loans during the depression.

Federal Housing Administration.—The Federal Housing Administration is authorized to insure a maximum of $1,250 million in home improvement loans and $19.5 billion of home mortgage loans and investments. Proposed legislation would authorize an additional $3 billion in mortgage insurance authority available at the discretion of the President for use on the proposed defense rental housing program, as well as on existing insurance programs. In the fiscal year 1952, insurance commitments will help to provide initial financing for 420,000 housing units.

Public Housing Administration.—Under the Housing Act of 1949, the Public Housing Administration is authorized to make loans and annual contributions for the construction and operation of low-rent public housing units by local housing authorities. The act authorizes construction starts of 135,000 such units annually. In the fiscal year 1952, however, a maximum of 75,000 units will be started, and the selection of projects and the occupancy of them will be planned to contribute to the defense effort.

AGRICULTURE AND AGRICULTURAL RESOURCES

Rural Electrification Administration.—New loan authority is provided annually in the Budget to finance construction of rural electrification facilities and to improve telephone service in rural areas. Because of the large volume of both unused and unadvanced funds carried over each year, however, loan expenditures and new loan commitments exceed the reduced new authorization recommended for 1952.

Farmers' Home Administration (excluding farm housing).—Production and subsistence loans account for the bulk of the Administration's lending program. In addition, it makes smaller amounts of loans for farm ownership and enlargement, and for improvement of water facilities on farms in semiarid areas. These programs are financed each year by new authorizations, available only for loans approved during the fiscal year.

FINANCE, COMMERCE, AND INDUSTRY

Expansion of Defense Production.—Section 301 of the Defense Production Act of 1950 authorizes the military and other defense procurement agencies to guarantee loans to defense contractors or subcontractors. Section 302 authorizes direct loans, and participations in private loans for expansion of capacity, development of technological processes, or production of essential materials. The estimates in this analysis assume that the volume of loan guarantees will be considerably less than half the magnitude of the comparable World War II program and that loan commitments under section 302 up to June 30, 1952, will use 40 percent of the $2 billion authorization.

Reconstruction Finance Corporation.—The Corporation has broad authority to make direct loans and to participate in private loans to help finance private businesses which are unable to obtain credit on reasonable terms elsewhere. Commitments in 1951 and 1952 are estimated at a little more than half the 1950 level.

Special Analysis F

FEDERAL ACTIVITIES IN CIVIL PUBLIC WORKS AND OTHER CONSTRUCTION

Civil public works and other construction included in the functions of the Federal Government have significant effects on the total construction and economic activity of the Nation. In this period of expanding defense activity the programs require a major shift of emphasis. Although substantial curtailment of nondefense construction must be effected, it is necessary in many instances to expand construction that will contribute to defense and also to provide sufficient long-run development of our national resources to maintain national strength.

This section of the Budget provides an analysis of the civil public works programs of the Federal Government and a summary of the construction aspects of certain of its other programs. It is not possible to present any data on military public works at this time because of the rapidly changing character of the military programs, but military public works will be substantially larger than in recent years.

CIVIL PUBLIC WORKS

As a general policy, recommendations for civil public works in fiscal year 1952 allow only for a minimum rate of progress, consistent with efficient use of funds. New projects are recommended only where required for defense or related essential civilian needs. New projects involving the production and transmission of power in shortage areas are provided for to meet the demand at the earliest possible date. New loan and grant commitments for public works in fiscal 1952 have generally been reduced, except for highways.

Even with the suspension or curtailment of a number of projects and programs as a result of application of the foregoing criteria, Federal civil public works expenditures will reach an estimated total of $3.4 billion. This is an increase over estimated expenditures in 1951 of $496 million. This large construction program is made necessary by several factors: Many of the major river-basin development programs which were started in previous years require a number of years to complete and are being continued because of investments already made as well as to provide much needed power; several new hydroelectric projects have been included to meet anticipated power shortages; the program of the Atomic Energy Commission has been substantially expanded; and provision has been made for construction of defense housing and community facilities and for civilian defense and dispersal facilities. Table 1, following, shows a breakdown of these expenditures by major programs and agencies for fiscal years 1950, 1951, and 1952.

Table 1.—*Expenditures for civil public works*

[Fiscal years. In millions]

Program	Expenditures		
	1950 actual	1951 estimate	1952 estimate
Major programs:			
Veterans' hospitals	$160.4	$213.2	$155.2
Bureau of Public Roads	461.8	454.6	456.9
Bureau of Reclamation	272.0	314.4	230.5
Corps of Engineers	539.7	565.2	543.7
Atomic Energy Commission	239.5	377.0	720.4
Housing and Home Finance Agency (gross)	27.8	365.5	269.2
Loan repayments	[a] 4.5	[a] 165.7	[a] 285.4
Tennessee Valley Authority	51.4	243.7	265.7
General Services Administration	15.3	70.7	182.6
Other programs:			
Federal Security Agency	18.3	64.5	139.3
Department of State	4.0	13.1	86.3
Reconstruction Finance Corporation (gross)	.8	25.0	95.0
Loan repayments	[a] 6.1	[a] 4.5	[a] 5.1

Total, civil public works	2,052.8	2,856.8	3,352.8

[a] Deduct.

Continuing Work and New Projects

Table 2, following, classifies the construction programs of the various Federal agencies not only according to whether they are new or continuing, but also according to whether they represent direct Federal construction or construction by non-Federal public agencies receiving loans or grants. "New" projects, or features thereof, and "new" commitments are defined as (1) those direct Federal projects or project features on which construction will be started with appropriations and contract authorizations recommended for fiscal year 1952 and (2) new commitments recommended for fiscal year 1952 on loan and grant programs. Costs shown to June 30, 1951, are actual costs to date plus estimates for the remainder of the year based on current prices. Estimates of expenditures required after fiscal year 1951 are based largely on current construction prices. Should these costs change before the projects are completed, the required expenditures would differ from those shown in table 2.

Total, civil public works, net			3,352.8	

[1] Loan authority.

RESERVE OF PUBLIC WORKS PROJECTS

Authorized work.—In addition to the foregoing commitments to complete going work, agency reports indicate that, on the basis of present prices, about $17 billion of construction work has been authorized, either by general or specific legislation, for undertaking after fiscal year 1952. This is an increase over the reserve of work reported in the 1951 Budget and is due principally to the large addition to the volume of authorized work for the Corps of Engineers provided by the Rivers and Harbors and Flood Control Act of 1950. Restrictions on new starts applied during the current year and in this Budget have also prevented normal depletion of reserves. Most of this authorized work is included in the programs of the Corps of Engineers and the Bureau of Reclamation.

TABLE 3.—*Reserve of authorized projects and programs for undertaking after fiscal year 1952*

Agency:	*Total cost of projects (billions)*
Corps of Engineers	$10.2
Bureau of Reclamation	2.5
Department of Agriculture, Forest Service	1.5
Federal Civil Defense Administration	1.0
Other	2.2
Total	17.4

Planned projects.—The backlog of planned projects is, in general, greater than in 1951 because of the restrictions on starting construction of projects already planned. The Corps of Engineers has an estimated $1.9 billion of authorized projects planned to the stage where construction can be undertaken; and advance planning is in various stages of completion on another $1.8 billion of authorized work. The Bureau of Reclamation has no large backlog of completed plans available in fiscal 1951 for later construction. Plans are now in process of preparation for $260 million of projects, and additional planning will continue in 1952. Other Federal agencies have much smaller quantities of planning under way.

The aggregate of planned direct Federal projects ready for construction is $2 billion, with another $2 billion of project plans in process of preparation. In addition to this category, States, local authorities, and cooperatives receiving Federal loans and grants have plans completed for a total of $3 billion of projects, with another $4 billion in preparation.

EXPENDITURES FOR BASIC DATA, PRELIMINARY SURVEYS, AND DETAILED PLANS

Basic data, such as topographic maps and records of rainfall, runoff, and stream flow, are not only essential to the efficient and economical design and construction of many projects, particularly in the field of resource development, but are also of great importance in planning defense projects. Similarly, well-conceived development projects and many defense installations require much preliminary investigation and survey work to determine their engineering and economic feasibility. Many Federal developments have been hampered in the past by inadequate examination of all of the problems involved before projects were authorized and construction was undertaken. Also, preparation of detailed project plans well in advance of construction provides for more orderly programing of project construction and prevents many expensive changes in project designs during the construction period.

Basic data.—A total of $40 million is recommended for appropriation or allotment in fiscal year 1952 for topographic mapping and geodetic control, geologic and soil surveys, and for assembly of hydrologic and climatologic data. This is an increase of $5.5 million over estimated 1951 expenditures.

Preliminary surveys.—Appropriations and allotments totaling $14.5 million are recommended for fiscal year 1952 for preliminary surveys of river-basin and other construction programs under investigation. These amounts include funds for the comprehensive interagency surveys of the Arkansas-White and Red River Basin and the New England river basin areas called for in the 1950 Flood Control Act, as well as for the river-pollution surveys of the Public Health Service.

Detailed plans.—The rigid restrictions on nondefense construction, combined with the backlog of available work already planned, make it unnecessary to continue preparation of detailed plans in any substantial volume. Funds for preparation of such plans have, therefore, been reduced from $25 million in 1951 to $10 million in 1952. Most of these funds are for projects of the Corps of Engineers and the Bureau of Reclamation.

PROGRAMS BY MAJOR FUNCTIONS

Most of the major Federal functional programs include public works at least to some extent, as is indicated in table 4. The natural resources and the transportation

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

and communication functions account for the major share of the Federal works, but the veterans' services and benefits and the housing and community development functions also include substantial outlays for that purpose.

TABLE 4.—*Federal civil public works expenditures by function and subfunction*

[Fiscal years. In millions]

Function and subfunction	1950 actual	1951 estimate	1952 estimate
Veterans' services and benefits:			
Veterans' hospitals and medical care	$159.5	$212.0	$155.0
Other services and administration	.9	1.2	.2
Total, veterans' services and benefits	160.4	213.2	155.2
International security and foreign relations, conduct of foreign affairs	.8	7.0	73.1
Social security, welfare, and health:			
Promotion of public health	18.2	51.8	63.6
Crime control and correction	.8	1.2	.6
Total, social security, health, and welfare	19.0	53.0	64.2
Housing and community development:			
Public housing programs	22.3	173.4	[a] 26.3
Research and other general housing aids	.1	3.8	3.3
Provision of community facilities	[a] 2.9	45.7	44.4
Civil defense		5.0	172.8
Defense housing, community facilities, and services			100.0
Total, housing and community development	19.5	227.9	294.2
Education and general research:			
Promotion of education		14.7	75.7
General-purpose research	1.2	1.7	2.5
Total, education and general research	1.2	16.4	78.2
Agriculture and agricultural resources:			
Stabilization of farm prices and farm income	95.1	53.3	25.5
Conservation and development of agricultural land and water resources	1.0	1.3	1.3
Research and other agricultural services	.6	.7	.1
Total, agriculture and agricultural resources	96.7	55.3	26.9
Natural resources:			
Conservation and development of land and water resources	783.7	1,078.7	965.9
Conservation and development of forest resources	4.8	10.9	13.0
Conservation and development of mineral resources	3.0	4.5	1.6
Conservation and development of fish and wildlife	1.1	1.3	1.2
Recreational use of natural resources	9.3	18.7	15.9
Development and control of atomic energy	239.5	377.0	720.4
General resource surveys			.6
Total, natural resources	1,041.4	1,491.1	1,718.6
Transportation and communication:			
Provision of navigation aids and facilities	134.1	139.5	176.7
Provision of highways	485.3	482.5	481.6
Promotion of aviation, including provision of airways and airports	58.5	66.9	80.2
Other services to transportation	17.0	25.7	6.5
Total, transportation and communication	694.9	714.6	745.0
General government:			
Legislative functions	3.2	3.2	8.8
Judicial functions	2.5	8.5	1.0
Executive direction and management	.8	3.3	1.1
Other central services	1.1	14.4	7.1
Other general government	11.3	48.9	179.4
Total, general government	18.9	78.3	197.4
Total, civil public works	2,052.8	2,856.8	3,352.8

[a] Deduct.

VETERANS' SERVICES AND BENEFITS

Veterans Administration hospitals.—During fiscal year 1952, work will continue on the construction program for Veterans Administration hospitals, consisting of 75 hospital projects to provide 36,504 beds, 2 new regional offices on existing hospital sites, and the major alteration and renovation of existing hospitals and homes. The total estimated cost of the program is now $891.3 million, an increase of $19.8 million resulting from increased construction costs, the inclusion of funds for a new regional office building at Chicago, Ill., and provision for portable initial equipment for hospitals to be completed during 1952.

It is estimated that by the end of the fiscal year 1952 projects for providing 30,254 new beds will be completed, those for 3,250 beds will be under construction, and only 3,000 will remain to be added in subsequent years.

INTERNATIONAL SECURITY AND FOREIGN RELATIONS

International information and educational activities.—Included in the proposed 1951 supplementals is one for international information and educational activities, Department of State, in the amount of $100 million to continue the acquisition of facilities necessary for the dissemination abroad of a better understanding of the United States, its people and policies, and for the successful prosecution of the cold war on the propaganda front. Expenditures in 1951 are estimated at $6.4 million and at $72.6 million for 1952, including expenditures from the anticipated supplemental. In order to complete the program, additional expenditures of $70.7 million will be required.

Department of State, building fund.—The Congress has authorized a total appropriation of $31.6 million (exclusive of foreign currency credits) for acquisition of sites and construction of buildings in foreign countries for the use of the Department of State and other agencies of the United States Government. Legislation expanding this authority will be requested in 1952. In view of the necessity for directing all possible resources to the defense effort, however, no additional appropriation is proposed for 1952. It is expected that dollar requirements for that year can be met from existing balances.

SOCIAL SECURITY, WELFARE, AND HEALTH

Public Health Service.—The Federal-aid hospital construction program was authorized in 1947. The initial act authorized a total of $375 million of Federal grants over a 5-year period for non-Federal public and private nonprofit hospitals and health facilities. The Eighty-first Congress amended the law to authorize annual grants for this purpose of $150 million in the fiscal year 1950 and for 5 years thereafter. A total of $460 million in authorizations has been provided through the fiscal year 1951. However, $75 million of the $160 million appropriated for 1951 has been placed in reserve under section 1214 of the General Appropriation Act. An additional $75 million for new obligations is recommended for 1952. This will permit final approval of about 250 new projects. Only the grants for public hospitals are included in the civil public works total; those for private hospitals are discussed in a later section.

Construction of the Clinical Research Center and auxiliary buildings at Bethesda, Md., was begun in fiscal year 1949 and is scheduled to be completed in fiscal year 1953. It will provide a research laboratory equipped with 500 beds for clinical research in cancer, heart, mental, metabolic, and infectious diseases.

Expenditures for construction of the Environmental Health Center at Cincinnati, Ohio, to be completed in the fiscal year 1953, will provide a laboratory for research in water pollution, radioactive wastes, radiological health, and other environmental health problems.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

Under the restrictive budget policy for 1952, no estimates are included for construction under the Water Pollution Control Act, which authorized $22,500,000 per year in loans to assist States, municipalities, and interstate agencies in the construction of sewage treatment plants and $1,000,000 per year in grants to assist them in preparing plans preliminary to construction. To date, these programs have not been started.

HOUSING AND COMMUNITY DEVELOPMENT

Housing and Home Finance Agency.—Title III of the Housing Act of 1949 expanded the low-rent public housing program by authorizing an additional 810,000 units over a 6-year period and a $1,500 million revolving loan fund. This program is being restricted below authorized levels and adjusted wherever required to meet national defense housing needs. As a part of the program to develop the resources of Alaska, a $15 million revolving fund was authorized by the Congress, of which $10 million was appropriated. Some portion of this amount will be expended for public housing in 1952.

The program of advance planning of non-Federal public works, which was transferred from the General Services Administration during the past year, was authorized for a 2-year period ending October 13, 1951. In view of the international situation, legislation for further extension of this program is not requested. Only $2 million of the $27 million contract authority authorized for 1951 is at present available for use. None is requested for 1952. The program in 1951 has been limited to loans for the planning of strictly defense-related projects. The activity in 1952 is restricted to liquidation of loans. Housing and community facilities required in the national defense effort are to be provided under appropriate legislation proposed for this purpose.

Department of the Interior.—The 1952 programs for Alaska and Virgin Islands public works contemplate progress on schools, hospitals, sewer and water systems, roads, and other related development projects at about the same rate as 1951.

Reconstruction Finance Corporation.—The Budget contemplates $25 million of new loan expenditures for public agencies for 1951 and $95 million in 1952. It is expected that most of these expenditures in 1952 will be made for the construction of underground structures in congested city areas. These projects are being designed so that they can also be used as bomb shelters.

Federal Civil Defense Administration.—Comprehensive legislation just enacted will assist States to provide a program for the protection of life and property in case of enemy attack. A new Federal agency has been set up to carry out the provisions of this legislation, which authorizes grants and direct expenditures for protective facilities and other features in critical target areas. A shelter construction program is being planned which will involve, over a 3-year period, a Federal outlay of over $1 billion in grants to States. In addition, there will be some direct construction of control centers. Total construction expenditures of $108 million are estimated for 1952.

Defense housing and community facilities.—Proposed legislation provides in part for Federal authority to construct housing units and community facilities to take care of the influx of population into defense production and military areas. This part of the new program will be partially one of direct construction, but will also involve grants or loans to local authorities for community facilities. The 1952 Budget recommends $150 million for a new defense housing and community facilities program. Expenditures of $100 million are estimated for 1952.

EDUCATION AND GENERAL RESEARCH

Office of Education.—The construction of school facilities in federally overburdened districts is being carried forward primarily through grants, with $21,500,000 cash appropriations and $25,000,000 contract authority made available in 1951. Liquidation of the contract authority and $50,000,000 new cash are included in the 1952 Budget. The present legislative authorization, Public Law 815, Eighty-first Congress, expires at the end of fiscal year 1953.

AGRICULTURE AND AGRICULTURAL RESOURCES

Department of Agriculture.—Expenditures for storage facilities of the Commodity Credit Corporation, while only about half as large as in 1951, constitute the largest item of public works construction in this category. Small amounts also are provided for research facilities of the Agricultural Research Administration and for water conservation and utilization projects. Other agricultural construction programs, principally for rural electrification and flood control, are discussed in the section dealing with other Federal activities in construction.

NATURAL RESOURCES

The natural resources function includes the multiple-purpose development of river basins for flood control, irrigation, hydroelectric power, and other purposes and the conservation and development of land, forest, mineral, recreational, and fish and wildlife resources. This section, however, excludes capital outlays of a nonstructural nature, such as range improvements, wildlife development, reforestation, and revegetation, which cannot be classified strictly as construction.

Corps of Engineers, flood control.—The flood-control program of the Corps of Engineers is Nation-wide in scope and involves the provision of major storage reservoirs, usually for multiple purposes including power generation, construction of levees, and improvement of channels. The construction programs for the fiscal years 1951 and 1952 have been reoriented to lessen the demand upon services and commodities needed for national defense and to concentrate mainly on the completion of power facilities. The only new flood-control project recommended is Gavins Point Dam on the Missouri River, required as an adjunct to the power features of Fort Randall Dam, being constructed immediately upstream. Major emphasis will continue on completion of flood-control works now underway in the Mississippi River Basin, including large programs on the Missouri, Ohio, and Arkansas Rivers, and in the Columbia River Basin. In addition, major projects are under construction in the Savannah and Roanoke River Basins on the Atlantic seaboard and the Los Angeles and Central Valley areas of California.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

Bureau of Reclamation.—The Bureau's program for development of water resources in the 17 Western States and Alaska will primarily consist of continuation of construction on 42 irrigation and power projects, including the Eklutna project in Alaska. Of the total construction and rehabilitation appropriation, 73 percent will be required to finance 5 major projects: Central Valley project in California, Colorado-Big Thompson project in Colorado, Hungry Horse project in Montana, Columbia Basin project in Washington, and various features of the Missouri River Basin program. The remainder of this appropriation will be used for continuation of 37 other projects and for a rehabilitation program on existing projects, consisting principally of replacement of obsolete or deteriorated structures and equipment. The Bureau's program includes construction of transmission lines to principal load centers to carry electric power produced at reclamation projects and at related projects of the Corps of Engineers, now underway, and work on new power generating additions to the Alcova Dam in Wyoming and the American Falls project in Idaho. Hells Canyon Dam and Reservoir on the Snake River, required to relieve the power shortage in the Pacific Northwest, is the only new project recommended.

International Boundary and Water Commission.—Construction will continue in fiscal year 1952, in cooperation with the Mexican Government, on Falcon Dam, the Commission's principal current activity and the first of the multiple-purpose dams authorized on the Rio Grande by the treaty of February 3, 1944. Other activities, for which reduced funds are provided, include flood control and stream rectification works along the Rio Grande. No new developments will be undertaken in fiscal year 1952.

Bonneville Power Administration.—This agency is responsible for marketing electric power generated at federally owned dams in the Pacific Northwest. The recommended program for 1952 is a continuation of construction of major grid transmission facilities required for the transmission of power from Federal projects to principal load centers and to adjacent areas and for connection of customers with this basic grid. Total installed generator capacity will amount to 2,492,400 kilowatts by the end of fiscal year 1952.

Southwestern Power Administration.—This agency is responsible for marketing power generated at federally owned dams in six States in the southwestern area of the United States. The recommended program for 1952 is a continuation of construction of transmission facilities to match the generator installation schedules at Department of the Army projects, to integrate the power plants and to interconnect Federal facilities with other systems. Installed generator capacity will amount to 237,000 kilowatts by the end of fiscal year 1952.

Southeastern Power Administration.—This agency, recently created, is responsible for disposing of power generated at multiple-purpose projects of the Department of the Army being constructed or to be constructed in 10 States in the southeastern area of the United States, including power generated on the Cumberland River, which is marketed through the Tennessee Valley Authority. Supplemental funds for 1951 have been provided to initiate construction of transmission facilities to transmit power scheduled for generation at the Buggs Island project to the National Advisory Committee for Aeronautics facilities at Langley Field, Va. The recommended 1952 program provides for continuation of this work and for initiating construction of transmission facilities from the Clark Hill project to Greenwood, S. C., and for engineering surveys and preliminary plans for other facilities required for marketing power.

Tennessee Valley Authority.—The power program for 1952 has been greatly accelerated to furnish power, not only for the steady growth in the service area of the Valley but also for the large increase in the requirements of the Atomic Energy Commission's facilities. A new steam-electric generating plant and several additional generators at existing hydroelectric plants are among the features for which funds are provided.

Forest Service, forest roads and trails.—Increased amounts are provided for forest development roads and trails in order to make additional timber supplies available for defense activities.

National Park Service.—The 1952 recommendation for construction of parkways, roads, bridges, trails, and physical improvements in park areas will continue the program below the 1951 level. This level provides the minimum facilities required to serve the large number of visitors to national parks, monuments, and historic sites.

Bureau of Indian Affairs.—The 1952 program for construction of irrigation systems, schools, hospitals, roads, and bridges has been severely curtailed even though there are urgent needs for more adequate facilities.

Atomic Energy Commission, construction.—Construction activity will increase very sharply in both 1951 and 1952, almost entirely because of a further expansion of production facilities. Expenditures for research facilities, including developmental reactors, will continue at approximately the 1951 level. Housing and other community construction in the towns of Oak Ridge, Tenn., Hanford, Wash., and Los Alamos, N. Mex., will decrease appreciably.

TRANSPORTATION AND COMMUNICATION

Corps of Engineers, rivers and harbors.—The rivers and harbors program of the Corps of Engineers is Nation-wide and primarily involves dredging and rock removal in the major harbors and approach channels along the coasts, the Great Lakes, and the rivers of the Nation; the construction of locks and dams, including the installation of hydroelectric power facilities; and the maintenance and operation of completed works. The construction programs for fiscal years 1951 and 1952 have been reoriented in order to lessen the demand upon services and commodities needed for national defense and to concentrate mainly on the completion of power projects. Three new dams, involving important quantities of hydroelectric power, are recommended for construction to meet anticipated power requirements in the Pacific Northwest and Tennessee Valley areas. These are The Dalles and Ice Harbor Dams in the Columbia Basin and Old Hickory Dam in the Cumberland Basin. In addition, an appropriation of $20,000,000 is recommended for fiscal year 1952 under proposed legislation for initial work on the St. Lawrence project.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

The Panama Canal Company.—In the fiscal year 1952, the Panama Railroad Company will become the Panama Canal Company and will take over many of the assets of the Panama Canal. Construction for housing for employees of the Panama Canal and the Panama Railroad Company, for which $2.5 million was appropriated in the first supplemental in 1951, will continue in the year 1952 with corporate funds provided by the Panama Canal Company in the amount of $11.1 million.

Department of Commerce, Bureau of Public Roads.—The Federal-Aid Highway Act of 1950 provides for continuing the program of highway improvement carried on in cooperation with the States. The acts of 1944 and 1948 had authorized a total of $2.4 billion through fiscal year 1950, and the act of 1950 authorized $500 million annually for the fiscal years 1952 and 1953. In addition to these authorizations, approximately $100 million of the prewar authorization has been available for new work in the postwar period. In accordance with current policy on civil public works, new projects for 1952 will be restricted to those contributing to national defense or essential civilian requirements.

The forest highway program, involving direct Federal construction, is an integral part of the Federal-aid program, inasmuch as the forest highway routes are essential links in the Federal-aid and State highway systems. The new annual authorization is $20 million.

Department of the Interior, Alaska Road Commission.—The 1952 program for construction of roads in Alaska provides for surfacing of existing roads and construction of new mileage in the interests of both national defense and the development of the Territory.

Civil Aeronautics Administration.—The Federal Airport Act originally authorized $520 million to be appropriated over a 7-year period, concluding in 1953. Public Law 382, Eighty-first Congress, extended the program to 1958. Through 1951, $196.7 million in cash and contract authorizations has been made available for airport grants to State and local public sponsors and for administration. However, the contract authorization for 1951 of $36.7 million has been reduced to $21.2 million under the provisions of section 1214 of the General Appropriation Act, 1951. For 1952, $21 million is recommended. In both years, grants for new projects will be limited primarily to terminal-type airports of highest priority from the standpoint of traffic density or anticipated national defense needs.

The recommended program of $24.4 million for 1952 for the establishment of air-navigation facilities will provide $17 million for continued implementation of the transition program of the Radio Technical Commission for Aeronautics, designed to meet the requirements of civil and military aviation, and $8 million for modernization and improvement of existing airways facilities. Projects in the latter category are being undertaken only where necessary to preserve the existing investment or to meet urgent traffic-control requirements.

Alaska Railroad.—In 1952, the program of track, roadbed, and other rehabilitation and the emergency reconstruction of the Eielson Branch line will be completed.

United States Coast Guard.—Expenditures for capital investments in Coast Guard operating facilities are principally for the completion of projects authorized in prior years and for extension of the Loran system and for depot rebuilding and improvements. Expenditures in the latter category have been cut, but those projects connected with the defense program are being pushed to completion.

GENERAL GOVERNMENT

General Services Administration, public buildings service.—In accordance with Budget policy on civil public works, no general public buildings program is recommended. However, acquisition of sites and preparation of plans for such a program of building construction outside the District of Columbia are in process under an authorization of $40 million, of which $13 million is available from appropriations enacted for 1950 and 1951 fiscal years.

With the exception of continuing work on a few projects now under construction for other agencies and discussed elsewhere, the General Services Administration program is limited almost entirely to construction contemplated as part of the defense program. Pending legislation would authorize the construction of Federal buildings at various locations in the area adjacent to the National Capital, including the provision of highway and communications facilities to connect these buildings with the Capital and with one another. This legislation would also authorize the decentralization of functions which could operate without significant loss of efficiency at a location removed from the National Capital or the adjacent area. The purpose of this legislation is to reduce the concentration of important Government functions now located in the congested central area of the District of Columbia through their dispersal to the adjacent areas. This would not only relieve the existing congestion in the District of Columbia but also make provision for the continuity of important Government functions in the event of an emergency. If this legislation is enacted, a supplemental appropriation of $190 million will be submitted for 1951 to finance operations over a 15-month construction period.

OTHER FEDERAL ACTIVITIES IN CONSTRUCTION

In addition to the preceding categories of civil public works expenditures, there are several other categories of Federal activities, involving loans, loan guarantees, grants, or direct Federal expenditures, which also affect or involve construction. They are discussed under the following classifications, newly added to this analysis this year. The distinguishing feature of these expenditures is that they contribute principally to the physical assets of international public bodies, of semipublic and private groups, or of individuals, whereas public works are limited both in the Analysis of investment, operating, and other budget expenditures and the foregoing section of this analysis to additions to Federal, State, and local governmental physical assets.

INTERNATIONAL PUBLIC WORKS

Loan to United Nations.—Congress authorized in 1948 a loan of $65 million to the United Nations for the construction of permanent headquarters in New York City. The buildings under construction are substantially complete, and the estimated Federal expenditure of $4.9 million in 1952 is expected to be the final one.

Federal Reserve Bank of St. Louis

Inter-American Highway.—The Highway Act of 1950 authorized $4 million for each of the years 1951 and 1952 to continue the construction of this project which links the nations of the Western Hemisphere.

TABLE 5.—*Federal expenditures for international public works and for semipublic programs*

[Fiscal years. In millions]

Program	1950 actual	1951 estimate	1952 estimate
Loan to United Nations	$26.2	$22.4	$4.9
Inter-American Highway	1.7	3.1	4.7
Rural Electrification Administration, loans, gross	286.7	303.2	260.0
Grants for hospital construction [1]	47.3	112.0	95.2
National Heart and Cancer Institutes, aids for research construction [1 2]	3.2	4.4	5.5
Howard University, construction	.6	2.5	3.5
Aids to medical education, grants [2]			2.0
Loans to educational institutions		1.0	36.0
Total	365.7	448.6	411.8

[1] Includes semipublic construction only. Balance of construction amount is shown in public works table.
[2] Includes only that part of the appropriation account used for construction.

SEMIPUBLIC WORKS

One important group of programs which a strict interpretation of "public works" excludes from the previous classifications is that concerning Federal aid to semipublic bodies.

Rural Electrification Administration.—This agency conducts two types of lending programs: (*a*) To finance electrical generation, transmission, and distribution facilities in rural areas, a program initiated in 1935, and now approaching completion with 86 percent of farms in the country electrified; and (*b*) under new authority established in 1950, to furnish and improve rural telephone service. Both programs cause heavy drains on scarce materials needed in the defense mobilization, and in part, for this reason, the level of expenditures for 1952 has been cut back to $260 million, considerably below the 1951 rate.

Grants for hospital construction.—Figures in table 5 above reflect that part of this program which cannot be classified as public works. In this case, grants are made to States for construction of hospitals which are not publicly owned. Many of these are private nonprofit hospitals. These expenditures are approximately 70 percent of the total hospital grant program.

Howard University.—The construction program at Howard University is continued in the 1952 Budget only for buildings now under construction or buildings necessary to the medical program. Previously appropriated sums for all other buildings have been placed in a contingency reserve pending review of each project in the light of current defense requirements.

Aid to medical education.—Under proposed legislation, the Public Health Service would be authorized, as part of a program to stimulate the expansion of medical training resources, to make grants to medical schools for the construction of additional facilities.

Loans to educational institutions.—The Housing Act of 1950 authorized a new program of loans to colleges and other institutions of higher education for the construction of dormitories and family housing for faculty and students. The program is now restricted to furnishing housing directly contributing to defense, and is limited to $40 million out of an original $300 million authorization.

CONSTRUCTION AIDS TO PRIVATE BUSINESS AND INDIVIDUALS

Various Federal programs provide loans, loan guaranties, and occasionally grants and direct aids for construction to individual farmers, homeowners, and business. Because it is difficult or impossible to estimate accurately the volume of specific construction resulting from this activity, no tabulation is shown. This federally induced construction, however, is an important segment of the total construction aggregate.

Farm housing, farm ownership, and water facilities loans.—The Farmers' Home Administration of the Department of Agriculture makes three types of loans which involve construction. (*a*) Loans for farm houses and buildings, authorized by the Housing Act of 1949, provide for improving the farm homestead; expenditures of $28 million are estimated for 1951 and $23 million for 1952. (*b*) To complement the above type of loan, farm ownership and improvement loans authorized by earlier legislation are often made for construction of farm buildings; expenditures for the construction part of this loan program are estimated at $4.6 million in 1951 and $3.5 million in 1952. (*c*) A continuing minor program for improvement of water facilities on farms in semiarid areas involves construction expenditures of $3.8 million in 1951 and $4.7 million in 1952.

Agricultural flood control.—Flood-control activities of the Department of Agriculture are designed to reduce floods by controlling flow in upstream areas. A small part of this program calls for direct construction of control structures on farmers' lands. Expenditures are estimated to be $2.5 million in 1951 and in 1952.

Housing finance programs.—The Federal Housing, Veterans, and Farmers' Home Administrations operate programs for the insurance or guarantee of mortgages on private homes. About one-half of the residential construction taking place in the country in recent years has depended upon this financing aid. It is not, however, possible to attribute all this construction directly to Federal activity. The Federal National Mortgage Association by its purchase of mortgages from primary lenders provides a secondary market for mortgages and insures an adequacy of private financing funds. Activities of the Federal Savings and Loan Insurance Corporation and the home-loan banks also have an indirect effect on the availability of capital for housing construction.

Loans to business.—A sizable part of funds made available to business firms by the Reconstruction Finance Corporation is used for construction of new plants. The Defense Production Act also authorizes special loans for expansion of defense production facilities. It is anticipated that large commitments will be made in fiscal years 1951 and 1952 for construction.

Other programs.—Other programs having a substantial but less direct effect on construction are included among those discussed in Special Analysis E on Federal Credit Programs.

* Includes only that part of the authorization used for construction.

▫ Deduct.

[1] Budget authorizations consist of appropriations, reappropriations, contract authorizations, and authorizations to expend from public debt receipts. New obligational authority is obtained by deducting from total authorizations the portion of the appropriation which is to liquidate prior contract authorizations.

[2] Expenditures are from corporate income.

Special Analysis G

FEDERAL AID TO STATE AND LOCAL GOVERNMENTS

This special analysis brings together in a single listing all the estimates of new obligational authority and expenditures for programs of Federal aid to State and local governments which appear in various agency chapters in part II of this Budget. The total of Federal aid in the fiscal year 1952 is estimated at $3,177 million or 4 percent of all Federal Budget expenditures. The individual programs are identified in the detailed table which follows.

The largest part of these Federal-aid expenditures will take the form of grants-in-aid, estimated at $3,004 million in the fiscal year 1952, but in addition the total includes $138 million as the net expenditure for loans and repayable advances and $35 million of shared revenues. The grants, and also the loans and repayable advances, are a device of intergovernmental cooperation through which the Federal Government participates in programs of national interest administered by State and local governments. The shared revenues are payments of a portion of the proceeds from the sale of certain Federal Government property, products, and services, usually in connection with the management of public lands.

The annual volume of Federal-aid expenditures over a 6-year period and their relative budgetary importance for the Federal Government and for the State and local governments are shown in the following table:

Fiscal year	Federal expenditures for aid to State and local governments [1]	Federal-aid expenditures as percent of—	
		Total Federal expenditures	State-local revenues
1947	$1,692,287,175	4	12
1948	1,656,672,123	5	10
1949	1,802,703,363	5	10
1950	2,268,808,423	6	11
1951 estimated	2,771,167,966	6	[2] 12
1952 estimated	3,176,512,124	4	[3]

[1] Collections on loans have been deducted from gross loan disbursements in all cases in which such collections are deducted in computing Budget expenditures. These collections are estimated at $302,877,560 for the fiscal year 1952.
[2] Preliminary estimate.
[3] Not available.

New obligational authority.—The Budget recommendations for new obligational authority for the fiscal year 1952 would provide $3,526 million for aid to State and local governments, an increase of $214 million over the amount available for the current fiscal year. The total for 1952 includes $308 million for proposed new legislation and $3,218 million under existing legislation. Of the total, $2,676 million is appropriations, $600 million contract authorizations, and $250 million authority to spend from public-debt transactions. Not included in new obligational authority is $596 million of appropriations to liquidate contract authorizations.

Major programs.—Grants to State and local governments account for more than one-half of the Federal expenditures in such functions as social security, welfare, and health; labor; and education and general research. The largest grant program is for public assistance, estimated at $1,300 million in the fiscal year 1952. Other major grants under present law are for highway construction, hospital construction, unemployment compensation and employment-service administration, and civil defense. The major grant under proposed legislation is for maintenance and operation of primary and secondary schools. Another proposed grant and loan program, not separated out of a broader authorization for inclusion in this analysis, is for community facilities and services made necessary by the national defense program.

The largest loan programs under present law are for the construction of civil-defense facilities, site acquisition for later slum clearance and redevelopment, and low-rent housing.

Loans and repayable advances.—Budget expenditures for loans and repayable advances are net amounts, representing for any one year the gross amount of loans and advances less credits for certain collections during the year. In the fiscal year 1952, the Budget expenditures for this purpose are estimated at $138 million. This is the difference between gross disbursements of $441 million and collections of $303 million which will be credited against them. Other collections, estimated at $18 million, are a part of "miscellaneous receipts" and are not deducted from gross disbursements in computing Budget expenditures.

Factors affecting aid expenditures and allocations.—The amounts expended for most programs of Federal aid are subject to limitation in advance within maximum amounts established in the basic authorizing laws. However, in the case of the largest grant program, public assistance, the Federal expenditure is a reimbursement of a portion of the expenditures of the States on the basis of a statutory formula applied to case loads and individual benefit rates established by the several States.

Federal-aid laws contain provisions restricting the Federal expenditures to specified purposes. States or local governments which wish to qualify for grants are usually required to meet certain conditions and standards relating to such matters as the matching of Federal expenditures, approval of State plans, the designation of an administering agency, a merit system of personnel selection, reporting systems, and audits. In their details these conditions and standards vary considerably among programs. In the case of shared revenues, the Federal statutes usually specify that the money be used by the States or their subdivisions for roads and schools.

Most Federal grant-in-aid statutes provide for the allocation of money among the States according to formulas containing specified measures of need such as population, per capita income, the incidence of certain diseases, area, or road mileage. These formulas vary considerably from one program to another, depending on the nature of the activity or services for which the aid is given. A few grants are allotted to States as a percentage of State expenditures within specified statutory limits. Other grants are distributed as an equal amount to each State. Some allocation formulas are statutory while others are developed by the administering Federal agency on the basis of criteria listed in the laws.

Relationship to other Budget figures.—Although the entries in this special analysis are compiled from part II of the Budget, and the program titles in general follow the appropriation account titles listed there, certain adjustments in the amounts have been necessary to provide a proper estimate of aid to State and local governments. These are noted below, along with an explanation of some inclusions and exclusions.

Expenditures for grants or loans are made in some instances from an appropriation which also finances direct Federal operations or Federal administrative expenses. In such cases, expenditures other than the actual grant or loan are excluded wherever possible and the amounts tabulated here ordinarily represent only that part of the new obligational authority or expenditure available for payment as aid to State and local governments.

Federal Reserve Bank of St. Louis

The amounts shown for the Department of Agriculture program, "Donation of commodities," represent the cost of commodities distributed during the year, whereas the commodities may have been bought, in part, in connection with the agricultural price support activities of a different year. This is one of the few grant-in-kind programs included in the table; these programs are identified by footnotes.

Legislation governing a few grant-in-aid programs permits aid to private nonprofit agencies or institutions. The hospital construction program of the Federal Security Agency is an illustration. It is estimated that 70 percent of Federal expenditures for this purpose in the fiscal year 1952 will be used for nonpublic hospitals. The program, nevertheless, is one in which the States have a central role in the approval of individual projects and the channeling of the Federal payments. Therefore the entire amount authorized and spent for the program is shown in this table. Another program which involves some grants to nonpublic institutions is the school-lunch program of the Department of Agriculture.

On the other hand, certain Federal programs may incidentally involve grants to particular governmental agencies even though they are not primarily programs of grants-in-aid or loans to State or local governments. For example, the Public Health Service makes research grants to medical schools, including some State institutions. Such payments are not included in this tabulation, since the State and local governments do not have general administrative responsibility for the programs.

Other financial relationships.—Apart from grants-in-aid, loans, and shared revenues, many other Federal expenditures and policies affect the finances of State and local governments. Types of transactions not covered in the tabulation of aids include the following:

(*a*) Reimbursements for various specific services, such as payments to public educational institutions for tuition of veterans and of students from the armed forces, and payments to local governments for care of Federal prisoners in local institutions.

(*b*) Contractual payments to public institutions for research and training in specified fields.

(*c*) The value of war surplus educational and hospital supplies, materials, and equipment, and of housing donated or sold at substantial discount to State and local agencies.

(*d*) The payments of property taxes, or payments in lieu of property taxes, made upon Federal property under the provisions of nearly a score of laws. When such payments are based upon a percentage of revenues, however, as in the case of the Tennessee Valley Authority, they are included in the shared-revenue section of the table.

Also, the table does not reflect various indirect financial benefits accruing to State and local governments such as the lower interest rates which those governments enjoy because of exemption from Federal income tax of interest paid on State and local debt; the indirect Federal guaranty of municipal obligations issued for low-rent housing and slum clearance; deductions of State and local income, property, and other taxes from personal and corporate incomes in computing Federal income tax; services which may be rendered to other governmental units by Federal agencies in the ordinary course of their operations; and some programs administered cooperatively for the purposes of both the State and the Federal Governments, such as agricultural crop reporting or the National Guard.

Some of these financial benefits, of course, have counterparts in the form of services rendered or occasional payments made to the Federal Government by the States or their subdivisions.

Changes in the functional classification from 1951 to 1952 Budget—Continued

Classification used in 1951 Budget	Classification used in 1952 Budget and description of change
Natural resources not primarily agricultural: 401. Conservation and development of land and water resources not primarily agricultural	**Natural resources:** 401. Conservation and development of land and water resources (title shortened)
Finance, commerce, and industry: 503. Promotion or regulation of trade and industry	**Finance, commerce, and industry:** 503. Promotion or regulation of trade and industry 506. Promotion of defense production and economic stabilization
General government: 607. Interest on refunds of receipts	(Item reclassified to code 652)
Interest on the public debt: (An unnumbered item)	**Interest:** 651. Interest on the public debt 652. Interest on refunds of receipts 653. Interest on uninvested trust funds (consolidation of interest on various uninvested trust funds)

In addition to the changes outlined above, the following major changes in the classification of individual items have been made:

Appropriations for the health, education, and welfare of Indians have been reclassified from 204 (Work relief and direct relief) to 203 (Aid to special groups).

The appropriations for the Solicitor of Labor have been reclassified from 554 (Labor information, statistics, and general administration) to 553 (Labor standards and training).

Reconstruction Finance Corporation administrative expenses for the synthetic rubber, tin, and fiber programs and for other nonlending activities, have been reclassified from 610 (Other general government) to 055 (Activities supporting defense).

All these changes are carried back through all years in the table.
