BUDGET MESSAGE OF THE PRESIDENT

To the Congress of the United States:

I transmit herewith my recommendations for the Budget of the United States Government for the fiscal year ending June 30, 1952.

This is a Budget for our national security in a period of grave danger.

It calls for expenditures of 71.6 billion dollars in the fiscal year 1952—a total 78 percent above expenditures for the year which ended last June 30. That increase is one measure of the vast new responsibilities thrust upon the American people by the communist assaults upon freedom in Asia and the threats to freedom in other parts of the world.

BUDGET TOTALS

[Fiscal years. In billions]

	1950 actual	1951 estimated	1952 estimated
Receipts (excluding proposed new tax legislation)	$37.0	$44.5	$55.1
Expenditures	40.1	47.2	71.6
Deficit	−3.1	−2.7	−16.5

The new emphasis on military preparedness reflects the necessities of the world situation today. It reflects no shift of purpose. Our purpose remains to secure and strengthen peace. We are determined to seek peace by every honorable means—mindful of our responsibility to ourselves, to our friends and allies, and to humanity everywhere to spare the world the tragedy of another world war. We are likewise determined to spare ourselves and the world the even deeper tragedy of the surrender of justice and freedom.

Another system—powerful in resources, hostile in intent, and ruthless in method—is seeking the destruction of all the values we would preserve. That system is under the mastery of men unrestrained by considerations of responsibility to their people and guided by twisted dogma. They can be restrained only if defensive strength is arrayed against them. Our best hope now is to build our strength to the point necessary to bring them to caution, if not to wisdom. We are compelled to make the creation of strength a paramount aim.

In our drive to build up our defenses, we and the countries associated with us have a twofold goal—first, military forces strong enough to provide a powerful deterrent to those who may be contemplating new

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

aggression; second, readiness for immediate mobilization of all our power if that becomes necessary.

This Budget reflects our determination.

First, it incorporates our expenditures for military purposes—to build swiftly an active force of highly trained men, equipped with the most modern weapons, and supported by ready reserves of men, supplies, and equipment.

Second, it includes our expenditures to help other threatened nations rebuild their strength and to participate with them in a program of mutual aid and common defense.

Third, it embodies our Government programs for the expansion of productive capacity and the concentration of needed capacity on defense requirements—at the expense where necessary of normal civilian purposes.

Fourth, it contains expenditures for programs which will maintain and develop our national strength over the long run, keeping in mind that the present emergency may be of long duration and we must therefore be prepared for crises in the more distant as well as in the immediate future.

Fifth, it reflects reductions in other expenditures, in order to divert a maximum of resources to the overriding requirements of national security.

As a sixth budgetary measure, I shall shortly recommend an increase in tax revenues in the conviction that we must attain a balanced budget to provide a sound financial basis for what may be an extended period of very high defense expenditures.

CONTENTS OF THE BUDGET

The accompanying comparative table shows projected expenditures for the major programs or functions of the Government for the fiscal year 1952, revised estimates for the current year, and actual expenditures for the year which ended last June 30. Estimated appropriations and other new obligational authority for 1952 are also shown. Differences between obligational authority and expenditures are accounted for by the fact that obligational authority granted in one fiscal year may be spent in part in subsequent fiscal years.

The table covers expenditures from general and special funds of the Treasury, plus net expenditures of wholly owned Government corporations. The estimates include requirements under proposed as well as existing legislation. Expenditures from trust funds are excluded from this table, but operations of the major trust funds are discussed in subsequent sections of the Budget Message.

Total	40,156	47,210	71,594	94,429

[1] This column excludes 4,075 million dollars of recommended appropriations to liquidate prior year contract authorizations.

[2] Excess of receipts over expenditures.

The requirements of national security are reflected in every major function of the Budget. The entire Government is being redirected to meet the compelling demands of national security, and each functional category includes activities which support, directly or indirectly, the defense effort.

The two largest categories—military services and international security and foreign relations—are devoted in their entirety to the broad objectives of national security. The military services category includes the costs of the Armed Forces and certain additional programs closely related to the military, particularly the stockpiling of strategic and critical materials and the activities of the National Advisory Committee for Aeronautics. Under the international security and foreign relations heading are the costs of weapons provided to our North Atlantic Treaty allies and to other free nations, as well as expenditures for economic assistance and for the expanded international information program.

The military and international categories account for expenditures of 41.4 and 7.5 billion dollars, respectively, in the fiscal year 1952. Together they total 48.9 billions, or nearly 69 percent of the total Budget.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

This total is an increase of 90 percent over the 25.7 billion dollars estimated as expenditures for these purposes during the current year—accounted for almost wholly by the great expansion of the military procurement program.

Our military requirements are of several kinds. We must maintain and supply our forces fighting in Korea. We must provide modern equipment for the expansion of our Army, Navy, and Air Force to the present combined goal of nearly three and a half million men. We must provide equipment for training purposes and for the civilian components not on active duty. We must provide military items to our allies as an essential part of our own defense. We must build a production base and matériel reserves against the contingency of full-scale war.

These demands do not press evenly on all sectors of defense production. In some areas, large supplies of military items remain from the recent war and reduce the need for new large-scale production. Our reserve naval fleet, for example, is an asset which reduces sharply the need for mass construction of new warships. In some cases, the record-breaking military production of the war years has left us with reserves of productive capacity. In other cases present capacity is far from adequate. The economic mobilization program will therefore be selective in character—in some areas, an all-out drive, with extensive conversion of civilian capacity; in other areas, a comparatively small expansion of present production rates.

At the same time that we sharply increase our own military production, Canada and the Western European nations with whom we are allied under the North Atlantic Treaty will be making comparable efforts. Nations outside the North Atlantic organization, including our neighbors in Latin America, are also making important contributions to the common security. Our international programs recognize that this Nation's own security is directly related to the security and defensive strength of our allies and that equipment and materials supplied to help arm their forces or to support their military production are, in fact, additions to our own defensive strength.

Figures shown in this Budget for both the military and the international security programs may be subject to substantial adjustment as the defense program progresses. Detailed estimates of new obligational authority for these categories are not included in the Budget at this time, in order to permit more thorough programing of specific requirements. Actual expenditures will depend on how rapidly we are able to produce the military items for which funds are made available.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

A defense program of the size now being undertaken must be supported by a strong and expanding economic base. Five major categories of Federal programs contribute directly to this economic base. These are: (1) finance, commerce, and industry; (2) labor; (3) transportation and communication; (4) natural resources; and (5) agriculture and agricultural resources. Together these categories make up 7.4 billion dollars of expenditures in the fiscal year 1952, or 10 percent of the Budget.

This total compares to 5.7 billion dollars estimated as expenditures for these purposes in the current fiscal year. The increase reflects primarily our programs to expand private production facilities through Federal action, to administer economic controls, and to add capacity for atomic energy activities.

Four other categories of Budget expenditures include programs which contribute to national strength through protecting and improving the health, education, and well-being of the individuals and families who make up the Nation. These classifications are: (1) housing and community development; (2) education and general research; (3) social security, welfare, and health; and (4) veterans' services and benefits.

These four categories account for a total of 7.9 billion dollars, or 11 percent of Budget expenditures in the fiscal year 1952. This represents a reduction of nearly a billion dollars from the current year's anticipated expenditures. If it were not for the major new programs of civil defense and defense housing, community facilities, and services, the total reduction would be even greater.

The general operations of Government—including the legislative and judicial branches and such general activities of the executive branch as tax collection, civil-service retirement payments, and central supply, records, and buildings services—amount to 1.4 billion dollars, or 2 percent of the 1952 Budget. Apart from the expected costs of dispersal of Government agencies, this group of expenditures is also scheduled to decline from the 1951 level.

Interest payments will amount to an estimated 5.9 billion dollars in the fiscal year 1952, or 8 percent of the total Budget.

In order that our resources can be diverted to meet the demands of national security, strict economy in nondefense spending is required. Such a policy is incorporated in this Budget. For example, the only major new public works projects included in the Budget are those directly necessary to the defense effort. Construction on many public works projects now under way has been substantially curtailed. Many other activities are being contracted. Expenditures for the

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

maintenance of Government property have been held to a minimum consistent with protection of Government investments. Cost increases, such as the rise that has already taken place in the prices of what the Government buys, are in many instances being absorbed by the agencies through compensating economies. Increases have been allowed where increasing workloads must be met or where further accumulation of backlogs of work cannot be tolerated, but only to the extent that the work cannot be taken care of through increased efficiency or reductions in service standards.

MANAGEMENT OF THE GOVERNMENT'S PROGRAM

Direction of the Nation's security program in this critical period will require the highest degree of administrative effectiveness in the Federal Government. Concerted efforts are being made to strengthen the organization and management of the executive branch for the extraordinarily difficult tasks that lie ahead. During the coming period, we must be able to make quickly such changes in the assignment of governmental functions as are needed to carry out national security programs. Under the Defense Production Act, I have by Executive order created the Office of Defense Mobilization, the Defense Production Administration, the Economic Stabilization Agency, and other emergency agencies with extensive delegation of authority. However, authority under that act covers only a part of the range of defense functions. During World Wars I and II the President was given emergency reorganization powers. These powers were extensively used to keep Government organization continuously in line with mobilization needs. Such authority for temporary changes is needed in the current emergency and should be one of the early measures considered by the Congress.

In addition to concentrating on the organization and management of the defense program, I shall continue to emphasize throughout the Government the management improvement program, instituted in 1949 to achieve greater efficiency in all Federal activities.

The last Congress took many important legislative actions aimed at improving governmental administration. Other actions are, however, still required. Some of these measures I shall incorporate in reorganization plans to be submitted to the Congress under the Reorganization Act of 1949. Others require legislation, including such important matters as improvements in the civil-service system and in the administration of the postal service.

The actions in the field of organization and management which we have taken in the past years have increased the ability of the Govern-

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

ment to deal with a major defense effort. We must continue to make progress in this field.

PAYING THE COSTS OF DEFENSE

When the American people resolved to undertake the defense program now under way, they accepted also the necessity for the increases in their taxes that the new level of expenditures requires. National security in the present world can be attained only with direct and heavy cost to each one of us.

High taxes are indispensable to our successful mobilization. They are required to preserve confidence in the integrity of the Government's finances, to distribute the heavy financial costs of defense fairly among all the people, to reduce excessive demand for raw materials and industrial products required for national defense, and to choke off inflationary pressures. We cannot as a Nation buy a defense establishment of the size that is now being constructed and still as individuals expect to spend our money to the same degree as before for normal peacetime purposes. Unless positive action is taken on the tax front, our defense effort will be in continuous jeopardy.

The tax legislation passed last year substantially increased our revenues. The Revenue Act of 1950, approved within 3 months after the invasion of the Republic of Korea, increased income taxes on individuals and corporations and closed some loopholes in the income tax laws. The corporation excess profits tax, passed in the final week of the Eighty-first Congress, also increased our revenues while at the same time placing the higher levies upon those businesses which can best afford to pay increased taxes.

In spite of these new tax measures, a deficit of 16.5 billion dollars is estimated for the fiscal year 1952 if no further tax legislation is enacted. At this time, sound public finance and fiscal policy require that we balance the Budget. I shall shortly transmit to the Congress recommendations for new revenue legislation.

Even a balanced budget will not of itself serve to keep our economy stable during a period of rapidly rising defense expenditures. The full amount of inflationary pressure is not measured by the budget deficit alone, since this reflects only payments actually made. The Department of Defense alone will have been granted for the fiscal years 1951 and 1952 an estimated 112 billion dollars of obligational authority for its military functions, and additional amounts will have been made available for foreign military-aid programs. Bidding for manpower and materials, which pushes prices upward, begins as soon as procurement contracts to be paid from these authorizations are signed, even

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

though expenditures may not take place for a year or more. Other positive stabilization measures, including allocations, and credit, price and wage controls, are essential to offset the inflationary pressures which are not reflected in the single figure of the budget deficit.

The following table provides a breakdown of anticipated budget receipts during the fiscal year 1952, based on existing legislation, compared with actual receipts during the fiscal year 1950 and revised estimated receipts for the current year.

BUDGET RECEIPTS

[Fiscal years. In millions]

Source	1950 actual	1951 estimated	1952 estimated
Direct taxes on individuals:			
Individual income taxes	$17,409	$21,599	$26,025
Estate and gift taxes	706	710	755
Direct taxes on corporations:			
Income and excess profits taxes	10,854	13,560	20,000
Excises	7,597	8,240	8,222
Customs	423	600	620
Employment taxes:			
Federal Insurance Contributions Act	2,106	2,960	3,823
Federal Unemployment Tax Act	226	239	263
Railroad Retirement Tax Act	551	565	613
Railroad Unemployment Insurance Act	9	10	10
Miscellaneous receipts	1,430	1,325	1,333
Deduct:			
Appropriation to social security trust fund	−2,106	−2,960	−3,823
Refunds of receipts	−2,160	−2,336	−2,703
Budget receipts	37,045	44,512	55,138

NOTE.—Includes only receipts under existing legislation.

Under existing legislation, including the recently enacted tax measures, budget receipts for the fiscal year 1952 are estimated at 55.1 billion dollars. This is 10.6 billion dollars higher than the estimate for the current year. Receipts from direct taxes on corporations show the greatest increase, 6.4 billion dollars over corresponding receipts for the current fiscal year. The combined effects of the Revenue Act of 1950, the Excess Profits Tax Act, and peak levels of corporate profits are reflected in this estimate. Direct taxes on individuals increase 4.4 billion dollars as a result of the high levels of income anticipated and a full year of operation under the Revenue Act of 1950. Although the collections from certain excise taxes will decline as production of some manufactured goods is affected by shortages of materials, receipts from other excises and all other major sources will increase.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

BORROWING AND PUBLIC DEBT

At the beginning of the current fiscal year the public debt stood at 257.4 billion dollars. The debt will rise to approximately 260 billion dollars by June 30, 1951, as a reflection of the financing of the budget deficit for the current fiscal year. The amount of the increase in debt beyond June 30, 1951, depends upon the extent to which the projected deficit for the fiscal year 1952 is reduced through the enactment of additional tax legislation.

PROGRAMS

The following sections outline in more detail the character and extent of the programs which are to be financed from this Budget. Further detailed descriptions of the programs of the Government, as well as certain special analyses covering public works, grants to State and local governments, investment and operating expenditures, and Federal credit programs, are included elsewhere in the Budget.

MILITARY SERVICES

The free nations of the world will continue to seek settlement of international disagreements peaceably and honorably within the framework of the United Nations—but they will rebuild their defenses rapidly. The communist attacks in Korea have served notice upon us all that the Soviet rulers are willing to risk the peace of the world to carry out their ambitions.

In response to the grave common peril, the free world is now moving forward, with increasing speed, determination, and unity, to build powerful defenses. This mutual effort is required both to deter further communist aggression and to insure that we shall emerge victorious if war is thrust upon us.

This Nation, as the strongest member of the free world, must provide the leadership in this great undertaking by developing its own military forces and, at the same time, assisting the other free nations on a large scale, in order to quickly achieve adequate mutual defenses.

The recommended program for building our own military strength is discussed in this section. The program for assisting other free nations in developing their strength is discussed under international security and foreign relations.

Department of Defense.—One year ago, I proposed a military program for the fiscal year 1951 based on active forces totaling about 1.5 million men and women, in a state of relative readiness, and backed by a

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

moderate rate of military production and a substantial level of research and development.

The communist attacks in Korea and the imminent possibility of further attacks elsewhere have already caused us to quadruple the budget for the Department of Defense. To the initial enactment of 13.3 billion dollars in new obligational authority for the fiscal year 1951, including nearly a billion dollars of prior year authorizations made available, the Congress has in the past 6 months added 28.7 billion dollars. In this Budget I am tentatively including an additional 10 billion dollars of obligational authority. This will make a total of 52 billion dollars for the fiscal year 1951.

Because of the extensive planning involved, I am not submitting detailed 1952 estimates for the Department of Defense at this time. The Budget includes, however, an over-all estimate of 60 billion dollars, which is expected to be the approximate total of new obligational authority requested this spring for the fiscal year 1952.

The expenditure estimates for the military functions of the Department of Defense are also tentative. At the present time expenditures of 20 billion dollars are estimated for the fiscal year 1951 and 40 billion dollars for 1952.

MILITARY SERVICES

[Fiscal years. In millions]

Total	12,303	20,994	41,421	60,971

[1] This column excludes 2,702 million dollars of recommended appropriations to liquidate prior year contract authority.

The increased funds for fiscal years 1951 and 1952 will serve four major interrelated purposes. First, they will support the current increase in the strength of our active forces; second, they will finance the military production program designed to produce rapidly the

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

modern equipment needed to supply our forces; third, they will provide reserves of equipment for still larger United States forces should these become necessary; and, fourth, they will help us to develop the production capacity of the country to the point where we could move rapidly to full mobilization should the need arise.

Six months ago our active military forces numbered less than one and a half million men and women. They have already been increased by about a million and this Budget includes funds to reach and maintain our present goal of nearly a million more.

We also have now available for rapid mobilization more than two million men and women in the National Guard and the Reserves of the Army, Navy, and Air Force. The Budget provides funds to increase the strength and degree of readiness of these Reserve organizations.

While the exact size and disposition of our active forces by units and geographic location must be kept secret in times like the present, in general we are increasing rapidly the number of active units. In the Army, we have called to active duty several National Guard divisions and reactivated certain regular divisions. We shall soon have a force more than twice as strong as our pre-Korea Army. In the Navy, by continuing to reactivate ships from the "moth-ball" fleet, we shall soon raise the active fleet to a strength more than 50 percent above that of a year ago. This Budget provides for maintaining two full Marine divisions plus additional separate units. In the Air Force, we are expanding the structure from 48 to 84 air wings; these will be rapidly brought up to full strength in trained men, and additional wings will be added.

The expansion of the active forces is reflected in the Budget not only in larger total amounts for pay and allowances, but also in increased funds for housing, training, and maintaining such forces.

We are now establishing training centers, bases, and camps for the enlarged forces. Furthermore, in order to prepare for the possibility of further mobilization, we shall be opening facilities with sufficient capacity to handle larger active forces than our immediate goals require. This Budget will provide, therefore, for a considerable increase in military public works expenditures—primarily to expand and improve troop training centers and air bases.

By far the largest part of the funds requested for the military services will be used to procure modern equipment. We have large stocks of some types of equipment, such as rifles and naval ships, which need only to be taken from storage and, in some cases, mod-

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

ernized. But in many other types, such as planes, tanks, electronic equipment, recoilless weapons, and rockets, we need to put into rapid production new models incorporating basic improvements that have been made since the end of World War II. This means a major production effort in order to obtain the best and most modern equipment for our enlarged active forces and for large reserve stocks.

This effort will require prompt and accurate planning and scheduling of military procurement and production in order to anticipate and forestall potential bottlenecks in materials, manpower, or facilities. For example, schedules must be laid out for producing the many complicated components of modern military airplanes, such as jet engines and electronic fire-control equipment, so that the components can be brought together as smoothly and efficiently as possible into finished aircraft. Some delays and frictions will inevitably occur in a production program as large and urgent as that upon which we are now embarked. But the experience and teamwork of military and civilian officials, of private businessmen and workers, will produce results very rapidly.

At the same time that the output of military equipment is stepped up, a base is being developed for moving to full-scale mobilization if the need should arise. For this reason, military orders are being spread among suppliers, instead of being concentrated in a few large firms. Production lines will be set up and manufacturers will be made familiar with our production needs over and above the immediate necessities of our present procurement plans. In this way, military production can be increased still further on short notice if that becomes necessary.

For example, we expect to develop an aircraft industry that will be capable of turning out 50,000 planes in a year, even though we will not be actually procuring that many. These planes, on the average, will be approximately 50 percent heavier than those used in World War II. Similarly, we shall organize to produce 35,000 tanks in a year, although we are not ordering that many now. This means, of course, planning for the readiness of basic materials, manpower, and components, as well as final assembly lines.

The process of putting military equipment into production will not stop or retard our research and development work. On the contrary, we shall increase our efforts to maintain superiority in all kinds of weapons and equipment. Expenditures for the military research and development program will amount to nearly a billion dollars in the current fiscal year. The developmental work and the production program will be planned so that our troops will be supplied with the best weapons in the world.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

Stockpiling.—If full mobilization becomes necessary, larger quantities of scarce materials such as copper, chromium, cobalt, and nickel will be required immediately. Many of these scarce materials are not produced in the United States, and others cannot be produced at a rate sufficient to meet all-out military needs. We are consequently acquiring and storing large reserve stocks of these materials.

This program will be expanded and developed in accordance with our total defense needs. The controls which have been established over the use of certain of these materials will assist us in meeting our stockpile requirements. We are also participating in the development of international controls. In addition, vigorous steps are being taken, by ourselves and our allies, to expand the production of strategic and critical materials both at home and abroad.

A total of 2.9 billion dollars of new obligational authority has been made available for the stockpile program during the current fiscal year and I am requesting an additional 820 million dollars of obligational authority for fiscal year 1952. Expenditures for fiscal year 1951 are estimated at 900 million dollars and for fiscal year 1952 at 1.3 billion dollars. These estimates must be considered tentative since the stockpiling program is constantly changing in response to new developments in both requirements and supply.

Selective service.—To provide the personnel needed for the expansion and maintenance of our military strength it will be necessary to rely heavily upon continued inductions through the Selective Service System. I shall therefore shortly request the Congress to enact the necessary legislation.

National Advisory Committee for Aeronautics.—The basic and applied research of the National Advisory Committee for Aeronautics is an essential part of our total military research program for maintaining and increasing our lead in the design of military aircraft. The spending authority recommended for this agency will provide for substantial expansion during fiscal year 1952.

INTERNATIONAL SECURITY AND FOREIGN RELATIONS

The combined strength of the free world, in people, in industrial capacity, and in natural resources, greatly exceeds that of the Soviet Union and its satellites. This great strength must be mobilized and organized. Most of all, it must be united in purpose. The Soviet rulers are doing their best to split apart the free nations. If the free world let that happen, we would be handing the Soviet Union a victory without a struggle.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

The Soviet rulers since the last war have been devoting a very large percentage of their resources to building military forces greatly in excess of any justifiable defense requirements. If these forces should be unleashed and succeed in conquering Western Europe, the Soviet rulers would more than double the industrial power now in their hands. If the communist forces should seize other major areas of the world, the Soviet rulers would control vastly increased reservoirs of manpower and raw materials. In either case they would win new strategic bases for further aggression. The key to United States security is to join in building the free world's defenses.

In the joint effort, the citizens of other free countries, like our own citizens, will be making personal sacrifices. Each free nation must make the largest contribution it can to the mutual defense. This Nation has greater industrial strength than the rest of the free world combined, and must therefore provide assistance on a large scale to other nations working with us in the joint defense drive. This assistance will permit the other free nations to accelerate the efforts they are already making with their own resources and their own energies.

INTERNATIONAL SECURITY AND FOREIGN RELATIONS

Total	4,803	4,726	7,461	[2] 10,956

[1] This column excludes 47 million dollars of recommended appropriations to liquidate prior year contract authority.

[2] Includes 1 billion dollars in new lending authority for the Export-Import Bank.

I estimate that expenditures of 7.5 billion dollars will be required for all of our international programs in the fiscal year 1952. This total will be 2.7 billion dollars more than the expenditure for international programs in each of the fiscal years 1951 and 1950. In 1952, the great preponderance of total expenditures for military and economic aid will go directly for the rapid build-up of mutual defense forces. More than one-half of total expenditures will be for procurement of military equipment to be shipped from this country to our allies. I shall

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

request appropriations of 9.7 billion dollars for these mutual security programs, in addition to an increase of 1 billion dollars now requested in the lending ceiling of the Export-Import Bank. Actual expenditures by the Bank in the fiscal year 1952 will, of course, be only a fraction of the increase in lending authority.

The complete request for appropriations will be presented to the Congress as soon as remaining details of the program are worked out.

In general, our assistance programs will continue to take two forms—provision of military equipment and provision of economic assistance. But the balance between these two forms of aid will shift very sharply, and will differ according to the strategic, political, and economic situation in each free world area requiring assistance.

Military and economic assistance to Europe.—The heart of our foreign policy in Europe is the North Atlantic Treaty, which was ratified by the Senate on July 21, 1949. Like all international undertakings which endure, this treaty is founded upon mutual interest. Americans know that the survival of this Nation would be gravely imperiled if the free peoples and industrial power of Western Europe were to fall under communist subjugation. Correspondingly, the majority of Europeans are fully aware of the interdependence of their security and ours. Over the coming months, the nations of Western Europe will be calling up increasing numbers of their young men for military service. They will be diverting their resources to production of military weapons. They will be imposing additional controls on their civilian economies, particularly on civilian consumption. They will be joining with us, through the joint staff organizations which already exist, in standardizing equipment and training and in strategic and tactical planning. They are placing major elements of their forces under the unified command of the Supreme Headquarters of the Allied Powers in Europe.

The North Atlantic Treaty Organization is now a going concern. It is backed by an impressive reservoir of skilled people and industrial power. It includes not only the military potential of this country and Canada, but also the combined strength of the nine European members of the North Atlantic Treaty—Great Britain, France, Italy, Belgium, Holland, Luxembourg, Norway, Denmark, and Portugal. These nine nations alone number altogether 175 million people, or almost as many as the Soviet Union. Iceland is also a full participant. Greece and Turkey, which within the past few years have proved their steadfastness under the threat of aggression, are closely associated with the mutual effort.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

The power of all these nations, pursuing a common course under the United Nations, is being directed to the creation of highly trained and well equipped forces-in-being, and a much larger mobilization base. The combined European and American forces will serve as a powerful deterrent to communist aggression in Europe. There is genuine hope, moreover, that arrangements can soon be completed for German participation in the common defense.

In order to reach the required level of combined strength in the shortest possible time, it will be necessary for the United States to give our European partners considerable assistance. The bulk of this assistance will be in the form of military equipment and supplies. We and our allies are determined that the mutual defense forces shall be equipped with modern and effective weapons. Although the European countries are undertaking to convert a substantial portion of their industries to arms production, they cannot by themselves produce rapidly enough all the complex and expensive weapons needed to arm their forces. Our tremendously productive economy must turn out many of the weapons needed to arm the European forces.

To achieve the rapid increase in European defenses that is necessary, our program of economic aid to Europe must, with a few exceptions—notably the aid program in Austria—be directed to support of the European military build-up, rather than to promoting further general economic expansion. The progress made to date under the recovery program is standing us and the entire free world in good stead in the present situation. In most European countries industry is now producing at well above prewar peaks, and this enlarged industrial strength can in substantial part be converted to military production. Moreover, the improved lot of the ordinary citizen, made possible in part by the European recovery program, has resulted in a higher degree of political cohesion and a firmer resolve to defend democracy and free institutions against aggression.

Western Europe's requirements for economic aid to support her program for building defensive forces arise directly from the disparity between her requirements for essential imports from the dollar area and her ability to earn dollars. In order to move ahead rapidly with defense plans, European countries will require materials and equipment of certain types which they can obtain only from the United States. These supplies include items essential directly in their armament factories, materials for essential consumer goods, foodstuffs, and materials for their most vital export industries. But because these countries will be diverting to rearmament a large proportion of the resources which would otherwise be engaged in pro-

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

ducing for export, they cannot for the time being obtain, without help from us, all the dollars needed to pay for these essential dollar imports.

Much remains to be done in the mutual effort to achieve rapid strengthening of European defenses. In general, the commitments made by the European countries to the North Atlantic Treaty Organization have not been large enough up to this time. But these countries share the deep new sense of urgency which recent events have given us, and these difficulties will be rapidly overcome. It must be clearly understood that the military and economic aid which I am recommending to assist European nations to rearm will be conditioned upon their carrying out their full responsibilities for building the defensive strength of the North Atlantic Treaty community. The entire free world is in grave peril. This peril can only be surmounted by arduous joint efforts, in which each nation carries out to the full its allotted responsibilities.

Assistance to other areas of the free world.—The heightened communist pressures in Asia, the Near East, and other non-European areas require that we accelerate our existing programs of military assistance, which now provide military equipment to certain countries which can use it effectively and are faced by internal and external communist pressures. However, in comparison with our assistance to Europe, which will be predominantly in the form of military equipment, our total program of assistance to the non-European areas of the free world must place proportionately more emphasis upon building security through helping the people and governments of these areas to solve pressing economic problems.

To varying degrees, in different parts of the non-European free world, the crucial problem in resistance to communism is the attitudes and aspirations of the people. In some of these areas, millions of people live in desperate conditions of poverty, insecurity, ill health, and illiteracy. To them communism may appear as a possible escape from unendurable conditions of life. These people must be given real faith in their future within the free world through concrete evidence that their age-old problems have been recognized and that effective steps are being taken to solve them.

In many of these countries the governments are increasingly aware of the real problem presented by the low living standards of their people and are taking such steps as they can to deal with this problem. But many of these governments do not yet have adequate numbers of trained administrators and technical and professional personnel, and lack the capital funds necessary to carry out critical develop-

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

mental projects. The United States cannot close the gap between reality and aspirations with generalized economic aid, especially in the present period of extreme pressure on our economy. What we can do is to work with these people and their governments to help them solve their problems. By making available to them knowledge and skills to supplement their own, together with modest amounts of loan capital and assistance grants, we can help these governments to bring tangible benefits to their people, and achieve an increase in the unity and resource strength of the free world.

In certain other non-European areas many of the countries have more experienced governments and a better start toward economic development. In these instances, economic and technical assistance can make an important contribution by breaking economic bottlenecks. Often the necessary projects in these areas are suitable for financing through loans.

We do not propose to assist countries where the governments are not sincerely trying to improve the economic conditions of their people. Our economic and technical assistance will be granted only where it is asked for by national governments which adopt in good faith the policies necessary to make the aid effective, and to make full use of their own resources.

Our total program of economic assistance to non-European areas of the free world will make a major contribution to increasing productivity in agricultural, industrial, and extractive industries. Part of the increased output must go directly to improving living standards and public services. Another part, including raw materials and particularly strategic materials needed for the mutual defense of the free world, can be traded with the more industrialized nations for capital goods needed for further economic development.

In Asia, we are now supplying military equipment to certain nations faced by communist threats against their independence. We are also providing economic assistance to help meet urgent problems in various parts of Southeast Asia, including Indonesia, Indo-China, Burma, Thailand, and Formosa, and a developmental program in the Philippines is being inaugurated. Both military and economic aid may have to be extended to additional Asian countries, and certain present programs will have to be accelerated. In addition, we are continuing our economic assistance to Japan, which is progressing steadily toward self-support.

In the crucial Near East, we are providing military assistance, loan capital, and technical assistance. We are continuing our support of the United Nations effort to reintegrate the refugees from Palestine.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

Our assistance to the Near East nations is essential to build up their strength against communist pressures.

In Africa, developmental and technical assistance programs are being carried out in the overseas territories of the Western European countries, in large part through the use of European recovery program counterpart funds. These programs, by improving living standards, will help to curb the growth of communist pressures and will bring about expanded output of vitally needed strategic materials.

In the Western Hemisphere we are joined with our Latin-American neighbors in a mutual effort to strengthen our combined defenses and to build increased economic strength. The balanced economic development of Latin America has been, and continues to be, an essential objective of American foreign policy. This policy is being supported by the public lending agencies which are providing capital for essential projects for which private financing is not available. The activities of the Institute of Inter-American Affairs in the field of technical cooperation are a demonstration of the practical value of the Point IV concept. It is essential that our lending and technical assistance activities be continued, with a special concentration of effort on projects to develop further the economic base of the Latin-American countries and to facilitate and expand the production of strategic materials vital to the free world in this emergency period.

In many of these areas, extremely important contributions to the total effort are being made by American private capital and nonprofit institutions.

The technical assistance program, administered in part by United Nations agencies, is gaining momentum in many areas, and through small expenditures is making an important contribution to productivity.

A steady outflow of loan capital for critical projects is being maintained by the International Bank for Reconstruction and Development and the Export-Import Bank. The increased need for undertakings to expand output of defense materials adds to the importance of the functions of the Export-Import Bank at this time. The Bank now has only about 500 million dollars of uncommitted lending authority. I recommend that the lending authority of the Bank be increased at this time by 1 billion dollars.

Our total program of assistance to non-European areas of the free world is making a major contribution to the ability of these areas to withstand internal and external communist pressures. The recommendations to be sent to the Congress will in part represent a continuation of these going programs, modified to take account of physical limitations of supply in this country, the increased dollar earnings of some of the areas, and the general sharpening of communist pressures.

Conduct of foreign affairs.—Effective conduct of our foreign relations takes on increasing importance in the critical world situation. The role of the diplomatic forces of the Government is of highest importance in organizing and making effective the mutual defense program. The need for a continuous flow of political and economic intelligence and the heightened tempo of activity in all aspects of international relations places a heavy burden upon the existing facilities of the Government.

This Government in cooperation with others is now organizing international machinery for dealing with world shortages of materials. In order to insure that scarce materials are used in the manner which will best serve the common defense, application of controls over international movements of certain commodities will be required. A substantial proportion of world trade will continue, however, through normal markets. In order to carry forward our long run policy of developing among the free nations workable trade patterns and a greater volume of world trade, I urge the Congress to extend the Reciprocal Trade Agreements Act.

Through the international information and education program, we are carrying to the rest of the world the truth about our own objectives, and exposing the evil objectives of the communist conspiracy. During the fiscal year 1951, I requested, and Congress approved, a considerable expansion in this activity, including construction of additional overseas radio broadcast facilities in the United States and abroad. I intend to request from the Congress an additional appropriation of 100 million dollars for this purpose during the current fiscal year. The expanded program will result in expenditures of 57 million dollars in fiscal year 1951 and 166 million dollars in fiscal year 1952.

In order that our political, economic, and military efforts may have their maximum effect, our purposes and objectives must be made clear to all. We must promote understanding and unity among the free peoples of the world and instill hope in the hearts and minds of those who have already fallen victim to aggression. Truth is on the side of the free nations of the world. We must make full use of this advantage.

FINANCE, COMMERCE, AND INDUSTRY

In the modern world, more than ever, military strength depends on economic strength. Since World War II, the Government's programs have been directed toward achieving a strong and growing economy. The strength of our economy is now one of our greatest assets in

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

deterring communist imperialism and in enabling us to meet military emergencies.

In the last 6 months, we have moved rapidly both to meet immediate defense requirements and to expand our capacity to produce airplanes, tanks, and other defense necessities. This has meant action by private initiative and by Government along a broad economic front. We are reopening all our reserve synthetic rubber plants. A substantial increase in steel and aluminum capacity is already well under way, and we will soon take measures to increase production of other key materials. Freight car production is being sharply increased. Expansion of both private and public power capacity is being accelerated. Mineral resources are being explored and developed both at home and abroad.

Federal Reserve Bank of St. Louis

The broad authority provided under the Defense Production Act has been a major factor both in increasing the output of defense equipment and materials and in guarding against inflation and disruption of our economy. While expenditures under this authority help to finance defense-supporting programs in other functional categories, they are all shown under the finance, commerce, and industry category of the Budget. They comprise over 90 percent of the 1.5 billion dollars in expenditures estimated for this category in the fiscal year 1952.

Major provisions of the Defense Production Act expire next June 30. It is already clear that they should be not only extended but broadened in several important respects. After the Director of Defense Mobilization completes his review of the legislation that is needed, I shall transmit specific recommendations to the Congress.

Expansion of production.—The most immediate and direct stimulants to defense production are the procurement contracts of the armed services. The Department of Defense is spreading contracts among as many contractors as practicable in order to develop the broad industrial base necessary for rapid mobilization. Where necessary, financial assistance is provided through advance payments and through Federal guarantees of private loans to defense contractors and subcontractors. In addition, the Department of Defense is constructing additional plants and facilities to produce military items not ordinarily produced by private firms for the civilian market.

Rapid expansion in output of defense equipment and supplies also depends on an adequate supply of raw materials and components. To encourage private businessmen to expand capacity in these areas, the tax laws now permit the portion of new investment attributable to defense requirements to be written off in 5 years for income tax purposes. Where the need is greater than private lenders can finance or the risk more than they can properly take, the Government is making direct loans or participating with private lenders. In other cases, the Government is entering into long-term procurement contracts, or is purchasing and installing Government-owned equipment in defense plants. Even with these liberal incentives, however, private enterprise cannot be expected to construct certain urgently needed, specialized productive facilities. For this reason, new legislation should include additional authority to construct Government-owned plants and facilities.

Production and distribution controls.—In order to build our defenses rapidly and efficiently, we must resort to direct governmental allocation to assure the proper use of our industrial facilities and materials.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

This means reimposing many of the production and distribution controls which were so successfully employed in the recent war years. Already steps have been taken to prevent excessive inventories, to cut back the amounts of critical materials going into nondefense uses, and to limit the production of certain nondefense goods using critical materials.

These controls must be augmented to keep pace with our rising production program. When the full impact of defense procurement is felt this spring and in the fiscal year 1952, even more comprehensive controls over the use of materials will become essential.

Price and wage controls.—While expansion in productive capacity will eventually mean a larger total output, its immediate effect is to add to inflationary pressures by absorbing manpower and materials which otherwise could be used to produce consumer goods. Vigorous use of credit controls and increased taxes, together with voluntary restraint by business and labor, have made it possible until recently to avoid direct controls over prices or wages.

At the present time, we are beginning to impose price and wage controls. Extension of such controls now appears inescapable. To administer such controls, as well as to promote effective voluntary cooperation, price and wage specialists are being recruited and offices are being opened in various cities as rapidly as they can be manned.

Rent control.—The developments in our defense program clearly require a further extension of rent control. Excessive rent increases will inevitably occur in many decontrolled communities where military installations are reopened or defense production expanded. The Congress has already recognized the changed situation by providing a temporary extension of controls beyond December 31, 1950, for all cases where communities have not taken affirmative decontrol action. I am recommending a further extension of rent control authority with provision for recontrol where necessary to protect tenants in defense areas against exorbitant rent increases.

Export controls.—Continuation of export controls is necessary to prevent undue drain from our economy of materials necessary for defense and essential civilian consumption and to make sure that the supplies made available for export make the maximum contribution to our international security objectives. These controls also help to prevent inflationary price increases. I recommend that export control authority be extended beyond the present expiration date of June 30, 1951.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

Business loans and guarantees.—As part of the realinement of credit programs last summer, the Reconstruction Finance Corporation sharply curtailed nondefense loans involving substantial amounts of materials and other resources important for defense requirements. Within these limits, loans to small business production have been emphasized.

Under this policy, new loan authorizations this year have been reduced to less than half the level for the same period last year. Net expenditures for the fiscal year 1952 are estimated to decline by 76 million dollars from the fiscal year 1950. Estimated net expenditures for the fiscal year 1951 are even lower, but this reflects repayment last September of the 92-million-dollar Kaiser Steel Company loan.

The Corporation will continue to make loans for defense purposes, wherever borrowers are unable to obtain adequate credit elsewhere on reasonable terms but can meet the usual credit standards under the Corporation's statutory authority. Only if borrowers cannot qualify for loans under these standards are they eligible for loans from Defense Production Act funds.

LABOR

A sustained defense program calls for a highly productive and mobile working force—well-trained, with skills fully utilized, and with good working conditions and labor relations. Mobilizing our strength requires changes in the numbers, location, and use of workers. We must make the most effective use of the technical ability, energy, and resourcefulness which have always characterized America at work.

Already, as defense production begins to rise, shortages of skilled workers such as machinists, tool and die makers, and draftsmen are occurring. Although there are still more than 2 million unemployed, in most of the 150 major labor market areas the number of idle workers has been decreasing, and in more than a third of the areas unemployment has practically disappeared.

In the next few months, nearly a million more men and women will be called into the Armed Forces. At the same time, more workers will be needed for defense industries. This means that hundreds of thousands of new workers—primarily women, but also older men and physically handicapped persons—must join the working force and that many people already employed must move to more essential activities.

To assure full utilization of manpower, we must quickly train new workers. We must increase our efforts to avoid losses of production caused by accidents, disputes, or poor working conditions. Produc-

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

tion will be scheduled, materials allocated, and new plants located with careful consideration of labor supply. Where migration cannot be avoided, the Federal Government will assist localities to the extent necessary in getting adequate housing and other community facilities and services.

Although the Federal Government can assist in many ways, solving our manpower problems calls primarily for initiative and cooperation by management and labor. Agreements on seniority and welfare provisions will be needed to facilitate transfers of workers to essential activities. Training, upgrading, and other improvements in manpower utilization must be accomplished in the plant and the community. Labor-management committees are being set up in major labor market areas to promote all possible voluntary adjustments.

Because existing Federal labor programs are being redirected, most expenditures for defense activities in the manpower field will be made under regular appropriations. For additional defense activities which may become necessary, Defense Production Act funds will be used. Total expenditures under regular appropriations for the fiscal year 1952 are estimated at 215 million dollars. Three-fourths of this total is for grants-in-aid to pay all costs of administering the Federal-State system of public employment offices and unemployment insurance.

LABOR

[Fiscal years. In millions]

Program or agency	Expenditures			Recommended new obligational authority for 1952
	1950 actual	1951 estimated	1952 estimated	
Placement and unemployment insurance activities:				
Department of Labor	$214	$165	$165	$175
Railroad Retirement Board	13	7	10	10
Labor standards and training:				
Department of Labor	11	14	14	14

Labor relations	13	13	13	13
Labor information, statistics, and general administration	8	9	9	9
Total	263	212	215	225

Placement and unemployment insurance activities.—The State employment services will have greatly increased responsibilities for recruitment, transfer, and placement of workers for defense industry and for our basic civilian economy. To minimize labor pirating and

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

unnecessary migration, I urge that employers hire through their local employment services to the greatest extent possible. The employment services will try to place local workers, including women, older workers, minority groups, and the physically handicapped, before recruiting from other areas. I also urge industry to use each individual's skill to the utmost and to adopt hiring specifications which do not exaggerate the strength and skills required.

In contrast to the expansion in employment service activities, the work of handling unemployment insurance claims will decrease because of high employment stimulated by defense production.

Labor standards and training.—In recent years, Federal programs of on-the-job training have emphasized the promotion of better apprenticeship standards. At the end of the fiscal year 1950, registered training programs employed 215,000 apprentices. A drive to increase the number of apprentices in key defense industries such as machine tools, metal working, and aircraft manufacture is now being launched. Further, a program to encourage on-the-job training of production workers and supervisors is being started with funds allocated to the Department of Labor.

World War II experience indicates that unless we intensify our preventive efforts, accidents will increase during a period of defense build-up, because of new kinds of production and new workers. To prevent loss of workers and loss of production, Defense Production Act funds will be used to help States plan special industrial safety campaigns and to train industrial supervisors and State safety inspectors.

To produce enough for defense, we must use wisely all our available labor resources. Even less than in other times can we now afford to discriminate in employment against the millions of workers in our labor force who are members of minority groups. Following the Federal experience with a Committee on Fair Employment Practice in World War II, eight States and a number of cities have established successful regulatory commissions to deal with employment practices. I again recommend that the Congress enact legislation to establish a Federal Fair Employment Practice Commission to prevent discrimination in interstate industries.

Labor relations.—Prompt handling of disputes in the sensitive field of labor relations is imperative if we are to avoid interruptions in defense production. A 25-percent increase is being recommended in the Federal Mediation and Conciliation Service's mediation staff to enable it to act in any dispute affecting defense production.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

Trust accounts and unemployment insurance legislation.—The receipts from payroll taxes on employers and the benefit payments for unemployment insurance go into and come out of the State and railroad accounts of the unemployment trust fund and are not included in Budget totals. For the fiscal years 1949 and 1950, unemployment insurance benefit payments exceeded the tax collections because of the temporary rise in unemployment. This year and next, the reserves in the trust fund will build up as unemployment continues to drop.

UNEMPLOYMENT TRUST FUND

[Fiscal years. In millions]

Item	1950 actual	1951 estimated	1952 estimated
Receipts:			
Deposits by States and railroad unemployment taxes	$1,113	$1,215	$1,296
Interest	167	175	183
Payments:			
State and railroad unemployment withdrawals	−2,013	−962	−715
Net accumulation	−733	428	764
Balance in fund at close of year	7,425	7,853	8,617

In this high employment period, we should take steps to bring the self-supporting unemployment insurance system up to date. After the Congress enacts improved Federal standards, time will be required for the States to bring their laws into conformity. Recommendations are now before the Congress to raise benefits, which now average less than a third of previously earned weekly wages, and to extend coverage, which has not kept up with that of other social insurance programs. The revision of unemployment insurance should also repeal last year's amendment which places a premium on court litigation as a means of determining claims for benefits.

TRANSPORTATION AND COMMUNICATION

Our transportation and communication systems, already handling a high level of traffic, must be prepared for the even greater loads that would result from the full impact of mobilization.

New freight cars, ore boats, and other equipment recently ordered by the carriers will increase their capacity for meeting these larger needs. Equally important, however, will be the steps that must be taken to obtain the maximum utilization of existing capacity. Such action depends principally upon the cooperative efforts of carriers and

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

shippers, but the Federal Government will provide leadership for these efforts and, where necessary, will impose controls to assure that all appropriate conservation measures are put into effect.

The Government must also continue to carry out its responsibilities for regulating the economic and safety aspects of transport and communication, for providing basic facilities and services, and for furnishing necessary financial aid. Federal programs have contributed to the growth of well-developed transport and communication systems; they must now assist these systems to adjust to the new demands placed upon them.

To carry out its many responsibilities in these fields, the Government will spend an estimated 1.7 billion dollars in the fiscal year 1952, or 285 million dollars less than in the fiscal year 1951. This expenditure decline depends, however, upon legislation which I am recommending to increase postal rates and thereby reduce the postal deficit.

Merchant marine.—Recent experience demonstrates again the large shipping demands imposed by an overseas military operation. To transport and supply our troops in Korea, more than 150 vessels of the Maritime Administration reserve fleet have been placed in operation to augment the merchant ships already operating in the Pacific and those which could be transferred from other areas. Our ability to meet rapidly this emergency need can be credited largely to the Government's long-range programs for supporting an active merchant marine and for preserving the surplus vessels of World War II.

Substantial assistance to our active merchant fleet is now provided through direct subsidies, tax benefits, long-term construction loans at low interest rates, and various other aids. Most important among these measures are the construction and operating subsidies, designed to offset lower foreign costs on essential trade routes. In fundamental scope and concept, this subsidy program continues to provide the most workable means for assuring an adequate base of vessels and shipyards, labor and management, for possible future expansion.

We are, however, supplementing this program with certain emergency measures, directed toward specific mobilization needs. Funds appropriated a few days ago will permit an immediate start on the construction of new and faster cargo ships better able to avoid attack by modern submarines. The desirable level of construction in future years is now under study. As a further measure, the Secretary of Commerce is establishing a National Shipping Authority within the Maritime Administration to handle existing functions related to shipping operations and to serve as the nucleus for future expansion of operations if circumstances require. Among other functions, this Authority will be prepared to provide marine war-risk insurance for private operators, should the need arise.

Navigation aids and facilities.—The defense program has attached a new and special urgency to the construction of the St. Lawrence seaway and power project. Besides the large amounts of additional electric power which the project would make available, it would also provide economical and safe access, through the seaway, to the large deposits of iron ore in Labrador and Quebec. As expanding requirements for steel bring us closer to the depletion of our high-grade domestic ore reserves, the importance of these nearby deposits will correspondingly increase. Construction of the St. Lawrence project should be started at the earliest possible date, and I urge the Congress to authorize this program without delay.

The river and harbor program of the Corps of Engineers includes three other new power development projects, with estimated expendi-

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

tures of 28 million dollars in the fiscal year 1952. These projects are discussed below under natural resources. Except for these and other projects involving power generation, construction and maintenance in this program have been substantially curtailed.

In addition to its normal functions of promoting the safety of life at sea and enforcing the maritime laws, the Coast Guard has recently been assigned responsibility for protecting our ports against sabotage. In the fiscal year 1952, the port security program will account for 23 million dollars of the total Coast Guard expenditures of 200 million dollars.

Aviation.—Facilities and services provided by the Civil Aeronautics Administration are essential for the safe operation of both civil and military aircraft. The present program for modernizing the Federal airways system has been expressly designed to meet the common needs of both groups, and the new facilities now being installed will permit the efficient handling of increased military traffic in the present emergency.

Some adjustments in aviation programs are being made in order to meet special military needs. Air navigation services in the Pacific have been expanded because of the airlift to Korea. The air traffic control system, normally concerned only with safety in flight, is now taking on the new function of identifying and controlling civil aircraft movements as a part of our air defense.

In keeping with the general public works policy of this Budget, construction of new facilities in the fiscal year 1952 will be limited to those projects which are most closely related to national security, or to civilian needs of an urgent nature. The same standards will be applied to grants for State and local airport construction.

In addition to the nearly 200 million dollars that will be spent in 1952 for aviation facilities and services, the Government will spend a substantial amount in subsidies to the airlines through mail payments. Federal financial assistance has been a major factor in the industry's rapid growth, and should be continued to the extent necessary for the sound development of civil aviation. The method of paying this subsidy should be changed, however, in order to provide the public with full information as to its cost. At present, the airline subsidy is merged with compensation for the cost of handling mail and included in postal expenditures. These two elements should be separated, and the subsidy portion paid by the Civil Aeronautics Board from funds appropriated specifically for that purpose. I again urge the Congress to enact legislation providing for this separation.

http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

Highways.—Partly as a result of reduced construction and maintenance during World War II, our highway system is not yet fully prepared to handle the current peak levels of motor traffic. While long-range improvement is needed in all classes of roads, we must concentrate in the present emergency upon overcoming those road deficiencies which are most serious from the standpoint of national defense or essential civilian traffic.

The impact of defense traffic will be especially heavy upon the National System of Interstate Highways, a limited network of roads selected because of their special importance to both peacetime and defense needs. Substantial relocation and reconstruction are required in order to provide the width, strength, and other characteristics needed to handle anticipated traffic. In reviewing State and local requests for Federal aid, the Bureau of Public Roads will give primary emphasis to projects on this system, and to the principal urban roads which connect with it.

Construction will be started in the fiscal year 1951 on a small number of access roads immediately required to serve defense installations. As additional factories and military camps are activated for the defense program, the need for new or improved access roads will correspondingly increase. So far as possible, these and other emergency needs should be met by diversion of funds from roads of less urgency.

Postal service.—On the basis of existing postal rates, the postal deficit for the fiscal year 1952 is estimated at 521 million dollars. This actually represents a higher level than that shown for 1951, since the 1951 estimate of 632 million dollars includes a nonrecurring expenditure of 152 million dollars, for retroactive adjustment of railway mail rates. No allowance is made in these estimates for possible future increases in mail transportation rates which may result from regulatory proceedings now pending before the Interstate Commerce Commission and the Civil Aeronautics Board.

The Postmaster General is taking many steps to reduce the cost of postal operations. Significant economies have already been realized through recent reductions in service. Experiments in the mechanized sorting of mail are being conducted. A streamlined money-order system will be established by July 1951. These and other similar measures will permit reductions in postal expenditures, some of which will be realized in the fiscal year 1952. At best, however, the total potential savings from improved efficiency are relatively small in relation to the present size of the postal deficit.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

Since the end of the war, the productivity of postal employees per man-hour worked has increased by over 10 percent, and the steps now being taken will permit further gains in the future. Despite this improved productivity, however, the average cost per postal transaction has increased by nearly 60 percent during the same period, mainly as a result of employee pay raises and transportation rate increases. In the absence of adequate postal rate increases, the average revenue per transaction has increased by less than 10 percent. The resulting deficit of over one-half billion dollars would be unsound at any time, but it is especially untimely in a period when the Federal Budget must sustain extremely heavy defense expenditures. I therefore repeat, most emphatically, my many previous recommendations for rate legislation which will bring postal revenues into line with present costs, reducing the deficit to the costs of handling Government mail and other costs which are not properly chargeable to the general users of the postal service.

NATURAL RESOURCES

The economic and military strength of this country is dependent upon the availability and wise use of our basic natural resources. These resources, while extensive, are not unlimited. Our land, forest, water, mineral, power, atomic, and other resources made a vital contribution toward winning World War II and are now called upon to support the present military expansion. The Federal Government has a large responsibility for assuring the use of these resources to maximum advantage.

Our natural resources programs are being modified in order to make the greatest immediate contribution to our national security. In some cases, it is necessary to postpone desirable long-range developments in order to accomplish urgent immediate objectives. Maintenance and rehabilitation on all programs are limited to those expenditures necessary to prevent deterioration of the vitally important resources which are basic to our continued economic expansion. The resource programs of the various agencies emphasize the development of Alaska for economic security and national defense.

Expenditures for natural resources are estimated at 2.5 billion dollars for fiscal year 1952, half of which will be spent on the atomic energy program. Other large expenditures are those for flood control and reclamation, including hydroelectric power generation, and for the Tennessee Valley Authority program.

Estimated expenditures for the fiscal year 1952 exceed those for 1951 by over 400 million dollars. This net expansion reflects increases

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

of 459 million dollars for atomic energy and 65 million dollars for the Tennessee Valley Authority, a combined decrease of 141 million dollars for the flood control and reclamation programs, and small changes for other programs.

[1] This column excludes 370 million dollars of recommended appropriations to liquidate prior year contract authorizations.

Atomic energy.—At the same time that we are actively pursuing industrial and other peacetime applications of atomic energy, present world developments demand intensification of the national security aspects of the program. The very substantial increases appropriated for the atomic energy program in fiscal year 1951 will provide for enlargement of production capacity for atomic materials and weapons. A portion of the funds recommended for 1952 provides for certain construction projects under this expansion program.

900000—51——v

Federal Reserve Bank of St. Louis

The Budget recommends increases also for the procurement and processing of raw materials, the production in existing plants of fissionable materials and weapons, and the investigation and development of new and improved weapons. The 1952 funds also allow for continuing development of new designs of nuclear reactors, including those for the production of fissionable material, the generation of power, and the propulsion of ships and aircraft. The Atomic Energy Commission will continue its vigorous program in basic and applied research in the physical sciences and in biology and medicine.

Land and water resources.—A year ago I appointed a Water Resources Policy Commission to recommend policies to guide Federal participation in the development, conservation, and use of water resources. This Commission has now submitted the first volume of its report and will submit two additional volumes. The Commission's report will be reviewed to determine what administrative actions and legislative recommendations may be needed to improve the Government's water and related land-use programs.

Although long-range improvement of our river basins is essential for the continued economic strength of the country, in the fiscal year 1952 we must emphasize those aspects of the programs which primarily support the national defense. Immediately after the first attack in Korea, all Government agencies were directed to review their programs and to adjust them to meet urgent needs. Many of the river basin projects contribute to defense as well as civilian industrial requirements through providing low-cost electric power in shortage areas. These projects are being pushed forward. Other projects, though desirable from a long-range standpoint, are being curtailed or deferred. As a result of these actions, combined expenditures required in the fiscal year 1952 for continuation of projects of the Bureau of Reclamation and the Corps of Engineers now under way—involving dams, power facilities, canals, channels, and levees—are estimated to decrease by nearly 150 million dollars from the 1951 level.

Following a careful review of power requirements for the defense program, seven new projects, all of which will provide substantial power benefits, are included in this budget. These new projects, together with the installation of additional power units in projects already under way and the related facilities required to transmit the power, are estimated to cost in total 1.5 billion dollars and to provide 3.9 million kilowatts of installed capacity. The projects are Hells Canyon, The Dalles and Ice Harbor in the Columbia Basin, Old Hickory on the Cumberland River, a steam plant in the Tennessee

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

Valley, Gavins Point on the Missouri River, and the St. Lawrence seaway and power project. These seven are the only new projects recommended for the river-basin programs. Four of them are in the river and harbor program, and funds for them are included in the transportation category.

The new projects together with projects completed or under way by the Bureau of Reclamation, Corps of Engineers, and Tennessee Valley Authority will provide ultimate capacity of 20 million kilowatts. Funds recommended in 1952 for the Bonneville, Southwestern, and Southeastern Power Administrations, Bureau of Reclamation, and Tennessee Valley Authority will provide properly scheduled facilities to transmit power to principal load centers.

I am also including funds in this Budget to plan for the urgently needed redevelopment of Niagara power facilities made possible by the recent treaty with Canada.

Following the Flood Control Act of 1950, I directed the Federal agencies concerned to work together on preparation of a comprehensive plan for development of the resources of the Arkansas, White, and Red River Basins and the New England-New York area. The Budget for 1952 provides funds to continue the surveys.

Mineral and other resource programs.—During and since World War II, the Bureau of Mines and the Geological Survey have concentrated upon research on the adequacy of mineral resources, the discovery of new resources, and means for improved development, conservation, and use of existing reserves. All of these activities have a clear defense significance and budget increases are recommended to accelerate them.

Funds for the management, protection, and development of other resources are at somewhat lower levels than would be desirable for good conservation practice. Increases are recommended for supervision and sale of timber resources and construction of access roads to increase the cut of timber, and for range improvement and fish and wildlife development to add to the supply of food and other essential products. Because of their importance to planning for defense projects, increases are also recommended for topographic mapping and water resources investigations. Programs for the management and development of national park areas and resources of Indian lands, and for other services to Indians have been held to the 1951 level or below.

To insure effective use of their lands, the Indians are in need of credit facilities. I recommend legislation which would augment the loan fund authorized in 1934 in an amount sufficient to meet the

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

demands for credit over the next 5 to 10 years. Such legislation is preferable to a piecemeal approach of providing credit for selected tribes through individual bills.

AGRICULTURE AND AGRICULTURAL RESOURCES

During the period of concentration upon defense expansion, our Federal agricultural programs must serve one central purpose—the maintenance of our capacity to produce abundant quantities of food and fiber to meet our own needs and critical needs of friendly countries. Government farm programs now in effect make up, in general, the kinds of activities needed for the defense period. Some of these programs are being redirected to provide a greater contribution to the defense effort, as for example the production of fibers required for clothing and equipment for the Armed Forces.

American agriculture today is in a strong financial condition. The high postwar demand for agricultural products has maintained farm production and income at high levels. Gross farm income in the calendar year 1950, although below the peak level of 1948, was approximately three times as high as in 1940, and will show a further increase in 1951.

Federal Reserve Bank of St. Louis

With this outlook for agricultural prices and farm income, total Federal expenditures for agriculture and agricultural resources are expected to decline from 2.8 billion dollars in the fiscal year 1950 to 1 billion dollars in 1951 and to 1.4 billion dollars in 1952. Most of the change in agricultural expenditures from 1950 to 1952 is due to decreased expenditures for agricultural price supports.

Stabilization of farm prices and farm income.—Expenditures of the Commodity Credit Corporation for price-support purposes have declined greatly since mid-1950 because of the rise in farm prices and the short cotton crop. During the fiscal year 1951, it is now estimated that the Corporation will realize net receipts of 296 million dollars compared with net outlays in 1950 of 1.6 billion dollars. Receipts from sales of nearly 3.5 million bales of cotton acquired from the 1948 crop will alone more than offset other expenditures for price support.

Present estimates of production, consumption, and exports of 1951 crops indicate that net expenditures for price support will be 238 million dollars in the fiscal year 1952. While commodity inventories are currently proving to be valuable in meeting increasing needs for foods and fibers, losses have occurred in the disposal of a number of perishable commodities, and further losses are expected to occur in 1952. To avoid the unnecessary accumulation and loss on perishable agricultural commodities, legislation is needed to permit direct payments to producers in lieu of market price supports through Government purchases. This would allow excess perishable commodities to move into consumption and would make our price support provisions more compatible with our international trade policy. To help the Commodity Credit Corporation dispose of its existing surpluses, it should be authorized to pay transportation and repackaging costs on surplus commodities distributed to public and private welfare organizations.

In addition to Commodity Credit Corporation price support expenditures, a permanent appropriation, equal to 30 percent of customs duties, is available for removal from the market of surplus agricultural commodities, mainly perishables. With increasing demands for farm commodities, the total amount of this fund will not be necessary for this purpose in the fiscal year 1952. Accordingly, I recommend that 77 million dollars of the permanent appropriation be used to reimburse the Commodity Credit Corporation for costs of the International Wheat Agreement in the fiscal year 1950.

Under the International Wheat Agreement, the United States guarantees the export of a certain quantity of wheat at the maximum

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

price of $1.80 per bushel during the 4 years of the Agreement. The loss arising from the difference between this agreed-upon price and the higher domestic price of wheat is met from Corporation funds, with reimbursement later from appropriated funds. Because of an increase in export quotas and higher domestic wheat prices, expenditures for the Wheat Agreement are estimated to rise to 117 million dollars in the fiscal year 1951 and 115 million in 1952.

Expenditures under the Sugar Act of 1948 will increase in the fiscal year 1952 because of the larger volume of domestic sugar production in 1950 and 1951, and the provision in the law for mandatory payments to sugar producers.

Financing farm ownership and operation.—The loan programs supervised by the Farm Credit Administration will, in the defense period, facilitate farm operations and encourage farm ownership. These loan programs are largely financed by borrowing in the open market, and only the supervisory expenses of the Farm Credit Administration and changes in net investment of Government capital in the supervised banks and other corporations are included in Budget totals.

The loan activities of the Farmers' Home Administration, which also assist farm operations, are financed by funds borrowed from the Treasury. These activities are expected to remain at approximately the same level in the fiscal year 1952, with a decrease in farm ownership loans offset in part by some expansion in production and subsistence loans to meet the needs of reclamation settlers and low-income farmers for essential operating credit not available from other credit sources. The disaster loan program is expected to decline in 1952 below the abnormal levels required in 1950 and 1951.

Financing rural electrification and rural telephones.—By June 30, 1950, approximately 86 percent of all farms were electrified, compared with 48 percent in 1945. Last year, a new program to extend and improve rural telephone systems was begun. Although under normal conditions it would be desirable to continue the rapid progress on rural electrification and the provision of adequate rural telephones, shortages of metals, particularly aluminum and copper, and of electronic equipment, make it necessary to proceed more slowly with both the electrification and telephone programs. I recommend that the Rural Electrification Administration new loan authorization be reduced from the 297 million dollars available in 1951 to 109 million dollars in 1952. Expenditures will decline by a smaller amount because of the backlog of loans committed but not yet advanced. The reduction in new loan authorization will permit improvement and expansion of existing

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

distribution capacity where essential, but will require some curtailment of loans for new facilities.

Conservation.—Efforts to promote conservation and development of agricultural land and water resources are aided by the Department of Agriculture through the technical advice and assistance of the Soil Conservation Service, the flood control program, and the conservation payments program. Although some phases of these programs may in future years need to be expanded to maintain and improve our soil resources, the higher priority which must now be given to defense programs requires in the 1952 Budget a policy of no expansion of present conservation programs. I, therefore, recommend that funds for flood control and the Soil Conservation Service be held at the present level and that the advance authorization for the conservation and use program in the 1952 crop year, which will largely determine expenditures in the fiscal year 1953, be continued at the 1951 crop-year level of 285 million dollars.

Research and other agricultural services.—An appropriation of 171 million dollars is recommended for the continuing basic services for agriculture, including research on crop varieties, livestock and poultry, and the production and marketing of farm products; control and eradication of insects and plant and animal diseases; meat inspection; payments to States for experiment stations and cooperative extension work; and general overhead expenses of the Department of Agriculture. This amount also includes 33 million dollars to reimburse the Commodity Credit Corporation for 1950 expenses of the program to eradicate foot-and-mouth disease in Mexico. Although there are many worth-while research and service programs which it would be desirable to expand under more normal conditions, I recommend at this time that they be held at or below their 1951 level. Finally, I recommend legislation to enable the Commodity Exchange Authority to control speculative trading and to strengthen its regulation of commodity exchanges.

HOUSING AND COMMUNITY DEVELOPMENT

In the years since World War II, we have made a good start toward achieving adequate housing and community facilities for our people. In the last 12 months over 1,350,000 new housing units were produced, a third above the previous record level. About half of this new housing was financed with mortgages insured or guaranteed by Federal agencies. Under the comprehensive legislation enacted by the Eighty-first Congress, the Federal Government has begun to aid in clearing

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

slums and redeveloping our cities; to assist local housing authorities in providing adequate housing for low-income groups; to promote better farm housing; and to conduct or sponsor the basic research needed to realize the full potentialities of the construction industry.

Continuance of the high level of housing construction achieved in 1950, while entirely desirable in normal times, would use materials and manpower now needed to meet defense requirements. Accordingly, to help the defense program go ahead full speed and to reduce inflationary pressures on construction costs, it has been necessary to take measures to reduce residential construction this year by more than a third, to a level of about 850,000 units annually.

Federal Reserve Bank of St. Louis

To meet defense needs, four major revisions have been made in our housing and community development programs. First, comprehensive limitations have been imposed on all types of credit to finance new housing construction, as well as on all Government-guaranteed credit to finance purchase of existing homes. Second, in both existing and proposed new programs, we are giving top priority to military and defense-related housing and community facilities. Third, subject only to defense priorities, we are giving special emphasis to housing for lower-income groups in accordance with the general objectives of national housing policy. Fourth, we are rapidly organizing under newly enacted legislation to meet the civil defense requirements of the Nation.

Most of the existing Federal programs are financed by authorizations already made by the Congress in basic statutes. Partly because of the sharp curtailments in programs, only a small part of those authorizations will be spent in the fiscal year 1952. Moreover, sales of mortgages purchased by the Government in earlier years and collections on loans will cause a substantial excess of receipts over new expenditures for several going programs. Therefore, despite increased expenditures for civil defense and for the proposed new defense-supporting legislation, the housing and community development category as a whole in the fiscal year 1952 will realize estimated net receipts of 102 million dollars.

Defense housing, community facilities and services.—As the defense effort accelerates, additional housing and community facilities and services in many key areas will undoubtedly be required to take care of the influx of defense workers and military personnel. We shall continue to place primary reliance on the initiative of private builders and local communities to provide the new construction and services required. To reinforce and supplement this initiative, I am recommending several basic changes in legislation to meet specific defense needs for housing, community facilities and services.

The expansion in the defense program makes more urgent the provision of an adequate supply of rental housing. Military installations and defense plants will find it difficult to meet their expanding manpower requirements if adequate housing is not available at reasonable rents. For this reason, despite the cutbacks in total construction, it is essential to increase new private rental housing in defense areas. The legislation which I am proposing will provide

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

more liberal insurance for loans financing construction of a limited number of rental units in these areas. In addition, it will extend the temporary program for insurance of military housing loans beyond the present expiration date of June 30, 1951, and will include similar insurance for mortgages to finance rental housing near installations of the Atomic Energy Commission.

The adaptability of prefabricated housing to defense housing requirements makes it imperative that present producers of proven efficiency be able to obtain adequate financing for their operations—especially for the distribution of such housing. The proposed legislation will help meet the special financing problems of this industry.

In some areas where the most rapid expansion in military or defense-related activities will occur, local communities and private builders cannot be expected—even with these new aids—to meet all the emergency requirements for housing and community essentials. This problem will be particularly acute where large installations are located in small communities or isolated areas. To prevent delays in recruitment and to assure a reasonably stable labor supply in such areas, the Federal Government should have authority, as in World War II, to construct housing units and to make loans and grants for community facilities and services. This authority should be limited to meeting defense needs and even then should be available only when these needs could not otherwise be met. Accordingly the proposed legislation would authorize direct Federal construction of defense housing and provision of Federal funds for community facilities and services. For these purposes, as well as for the necessary extension and expansion of defense-related private housing aids, the Budget includes estimated appropriations of 150 million dollars.

Civil defense.—With modern methods of warfare our Nation could be subjected to a sudden, devastating enemy attack. The military services have responsibility for warding off attack, but effective civil defense can sharply reduce the injuries, loss of life, and destruction of homes and factories that otherwise might occur.

Under legislation just enacted, the Federal Civil Defense Administration will provide equal matching grants to States for the construction of shelters and other protective facilities in critical target areas. These grants account for the larger part of the expenditures projected for this program in the fiscal year 1952. The Administration will also begin building a national reserve of supplies and equipment. In addition, the Reconstruction Finance Corporation will make loans to public authorities for public works which can serve

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

both as shelters and for other community purposes, when the Administrator certifies that there is a civil defense necessity for such projects.

Aids to private housing.—The record levels of private housing construction in recent years have been stimulated in large part by widespread and generous Federal credit aids—mainly Federal insurance or guarantees of private mortgage loans and Federal purchases to support the market for these mortgages. By reducing the liberality of these aids, it has been possible to cut back housing construction in recent months without imposing direct controls.

Federal National Mortgage Association.—Changes in law and administrative policy governing the Federal National Mortgage Association have sharply curtailed new purchases of mortgages (except those covered by earlier commitments) and have helped to stimulate an increasing volume of sales of mortgages previously purchased. As the large backlog of old commitments is gradually drawn down, the net expenditures of this program will continue to decline. In the fiscal year 1952 net receipts of 530 million dollars are expected, primarily from the accelerated sales program. By that time, we plan to return this secondary mortgage market largely to a stand-by status and to place a substantial part of the unused mortgage purchase authority in reserve for possible future emergency requirements.

Federal Housing Administration.—The higher down payments and other limitations placed on housing credit have caused a sharp decline in applications for mortgage insurance under existing Federal Housing Administration programs. Nevertheless, in 1952, roughly one-half the total new housing produced, as well as purchases of nearly 200,000 existing homes, will probably be financed with the aid of Federal mortgage insurance. From the standpoint of the Federal Budget, these programs will continue to show net receipts, since the estimated premium income will exceed administrative expenses and probable losses.

Home Owners' Loan Corporation.—The Home Owners' Loan Corporation will be liquidated before the close of the current fiscal year. All of the Federal investment of more than 3.7 billion dollars made during the depression years of the 1930's will be repaid in full and in addition the earned surplus of 14 million dollars will be paid to the Treasury. These payments will successfully complete one of the largest emergency financing operations of the depression years.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

Direct veterans loans.—Under the Housing Act of 1950, the Administrator of Veterans' Affairs was given temporary authority to make a maximum of 150 million dollars in direct housing loans to veterans in areas where, even with the support of the secondary market, adequate financing is not obtainable. Experience to date indicates only a limited need for such loans, which private lenders should be able to provide. Accordingly, I do not recommend the extension of this program beyond the current fiscal year.

Farm housing.—As part of the general limitation of new housing construction, new loans for farm housing in the fiscal year 1952 will be held to less than a third of the 75 million dollars authorized in the basic statute.

Public housing programs.—In the fiscal year 1952, construction of an estimated 75,000 new units will be started under the low-rent public housing program, well below the annual level of 135,000 units authorized by the Housing Act of 1949. These units will serve two major purposes. They will not only help meet the long-neglected housing needs of low-income families, but will also make an important contribution to defense housing requirements. To make sure that the full defense potentialities are realized, the Public Housing Administration, to the maximum extent feasible, will give preference to projects serving defense areas and will require local housing authorities to give military personnel and defense workers preference as tenants.

During the current year, the initial construction is being financed largely through temporary Federal loans. In 1952 and later years, however, both the initial construction and the permanent capital investment in the local projects will be largely financed by obligations issued by the local housing authorities to private investors on the security of the annual Federal contributions. In the fiscal year 1952, collections and private refinancing of earlier loans will cause substantial net receipts. Federal expenditures for annual contributions to help pay rentals of low-income tenants will increase moderately, but in the case of projects occupied by defense workers the income of the occupants will be sufficient to make Federal contributions unnecessary to help pay their rents.

Loans to educational institutions.—Soon after the aggression in Korea last summer, authorizations under this program were suspended to permit reappraisal of college housing needs. On the basis of this reappraisal, a maximum of 40 million dollars out of the 300 million dollars authorized by the Housing Act of 1950 has been provided, to

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

be used only for college housing directly contributing to defense. No other loans will be made under this program until the outlook for college enrollment shows a clear need for such housing.

Slum clearance and urban redevelopment.—The long-range program for clearance of slums and redevelopment of the major urban areas, for both private and public use, is still in its early stages. Commitments for planning advances have been issued to 70 cities.

Because of the great importance of encouraging orderly development of our cities—and the small amounts of manpower and other resources involved in the early years—steady progress should continue in the planning stage of this program. Local authorities also may acquire sites, but will not demolish existing buildings or otherwise redevelop areas unless the redevelopment is consistent with defense requirements. Under this basic policy, net expenditures of 65 million dollars are anticipated for the fiscal year 1952—primarily for planning advances and temporary loans for acquisition of sites. This contrasts with the additional 350 million dollars in authority which becomes available in 1952 under the basic statute.

Advance planning loans.—Advances to State and local governments for public works planning have been suspended except when the projects involve defense-related or essential civilian requirements. While in a normal peacetime economy this program makes a major contribution to economic stability, it does not now appear advisable to extend it beyond the present expiration next October.

EDUCATION AND GENERAL RESEARCH

The challenge of communist imperialism requires the full potential of all our people—their initiative, their knowledge, their skills, and their ideals. These qualities have given this Nation world leadership in science and industry. Education and research are vital to the maintenance of this leadership.

The highly developed technology of the Nation requires an educated people equipped to operate this productive system efficiently. Likewise, it requires continuing basic research and the practical application of new knowledge and new techniques. Yet we start our defense effort with an educational system which fails to provide adequate educational opportunities for all our people, and with a lack of balance in the Nation's research activities.

The Federal Government took a major step last year toward achieving a better balance in research through the creation of the National

Digitized for FRASER

Federal Reserve Bank of St. Louis

Science Foundation, but urgently needed general legislation in the field of education was not enacted. This Budget includes provision for grants to the States for the operating expenses of elementary and secondary schools to assist in improving educational opportunities for our children. This proposal accounts for more than half of the total estimate of 483 million dollars of expenditures for education and general research in the fiscal year 1952, and for most of the estimated increase over 1951.

In addition to programs included in this total, many Federal agencies carry on specialized education and research activities which are included under other categories, such as veterans' services and benefits, military services, and agriculture.

Promotion of education.—Strong elementary and secondary educational systems throughout the country are vital to national strength and to the improvement of individual opportunity. Although educational opportunities are excellent in some parts of the country, children and youth in too many of our communities still do not receive adequate education. Inequalities exist primarily because of differences in the financial resources of the States and localities.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

The Nation as a whole suffers from these inequalities. The results are demonstrated most sharply in times like the present. The military services even find it necessary to teach some inductees reading and writing before they can begin combat training. From the standpoint of national security alone, as well as the enlargement of opportunities for the individual, the Nation needs to see that every youth acquires the fundamental education and training which are essential to effective service, whether in the Armed Forces, in industry, or on the farm. I therefore urge the Congress to authorize Federal financial assistance to help the States provide a level of elementary and secondary education that will meet the minimum needs of the Nation. The Budget includes a tentative appropriation estimate of 300 million dollars for this purpose.

To help meet one particular educational problem, laws were enacted last year to make a single agency—the Federal Security Agency—responsible for giving financial assistance to schools or, if necessary, establishing schools for the education of children living on Federal property or in areas especially affected by Federal activities. Previously a variety of arrangements existed, and some of these children were denied free public education. The Budget includes expenditures of 106 million dollars in the fiscal year 1952 for buildings and current operating expenses under these new laws.

In view of the present necessity to provide training for defense production, a part of the appropriations for the general purpose of vocational education and training should be used for the training of workers for defense and essential civilian production. This Budget provides for the designation of 10 million dollars of the proposed vocational education appropriation for the fiscal year 1952 for this purpose.

Last year I recommended a program of aid to college students to help equalize educational opportunities. The proposal is omitted from this Budget pending reconsideration of the kind of program that will best fit into Selective Service policies and general manpower requirements.

Science Foundation.—The National Science Foundation, established by law last year, is now organized and planning its program. The limited funds available to it in the current fiscal year will not permit the Foundation to proceed beyond initial preparations. An appropriation request for the fiscal year 1952 will be submitted this spring to enable the Foundation to initiate the important work of formulating a national policy for basic research, stimulating such research, and training scientific personnel.

SOCIAL SECURITY, WELFARE, AND HEALTH

Last year the Congress enacted important improvements in our social security program. Coverage under old-age and survivors insurance was extended to some 10 million additional workers. Eligibility requirements were relaxed for older people, so that many more will qualify for retirement annuities in the near future. The level of benefits was raised substantially and the taxable wage base was increased moderately, to make the benefits and the taxes more commensurate with earnings.

In taking this step, the Congress clearly decided that social insurance, rather than public assistance, is to be the primary vehicle for providing social security in this country. This accords fully with our American tradition of self-reliance. In the future, the great majority of American families will obtain, through their own and their employers' contributions, a considerable degree of insurance protection against poverty arising from the old age or death of the wage earner.

In spite of these far-reaching improvements, however, the Nation's social insurance program still does not measure up to the full needs or aspirations of the American people; nor has it by any means achieved the scope of protection that our economy can afford and should give. Millions of people, including self-employed farmers, many domestic and agricultural workers, many public employees, and members of the Armed Forces, still are not under social insurance. Our aim should be to establish for all employed people a minimum protection that each person takes with him wherever he works. Pension and insurance plans for special groups should supplement social security benefits, as industry pensions already do for several million workers. Moreover, we need to fill important gaps in our social insurance system by providing protection on a prepaid basis against the costs of medical care and the loss of family income in cases of disability. These measures will help to provide that material security which is essential to a vigorous democracy and a highly productive labor force.

All Federal programs of social security, welfare, and health are estimated to require expenditures of 2.6 billion dollars in the fiscal year 1952, an increase of 105 million dollars over the current year. Three-fourths of the expenditures are for public assistance, for accident compensation payments, and for the transfer of railroad payroll tax receipts to the railroad retirement trust account. The amounts of these expenditures are all determined by statutory requirements. The remaining one-fourth provides for all the public health activities

Digitized for FRASER
http://fraser.stlouisfed.org/

of the Government, for aid to various special groups, and for the Federal Bureau of Investigation and other crime control and correction services.

[1] This column excludes 141 million dollars of recommended appropriations to liquidate prior year contract authorizations.

Public assistance.—The same legislation which extended coverage of old-age and survivors insurance also made changes in the Federal-State public assistance program. It authorized Federal grants for assistance to totally and permanently disabled persons, extended the aid for dependent children to include a relative who takes care of such children, and provided for Federal sharing of payments made by the States to hospitals and doctors furnishing medical care for persons receiving public assistance.

With many more persons eligible now or in the near future for old-age and survivors insurance benefits, and with the increased employment opportunities of the defense economy, public assistance should conform more nearly to its intended purpose of filling gaps in social insurance. Thus, increases in expenditures resulting from the new public assistance legislation are expected to be largely offset by decreases resulting from a reduction in the number of children and

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

old people on the public assistance rolls. The estimated expenditures of 1.3 billion dollars for public assistance in the fiscal year 1952 exceeds by 20 million dollars the amount for the current year.

Aid to special groups.—The present Federal-State program for rehabilitation of the disabled will return 65,000 persons to productive work this year. This program should be expanded. Bringing these people into the ranks of the gainfully employed, besides improving their economic self-reliance, adds to our national productive capacity.

Railroad Retirement Board.—Expenditures shown for the Railroad Retirement Board represent principally a bookkeeping transfer of payroll taxes, collected from railroad workers and companies, to the railroad retirement trust account, where they are added to the reserve against future benefit payments. The estimate for the fiscal year 1952 also includes a 33-million-dollar payment by the United States to the trust account for the cost of military service credits for railroad workers. Increased railroad payrolls expected in 1952 are responsible for a rise of 48 million dollars in the estimate. I again recommend that these taxes be transferred to the fund as they are collected, rather than in advance of collection, in order to correct the present indefensible practice whereby the Federal Government pays interest on money that it advances to the fund.

Promotion of public health.—If we are to meet successfully the challenge that confronts this Nation, we can less than ever afford to waste the good health of our people. But the present emergency makes even more difficult the maintenance of good health.

Our chronic shortage of doctors, dentists, and nurses will be aggravated as more of them are called into the Armed Forces. Therefore, we need, more than ever, prompt enactment of legislation that will help to increase enrollment in medical and related schools, by assisting them to meet their costs of instruction and to construct additional facilities where needed. Scholarships should be provided to attract larger enrollments in nursing schools and grants should be made to States for vocational training of practical nurses. Estimated Budget expenditures in the fiscal year 1952 include 25 million dollars for this proposed program.

Many communities that will be faced with added health burdens arising from defense needs do not have adequately staffed local health departments—indeed, some communities have none at all. To help overcome this deficiency, I urge the Congress to enact legislation

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

which will make possible more adequate Federal grants to the States for the strengthening of their local health services. The Budget includes 5 million dollars as the estimated first-year cost of this proposed legislation.

More than one-half of all Federal expenditures for the promotion of public health—estimated at 350 million dollars for the existing programs in the fiscal year 1952—consists of grants to State and local governments. These grants are available for a variety of public health programs, including general health services, hospital construction, maternal and child health, and control of certain specific diseases such as venereal disease, tuberculosis, cancer, mental illness, and heart disease.

Federal expenditures for hospital construction grants are estimated at 136 million dollars, about 4 million dollars less than in the current year. Federal expenditures for other existing programs of grants to States are estimated at 72 million dollars, a slight increase over 1951, due entirely to the expanded grants for maternal and child welfare services provided by the recent amendments to the Social Security Act. The principal direct Federal programs are the research and hospital activities of the Public Health Service.

Trust funds.—The three major retirement systems administered by the Government are the old-age and survivors insurance, railroad retirement, and Federal employee retirement and disability programs. Benefit disbursements are made directly from trust accounts and are not included in Budget expenditures. Receipts of the trust funds are mainly employer and employee payroll contributions. In the case of the railroad retirement system, these receipts are included in total Budget receipts and are transferred to the trust account as a Budget expenditure. The Government contributes as an employer to the Federal employee retirement funds and, for those Federal workers who are not covered by these special programs, to the old-age and survivors insurance system. These contributions appear as Budget expenditures. Payroll contributions received from other employers and from workers for old-age and survivors insurance are transferred directly to the trust fund and are not included in total Budget receipts. Accumulated assets in the three major trust funds now total 20 billion dollars; the money is invested in Government securities and the interest earned is added to the principal of each trust fund.

Receipts and expenditures under the proposed medical care insurance program would be handled through a trust account, paralleling

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

the procedures for old-age and survivors insurance. A period of preparation will be required to set up the health insurance system. I am proposing that in the meantime a small payroll tax of one-fourth of 1 percent each on employees and employers be levied to provide for initial expenses.

VETERANS' SERVICES AND BENEFITS

In the fiscal year 1952 expenditures for veterans' services and benefits will be under 5 billion dollars for the first time in 6 years. This results from a further decline in requirements for the readjustment of veterans of World War II.

During the coming years, because we shall need to maintain larger Armed Forces, virtually all our able-bodied young men may be required to serve their country in its military forces. Before many years, nearly all the population may be veterans or the dependents of veterans.

This means a profound change in the social and economic import of Government programs which affect veterans. It requires a clear recognition that many of the needs of our veterans and their dependents can be met best through the general programs serving the whole population. Therefore, in legislation directed particularly to the problems of servicemen and their dependents, we should provide only for those special and unique needs which arise directly from military service. We should meet their other needs through general programs of the Government.

Federal Reserve Bank of St. Louis

Readjustment benefits.—A decline of nearly 800 million dollars in expenditures for veterans' readjustment, to 1.6 billion dollars estimated for the fiscal year 1952, will result almost entirely from reduced enrollments for education and training.

Under the Servicemen's Readjustment Act, eligible veterans are required to initiate their courses of training by July 25, 1951. Accordingly, with the program drawing to a close, the enrollment in institutional, on-the-job, and farm-training courses in the fiscal year 1952 is expected to average about 1 million, a decline of some 600,000 from 1951. By the end of the fiscal year 1952 more than 7,500,000 veterans will have received education and training under this program at a cost of 13.9 billion dollars.

Other expenditures for readjustment benefits cover guarantees of veterans' loans, unemployment allowances, tuition and supplies for the training of disabled veterans, and Government grants to certain seriously disabled veterans. Government expenditures for the loan guarantees in the fiscal year 1952 are estimated at 110 million dollars, largely for a gratuity of 1 year's interest on the guaranteed portion of each loan. By the end of the fiscal year 1952 over 3 million veterans will have borrowed 18 billion dollars in Government-guaranteed loans for homes, farms, and businesses.

The Eighty-first Congress enacted legislation to meet the special rehabilitation needs of disabled veterans injured in Korea. By renewing the program of vocational rehabilitation which was in effect during and after World War II for disabled veterans, and by providing medical treatment, hospital services, and monthly compensation, the Government is assisting our disabled veterans to return to a self-reliant and productive role as civilians.

Broader problems of policy arise when we consider the readjustment needs of nondisabled veterans. In preparing to meet their needs, we naturally think first of the combat veterans of the Korean fighting, but we must remember that during the coming years the lives of nearly all our young men also may be interrupted for service to their country. When the time comes that these future veterans can be discharged, we must be sure that they will be able to readjust rapidly to normal civilian pursuits.

The provision of education benefits, vocational training, loan guarantees, and unemployment allowances to World War II veterans represented a new and more positive approach to the veterans' readjustment problem than the pensions and bonuses previously pro-

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

vided. There is ample evidence that the "GI bill" has benefited the Nation as well as millions of veterans, despite abuses which impaired the readjustment of some veterans and added to the cost of the whole program.

Any future program should not only avoid past mistakes but should also be fitted to our changed economic and military outlook. The readjustment needs of the men in the Armed Forces now and in the future are likely to be quite different from the needs of World War II veterans. The requirements of future veterans will depend on how long our young men serve, what they do while in military service, and their ages and family responsibilities at time of discharge. The need for special programs for veterans will depend also on how many of our young men serve, the job opportunities open to them afterward, and the types of services available to them under governmental programs for the population as a whole. When all these factors are considered, it is clear that an extension of the "GI bill," without material changes, would perpetuate provisions not suited to changed conditions. It could result in excessive expenditure of public funds and still fail to accomplish the objective of helping the veteran to readjust.

The full assessment of these complicated problems requires careful study in order that we may adopt the best policies for future Government programs affecting veterans. In that assessment, we need to take careful account of our own national experience over the last 6 years and the requirements imposed by our changed military and economic needs.

Compensation and pensions.—It is estimated that payments for compensation and pensions will total more than 2.2 billion dollars in the fiscal year 1952, and will be made to an average of 3,168,000 individuals and families. This is an increase over the current year of 113,000 in the average number of cases, and of 25 million dollars in expenditures. Of the compensation cases, which result from service-connected disabilities or deaths, 82 percent relate to military service during or after World War II. Of the pension recipients, 7 percent are veterans or the dependents of veterans of World War II.

The total of 2.2 billion dollars for 1952 includes 1.5 billion dollars in compensation payments, covering an average of 345,000 families of deceased veterans and 2,010,000 veterans with service-connected disabilities. Also included is 80 million dollars for subsistence allow-

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

ances to service-disabled veterans in the vocational rehabilitation program, a decrease of 56 million dollars below the 1951 level. Pension payments will be made in an estimated 812,000 non-service-connected cases. The total of 605 million dollars for these pension payments is 75 million dollars higher than in the current year.

Insurance.—Government liabilities for life insurance programs for servicemen and veterans are mainly for the costs of administration and for payments on account of deaths traceable to the extra hazards of military service.

In view of the Korean hostilities and the current enlargement of the Armed Forces, there is pressing need for new legislation to assure financial protection to the families of servicemen. The present national service life insurance program does not meet this need. Because it is optional, the protection is not carried by some servicemen and is held in less than adequate amounts by others. The system is complex and costly and absorbs excessive manpower, especially when the Armed Forces are large and manpower scarce.

It would be more equitable, and over the last decade it would have been more economical, to provide a free and automatic $10,000 indemnity to the survivors of all who die while in military service, and to establish a special new system of voluntary insurance open only to veterans whose insurability at standard rates has been impaired by military service. I recommend that this Congress now enact such legislation and extend its benefits to the dependents of those servicemen who have died while on active duty since June 27, 1950, if they did not have a like amount of servicemen's insurance protection.

Hospitals and medical care.—Expenses for hospital and medical care are estimated at 650 million dollars in the fiscal year 1952, 49 million more than in the current year. The average number of patients in hospitals and homes is estimated at 138,000, an increase of 5,000 over the current year. Approximately two-thirds of present patients are being treated for non-service-connected disabilities.

The presently approved construction program of 766 million dollars, to provide 36,500 new hospital and domiciliary beds, will be four-fifths completed by the end of the fiscal year 1952. Obligational authority already available is more than adequate to complete the program.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

Trust funds.—About 6.5 million life insurance policies are now outstanding under two trust funds operated for servicemen and veterans. One is for the Government life insurance program established for servicemen in World War I; the other is for national service life insurance, its World War II counterpart.

Net withdrawal	−1,937	−22	−265
Balance in funds at close of year	6,692	6,670	6,405

Expenditures from these trust funds are expected to exceed receipts by 265 million dollars, because dividends estimated at 546 million dollars will be paid to policyholders in the fiscal year 1952. During the fiscal years 1950 and 1951 dividends which had accumulated over an extended period were paid from these funds, so that the trust fund expenditures in those two years exceeded receipts by 2 billion dollars. At the end of the fiscal year 1952, the Government securities and cash held by the funds will still exceed 6.4 billion dollars.

GENERAL GOVERNMENT

Expenditures for general government in the fiscal year 1952 are estimated at 1.4 billion dollars, an increase of 99 million dollars over the current year. This total includes 164 million dollars for the dispersal of governmental facilities.

Public building construction (General Services Administration)	9	38	9	
Weather Bureau	24	25	26	27
Claims and relief acts (Treasury)	71	96	50	
Other	58	67	41	63
Total	1,108	1,252	1,351	1,140

[1] This column excludes 5 million dollars of recommended appropriations to liquidate prior year contract authorizations.

Dispersal of Government facilities.—The acceleration of the defense effort requires additional Government buildings to accommodate the increased number of Federal employees in the District of Columbia. From the viewpoint of security, the new buildings should not be located in the central area of the District of Columbia but should be located within commuting distance and sufficiently removed from each other to assure continuity of operations in the event of air attack. Long-range planning goals for the Capital area also call for dispersal of Government buildings. I therefore urge the Congress to provide the necessary authority and funds to begin promptly a program for the dispersal of Government offices now located in the District of Columbia.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

As distinct from dispersal, functions will be decentralized to locations outside the vicinity of the District of Columbia only in those instances where the functions involved can be permanently located at further distances without significant loss of efficiency.

Federal financial management.—New tax legislation has created additional problems of tax collection. The increase in the estimate for the Bureau of Internal Revenue will permit continued strengthening of audit and enforcement activities to try to insure that every person pays his full and fair share of taxes.

Present customs law imposes unnecessary difficulties upon the Nation's importers and hampers the conduct of international trade. I therefore urge the Congress to enact legislation to simplify customs procedures along the lines of recommendations previously transmitted.

Central property and records management.—When the General Services Administration was established in 1949, the Federal Government inaugurated a Government-wide effort to improve real and personal property management, including procurement, warehousing, traffic, utilities, and records management. In the last few months, special emphasis has been given to measures to eliminate every nonessential requirement for supplies and equipment; to set inventory ceilings at minimum levels in each agency and make any excess stocks available to other agencies; to screen thoroughly all surplus property declarations before making sales to the public; and to reduce the volume of records so as to release scarce office space and equipment.

Payments on Federal real estate.—As an outcome of conferences with State and local government officials, a proposal will shortly be transmitted to the Congress for a general plan to reduce the effects of Federal real estate acquisitions on State and local government finances. Payments to State and local governments would not generally begin until the second year after enactment of this measure.

Civilian employees retirement.—The Budget includes 320 million dollars for the annual Government contribution to enable the civil-service retirement and disability fund to cover its currently accruing obligations. Federal employees covered by the system are required by law to contribute 6 percent of their salaries toward future benefits. The Government contribution, designed to cover the remaining cost of benefits, amounts to approximately 2.6 percent of the payrolls of covered employees plus interest on the Government's liability to the fund for deficiencies in previous contributions.

Federal Reserve Bank of St. Louis

INTEREST

The interest payments made by the Federal Government arise primarily from the huge additions made to the Federal debt in World War II. All interest payments are financed by permanent indefinite appropriations and therefore do not require annual Congressional action.

INTEREST

[Fiscal years. In millions]

Item	Expenditures			Obligational authority (permanent indefinite)
	1950 actual	1951 estimated	1952 estimated	
Interest on the public debt	[1] $5,720	$5,625	$5,800	* $5,800
Interest on refunds	93	90	92	92
Interest on uninvested trust funds	4	7	5	5
Total	5,817	5,722	5,897	5,897

[1] Includes 225 million dollars in nonrecurring payments resulting from a shift in reporting methods.

Interest on the public debt.—Interest payments on the public debt are estimated at 5.8 billion dollars for the fiscal year 1952, continuing the gradual increase of recent years. This increase is the product of a great number of factors, relating not only to the amount of Federal securities outstanding, but also to the composition of the debt by type of security and the interest rate structure of the debt.

About one-third of the increase in interest for the fiscal year 1952 is accounted for by the continued expansion of special issues to Government trust funds at rates of interest higher than the average on the public debt as a whole.

Second, the current increase in public debt is also reflected in higher interest expenditures.

A third important factor is the accrual of interest on savings bonds. These accruals are continuing to increase as the large volume of World War II savings bonds gets closer to maturity. Interest on savings bonds alone accounts for a little more than one-fourth of the total interest on the public debt. Most of this interest is received by individuals and is a reflection of the widespread distribution of the public debt at the present time.

Interest on refunds.—On most refunds of receipts interest is paid because the Federal Government has had temporary use of the funds.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

Most of the refunds result from overpayment of taxes. The interest rate paid on tax refunds, like that collected on tax deficiencies, is considerably higher than the average rate paid on the public debt.

I have presented a Budget to meet our country's needs in a period of danger.

We are building the military and economic strength which alone has meaning to the men who control world communism. This is the only realistic road to a world peace based on justice and individual freedom.

For the third time in this century we as Americans must subordinate our peacetime goals to what is required for the survival of the Nation. Our national objectives in the coming months demand unity of purpose among us and a spirit of dedication on the part of everyone. Our young men will devote more years to military service. All of us will work longer and harder than we have worked before. We will pay much heavier taxes. We must defer, in many cases, new governmental programs to enrich our national life and contribute to our individual and family welfare. But in return we will get something precious—strength to meet and overcome the barbaric threat of communism in whatever manner it confronts us.

We in this Nation have always, in time of national emergency, risen with unity and vigor to the defense of our free institutions and way of life. We are responding now. We go forward with faith and confidence to meet and win the tests ahead.

HARRY S. TRUMAN.

INTRODUCTION TO PART I

Part I of the Budget summarizes the President's estimates of receipts and expenditures of Federal funds for the fiscal year ending June 30, 1952, and presents comparable data for 1950 and 1951. It also summarizes the action which the President proposes that Congress take to authorize Government agencies to incur obligations and to make expenditures, and the authorizing action previously enacted by Congress for these same years. Thus, the Budget shows the financial plan for the year and the action recommended to carry out that plan.

Authorizations come to a different total than expenditures. This is due to several factors. The primary reason is that most authorizations are estimates of, and become limitations upon, the amount of obligations which can be incurred during a given period of time, and the actual expenditures in payment of these obligations may occur later. Most appropriations remain available for making payments 2 years after the obligations are incurred. A second important reason is that some authorizations permit obligations to be incurred over a period of more than a year, sometimes without time limit. Therefore, part of the expenditures in any fiscal year are chargeable to authorizations granted earlier, and part of the authorizations granted in any fiscal year will result in expenditures in a later year. A third factor is that a part of some authorizations are never spent due to economies and changes in requirements which develop after the authorizations are enacted.

Types of Funds

The Budget distinguishes two main groups of funds: "Federal funds," which are owned by the Government, and "trust funds," which are held by the Government as trustee or banker. Parts I and II of the Budget generally deal with Federal funds, while part III deals with trust funds.

The Budget distinguishes four kinds of Federal funds and two kinds of trust funds, as follows:

The general fund consists of receipts not earmarked for specific purposes by law, and it is charged with appropriations and expenditures which are payable "out of any money in the Treasury not otherwise appropriated." Accounts not designated otherwise in the Budget are general fund items.

Special funds are credited with those receipts belonging to the Government which are earmarked by law for a specific purpose, except for those receipts which go into the two types of funds named immediately below. They are charged with appropriations and expenditures payable from such earmarked receipts.

Business enterprise funds are established on a revolving basis to carry out a cycle of business-type operations for Government-owned corporations and for certain other enterprises of a commercial nature.

Revolving funds are established to carry out a cycle of operations primarily within the Government, such as the general supply fund.

Trust funds (proper) are funds which are credited with receipts held in trust by the Government; such moneys are appropriated and expended for the purposes for which the trust was established.

Deposit funds (held in trust) consist of money which is held by the Government as fiscal agent or banker for others, together with amounts held in suspense pending a determination as to the accounts to which they should be credited or a determination as to whether they should be refunded.

Budget Receipts, Expenditures, and Deficit

Meaning of budget totals and budget deficit.—The "budget" totals used in table 1 and various other tables refer to the receipts and expenditures of the Federal funds. The "budget deficit" is the amount by which the expenditures of Federal funds exceed the receipts. Government borrowing and the repayment of borrowing are excluded from receipts and expenditures. The investments in United States securities on the part of business enterprise funds and the redemption of such investments are similarly excluded. (These items are shown in special analysis H of part IV.)

Certain transactions between Federal funds have been eliminated from the budget tables. This is standard accounting practice and is necessary in order to avoid inflating both sides of the budget. It has no effect upon the amount of the surplus or deficit. Such items, called "capital transfers," represent payments from business enterprise funds into miscellaneous receipts of the general fund, for retirement of capital previously advanced by the general fund and for distribution of earnings. (These items are listed in special analysis H of part IV.)

Basis of receipts figures.—Receipts are generally reported on the basis of amounts collected and covered into the Treasury to the credit of the general fund and of special funds. Refunds of receipts and the appropriations from the general fund for the Federal old-age and survivors insurance trust fund are shown as deductions from receipts. No receipts are shown for the business enterprise funds and the revolving funds (see next paragraph).

Basis of stating expenditures.—Expenditures are stated on a checks-issued basis, including checks issued to make contributions from Federal funds to trust funds. An exception is interest on the public debt, which is reported on the basis of amounts becoming payable. In the case of business enterprise funds and revolving funds the expenditures are on a net basis; that is, the budget statements reflect the net amount by which the expenditures exceed the collections of those funds in the fiscal year. Where the collections are larger than the expenditures, the amount is shown in the expenditure tables as a negative item. Expenditures in total for the fiscal year 1950 are adjusted to the daily Treasury statement.

Expenditures are net of refunds credited to appropriations. Reimbursements from other accounts and certain payments received from outside the Government have also been netted against expenditures.

Types of Authorizations

Appropriations.—Appropriations are authorizations to make expenditures from the Treasury. Some appropriations are made by standing law and do not require action by Congress each year; these are called permanent appropriations. They are included with other appropriations in the various tables of part I, but are also set out separately in special analysis I of part IV. Most appropriations are not only authorizations to expend but are also authorizations to incur obligations which will require the future payment of money. In some cases, the authority to incur obligations has previously been granted in the form of contract authorizations; in such cases, the portion of the appropriation which is to permit the payment of such obligations is called an "Appropriation to liquidate contract authorization." Appropriations are usually available for obligation for 1 year, and for making payments on such obligations an additional 2 years. Some appropriations are available for 2 or more years; some are available without time limit.

Contract authorizations.—A contract authorization is a statutory authorization empowering designated agencies to enter into contracts and incur obligations prior to the enactment of an appropriation. A contract authorization does not provide the authority to make expenditures; hence, it must be followed by an appropriation to liquidate it. Most contract authorizations appear in annual appropriation acts; a few are made by substantive legislation. All contract authorizations are included in part I, but those made by substantive legislation are also set out separately in special analysis I of part IV.

Authorizations to expend from public debt receipts.—In lieu of appropriations, the law in some cases authorizes expenditures to be made directly from money which the Treasury is directed to borrow. Such spending is an authorization as much as an appropriation is, and the spending under such authorizations has the same effect on budget totals and on the deficit as does the spending of money which has been directly appropriated. A variety of this type of authorization is the cancellation of notes of a Government enterprise to the Treasury under circumstances where the cancellation restores or in effect increases the authority to expend from public debt receipts.

Reappropriations.—A reappropriation continues the availability of part or all of the unused balance of a prior appropriation which would otherwise expire for obligation purposes. Most reappropriations are in annual appropriation acts. In a few cases, such as the Department of Defense, Congress has authorized agencies to take the action which effects the reappropriation under certain circumstances; such reappropriations are included with the others in part I.

Total budget authorizations.—The sums of all the foregoing authorizations are totaled in certain tables of part I. It should be noted, however, that this total includes both the new authority to obligate and the authority to liquidate previous obligations.

New obligational authority.—The sum of the authorizations, less the portion of appropriations which is to liquidate contract authorizations, comprises the new authority to incur financial obligations. This figure, used in certain tables, is the best measure of authorizations (granted or recommended) to make commitments in a given year.

Authorizations for expenditure.—The sum of all authorizations except contract authorizations comprises the authority to make payments from the Treasury. This term as used in the tables herein measures the new authority granted or recommended to make expenditures; however, as explained earlier, the cash outgo authorized in any given year will not all occur within that year.

Adjustments of Appropriations

The authorization columns of the Budget reflect adjusted appropriation amounts where there are transfers between appropriations, if (*a*) the transfer is for the purposes of the receiving appropriation, not the paying appropriation, (*b*) future appropriations for similar purposes will be requested under the receiving appropriation, due to a reorganization, or (*c*) Congress has specifically authorized the transfer in a definite amount.

Distinction Between Present Recommendations and Probable Later Transmissions

The summary tables in this Budget are presented on a comprehensive basis. However, certain items therein are transmitted in detail in this Budget (part II), while detail for other items will be transmitted later. In the tables of part I the items which will be submitted in detail later are placed in separate columns or separate sections from the rest of the items. These items on which detailed language for enactment is not included in this Budget are: (*a*) estimates of appropriations and authorizations to carry out certain items of existing legislation (to be submitted later when the amounts required can be determined more precisely); and (*b*) appropriations and other authorizations to carry out proposed legislation; (*c*) allowance for items which cannot be foreseen now, but which will be transmitted later when needs arise; and (*d*) proposed legislation regarding tax receipts.

Classifications of Authorizations and Expenditures

Two major classifications are used in the tables of part I: Classification by functions in tables 1 and 2, and by organizational units in tables 4, 5, 6, and 7.

The functional classification indicates the broad purposes and programs of the Government. A list of the changes in this classification between the 1951 Budget and the 1952 Budget is contained in special analysis J of part IV.

The organizational unit classification indicates the agency to which the funds are appropriated. In other recent Budgets, the tables by organization unit indicated the agency actually making the expenditures. In this Budget, however, the tables show expenditures under the agency responsible for the appropriation.

Analysis of Expenditures by Year of Authorization

Table 7 contains the same type of expenditure analysis by year of authorization as is shown in the tables which appear at the head of each chapter of part II. An explanation of the basis for the columnar breakdown is contained in the introduction to part II.

INTRODUCTION TO PART II

Part II presents tables on appropriations and expenditures of Federal funds, together with the detailed Budget presentation for proposed appropriations which are recommended to Congress for action at this time and for the appropriations of Federal funds on which Congress has already acted. The material covers the fiscal years 1950 and 1951 as well as the fiscal year 1952. In addition to Federal funds, the detailed presentation includes estimates for trust funds or portions thereof which require annual congressional action.

ARRANGEMENT OF MATERIAL BY CHAPTERS

The contents of part II are arranged in chapters. There is one each for the Legislative Branch, the Judiciary, the Executive Office of the President, funds appropriated to the President for allocation to the various departments and agencies, the three large independent agencies, each Executive department, and the District of Columbia. There is also a chapter for all of the remaining agencies.

Detailed estimates for certain appropriations, including the military functions of the Department of Defense, are not included in this volume, but will be transmitted to the Congress in supplementary estimates at a later date.

LEAD-OFF TABLE FOR EACH CHAPTER

A table at the head of each chapter lists the individual appropriations and other authorizations by accounting title, and shows the amounts of the authorizations and related expenditures for 1950 (actual), 1951 (actual and estimated), and 1952 (estimated).

The chapter summaries are divided into two principal sections—one for appropriations and other authorizations already enacted or recommended in detail in this Budget, and another for supplemental authorizations to be transmitted in detail for action later.

Within each of these main sections, a distinction is drawn between general and special funds on the one hand, and business enterprise and revolving funds on the other hand. General fund advances and contributions to business enterprise and revolving funds are shown in the section for the latter funds, rather than in the general and special fund group.

Authorizations other than direct appropriations are set forth under the applicable appropriation titles, identified by separate stub entries. The recapitulation at the end totals the authorizations by type to indicate the totals of new expenditure authority, new budget authorizations, and new obligational authority.

Authorizations shown in the table include the new amounts becoming available each year, including those becoming available under permanent authorizations, but exclude balances carried forward automatically from authorizations of previous years. Generally, the amounts shown in the authorization columns have been adjusted to reflect the transfers made subsequent to enactment of the authorization, where (*a*) the transfer is to carry out the purposes of the receiving appropriation, not the paying appropriation, (*b*) where future appropriations for similar purposes will be requested under the receiving appropriation, due to a reorganization or a change in appropriation pattern, or (*c*) where Congress has specifically authorized the transfer in a definite amount.

In these tables the expenditures are shown on the same line as the related authorization or appropriation. Hence, the expenditures for a given item include advances and reimbursements made to other agencies; likewise, the expenditures for any agency exclude the payments which are financed through advances or reimbursements received from other agencies. Expenditures from allocation accounts and working funds are reflected in the expenditures of the parent appropriations.

The expenditures for 1950 are analyzed, by columns, to reflect separately the amounts paid during the year out of (*a*) 1948 one-year appropriations, (*b*) 1949 one-year appropriations, (*c*) 1950 one-year appropriations, and (*d*) all other authority. The last-named column includes expenditures out of appropriations and other authorizations made in 1948, 1949, and 1950, wherever the appropriations were available for more than the 1 year and wherever the appropriations are by law added to the balances of appropriations of previous years. It also includes expenditures out of appropriations and other authorizations made prior to the fiscal year 1948.

The 1951 and 1952 expenditure estimates are broken down in a different manner from the 1950 figures. For 1951 and 1952 the breakdown is between (*a*) expenditures out of appropriations and other authorizations which became available before the year in which the expenditure takes place, and (*b*) expenditures out of authorizations becoming available in the year of expenditure. In cases where new authorizations are merged with balances of prior years, it has been generally assumed that the older money available will be obligated before the new money is obligated, and that expenditures will reflect a liquidation of those obligations on the basis of previous experience.

ARRANGEMENT OF DETAILED MATERIAL

The detailed material generally follows the order of the chapter summaries. Within any particular bureau or independent agency, the accounts requiring congressional action are generally shown ahead of the other accounts. Bold-face headings are used for the account titles requiring action; light-face italic headings are used for the accounts which do not require action.

MATERIAL ON GENERAL AND SPECIAL FUNDS

Text of appropriation acts.—The language proposed by the President for inclusion in the 1952 appropriation act is printed at the head of each item requiring action. The language in appropriation acts for the fiscal year 1951 is used as a base. Brackets are set around the material therein which is proposed for omission in 1952; proposed additions are printed in italics. Immediately following the language are citations to relevant laws and the latest appropriation acts, after which the amounts of the 1951 appropriation and the 1952 estimates are printed in bold-face type. Adjusted amounts of appropriations and estimates are also shown.

Schedule of funds available.—For each account there is shown a brief schedule which lists the appropriations made or required, transfers in and out, the amount of the appropriations after adjusting for the transfers, other new authorizations for obligation, and unobligated balances

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

brought forward (where they are available for obligation), coming to a "Total available for obligation." From this figure there are shown deductions for the amounts not used within the year, leaving the amount of "Obligations incurred." These represent orders placed, contracts awarded, etc., during the year regardless of the time of payment. (Where the cost of an activity has been moved from one appropriation account to another for 1952, the schedules will often show a "Comparative transfer" of the obligations for that purpose in the years 1950 and 1951, in order that obligations for all 3 years under both appropriation titles will be on a consistent basis.)

Narrative statements.—The work planned and services proposed to be carried out are described briefly under each appropriation account. Where practicable these narrative statements indicate the expected accomplishment in relation to the financial estimates and give some measures of program and performance. While the emphasis in the narratives is upon the fiscal year 1952, significant changes in character or scope of the program between 1951 and 1952 are usually indicated. In the case of permanent appropriations, the narrative statements also explain the source of the money and the statutory basis for the appropriation.

Schedule of obligations by activities.—Financial requirements are broken down by purpose, program, project, or activity. This breakdown is especially tailored for each agency and account, reflecting its particular duties and responsibilities.

Schedule of obligations by objects.—There is also shown for each account a classification of the obligations incurred, according to a uniform list of objects of expenditure. These object classes, numbered from 01 to 16, reflect the nature of the services or things purchased, regardless of the purpose or the nature of the program for which they are used.

MATERIAL ON BUSINESS ENTERPRISE FUNDS

Business-type budgets submitted under the Government Corporation Control Act contain narrative statements describing their programs, operating results, and financial condition, together with financial statements as follows:

Source and application of funds (statement A).—This is a balanced presentation of the amounts becoming available during the year, either in the form of cash or other working capital, the way in which those amounts have been applied, and the increase or decrease in working capital. Appended is an analysis of the effect of the enterprise's financial operations upon the budgetary expenditures of the Government.

Income and expense and analysis of earned surplus (statement B).—A statement of income and expense and the resulting profit or loss for the year is shown. This is followed by an analysis of the retained earnings or cumulative deficit, showing any additions to it or charges made against it in the year.

Financial condition (statement C).—A balance sheet of assets, liabilities, and the investment of the Government completes the major business-type statements. This shows the Government's financial interest as owner and creditor, broken down to indicate the portion of the investment on which an interest charge accrues.

Additional detail for certain items on statements A, B, and C is sometimes carried in supporting schedules, appropriately numbered and cross-referenced to the main statements. For appropriations made to the business enterprises, and for administrative expense limitations, there are shown the texts proposed for inclusion in the appropriation act, and schedules somewhat similar to the material presented for general and special funds.

MATERIAL ON REVOLVING FUNDS

Brief statements of income and expense and of financial condition are shown for the internal revolving funds of the Government. These indicate the profit or loss being made by such funds, and the amount of earnings retained, if any.

Such statements usually take the place of the schedule of activities shown for most general and special funds. Schedules of funds available, narrative statements, and a breakdown of requirements by object class are shown for revolving funds in the same manner as for general and special funds.

OTHER FINANCIAL SCHEDULES AND DATA

Motor vehicle and aircraft summaries.—In accordance with law, there is presented for each agency a schedule relating to passenger-carrying motor vehicles and aircraft. These statements cover certain elements of cost, the number of vehicles or planes required, and the use for which they are needed in 1952.

Funds available for appropriation.—In the few instances where receipts earmarked by law for specified purposes are reserved, subject to annual appropriation, rather than being permanently appropriated, a special schedule of "Funds available for appropriation" is printed. This shows the amount of earmarked balances and the receipts which are available to finance the annual appropriations therefrom.

Mixed-ownership corporations.—There are some corporations in which the United States Government owns only part of the capital stock. These are not subject to the usual budgeting procedures. A brief narrative and balance sheet are printed in these cases.

Foreign currency.—Special schedules of foreign currency acquired and used are printed in a few cases where the law permits agencies to receive and use such foreign currency in addition to their appropriations. The schedules are expressed in United States dollar equivalents.

DETAIL OF PERSONAL SERVICES

The detailed schedules of personal services, printed in the Budgets of 1950 and prior years, are now contained in a separate volume entitled "Appendix to the Budget." The appendix volume also includes the same schedules of obligations by objects as are printed herein.

LIBRARY OF CONGRESS—Continued

INTRODUCTORY STATEMENT—Continued

Government of the United States, complemented in special fields by other Government libraries. Its collections are comprehensive and varied and include important manuscripts, maps, music, prints, photographs, newspapers, documents of all governments of the world, Oriental literature, etc. In addition to housing the collections and performing general and basic services connected therewith, certain specialized functions are performed: The Legislative Reference Service, copyright, catalog-card distribution, and the service of books in raised characters and talking books to the adult blind. In terms of these broad fields of activity, comparative obligations (including only those chargeable to annual appropriations) for 1950 and estimated for 1951 and 1952 are—

	1950 actual	1951 estimate	1952 estimate
General and basic services:			
Acquisitions	$985,314	$944,635	$1,138,807
Organization of the collections	1,243,552	1,323,193	1,497,244
Reader and reference services	1,209,246	1,159,306	1,308,665
Maintenance and protective services	658,680	698,680	734,500
Executive direction and general administrative services	593,822	615,617	693,984
Specialized services:			
Legislative Reference Service	756,921	819,402	937,600
Copyright	848,672	929,500	990,100
Catalog-card distribution service	1,011,368	1,102,600	1,137,300
Books for the adult blind	999,609	1,000,000	1,000,000
Total obligations	8,307,184	8,592,933	9,438,200

The Library's first obligation is to Congress; the second to other agencies of the Government; and the third to other libraries, scholars, investigators, and the general public.

In addition to funds appropriated annually by Congress, there are also available a number of gift and trust funds, working and allocated funds.

Certain responsibilities for the physical equipment, maintenance, and operation of the Library buildings rest by law with the Architect of the Capitol, and estimates for these purposes are carried under the request of that office.

For the general and basic services, the major objective in 1952 will be the strengthening of the reference staff specializing in the critical areas of the world to enable the Library to offer adequate service in the current emergency, particularly to Congress and Federal agencies; and the concomitant strengthening of the acquisitions and cataloging programs to make such service possible. Some additions to the staff are proposed for a few operations which are threatened with a serious breakdown. The new projects proposed are limited to two, both dealing with American history: The microfilming of weekly newspapers, and Writings in American History. For the specialized services, the objectives in 1952 will be the strengthening of staff, organization, and techniques to meet the demands of Congress (Legislative Reference Service) and of the public (copyright, catalog card distribution, and the service of books for the adult blind).

Salaries, Library Proper, Library of Congress—

Salaries, Library proper: For the Librarian, the Librarian Emeritus, and other personal services including special and temporary services and extra special services of regular employees (not exceeding $5,000) at rates to be fixed by the Librarian, services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a), and personal services for printing and binding, [$3,044,000] *$3,511,000*, of which so much as may be necessary may be transferred to other agencies of the Government for the purpose of investigating the loyalty of Library employees, and for health service program as authorized by law. (*2 U. S. C. 131–166; 5 U. S. C. 150; 20 U. S. C. 91; 52 Stat. 808; Legislative Branch Appropriation Act, 1951.*)

Appropriated 1951, **$3,044,000** Estimate 1952, **$3,511,000**

FUNDS AVAILABLE FOR OBLIGATION

Unobligated balance, estimated savings	−295		
Total direct obligations	2,911,965	3,044,000	3,511,000
Reimbursable Obligations			
Reimbursements for services performed	4,435		
Total obligations	2,916,400	3,044,000	3,511,000

PROGRAM AND PERFORMANCE

Personal services required for the basic operations of the Library are financed from this appropriation.

1. *Acquisition of library materials.*—The development of the collections of the Library is planned; materials are procured by purchase, gift, exchange, copyright deposit, transfer, or otherwise; and materials are selected for addition to the collections. The objectives for 1952 are: Greater selectivity and improved efficiency in the procurement of materials, with emphasis on the publications of the Far East, Near East, South Asia, and Eastern Europe; improvement in recording the receipts and holdings of serial publications; and the strengthening of exchange relations with institutions in these areas. The collections totaled 28,691,350 items as of June 30, 1950, and consisted of 8,956,993 books and pamphlets, 11,970,000 manuscript pieces, and 7,764,357 maps, pieces of music, reels of microfilm, photographs, and the other miscellaneous items. A continued increase in receipts from various sources is anticipated in 1951 and 1952:

Description	1950 actual	1951 estimate	1952 estimate
Purchase	534,247	500,000	550,000
Copyright	359,163	377,000	395,000
Transfer and deposit (principally from Government agencies)	3,569,885	4,000,000	4,250,000
Gift from individual and unofficial sources	742,635	900,000	900,000
Exchange	600,456	625,000	650,000
Source unidentified (mainly newspaper and periodical issues)	2,380,755	2,500,000	2,500,000
Total	8,187,141	8,902,000	9,245,000

Of the pieces received, about 1½ million items, excluding unbound newspapers, periodicals, and other serial parts, are added to the collections annually.

2. *Organization of the collections.*—Library materials are cataloged, classified, marked, and arranged; Library of Congress catalogs maintained; and binding operations controlled. The objectives for this activity in 1952 are: Improvement of the cataloging of scientific publications and the cataloging of additional foreign-language publications.

Selected performance data for 1950 and estimated for 1951 and 1952 are as follows:

Description	1950 actual	1951 estimate	1952 estimate
Volumes fully cataloged and added to the classified collection (including work performed by copyright cataloging)	130,815	140,000	150,000
Items otherwise organized for use (without full cataloging)	47,701	40,000	40,000
Cards filed in catalogs	1,489,847	1,364,000	1,500,000
Volumes sent to bindery	64,948	60,000	65,000
Items repaired, cleaned, mounted, etc	137,849	140,000	140,000

NOTE.—These figures cover cataloging for the collections of the Library performed by the processing department and the Copyright Office and do not reflect cataloging, filing, and related processing operations performed by other departments of the Library.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

3. *Reader and reference service.*—Books and other library materials are served to readers, reference assistance is rendered, and loans are made. The objectives of this activity for 1952 are: More adequate service to readers during the 52 hours of full service and the 26 hours of limited service; the expansion of the area specialization program in such regions of critical importance as the Near and Far East and eastern Europe, and the undertaking of a new project, editing of the annual publication, Writings in American History. The upward trend in workload is expected to continue in 1951 and 1952:

Description	1950 actual	1951 estimate	1952 estimate
Books and pamphlets served	1,606,236	1,630,000	1,645,000
Other units of material served	564,446	590,000	605,000
Units issued on loan	209,913	215,000	225,000
Reference inquiries answered (includes telephone requests for reference service and loans, aid to readers, and reference conferences)	657,220	675,000	692,000
Reference letters	30,230	35,000	38,000

4. *Executive direction and general administrative services.*—Over-all executive direction is given and general administrative services are provided for the entire staff of the Library. Positions under this activity represented 7.53 percent of the total number of positions (inclusive of the full-time equivalent of part-time and temporary positions) financed by appropriated funds during 1950; estimated for 1951 and 1952, they will represent 7.39 percent and 7.07 percent, respectively. Emphasis during 1952 will be placed on the management improvement program, for which four positions are proposed.

OBLIGATIONS BY ACTIVITIES

Unobligated balance, estimated savings	−272		
Total obligations	819,456	890,000	950,600

PROGRAM AND PERFORMANCE

The Copyright Office is responsible for recording and cataloging all copyright applications, assignments, and renewals, supplying copyright information to the public; and for collecting and accounting for copyright fees. The Office is conducted as a business operation. The amount requested for personal services is approximately equal to the fees received for services rendered. In addition, the value of books and other library materials deposited in accordance with the Copyright Act and transferred to the Library's collections should also be credited to the copyright operation. The income and costs for 1950 and estimates for 1951 and 1952 are as follows:

	1950 actual	1951 estimate	1952 estimate
Income:			
Fees applied	$849,661	$892,144	$936,751
Estimated value of materials deposited and transferred to the Library's collections	564,990	593,208	622,836
Total	1,414,651	1,485,352	1,559,587
Costs:			
Salaries	819,728	890,000	950,600
Printing and binding, catalog of title entries	29,216	39,500	39,500
Other costs	36,407	32,100	31,700
Total	885,351	961,600	1,021,800

The objective for 1952 is to keep current with the workload at all times and to render prompt and efficient service to the public. The program and performance under each of the activities described are predicated on an estimated 232,000 copyright registrations during 1952, an estimated 221,000 during 1951, and an actual 210,564 during 1950. The basis for the estimated increase between 1950 and 1952 is the actual increase in registrations (4.6 percent) between 1949 and 1950.

1. *Receiving and accounting for applications, fees, and correspondence.*—All materials dispatched or delivered to the Copyright Office are received, assembled, and routed; accounts maintained for all moneys received;

Federal Reserve Bank of St. Louis

LIBRARY OF CONGRESS—Continued

COPYRIGHT OFFICE—continued

Salaries, Copyright Office, Library of Congress—Continued

records relating to the registration of copyrights filed; and materials deposited in accordance with the Copyright Act. Performance data for 1950 and estimates for 1951 and 1952 are as follows:

Description	1950 actual	1951 estimate	1952 estimate
Registrations	210,564	221,000	232,000
Mail received and dispatched	566,757	595,000	624,700

2. *Examining copyright applications.*—All applications and deposits are examined before issuance of registration certificates or recording of documents to determine whether the provisions of the Copyright Act have been satisfied. Performance data for 1950 and estimates for 1951 and 1952 are as follows:

Description	1950 actual	1951 estimate	1952 estimate
Items examined for registration	272,984	286,600	300,900
Registrations	210,564	221,000	232,000
Examination and recordation of documents	7,565	7,900	8,300

3. *Indexing and cataloging all materials received.*—The Register of Copyrights is required to print complete and indexed catalogs of all items registered. In the interest of over-all economy and the elimination of overlapping activities, the Copyright Office also prepares full catalog entries (in the case of music including classification; in all other cases not including classification or subject headings) in accordance with Library of Congress cataloging rules on about 10 percent of the items registered. Performance data for 1950 and estimates for 1951 and 1952 are as follows:

Description	1950 actual	1951 estimate	1952 estimate
Registrations cataloged	210,564	221,000	232,000

4. *Reference services.*—The Copyright Office makes available to the public information concerning the provisions of the Copyright Act, including procedures, policies, and rulings; and information concerning registrations is furnished on a fee basis. Obtaining compliance with registration requirements is also part of this activity. Performance data for 1950 and estimates for 1951 and 1952 are as follows:

Description	1950 actual	1951 estimate	1952 estimate
Titles searched	28,414	29,800	31,300
Letters and search reports written	18,810	19,700	20,700

5. *General supervision and legal services.*—The work of the Copyright Office is supervised and coordinated; this includes legal services relating to the status and improvement of the copyright law in its foreign as well as domestic aspects, such improvement constituting the major objective under this activity in 1952.

OBLIGATIONS BY ACTIVITIES

LEGISLATIVE REFERENCE SERVICE

Legislative Reference Service, Library of Congress—

Salaries and expenses: For necessary personal services to enable the Librarian to carry out the provisions of section 203 of the Legislative Reorganization Act of 1946, including not to exceed $20,000 for employees engaged by the day or hour at rates to be fixed by the Librarian; services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a); printing and binding; and supplies and materials; [$790,000] *$922,100. (2 U. S. C. 131, 136, 139, 150, 164a, 166; Legislative Branch Appropriation Act, 1951.)*

Appropriated 1951, **$790,000** Estimate 1952, **$922,100**

Reimbursable Obligations			
Reimbursements for services performed	1,308		
Total obligations	721,654	790,000	922,100

PROGRAM AND PERFORMANCE

To carry out the objectives of the Legislative Reorganization Act of 1946, research reports and digests are prepared and inquiries from Members and committees of Congress relating to legislative problems and programs are answered. The objectives for 1952 are: The readjustment of all activities to an anticipated increase in the number of inquiries and more adequate research coverage in areas of congressional concern.

1. *Authoritative research and analysis.*—The Legislative Reorganization Act of 1946 specifies 21 fields of specific congressional concern. During 1951 the following 13 fields, all carried forward from 1950, are to be covered: International economics, international relations, taxation, and fiscal policy, American government and administration, conservation and natural resources, social welfare, American law, labor economics, engineering and public works, transportation and communications, national defense, housing, and money and banking. It is proposed in 1952 to add 2 additional fields: Veterans' affairs and industrial organization and corporation finance.

2. *General research.*—General research is performed and reports furnished; spot reference inquiries answered; graphs, charts and illustrations prepared; and translations

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

made. Congressional inquiries numbering 34,860 in 1950, which was 52 percent over 1949, are expected to increase to 37,000 in 1951 and 39,000 in 1952. Sufficient staff is requested for 1952 to provide more adequate handling of the substantial increase in inquiries since 1949.

3. *Preparation of abstracts, indexes, digests, and summaries.*—The Digest of Public General Bills covered 10,797 bills during the Eightieth Congress and 15,707 bills during the Eighty-first Congress (to September 23, 1950); a further increase is expected during the Eighty-second Congress. During the last 6 months of fiscal 1950, 10 topics of congressional concern were covered by Public Affairs Abstracts; it is estimated that, during 1951, 20 topics will be covered and the same number during 1952. During the second session of the Eighty-first Congress, the one available hearings reporter prepared 365 pages of Summaries of Committee Hearings covering 5 series totaling 180 separate sessions of congressional hearings; it is proposed in 1952 to add 3 hearings reporters to quadruple the coverage of the summaries.

4. *Reference files, bibliographic and reader services.*—Reference files, containing clippings, pamphlets, and documents, are maintained; researchers supplied with bibliographic and reference tools; selective and comprehensive bibliographies prepared for Members and committees of Congress; and reader services provided by the Congressional Reading Room. During 1950, 39,400 clippings, pamphlets, and documents were classified by subject, identified as to date and source, and added to the reference files; 13,500 bibliographic entries prepared; 30,000 booklets, pamphlets, duplicated publications and similar materials were classified by subject and added to the reference shelves; and 3,125 readers served. No increase in the level of this activity is expected in 1951 or 1952.

5. *General supervision.*—The equivalent of eight positions is devoted to over-all direction and supervision of the Legislative Reference Service, and no increase is requested for 1952.

Unobligated balance, estimated savings	−284		
Total obligations	507,452	552,100	586,800

PROGRAM AND PERFORMANCE

The work of the Card Division is that of a mail-order house doing a business of about $1,000,000 per annum. It maintains a stock of over 159,000,000 cards, representing 2,000,000 titles, and fills orders for more than 8,900 subscribers in the United States and abroad. It also prepares and offers for sale certain publications. More than 97 percent of this appropriation is chargeable to the cost of card and publication sales, and this cost plus 10-percent profit is returned to the Treasury. The remaining 3 percent represents a service to the Library of Congress. The objectives for 1952 are: The greater use of card reproduction by means other than printing, expediting operations with resulting reduction in costs to card subscribers, and increasing the utility of the Library's Author and Subject Catalogs in book form.

1. *Supplying cards to the Library of Congress.*—The number of cards supplied to the Library of Congress in 1950 was 4,071,260; estimated for 1951, 4,197,676, and for 1952, 4,551,298.

2. *Sale of cards.*—The number of cards sold in 1950 was 21,594,989; estimated for 1951, 22,000,000, and for 1952, 22,500,000.

3. *Preparation and distribution of publications.*—Continued emphasis will be placed on the improvement and wider distribution of the two Library catalogs issued periodically in book form: The Author Catalog (formerly the Cumulative Catalog) and the Subject Catalog, the latter begun in 1950, and both widely accepted as important bibliographic tools.

Unobligated balance, estimated savings	−135		
Total obligations	72,426	77,000	89,300

PROGRAM AND PERFORMANCE

The National Union Catalog is a centralized and cooperatively maintained record of the holdings of more than 700 research libraries of the United States and Canada. It contains an estimated 12,400,000 cards and is consulted daily by libraries and research institutions in all parts of the United States and the world, as well as by representatives of Government agencies, visiting scholars, and the Library's own staff, in order to locate copies of research works. The staff files cards received, notes additional locations for works already represented in the Catalog, eliminates duplicate entries, edits the entries received, and responds to inquiries from other libraries.

It is proposed in 1952 to conduct a survey of special collections of materials not represented in the National Union Catalog, the inclusion of which may have special value at this juncture in history, that is, collections of scientific materials and publications relating to such critical areas as the Near and Far East and eastern Europe, and to begin a program of procuring cards for these materials by photographic reproduction. To the extent possible, the continuing program of adding cards received regularly from other libraries will be maintained, as will the reference service on the Catalog.

The number of cards for, and locations of, research materials added in 1950 was 1,414,000. The same number is estimated for 1951 and 1952. The number of titles searched in response to inquiries in 1950 was 15,815. The same number is anticipated for 1951 and 1952. These figures do not include inquiries answered through the use of the National Union Catalog by readers themselves or by members of the Library outside the Union Catalog Division staff.

OBLIGATIONS BY ACTIVITIES

Maintaining Union Catalogs—1950, $72,426; 1951, $77,000; 1952, $89,300.

INCREASE OF THE LIBRARY OF CONGRESS

Increase of Library of Congress, General—

General increase of the Library: For purchase of books, miscellaneous periodicals and newspapers, photocopying supplies and photocopying labor, and all other material for the increase of the Library, including payment in advance for subscription books and society publications, and for freight and expressage, postage, commissions, and traveling expenses not to exceed $25,000, including expenses of attendance at meetings when incurred on the written authority and direction of the Librarian in the interest of collections, and all other expenses incidental to the acquisition of material for the increase of the Library by purchase, gift, bequest, or exchange, [$270,000] *$330,000,* to continue available during the next succeeding fiscal year. *(2 U. S. C. 131, 132, 132a, 139; Legislative Branch Appropriation Act, 1951.)*

Appropriated 1951, **$270,000** Estimate 1952, **$330,000**

FUNDS AVAILABLE FOR OBLIGATION

	1950 actual	1951 estimate	1952 estimate
Appropriation or estimate	$300,000	$270,000	$330,000
Prior year balance available	92,662	14,393

Balance available in subsequent year	−14,393		
Total obligations	378,269	284,393	330,000

PROGRAM AND PERFORMANCE

This appropriation constitutes the only important means of acquiring regular trade publications except for copyright deposits, for other materials which cannot be obtained except by purchase, and for services related to the increase of the collections. Though only a small proportion of the Library's annual receipts are purchased, this constitutes a most important part of its acquisitions, which is essential to fill in gaps in the collections. Pieces purchased in 1950 totaled 457,022; estimated for 1951, 300,000; and estimated for 1952, 337,500. Of the increase proposed for 1952, $30,000 is for restoration of the $300,000 base appropriation in effect prior to 1951 and $30,000 for an estimated 10-percent increase in prices.

OBLIGATIONS BY ACTIVITIES

Purchase of books and other library materials—1950, $378,269; 1951, $284,393; 1952, $330,000.

Balance available in subsequent year	−9,358		
Total obligations	126,667	94,858	95,000

PROGRAM AND PERFORMANCE

This appropriation constitutes the only important means of acquiring regular trade publications in the legal subjects except for copyright deposits, for other materials which cannot be obtained except by purchase, and for services related to the increase of the law collections. Though a large part of the annual receipts is acquired by means other than purchase, a very substantial and essential part is purchased to fill gaps in the collections. Pieces purchased in 1950 totaled 56,212; estimated for 1951, 40,000; and estimated for 1952, 40,000. The increase proposed for 1952 is for restoration of the $95,000 base appropriation in effect prior to 1951.

OBLIGATIONS BY ACTIVITIES

Purchase of books and other library materials—1950, $126,667; 1951, $94,858; 1952, $95,000

OBLIGATIONS BY OBJECTS

Unobligated balance, estimated savings	−2,324		
Total obligations	22,676	22,500	25,000

PROGRAM AND PERFORMANCE

Books and periodicals are purchased for the library of the Supreme Court, which, though a part of the Library of Congress, is administered under the direction of the Chief Justice.

The increase proposed for 1952 is to pay for increased prices of books and periodicals.

OBLIGATIONS BY ACTIVITIES

Purchase of books and periodicals—1950, $22,676; 1951, $22,500; 1952, $25,000.

OBLIGATIONS BY OBJECTS

09 Equipment (books and other library materials)—1950, $22,676; 1951, $22,500; 1952, $25,000.

Microfilming Weekly Newspapers, Library of Congress—

Microfilming weekly newspapers: For grants to public and private agencies and persons to encourage the preservation in microfilm form of county weekly newspapers, $15,000. (*2 U. S. C. 131, 132, 132a, 139.*)

Estimate 1952, **$15,000**

FUNDS AVAILABLE FOR OBLIGATION

Appropriation or estimate—1952, $15,000.

PROGRAM AND PERFORMANCE

On March 13, 1950, the Joint Committee on the Library voted to "go on record as approving the microfilming of a limited number of weekly newspapers by the Library of Congress providing that any appropriation for such a project shall not exceed $15,000 . . ." It is proposed that the Librarian will issue regulations under which grants will be made for microfilming county weekly newspapers to preserve these important records of State and local history.

OBLIGATIONS BY ACTIVITIES

Acquisition of library materials—1952, $15,000.

OBLIGATIONS BY OBJECTS

11 Grants, subsidies, and contributions—1952, $15,000.

BOOKS FOR ADULT BLIND

Books for Adult Blind, Library of Congress—

To enable the Librarian of Congress to carry out the provisions of the Act entitled "An Act to provide books for the adult blind", approved March 3, 1931 (2 U. S. C. 135a), as amended, $1,000,000, including not exceeding [$70,000] *$100,000* for personal services, not exceeding $200,000 for books in raised characters, and the balance remaining for sound-reproduction records and for the purchase, maintenance, and replacement of the Government-owned reproducers for sound-reproduction records for the blind and not exceeding $1,000 for necessary traveling expenses connected with such service and for expenses of attendance at meetings when incurred on the written authority and direction of the Librarian; and for printing and binding. (*2 U. S. C. 131, 135b, 136, 139, 140; Legislative Branch Appropriation Act, 1951.*)

LIBRARY OF CONGRESS—Continued

BOOKS FOR ADULT BLIND—continued

Books for Adult Blind, Library of Congress—Continued

PROGRAM AND PERFORMANCE

Multiple copies of books in raised characters and phonograph records are selected, purchased, and distributed to 27 libraries, which circulate them among the Nation's adult blind; and phonographs on which these records are played are purchased, distributed, and repaired. The machines are distributed by 55 agencies in the various States, with priority to blind veterans.

The objectives in 1952 are: Continued replacement of obsolete and worn-out talking-book machines and records; stocking new distributing libraries with old and new talking-book titles; continued research to improve machines, records, needles, methods of binding braille books, the study of the reading habits and preferences of braille readers, and the improvement of relations with regional libraries and State and local agencies serving the blind.

1. *Procurement and distribution.*—Books are selected, purchased, and distributed; and talking-book machines are purchased, repaired, and replaced.

Description	1950 actual	1951 estimate	1952 estimate
Talking books purchased (titles)	162	150	150
Embossed books purchased (titles)	137	125	125
Machines:			
Purchased	10,000	10,000	10,000
Repaired	2,702	7,500	7,500
Salvaged-scrapped	4,476	5,000	5,000
Records replaced	148,200	130,000	130,000

2. *Cataloging and reference services.*—Catalogs of talking and braille books are prepared and maintained. In addition to continuing the revision of catalogs, there are in process of revision a pamphlet on braille transcription and a manual for braille proofreaders. Plans for 1952 call for issuance of a union catalog of hand-transcribed braille books, the preparation of which will be initiated in 1951.

PRINTING AND BINDING

Printing and Binding, General, Library of Congress—

General printing and binding: For miscellaneous printing and binding for the Library of Congress, including the Copyright Office, and the binding, rebinding, and repairing of Library books, [$450,000] *$483,000.* *(2 U. S. C. 131, 139, 152; 31 U. S. C. 588, 589; Legislative Branch Appropriation Act, 1951.)*

Appropriated, 1951, **$450,000** Estimate 1952, **$483,000**

FUNDS AVAILABLE FOR OBLIGATION

	1950 actual	1951 estimate	1952 estimate
Appropriation or estimate	$450,000	$450,000	$483,000
Unobligated balance, estimated savings	−122		
Total obligations	449,878	450,000	483,000

PROGRAM AND PERFORMANCE

Printing and binding requirements of the Library of Congress except those which are financed by special appropriations for card and copyright catalog printing are financed by this appropriation. All but a minor part of the costs are for work done by the Government Printing Office branch bindery operated in the Library Annex.

1. *Organization of the collections.*—Books are bound; manuscripts, maps, etc., are repaired; protective boxes and binders purchased; and other miscellaneous bindery operations performed. It is planned in both 1951 and 1952 to bind 65,000 volumes which is approximately the number (64,475) bound in 1950. Increases proposed for 1952 are to meet an estimated 20-percent increase in the price of paper and other supplies and to provide for additional laminating work on maps.

2. *Reference service, publications.*—The Library publishes books and pamphlets, usually of a bibliographical character, and descriptive of materials contained in its collections. An increase proposed for 1952 is to meet an estimated 25 percent increase in book paper prices.

3. *Administrative printing and binding.*—Copyright applications, miscellaneous forms and other printed matter for general administrative purposes are procured; and the Annual Report of the Librarian and the Quarterly Journal of Current Acquisitions are published. The increases proposed for 1952 are to meet an estimated 25 percent increase in book paper prices and 20 percent increase in other paper prices; and to provide for miscellaneous printed forms at the 1950 level.

OBLIGATIONS BY ACTIVITIES

Description	1950 actual	1951 estimate	1952 estimate
1. Organization of the collections:			
(a) Binding and rebinding of books, etc.	$246,733	$255,000	$260,100
(b) Miscellaneous binding, lettering, cutting, punching, and stapling	12,245	12,375	12,623
(c) Protective boxes and binders	7,696	8,700	10,440
(d) Repair of maps, manuscripts, etc.	65,458	65,500	71,810
(e) Print transfer	1,038	3,000	3,000
2. Reference service, publications	37,081	32,600	35,317
3. Administrative printing and binding:			
(a) Miscellaneous cutting, stapling, and punching	4,082	4,125	4,207
(b) Miscellaneous printing of forms	58,850	50,000	65,245
(c) Publications	16,695	18,700	20,258
Total obligations	449,878	450,000	483,000

OBLIGATIONS BY OBJECTS

06 Printing and reproduction—1950, $449,878; 1951, $450,000; 1952, $483,000.

Printing the Catalog of Title Entries of Copyright Office, Library of Congress—

Printing the Catalog of Title Entries of the Copyright Office: For the publication of the Catalog of Title Entries of the Copyright Office and the decisions of the United States courts involving copyrights, $39,500. *(2 U. S. C. 131, 136, 139; 17 U. S. C. 56, 57; 31 U. S. C. 588, 589; Legislative Branch Appropriation Act, 1951.)*

Appropriated 1951, **$39,500** Estimate 1952, **$39,500**

Total	29,216	39,500	39,500

PROGRAM AND PERFORMANCE

The register of copyrights is required to print complete and indexed catalogs for each class of copyright entries. The amount requested for fiscal 1952 is sufficient to cover entries for estimated increase in registrations (22,000), and a bulletin of copyright decisions which will not be ready for printing until 1952.

OBLIGATIONS BY ACTIVITIES

Description	1950 actual	1951 estimate	1952 estimate
1. Catalog of title entries	$29,216	$39,500	$34,500
2. Bulletins of decisions			5,000
Total obligations	29,216	39,500	39,500

OBLIGATIONS BY OBJECTS

06 Printing and reproduction—1950, $29,216; 1951, $39,500; 1952, $39,500.

Printing, Catalog Cards, Library of Congress—

Printing catalog cards: For the printing of catalog cards and of miscellaneous publications relating to the distribution of catalog cards, and for duplication of catalog cards by methods other than printing, $550,500. *(2 U. S. C. 139, 150; 31 U. S. C. 588. 589; Legislative Branch Appropriation Act, 1951.)*

Appropriated 1951, **$550,500** Estimate 1952, **$550,500**

FUNDS AVAILABLE FOR OBLIGATION

	1950 actual	1951 estimate	1952 estimate
Appropriation or estimate	$535,000	$550,500	$550,500
Transferred to "Distribution of catalog cards, Library of Congress," Public Law 583	−16,000		
Adjusted appropriation or estimate	519,000	550,500	550,500
Unobligated balance, estimated savings	−15,084		
Total obligations	503,916	550,500	550,500

PROGRAM AND PERFORMANCE

Approximately 68 percent of this appropriation for the printing of catalog cards and related publications is chargeable to the cost of card and publication sales, and this cost, plus 10 percent profit, is returned to the Treasury; the remaining 32 percent represents service to the Library of Congress. It is planned in 1952 to keep pace with the increased number of titles cataloged.

1. *Card printing for the Library of Congress.*—The number of cards printed in 1950 for the Library of Congress was 3,959,959; estimated for 1951, 4,514,000; and estimated for 1952, 4,514,000.

2. *Card printing for other libraries.*—The number of cards printed in 1950 was 32,039,669; estimated for 1951, 31,463,000; for 1952, 31,463,000. Reduction in the number of cards sent to reserve stock accounts for the reduced number to be printed.

3. *Printing and binding the Author Catalog.*—The Author Catalog is a book catalog of the cards printed by the Library of Congress arranged by author. It is issued monthly and cumulated quarterly and annually. There were 846 paid subscriptions for complete or partial service in 1950; it is estimated that there will be 875 in 1951 and 900 in 1952.

4. *Printing and binding the Subject Catalog.*—The Subject Catalog is a book catalog reproducing cards printed by the Library of Congress and arranged according to subject content of the publications represented. It is published quarterly and cumulated annually. There was no annual cumulation for fiscal year 1950 but there will be for each year thereafter. There were 354 paid subscriptions for 1950; it is estimated there will be 400 in 1951 and 450 in 1952.

5. *Printing and binding of publications related to cataloging.*—These publications are auxiliary to the cataloging activities of the Library of Congress and include the Classification Schedules, lists of Subject Headings, Rules of Descriptive Cataloging and similar publications. A reduction in the publication program is anticipated for 1951 and 1952, as compared with 1950.

OBLIGATIONS BY ACTIVITIES

tive photoduplicating requirements of the Library of Congress. The other part of this appropriation is for minor miscellaneous expenses required for the general administration of the Library not properly chargeable to other Library appropriations. The increases proposed for 1952 are (1) to meet an estimated increase of 20 percent in paper prices, (2) for rental of additional tabulating equipment to be applied to bibliographical controls, and (3) for procurement of supplies and containers to prevent deterioration of the motion picture collection for which the Library continues to have custodial responsibility.

LIBRARY BUILDINGS

Salaries and Expenses, Library Buildings, Library of Congress—

Salaries and expenses: For personal services, including personal services for printing and binding, and necessary miscellaneous expenses in connection with the custody, care, and maintenance of the Library buildings; including not to exceed $750 for employees engaged by the day or hour at rates to be fixed by the Librarian, and including mail and delivery service, telephone service, special clothing, cleaning of special clothing of separated employees, medical supplies, equipment, and expenses for the emergency rooms, housekeeping and miscellaneous supplies and equipment, and other incidental expenses; [$698,680] *$734,500.* (*2 U. S. C. 139–141; Legislative Branch Appropriation Act, 1951.*)

Appropriated 1951, **$698,680** Estimate 1952, **$734,500**

FUNDS AVAILABLE FOR OBLIGATION

	1950 actual	1951 estimate	1952 estimate
Appropriation or estimate		$698,680	$734,500
Comparative transfer from—			
"Salaries, Library buildings, Library of Congress"	$624,749		
"Maintenance, Library buildings, Library of Congress"	33,931		
Total obligations	658,680	698,680	734,500

PROGRAM AND PERFORMANCE

The two Library buildings and the collections and other properties contained therein are maintained, preserved, and protected.

1. *Maintenance services.*—A staff of 203, including 90 part-time charwomen, preserves, cleans, and maintains the Library buildings, collections and grounds; operates telephones, elevators, check stands, motor vehicles, and the laundry; procures and maintains furniture, housekeeping materials, and miscellaneous equipment; assigns space; and operates the receiving room and stockrooms. The 1952 estimates provide for eight additional laborers to render more adequate service to acquisitions and custodial divisions in the physical handling of large quantities of unopened containers and incoming materials; and to improve the cleanliness of the buildings and grounds; for increased prices of housekeeping supplies; and for the replacement of obsolete automotive equipment.

2. *Protective services.*—Constant alertness by the guard force is necessary to prevent fire and theft, for the maintenance of order, and for regular inspections of all areas in both buildings which contain one of the greatest accumulations of national treasures in the world. For adequate coverage 24 hours per day, 7 days per week, a total of 79 duty stations must be manned throughout the year by the 66 guards and 13 officers currently on the Guard Force, which it is proposed to keep at the same level during 1951 and 1952. The 1952 estimates provide for the accelerated replacement of worn and shabby uniforms.

OBLIGATIONS BY ACTIVITIES

PROGRAM AND PERFORMANCE

A contingent fund is provided which usually reverts in whole or in part to the Treasury, but which is used occasionally to meet certain expenses related to the operation of the trust fund board which cannot be met out of any other fund.

OBLIGATIONS BY ACTIVITIES

General administrative services—1951, $500; 1952, $500.

OBLIGATIONS BY OBJECTS

07 Other contractual services—1951, $500; 1952, $500.

Not to exceed ten positions in the Library of Congress may be exempt from the provisions of section [1102] *1202* of chapter [XI] *XII* of this Act, but the Librarian shall not make any appointment to any such position until he has ascertained that he cannot secure for such appointment a person in any of the three categories specified in such section [1102] *1202* who possesses the special qualifications for the particular position and also otherwise meets the general requirements for employment in the Library of Congress. (*Legislative Branch Appropriation Act, 1951.*)

GOVERNMENT PRINTING OFFICE

WORKING CAPITAL AND CONGRESSIONAL PRINTING AND BINDING

Working Capital and Congressional Printing and Binding, Government Printing Office—

To provide the Public Printer with a working capital for the following purposes for the execution of printing, binding, lithographing, mapping, engraving, and other authorized work of the Government Printing Office for the various branches of the Government: For salaries of Public Printer and Deputy Public Printer; for salaries, compensation, or wages of all necessary officers and employees additional to those herein appropriated for, including employees necessary to handle waste paper and condemned material for sale; to enable the Public Printer to comply with the provisions of law granting holidays and half holidays and Executive orders granting holidays and half holidays with pay to employees; to enable the Public Printer to comply with the provisions of law granting leave to employees with pay, such pay to be at the rate for their regular positions at the time the leave is granted; rental of buildings and equipment; fuel, gas, heat, electric current, gas and electric fixtures; [bicycles,] motor-propelled vehicles for the carriage of printing and printing supplies, and the maintenance, repair, and operation of the same, to be used only for official purposes [including] *; purchase (not to exceed one at $2,700 for replacement only)* operation, repair, and maintenance of passenger motor vehicles for official use of the officers of the Government Printing Office when in writing ordered by the Public Printer; freight, expressage, telegraph and telephone service, furniture, typewriters, and carpets; traveling expenses, including not to exceed $1,000 for attendance at meetings or conventions when authorized by the Joint Committee on Printing; stationery, postage, and advertising; directories, technical books, newspapers, magazines, and books of reference (not exceeding [$1,000] *$2,000*); adding and numbering machines, time stamps, and other machines of similar character; purchase of uniforms for guards; rubber boots, coats, and gloves; machinery (not exceeding $500,000); equipment, and for repairs to machinery, implements, and buildings, and for minor alterations to buildings; necessary equipment, maintenance, and supplies for the emergency room for the use of all employees in the Government Printing Office who may be taken suddenly ill or receive injury while on duty; other necessary contingent and miscellaneous items authorized by the Public Printer; for expenses authorized in writing by the Joint Committee on Printing for the inspection of printing and binding equipment, material, and supplies and Government printing plants in the District of Columbia or elsewhere (not exceeding $1,000); [payment of tort claims pursuant to law (28 U. S. C. 921);] for salaries and expenses of preparing the semimonthly and session indexes of the Congressional Record under the direction of the Joint Committee on Printing (chief indexer at $5,546, one cataloger at $5,111, two catalogers at $4,068 each, and one cataloger at $3,515); and for all the necessary labor, paper, materials, and equipment needed in the prosecution and delivery and mailing of the work; in all, [$15,500,000] *$16,700,000*; to which sum shall be charged the printing and binding authorized to be done for Congress, including supplemental and deficiency estimates of appropriations; the printing, binding, and distribution of the Federal Register in accordance with the Act approved July 26, 1935 (44 U. S. C. 301–310) (not exceeding [$475,000] *$480,000*); the printing and binding [of the Code of Federal Regulations and supplements thereto,] *of the supplement to the Code of Federal Regulations* as authorized by the Act of July 26, 1935, as amended (44 U. S. C. 311) (not exceeding [$150,000] *$200,000*); the printing and binding for use of the Government Printing Office; the printing and binding (not exceeding $5,000) for official use of the Architect of the Capitol upon requisition of the Secretary of the Senate; in all to an amount not exceeding [$8,000,000] *$9,200,000*: *Provided*, That not less than $7,500,000 of such working capital shall be returned to the Treasury as an unexpended balance not later than six months after the close of the current fiscal year: *Provided further*, That notwithstanding the provisions of section 73 of the Act of January 12, 1895 (44 U. S. C. 241), no part of the foregoing sum of [$8,000,000] *$9,200,000* shall be used for printing and binding part 2 of the annual report of the Secretary of Agriculture (known as the Year-book of Agriculture). (*Legislative Branch Appropriation Act, 1951.*)

PROGRAM AND PERFORMANCE

The Government Printing Office executes orders for printing, binding, and blank-book work placed by Congress, and the departments, independent establishments, and agencies of the Federal Government and furnishes on order, blank paper, inks, and similar supplies.

The amount appropriated each year includes the printing and binding authorized to be done for Congress; for the printing, binding, and distribution of the Federal Register; and $7,500,000 for working capital, which is returned to the Treasury not later than 6 months after the close of each fiscal year. All work for other agencies of the Government is reimbursed on the basis of actual cost incurred.

Printing and binding for Congress chargeable to the foregoing appropriation, when recommended to be done by the Committee on Printing of either House, shall be so recommended in a report containing an approximate estimate of the cost thereof, together with a statement from the Public Printer of estimated approximate cost of work previously ordered by Congress within the fiscal year for which this appropriation is made.

During the current fiscal year any executive department or independent establishment of the Government ordering printing and binding or blank paper and supplies from the Government Printing Office shall pay promptly by check to the Public Printer upon his written request, either in advance or upon completion of the work, all or part of the estimated or actual cost thereof, as the case may be, and bills rendered by the Public Printer in accordance herewith shall not be subject to audit or certification in advance of payment: *Provided*, That proper adjustments on the basis of the actual cost of delivered work paid for in advance shall be made monthly or quarterly and as may be agreed upon by the Public Printer and the department or establishment concerned. All sums paid to the Public Printer for work that he is authorized by law to do; all sums received from sales of waste paper, other waste material, and condemned property; and for losses or damage to Government property; shall be deposited to the credit, on the books of the Treasury Department, of the appropriation made for the working capital of the Government Printing Office and be subject to requisition by the Public Printer.

No part of any money appropriated in this chapter shall be paid to any person employed in the Government Printing Office while detailed for or performing service in the executive branch of the public service of the United States unless such detail be authorized by law. (*Legislative Branch Appropriation Act, 1951.*)

OFFICE OF SUPERINTENDENT OF DOCUMENTS

Salaries and Expenses, Office of Superintendent of Documents—

Salaries and expenses: For necessary expenses of the Office of Superintendent of Documents, including personal services in accordance with the Classification Act of 1949, and compensation of employees who shall be subject to the provision of the Act entitled "An Act to regulate and fix rates of pay for employees and officers of the Government Printing Office", approved June 7, 1924 (44 U. S. C. 40); traveling expenses (not to exceed $1,500); [printing and binding including] price lists and bibliographies; repairs to buildings, elevators, and machinery; and supplying books to depository libraries; [$2,699,800] *$2,773,300: Provided,* That no part of this sum shall be used to supply to depository libraries any documents, books, or other printed matter not requested by such libraries, and the requests therefor shall be subject to approval by the Superintendent of Documents: *Provided further,* That [hereafter employees in the Office of the Superintendent of Documents may be paid compensation for night, Sunday, holiday, and overtime work at rates not in excess of the rates of additional compensation for such work allowed to other employees of the Government Printing Office under the provisions of the Act entitled "An Act to regulate and fix rates of pay for employees and officers of the Government Printing Office", approved June 7, 1924] *$200,000 of the unobligated balance of the appropriation granted under this head for the fiscal year 1951 shall remain available during the current fiscal year. (Legislative Branch Appropriation Act, 1951.)*

PROGRAM AND PERFORMANCE

The Office of the Superintendent of Documents is a division of the Government Printing Office which operates under separate appropriations. The work programs are entirely of a service nature and are of such type that there is no control over the volume of work which the Superintendent of Documents is required by law to perform.

1. *Sales distribution.*—The Superintendent of Documents is authorized by law to sell copies of Government publications purchased from the Public Printer. Acquisition costs are paid from sales receipts, so no appropriation is required for printing sales copies. By provision of law, the sale price is set at the cost of manufacture plus 50 percent. At the end of each fiscal year, excess receipts not required for purchasing additional publications are turned in to the Treasury Department as miscellaneous receipts. For the fiscal year 1949 earned revenue from this source was $1,439,698, and for 1950 was $1,734,623. It is estimated that miscellaneous receipts earned will be $1,800,000 for 1951 and $2,000,000 for 1952. The number of sales orders has been steadily increasing, and in the last 10 years the volume of orders has more than doubled and the dollar value of publications sold has more than tripled. The current public interest in the Government's publishing program points to a continuing increase in the volume of orders.

2. *Distribution for other agencies and Members of Congress.*—The Superintendent of Documents under provisions of law is required to prepare mailing lists and to perform mailing operations upon the request of any Government agency and without reimbursement from those agencies. Another legal obligation is to handle the mailing of Farmers' Bulletins, Soil Surveys, copies of the Congressional Record, and other publications which are allocated to Members of Congress on a quota basis.

3. *Depository library distribution.*—The Superintendent of Documents is required by law to supply one copy of every Government publication, upon request, to more than 500 libraries which are designated depositories for Government publications.

4. *Cataloging and indexing.*—The law provides that the Superintendent of Documents shall prepare and distribute catalogs and indexes of all publications issued by the Federal Government. The Monthly Catalog of U. S. Government Publications and the Numerical List and Schedule of Volumes are the two principal publications which are issued to discharge legal requirements.

SUMMARY OF WORKLOAD

	1950 actual	1951 estimate	1952 estimate
Number of sales orders	1,727,987	1,900,000	2,100,000

Working capital and congressional printing and binding, Government Printing Office.	1	$2,700	1	$700	$2,000	3		To be used by Public Printer and subordinate officials when such means of transportation is economical and advantageous to the Government.

GENERAL PROVISIONS

SEC. 102. Purchases may be made from the foregoing appropriations under the "Government Printing Office", as provided for in the Printing Act approved January 12, 1895, and without reference to the Act approved June 30, 1949 (Public Law 152) *as amended by Act approved September 5, 1950 (Public Law 754)*, concerning purchases for the Federal Government.

SEC. 103. In order to keep the expenditures for printing and binding for the current fiscal year within or under the appropriations for such fiscal year, the heads of the various executive departments and independent establishments are authorized to discontinue the printing of annual or special reports under their respective jurisdictions: *Provided,* That where the printing of such reports is discontinued the original copy thereof shall be kept on file in the offices of the heads of the respective departments or independent establishments for public inspection.

SEC. 104. No part of the funds appropriated in this chapter shall be used for the maintenance or care of private vehicles.

SEC. 105. Whenever any office or position not specifically established by the Legislative Pay Act of 1929 is appropriated for herein or whenever the rate of compensation or designation of any position appropriated for herein is different from that specifically established for such position by such Act, the rate of compensation and the designation of the position, or either, appropriated for or provided herein, shall be the permanent law with respect thereto: *Provided,* That the provisions relating to positions and salaries thereof carried in H. Res. 255, 303, 315, 370, 394, 414, and 453 (Eighty-first Congress) shall be the permanent law with respect thereto.

SEC. 106. No part of any appropriation contained in this chapter shall be paid as compensation to any person appointed after June 30, 1935, as an officer or member of the Capitol Police who does not meet the standards to be prescribed for such appointees by the Capitol Police Board: *Provided,* That the Capitol Police Board is hereby authorized to detail police from the House Office, Senate Office, and Capitol Buildings for police duty on the Capitol Grounds. (*Legislative Branch Appropriation Act, 1951.*)

Total obligations	3,328,381	3,387,000	3,472,000

PROGRAM AND PERFORMANCE

The Bureau of the Budget assists the President in formulating his proposed Budget and program for the Federal Government and in seeing that appropriations are used to carry out the Government's functions efficiently and economically.

1. *Estimates.*—Annual and supplemental budget estimates are reviewed on the basis of continuing examination of agency operations, programs, and financial requirements. Obligation of funds is controlled through apportionment of appropriations and analysis of agency financial reports.

2. *Fiscal analysis.*—Budget policies are developed, related programs of different agencies are analyzed to insure balance and consistency, and the Budget Message and special budget summaries and reports are prepared.

3. *Administrative management.*—Plans for improved Government organization are developed; improvements are made in Government-wide procedures, as in the joint accounting program; and agency program effectiveness and operating efficiency are appraised and assistance given in making improvements.

4. *Statistical standards.*—Agency report forms are cleared to prevent duplication and reduce reporting burdens on the public; statistical programs are coordinated to eliminate overlapping, gaps in needed data, and inconsistencies; and statistical methods are improved. Approximately 2,700 report forms are cleared annually, with the number expected to increase by 50 percent in 1952.

5. *Legislative reference.*—Proposed legislation and agency reports on pending legislation, enrolled bills, Executive orders, and proclamations are reviewed and analyzed for the President, and reports on the progress of legislation are prepared for the White House. Annual workload includes approximately 5,000 agency reports on general legislation, 500 congressional requests for Bureau views, 1,000 enrolled bills, and 100 Executive orders and proclamations.

6. *Field service activities.*—Four field offices supply information on agency programs and operations in the field; investigate field problems; promote economies, improved management, and better interagency working relationships in field operations; and work with State and local governments on pertinent Federal problems.

7. *Administration.*—Executive direction and administrative services are provided centrally.

PROGRAM AND PERFORMANCE

The National Security Council advises the President with respect to the integration of domestic, foreign, and military policies relating to the national security. The Council's staff work is performed under the direction of a civilian executive secretary by permanent Council employees and officials detailed from the participating departments and agencies. A senior staff, also headed by the executive secretary, is composed of six high-ranking officials designated by the President based on nomination by the Secretaries of State, Defense, and the Treasury, the Chairman of the National Security Resources Board, the Joint Chiefs of Staff, and the Director of Central Intelligence. The Central Intelligence Agency is, by law, under the direction of the Council.

PROGRAM AND PERFORMANCE

As provided in the National Security Act of 1947, the Chairman of the National Security Resources Board advises the President concerning the coordination of military, industrial, and civilian mobilization. As a Presidential staff agency, the Resources Board draws on the collective efforts of all departments and agencies of the executive branch.

The Chairman of the Resources Board advises the President on programs and policies required to assure the most effective utilization of the Nation's resources for war. This advice includes measures that must be taken in peacetime against the contingency of war. The Chairman of the Resources Board is also a member of the National Security Council.

Civil defense planning was assigned the Resources Board by Presidential directive dated March 3, 1949. The President established on December 1, 1950, a new Executive order agency, the Federal Civil Defense Administration, to carry on civil defense activities. Financing of the new agency has been provided from Presidential emergency funds.

OFFICE FOR EMERGENCY MANAGEMENT

PHILIPPINE ALIEN PROPERTY ADMINISTRATION

Special deposit, trust account:

Salaries and Expenses, Executive Office of the President, Philippine Alien Property Administration—

[Administrative expenses, Philippine Alien Property Administration: The Philippine Alien Property Administrator is hereby authorized to pay out of any funds or other property or interest vested in him or transferred to him, necessary expenses incurred in carrying out the powers and duties conferred on him pursuant to the Trading With the Enemy Act, as amended (50 U. S. C. App.), and the Philippine Property Act of 1946 (60 Stat. 418): *Provided*, That not to exceed $187,750 shall be available for the current fiscal year for the general administrative expenses of the Philippine Alien Property Administration; printing and binding; rent of private or Government-owned space in the District of Columbia; employment outside the United States of persons without regard to the civil service and classification laws including services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a); personal services in the District of Columbia and expenses of attendance at meetings of organizations concerned with the work of the agency: *Provided further*, That on or before November 1 of the current fiscal year the Philippine Alien Property Administrator shall make a report to the Appropriations Committees of the Senate and the House of Representatives giving detailed information on all administrative and nonadministrative expenses incurred during the next preceding fiscal year, in connection with the activities of the Philippine Alien Property Administration: *Provided further*, That the Philippine Alien Property Administration shall cease to exist after June 30, 1951, and all duties being performed by such Administration as of that date shall be transferred to the Office of Alien Property Custodian, including all records, files, and other property.] (*Independent Offices Appropriation Act, 1951.*)

FUNDS AVAILABLE FOR OBLIGATION

	1950 actual	1951 estimate	1952 estimate
Authorization or estimate	$250,000	$187,750	
Unobligated balance, estimated savings	−5,377		
Total obligations	244,623	187,750	

PROGRAM AND PERFORMANCE

The Administration was established for the purpose of vesting and disposing of enemy alien property in the Philippines. Assets remaining after the payment of claims and administrative expenses from vested property are being transferred to the Philippine Government. The Administration will cease to function during the fiscal year 1951, and all programs, with the exception of some litigation and a few remaining claims, will be concluded. Work remaining will be transferred to the Office of Alien Property, Department of Justice.

Total available for obligation	116,371,397	100,196,413	2,225,000
Balance reappropriated for subsequent year	−92,270,000		
Balance available in subsequent year	−7,926,413	−2,225,000	
Total obligations	16,174,984	97,971,413	2,225,000

PROGRAM AND PERFORMANCE

The 1952 requirements are included elsewhere in the Budget under proposed legislation for "Mutual assistance, military and economic."

1. *Economic assistance.*—The Foreign Economic Assistance Act of 1950 authorized the utilization of the unexpended balance of funds previously appropriated for economic aid to China, for economic assistance "in the general area" of China. Under this authorization, the Economic Cooperation Administration has continued economic assistance to Formosa and has initiated programs of economic assistance to countries in southeast Asia, including Indonesia, the Associated States of Indochina, Burma, Thailand, and the Philippines. In addition, $4.5 million was obligated for purchase of grain sorghum for famine relief in India.

(*a*) *Direct country aid.*—ECA assistance to Formosa and southeast Asia countries has been designed to strengthen and expand the economic life of the area, to improve living conditions and strengthen national governments by bringing aid to their people, thereby building political support, and to demonstrate the genuine interest of the United States in the welfare of the people of the area as a part of the free world.

Assistance to Formosa has included a commodity program, an industrial reconstruction program, and a rural reconstruction program. ECA has financed the importation into Formosa of many essential raw materials, consisting largely of agricultural products, fertilizers, and industrial raw materials.

The ECA programs developed in Indonesia, the Associated States of Indochina, Burma, and Thailand have included projects of two main types: (1) Technical and material aid to essential services in such fields as health, agriculture, industry, and transportation; and (2) economic rehabilitation and development focused primarily on the provision of technical assistance and material aid to develop agricultural and industrial output both for local consumption and for export.

The Philippines program has involved technical assistance to stimulate total economic mobilization and to achieve greater production, a more diversified economy, and a higher income for industrial and agricultural laborers.

(*b*) *Rural reconstruction.*—Many rural reconstruction projects for improvement of the agricultural economy and betterment of living conditions have been financed in Formosa with these funds.

(*c*) *Relief packages.*—Ocean transportation charges are paid on relief packages sent from the United States by individuals and by American nonprofit agencies.

(*d*) *Administration.*—A single Washington headquarters staff has administered both the China aid program and the aid programs for southeast Asia. In the field, special technical and economic missions have been established to administer the ECA programs.

2. *Exchange of student program.*—The Department of State administers a program to defray the expenses of selected citizens of China to study or teach in accredited colleges, universities, and other educational institutions in the United States.

In fiscal year 1951, grants will be made to approximately 3,550 students and 500 professors, teachers, research scholars, and other professional Chinese citizens now in the United States, as well as 50 grants to professional persons of prominence in Formosa and Hong Kong to come to the United States. An estimated amount of $2,225,000 will be available for this program in fiscal year 1952 as compared to approximately $5.7 million in fiscal year 1951.

Total obligations	84,565,876	90,000,000	

PROGRAM AND PERFORMANCE

The broad objectives of the program for assistance to Korea have been to facilitate the maintenance of political independence, the achievement of economic stability, and the eventual unification of the country as a democratic state. The war in Korea has added the immediate task of making physical repairs to the damage to Korean industry, public works, and housing, as well as assisting the Koreans in overcoming the disruption to the functioning of their economy. In connection with the latter, the Economic Cooperation Administration was relieved by the President on September 29 of responsibility for the provision of direct relief supplies, this function being assigned to the Department of Defense.

The Communist aggression made it necessary to modify the economic development program for the first 6 months of the current fiscal year, and the program for the remainder of the fiscal year is dependent upon the outcome of present hostilities in Korea. The 1952 requirements are included elsewhere in the Budget under proposed legislation for "Mutual assistance, military and economic."

The 1951 program has involved—

1. *Grants for recovery imports.*—These are primarily for fertilizer, raw materials, supplies, and equipment (including complete installations and repair parts) to maximize the output of agricultural and industrial production facilities.

2. *Technical assistance.*—Assistance is given in the development and execution of programs for the training of personnel in the administration and operation of economic agencies and enterprises, including the rendering of fiscal advisory assistance to combat the threat of inflation and to help Korea to develop appropriate controls.

3. *Payment of relief package transportation.*—Ocean transportation charges are paid on relief packages sent to South Korea from the United States by individuals and by American voluntary nonprofit agencies.

4. *Administration.*—The administrative organization consists of a staff in Washington, D. C., and a mission in Korea.

Total obligations	3,848,355,099	2,477,132,399	

PROGRAM AND PERFORMANCE

The Economic Cooperation Administration (ECA) carries out the European Recovery Program (ERP) by helping the countries of Europe to achieve a healthy and strong economy substantially independent of extraordinary outside assistance. The participating European countries are: Austria, Belgium, Denmark, Eire, the Federal Republic of Germany, France, the United States-United Kingdom Zone of the Free Territory of Trieste, Greece, Iceland, Italy, Luxemburg, Netherlands, Norway, Portugal, Sweden, Switzerland, Turkey, and the United Kingdom. These countries are members of the Organization for European Economic Cooperation (OEEC), which was established to plan and execute a program of self-help and mutual aid, in association with the United States, to increase production, expand foreign trade, promote internal financial stability and facilitate economic cooperation in Europe. This program is now undergoing a rapid change in emphasis to achieve accelerated production to maintain military security. The present legislative authority for the program terminates June 30, 1951.

The 1952 requirements are included elsewhere in the Budget under proposed legislation for "Mutual assistance, military and economic."

1. *Grants and loans—(a) Direct country aid.*—To date, appropriations and loan authorizations (exclusive of investment guaranty funds and loans earmarked for Spain) have amounted to approximately $12 billions.

ECONOMIC COOPERATION—Continued

Foreign Assistance, Executive Office of the President—Continued

By June 1950, the time of the aggression in Korea, industrial production in Western Europe had risen to almost 30 percent over prewar levels and agricultural output had been restored virtually to prewar levels (while population had risen roughly 10 percent). At the same time, use of local currency counterpart funds generated by dollar aid had contributed to the general restoration of financial stability and to a substantial lifting of internal controls. A revaluation of currencies helped to place international trade on a freer and more satisfactory basis. Higher efficiency and morale was further promoted by increasing progress toward European unification, as was evidenced by the continued strengthening of the OEEC, the general removal of quantitative restrictions on 60 percent of intra-European trade, and the prospective organization of a supra-national authority over continental European coal and steel under the Schuman Plan. All of this progress in turn had permitted reduction of the European dollar gap from a $7 billion level in 1947, to roughly $2.5 billion projected for 1951.

Under the threat of intensified Communist aggression, the Western European countries must maintain and extend their gains. In the period ahead, the economies of the participating countries will have to support a heavier load. The economic base upon which Western Europe's security rests must be further strengthened to permit the required increase in military production. The growth of productivity must be accelerated to assure adequate resources for both the rearmament program and the civilian economy.

Expanded transport facilities and greater output of steel, electric power, petroleum products, coal, textiles, and food are required to support the increase in military strength. The past efforts of the ERP have been directed at enlarging the capacity of Europe to produce such items. Under the changing program our efforts will be focused even more intently on such production. For this reason, the United States plans to continue to furnish economic assistance through the administration of dollar aid and counterpart funds.

Included in the 1951 program for direct country aid is $50,000,000 for emergency aid to Yugoslavia under legislation approved in December 1950. This program consists primarily of food supplies to bring relief from threats of hunger caused by a severe drought, and will also assist Yugoslavia to maintain its political independence.

(*b*) *Transfers and assistance to European Payments Union.*—The European Payments Union (EPU), established July 1, 1950, is in essence an automatic mechanism whereby members of the OEEC, including the sterling bloc and the monetary areas of the other participating countries, settle surpluses and deficits with one another. The EPU is designed to assist in the creation of a single competitive market in Western Europe, and in the achievement of general convertibility of currencies. It will assist materially in liberalizing trade and payments, and in removing discrimination caused by balance of payments difficulties. It represents a cooperative effort to achieve independence of extraordinary outside assistance and will encourage suitable industrial specialization within each member country, thus adding to European strength and security.

The sum of $350 million is being made available to the EPU as a working capital fund designed to furnish sufficient convertible assets to enable the EPU to fulfill its obligations arising in the course of its automatic operations. Public Law 759 of the Eighty-first Congress permits a maximum of $500 million to be made available for this purpose.

(*c*) *Trade liberalization.*—One objective of the ERP is the removal of quantitative import restrictions on the part of the member countries of the OEEC. This objective has been advanced by the establishment of the EPU, as well as by a code of liberalization designed to launch a direct attack against quantitative import restrictions between member countries and discriminatory application of quantitative restrictions on balance of payments grounds.

On November 2, 1949, the Council of Ministers of the OEEC decided to free 50 percent of each country's imports of restrictions. Most countries had attained and even exceeded this objective when on January 31, 1950, the OEEC in a resolution, sought to remove quantitative restrictions on at least 60 percent of imports on private account. The majority of the participating countries have complied, and the stage has been set for the 75 percent round of the abandonment of intra-European trade restrictions, as of February 1, 1951.

Continued trade liberalization encompassing the removal of quantitative import restrictions can make a significant contribution toward the goal of more efficient resource utilization.

2. *Strategic materials, purchase and development.*—Funds are used to increase the production of materials in which the United States is actually or potentially deficient. Also, direct purchases of such materials are made with 5 percent local currency counterpart funds.

The obligation of $40 million of appropriated funds for 1951 is to be devoted to projects involving tin in the Belgian Congo, chrome in New Caledonia, industrial diamonds, copper, lead and zinc in French Equatorial Africa, chrome in Turkey, port improvement in Portuguese East Africa and a detailed geological survey in Portuguese East and West Africa. It is also estimated that 5 percent local currency counterpart funds equivalent to $112 million and $30 million will be obligated for development projects and purchases, respectively.

3. *Technical assistance.*—The furnishing of technical assistance to the participating countries will continue on the basis of specific requests for the services of United States technicans, for study and training in the United States, and for scientific and technical information. As heretofore, generally only the dollar costs will be financed. Local currency costs of projects will continue to be borne by participating countries, and, on the basis of experience to date, will continue to exceed dollar costs.

Observation of American practices by the Europeans since the start of the program is leading to a more fundamental approach for further increasing European productivity. At the start, emphasis was placed on projects concerned with specific manufacturing, scientific, and agricultural processes. Conclusions by early visiting teams that high United States productivity does not rest entirely on superior technology nor freer raw materials has demonstrated the need for broader inquiry. Therefore, the Europeans are planning intensive study of manpower utilization, training, wage rates, and labor-management relations; quantity, quality, and cost control methods; product design and marketing; management techniques and industrial engineering; agricultural research and informational dissemination. Through adaptation at home, and by utilizing newly established national productivity centers, the Europeans seek the conservation of materials and manpower to aid rearmament and support living standards.

http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

During 1951 it is anticipated that approximately 700 projects will be approved at an estimated cost of $15 million.

4. *Payment of transportation on relief supplies and packages.*—To encourage voluntary relief contributions to Europe, ocean freight charges are paid on three groups of relief shipments to countries receiving dollar grants: (1) Supplies sent by United States voluntary nonprofit relief agencies; (2) shipments of individual relief packages by parcel post; and (3) commercial shipments of individual packages sent by ocean freight from the United States.

A general downward trend in shipments in all of the above categories has occurred, which indicates that economic conditions in the participating countries have improved and the need for relief in the form of food and clothing in some of the countries is much less urgent than it has been. As a result, the ocean freight subsidy on gift packages shipped via parcel post, commercial channels, and on certain categories of CARE food packages has been discontinued to all European countries except Austria, Greece, Italy, and Trieste. However, voluntary nonprofit relief agencies continue to receive reimbursement of ocean freight charges on supplies shipped overseas in support of their programs in all ECA grant countries which have concluded relief agreements.

5. *Confidential funds.*—Expenditures of a confidential character other than entertainment may be made upon certification by the Administrator or Deputy Administrator.

6. *Administration.*—Administration of ERP is carried out by the Administrator, assisted by a staff in Washington, the United States special representative in Europe, and special ECA missions in each of the participating countries. Included also are funds used by the Department of State and the Department of Agriculture for expenses incurred as a result of the ERP.

In addition to the dollar obligations, the local currency equivalent of $12,044,066 during 1950, and an estimated $15,580,000 during 1951, will be obligated for ECA administration in Europe.

OBLIGATIONS BY ACTIVITIES

Description	1950 actual	1951 estimate	1952 estimate

EXPENSES OF DEFENSE PRODUCTION

Expenses of Defense Production, Executive Office of the President—

[For expenses necessary to enable the President to carry out the provisions of the Defense Production Act of 1950 (Public Law 774, approved September 8, 1950), including personal services in the District of Columbia; printing and binding; health service programs as authorized by law (5 U. S. C. 150); rents in the District of Columbia; payment of claims pursuant to law (28 U. S. C. 2672); purchase and hire of passenger motor vehicles and aircraft; employment of aliens; exchange and advance of funds without regard to sections 3648 and 3651 of the Revised Statutes; and expenses of attendance at meetings concerned with the purposes of this appropriation; $30,000,000: *Provided*, That the authorizations, limitations, or restrictions, governing the availability of funds for administrative expenses of Government corporations and other agencies, for the current fiscal year, are hereby waived to such extent as may be determined by the President to be necessary in order for such corporations or agencies to carry out their assigned functions under the Defense Production Act of 1950.] (*Supplemental Appropriation Act, 1951.*)

Annual definite appropriation:

Appropriated 1951, **$30,000,000**

FUNDS AVAILABLE FOR OBLIGATION

Department of the Interior		750,000	
Department of Labor		679,000	
Total obligations		3,955,000	

PROGRAM AND PERFORMANCE

The appropriation for expenses of administering the Defense Production Act is allocated by the President to the departments and agencies as required for defense production, price, wage, and other related programs. The Supplemental Appropriation Act, 1951, included an appropriation of $30 million for this purpose. It is estimated that an additional supplemental of $10 million will be needed in 1951. The 1952 requirements are included in the proposed supplemental appropriation for "Economic stabilization and allocations."

Loans, Etc., Defense Production Act—

FUNDS AVAILABLE FOR OBLIGATION

	1950 actual	1951 estimate	1952 estimate
Authorization to expend from public debt receipts		$600,000,000	
Reserve for future allocation		−600,000,000	
Total obligations			

PROGRAM AND PERFORMANCE

This appropriation is allocated by the President to the departments and agencies for (1) making loans to expand defense production, (2) purchasing critical metals, minerals and other raw materials, (3) purchasing and installing Government equipment in defense industrial plants, and (4) encouraging the exploration, development, and mining of critical and strategic minerals and metals. The Defense Production Act of 1950 authorized borrowing authority of $600 million and authorized to be appropriated an additional $1,400,000,000. It is estimated that a supplemental appropriation of $200 million will be required in 1951. The 1952 budget includes an anticipated supplemental appropriation of $1,200,000,000, based upon a contemplated extension of the Defense Production Act.

INTERNATIONAL CHILDREN'S EMERGENCY FUND

International Children's Emergency Fund of the United Nations, Executive Office of the President—

FUNDS AVAILABLE FOR OBLIGATION

	1950 actual	1951 estimate	1952 estimate
Prior year balance reappropriated	$16,712,475	$1,356,114	
Balance reappropriated for subsequent year	−1,356,114		
Total obligations	15,356,361	1,356,114	

PROGRAM AND PERFORMANCE

Contributions to the International Children's Emergency Fund of the United Nations.—This fund, established by resolution of the United Nations, is for the purpose of assisting in the mental and physical rehabilitation of the children of various countries. Priority is given to the children of countries which were victims of aggression.

The presently available funds exhaust the total appropriations of $75,000,000 of prior years under which the United States voluntarily contributed, on a matching basis, 72 percent of the total resources contributed by all governments, including the United States. Public Law 535, Eighty-first Congress, authorizes additional appropriations up to $15,000,000 for fiscal year 1951, but no appropriation has yet been made. The 1952 requirements are included elsewhere in the Budget under proposed legislation for "Mutual assistance, military and economic."

OBLIGATIONS BY ACTIVITIES

Contribution to International Children's Emergency Fund of the United Nations—1950, $15,356,361; 1951, $1,356,114.

OBLIGATIONS BY OBJECTS

ALLOCATION TO DEPARTMENT OF STATE

11 Grants, subsidies, and contributions—1950, $15,356,361; 1951, $1,356,114.

INTERNATIONAL DEVELOPMENT

Expenses, International Development, Executive Office of the President—

[For expenses necessary to enable the President to carry out the provisions of the Act for International Development (title IV of Public Law 535, approved June 5, 1950), including personal services in the District of Columbia; expenses of attendance at meetings concerned with the purposes of this appropriation; purchase (not to exceed twelve), and hire of passenger motor vehicles for use outside the continental limits of the United States; printing and binding; payment of tort claims pursuant to law (28 U. S. C. 2672); health service programs as authorized by law (5 U. S. C. 150); insurance of official motor vehicles in foreign countries when required by law of such countries; acquisition of temporary quarters outside the con-

tinental limits of the United States to house employees of the United States Government by rental (without regard to section 322 of the Act of June 30, 1932, as amended (40 U. S. C. 278a)), lease, or construction, and necessary repairs and alterations to such temporary quarters; exchange of funds without regard to section 3651 of the Revised Statutes (31 U. S. C. 543); entertainment (not to exceed $2,000); health and accident insurance for foreign trainees and technicians while absent from their own countries participating in activities authorized under this appropriation, and actual expenses of preparing and transporting to their former homes the remains of such persons who may die away from their homes while participating in such activities; services of commissioned officers of the Public Health Service and of the Coast and Geodetic Survey, and for purposes of providing such services the Public Health Service may appoint not to exceed twenty officers in the Regular Corps to grades above that of senior assistant, but not above that of director, as otherwise authorized in accordance with section 711 of the Act of July 1, 1944, as amended (42 U. S. C. 211a), and the Coast and Geodetic Survey may appoint for such purposes not to exceed twenty commissioned officers in addition to those otherwise authorized; $26,900,000; and, in addition, there may be transferred to this appropriation for the purposes hereof not to exceed $2,600,000 from the appropriation to the Department of State for "International information and educational activities," fiscal year 1951: *Provided*, That this appropriation shall be available for contracts or agreements entered into during the fiscal year 1951 pursuant to section 405 (e) of the Act for International Development which entail commitments for the expenditure of funds for not to exceed three years: *Provided, however*, That no part of this appropriation may be expended for the duplication of any program being carried on by any other agency of the United States Government or any international agency to which the United States is a major contributor, nor for the construction of any project except for demonstration or instructional purposes, nor for any purpose except administrative expenses, and preliminary surveys and technical cooperation programs upon which reports shall be made to the Congress of the United States quarterly: *Provided further*, That the making of any survey or the advancement of any technical cooperation program or the preparation of plans for projects does not constitute any obligation whatsoever on the part of the Government of the United States to make any loan or grant for the execution or construction of any project or for the completion of any program devised under title IV of Public Law 535, approved June 5, 1950: *Provided further*, That it shall be the duty of the Secretary of State to give written notice to each recipient of funds or beneficiary under said title that such assistance shall not be construed as an obligation on the part of the United States to make funds available for the construction or execution of any project and to report such action to Congress.] (*Foreign Aid Appropriation Act, 1951.*)

Appropriated 1951, **$26,900,000**
Appropriated (adjusted) 1951, **$29,437,000**

FUNDS AVAILABLE FOR OBLIGATION

	1950 actual	1951 estimate	1952 estimate
Appropriation or estimate		$26,900,000	
Transferred from "International information and educational activities, Department of State," pursuant to Public Law 759		2,537,000	
Adjusted appropriation or estimate		29,437,000	
Comparative transfer from "International information and educational activities, Department of State"	$3,141,909		
Total obligations	3,141,909	29,437,000	

PROGRAM AND PERFORMANCE

The program for international development was authorized in June 1950 for 1 year as a means of furthering the freedom and economic and social progress of peoples living in economically underdeveloped areas of the world by providing them with technical assistance. Consolidated in this program are activities formerly conducted under the scientific and cultural program financed by the international information and educational activities appropriation.

Of the first year's funds available, approximately 44 percent is earmarked for contributions to international organizations. The remainder will, in the main, be committed on a bilateral basis to sending experts abroad and bringing qualified trainees to the United States.

The 1952 requirements are included elsewhere in the Budget under proposed legislation for "Mutual assistance, military and economic."

1. *Contributions to international organizations.*—Contributions on a voluntary basis of $12,007,500 are planned to the United Nations (including the specialized agencies) and of $1,000,000 to the Organization of American States. Contributions from other nations to the special technical assistance fund of the United Nations will bring the total of the UN program to about $20,048,000. Both organizations plan to emphasize agriculture and health projects.

2. *Technical cooperation with underdeveloped countries.*—All projects will be on a cooperative basis, with projects undertaken only at the request of other governments. The United States program will be carried on through a number of Federal agencies cooperating in the fields in which they are technically competent. The participating countries will supply local personnel and additional funds. Bilateral projects will deal with such fields as agriculture, transportation, health, hydroelectric power, mineral resources, public administration, and manpower utilization.

3. *Service to American business for foreign economic development.*—This service, performed by the Commerce Department, provides detailed information to the American business community on investment opportunities and business problems in underdeveloped areas and stimulates foreign investment by private business.

4. *Executive direction and administration.*—Provision is made for all domestic expenses of the cooperating agencies which do not have a direct bearing on program operations and all domestic expenses of the Department of State except those directly related to the training program.

PROGRAM AND PERFORMANCE

The mutual defense assistance program provides for military assistance to strengthen the will and ability of other free nations to resist aggression. Appropriations in the amount of $6,492,033,729 have been made available by Congress during fiscal years 1950 and 1951. An appropriation for fiscal year 1952 is requested under existing legislation to liquidate contract authority.

Funds heretofore appropriated are being used for three main purposes: (1) to provide finished military equipment and materials; (2) to provide technical and training assistance; and (3) to provide supplemental economic assistance to make possible the raising, maintaining, and equipping of larger forces.

The 1952 requirements are included elsewhere in the Budget under proposed legislation for "Mutual assistance, military and economic."

1. *North Atlantic Treaty countries.*—Assistance is being provided toward implementing the integrated plans for the defense of the North Atlantic area which have been developed by the North Atlantic Treaty Organization.

2. *Greece, Turkey, and Iran.*—Assistance to Greece and Turkey is designed to continue the programs originally authorized by the act of May 22, 1947, which aims to maximize, within the limits of their economic capabilities, the military potential of these countries. Assistance to Iran is being furnished to improve the effectiveness of the Iranian Armed Forces. The 1950 appropriation provided funds for assistance to Greece and Turkey, whereas the 1951 appropriation also includes provision for assistance to Iran.

3. *Iran, Korea, Philippines, general area of China, and nations in southern and eastern Asia.*—Assistance to Korea under this program is being combined with all other United Nations assistance to Korea in the present emergency. Assistance to the Philippines is intended to aid the government to withstand threats to its internal security. Assistance to the general area of China and to nations in southern and eastern Asia is for the purpose of increasing the capability of non-Communist forces to resist Communist aggression. The 1950 appropriation provided funds for assistance to Iran, whereas provision for such assistance was included under the preceding heading in the 1951 appropriation.

OBLIGATIONS BY ACTIVITIES

Description	1950 actual	1951 estimate	1952 estimate
Direct Obligations			
Title I			
1. North Atlantic Treaty countries:			
(a) Improving effectiveness of ground forces:			
(1) Furnishing supplies and equipment	$738,312,006	$2,084,591,614	
(2) Training expenses	564,772	9,986,116	
Total	738,876,778	2,094,577,730	
(b) Improving effectiveness of naval forces:			
(1) Furnishing supplies and equipment	54,119,571	503,396,531

Total, general appropriations, funds appropriated to the President:

Appropriated 1951, **$5,678,023,729** Estimate 1952, **$45,476,271**

Appropriated (adjusted) 1951, **$5,827,460,729**

PROPOSED FOR LATER TRANSMISSION

Mutual assistance, military and economic.—Appropriations totaling $9.5 billion are included in this budget for 1952 under proposed legislation for programs to build up the free world's defensive strength. The balanced program to achieve this purpose will be presented in detail to the Congress in the early spring. All but a small part of the funds requested will be used directly to assist our allies in the rapid expansion of their defensive forces. A very large part of the total will be used for procurement of military equipment to arm those forces. The total request also includes amounts needed to carry forward other international programs essential to the security of the United States.

Defense housing, community facilities and services.—The budget includes a supplemental appropriation of $150 million for 1952 under proposed legislation to initiate a new program to assist in the provision of housing and community facilities needed for the defense effort and to provide broader financing facilities for prefabricated housing. Housing and community facilities assistance would complement the broader aids to private rental housing already available or proposed for defense areas and would be limited to assistance not otherwise provided. The proposal relating to prefabricated housing would amend section 102 of the Housing Act of 1948, principally to provide financing of dealers in prefabricated housing.

Economic stabilization and allocations.—The budget includes a supplemental appropriation of $330 million for 1952 under proposed legislation, and one for $10 million for 1951 under existing legislation. The latter is for administrative expenses to carry out the provisions of the Defense Production Act of 1950. The 1952 supplemental makes provision for administrative expenses in connection with, (*a*) activities under the Defense Production Act, (*b*) extension of rent control and, (*c*) continuation of the export control program.

Expansion of defense production.—It is estimated that a supplemental appropriation of $200 million will be required in 1951. The budget also includes a supplemental appropriation of $1.2 billion for 1952 based upon a contemplated extension of the Defense Production Act.

AMERICAN BATTLE MONUMENTS COMMISSION

Salaries and Expenses, American Battle Monuments Commission—

Salaries and expenses: For necessary expenses, as authorized by the Act of June 26, 1946 (36 U. S. C. 121, 123–132, 138), including the acquisition of land or interest in land in foreign countries; [personal services in the District of Columbia;] purchase and repair of uniforms for caretakers of national cemeteries and monuments outside of the United States and its Territories and possessions at a cost not exceeding [$4,845; travel expenses] *$1,000*; rent of office and garage space in foreign countries; the purchase of [one] *two* passenger motor [vehicle;] *vehicles for replacement only; and* insurance of official motor vehicles in foreign countries when required by law of such countries; [and printing, binding, engraving, lithographing, photographing, and typewriting; $670,000] *$775,000*: *Provided*, That where station allowance has been authorized by the Department of the Army for officers of the Army serving the Army at certain foreign stations, the same allowance shall be authorized for officers of the armed forces assigned to the Commission while serving at the same foreign stations, and this appropriation is hereby made available for the payment of such allowance: *Provided further*, That when traveling on business of the Commission, officers of the armed forces serving as members or as secretary of the Commission may be reimbursed for expenses as provided for civilian members of the Commission. (*Independent Offices Appropriation Act, 1951.*)

Appropriated 1951, **$670,000** Estimate 1952, [a] **$775,000**

[a] Excludes $36,500 for activities transferred in the estimates to "Construction of memorials and cemeteries, American Battle Monuments Commission." The amounts obligated in 1950 and 1951 are shown in the schedule as comparative transfers.

FUNDS AVAILABLE FOR OBLIGATION

Total obligations	535,936	629,187	775,000

PROGRAM AND PERFORMANCE

Provision is made for the maintenance and operation of all permanent United States military cemeteries and memorials located in foreign countries, including 8 World War I cemeteries, 11 World War I memorials, 14 World War II cemeteries, and the Mexico City National Cemetery. The increase for 1952 is occasioned by the transfer of two additional cemeteries from the Department of the Army and by the completion of additional features under the construction program.

Construction of Memorials and Cemeteries, American Battle Monuments Commission—

Construction of memorials and cemeteries: For *expenses necessary for* the permanent design and construction of memorials and cemeteries in foreign countries as authorized by the Act of June 26, 1946 (36 U. S. C. 121, 123–132, 138), and the Act of August 5, 1947 (50 U. S. C. 1819), [and personal services in the District of Columbia and elsewhere, $8,500,000, of which $5,000,000 is for payment of obligations incurred under authority provided under this head in the Independent Offices Appropriation Act, 1950,] *including the purchase of one passenger motor vehicle for replacement only, $4,000,000*, to remain available until expended[; and in addition the Commission is authorized to enter into contracts in the amount of $1,500,000 for the purposes of this appropriation]. (*Independent Offices Appropriation Act, 1951.*)

Appropriated 1951, **$8,500,000** Estimate 1952, [a] **$4,000,000**

[a] Includes $36,500 for activities previously carried under "Salaries and expenses, American Battle Monuments Commission." The amounts obligated in 1950 and 1951 are shown in the schedule as comparative transfers.

PROGRAM AND PERFORMANCE

Construction and development activities at 14 United States military cemeteries in foreign countries include provision of permanent headstones, memorial structures, landscaping, roads and paths, water and drainage facilities, and utility buildings. The estimate for 1952 reflects the general policy to defer new construction projects which do not materially contribute to the defense effort and to permit the continuation of projects only to the extent required to protect existing investment or to make usable an essential portion of the project.

ATOMIC ENERGY COMMISSION

SALARIES AND EXPENSES

Salaries and Expenses, Atomic Energy Commission—

For expenses necessary to carry out the purposes of the Atomic Energy Act of 1946, including [personal services in the District of Columbia and] employment of aliens; purchase of land and interests in land; services authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a); purchase of [not to exceed one hundred and fifty] passenger motor vehicles [for replacement only]; purchase, maintenance, and operation of aircraft; [printing and binding; health service program as authorized by law (5 U. S. C. 150);] publication and dissemination of atomic information; [payment of tort claims pursuant to law;] purchase, repair, and cleaning of uniforms; purchase of newspapers and periodicals (not to exceed $8,000) [and travel expenses]; official entertainment expenses (not to exceed $5,000); reimbursement of the General Services Administration for security guard services; and payment of obligations incurred under prior year contract authorizations; [$647,820,000] *$1,210,000,000*, together with the unexpended balances, as of June 30, [1950] *1951*, of prior year appropriations to the Atomic Energy Commission, of which amounts $100,000 may be expended for objects of a confidential nature and in any such case the certificate of the Commission as to the amount of the expenditure and that it is deemed inadvisable to specify the nature thereof shall be deemed a sufficient voucher for the sum therein expressed to have been expended; from which appropriation transfers of sums may be made to other agencies of the Government for the performance of the work for which this appropriation is made, and in such cases the sums so transferred may be merged with the appropriation to which transferred[; and in addition to the amount herein provided, the Commission is authorized to contract for the purposes of this appropriation during the current fiscal year in an amount not exceeding $300,150,000]: *Provided*, That no part of this appropriation shall be used to pay the salary of any officer or employee (except such officers and employees whose compensation is fixed by law, and scientific and technical personnel) whose position would be subject to the Classification Act of [1923, as amended] *1949*, if such Act were applicable to such position, at a rate in excess of the rate payable under such Act for positions of equivalent difficulty or responsibility: *Provided further*, That no part of this appropriation [or contract authorization] shall be used—

(A) to start any new construction project for which an estimate was not included in the budget for the current fiscal year;

(B) to start any new construction project the currently estimated cost of which exceeds the estimated cost included therefor in such budget; or

(C) to continue any community facility construction project whenever the currently estimated cost thereof exceeds the estimated cost included therefor in such budget;

unless the Director of the Bureau of the Budget specifically approves the start of such construction project or its continuation and a detailed explanation thereof is submitted forthwith by the Director to the Appropriations Committees of the Senate and the House of Representatives and the Joint Committee on Atomic Energy; the limitations contained in this proviso shall not apply to any construction project the total estimated cost of which does not exceed $500,000; and, as used herein, the term "construction project" includes the purchase, alteration, or improvement of buildings, and the term "budget" includes the detailed justification supporting the budget estimates: *Provided further*, That whenever the current estimate to complete any construction project (except community facilities) exceeds by 15 per centum the estimated cost included therefor in such budget or the estimated cost of a construction project covered by clause (A) of the foregoing proviso which has been approved by the Director, the Commission shall forthwith submit a detailed explanation thereof to the Director of the Bureau of the Budget and the Committees on Appropriations of the Senate and of the House of Representatives and the Joint Committee on Atomic Energy: *Provided further*, That the two foregoing provisos shall have no application with respect to technical and production facilities (1) if the Commission certifies to the Director of the Bureau of the Budget that immediate construction or immediate continuation of construction is necessary to the national defense and security, and (2) if the Director agrees that such certification is justified[: *Provided further*, That no part of the foregoing appropriation or contract authorization shall be used in connection with the payment of a fixed fee to any contractor or firm of contractors engaged under a cost-plus-a-fixed-fee contract or contracts at any installation of the Commission, where that fee for community management is at a rate in excess of $90,000 per annum, or for the operation of a transportation system where that fee is at a rate in excess of $45,000 per annum]. (*Atomic Energy Act of 1946* (*Public Law 585, approved Aug. 1, 1946*); *Independent Offices Appropriation Act, 1951.*)

Annual definite appropriation:

Appropriated 1951, [a] **$907,820,000** Estimate 1952, **$1,210,000,000**

[a] Includes $260,000,000 appropriated in the Supplemental Appropriation Act, 1951.

PROGRAM AND PERFORMANCE

The Commission provides for the production of fissionable materials and atomic weapons, research and development on both military and peaceful applications of atomic energy, dissemination of unclassified technical information to broaden scientific knowledge, and control of scientific and technical data to the extent necessary to safeguard the national security. Coordination of the Commission's programs with the Department of Defense is secured through the Military Liaison Committee. The facilities for the production of fissionable materials and weapons, together with the large national laboratories, are operated for the Commission by contractors.

As in the case of last year's budget submission, the Commission's estimates are based on costs to be incurred during the fiscal year 1952 converted in total to the obligational authority required to finance the program. The classification of costs conforms with that used in the Commission's industrial-type accounting system. Operating costs shown do not include any provision for depreciation of fixed assets.

1. *Operations*—(*a*) *Source and fissionable materials.*—The atomic energy program depends on both foreign and domestic programs of exploration for ores and procurement of uranium ores and concentrates. These ores and concentrates are processed through a complex manufacturing chain into feed materials, which are converted into uranium 235 and plutonium for atomic weapons and other uses. The quantity of fissionable materials produced will continue to increase in 1952 as capacity is expanded at the feed materials plants and at the Oak Ridge and Hanford plants. Further improvements will be sought by conducting development work in all phases of manufacturing processes to increase yields and improve product quality.

(*b*) *Weapons.*—The weapons program comprises weapons research and development and the manufacture, testing, storage, custody, and surveillance of atomic weapons. In 1952, extensive work will be continued on all aspects of this program, including the development of new and improved atomic weapons and industrial-type production of weapons of the latest approved designs.

(*c*) *Reactor development.*—Nuclear reactors are being developed for the production of fissionable material, the generation of power, and the propulsion of ships and aircraft. Although these reactors are important for military purposes, the Commission, through this work, expects also to evolve means of utilizing atomic energy for peaceful purposes. Exploratory work on the application of nuclear energy to aircraft propulsion will continue. Development work on the use of a nuclear reactor for ship propulsion has progressed. Construction of a land-based prototype began in 1950, and the development of a second prototype is going forward. An experimental breeder-reactor and a reactor for testing materials are now under construction at Arco, Idaho. The Commission laboratories are constantly working on new types of reactors, such as homogeneous and breeder reactors. These efforts require a continued increase in annual costs to complete development and to provide for operation and testing of the new models. Three-fourths of the scientific effort in this field is devoted to development of specific reactors, the balance being directed to research on materials and systems of chemical processing and heat transfer, which are essential to general reactor design and operation, and to operation of a school of reactor technology at Oak Ridge.

(*d*) *Physical research.*—The program of research in the physical sciences is designed to continue and strengthen the world leadership of the United States in the utilization of atomic energy by expanding the basic scientific knowledge to which physics, chemistry, metallurgy, and mathematics contribute. As an example of results achieved during the past year, two new elements, Berkelium and Californium, were discovered and the physical and chemical properties of hafnium are being accurately determined for the first time, since pure samples are now available from new purification processes. Such knowledge, as exemplified by these discoveries, will provide developmental scientists and engineers with an important supply of new basic information. Although much of the basic research is performed in the Commission's national laboratories, a substantial portion of it is carried on at universities and other institutions. Besides basic research, considerable work in applied sciences looking toward the application of new theories and devices for production uses contributes to the rise in costs. Provision is also made for the production of radioisotopes in Oak Ridge for use in research and medical therapy. The demand for radioisotopes is growing; partially as a result of this increased demand, and partially because of the adaptation of mass production methods to the processing and packaging of radioisotopes, a reduction in prices to the public was effected during the past year. Finally, provision is made for the awarding of some 325 fellowships in the physical sciences, as compared with 274 in 1951.

(*e*) *Biology and medicine.*—Activity in life science research is being increased within the Commission and the laboratories which it supports, especially in connection with the new programs of the Commission and civil defense. This program comprises (1) establishment and use of standards for the protection of the health of workers who are or may be exposed to radiation, and of standards for the protection of communities from such hazards; (2) study of means for protecting and treating individuals exposed to ionizing radiations produced by atomic weapons; (3) study of effects of the atomic bomb, in cooperation with agencies having a direct responsibility for civil and national defense; (4) promotion and direction of research utilizing atomic energy and its products in the fields of biology, agriculture, biophysics, and medicine, with special emphasis on treatment of disease, including cancer; (5) development and continuous improvement of instruments for the detection of radiation and the monitoring of radiation hazards; (6) determination of standards for the handling and disposal of radioactive wastes; (7) training of scientific manpower in radiation protection,

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

industrial hygiene, and the techniques essential to radiobiological research and civil defense; (8) development of greater understanding of the direct and indirect effects of ionizing radiation on all living organisms; and (9) development of the use of radioisotopes in determining the value of fertilizers and the most effective methods of applying them. This program provides also for 170 fellowships in the life sciences, as compared with 235 in 1951. During the past year, advances have been made in understanding the problem of acute radiation sickness.

(*f*) *Community operations.*—The Commission operates the towns of Oak Ridge, Tenn.; Richland, Wash.; and Los Alamos, N. Mex.; in addition, it provides some housing at other locations. The net cost includes the cost of providing housing, commercial facilities, and all of the usual municipal and utility functions, offset in part by the revenues derived therefrom. Due to the expansion of manufacturing and laboratory activities, the combined population of these towns is expected to increase from about 63,600 in 1950 to about 67,000 in 1951 and about 68,000 in 1952. Despite this projected increase in population, the estimates show a decrease in net costs, attributable to increases in revenue.

(*g*) *Program direction and administration.*—Offices in Washington and at principal plant installations provide general management, executive direction, and general supervision of program operations. Excluded are the costs which are related directly to the management of manufacturing, research facilities, and towns that are operated by contractors. Although additional offices at new plant sites and some increase in headquarters personnel are required as a result of the Commission's proposed expansion, the costs for program direction and administration drop from 6.9 percent of total operating costs in 1950 to 5.6 percent in 1952.

2. *Plant and equipment.*—Provision is made for increasing plant capacity to meet revised production goals for fissionable materials; necessary construction to continue research and development for new and improved atomic weapons; construction of developmental reactors and related utility and service facilities; laboratory and other research facilities at Commission laboratories and at universities and other institutions; and necessary construction to maintain and expand community facilities. The request for 1952 represents, for the most part, those amounts necessary to carry these projects toward completion.

OBLIGATIONS BY ACTIVITIES

Description	1950 actual	1951 estimate	1952 estimate
1. Operations (accrued-cost basis):

CIVIL SERVICE COMMISSION

Salaries and Expenses, Civil Service Commission—

Salaries and expenses: For necessary expenses, including [personal services in the District of Columbia;] not to exceed [$28,000] *$30,000* for services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a); not to exceed $10,000 for medical examinations performed for veterans by private physicians on a fee basis; travel expenses of examiners acting under the direction of the Commission, and expenses of examinations and investigations held in Washington and elsewhere; payment in advance for library membership in societies whose publications are available to members only or to members at a price lower than to the general public; [printing and binding;] not to exceed [$50,000] *$80,000* for performing the duties imposed upon the Commission by the Act of July 19, 1940 (54 Stat. 767); reimbursement of the General Services Administration for security guard services for protection of confidential files; [a health service program as authorized by law (5 U. S. C. 150); payment of tort claims pursuant to law (28 U. S. C. 2672);] and not to exceed $5,000 for actuarial services by contract, without regard to section 3709, Revised Statutes, as amended; [$15,511,913] *$19,875,000: Provided*, That no details from any executive department or independent establishment in the District of Columbia or elsewhere to the Commission's central office in Washington or to any of its regional offices shall be made during the current fiscal year, but this shall not affect the making of details for service as members of the boards of examiners outside the immediate offices of the Commission in Washington or of the regional directors, nor shall it affect the making of details of persons qualified to serve as expert examiners on special subjects: *Provided further*, That the Civil Service Commission shall have power in case of emergency to transfer or detail any of its employees to or from its office or field force: *Provided further*, That members of the Loyalty Review Board in Washington and of the regional loyalty boards in the field may be paid actual transportation expenses, and per diem in lieu of subsistence authorized by the Travel Expense Act of 1949 while traveling on official business away from their homes or regular places of business, and while en route to and from and at the place where their services are to be performed: *Provided further*, That nothing in section 281 or 283 of title 18, United States Code, or in section 190 of the Revised Statutes (5 U. S. C. 99) shall be deemed to apply to any person because of his appointment for part-time or intermittent service as a member of the Loyalty Review Board or a regional loyalty board in the Civil Service Commission.

[For an additional amount for "Salaries and expenses", Civil Service Commission, $1,000,000; and the limitation imposed by section 103 of the Independent Offices Appropriation Act, 1951, on the amount available for travel expenses under this head, is increased from "$438,013" to "$466,000".] *(5 U. S. C. chap. 12; 18 U. S. C. 611; 31 U. S. C. 388; Executive Orders 6670, Apr. 7, 1934; 6731, June 5, 1934; 7915 and 7916, June 24, 1938; Independent Offices Appropriation Act, 1951; Supplemental Appropriation Act, 1951.)*

Appropriated 1951, **$16,511,913** Estimate 1952, **$19,875,000**

PROGRAM AND PERFORMANCE

As the central personnel agency of the Government, the Civil Service Commission holds examinations, certifies eligibles to fill vacancies in the Federal service, and determines the character and suitability of applicants for such employment. It also administers the Classification Act of 1949 and the retirement system under the act of 1920, as amended.

1. *Examining, placement, and veterans' preference.*—From December 1, 1950, on, most appointments will be on a temporary-indefinite basis. The use of competitive examinations will be continued, except that where there are not enough qualified applicants the Commission will authorize noncompetitive examination procedures and standards. The recruiting facilities of the Commission and its agency boards and committees of examiners will be fully utilized in making temporary-indefinite appointments. Veterans are aided in securing the benefits to which they are entitled under law. The Commission also inspects personnel activities carried on by agencies subject to its review.

Production count	1950 actual	1951 estimate	1952 estimate
Applications processed	890,157	540,833	495,532
Placements made:			
By the Commission	214,959	159,517	156,094
By boards and committees	121,541	183,623	212,041
Agencies inspected	2,076	1,601	1,606

2. *Investigation of character and fitness for employment.*—The Commission has specific responsibilities for carrying out the loyalty program, including the establishment of regional boards and of a central board to review decisions of the regional and agency boards. In addition, investigations are made of applicants for certain positions in the Federal service, including postmasters and the higher grade administrative and technical positions.

Production count	1950 actual	1951 estimate	1952 estimate
Record check and inquiry cases	291,593	593,998	1,003,108
Regional loyalty cases adjudicated	1,931	2,417	5,019
Loyalty appeals adjudicated	135	158	175
Competitive qualifications investigations	1,585	1,842	1,585
Other personal investigations	11,425	13,132	12,474

3. *Administration of the personnel classification system.*—The Commission prepares and issues allocation standards for positions under the Classification Act of 1949; conducts a program of audits to insure compliance with existing standards; and establishes new minimum and maximum rates of pay for certain groups of employees. The slight increase recommended for audits is related to the larger number of positions to be covered in 1952.

Production count	1950 actual	1951 estimate	1952 estimate
Allocation standards established	712	700	700
Conducting audits	22,801	136,029	150,000

4. *Administration of the retirement system.*—Administering the Civil Service Retirement Act, the Panama Canal Construction Annuity Act, and the Lighthouse Service Widow's Benefit Act, involves adjudicating annuity,

Status cases determined	79,203	24,789	1,000
Inquiries answered	105,585	104,495	131,897

6. *Federal Personnel Council.*—The Council advises the President and the Commission in the protection and improvement of the merit system, recommends changes in the personnel regulations and procedures, and serves as an instrument for raising the standards of personnel administration in the Government.

7. *Regulatory, appellate, and advisory functions.*—These consist of the formulation of rules and regulations; hearing and taking action on appeals; the administration of the political activities statutes; and the recommendation of measures to the President to promote the accomplishment of the objectives of the rules and regulations.

8. *Executive and administrative services.*—These comprise executive staff and administrative housekeeping services.

No part of the appropriations herein made to the Civil Service Commission shall be available for the salaries and expenses of the Legal Examining Unit in the Examining and Personnel Utilization Division of the Commission, established pursuant to Executive Order Numbered 9358 of July 1, 1943, or for the compensation or expenses of any member of a board of examiners (1) who has not made affidavit that he has not appeared in any agency proceeding within the preceding two years, and will not thereafter while a board member appear in any agency proceeding, as a party, or in behalf of a party to the proceeding, before an agency in which an applicant is employed who has been rated or will be rated by such member; or (2) who, after making such affidavit, has rated an applicant who at the time of the rating is employed by an agency before which the board member has appeared as a party, or in behalf of a party, within the preceding two years: *Provided*, That the definitions of "agency", "agency proceeding" and "party" in section 2 of the Administrative Procedure Act shall apply to these terms as used herein.

No part of appropriations herein shall be used to pay the compensation of officers and employees of the Civil Service Commission who allocate or reallocate supervisory positions in the classified civil service solely on the size of the group, section, bureau, or other organization unit, or on the number of subordinates supervised. References to size of the group, section, bureau, or other organization unit or the number of subordinates supervised may be given effect only to the extent warranted by the work load of such organization unit and then only in combination with other factors, such as the kind, difficulty, and complexity of work supervised, the degree and scope of responsibility delegated to the supervisor, and the kind, degree, and value of the supervision actually exercised. (*Independent Offices Appropriation Act, 1951.*)

PROGRAM AND PERFORMANCE

Annuities are paid to persons who were employed on the construction of the Panama Canal or to their widows, and benefits are paid to widows of former employees of the Lighthouse Service. On June 30, 1950, there were 3,041 Panama Canal annuitants on the roll, as compared with an estimate of 3,068 on June 30, 1951, and an estimate of 2,978 on June 30, 1952. The act authorizing benefit payments to widows of former Lighthouse Service employees became effective September 1, 1950, and it is estimated that there will be 489 widows receiving benefit payments on June 30, 1951, and 554 on June 30, 1952.

OBLIGATIONS BY ACTIVITIES

Payment of annuities to employees engaged in the construction of the Panama Canal and widows of former employees of the Lighthouse Service—1950, $5,216,359; 1951, $2,803,177; 1952, $2,955,900.

OBLIGATIONS BY OBJECTS

11 Grants, subsidies, and contributions—1950, $5,216,359; 1951, $2,803,177; 1952, $2,955,900.

Payment to Civil Service Retirement and Disability Fund—

[Civil-service] *Payment to civil service* retirement and disability fund: For financing the liability of the United States, created by the Act approved May 22, 1920, and Acts amendatory thereof (5 U. S. C. chap. 14), [$305,000,000] *$320,450,350*, which amount shall be placed to the credit of the "civil-service retirement and disability fund". (*Independent Offices Appropriation Act, 1951.*)

Appropriated 1951, **$305,000,000** Estimate 1952, **$320,450,350**

FUNDS AVAILABLE FOR OBLIGATION

	1950 actual	1951 estimate	1952 estimate
Appropriation or estimate	$301,290,728	$305,000,000	$320,450,350
Comparative transfer from—

"Alaska Railroad retirement and disability appropriated fund"	215,000		
Total obligations	302,504,728	305,000,000	320,450,350

PROGRAM AND PERFORMANCE

The Government contributes to the civil-service retirement and disability fund based on an estimated average employment during 1952 of 1,520,000 persons covered by the fund, and also for the persons previously covered by the Canal Zone retirement and disability fund and the Alaska Railroad retirement and disability fund, which were consolidated with this fund in 1950.

The Government contribution for 1952 is based on 2.6 percent of salaries of covered employees plus interest payment of 4 percent on its accrued liability.

DISPLACED PERSONS COMMISSION

Expenses, Displaced Persons Commission—

Displaced Persons Commission: For expenses necessary to carry out the provisions of the Displaced Persons Act of 1948, as amended by the Act of June 16, 1950 (Public Law 555), including [perscnal services and] *$1,200,000 for capital for loans pursuant to section 14 of said Act;* rents in the District of Columbia; travel expenses, including travel expenses outside continental United States without regard to the Standardized Government Travel Regulations, as amended, and the rates of per diem allowances under the [Subsistence Expense Act of 1926, as amended; purchase (not to exceed three), and] *Travel Expense Act of 1949;* hire of passenger motor vehicles; [printing and binding, including] printing and binding outside the continental limits of the United States without regard to section 11 of the Act of March 1, 1919 (44 U. S. C. 111); expenses incident to the primary and secondary education of American children who are dependents of Government personnel paid from this appropriation and stationed overseas; services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a); [payment of tort claims pursuant to law (28 U. S. C. 2672); health service program as authorized by law (5 U. S. C. 150);] employment of aliens; and payment of rent in foreign countries in advance; [$8,000,000] *$8,260,000: Provided,* That allocations may be made from this appropriation by the Commission upon approval by the Bureau of the Budget to any department, agency, corporation, or independent establishment of the Government for direct expenditure for the purposes of this appropriation, and any such expenditures may be made under the specific authority herein contained or under the authority governing the activities of the department, agency, corporation, or independent establishment to which amounts are allocated: *Provided further,* That the Commission may enter into agreements with *international agencies for the use of their transportation and other facilities for the transfer of persons as provided in section 12 of the Displaced Persons Act of 1948, as amended, and with* United States governmental agencies and may make payment in advance or by reimbursement for expenses incurred by such agencies in rendering assistance to the Commission in carrying out the provisions of this Act.

[Funds appropriated for the expenses of the Commission shall be available for use in connection with agreements with international agencies for the use of their transportation and other facilities for the transfer of persons as provided for in section 12 of the Displaced Persons Act, as amended, and the Commission may make payment in advance or by reimbursement for expenses incurred by such agencies in rendering assistance to the Commission in carrying out the provisions of such Act.]

[Funds appropriated for the expenses of the Commission shall be available for loans as provided in section 14 of the Displaced Persons Act, as amended.] (*Independent Offices Appropriation Act, 1951; Supplemental Appropriation Act, 1951.*)

Appropriated 1951, **$8,000,000** Estimate 1952, [a] **$8,260,000**

[a] Includes $73,000 for activities previously carried under "Salaries and expenses, Department of State." The amounts obligated in 1950 and 1951 are shown in the schedule as comparative transfers.

PROGRAM AND PERFORMANCE

This program provides for screening and selecting displaced persons for admission into the United States as permanent residents, and aiding selectees in resettlement. The Displaced Persons Act of 1948, as amended, authorizes 341,000 displaced persons, 5,000 war orphans, and 54,744 persons of ethnic German origin to be admitted as permanent residents. In addition, it authorizes 15,000 displaced persons, who as of April 30, 1949, were temporarily in the United States, to apply for permission to remain here as permanent residents. It is the aim to

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

achieve this immigration in a manner consistent with resettlement opportunities existing in the United States, particularly with regard to employment and housing.

The International Refugee Organization supervises and finances the movement of displaced persons from ports of embarkation in Europe to the United States. The movement of persons of ethnic German origin is supervised and financed by the Displaced Persons Commission.

It is expected that the program will be virtually completed by the end of fiscal 1952.

1. *Selection and resettlement of displaced persons, war orphans, and refugees of ethnic German origin.*—Applicants for admission in 1952 are estimated at 157,000 as compared with 332,500 in 1951. Admissions during 1952 will be about 63,000 as compared with 163,500 in 1951. Major reductions in staff to be made during 1952 are offset by an increase of $3,125,000 in funds required to transport persons of ethnic German origin to the United States. During 1952 there will be 35,000 of this group to be transported as against 10,000 in 1951.

2. *Security investigations.*—Security investigations in the United States Occupied Areas of Germany and Austria are conducted by the Counter Intelligence Corps, Department of the Army. It is estimated that 50,200 persons will be investigated in 1952, as against 126,000 in 1951. A decrease of 71 percent in costs is reflected in the budget.

3. *Health examinations.*—The Public Health Service gives health examinations to persons eligible for admission into the United States. Examinations are estimated to drop from 184,300 in 1951 to 36,700 in 1952. A decrease of 60 percent in costs is reflected in the budget. A considerable part of the 1952 cost is for liquidating purposes.

4. *Consular service.*—The Department of State determines the eligibility of applicants under immigration laws and issues visas to eligible persons. It is estimated that visas will be issued to 34,000 persons in 1952, compared to about 179,000 in 1951. A decrease of 72 percent in costs is reflected in the budget. Of the amount required in 1952, about 40 percent will be for liquidation purposes.

5. *Immigration inspection.*—The Immigration and Naturalization Service preexamines overseas applicants to determine their eligibility for admission into the United States. About 63,000 persons will be admitted in 1952, as against an estimated 163,500 in 1951. A decrease of 42 percent in costs is reflected in the budget.

6. *Resident alien registration.*—The Immigration and Naturalization Service determines whether alien applicants for adjustment of immigration status are qualified for permanent residence status, and reports to the Congress all pertinent facts in each case where adjustment is recommended. Action is expected to be completed on about 2,500 applications annually in 1951 and 1952, and the cost of this activity is expected to remain about the same each year.

ECONOMIC COOPERATION ADMINISTRATION

Permanent indefinite appropriation, special account:

Discharge of Investment Guaranty Liabilities, Economic Cooperation Administration.

FUNDS AVAILABLE FOR OBLIGATION

Appropriation or estimate—1950, $227,802; 1951, $230,276.

PROGRAM AND PERFORMANCE

Section 111 (b) of Public Law 472, Eighteenth Congress, as amended, authorizes the Administrator for Economic Cooperation to issue industrial investment (including forward contracting) and informational media guaranties up to $200,000,000 as an endeavor to stimulate the flow of private capital to the areas participating in the European recovery program. (22 U. S. C. 1509 (b); 63 Stat. 51-52.)

STATUS OF GUARANTIES BY TYPES

[As of June 30 of each year]

	1949 actual	1950 actual	1951 estimate
Industrial	$2,670,000	$22,276,565	$39,000,000
Forward contracting		550,000	550,000
Informational media	1,791,814	2,025,961	6,600,000
Total outstanding	4,461,814	24,852,526	46,150,000

Industrial investment guaranties.—Twenty-three industrial investment guaranties were outstanding at the end of fiscal year 1950, including one forward contracting guaranty. These guaranties represent a net contingent liability of the Government to convert foreign currencies. From the inception of the program until October 31, 1950, no disbursements have been made under this type of guaranty. A total of $217,162 in fees has been collected in this same period.

Under recent amendments to the Economic Cooperation Act, investment guaranties were broadened to cover royalty payments under licensing agreements, and losses incurred by expropriation or confiscation. As a result of these changes, increased activity is expected.

Informational media guaranties.—The Administrator is authorized to issue guaranties up to $10,000,000 in any fiscal year against non-transferability of funds in connection with American investments in enterprises producing or distributing informational media. As of October 31, 1950, $1,419,350 disbursements have been made against the guaranties, and $82,709 in fees have been collected.

STATEMENT A.—*Statement of sources and application of funds*

DISCHARGE OF INVESTMENT GUARANTY LIABILITIES

	1950 actual	1951 estimate
FUNDS APPLIED		
To acquisition of assets:		
Payments under guaranties:		
Informational media	$586,526	$2,785,385
Industrial		
Forward contracting		
	586,526	2,785,385
To expenses:		
Losses on foreign currencies sold	19,383	27,107
Interest paid to the U. S. Treasury	12	
To retirement of borrowings	10,133	
To increase in working capital	114,180	6,709
Total, funds applied	730,234	2,819,201
FUNDS PROVIDED		
By realization of assets	101,205	1,315,608
By income: Fees collected:		
Informational media	24,436	64,986
Industrial	172,059	162,790
Forward contracting	550	2,500
	197,045	230,276
By borrowings	431,984	1,273,317
Total, funds provided	730,234	2,819,201

STATEMENT B.—*Statement of income and expenses*

Interest paid to the U. S. Treasury	12	
	19,395	27,107
Net	177,650	203,169

STATEMENT C.—*Statement of financial condition*

	1949 actual	1950 actual	1951 estimate
ASSETS			
Cash with U. S. Treasury		$114,179	$120,889
Foreign currencies on hand (at cost)	$45,176	530,497	2,000,274
Total assets	45,176	644,676	2,121,163
INVESTMENT OF U. S. GOVERNMENT			
Borrowings from U.S. Treasury	10,133	431,983	1,705,301
Fees—net available for future liabilities	35,043	212,693	415,862
Total investment of U. S. Government	45,176	644,676	2,121,163

SCHEDULE C–1.—*Position with respect to borrowing authority*

	1949 actual	1950 actual	1951 estimate
Outstanding borrowings at end of year	$10,133	$431,983	$1,705,301
Unused borrowing authority	149,989,867	199,568,017	198,294,699
Total borrowing authority	150,000,000	200,000,000	200,000,000

OBLIGATIONS BY ACTIVITIES

Discharge of investment guaranty liabilities—1950, $227,802; 1951, $230,276.

OBLIGATIONS BY OBJECTS

07 Other contractual services—1950, $227,802; 1951, $230,276.

Allocations Received From Other Appropriation Accounts—

NOTE.—Obligations incurred under allocations from other appropriations are shown in the chapter, "Funds appropriated to the President," under the following heads:
Economic cooperation.
Mutual defense assistance.
Assistance to China.
Assistance to the Republic of Korea.
Assistance to Greece and Turkey.

FEDERAL COMMUNICATIONS COMMISSION

Salaries and Expenses, Federal Communications Commission—

Salaries and expenses: For necessary expenses in performing the duties imposed by the Communications Act of 1934[, approved June 19, 1934 (48 Stat. 1064)] (*47 U. S. C. 151*), the Ship Act of 1910, [approved June 24, 1910,] as amended (46 U. S. C. 484–487), the International Radiotelegraphic Convention (45 Stat. pt. 2, p. 2760), Executive Order 3513, dated July 9, 1921, as amended under date of June 30, 1934, relating to applications for submarine cable licenses, and the radiotelegraphy provisions of the Convention for Promoting Safety of Life at Sea[, ratified by the President July 7, 1936] (*50 Stat. 1121*), including [personal services in the District of Columbia, contract stenographic reporting services,] *newspapers (not to exceed $175)*, special counsel fees, [health service program as authorized by law (5 U. S. C. 150), payment of tort claims pursuant to law (28 U. S. C. 2672),] improvement and care of grounds and repairs to buildings (not to exceed $17,500), purchase of not to exceed twenty passenger motor vehicles for replacement only, [travel expenses (not to exceed $93,000),] and [printing and binding, $6,625,000, of which $25,000 shall be available only for] services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a), [for a survey as to ways and means of expediting business: *Provided*, That funds appropriated under this paragraph may be used for application processing and hearings in connection with broadcast activities and for application processing in connection with safety and special services without regard to the apportionment of funds required by the Act of February 27, 1906 (31 U. S. C. 665)] *$6,850,000. (Independent Offices Appropriation Act, 1951.)*

Annual definite appropriation:

Appropriated 1951, **$6,625,000** Estimate 1952, **$6,850,000**

FUNDS AVAILABLE FOR OBLIGATION

Appropriation or estimate	$6,729,345	$6,625,000	$6,850,000
Unobligated balance, estimated savings	−14		
Savings under sec. 1214		−50,000	
Total obligations	6,729,331	6,575,000	6,850,000

PROGRAM AND PERFORMANCE

The Commission regulates interstate and international wire and radio communication.

1. *Common carrier activities.*—Formal and informal investigations are conducted with respect to existing and proposed rates and practices of common carriers in communication. Also construction of facilities, extensions, and reductions in services, as well as mergers and acquisitions of properties, are passed upon.

2. *Applied technical research and frequency allocation.*—Detailed factual knowledge of radio wave characteristics and equipment capabilities is developed as the foundation for frequency allocation and assignment. Increased demand for assignment of frequencies, occasioned by development of new uses of radio, necessitates more intensive technical research to assure the best possible utilization of the available radio spectrum. The small increase estimated for 1952 is primarily for additional research, technical equipment, and frequency assignment work.

3. *Field engineering and monitoring.*—Field staff inspect radio stations, give operator examinations, monitor the radio spectrum, locate illegal sources of radio emissions and lost aircraft through radio direction-finding techniques, and gather engineering data for use by the Commission. The increase requested for 1952 will provide for continuous twenty-four hour watch at all monitoring stations.

4. *Safety and special radio services.*—Aviation, marine, police, fire, industrial, amateur, and other nonbroadcast uses of radio are licensed and regulated as new safety and special uses for radio develop. The number of stations authorized for nonbroadcast purposes increased from 143,083 in 1949 to 157,387 in 1950, but equipment shortages caused by the expanding defense effort are expected to retard further growth in 1951 and 1952.

5. *Broadcast activities.*—All standard broadcast (AM), frequency modulation (FM), and television (TV) broadcasting stations are licensed and regulated under this activity. The estimated reduction in these activities is based on the assumption that the expanding defense program will reduce workloads.

6. *Executive, staff, and service activities.*—These include top policy-making and adjudicatory functions, as well as administrative services.

OBLIGATIONS BY ACTIVITIES

Description	1950 actual	1951 estimate	1952 estimate
1. Common carrier activities	$868,191	$816,377	$836,445

Reimbursable Obligations			
Reimbursements for services performed	1,530		
Total obligations	6,338,037	7,054,000	7,053,000

PROGRAM AND PERFORMANCE

The Federal Deposit Insurance Corporation, under authority of the Federal Deposit Insurance Act of September 21, 1950, (1) insures the deposits of all banks that apply and qualify for insurance up to a maximum of $10,000 for each depositor; (2) protects depositors by extending financial aid to distressed insured banks through loans, deposits, or purchases of assets; and (3) acts as receiver for closed insured banks. No appropriations are made to the Corporation. Funds necessary for administrative expenses are provided from corporate income in amounts authorized by the Director of the Bureau of the Budget. Estimated administrative expenses in 1952 of $6,800,000 are $70,000 less than in 1951.

As of June 30, 1950, there were 13,641 insured banks, involving approximately 100 million depositors and representing a contingent liability of about $77 billion. The Corporation examines annually 6,745 of these banks, and reviews reports of examination of the remaining 6,896 which are examined by other Federal agencies.

The returns from deposit insurance assessments and Corporation investments have been sufficient to cover all insurance losses and operating expenses, and provide for an insurance reserve amounting to over $1.2 billion on June 30, 1950. The Corporation has authority to borrow up to $3 billion from the Treasury for insurance purposes which authority has never been used. Paid-in capital stock of $289 million was retired during fiscal years 1948 and 1949. Interest in the amount of $80,562,312 is payable in 1951, representing 2 percent per

Unobligated balance, estimated savings	−37,061		
Total obligations	2,695,939	2,949,700	3,247,000

PROGRAM AND PERFORMANCE

The Service is one of several agencies administering the national policy of promoting industrial peace and stability through encouragement of collective bargaining. It assists in the prevention and settlement of labor-management disputes in industries, other than rail and air transportation, affecting interstate commerce. The Service possesses no law-enforcement authority; its only power is that of persuasion. The 1952 estimate contemplates an increase in staff attributable to defense production requirements.

During fiscal year 1950 the Service made its facilities available in about 15,000 labor-management disputes. Based on the general economic outlook and the expansion of defense production, it expects to be active in a larger number of cases in the current and budget years. The Service will also continue to complement the settlement of specific disputes by encouraging the development of free collective bargaining and by promoting relationships between representatives of labor and management which better enable them to settle their differences directly and amicably.

OBLIGATIONS BY ACTIVITIES

Description	1950 actual	1951 estimate	1952 estimate
1. Mediation and conciliation of labor disputes	$2,515,234	$2,774,200	$3,065,100

PROGRAM AND PERFORMANCE

The Federal Power Commission administers the Federal Power Act and Natural Gas Act and has additional duties under other acts relating to Federal power development.

1. *Licensing of non-Federal hydroelectric projects.*—The Commission issues licenses to private, State, and municipal interests for proposed and existing hydroelectric projects affecting public lands and streams subject to Federal jurisdiction; inspects construction and operation of such projects; and determines their actual legitimate original cost. Pertinent data are set forth below:

	1950 actual	1951 estimate	1952 estimate
Number of licensed projects	658	670	680
Number of applications pending (end of year)	176	176	171
Total claimed cost (in millions)	$958	$1,037	$1,112
Annual income to Government from licenses	$1,168,479	$1,161,483	$1,428,401

2. *Regulation and surveys, electric power industry.*—The Commission regulates the transmission and sale for resale of electric energy in interstate commerce and the rates, accounts, depreciation practices, certain security issues, disposition of properties, mergers, and the interconnection and coordination of facilities of public utilities subject to the Commission's jurisdiction. It also gathers and publishes statistics and other information about the electric utility industry. Pertinent data are set forth below:

	By calendar year		
	1949 actual	1950 estimate	1951 estimate
Number of public utilities regulated	272	280	280
Operating revenues (in millions)	$3,669	$3,850	$4,000
Number of companies reporting for statistical purposes	1,462	1,500	1,500

3. *Regulation and surveys, natural gas industry.*—The Commission also regulates the transportation and sale for resale of natural gas in interstate commerce, and the rates, accounts, and depreciation and depletion practices, and issues certificates of public convenience and necessity to natural gas companies subject to the jurisdiction of the Commission. It gathers and publishes statistics and other information about the natural gas industry.

The continued expansion of the natural gas industry, shown below, has added to the Commission's workload and responsibilities in this field.

	By calendar year		
	1949 actual	1950 estimate	1951 estimate
Number of natural gas companies	122	130	135
Operating revenues (in millions)	$1,147	$1,350	$1,550

4. *Investigations relating to Federal river development projects.*—Studies are made of entire river basins and individ-

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

ual projects proposed by the Departments of the Army and Interior to determine possibilities for conservation, development, and utilization of potential power resources. Review and approval are required of certain proposed rates for sale of power from such projects. The Commission also assists Congress and Federal and State agencies with information on the power features of Federal river development projects.

Only 17.7 million kilowatts out of a potential 88 million kilowatts of hydroelectric energy in the United States were developed as of December 31, 1949. In fiscal year 1950, 158 studies were carried on, and it is estimated that there will be 182 in 1951. It is planned to undertake 195 studies in 1952, of which 120 will be financed from the appropriation, "Flood control surveys."

5. *International Joint Commission.*—The International Joint Commission, of which the Chief Engineer of the Federal Power Commission is a member, adjudicates controversies between the Governments of the United States and Canada or nationals of the two countries, principally over boundary waters and waters that cross the boundary, and conducts investigations as directed by the two Governments.

6. *Administration.*—This activity combines executive direction and common services.

tices and conspiracies in restraint of trade; gathers economic data about business organization and conduct, particularly concerning monopoly and related problems; and supervises the registration and operation of associations of American exporters engaged solely in export trade.

2. *Antideceptive practices.*—The Commission prevents false, misleading, and fraudulent advertising and other deceptive or fraudulent practices by cease-and-desist orders; protects producers, manufacturers, distributors, and consumers from unrevealed presence of substitutes and mixtures in manufactured wool products; and aids business in maintaining effective competition through industry trade practice conferences.

3. *Administration.*—This activity consists of general direction and the provision of common services.

PROGRAM AND PERFORMANCE

The programs of the General Accounting Office for 1952 are affected by two acts passed in 1950—the Budget and Accounting Procedures Act and the Post Office Financial Control Act.

Under the Budget and Accounting Procedures Act the amount of detailed audit work can be regulated or modified in the light of the effectiveness of agency accounting systems and the administrative application of legal requirements governing financial transactions, making possible the extension of selective examination and reliance on the Comptroller General's comprehensive audit program. The Post Office Department Financial Control Act calls for the development by the Post Office Department of a complete system of accounting and internal control under the principles and standards prescribed by the Comptroller General. Thus, the programs for 1952 are to serve two ends: (1) To achieve all economies possible under these acts and the joint accounting program, and (2) to maintain continuity in the Government's financial processes while the change-over to more modern and efficient methods is going forward.

The General Accounting Office settles claims by or against the Government; audits the financial transactions of Government agencies; audits Government corporations; audits and settles fiscal officers' accounts; renders legal decisions relating to Government fiscal matters; conducts investigations relating to the receipt, disbursement, and application of public funds; develops, prescribes, and evaluates accounting systems on a Government-wide basis; and performs other related and necessary functions. During the fiscal year 1950, refunds and collections in the amount of $42,785,277 were made through the audit, investigative, and claims activities of the General Accounting Office.

1. *Office of the Comptroller General.*—The Comptroller General serves Congress by presenting to it reports on matters relating to public funds, with recommendations and advice. The scope and variety of legislative reports

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

GENERAL ACCOUNTING OFFICE—Continued

Salaries, General Accounting Office—Continued

and services continues to broaden, and the number to expand.

2. *Office of the General Counsel.*—In addition to preparing decisions and reports the general counsel and his staff participate in conferences with legislative and administrative officials of the Government on the legality or propriety of proposed obligations and expenditures, the sufficiency of proposed legislation, the desirability of new legislation for particular purposes, and like matters. Workload amounted to 16,467 cases during 1950; the backlog on June 30, 1950, was 2,691.

3. *Office of Investigations.*—This activity comprises (*a*) inspections at irregular intervals of most of the larger Federal installations and activities throughout the country; (*b*) investigations of fraudulent transactions, suspected fraud, or other serious irregularity; and (*c*) surveys of particular subjects of Federal expenditure on a broad and sometimes Nation-wide basis. The work is carried on in the field and at the spot where it can be best applied in the interest of the Government. Nine hundred and forty-five Federal offices and activities were visited in 376 cities during the fiscal year ended June 30, 1950.

4. *Office of the Chief Clerk.*—This office is responsible for property management and housekeeping work which encompass duplicating, procurement, distribution of mail, telephone service, and messenger and labor services.

5. *Accounting and Bookkeeping Division.*—As a result of the Budget and Accounting Procedures Act of 1950, this Division has been abolished, although it has been necessary to transfer certain of its functions to other divisions in the Office.

6. *Accounting Systems Division.*—Enactment of the Budget and Accounting Procedures Act has made urgent the work of bringing about improvement in the accounting system of individual agencies and in the central and Government-wide accounting and auditing. It is also necessary to develop ways and means of achieving an orderly transition to modern procedures which require professional competence of the highest order.

7. *Audit Division.*—The traditional audit conducted by the General Accounting Office is directed primarily to the accountability of the officers of the Government who have been entrusted with public funds, and of duly authorized certifying officers for any illegal, improper, or incorrect payments.

Where found to be more feasible and practicable many audits are performed immediately within the departments and agencies or at project sites. At present field audits are performed at 590 locations outside of Washington.

8. *Claims Division.*—All justiciable claims by or against the United States are settled, unless exclusive jurisdiction is specifically conferred upon another agency by law. During 1950 the number of claims settled was 311,689.

9. *Corporation Audits Division.*—The audit of Government corporations was current on June 30, 1950. This activity has now been enlarged to include the conduct of comprehensive audits of certain Government agencies. The comprehensive audit consists of an audit of receipts, expenditures, and application of public funds, together with verification of the assets, liabilities, proprietary accounts, and operating results of Government agencies in accordance with generally accepted auditing principles and procedures applicable to commercial enterprises.

10. *Division of Personnel.*—During 1950 a program was inaugurated to establish work performance standards. The standard will indicate the essential work operations assigned to each position, prescribe the approved manner of performance, set out the work aims to be accomplished, and provide the means for evaluating employee performance.

11. *Postal Accounts Division.*—As a result of the Post Office Department Financial Control Act of 1950 this activity was transferred to the Post Office Department.

12. *Postal Audit Division.*—This Division was recently created to perform the functions placed upon the General Accounting Office by the Post Office Department Financial Control Act of 1950 (64 Stat. 460).

This act will enable progressive decentralization and refinement of General Accounting Office audit. The audit will be more comprehensive in scope but on a selective basis depending on the development of effective systems of accounting and internal control by the department.

13. *Reconciliation and Clearance Division.*—Provision is made for the audit, reconciliation, and adjustment of official checking accounts and such other activities as the initial examination, analysis, and segregation of fiscal officers' accounts; furnishing of information from fiscal accounts and documents; coordination, assembly, and preparation of fiscal accounts for settlement and filing; and maintenance of control over the flow of fiscal accounts and supporting documents through the Office.

14. *Transportation Division.*—This activity audits freight and passenger transportation payments for the account of the United States and the settlement of claims involving transportation charges. Through the efforts of the General Accounting Office, over $400,000,000 has been collected during the past 10 years.

OBLIGATIONS BY ACTIVITIES

Description	1950 actual	1951 estimate	1952 estimate

Savings under sec. 1214		−4,000	
Total obligations	82,117	95,000	99,000

PROGRAM AND PERFORMANCE

This independent Commission of three members, which is required to complete its work by April 10, 1957, was created to hear and adjudicate claims, existing before August 13, 1946, of American Indian tribes, bands, or other identifiable groups of Indians residing within the territorial limits of the United States or Alaska. Claims must be filed with the Commission by August 13, 1951, by which time it is estimated that a total of 300 claims will have been filed. Two hundred and thirty claims have been filed through November 6, 1950. Payment of awards will be dependent upon subsequent appropriations by Congress.

OBLIGATIONS BY ACTIVITIES

Hearing and adjudication of Indian claims—1950, $82,117; 1951, $95,000; 1952, $99,000.

Total obligations	9,718,555	9,718,600	9,823,000

PROGRAM AND PERFORMANCE

The Interstate Commerce Commission regulates common carriers engaged in interstate and foreign commerce, including railroads, motor carriers, water carriers, pipelines, contract carriers by motor vehicle and water, freight forwarders, brokers of motor service, and to a limited extent private freight-car lines.

Rising operating costs of the regular common carriers account for increased applications for rate adjustments. Greater competition between carriers results in increased complaint proceedings and a higher volume of investigatory and inspection activities. The amount recommended for 1952 provides for (*a*) strengthening the Commission's work upon a selective basis in areas where backlogs are most serious and where volume of workload is not subject to control; (*b*) improving motor carrier safety; (*c*) more adequate review of motor carrier tariffs.

1. *Applications, complaints, and other proceedings.*—About one-fourth of the Commission's work is devoted to setting rates, granting operating authorities, approving financial organizations, and disposing of complaints. The preparation of decisions in these proceedings involves detailed review of data and holding of informal and formal hearings.

2. *Investigation, litigation, legal advice, and compliance.*—The Commission (*a*) formulates uniform systems of accounts for all types of carriers subject to the Interstate Commerce Act and examines such accounts in order to obtain accurate and reliable information; (*b*) prepares studies and analyses of costs of transportation services of the various types of carriers; (*c*) investigates alleged violations of the law and assists in the enforcement of statutes affecting transportation and carriers; (*d*) prepares briefs and arguments in cases involving suits to set aside orders of the Commission; (*e*) ascertains that motor carriers and freight forwarders are adequately insured; and (*f*) prepares regulations to promote highway safety and to assure the use of safe equipment and operating practices by operators of busses and trucks.

3. *Collection and analysis of accounting and statistical data.*—Statistical research is undertaken so that the Commission may regulate the industry on a sound factual basis.

4. *Supervision of rate publications.*—Before they become effective, all common-carrier rate tariffs must be filed with the Commission, which examines them to protect users from excessive charges.

5. *Railroad car service.*—A field staff of service agents is maintained for working directly with individual railroads in handling problems related to the movement of freight cars.

6. *Valuation of railroads and pipelines.*—Valuation work consists of keeping inventory and cost records current and developing elements of value which must be used in prescribing just and reasonable rates, determining divisions of joint rates and fares, prescribing proper switching charges, setting up of depreciation reserves, determining costs of service, and approving financial reorganizations. Such data are used also by other agencies of the Federal Government and by State regulatory bodies.

7. *Administration.*—General executive direction is provided by the Commissioners and by the Office of the Secretary. Administrative services are furnished to all bureaus centrally.

Locomotive Inspection, Interstate Commerce Commission—

Locomotive inspection: For expenses necessary in the enforcement of the Act of February 17, 1911, entitled "An Act to promote the safety of employees and travelers upon railroads by compelling common carriers engaged in interstate commerce to equip their locomotives with safe and suitable boilers and appurtenances thereto", as amended (45 U. S. C. 22–34), [including personal services in the District of Columbia, and payment of tort claims pursuant to law (28 U. S. C. 2672), $718,600] *$719,000.* (*Independent Offices Appropriation Act, 1951.*)

Appropriated 1951, **$718,600** Estimate 1952, **$719,000**

FUNDS AVAILABLE FOR OBLIGATION

The 10 additional vehicles are for use by the additional safety inspectors.

INTERSTATE COMMISSION ON THE POTOMAC RIVER BASIN

Contribution to Interstate Commission on the Potomac River Basin—

Contribution to Interstate Commission on the Potomac River Basin: To enable the Secretary of the Treasury to pay in advance to the Interstate Commission on the Potomac River Basin the Federal contribution toward the expenses of the Commission during the current fiscal year in the administration of its business in the conservancy district established pursuant to the Act of July 11, 1940 (54 Stat. 748), $5,000. (*Independent Offices Appropriation Act, 1951.*)

Appropriated **1951, $5,000** Estimate **1952, $5,000**

FUNDS AVAILABLE FOR OBLIGATION

Appropriation or estimate—1950, $5,000; 1951, $5,000; 1952, $5,000.

PROGRAM AND PERFORMANCE

The Interstate Commission on the Potomac River Basin was created by compact among the four States in the basin, the District of Columbia, and the Federal Government to abate water pollution. The estimates included under this appropriation title represent the Federal Government's pro rata contribution to the general expenses of the Commission.

OBLIGATIONS BY ACTIVITIES

Contribution to Interstate Commission on the Potomac River Basin—1950, $5,000; 1951, $5,000; 1952, $5,000.

OBLIGATIONS BY OBJECTS

11 Grants, subsidies, and contributions—1950, $5,000; 1951, $5,000; 1952, $5,000.

MOTOR CARRIER CLAIMS COMMISSION

SALARIES AND EXPENSES

Salaries and Expenses, Motor Carrier Claims Commission—

For expenses necessary for the Motor Carrier Claims Commission established by the Act of July 2, 1948 (Public Law 880), including [personal services in the District of Columbia, travel, printing and binding, and] services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a), [$190,000] *$40,000.* (*Independent Offices Appropriation Act, 1951.*)

Unobligated balance, estimated savings	−56,558	−25,700	
Total obligations	93,442	164,300	40,000

PROGRAM AND PERFORMANCE

The Motor Carrier Claims Commission adjudicates claims against the United States brought by motor carrier transportation systems arising out of their seizure or control by the Government in World War II.

One hundred and three motor carriers have filed claims totaling $39,133,840. Hearings are expected to be completed on 50 claims by September 20, 1951, the closing date of the Commission's operations. Legislation extending the Commission's life and a supplemental estimate pro-

Total obligations	42,829,909	42,500,000	55,000,000

PROGRAM AND PERFORMANCE

The National Advisory Committee for Aeronautics conducts scientific research in aeronautics which is devoted almost entirely to problems of military aviation. Most of the research is directed toward obtaining basic scientific and engineering data required for continued improvement in the design of military aircraft, missiles, and their power plants. Applied research is also performed, on behalf of the military departments, for the development or improvement of specific aircraft, missiles, and power plants. Although the main emphasis is military, the Committee's research has applications to commercial aviation as well.

As shown below in the schedule of obligations by locations, the research of the Committee is carried on mainly at its three major laboratories and two auxiliary flight research stations, supplemented by research sponsored at scientific and educational institutions and other Government agencies. Close coordination with the aeronautical programs of the Department of Defense is maintained through military representation on the National Advisory Committee for Aeronautics and its subcommittees, and National Advisory Committee for Aeronautics representation on the aeronautics and guided missiles committees of the Research and Development Board of the Department of Defense.

In addition to the amounts shown in the schedules of obligations, the budget summaries include a pending supplemental appropriation for 1951 of $3,250,000 which has been recommended to Congress to enable the Committee to accelerate its research activities in support of the expanded military programs in the present emergency.

1. *Aerodynamic research.*—The programs for 1952 will continue to be centered upon the solution of problems to permit the design of aircraft and missiles which can perform effectively in the critical transonic and supersonic speed ranges, and at the low speeds of take-off and landing. Data obtained from actual flight tests of high-speed piloted and pilotless aircraft are correlated with wind tunnel results and theoretical studies. The increased funds in 1952 are required to complete the staffing of newly constructed specialized research facilities and to carry on intensified research in other facilities used in the solution of the most urgent aerodynamic problems.

2. *Power plants research.*—The research program for 1952 contemplates the continuation of intensive research on the newer forms of aircraft and missile power plants, such as turbo-jet, ram-jet, turbo-propeller, and rocket engines. Research will be continued on engine components, such as compressors and turbines, on engine materials and fuels, and on complete propulsion systems. The increase in funds in 1952 is required to complete the staffing of newly constructed propulsion research facilities and permit increased utilization of existing facilities.

3. *Aircraft structural research.*—In 1952 particular emphasis will be placed on structural problems resulting from the increased aerodynamic and ground handling loads, thinner wings, and novel configurations of modern high-speed aircraft. The increased funds in 1952 are required primarily to permit an expansion of flight research activity at the High-Speed Flight Research Station.

4. *Operating problems research.*—The 1952 program will consist mainly of continuing studies now under way on aircraft icing, flight through turbulent weather, and the causes and prevention of fires in aircraft. These studies are of vital importance to civil aviation as well as to the operation of military aircraft.

5. *Headquarters management and coordination.*—The headquarters office provides direction and central administration of the entire research program of the Committee and maintains proper liaison and coordination with the military departments, other Government agencies, and the aircraft industry. Small coordination offices are maintained at Wright-Patterson Air Force Base, Dayton, Ohio, to facilitate liaison with research and development activities of the Air Force, and at Los Angeles, Calif., for liaison with the aircraft companies in the West.

PROGRAM AND PERFORMANCE

The problems associated with increased speeds and power for future aircraft and missiles require the continuing modernization of the research facilities of the Committee and the construction of certain additional facilities for conducting research beyond the capabilities of existing equipment. In addition to the amounts shown in the schedules of obligations, the budget summaries include a pending supplemental appropriation of $1,818,000 which has been recommended to Congress to provide for some urgently required modifications to one of the Committee's wind tunnels for power plants research at the Lewis Flight Propulsion Laboratory.

1. *Aerodynamic research.*—The new projects requested for 1952 consist of modifications to wind tunnels at the Langley and Ames Aeronautical Laboratories, construction of high-speed air jets at the Ames Aeronautical Laboratory, construction of permanent operating facilities at the High-Speed Flight Research Station, construction of service facilities at the Pilotless Aircraft Research Station, and improvements to the utility systems at the Langley Aeronautical Laboratory. Obligations will also be incurred in 1952 against existing contract authority to complete modifications to a wind tunnel at the Ames Aeronautical Laboratory which were approved in 1951.

2. *Power plants research.*—The projects under this head in 1952 consist of facilities for research on unconventional fuels and utility systems improvements at the Lewis Flight Propulsion Laboratory.

3. *Aircraft structural and operating problems research.*—Obligations will be incurred in 1952 against existing contract authority to complete a special research facility at the Langley Aeronautical Laboratory for the study of structural and operating problems of aircraft landing gear.

PROGRAM AND PERFORMANCE

An appropriation of $75,000,000 was made in the Deficiency Appropriation Act, 1950 for the construction of three large supersonic wind tunnels at laboratories of the National Advisory Committee for Aeronautics as authorized by the Unitary Wind Tunnel Plan Act of 1949. These tunnels are to be used for the development, primarily by industry, of military aircraft and missiles.

1. *Aerodynamic research.*—This will provide for continuing the construction of two supersonic aerodynamic tunnels, one each at the Langley and Ames Aeronautical Laboratories.

2. *Power plants research.*—This will provide for continuing the construction of a supersonic propulsion tunnel at the Lewis Flight Propulsion Laboratory.

PROGRAM AND PERFORMANCE

The National Capital Park and Planning Commission acquires land on behalf of the United States for parks, parkways, and recreational purposes in the District of Columbia and its environs.

1. *George Washington Memorial Parkway.*—Land is acquired along the shores of the Potomac River in Maryland and Virginia, one-half the cost of which is borne by the respective jurisdictions. Substantial completion of this project is contemplated in 1952 with the exception of the section in Prince Georges County, Md.

2. *Extension of National Capital Park system.*—Funds are advanced to the Maryland-National Capital Park and Planning Commission for extension of the parkway system into the environs of Maryland. Two-thirds of these funds are subsequently repaid to the United States. During 1952 it is planned to proceed with the acquisition of land now threatened by impending subdivision developments or essential to completion of the park system in accordance with the Capper-Cramton Act of 1930.

3. *Park, parkway, and playground system in the District of Columbia.*—Land is also acquired in the District of Columbia with all expenditures being repaid to the United States by the District. In 1952 it is planned to complete a major recreation area and to acquire two units of land for areas either not served or inadequately served by recreational facilities.

NATIONAL LABOR RELATIONS BOARD—Con.

Salaries and Expenses, National Labor Relations Board—Con.

PROGRAM AND PERFORMANCE

Under the National Labor Relations Act, the Board (1) resolves representation disputes in industry and (2) remedies and prevents unfair labor practices by employers and unions. The Board has no control over the number of actions brought to it and must process all properly filed cases. Its objective is to resolve these cases as rapidly as possible consistent with careful investigation and due process of law.

The trend of increased case filings is expected to continue in the fiscal year 1952. A further increase in the work of the Board for 1952 may also result from the conduct of large-scale union shop authorization elections among construction workers. These elections have hitherto not been held because of seeming administrative difficulties, although they are authorized by statute. If hearings during 1951 on the feasibility of such elections prove that they can be successfully conducted, a supplemental estimate will be submitted.

The statute also requires the Agency to hold elections in the case of labor disputes threatening a national emergency to determine whether employees wish to accept the "last offer" of their respective employers. Because such elections have not been necessary for 2 years, no estimate has been included for this contingent function. Thus if large or expensive elections develop supplemental funds might be necessary.

1. *Field investigation of cases and informal disposition or preparation for formal processing.*—Charges of unfair labor practices and petitions for elections to resolve representation disputes are investigated in the regional office in which they are filed. Failing settlement, dismissal, or withdrawal of these cases, they are prepared for public hearing. About 89 percent of the unfair labor practice cases and 80 percent of the election cases are closed without the need for public hearing or further formal action.

CASES PROCESSED

	1950 actual	1951 estimate	1952 estimate
Charges of unfair labor practices	5,558	5,900	6,350
Petitions for representation elections	8,813	10,100	10,150

2. *Trial examiner hearing of unfair labor practice cases.*—Trial examiners conduct public hearings which are the basis of the findings and recommendations set forth in their reports. In fiscal year 1950, 289 such reports were issued; for 1951 the estimate is 360; for 1952 it is 410.

3. *Board adjudication of cases.*—Approximately 81 percent of trial examiners' reports are contested and require Board decisions. The Board itself reviews the entire record of these cases and may dismiss or issue an appropriate remedial order.

Contested representation cases which cannot be closed informally are referred to the Board for decision. The Board may either order an election to determine the choice of bargaining representative or dismiss the case.

DECISIONS ISSUED

	1950 actual	1951 estimate	1952 estimate
Charges of unfair labor practices	215	290	332
Petitions for representation elections	1,429	1,560	1,570

4. *Securing of compliance with Board orders, including enforcement through court orders.*—About 60 percent of decisions in unfair labor practice cases adjudicated by the Board itself eventually require litigation in circuit courts of appeals. In 1950 there were 123 decisions so referred; in 1951 the estimate is 175; in 1952 it is 199.

Arbitration and Emergency Boards, National Mediation Board—

Arbitration and emergency boards: For expenses necessary for arbitration boards established under section 7 of the Railway Labor Act, as amended (45 U. S. C. 157), and emergency boards appointed by the President pursuant to section 10 of said Act (45 U. S. C. 160), including [printing and binding, and] stenographic reporting services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a), $150,000. *(45 U. S. C. 154, 157; National Mediation Board Appropriation Act, 1951.)*

Appropriated 1951, **$150,000** Estimate 1952, **$150,000**

FUNDS AVAILABLE FOR OBLIGATION

Appropriation or estimate—1950, $175,000; 1951, $150,000; 1952, $150,000.

PROGRAM AND PERFORMANCE

1. *Voluntary arbitration of controversies between carriers and employees.*—When mediation fails, the Board urges the parties to submit their differences to a board of arbitration whose neutral member is paid from this appropriation.

2. *Investigation of disputes threatening interruption of essential transportation service.*—If all other efforts at adjustment fail, the Board reports to the President any dispute which threatens substantially to deprive a section of the country of essential interstate transportation. The President may then create an emergency board, paid from this appropriation, to investigate and report respecting the dispute. Although not bound to accept the findings and recommendations of a board, the parties customarily utilize the findings and recommendations as a basis for agreement.

A supplemental appropriation estimate of $175,000 is pending for arbitration and emergency boards. Labor-management disputes in the railway and airline industries have required the creation of a greater number of such boards than anticipated under the original estimate for 1951.

OBLIGATIONS BY ACTIVITIES

PROGRAM AND PERFORMANCE

If employee grievances over the interpretation or application of labor-management contracts in the railroad industry cannot be settled on the railroad properties, they are brought to the Board for adjustment. The 36-man Board is composed of an equal number of representatives of the carriers and unions who are paid by the parties, and who form four quasi-independent divisions having separate jurisdiction over employees in four different groups of crafts. Only the staff and administrative expenses are paid from this appropriation.

The division which adjusts grievances of train-service employees has received about two-thirds of all cases brought before the Board because grievances among such employees generally involve individuals, or train and engine crews, rather than large groups of workers. A backlog equaling 2 years' work has therefore accumulated, stimulating employees to seek prompt action on their grievances through the emergency board fact-finding process and through court action, to the detriment of sound labor relations and at greater cost to the Govern-

ment. In 1950, agreement was secured between labor and management representatives to create two supplemental panels to this division. By this means the Board expects to consider the adjustment of grievances among train-service employees with greater dispatch in 1951 and 1952.

The work of the other three divisions is expected to remain current despite some increase in the cases estimated to be brought before them in 1951 and 1952.

OBLIGATIONS BY ACTIVITIES

Description	1950 actual	1951 estimate	1952 estimate

Appropriated 1951, **$225,000**

FUNDS AVAILABLE FOR OBLIGATION

Appropriation or estimate—1951, $225,000.

PROGRAM AND PERFORMANCE

The principal responsibilities of the Foundation are (1) to develop a national policy for the promotion of basic scientific research and education; (2) to support basic scientific research; (3) to award scholarships and fellowships in the sciences; (4) to evaluate Federal scientific research programs; and (5) to maintain a register of scientific and technical personnel in the United States. The officers of the Foundation have recently been appointed and have begun to develop the Foundation's program plans. A supplemental appropriation estimate to provide the funds necessary to enable the Foundation to initiate its programs in 1952 will be transmitted to the Congress later in this current fiscal year.

Program development.—In addition to establishing its organization, the Foundation in 1951 will examine existing needs for the support of basic scientific research and for the training of personnel and develop plans for a program of research and training in the sciences. It is expected that the Foundation will provide limited staff for the Interdepartmental Committee on Scientific Research and Development, which is engaged in improving the effectiveness of Federal research and development programs.

PROGRAM AND PERFORMANCE

The Housing and Rent Act of 1950 extended Federal rent controls to December 31, 1950, and to June 30, 1951, when requested by localities. Public Law 880, approved December 20, 1950, extended the December 31, 1950, date to March 31, 1951. To administer the act through the latter date will require an additional appropriation of $1,200,000. Legislation is proposed to extend rent control authority and to provide for more effective controls including authority to recontrol. The 1952 requirements for extension of controls are included in the proposed supplemental appropriation for "Economic stabilization and allocation" under Funds appropriated to the President.

1. *Administration of rent control program—Rent operations.*—The following table shows the actual and estimated workload for the fiscal years 1950 and 1951. Consideration has been given to decontrol actions taken up to December 8, 1950; and since the effect of future decontrol actions or the extent to which localities may fail to take the required affirmative action necessary to extend rent controls beyond March 31, 1951, cannot at this time be forecast, the projected workload is based on current indications of anticipated actions.

DOCKETED WORKLOAD

	1950 actual	1951 estimate
First rent actions processed	140,273	55,000
Tenants' complaints processed	381,066	210,000
Compliance actions processed	266,926	155,000
Landlords' petitions processed	596,125	1,120,000
Eviction cases processed	641,312	450,000
Other actions processed	176,198	120,000
Total docketed workload	2,201,900	2,110,000
Settlements for repayment to tenants	$6,429.221	$4,750,000
Payments to U. S. Treasury	$765,271	$1,000,000

Decontrol actions.—The act provides for the decontrol of defense rental areas, or portions of areas, by action of the Housing Expediter on his own initiative; upon recommendation of the local advisory boards, and by State or local option. As of December 8, 1950, there remained under control 261 defense rental areas which, according to the 1940 census, had a population of approximately 25,775,000 and contained about 7,568,000 nonfarm tenant occupied dwelling units. The following table summarizes the decontrol actions taken during the period April 1, 1949, to December 8, 1950.

	Number	Estimated units	1940 population
Expediter initiative	575	1,397,907	16,290,991
Local option	403	1,488,843	7,680,701
Local option (county)	5	79,863	619,726
State option	10	3,489,368	19,876,818
Board recommendation	6	84,419	559,842
Total	999	6,540,400	45,028,078

2. *Veterans affairs program.*—The Housing Expediter investigates and prosecutes violations of the Veterans Emergency Housing Act of 1946 and regulations issued pursuant thereto.

Although it was anticipated that this activity would liquidate itself on or before January 1, 1950, complaints continue to be received. The following table reflects the workload under this program during the fiscal year 1950, and from July 1 to November 25, 1950.

	1950 actual		1951 actual (July 1–Nov. 25, 1950)	
	Cases	Number of units	Cases	Number of units
On hand beginning of year	612	18,323	28	475

RAILROAD RETIREMENT BOARD

Payment to Railroad Retirement Account—

Payment to railroad [Railroad] retirement account: [For an amount sufficient as an annual premium for the payments required under the Railroad Retirement Acts of August 29, 1935, and June 24, 1937, and authorized to be appropriated to the railroad retirement account established under section 15 (a) of the latter Act, $457,832,724: *Provided*, That such total amount shall be available until expended for making payments required under said retirement Acts, and the amount not required for current payments shall be invested by the Secretary of the Treasury in accordance with the provisions of said Railroad Retirement Act of June 24, 1937.] *For an annual premium to provide for the payment of all annuities, pensions, and death benefits in accordance with the provisions of the Railroad Retirement Acts of 1935 and 1937, as amended (45 U. S. C. 228–228s), and for expenses necessary for the Railroad Retirement Board in the administration of said Acts as may be specifically authorized annually in appropriation Acts, there is hereby appropriated for crediting monthly to the railroad retirement account for the fiscal year 1952, and for each fiscal year thereafter, an amount equal to the amount covered into the Treasury (minus refunds) during each such fiscal year under the Railroad Retirement Tax Act (26 U. S. C. 1500–1538): Provided, That the appropriation made herein for the fiscal year 1952 shall be adjusted by the Secretary of the Treasury, with the approval of the Bureau of the Budget, in such manner as may be necessary to insure that the railroad retirement account shall be credited for an amount equal to the amounts covered into the Treasury (minus refunds) prior to July 1, 1951, under said Railroad Retirement Tax Act and under the Carriers Taxing Act of 1937, as amended, less (1) amounts credited as premiums to the railroad retirement account (excluding $334,429,100 heretofore appropriated for military service credits) and (2) amounts properly chargeable as administrative expenses of the Railroad Retirement Board, prior to July 1, 1951.* (*Railroad Retirement Board Appropriation Act, 1951.*)

PROGRAM AND PERFORMANCE

The railroad retirement system is supported by taxes on carriers and their employees established at a level designed to support the system on an actuarially sound basis. Appropriation of an annual premium, in an amount equal to the estimate of taxes to be collected, is made to this account for payment to the railroad retirement account (trust fund).

At present, appropriations are made in definite amounts which are paid to the trust fund many months in advance of actual receipt of taxes. Over or under appropriations of amounts estimated as probable tax collections each year are adjusted in the appropriations of subsequent years. It is proposed that this appropriation henceforth be made in an indefinite amount so that payments to the trust fund will be made on a monthly basis after the taxes have actually been collected, thereby assuring the transfer of amounts equal to all the taxes collected each year and obviating the necessity for subsequent appropriation adjustments. This change is more consistent than present practices with the actuarial assumptions used from time to time to determine the level of tax rates necessary to support the program.

OBLIGATIONS BY ACTIVITIES

Payment to railroad retirement account—1950, $582,832,724; 1951, $598,172,200; 1952, $646,000,000.

Total obligations	12,940,399	6,935,016	10,020,152

PROGRAM AND PERFORMANCE

In addition to the railroad retirement program the Railroad Retirement Board administers an unemployment insurance and employment service system, paying unemployment, sickness, and maternity benefits to and securing the reemployment of unemployed railroad workers. The administrative costs of this system are provided through a permanent appropriation of 0.2 percent of taxable payroll to this fund. As of June 30 of each year, any sum in this fund in excess of $6,000,000 is transferred to the railroad unemployment insurance account in the unemployment trust fund (45 U. S. C. 361).

1. *Maintenance of accounts of employee earnings.*—The amounts of insurance payments for unemployment, sickness, and maternity are based upon individual records of earnings. The principal workload is the processing of compensation items which is carried on simultaneously with a like requirement under the retirement program—the costs being shared proportionately between the two programs.

2. *Processing and payment of unemployment insurance claims.*—This activity embraces the work of paying unemployment benefits and the correlated program of securing the placement of unemployed railroad workers. Individual claims for unemployment compensation are filed locally and certified for payment through the several regional offices of the Board. The number of claims for unemployment compensation fluctuate widely due to economic changes affecting the railroad industry.

3. *Processing and payment of sickness and maternity claims.*—Unlike unemployment claims, these claims are filed by mail and certified for payment through the regional offices of the Board. The volume of claims for sickness tends to follow the general health pattern in railroad communities.

4. *General administration.*—Except for certain basic activities solely supported and concerned only with this program, the remainder of the general administration costs are shared between this program and the retirement program on a measured basis.

PROGRAM AND PERFORMANCE

The Railroad Retirement Board administers the federally operated railroad retirement system, financed by employer and employee taxes. This appropriation is for that portion of the administrative expenses of the Board required in the operation of this program, and is derived from the railroad retirement account.

1. *Maintenance of accounts of employee earnings.*—Annuity and benefit payments based upon earnings in railroad employment require individual records of earnings. The workload of maintaining these records fluctuates with the level of employment in the railroad industry, rates of turnover, and similar factors. The primary workload is the processing of compensation items, which represent the individual earnings of workers. This activity is operated jointly with a similar requirement under the railroad unemployment insurance program and the costs are shared on a measured basis.

	1950 actual	1951 estimate	1952 estimate
Compensation items	6,605,377	6,667,600	7,173,200

2. *Processing and certification for payment of initial claims.*—Individual claims for age and disability annuities, survivors benefits, and lump-sum payments are adjudicated and certified to the Treasury for initial payment. The principal workload is the number of new claims received. This load tends to increase each year as more railroad workers are forced to seek retirement because of age or disability, and as more survivors of deceased employees become eligible for benefits.

	1950 actual	1951 estimate	1952 estimate
Claims received	102,840	105,700	106,200

3. *Monthly recertification of awarded claims.*—Once the individual claimant has been certified as entitled to monthly annuity or benefit payments, subsequent monthly recertification is required to assure continuation of such payments. The volume of monthly recertifications tends to grow slowly but steadily larger as the system ages. This growth will continue until the system reaches maturity a number of years hence. The primary workload is the number of monthly payments in force.

	1950 actual	1951 estimate	1952 estimate
Total number of monthly payments	4,458,741	4,787,400	5,245,000

4. *Hearings and appeals.*—Individuals whose claims for annuities or benefits are disallowed or who dispute the award have the right of appeal to the appeals council, and subsequently to the Board itself. This workload is relatively stable.

	1950 actual	1951 estimate	1952 estimate
Appeals	296	300	300

5. *Actuarial services.*—Actuarial studies are required primarily to determine the adequacy of the tax rate to establish and maintain a sufficient reserve to meet all future payments. A triennial actuarial valuation is required by basic law.

6. *General administration.*—Executive direction and general administration is provided by Board members and various staff and general service units. Except for administrative activities supported by and concerned with the retirement program exclusively, the cost of general administration is shared between the retirement and the railroad unemployment insurance programs on a measured basis.

PROGRAM AND PERFORMANCE

The general objective of the seven statutes administered by the Commission is to protect the interests of the public and investors.

1. *Regulation of public sale of securities.*—Facilities are maintained to provide for statutory standards of disclosure in offerings of securities registered with the Commission for public sale and in related periodic reports; registration of securities on national securities exchanges; protection of the rights and interests of purchasers of debt securities issued under mortgage indentures; regulation of solicitation of proxies, consents, and authorizations pertaining to securities of certain companies; prevention and suppression of fraud in the sale of securities; and administration and enforcement of other provisions of the securities laws. The estimate proposes some expansion in the area of preventing violations and in the investigation of alleged frauds in the sales of securities.

2. *Regulation of securities markets.*—The Commission registers and regulates national securities exchanges; polices the securities markets to prevent illegal trading practices; registers broker-dealers and investment advisers and supervises certain of their activities; and generally supervises securities markets. The estimate provides a slight increase in 1952 for this activity.

3. *Regulation of public-utility holding companies.*—Registered public-utility holding companies are subject to broad regulation by the Commission with respect to various financial matters, including supervision of issuance, sale, and purchase of securities, purchase and sale of utility properties and other assets, and dividend and other financial policies; geographic integration and corporate simplification of holding-company systems and supervision of related reorganizations, mergers, and consolidations; and surveillance of service-company arrangements, solicitation of proxies and consents, constitution of managements, and intrasystem transactions. The decrease in this activity results from the partial completion of geographic integration and corporate simplification work.

4. *Regulation of investment companies.*—On June 30, 1950, there were 366 registered investment companies. The Commission regulates their activities in accordance with prescribed standards.

5. *Assistance to courts in reorganization of bankrupt corporations.*—At the request or with the approval of the court, the Commission participates in proceedings under chapter X of the Bankruptcy Act to provide independent expert assistance.

6. *Publication of corporate statistics.*—A quarterly financial report series for manufacturing corporations is compiled and published jointly with the Federal Trade Commission. A study of plant and equipment expenditures by major industry groups is conducted with the Department of Commerce. An increase of 3 positions is recommended for the latter.

7–9. *Executive, staff, administrative services.*—These activities service the Commission as a whole.

PROGRAM AND PERFORMANCE

The Selective Service System, through the action of its 4,000 local boards, registers, classifies, and forwards men for induction into the Armed Forces. It defers from induction those whose civilian employment or training is found necessary to the national health, safety, or interest.

A supplemental estimate of $11,000,000 is pending for the fiscal year 1951. This will provide funds to deliver for induction a greater number of men than originally estimated for the fiscal year and to meet the expenses of advisory committees necessary to the administration of the law for the drafting of medical, dental, and allied specialists.

By terms of the Selective Service Act of 1948, as amended, this agency will be terminated on July 9, 1951. A supplemental appropriation estimate for the fiscal year 1952 will be submitted when proposed legislation to provide for continuation of a selective service program has been enacted.

PROGRAM AND PERFORMANCE

The Smithsonian Institution maintains public exhibits; preserves valuable items of scientific and historical interest and art objects; conducts fundamental research in anthropology, astrophysics, and geology; taxonomic research in zoology and botany; historical research in technology, the arts, and Americana; and participates in the international exchange of scientific literature.

1. *Management.*—The management staff plans and directs the Institution's operations and services.

2. *Operations.*—The Institution operates two museums, two scientific bureaus, two art galleries, the Canal Zone Biological Area, and the International Exchange Service. Public interest continues to grow as reflected by yearly increases, in number of visitors (1950 attendance—2,600,000) and the receipt of new collections.

3. *General services.*—Five main exhibit buildings are operated and maintained.

PROGRAM AND PERFORMANCE

The National Gallery of Art administers, and exhibits collections of works of art acquired for the Nation by its board of trustees.

1. *Acquisition, care, and exhibition of art objects.*—Provides for (*a*) care, restoration, and exhibition of collections owned by or on loan to the Gallery; (*b*) negotiation for gifts or loans of works of art to the Gallery; and (*c*) special exhibitions, lectures, and library services to the public.

2. *Staff services for the board of trustees and its committees.*—Staff services furnished include legal, secretarial, and financial services related to the Gallery's activities and administration.

3. *Maintenance and operation of Gallery.*—Provides for the operation and maintenance of the Gallery's building and grounds, and protection of art treasures. The addition of five new galleries, constructed from private funds will require a nominal increase in 1952.

4. *Administrative services.*—The administrative staff plans and directs the Gallery's operations and services.

SUBVERSIVE ACTIVITIES CONTROL BOARD

Salaries and Expenses, Subversive Activities Control Board—

Salaries and expenses: For necessary expenses of the Subversive Activities Control Board, including services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a), and not to exceed $1,000 for the purchase of newspapers and periodicals, $620,000. (Public Law 881, approved Sept. 23, 1950.)

Estimate 1952, **$620,000**

FUNDS AVAILABLE FOR OBLIGATION

Appropriation or estimate—1952, $620,000.

PROGRAM AND PERFORMANCE

Under the Subversive Activities Control Act of 1950, the Board determines whether organizations are "Communist-action" organizations or "Communist-front" organizations, and whether individuals are members of "Communist-action" organizations. Petitions, answers, and motions are reviewed and heard, and reports, Board decisions, and final orders are prepared.

Total obligations	1,276,671	1,267,700	1,266,000

PROGRAM AND PERFORMANCE

1. *Research, investigations, and reports on international trade, tariffs, and commercial policies.*—The Commission assembles and interprets economic data relating to industry, commodities, and foreign trade for governmental use in formulating and implementing United States tariff policy. This work consists largely of (*a*) conducting investigations bearing on tariff and other restrictions on imports and recommending action for the withdrawal or modification of concessions when increased imports cause serious injury to domestic industry; (*b*) supplying factual data on specific commodities as the basis for consideration of concessions by the United States in trade agreements, participating in their negotiations, and reporting on their operations; (*c*) performing a continuous analysis of economic and technical information.

The total workload is expected to remain at approximately the previous level, with an anticipated shift in emphasis from work on trade-agreement negotiations to a more thorough and expanded coverage of basic data on commodities, production facilities, and the like, so that the Commission will be in a position to serve defense agencies with specialized information and advice, as it did in World War II. A slight decrease in personnel is planned under this recommendation.

2. *Executive direction and administration.*—This activity consists of the work performed in the Commissioners' offices and general administrative services.

Savings under sec. 1214		−17,000	
Total obligations	809,511	809,900	818,000

PROGRAM AND PERFORMANCE

The Tax Court reviews determinations of tax deficiencies made by the Commissioner of Internal Revenue and decides whether there is deficiency or overpayment in income, estate, gift and unjust enrichment taxes, and in cases founded on claims under excess profits statutes. The court also adjudicates claims for processing tax refunds, and redetermines excessive profits on renegotiated war and postwar contracts.

An increase is anticipated during the fiscal year 1952 in the number of new cases filed by taxpayers as a result of new tax legislation. A slight increase in funds is proposed to accelerate the disposal of these cases.

The following tabulation indicates the volume of work:

FUNDS AVAILABLE FOR OBLIGATION—Continued

	1950 actual	1951 estimate	1952 estimate
Reimbursable Obligations			
Reimbursement for service performed	$6,552,481	$2,000,000	$2,263,000
Total obligations	892,642,316	875,866,800	897,051,000

PROGRAM AND PERFORMANCE

This appropriation covers the administration and operation of all programs administered by the Veterans Administration except for construction activities and operation of canteens. The programs fall into two broad categories: (*a*) The furnishing of medical, hospital, and domiciliary care to veterans, and (*b*) the administration of the various nonmedical programs authorized by law of which the major ones are the compensation and pension program, the insurance program, and the benefits for World War II veterans authorized by the Servicemen's Readjustment Act.

1. *Medical, hospital, and domiciliary services.*—This activity provides for the operation of 189 Veterans Administration hospitals and homes, 69 out-patient clinics at regional offices, and reimbursement to other hospitals and homes and private physicians and dentists for the care of eligible veterans. Provision is also made for medical research and education, operation of supply depots, furnishing of prosthetic appliances, and central and field office supervision of program activities.

(*a*) *Hospital and domiciliary services.*—Hospital and domiciliary care is provided for veterans with service-connected disabilities and, subject to the availability of beds and receipt of a statement regarding inability to defray expenses, for veterans with non-service-connected disabilities. At the end of the fiscal year 1950, approximately 34 percent of the patients in hospitals had service-connected disabilities and 66 percent had non-service-connected disabilities. On June 15, 1950, there were 25,312 veterans awaiting hospitalization, representing about one-half of a month's total admissions. Only 28 of these had service-connected disabilities. On October 15, 1950, the number awaiting hospitalization had been reduced to 20,557. Approximately 680,000 veterans were hospitalized during the fiscal year 1950. Average daily patient and member loads in the fiscal year 1952 are expected to increase 3.8 percent over fiscal year 1951 levels.

AVERAGE DAILY LOAD

	1950 actual	1951 estimate	1952 estimate
In Veterans Administration hospitals:			
Neuropsychiatric	48,186	49,286	50,140
Tuberculosis	6,955	7,108	7,300
General medical	41,502	43,734	50,400
Total	96,643	100,128	107,840
In other hospitals	11,395	7,794	4,760
Total, all hospitals	108,038	107,922	112,600
In Veterans Administration homes	16,831	17,200	17,150
In State homes	7,437	7,800	8,190
Total, all homes	24,268	25,000	25,340
Total, hospitals and homes	132,306	132,922	137,940

The sharp decline in the average number of patients to be cared for in other than Veterans Administration hospitals is due to the increased availability of beds in Veterans Administration hospitals resulting from new construction and to a reduction in the number of beds available in hospitals operated by the Department of Defense.

(*b*) *Out-patient service.*—Medical and dental out-patient care is provided to eligible veterans. Medical and dental examinations are for the purpose of ascertaining need for hospital, domiciliary, or out-patient care and treatment and to determine eligibility for pensions, compensation, vocational rehabilitation, and insurance benefits. Treatment is provided only to veterans with service-connected disabilities and those receiving vocational rehabilitation benefits.

The number of individuals examined and treated for medical purposes during the fiscal year 1952 is expected to increase approximately 3 percent from the previous year's level and about 0.2 percent from the level of fiscal year 1950. Fiscal year 1950 workloads were 12 percent under fiscal year 1949. Dental workloads are estimated at approximately 1 percent above the 1950 level. Approximately 66 percent of out-patient services during the fiscal year 1952 is estimated to be furnished through Veterans Administration facilities. The remainder will be provided on a fee basis by private physicians and dentists.

NUMBER OF INDIVIDUALS TREATED

	1950 actual	1951 estimate	1952 estimate
Total:			
Examined, medical	2,094,898	1,996,000	2,122,250
Treated, medical	1,786,086	1,777,000	1,766,550
Examined, dental	527,487	497,500	532,950
Treated, dental	430,065	372,000	438,250
Total	4,838,536	4,642,500	4,860,000
In Veterans Administration facilities:			
Examined, medical	1,765,057	1,720,000	1,782,400
Treated, medical	1,014,302	1,012,000	1,017,350
Examined, dental	322,732	310,000	325,000
Treated, dental	87,088	90,000	83,000
Total, Veterans Administration facilities	3,189,179	3,132,000	3,208,250
By private physicians and dentists:			
Examined, medical	329,841	276,000	339,840
Treated, medical	771,784	765,000	748,700
Examined, dental	204,755	187,500	207,950
Treated, dental	342,977	282,000	355,260
Total, by private physicians and dentists	1,649,357	1,510,500	1,651,750

(*c*) *General administration.*—This activity provides executive direction and general supervision of medical, hospital, domiciliary, and supply depot activities, except supervision of such activities as finance, personnel, legal, contact, and administrative services. In addition a central purchasing service is operated, and general supervision is given the hospital construction program. The cost of general administration in relation to the total cost of providing medical, hospital, and domiciliary services is indicated below:

Percent of total costs of medical, hospital, and domiciliary services provided for general administration—1950, 1.4; 1951, 1.3; 1952, 1.3.

(*d*) *All other services.*—This includes medical research and education and physical alterations at supply depots and out-patient clinics. Medical research is confined to areas related to improved care and treatment of veterans, including prosthetic research, and is conducted in Veterans Administration facilities and on a contract basis. Medical education and training includes residency and intern training programs as well as refresher courses for other personnel.

2. *Nonmedical program, administration and operation*—(*a*) *Veterans and dependents' claims.*—Claims for compensation, pensions, or other benefits are adjudicated. Guardianship and fiduciary service is furnished helpless

VETERANS ADMINISTRATION—Continued

Administration, Medical, Hospital and Domiciliary Services, Veterans Administration—Continued

or incompetent veterans and minor dependents. Field examinations and investigations are conducted as required. Work is also done for other activities including (1) processing of death claims and appeals, and (2) furnishing legal advice and case investigations.

Major workloads are as follows:

Workload units	1950 actual	1951 estimate	1952 estimate
Rating actions	2,294,512	2,040,000	1,930,000
Authorization actions	1,388,194	1,194,000	1,170,000
Appeals processed	64,661	66,000	68,000
Cases involving guardianship or fiduciary relationships (average)	244,052	274,000	304,000
Field examinations	153,390	150,000	150,000

(*b*) *Insurance.*—Operations of this office relate to the provision of Government insurance to eligible servicemen and veterans, and are similar to those of private mutual insurance companies, except that no agents are maintained. The increase in the size of the armed forces is expected to increase the number of policies in force in both 1951 and 1952.

AVERAGE NUMBER OF POLICIES IN FORCE

	1950 actual	1951 estimate	1952 estimate
U. S. Government life insurance	492,598	472,500	455,200
National service life insurance	5,619,162	5,879,000	6,470,000
Total	6,111,760	6,351,500	6,925,200

(*c*) *Vocational rehabilitation and education.*—The Office of Vocational Rehabilitation and Education determines the eligibility of veterans under the Vocational Rehabilitation Act of 1943, and the Servicemen's Readjustment Act of 1944. The office also furnishes advisement and guidance to trainees, follows their progress, furnishes funds to State approving agencies responsible for the certification of training establishments, and contracts with training institutions for tuition and other charges.

AVERAGE NUMBER OF VETERANS IN TRAINING

	1950 actual	1951 estimate	1952 estimate
Under Servicemen's Readjustment Act	1,979,099	1,620,000	1,055,000
Vocational rehabilitation trainees	167,726	105,000	63,000
Total	2,146,825	1,725,000	1,118,000

(*d*) *Loan guaranty.*—Loan guaranty operations include (1) issuance of certificates of loan guaranty or insurance, (2) payment to lenders for the veterans account of 4 percent of the amount guaranteed or insured, (3) servicing of loans to effect cures on reported defaults, (4) payment of claims of lenders on defaulted loans, and (5) the acquisition, management, and disposal of property when necessary to protect the Government's interest.

Work units	1950 actual	1951 estimate	1952 estimate
Loans closed	397,784	559,000	518,000
Defaults cured	46,153	68,010	84,770
Claims paid	6,032	7,000	8,000
Property acquired	1,872	2,908	4,230

(*e*) *Readjustment allowances.*—This activity provides for general supervision of the readjustment allowance program and for reimbursements to the States for claims paid.

Claims paid	1950 actual	1951 estimate	1952 estimate
Unemployment claims	6,268,917	832,000	468,000
Self-employment claims	141,530	14,100	5,440
Total	6,410,447	846,100	473,440

(*f*) *General administration and contact.*—Administrative, finance, personnel, supply, and utilities services for all programs are provided, except those performed at hospitals and homes which are included in the costs of the hospital and domiciliary care program. The contact service provides information and assistance to veterans and their dependents relative to all programs of the Veterans Administration.

DETAIL OF GENERAL ADMINISTRATION AND CONTACT

	1950 actual	1951 estimate	1952 estimate
Administrative services	$33,193,966	$32,230,390	$31,063,047
Finance	26,211,325	24,978,573	22,499,255
Personnel	3,879,099	3,405,239	3,117,441
Supply, utility, and real estate	6,332,924	5,831,031	5,646,014
General operating expenses	20,112,168	20,009,194	13,620,876
Contact service	13,674,173	12,889,613	10,947,022
Total	103,403,655	99,344,040	86,893,655

3. *Executive direction.*—This consists of the immediate offices of the Administrator, Deputy Administrator, and those field-station managers who supervise all program activities in their respective geographical areas; Veterans Education Appeals Board; and the top staff activities of budget, coordination, information, investigations, legislative reference, and foreign relations.

OBLIGATIONS BY ACTIVITIES

Description	1950 actual	1951 estimate	1952 estimate
Direct Obligations			
1. Medical, hospital, and domiciliary services:			
(*a*) Neuropsychiatric hospitals	$127,321,880	$131,606,119	$140,450,800
(*b*) Tuberculosis hospitals	36,459,861	38,178,800	40,221,300
(*c*) General medical hospitals	246,315,323	269,913,100	307,302,500

PROGRAM AND PERFORMANCE

This program provides for all compensations, pensions, and allowances including emergency officers' retirement pay and annuities, as well as subsistence allowance paid to veterans receiving vocational rehabilitation under Public Law 16, Seventy-eighth Congress, and payments due under World War I Adjusted Compensation Act in cases where benefits are not covered by the issuance of adjusted service certificates.

There will be required in 1951 an estimated supplemental of $42,450,000. The need for a supplemental in this administratively uncontrollable appropriation is due to increased needs beyond those provided for in the 1951 appropriation. Funds are available under this title to cover the additional cost of subsistence payments due to the extension of benefits under Public Law 16, Seventy-eighth Congress, to veterans of the Korean campaign.

The workload shown is the average number of veterans' cases for which payment was made during the fiscal year 1950 and for which payment is estimated to be paid during the fiscal years 1951 and 1952. The unit costs by activity show the actual average costs per veteran's case for the fiscal year 1950 and the estimated costs for the fiscal years 1951 and 1952.

WORKLOAD BY ACTIVITY

Appropriation or estimate	$2,917,503,000	$2,505,600,000	$1,211,640,000
Applied to liquidation of prior year obligations	−31,849,163		
Prior year balance available		93,064,188	317,306,791
Total available for obligation	2,885,653,837	2,598,664,188	1,528,946,791
Balance available in subsequent year	−93,064,188	−317,306,791	
Total obligations	2,792,589,649	2,281,357,397	1,528,946,791

PROGRAM AND PERFORMANCE

These benefits to veterans of World War II apply to the cost of subsistence, tuition, supplies, and equipment needed for courses of training; guaranty, claims, and property acquisition costs on loans; and the payment of readjustment (unemployment and self-employment) allowances.

1. *Education and training.*—Load forecasts of trainees are based upon an analysis of trends in each of the four major categories of training, as follows:

AVERAGE NUMBER OF TRAINEES

	1950 actual	1951 estimate	1952 estimate
Institutions of higher learning	612,743	451,500	210,000
Institutions below the college level	808,831	750,000	500,000
On-the-job training	263,201	130,000	90,000
On-the-farm training	305,638	300,000	265,000
Total	1,990,413	1,631,500	1,065,000

The sharp drop in enrollment between fiscal years 1951 and 1952 results from the fact that after July 25, 1951, most World War II veterans will no longer be eligible to initiate a course of training. Enrollment after this date will for the most part be limited to veterans completing courses begun prior to that date.

2. *Loan guaranty.*—Load forecasts are based on current monthly trends which have been affected by a number of factors, especially the Housing Act of 1950. Some of the upward tendencies in program activities resulting from the Housing Act will be offset by the recently announced policy on curtailment of credit expansion. However, subject to further changes in policies it is anticipated that the momentum reached during the last quarter of fiscal year 1950 will carry on well into fiscal year 1951 with a gradual reduction in application volume occurring in the latter part of the year and leveling off through fiscal year 1952. The estimate for 1952 is based on the assumption that the same restrictions applicable in 1951 would continue through 1952.

3. *Readjustment allowances.*—The load forecasts reflect only those eligible veterans who have been discharged for less than 2 years.

PROGRAM AND PERFORMANCE

Payments are made to veterans who suffered permanent or total disability as a result of war service or during the postwar period in which they carried World War I war risk insurance. Payments are also being made to beneficiaries of members of the Armed Forces who died in service or during the postwar period during which this type of insurance was in force. In addition, payments are made to the United States Government life insurance fund to meet obligations sustained by that fund incident to the extra hazards of military or naval service.

Comparative summaries by fiscal years are as follows:

WORKLOAD BY ACTIVITY

PROGRAM AND PERFORMANCE

This program is for the construction of new hospitals and homes and additions to existing hospitals and homes to provide new beds and administrative facilities at hospital sites. Provision also is made for major alteration and renovation of existing hospitals and homes and for the purchase of portable initial equipment for the hospital-construction program. The program now approved is estimated to cost $891.3 million, an increase of $19.8 million in the 1951 estimate due to increased construction cost, inclusion of funds for a new regional office building at Chicago, Ill., and provision for portable initial equipment for construction projects to be completed during 1952. Appropriations to meet expenditure requirements are estimated to be exhausted before the end of 1951, necessitating an appropriation of $28 million to liquidate contract authority.

1. *Hospital bed-producing projects.*—Current estimates of cost of $765.5 million are for the construction of 75 projects to provide 36,504 new beds and the acquisition of a site at Topeka, Kans., for a neuropsychiatric hospital:

	New hospitals	Additions to existing hospitals	Total
Beds in:			
Neuropsychiatric hospitals	8,465	1,264	9,729
Tuberculosis hospitals	1,200	1,044	2,244
General medical and surgical hospitals	23,281	950	24,231
Homes	300		300
Total	33,246	3,258	36,504

Provision also is made for seven projects to adapt facilities to meet current needs.

Of the total program providing 36,504 beds the Corps of Engineers, United States Army, is responsible for the construction of 44 projects, providing 21,846 beds at an estimated cost of $442.6 million. The remaining 31 projects, providing 14,658 beds, together with the conversions of existing beds, will be constructed by the Veterans Administration at an estimated cost of $322.9 million. The following table sets forth the status of the hospital-bed construction program:

NUMBER OF BEDS

	1950 actual	1951 estimate	1952 estimate
Under construction beginning of year	15,320	20,094	17,250
Put under construction during year	11,650	5,700	
Completed during year	6,876	8,544	14,000
Total completed at end of year	7,710	16,254	30,254
Under construction at end of year	20,094	17,250	3,250
Not under construction at end of year	8,700	3,000	3,000

DOLLAR VALUE OF CONSTRUCTION

	1950 actual	1951 estimate	1952 estimate
	Millions	*Millions*	*Millions*
Completed prior to 1950	$185.8		
Under construction beginning of year	165.2	$216.7	$178.3
Put under construction during year	191.3	148.9	9.8
Completed during year	139.8	187.3	131.2
Total completed at end of year	325.6	512.9	644.1
Under construction at end of year	216.7	178.3	56.9
Not under construction at end of year	223.2	74.3	64.5

2. *Non-bed-producing projects.*—Funds available for a program of major alterations, improvements, and renovation of existing hospitals and homes now total $94.3 million. Also included in this amount is $6.3 million for two new regional office buildings at Veterans Administration hospitals, one of which has been completed at Wichita, Kans., and the other is proposed for Chicago, Ill. In view of the backlog of work yet to be started and the current international situation, no additional funds have been included for a new 1952 non-bed construction program. The status of the work is set forth in the following table:

DOLLAR VALUE OF CONSTRUCTION

	1950 actual	1951 estimate	1952 estimate
	Millions	*Millions*	*Millions*
Completed prior to 1950	$25.8		
Under construction at beginning of year	5.2	$3.8	$6.0
Put under construction during year	13.3	14.9	6.1
Completed during year	14.7	12.7	11.5
Total completed at end of year	40.5	53.2	64.7
Under construction at end of year	3.8	6.0	.6
Not under construction at end of year	50.0	35.1	29.0

3. *Portable initial equipment.*—Funds in the amount of $31.5 million have been included for portable initial equipment for approximately 33,504 beds expected to be completed by January 1, 1953, and for major alterations and improvements to existing hospitals.

OBLIGATIONS BY ACTIVITIES

Description	1950 actual	1951 estimate	1952 estimate
Direct Obligations			
1. Hospital facilities, bed-producing projects:			
(*a*) Construction of new hospitals	$172,707,846	$137,289,240	$9,800,000
(*b*) Construction of additions to and conversions at existing hospitals	18,571,377	11,618,923	50,000
Total bed-producing projects	191,279,223	148,908,163	9,850,000

Balance available in subsequent year	−12,440,016		
Total obligations	473,544,510	44,648,445	67,335,302

PROGRAM AND PERFORMANCE

Payments are made to the national service life insurance trust fund (*a*) for death claims and waiver of premium losses incurred by the trust fund where such claims are determined to be due to the extra hazards of military or naval service, (*b*) to meet claims for gratuitous insurance, and (*c*) to cover the cost of waiver of recovery of erroneous payments or overpayments from the trust fund. In addition, certain veterans who fail to meet standards of insurability are eligible to enter into insurance and disability income contracts. In those cases premiums are payable to this appropriation and all losses suffered are payable from it. Also, the appropriation pays for certain claims such as those described under "Direct payments" where the deceased was not covered under the trust fund. A supplemental appropriation of $44,270,000 will be required in 1951 to cover gratuitous insurance claims arising out of World War II operations in the Philippine Islands.

WORKLOAD BY ACTIVITY

Description	1950 actual	1951 estimate	1952 estimate
1. Transfer to "National service life insurance fund":			
(*a*) For death and disability claims traceable to extra hazard of military service:			
(1) Death claims (policies, not lives)	5,039	4,883	4,000
(2) Disability claims	45,000	43,032	37,058
(*b*) For gratuitous insurance—claims processed	11,771	1,908	7,102
(*c*) For waiver of recovery of erroneous payments—number of erroneous cases	49	28	28
2. Direct payments:			
(*a*) For insurance and disability income issued to persons partially disabled from a service-incurred disability:			
(1) Active death awards	84	132	140
(2) Active disability income awards	95	134	170
(*b*) For claims where applications were rejected for medical reasons and claimant died in line of duty—active awards	198	210	215

Total obligations	84,044,984	64,870,400	44,844,110

PROGRAM AND PERFORMANCE

1. *Burial allowances.*—The increase for funeral and burial expenses of deceased veterans forecast for 1952 is based on the upward trend apparent for the last several years.

2. *Vocational rehabilitation for disabled veterans.*—Average training load was 167,809 during fiscal year 1950. It is estimated on the basis of past trends that the workload will average 105,000 and 63,000 during fiscal years 1951 and 1952, respectively.

3. *Housing grants for disabled veterans.*—This assistance is provided to veterans with specified permanent and total service-connected disabilities in acquiring suitable housing. Of the estimated 4,500 eligible, 2,880 have established their basic eligibility as of June 30, 1950. Of these 1,059 had made formal application for a grant and 967 applications had been processed for approval. In 600 cases, disbursement had been completed.

Savings under sec. 1214		−2,635,000	
Total obligations	163,000	2,650,000	8,500,000

PROGRAM AND PERFORMANCE

Public Law 865, Eightieth Congress, authorized the payment of grants-in-aid to the Philippine Government for (1) the construction and equipping of veterans' hospitals, in the total amount of $22,500,000, and (2) the medical care and treatment of certain veterans in the Philippines, at not to exceed $3,285,000 per annum for 5 years. An estimate of $9,400,000 for construction, presented to the Congress by the President April 12, 1949, is believed to be sufficient to meet all construction costs through fiscal year 1952. On the basis of an increasing hospital load, it is estimated that expenditures amounting to $650,000 for fiscal year 1951, and $1,100,000 for fiscal year 1952 under this appropriation will be used to reimburse the Philippine Government for the care and treatment of eligible veterans.

OBLIGATIONS BY ACTIVITIES

Description	1950 actual	1951 estimate	1952 estimate
1. Construction and equipping of hospitals		$2,000,000	$7,400,000
2. Medical care and treatment of veterans	$163,000	650,000	1,100,000

PROGRAM AND PERFORMANCE

Under the Housing Act of 1950 loans may be made to veterans under certain specified conditions up to a maximum of $150,000,000 until June 30, 1951. It is estimated that 62,500 applications will be received and 12,500 direct loans will be made during fiscal year 1951.

Attorney fees in connection with the closing of these loans are estimated at an average of $40 each. During fiscal year 1952 it is estimated that for approximately 1 percent of the loans, advances will be necessary to recipients of loans in order to protect the security or safeguard the lien. Such advances will consist of necessary repairs or special assessments.

Total obligations	51,230	158,200	56,500

PROGRAM AND PERFORMANCE

Under the Soldiers' and Sailors' Civil Relief Act of 1940, premiums becoming due on commercial private life insurance policies held by servicemen could be charged as a loan against the insurance policy while the insured was in service and for 2 years after discharge. The Government guarantees the repayment of any indebtedness not liquidated by the insured himself, but any payment made by the Government is a debt owed the Government by the insured. The workload will continue to decline as the majority of those covered have now been out of service for over 2 years.

WORKLOAD AND AVERAGE COST

Balance available in subsequent year	−1,453,950		
Carried to surplus fund		−1,665,000	−558,000
Total obligations	11,050		

PROGRAM AND PERFORMANCE

The Veterans' Canteen Service furnishes at reasonable prices articles of merchandise and services essential to the comfort and well-being of veterans of the Armed Forces of the United States in hospitals and homes of the Veterans Administration. The Congress has appropriated a total of $4,965,000 to be administered as a revolving fund for the operation of the Veterans' Canteen Service. During fiscal year 1950, $1,465,000 in excess funds were returned to the Treasurer of the United States. It is contemplated that it will be possible to return additional funds in the amount of $200,000 during fiscal year 1951 and an additional $558,000 at the end of fiscal year 1952 (38 U. S. C. 13–13g).

Statement of proposed obligations for purchase and hire of passenger motor vehicles for the fiscal year 1952

VETERANS ADMINISTRATION

Appropriation	Motor vehicles to be purchased		Old vehicles to be exchanged		Net cost of vehicles to be purchased	Old vehicles still to be used	Cost of hire of motor vehicles	Public purpose and users
	Number	Gross cost	Number	Allowance (estimated)				
Salaries and expenses, Veterans Administration.	92	$244,875	97	$14,675	$230,200	974	----------	The passenger-carrying vehicles are to be used in the efficient and economical operation of the Veterans Administration stations for the primary purpose of transporting claimants and beneficiaries; also in connection with adjustment and investigation of claims to the interest of the Government and/or the veteran; for the transportation of sick and disabled veterans from point to point for the best interest of proper medical care for the veteran. The vehicles are to be operated by designated employees or officials of the various Veterans Administration stations.
Hospital and domiciliary facilities, Veterans Administration.[1]	[1] 75	222,800	----------	----------	222,800	----------	----------	
Total	167	467,675	97	14,675	453,000	974	----------	

NOTE.—As cumulative hospital and domiciliary facilities limitation for purchase of initial equipment passenger vehicles was established at 176 vehicles for fiscal years 1950 and 1951 and cumulative requirements from fiscal year 1950 through 1952 are estimated 213 passenger vehicles, a net increase of only 37 in the hospital and domiciliary facilities limitation for passenger vehicles is required because part of the authorization for the 75 vehicles indicated above was provided in prior fiscal years.

[1] Initial equipment for new hospitals.

WAR CLAIMS COMMISSION

PAYMENT OF CLAIMS

Trust account:

War Claims Fund—

For payment of claims, as authorized by the War Claims Act of 1948, from funds deposited in the Treasury to the credit of the war claims fund created by section 13 (a) of said Act, such sums as may be necessary, to be available to the Secretary of the Treasury for payment of claims under sections 4 (a), 4 (b) (2), 5 (*a*) *through* (e), 6 [(b)], and 7 of said Act to the payees named and in the amounts stated in certifications by the War Claims Commission and the [Federal Security Administrator] *Secretary of Labor* or their duly authorized representatives, which certifications shall be in lieu of any vouchers which might otherwise be required: *Provided*, That this appropriation shall not be available for administrative expenses: *Provided further*, That no claims shall be allowed or paid under the provisions of said War Claims Act of 1948 from any funds other than those covered into the Treasury pursuant to the provisions of section 39 of the Trading With the Enemy Act of October 6, 1917, as amended, as provided by section 13 (a) of said War Claims Act of 1948.

ADMINISTRATIVE EXPENSES

For expenses necessary for the War Claims Commission, including [personal services in the District of Columbia; travel; printing and binding; purchase of one passenger motor vehicle;] services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a); expenses of attendance at meetings concerned with the purposes of this appropriation; and advances or reimbursements to other Government agencies for use of their facilities and services in carrying out the functions of the Commission; [$600,000] *$1,200,000*, to be derived from the war claims fund created by section 13 (a) of the War Claims Act of 1948 (Public Law 896, approved July 3, 1948). (*Reorganization Plan No. 19 of 1950; Independent Offices Appropriation Act, 1950.*)

Appropriated (est.) 1951, **$40,500,000** Estimate 1952, **$56,000,000**

PROGRAM AND PERFORMANCE

The war claims fund consists of moneys derived from enemy assets vested by the Office of Alien Property, Department of Justice. The fund is used to pay the following classes of claims arising out of World War II (and the administrative expenses in connection therewith): (1) Claims of certain American and Filipino prisoners of war for compensation for food deficiencies while imprisoned; (2) claims of certain American civilian internees for detention benefits; (3) claims of religious organizations or their personnel for reimbursement for assistance rendered Americans, civilian and military; (4) reimbursement to the Department of State for canceled obligations of various costs of repatriation of certain Americans; (5) claims of certain employees of United States contractors for injury, death, or detention benefits; and (6) claims of certain American civilian internees for disability or death benefits.

Classes (1) to (3) are administered by the War Claims Commission; class (4), by the Department of State; classes (5) and (6) by the Bureau of Employees' Compensation, Department of Labor.

OBLIGATIONS BY ACTIVITIES

Administration and adjudication of war claims—1950, $10,707,274; 1951, $53,756,028 1952, $56,795,830.

PROGRAM AND PERFORMANCE

The War Claims Commission adjudicates the claims of internees, prisoners of war, and religious organizations. It is estimated that 275,000 valid claims, amounting to approximately $120,000,000, will be received by March 1, 1951, the statutory deadline for filing claims. The 1952 budget estimate is based on a workload projection under which the work of the Commission will be completed several months prior to its statutory termination date of March 1, 1954. During fiscal year 1952 all claims of civilian internees and American prisoners of war will be adjudicated, and a start made on the claims of religious organizations and Filipino prisoners of war.

SCHEDULE OF CLAIMS LOAD

INDEPENDENT OFFICES—GENERAL PROVISIONS

SEC. 102. No part of any appropriation contained in this title for the Atomic Energy Commission shall be used to confer a fellowship on any person who advocates or who is a member of an organization or party that advocates the overthrow of the Government of the United States by force or violence or with respect to whom the Commission finds, upon investigation and report by the Federal Bureau of Investigation on the character, associations, and loyalty of whom, that reasonable grounds exist for belief that such person is disloyal to the Government of the United States: *Provided further*, That any person who advocates or who is a member of an organization or party that advocates the overthrow of the Government of the United States by force or violence and accepts employment or a fellowship the salary, wages, stipend, grant, or expenses for which are paid from any appropriation contained in this title shall be guilty of a felony and, upon conviction, shall be fined not more than $1,000 or imprisoned for not more than one year, or both: *Provided further*, That the above penal clause shall be in addition to, and not in substitution for, any other provisions of existing law.

SEC. 103. Where appropriations in this title are expendable for travel expenses of employees and no specific limitation has been placed thereon, the expenditures for such travel expenses may not exceed the amount set forth therefor in the budget estimates submitted for the appropriations.

SEC. 104. Where appropriations in this title are expendable for the purchase of newspapers and periodicals and no specific limitation has been placed thereon, the expenditures therefor under each such appropriation may not exceed the amount of $50: *Provided*, That this limitation shall not apply to the purchase of scientific, technical, trade, or traffic periodicals necessary in connection with the performance of the authorized functions of the agencies for which funds are herein provided.

SEC. 105. No part of any appropriation contained in this title shall be available to pay the salary of any person filling a position, other than a temporary position, formerly held by an employee who has left to enter the armed forces of the United States and has satisfactorily completed his period of active military or naval service and has within ninety days after his release from such service or from hospitalization continuing after discharge for a period of not more than one year made application for restoration to his former position and has been certified by the Civil Service Commission as still qualified to perform the duties of his former position and has not been restored thereto.

SEC. 106. Appropriations contained in this title, available for expenses of travel shall be available, when specifically authorized by the head of the activity or establishment concerned, for expenses of attendance at meetings of organizations concerned with the function or activity for which the appropriation concerned is made; and shall be available for the examination of estimates of appropriations and activities in the field.

[SEC. 107. No part of any appropriation or fund contained in this title shall be available for installing or maintaining systems for administrative appropriation, fund, or inventory accounting except such systems as are prescribed or approved by the Comptroller General: *Provided*, That all agencies, for whose activities provision is made in this title, shall hereafter maintain fiscal-accounting control of all inventories of supplies, materials, or equipment which may be owned by or be in the custody of such agencies.]

SEC. [108] *107*. No part of any appropriations made available by the provisions of this title shall be used for the purchase or sale of real estate or for the purpose of establishing new offices outside the District of Columbia: *Provided*, That this limitation shall not apply to programs which have been approved by the Congress and appropriations made therefor.

SEC. [109] *108*. No part of any appropriation contained in this title shall be used to pay the compensation of any employee engaged in personnel work in excess of the number that would be provided by a ratio of one such employee to one hundred and fifteen, or a part thereof, full-time, part-time, and intermittent employees of the agency concerned: *Provided*, That for purposes of this section employees shall be considered as engaged in personnel work if they spend half time or more in personnel administration consisting of direction and administration of the personnel program; employment, placement, and separation; job evaluation and classification; employee relations and services; training; committees of expert examiners and boards of civil-service examiners; wage administration; and processing, recording, and reporting.

SEC. [110] *109*. None of the sections under the head "Independent offices, General provisions" in this title shall apply to the Housing and Home Finance Agency[, the Inland Waterways Corporation,] or the Tennessee Valley Authority. (*Independent Offices Appropriation Act, 1951.*)

Earned surplus reserved for future contingencies	203.1	252.6	303.9

[1] Excludes activity on loans and currency transfer guaranties as agent for the Economic Cooperation Administration. Details with regard to these activities are shown under the Economic Cooperation Administration section of the Budget.

Purpose and Financial Organization

The Bank is authorized by the Export-Import Bank Act of 1945 (12 U. S. C. 635), as amended, "to aid in financing and to facilitate exports and imports and the exchange of commodities between the United States or any of its Territories or insular possessions and any foreign country or the agencies or nationals thereof." In carrying out its objectives the Bank is guided by the policy of supplementing and encouraging rather than competing with private capital, and that loans, so far as possible consistent with carrying out the Bank's purposes, shall generally be for specific purposes which offer reasonable assurance of repayment. The Bank may extend loans and guaranties not in excess at any one time of $3.5 billion. The management of the Bank is vested in a board of directors consisting of the Secretary of State, ex officio, and four full-time members appointed by the President by and with the advice and consent of the Senate.

Analysis of Budget Program

The Bank contemplates no substantial changes during the budget period in the nature of its program under its existing legislation. The Bank's activity centers on a program of general foreign trade credits intended to assist the foreign trade of the United States. Among the principal factors considered in the choice of credits for this purpose are the extent to which such credits: (1) will assist United States exporters and importers; (2) will aid in expanding the productive capacity or increase the financial and economic stability of the borrowing country; and, (3) in areas faced with serious dollar shortages, will promote that type of export from the United States and that type of import into a borrowing country which are most likely to result in increased dollar earnings or decreased dollar expenditures.

General foreign trade credits.—This program is the principal activity of the Bank. Credits under this program are usually of a specific project nature. Prior to undertaking any such credit the Bank makes a careful economic and financial study of the project, including the engineering and technical aspects of the credit. In administering these loans, it is essential to follow the progress made during the development of the project, by an enlarged program of inspection. The workload involved in administering credits after their initial authorization is becoming considerably more extensive but the Bank has found its procedure to be eminently worthwhile. General balance-of-payments credits for foreign exchange purposes are also part of the Bank's lending program, but the expected number of such credits in the budget period is few.

Revolving credits for small exporters and importers.—The Bank makes its facilities available to small United States exporters and importers who are unable to secure necessary assistance from commercial banks and has authorized a revolving credit of $1 million to which such concerns may have access.

Although the average amount outstanding per account at any one time is only approximately $5,000, the total disbursements under these revolving credits in 1950 were approximately $186,000. Estimated disbursements are $200,000 for 1951 and 1952. Repayments and interest in 1950 totaled $210,000 and are estimated at $202,000 for 1951 and 1952.

Edible animal and vegetable products	1.6
Wood and paper	1.9
Other items:	
Miscellaneous	9.3
Ocean freight, forwarding charges, etc	2.7
Total	196.3

Import activities.—An increasing level of United States imports contributes toward assuring future repayments of the Bank's loans, and to the highest possible level of a more stabilized balance of exports and imports.

Most United States imports do not currently require direct financing by the Bank since this is usually provided by commercial banks. The Bank's primary role in assisting the growth of necessary imports to the United States is to aid in the foreign development and production of those commodities and materials which are increasingly needed in the United States.

Private capital participation.—The Bank makes every effort to secure a maximum of private capital participation in its credits and for this purpose maintains a special division to provide close contact with the private capital market.

Activities under the Foreign Assistance Acts of 1948 and 1949.—Under these acts, when it is determined by the Administrator for Economic Cooperation that assistance should be extended to a participating country on credit terms, the Bank makes and administers the credit on

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

terms specified by the Administrator in consultation with the National Advisory Council on International Monetary and Financial Problems, of which the chairman of the board of directors of the Bank is a member. The Administrator and the chairman of the board of directors of the Bank have entered into an agreement providing that the Bank will issue as agent for and upon terms specified by the Administrator currency transfer guaranties of foreign investments which are extended under these acts. Activity in this connection is shown by the Economic Cooperation Administration elsewhere in the Budget.

Administrative expenses.—The increased workload of administering project-type loans in addition to pay-act increases necessitated increases in the administrative expense limitations in 1950 and 1951. The administrative expense limitation in fiscal year 1952 remains at the same level as in fiscal year 1951.

It is planned to expand the program of periodical on-the-spot inspections of the progress made by the borrowing countries in utilizing the proceeds of the loans disbursed.

Financial Review

Effect on budgetary expenditures.—The Bank's operation will result in a net expenditure of $75.6 million in 1952 as compared with $100,619,072 in 1951.

Earnings.—Net income from operations of the Bank for the fiscal year ended June 30, 1950, was $49.1 million, and estimates for fiscal years 1951 and 1952 are $49.5 million and $51.3 million of net income, respectively.

The Export-Import Bank Act of 1945 provides that "net earnings of the Bank after reasonable provision for possible losses shall be used for payment of dividends on capital stock." The Board of Directors determined that a reasonable reserve has not yet been established; therefore no dividends have been paid or accrued on the capital stock held by the United States Treasury. The estimated balance of accumulated earnings at the end of fiscal year 1952 is $303,882,264.

Had the Bank paid interest to the United States Treasury on all public funds used, whether in the form of stock or borrowings, at the rate representing the average cost of those funds to the United States Treasury, net earnings for the Bank in 1950 on that basis, on behalf of the United States Government as a whole, would have amounted to $27.9 million, and $118.9 million cumulative from the founding of the Bank in 1934 to June 30, 1950.

Investment of United States Government.—The Government's investment in the bank amounted to $2,167,582,624 on June 30, 1950, of which $1,203,082,264 is noninterest-bearing. It is anticipated that this investment will be about $2,443,282,264 on June 30, 1952, represented by $1,139,400,000 of interest-bearing notes of the United States Treasury and interest-free capital consisting of capital stock of $1,000,000,000 and earned surplus reserved for future contingencies of $303,882,264.

Purpose and Financial Organization

The Reconstruction Finance Corporation (RFC) is authorized to engage in certain lending activities in order to aid in financing agriculture, commerce, and industry; to encourage small business; to help in maintaining the economic stability of the country; and to assist in promoting maximum employment and production. The Corporation's loans or commitments made subsequent to June 30, 1947, are limited to $993,097,000 ($3,750,000,000 authorized in section 4 (c) of the Reconstruction Finance Corporation Act, as amended, less $2,756,903,000 transferred to Housing and Home Finance Agency under the provisions of Reorganization Plans 22 and 23 of 1950).

In addition to its lending activities, the Corporation is engaged in the manufacture and sale of synthetic rubber, the production and sale of refined tin, the production and sale of abacá fiber, and the liquidation and final settlement of programs initiated during World War II.

The lending activities of the Corporation are financed by capital stock in the amount of $100,000,000 issued to and held by the Secretary of the Treasury, the retention of accumulated earned surplus (after reasonable reserve for losses) to the extent of $250,000,000, and borrowings from the Secretary of the Treasury as needed to carry out its functions. All surplus in excess of $250,000,000 is required to be deposited in the Treasury as miscellaneous receipts.

The synthetic rubber, tin, and abacá programs and the liquidation of national defense, war and reconversion activities are financed with funds arising from the operation and liquidation of these programs in accordance with the provisions of the Government Corporations Appropriation Act, 1949. Funds realized from these activities in excess of financial requirements are deposited in the Treasury as miscellaneous receipts.

Analysis of Budget Programs

The activities of the Corporation are grouped according to the following broad categories: (*a*) Lending activities; (*b*) production and sale of synthetic rubber; (*c*) production, purchase and sale of tin; (*d*) production and sale of abacá fiber; (*e*) liquidation of war and related activities, including the administration and liquidation of assets acquired from Smaller War Plants Corporation.

LENDING OPERATIONS

Unless otherwise stated, all lending operations discussed under the following categories are authorized by section 4 (a) of the Reconstruction Finance Corporation Act, as amended.

Business loans and participations.—The making and servicing of direct business loans constitutes the major activity in the lending operations of the Corporation. Throughout the fiscal year 1950, there was an increasing demand by business enterprises for RFC loans, which resulted in an increase of $124,000,000, or 55 percent more direct loan authorizations in that year than in the fiscal year 1949, and an increase of 34 percent in the business loan portfolio of the Corporation. On July 31, 1950, however, the lending policy of the Corporation was modified to give priority to loans which contribute directly to national defense, and to provide that other loans may not be made if the proceeds are to be used for the acquisition of materials, supplies or equipment needed for national defense. It is anticipated that this change in lending practice will have a restrictive effect on new loan activity in the fiscal years 1951 and 1952. Estimates for these two fiscal years, which are compared with actual results for the fiscal year 1950, in the following tabulation, give effect to this change in policy. The statistics include direct business loans and loans made on an immediate participation basis with banks:

[In millions of dollars]

	1950 actual		1951 estimate		1952 estimate	
	Number	Amount	Number	Amount	Number	Amount
Loans authorized, less cancellations	3,410	$348.5	3,569	$211.7	3,578	$226.0
Loans disbursed (including purchases of participations)	3,230	284.0	3,538	262.0	3,230	235.8
Outstanding at end of year:						
Commitments	1,174	220.2	1,416	176.0	1,924	170.8
Loans	6,650	504.3	7,470	514.8	7,897	586.9

It will be noted that the net increase in number of loans outstanding during the fiscal year 1951 is proportionately greater than the increase in dollar amount during that year. This is attributable to the retirement in November 1950 of the three Kaiser Company loans, which had an aggregate unpaid balance at June 30, 1950, of $94,083,000.

In addition to the above, loans are made in participation with banks on a deferred basis. Banks disburse and service the loan, and in consideration of a fee, the Corporation stands ready to purchase its agreed percentage (up to 70 percent in loans amounting to $100,000 or less, and up to 60 percent in loans which are in excess of that amount) upon request of the participating bank. Although there has been a material decrease in the demand by banks for deferred participations, there were outstanding at June 30, 1950, $129,663,269 of this type of loan. Purchases of deferred participation loans are estimated at $6,100,000 and $4,600,000 for the fiscal years 1951 and 1952, as compared with $9,906,040 for the fiscal year 1950.

Loans to aid financial institutions.—The Corporation is authorized to make loans to aid any financial institution organized under the laws of any State or of the United States, and under certain conditions to subscribe for or make loans upon nonassessable preferred stock of insurance companies. There were no loans made to banks under this authority during the fiscal year 1950, and none are anticipated in the fiscal years 1951 and 1952. Loans to insurance companies amounted to $3,000,000 in the fiscal year 1950 and are estimated in the same amount for each of the fiscal years 1951 and 1952.

The Corporation held as of June 30, 1950, $109,969,251 of loans, preferred stock, capital notes and debentures acquired under authority rescinded in Public Law 132, Eightieth Congress. These holdings are being liquidated as rapidly as conditions permit. It is estimated that $13,060,000 and $11,073,000 will be retired during the fiscal years 1951 and 1952, respectively, as compared to $15,445,000 in fiscal year 1950.

Railroad loans.—Since 1949, financial assistance required in this field has been provided through private channels. Continuation of the current receptive bond market for the next 2 years will obviate to a great extent the need for any Government financing of railroads, and accordingly new loans are estimated at only $1,000,000 for each of the 2 years.

Public agency loans.—An increased demand for this type of loan is anticipated in the fiscal years 1951 and 1952, principally for the construction of underground parking facilities in metropolitan areas. These projects will serve

RECONSTRUCTION FINANCE CORPORATION—Continued

to alleviate a major traffic problem existent in many cities today, and also may be used as bomb shelters in the event of emergency. Disbursements are estimated at $25,000,000 and $95,000,000 for the fiscal years 1951 and 1952, respectively. Of the total of $120,000,000 for the 2 years, $85,000,000 is provided for construction of the parking facilities referred to, $20,000,000 represents disbursements on a public transit loan approved in 1949, and the balance is provided for other public projects essential to civilian requirements or national defense.

Catastrophe loans.—Upon the occurrence of any catastrophe which may result in the need for financing for relief and rehabilitation, Corporation representatives are assigned to the disaster area to work with local authorities, relief agencies, and other Federal agencies in the formulation of plans to assist applicants whose properties or businesses have been damaged.

During the fiscal year 1950, the Corporation declared 13 localities as disaster areas and disbursed $1,579,800 in loans. Provision has been made for disbursements of $1,000,000 in each of the two fiscal years under consideration for this type of assistance.

Other loans.—In addition to the major classes of loans discussed above, the Corporation held as of June 30, 1950, the following major categories of loans for collection or liquidation:

(1) A loan of $68,345,300 to the United Kingdom of Great Britain and Northern Ireland, which is expected to be fully repaid in the latter part of the fiscal year 1952;

(2) A loan of $60,000,000 made to the Republic of the Philippines pursuant to Public Law 656, Seventy-ninth Congress, on which a principal repayment of $25,000,000 is expected in 1952;

(3) Mortgages and other assets acquired from Defense Homes Corporation for liquidation, pursuant to Public Law 860, Eightieth Congress. Principal repayments of $929,000 and $900,000 are estimated on these mortgages in the fiscal years 1951 and 1952, respectively;

(4) Mortgages (insured by FHA or guaranteed by VA) acquired from the RFC Mortgage Company pursuant to Public Law 132, Eightieth Congress. It is expected that most of these mortgages, which amounted to $100,862,078 at June 30, 1950, will be disposed of by June 30, 1952, either by repayment or by sale, and that there will remain outstanding at the end of 1952 only $38,322,577.

Properties and securities acquired by foreclosure or in liquidation of loans.—As of June 30, 1950, the Corporation held miscellaneous securities and assets acquired in liquidation of loans or through foreclosure in the following amounts (net carrying value, based on the lower of cost or market values):

Securities accepted in reorganization of railroads	$16,390,734
Real and personal property acquired through foreclosure and other liquidation of loans	15,442,263
Securities accepted in payment of past due interest	495,534
Total	32,328,531

It is estimated that additional properties will be acquired through foreclosure or other liquidation of loans in the net amount of $9,287,600 during the fiscal year 1951, and $10,613,400 during the fiscal year 1952. The Corporation's responsibility in connection with these assets centers primarily in their liquidation to the best advantage of the Government. Receipts from sales or other disposition are estimated at $6,000,000 in the fiscal year 1951, and $7,500,000 in the fiscal year 1952.

NATIONAL DEFENSE, WAR AND RECONVERSION ACTIVITIES

Production and sale of synthetic rubber (authority—Public Law 469, 80th Cong., as extended by Public Law 575, 81st Cong.).—The Corporation operates all rubber-producing facilities owned by the Government. The law specifies that there shall be maintained facilities having an annual rated production capacity of not less than 600,000 long tons of general purpose rubber and not less than 65,000 long tons of special purpose rubber. The law also provides for research and development work in rubber and allied fields, the formulation of a plan for disposal of Government-owned plants to private ownership, and maintenance in stand-by of those facilities included in the total capacity, the operations of which are not required to meet the demands for synthetic rubber.

The authority contained in Public Law 575 expires on June 30, 1952, and the budget is therefore based on continuation of the Corporation's rubber operations through the fiscal year 1952.

At the direction of the President the rubber program is being expanded to an annual production rate closely approximating the maximum amount of rubber which can be produced in the facilities using petroleum raw materials. In addition, it is contemplated that there will be a further expansion of activities involving the use of alcohol as a basic feedstock. Since the cost of rubber produced from alcohol based raw materials is considerably greater than that produced from petroleum based raw materials, provision has been made for a price increase in order to prevent a substantial loss to the Government in the operation of this program.

Purchase, production, and sale of tin (authority—Public Law 723, 81st Cong.).—The Corporation is authorized and directed to continue operation of the Texas City tin smelter until June 30, 1956. Authority is provided to buy, sell, and transport tin and tin ores and concentrates and to finance research in tin smelting and processing.

Activities under this program included, during the fiscal year 1950, operation of the smelter and purchase and sale of refined tin. Following the relaxation of import controls by the Department of Commerce in August 1949, and the decontrol of tin on December 1, 1949, industry began to import tin for its own account. This has resulted in a substantial decrease in the sale of domestically produced tin to industry.

Purchases of tin concentrates, and refining and other costs, are estimated at $86,420,000 for 1951 and $86,311,000 for 1952. Sales are contemplated at $92,400,000 for each of the two years.

A major plant improvement, an acid recovery plant, is practically completed and is now in the trial period. Changes and corrections will undoubtedly be necessary. It is estimated that these will involve expenditures of approximately $250,000 in the fiscal year 1951. In view of the present work situation and the length of operation authorized by the enactment of Public Law 723, additional substantial capital expenditures for the purpose of improving the efficiency of the plant are being considered. A preliminary survey indicates that approximately $250,000 will be required for this purpose in the fiscal year 1951 and approximately $500,000 will be required in the fiscal year 1952.

Production and sale of abacá fiber (authority—Public Law 683, 81st Cong.).—The Corporation is engaged in the production of abacá fiber in Central America as a part of the defense program of the Government. The

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

law provides for the continuation and expansion of the operation for a period not to exceed ten years.

On August 21, 1950, the President directed the Corporation to extend the acreage to the maximum of 50,000 acres. A survey is now being made in Central America for the purpose of developing recommendations in regard to acreage for the expansion. It is anticipated that this survey will be completed by January 1951, and within a short time thereafter the most desirable acreage will be selected and planting of the new acreage will begin. It is estimated that the maximum acreage will be under cultivation within two or three years thereafter.

It is estimated that during the fiscal year 1951 approximately $2,000,000 will be expended in the expansion program, and in the fiscal year 1952 approximately $15,000,000 will be expended for this purpose.

In the fiscal year 1950, production of abacá amounted to 30,061,600 pounds at a cost of $7,185,076. The gross income during the year, involving sales of 28,717,968 pounds of abacá, was $6,736,360.

Production during the fiscal year 1951 is estimated at 30,000,000 pounds at a cost of $9,604,253, the increase in cost per pound over 1951 being primarily attributable to an estimated expenditure for fertilizer under the rehabilitation program which was undertaken subsequent to the enactment of Public Law 683. Receipts during the same period are estimated at $6,600,000. For the fiscal year 1952 it is estimated that approximately 35,000,000 pounds of abacá will be produced at a cost of $8,785,097, including an estimate of $1,000,000 for expenditures for fertilizer. Receipts during the latter year are estimated at $7,000,000.

Liquidation of war and related activities (authority—sec. 12, Public Law 132, 80th Cong.).—This program will be largely completed during the fiscal years 1951 and 1952. As of June 30, 1950, there remained for liquidation the following groups of assets and liabilities with total acquisition or book costs of $124,777,028 (exclusive of contingent assets and liabilities amounting to $21,418,339):

1. Aluminum and magnesium forgings plant	$4,267,230
2. Other plants and equipment	52,134,019
3. Miscellaneous inventories of property	1,041,219
4. Loans, advances and receivables	38,421,680
5. Other assets	21,102,419
6. Liabilities related to the above programs	7,810,461

Aluminum and magnesium forgings plant

It is expected that this plant will be disposed of by transfer to the Department of Defense during the fiscal year 1952.

Other plants and equipment under lease

The Corporation had, as of June 30, 1950, 30 properties acquired during the war or related to war programs. Of these 18 with a book value of $36,142,963 were under lease, some for long terms, and the remaining 12 plants, with a book value of $15,991,056, will be disposed of by sale, transfer or lease, as conditions permit. Aside from the workload involved in the management and disposal of the 12 plants referred to above, the Corporation's activity in connection with its wartime properties will be the administration of the 18 continuing leases, administration of 25 conditional-sales contracts involving plants (with book value of $23,316,634) previously sold, and determining final accountability of lessees in connection with plants previously sold or declared surplus or hereafter becoming excess.

Loans, advances, and receivables

In connection with various programs undertaken by the Corporation under wartime authorities, there remained for liquidation, as of June 30, 1950, $38,421,680 of loans and receivables. Some of these are loans on regular amortization schedules and can be collected only when due. Others are claims and receivables which must be collected by negotiation or litigation. In still others, a complete analysis of the cases is necessary, after which it may be determined that there is no basis for the claims as they exist in the Corporation's records. In addition to the amounts stated, there are many claims such as claims for refunds for rail freight paid in full when land-grant rates should have applied, the amounts of which are yet to be determined and settled. Land-grant claims amounting to $5,368,329 were collected during the fiscal year 1950; such collections are estimated at $3,000,000 and $2,000,000 for the fiscal years 1951 and 1952.

Other assets

This includes a variety of items such as an experimental plywood flying boat, leased platinum, and other miscellaneous inventories in process of disposal and other assets involved in litigation or extended negotiations.

Smaller War Plants Corporation (authority—Executive Order 9665).—As of June 30, 1950, there remained for collection or disposal the following categories of assets of Smaller War Plants Corporation transferred to the Corporation for disposal:

Loans	$3,458,310
Notes and accounts receivable	963,505
Machinery and equipment	215,838
Other assets	621,767
Total	5,259,420

These assets are being liquidated as promptly as possible. Total receipts from collections and sale of assets are estimated at $1,442,687 in the fiscal year 1951 and $1,075,322 in the fiscal year 1952.

ADMINISTRATIVE EXPENSES

Administrative expenses of the Corporation consist of salaries and other related costs of all supervisory and operating personnel, together with the cost of rental space in Government-owned buildings occupied by Corporation employees, and all expenditures for administrative equipment.

The Corporation is authorized to incur necessary administrative expenses not in excess of $21,337,200 during the fiscal year 1951, an amount representing the enacted authorization of $26,000,000 less $4,662,800 transferred to the Housing and Home Finance Agency under provisions of Reorganization Plans No. 22 and No. 23 of 1950. Administrative expenses are estimated at $17,835,000 for the fiscal year 1952, a reduction of $3,502,200.

It is anticipated that the major part of this saving will be accomplished by reorganization of the field offices of the Corporation under a plan which will not only result in a substantial reduction in personnel, but will improve efficiency of operations and provide better services to applicants and borrowers in the field.

FINANCIAL REVIEW

Effect on budgetary expenditures (statement A).—The funds made available to the Corporation in the fiscal year 1950 resulted in net budgetary expenditures of $556,514,-

Digitized for FRASER

Federal Reserve Bank of St. Louis

RECONSTRUCTION FINANCE CORPORATION—Continued

249 after eliminating $36,985,041 of capital transfer items representing dividend payments and proceeds of programs administered by the Corporation and recoveries of advances to other Government agencies of $1,000,000,000. It is anticipated that the use of funds will result in net receipts of $79,131,898 in 1951 and net expenditures of $22,681,000 in 1952.

Operating results (statement B).—A comparison follows of actual income and expense in lending programs in the fiscal year 1950 and those estimated for 1951 and 1952:

[In thousands of dollars]

	1950 actual	1951 estimate	1952 estimate
Total income	$71,988	$43,689	$42,412
Total expense, before charge-offs, and adjustments in valuation reserves	43,680	31,322	25,813
Net income before charge-offs, and adjustments in valuation reserves	28,308	12,367	16,599
Less charge-offs and adjustments in valuation reserves	8,523	8,048	8,337
Net income for year	19,785	4,319	8,262

Net income for the fiscal year 1950 included (*a*) a dividend of $10,000,000 on the Corporation's investment in the capital stock of the Federal National Mortgage Association and (*b*) extraordinary profits of $6,280,000 earned during the year from sale of assets acquired through foreclosure. Exclusion of these two items would reduce net income for the fiscal year 1950 to $3,504,653 which, for purposes of comparability, should be the amount considered in relation to estimated net income for the fiscal years 1951 and 1952, since the Federal National Mortgage Association was transferred to the Housing and Home Finance Agency on September 7, 1950, in accordance with Reorganization Plan No. 22 of 1950, and no extraordinary profits are anticipated in the estimates for 1951 and 1952. Exclusive of these two items, an increase in net income from lending activities is estimated in each of the two fiscal years under consideration, which is attributable to an increase in the interest rate to be charged on new business loans, the establishment of a policy of collecting application and commitment fees not heretofore charged prospective borrowers, a material decrease in administrative expenses, and a slight increase in the portfolio of business loans.

An accrued dividend of $18,674,005, representing earnings of the Corporation during the fiscal year 1950, will be paid to the United States Treasury in the fiscal year 1951. The dividend represents earnings of the Corporation in excess of $250,000,000 which, pursuant to the Reconstruction Finance Corporation Act, as amended, is retained as accumulated surplus. Net income reflected below will be paid to the Treasury as dividends in the fiscal years indicated:

Net earnings, 1951, payable in 1952	$4,319,000
Net earnings, 1952, payable in 1953	8,262,000

Net income from synthetic rubber plants in operation amounted to $799,519 in the fiscal year 1950. However, maintenance of stand-by plants during that year involved a net expenditure of $8,512,296, so that the synthetic rubber program resulted in a net loss to the Corporation of $7,712,777. Because of increased production, involving the reactivation of plants previously held in standby, and a price increase, profits of $10,839,000 and $5,484,000 are projected for the fiscal years 1951 and 1952, respectively. The total projected profits, representing 2.2 percent of estimated operating expenditures for the 2 years is considered a conservative margin to assure operations on a break-even basis.

The tin program operated at a loss of $10,916,370 in the fiscal year 1950 as the result of a severe price drop. Projected results of operations, however, are based on a continuation of the present favorable market during the fiscal years 1951 and 1952. This will result in a net profit of $5,980,000 and $6,088,948 in 1951 and 1952, respectively.

Financial condition and investment of the United States Government.—As indicated in the statement of financial condition (statement C, pt. 1), the Corporation's total assets, exclusive of interim advances made to other Government agencies and the Corporation's investment in the Federal National Mortgage Association, will increase from $954,384,717 at June 30, 1949, to $1,017,443,006 at June 30, 1952. This results from the increase in business loans to be made by the Corporation.

Investment of the Government in the Corporation as set forth in statement C, is represented by: (1) Capital stock of $100,000,000 held by the Treasury; (2) earned surplus of $250,000,000; (3) borrowings from the Treasury; and (4) unpaid dividends. The total investment as of the end of the fiscal years 1949 through 1952, exclusive of borrowings from the Treasury for interim advances to other Government agencies and the Corporation's investment in the Federal National Mortgage Association is as follows:

1949	$742,073,685
1950	771,877,406
1951	717,988,779
1952	801,931,779

The increase in the Government's investment results primarily from borrowings from the Treasury.

Total income		534,185		194,000		94,000
By decrease in working capital		7,959,790		2,281,629		2,585,678
Total funds provided		10,312,034		3,115,000		3,105,000

EFFECT ON BUDGETARY EXPENDITURES

Checking account expenditures:						
Increase (−) or decrease in Treasury checking account:						
Reconstruction Finance Corporation		−$6,725,199		$11,905,462		----------
Defense Homes Corporation (in liquidation)		667		----------		----------
Note of Federal National Mortgage Association	$579,304,104		----------		----------	
Net additional borrowings including advances to other Government agencies	−979,068,468		----------		----------	
		−399,764,364		−1,095,000,000		$80,000,000
		−406,488,896		−1,083,094,538		80,000,000
Transfer to Housing and Home Finance Agency:						
Federal National Mortgage Association		----------		1,047,466,348		----------
Prefabricated housing loans:						
Principal	----------		$20,031,561		----------	
Interest and accounts receivable	----------		138,736		----------	
		----------		20,170,297		----------
		----------		−15,457,893		----------
Less capital transfers and advances:						
Payments to U. S. Treasury:						
Dividend payment	1,345,185		18,674,005		$4,319,000	
Liquidating dividend, Smaller War Plants Corporation	10,000,000		3,000,000		3,000,000	
Net proceeds from national defense, war, and reconversion activities	25,000,000		50,000,000		50,000,000	
Net proceeds from war damage insurance program	639,856		----------		----------	
		−36,985,041		−71,674,005		−57,319,000
Repayments of advances to other Government agencies		1,000,000,000		8,000,000		----------
Effect of working fund transfers		−11,814		----------		----------
Net effect on budgetary expenditures		[1] 556,514,249		−79,131,898		22,681,000

[1] Net budgetary expenditures of $556,514,249 in 1950 include loans of $579,304,104 to the Federal National Mortgage Association, a subsidiary of the Corporation until September 7, 1950, when the Association was transferred to the Housing and Home Finance Administrator by Reorganization Plan No. 22. While the transfer did not take place until fiscal year 1951, the Association's budget for all 3 years, 1950 through 1952, is shown under Housing and Home Finance Agency for purposes of comparability.

STATEMENT B.—*Reconstruction Finance Corporation: Statement of income and expenses*

[Fiscal years ending June 30, 1950, 1951, and 1952]

PART I. LENDING ACTIVITIES

	1950 actual		1951 estimate		1952 estimate	
Income:						
Interest and dividends earned on loans to, and securities of:						
Commercial enterprises, financial institutions, political subdivisions of States, Territories and home owners	$33,641,751		$33,257,952		$36,521,683	
Foreign governments	4,181,321		2,963,245		1,686,747	
Other U. S. Government agencies	15,307,063		4,079,693			
Total interest and dividends		$53,130,135		$40,300,890		$38,208,430
Fees on loan participation agreements		1,008,358		826,022		641,330
Premiums and discounts		183,299		145,000		145,000
Income from acquired collateral, net		7,666,590		1,916,755		1,916,755
Other income				500,000		1,500,000
Dividends received from subsidiary		10,000,000				
Total income (statement A, pt. I)		71,988,382		43,688,667		42,411,515
Expenses:						
Interest on:						
Funds borrowed from U. S. Treasury		22,614,041		10,634,000		7,467,000
Funds held for U. S Treasury and others		4,082,612		3,482,000		3,216,000
Allocated portion of administrative expenses		16,391,530		16,780,000		14,860,000
Fees for servicing mortgages		584,733		401,000		245,000
Other expenses		7,038		25,000		25,000
Total expenses before losses and charge-offs, and adjustment of valuation allowances (statement A, pt. I)		43,679,954		31,322,000		25,813,000
Loans, investments, and other receivables charged off:						
Loans and investments	41,854,909		4,427,200		4,995,100	
Accounts and notes receivable	2,475					
		41,857,384		4,427,200		4,995,100
Total expenses, lending activities		85,537,338		35,749,200		30,808,100
Net income (or loss (—)) from lending activities before adjustment of valuation allowances		—13,548,956		7,939,467		11,603,415
Increase (—) or decrease in valuation allowances:						
Allowances for losses on:						
Loans and investments	33,755,160		—4,538,792		—4,259,740	
Accounts and notes receivable	17,683					
Deferred participations in bank loans	—439,234		918,325		918,325	
Net adjustment of allowances		33,333,609		—3,620,467		—3,341,415
Net income (or loss (—)) from lending activities		19,784,653		4,319,000		8,262,000

Analysis of Earned Surplus

Surplus reserves (contingencies):						
Balance at beginning of fiscal year		$1,500,000		$2,423,529		$2,423,529
Increase (or decrease (—)) during period		923,529				
Balance at end of fiscal year		2,423,529		2,423,529		2,423,529
Unreserved surplus:						
Balance at beginning of fiscal year		250,000,000		250,000,000		250,000,000
Net income for fiscal year		19,784,653		4,319,000		8,262,000
Balance before adjustments		269,784,653		254,319,000		258,262,000
Adjustments to surplus reserves		—923,529				
Adjustments of prior years' income		—187,119				
Dividend to U. S. Treasury paid or accrued		—18,674,005		—4,319,000		—8,262,000
Balance at end of fiscal year		250,000,000		250,000,000		250,000,000
Total earned surplus		252,423,529		252,423,529		252,423,529

PART II. NATIONAL DEFENSE, WAR AND RECONVERSION ACTIVITIES

	1950 actual		1951 estimate		1952 estimate	
SYNTHETIC RUBBER PROGRAM						
Income:						
Sales of synthetic rubber		$156,006,135		$328,690,000		$450,350,000
Revenue from tank-car operations		211,434		200,000		200,000
Other income		213,022		100,000		150,000
Total income from operations		156,430,591		328,990,000		450,700,000
Expenses:						
Cost of synthetic rubber sold	$115,939,875		$264,230,000		$385,050,000	
Allocated portion of administrative expenses	1,655,686		1,760,000		1,790,000	
Research and development	4,927,586		5,250,000		4,750,000	
Excess of sales freight expense over freight charged to customers	3,217,194		1,650,000			
Reactivation expense	110,061		5,020,000		5,030,000	
Other expenses	926,980		500,000		800,000	
Total expenses before depreciation	126,777,382		278,410,000		397,420,000	
Provision for depreciation	25,522,411		34,850,000		42,830,000	
Total expenses		152,299,793		313,260,000		440,250,000
Net income (or loss (−)) from operations before deduction of interest on investment		4,130,798		15,730,000		10,450,000
Interest on funds invested in net operating assets		3,331,279		4,860,000		5,220,000
Net income from operations		799,519		10,870,000		5,230,000
Nonoperating income or expense (−):						
Rental income	834,125		450,000		400,000	
Expenses for maintenance of stand-by plants	−3,581,525		−400,000		−100,000	
Other losses and costs (net) including income or loss from sale or retirement of property, plant, and equipment	−5,764,896		−81,000		−46,000	
Nonoperating income (or loss (−))		−8,512,296		−31,000		254,000
Net income (or loss (−)) from synthetic rubber program		−7,712,777		10,839,000		5,484,000
TIN PROGRAM						
Income: Sales of refined tin		141,186,267		92,400,000		92,400,000
Expenses:						
Cost of tin (including storage and handling)	150,220,056		84,400,000		84,291,052	
Allocated portion of administrative expenses	489,597		460,000		445,000	
Other expenses	112,096		110,000		100,000	
Total expenses before depreciation and charge-offs	150,821,749		84,970,000		84,836,052	
Provision for depreciation	445,662		600,000		600,000	
Interest on funds invested in net operating assets	835,226		850,000		875,000	
Total expenses		152,102,637		86,420,000		86,311,052
Net income (or loss (−)) from tin program		−10,916,370		5,980,000		6,088,948
FIBER PROGRAM						
Income:						
Sales of fiber		6,736,193		6,600,000		7,000,000
Other income		167				
Total income		6,736,360		6,600,000		7,000,000
Expenses:						
Cost of fiber sold	5,578,381		8,000,000		7,000,000	
Allocated portion of administrative expenses	123,673		130,000		135,000	
Other expenses	49,389		35,000		35,000	
Total expenses before depreciation and charge-offs	5,751,443		8,165,000		7,170,000	
Provision for depreciation	1,174,812		1,174,000		1,173,500	
Interest on funds invested in net operating assets	258,821		265,253		441,597	
Total expenses		7,185,076		9,604,253		8,785,097
Net income (or loss (−)) from fiber program		−448,716		−3,004,253		−1,785,097

Program Highlights

	1950	1951	1952
Outside sales of electric energy (kw-hr.)	13,581,345,000	15,606,600,000	19,190,600,000
Gross revenue from outside power sales	$55,609,335	$64,366,000	$83,306,000
Net power income before interest charges	27,006,662	24,360,000	20,779,000
Expense (or income [1]) of developmental programs:			
Navigation operations	2,796,445	2,978,000	2,822,000
Flood control operations	2,331,521	2,536,000	2,371,000
Reservoir development			305,000
Fertilizer and munitions research and experimental production	163,420	919,000	[1] 179,000
Resource development activities	4,830,419	4,357,000	2,449,000
Construction obligations, exclusive of administrative and general expenses:			
Facilities for navigation, flood control, and power	70,330,292	138,522,000	261,057,000
Chemical facilities	3,663,414	3,373,000	1,500,000
Facilities for general use	370,038	966,431	900,000

[1] Net income.

Purpose and Financial Organization

The Tennessee Valley Authority is a Corporation established "to improve the navigability and to provide for the flood control of the Tennessee River; to provide for reforestation and the proper use of marginal lands in the Tennessee Valley; to provide for the agricultural and industrial development of said valley; to provide for the national defense by the creation of a corporation for the operation of Government properties at and near Muscle Shoals in the State of Alabama, and for other purposes" (16 U. S. C. 831).

The Corporation's programs are financed by appropriations and by proceeds from its operations, principally the sale of power and fertilizer materials. Appropriations are requested to cover expenses of navigation and flood-control operations, fertilizer and munitions development, resource development activities, and most capital plant additions. Proceeds (referred to as corporate funds) are used to conduct the business of generating, transmitting, and distributing electric energy, including related reservoir operating expenses; and in manufacturing, selling, and distributing fertilizer. Section 26 of the TVA Act, as amended, provides for payment into the Treasury of the United States of such proceeds as in the opinion of the TVA Board are not required for the purposes enumerated above.

Analysis of Budget Programs

The function of TVA is to bring about the unified development of the water and soil resources of the Tennessee Valley. The program consists of five types of activity: (1) Navigation, flood control, and power operations; (2) reservoir development; (3) fertilizer and munitions development; (4) resource development activities; and (5) construction or acquisition of structures and equipment to be employed in the foregoing operations.

As shown in statement A following this narrative, the 1952 program involves the use of $250,622,000 of appropriated funds, and $108,202,000 of corporate funds, a total of $358,824,000.

NAVIGATION, FLOOD CONTROL, AND POWER

As of June 30, 1950, the total investment in facilities serving navigation, flood control, and power was $766,041,551, and was allocated as required by section 14 of the act (16 U. S. C. 831m), as follows: Navigation, $141,600,613; flood control, $155,432,856; and power, $469,008,082. Principal components are a system of 24 major dams, 22 major hydroelectric generating stations, 10 navigation locks, 6 major fuel-electric generating stations, and a power transmission network of about 7,200 circuit-miles.

Navigation operations.—Navigation improvements which have been constructed on the Tennessee River and its tributaries provide a 9-foot channel from the mouth of the river to Knoxville, Tenn., a distance of 650 miles. The Tennessee Valley is thereby linked with the 6,000-mile inland waterways system extending from the Great Lakes to the Gulf of Mexico. Freight traffic on the Tennessee River has increased from 32,659,000 ton-miles in 1933 to about 470,000,000 ton-miles in 1949. Increasing quantities of steel, oil, and other higher value commodities are being shipped. There also has been a tremendous growth in recreational navigation.

The Corporation's activities in the field of navigation consist of: (1) Keeping the facilities open and adequate to meet the needs of commerce; (2) encouraging and assisting private interests in the development of terminal facilities and barge-line services; and (3) working with shippers, carriers, and others in coordinating water transportation with other means of transport. Five small public-use river terminals are operated to provide service for small shippers and to permit prospective large shippers to try water transportation before making heavy investments in their own facilities.

Close working relationships are maintained among the TVA, the United States Corps of Engineers, the United States Coast Guard, and State and local agencies in matters relating to navigation on the Tennessee River.

The net expense of navigation operations, as shown in statement B, is estimated at $2,822,000 in 1952, compared to $2,978,000 in 1951 and $2,796,445 in 1950.

Flood control operations.—The river control system on the Tennessee and its tributaries provides 11,738,000 acre-feet of storage for flood control. To date the system has averted nearly $45,000,000 in flood damage at the city of Chattanooga alone. Benefits to communities below the mouth of the Tennessee are substantial and extend to the lower Ohio and Mississippi basins. Studies show that the present reservoir system would be able to reduce flood heights at Cairo, Ill., from 2 to 3½ feet. The operation of the Tennessee River system is recognized as an important factor in the planning of the Mississippi River levees between Cairo and the mouth of the Red River.

The net expense of flood control operations, as shown in statement B, is estimated at $2,371,000 in 1952 and $2,536,000 in 1951; in 1950 it was $2,331,521.

Power operations.—Power operations of the Corporation are confined to generation and transmission of power and sales at wholesale to local distribution systems and to certain industries and Government agencies requiring large amounts of power. Power is distributed by 145 local public agencies to more than 1,100,000 ultimate consumers. As of June 30, 1950, the installed capacity of the system was 2,993,610 kilowatts, including 36,000 kilowatts in a Department of the Army plant on a tributary of the Cumberland River and 345,560 kilowatts in plants owned by the Aluminum Co. of America but operated as a part of the TVA system. The total system input in fiscal year 1950 was 18,426,000,000 kilowatt-hours, of which 16,522,000,000 kilowatt-hours was generated at hydro plants and 1,904,000,000 kilowatt-hours was supplied by fuel plants or other auxiliary sources of supply. System input is estimated at 19,227,000,000 kilowatt-

http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

TENNESSEE VALLEY AUTHORITY--Continued

hours and 22,771,000,000 kilowatt-hours, respectively, for 1951 and 1952.

Net income from power operations (before interest charges) amounted to $27,006,662 in fiscal year 1950. Estimates for 1951 and 1952 are $24,360,000 and $20,779,000, respectively. The return on power investment was 5.8 percent in 1950. During the next 2 years, with power demands substantially in excess of the capacity of the system's economical power sources, the return on the investment is expected to range from 3½ to 4½ percent. The estimates are based on assumptions of average stream flow. Dry-year conditions would reduce the energy available from hydro sources, increase operating expenses through a greater use of steam generation, and thus lower substantially the amount of net income which would be realized. Better-than-average streamflow could produce some increase over the estimates.

RESERVOIR MANAGEMENT

Multipurpose reservoirs are managed by TVA primarily for navigation, flood control, and power. The costs of operations common to navigation, flood control, and power are allocated to and included in the estimates for those three programs. These common expenses are estimated at $3,345,000 in 1952 and cover the cost of water dispatching operations, malaria control, plant protection and services to visitors, engineering tests and studies, and maintenance of multiple-use facilities. In addition to these allocated expenses, certain activities are conducted to aid in obtaining additional use of the reservoirs. These reservoir development activities consist of fish and game investigations, stream sanitation work, and recreation development; they are estimated to cost $210,000 in 1952.

FERTILIZER AND MUNITIONS DEVELOPMENT

Chemical laboratories at Wilson Dam, Ala., and production facilities at Wilson Dam, Ala., and Columbia, Tenn., form a center of research for the development of new and improved fertilizers and processes for their manufacture. Use of the research and production facilities for national defense takes precedence over other use.

Expenditures from appropriated funds for the fertilizer and munitions program are estimated at $1,404,000 for 1952 and cover the costs of research in product and process development and research in fertilizer use. Gross expenditures from corporate funds, for the cost of manufacturing and distributing fertilizer, are estimated at $16,026,000. Gross receipts are estimated at $19,224,000. The estimated net income of the program is $179,000 after provision for depreciation ($1,447,000) and prorations of administrative and general expenses ($168,000).

Research on products and processes consists of (1) small-scale chemical research, and (2) process development. The first category is limited to exploratory tests, background research, and applied research at the laboratory level. Process development includes the technical and economic evaluation of research results; design, construction, and operation of pilot plants; improvement of design features and operating procedures of demonstration or large-scale plants; and engineering and economic studies directed toward use of the findings by other agencies and industries.

Research in fertilizer use includes testing fertilizer under controlled and practical farm conditions, research in fertilizer application, experimentation with fertilizers in different farming systems, and economic analyses.

Large scale fertilizer manufacturing units are built and operated to demonstrate the technical and commercial feasibility of new processes on a scale suitable for adoption by industry; to supply fertilizers in sufficient quantity for farm tests and demonstrations; and to produce new fertilizers in quantities sufficient for widespread introduction to farmers. Phosphatic and nitrogenous fertilizers produced will be used in tests and demonstrations and substantial quantities will be distributed through commercial and cooperative channels for experimental and educational purposes and to increase the production of agricultural products needed for national defense.

RESOURCE DEVELOPMENT ACTIVITIES

The 1952 estimate for these activities is $2,480,000 ($2,286,000 from appropriated funds and $194,000 from corporate funds). In view of the requirements of national defense, the marked progress which has been made in regional development in the past 17 years, and the increased effectiveness of State and local agencies, TVA is making a number of significant adjustments in its resource development activities. These adjustments involve a contraction of general test-demonstration activities and increased reliance on other agencies for the educational phases of the program; withdrawal from research and technical assistance activities in fields where State and local agencies are taking increased initiative; drastic curtailment of activities not related to national defense; and concentration of efforts on specifically defined projects and in selected tributary watersheds. The program is carried out in close cooperation with State, local, and other Federal agencies. It includes agricultural resource development, forest resource development, tributary watershed development, mineral resource development, topographic mapping, and surveys and studies of the Tennessee Valley. The expenditure level proposed for 1952 is substantially below that of recent years.

CONSTRUCTION AND ACQUISITION OF ASSETS

Total obligations for construction and acquisition of assets are estimated at $266,601,000 in fiscal year 1952, of which $241,732,000 would be derived from appropriated funds and $24,869,000 from proceeds. The program is summarized as follows:

Completion of South Holston Dam	$126,000
Continued construction of 2 dam and reservoir projects on the South Fork of the Holston River	19,000,000
Additions and improvements to multipurpose dams and reservoirs	415,000
Continued work on 8 hydro generating units in existing dams	12,568,000
Continued construction of 18 generating units in 4 steam plants	143,210,000
Commencing construction of 2 hydro generating units at existing projects	3,390,000
Commencing construction of 2 additional units at Widows Creek Steam Plant	12,666,000
Commencing construction of a new steam plant of 2 units	16,568,000
Transmission and other electric plant	52,736,000
Navigation facilities	78,000
Chemical facilities	1,500,000
Facilities for general use	900,000
Investigations for future projects	300,000
Administrative and general expenses distributed to fixed assets	3,144,000
Total	266,601,000

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

A supplemental appropriation estimate amounting to $66,500,000 for power facilities is not reflected in these estimates.

The first three items above relate to structures serving the navigation, flood control, and power programs. The estimate for South Holston Dam provides for completion of this project for which closure was made in November 1950, and initial power generation is scheduled in February 1951. The second item provides for continued construction of the Boone and Fort Patrick Henry projects on the south fork of the Holston River, the former scheduled for completion during the early part of calendar year 1953 and the latter during the early part of calendar year 1954.

Most of the remaining funds required in 1952 will be used to enlarge the generating capacity at other projects, to continue work on new projects scheduled to be started in the fiscal year 1951, and to increase the capacity of the power system transmission network. The Tennessee Valley region, wholly dependent for electricity upon the TVA system, is experiencing a steady growth in power loads. The program aims to place sufficient additional generating facilities in operation in the calendar years 1952 and 1953 and early in 1954 to minimize a critical shortage in power supply in the winter of 1952–53 and to meet the anticipated demands in the winter of 1953–54. The installations proposed represent a minimum program for supplying increased demands to result from continuing mobilization for defense.

Since the end of World War II, installations of new power capacity have not kept pace with the growth in electric load. In 1945, when the peak wartime demands occurred, there was a margin of nearly 20 percent between demands and assured capacity. Because of the more rapid increase in load than in capacity to serve it, this margin has greatly decreased. Even with the present heavy construction program, it is expected that there will be little, if any, margin in the winters of 1952–53 and 1953–54.

In order to provide capacity for supplying power to the Atomic Energy Commission's new Kentucky facilities and to meet other load increases during calendar year 1953, TVA is beginning, in fiscal year 1951, construction of two new steam plants. A small part of this new capacity will be in service by December 1952. Together with other capacity now under construction, the TVA system will have a load carrying ability of about 4,600,000 kilowatts by the winter of 1952–53. At that time power requirements, including the initial supply of TVA power to the new AEC load, are expected to equal or exceed this amount. The facilities to be completed during 1953 will increase the assured capacity to about 5,500,000 kilowatts by the winter of 1953–54, providing for the expected peak load and reestablishing a very small margin.

It is proposed to place orders with manufacturers during fiscal year 1952 for additional generating units which will provide capacity in calendar year 1954 necessary to meet load developments to be expected in that year. These additional units, together with expected installations in the Cumberland basin to become available in 1954, will add about 590,000 kilowatts to the load carrying ability of the system. Developments in the near future will determine what other steps, if any, may be necessary to add to the 1954 power supply.

The estimate of $1,500,000 for chemical facilities provides for phosphate washing and processing equipment, additional nitric acid towers to handle increased production of ammonium nitrate, and plant replacements necessary to keep existing phosphate and nitrate facilities in operation.

The estimate of $900,000 for general facilities provides for routine replacement of transportation, office, and other general equipment.

ADMINISTRATIVE AND GENERAL EXPENSES

These expenses consist primarily of costs of administration and management services common to all organizations and functions which have been centralized in the interest of economy and convenience in over-all operations. Schedule B–2 summarizes these expenses by source and shows the distribution to the various programs and projects. The 1952 estimate of $4,450,000 represents about 1 percent of the total gross budget of the agency.

Financial Review

Net effect on Government budget.—The 1952 program involves the use of $250,622,000 of appropriated funds and $108,202,000 of corporate funds, a total of $358,824,000. Of the total, $268,655,000 is for acquisition of assets; $76,926,000 is for operating expenses; $11,773,175 for retirement of borrowings and payments to the United States Treasury; and $1,469,825 to increase corporate working capital. The use of these funds will result in net budgetary expenditures of $236,597,000.

Operating results.—Operating results of the several programs are summarized in statement B. Net income from power operations (after interest charges) is estimated at $20,000,000 for 1952, as compared with $23,496,000 in 1951 and $26,068,211 in 1950; the net expenses for other programs are estimated at $7,766,000 in 1952, $10,787,000 in 1951, and amounted to $10,092,045 in 1950.

Financial condition.—The financial position of the Corporation at the close of fiscal year 1949 through 1952 is shown on statement C. Significant items are as follows:

Cash and cash funds.—Cash balances with the United States Treasury at the end of each year are generally sufficient to cover outstanding obligations. The forecast cash balance of $66,865,890 at June 30, 1952, reflects anticipated increases in unliquidated obligations.

Land, structures, and equipment.—The increase of $264,216,000 represents additional construction in progress and plant to be placed in service. Major projects scheduled for completion in 1952 are: Additional hydro generating units at Pickwick, Guntersville, and Chickamauga dams; four generating units at Johnsonville steam plant; the power service building; and additional transmission facilities.

Interest-bearing investment.—Total interest-bearing investment consists of bonds sold to and held by the United States Treasury. The 1952 budget program provides for the retirement from power proceeds of $4,000,000 of this indebtedness, leaving a balance of $40,000,000 outstanding as of June 30, 1952.

Non-interest-bearing investment.—Through June 30, 1950, the Congress had appropriated $827,603,981. For fiscal year 1951 the Congress has appropriated $131,214,000, of which $3,000,000 has been placed in reserve under the provisions of section 1214 of the General Appropriation Act, 1951. The 1952 budget program requests an appropriation of $248,568,000.

In addition to the retirement of bonds mentioned above, repayment of $5,000,000 from power proceeds of the United States Treasury's investment in power program assets is budgeted for 1952. Schedule C–1, "Repayment of investment in power program," summarizes the status of repayments under title II of the Government Corporations Appropriation Act, 1948. A repayment of $2,773,175 from nonpower proceeds is also budgeted for 1952.

Corporate funds:						
By realization of assets:						
Sales of retired plant and construction costs recovered	1,767,878		2,280,000		904,000	
Other	1,273,498		27,000		26,000	
Total realization of assets		3,041,376		2,307,000		930,000
By income:						
Power operations	58,431,360		66,422,000		84,999,000	
Prepaid rent on Memphis steam plant	1,145,098					
Chemical operations	17,670,293		16,196,000			
Fertilizer and munitions development					19,224,000	
Reimbursable services	1,703,089		2,359,000		2,501,000	
Miscellaneous receipts from other programs	657,862		550,000		548,000	
Total income		79,607,702		85,527,000		107,272,000
Total corporate funds provided		82,649,078		87,834,000		108,202,000
Total funds provided		143,690,728		222,481,000		358,824,000

EFFECT ON BUDGETARY EXPENDITURES

Checking accounts with U. S. Treasurer: [3]						
Net increase (−) or decrease in checking account balance with U. S. Treasurer	−$13,281,583		−$51,615,046		−$197,825	
Net funds borrowed from or repaid to (−) U. S. Treasury:						
Retirement of bonds held by U. S. Treasury	−2,500,000		−5,000,000		−4,000,000	
Repayment of investment	−4,174,463		−4,000,000		−7,773,175	
Subtotal	−19,956,046		−60,615,046		−11,971,000	
Adjustment to checks issued basis	377,772					
Net expenditure or credit (−) in checking account		−$19,578,274		−$60,615,046		−$11,971,000
General and special account expenditures: Tennessee Valley Authority fund		38,773,851		164,638,865		248,568,000
Net effect on budgetary expenditures		19,195,577		104,023,819		236,597,000

[1] Changes in working capital include:

	1950 actual	1951 estimate	1952 estimate
Cash	$35,204,678	$8,832,729	$197,825
Other	−3,633,333	−5,397,729	−782,000

[2] The enacted appropriations include supplemental amounts of $11,682,500 in 1950 and $28,500,000 in 1951.

[3] In accord with the provisions of sec. 309 of Public Law 266, Tennessee Valley Authority plans during 1951 to consolidate all cash into 1 account for checking purposes.

STATEMENT B.—*Tennessee Valley Authority: Statement of income and expenses*

[Fiscal years ending June 30, 1950, 1951, and 1952]

	1950 actual		1951 estimate		1952 estimate	
NAVIGATION OPERATIONS						
Income		$57,394		$98,000		$127,000
Expenses:						
Direct expenses (schedule A–2)	$296,376		$332,000		$361,000	
Distribution of administrative and general expenses (schedule B–2)	15,467		12,000		12,000	
Allocated from reservoir management	1,185,005		1,336,000		1,129,000	
Total expenses before depreciation	1,496,848		1,680,000		1,502,000	
Depreciation on navigation facilities	587,986		594,000		600,000	
Depreciation allocated from reservoir management	769,005		802,000		847,000	
Total expenses		2,853,839		3,076,000		2,949,000
Net expense of navigation operations		2,796,445		2,978,000		2,822,000
FLOOD CONTROL OPERATIONS						
Expenses:						
Direct expenses (schedule A–2)	71,525		53,000		48,000	
Distribution of administrative and general expenses (schedule B–2)	4,051		3,000		4,000	
Allocated from reservoir management	1,186,942		1,336,000		1,129,000	
Total expenses before depreciation	1,262,518		1,392,000		1,181,000	
Depreciation on flood control facilities	266,689		300,000		300,000	
Depreciation allocated from reservoir management	802,314		844,000		890,000	
Total expense of flood control operations		2,331,521		2,536,000		2,371,000
POWER OPERATIONS (See schedule B–1)						
Income:						
Total operating revenues	56,084,237		64,652,000		83,601,000	
Total incidental income	2,347,123		1,770,000		1,398,000	
Total income before amortization (statement A)		58,431,360		66,422,000		84,999,000
Amortization of prepaid rentals on Memphis steam plant		11,928		142,000		142,000
Total income		58,443,288		66,564,000		85,141,000
Expenses:						
Direct expenses (schedule A–2)	19,615,611		29,246,000		49,242,000	
Distribution of administrative and general expenses (schedule B–2)	656,792		591,000		716,000	
Allocated from reservoir management	1,200,316		1,354,000		1,143,000	
Total expenses before depreciation	21,472,719		31,191,000		51,101,000	
Depreciation on power facilities	9,636,306		10,559,000		12,658,000	
Amortization of electric plant acquisition adjustments	200,000		200,000		200,000	
Depreciation allocated from reservoir management	1,066,052		1,118,000		1,182,000	
Total expenses		32,375,077		43,068,000		65,141,000
Net income from power operations		26,068,211		23,496,000		20,000,000
MULTIPURPOSE RESERVOIR OPERATIONS						
Income		264,015		187,000		
Expenses:						
Direct expenses (schedule A–2)	3,580,713		3,979,000			
Distribution of administrative and general expenses (schedule B–2)	255,565		234,000			
Total expenses before depreciation	3,836,278		4,213,000			
Depreciation on multiple-use facilities	2,637,371		2,764,000		(1)	
Total expenses		6,473,649		6,977,000		
Net expense of multipurpose reservoir operations before allocation		6,209,634		6,790,000		
Allocation to navigation, flood control, and power operations		−6,209,634		−6,790,000		
Net expense of multipurpose reservoir operations after allocation

Other expense	88, 958		98, 000		103, 000	
Total operating and interest expense	21, 305, 557		30, 972, 000		50, 653, 000	
Less interdivisional sales and rents (note 3)	1, 689, 946		1, 726, 000		1, 411, 000	
Total direct expenses (schedule A–2)	19, 615, 611		29, 246, 000		49, 242, 000	
Distribution of administrative and general expenses (schedule B–2)	656, 792		591, 000		716, 000	
Allocated from reservoir management	1, 200, 316		1, 354, 000		1, 143, 000	
Total expenses before depreciation	21, 472, 719		31, 191, 000		51, 101, 000	
Depreciation on power facilities	9, 636, 306		10, 559, 000		12, 658, 000	
Amortization of electric plant acquisition adjustments	200, 000		200, 000		200, 000	
Depreciation allocated from reservoir management	1, 066, 052		1, 118, 000		1, 182, 000	
Total expenses		32, 375, 077		43. 068, 000		65, 141, 000
Net income from power operations		26, 068, 211		23, 496, 000		20, 000, 000

NOTE.—In accordance with the uniform system of accounts prescribed by the Federal Power Commission, TVA's published financial statements reflect these items as follows: 1. Incidental income is deducted from the appropriate operating expense. 2. Amortization of prepaid rentals is included in operating revenues. 3. Interdivisional sales and rents are included in operating revenues. These departures are made herein for clarity of presentation for budgetary purposes.

SCHEDULE C–1.—*Tennessee Valley Authority: Repayment of investment in power program*

Repayable investment as of July 1, 1947, fixed by Government Corporations Appropriation Act, 1948, approved July 30, 1947 (61 Stat. 572)				$348,239,240
Additions to repayable investment:				
To June 30, 1950			$17,745,841	
Fiscal year 1951			28,470,994	
Fiscal year 1952			102,469,655	
Total additions				148,686,490
Total repayable investment to June 30, 1952				496,925,730
Repayments:	*Bond redemptions*	*Other*	*Total*	
Actual to June 30, 1950 [1]	$7,500,000	$14,000,000	$21,500,000	
Estimated fiscal year 1951	5,000,000	4,000,000	9,000,000	
Estimated fiscal year 1952	4,000,000	5,000,000	9,000,000	
Total repayments to June 30, 1952	16,500,000	23,000,000	39,500,000	39,500,000
Estimated repayable investment at June 30, 1952				457,425,730
Repayments required under Government Corporations Appropriation Act, 1948:				
On investment at July 1, 1947:				
6-year period ending June 30, 1958			$47,559,810	
10-year period ending June 30, 1968			87,059,810	
10-year period ending June 30, 1978			87,059,810	
10-year period ending June 30, 1988			87,059,810	
				308,739,240
On additions to repayable investment since July 1, 1947:				
40-year period ending June 30, 1990			17,745,841	
40-year period ending June 30, 1991			28,470,994	
40-year period ending June 30, 1992			102,469,655	
				148,686,490
Total repayments required June 30, 1952, to June 30, 1992				457,425,730

[1] In addition to repayments under the provisions of the Government Corporations Appropriation Act, 1948, bond redemptions of $8,572,500 and other repayments of $15,059,019 were made prior to fiscal year 1948.

Statement of proposed obligations for purchase and hire of passenger motor vehicles for the fiscal year 1952

TENNESSEE VALLEY AUTHORITY

Appropriation	Motor vehicles to be purchased		Old vehicles to be exchanged		Net cost of vehicles to be purchased	Old vehicles still to be used	Cost of hire of motor vehicles	Public purpose and users
	Number	Gross cost	Number	Allowance (estimated)				
Tennessee Valley Authority fund	200	$245,000	172	$100,000	$145,000	517	$5,000	For use of officials and employees of the Tennessee Valley Authority. All automobiles are pooled in 1 fleet and issued to individual employees when such means of transportation is most economical and advantageous to the Government. The principal users are engineers, construction foremen, timekeepers, inspectors, safety engineers, malaria control technicians, agriculturists, foresters, and administrative officers. Motor vehicles will be hired on special occasions and at field locations where the Authority does not maintain a pool of motor vehicles.

Statement of proposed obligations for purchase, maintenance, and operation of aircraft for the fiscal year 1952

Appropriation	Aircraft to be purchased		Aircraft to be exchanged		Net cost of aircraft to be purchased	Old aircraft still to be used	Cost of maintenance and operation of aircraft	Public purpose and users
	Number	Gross cost	Number	Allowance (estimated)				
Tennessee Valley Authority fund----	2	$50,000	2	$2,000	$48,000	5	$85,000	In the transaction of official business of the Tennessee Valley Authority, 1 plane will be used principally for passenger service, serving the board of directors, general manager, division heads, and other administrative personnel; 1 plane will be used mainly for photography, mapping, and reconnaissance and will be available for emergency passenger service in the absence of the passenger plane; 1 helicopter will be used for power-line patrol; and 1 helicopter and 3 planes will be used by technicians and engineers in making insecticidal and phytocidal applications for malaria control, survey, reconnaissance, inspection of construction, and malaria control projects in areas remote from transportation facilities or access roads.

CORPORATIONS—GENERAL PROVISION

SEC. 202. No part of the funds of, or available for expenditure by, any corporation or agency included in this title shall be used to pay the compensation of any employee engaged in personnel work in excess of the number that would be provided by a ratio of one such employee to one hundred and fifteen, or a part thereof, full-time, part-time, and intermittent employees of the agency concerned: *Provided*, That for purposes of this section employees shall be considered as engaged in personnel work if they spend half-time or more in personnel administration consisting of direction and administration of the personnel program; employment, placement, and separation; job evaluation and classification; employee relations and services; training; committees of expert examiners and boards of civil-service examiners; wage administration; and processing, recording, and reporting. (*Independent Offices Appropriation Act, 1951.*)

GENERAL PROVISIONS

DEPARTMENTS [AND], AGENCIES, *AND CORPORATIONS*

SEC. 1201. Unless otherwise specifically provided, the maximum amount allowable during the current fiscal year, in accordance with section 16 of the Act of August 2, 1946 (5 U. S. C. 78), for the purchase of any passenger motor vehicle (exclusive of busses, ambulances, and station wagons), is hereby fixed at $1,400.

SEC. 1202. Unless otherwise specified and during the current fiscal year, no part of any appropriation contained in this or any other Act shall be used to pay the compensation of any officer or employee of the Government of the United States (including any agency the majority of the stock of which is owned by the Government of the United States) whose post of duty is in continental United States unless such person (1) is a citizen of the United States, (2) is a person in the service of the United States on the date of enactment of this Act who, being eligible for citizenship, had filed a declaration of intention to become a citizen of the United States prior to such date, or (3) is a person who owes allegiance to the United States: *Provided*, That for the purpose of this section, an affidavit signed by any such person shall be considered prima facie evidence that the requirements of this section with respect to his status have been complied with: *Provided further*, That any person making a false affidavit shall be guilty of a felony and, upon conviction, shall be fined not more than $4,000 or imprisoned for not more than one year, or both: *Provided further*, That the above penal clause shall be in addition to, and not in substitution for, any other provisions of existing law: *Provided further*, That any payment made to any officer or employee contrary to the provisions of this section shall be recoverable in action by the Federal Government. This section shall not apply to citizens of the Republic of the Philippines or to nationals of those countries allied with the United States in the prosecution of the war.

SEC. 1203. Appropriations of the executive departments and independent establishments for the current fiscal year, available for expenses of travel or for the expenses of the activity concerned, are hereby made available for living quarters allowances in accordance with the Act of June 26, 1930 (5 U. S. C. 118a), and regulations prescribed thereunder, and cost-of-living allowances similar to those allowed under section 901 (2) of the Foreign Service Act of 1946, in accordance with and to the extent prescribed by regulations of the President, for all civilian officers and employees of the Government permanently stationed in foreign countries: *Provided*, That the availability of appropriations made to the Department of State for carrying out the provisions of the Foreign Service Act of 1946 shall not be affected hereby.

SEC. 1204. No part of any appropriation for the current fiscal year contained in this or any other Act shall be paid to any person for the filling of any position for which he or she has been nominated after the Senate has voted not to approve of the nomination of said person.

SEC. 1205. No part of any appropriation contained in this or any other Act shall be used to pay in excess of $4 per volume for the current and future volumes of the United States Code Annotated and such volumes shall be purchased on condition and with the understanding that latest published cumulative annual pocket parts issued prior to the date of purchase shall be furnished free of charge, or in excess of $4.25 per volume for the current or future volumes of the Lifetime Federal Digest.

SEC. 1206. Funds made available by this or any other Act for administrative expenses in the current fiscal year of the corporations and agencies subject to the Government Corporation Control Act, as amended (31 U. S. C. 841), shall be available, in addition to objects for which such funds are otherwise available, for [personal services and] rent in the District of Columbia; [printing and binding;] examination of budgets and estimates of appropriations in the field; services in accordance with section 15 of the Act of August 2, 1946 (5 U. S. C. 55a); and the objects specified in [the sections of] this title [under the head "Departments and agencies"], all the provisions of which shall be applicable to the expenditure of such funds unless otherwise specified in the Act by which they are made available: *Provided*, That in the event any functions budgeted as administrative expenses are subsequently transferred to or paid from other funds, the limitations on administrative expenses shall be correspondingly reduced.

SEC. 1207. No part of any funds of or available to any wholly owned Government corporation shall be used for the purchase or construction, or in making loans for the purchase or construction of any office building at the seat of government primarily for occupancy by any department or agency of the United States Government or by any corporation owned by the United States Government.

[SEC. 1208. Funds of corporations and agencies, subject to the Government Corporation Control Act, as amended, covered by the provisions of this or any other Act shall be available during the current fiscal year for payment of tort claims pursuant to law (28 U. S. C. 2672).]

SEC. [1209] *1208.* No part of any appropriation contained in this or any other Act, or of the funds available for expenditure by any corporation included in this or any other Act, shall be used to pay the salary or wages of any person who engages in a strike against the Government of the United States or who is a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or who advocates, or is a member of an organization that advocates, the overthrow of the Government of the United States by force or violence: *Provided*, That for the purposes hereof an affidavit shall be considered prima facie evidence that the person making the affidavit has not contrary to the provisions of this section engaged in a strike against the Government of the United States, is not a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or that such person does not advocate, and is not a member of an organization that advocates, the overthrow of the Government of the United States by force or violence: *Provided further*, That any person who engages in a strike against the Government of the United States or who is a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or who advocates, or who is a member of an organization that advocates, the overthrow of the Government of the United States by force or violence and accepts employment the salary or wages for which are paid from any appropriation or

fund contained in this or any other Act shall be guilty of a felony and, upon conviction, shall be fined not more than $1,000 or imprisoned for not more than one year, or both: *Provided further*, That the above penalty clause shall be in addition to, and not in substitution for, any other provisions of existing law: *Provided further*, That, as applicable to the Departments of Agriculture and Interior, nothing in this section shall be construed to require an affidavit from any person employed for less than sixty days for sudden emergency work involving the loss of human life or destruction of property, and the payment of salary or wages may be made to such persons from applicable appropriations for services rendered in such emergency without execution of the affidavit contemplated by this section.

[SEC. 1210. No funds made available by this or any other Act shall be withdrawn from one appropriation account for credit to another, or to a working fund, except as authorized by law: *Provided*, That, except as otherwise specifically provided by law, any funds so withdrawn and credited shall be available for the same purposes, and subject to the same limitations, conditions, and restrictions, as provided by the Act appropriating such funds: *Provided further*, That any such withdrawal and credit shall be made, without warrant action, by check: *Provided further*, That no funds withdrawn and credited pursuant to section 601 of the Act of June 30, 1932, as amended (47 Stat. 417; 31 U. S. C. 686), shall be available for any period beyond that provided by the Act appropriating such funds.]

[SEC. 1211. Section 3679 of the Revised Statutes, as amended (31 U. S. C. 665), is hereby further amended to read as follows:]

["SEC. 3679. (a) No officer or employee of the United States shall make or authorize an expenditure from or create or authorize an obligation under any appropriation or fund in excess of the amount available therein; nor shall any such officer or employee involve the Government in any contract or other obligation, for the payment of money for any purpose, in advance of appropriations made for such purpose, unless such contract or obligation is authorized by law.]

["(b) No officer or employee of the United States shall accept voluntary service for the United States or employ personal service in excess of that authorized by law, except in cases of emergency involving the safety of human life or the protection of property.]

["(c) (1) Except as otherwise provided in this section, all appropriations or funds available for obligation for a definite period of time shall be so apportioned as to prevent obligation or expenditure thereof in a manner which would indicate a necessity for deficiency or supplemental appropriations for such period; and all appropriations or funds not limited to a definite period of time, and all authorizations to create obligations by contract in advance of appropriations, shall be so apportioned as to achieve the most effective and economical use thereof. As used hereafter in this section, the term 'appropriation' means appropriations, funds, and authorizations to create obligations by contract in advance of appropriations.]

["(2) In apportioning any appropriation, reserves may be established to provide for contingencies, or to effect savings whenever savings are made possible by or through changes in requirements, greater efficiency of operations, or other developments subsequent to the date on which such appropriation was made available. Whenever it is determined by an officer designated in subsection (d) of this section to make apportionments and reapportionments that any amount so reserved will not be required to carry out the purposes of the appropriation concerned, he shall recommend the rescission of such amount in the manner provided in the Budget and Accounting Act, 1921, for estimates of appropriations.]

["(3) Any appropriation subject to apportionment shall be distributed by months, calendar quarters, operating seasons, or other time periods, or by activities, functions, projects, or objects, or by a combination thereof, as may be deemed appropriate by the officers designated in subsection (d) of this section to make apportionments and reapportionments. Except as otherwise specified by the officer making the apportionment, amounts so apportioned shall remain available for obligation, in accordance with the terms of the appropriation, on a cumulative basis unless reapportioned.]

["(4) Apportionments shall be reviewed at least four times each year by the officers designated in subsection (d) of this section to make apportionments and reapportionments, and such reapportionments made or such reserves established, modified, or released as may be necessary to further the effective use of the appropriation concerned, in accordance with the purposes stated in paragraph (1) of this subsection.]

["(d) (1) Any appropriation available to the legislative branch, the judiciary, or the District of Columbia, which is required to be apportioned under subsection (c) of this section, shall be apportioned or reapportioned in writing by the officer having administrative control of such appropriation. Each such appropriation shall be apportioned not later than thirty days before the beginning of the fiscal year for which the appropriation is available, or not more than thirty days after approval of the Act by which the appropriation is made available, whichever is later.]

["(2) Any appropriation available to an agency, which is required to be apportioned under subsection (c) of this section, shall be apportioned or reapportioned in writing by the Director of the Bureau of the Budget. The head of each agency to which any such appropriation is available shall submit to the Bureau of the Budget information, in such form and manner and at such time or times as the Director may prescribe, as may be required for the apportionment of such appropriation. Such information shall be submitted not later than forty days before the beginning of any fiscal year for which the appropriation is available, or not more than fifteen days after approval of the Act by which such appropriation is made available, whichever is later. The Director of the Bureau of the Budget shall apportion each such appropriation and shall notify the agency concerned of his action not later than twenty days before the beginning of the fiscal year for which the appropriation is available, or not more than thirty days after the approval of the Act by which such appropriation is made available, whichever is later. When used in this section, the term 'agency' means any executive department, agency, commission, authority, administration, board, or other independent establishment in the executive branch of the Government, including any corporation wholly or partly owned by the United States which is an instrumentality of the United States. Nothing in this subsection shall be so construed as to interfere with the initiation, operation, and administration of agricultural price support programs and no funds (other than funds for administrative expenses) available for price support, surplus removal, and available under Section 32 of the Act of August 24, 1935, as amended (7 U. S. C. 612 (c)), with respect to agricultural commodities shall be subject to apportionment pursuant to this section. The provisions of this section shall not apply to any corporation which obtains funds for making loans, other than paid in capital funds, without legal liability on the part of the United States.]

["(e) (1) No apportionment or reapportionment which, in the judgment of the officer making such apportionment or reapportionment, would indicate a necessity for a deficiency or supplemental estimate shall be made except upon a determination by such officer that such action is required because of (A) any laws enacted subsequent to the transmission to the Congress of the estimates for an appropriation which require expenditures beyond administrative control; or (B) emergencies involving the safety of human life, the protection of property, or the immediate welfare of individuals in cases where an appropriation has been made to enable the United States to make payment of, or contributions toward, sums which are required to be paid to individuals either in specific amounts fixed by law or in accordance with formulae prescribed by law.]

["(2) In each case of an apportionment or a reapportionment which, in the judgment of the officer making such apportionment or reapportionment, would indicate a necessity for a deficiency or supplemental estimate, such officer shall immediately submit a detailed report of the facts of the case to the Congress. In transmitting any deficiency or supplemental estimates required on account of any such apportionment or reapportionment, reference shall be made to such report.]

["(f) (1) The officers designated in subsection (d) of this section to make apportionments and reapportionments may exempt from apportionments trust funds and working funds expenditures from which have no significant effect on the financial operations of the Government, working capital and revolving funds established for intragovernmental operations, receipts from industrial and power operations available under law and any appropriation made specifically for—]

["(1) interest on, or retirement of, the public debt;]

["(2) payment of claims, judgments, refunds, and draw-backs;]

["(3) any item determined by the President to be of a confidential nature;]

["(4) payment under private relief Acts or other laws requiring payments to designated payees in the total amount of such appropriation;]

["(5) grants to the States under title I, IV, or X of the Social Security Act, or under any other public assistance title in such Act.]

["(2) The provisions of subsection (c) of this section shall not apply to appropriations to the Senate or House of Representatives or to any Member, committee, Office (including the office of the Architect of the Capitol), officer, or employee thereof.]

["(g) Any appropriation which is apportioned or reapportioned pursuant to this section may be divided and subdivided administratively within the limits of such apportionments or reapportionments. The officer having administrative control of any such appropriation available to the legislative branch, the judiciary, or the District of Columbia, and the head of each agency, subject to the approval of the Director of the Bureau of the Budget, shall prescribe, by regulation, a system of administrative control (not inconsistent with any accounting procedures prescribed by or pursuant to law) which shall be designed to (A) restrict obligations or expenditures against each appropriation to the amount of apportionments or reapportionments

DEPARTMENTS [AND], AGENCIES, *AND CORPORATIONS*—Continued

made for each such appropriation, and (B) enable such officer or agency head to fix responsibility for the creation of any obligation or the making of any expenditure in excess of an apportionment or reapportionment.]

["(h) No officer or employee of the United States shall authorize or create any obligation or make any expenditure (A) in excess of an apportionment or reapportionment, or (B) in excess of the amount permitted by regulations prescribed pursuant to subsection (g) of this section.]

["(i) (1) In addition to any penalty or liability under other law, any officer or employee of the United States who shall violate subsection (a), (b), or (h) of this section shall be subjected to appropriate administrative discipline, including, when circumstances warrant, suspension from duty without pay or removal from office; and any officer or employee of the United States who shall knowingly and willfully violate subsection (a), (b), or (h) of this section shall, upon conviction, be fined not more than $5,000 or imprisoned for not more than two years, or both.]

["(2) In the case of a violation of subsection (a), (b), or (h) of this section by an officer or employee of an agency, or of the District of Columbia, the head of the agency concerned or the Commissioners of the District of Columbia, shall immediately report to the President, through the Director of the Bureau of the Budget, and to the Congress all pertinent facts together with a statement of the action taken thereon."]

[SEC. 1212. No part of the funds of, or available for expenditure by any corporation or agency included in this Act, including the government of the District of Columbia, shall be available to pay for annual leave accumulated by any civilian officer or employee during the calendar year 1950 and unused at the close of business on June 30, 1951: *Provided*, That this section shall not apply to officers and employees whose post of duty is outside the continental United States: *And provided further*, That this section shall not apply with respect to the payment of compensation for accumulated annual leave in the case of officers or employees who leave their civilian positions for the purpose of entering upon active military or naval service in the Armed Forces of the United States.]

[SEC. 1213. Notwithstanding the provisions of section 6 of the Act of August 24, 1912 (37 Stat. 555), or the provisions of any other law, the Secretary of State may, in his absolute discretion, during the current fiscal year, terminate the employment of any officer or employee of the Department of State or of the Foreign Service of the United States whenever he shall deem such termination necessary or advisable in the interests of the United States.]

[Notwithstanding the provisions of section 6 of the Act of August 24, 1912 (37 Stat. 555), or the provisions of any other law, the Secretary of Commerce may, in his absolute discretion, during the current fiscal year, terminate the employment of any officer or employee of the Department of Commerce whenever he shall deem such termination necessary or advisable in the best interests of the United States.]

[SEC. 1214. Appropriations, reappropriations, contract authorizations and reauthorizations made by this Act for departments and agencies in the executive branch of the government shall, without impairing national defense, be reduced in the amount of not less than $550,000,000 through the apportionment procedure provided for in Section 1211 of this Act.]

SEC. [1215] *1209*. No payment shall be made from appropriations in this Act to any officer on the retired lists of the Regular Army, Regular Navy, Regular Marine Corps, Regular Air Force, Regular Coast Guard, Coast and Geodetic Survey, and Public Health Service for a period of two years after retirement who for himself or for others is engaged in the selling of or contracting for the sale of or negotiating for the sale of to any agency of the Department of Defense, the Coast Guard, the Coast and Geodetic Survey, and the Public Health Service any supplies or war materials. (*General Appropriation Act, 1951.*)

[SEC. 1302. After September 1, 1950, and during the fiscal year 1951:]

[(a) In making appointments in the Government service the Civil Service Commission shall make full use of its authority to make temporary appointments in order to prevent increases in the number of permanent personnel and no employee in the Federal civil service promoted, transferred or appointed to a position of higher grade shall be eligible, in the event of separation from the service through reduction in force, to reinstatement at a grade above the grade held by such employee on September 1, 1950; and all reinstatements, transfers or promotions to positions in the Federal civil service shall be temporary and for positions subject to the Classification Act of 1949 shall be made with the condition and notice to the individual reinstated, transferred or promoted that the classification grade of the position is subject to post-audit and correction by the appropriate departmental or agency personnel office or the Civil Service Commission:]

[(b) The names of all persons to be terminated under reductions in force in the departments and agencies of the Government shall be certified as eligible for appointment to positions in agency programs determined by the President to be related directly to national defense, if qualified, at not to exceed the grade and salary last held in the terminating agency or department; and]

[(c) The Department of Defense is authorized to call on other departments or agencies for such additional personnel as it may require within the limits of its funds.]

[SEC. 1303. When determined by the President to be necessary, the provisions of subsection (c) of section 3679 of the Revised Statutes, as amended by section 1211 of the General Appropriation Act, 1951, shall not apply, during the current fiscal year, to any appropriations, funds, or contract authorizations, available to the executive departments for carrying out the provisions of the Act of August 9, 1950 (Public Law 679); and for the purposes of said Act of August 9, 1950, the Secretary of the Treasury may, during the current fiscal year, transfer such amounts as may be necessary (not to exceed $10,000,000) from appropriations to the Coast Guard for "Operating expenses", fiscal year 1951, to appropriations to the Coast Guard for "Acquisition, construction, and improvements", and the limitation on number of aircraft on hand at one time, provided in the General Appropriation Act, 1951, shall not apply with respect to said Act of August 9, 1950.]

[SEC. 1304. During any period in which the Armed Forces of the United States are actively engaged in hostilities while carrying out any decision of the Security Council of the United Nations, no economic or financial assistance shall be provided, out of any funds appropriated to carry out the purposes of the Economic Cooperation Act of 1948, as amended, or any other act to provide economic or financial assistance (other than military assistance) to foreign countries, to any country whose trade with the Union of Soviet Socialist Republics or any of its satellite countries (including Communist China and Communist North Korea) is found by the National Security Council to be contrary to the security interests of the United States.] (*Supplemental Appropriation Act, 1951.*)

SEC. [1102] *1210*. Appropriations and funds made available by this or any other Act for salaries, wages, or compensation, for the *current* fiscal year [1951], shall also be available for payment of any tax with respect thereto which is imposed on any department, agency, corporation, or other instrumentality of the United States, as an employer, by the provisions of the Social Security Act Amendments of 1950. (*Second Supplemental Appropriation Act, 1951.*)

PROPOSED FOR LATER TRANSMISSION

Civil defense.—The budget includes supplemental appropriations of $80 million in 1951 and $450 million in 1952 under existing legislation for a national program of civil defense which, through organized efforts of the civilian population, is designed to minimize the effects of enemy action directed against the United States and its Territories, and in the event of such attack to maintain or restore those facilities and services which are essential to civil life.

Annuities under special acts, Civil Service Commission.—The act authorizing benefit payments to widows of former Lighthouse Service employees became effective September 1, 1950, and a supplemental appropriation of $219,500 will be required for benefit payments during 1951.

Salaries and expenses, Civil Service Commission.—A supplemental appropriation of $500,000 will be submitted for 1951 to carry out investigations of new appointees to the Federal service as required under provisions of the President's loyalty program.

National Science Foundation, salaries and expenses.—A supplemental appropriation estimate, currently estimated at $10 million, to provide the funds for the Foundation's

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

operations in 1952 will be transmitted later in fiscal year 1951, after the Foundation has had an opportunity to develop plans for its 1952 programs in scientific research and training.

Extension of Selective Service program.—The present Selective Service Act expires on July 9, 1951. New legislation will be necessary for the continued induction of men into the Armed Forces in order to realize the military strength assumed by the Department of Defense. To provide the necessary funds for a selective service program, a supplemental appropriation estimate of $50 million is forecast for the fiscal year 1952.

Air Force, Army, and Navy pensions, Veterans Administration.—Additional funds in the amount of $42,456,348 will be required in 1951 to cover uncontrollable compensation workloads now anticipated.

National service life insurance, Veterans Administration.—An additional requirement for 1951 of $44,270,000 is expected to result from gratuitous insurance claims originating in the Philippines.

Payment on the purchase of automobiles and other conveyances for disabled veterans.—An amount of $800,000 will be required for 1951 to meet the cost of benefits provided by Public Law 798, Eighty-first Congress, which authorizes the Administrator of Veterans Affairs to pay not to exceed $1,600 toward the purchase of an automobile or other conveyance for certain disabled veterans.

Export-Import Bank.—Authorization to increase the lending authority of the Export-Import Bank by $1 billion is included in this budget for 1952 under proposed legislation. The present uncommitted lending authority of the Bank is about $500 million. The increase will permit the Bank to embark on an expanded program of developmental loans, particularly to increase the output of strategic and critical materials in the underdeveloped areas of the world.

Unobligated balance, estimated savings	−2,307		
Total obligations	435,600	448,200	480,000

PROGRAM AND PERFORMANCE

This is a private residential institution created by act of Congress in 1857 and composed of two schools for the education of the deaf and a normal training department.

1. *Instruction and administration.*—Two schools are centrally administered as integral parts of the institution.

Kendall School provides public elementary and secondary education for 94 students, including 53 from the District of Columbia. The remainder, some of preschool age, pay a portion of the cost of their education.

Gallaudet College has a present enrollment of 225 students, 145 of whom are provided with Federal scholarships. Nonscholarship students pay a portion of their cost. The normal training department trains hearing college graduates to become teachers of the deaf.

2. *Auxiliary services and plant expenses.*—Practically all students are housed and fed on the campus. Operation of auxiliary services and maintenance of the physical plant are provided under this activity.

OBLIGATIONS BY ACTIVITIES

PROGRAM AND PERFORMANCE

The Food, Drug, and Cosmetic Act and other laws enforced by the Food and Drug Administration are designed for consumer protection against adulteration and misbranding of foods, drugs, cosmetics, therapeutic devices, and caustic poisons. Control is exercised through factory inspections and examinations of articles entering interstate commerce or offered for importation.

1. *General enforcement operations.*—This includes all enforcement operations.

Inspection of domestic plants are planned on the basis of importance of the industry to the consuming public and the seriousness of probable violations of the acts. Where violation is indicated, samples are collected from interstate commerce for laboratory examination as evidence for legal action. The facts are reported to the Department of Justice with appropriate recommendations for seizure or court action. Informal warnings are given by inspectors during factory inspections. As a result, many corrections of violations are effected without resort to court action. By collaboration with industry, voluntary compliance with the law is promoted. During the fiscal year 1950, 8,714 of the approximately 77,350 manufacturers, shippers, and warehouses subject to regulation were inspected. In 1951, approximately 9,500 establishments will be inspected and 10,000 in 1952. Other significant domestic workloads are as follows:

	1950 actual	1951 estimate	1952 estimate
Number of separate inspections	14,115	15,000	15,700
Samples collected	29,200	32,000	32,000
Laboratory examinations	33,624	36,750	36,750

Annually approximately 177,500 import shipments of commodities subject to the act are offered for entry into the country. In 1950, approximately 26 percent of the shipments were inspected, of which about 16 percent were denied entry. This involved the collection of about 15,500 samples and 76,900 examinations. A slightly higher level of inspections will be maintained in 1952 with the same staff.

Standards of identity, quality, and fill of container and tolerances for poisonous substances in foods are promulgated after investigations and formal hearings. Work on 12 classes of food and 29 insecticidal substances is now in progress and will be continued in 1952.

The estimate for 1952 for the foregoing provides for a slight increase in travel requirements.

Public Law 459, approved March 16, 1950, requires inspection of oleomargarine manufacturing plants, producers of raw materials for use in the manufacture of oleomargarine, and public eating places serving oleomargarine. Each of the approximately 60 manufacturers of oleomargarine will be inspected annually. Approximately 25 percent of the 650 oil mills and oil refineries will be inspected, and the necessary work will be done on the fraudulent distribution of colored oleomargarine. Approximately 25,000 of the estimated 525,000 eating places will be inspected.

2. *General administration.*—Executive direction and administrative and housekeeping services are provided.

use in foods, drugs, and cosmetics; and inspects seafood-packing establishments upon application by the packers. These services are wholly supported by fees charged against advance deposits, which are appropriated annually to cover the service costs or refunds of unearned deposits. In the fiscal year 1950, 17,731 samples of antibiotics, 332 of insulin, and 4,465 coal-tar colors were tested. These are estimated at 21,300, 330, and 4,470, respectively, for 1951 and 1952.

During 1950, 18 packers subscribed to the seafood inspection service and 16 for 1951, with a like number estimated for 1952.

PROGRAM AND PERFORMANCE

Freedmen's Hospital consists of 347 general beds, 51 bassinets, 135 tuberculosis beds, and an out-patient department. In addition to furnishing patient care, it operates a training program for physicians at the undergraduate levels, for nurses and other professional and technical personnel, and is affiliated with Howard University as the teaching hospital for the university's medical school.

Federal appropriations for operation of the hospital are augmented by receipts from pay patients. Also, the District of Columbia reimburses the Federal Government for the care of indigent residents of the District.

1. *Maintenance and operation, in-patient services.*—Hospital patient loads will continue in 1952 at approximately current levels.

Average daily patient load	1950 actual	1951 estimate	1952 estimate

PROGRAM AND PERFORMANCE

Howard University, primarily for the education of Negroes, operates an undergraduate college, a graduate school offering the master's degree, and eight professional schools. Federal funds provide approximately 51 percent of operating costs. During the school year 1949–50, 5,789 students studied at the university, representing 40 States, the District of Columbia, and 19 foreign countries. A full-time enrollment objective of 5,206 is planned for the university, and it is this figure on which the master plan is based and for which new buildings are now being constructed.

1. *General administration.*—The university is centrally administered by a private board of trustees and a paid staff at the campus.

2. *Resident instruction and departmental research.*—Projected plans call for improving the quality of both instructional and research activities at the university while at the same time scaling down enrollments to the goal of 5,206. Increases for this purpose are included in the 1952 estimate but, as in 1951, are limited to the medical and dental fields.

3. *General library.*—The general library of the university serves all 10 schools and supervises, in part, the specialized libraries on the campus. Its total collection of books in 1949–50 was 267,088 volumes. This collection is being increased by about 8,000 volumes per year toward an objective of approximately 400,000.

4. *Operation and maintenance of the physical plant.*—The operation and maintenance staff services over 40 permanent and temporary buildings and approximately 49 acres of grounds.

5. *Auxiliary enterprises and noneducational expenses.*—These enterprises include the dormitories, dining halls, cafeteria, and bookstores. They are intended to be self-supporting and are designed to provide services at the lowest possible cost.

PROGRAM AND PERFORMANCE

On the master development plan, basic data and major studies are complete, although organization of information into final form is yet to be completed. Of the 10 projects presently authorized, plans and specifications are completed on 2 projects and construction is underway; plans for the remaining 8 projects are in various stages of completion ranging from 20 percent to 90 percent. Funds for an eleventh project, a pharmacy building, are included in the 1952 estimate.

OBLIGATIONS BY ACTIVITIES

Total obligations	2,767,315	1,669,152	4,338,547

PROGRAM AND PERFORMANCE

Appropriated funds or contract authorizations have been made available for 8 building and 2 alteration projects. The estimate for 1952 reflects the general policy to permit the continuation of projects only to the extent required to protect existing investment and to meet defense and essential civilian needs. Of the 10 presently authorized projects, 3 are now under construction and will be completed by January 1952; construction of 1 will start during fiscal year 1951; and 1 in 1952. Educational program conditions may delay one alteration project until 1954. The other four projects, for which construction was scheduled to start in 1952, are subject to clearance before construction is begun. The 1952 budget requests funds for an eleventh project, a pharmacy building, and funds to liquidate prior contract authority.

PROGRAM AND PERFORMANCE

Grants are made to the States, Hawaii, Puerto Rico, and the Virgin Islands for training in agriculture, home economics, trades and industry, and distributive occupations, and for training teachers of these subjects. During the 1949–50 school year, more than 3,000,000 students received vocational instruction under the program. The 1952 budget includes funds to extend the program to the Virgin Islands in accordance with Public Law 462, Eighty-first Congress, and $10,000,000 is specifically earmarked for training in shortage skills for defense production.

OBLIGATIONS BY ACTIVITIES

Description	1950 actual	1951 estimate	1952 estimate
1. Grants to States (George-Barden Act)	$19,167,243	$19,707,760	$9,842,760
2. Grants to Hawaii	30,000	30,000	30,000
3. Grants to Puerto Rico	99,745	105,000	105,000
4. Grants to the Virgin Islands		33,000	40,000
5. Defense training			10,000,000
Total obligations	19,296,988	19,875,760	20,017,760

OBLIGATIONS BY OBJECTS

11 Grants, subsidies, and contributions—1950, $19,296,988; 1951, $19,875,760; 1952, $20,017,760.

Further Endowment of Colleges of Agriculture and the Mechanic Arts, Office of Education—

Further endowment of colleges of agriculture and the mechanic arts: For carrying out the provisions of section 22 of the Act of June 29, 1935 (7 U. S. C. 329), $2,480,000. *(Federal Security Agency Appropriation Act, 1951.)*

Appropriated 1951, **$2,480,000** Estimate 1952, **$2,480,000**

FUNDS AVAILABLE FOR OBLIGATION

Appropriation or estimate—1950, $2,480,000; 1951, $2,480,000; 1952; $2,480,000.

PROGRAM AND PERFORMANCE

This appropriation, additional to the $2,550,000 permanent appropriation for the same purpose, is distributed to the 69 land-grant colleges for the encouragement of college training in agriculture and subjects useful in industry. Each State receives a minimum of $20,000, and the balance is distributed on a basis of population.

OBLIGATIONS BY ACTIVITIES

Grants to States—1950, $2,480,000; 1951, $2,480,000; 1952, $2,480,000.

OBLIGATIONS BY OBJECTS

11 Grants, subsidies, and contributions—1950, $2,480,000; 1951, $2,480,000; 1952, $2,480,000.

Salaries and Expenses, Office of Education—

Salaries and expenses: For expenses necessary for the Office of Education, including surveys, studies, investigations, and reports regarding libraries; fostering coordination of public and school library service; coordination of library service on the national level with other forms of adult education; developing library participation in Federal projects; fostering Nation-wide coordination of research materials among libraries, interstate library coordination and the development of library service throughout the country; [personal services in the District of Columbia;] purchase, distribution, and exchange of educational documents, motion-picture films, and lantern slides; collection, exchange, and cataloging of educational apparatus and appliances, articles of school furniture and models of school buildings illustrative of foreign and domestic systems and methods of education, and repairing the same; [$1,971,500, of which not less than $533,700 shall be available for the Division of Vocational Education as authorized] *$3,550,000: Provided,* That all receipts from non-Federal agencies representing reimbursement for expenses of travel of employees of the Office of Education performing advisory functions to said agencies shall be deposited in the Treasury of the United States to the credit of this appropriation.

PROGRAM AND PERFORMANCE

1. *Development of vocational education.*—Studies and investigations are made in cooperation with the States, and assistance is given in the appraisal and development of their programs. State plans are reviewed, and funds are allocated in accordance with provisions of acts authorizing grants for vocational education.

2. *School assistance in federally affected areas.*—Applications for assistance under Public Laws 815 and 874, Eighty-first Congress, are processed. These laws authorize financial aid to areas where school facilities are overburdened by Federal activities concentrated in their vicinity. Public Law 815 provides grants for school construction, and Public Law 874 provides grants for school operation expenses. Applications for grants are analyzed to determine eligibility, priority, and amounts to be granted. Review of construction plans and supervision of construction is carried on in cooperation with the Community Facilities Service, Housing and Home Finance Agency.

3. *Services to State school systems.*—Studies are conducted and publications issued on school organization, transportation, legislation, finance, housing, and general administration of schools and school systems. Consultative and advisory services are provided State, local, and professional bodies concerned with school administration.

4. *Services to elementary and secondary schools.*—Studies are made and publications issued on organization, supervision, teacher training, and instructional problems and practices. Consultative and advisory services are provided and cooperative professional relationships maintained with Federal, State, and professional bodies in the interest of elementary and secondary education.

5. *Services to higher education institutions.*—Studies for the purpose of developing programs for the improvement of higher education are stimulated and carried forward. Information regarding higher education is collected and disseminated. Consultative and advisory services are provided and cooperative relationships with Federal, State, and local agencies dealing with higher education are maintained.

6. *Auxiliary educational services.*—Statistical and reports analysis services are developed and maintained. Studies and research on school and college libraries, visual education, educational uses of radio, and related subjects are carried out, and publications issued thereon. Information, publications, consultative and advisory services are provided to, and cooperative relationships are maintained with, professional organizations.

7. *International educational activities.*—Studies are made of the educational systems of other countries and publications issued thereon. Credentials of foreign students desiring to study in the United States are evaluated on request. Procedures to be followed in the international exchange of educational personnel are established. A foreign student exchange program is administered in cooperation with the Department of State.

8. *Administration.*—General administrative direction of the Office is provided through the Office of the Commissioner and the Office of the Executive Assistant. For 1952 some additional funds are requested to cover supervision of the two new programs for federally overburdened areas under Public Laws 815 and 874, Eighty-first Congress.

PAYMENTS TO SCHOOL DISTRICTS

Maintenance and Operation of Schools, Office of Education—

For payments to local educational agencies for the maintenance and operation of schools as authorized by [law, $23,000,000: *Provided*, That this paragraph shall be effective only upon enactment into law of H. R. 7940, Eighty-first Congress] *the Act of September 30, 1950 (Public Law 874), $28,000,000. (Supplemental Appropriation Act, 1951.)*

Appropriated 1951, **$23,000,000** Estimate 1952, **$28,000,000**

FUNDS AVAILABLE FOR OBLIGATION

Appropriation or estimate—1951, $23,000,000; 1952, $28,000,000.

PROGRAM AND PERFORMANCE

This appropriation provides payments for operating expenses of schools in districts overburdened by Federal activities in their vicinity. This financial assistance was authorized by Public Law 874, Eighty-first Congress.

OBLIGATIONS BY ACTIVITIES

Grants to local educational agencies—1951, $23,000,000; 1952, $28,000,000.

OBLIGATIONS BY OBJECTS

11 Grants, subsidies, and contributions—1951, $23,000,000; 1952, $28,000,000.

GRANTS FOR [SURVEYS AND] SCHOOL CONSTRUCTION

Grants to States, Surveys and School Construction, Office of Education—

For grants [to the States for surveying their needs, and for planning construction programs, for elementary and secondary school facilities; and for grants] for emergency school construction to school districts in federally affected areas[, $24,500,000] *as authorized by the Act of September 23, 1950 (Public Law 815)*, to remain available until expended, [and in addition contracts may be entered into in an amount not to exceed $25,000,000 for the purposes of this paragraph: *Provided*, That this paragraph shall be effective only upon enactment into law of S. 2317, Eighty-first Congress] *$75,000,000, of which $25,000,000 is for payment of obligations incurred under authority provided under this head in the Supplemental Appropriation Act, 1951: Provided, That no portion of this appropriation shall be available for reimbursement payments under section 205 (c) (1) of such Act with respect to school facilities completed before July 1, 1951: Provided further, That, in determining relative urgency of need for purposes of prescribing, under section 206(d) of such Act, the order in which certifications for payments from this appropriation shall be made (other than payments in liquidation of contractual obligations incurred prior to July 1, 1951), the Commissioner shall give special consideration to the extent to which the school facilities are needed in the interests of national defense. (Supplemental Appropriation Act, 1951.)*

OFFICE OF VOCATIONAL REHABILITATION

Payments to States (Including Alaska, Hawaii, and Puerto Rico), Office of Vocational Rehabilitation, Federal Security Agency—

Payments to States (including Alaska, Hawaii, and Puerto Rico): For payments to States (including Alaska, Hawaii, and Puerto Rico) in accordance with the Vocational Rehabilitation Act, as amended (29 U. S. C. ch. 4), including payments, in accordance with regulations of the Administrator, for one-half of necessary expenditures for the acquisition of vending stands or other equipment in accordance with section 3 (a) (3) (C) of said Act for the use of blind persons, such stands or other equipment to be controlled by the State agency, [$20,600,000] *$23,000,000,* of which (*1*) not to exceed [$170,000] *$175,000* shall be available to the Federal Security Administrator for providing rehabilitation services to disabled residents of the District of Columbia, as authorized by section 6 of said Act, which latter amount shall be available for administrative expenses in connection with providing such services in the District of Columbia[, printing and binding, including the purchase of reprints, and travel] *and (2) not to exceed $9,400,000 shall be available for guidance and placement of disabled individuals*: *Provided,* That not to exceed 15 per centum of the appropriation shall be used for administrative purposes.

Payments to States (including Alaska, Hawaii, and Puerto Rico), next succeeding fiscal year: For making, after May 31 of the current fiscal year, payments to States in accordance with the Vocational Rehabilitation Act, as amended (including the objects specified in the preceding paragraph), for the first quarter of the next succeeding fiscal year such sums as may be necessary, the obligations incurred and the expenditures made thereunder to be charged to the appropriation therefor for that fiscal year: *Provided,* That the payments made pursuant to this paragraph shall not exceed the amount paid to the States for the first quarter of the current fiscal year. (*Federal Security Agency Appropriation Act, 1951.*)

Appropriated 1951, **$20,600,000** Estimate 1952, **$23,000,000**

Total obligations	20,856,883	20,861,194	23,302,293

PROGRAM AND PERFORMANCE

Grants to States are made to prepare physically or mentally disabled persons whose disability constitutes an employment handicap for suitable remunerative employment. Almost 60,000 persons were rehabilitated in 1950. Their weekly earnings at the time the cases were closed as rehabilitated averaged about $35 and were six times as high as the weekly average at the start of their rehabilitation. The 1952 estimate provides for an increase of $2,400,000 over 1951 which will enable the States to expand services to the more severely handicapped.

1. *Purchase of case services.*—States are reimbursed for 50 percent of the costs of the purchase of case services for disabled clients, including medical examinations, surgical and therapeutic treatment, hospitalization, prosthetic appliances, transportation, occupational tools and licenses, vocational training, and maintenance. The $12,000,000 provided for this function for 1952 will enable the States to purchase such services for about 117,500 disabled persons, or 23,800 more than in 1951. The estimate also provides $9,330 for 100 percent reimbursement to the States for similar services when provided for war-disabled civilians of World War II.

2. *Counseling, guidance, and placement services.*—Grants are made to the States for 100 percent of the cost of such services. The State vocational rehabilitation agencies will provide these services to about 239,000 disabled clients in 1952, as compared with 229,000 in 1951.

3. *State administration.*—Grants to States cover 100 percent of the administrative expenses of the 87 State vocational rehabilitation agencies.

Total obligations	696,055	705,000	705,000

PROGRAM AND PERFORMANCE

1. *Prescribe rehabilitation standards.*—Standards for the safe and effective provision of services to clients by the State rehabilitation agencies are developed in consultation with the States, and with many professional agencies and persons including the 24 national health, welfare, labor, educational, and medical organizations with which formal agreements exist. Special studies and case surveys of the operations of the State agencies are used to evaluate and to obtain adherence to these standards.

2. *Prescribe fiscal and management controls and standards for State operations.*—Policies, standards, and procedures are developed with respect to making grants to the States, controlling and safeguarding funds, and with respect to organizational, administrative, and operating problems of the 87 State agencies. Spot surveys and a review of budgets and of financial and other performance reports are used to examine and to secure conformity to these standards.

3. *Prepare and distribute informational material and assist States in developing informational programs.*—Materials to promote public understanding of the program are provided and assistance is given to States to develop and improve their information services; liaison is maintained with news media and cooperating organizations.

4. *Administration.*—This activity includes the functions of the Director's office and the personnel and business management functions and services.

PROGRAM AND PERFORMANCE

The number of reported cases of syphilis has declined from a high of 604,120 in 1943 to the estimated figure of 247,792 in 1950. The program serves two major purposes: (1) to assist States and localities in their programs of case finding and treatment; (2) to refine existing treatment techniques and to assist in the standardization of diagnostic methods and tests. Increasing emphasis is being placed on the control of venereal disease around military stations and industrial areas.

1. *Grants to States for general venereal disease control, case finding, and treatment.*—The estimated reduction in a large measure reflects declining incidence and partial conversion from in-patient to out-patient treatment made feasible by improved penicillin therapy schedules. It is expected that the downward trend in morbidity can be maintained by concentrating funds for case finding and treatment in population groups of highest incidence and in areas where unusual problems of control are encountered.

2. *Direct operations—(a) Clinical and laboratory research.*—Present research is directed toward developing immunizing agents against venereal diseases, standardizing laboratory diagnostic practices, and determining the most effective methods of treatment of all forms of venereal diseases.

(*b*) *Technical assistance to States.*—Assistance is rendered to the States and localities through technical consultation furnished upon request; by assignment of consultants to State or local health departments; by the development of cooperative techniques of case finding and treatment through field studies and demonstrations; and by the preparation of scientific information, training aids, and educational media and their dissemination to State and local agencies. The 1951 and 1952 estimates include increases for case-finding and out-patient treatment studies.

(*c*) *Administration.*—This activity provides for program direction and administrative services.

PROGRAM AND PERFORMANCE

The tuberculosis control program has two major purposes: (1) to assist States and localities in case finding, diagnosis, and in placing cases under local medical supervision; and (2) to develop and evaluate improved methods of detection, diagnosis, treatment, and immunization.

1. *Grants to States for tuberculosis control activities.*—Tuberculosis grants are made to the States to assist them in planning and administering specific control measures, including training of professional workers, case finding, case follow-up, clinic operation, and administrative research.

2. *Direct operations*—(*a*) *Cooperative applied research.*—In cooperation with States, medical schools, private investigators, and others, studies are conducted in the epidemiology, diagnosis, prognosis, immunology, and therapy of tuberculosis. Related studies are made in chest X-ray interpretation and in the development and application of radiological equipment.

(*b*) *Technical assistance to States.*—Assistance is provided through consultative services, demonstrations, community-wide X-ray case-finding surveys in large metropolitan areas, and in the follow-up of cases after mass X-ray surveys.

(*c*) *Administration.*—This activity provides for program direction and administrative services.

PROGRAM AND PERFORMANCE

The basic purpose of this appropriation is to assist States in meeting the need for local health services as well as to provide financial support for State health services of a general character.

1. *Grants to States for general health.*—These grants are made to assist States in supporting local health services and providing basic health services at the State level, such as public health nursing, laboratory services, vital statistics, sanitary engineering, control of communicable diseases and other generalized services.

2. *Direct operations*—(*a*) *Technical assistance to States.*—Such assistance consists of: (1) Consultative services to States for local and general health services, and review and analysis of State plans, programs, and budgets; (2) sanitation and other general training of State and local public health personnel, assistance to States in establishing training programs, and in-service training for Public Health Service officers in local health units; and (3) studies of and demonstrations in the field of chronic diseases.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

(*b*) *Collection, analysis, and dissemination of vital statistics.*—Statistical data are collected, analyzed, and disseminated on births, deaths, stillbirths, illnesses, marriages, and divorces.

(*c*) *Administration.*—This activity provides for program direction and administrative services.

OBLIGATIONS BY ACTIVITIES

Control of Communicable Diseases, Public Health Service—

Communicable diseases: To carry out, *except as otherwise provided for*, those provisions of sections 301, 311, 361, and 704 of the Act relating to the prevention and suppression of communicable *and preventable* diseases, and the interstate transmission and spread thereof, including *the purchase, erection, and maintenance of portable buildings;* the purchase of not to exceed [twenty] *thirty* passenger motor vehicles *and two aircraft* for replacement only; and hire, maintenance, and operation of aircraft; [$6,415,000] *$6,050,000.* (*Federal Security Agency Appropriation Act, 1951.*)

Appropriated 1951, **$6,415,000** Estimate 1952, [a] **$6,050,000**
Appropriated (adjusted) 1951, **$6,465,000**

[a] Includes $46,550 for activities previously carried under "Operating expenses, National Heart Institute, Public Health Service." The amounts obligated in 1950 and 1951 are shown in the schedule as comparative transfers.

Total obligations	7,335,627	6,300,600	6,090,000

PROGRAM AND PERFORMANCE

This program provides for laboratory and field investigations, control operations, and training facilities which supplement and support the activities of State and local health departments in the control of communicable diseases, other than venereal diseases and tuberculosis.

1. *General disease-prevention and control activities.*—These consist of epidemiology, laboratory technological services, general veterinary public health activities, technical vector control, training and production of training materials, and general operational functions. The proposed increases are primarily for epidemiological studies in fungal and streptococcal diseases and evaluation of current communicable disease control practices of State and local health departments; improving the diagnostic methods and performance of State, local, and other nonprofit laboratories; and toxicological studies of health hazards involved in the use of new insecticides and other commercial poisons, preliminary studies in airborne diseases and encephalitis mosquito investigations on irrigation projects.

2. *Specific disease-prevention and control activities.*—The specific diseases are diarrheal diseases, malaria, typhus fever, poliomyelitis, encephalitis, plague and other rat-borne diseases, "Q" fever, and leprosy. As a result of the sharp declines in the malaria mortality rate, the malaria control program is being further reduced and the long-term malaria surveillance program is being established. The estimate also reflects some decrease in typhus fever control. Some increase in studies on poliomyelitis is planned.

3. *General epidemic and disaster aid.*—A small emergency fund is utilized to supplement State and local facilities in connection with serious outbreaks of disease.

4. *Administration.*—The estimated reduction for program direction and administrative services reflects the transfer of the cost of certain leases to the General Services Administration.

OBLIGATIONS BY ACTIVITIES

"Salaries and expenses, water pollution control, Public Health Service"	$1,750		
Total reimbursable obligations	3,550		
Total obligations	3,068,844	$3,670,030	$3,800,000

PROGRAM AND PERFORMANCE

The Service supplements and supports the activities of States and localities in promoting and preserving the public health through control of the basic essentials of individual and community life—air, water, food, and shelter.

1. *Water pollution control.*—The heaviest and most essential part of the work planned calls for developing 260 comprehensive river basin programs for reducing water pollution. Seventy-five will be completed in 1951 and 185 in 1952. Based on these technical reports, 105 simplified consolidated reports will be addressed to laymen—35 in 1951, 35 in 1952, the remainder later. The estimate reflects the transfer of the cost of certain leases to the General Services Administration.

2. *Radiological health services.*—This activity provides for the collection, analysis, and dissemination of information relative to the hazards of handling, using, and disposing of radioactive substances and the training of personnel competent to render advisory services to Federal, State, and local authorities in radiological health problems. Increases in funds are proposed for the expansion of the training program and for research in radioactive wastes.

3. *Milk and food sanitation and other general sanitation activities.*—This activity provides for technical assistance to States and investigations in sanitation of water, milk, shellfish, and other foods and in home accident prevention.

4. *Sanitation of interstate land, water, and air carriers.*—Under the interstate quarantine regulations, food and water placed aboard carriers must be safe, food-handling equipment and practices must be adequate to prevent contamination, and rest room facilities must be properly designed and maintained. Compliance is obtained through inspections, sanitation guides, and standards, and review of plans prior to construction. The estimate is based on approximately 5,800 inspections.

5. *Industrial hygiene.*—Technical and consultative services are furnished to States, local authorities, and industry, including assistance in establishing, conducting, and improving industrial hygiene services and in making atmospheric pollution studies. Research and investigations are undertaken in the evaluation of injurious and objectionable chemical, physical, and biological agents used or produced in industrial processes, and for the development of control measures. The estimated reduction reflects the transfer of the cost of certain leases to the General Services Administration.

6. *Administration.*—The estimate provides a small increase for program direction and administrative services.

OBLIGATIONS BY ACTIVITIES

Total obligations	995,427	1,004,573	1,000,000

PROGRAM AND PERFORMANCE

It is proposed to use the maximum of $1,000,000 authorized by law for grants to State and interstate water pollution agencies to assist them in the conduct of surveys, studies, investigations, and research related to the prevention and control of water pollution caused by industrial wastes. In accordance with the general policy on construction, no estimates are proposed for the construction features of the Water Pollution Control Act.

OBLIGATIONS BY ACTIVITIES

Grants to States and interstate agencies for industrial waste studies, surveys, and research—1950, $995,427; 1951, $1,004,573; 1952, $1,000,000.

OBLIGATIONS BY OBJECTS

11 Grants, subsidies, and contributions—1950, $995,427; 1951, $1,004,573; 1952, $1,000,000.

Disease and Sanitation Investigations and Control, Territory of Alaska, Public Health Service—

Disease and sanitation investigations and control, Territory of Alaska: To enable the Surgeon General to conduct, in the Service, and to cooperate with and assist the Territory of Alaska in the conduct of, activities necessary in the investigation, prevention, treatment, and control of diseases, and the establishment and maintenance of health and sanitation services pursuant to and for the purposes specified in sections 301, 311, 314 (without regard to the provisions of subsections (d), (f), (h), and (j) and the limitations set forth in subsection (c) of such section), 361,363, and 704 of the Act, including the purchase of one passenger motor vehicle, and hire, operation, and maintenance of aircraft, [$1,259,000] *$1,234,000*: *Provided*, That property of the Public Health Service located in Alaska and used in carrying out the activities herein authorized may be transferred, without reimbursement, to the Territory of Alaska at the discretion of the Surgeon General. (*Federal Security Agency Appropriation Act, 1951.*)

Appropriated 1951, **$1,259,000** Estimate 1952, **$1,234,000**

FUNDS AVAILABLE FOR OBLIGATION

	1950 actual	1951 estimate	1952 estimate
Appropriation or estimate	$1,317,000	$1,259,000	$1,234,000
Unobligated balance, estimated savings	−7,526		
Savings under sec. 1214		−25,000	
Total obligations	1,309,474	1,234,000	1,234,000

PROGRAM AND PERFORMANCE

These activities supplement and strengthen the services of the Territorial Department of Health to meet the needs of an expanding military and civilian population in Alaska. They enable the Public Health Service to conduct field and laboratory investigations of the disease problems of the Territory, many of which are different from those in the continental United States.

1. *Special grant to Alaska for general health purposes.*—This grant supplements Territorial, local, and other funds available to the Alaska Department of Health. The decrease reflects a shift from the grant to direct operations because of personnel recruitment difficulties encountered by the Territorial Health Department.

2. *Direct operations*—(*a*) *Technical assistance to Alaska.*—The Public Health Service assists Alaska through loans of personnel, procurement of supplies, and provision of other services relating to control of venereal diseases and tuberculosis and to sanitation and other general health problems. The increase is to provide for full year employment of personnel detailed to Alaska for only a part of 1951.

(*b*) *Field and laboratory investigations.*—The Service has undertaken long-range studies in Alaska in environmental sanitation, entomology, nutrition and biochemistry, physiology, animal-borne diseases, bacteriology and parasitology, and supportive activities essential to the maintenance of laboratory bench research. Increases in the estimate are for expansion of parasitological studies in the field of animal-borne diseases and small increases for operations in other investigational activities.

PROGRAM AND PERFORMANCE

The Federal Government provides financial assistance to States, local governments, and nonprofit agencies to defray part of the cost of construction of hospitals and public health center projects. Funds totaling $150,000,000 are authorized to be appropriated for each fiscal year up to and including the fiscal year 1955 for allocation to the States and Territories on the basis of population and economic need. Actual payments are made as construction proceeds. In no case is the Federal share greater than 66⅔ percent or less than 33⅓ percent of the cost of any project.

Actual and estimated progress of this program since initiation of the construction phase is summarized in the following table. Amounts shown are cumulative.

PROGRAM AND PERFORMANCE

This appropriation finances the direct expenses of the Public Health Service under the hospital construction program.

1. *Operations and technical services activities.*—The Service assists the States and their communities in making inventories of their hospitals and health centers, determining the additional facilities required, and developing a coordinated program to meet the indicated need. Proposed hospital and medical center projects for which Federal financial help is requested are reviewed to determine eligibility for assistance, and the project plans and specifications are reviewed for compliance with construction standards. To assure adequate facilities and adherence to cost limits, technical assistance is provided on architectural and engineering aspects.

2. *Administration.*—This includes administrative services of the program.

Hospitals and Medical Care, Public Health Service—Continued

ployees' Compensation cases, persons afflicted with Hansen's disease, and drug addicts.

1. *Operation of hospitals.*—This activity consists of 19 general hospitals, 2 tuberculosis hospitals, the National Leprosarium at Carville, La., and 2 neuropsychiatric hospitals. The hospital patient load is relatively stable in 1951 and 1952 while the out-patient visits are expected to increase from year to year.

AVERAGE DAILY PATIENT LOAD AND OUT-PATIENT VISITS

	1950 actual	1951 estimate	1952 estimate
General hospitals	4,422	4,425	4,401
Tuberculosis hospitals	452	485	485
Leprosarium	388	390	390
Neuropsychiatric hospitals	2,208	2,260	2,210
Total	7,470	7,560	7,486
Hospital out-patient visits	553,722	556,500	577,400

2. *Operation of out-patient clinics and offices.*—There are 19 full-time out-patient clinics and 103 part-time out-patient offices. A total of 459,768 visits were made in 1950 with 460,000 visits expected in 1951 and 468,050 in 1952.

3. *Operation of health units.*—The Service operates a health program for the Federal Security Agency and, on a reimbursable basis, conducts programs for other Federal agencies.

4. *Coast Guard, medical services.*—Medical services are provided by the Service for Coast Guard personnel at shore stations and on vessels.

5. *Administration.*—This provides for the professional and administrative direction of the above programs.

6. *Personnel detailed to other agencies.*—Medical personnel are detailed to certain other Federal agencies on a reimbursable basis.

PROGRAM AND PERFORMANCE

The purposes of this appropriation are: (1) To prevent the introduction of epidemic diseases into the United States from foreign countries; and (2) to provide medical services to the Department of State and to the Immigration and Naturalization Service in the examinations of aliens.

1. *Medical examination of aliens and quarantine inspection of persons, vessels, and aircraft entering United States ports.*—Persons inspected for quarantinable diseases increased from 26,439,544 in 1949 to 30,072,681 in 1950. During this same period vaccinations increased from 117,469 to 207,419, the greatest increase occurring along the Mexican border. The number of medical certifications increased from 48,668 to 53,135. The 1950 workload also included 4,087 persons disinfested, 223 held for observation, and 6,887 placed under surveillance. Thirteen thousand five hundred and forty-four arriving planes were disinsectized for yellow fever mosquitoes and 967 vessels were deratized by fumigation, poisoning, or trapping.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

During 1950, 1,330,622 medical examinations of aliens were performed in the United States. The Service certified 1,082 for excludable diseases.

2. *Medical examination of visa applicants in foreign countries.*—The number of medical examinations of such applicants increased from 79,966 in 1949 to 89,229 in 1950; the medical notifications increased during this period from 18,425 to 26,235. Of this number, 636 were for mandatorily excludable diseases.

3. *Administration.*—This activity provides for program direction and administrative services.

PROGRAM AND PERFORMANCE

The National Institutes of Health foster and conduct medical and related research. Organizationally, they comprise seven institutes: the Microbiological Institute; the National Cancer Institute; the National Institute of Mental Health; the National Heart Institute; the National Institute of Dental Research; and two new institutes, the National Institute on Arthritis, Rheumatism, and Metabolic Diseases, and the National Institute on Neurological Diseases and Blindness. Funds are provided by this appropriation and by the appropriations for cancer, mental health, heart, and dental activities.

This appropriation finances fundamental research in microbiology, communicable diseases, community health, nutrition, and physical biology. It also finances research

Federal Reserve Bank of St. Louis

PUBLIC HEALTH SERVICE—Continued

Operating Expenses, National Institutes of Health, Public Health Service—Continued

in various basic problems in pathology, pharmacology, physiology, biochemistry, and chemistry and chemotherapy, which are not covered by the four other appropriations mentioned above. It is also proposed for 1952 to continue to finance activities in arthritis, rheumatism, and metabolic diseases and in neurological diseases and blindness from this appropriation. The proposed increases are primarily for these purposes.

1. *Grants to medical schools and other institutions and to individuals for research and training.*—The estimate recommends increases in research grants from 765 to 918 projects at an average cost of $9,805 and in research fellowships from 172 to 194 at an average cost of $3,350. These include a substantial increase for new research projects and fellowships in arthritis, rheumatism, and metabolic diseases and in neurological diseases and blindness.

2. *Direct operations—(a) Research.*—This consists of basic research in fundamental physiological processes and nutrition, in virus, infectious and tropical diseases, and the testing and control of biological products. The estimate recommends increases for research in arthritis, rheumatism, and metabolic diseases and in neurological diseases and blindness and for employment of certain key personnel in preparation for the opening of the Clinical Research Center in fiscal year 1953.

(*b*) *Other direct operations.*—These comprise (1) the administration of the research grant and fellowship program and (2) program direction and central administration for the total program of the National Institutes of Health. The recommended increase in review and approval of research and training grants is to meet an increasing workload.

OBLIGATIONS BY ACTIVITIES

Description	1950 actual	1951 estimate	1952 estimate
Direct Obligations			
1. Grants to medical schools and other institutions and to individuals for research and training:

Federal Reserve Bank of St. Louis

PROGRAM AND PERFORMANCE

This program has three major purposes: (1) to foster and conduct research in the causes of the various types of cancer and in the development of improved methods of detection, diagnosis, and treatment; (2) to improve teaching in cancer problems and increase the supply of personnel trained for cancer work; and (3) to assist in developing and maintaining detection, diagnostic, and home care services at the local level.

1. *Grants*—(*a*) *Grants to medical and dental schools and other institutions and to individuals for research and training.*—Present funds are supporting approximately: 324 research projects, averaging $9,679 a project; 158 research fellowships, averaging about $3,275 each; 113 stipends to graduate physicians for specialized training, averaging over $3,300 each; and maximum teaching grants of $25,000 to each of 72 recognized 4-year medical schools and of $5,000 to each of 48 recognized dental schools and 2-year medical schools. The increase is for new research projects.

(*b*) *Grants to States for detection, diagnosis, and other control services.*—Federal funds, allocated to all States and four Territories on a formula basis, are designed to strengthen State and local clinical and educational services.

(*c*) *Grants for special control projects.*—Financial assistance is being provided to State and local health agencies, universities, hospitals, and nonprofit professional organizations to develop, initiate, or establish improved types of cancer control techniques and devices.

2. *Direct operations*—(*a*) *Research.*—Fundamental research is conducted in biology, biochemistry, biophysics, endocrinology, pathology, chemotherapy, and epidemiology. Growing emphasis is being placed on clinical research in the following areas: functional changes in patients with cancer; characteristics of human malignant tissues; and clinical chemotherapy.

(*b*) *Other direct operations.*—These comprise: (1) Review of State plans and budgets submitted in connection with the State grant-in-aid program, consultative services to States in the development of their programs, and demonstrations and field studies in new and improved diagnostic tests and procedures; (2) review of applications for grants, awards, and stipends for research and training; and (3) program direction and administration.

OBLIGATIONS BY ACTIVITIES

Description	1950 actual	1951 estimate	1952 estimate
1. Grants:			
(*a*) Grants to medical and dental schools and other institutions and to individuals for research and training:			
(1) Research projects	$2,632,066	$3,136,000	$3,300,000
(2) Research fellowships	519,392	517,000	500,000
(3) Construction of research facilities	6,000,000		
(4) Teaching of medical subjects	2,006,913	2,040,000	2,040,000
(5) Training stipends	347,192	375,000	375,000
(*b*) Grants to States for detection, diagnosis, and other control services	3,246,056	3,200,000	3,200,000
(*c*) Grants for special control projects	1,084,748	949,000	900,000
2. Direct operations:			
(*a*) Research	3,917,303	3,770,000	3,909,000
(*b*) Other direct operations:			
(1) Technical assistance to States	463,233	475,000	465,000
(2) Review and approval of research and training grants	81,678	82,000	83,000
(3) Administration	346,384	342,000	350,000
Total obligations	20,644,965	14,886,000	15,122,000

PUBLIC HEALTH SERVICE—Continued

Mental Health Activities, Public Health Service—Continued

ventive, diagnostic, and out-patient clinical services at the local level.

1. *Grants—(a) Grants to medical schools and other institutions and to individuals for research and training.*—The estimate recommends increases in: research grants from 77 to 107 projects at an average cost of approximately $15,000; research fellowships from 63 to 78 at an average cost of $3,280; graduate teaching grants in psychiatry, psychology, psychiatric social work, and psychiatric nursing from 148 to 164 at an average cost of $12,195 and training stipends in these fields from 525 to 688 at an average cost of $2,035. In addition, it provides an increase in cash to liquidate prior-year commitments to raise the average amount of the undergraduate teaching grants in psychiatry, now being made to 42 medical schools, from $11,880 to $14,288.

(b) Grants to States for detection, diagnosis, and other preventive and control services.—Federal grants, allocated to States on a formula basis, have resulted in the initiation of mental health programs in 28 States and Territories and the expansion of mental health programs in 24 others.

2. *Direct operations—(a) Research.*—This provides for: development of laboratory and clinical research programs in preparation for operations at the Clinical Center now under construction at Bethesda, Md.; research in narcotic and barbiturate addiction; epidemiological field research; research in psychological aspects of aging; a field study in Phoenix, Ariz., to determine the mental health needs of an urban community with a heterogeneous population; and supporting services in biometrics, publications, and reports. The estimate provides for further development of the National Institute of Mental Health intramural research organization preparatory to the opening of the Clinical Center.

(b) Other direct operations.—These comprise: (1) Review and approval of research and training grants; (2) short-term training institutes for practicing physicians, health officers, and other health workers, consultation and demonstration services in training activities, and in-service training; (3) review of State plans and budgets submitted in connection with the State grant-in-aid programs, consultative services to States, and demonstrations and field studies in developing preventive and out-patient services; and (4) program direction and administration. The only significant increase estimated is for administrative services to be rendered by the National Institutes of Health.

PROGRAM AND PERFORMANCE

This program has three major purposes: (1) to foster and conduct research in the causes of the various diseases of the heart and circulation and in the development of improved methods for their detection, diagnosis, and treatment; (2) to improve teaching in cardiac problems and increase the supply of personnel trained for research and treatment of heart diseases; and (3) to assist in the development and maintenance of detection, diagnostic, and home care services at the local level.

1. *Grants*—(*a*) *Grants to medical schools and other institutions and to individuals for research and training.*—Present funds are supporting: 355 research projects averaging $13,265 a project; 94 research fellowships averaging $3,415; teaching grants averaging $14,000 each to 43 recognized 4-year medical schools and to certain other recognized medical and public health schools; and 45 training stipends, averaging approximately $3,300 to graduate physicians for specialized training in cardiovascular diseases. The estimate provides for expansion in grants for research and development in blood derivatives.

(*b*) *Grants to States for detection, diagnosis, and other control activities.*—Grants are made to States, on a formula basis, to find and refer cardiac patients for diagnosis and treatment, to provide services to heart-disease patients in their homes, to furnish training opportunities to physicians and public health workers in cardiac problems, and to supply public information.

2. *Direct operations*—(*a*) *Research.*—Research is being conducted in the following areas: development of diagnostic and case-finding instruments; the peripheral vascular system; kidney and electrolyte metabolism; high blood pressure; gerontology; rheumatic heart disease; therapeutics; and epidemiology. The program provides for further development of the National Heart Institute's intramural research organization preparatory to the opening of the Clinical Center.

(*b*) *Other direct operations.*—These consist of: (1) Review and approval of applications for research and training grants; (2) review and approval of State plans and budgets, consultative services to States on heart disease control programs, and field studies and demonstrations on improved methods of conducting local control programs; and (3) program direction and administration.

PUBLIC HEALTH SERVICE—Continued

Dental Health Activities, Public Health Service—Continued

PROGRAM AND PERFORMANCE

This program has three major purposes: (1) to foster and conduct research in the causes and prevention of dental diseases and in the development of improved methods for their diagnosis and treatment; (2) to increase the supply of personnel trained for dental health work and improve the utilization of dental health personnel now available; and (3) to assist in the development and maintenance of up-to-date preventive and clinical programs at the local level.

1. *Grants to dental schools and other institutions and to individuals for research and training.*—Present funds are supporting grants for 34 research projects averaging approximately $6,500, and awards to 15 research fellows averaging $3,333 each. The estimate proposes support of approximately the same number.

2. *Direct operations*—(*a*) *Research.*—Basic research will be continued in the fields of bacteriology, pathology, histology, oral and biological chemistry, epidemiology, and biometry.

(*b*) *Other direct operations.*—These consist of: (1) Review and approval of applications for research grants and fellowships; (2) technical assistance to States in the form of consultative services and demonstrations of newly developed techniques and the effectiveness of advanced educational, preventive, and treatment methods in the control of dental conditions; (3) coordination and development of dental health resources through evaluation and development of clinical care methods and facilities, program planning, and studies of oral health conditions; and (4) program direction and administration. The estimate reflects a decrease in topical fluoride demonstrations in anticipation of declining need for this type of demonstration after the fourth year of the program.

OBLIGATIONS BY ACTIVITIES

Description	1950 actual	1951 estimate	1952 estimate
1. Grants to dental schools and other institutions and to individuals for research and training:

Construction of Research Facilities, Public Health Service—

Construction of research facilities: For construction of research facilities, to be transferred (except such part as may be necessary for incidental expenses and purchase of equipment by the Public Health Service) to the General Services Administration, and to remain available until expended, as follows:

For [payment of obligations incurred under authority heretofore granted to enter into contracts for] *continuation of* construction of a combined hospital and research building as authorized under this head in the Federal Security Agency Appropriation Acts of 1949 and 1950, [$7,500,000] *$10,400,000, of which $10,000,000 is for payment of obligations incurred under authority heretofore granted under this head.*

For payment of obligations incurred under authority heretofore granted to enter into contracts for construction of auxiliary service area structures, as authorized under this head in the Federal Security Agency Appropriation Act, 1950, [$3,600,000] *$1,100,000.*

[For construction of additional auxiliary structures to provide station quarters for personnel and a grounds maintenance building, including necessary distribution facilities and roads and walks, $1,025,000; and in addition, contracts may be entered into an amount not to exceed $350,000 toward completion of such construction at a cost not to exceed $1,375,000: *Provided,* That the Surgeon General is authorized to convey by quitclaim deed upon such terms and conditions as he may prescribe not to exceed twenty-five thousand square feet of land presently included in the site of the National Institutes of Health to the Bethesda Fire Department, a body corporate of the State of Maryland, for the purpose of erecting and maintaining a fire station to provide protection for the facilities of the National Institutes of Health and for the adjacent community: *Provided further,* That such terms and conditions may include an agreement by the Surgeon General to pay to such department on behalf of the United States 33⅓ per centum of the cost of the construction of the station but not to exceed $20,000, to be charged to the maximum limits of costs set out in this paragraph.]

For payment of obligations incurred under authority heretofore granted to enter into contracts for construction of additional auxiliary structures as authorized under this head in the Federal Security Agency Appropriation Act, 1951, $350,000.

For purchase and installation of additional equipment, *supplies,* and furnishings [to partially equip and furnish] *for* structures heretofore [or herein] provided under this head [(except structures for station quarters), $3,000,000], *$6,740,000. (42 U. S. C. 248; 60 Stat. 421; Federal Security Agency Appropriation Act, 1951.)*

PROGRAM AND PERFORMANCE

The Public Health Service is currently engaged in a major expansion of its medical research facilities at the National Institutes of Health in Bethesda, Md. The principal building, now in its third year of construction, is the Clinical Center, a research laboratory equipped with

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

500 beds for clinical research in cancer, heart, mental, metabolic, and infectious diseases. The project also includes auxiliary structures to provide power, incineration, storage, laundry, animal breeding, and shop services for the entire National Institutes of Health.

In 1948, the Congress appropriated $3,500,000 to acquire additional land and to prepare plans and specifications. The first and main stage of construction with a cost limitation of $40,000,000 began in 1949; to date, $25,600,000 has been appropriated. The second stage, covering most of the auxiliary service structures, has a total cost limitation of $8,600,000, of which $7,500,000 has been appropriated. The third stage consists of construction of housing facilities on the station and a grounds maintenance building, for which $1,375,000 has been appropriated and authorized.

The estimate includes $11,450,000 in cash to liquidate contract authority used in the three stages mentioned above. In addition, it provides $400,000 in new obligational cash for the first stage to install auxiliary generators for an emergency and windows of tempered glass as protection against possible blast damage. It also includes $6,740,000 for purchase by the Public Health Service of equipment and initial inventory of supplies for the Clinical Center and supporting structures. All buildings are expected to be completed and equipped for operation by the middle of fiscal year 1953.

Commissioned Officers, Pay, Etc., Public Health Service—

Commissioned officers, pay, and so forth: For pay, uniforms and subsistence allowances, increased allowances for foreign service and commutation of quarters for not to exceed one thousand five hundred regular active commissioned officers; for medals, decorations, and retired pay of regular and reserve commissioned officers; for payment of claims for private property lost, destroyed, captured, abandoned, or damaged in the military service of the United States, as authorized by law (31 U. S. C. 222c, h; 42 U. S. C. 213); and for six months' death gratuity pay and burial payments for regular commissioned officers; [$1,790,000] *$1,900,000,* and the Surgeon General is authorized to advance to this appropriation from appropriations made available to the Public Health Service for the current fiscal year such additional amounts as may be necessary for pay and allowances of the officers herein authorized. (*Federal Security Agency Appropriation Act, 1951.*)

PROGRAM AND PERFORMANCE

This appropriation provides for pay of commissioned officers of the Regular Corps on general duty, pay to retired officers, death gratuity payments to survivors of officers deceased in line of duty, and tuition for training.

1. *General duty.*—This includes commissioned officers assigned to the immediate Office of the Surgeon General, the Division of Commissioned Officers, the regional medical directors and their immediate professional staffs, officers assigned for highly specialized types of training, officers assigned to duties of a temporary or emergency nature, and other officers not assigned to specific operating programs.

2. *Retired officers' pay and survivors' benefits.*—The number of retired officers on the rolls is expected to increase from 210 at the end of 1951 to 229 at the end of 1952.

3. *Tuition for training.*—It is estimated that, in 1952, 60 officers will attend institutions for training at average annual costs of $600 for tuition and $100 for books, laboratory equipment, and other incidental expenses.

PROGRAM AND PERFORMANCE

1. *Evaluation of public health problems and methods.*—Studies planned for 1952 deal with: Measurement of costs of education for the health profession; distribution of medical, dental, nurse, and other health personnel as a basis for studies of health manpower and medical services; the support, staffing needs, and organization of departments of preventive medicine; prevalence of disability and type of care and living arrangements for the

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

aged and disabled; group medical practice; morbidity and health statistics studies on colds and other respiratory diseases, allergies, gastric and duodenal ulcer, chronic and acute sinusitis; and morbidity in important broad age groups.

2. *Development and coordination of nursing resources.*—This program is designed to find ways of increasing nursing service to patients throughout the country and to encourage States and local groups to use methods that will result in more nursing personnel, better distribution of nursing personnel, better prepared nursing personnel, and better use of nurse time.

3. *International health activities.*—The Service assists other Government agencies in the development of international health programs, participates in development of general policy for the World Health Organization, carries out foreign health programs on a contract basis, recruits and assigns health experts to carry out projects overseas, develops and carries out health training programs for foreign students, and drafts United States policy on revision of international sanitary conventions.

4. *Management and central services.*—This provides staff assistance to the Surgeon General, central administrative services, and printing of Service-wide material.

PROGRAM AND PERFORMANCE

The 1950 appropriation act provided $100,000 for developing plans and specifications for the erection of a dental research building on the grounds of the National Institutes of Health in Bethesda, Md. This would be a separate building, in addition to the principal building for the Clinical Center now under construction on these grounds. Review of the space requirements of the National Institutes of Health has indicated that the needs of the National Institute of Dental Research can be accommodated, at least for the immediate future, within the total space now in existence and under construction. In view of this fact, and coupled with the current status of our economy, it is considered necessary that this building project be postponed indefinitely.

Total obligations	10,228,092	10,525,262	11,189,000

PROGRAM AND PERFORMANCE

Saint Elizabeths Hospital provides care and treatment for various groups of mentally ill patients who are beneficiaries of the Federal Government and for mentally ill residents of the District of Columbia. The District government reimburses the hospital for care of District residents.

1. *Operation and maintenance of hospital.*—This activity provides care and treatment of the mentally ill; research on the causes, prevention, and treatment of mental illness; maintenance of the hospital buildings; and necessary administrative services. The funds requested for 1952 will enable the hospital to provide better care for the aged and infirm.

	1950 actual	1951 estimate	1952 estimate
Federal beneficiaries	1,624	1,722	1,740
District of Columbia residents	4,963	4,985	4,995
Total	6,587	6,707	6,735

2. *Operation of farm.*—The farm provides occupational therapy benefits for the patients. Produce value exceeds the cost of operation.

3. *Operation of cafeteria.*—The hospital is authorized to operate a cafeteria for employees and others and to sell meals at not less than cost. The cafeteria served 186,440 meals in 1950. Approximately this number will also be served in 1951, and about 187,000 in 1952.

4. *Training program.*—This is to provide a source for medical and nursing staff recruitment by training medical, psychology, and dental interns, psychiatric residents, and student nurses. Actual and estimated trainees are as follows:

	1950 actual	1951 estimate	1952 estimate
Interns and postgraduates	38	43	49
Student nurses	80	96	104

Total obligations	234,276	791,863	166,500

PROGRAM AND PERFORMANCE

This appropriation finances major repairs, permanent improvements, or additions to the buildings, grounds, and utilities of the hospital. Funds for the larger projects are transferred to the General Services Administration.

1. *Building repairs and improvements.*—This provides for weatherstripping and calking 12 patients' buildings and the replacement of Center Building roof.

2. *Ground maintenance and improvements.*—This provides for the demolition or conversion of abandoned shops building and the replacement of a section of worn-out road.

3. *Utility facilities, repairs, and improvements.*—Funds are requested to provide for major repairs to 15 badly deteriorated power-operated food elevators, all of which are more than 20 years old.

Total obligations	619,342	765,000	798,000

PROGRAM AND PERFORMANCE

Federal credit unions are cooperative associations organized for the purpose of promoting thrift among their members and creating a source of credit for provident and productive purposes. The operating cost of the Bureau of Federal Credit Unions is provided partly through an appropriation from the general fund of the Treasury and partly through fees collected as authorized in the Federal Credit Union Act. The 1952 estimate for the general fund appropriation is reduced by $50,000 resulting from a readjustment of examination fees, thereby providing for a more self-supporting program.

1. *Chartering and establishment of Federal credit unions.*—The Bureau investigates and issues charters to eligible groups upon application; advises newly chartered credit unions as to Federal requirements and recommended practices; and assists them to organize, set up their records, and establish their operating policies and procedures. In 1950, charters were granted to 590 new Federal credit unions, and it is expected that 600 new charters will be granted in each of the fiscal years 1951 and 1952.

2. *Examination and supervision of Federal credit unions.*—In 1952, examinations will be made of the financial condition and operating practices of 3,780 operating Federal credit unions. In addition, the Bureau will supervise mergers, suspensions, and liquidations; investigate shortages; review and approve amendments to charters and bylaws; and assist the officers of credit unions through procedural manuals, instructional material, and advice on economic conditions and trends.

GROWTH OF FEDERAL CREDIT UNIONS

End of calendar year	Number of credit unions	Assets	Loans outstanding	Number of members
1940 actual	3,739	$72,500,539	$55,801,026	1,126,222
1945 actual	3,757	153,103,120	35,155,414	1,216,625
1948 actual	4,058	258,411,736	137,642,327	1,628,339
1949 actual	4,495	316,362,504	186,218,022	1,819,606
1950 estimate	4,995	387,227,705	232,772,528	2,001,567
1951 estimate	5,495	473,966,711	290,965,660	2,201,724

3. *Administration.*—The direction of the Bureau program and administrative services will continue at the same level in 1952.

PROGRAM AND PERFORMANCE

The Bureau administers the old-age and survivors insurance program. Tax contributions from employers and employees are deposited in the Federal old-age and survivors insurance trust fund, out of which are paid benefit payments and administrative costs. Public Law 734, Eighty-first Congress, amending the Social Security Act, broadened coverage, liberalized the requirements for an insured status, and raised benefit payments. As a result, workloads will be very substantially increased in 1951 and 1952 and continue, in subsequent years, at a generally higher level.

1. *Maintenance of accounts of employee earnings.*—Individual accounts of earnings are maintained. This workload has become relatively stabilized but will continue to grow gradually each year as coverage is broadened and as the level of employment increases.

	1950 actual	1951 estimate	1952 estimate
Reports of employee earnings received (old program)	178,069,707	182,588,000	185,633,000
1950 amendments		3,526,000	27,176,000
Total program	178,069,707	186,114,000	212,809,000

2. *Processing and certification for payment of initial claims.*—The principal activity of the Bureau is the processing of claims for benefits from aged workers or from the survivors of workers who have died. This workload by reason of the amendments will rise to unprecedented levels in 1951 and 1952. In 1953 it will return to more normal levels but will continue to grow gradually as the number of insured workers under the program increases.

	1950 actual	1951 estimate	1952 estimate
New claims received (old program)	951,302	957,000	1,000,000
1950 amendments		1,110,000	420,000
Total program	951,302	2,067,000	1,420,000

3. *Monthly recertification of awarded claims.*—Each month the Bureau revises and recertifies to the Treasury the roll of those entitled to benefits. The number of beneficiaries on the roll will increase sharply in 1951 and 1952 and thereafter grow larger for many years until the program reaches its maturity.

	1950 actual	1951 estimate	1952 estimate
Beneficiaries on rolls at end of year (old program)	3,287,638	3,662,000	4,028,000
1950 amendments		940,000	1,225,000
Total program	3,287,638	4,602,000	5,253,000

4. *Hearings and appeals.*—Individuals whose claims for benefits are disallowed have the right of appeal. Hearings are held before referees and decisions are reviewed by the Appeals Council, administratively independent of the Bureau. The workload while not large is significant in protecting the individual's rights.

	1950 actual	1951 estimate	1952 estimate
New appeals (old program)	2,386	2,457	2,532
1950 amendments		500	550
Total program	2,386	2,957	3,082

5. *Actuarial services.*—Actuarial studies and estimates are prepared for long-range program planning.

Reimbursement to Federal Old-Age and Survivors Insurance Trust Fund, Social Security Administration—

Reimbursement to Federal old-age and survivors insurance trust fund: For reimbursement to the Federal old-age and survivors insurance trust fund for *administrative costs and for* benefits paid during the [fiscal year 1949] *period July 1, 1949 through August 31, 1950* to the survivors of veterans of World War II eligible for benefits as provided under section 210 of the Social Security Act, as amended (42 U. S. C. 410), [$3,694,000] *$3,734,000.* (*Labor-Federal Security Appropriation Act, 1951.*)

Appropriated 1951, **$3,694,000** Estimate 1952, **$3,734,000**

FUNDS AVAILABLE FOR OBLIGATION

Appropriation or estimate—1950, $3,604,000; 1951, $3,694,000; 1952, $3,734,000.

PROGRAM AND PERFORMANCE

The 1946 amendments to the Social Security Act (section 210) extended temporary privileges to veterans of World War II in order to make possible the payment of benefits to survivors of those veterans who die within 3 years after their discharge from the armed services. This estimate provides for the reimbursement of actual benefit payments, administrative expenses, and interest lost to the trust fund by reason of these payments in fiscal year 1950, and in the first 2 months of fiscal year 1951, ending with the terminal date Sept. 1, 1950.

PROGRAM AND PERFORMANCE

Grants for old-age assistance, aid to dependent children, aid to the blind, and aid to the permanently and totally disabled are made to States that have plans for these programs approved by the Federal Security Agency. For 1952, the total amount of Federal, State, and local ex-

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

penditures for assistance and administration is estimated at $2,364,375,000, of which $1,300,000,000 represents Federal grants. The increase of $20,000,000 in Federal funds over the $1,280,000,000 appropriated for 1951 is the net result of two sets of factors, one operating to increase, the other, to decrease expenditures for assistance. The factors operating to increase expenditures are as follows: (1) The 1950 amendments to the public assistance provisions of the Social Security Act will be in effect for the entire year 1952 compared with three-quarters of 1951; (2) the amendments related to the aid-to-the-blind program are expected to result in an increase in the number of recipients and result in higher expenditures in 1952 than are estimated for 1951; and (3) the program for aid to the permanently and totally disabled is expected to be in operation for the full year under an approved plan in all but three States and to assist a substantially greater number of people in 1952 than in 1951. It is estimated that a large part of the cost resulting from these factors will be offset by the drop in assistance rolls for old-age assistance and aid to dependent children because of: (1) The amendments to the old-age and survivors insurance provisions of the Social Security Act; and (2) the substantial increase in employment opportunities that will be associated with the defense effort. As a result of the extension of coverage and liberalization of the eligibility and benefit provisions under the insurance program, some needy aged currently receiving public assistance will no longer require assistance and others will have their payments reduced; still others who are not now receiving assistance will be eligible for benefits under the old-age and survivors insurance program and thus will not apply for assistance or will receive smaller assistance payments.

In order to facilitate comparison of the estimated year-to-year changes in the programs, case load and financial data are presented in the tables below for the operating period to which they relate, rather than for the period in which grants become obligations of the Federal Government.

1. *Payments to recipients*—(*a*) *Old-age assistance.*—The average number of recipients per month for 1952 is estimated at 4.4 percent less than is estimated for 1951. The average monthly payment is estimated to exceed by $1.50 the amount for 1951.

	1950 actual	1951 estimate	1952 estimate
Average number of recipients per month	2,728,722	2,823,000	2,700,000
Average monthly payment	$43.91	$45.00	$46.50
Total expenditures for assistance (Federal, State, and local)	$1,437,981,000	$1,524,420,000	$1,506,600,000
Percent from Federal funds	54.9	54.8	54.6

(*b*) *Aid to dependent children.*—The average number of families with dependent children per month in 1952 is estimated at 10.7 percent less than was estimated for 1951. The average monthly payment per family is estimated to exceed by $1.75 the amount for 1951.

	1950 actual	1951 estimate	1952 estimate
Average monthly number of families	602,078	655,000	585,000
Average monthly payment	$72.02	$72.50	$74.25
Total expenditures for assistance (Federal, State, and local)	$520,312,000	$569,850,000	$521,235,000
Percent from Federal funds	43.7	53.4	58.2

(*c*) *Aid to the blind.*—The average number of recipients per month is estimated for 1952 at 7.6 percent more than was estimated for 1951. The average monthly payment is estimated at $1.80 more than the amount for 1951.

	1950 actual	1951 estimate	1952 estimate
Average monthly number of recipients	74,531	97,600	105,000
Average monthly payment	$47.23	$47.20	$49.00
Total expenditures for assistance (Federal, State, and local)	$42,240,000	$55,280,000	$61,740,000
Percent from Federal funds	51.9	52.8	52.7

(*d*) *Aid to the permanently and totally disabled.*—Under this new program effective October 1, 1950, grants-in-aid to the States are authorized to provide assistance to needy persons 18 years of age or over who are unable to support themselves because of various kinds of physical and mental handicaps. The average number of recipients per month is estimated for 1952 at 26.9 percent more than the estimate for 1951. The average monthly payment is estimated to exceed by $1 the amount for 1951.

	1950 actual	1951 estimate [1]	1952 estimate
Average monthly number of recipients		197,000	250,000
Average monthly payment		$45.00	$46.00
Total expenditures for assistance (Federal, State, and local)		$79,785,000	$138,000,000
Percent from Federal funds		52.7	53.0

[1] For 9-month period beginning Oct. 1, 1950.

2. *Administration: State and local operations.*—The grants to States include 50 percent of the administrative costs which are found by the Federal Security Agency to be necessary for the proper and efficient administration of the State public assistance programs. The $68,400,000 in Federal grants for this activity for 1952 will provide approximately 50 percent of the salaries and expenses of about 47,000 State and local personnel engaged in administering the 4 public assistance programs, compared with an estimated 48,000 administering these 4 programs in 1951 and an estimated 41,000 administering the 3 assistance programs for which Federal grants-in-aid were made in 1950.

	1950 actual	1951 estimate	1952 estimate
(*a*) Old-age assistance	$71,976,000	$79,366,000	$78,000,000
(*b*) Aid to dependent children	39,300,000	45,692,000	42,600,000
(*c*) Aid to the blind	3,286,000	4,012,000	4,400,000
(*d*) Aid to the permanently and totally disabled		8,904,000	11,800,000
Total expenditures (Federal, State, and local)	114,562,000	137,974,000	136,800,000
Percent from Federal funds	50	50	50

PROGRAM AND PERFORMANCE

The Bureau of Public Assistance administers Federal grants to States for old-age assistance, aid to dependent children, aid to the blind, and aid to the permanently and totally disabled. The increase in the 1952 estimate provides additional staff for the increased workload arising from the Social Security Act amendments of 1950, Public Law 734, Eighty-first Congress, approved August 28, 1950.

1. *Develop and consult on program policies and standards.*—The work in this area clarifies conditions under which States may use Federal funds in carrying out the purposes of the public assistance programs. The need for issuance of interpretations and statements of clarification arises as States continue to change their legislative provisions and procedures or changes occur in Federal law affecting these programs. Standards are formulated for the development of efficient administration of the public assistance programs, and consultation is provided to State agencies on specialized subjects.

2. *Review and approve State plans and grants, evaluate and advise States on operations.*—The Bureau reviews and acts on State plans and amendments resulting from continuous revisions in State programs; authorizes grants to States; conducts an administrative review to evaluate State and local operations; and provides general consultative services to States in relation to current operating problems and development of their programs.

3. *Collect and interpret statistical and other data.*—The Bureau collects, analyzes, and interprets statistical information on the operation of public assistance programs and their relationship to other programs, for administrative use, for use of the State public-assistance agencies, and for Federal legislative purposes; and conducts special studies essential to the evaluation of the public assistance programs.

4. *Administration.*—This includes over-all program direction and administrative services of the Bureau.

PROGRAM AND PERFORMANCE

Matters pertaining to the welfare of children and child life are investigated and reported on and grants to States for extending and improving maternal and child health and child welfare programs are administered.

1. *Development of State and local health services for children.*—The Bureau develops program policies and requirements related to the State plans for maternal and child health and crippled children's services; reviews and approves such plans, and evaluates the services provided; provides consultative service to the State agencies in regard to developing and carrying out these plans, to other public and private agencies and organizations concerned with health programs for children, and to educational institutions engaged in training professional personnel; and prepares guides and recommendations with respect to the provision of the essential child health services.

2. *Development of State and local social services for children.*—The same methods of program planning and consultation services are used for the child welfare services as for the child health services.

3. *Research in child life and services for children.*—The Bureau conducts research in subjects pertaining to child growth and development and in the effectiveness of health and welfare services for children, and interprets research findings to the public through its pamphlets and bulletins for parents and others caring for children; and acts as a center for keeping research workers informed of studies going on in the United States relating to children.

4. *Dissemination of information to parents and others working with children.*—The Bureau prepares and distributes publications on various aspects of the child health and welfare services, and upon request assists the States with their information programs.

5. *Administration.*—This includes over-all direction of Bureau activities, cooperation with other agencies and with parents and citizen groups in promoting the well-being of children, and administrative services of the Bureau.

Grants to States for Maternal and Child Welfare, Children's Bureau, Social Security Administration—

Grants to States for maternal and child welfare: For grants to States for maternal and child-health services, services for crippled children, and child-welfare services as authorized in title V, parts 1, 2, and 3, of the Social Security Act, as amended (42 U. S. C., ch. 7, subch. V), [$22,000,000] *$33,000,000*: *Provided*, That any allotment to a State pursuant to section 502 (b) or 512 (b) of such Act shall not be included in computing for the purposes of subsections (a) and (b) of sections 504 and 514 of such Act an amount expended or estimated to be expended by the State: *Provided further, That this appropriation shall be allotted on a pro rata basis among the several States in proportion to the amounts to which the respective States are entitled for the current fiscal year by reason of section 331 of the Social Security Act Amendments of 1950.*

[For an additional amount for "Grants to States for maternal and child welfare", $8,250,000: *Provided*, That such additional amount shall be allotted on a pro rata basis among the several States in proportion to the amounts to which the respective States are entitled for the fiscal year 1951 by reason of section 331 of the Social Security Act Amendments of 1950.] (*Federal Security Agency Appropriation Act, 1951; Supplemental Appropriation Act, 1951.*)

PROGRAM AND PERFORMANCE

Grants to States are provided for (1) maternal and child health services; (2) crippled children's services; and (3) child welfare services.

1. *Maternal and child health services.*—Grants are provided to enable States to extend and improve services for promoting the health of mothers and children, especially in rural areas and other areas of special need. The States must provide matching funds for one-half of the amount appropriated; the remainder is provided the States on the basis of 100 percent Federal grants for special needs. The 1952 estimate provides for a continuation of services expanded in the preceding year, when as a result of increased appropriations in response to the 1950 amendments to the Social Security Act, States initiated the development or extension of new programs. Particular emphasis will be placed in 1952 on those programs relating to the care of premature infants, children with sight or hearing losses, and school health services.

2. *Crippled children's services.*—Grants are made to the States to extend and improve services for locating crippled

SOCIAL SECURITY ADMINISTRATION—Continued

General accounts—Continued

Grants to States for Maternal and Child Welfare, Children's Bureau, Social Security Administration—Continued

children, and provide medical, surgical, corrective, and other care and services for children who are crippled or who are suffering from conditions which lead to crippling. The States are required to provide matching funds for half of the amount appropriated; the remainder is distributed to the States on the basis of 100 percent Federal grants for special needs. The estimate provides for sustaining the program expansion which occurred in 1951 as a result of the increased appropriation authorized under the 1950 amendments to the Social Security Act and also will enable some expansion in services to children with cerebral palsy, rheumatic fever, and epilepsy.

3. *Child welfare services.*—Grants are provided to the States to aid them in establishing, extending and strengthening, especially in rural areas and other areas of special need, child welfare services for the protection and care of homeless, dependent and neglected children, and children in danger of becoming delinquent. It also authorizes the payment of funds to help return runaway children. States are required to make some financial contribution but the share is not specified. The 1952 estimate provides for a continuation of the program expansion initiated in the previous year as a result of the amendments to the Social Security Act, particularly the use of Federal funds for the care of children in foster homes.

OBLIGATIONS BY ACTIVITIES

Description	1950 actual	1951 estimate	1952 estimate
1. Maternal and child health services	$10,986,016	$13,200,000	$13,120,500

PROGRAM AND PERFORMANCE

The staff of the Office of the Commissioner is engaged in the over-all executive direction, coordination, and development of the social security program and in basic research covering the broader phases of social security.

1. *Direction and coordination of the social security program.*—Executive direction of the social security bureaus consists of: (*a*) formulation of administrative policies; (*b*) appraisal of State laws, plans, and operations for compliance to Federal requirements; (*c*) certification of grants to States; (*d*) coordinating interprogram activities and material relating to legislative reports and proposals; and (*e*) review of important phases of administrative management throughout the Social Security Administration, and achieving integrated social security operations.

2. *Appraisal and development of the social security program.*—This activity provides: (*a*) basic social security studies beyond the immediate scope of any bureau; (*b*) review and coordination of research and statistics work in the Administration; and (*c*) the development of more effective ways of improving economic security through social insurance and related measures. The 1952 estimates provide for the printing of the Social Security Bulletin heretofore carried in the appropriations available to the Office of the Administrator.

PROGRAM AND PERFORMANCE

1. *General administration and direction.*—This activity provides for the over-all supervision and direction of the agency and the determination of agency-wide policies in carrying out the several programs.

2. *Program coordination and development.*—This activity provides for the development and coordination of all program activities of the agency. The 1952 estimate provides funds for additional personnel for comprehensively examining the diversified programs and functions of the agency.

3. *Field services and State relations.*—The ten agency regional offices are responsible for execution of agency policies, coordination, evaluation, and general direction of all agency programs in the field.

Twenty-three grant-in-aid programs are audited on a test-check basis. Approximately 1,170 audits of State programs are made each fiscal year. Assistance is also furnished the States in complying with merit system statutes under grant-in-aid programs.

The 1952 estimate provides additional personnel for the added housekeeping services resulting from the expansion of the social security and education programs.

4. *Publications and reports.*—The agency furnishes information regarding its programs to professional groups, congressional committees, and individual members of Congress and to interested citizens.

5. *Administrative services.*—All staff functions at the agency level involving administrative management of the agency's budget, fiscal planning, personnel management, procurement, space, and transportation are included here

PROGRAM AND PERFORMANCE

This division furnishes central services for the entire agency in such matters as space, telephones, motor vehicles (excluding Public Health Service), tabulating, duplicating, and distributing of agency materials under the direction and supervision of the executive assistant to the Administrator. It also performs certain essential administrative services relating principally to payroll, procurement of supplies and equipment, and travel for Office of the Administrator and some of the smaller offices, and formulates procedures, establishes standards, and advises all constituent bureaus on procurement, travel, space, and similar administrative service matters. While the 1952 estimate provides funds to cover increased regional office costs made necessary by the new and expanded Social Security Administration and Office of Education programs, these are offset by costs of rents, utilities, and surcharges to be carried in the General Services Administration appropriation and the printing

PROGRAM AND PERFORMANCE

The Federal Property and Administrative Services Act of 1949 (Public Law 152) as amended by Public Law 754 (81st Cong., 2d sess.), assigned to the Federal Security Administrator three major responsibilities in the field of surplus property: (1) Determination of surplus personal property needed for educational and public health purposes, including research, and allocation of that property to State agencies for distribution to educational and public health institutions; (2) disposal of surplus real property for educational and public health purposes, subject to the approval of the Administrator of the General Services Administration; and (3) insuring compliance with the terms and conditions of transfers made for educational and public health purposes under Public Law 152 and under prior laws (Surplus Property Act and its amendments).

GENERAL PROVISIONS

[SEC. 202. Appropriations under this title available for salaries and expenses shall be available for payment of tort claims pursuant to law (28 U. S. C. 2672).]

SEC. [203] *202.* Appropriations under this title available for salaries and expenses shall be available for examination of estimates of appropriations in the field, [for exchange of books] *and for payment in advance when authorized by the Federal Security Administrator for dues or fees for library membership in organizations whose publications are available to members only or to members at a price lower than to the general public.*

[SEC. 204. Appropriations under this title available for salaries and expenses shall be available for health service programs as authorized by law (5 U. S. C. 150), and such amounts as may be necessary may be transferred to the appropriations of the organizational units operating such programs.]

[SEC. 205. Appropriations under this title available for salaries and expenses shall be available for printing and binding, including the purchase of reprints.]

SEC. [206] *203.* Appropriations under this title available for salaries and expenses shall be available for services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a).

SEC. [207] *204.* Appropriations under this title available for salaries and expenses shall be available for travel expenses and for expenses of attendance at meetings concerned with the function or activity for which any such appropriation is made.

SEC. [208] *205.* None of the funds appropriated by this title to the Social Security Administration for grants in aid of State agencies to cover, in whole or in part, the cost of operation of said agencies including the salaries and expenses of officers and employees of said agencies, shall be withheld from the said agencies of any States which have established by legislative enactment and have in operation a merit system and classification and compensation plan covering the selection, tenure in office, and compensation of their employees, because of any disapproval of their personnel or the manner of their selection by the agencies of the said States, or the rates of pay of said officers or employees. (*Federal Security Agency Appropriation Act, 1951.*)

PROPOSED FOR LATER TRANSMISSION

Salaries and expenses, Office of Education.—A supplemental appropriation of $187,500 is included for 1951 to cover administrative costs of the two new programs of aid to federally overburdened school districts (Public Law 815 and Public Law 874, 81st Cong.). The original appropriation for this item, contained in the Supplemental Appropriation Act of 1951, provided 50 percent of the estimated need.

Grants for hospital construction.—A supplemental estimate for 1951 in the amount of $25 million has been included in order to provide additional cash to liquidate obligations heretofore incurred for hospital construction under the Hill-Burton program.

General aid for operating expenses, elementary and secondary schools.—Proposed legislation, for which $300 million is included in the 1952 budget, will provide Federal grants to equalize elementary and secondary educational opportunities in the several States. The purpose of this proposal is to assist the States in improving and expanding our basic elementary and secondary schools, in providing for mounting numbers of enrolled students, and in increasing the number of well-qualified teachers.

Aid to medical education and local health services.—The increasingly critical shortages of doctors, nurses, dentists, and public health personnel indicate the urgent need for Federal aid to encourage expansion of enrollments in accredited schools offering training in these professions. Legislation is proposed to authorize: (1) premium payments to medical, dental, degree nursing, and public health schools for each student enrolled in excess of its average past enrollment and smaller payments per student based on average past enrollment; (2) grants to medical, dental, degree nursing, and public health schools for construction of additional facilities; (3) grants to States for practical nurse training; and (4) scholarship aid to students in fields in which there is a shortage of qualified applicants, particularly nursing.

The civil defense program will confront many communities with important public health responsibilities. Moreover, shifts in population arising from stepped-up defense production and increased mobilization will place heavier burdens on many communities to provide adequate sanitation, protect food and water supplies, furnish preschool and school child health services, and otherwise to prevent disease and promote the health of its citizens. Yet, a sizable number of them lack the services of an adequately staffed local health department—even for their normal needs.

An estimate of $35 million is included for 1952 as the cost of proposed legislation for aid to medical education and for additional assistance to States for local health services, particularly in defense-affected areas.

Medical care insurance.—Modern medical care is expensive, and the impact of illness on family budgets is often disastrous. It is proposed to meet this problem through medical care insurance. Such a program would require a 2-year starting period before health benefits become available. During that time, a small payroll tax of one-half of 1 percent would be levied to accumulate a starting reserve, estimated at $275 million for 1952, and covered into a trust fund to defray initial administrative and developmental expenses. These expenses, which would be made directly from the trust fund, are estimated at $35 million for 1952.

INTRODUCTORY STATEMENT

The Administration's regular program operations are assigned to three services: Public buildings service, Federal supply service, and National Archives and records service. A fourth operating service, the emergency procurement service, has been established to conduct procurement services for programs of an emergency nature. Appropriate counterparts of these services have been established in each of 10 field offices in order to serve other Federal agencies and the public directly.

Regular operations of the Administration are provided for in a single appropriation item for "Operating expenses, General Services Administration." Specific, special, or emergency programs, such as building construction, the operation of supply stores, stockpiling, and others, are provided for in separate appropriation items.

Operating Expenses, General Services Administration—

Operating expenses: For necessary expenses of the General Services Administration not otherwise provided for, including: [Operation, maintenance, protection,] repair[,] and improvement of public buildings and grounds [to the extent that such buildings and grounds are] under the control of the General Services Administration [for any of such purposes (including the operation, maintenance, and protection of the District Court Building in the District of Columbia)]; rental of buildings [or parts thereof] in the District of Columbia [and elsewhere; the]; restoration of leased premises; moving Government agencies in connection with the assignment, allocation, and transfer of building space; [ground rent, which may be paid in advance where required;] demolition of buildings; furnishings and equipment; acquisition by purchase or otherwise and disposal by sale or otherwise of real estate and interests therein; [payment of sums in lieu of taxes accruing against real property declared surplus by Government corporations under the Surplus Property Act of 1944, where legal title to such property remains in the Government corporation; compliance with the provisions of the National Industrial Reserve Act of 1948 (50 U. S. C. 451ff); payment of per diem employees employed in connection with any of the foregoing functions at rates approved by the Administrator of General Services or his designee not exceeding current rates for similar services in the place where such services are employed; arms and ammunition for the guard force; purchase, repair, and cleaning of uniforms for guards and elevator operators;] purchase of not to exceed [twenty-three] *15* passenger motor vehicles *for replacement only; not to exceed $1,000 for purchase of newspapers and periodicals;* processing and determining net renegotiation rebates; liquidation of activities under the Act to promote the defense of the United States (55 Stat. 31); [scientific, technical and other apparatus and materials for the arrangement, titling, scoring, repair, editing, processing, duplication, and reproduction of photographic and other records (including motion-picture and other films and sound recordings) in the custody of the Archivist of the United States] and preparation of guides and other finding aids to records of the Second World War; [$78,500,000] *$114,400,000.*

[Section 322 of the Act of June 30, 1932, as amended (40 U. S. C. 278a) shall not apply to any lease entered into by, or transferred to, the General Services Administration, for the housing of agencies specifically exempted from the requirements of said section.]

The foregoing appropriation shall be credited with (1) advances or reimbursements for salaries and administrative expenses chargeable against other appropriations of the General Services Administration, and such salaries and expenses may be paid from this appropriation; [(2) advances or reimbursements for services, quarters, maintenance, or other facilities furnished other agencies on a reimbursable basis; (3)] *(2)* cost of maintenance, upkeep, and repair included as part of rentals received from Government corporations pursuant to law (40 U. S. C. 129); [(4)] *(3)* reimbursements for services performed in respect to bonds and other obligations under the jurisdiction of the General Services Administration, issued by public authorities, States, or other public bodies, and such services in respect to such bonds or obligations as the Administrator deems necessary and in the public interest may, upon the request and at the expense of the issuing agencies, be provided from this appropriation; and [(5) as respects property transferred to the General Services Administration pursuant to the Act of July 2, 1948 (50 U. S. C. 451ff), (a) advances or reimbursements for necessary utilities and services furnished private occupants of industrial plants, and such utilities and services may be provided at cost from this appropriation; (b) proceeds received from insurance against damage to such property, and such proceeds may, at the direction of the Secretary of Defense, be used to repair or restore the damaged property; and (c)] *(4)* appropriations or funds available to other agencies, and transferred to the General Services Administration, in connection with [such] property *transferred to the General Services Administration pursuant to the Act of July 2, 1948 (50 U. S. C. 451ff)*, and such appropriations or funds may, with the approval of the Bureau of the Budget, be so transferred.

[Appropriations or other funds available to the General Services Administration shall be available during the current fiscal year for personal services in the District of Columbia; health service programs as authorized by law (5. U. S. C. 150); printing and binding; purchase of newspapers and periodicals (not to exceed $400); preparation, shipment, and installation of photographic displays, exhibits, and other descriptive materials; and payment of tort claims pursuant to law (28 U. S. C. 2672).]

During the current fiscal year, no part of any money appropriated in this or any other Act shall be used during any quarter of such fiscal year to purchase *within the continental limits of the United States* typewriting machines (except bookkeeping and billing machines) at a price which exceeds 90 per centum of the lowest net cash price, plus applicable Federal excise taxes, accorded the most-favored customer (other than the Government, the American National Red Cross, and the purchasers of typewriting machines for educational purposes only) of the manufacturer of such machines during the six-month period immediately preceding such quarter.

No part of any money appropriated by this or any other Act for any agency of the executive branch of the Government (which shall include all departments, independent establishments, and wholly owned Government corporations) shall be used during the current fiscal year for the purchase within the continental limits of the United States of any typewriting machines (except typewriting machines for veterans under public laws administered by the Veterans' Administration) unless the Administrator of General Services certifies that he is unable to furnish such agency with suitable typewriting machines out of stock on hand. The Administrator of General Services is authorized and directed at such times as he may determine to be necessary to survey and determine the numbers and kinds of typewriting machines located in the continental limits of the United States which are at any time surplus to the requirements of any agency in the executive branch of the Government (which shall include all departments, independent establishments, and wholly owned Government corporations). Upon such determination, the Administrator of General Services is authorized to direct, upon such notice and in such manner as he may prescribe, the head of any such agency to surrender to the General Services Administration any and all typewriting machines surplus to its requirements, the costs of packing, shipping, and handling thereof to be charged to the general supply fund. Each such agency shall furnish the Administrator of General Services such information regarding typewriting machines, wherever located, as he may from time to time request. The General Services Administration is authorized and directed to receive, hold, sell, exchange, or supply to any branch of the Government, including the District of Columbia, typewriting machines surrendered to it hereunder. The Administrator of General Services is authorized to charge each agency to which typewriting machines are supplied hereunder amounts equal to the fair value thereof, as determined by him, and such amounts shall be credited to the general supply fund. *(Independent Offices Appropriation Act, 1951.)*

Appropriated 1951, **$78,500,000** Estimate 1952, **$114,400,000**
Appropriated (adjusted) 1951,[a] **$108,148,273**

[a] Includes $15,648,273 received by transfer from other agencies due to Reorganization Plans Nos. 18 and 20 of 1950 and $14,000,000 from the strategic and critical materials appropriation. Excludes $2,644,591 for activities transferred in the estimate to "Expenses, general supply fund." The amounts obligated in 1951 are shown as comparative transfers.

PROGRAM AND PERFORMANCE

The substantial increase of $35,900,000 in the estimate for 1952 over the appropriation for 1951 reflects equally substantial increases in workload and performance of operating activities due to the following general changes: (1) Transfer of functions from other agencies under Reorganization Plans Nos. 18 and 20 of 1950, amounting to $29,380,616; (2) covering into this appropriation certain buildings management services performed on a reimbursable basis for other agencies in 1951, amounting to $7,445,000; (3) normal increase in workload of buildings management services, $2,203,000; (4) advance from the planning stage to actual performance in the systems of property and records management, $3,062,860. Decreases in workload and performance under this appropriation which partially offset those increases total $6,191,476, consisting of (1) completion of lay-away phase of the National Industrial Reserve program, $2,935,027; (2) transfer of certain functions pertaining to the operation of the General Supply Fund to the new appropriation for that purpose in 1952, $2,644,591; (3) miscellaneous minor adjustments, $611,858.

1. *Public buildings service.*—This service plans, develops, and administers programs dealing with the acquisition, construction, utilization, management, and disposal of buildings and other real property and functions related thereto, as well as management of public utilities services.

The performance of two activities of this service which deal with buildings management is substantially greater than that provided for in the appropriation for 1951, due to the transfer from other agencies of 113 general purpose buildings under Reorganization Plan No. 18 of 1950.

(*a*) *Buildings management in the District of Columbia.*—Management, operation, maintenance, protection, and repair of 43,200,000 square feet of Government owned and leased space financed by direct appropriation in 1952 is an increase of some 2,300,000 square feet over that estimated for 1951, due principally to completion of the new General Accounting Building and the Federal Courts Building. Joint-use communications services and other

Federal Reserve Bank of St. Louis

Operating Expenses, General Services Administration—Continued

related special services in 1952 are relatively at the 1951 level. About 72 percent of this activity is financed by direct appropriation and the balance from reimbursements by occupying agencies.

Similar functions performed for space occupied by expanded Department of Defense, Selective Service, and defense connected agencies are supervised under this activity, although the operations are financed from other sources.

(*b*) *Buildings management outside the District of Columbia.*—Management, operation, maintenance, and protection of 50,200,000 square feet of Government owned and eased space financed by direct appropriation in 1952 is an increase of 5,400,000 square feet over that estimated for 1951.

Except for increased space acquired by the completion of new Federal buildings at Nashville, Tenn., and Columbia, S. C., almost the entire increase of this activity over 1951 has already been offset by reductions in the estimates for 1952 of other Federal agencies for (1) space operated during 1951 on a reimbursable basis, (2) payment for rents and related contracts covering 1,435 leases transferred to this Administration under section 1 of Reorganization Plan No. 18 of 1950, and (3) 111 general purpose buildings containing 16,800,000 square feet of space transferred to this Administration during 1951 under section 2 of Reorganization Plan No. 18 of 1950.

Similar functions performed for space occupied by expanded Department of Defense, Selective Service, and defense connected agencies are supervised under this activity, although the operations are financed from other sources.

(*c*) *National industrial reserve.*—Continued maintenance in lay-away condition of a reserve of 55 Government-owned industrial plants having a total residual acquisition cost of $663,000,000 is included in the 1952 estimate at a decreased cost of about 28 percent below the 1951 program. Continued maintenance of a reserve of machine tools and industrial equipment having an acquisition cost of approximately $12,000,000 for 1952 represents a decrease of about 50 percent under the 1951 program. Rehabilitation of certain industrial plants in 1951 is being supervised under this activity but accomplished with funds transferred from other sources.

(*d*) *Space acquisition and utilization.*—The use of 120,000,000 square feet of Government owned and leased space is controlled, leasing services for acquisition of rented space are provided, and maximum utilization of occupied space and excess real property throughout the executive agencies is promoted. Functions involving the servicing of approximately 2,600 leases were transferred in 1951 from other Federal agencies to this Administration under Reorganization Plan No. 18 and are being performed on a reimbursable basis. Amounts for servicing 1,435 of these leases have been deducted from the 1952 estimates of other agencies and this estimate increased accordingly. Servicing of the remaining leases will be continued on a reimbursable basis for 1952.

(*e*) *Surplus property management and disposal.*—Provision is made for protection and maintenance, pending disposal, of surplus real property with a declared value of $34,800,000 and the servicing of 710 mortgages and leases. Rescreening during 1951 of the current inventory for defense needs delayed disposals but may accelerate disposal of surplus real properties not required in the defense effort during 1952. Income from sales, mortgages, and leases is estimated at $67,750,000 for 1952.

(*f*) *Buildings design and supervision.*—Provision is made for a nucleus technical staff to supervise over-all regular and emergency programs involving design, construction, and remodeling of buildings.

(*g*) *Public utilities management.*—Technical engineering and utility rate studies are made, contracts negotiated, and the Government represented as a user of utilities services before Federal and State regulatory bodies, to obtain the most economical necessary utilities services. The increase for 1952 will make it possible to serve several important untouched areas which, when given adequate attention, should yield a substantial saving to Federal agencies requiring public utilities services.

2. *Federal supply service.*—This service manages the programs dealing with the procurement and supply of personal property and nonpersonal services, except public utilities services, and related functions for the civil agencies. The estimate for 1952 reflects a major shift in financing the activities of this service due to the proposal for a separate appropriation covering all of the expense of operating the Nation-wide supply system, much of which was provided by the operating expenses appropriation in 1951.

(*a*) *Supply management.*—Development of policies, regulations, procedures, and instructions pertaining to the Federal supply system is planned and coordinated. Biennial on-the-site surveys of 24 of 105 civil agencies which have sufficient supply problems to warrant such attention will be started in 1951. For 1952, 48 such surveys are scheduled.

(*b*) *Purchasing.*—Commodities and services of common use by civil agencies which are not feasible to supply through the stores system are procured by means of Federal supply schedule contracts against which the agencies place orders. The program for 1952 contemplates doubling the coverage of 1951 contracts by decentralizing the purchasing in the field, thereby including local sources and small-business enterprises.

(*c*) *Property utilization and disposal.*—Personal property which is declared excess by executive agencies is screened for need and transfer to other agencies or, if found to be surplus to the needs of the Government, is disposed of under the supervision of this staff. Initiation of an active program in 1951 is disclosing such substantial accumulations of idle property as to necessitate doubling the performance for 1952 in order to achieve satisfactory utilization or disposals.

(*d*) *Commodity specifications.*—Satisfactory standards of quality and other characteristics of commodities to be purchased are established by the development and establishment of Federal specifications. The program for 1952, as is the case in 1951, provides for keeping abreast with normal requirements for about 275 new or revised specifications, as well as a slight inroad into the backlog of 1,300.

(*e*) *Commodity cataloging.*—Provision is made for development of the civil-agency portion of the Federal catalog and collaboration with the Munitions Board cataloging agency in development of the portion covering items of common use between the civil and military agencies. Defense programs resulting from the international situation make it essential to accelerate preparation of the Federal catalog. The increase for 1952 provides for doubling the 1951 production rate.

(*f*) *Commodity inspection.*—Assurance that commodities purchased comply with specified standards of quality and other characteristics is provided by inspections of manufacturers' plant facilities, laboratory tests, and samples. Supervision of all such activities in the Administration is provided for here, as well as the performance of such services in connection with Federal supply schedule

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

contracts. Performance in 1952 will be about 50 percent above 1951, in order to cover the increase in numbers of such contracts.

(*g*) *Traffic management.*—A centralized service to all agencies provides an efficient and adequate source of data, rates, operating methods, and procedures, as well as a central point for negotiation with carriers as to rates and other matters concerning the transportation of Federal property estimated to cost some $400,000,000 annually. Facilities were provided for 1951 which would cover some 27 percent of traffic problems. The estimate for 1952 provides for a coverage of about 60 percent, with an estimated annual saving of some $5,000,000.

3. *Nat onal Archives and records service.*—This service is responsible for planning, development, and administration of programs which contribute to the establishment and continuation of a Government-wide system of records management, including the operation of the National Archives Establishment.

(*a*) *Records management.*—Prompt and systematic elimination of records from current offices is secured through on-the-site surveys; staff assistance is provided, including training personnel in records management procedures; guides and standards for agency programs, especially those restricting the creation of new records, are developed and promulgated. In 1952, 20 agency surveys will be made, as compared to 10 scheduled for 1951; 3 million feet of records will be scheduled for disposal in comparison to one million in 1951; and the development of standards, staff assistance, and training will be accelerated.

(*b*) *Records centers.*—Housing, administration, and systematic disposal of records not needed in the current work of Federal agencies is provided by a system of records centers, resulting in over-all economy and efficiency. In 1951, four regional Federal records centers were established in Washington, D. C., New York, Chicago, and San Francisco to handle some 400,000 cubic feet of records. In 1952, six additional records centers will be established, and the volume of records administered will be increased to 1,300,000 feet, resulting in space and equipment savings alone of $3,250,000.

(*c*) *Microfilming.*—Space required to store paper records is reduced by converting them to compact microfilm form, valuable permanent archives are preserved, and duplicates of vital Government documents provided for security reasons. The 1951 program deals with a pilot study to determine techniques and costs which will be continued through 1952.

(*d*) *National Archives.*—The selection, preservation, arrangement, cataloging, and servicing of the archives of the Federal Government comprise the regular functions of the National Archives. The 1951 program provides for limited activity on (1) identifying and cataloging records, with emphasis on the records of World War II agencies; and (2) repairing and preserving archives requiring rehabilitation. Slight increases in both of these functions are provided for in 1952. A 5-percent increase in reference services is expected in both 1951 and 1952.

(*e*) *Federal Register.*—The daily issue of the Federal Register, the Code of Federal Regulations, the United States Government Organization Manual, the slip laws, and the United States Statutes-at-Large are published.

(*f*) *Franklin D. Roosevelt Library.*—Manuscripts, books, prints, paintings, and other historical material received from Franklin D. Roosevelt and related materials acquired from his contemporaries are preserved, cataloged, and serviced. Opening of a major part of the Roosevelt papers in March 1950, has resulted in a continued increase of reference services. Work on the 80-percent backlog of unprocessed holdings will be continued in both 1951 and 1952.

4. *Executive direction and staff operations.*—The central office and 10 regional offices, the immediate staff of the Administrator, and staff officers provide financial management, administrative management, legal, informational, investigative, and related services for all of the activities financed by this appropriation. Operating services of similar nature for other programs are financed directly from the respective appropriations but are supervised by this staff.

OBLIGATIONS BY ACTIVITIES

Description	1950 actual	1951 estimate	1952 estimate
Direct Obligations			
1. Public buildings service:			
(*a*) Buildings management in the District of Columbia:			
(1) Rent	$1,463,049	$1,468,000	$1,873,000

PROGRAM AND PERFORMANCE

Sites are acquired and drawings and specifications prepared for a shelf of public buildings projects for future construction under a total authorization of $40,000,000.

As a result of the international situation, it was determined early in September 1950 to limit the program to acquisition of sites and design of defense-connected projects and those projects essentially needed to meet critical civilian requirements.

The revised program contemplates the acquisition of 94 of the authorized total of 415 sites, leaving 321 for future consideration. As of September 10, 1950, commitments for 81 of the 94 sites had been made and the balance is scheduled for commitment by June 30, 1951. The revised program also contemplates completion of design of 16 high-priority projects through June 30, 1952, leaving 444 for future determination.

Total obligations	9,026,902	10,973,725	5,000,000

PROGRAM AND PERFORMANCE

Federally owned buildings outside the District of Columbia are renovated and improved under a program for which appropriations of $30,000,000 are authorized. The authorization limits projects to those costing $25,000 or more and includes such items as expansion of mail-handling facilities, renovation and modernization of marine hospital facilities, improvement of lighting systems, and replacing boiler and heating equipment.

In comparison with the accomplishment of 91 high-priority major renovation and repair projects scheduled for 1951, 45 urgent projects are proposed for accomplishment in 1952 at a cost of $5,000,000. This will leave an unappropriated authorization of $5,000,000.

PROGRAM AND PERFORMANCE

Normal minor repairs, preservation, and equipment are provided for 5,435 Federal buildings outside the District of Columbia which were constructed or purchased at a cost of approximately $1 billion. The current workload includes buildings containing approximately 3½ million square feet transferred from other agencies to the jurisdiction of the General Services Administration pursuant to section 2 of Reorganization Plan No. 18 of 1950.

The program for 1952 contemplates the accomplishment of the most urgent repair and preservation work where the cost is less than $25,000. Projects costing $25,000 or more are provided for under a separate appropriation.

WORKLOAD BY ACTIVITIES

Repairs to buildings and equipment (square feet)—1950, 95,392,745; 1951, 98,841,670; 1952, 98,841,670.

UNIT COST BY ACTIVITIES

Repairs to buildings and equipment (average)—1950, $0.1041; 1951, $0.1012; 1952, $0.1012.

Strategic and Critical Materials, General Services Administration—

[For necessary expenses in carrying out the provisions of the Strategic and Critical Materials Stock Piling Act of July 23, 1946, including personal services in the District of Columbia; services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a); purchase of five passenger motor vehicles; and printing and binding; $605,000,000, to remain available until expended, of which $240,000,000 is for liquidation of obligations incurred pursuant to authority heretofore granted under this head; and in addition to the amount herein appropriated, contracts may be entered into for the purposes of the said Act of July 23, 1946, in an amount not in excess of $125,000,000: *Provided*, That any funds received as proceeds from sale or other disposition of materials on account of the rotation of stocks under said Act shall be deposited to the credit, and be available for expenditure for the purposes, of this appropriation: *Provided further*, That during the current fiscal year, there shall be no limitation on the value of surplus strategic and critical materials which, in accordance with subsection 6 (a) of the Act of July 23, 1946 (60 Stat. 598), may be transferred to stock piles established in accordance with said Act.]

[For an additional amount for carrying out the Strategic and Critical Materials Stock Piling Act of July 23, 1946 (50 U. S. C. 98), $598,637,370, of which not to exceed $14,000,000 shall be available for transfer to the appropriation "Operating expenses", for the reactivation of industrial plants under the provisions of the National Industrial Reserve Act of 1948 (50 U. S. C. 451–462).] (*Independent Offices Appropriation Act, 1951; Supplemental Appropriation Act, 1951.*)

PROGRAM AND PERFORMANCE

Strategic and critical raw materials needed in the national defense to supplement supplies expected to be available from dependable sources in an emergency period are acquired, stockpiled, and maintained. In addition to the amounts thus far appropriated for 1951, there is pending a further supplemental appropriation of $1,834,911,000. Since requirements for 1952 are not yet firm no estimate is being submitted to the Congress at this time. A tentative amount of $1,000,000,000 for 1952 is included in the Budget tables.

PROGRAM AND PERFORMANCE

The funds are for refund payments due war contractors upon approval of claims presented under the provisions of title VII of the Revenue Act of 1943. The indicated funds are to cover net amounts refunded to contractors after calculation of the Federal tax benefit, as well as interest costs which the Tax Court may order to be paid in a few instances.

As of July 1, 1950, there had been received 3,332 claims, aggregating over $125,396,000. The total program is estimated at 6,000 claims, with a gross dollar value of $226,000,000, resulting in net refunds of $56,000,000 after calculation of the Federal tax benefit.

In 1952, it is estimated that claims having a gross value of $40,200,000, will be cleared for payment at a net settlement value of $9,000,000. Experience over a 3-year period indicates that final payments average 22.4 percent of gross value of claims.

PROGRAM AND PERFORMANCE

The purchase of materials and services required by the various Federal agencies and the District of Columbia is financed by the General Supply Fund. The fund is charged with payments made for services and materials purchased and reimbursed with payments received from the various agencies of the Government to which the services and materials are sold (41 U. S. C. 7a–c). Any surplus arising out of the operations of the fund, determined as a result of audits made by the General Accounting Office, is returned to the Treasury as miscellaneous receipts.

The actual sales at cost for the fiscal year 1950 and the projected sales for the fiscal years 1951 and 1952, exclusive of interwarehouse transfers, and surplus typewriter sales follow:

Fiscal year	Stores issues	Direct delivery	Total
1950 actual	$25,863,977	$51,102,505	$76,966,482
1951 estimated	28,998,500	56,588,000	85,586,500
1952 estimated	117,412,280	61,588,000	179,000,280

During the fiscal year 1951 the total capital appropriated to the General Supply Fund was increased from $10,000,000 to $44,000,000 in order to expand the stores system to carry a more adequate stock of common use items required by the agencies.

The sharp increase over 1950 in stores issues estimated for 1952 is made possible by the increased capital. Partial effect of this increase is reflected in the estimated amount of stores issues and direct deliveries for 1951.

Pursuant to Public Law 754, Eighty-first Congress, availability of the fund is limited to recovery of the purchase price, the transportation cost to first storage point, inventory losses, the cost of personal services employed directly in the repair, rehabilitation, and conversion of personal property, and the cost of amortization and repair of equipment utilized for lease or rent to executive agencies. Expenses for operating the fund are provided for under the appropriation "Expenses, General Supply Fund."

Total obligations	5,566,381	6,467,801	18,426,000

PROGRAM AND PERFORMANCE

This item appears in the Budget as a separate appropriation for the first time to provide by direct appropriation funds necessary to operate the "General supply fund, General Services Administration." The general supply fund is a revolving fund through which the General Services Administration purchases materials required by the various Federal agencies and the District of Columbia, on a reimbursable basis.

During the fiscal year 1951 operating expenses are being financed from two sources: (1) indirect costs out of "Operating expenses, General Services Administration" and (2) direct costs out of surcharges paid on agency purchases under the general supply revolving fund.

Establishment in fiscal year 1952 of a direct appropriation to defray both types of costs, thereby consolidating all expenses of doing business in one item and at the same time obviating the need for surcharges payments by the agencies, is made possible under provisions of Public Law 754, approved September 5, 1950. That law, in amending the Federal Property and Administrative Services Act of 1949, limits the availability of the revolving fund, with some exceptions, to purchase price plus certain transportation costs, subject to a determination by the Administrator of General Services that appropriated funds are adequate to effectuate its purposes.

Expenses, General Supply Fund, General Services Administration—Continued

Provision is made in the appropriation for expanding the existing staff to the extent necessary to handle an estimated sales-at-cost of $150,000,000 during 1952. This represents an increase of 63 percent as compared with the $92,000,000 estimated for 1951. The substantial increase in sales is made possible by the increase in appropriated capital under the revolving fund from $10,000,000 to $44,000,000, approved in 1951 appropriation acts. Aside from certain nonrecurring costs necessary to expand the warehousing plants to accommodate the added volume of business estimated at $4,061,800, operating expenses are in direct proportion to the volume of business. The sum of $14,364,200 requested for recurring costs, including $2,805,200 for new space rental, is directly related to the estimated $150,000,000 sales-at-cost. Additional funds will be required if sales significantly exceed that level.

1. *Purchasing.*—Purchases are made of new stock items, for replenishment of warehouse and fuel yard stocks, and for direct delivery to the ordering agencies. Purchasing activities were decentralized to the field in November 1950 in order to increase participation of small business firms, avoid excessive transportation costs, and save delivery time. Stock and replenishment purchases during 1952 are estimated to increase 150 percent over 1951. Direct delivery purchases are estimated to increase by 9 percent.

2. *Stores operation.*—Items which are in common use by executive agencies are received, stored, and issued to ordering agencies through a Nation-wide system of supply centers. Solid and liquid fuels are furnished to Federal and District of Columbia agencies located in or near the District of Columbia. Sales-at-cost in 1952 are estimated to increase by 63 percent as compared with 1951. Provision is made for a corresponding increase in store facilities as well as personnel.

3. *Repair shops and equipment pools.*—Policies, regulations and procedures are developed pertaining to the Government-wide services of repair and rehabilitation of personal property and the maximum utilization of motor equipment. In addition, general supervision of the repair shops and equipment pools is provided. Direct labor and actual material costs incident to the repair work will continue to be paid out of the general supply fund from surcharges recovered from the requisitioning agencies. Provision is made for additional supervision resulting from the planned expansion of the Washington shops and the establishment of similar shops in 10 field locations.

4. *Commodity inspection.*—Materials purchased through the general supply fund are inspected for compliance with contract specifications. Inspections and tests are performed either at the manufacturing source, at General Services Administration laboratories, or by other laboratories especially equipped for the purpose. The increased volume of purchasing estimated for 1952 as compared to 1951 will increase the inspection and testing workload by approximately 42 percent.

5. *Traffic management.*—Transportation and traffic information service is provided in connection with freight movements incident to revolving fund operations.

6. *Staff operations.*—Legal, financial, administrative, informational, and investigative services incident to the revolving fund operations are provided under this activity. Provision is made for a 100-percent expansion in staff services incident to the 150-percent increase in volume of stock and replenishment purchases resulting from the increased capitalization of the revolving fund.

PROGRAM AND PERFORMANCE

This is to (1) purchase and remodel certain Federal buildings, (2) construct extensions to marine hospitals at San Francisco and Seattle, and (3) design public buildings for future construction. Total cost is limited to $13,000,000.

The purchase portion of the program has been completed, and it is contemplated that remodeling work will be completed during fiscal year 1951. Contract for an extension to the hospital at San Francisco was awarded June 15, 1950, for completion in 25 months. The program proposes the award of contract by June 1, 1951, for an extension to the marine hospital at Seattle for completion in 16 months. It is contemplated that all projects in this cumulative program for design of public buildings for future construction will be under way by the end of the 1952 fiscal year.

PROGRAM AND PERFORMANCE

Rental deposits received from commercial occupants of the Lafayette Building, Washington, D. C., are available to pay the costs of maintenance, upkeep, and repair of such space. Unobligated balances remaining therein at the close of each fiscal year are covered into miscellaneous receipts of the Treasury.

It is estimated that rental deposits for the 1952 fiscal year will total $38,400, of which $2,000 will be required for maintenance and $36,400 will be covered into miscellaneous receipts of the Treasury (62 Stat. 644).

OBLIGATIONS BY ACTIVITIES

Maintenance and operation—1951, $2,000; 1952, $2,000.

OBLIGATIONS BY OBJECTS

Miscellaneous—Continued

General accounts—Continued

Working Capital Fund, General Services Administration—Continued

PROGRAM AND PERFORMANCE

A central blueprinting, photostating, and duplicating service on an agency-wide basis is financed by a working capital fund established by the Independent Offices Appropriation Act of 1946, pending reimbursements from the accounts benefited. Surplus resulting from operation is required to be deposited into miscellaneous receipts of the Treasury. Through June 30, 1950, a total of $12,639 had been so deposited.

The duplicating plants of the component agencies transferred into General Services Administration were consolidated and placed under this fund as of May 1, 1950. This accounts for the increase in estimated obligations for 1951 and 1952 over 1950.

OBLIGATIONS BY ACTIVITIES

Reimbursable Obligations

Duplicating services performed—1950, $363,865; 1951, $750,000; 1952, $750,000.

PROPOSED FOR LATER TRANSMISSION

Strategic and critical materials.—Since requirements for 1952 are not yet firm, a supplemental under existing legislation will be proposed at a later date for approximately $1,000,000,000.

Dispersal of Government facilities.—Pending legislation would authorize the construction of Federal buildings at various locations in the area adjacent to the National Capital, including the provision of highway and communications facilities to connect these buildings with the Capital and with one another. This legislation would also authorize the decentralization of functions which could operate without significant loss of efficiency at a location removed from the National Capital or the adjacent area. The purpose of this legislation is to reduce the concentration of important Government functions now located in the congested central area of the District of Columbia through their dispersal to the adjacent areas. This would not only relieve the existing congestion in the District of Columbia but also make provision for the continuity of important Government functions in the event of an emergency. If this legislation is enacted a supplemental appropriation of $190,000,000 will be submitted for 1951 to finance operations over a 15-month construction period.

INTRODUCTORY STATEMENT

The major housing activities of the Federal Government are grouped in the Housing and Home Finance Agency, which consists of the Office of the Administrator and three main constituents: the Home Loan Bank Board, including the Federal Savings and Loan Insurance Corporation and the Home Owners' Loan Corporation; the Federal Housing Administration; and the Public Housing Administration.

The Administrator is responsible for the general supervision and coordination of the functions of these constituents, and serves as chairman of the National Housing Council. The Administrator is also responsible under the Defense Production Act of 1950 and delegations under Executive Order 10161 for the issuance of regulations governing residential loans made, insured or guaranteed by the Federal Government; for concurrence in regulations issued by the Federal Reserve Board relating to other real estate credit for new residential construction; and for serving as claimant agency for materials for all housing construction, alteration and repair, and for most community facilities.

Salaries and expenses of the Office of the Administrator, (except for the Federal National Mortgage Association and the prefabricated housing loans program), salaries and expenses for the United States Housing Act program of the Public Housing Administration, and annual contributions to local housing authorities for maintenance of the low-rent character of public housing projects are financed from appropriations. All other activities are financed from corporate or other funds available from operations of the Agency.

OFFICE OF THE ADMINISTRATOR

PROGRAM AND PERFORMANCE

The Office of the Administrator supervises and coordinates the housing programs and functions of the constituent units of the Agency and exercises direct responsibility for housing research; slum clearance and urban redevelopment; Alaska housing; college housing; prefabricated housing; advances for planning non-Federal public works; Lanham Act public works disposal; secondary mortgage market activities of the Federal National Mortgage Association; credit restrictions on residential loans made, insured, or guaranteed by the Federal Government, together with concurrence in regulations affecting other real estate credit; and the claimant agency function for housing and most community facilities materials. The Administrator is also responsible for the management and disposition of publicly financed war and veterans housing constructed under the Lanham and related acts, operating responsibility for which has been delegated to the Public Housing Commissioner.

1. *Agency-wide program coordination and supervision.*—Provision is made for general supervision and coordination of the Agency's programs and activities, for staff assistance and services to the National Housing Council chaired by the Administrator, and for the supervision of management and disposition of public war and emergency housing.

2. *Housing research program.*—Research is conducted in five major areas: (1) capital cost of housing; (2) building codes and local regulations; (3) residential design and construction practices; (4) housing credit and finance; and (5) market analysis and statistics.

Future research will be concentrated in areas most useful in serving the needs of a defense economy. Housing market analysis and collection and analysis of statistics will be mainly concerned with the needs of the Government for adequate data on which to base determinations concerning the necessity for adjustments in housing credit controls. Economic analysis will be directed toward study of housing requirements in the defense effort and development and interpretation of market indicators of special value for the administration of economic controls.

Technical research will aim at (1) conservation of both critical materials and manpower in the provision and operation of housing; and (2) development of housing standards and types to meet defense needs.

3. *Slum clearance and urban redevelopment program.*—

Capital grant commitments			40	88,600	95	166,500

PURPOSE AND FINANCIAL ORGANIZATION

Title I of the Housing Act of 1949 (Public Law 171, 81st Cong.) provides for a program of slum clearance and community development and redevelopment, and authorizes both temporary and definitive loans to local public agencies to enable them to undertake projects for the assembly, clearance, preparation, and sale or lease of land for redevelopment. Advances of funds finance the planning of local projects, while temporary loans provide for the acquisition and clearance of land and for the preparation of land for re-use purposes. Temporary loans are repayable when the land in the project area is sold or leased for redevelopment. Long-term loans, available to refinance those portions of project areas which are leased, are secured by the rentals from the leased land.

Title I also authorizes capital grants to defray up to two-thirds of the net project cost defined as the difference between the cost of acquiring and clearing slum areas and the proceeds received as these areas are made available for reuse. No special Federal assistance is provided under title I for building construction on the cleared sites.

The act contains an authorization of $1,000,000,000 in loans and $500,000,000 in capital grants for the conduct of the program. The loan authorization becomes available over a 5-year period beginning with $25,000,000 on July 1, 1949, and increasing by $225,000,000 on July 1, 1950, and by further amounts of $250,000,000 on July 1 of the three succeeding years. The authority to enter into contracts for capital grants is limited to five annual increments of $100,000,000 each, starting July 1, 1949.

ANALYSIS OF BUDGET PROGRAM

The complete cycle of work under this program consists of four stages—project planning, land acquisition and rehousing, land clearance and site preparation, and land disposition and permanent financing.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

During both the current and the budget years most federally assisted local programs will be in the project planning stage. By the start of the current year some 200 cities had applied for capital grant reservations. About 40 had applied for advances to finance project planning, and about the same number had requested prior approval of local expenditures for planning and other purposes eligible for inclusion in gross project costs. Assistance is given local officials in selection of sites, estimating land and redevelopment costs, determining future uses of land, and preparing plans for relocation of families in the project area. During the current year it is expected that 149 commitments for planning advances will be made, with 125 anticipated in 1952.

Conclusion of loan and grant contracts for 40 projects anticipated in the current year, and 95 projects in 1952 will bring the need for technical advice and inspection with respect to local financing of project costs, land acquisition, temporary or permanent relocation of families, and construction or reconstruction of streets and other public facilities.

Local public agencies are proceeding with the execution of loan and capital grant contracts for their slum clearance and redevelopment projects, but, in view of current conditions, all such contracts will include a requirement that demolition may not be commenced without express approval. Because of the time factors involved in the planning of slum clearance and redevelopment projects, and in the acquisition of land, which frequently involves condemnation, most projects will not reach this stage for a considerable period of time. Requests for approval to commence demolition, clearance, and disposition of the project areas for redevelopment will be granted only if consistent with the requirements of national defense.

No slum clearance and redevelopment projects are expected to reach the stage where capital grant payments will be required during 1952. Administrative expenses estimated at $1,598,000 for 1952 are included in the estimate of expenses for the Office of the Administrator.

Financial Review

The preponderant reliance on financing through bond issues of local governmental bodies backed by Federal loan commitments sharply reduces the requirements for loan funds as the budget program assumes that 70 percent of the projects will be financed by local bond issues, using Federal loan commitments as additional security. Net income to the program, stemming solely from the interest differential in 30 percent of the projects relying on Federal financing, is expected to increase from $52,000 in the current year to $450,260 in 1952 (exclusive of appropriations for administrative expenses). The increase in loans receivable from $10.2 million at the end of 1951 to $75.3 million at the close of the following year is paralleled by the rise in Treasury borrowings.

Available balance of contract authority	100,000,000	111,400,000	44,900,000

4. *Alaska housing program.—*

PROGRAM HIGHLIGHTS

[Dollars in thousands]

	1950 actual	1951 estimate	1952 estimate
Loans approved:			
Number	4	17	18
Number of units:			
Regular construction	298	485	425
Remote dwellings (native)	170	400	750
Amount	$3,481	$5,860	$5,240
Unused balance of loan revolving fund	$6,462	$191	$104

PURPOSE AND FINANCIAL ORGANIZATION

The Alaska Housing Act, Public Law 52, Eighty-first Congress, was enacted for the purpose of promoting the settlement and development of Alaska by facilitating the construction of necessary housing within the Territory by (1) liberalizing the mortgage insurance provisions of the National Housing Act to allow for the higher construction costs prevailing throughout Alaska; (2) expanding the operations of the Federal National Mortgage

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

Association to facilitate further participation of private capital in this program; and (3) authorizing a $15,000,000 revolving fund ($10,000,000 of which has been appropriated) for use when adequate private capital is not available for construction of housing.

Analysis of Budget Program

The revolving fund is used to purchase obligations of the Alaska Housing Authority for activating specific construction projects by (1) loans to private builders; (2) direct construction by the Authority where no private sponsor can be obtained; and (3) character loans of not more than $500 each for the improvement of native dwellings in remote areas of the Territory. Actual and estimated loan commitments for the fiscal years 1950, 1951, and 1952, are as follows:

[Dollars in thousands]

	1950 actual		1951 estimated		1952 estimated	
	Units	Amount	Units	Amount	Units	Amount
Preconstruction loans	(298)	($2,150)	(225)	($1,500)	(225)	($1,500)
First-mortgage loans (with construction advances)	298	3,418	375	4,200	375	4,200
Alaska Housing Authority direct contract construction			110	1,500	50	700
Character loans	170	63	400	160	750	340
Total	468	3,481	885	5,860	1,175	5,240

Preconstruction loans are for the purpose of assisting the private builder in obtaining and transporting building materials and are repaid from construction advances as the materials are put in place. Since as a rule such cases also involve first-mortgage loans from the Authority, preconstruction commitments shown above are not counted as adding to total units assisted or loan commitments. First mortgage loans, with provision for advances as construction proceeds, are chiefly to provide needed financing for operative builders producing single-family homes. Such housing is eligible for Federal Housing Administration insurance and the insured loans will be taken over by private financial institutions or by the Federal National Mortgage Association.

The Alaska Housing Authority will use loan funds for direct contract construction of urgently needed housing for sale or rental only in those instances where adequately equipped private sponsors cannot be obtained. Character loans are made to individuals or cooperatives for construction or improvement of dwellings located in remote areas of the Territory.

Administrative expenses of the Office of the Administrator, estimated at $108,300 in 1951 and $102,000 in 1952, in supervising the program and extending aid to the Alaska Housing Authority are provided by appropriation and are not reflected in statements for the revolving fund. A small staff has been engaged in formulating policies and procedures, reviewing loan requests from the Authority, providing assistance to the Authority in organizing its operations, and meeting the new problems encountered as the program emphasis shifts from the few major towns to the smaller and widely dispersed localities with equally acute housing needs.

Financial Review

Repayment of loans as projects are completed is expected to permit the revolving fund to care for a considerable volume of construction operations. Statement A shows for the 1952 fiscal year $11 million in loan disbursements and $7.6 million in repayments, leaving some $7.3 million in loans outstanding at the end of the period (statement C). Based on the probable disbursement and repayment of loans, the average amount outstanding has been estimated at $1.5 million and $6.2 million respectively in the 1951 and 1952 fiscal years. Interest on these amounts constitutes the only income of the program as shown on statement B.

5. *Program of housing loans to educational institutions*—

PROGRAM HIGHLIGHTS

	1951 estimate	1952 estimate
Loans committed	$15,000,000	$25,000,000
Loans disbursed	$1,000,000	$36,000,000
Units placed under construction	1,125	8,875

PURPOSE AND FINANCIAL ORGANIZATION

Title IV of the Housing Act of 1950 authorized the Administrator to make long-term low-interest loans to certain types of institutions of higher learning as an aid in providing housing for their students and faculties by new construction or conversion of existing structures. For this purpose the Administrator may issue and have outstanding notes and obligations for purchase by the Secretary of the Treasury in an amount not to exceed $300,000,000. On July 18, 1950, the President directed temporary suspension of the program in view of the international situation and rising defense needs. Since that time, authority to reactivate the program has been granted but only for defense-related college housing.

ANALYSIS OF BUDGET PROGRAM

The program planned is limited to $40 million in loans, to provide for some 9,000 accommodations in 40 projects, with 85 percent dormitory units and 15 percent family dwelling units. With the assurance of a Federal loan, an educational institution may often obtain bids for its bonds at less than the 2.75 percent interest charged

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

by the Government, and in all such cases private financing will be used. The Office of Education will assist by reviewing applications as to eligibility under statutory and program standards, and with respect to relative need in terms of single and married students and faculty.

The estimated $200,000 for administrative expenses required in 1952 is included in the consolidated appropriation estimates for the Office of the Administrator. Site inspection and audit costs will be met by payment of fixed fees from construction loan funds, as authorized by the appropriation language.

Financial Review

Disbursement of $1 million in the current fiscal year and $36 million in 1952 is anticipated (statement A).

The net margin of approximately three-quarters percent between the interest paid to the Treasury and that charged to the educational institutions is expected to produce a surplus of about $143,000 in 1952 (statement C) excluding appropriations for administrative expenses. It is anticipated that the objectives of the program will be accomplished without eventual cost to the Government.

PROGRAM AND PERFORMANCE

SECOND ADVANCE PLANNING PROGRAM

Interest-free repayable advances are made to States and other local public bodies for planning in advance needed public works and for financing the costs of surveys, engineering investigations, and plans preliminary to the construction of local public works. This function was transferred to the Agency from the General Services Administration by Reorganization Plan No. 17 of 1950.

Appropriations and contract authority totaling $25 million were made available in 1950 to initiate the $100 million program, authorization for which will expire in October 1951. In line with the general curtailment of all civilian public works programs, new contract authorizations available for 1951 were reduced by $15 million, and the remaining balance was apportioned to advance planning projects required for defense-connected and essential civilian needs.

With the authorization expiring in October 1951, $4.9 million of the total estimate of $6 million for 1952 will be used to liquidate prior contract authorizations; $975,000 is for administrative expenses of this program and $125,000 for the first advance planning program.

PROGRAM AND PERFORMANCE

FIRST ADVANCE PLANNING PROGRAM

A total of $65 million was appropriated under the War Mobilization and Reconversion Act of 1944 for interest-free repayable advances to State and local public bodies for the planning of useful non-Federal public works. The authority to make further commitments expired June 30, 1947. The program was transferred to the Agency from the General Services Administration by Reorganization Plan No. 17 of 1950.

Final payments and cancellations through 1951 are expected to reduce outstanding obligations as of June 30, 1951, to 140 projects representing $1,861,981. With availability of balances for liquidation of outstanding obligations expiring on June 30, 1951, payments on such obligations during 1952 will be made on certification of the Comptroller General under the Surplus Fund-Certified Claims Act of 1949, after completed plans are reviewed and approved. To this end the unexpended balance under "Public Works Advance Planning" as of June 30, 1951 (exclusive of the amount reappropriated to "Liquidation of Public Works Advance Planning") will be paid into the appropriation "Payment of Certified Claims."

Liquidation of Public Works Advance Planning, Office of the Administrator, Housing and Home Finance Agency—

[Liquidation of public works advance planning: Not to exceed $125,000 of the unobligated balance on June 30, 1950 of the funds made available for public works advance planning under title V of the War Mobilization and Reconversion Act of 1944 (58 Stat. 791) shall be available during the current fiscal year for administrative expenses incident to the liquidation of the activity for which said funds were appropriated, including the objects specified under this head in the Independent Offices Appropriation Act, 1946.] *(Reorganization Plan No. 17 of 1950, effective May 24, 1950; Independent Offices Appropriation Act, 1951.)*

OFFICE OF THE ADMINISTRATOR—Continued

FEDERAL NATIONAL MORTGAGE ASSOCIATION—Con.

Purpose and Financial Organization

The Federal National Mortgage Association provides a secondary market for Federal Housing Administration insured mortgages under authority of title III of the National Housing Act of 1934, and for Veterans Administration guaranteed mortgages as authorized by Public Law 864 (80th Cong.). On September 7, 1950, pursuant to Reorganization Plan No. 22, the functions, assets, and liabilities of the Association, together with personnel and unexpended balances of funds, were transferred from the Reconstruction Finance Corporation to the Housing and Home Finance Administrator.

The Administrator received the Association's $20 million in capital stock, $1 million in paid-in surplus, and the power to borrow from the Treasury the amounts necessary in conjunction with other assets to finance the purchase of $2.75 billion in mortgages. In return for the capital stock, paid-in surplus, and other assets, the Administrator issued notes to the Treasury, so that the interest-bearing investment of the Government (statement C) was increased by the $21 million representing capital and paid-in surplus. Public Laws 387 and 475 (81st Cong.), which raised mortgage purchasing authority to $2.75 billion, also revoked the previous authority to make commitments to purchase mortgages on completion of construction. The majority of the current outstanding commitments expire in March 1951.

Analysis of Budget Program

It is estimated that the purchase of mortgages will reach its peak in 1951, when 110,000 mortgages amounting to $770 million will be added to the Association's portfolio. A substantial proportion of these purchases will result from the commitments outstanding at the beginning of the year. A sharp drop in purchases is expected during 1952 in view of the elimination of purchase commitments and the reduction in total mortgage volume following application of more stringent credit restrictions.

Emphasis will be placed on the sales program for disposal of mortgages to approved buyers. It is estimated that mortgage sales in the amount of $630 million will be realized in 1952, an increase of $140 million over 1951.

The average portfolio maintained by the Federal National Mortgage Association will show a decrease during 1952, with a resultant decline in the mortgage servicing workload.

Administrative expenses.—It is estimated that economies effected by reorganization, consolidation of offices, and declining workload under present administrative and fiscal policies will permit a decrease from $4,512,800 in the current year to $3,600,000 in 1952 in the amount of administrative expenses under limitation.

Financial Review

Income and expense.—The net income for 1951 is estimated at $19.6 million and for 1952 at $16.5 million.

Revenues of the Association are derived primarily from three sources: Interest on mortgages held, premium on mortgages sold, and fees for purchase commitments. This latter source of earnings will cease with the purchases in 1951 under commitments made previous to the elimination of this authority. Based on projected program activities, the income earned should decrease from $51.4 million in 1951 to $43.6 million in 1952.

The principal items of expense are interest on borrowings used to purchase mortgages, fees paid for servicing mortgages, and administrative expenses. The decrease in program activity is reflected in reduced estimates of annual operating expenses from $31.8 million in 1951 to $27.1 million for 1952.

In 1951, it is estimated that $565.6 million will be provided by sales and repayments, $51.4 million from income, and $200.4 million from borrowings. Of these funds, the principal anticipated disbursements are $770 million for mortgage purchases and $31.7 million for operating and administrative expenses.

In 1952, the chief sources of funds will be $687 million from sales and repayments and $43.6 million from income. Funds will be applied primarily to mortgage purchases in the amount of $175 million, to operating and administrative expenses of $27 million and to repayment of borrowings in the amount of $531.4 million.

Financial condition.—Assets which totaled $1,068,044,744 as of June 30, 1950, are estimated to reach $1,282,052,952 by June 30, 1951, and to decline to $765,480,222 by June 30, 1952. The principal assets consist of mortgages, accruals, claims, and acquired security and collateral.

Liabilities totaled $1,068,044,744 as of June 30, 1950. It will be noted that virtually all of this amount is the investment of the Reconstruction Finance Corporation, comparable to the entries in subsequent years under "Investment of the United States Government." As of June 30, 1951, the $12,123,046 in liabilities consists of accruals, trust and deposit liabilities, and a reserve for accrued annual leave. Liabilities of similar content will decrease to $10,438,516 by June 30, 1952.

The investment of the United States Government comprises notes, capital stock, paid-in surplus, and earned surplus, all held by the Administrator, Housing and Home Finance Agency.

Operated largely with borrowed funds, the Government's investment varies with the size of the mortgage portfolio in the possession of the Association. The $1.1 billion at the end of 1950 (shown as a liability to the Reconstruction Finance Corporation), $1.3 billion projected for the close of the current year, and the $0.8 billion at June 30, 1952, closely approximate the investment in mortgage loans at the same dates.

Net effect on budgetary expenditures.—Net budgetary expenditures in 1950 amounted to $579,304,104 (included in Reconstruction Finance Corporation's expenditures). It is estimated that in 1951 expenditures will be $189,421,153 and that a budgetary credit of $530,259,870 will result in 1952.

PROGRAM OF LOANS FOR PREFABRICATED HOUSING

Program Highlights

	Sept. 7, 1950	1951 estimate	1952 estimate
Loans at year end:			
Outstanding balance	$20,031,561	$31,727,039	$35,185,681
Amount undisbursed	16,065,088	13,672,410	9,837,790
Principal:			
Disbursements		14,789,202	7,869,480
Repayments		2,243,724	3,503,838
Interest income		1,041,280	1,338,152
Reserves for losses	7,885,755	7,092,956	6,196,231

Purpose and Financial Organization

Reorganization Plan No. 23, effective September 7, 1950, transferred to the Housing and Home Finance Administrator certain lending functions of the Reconstruction Finance Corporation designed to provide Government financial aids to the prefabricated housing industry.

These lending functions, under section 102 of the Housing Act of 1948, and under sections 4 (a) (1) and 5 (d) (2) of the Reconstruction Finance Corporation Act, provide limited lending authority implemented by power to borrow from the Treasury. Although with differing limitations as to maturity and security required, the first two are revolving authorities for the purpose of loans to business enterprises for the production of prefabricated homes, for the production of prefabricated housing components, and for large-scale modernized site development. The authority for further lending under section 5 (d) (2) has expired, and principal repayments act to reduce the lending and borrowing authority.

The status of the lending authorities (in millions of dollars) at the time of transfer was as follows:

Section	Total lending authority	Number of loans	Commitments	Disbursed	Undisbursed
Sec. 102	$50.0	20	$28.2	$18.0	$10.2
Sec. 4 (a) (1)	6.9	14	6.9	.9	6.0
Sec. 5 (d) (2)	2.5	103	2.5	2.5	

Analysis of Budget Program

The budget program consists of:

1. *Normal loan disbursement and service operations.*—Heavy disbursements are taking place under the $16.2 million of undisbursed commitments transferred with the program, and repayments will assume increasing importance under the terms of the loans.

2. *Problem loans.*—A number of loans in actual or imminent default will require special attention.

3. *Loan applications.*—A number of loan applications were transferred with the program or have been subsequently received. Some of these applications represent additional financing for present borrowers, while some are new proposals.

In all three areas other factors must be considered at this time in addition to the elements of business risk, especially the value that prefabricated housing may have in the defense effort from the standpoint of mobility and reduction in site labor requirements in areas of acute manpower shortage.

It has been assumed that substantially all the remaining authorization, plus repayments under the revolving authorizations, will be committed during the current and the next fiscal year. It is further assumed that disbursements approximating 50 percent of this amount will be made in fiscal 1952, with the remainder occuring in the following fiscal year. There will be net disbursements of $12.5 million in the current year, principally under commitments transferred, and $4.4 million in 1952 under new commitments.

Administrative expenses are estimated at $150,000 for fiscal 1951 and $185,000 for the budget year. The $150,000 was transferred from the Reconstruction Finance Corporation limitation for slightly less than 10 months of operation during 1951. The $185,000 request for fiscal 1952 is based on conservative assumptions as to the possibilities of standardization in loan servicing and as to favorable experience in correcting present problem loans.

Financial Review

As a measure of the reserves for losses that should be established, the value of collateral as appraised prior to the transfer was deducted from the outstanding loan balances and associated receivables. Reserves against losses on loans, accrued interest, and other receivables were accordingly established, as of September 7, amounting to $7,885,755 against the $20,170,297 in gross loans and receivables transferred. A deficit of like amount appears on the balance sheet.

It is assumed that over $2 million in loans will be liquidated through bankruptcy or receivership in the next 2 years, resulting in charge-offs to the reserves of $850,000 and $907,000 in the respective fiscal years, after recoveries of approximately 15 percent. With respect to accrued interest receivables, further increments to the reserves will be made in amounts equal to further interest accruals prior to the assumed liquidation dates. With regard to remaining doubtful loans, it has been assumed that further loans, following reorganization of the borrowing companies, will restore financial health to a point permitting resumption of interest payments.

HOME LOAN BANK BOARD

PROGRAM HIGHLIGHTS

[As of June 30, 1950, 1951 and 1952. Dollars in thousands]

	1950 actual	1951 estimate	1952 estimate
Number of members	3,898	4,025	4,150
Total assets of members	$15,400,000	$16,700,000	$18,100,000
Savings invested in members	$13,200,000	$14,600,000	$16,100,000
Mortgage loans of members	$12,100,000	$13,400,000	$14,500,000
Insured institutions examined and supervised	2,799	2,925	3,050
Federal home-loan bank advances outstanding	$443,000	$600,000	$550,000

PURPOSE AND FINANCIAL ORGANIZATION

The Home Loan Bank Board, consisting of three members, was created by Reorganization Plan No. 3 of 1947 for the purpose of supervising the operations of the 11 Federal home-loan banks, the Federal Savings and Loan Insurance Corporation, and the Home Owners' Loan Corporation (in liquidation).

The Federal home-loan banks were originally organized in 1932 (47 Stat. 725) to provide credit facilities for their respective members (savings and loan associations, homestead associations, savings banks and insurance companies which are eligible for membership). The banks extend credit to their membership by making short- and long-term advances to meet their current and prospective needs; the banks are also authorized to make advances to nonmember mortgagees approved under title II of the National Housing Act.

ANALYSIS OF BUDGET PROGRAMS

The Board's budget for 1952 is based on six programs: (1) Executive direction and administrative services; (2) examination and supervision of Federal home-loan banks; (3) supervision of Federal and State-chartered insured savings and loan associations; (4) chartering of Federal savings and loan associations and branches thereof; (5) examination of savings and loan associations; (6) fiscal and housekeeping services.

1. *Executive direction and administrative services.*—The Board is responsible for over-all direction, coordination, and the formulation of basic policy with respect to its activities and programs. As a continuing result of the Board's general reorganization of its staff units in 1949, the estimated financial requirements for this activity in the fiscal year 1952 are below the levels of expenses in the current and preceding year.

2. *Examination and supervision of Federal home-loan banks.*—The Board examines, at least annually, and supervises the operations of the Federal home-loan banks. Expenses of this activity are met from assessments upon the banks. The banks are also subject to an annual audit by the Corporation Audits Division of the General Accounting Office.

3. *Supervision of Federal and State-chartered insured savings and loan associations.*—In order to prevent the development and continuance of unsound financial practices, and to assure compliance with governing laws and regulations, the financial condition and operations of each insured institution, as disclosed in supervisory examination and other reports, is analyzed, and corrective action is instituted when warranted. This work is under the direction of the Board's chief supervisor and performed by designated officers of the Federal home-loan banks. Supervision of insured institutions operating under State charter is carried on cooperatively under arrangements made with the respective State authorities.

During the year ended June 30, 1950, the number of supervised institutions increased from 2,691 to 2,799; and their assets increased more than $2 billion to a total of $12.5 billion. In the same period they made over $3.7 billion of mortgage loans, of which a substantial portion was for financing the construction of homes.

4. *Chartering of Federal savings and loan associations and branches thereof.*—Federal savings and loan associations are chartered and regulated under authority of the Home Owners' Loan Act of 1933, as amended (48 Stat. 128); the Federal Home Loan Bank Act, as amended (47 Stat. 725); and in title IV of the National Housing Act (48 Stat. 1246).

In the case of new organizations, it is the Board's responsibility to see that standards of character, need, usefulness, and integration with local home financing patterns are met before approving grant of charter.

HOME LOAN BANK BOARD—Continued

Applications of State-chartered associations for conversion into Federal savings and loan associations are considered upon the basis of a careful analysis of the association's financial condition and trends, management and operating policies with respect to lending, liquidity, reserve and other financial practices.

During 1950, 28 charter applications were acted upon. It is estimated that 30 applications will be processed in each of the fiscal years 1951 and 1952.

5. *Examination of savings and loan associations.*—The Board's Examining Division conducts supervisory examinations of Federal savings and loan associations, State-chartered associations insured by the Federal Savings and Loan Insurance Corporation, and such uninsured member institutions of the Federal home loan bank system as are not examined by State examiners. Examination is also made of institutions applying for membership in the bank system, for insurance of accounts, or for conversion from State to Federal charter, when required by the Board.

At the beginning of fiscal year 1950 there were 2,691 insured institutions with total assets of $10.5 billion. At the start of the current year there were 2,799 associations with aggregate assets of $12.5 billion.

The costs of examinations and audits are assessed against the institutions examined. The estimated expenses of the Division, applicable to 1952, are in relation to the examination program and, due to the increasing growth, both in number and assets of the institutions to be examined, are slightly above the level of the current and preceding years, respectively.

6. *Fiscal and housekeeping services.*—This activity embraces auditing; accounting, budgetary and financial reporting; internal budget control and fiscal organization and management; general housekeeping and common operating services, including agency-wide facilities for printing and reproduction work. The estimated gross expenses of this activity, applicable to the fiscal year 1952, are approximately 7 percent less than the amount provided in the fiscal year 1951 and 5 percent less than was actually incurred in the fiscal year 1950.

Administrative Expenses

The Board's administrative expenses, which are payable wholly out of income derived from assessments and charges for services and facilities furnished, amounted to $823,000 in 1950 and are estimated at $792,494 in 1951 and $750,000 in 1952. The financial requirements for administration in 1952 are in direct relation to the estimated costs of carrying out the general supervisory and operating programs of the Board.

Financial Review

The Board is not incorporated, thus it has no capital stock issued or outstanding. Its assets consist of cash on deposit with the Treasurer of the United States and accounts receivable from the several beneficiaries of the services which it renders. Its liabilities consist essentially of accounts payable. Since income is estimated only in an amount necessary to defray all expenses, the net effect on budgetary expenditures will be nominal.

HOME LOAN BANK BOARD—Continued

SCHEDULE C–1.—*Home Loan Bank Board: Position with respect to borrowing authority*

NOTE.—The Home Loan Bank Board has no borrowing authority.

Administrative Expenses, Home Loan Bank Board—

Home Loan Bank Board: Not to exceed a total of [$455,000 to] *$750,000 shall be available for administrative expenses of the Home Loan Bank Board, including the purchase of one passenger motor vehicle for replacement only, and shall* be derived from *funds available to the Home Loan Bank Board, including those in* the special deposit account established under the provisions under the head "Federal Home Loan Bank Administration" in the Independent Offices Appropriation Act, 1944, and [from] receipts of the Federal Home Loan Bank Administration, the Federal Home Loan Bank Board, or the Home Loan Bank Board for the current fiscal year and prior fiscal years, [shall be available during the current fiscal year for administrative expenses of the Home Loan Bank Board, including health service program as authorized by law (5 U. S. C. 150),] and the Board may utilize and may make payment for services and facilities of the Federal home-loan banks, the Federal Reserve banks, the Federal Savings and Loan Insurance Corporation, [the Home Owners' Loan Corporation,] and other agencies of the Government: *Provided*, That all necessary expenses in connection with the conservatorship of institutions insured by the Federal Savings and Loan Insurance Corporation and all necessary expenses (including services performed on a contract or fee basis, but not including other personal services) in connection with the handling, including the purchase, sale, and exchange, of securities on behalf of Federal home-loan banks, and the sale, issuance, and retirement of, or payment of interest on, debentures or bonds, under the Federal Home Loan Bank Act, as amended, shall be considered as nonadministrative expenses for the purposes hereof: *Provided further*, That notwithstanding any other provisions of this chapter, except for the limitation in amount hereinbefore specified, the administrative expenses and other obligations of the Board shall be incurred, allowed, and paid in accordance with the provisions of the Federal Home Loan Bank Act of July 22, 1932, as amended (12 U. S. C. 1421–1449). (*Independent Offices Appropriation Act, 1951.*)

EXAMINING DIVISION, HOME LOAN BANK BOARD

The Examining Division conducts regular periodic and special supervisory examinations of all Federal savings and loan associations, of State-chartered savings and loan associations which are insured by the Federal Savings and Loan Insurance Corporation, and of such noninsured member institutions of the Federal Home Loan Bank System as are not subject to State supervision. When required by the Board, the Division also examines and analyzes the financial condition of savings and loan associations which apply for membership in the Bank System, for insurance of accounts, or for conversion from State to Federal charter.

In addition to a regular periodic examination, insured institutions are required to have an audit; approximately

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

80 percent of the associations exercise their option of having the Examining Division expand its examination to include such audit. The institutions examined bear the costs of examination, and the fees charged for examining work are calculated to meet all of the operating expenses of the Division.

The following table reflects, for the fiscal years indicated, comparative data regarding factors principally influencing the work program and staffing requirements of the Division:

	1950 actual	1951 estimate	1952 estimate
Examinations completed or to be completed	2,450	2,450	2,450
Average assets of insured institutions (start of year)	$3,891,167	$4,471,300	$5,043,000

FEDERAL HOME LOAN BANKS (MIXED-OWNERSHIP CORPORATIONS)[1]

[Submitted under the Government Corporation Control Act]

Under the provisions of the Federal Home Loan Bank Act, approved July 22, 1932 (47 Stat. 725), Congress created a reservoir of credit by authorizing the Federal Home Loan Bank Board to establish Federal home-loan banks throughout the country from which home-financing institutions might secure funds to meet the reasonable withdrawal requests of their investors and supplement the savings ordinarily received from individual citizens to meet the home-financing needs of their communities. The Federal home-loan banks created under the act, and the building and loan associations and similar institutions which are members of these banks, constitute the Federal Home Loan Bank System. It was designed to stabilize and strengthen institutions promoting private thrift and individual home ownership. It performs substantially the same function in the field of home mortgage credit as the Federal Reserve System performs as a credit reserve for commercial banks, and the Federal land banks perform in the field of farm finance.

The Federal home-loan banks, defined as mixed-ownership corporations by the Government Corporation Control Act of 1945 (Public Law 248, 79th Cong.), obtain their funds from subscriptions to capital stock, the issuance of their own obligations, and deposits of member institutions. The capital stock of the banks consists of subscriptions of the United States Government and of member institutions. The Secretary of the Treasury was authorized by the Congress to subscribe to the capital stock of the Federal home-loan banks up to the total amount of $125 million. The amount thus subscribed and paid in full aggregated $124,741,000, of which $49,519,100 had been retired as of June 30, 1950, leaving a Government interest in the banks of $75,221,900. Ownership of stock was transferred as of July 1, 1947, from the Reconstruction Finance Corporation to the Secretary of the Treasury, under the provisions of Public Law 132, Eightieth Congress. Under the provisions of the Federal Home Loan Bank Act, as recently amended, it is estimated that approximately $60 million of the Government owned stock will be retired during the current fiscal year, and the remainder by June 30, 1952.

There follows a condensed consolidated statement of the financial condition of the banks as of June 30, 1950.

ASSETS

Cash:	
On deposit with Treasurer of the United States	$6,627,395

FEDERAL SAVINGS AND LOAN INSURANCE CORPORATION

[Submitted under the Government Corporation Control Act]

Program Highlights

[As of June 30, 1950, 1951, and 1952. Dollars in thousands]

	1950	1951	1952
Number of insured institutions	2,799	2,925	3,050
Insured liability	$10,500,000	$12,300,000	$13,700,000
Number of insured savers	7,663,000	8,800,000	9,800,000
Assets of insured members	$12,515,000	$14,100,000	$15,800,000
Reserves and undivided profits of insured institutions	$843,644	$1,000,000	$1,150,000
Corporation's reserve for insurance losses	$88,205	$99,295	$111,772

Purpose and Financial Organization

The Federal Savings and Loan Insurance Corporation was created in 1934 with a capital stock of $100,000,000, pursuant to title IV of the National Housing Act, for the purpose of insuring savings accounts up to $5,000 in all Federal savings and loan associations and in those State-chartered savings and loan institutions which apply and are approved for insurance. In 1950, the insurance limit was raised to $10,000 by Public Law 797, Eighty-first Congress. On June 30, 1950, the 2,799 insured associations had resources of $12.5 billion, representing approximately 80 percent of the assets of all savings and loan associations. The Corporation's insurance liability on these institutions aggregated $10.5 billion.

Major changes in the financial organization of the Corporation occurred in 1950 under Public Laws 576 and 797, Eighty-first Congress. These changes may be summarized as follows: (1) beginning with 1951, annual retirement of capital stock held by Secretary of the Treasury in an amount equal to 50 percent of net income for each fiscal year, and annual payment to him of a return on the average amount of capital stock outstanding; (2) payment to the Secretary of the Treasury of an amount equal to 2-percent interest per annum on the capital stock of $100,000,000 from June 27, 1934, to June 30, 1950, less any amount previously paid as dividends; on June 30, 1950, the Corporation paid him approximately $29,000,000 in lieu of all unpaid dividends on its capital stock; (3) rescission of the Corporation's authority to issue notes, bonds, debentures, and other obligations in the open market, and substitution of authority to borrow from the Treasury for insurance purposes, not exceeding $750,000,000 outstanding at any one time; the program for 1952 does not contemplate any borrowing; (4) reduction of the premium rate from one-eighth of 1 percent to one-twelfth of 1 percent of the total amount of accounts of insured members and creditor obligations of each insured institution after June 30, 1949; (5) provision for termination of insurance by either a State-chartered insured institution or the Corporation, with coverage and premiums continuing for a 2-year period after the date of termination; (6) increase in the amount of insurance from $5,000 to $10,000 for each account, increasing the percentage of accounts fully insured from 93.8 to 99.2 percent and the insurance liability of the Corporation from $10.5 billion to $11 billion; (7) elimination of authority to settle insurance by the issuance of a new insured account or 10-percent cash and 90 percent in negotiable non-interest-bearing debentures at the option of the account holder, and substitution of a new insured account or cash at the option of the Corporation.

The Corporation obtains its funds from insurance premiums and interest on investments. It operates under the supervision and direction of the Home Loan Bank Board, which provides certain administrative services and conducts the examination and supervision of insured institutions. The costs of examinations are borne by the institutions examined while the cost of all other services rendered by the Board are reimbursed by the Corporation.

Analysis of Budget Program

The budget program comprises the five following broad functions: (1) underwriting; (2) prevention of default; (3) payment of insurance; (4) analysis of operations; and (5) executive direction and fiscal and other administrative services.

1. *Underwriting.*—On June 30, 1950, the amount of the assets of insured institutions had increased 16 percent over those at the end of the previous fiscal year. At the anticipated rate of growth, including the admission of 126 new insured members in 1951 and 125 in 1952, the insured liability may reach $13,700,000,000 by June 30, 1952. The large increase during the past 10 years in the amount of savings protected by the Corporation may be observed by comparing this sum with the insured liability of $2,057,000,000 as of June 30, 1940.

2. *Prevention of default.*—The Corporation has the statutory authority to make loans, purchase assets, or make a cash grant whenever advisable. To date the Corporation has not made any loans but it has prevented the default of 28 insured associations by making cash grants. Three of such actions were accompanied by voluntary liquidations, 6 were made in connection with mergers, and in 19 cases continued operation was permitted on a sound basis. Total cash grants for prevention of default have aggregated $5,374,125 of which $475,797 has been recovered, leaving a net loss of $4,898,328 to June 30, 1950. During 1950 the Corporation found it necessary to make its first purchase of assets in order to prevent the default of a State-chartered institution. This action required the disbursement of approximately $4,405,000 for which the Corporation acquired title to all assets of the institution. Liquidation of these holdings is taking place as rapidly as is consistent with sound operations. It is not anticipated that the loss will exceed 3 percent of the total disbursement. Both grant and purchase activities have protected the savings of 57,558 investors against the losses they would have experienced if the institutions had not been insured.

As part of its preventive program, the Corporation works closely with the supervising department of the Home Loan Bank Board, collects and interprets financial data for certain areas and specific institutions, and is making a more intensive analysis of applicants for insurance by field inspections when necessary.

3. *Payment of insurance.*—If an insured institution is placed in liquidation because prevention of default is neither prudent nor economical, the Corporation pre-

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

viously fulfilled its insurance contract by making available to each insured investor, at his option, either a new insured account in an insured institution not in default or 10 percent of his insured account in cash and the balance of 90 percent in negotiable non-interest-bearing debentures. Since 1934 the Corporation has provided for liquidation of only seven institutions with aggregate assets of $9,209,816. Of the 7,705 investors accounts amounting to $7,557,214, over 93 percent had been settled by June 30, 1950. Only 527 account holders have not requested settlement of insurance. Total losses to date from this operation are $309,434.

Under Public Law 797, Eighty-first Congress, the Corporation will no longer settle insurance by the issuance of 10 percent in cash and 90 percent in debentures. In the future each account holder will receive all cash or a new insured account in another institution in the same community.

When an insured institution declared in default is a Federal savings and loan association, the Corporation is appointed as receiver for the purpose of liquidation. Payment of insurance takes place in a relatively short period of time—most of the accounts being presented for payment within the first few months and approximately 90 percent in the first year. However, liquidation of the assets requires a longer period of time in order to avoid undue disturbance of the real estate market, as well as to obtain the maximum recovery from assets of the receivership.

4. *Analysis of operations.*—Constant study of the financial condition of member institutions, evaluation of reserves and liquidity positions, and observation of the flow of savings and of the character and volume of mortgage lending furnish invaluable information to the Corporation in connection with its other activities. Certain analyses of general economic conditions are made available to member institutions and the public at large as illustrated by the Corporation's mortgage recording study, which is the only one available in the United States.

This activity has greatly increased because of the credit restrictions recently placed on home mortgage lending.

5. *Executive direction and fiscal and other administrative services.*—Provision is made for all administrative services as well as management and direction.

Administrative expenses.—The authorization of $435,000 requested for 1952 is based upon the assumption that there will be no abnormal demands on the resources of the Corporation. The substantial reduction in the amount requested as compared to the authorizations approved for 1950 and 1951 is due to the exclusion of administrative costs of the Home Loan Bank Board in the amount of $289,234. This sum appears as an expense of the Corporation on exhibit B but is included in the authorization request of the Home Loan Bank Board to whom the funds will be advanced to cover a pro rata share of the Board's administrative expenses.

Since the time and size of expenditures for payment of insurance and prevention of default are unpredictable, estimates of these expenditures are omitted from the financial statements, nor has provision been made in the requested authorization for the natural increases in costs of administration which accompany such operations. The budget program of the Corporation is designed to preserve the present nucleus of competent and experienced personnel, to permit the Corporation to minimize or avoid unfavorable developments, and to handle the anticipated number of applications for insurance of accounts.

Financial Review

Operating results.—Revenues of the Corporation are derived primarily from insurance premiums collected from insured institutions and from income on investments in United States Government obligations. Total income since organization of $131,290,890 has been applied as follows:

	Percent	Amount
Expenses	4.4	$5,728,337
Insurance losses (net)	4.0	5,340,628
Return on capital stock	24.4	32,016,439
Legal reserve	67.2	88,205,486

The Corporation expects a reduction of one-third in its annual premium income due to the adoption of Public Law 576, Eighty-first Congress. When the current rate of one-twelfth of 1 percent of insured accounts and creditor obligations was applied to the operations for 1950, premium income was reduced approximately $4 million. In addition the payment of a return on the capital stock since organization required the Corporation to dispose of approximately $29 million of securities. The annual interest loss on these investments is about $580,000. Another item which will reduce the annual income of the Corporation is the provision in Public Law 576 for the payment of the equivalent of an annual interest charge to the Secretary of the Treasury on the average amount of capital stock outstanding. For 1950 this charge amounted to $2 million. However, as a result of the anticipated increases in the insurance liability, the premium income at the lower rate should amount to $10,507,800 in 1952, which compares favorably with the premium income for 1949, the last year in which a rate of one-eighth of 1 percent was in effect.

In the absence of insurance losses or payments of insurance, all receipts in excess of expenses are invested in United States Government obligations or obligations guaranteed as to principal and interest by the United States. Due to anticipated growth of the insured institutions and the investment of premiums and interest received, the Corporation estimates investment income at $4,589,300 for 1952. In 1950 investment income amounted to $4,813,998.

Assets.—Total assets of the Corporation as of June 30, 1950, amounted to $195,136,387, a decrease of $15,475,876 since the beginning of the year. Without the payment to the Treasury of a $29,000,000 return on capital stock, the Corporation would have reflected a substantial increase in assets during the year. If no insurance losses should occur, total assets are expected to reach $211,644,581 by June 30, 1952.

Liabilities.—The Corporation has no outstanding obligations except current liabilities. Unearned insurance premiums represent premiums billed for insurance of accounts to be taken into earnings over the insurance year of each institution. Prepaid insurance premiums are the result of the retroactive adjustment granted by Public Law 576, Eighty-first Congress. This amount will be applied against premium charges during the current year.

Investment of United States Government.—Under Public Law 576, the Corporation will begin to retire the capital stock of $100,000,000 held by the Secretary of the Treasury in 1951. Assuming a substantial growth in the size of insured associations, it is anticipated that the Corporation may be able to retire all capital stock in 10 to 15 years. During such period the Corporation will pay the

Federal Reserve Bank of St. Louis

HOME LOAN BANK BOARD—Continued

FEDERAL SAVINGS AND LOAN INSURANCE CORPORATION—Continued

Treasury a return on the average amount of capital stock outstanding at a rate to be determined by the Secretary of the Treasury.

The National Housing Act, as amended, requires accumulation of a reserve of 5 percent of all insured accounts and creditor obligations of insured institutions before collection of premiums may be discontinued. As of June 30, 1950, this statutory requirement would have amounted to approximately $525,000,000. The reserve for insurance losses of the Corporation at that date amounted to $88,205,486 or 0.84 percent of the insurance liability.

Prior to the passage of Public Law 576 the net increase in the reserve would have amounted to between $15,000,000 to $17,000,000. In 1950 the Corporation credited approximately $10,000,000 in earnings to the reserve. Beginning in 1951, the Corporation will retire capital stock equivalent to one-half the net earnings of each fiscal year. Consequently, the annual net increase in capital and reserves of the Corporation is estimated at less than one-third of the previous annual increase. Anticipated net income of $11,089,700 in 1951 and $12,476,866 in 1952 should increase the reserve to $111,772,052 by June 30, 1952. During the same period capital stock is expected to decrease from $100,000,000 to $94,455,100.

Because of the estimated insurance liability on June 30, 1952, and the statutory requirement with respect to reserves, the Corporation does not contemplate returning any earned surplus to the Treasury.

Purpose and Financial Organization

The Home Owners' Loan Corporation is a wholly owned Government corporation, organized under the Home Owners' Loan Act of 1933, as amended, as an emergency instrumentality to refinance the mortgages of distressed urban home owners. The Corporation's lending authority expired on June 12, 1936, and since that date its efforts have been devoted to the realization of home-owner accounts and other assets.

The capital stock of the Corporation, amounting to $200 million, was subscribed and paid for and is held by the Secretary of the Treasury.

The Corporation was authorized to issue $4,750 million of bonds, exclusive of issues for refunding purposes. As of June 30, 1950, a total of $3,489,453,550 of bonds had been issued for value, all of which had been retired. In addition, $126 million of the $200 million capital stock had been retired.

Analysis of Budget Program

From June 12, 1936, the date the last loan was closed, until recently, the Corporation's principal objective has been the orderly realization of assets, the liquidation of liabilities, and operations incidental thereto. The activities of the Corporation fall into three primary classifications: (1) the servicing of active accounts; (2) the termination of accounts through regular payments in full by borrowers; and (3) the termination of accounts by sale or assignment to financial institutions or other investors. A related activity is classified as management and administrative services.

1. *Servicing active accounts.*—This comprises all operations in connection with the maintenance of home-owner accounts prior to termination, all transactions related to the investment of corporate funds in shares of savings and loan associations and their realization, the normal liquidation of liabilities including retirement of the Corporation's bonded indebtedness and capital stock, and all fiscal services and overhead not classified as management and administrative services or costs attributable to the final termination of accounts.

2. *Termination of accounts by regular payments in full.*—In recent years of high income the Corporation actively encouraged its borrowers to make payments in advance in order to clear their homes of indebtedness at the earliest possible date. This program was very successful, particularly during the war and the postwar periods.

In March 1948 a special program of accelerated liquidation was instituted in those States in which aggregate loan balances owing to the Corporation were $1 million or less. The mortgagors were circularized by letter requesting that they refinance or pay their accounts in full. This step was followed by the use of field representatives to contact financial institutions in an effort to achieve State-wide disposal of those accounts which the borrowers were unable to pay in full or refinance locally.

Another aspect of the accelerated liquidation program applied to the remaining States and had as its objective the removal from the Corporation's books accounts with small balances, and bringing current all slow and delinquent accounts. Borrowers in this category were contacted by circular letter and encouraged to pay small loan balances in full, to refinance their mortgages with

HOME LOAN BANK BOARD—Continued

HOME OWNERS' LOAN CORPORATION—Continued

local financial institutions, or to increase principal payments so that their loans would be completely amortized by 1951.

3. *Termination of accounts by sale or assignment.*—Authority for the accelerated termination of accounts through sale or assignment was implied in the Independent Offices Appropriation Act, 1950, which provided a specific authorization for the termination or liquidation of accounts carried on the books of the Corporation. Accordingly, in June 1949, the Corporation publicly offered to sell for cash its entire portfolio of loans and installment sales contracts in one State, consisting of approximately 40,000 individual accounts with an aggregate balance in excess of $102 million. Pursuant to this offer and acceptance by bid, a contract of sale was executed on September 1, 1949, and assignment of accounts was commenced immediately. Since then contracts have been signed for additional sales in all of the remaining States and Puerto Rico. As a result of this program, 20 States and the District of Columbia had been completely liquidated by June 30, 1950, leaving 28 States and Puerto Rico still to be liquidated, representing a total of 74,023 accounts with balances of $84,198,750. It is expected that all of these remaining accounts will be completely liquidated during the fiscal year 1951.

Of the 201,338 accounts with balances of $319,342,497 outstanding as of June 30, 1949, there were 127,315 accounts terminated during fiscal year 1950 (an average of 10,600 a month), of which 47,783 were terminated regularly and 79,532 by sale or assignment. Of the 74,023 accounts outstanding as of June 30, 1950, it is estimated that approximately 8,000 will be terminated regularly and 66,023 by sale or assignment; and that approximately 60,000 will be terminated during the first half of fiscal 1951 (an average of 10,000 a month); leaving 14,023 accounts to be terminated during the last half of the fiscal year.

Administrative Expenses

There are no administrative expenses estimated for fiscal year 1952. However, certain expenses incident to final liquidation, such as cost of final audit and compilation and printing of final report are provided for by an advance of $100,000 of the corporation's funds to the Home Loan Bank Board. These expenses are considered as nonadministrative for the Board.

Financial Review

For 1950 the net income after losses and adjustments of valuation reserves amounted to $8,908,410. Application of this income to the surplus of $1,718,118, as of the beginning of the 1950 fiscal year, plus a surplus adjustment of the reserve for losses on loans receivable in the amount of $2,510,450, resulted in an earned surplus of $13,136,978 as of June 30, 1950. The net income for 1951 is estimated at $949,000. This substantial decrease in estimated net income is due to the realization of the Corporation's principal income-producing assets—mortgage loans and vendee accounts—through termination by payment in full or by sale or assignment, and investments in savings and loan associations, through repurchase. It is estimated that final liquidation costs in fiscal year 1952 will amount to $100,000.

In 1951 it is estimated that $94,972,886 of funds will be provided by the realization of assets from the following sources: repayments of principal of loans and vendee accounts $84,621,129; sale of investments $2,680,400; $2,323,000 will be provided by income and $5,348,357 by decrease in working capital. Of the total funds provided, it is expected that $74 million will be used in the retirement of the Corporation's remaining capital stock held by the Treasury, that $500,000 will be used to retire Corporation bonds held by the public and $13 million to payment of dividends to the Treasury.

Assets.—On June 30, 1950, there were 74,023 mortgage loans and vendee accounts outstanding, amounting to $84,198,750. It is estimated that during the fiscal year 1951 all of these accounts will be terminated, 8,000 by payment in full and 66,023 by sale or assignment.

Savings and loan associations have been encouraged to repurchase, in advance of callable dates, the Corporation's remaining investments in their institutions and responses to such requests indicate that repayment of the remaining balance of $680,400 will be made in 1951.

As of June 30, 1950, the Corporation held 13 properties, either owned or in process of acquiring title, having a book value of $25,379. It is estimated that all of these properties will be disposed of by June 30, 1951.

Liabilities.—Of a total of $3,489,453,550 of bonds issued for value, it is estimated that only $1,169,225 of matured bonds held by the public will remain outstanding as of June 30, 1951. Since provision has been made for payment of these bonds by deposit of funds with the Treasury this liability has been eliminated from the balance sheet for 1952.

Investment of United States Government.—Funds acquired through the realization of assets will be applied to the retirement of capital stock held by the Treasury. It is expected that the outstanding balance of $74 million at June 30, 1950 will be wholly eliminated by June 30, 1951. It is also anticipated that $13 million will be paid to the Treasury in 1951 in the form of dividends. For fiscal year 1952 it is anticipated that final dividends of $1,076,978 will be paid to the Treasury making total dividends paid of $14,076,978.

Purpose and Financial Organization

The Federal Housing Administration, created by the National Housing Act of 1934, is a noncorporate business-type agency subject to the provisions of the Government Corporation Control Act under the Housing Act of 1948 (Public Law 901, 80th Cong.). The principal purposes of the Administration are to stabilize the mortgage market, to improve home-financing practices, and to improve housing standards and conditions, through a system of insurance of loans and investments to finance the production, purchase, repair, and improvement of residential structures. As of June 30, 1950, a total of $20.5 billion of insurance had been written.

The insurance programs administered under the several titles of the National Housing Act are: (1) Loan insurance for repair and improvement—title I; (2) mortgage insurance for small homes and multifamily houses—titles I (section 8) and II; (3) emergency and special-incentive mortgage and loan insurance—title VI; (4) yield insurance on equity investments on rental housing—title VII; and (5) mortgage insurance on rental housing to serve military installations—title VIII.

Financial organization.—The Administration maintains seven insurance funds: (1) A fund for insuring repair and improvement loans and mortgage loans under title I; (2) a fund for insuring mortgages on individual dwellings under section 8, title I; (3) a mutual mortgage insurance fund for insuring mortgages on one- to four-family dwellings under title II; (4) a fund for insuring mortgages on multifamily housing projects, including cooperative housing, under title II; (5) a fund for emergency and special-incentive mortgage and loan insurance under title VI; (6) an investment insurance fund for operations under title VII; and (7) a military housing insurance fund for operation under title VIII.

All of the Administration's insurance programs are income-producing. Income is derived from insurance premiums, appraisal and miscellaneous fees, and interest on investments in Government securities.

The mutual mortgage insurance fund differs from other insurance funds in that insured mortgages are grouped together with others having similar risk characteristics and maturity dates, with the mortgagors in the group receiving as dividends any excess of fees and premiums paid over losses and expenses allocable to the group.

Analysis of Budget Programs

The estimates for the current and the budget years reflect the effect of credit restrictions instituted July 19 and October 12 in accordance with the President's program to curb inflation and conserve materials needed for defense. The general effect of the first curbs was to reduce the ratios of mortgage loan to value in the mortgage insurance programs, except for military housing and housing in Alaska, and to require a 10 percent down payment on repair and improvement loans. Subsequently, the October 12 restrictions adjusted home mortgage requirements to conform to the terms of regulation X of the Federal Reserve Board. In addition, on both occasions similar restrictions were placed on insured mortgages on existing homes.

Repair and improvement loan insurance—title I.—This program provides for insurance on loans for the alteration, repair, and improvement of residential properties. The loans insured are characteristically short-term, unsecured notes averaging around $476. Program estimates are set forth below:

	1950 actual	1951 estimate	1952 estimate
Initiation: Loans insured	1,361,194	1,350,000	1,125,000
Maintenance of insurance in force—end of year: Insurance in force (notes)	3,093,600	3,205,400	3,179,300
Settlement:			
Claims	58,349	56,000	54,000
Average defaulted notes in process of collection	105,300	139,000	162,000

Mortgage insurance on small homes and multifamily housing—titles I and II.—Mortgages may be insured on one- to four-family structures and on multifamily housing projects up to statutory limits of 80, 90, or 95 percent of appraised value, depending upon the amount and character of the loan involved. Insured mortgages may cover both new and existing property, both for rent and for sale, including nonprofit cooperative housing. Legislation enacted in May 1950 has authorized insurance of loans bearing a higher ratio to the mortgaged property in the lower price and rental ranges to aid in construction of housing for families of low and moderate income. Program estimates are as follows:

	1950 actual	1951 estimate	1952 estimate
Initiation:			
Unit applications examined	627,141	623,000	548,500
1-4 family inspections made	1,026,702	1,207,200	939,900
Average multifamily units under inspection	473	8,300	54,600
Unit mortgages insured	321,516	431,400	393,950
Maintenance of insurance in force—end of year: Insurance in force	993,013	1,314,248	1,565,873
Settlement:			
Mortgages terminated	87,731	110,165	142,325
Properties acquired (dwelling units)	75	300	400
Properties on hand (dwelling units)	36	34	87

Emergency and special incentive mortgage loan insurance—title VI.—Special war-housing mortgage insurance provisions of title VI have been continued during the postwar period to provide veterans emergency housing and other special-incentive programs. The one- to four-family mortgage insurance program under title VI (sec. 603) has expired except for authority to insure under outstanding commitments and in connection with the refinancing of section 603 mortgages heretofore insured under the program. At present section 608 mortgages are insured on multifamily rental projects up to 90 percent of cost, as distinguished from long-term value. The insurance provisions of section 608 expired March 1, 1950, except as to applications received on or prior to that date. Processing of applications on hand covering 89,000 units is continuing into 1951. Section 609 of title VI provides for insurance of loans for the manufacture of housing by industrial processes and short-term notes incident to the

Federal Reserve Bank of St. Louis

FEDERAL HOUSING ADMINISTRATION—Continued

sale of such housing. Section 610 provides for insurance on mortgages executed in connection with the sale by the Government of certain federally owned housing. Section 611 provides for insurance of short-term loans to finance the construction, by modern site-fabrication methods, of groups of 25 or more single-family dwellings, as well as for insured long-term financing of properties constructed under this section. Program estimates are as follows:

	1950 actual	1951 estimate	1952 estimate
Initiation:			
Unit applications examined	180,023	66,050	11,700
1-4 family inspections made	17,200	1,000	----------
Average multifamily units under inspection	98,513	139,600	104,000
Unit mortgages and loans insured	159,608	113,300	28,300
Maintenance of insurance in force—end of year: Insurance in force (unit mortgage and loans)	765,807	843,722	837,572
Settlement:			
Mortgages and loans terminated (dwelling units)	35,522	35,385	34,450
Properties acquired (dwelling units) (603 and 608)	3,119	5,100	6,300
Properties on hand (dwelling units)	3,679	6,669	10,307
Mortgage notes on hand (in exchange for properties)	1,594	2,414	3,305

Yield insurance on equity investment in rental housing—title VII.—Although there has been considerable interest among large investors in this new insurance program for investments in rental housing, no actual insurance has yet been consummated. It is anticipated, however, that in 1951 and 1952 insurance applications will be processed as indicated in the table below.

	1950 actual	1951 estimate	1952 estimate
Initiation:			
Unit applications examined	----------	1,500	4,800
Average dwelling units under inspection	----------	100	2,300
Investments insured (in dwelling units)	----------	450	3,800
Maintenance and insurance in force—end of year: Insurance in force (in dwelling units)	----------	450	4,250

Housing at or near military installations—title VIII.—Rental housing is provided for military and civilian personnel of the armed services stationed at or near military installations, through use of private capital under insured mortgages. The program authorized through June 30, 1951, is receiving special emphasis in the interest of the expanded defense effort. The estimated volume of operations is set forth below.

	1950 actual	1951 estimate	1952 estimate
Initiation:			
Unit applications examined	11,712	78,900	----------
Average dwelling units under inspection	1,044	19,900	49,200
Unit mortgages insured	7,437	35,200	37,500
Maintenance of insurance in force—end of year: Insurance in force (in dwelling units)	7,437	42,637	78,637
Settlement: Mortgages terminated (dwelling units)	----------	----------	1,500

Administrative expenses.—Administrative expenses estimated at $5,360,000 in 1952 consist of: (1) expenses of the Office of the Commissioner; (2) expenses of those units in the Washington office directly responsible for the operation of the repair and improvement program and the various mortgage insurance programs; and (3) expenses of the various services of the Washington office incidental to over-all administration, such as legal, personnel, budget, statistical, and accounting.

SUMMARY OF ADMINISTRATIVE EXPENSES

	1950 actual	1951 estimate	1952 estimate
1. Executive direction	$77,584	$77,300	$77,600
2. Program direction	1,427,246	1,424,700	1,515,000
3. Staff and administrative services	3,640,204	3,623,000	3,767,400
Total	5,145,034	5,125,000	5,360,000

Financial Review

During fiscal year 1950 the accounts of the Administration were converted from a cash to an accrual basis; the accompanying financial statements have been prepared on the new basis. The important changes involve the accrual and deferral of insurance premium income.

In order to place the figures on a comparable basis, the statement of financial condition as of June 30, 1949, has been revised to include the premium accounts receivable and to reflect the deferral of unearned insurance premiums. In addition, liabilities reflect the statutory reserves required by the National Housing Act with respect to the group accounts of the Mutual Mortgage Insurance Fund. Insurance reserves relating to the nonmutual insurance funds are reflected in earned surplus.

Income and expenses.—Net income from insurance operations before adjustment of valuation allowances amounted to $57,217,501 during 1950. For 1951 and 1952 this income is estimated at $70,216,800 and $80,312,700, respectively; the estimated increase is due mainly to additional renewal insurance premiums on insurance in force, as the volume of new insurance is not expected to increase in these two fiscal years.

Valuation allowances increased by $9,326,891 during 1950, and are estimated to increase by $8,964,272 and $9,506,700 in 1951 and 1952, respectively, due mainly to the larger amount of real estate and defaulted notes anticipated to be on hand as the result of acquisitions under the terms of insurance. With these increases in valuation allowances, the net income from insurance operations is estimated to increase from $47,890,610 in 1950 to $61,252,528 in 1951 and $70,806,000 in 1952.

Financial condition.—The comparative statement of financial condition is a combined balance sheet for all funds.

Combined assets totaled $313,938,379 as of June 30, 1950, and are estimated to reach $389,649,787 and $449,611,387 in 1951 and 1952, respectively, due mainly to the estimated increase in investments and acquired security or collateral. The principal assets consist of cash, investments, loans receivable, and acquired security.

Digitized for FRASER

Federal Reserve Bank of St. Louis

As of June 30, 1950, liabilities totaling $167,130,869 consisted of $83,493,255 statutory reserves prescribed under the mutual provision of the act, $45,897,934 deferred premium income, $29,315,786 debentures payable in connection with the settlement of mortgage insurance claims, and $8,423,894 current and other liabilities. It is estimated that by the end of 1951 liabilities will total $199,277,408 of which $91,411,997 will represent statutory reserves, $50,995,400 deferred premium income, $42,311,086 debentures payable, and $14,558,925 current and other liabilities. By the end of 1952 total liabilities are expected to be $221,489,308, consisting of $113,200,097 statutory reserves, $53,674,300 deferred premium income, $38,629,886 debentures payable, and $15,985,025 current and other liabilities.

The Government's investment as of June 30, 1950, totaled $146,807,510, of which $17,000,000 was paid-in surplus, $70,167,625 net expended appropriations, and $59,639,885 earned surplus. The paid-in surplus consisted of (*a*) the original allocations by the Reconstruction Finance Corporation of $10,000,000 to establish the Mutual Mortgage Insurance Fund and $5,000,000 to establish the War Housing Insurance Fund, (*b*) the allocation of $1,000,000 from earnings of the Mutual Mortgage Insurance Fund to establish the Housing Insurance Fund, and (*c*) the allocation of $1,000,000 from earnings of the Title I Insurance Revolving Fund to establish the Title I Housing Insurance Fund. In previous submissions the latter two items, arising from the transfer of earnings from an existing insurance fund to establish a new insurance fund, have been reflected under earned surplus. Investment of the Government is estimated to increase to $190,372,379 and $228,122,079 by the end of the next two fiscal years, respectively.

Net expended appropriations amounted to $70,167,625 on June 30, 1950, and are estimated to be $70,007,608 and $69,925,908 at the close of the next two fiscal years. The small decrease estimated in 1951 and 1952 will result from repayments to the Treasury. As of June 30, 1950, the expended appropriations represented $42,777,930 allocated by the Reconstruction Finance Corporation to meet administrative expenses ($6,613,811 for title I, $31,994,095 for the Mutual Mortgage Insurance Fund, and $4,170,024 for the Housing Insurance Fund); $21,389,695 advanced by the Reconstruction Finance Corporation to pay insurance claims under title I in the early years; $1,000,000 appropriated from general funds of the Treasury to initiate the Housing Investment Insurance Fund; and $5,000,000 from general funds of the Treasury to establish the Military Housing Insurance Fund.

The earned surplus is made up of the net of the surpluses and deficits (—) of the various insurance funds as follows:

Fund	Actual June 30, 1950	Estimate June 30, 1951	Estimate June 30, 1952
General reinsurance account, Mutual Mortgage Insurance Fund	$8,719,961	$20,127,961	$26,382,261
Title I, Insurance Fund and claims account	−13,861,482	−11,586,488	−9,703,188
Title I, Housing Insurance Fund	21,880	−852,320	−1,740,220
Housing Insurance Fund	247,829	1,676,234	4,336,134
War Housing Insurance Fund	63,936,862	90,984,249	116,361,449
Housing Investment Insurance Fund	−27,090	−3,990	89,110
Military Housing Insurance Fund	601,925	3,019,125	5,470,625
Total earned surplus	59,639,885	103,364,771	141,196,171

The earned surplus of each of the insurance funds constitutes an insurance reserve available for future losses and related expenses. The increases reflected during 1951 and 1952 under the insurance reserves of the general reinsurance account of the Mutual Mortgage Insurance Fund, the Housing Insurance Fund, the War Housing Insurance Fund, and the Military Housing Insurance Fund result from crediting these accounts with the anticipated income earned during the two fiscal years.

The small deficits in the Title I Housing Insurance Fund and the Housing Investment Insurance Fund are caused by the fact that these funds were recently established to carry on new insurance programs. When the new programs gain momentum and renewal insurance premiums accumulate, it is estimated that earnings will be sufficient to cover the early deficits and produce surplus reserves for future operations.

The deficit under the Title I Insurance Fund and Claims Account results from the fact that the Administration was not authorized to collect insurance premiums on loans insured under this title from July 1, 1934, to June 30, 1939, which made it necessary for the Government to subsidize operations. Since income received from Title I operations after July 1, 1939 appears to be sufficient to carry on the current insurance program, no recommendation appears necessary at this time for an appropriation to eliminate the deficit in the Title I Insurance Fund.

Insurance authority.—The present authority to insure mortgages will be adequate for the programs contemplated with the exception of insurance under title I, section 8, and title II (see schedule C–2). Proposed legislation would provide additional insurance authorizations of $3 billion. The additional insurance authority would be made available at the President's discretion for allocation to such insurance programs as he may determine, including a new program proposed for defense rental housing.

PUBLIC HOUSING ADMINISTRATION

[Submitted under the Government Corporation Control Act]

Introductory Statement

The Public Housing Administration was established by Reorganization Plan No. 3 of 1947. The responsibilities of the Administration are classified as direct and delegated. Business-type budgets are submitted for each of the five programs involved.

1. Housing programs for which the Administration is directly responsible are—

(*a*) *United States Housing Act program.*—This consists of (1) federally aided low-rent housing under the United States Housing Act of 1937 (42 U. S. C. 1401); (2) slum-clearance projects developed by the Public Works Administration under the Emergency Relief Act and the National Industrial Recovery Act; (3) war housing developed under the defense amendment to the United States Housing Act, Public Law 671 (42 U. S. C. 1501), which authorized the use of low-rent funds to provide housing for defense workers; (4) expanded low-rent housing program provided by title III of the Housing Act of 1949 (63 Stat. 413); and (5) labor camps transferred from the Department of Agriculture by title II of the Housing Act of 1950 (64 Stat. 48).

(*b*) *Subsistence homesteads and greentowns program.*—Two greentowns and residual subsistence homestead projects are operated under the provision of the Bankhead-Black Act of 1936 (40 U. S. C. 431). This program is in process of liquidation.

2. Housing programs administered under delegated authority from the Housing and Home Finance Administrator are:

(*a*) *Public war housing program.*—This program involves management and disposition of public war housing projects under the Lanham and related acts (54 Stat. 872, 1125; 55 Stat. 14, 197, 810).

(*b*) *Veterans' re-use housing program.*—This program involves the supervision over local management of temporary dwellings for veterans constructed under title V of the Lanham Act (54 Stat. 1125) and the disposition of such properties by transfer to eligible local bodies as provided in the Housing Act of 1950 (64 Stat. 48).

(*c*) *Homes conversion program.*—This program consists of residual disposition activities related to properties leased by the Government and remodeled to produce additional dwelling facilities for war workers under the Lanham Act (54 Stat. 1125).

In addition to the five program budgets outlined above, there is a sixth budget covering in consolidated form administrative expenses of the Public Housing Administration in performing necessary functions required in all of these programs. Such expenses are paid from a single administrative expense fund and are distributed on a workload basis to the various programs.

[1] Excludes homes conversion properties.

Purpose and Financial Organization

The Housing Act of 1948 (62 Stat. 1268) authorized a consolidated administrative expense budget for the following programs administered by the Administration:

1. United States Housing Act.
2. Subsistence homesteads and greentowns.
3. Public war housing.
4. Veterans' re-use housing.
5. Homes conversion.

Administrative expenses are distributed to the various programs on the basis of special surveys and analyses of employee time spent on each of the several programs.

Analysis of Budget Program

The Public Housing Administration is responsible for five separate housing programs: United States Housing Act, subsistence homesteads and greentowns, public war housing, veterans' re-use housing, and homes conversion. Each is presented in a separate budget statement in which the budgetary programs are described in detail. The several programs are administered by a single integrated organization. The administrative functions of the agency break down into three major categories: development, management, and disposition. The budget program for each of these activities is summarized below:

Development.—The Housing Act of 1949 authorizes the start of construction of 135,000 low-rent housing units each year commencing with July 1, 1949. In view of the international situation the President directed that only 30,000 units be approved for construction between July 1 and December 31, 1950. The construction program is projected at a rate of 37,500 units each 6 months following December 31, 1950.

The greatest portion of administrative activity during the development phase of a project occurs prior to actual construction. Assistance is given the local authorities in planning projects. Contracts for financial aid stipulating the responsibilities of the Public Housing Administration and the local housing authorities are entered into prior to construction. Plans for construction are reviewed to assure that proposed projects conform with standards of economy, safety, and sanitation.

By the end of 1951 it is contemplated that 192,000 dwelling units will be in the preliminary planning stage, 120,000 will be under preparation for construction contract award, and 53,000 under construction. By June 30, 1952, the plan anticipates that 167,000 dwelling units will be in the preliminary stage, 145,000 will be under preparation of contract award, and 75,000 under construction.

Management.—The management responsibility of the Public Housing Administration pertains to locally owned projects developed and operated with Federal financial assistance and to federally owned projects. Dependent on the type of program, management is conducted by local authorities who own and operate low-rent housing projects and also lease certain of the federally owned projects; by sponsoring municipalities and educational institutions; and by contract managers (real-estate brokers). A sizable group of federally owned war housing projects are directly operated by Federal employees.

The 542,215 housing accommodations under management as of June 30, 1950, will be decreased by the transfer of veterans' re-use housing projects to sponsoring local bodies, and other dispositions, but by June 30, 1952, will be increased to 556,284, because of the transfer of the farm labor camps from the Department of Agriculture and completion of 63,000 units of low-rent housing.

Disposition.—Disposal of 9,728 units and complete liquidation of the homes conversion program by the end of 1951 is contemplated. The handling of claims and closing of records and accounts will be the only activity in the homes conversion program in 1952. During 1951 some 14,254 veterans' re-use housing accommodations will be transferred to sponsoring local public bodies and 10,310 accommodations will be demolished or removed from site. An additional 7,203 accommodations are scheduled for transfer in 1952.

Disposition of public war housing in 1951 and 1952 is limited to 23,500 units, including the sale of 6,700 and 2,000 permanent and demountable units in these respective years. The sale and demolition of temporary accommodations is estimated at 4,300 in 1951 and 500 in 1952. In addition, under authority of the Housing Act of 1950, 10,000 temporary units will be transferred to local bodies in 1952. Further disposition has been restricted pending determination as to eventual need for the war housing in the defense production effort.

Salaries and Expenses, Public Housing Administration, Housing and Home Finance Agency—

Public Housing Administration: Of the amounts available by or pursuant to law for the administrative expenses of the Public Housing Administration in carrying out duties imposed by or pursuant to law including funds appropriated by title I of this chapter, not to exceed [$15,024,000] *$16,000,000* shall be available for such expenses, including purchase of not to exceed [nine] *eight* passenger

UNITED STATES HOUSING ACT PROGRAM

Program Highlights

[Dollars in thousands]

	1950 actual	1951 estimate	1952 estimate
Program (in units): At end of year:			
Presite selection	228,814	192,000	167,000
Preconstruction	78,906	120,000	145,000
Construction	3,091	53,000	75,000
Management	201,536	211,594	264,118
Total active units	512,347	576,594	651,118
Annual contribution requirements	$6,519	$7,500	$15,000
Borrowings from Treasury outstanding at end of fiscal year	$349,000	$519,000	$381,000
Loans to local housing authorities outstanding at end of fiscal year	$304,058	$476,644	$449,846
Administrative expenses	$6,284	$10,300	$12,400

Purpose and Financial Organization

The United States Housing Act of 1937 (42 U. S. C. 1401) provided for a program of locally owned and operated low-rent housing, authorizing loans to local public housing agencies and payment to local housing authorities of annual contributions to maintain the low-rent character of the projects; subsequently, the Act of June 28, 1940 (42 U. S. C. 1501) permitted the construction of permanent housing for war workers, subject to conversion to low-rent use after the emergency. The program was expanded by the Housing Act of 1949 (63 Stat. 413), which authorized the construction of an additional 810,000 housing units over a 6-year period, increased the borrowing power of the Public Housing Administration to $1.5 billion outstanding at any one time, and increased the authorization to contract for annual contributions to $336 million for periods up to 40 years. The Housing Act of 1950 (64 Stat. 48) transferred to the Public Housing Administration all labor supply centers, labor homes, and labor camps administered by the Secretary of Agriculture, to be used for low-income farm laborers and their families.

In administering this program special emphasis will be given to meeting defense housing requirements. This will be done in two ways. First, in expediting the planning and the starting of construction for new projects the Public Housing Administration will give preference to projects located in defense areas as rapidly as defense needs in such areas develop and, where necessary, will give eligibility preference to defense workers. Second, in cooperation with the local authorities, who own and operate the existing housing, every effort will be made to facilitate the defense production and mobilization effort by utilizing for defense workers all units which become available where such action is necessary.

Analysis of Budget Program

The major activities under the United States Housing Act program relate to (*a*) the development and financing of low-rent projects; and (*b*) the management of projects including the payment of subsidies in the form of annual contributions appropriated annually by the Congress. For the latter activity an appropriation of $15,000,000 will be required.

PROGRAM SUMMARY

	June 30, 1950, actual		June 30, 1951, estimate		June 30, 1952, estimate

[1] Estimated.

Development and capital financing.—Under the United States Housing Act, low-rent housing is primarily a subject for local determination and control, Federal support being generally confined to making capital loans, paying annual contributions, and reviewing local actions for conformity with law. After the local housing authority has demonstrated a need for low-rent housing which is not being met by private enterprise, the Public Housing Administration covers by preliminary loan the cost of project planning by the local housing authority upon approval by the local governing body. The cost of the project is limited by law. Private capital in the form of temporary loan notes is fully utilized during the early development period, with the remainder covered by purchase of advance loan notes by the Administration. All temporary loan notes are retired as soon as the project is permanently financed at which time the local authority sells to private investors substantially all of its long-term bonds which are secured by the Federal Government's pledge to pay annual contributions.

It is anticipated that 1,682 projects consisting of 375,000 units will be initiated by June 1951. Of this number, 255 projects with 63,000 units are expected to start construction by that time. During 1952 an additional 491 projects consisting of 75,000 units will be initiated or a total of 2,173 projects comprising 450,000 units initiated by June 1952. Of this number, construction will have started on 138,000 units of which 63,000 units will have reached occupancy by June 30, 1952.

This activity will involve entering into loan contracts and making advances in the amount of $334 million in 1951 and $171 million in 1952. The relatively smaller requirement in 1952 is due to an anticipated larger percentage of temporary financing and earlier permanent financing from private sources.

In addition to this activity, supplemental construction work and corrections of war-caused construction deficiencies for locally owned projects will be undertaken in the amount of $2,330,000 in 1951 and $1,350,000 in 1952. Corrections of deficiencies and supplemental work are required to bring projects up to essential physical standards and to complete work delayed in the past by shortages of materials, labor, and equipment.

The Housing Act of 1949 permits the financing of low-rent projects at more favorable interest rates and with greater private capital participation. The budgetary plans contemplate permanent financing of existing projects with a development cost of $150 million by June 1952, to be accomplished entirely through the use of private capital. The remaining projects now under temporary financing with an estimated development cost of $40 million are not expected to be placed in permanent financing until after June 1952.

The following table summarizes the financing activities of the Public Housing Administration in fiscal years 1951 and 1952:

	1951 estimate	1952 estimate
Purchases:		
Advance loan notes:		
Preliminary loan contract	$35,260,000	$16,190,000
Annual contribution contract	298,004,000	142,405,000
Additional development costs	975,200	12,393,000
Total	334,239,200	170,988,000
Bonds: War-caused deficiencies and supplemental work	2,330,000	1,350,000
Total purchases	336,569,200	172,338,000
Repayments:		
Advance loan notes:		
Temporary financing	120,591,000	120,258,000
Permanent financing	39,705,600	154,598,000
Applicable to deferred program	2,500,000	1,000,000
Total	162,796,600	275,856,000
Bonds: Normal retirements	1,187,000	1,268,000
Total repayments	163,983,600	277,124,000

Management.—The Public Housing Administration reviews management operations of the local housing authorities, approves operating budgets, and audits their books and records to assure compliance with the law and an orderly and economical operation of all projects. Annual Federal contributions are made to cover operating deficits.

It is anticipated that in 1952, 523 projects containing 150,192 dwelling units initiated prior to the enactment of the Housing Act of 1949 will be eligible for annual contribution payments, and that 108 projects consisting of 22,818 dwelling units initiated under the new legislation will reach a point where first contributions will be required. Contributions on the existing projects for 1951 are based upon approved project budgets and recent operating experience. Expense estimates for 1952 are based upon the 1951 estimate and approved 5-year estimates of average annual expense.

First contributions on new projects are computed on a project-by-project basis. The maximum amount of the first contributions will be reduced by the following three factors: (1) The amount of capitalized interest; (2) the amount of the bond premium; and (3) the amount of the semiannual interest payment applicable to 1952 but payable thereafter. The effect of these reductions is expected to decrease the first contributions from the authorized maximum amount of 4½ percent to 2.77 percent of development cost.

It is estimated that $15,000,000 in annual contributions will be required in 1952; of this amount $7,364,443 will be for first contributions.

Reserves	[1] 1.13	[1] 214,512	[1] 1.77	[1] 1,285,782	[1] 1.20	[1] 2,009,270
Debt service	11.42	19,320,263	11.39	19,135,773	12.09	20,320,935
Payments in lieu of taxes	.84	1,417,713	2.39	4,020,321	2.39	4,020,322
Nonoperating expenses	.07	119,212	.34	570,294	.34	570,294
Subtotal	34.88	58,987,839	36.13	60,706,902	36.25	60,917,636
Operating deficit	2.47	4,165,943	4.18	7,024,000	4.30	7,234,733
Add:						
Accounting adjustments	[1] 1.10	[1] 160,656				
Noncontinental contributions		261,734		285,709		325,499
Nonrecurring contributions		[2] 2,251,711		150,501		75,325
First contributions				39,790		7,364,443
Unobligated balance of appropriation		132,818				
Total annual contribution appropriation or estimate		6,651,550		7,500,000		15,000,000

[1] Deduct.
[2] Includes $2,086,716 for retroactive increases in payments in lieu of taxes.

The table shows an anticipated increase during 1952 of $7,500,000 over 1951 for contribution requirements. Two factors are primarily responsible for this increase: (1) First contributions, to be paid on approximately 23,000 units initiated after enactment of the Housing Act of 1949, accounting for approximately $6,800,000 of the increase; and (2) permanent financing of projects presently under temporary financing, accounting for the balance.

Not included in the table are 39 farm labor camps, transferred from the Department of Agriculture under the Housing Act of 1950, which had been managed by private operators and are in a bad state of repair. They are now being rehabilitated in order to increase their utility and to enhance the possibility of disposition by sale. All but very few of these projects will be sold to local housing authorities by June 30, 1952, under contracts which provide that title will not pass until the end of a 20-year period during which time the Government will receive net income but will not pay deficits. Rehabilitation costs and operating deficits are expected to total about $1.5 million in 1951 and $1 million in 1952.

Administrative expenses.—These costs are estimated at $10,300,000 for 1951 and $12,400,000 for 1952, reflecting an increase due to greatly expanded program activity. These administrative expenses are merged with the funds for administrative expenses of the several programs administered by the Public Housing Administration into a single fund, shown under the estimate "Administrative expenses."

Financial Review

Financing activities will be expanded in fiscal years 1951 and 1952 in line with increases in the number of units in the low-rent program as authorized by the Housing Act of 1949 (Public Law 171). These activities will lead to an increase in outstanding loans to local housing authorities in fiscal year 1951. Loans to local housing authorities will decrease in fiscal year 1952 as a result of increased private financing and earlier permanent financing for the later projects. Borrowings from the Treasury are estimated at an additional $170 million in fiscal year 1951, and a net repayment of $138 million in fiscal year 1952.

Sales of federally-owned projects to local housing authorities will occur in fiscal year 1952. The cost of the property transferred in 1952 will be at book value of $112,409,429, which is original cost less depreciation. Conveyance of Public Works Administration leased projects will be with the stipulation that all net income will be returned to the Public Housing Administration.

Average for year	1,888	1,527	1,527
Disposed of during year	699	43	
Mortgages at year end	50	44	39
Cost of property disposed of	$10,741,658	$1,059,080	$28,230
Book value of property at year end	$19,995,663	$18,514,103	$18,070,533
Total sales proceeds	$3,804,118	$1,159,760	$10,830

PURPOSE AND FINANCIAL ORGANIZATION

This program was originally developed as one of the initial experimental endeavors of the Government to develop higher standards of housing coincident with the establishment of a work relief program to help alleviate the economic depression of the period. By Executive Order 9070, of February 24, 1942, the program was transferred to the Public Housing Administration, at which time the book value of the assets was $62,695,922. The program is authorized by the Bankhead-Black Act of 1936 (40 U. S. C. 431, et seq.). Receipts from operations were made available for operation, maintenance, and administration by the act of June 29, 1936 (49 U. S. C. 433, 7 id. 1017), and later were made available in annual authorizations to facilitate disposition of the greentown projects (5 U. S. C. 55a).

ANALYSIS OF BUDGET PROGRAM

Management.—As of June 30, 1950, there remained under management two greentown projects of 1,570 units and 19 units at 4 former subsistence homestead project sites. It is contemplated that the greentown projects will remain in full operation during 1951 and 1952. The subsistence homestead dwelling units are under sales contract involving occupancy of the units by the prospective purchaser. Net operating income during 1951 and 1952 is shown in the following table:

900000—51——21

PUBLIC HOUSING ADMINISTRATION—Continued

SUBSISTENCE HOMESTEADS AND GREENTOWNS PROGRAM—Continued

NET OPERATING INCOME

[Before collection loss, depreciation, and adjustment of valuation reserves]

	1950 actual	1951 estimate	1952 estimate
Greentown projects	$327,991	$223,114	$235,864
Subsistence homesteads	3,396	2,050	1,970
Total net operating income	331,387	225,164	237,834

The estimated decrease in net operating income is due to the sale of one greentown project and five subsistence homestead units during 1950.

Disposition.—Subsistence homesteads: Disposition activities during 1951 and 1952 are expected to involve receipt of payment in full on 3 subsistence homestead mortgages covering 57 dwelling units and on 6 lease and purchase contracts covering 6 dwelling units; and liquidation of 1 industrial cooperative association mortgage and 1 other mortgage note.

Greentown projects: On August 16, 1950, the Administrator, Housing and Home Finance Agency, issued an order temporarily suspending disposition of federally owned housing until its need in defense requirements can be ascertained. The only disposition activity contemplated is the sale of residual land at Greenhills, Ohio, the houses and most of the other structures having been sold in fiscal 1950. This land, including the 43 farmhouses located thereon, is expected to be sold for cash in fiscal 1951.

Administrative expenses.—The administrative expense requirements for this program are estimated at $70,000 for 1951 and $70,000 for 1952. Cost of administration is related to the size of the program and the budget plan of activity and is comparable to the expense experienced in 1950. These funds are merged with funds for administrative expenses of the several programs administered by the Public Housing Administration into a single fund, shown under the estimate for "Administrative expenses."

Financial Review

During 1951 and 1952, property with a cost value of $1,087,310 will be sold and at the same time assets in the form of mortgage notes in the amount of $386,737 will be liquidated. This, together with payments of principal on other obligations, will reduce the assets in the program to $21,761,941 as of June 30, 1952. As of June 30, 1950, there were available $941,231 of funds derived from management operations from which there is being set aside an amount equivalent to estimated liabilities together with funds needed to meet liquidating costs after disposal of all income producing property. The remainder, together with net operating revenues for 1951 and 1952 will be returned to the Treasury, estimated at $1,040,485 in 1951 and $140,519 in 1952. During these 2 years, in addition to deposits to the Treasury from operating funds, receipts from the liquidation of the program will permit a total return to the Treasury of $3,007,779, making a cumulative return as of June 30, 1952, of $15,625,572 as a partial repayment on the investment of the Government.

PUBLIC WAR HOUSING PROGRAM

PROGRAM HIGHLIGHTS

	1950 actual	1951 estimate	1952 estimate
Average number of dwelling units in program, available for occupancy	295,795	282,009	274,091
Management operations (total for all federally operated and leased projects):			
Project income	$118,645,300	$116,544,700	$113,326,500
Project expense	89,102,497	94,114,247	89,786,550
Public Housing Administration administrative expense	2,883,300	2,919,000	2,876,000
Net income from management operations (statement B)	26,659,503	19,511,453	20,663,950
Disposition operations, total dwelling units disposed of	21,894	11,000	12,500
Total sales (statement B)	$16,649,829	$18,136,800	$6,460,000

PURPOSE AND FINANCIAL ORGANIZATION

The public war housing program was carried out during the defense and war periods as one means of alleviating an acute shortage of housing for workers in essential war industries. The housing still in use serves the needs of veterans, servicemen and their families, and certain defense workers, pending disposition in accordance with the basic legislation. No new projects have been authorized since 1945.

This housing was constructed with funds appropriated under the act of October 14, 1940 (42 U. S. C. 1521) (Lanham Act) and related acts. Expenses of operation, maintenance and disposition or removal are paid from rental and other project income.

ANALYSIS OF BUDGET PROGRAMS

The following table shows the number of active and inactive projects and units and the number disposed of during fiscal years 1950, 1951, and 1952 (elimination of demountable projects in fiscal year 1951 results from their reclassification as permanent or temporary, as required by the Housing Act of 1950, Public Law 475, 81st Cong.):

	June 30, 1950, actual		June 30, 1951, estimate		June 30, 1952, estimate	
	Projects	Units	Projects	Units	Projects	Units
Available for occupancy:						
Permanent	269	74,138	348	110,349	340	108,349
Demountable	131	55,822				
Temporary	638	155,416	683	169,742	642	159,742
Total	1,038	285,376	1,031	280,091	982	268,091

Federal Reserve Bank of St. Louis

	June 30, 1950, actual		June 30, 1951, estimate		June 30, 1952, estimate	
	Projects	Units	Projects	Units	Projects	Units
Disposed of during the year:						
Permanent	27	4,696	16	4,700	8	2,000
Demountable	6	1,144	5	2,000		
Temporary	90	16,054	12	4,300	47	10,500
Total	123	21,894	33	11,000	55	12,500

Management.—Management of the projects is accomplished by direct operation by the Federal Government, using Federal employees, or by leased operation under which the projects are operated by local housing authorities under lease agreements which provide for return to the Government of all net income remaining after payment of approved operating costs. As of June 30, 1950, 34 percent of all active projects were federally operated and 66 percent were leased.

The following table shows the number of projects and dwelling units in active management status as of the end of each fiscal year.

	June 30, 1950, actual		June 30, 1951, estimate		June 30, 1952, estimate	
	Projects	Units	Projects	Units	Projects	Units
Federally operated:

Dormitories	1	38	1	38	1	38
Stop-gap	6	666	6	666	6	666
Total	350	98,408	345	95,802	328	92,052
Leased:						
Family dwellings	658	181,774	658	181,988	626	173,738
Dormitories	12	3,664	10	771	10	771
Stop-gap	18	1,530	18	1,530	18	1,530
Total	688	186,968	686	184,289	654	176,039
Total active program	1,038	285,376	1,031	280,091	982	268,091

The estimates of income and expense projected for the fiscal years 1951 and 1952 were computed after a thorough review, approval, and consolidation of operating budgets submitted by each project for the fiscal year 1951. No significant change in average income and expense per unit is anticipated as between the two fiscal years, except for about $7,000,000 budgeted for planned structural, plumbing, and other repairs, and exterior painting. Temporary projects, designed and built for an expected five-year useful life, will have been in use 8 and 9 years in 1951 and 1952. The Public Housing Administration, in view of contemplated disposition, has followed a policy of minimum repair and maintenance, and as a result many projects have reached a state of serious deterioration. The items of extraordinary maintenance are a result of the extended period of operation, the maintenance policy, and the necessity of further prolonging the useful life of the projects for defense purposes.

Disposition.—Disposition of 11,000 units is contemplated in fiscal year 1951 and 12,500 units in 1952. The Housing Act of 1950 authorizes the transfer, under certain conditions, of (1) temporary war housing projects to local public agencies, and (2) permanent war housing projects to local public housing agencies for operation as low-rent housing. The act further provides for disposition of all war housing remaining after such transfers. The Administrator of the Housing and Home Finance Agency on August 16, 1950, issued an order temporarily suspending all disposition and transfer activity, pending determination of need for defense purposes.

The budget program for the fiscal year 1951 contemplates completion of sales of those projects which were at the point of title transfer at the time of issuance of the suspension order. The program for both years anticipates sales of projects which it is estimated will be determined as not required to serve defense purposes. On the same assumption, the program for the fiscal year 1952 provides for the transfer of 10,000 temporary dwellings to local public agencies.

The following table shows the volume, proceeds, costs, and value of disposition operations undertaken by fiscal years:

	1950 actual	1951 estimate	1952 estimate
Number of dwelling units disposed of:			
Permanent family dwellings	4,696	4,700	2,000
Demountable family dwellings	1,144	2,000	
Temporary family dwellings	5,346		10,000
Dormitory units	6,603	3,646	
Stop-gap units	4,105	654	500
Total	21,894	11,000	12,500
Total proceeds from sales	$16,649,829	$18,136,800	$6,460,000
Disposition expense	−1,865,331	−1,225,000	−725,000
Net proceeds from sales	14,784,498	16,911,800	5,735,000
Total cost of housing disposed of	57,666,050	32,285,400	39,409,000

Administrative expenses.—These costs, estimated at $3,769,000 for 1951 and $3,326,000 for 1952, are related to the size of the program and the budget plan of activity, and are comparable to 1950 experience. These funds are merged with the funds for administrative expenses of the several programs administered by the Public Housing Administration into a single fund, shown under the estimate for "Administrative expenses."

Financial Review

Development cost of the emergency war housing program constructed by the Public Housing Administration, or received by transfer from other agencies, amounted to $1,704,776,849 as of June 30, 1950. This expenditure produced federally owned assets which, as of June 30, 1950, had earned $331,319,223 for the Government, exclusive of the write-off of asset values of properties disposed of. Net income from management operations and net proceeds from disposition of war housing are expected to increase this amount to $394,141,426 at the end of 1952. Exclusive of the transfer of properties, valued at $196,406,791, to other programs and Federal agencies, this estimated net return represents 26 percent of the total development cost of the program under the jurisdiction of the Public Housing Administration.

There remained on the books as of June 30, 1950, properties having a cost value of $1,043,357,516. Much of this property represents temporary housing which, under the Housing Act of 1950, is eligible for transfer to local public agencies without reimbursement (except for certain payments for Government-owned land). The temporary housing remaining after such transfers will have very low salvage value with no possibility of achieving full recapture of all development costs before the program is completely liquidated. However, the estimated return of 26 percent of invested capital as of June 30, 1952, will increase substantially as the remaining assets are liquidated.

VETERANS' RE-USE HOUSING PROGRAM

PROGRAM HIGHLIGHTS

	1950 actual	1951 estimate	1952 estimate
Average number of accommodations in program available for occupancy	81,361	38,395	27,644
Transfers and other removals	79,466	24,564	7,273
Number of accommodations at year end	44,005	29,751	22,548
Net return to Public Housing Administration from management and from properties transferred to local bodies	$4,395,701	$2,622,910	$1,153,510

PURPOSE AND FINANCIAL ORGANIZATION

This is a temporary emergency program undertaken to alleviate the housing difficulties of servicemen, veterans and their families, including veterans attending educational institutions, by relocation and re-use of surplus Federal structures. The program is conducted under title V of the Lanham Act as amended and approximately $443.5 million was allotted to the Public Housing Administration for development purposes. Funds derived from the operation of the projects are available for expenses of operation and maintenance, for disposition and removal of the projects, and for administrative expenses. Each quarter, operating funds in excess of amounts needed for liquidation of outstanding liabilities are covered into miscellaneous receipts of the Treasury (60 Stat. 9).

ANALYSIS OF BUDGET PROGRAMS

Development.—Construction is completed and all that remains is the final settlement of contractors' claims in

Federal Reserve Bank of St. Louis

PUBLIC HOUSING ADMINISTRATION—Continued

VETERANS' RE-USE HOUSING PROGRAM—Continued

the amount of $443,315. This is expected to be accomplished during 1951.

Management.—Housing projects are managed by the participating local bodies. Public Housing Administration management functions are only of an advisory nature. Federally financed projects are required to return all net income to the the Public Housing Administration. Projects financed in whole or in part by the participating local body are authorized to reimburse themselves from net income to the extent of their expenditures for development and after complete reimbursement are required to return net income to the Public Housing Administration. In 1950, for the first time, some of the projects wholly or partially financed by the participating local bodies made a net return to the Government, having completely reimbursed their development expenditures from net operating revenues.

The number of unit months in active management and per unit per month net income for 1950, 1951, and 1952 are shown below:

	1950 actual		1951 estimate		1952 estimate	
	Unit months	Net income	Unit months	Net income	Unit months	Net income
Total active management	976,332	$5.73	460,746	$4.96	331,723	$4.79

The anticipated reduction in the net return per unit per month for 1951 and 1952 is due to: (1) temporary-type of construction which will result in increased operating and maintenance costs each year and (2) anticipated transfers, under the Housing Act of 1950. Experience has shown that applications for transfer are generally made for the better projects. Net estimated operating return to the Public Housing Administration follows:

	1950 actual	1951 estimate	1952 estimate
Management: Net operating income before collection loss (statement B)	$158,449	$131,730	$131,730
Disposition:			
Total net income of projects transferred to local bodies (statement B)	5,589,548	2,286,330	1,588,380
Less: Net income applied to reimbursement of development expenditures	1,352,296	795,150	566,600
Net return	4,395,701	1,622,910	1,153,510

The substantial decrease in the estimated net return is attributable to the anticipated transfers to local public bodies resulting in a reduction of 58 percent in the number of units in the program.

Disposition.—The McGregor Act (62 Stat. 1062) authorized colleges and universities operating veterans' projects on lands owned or controlled by them to acquire complete ownership and control of these projects without monetary consideration. The Independent Offices Appropriation Act, 1950, permitted transfers to local public bodies under similar conditions. As of June 30, 1950, more than 175,000 units had been transferred under these authorities.

The Housing Act of 1950 authorizes further transfer activity. The Administrator, Housing and Home Finance Agency, on August 16, 1950, issued an order temporarily suspending all disposition and transfer activity pending determination of possible defense requirements. It is expected, however, that analysis of defense requirements will permit some exceptions during 1952. Transfer activities under the Housing Act of 1950, carry-overs of incompleted transfers under the Independent Offices Appropriation Act, 1950, and sale and other removals are expected to result in additional reductions in the program of 31,767 units as shown below:

SUMMARY OF DISPOSITION BY ENABLING LEGISLATION

	1951		1952	
	Projects	Units	Projects	Units
In program at beginning of year	437	54,315	183	29,751
Transfers to local bodies and educational institutions:				
Independent Offices Appropriation Act, 1950	58	5,443		
Housing Act of 1950, sec. 601 (a)	109	8,811	28	2,203
Housing Act of 1950, sec. 601 (b)			20	5,000
Other disposition	87	10,310		
Total	254	24,564	48	7,203
In program at end of year	183	29,751	135	22,548

Administrative expenses.—These costs, estimated at $320,000 for 1951 and $184,000 for 1952, are related to the size of the program and the budget plan of activity, and are comparable to the expense experienced in 1950. These funds are merged with the funds for administrative expenses of the several programs administered by the Public Housing Administration into a single fund, shown under the estimate for "Administrative expenses."

Financial Review

As of June 30, 1950, development appropriations totaled $443,485,276. After liquidation of outstanding obligations and contractors' claims it is estimated that unexpended appropriations amounting to $638,911 will be returned to the Treasury.

Cumulative earnings in excess of operating costs by local sponsoring bodies and net operating income from direct operations amounted to $35,650,298 on June 30, 1950. Operations during 1951 and 1952 are expected to increase to $39,788,468 as follows:

ESTIMATED CUMULATIVE NET RETURN TO PUBLIC HOUSING ADMINISTRATION

	Actual cumulative as of June 30, 1950	1951 estimate	1952 estimate	Estimated cumulative as of June 30, 1952
Net operating income (before collection loss)	$582,660	$131,730	$131,730	$846,120
Net return from properties transferred to local bodies	35,067,638	2,286,330	1,588,380	38,942,348
Total	35,650,298	2,418,060	1,720,110	39,788,468

Because of the considerable anticipated reduction in the program, net income from properties transferred to local bodies will no longer be a significant factor after 1952. The deficit is due to the difference between the cost of property transferred to local bodies and the net income returned to Public Housing Administration by local bodies from the operation of the projects. Deposits to the Treasury will amount to $6,213,098 in 1951 and $1,269,660 in 1952.

HOMES CONVERSION PROGRAM

Program Highlights

	1950 actual	1951 estimate	1952 estimate
Management:			
Average number of active properties during year	2,261	673	----------
Average active units during year	15,882	4,046	----------
Number of active properties at end of year	1,347	----------	----------
Number of active units at end of year	9,728	----------	----------
Net income per unit month before amortization, depreciation, losses, and charge-offs	$6.28	$6.28	----------
Disposition:			
Number of properties terminated during year:			
Expiration leasehold period	1,024	1,307	----------
Canceled prior to lease expiration	805	40	----------
Number of units terminated during year:			
Expiration of leasehold period	4,901	9,236	----------
Canceled prior to lease expiration	5,854	492	----------
Proceeds from disposition	$539,583	$58,869	----------

Purpose and Financial Organization

The homes conversion program, budgeted for complete liquidation by the end of 1951, originated under the provisions of the Lanham Act (42 U. S. C. 1521). Its purpose was to provide needed living accommodations for inmigrant war workers and their families in those critical production areas where other housing was not readily available, by leasing existing structures and remodeling them to provide additional dwelling units.

Development operations were started by the Home Owners' Loan Corporation in calendar year 1942 and consisted of negotiating leases on suitable structures and remodeling them into apartments. The initial conversion was financed entirely from appropriated funds and the whole amount capitalized. A total of 8,842 leaseholds with 49,565 dwelling units were provided at a total cost of $90,110,785, excluding $193,966 of assets transferred from other programs.

Development activities were largely completed prior to the transfer of this program to the Public Housing Administration. Management responsibilities were transferred to the Public Housing Administration on August 1, 1944, and on January 1, 1945, responsibility for completion of the residual development activity was transferred.

Section 303 of the Lanham Act authorizes the use of operating income for property operations, disposition, and administrative costs. Operating income is adequate to meet these expenses and permit a substantial return to the United States Treasury.

Analysis of Budget Program

Management.—Properties in this program are managed by some 200 real-estate management brokers who operate and maintain the properties and collect the rents from which they pay operating and maintenance costs and retain a commission stipulated by contract. The net revenue is remitted to the Public Housing Administration which makes payments for rentals, taxes, and insurance. The income, expense, and net return to the Government from operations is projected during 1951 at the level experienced during 1950 for the average unit for each month of operations. The total income and expense of program operations decrease substantially due to the decreasing size of the program occasioned by the liquidation of the Government's interest by June 30, 1951. The operating income and expense experienced in 1950 for the average units per month were:

Operating income per unit per month	$41.48
Operating expense per unit per month	35.20
Net income before depreciation losses and charge-offs, per unit per month	6.28

Disposition.—As of June 30, 1950, 85 percent of the 8,842 leaseholds consisting of 49,565 dwelling units had been canceled, yielding a total of $9,240,886. This substantial progress in liquidating the Government's interest resulted from a program of negotiating leasehold terminations with the property owners whenever satisfactory settlement could be obtained. Some of the leaseholds expired in November 1949 and additional leaseholds have expired each month and will continue to do so through 1951, leaving 40 leaseholds unexpired as of June 30, 1951. The budget provides for negotiating terminations of the latter prior to the end of 1951. Leases provide for restoration and redecoration of the vacant properties upon expiration.

Administrative expenses.—These are estimated at $265,000 for 1951 and $20,000 for 1952. Expenses for 1952 are for the handling of claims in connection with the termination of leaseholds and for the closing of records and accounts of this program. These funds are merged with the funds for administrative expenses of the several programs administered by the Public Housing Administration into a single fund, which is shown under the estimate for "Administrative expenses."

Financial Review

The original investment of the Government was $90.3 million, and this amount has been reduced yearly by net operating income, amortization, and charge-offs, and will be completely liquidated at the close of 1952.

The result of the program operations (before amortization, depreciation, losses, and charge-offs) is as follows:

	Cumulative to June 30, 1950	1951 estimate	1952 estimate	Total June 30, 1952
Management operations:				
Gross income	$113,803,313	$2,014,200	----------	$115,817,513
Operating expenses	90,590,024	1,774,300	----------	92,364,324
Net income	23,213,289	239,900	----------	23,453,189
Disposition operations:				
Proceeds	9,240,886	58,869	----------	9,299,755
Expenses	1,518,037	296,600	$45,000	1,859,637
Net income	7,722,849	−237,731	−45,000	7,440,118
Entire program, net income	30,936,138	2,169	−45,000	30,893,307

Payments to the general fund of the Treasury for 1951 and 1952 are estimated to be $397,065 and $107,016, respectively.
