RESEARCH AND MARKETING ACT OF 1946 *(TITLE II)*

Research and Marketing Act of 1946 (Title II), Department of Agriculture—

To enable the Secretary to improve and develop, independently or through cooperation among Federal and State agencies, and others, a sound and efficient system for the distribution and marketing of agricultural products under the provisions of [title] *titles* II *and III* of the Act of August 14, 1946, as amended (7 U. S. C. 1621–1629), [including the objects for which funds are available for titles II and III of such Act of August 14, 1946, $6,000,000] *$5,500,000*: *Provided*, That not less than [$650,000] *$600,000* of this amount shall be available for contracts in accordance with the provisions of section 205 of said Act: *Provided further*, That the Secretary may make available to any bureau, office, or agency of the Department such amounts from this appropriation as may be necessary to carry out the functions for which it is made (but amounts made available to the Office of the Secretary, Office of the Solicitor, and Office of Information, shall not exceed those which the Bureau of the Budget, after a hearing thereon with representatives of the Department, shall determine), and any such amounts shall be in addition to amounts transferred or otherwise made available to other appropriation items of the Department: *Provided further*, That no part of this appropriation shall be available for work relating to fish or shellfish or any product thereof, except for the support of equitable transportation rates before Federal agencies concerned with such rates and for development of foreign markets. (*Department of Agriculture Appropriation Act, 1951.*)

Annual definite appropriation:

Appropriated 1951, **$6,000,000** Estimate 1952, **$5,500,000**

PROGRAM AND PERFORMANCE

Title II of the Research and Marketing Act authorizes appropriations for research, service, and educational work applicable to the distribution and marketing of agricultural products. Funds are allotted to agencies of the Department for specified projects or to State agencies on a matching-fund basis for carrying on projects under cooperative agreements. They are also used under contract or cooperative agreements with qualified public or private agencies, institutions, organizations, or individuals.

1. *Basic data and information on supplies, movements, and prices.*—To facilitate the orderly marketing of farm products, comprehensive data are gathered and disseminated on supplies, movements, and prices of farm products; studies are made to improve market news and other market information services; and increased use of market information through State educational and service agencies is encouraged.

2. *Expansion of outlets for farm products.*—The development of foreign outlets for farm products and the opportunities for expanding domestic markets are studied; information on consumer preferences is collected to determine demand for different classes, grades, or varieties of agricultural products; consumer education programs are carried out by the cooperative State extension services to expand consumption and to introduce new uses of abundant foods; marketing-service work is conducted in cooperation with State departments of agriculture; and analyses are made of the supply, demand, and consumption of agricultural commodities.

3. *Measurement and analysis of marketing services, costs, and margins.*—With the primary objective of reducing costs and increasing efficiency, studies are made of marketing services, pricing practices, and costs and margins for a wide variety of agricultural products at each stage of the marketing process.

4. *Improvement in the grading, handling, packaging, transportation, storing, and merchandising.*—To improve the quality and increase the salability of farm products and thereby reduce marketing costs, studies are made on development and improvement of grades and standards; development of improved containers and methods of packaging; improvement of transportation services and equipment; new and improved processing methods; improvement of storage and conditioning of farm products; and quality preservation in marketing channels.

5. *Evaluation and improvement of marketing facilities, methods, policies, and organization and pricing practices.*—To aid in improving the organization of the marketing system and increasing its efficiency, marketing facilities,

Federal Reserve Bank of St. Louis

organization, equipment, methods, and practices are studied and evaluated; the possibilities of increasing merchandising efficiency are explored; educational and demonstrational work for improving marketing methods, facilities, and equipment is conducted in cooperation with State extension services; and technical assistance is given to marketing agencies through cooperative work with State departments of agriculture and bureaus of markets.

6. *Over-all administration.*—Approximately 3 percent of the appropriation is expended for over-all administration, planning, and coordination of the marketing research, service, and educational program carried out under the act.

The Secretary is required by title III to establish a national advisory committee of 11 members, 6 of whom represent producers or their organizations, to consult with the Secretary and other appropriate officials of the Department concerning research and service work authorized by the act, and to assist in obtaining the cooperation of producers, farm organizations, industry groups, and Federal and State agencies. The act also provides for the establishment, by the Secretary, of appropriate committees, including representatives of producers, industry, Government, and science, to assist in effectuating specific research and service programs. Committees have been established under this authority to advise the Department on the principal agricultural commodities and in the functional areas of cold storage, foreign trade, and transportation.

Title I of the act authorized appropriations for payments to States for research at agricultural experiment stations; utilization research on the development and application of present, new, and extended uses of agricultural commodities and products; and cooperative research, other than utilization, between Department agencies and State agricultural experiment stations. Funds previously appropriated under title I of the act were merged in the 1951 appropriation act with related appropriations of the agencies of the Department performing the work.

OBLIGATIONS BY ACTIVITIES

Description	1950 actual	1951 estimate	1952 estimate

PROGRAM AND PERFORMANCE

The Bureau is the chief economic research and statistical fact-finding agency of the Department and furnishes current data and analyses to other Federal agencies, congressional committees, industrial groups, and the general public.

1. *Economic investigations.*—Provision is made for economic research and statistical analyses covering organization and operation of farms; costs and returns from farming; farm finance, land utilization; farm prices and income; trends in supply and demand for farm products; farm marketings and marketing costs; and farm population and labor problems. Related statistical series are kept current.

(*a*) *Economics of production.*—Research is conducted on the type and size of farms in relation to farmers' costs and returns and on total farm output of different products; efficiency of use of labor, equipment, land, and water; inventory and analyses of land resources; new and improved techniques; farm valuation and debt, taxation, tenure, risk, and insurance; and related problems.

(*b*) *Prices, income, and marketing.*—Statistical and economic analyses are made relating to production, marketing, and consumption of agricultural products. These studies establish the relation between farm prices or income and parity standards and analyze the economic situation and outlook for farm products. Information is made available to farmers through the Federal-State cooperative extension service and other agencies and are available to Federal agencies for consideration in carrying out their programs. Investigations are made to determine the bases for increasing the efficiency of distribution and to narrow the cost spread between producer and consumer.

(*c*) *Farm population and manpower.*—These studies cover changes in farm population and the farm work force. They involve estimates of the number of people on farms, their age and sex, birth and death rates, their levels of living in comparison with urban living standards, the number in the farm work force, and wage rates of hired farm workers. Statistical series are maintained on movements of population to and from farms in different areas and on the farm labor force.

2. *Crop and livestock estimates.*—Basic current data needed in making official estimates of production of crop and livestock products are gathered. About 500 national reports are issued annually, containing estimates by States, for use by farmers, processers, handlers and marketers, governmental agencies and officials, and others. The estimates are based on sample data obtained from many thousands of voluntary reporters. These data are checked and supplemented by personal observations of the Bureau's statisticians and by contacts with growers, handlers, and credit agencies, etc. Data are summarized and interpreted in the field offices and then forwarded to the Crop Reporting Board in Washington for use in preparing national reports and forecasts. Each month the Bureau determines and publishes parity or comparable prices for agricultural commodities.

OBLIGATIONS BY ACTIVITIES

Description	1950 actual	1951 estimate	1952 estimate
Direct Obligations			
1. Economic investigations:			
(*a*) Economics of production	$1,367,112	$1,341,000	$1,337,000

"Foreign assistance, Executive Office of the President."

AGRICULTURAL RESEARCH ADMINISTRATION

OFFICE OF ADMINISTRATOR

Salaries and Expenses, Office of Administrator, Agricultural Research Administration—

For necessary expenses of the Office of Administrator, including [the purchase of one passenger motor vehicle,] travel and subsistence expenses of advisory committees authorized by title III of the Act of August 14, 1946 (7 U. S. C. 1628–1629), and the maintenance, operation, and furnishing of facilities and services at the Agricultural Research Center, [$600,000] *$587,000*: *Provided*, That the appropriation current at the time services are rendered may be reimbursed (by advance credits or reimbursements based on estimated or actual charges) from applicable appropriations, to cover the charges, including handling and other related services, for equipment rentals (including depreciation, maintenance, and repairs); for services, supplies, equipment, and material furnished: *Provided further*, That of the several appropriations of the Agricultural Research Administration, not to exceed $15,000 shall be available for employment pursuant to the second sentence of section 706 (a) of the Organic Act of 1944 (5 U. S. C. 574), as amended by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a): *Provided further*, That the several appropriations of the Agricultural Research Administration shall be available for the construction, alteration, and repair of buildings and improvements: *Provided, however*, That unless otherwise provided, the cost of constructing any one building (excepting headhouses connecting greenhouses) shall not exceed $5,000, the total amount for construction of buildings costing more than $2,500 each shall be within the limits of the estimates submitted and approved therefor, and the cost of altering any one building during the fiscal year shall not exceed $2,500 or 2 per centum of the cost of the building as certified by the Research Administrator, whichever is greater. *(5 U. S. C. 511–512, 565a; Department of Agriculture Appropriation Act, 1951.)*

Annual definite appropriation:

Appropriated 1951, **$600,000** Estimate 1952, [a] **$587,000**

[a] Excludes $7,500 for activities transferred in the estimates to "Salaries and expenses, Office of Secretary of Agriculture." The amounts obligated in 1950 and 1951 are shown in the schedule as comparative transfers.

PROGRAM AND PERFORMANCE

This office coordinates all research activities (other than economic) of the Department, administers the Research and Marketing Act of 1946, and directs the Agricultural Research Administration, which includes seven research bureaus and the Agricultural Research Center, Beltsville, Md.

1. *Administration and over-all direction of the Agricultural Research Administration.*—The Agricultural Research Administrator, with the assistance of his staff, plans, coordinates, and directs the scientific research programs and the control and regulatory programs of the Agricultural Research Administration; coordinates research activities of the Department and develops, in cooperation with directors of State and Territorial agricultural experiment stations and in the light of research conducted by other public agencies and private industry, an integrated research program which will best meet the changing needs of agriculture and the Nation's requirements for food, feed, and fiber. To assist further in planning such a program, 20 advisory committees have been established under the authority of title III of the Research and Marketing Act. Members of these committees review research accomplishments, recommend changes in existing programs, and outline new or additional research needs. Their activities in the past have been confined primarily to research conducted under the Research and Marketing Act, but are steadily being extended to the Department's entire research program.

2. *Supervision of maintenance, operation, and furnishing of facilities and services at the Agricultural Research Center.*—The Center is comprised of 12,000 acres of land and extensive facilities used for research conducted by agencies of the Department. It involves two types of operation: (1) Over-all supervision and general services, such as maintenance of buildings and roads and clearance of land, which are provided for by direct appropriation; and (2) special services for agencies conducting research at the Center and for which reimbursement is made.

Total obligations		1,500,000	1,500,000

PROGRAM AND PERFORMANCE

The Department of Agriculture Appropriation Act, 1951, established a working capital fund of $300,000, without fiscal year limitation, for financing, on a reimbursable basis, central facilities and services furnished other agencies operating at the Agricultural Research Center, Beltsville, Md. These facilities and services include general operations, such as maintenance, construction, and repair of structures and equipment; farm operations for experimental and forage crops; engineering services for making surveys, and preparation of plans and specifications; and centralized purchasing of supplies, equipment, and services as requested by agencies at the Center. The integrity of the fund will be maintained at all times in the form of cash, inventory stocks on hand, or accounts receivable.

OBLIGATIONS BY ACTIVITIES

Central facilities and services furnished other agencies—1951, $1,500,000; 1952, $1,500,000.

RESEARCH ON STRATEGIC AND CRITICAL AGRICULTURAL MATERIALS

Research on Strategic and Critical Agricultural Materials, Department of Agriculture—

For expenses necessary to enable the Secretary to carry out his responsibilities under section 7 (b) of the Strategic and Critical Materials Stock Piling Act of July 23, 1946 (50 U. S. C. 98f), [$399,000, including not to exceed $30,000 for alterations at the Eastern Regional Research Laboratory, Wyndmoor, Pennsylvania, to provide pilot plant facilities for tannin extraction, and such amount shall be in addition to amounts otherwise available for alterations] *$700,000.* (*Department of Agriculture Appropriation Act, 1951.*)

Annual definite appropriation:

Appropriated 1951, **$399,000** Estimate 1952, **$700,000**

Reimbursements for services performed	2,694	2,600	2,600
Total obligations	337,901	401,600	702,600

PROGRAM AND PERFORMANCE

Scientific, technologic, and economic investigations are made of the feasibility of developing domestic sources of supplies of any agricultural material or substitutes for such materials determined by the Munitions Board to be strategic and critical. Proposed investigations are undertaken only on recommendation and approval of the Munitions Board.

1. *Research on domestic production of natural rubber.*—Rubber production investigations are carried on to test means of quickly and inexpensively establishing field stands of guayule, to develop new strains of higher yield, and to develop methods of recovering and improving the quality of rubber from the guayule plant.

2. *Investigations of domestic production of vegetable tannins.*—These studies deal with the possible production in the United States of crops from which materials for tanning leather can be derived. Canaigre, a plant native to the southwestern United States, is proving a most promising crop for this purpose, and some expansion of the growing and processing program to make semicommercial tests possible is planned for 1952.

3. *Investigations on vegetable oils.*—Heretofore this work has dealt with improvements in production of the castor-bean plant. For 1952 a study will be undertaken to provide domestic oils to be used for those strategic purposes for which it is now necessary to import castor, palm, coconut, and sperm oils.

4. *Investigations on hard fiber plants for cordage.*—This work involves research on the domestic production of hard fibers, such as sansevieria, that can be used for lines and ropes on naval vessels. Additional studies on the production of phormium, domestic hemp, and hemp seed are proposed for 1952.

RESEARCH ON AGRICULTURAL PROBLEMS OF ALASKA

Research on Agricultural Problems of Alaska, Department of Agriculture—

For expenses necessary to enable the Secretary to conduct research into the basic agricultural needs and problems of the Territory of Alaska, through such agencies of the Department as he may designate, independently or in cooperation with appropriate agencies of the Territory of Alaska, $280,000. *(5 U. S. C. 511–512; Department of Agriculture Appropriation Act, 1951.)*

Annual definite appropriation:

Appropriated 1951, $280,000 Estimate 1952, **$280,000**

FUNDS AVAILABLE FOR OBLIGATION

	1950 actual	1951 estimate	1952 estimate
Appropriation or estimate	$675,000	$280,000	$280,000
Unobligated balance, estimated savings	−13,544		
Total obligations	661,456	280,000	280,000

PROGRAM AND PERFORMANCE

Agricultural research in Alaska is carried on as a joint program of the Department of Agriculture and the University of Alaska, providing for a consolidated attack on problems and needs of Alaskan agriculture. Research work includes soil analysis, horticulture, animal husbandry, agricultural economics, agricultural engineering, insect control, and field crop improvement studies.

The soils survey aids settlers in determining those areas where agriculture will be profitable. Through the calendar year 1949, 79,360 acres in the Matanuska Valley and 7,860 acres in the Tanana Valley have been mapped and classified. Dairying research has stimulated milk production in the Territory by devising measures for raising heifers to maturity more economically. Nutrition problems associated with mink, fox, and marten production have been studied to aid fur farmers. New grain, forage, and vegetable varieties have been introduced and have proved more profitable than those commonly used. Potato breeding research has resulted in several higher-yielding crosses that are producing more palatable tubers than those previously grown, especially when handled under improved production and storage methods.

Emphasis in 1952 will continue to be placed on improving the yields and quality of farm and dairy products, the improvement of marketing methods, and the design of more satisfactory farm structures.

OFFICE OF EXPERIMENT STATIONS

PAYMENTS TO STATES, HAWAII, ALASKA, AND PUERTO RICO

Payments to States, Hawaii, Alaska, and Puerto Rico, Experiment Stations, Agricultural Research Administration—

For payments to the States, Hawaii, Alaska, and Puerto Rico to be paid quarterly in advance where applicable, to carry into effect the provisions of the following Acts relating to agricultural experiment stations:

Hatch, Adams, Purnell, Bankhead-Jones, and related Acts: Hatch Act, the Act approved March 2, 1887 (7 U. S. C. 362, 363, 365, 368, 377–379), $720,000; Adams Act, the Act approved March 16, 1906 (7 U. S. C. 369), $720,000; Purnell Act, the Act approved February 24, 1925 (7 U. S. C. 361, 366, 370, 371, 373–376, 380, 382), $2,880,000; Bankhead-Jones Act, title I of the Act approved June 29, 1935 (7 U. S. C. 427–427g), sections 3 and 5, $2,863,708, and sections 9 and 11 of said Act as added by the Act of August 14, 1946 (7 U. S. C. 427h, 427j), including administration by the Office of Experiment Stations in the United States Department of Agriculture, $5,000,000[, no part of which latter amount shall be used for beginning construction of any building costing in excess of $15,000, except that a poultry breeding house may be constructed at Purdue University at a cost to this appropriation of not to exceed $29,000]; Hawaii, the Act approved May 16, 1928 (7 U. S. C. 386–386b), extending the benefits of certain Acts of Congress to the Territory of Hawaii, $90,000; Alaska, the Act approved February 23, 1929 (7 U. S. C. 386c), extending the benefits of the Hatch Act to the Territory of Alaska, $15,000, and the provisions of section 2 of the Act approved June 20, 1936, *as amended* (7 U. S. C. 369a, *Public Law 739, approved August 29, 1950*), extending the benefits of the Adams and Purnell Acts to the Territory of Alaska, [$37,500] *$75,000;* Puerto Rico, the Act approved March 4, 1931, as amended (7 U. S. C. 386d–386f), extending the benefits of certain Acts of Congress to Puerto Rico, $90,000; in all, payments to States, Hawaii, Alaska, and Puerto Rico, [$12,416,208] *$12,453,708. (7 U. S. C. 427d; Department of Agriculture Appropriation Act, 1951.)*

Appropriated 1951, **$12,416,208** Estimate 1952, **$12,453,708**

FUNDS AVAILABLE FOR OBLIGATION

	1950 actual	1951 estimate	1952 estimate
Appropriation or estimate	$7,406,208	$12,416,208	$12,453,708
Comparative transfer from "Research and Marketing Act of 1946, Department of Agriculture"	4,984,636		
Total obligations	12,390,844	12,416,208	12,453,708

PROGRAM AND PERFORMANCE

Funds are allotted to the State agricultural experiment stations of the land-grant colleges in each of the States, Hawaii, Alaska, and Puerto Rico to enable these stations to undertake agricultural research, including investigations and experiments to promote a permanent and efficient agricultural industry, and improvement of the rural home and rural life. The allotments are based partly on the basis of prescribed amounts and partly on the basis of rural and farm population and the need for research in smaller States. The States are contributing about $4 to each $1 paid by the Federal Government.

The increase recommended under the Alaska Station Act of 1936 is for research on the most urgent portions of the joint Federal-Territorial agricultural research program.

OBLIGATIONS BY ACTIVITIES

Description	1950 actual	1951 estimate	1952 estimate
1. Payments to agricultural experiment stations	$12,256,167	$12,266,208	$12,303,708

SALARIES AND EXPENSES

Salaries and Expenses, Experiment Stations, Agricultural Research Administration—

For necessary expenses in connection with administration of grants and coordination of research with States[, to carry out the provisions of] *pursuant to* the Acts approved March 2, 1887, March 16, 1906, February 24, 1925, May 16, 1928, February 23, 1929, March 4, 1931, and June 20, 1936, and Acts amendatory thereto (7 U. S. C. 361–363, 365–383, 386–386f), and title I of the Act approved June 29, 1935, as amended by the Act of September 21, 1944 (7 U. S. C. 427–427g), [relative to their administration] and for the administration, *operation, and maintenance* of an agricultural experiment station in Puerto Rico, [$237,500] *$400,000;* and the Secretary shall prescribe the form of the annual financial statement required under the above Acts, ascertain whether the expenditures are in accordance with their provisions, coordinate the research work of the State agricultural colleges and experiment stations in the lines authorized in said Acts with research of the Department in similar lines, and make report thereon to Congress.

[FEDERAL EXPERIMENT STATION, PUERTO RICO]

[For expenses necessary to establish and maintain an agricultural experiment station in Puerto Rico, including the preparation, illustration, and distribution of reports and bulletins, and not to exceed $24,950 to replace water supply line and increase capacity of reservoir, $175,000.] (*Department of Agriculture Appropriation Act, 1951.*)

Appropriated 1951, **$412,500** Estimate 1952, **$400,000**

PROGRAM AND PERFORMANCE

1. *Administration of grants and coordination of research with States.*—New and revised research proposals are evaluated, annual programs and budget allotments are reviewed, and the work and expenditures of each experiment station are examined in the field. Each experiment station is certified as to its eligibility to receive Federal-grant funds.

2. *Federal experiment station, Puerto Rico.*—Research is conducted primarily on tropical and subtropical crops of strategic or economic importance, including food, forage, and specialty crops such as quinine, rotenone, vanilla, and bamboo.

BUREAU OF HUMAN NUTRITION AND HOME ECONOMICS

Salaries and Expenses, Human Nutrition and Home Economics, Agricultural Research Administration—

For necessary expenses in connection with conducting investigations of the relative utility and economy of agricultural products for food, clothing, and other uses in the home, with special suggestions of plans and methods for the more effective utilization of such products for these purposes, and such economic investigations, including housing and household buying, as have for their purpose the improvement of the rural home, for coordinating nutrition services made available by Federal, State, and other agencies, and for disseminating useful information on these subjects, [$1,500,000] *$1,482,500. (5 U. S. C. 511–512; Department of Agriculture Appropriation Act, 1951.)*

Annual definite appropriation:

Appropriated 1951, **$1,500,000** Estimate 1952,[a] **$1,482,500**

[a] Excludes $1,900 for activities transferred in the estimate to "Salaries and expenses, Office of Information, Department of Agriculture." The amounts obligated in 1950 and 1951 are shown in the schedule as comparative transfers.

PROGRAM AND PERFORMANCE

Research is conducted on problems relating to food, clothing, shelter, and the other goods and services used in family living, including questions as to what people need and want; what different products contribute to satisfying these needs; and how current consumption or utilization compares with standards that would represent improved health and well-being.

In 1950, 151 technical and popular reports on the results of such research were published or prepared. Of the current popular and technical bulletins available to the public through the Government Printing Office, over 7 million copies were distributed, largely on individual request. In addition, the Bureau issues a monthly news letter for promoting coordination of nutrition programs, quarterly reports on developments affecting rural family living, and a quarterly appraisal of the nutritional adequacy of the estimated per capita food supply.

1. *Food and nutrition investigations.*—Research is conducted on nutritional requirements, the composition and nutritive value of various foods, and methods and prin-

ciples underlying satisfactory food preparation and preservation in the home.

2. *Family economics investigations.*—Household buying problems are studied, including the quantities consumed and the adequacy and economy of the food, clothing, and other items used by various population groups.

3. *Textiles and clothing investigations.*—Chemical and physical properties of fabrics used in the home are studied as well as technical problems of quality and design.

4. *Housing and household equipment investigations.*—Studies are carried on to improve the design of rural houses for comfort and efficiency and to help families with selection, care, and use of household equipment.

BUREAU OF ANIMAL INDUSTRY

SALARIES AND EXPENSES

Salaries and Expenses, Animal Industry, Agricultural Research Administration—

For expenses necessary to carry out the provisions of the Act, as amended, establishing a Bureau of Animal Industry, and related Acts, and for investigation concerned with the livestock and meat industries and the domestic raising of fur-bearing animals, as follows:

Animal research: For animal husbandry investigations; investigations of diseases of animals and of tuberculin, serums, antitoxins, and analogous products; and cooperation in the administration of regulations for the improvement of poultry, poultry products, and hatcheries, as authorized by law (7 U. S. C. 429, Public Law 662, approved August 4, 1950); $3,539,400.

[Animal husbandry: For investigations and experiments in animal husbandry and animal and poultry feeding and breeding, and for carrying out the purposes of section 101 (b) of the Organic Act of 1944 (7 U. S. C. 429) authorizing cooperation with State authorities in the administration of regulations for the improvement of poultry, poultry products, and hatcheries, $2,294,000.]

[Diseases of animals: For scientific investigations of diseases of animals, and for investigations of tuberculin, serums, antitoxins, and analogous products, $1,325,000, including not to exceed $8,000 for the purchase of land and appurtenances near Ames, Iowa, for continuation of a hog cholera experiment station.]

Animal disease control and eradication: For the control and eradication[, including inspections and quarantines,] of tuberculosis and paratuberculosis of animals, avian tuberculosis, Bang's disease of cattle, scabies in sheep and cattle, southern cattle ticks, hog cholera and related swine diseases, and dourine in horses, and *other* inspection and quarantine work; for supervision of the transportation of livestock, including administration of the twenty-eight-hour law; for inspection of vessels; and for carrying out the provisions of the Act of March 4, 1913 (21 U. S. C. 151–158), relating to veterinary biological products, [$7,950,000] *$7,868,000* including $30,000 for the acquisition of land and construction of buildings for inspection of livestock at Canadian border ports of entry: *Provided,* That no payment hereunder as compensation for any cattle condemned for slaughter for tuberculosis, paratuberculosis, or Bang's disease shall exceed (1) $25 for any grade animal or $50 for any purebred animal, (2) one-third of the difference between the appraised value and the value of salvage thereof, or (3) the amount paid or to be paid by the State or other cooperating agency, and no payment hereunder shall be made for any animal if at the time of test or condemnation it shall belong to or be upon the premises of any person, firm, or corporation to which it has been sold, shipped, or delivered for slaughter[: *Provided further,* That inspection service shall be maintained at all stockyards having such service during the current fiscal year].

[MARKETING AGREEMENTS, HOG CHOLERA VIRUS AND SERUM]

[The sum of $49,300 of the appropriation made by section 12 (a) of the Agricultural Adjustment Act, approved May 12, 1933 (7 U. S. C. 612), is hereby made available during the fiscal year for which appropriations are herein made to carry] *Marketing agreements, hog cholera virus and serum: For carrying* into effect sections 56 to 60, inclusive, of the Act approved August 24, 1935 (7 U. S. C. 851–855) *regulating the marketing of anti-hog-cholera serum and hog-cholera virus, $49,300.*

Meat inspection: For carrying out the provisions of laws relating to Federal inspection of meat and meat-food products, [$12,800,000] *including the purchase of one passenger motor vehicle for replacement only, $13,393,300. (5 U. S. C. 511–512—establishing the Department of Agriculture, 563–564, 565a; 7 U. S. C. 391—establishing the Bureau of Animal Industry, 394–396, 429–431, 433–434, 436–437; 19 U. S. C. 1201, 1306; 21 U. S. C. 71–96, 101–105, 111–128, 130–131, 151–158; 31 U. S. C. 725a; 45 U. S. C. 71–74; 46 U. S. C. 466a–466b; Act of August 5, 1950 (Public Law 664); Act of August 28, 1950 (Public Law 735); Department of Agriculture Appropriation Act, 1951.)*

Appropriated 1951, **$24,369,000** Estimate 1952, [a] **$24,850,000**

[a] Excludes $2,900 for activities transferred in the estimates to "Salaries and expenses, Office of Information, Department of Agriculture." The amounts obligated in 1950 and 1951 are shown in the schedule as comparative transfers.

PROGRAM AND PERFORMANCE

The Bureau conducts research and administers programs primarily concerned with the protection and development of the livestock, meat, poultry, and related industries.

1. *Animal research.*—This work is carried on through field and laboratory investigations and in cooperation with other Federal agencies, State agricultural experiment stations, State extension services, and others.

(*a*) *Animal husbandry.*—Research covering all classes of farm livestock (except dairy cattle) and poultry and domestic fur animals is conducted to develop (1) superior strains and crossbred types of beef and dual-purpose cattle; (2) strains of hogs with capacity for rapid growth and economy of gain, high fertility, and quality of carcass; (3) types of sheep that are most efficient in producing high-quality meat and wool; and (4) strains of chickens and turkeys that excel in egg and meat production. Research is also conducted on the nutritive requirements of livestock to furnish a basis for improved rations, and on the efficient utilization of feed and forage in the production of meat, eggs, wool, fur, and other livestock products. The decrease in 1952 results from closing out of horse breeding work at Middlebury, Vt.

(*b-c*) *Investigations of diseases and parasites.*—Research is conducted on diseases of farm livestock, poultry, and domestic fur animals, with the aim to develop practical methods of control of diseases by (1) development of better laboratory and field tests for diagnosis; (2) determination of the mode of acquisition of parasites; (3) experimentation with chemicals, drugs, and vaccinal agents for prevention and control of diseases and parasites; and (4) development of control measures by management procedures to prevent spread or perpetuation of diseases and parasites. An increase is proposed for 1952 for investigations to develop improved and more economical means for control of hog cholera.

2. *Animal disease control and eradication.*—Measures are devised to exclude from this country communicable diseases of foreign origin, to prevent the spread of diseases through interstate shipments of livestock or distribution of impure or impotent veterinary biologics, and to control and eradicate livestock diseases. This work includes inspection and certification of animals for export and inspection of vessels and accommodations used in shipment to assure the humane handling and safe transport of animals. Work also includes identification and certification of imported purebred animals for entry free of duty and administration of the 28-hour law for enforcement of humane handling of livestock in interstate commerce.

Exclusion of communicable diseases of foreign origin such as foot-and-mouth disease and rinderpest is accomplished through inspection of imported animals at ports of entry, proper disposition of prohibited garbage or meat on incoming ships or planes, and supervision and control of importation of animal products, hay, straw, and other matter which might harbor dangerous diseases.

Control and eradication of livestock diseases are carried on in cooperation with State agencies. Indemnities are paid when animals are condemned. A decrease of $10,000 results from decreased cattle tick eradication activities in Florida.

The volume of inspections and examinations annually are shown in the following table:

NUMBER OF UNITS

	1950 actual	1951 estimate	1952 estimate
Import-export inspection:			
All animals	648,416	550,000	550,000
Hides, glands, and other animal products—pounds	4,057,290,000	4,000,000,000	4,000,000,000
Public stockyards inspections: All animals	66,951,536	67,000,000	67,000,000
Supervision of production of veterinary biologics:			
Hog-cholera virus and anti-hog-cholera serum—cubic centimeters	1,990,174,700	2,149,382,400	2,256,838,400
Other biologics:			
Cubic centimeters	595,751,500	625,539,000	656,816,000
Milligrams	68,366,000	71,784,000	75,373,000
Disks	272,300	200,000	150,000
Units	617,568,000	636,095,000	655,178,000
Field testing, dipping, and inspection:			
Tuberculosis	9,439,811	10,200,000	10,200,000
Brucellosis (Bang's disease)	5,974,721	6,200,000	6,200,000
Scabies (cattle and sheep)	6,591,944	6,000,000	6,000,000
Cattle fever ticks	7,163,974	6,500,000	6,500,000

3. *Marketing agreements, hog-cholera virus and serum.*—The Secretary's marketing agreement with the manufacturers and other handlers of these products provides for the maintenance of adequate stocks for the protection of swine producers. Regulations prescribed by the Department to prevent undue and excessive fluctuations in price, unfair methods of competition, and unfair trade practices are administered by a control agency representing the industry. The Bureau's work includes reviewing the acts of the control agency, assembling data on production, sales and prices, and conducting investigations.

4. *Meat inspection.*—Federal meat inspection assures clean and wholesome meat for human consumption. It includes (*a*) inspection of cattle, sheep, goats, swine, and horses prior to slaughter, and of carcasses at the time of slaughter to eliminate diseased or unfit meat; (*b*) inspection at all stages of preparation of meat and meat food products to assure sanitary handling; and (*c*) enforcement of measures that insure informative labeling. Inspection also includes meats and meat food products offered for importation and certification of these products for exportation. Laboratory examinations are made, and research is conducted on problems relating to meat inspection. Meat and meat food products are examined for compliance with specification requirements of governmental purchas-

Federal Reserve Bank of St. Louis

ing agencies, for which reimbursements are received. Reimbursements are also received from meat-packing establishments for the cost of overtime work performed at their request. Amounts collected approximate $2,535,000 annually. An increase is proposed for 1952 to provide for more adequate enforcement of meat inspection laws.

The volume of inspections and examinations performed annually is indicated by the following table:

NUMBER OF UNITS

	1950 actual	1951 estimate	1952 estimate
Inspections of live animals	87,732,534	90,648,000	93,388,000
Postmortem inspections	87,723,838	90,638,000	93,378,000
Carcasses condemned	295,221	300,000	310,000
Meat and meat food products processed—pounds	14,146,903,556	14,800,000,000	15,000,000,000
Meat and meat food products condemned on reinspection—pounds	7,020,890	9,000,000	9,500,000
Imported meat and meat food products—pounds	229,147,254	200,000,000	200,000,000
Meat and meat food products examined for other governmental agencies—pounds	191,706,540	190,000,000	190,000,000

Eradication of Foot-and-Mouth Disease and Other Contagious Diseases of Animals and Poultry, Agricultural Research Administration—

For expenses necessary in the arrest and eradication of foot-and-mouth disease, rinderpest, contagious pleuropneumonia, or other contagious or infectious diseases of animals, or European fowl pest and similar diseases in poultry, including the payment of claims growing out of past and future purchases and destruction of animals (including poultry) affected by or exposed to, or of materials contaminated by or exposed to, any such disease, wherever found and irrespective of ownership, under like or substantially similar circumstances, when such owner has complied with all lawful quarantine regulations; and for foot-and-mouth disease and rinderpest programs undertaken pursuant to the provisions of the Act of February 28, 1947 [(21 U. S. C. Supp. II, 114b–114d),] and the Act of May 29, 1884, as amended (7 U. S. C., 391; 21 U. S. C., 111–122), including expenses in accordance with section 2 of said Act of February 28, 1947, the Secretary may transfer from other appropriations or funds available to the bureaus, corporations, or agencies of the Department such sums as he may deem necessary, to be available only in an emergency which threatens the livestock or poultry industry of the country, and any unexpended balances of funds transferred under this head in the next preceding fiscal year shall be merged with such transferred amounts: *Provided*, That, except for payments made pursuant to said Act of February 28, 1947, the payment for such animals hereafter purchased may be made on appraisement based on the meat, egg-production, dairy, or breeding value, but in case of appraisement based on breeding value no appraisement of any such animal shall exceed three times its meat, egg-production, or dairy value, and, except in case of an extraordinary emergency, to be determined by the Secretary, the payment by the United States Government for any such animals shall not exceed one-half of any such appraisements: *Provided further*, That poultry may be appraised in groups when the basis for appraisal is the same for each bird.

To enable the Secretary to make repayment to the Commodity Credit Corporation for amounts transferred and expenses incurred under this head during the fiscal year 1950, pursuant to authority granted in the Department of Agriculture Appropriation Act, 1950, $32,700,000. (21 U. S. C. 114a; Department of Agriculture Appropriation Act, 1951.)

Total obligations	31,453,045	443,616	$32,700,000

PROGRAM AND PERFORMANCE

This program was initiated after discovery of foot-and-mouth disease in Mexico late in 1946. Measures to prevent spread of the disease into the United States and to assist Mexico in control and eradication will be continued until it is assured that the disease has been completely eradicated. Due to the unpredictable course of the disease, the Department has been authorized to transfer needed amounts from any funds available to it. Repayment of these transfers has been made from supplemental appropriations. However, no supplemental will be proposed in 1951; instead the above language provides for a 1952 appropriation for repayment to the Commodity Credit Corporation of amounts transferred and expenses incurred, including inventory adjustments, during 1950 under the 1950 Department of Agriculture Appropriation Act.

Cooperation with Mexico in control and eradication.—This consists of (*a*) quarantine restrictions to prevent the spread of foot-and-mouth disease, (*b*) inspection to detect infected animals, (*c*) eradication of any new outbreak of the disease, and (*d*) sanitary measures, which include disinfection of trucks, cars, and other vehicles at centers of infection. From April 1948 through July 1950 more than 60,000,000 vaccinations were made in 4 successive series at intervals of 4 months. More than 14,000,000 animals are currently inspected each month. No slaughter has been necessary since January 1950.

Enforcement of Mexican border quarantine.—Nineteen hundred miles of border are patroled to prevent importation of ruminants and swine from Mexico or entry of materials that might harbor the virus.

Inspection at public stockyards and in the field.—Increased inspection provides means to detect immediately any introduction of foot-and-mouth disease into the United States.

Short-term research.—Study of foot-and-mouth disease has been undertaken in Europe, utilizing foreign laboratory facilities, to acquire information for use in Mexico.

Purchases and sales costs of Mexican canned meat and meat products.—Mexico lost an export market for about 500,000 animals annually with the closing of the United States border. Resulting congestion of the animal population increased the hazards of contagion in Mexico. As a further defensive measure in the eradication program, the United States agreed to purchase, for disposal in foreign markets, meat produced in northern Mexico and canned under adequate supervision. It is anticipated that purchase of canned meat will be discontinued in 1951.

Balance available in subsequent year	−462,844	−455,698	
Total obligations	37,156	7,146	455,698

PROGRAM AND PERFORMANCE

The Second Deficiency Appropriation Act of 1949 provided $500,000 for preparing plans and specifications for laboratory facilities for research on foot-and-mouth disease and for acquiring an option on the site recommended. Total costs were to be limited to $25,000,000.

In accordance with the Act, the Secretary submitted estimates for construction of facilities, detailed information concerning the proposed location, and estimated costs, prepared in cooperation with the General Services Administration. The proposal was not approved. The unobligated balance of this appropriation, therefore, has been placed in reserve pending final determination of its disposition.

OBLIGATIONS BY ACTIVITIES

Preparation of plans and specifications for laboratory facilities—1950, $37,156; 1951 $7,146; 1952, $455,698.

OBLIGATIONS BY OBJECTS

Total obligations	1,619,787	1,589,500	$1,589,000

PROGRAM AND PERFORMANCE

Research is conducted to improve the producing efficiency of dairy cows and the quality of dairy products, determine the nutritional requirements of dairy cattle and the nutritive value of feeds, and extend the use of milk and its byproducts in new ways. The Bureau also enforces Federal regulations relating to process butter.

1. *Dairy cattle breeding, feeding, and management.*—Research is conducted to increase the efficiency of milk production of dairy cows through breeding, feeding, and management. Experiments in cross-breeding are also being conducted. Determinations are made of the relationship of conformation, internal anatomy, and mamary development to producing capacity, accompanied by demonstrations and studies of practices beneficial to specific regions, notably the irrigated region of the Northwest, the Great Plains region, the Coastal Plain region, and the blue grass region of Alabama, Mississippi, Tennessee, and Kentucky.

2. *Nutrition and physiology.*—This research activity has been considerably broadened during recent years. Fundamental work includes determinations of nutritional values of milk and their relation to the nutrition of the cow, nutritional requirements of animals of various ages, values of different feeds and feeding regimes, physiological processes affecting the general economic usefulness of dairy cattle, and the relation of diet to these processes.

3. *Dairy herd improvement investigations.*—Continuous application of research results to farmers' herds is tested by analyzing production data of individual animals and families of animals in dairy herd improvement associations. This is done cooperatively with State extension dairymen who work with 40,000 farmers enrolled in 1,973 associations, which provide production and other data on about 1 million cows annually. Analytical data are returned to the State extension services, which in turn make them available to dairymen so they may have the information needed for improving their herds. A list of proved sires in association herds is published annually.

4. *Dairy products research.*—Studies are being conducted of the bacteriology and chemistry of milk, which are fundamental to practically all other research dealing with the manufacture of milk products. Applied research is directed toward the preservation of milk in evaporated, dried, and frozen form, and the manufacture of cheeses, ice cream, and other milk products, including studies designed to demonstrate how large amounts of milk solids now wasted or used inefficiently may be utilized in new or improved food products.

5. *Administration and enforcement of the Process Butter Act.*—Three factories manufacture process butter under continuous inspection. During fiscal 1950, 1,745,253 pounds of packing stock butter were inspected of which 3.4 percent was condemned.

OBLIGATIONS BY ACTIVITIES

PROGRAM AND PERFORMANCE

Research is conducted in the field of chemistry and related physical sciences on problems related to the utilization of agricultural commodities, residues, and byproducts in food, feeds, drugs, and nonedible products, mainly through 4 regional research laboratories and 10 smaller field stations.

1. *Cereal and forage crops utilization investigations.*—Experiments are conducted to develop products from grains having industrial and food uses and providing potential outlets for surplus production. Studies are made on reducing costs of producing alcohol from grains and the use of motor fuels produced from grains. Other major lines of study are (1) relation between the oil and vitamin content of grains and their breeding to enhance their value as industrial raw materials; (2) improvement of methods for the milling of grains and rices; (3) conversion of grains and starches to sugars or sirups; (4) modification of starch, corn sugar, and cereal proteins to yield better adhesives, fibers, films, and resins; and (5) development of new industrial fermentations for converting grains to chemicals, drugs, vitamins, and food products.

2. *Cotton and other fiber crops utilization investigations.*—These investigations deal with (1) determination of fiber structure and properties and their relation to the processing behavior and to the quality and uniformity of the resulting yarns and fabrics; (2) new or improved machinery and methods for processing lint cotton; (3) new or improved cotton products for specific industrial, clothing, and household applications; (4) chemical processing of cotton to impart or improve desirable properties; (5) production of chemical derivatives of cellulose from cotton linters; and (6) the development of improved processing methods for scouring and carbonizing wool.

3. *Fruit and vegetable utilization investigations.*—Research is conducted to devise new and more economical processing methods, to create new types of food products, to increase the value of byproducts from processing residues and to solve disposal problems.

4. *Oilseed utilization investigations.*—Major lines of investigation include studies on deterioration of oilseeds during storage; development of new, economical methods for processing oilseeds to improve quality of the products for edible and industrial uses; and the chemical modification of oils to meet specific industrial requirements.

5. *Sugar and special plants utilization investigations (including pine gum, tobacco, tanning materials, wild plants, etc.).*—Research on cane sugar seeks to improve methods for processing sugar cane, cane juice, and molasses and utilization of byproducts. Similar research is being conducted on beet sugar. Research is being conducted to improve methods and equipment for processing pine-tree gum for the production of oleoresin, turpentine, and rosin and to develop new and expanded outlets for the commodities and their derivatives.

Studies are conducted on tobacco to isolate essence or flavor and to develop outlets for this material. Development of new and improved insecticides from nicotine and improved methods for the recovery of nicotine from high nicotine varieties are also studied.

To provide reliable, adequate, domestic sources of vegetable tannins, processes for tannin extraction, utilization of byproducts, and the leather tanning quality of the materials alone or in blends are being investigated.

6. *Poultry, dairy, and animal products utilization investigations.*—Research includes (1) extensive studies on improvement of methods for preserving poultry and for utilizing poultry byproducts and (2) development of methods for the practical preparation of dried whole eggs and egg white having superior quality and longer storage life. Microbiological problems in the preservation of both egg and poultry meat are receiving increasing attention. New uses are being sought for milk and milk products, particularly for skim milk and whey. Lactic acid derivatives are being prepared and exhibit promising plasticizing properties for use in new types of synthetic rubber. Intensive effort is being expended toward development of new uses for inedible animal fats and oils. It is the objective of these investigations to prepare fractions of these oils, as well as pure fatty acids and their derivatives, for industrial chemical use as replacements for imported oils and as emulsifiers, soaps, detergents, and lubricating oils.

7. *Agricultural residues utilization investigations.*—The three chief constituents of agricultural residues are cellulose, hemicellulose, and lignin, on which research is conducted to extend their use in the manufacture of fine and specialty papers, box and building boards, filters, extenders for adhesives and plastics, soft-grit blasting materials, and industrial chemicals.

OBLIGATIONS BY ACTIVITIES

Description	1950 actual	1951 estimate	1952 estimate
1. Cereal and forage crops utilization investigations	$1,283,242	$1,339,168	$1,338,661
2. Cotton and other fiber crops utilization investigations	1,299,230	1,225,213	1,224,727
3. Fruit and vegetable utilization investigations	2,221,187	2,125,463	2,124,668
4. Oilseed utilization investigations	1,184,155	1,151,014	1,150,585
5. Sugar and special plants utilization investigations (including pine gum, tobacco, tanning materials, wild plants, etc.)	753,348	781,404	781,113
6. Poultry, dairy and animal products utilization investigations	1,186,579	1,086,310	1,085,911
7. Agricultural residues utilization investigations	291,069	261,428	261,335
Total obligations	8,218,810	7,970,000	7,967,000

AGRICULTURAL RESEARCH ADMINISTRATION—Continued

BUREAU OF PLANT INDUSTRY, SOILS, AND AGRICULTURAL ENGINEERING

Salaries and Expenses, Plant Industry, Soils, and Agricultural Engineering, Agricultural Research Administration—

Plant, soil, and agricultural engineering research: For expenses necessary for investigations, experiments, and demonstrations concerning plants, soils, and agricultural engineering, including those related to the production, improvement, handling, processing, transportation, and storage of farm and other crops; control of weeds, plant diseases, and nematodes; discovery and introduction of new and useful plants, both foreign and native; soil and water management to improve soil productivity; the relation of soils to plant, animal, and human nutrition; classification and mapping of soils; fertilizers, liming materials, and soil amendments; farm machinery and processing equipment; farm buildings, and farm electrification; and for the operation and maintenance of airplanes; $10,636,400.

[For expenses necessary for investigations, experiments, and demonstrations in connection with the production and improvement of farm crops and other plants and plant industries; soils and soil-plant relationships, and the application of engineering principles to agriculture; plant diseases, including nematodes, and methods for their prevention and control; plant and plant-disease collections, and surveys; the distribution of weeds and means for their control; methods of handling, processing, transportation, and storage of agricultural products; and plants in foreign countries and our possessions for introduction into the United States, including explorations and surveys, and propagation and testing in this country; and for the operation and maintenance of airplanes, as follows:]

[Field crops: For investigations on the production, improvement, and diseases of alfalfa, barley, clover, corn, cotton, flax, grasses, oats, rice, rubber crops, sorghums, soybeans, sugar beets, sugarcane, tobacco, wheat, and other field crops, $3,437,500.]

[Fruit, vegetable, and specialty crops: For investigations on the production, improvement, and diseases of fruit, vegetable, nut, ornamental, and related crops and plants, $3,012,500.]

[Forest diseases: For investigations of diseases of forest and shade trees and forest products, and methods for their control, $452,500.]

[Soils, fertilizers, and irrigation: For investigations of soil management methods to increase and maintain productivity, including fertilization, liming, crop rotations, tillage practices, and other means of improving soils; fertilizers, fertilizer ingredients, and their improvement for agricultural use; soil management and crop production on dry and irrigated lands, and the quality of irrigation water and its use by crops; and for the classification of soils in a national system and indication of their extent and distribution on maps, and determination of their potential productivity under adapted cropping and improved soil management, $2,723,750, including not to exceed $100,000 for construction or acquisition of buildings, facilities, and equipment for the station at Brawley, California.]

[Agricultural engineering: For investigations involving the application of engineering principles to agriculture, including farm power and equipment, rural water supply and sanitation, and rural electrification; farm buildings and their appurtenances and buildings for processing and storing farm products, and the preparation and distribution of building plans and specifications; cotton ginning, and other engineering problems relating to the production, processing, transportation, and storage of agricultural products; $1,130,000.]

National Arboretum: For the maintenance and development of the National Arboretum established under the provisions of the Act approved March 4, 1927 (20 U. S. C. 191–194), [$152,700] *$148,600.*

[SOILS, FERTILIZERS, AND IRRIGATION]

[For an additional amount for "Soils, fertilizers, and irrigation", $100,000, for payment of obligations incurred pursuant to authority granted under this head in the Department of Agriculture Appropriation Act, 1950, to enter into contracts for construction or acquisition of buildings, facilities, and equipment for the station at Brawley, California, including architectural and other costs previously incurred in connection therewith.] *(5 U. S. C. 511–512—establishing the Department of Agriculture; 524 establishing the Bureau; 563, 564; Supplemental Appropriation Act, 1951; Department of Agriculture Appropriation Act, 1951.)*

Annual definite appropriation:

Appropriated 1951, **$11,008,950** Estimate 1952, [a] **$10,785,000**
Appropriated (adjusted) 1951, **$11,068,950**

[a] Excludes $650 for activities transferred in the estimates to "Salaries and expenses, Office of Information, Department of Agriculture." The amounts obligated in 1950 and 1951 are shown in the schedule as comparative transfers.

Total reimbursable obligations	222,498	196,800	169,600
Total obligations	11,141,090	10,940,800	10,954,600

PROGRAM AND PERFORMANCE

The Bureau conducts research on (1) the improvement and more efficient production of farm crops, fruits, vegetables, and other plants including the development of methods for controlling plant diseases; (2) soil management, irrigation, and fertilizers; and (3) the application of engineering principles to agriculture. It is also responsible for the operation, maintenance, and development of the National Arboretum.

1. *Plant, soil, and agricultural engineering research.*—The research consists primarily of field, laboratory, and greenhouse experiments conducted usually in cooperation with State agricultural experiment stations, various Federal agencies, crop improvement associations, industry and others. Plant explorations are conducted to introduce new plants and strains from all parts of the world valuable as new crops or for breeding varieties superior to those now grown. The work is conducted at approximately 200 field locations throughout the United States. Research results are made available to farmers and others through increase and distribution of improved varieties, and by dissemination of information through the Federal-State cooperative extension service, publications, the agricultural press, and correspondence.

(*a*) *Field crop investigations.*—Research is conducted on the production, improvement, and control of diseases of the principal farm field crops to insure ample supplies of high quality food for an increasing population and provide fibers and raw materials from crops in the quantities and kinds needed by industry. Investigations on weed control are also conducted. Improved varieties are released to the public for commercial production. Progress is being made on the development of corn

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

hybrids resistant to corn borers, new cotton hybrids with superior yarn strength, tobacco varieties with resistance to wildfire disease, and other crop improvement work. The 1952 program provides for research to develop wheat varieties resistant to new races of stem rust.

(*b*) *Horticultural crop investigations.*—Research is conducted on (1) production, improvement, and control of diseases of fruit, vegetable, nut, and ornamental crops, (2) economical methods of handling, processing, transporting, and storing fruits and vegetables and related disease and quality problems, (3) introduction and testing of new plant materials, and (4) control of nematodes causing crop damage. During the current year, several improved varieties of fruits, vegetables, and ornamentals were made available to the public for commercial production.

(*c*) *Forest disease investigations.*—This research program, which serves the Forest Service, other governmental bureaus, State forestry agencies, and others, consists primarily of (1) identifying diseases of forest trees and products and determining their life cycles and (2) developing effective and economical control methods and management practices, including the development of disease-resistant varieties. Current progress includes the development and public introduction of an elm resistant to both Dutch elm disease and phloem necrosis, the development of a method for reducing decay of stored pulp wood, and studies on the pole blight disease of western white pine. The 1952 program provides for additional research to develop practical methods for controlling oak wilt which recently has become prevalent in the Midwest.

(*d*) *Soils, fertilizers, and irrigation investigations.*—These investigations are directed toward (1) determination of soil and water management practices in humid, dry-land, and irrigated regions which will maintain or increase soil fertility and provide more efficient crop production; (2) improvement of fertilizers, liming materials, and soil amendments; (3) classification and mapping of soils with particular respect to their crop production capacities, crop adaptations, and management practices; and (4) relation of soils to plant, animal, and human nutrition. During the past year, soil surveys and soil management investigations were expanded in the Missouri River Basin. The 1952 program provides for developing the regional research program made possible by completion in 1951 of the new Southwest Irrigation Field Station, Brawley, Calif.

(*e*) *Agricultural engineering investigations.*—These investigations include (1) improvement of farm machinery for planting, cultivating, fertilizing, and harvesting farm crops and for combating their insect pests and diseases; (2) development of plans for improved farm buildings and houses; (3) development of improved types of equipment and facilities for handling and processing farm products on the farm or at local cooperative plants; and (4) development and adaptation of electrical equipment to farm use. Progress during the past year includes the development of designs for improved grain storage structures, development of improved spray and seeding equipment, improved electric traps for controlling night flying insects, and the initiation of cotton ginning investigations in the Southwest.

2. *National Arboretum.*—The Arboretum, located in the District of Columbia, provides an extensive collection of living plants from this country and abroad valuable for use in developing new species of trees, shrubs, and flowers for parks, boulevards, and other landscape uses, and for study by students and scientists. A long-term development program initiated in fiscal year 1948 has been partially completed. Basic landscaping has been undertaken, some permanent roads and footpaths completed, and transplantings from nurseries to permanent locations are in progress. No major construction is contemplated in 1952.

OBLIGATIONS BY ACTIVITIES

Description	1950 actual	1951 estimate	1952 estimate
Direct Obligations			
1. Plant, soil, and agricultural engineering research:			
(*a*) Field crop investigations	$3,456,503	$3,383,790	$3,442,100
(*b*) Horticultural crop investigations	3,006,535	3,010,810	3,033,400
(*c*) Forest disease investigations	449,277	441,970	476,600
(*d*) Soils, fertilizers, and irrigation investigations	2,693,429	2,646,900	2,579,300

AGRICULTURAL RESEARCH ADMINISTRATION—Continued

BUREAU OF ENTOMOLOGY AND PLANT QUARANTINE

SALARIES AND EXPENSES

Salaries and Expenses, Entomology and Plant Quarantine, Agricultural Research Administration—

For expenses necessary for investigations, experiments, demonstrations, and surveys for the promotion of economic entomology, for investigating and ascertaining the best means of destroying insects and related pests injurious to agriculture, for importing useful and beneficial insects and bacterial, fungal, and other diseases of insects and related pests, for investigating and ascertaining the best means of destroying insects affecting man and animals, and the best ways of utilizing beneficial insects, for carrying into effect the provisions of the Plant Quarantine Act of August 20, 1912, as amended (7 U. S. C. 151–167), the Honey Bee Act (7 U. S. C. 281–283), the Insect Pest Act (7 U. S. C. 141–144), the Mexican Border Act (7 U. S. C. 149), and the Organic Act of 1944 (7 U. S. C. 147a), as amended, authorizing the eradication, control, and prevention of spread of injurious insects and plant pests; including the operation and maintenance of airplanes and the purchase of not to exceed [two] *three*, as follows:

Insect investigations: For the investigation of insects affecting fruits, grapes, nuts, trees, shrubs, forests and forest products, truck and garden crops, cereal, forage and range crops, cotton, tobacco, sugar plants, ornamental and other plants and agricultural products, household possessions, and man and animals; for bee culture and apiary management; for classifying, identifying, and collecting information to determine the distribution and abundance of insects; for investigations in connection with introduction of natural enemies of injurious insects and related pests and for the exchange with other countries of useful and beneficial insects and other arthropods; for developing methods, equipment, and apparatus to aid in enforcing plant quarantines and in the eradication and control of insect pests and plant diseases; and for investigations of insecticides and fungicides, including methods of their manufacture and use and the effects of their application, [$4,157,500] *$3,908,000*: *Provided*, That of the amount allotted for oriental fruitfly, not to exceed $250,000 may be used for contracts with public or private agencies for research without regard to provisions of existing law, and the amounts obligated for contract research shall remain available until expended[: *Provided further*, That $50,000 shall be transferred to applicable appropriations of the Public Health Service for investigations and studies of effects of insecticidal and fungicidal residue on human health].

Insect and plant-disease control: For carrying out operations or measures to eradicate, suppress, control, or to prevent or retard the spread of Japanese beetle, sweetpotato weevil, Mexican fruitflies, phony peach and peach mosaic, cereal rusts, pink bollworm and Thurberia weevil, golden nematode, citrus blackfly, white-fringed beetle, [and the] Hall scale, *and gypsy and brown-tail moths*, including the enforcement of quarantine regulations and cooperation with States to enforce plant quarantines as authorized by the Plant Quarantine Act of August 20, 1912, as amended (7 U. S. C. 151–167), and including the establishment of such cotton-free areas as may be necessary to stamp out any infestation of the pink bollworm as authorized by the Act of February 8, 1930 (46 Stat. 67), and for cooperation with States in the compensation of growers for losses resulting from the destruction of or for not planting potatoes and tomatoes on lands infested or exposed to infestations of the golden nematode for the purpose authorized by the Golden Nematode Act (Public Law 645, approved June 15, 1948), [and for the enforcement of domestic plant quarantines through inspection in transit, including the interception and disposition of materials found to have been transported interstate in violation of Federal plant quarantine laws or regulations, and operations under the Terminal Inspection Act (7 U. S. C. 166), $4,450,000] *$4,760,000*: *Provided*, That no part of this appropriation shall be used to pay the cost or value of trees, farm animals, farm crops, or other property injured or destroyed, except potatoes and tomatoes as authorized under the Golden Nematode Act: *Provided further*, That, in the discretion of the Secretary, no part of this appropriation shall be expended for the control of sweetpotato weevil in any State until such State has provided cooperation necessary to accomplish this purpose, or for barberry eradication until a sum or sums at least equal to such expenditures shall have been appropriated, subscribed, or contributed by States, counties, or local authorities, or by individuals or organizations for the accomplishment of this purpose, or with respect to the golden nematode except as prescribed in section 4 of the Golden Nematode Act.

[Foreign plant] *Plant* quarantines: For operations against the introduction of insect pests or plant diseases into the United States, including the enforcement of foreign-plant quarantines and regulations promulgated under sections 5 and 7 of the Plant Quarantine Act of August 20, 1912, as amended (7 U. S. C. 151–167), the Insect Pest Act of 1905 (7 U. S. C. 141–144), and the Mexican Border Act of 1942 (7 U. S. C. 149), for enforcement of domestic-plant quarantines as they pertain to Territories *and districts* of the United States, *for the enforcement of plant quarantines through inspection in transit, including the interception and disposition of materials found to have been transported in violation of Federal plant quarantine laws or regulations, and operations under the Terminal Inspection Act (7 U. S. C. 166)* and enforcement of regulations governing the movement of plants into and from the District of Columbia promulgated under section 15 of the Plant Quarantine Act of August 20, 1912, as amended, and for inspection and certification of plants and plant products to meet the sanitary requirements of foreign countries, as authorized in section 102 of the Organic Act of 1944 (7 U. S. C. 147a), [$2,354,700] *$2,667,000*. *(5 U. S. C. 511–512—establishing the Department of Agriculture; 563–564; 7 U. S. C. 145–148a, 148c–e; 16 U. S. C. 581–581c; Public Res. 47, approved May 21, 1928; Public Res. 42, approved Feb. 8, 1930; Department of Agriculture Appropriation Act, 1951.)*

Appropriated 1951, **$10,962,200** Estimate 1952, [a] **$11,335,000**
Appropriated (adjusted) 1951, **$10,912,200**

[a] Includes $560,000 for activities previously carried under "Control of forest pests Department of Agriculture," and excludes $700 for activities transferred in the estimates to "Salaries and expenses, Office of Information, Department of Agriculture." The amounts obligated in 1950 and 1951 are shown in the schedule as comparative transfers.

PROGRAM AND PERFORMANCE

The Bureau conducts research on insects and disseminates information on their control and use; studies the classification, anatomy, physiology, habits, and responses of insects; investigates practical and scientific aspects of beekeeping and insect pollination; develops and disseminates information on how injurious or annoying insects may be eliminated or controlled; conducts research on chemicals or other substances that may be used to destroy, attract, repel, or mitigate insects; studies diseases and natural enemies of insects to determine ways of utilizing those which may aid in the control of injurious insect pests; cooperates with State and local agencies to control and prevent the spread of injurious insects and plant diseases; and enforces Federal plant quarantines and regulatory orders. Activities are conducted in all 48 States of the Union, in Puerto Rico, Mexico, France, Egypt, and in the Canal Zone as well as in Alaska and Hawaii.

Federal Reserve Bank of St. Louis

1. *Insect investigations.*—Investigations are made of insects for control of those which are injurious, for utilization of those which are beneficial, and for better management of those (such as the honey bee) which produce useful products. Insecticides are studied and new formulations developed and tested in order that growers may protect their crops more effectively and economically. Similar work is done for more effective control of insects attacking warm-blooded animals and those commonly known as household pests. Farmers are advised on appropriate uses, safety precautions, time and method of application, and dosage. Most activities are in cooperation with State colleges, agricultural experiment stations, other agencies of the Federal Government, associations, growers, livestock owners, and beekeepers.

2. *Insect and plant disease control.*—Programs designed to protect agriculture from specific destructive insects and plant diseases are carried on in cooperation with appropriate governmental agencies, local communities, and individuals and include (1) inspections to detect and appraise infestations, (2) inspections to determine if regulated articles are free of pests, (3) certification of those which can be safely moved into uninfested areas, (4) supervision of treatments that are required by plant quarantines, (5) the applications of pesticides, and (6) other methods of combating infestations.

3. *Plant quarantines.*—Protective measures are carried out to prevent the introduction from abroad of insect pests and plant diseases. Complementary to this work, a service is rendered to American exporters of plants and plant products by certifying to the sanitary condition of such material as required by various foreign countries. Special precautions are being taken to prevent the introduction of oriental fruitfly, citrus blackfly, and the golden nematode.

Principal activities include issuance of permits required as a condition of entry of plants and plant products; inspections of carriers, cargoes, crew quarters, passengers' baggage, and mail; treating or supervising sanitation treatment of commodities offered for import; and making inspections in Hawaii and Puerto Rico of aircraft and their cargo to certify freedom from pests, thus permitting prompt clearance on arrival at mainland ports.

The various activities are carried on with the assistance and close cooperation of the Bureau of Customs, Immigration and Naturalization Service, Post Office Department, and Public Health Service.

OBLIGATIONS BY ACTIVITIES

Description	1950 actual	1951 estimate	1952 estimate
Direct Obligations			
1. Insect investigations:			
(a) Insects affecting food, feed, and fiber crops	$2,647,138	$2,672,400	$2,505,000
(b) Insects affecting forests and forest products	519,825	501,800	516,500
(c) Insects affecting man and animals	276,760	289,300	289,100

PROGRAM AND PERFORMANCE

Flexible year-to-year programs are conducted to combat incipient and emergency outbreaks of insects and plant diseases that are regional in scope and present serious threats to agriculture, usually involving cooperative effort by Federal and State agencies, local communities, and individual farmers. Surveys locate possible outbreaks of destructive pests and appraise the status of infestation. Depending upon the type of threat that may exist, the Bureau (1) cooperates with State and local agencies in advising farmers how and when to use protective insecticides, (2) undertakes suppressive measures against new introductions or potentially destructive pests now limited to small areas within the United States, (3) organizes large-scale control programs on a cooperative basis within affected areas, and (4) informs industry of potential needs for insecticide materials.

1. *Grasshopper and Mormon cricket control.*—Large-flake bran impregnated with an oil solution of either chlordane or toxaphene was first used for treating extensive areas for grasshopper control in 1949. This new-type bait, applied with aircraft to nearly 3,000,000 acres of native grass lands in Montana and Wyoming, protected forage in treated areas and prevented migrations to other parts of these or adjoining States. During the 1950 crop season, nearly 2,750,000 acres were similarly treated in Wyoming, Montana, Arizona, and Nevada with smaller acreages receiving attention in other Northwestern States.

An outstanding development of the 1950 program was the extent to which farmers acquired and applied chlordane and toxaphene sprays and dusts at their own expense to protect cultivated crops from grasshoppers breeding locally. It is estimated that approximately 5,000,000 acres were so treated. Also, in 1950, various formulations of aldrin were used experimentally for grasshopper control with most encouraging results. Two ounces of aldrin in a gallon of oil, or oil emulsion, when applied to an acre of either cultivated crops or native grass lands, gave almost complete control of all species of grasshoppers present. This new material, available in quantity for the first time this year, promises to further reduce the per acre cost of grasshopper control and to further simplify control procedures.

2. *General surveys.*—Information is developed on the distribution and imminent threat of various insect and plant diseases in order that preventive measures may be promptly taken.

3. *Contingency fund.*—The 1951 appropriation act provided a contingency fund of $1,250,000 under this item to minimize the need for supplemental appropriations, and a similar amount is included in the estimates for 1952. This contingency fund is to be apportioned for use only to the extent that the Secretary, with the approval of the Bureau of the Budget, finds necessary to meet emergency conditions. This fund makes it possible to take quick action to meet emergency situations as they arise.

CONTROL OF FOREST PESTS

Control of Forest Pests, Department of Agriculture—

For expenses necessary for carrying out operations, measures, or surveys necessary to eradicate, suppress, control, or to prevent or retard the spread of insects or diseases which endanger forest trees on any lands in the United States, and for such quarantine measures relating thereto as may be necessary pursuant to the Plant Quarantine Act of August 20, 1912, as amended (7 U. S. C. 151–167), including the purchase (not to exceed [three] *two*) and operation and maintenance of airplanes, *and* construction and alteration of necessary buildings[, not to exceed $23,500 for the purchase of one building at Greenfield, Massachusetts]: *Provided,* That the cost of constructing or altering any one building during the fiscal year shall not exceed $2,500, as follows:

[Gypsy and brown-tail moths: Gypsy and brown-tail moths, pursuant to section 102 of the Act of September 21, 1944 (7 U. S. C. 147a), $560,000.]

Forest Pest Control Act: For carrying out the provisions of the Act approved June 25, 1947 (16 U. S. C., Supp. I, 594–1—594–5), [$1,650,000] *$2,593,000,* of which [$750,000] *$2,000,000* shall be apportioned for use pursuant to section 3679 of the Revised Statutes, *as amended,* for the purposes of said Act only to the extent that the Secretary, with the approval of the Bureau of the Budget, finds necessary to meet emergency conditions.

White pine blister rust: White pine blister rust, pursuant to the Act of April 26, 1940 (16 U. S. C. 594a), [$3,490,000] *$3,407,000,* of which [amount $537,050] *$527,400* shall be available to the Department of the Interior for the control of white pine blister rust on or endangering Federal lands under the jurisdiction of that Department or lands of Indian tribes which are under the jurisdiction of or retained under restrictions of the United States; [$1,837,475] *$1,804,500* [of said amount] to the Forest Service for the control of white pine blister rust on or endangering lands under its jurisdiction; and [$1,115,475] *$1,075,100* [of said amount] to the Bureau of Entomology and Plant Quarantine for leadership and general coordination of the entire program, method development, and for operations conducted under its direction for such control, including, but not confined to, the control of white pine blister rust on or endangering State and privately owned lands. (*Department of Agriculture Appropriation Act, 1951.*)

Annual definite appropriation:

Appropriated 1951, **$5,700,000** Estimate 1952, [a] **$6,000,000**
Appropriated (adjusted) 1951, **$5,450,000**

[a] Excludes $560,250 for activities transferred in the estimates to appropriations as follows:

"Salaries and expenses, entomology and plant quarantine, Agricultural Research Administration"	$560,000
"Salaries and expenses, Office of Information, Department of Agriculture"	250

The amounts obligated in 1950 and 1951 are shown in the schedule as comparative transfers.

Total obligations	5,714,806	7,158,458	6,000,000

PROGRAM AND PERFORMANCE

1. *Forest Pest Control Act.*—Operations include (*a*) surveys to detect and appraise the presence and potential danger of insects and plant diseases which injure or destroy forest resources, and (*b*) suppressive measures in cooperation with one or more of several land-managing agencies that may be involved. Where the work is done on federally owned lands the operations are usually conducted by the agency responsible for the management of the land, under the technical leadership of Department specialists familiar with the pest concerned. Where the pest occurs on State or privately owned lands control operations are carried out cooperatively, using in part funds provided by the States, local forest protective associations, and the individuals concerned.

Major control programs during the past 2 years have involved spraying and treatment of large forest areas of high-value timber for control of the spruce budworm, of the Engelmann spruce beetle, and the bark beetle. The objective of this work is to detect and suppress outbreaks of destructive forest pests before extensive damage is done and while areas requiring treatment are small.

The 1951 appropriation act provided a contingency fund of $750,000 under this item to minimize the need for supplemental appropriations. This fund is to be apportioned for use only to the extent that the Secretary, with the approval of the Bureau of the Budget, finds necessary to meet emergency conditions. Fall surveys indicate the need for an additional supplemental appropriation of $1,500,000 during fiscal year 1951. To provide a contingency fund which, based on past experience, will more adequately meet emergency situations as they arise, the 1952 estimates propose that the contingency fund under this item be increased to $2,000,000.

2. *White pine blister rust.*—This program provides for the protection of white pine trees from the blister rust disease which causes extensive damage to mature stands of white pine and is fatal to young trees. By removing ribes (host plants) from areas where white pines grow, these valuable trees can be protected from the disease at reasonable cost. A considerable amount of the work is done by contract.

Control work on federally owned lands is carried out to a large degree by the agency responsible for the management of the land, and that on State and privately owned lands is carried out cooperatively between the Bureau of Entomology and Plant Quarantine and the States involved. The Bureau is responsible for technical leadership and supervision of operations on all lands, for the surveys that indicate when and where control work should be done, and enforcement of the Federal plant quarantine which prevents reinvasion of protected areas.

Since the cooperative program was initiated in 1919, ribes have been removed completely from approximately 13,000,000 acres, where little additional work is needed to safeguard the growth of white pine. Approximately 15,000,000 acres require further intensive work, including about 4,000,000 acres where no ribes eradication has yet been done.

FOREST SERVICE

Introductory Statement

The primary functions of the Forest Service are: (1) Protection, development, and use of more than 181,000,000 acres of land in national forests in the United States, Alaska, and Puerto Rico; (2) cooperation with the States and private forest landowners to obtain better fire protection on 427,000,000 acres of forest lands and better forest practices on and returns from 345,000,000 acres of privately owned forest lands, to aid in the distribution of planting stock to landowners, and to stimulate development and proper management of State, county, and community forests; (3) forest and range research for all forest and open-range lands to bring about better protection and increasing productivity, full utilization of forest, water, and range resources, and more profitable use of land for growing timber and for grazing. These functions include land acquisition, construction and maintenance of roads and trails, flood control, and other cooperative projects.

SALARIES AND EXPENSES

Salaries and Expenses, Forest Service—

For expenses necessary, including not to exceed $10,000 for employment pursuant to the second sentence of section 706 (a) of the Organic Act of 1944 (5 U. S. C. 574), as amended by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a); to experiment and make investigations and report on forestry, national forests, forest fires, and lumbering, but no part of this appropriation shall be used for any experiment or test made outside the jurisdiction of the United States; to advise the owners of woodlands as to the proper care of the same; to investigate and test American timber and timber trees and their uses, and methods for the preservative treatment of timber; to seek, through investigations and the planting of native and foreign species, suitable trees for the treeless regions; to erect necessary buildings: *Provided*, That the cost of any building purchased, erected, or as improved, exclusive of the cost [(not to exceed $1,000)] of constructing a water-supply or sanitary system and of connecting the same with any such building, and exclusive of the cost of any tower upon which a lookout house may be erected, shall not exceed $15,000, with the exception that any building erected, purchased, or acquired, the cost of which was $15,000 or more, may be improved out of the appropriations made under this chapter for the Forest Service by an amount not to exceed 2 per centum of the cost of such building as certified by the Chief of the Forest Service[, and that not to exceed $8,000 may be expended for the installation of an elevator in the Yeon Avenue warehouse in Portland, Oregon]; to protect, administer, and improve the national forests, including tree planting and other measures to prevent erosion, drift, surface wash, soil waste, and the formation of floods, and to conserve water; to ascertain the natural conditions upon and utilize the national forests, to transport and care for fish and game supplied to stock the national forests or the waters therein; to collate, digest, report, and illustrate the results of experiments and investigations made by the Forest Service, as follows:

[General administrative expenses: For general administration, including expenses of the National Forest Reservation Commission as authorized by section 14 of the Act of March 1, 1911 (16 U. S. C. 514), $665,000.]

National forest protection and management: For the administration, protection, use, maintenance, improvement, and development of the national forests, including the establishment and maintenance of forest tree nurseries, including the procurement of tree seed and nursery stock by purchase, production, or otherwise, seeding and tree planting and the care of plantations and young growth; the operation and maintenance of aircraft and the purchase of not to exceed three; the maintenance of roads and trails and the construction and maintenance of all other improvements necessary for the proper and economical administration, protection, development, and use of the national forests, including experimental areas under Forest Service administration, except that where direct purchases will be more economical than construction, improvements may be purchased; the construction (not to exceed $15,000 for any one structure), equipment, and maintenance of sanitary and recreational facilities; timber cultural operations; development and application of fish and game management plans; propagation and transplanting of plants suitable for planting on semiarid portions of the national forests; estimating and appraising of timber and other resources and development and application of plans for their effective management, sale, and use; *expenses of the National Forest Reservation Commission as authorized by section 14 of the Act of March 1, 1911 (16 U. S. C. 514);* examination, classification, surveying, and appraisal of land incident to effecting exchanges authorized by law and of lands within the boundaries of the national forests that may be opened to homestead settlement and entry under the Act of June 11, 1906, and the Act of August 10, 1912 (16 U. S. C. 506–509), as provided by the Act of March 4, 1913 (16 U. S. C. 512); investigation and establishment of water rights, including the purchase thereof or of lands or interests in lands or rights-of-way for use and protection of water rights necessary or beneficial in connection with the administration and public use of the national forests; and all expenses necessary for the use, maintenance, improvement, protection, and general administration of the national forests, [$27,100,000] *$29,655,000,* of which not to exceed $75,000 shall be available for the purchase of three nursery sites[, and not to exceed $5,000 shall be available for the purchase of administrative sites].

Fighting forest fires: For fighting and preventing forest fires on or threatening lands under Forest Service administration, including lands under contract for purchase or in process of condemnation for Forest Service purposes, and for liquidation of obligations incurred in the preceding fiscal year for such purpose, $6,000,000, of which $2,500,000 shall be apportioned for use, pursuant to section 3679 of the Revised Statutes, as amended, only to the extent that the Secretary, with the approval of the Bureau of the Budget, finds necessary to meet emergency conditions.

Forest research: For forest research at forest or range experiment stations, the Forest Products Laboratory, or elsewhere, in accordance with the provisions of sections 1, 2, 7, 8, 9, and 10 of the Act approved May 22, 1928, as amended (16 U. S. C. 581, 581a, 581f–581i), including the construction and maintenance of improvements; fire, silvicultural, watershed, and other forest investigations and experiments; investigations and experiments to develop improved methods of management of forest and other ranges; experiments, investigations, and tests of forest products; a comprehensive forest survey; and investigations in forest economics; $5,345,000.

[Forest research: For forest research in accordance with the provisions of sections 1, 2, 7, 8, 9, and 10 of the Act approved May 22, 1928, as amended (16 U. S. C. 581, 581a, 581f–581i), including the construction and maintenance of improvements, as follows:]

[Forest and range management investigations: Fire, silvicultural, watershed, and other forest investigations and experiments under said section 2, as amended, and investigations and experiments to develop improved methods of management of forest and other ranges under section 7, at forest or range experiment stations or elsewhere, $3,030,000, of which $41,000 shall be available for such investigations and experiments at Bartlett Experimental Forest only.]

[Forest products: Experiments, investigations, and tests of forest products under section 8, at the Forest Products Laboratory, or elsewhere, $1,300,000, of which $30,000 shall be made available for the establishment of a forest utilization service unit in the Southwest.]

[Forest resources investigations: A comprehensive forest survey under section 9, and investigations in forest economics under section 10, $880,000.] *(5 U. S. C. 511–512—establishing the Department of Agriculture; 524—establishing the Bureau of Forestry; 565a; 16 U. S. C. 471–583i; 31 U. S. C. 534; Act of June 20, 1910, Public Law 219; Act of Apr. 24, 1950, Public Law 478; Department of Agriculture Appropriation Act, 1951.)*

Appropriated 1951, **$38,975,000** Estimate 1952, [a] **$41,000,000**
Appropriated (adjusted) 1951, **$38,939,925**

[a] Excludes $167,400 for activities transferred in the estimates to appropriations as follows:
"Forest development roads and trails, Department of Agriculture" $94,900
"State and private forestry cooperation, Department of Agriculture" 67,800
"Salaries and expenses, Office of Information, Department of Agriculture" ... 4,700
The amounts obligated in 1950 and 1951 are shown in the schedule as comparative transfers.

PROGRAM AND PERFORMANCE

1. *National forest protection and management*—(*a*) *Resource protection and use.*—The Service protects the national forest properties from fire and trespass and manages the timber, water, range, recreation, wildlife, and other resources in such ways as to bring about maximum sustained production. In calendar year 1949, a total of 11,526 fires occurred on national forests, resulting in a burned area of 190,864 acres; the area burned over in calendar year 1950 will be larger. In 1952, it is proposed to strengthen detection and initial attack of the presuppression force by employing additional lookouts and firecrew men and by replacing a number of unsafe lookout towers. In the first quarter of the fiscal year 1951, 1.5 billion board feet of timber were cut from national forests, an increase of 41 percent over the same period of 1950. In 1952, it is proposed to expand the cut from national forest land to supply a greater share of forest products needed for military and important civilian uses. The demand for national forest timber on a long-term basis is steadily increasing because of the depletion of timber on private land in many localities. Forage on the forests is utilized by grazing of domestic livestock, with about 28,000 permits issued annually for grazing on approximately 80,000,000 acres. Recreation and wildlife resources are utilized by millions of visitors. Public use of the national forests in 1949 exceeded 26,000,000 visits, which reflects an increase at the rate of about 2,000,000 visits annually in recent years. Efforts are being made to obtain greater participation by local communities in the management of national forest campgrounds, and increased cooperation from the States in reducing big game population in overstocked areas. Watershed management of the national forests is accomplished by measures to minimize erosion, lessen flood run-off, increase useful water yield and improve water quality. Receipts from national forests in 1950 totaled about $35,500,000, including $29,400,000 of timber sales, $3,340,000 of grazing receipts, and $1,751,000 from other revenue-producing land activities, of which latter figure more than $1,000,000 was collected for mineral leases.

(*b*) *Resource development.*—Of a total of 1,358,183 acres of national forest land planted to trees, acreage planted in 1950 was 45,428. More than 4,000,000 acres of cutover, burned-over, denuded, or poorly stocked land are in need of planting. About 36,000 acres are to be planted in each of the fiscal years 1951 and 1952. Of the 80,000,000 acres of range lands in the national forests, about 4,000,000 require reseeding to range grasses to restore their productivity and improve watershed conditions. As of June 30, 1950, 334,000 acres have been reseeded, including 63,000 acres during 1950. It is estimated that 65,000 and 74,000 acres will be planted during 1951 and 1952, respectively.

2. *Fighting forest fires.*—Emergency fire control funds for temporary employment of additional persons are used when fire conditions become so critical that the regular protective organization (financed from "National forest protection and management") is unable to cope with the situation.

3. *Forest research*—(*a*) *Forest and range management investigations.*—Research is conducted to provide private and public land managers and owners with sound bases for protection and management of timber, range, and watershed lands. Studies are conducted at regional forest experiment stations to maintain a sustained yield of products at the lowest possible cost; increase forage on range lands for maximum production of livestock without damage to soil, watershed, or other values; assure maximum regular flow of usable water, and reduce flood and sedimentation, as well as fire damages.

(*b*) *Forest products investigations.*—These aid in protecting and enhancing the value and utility of forest products. The work of the Forest Products Laboratory, is directed toward improvement of forest products, reduction and utilization of waste, utilization of low-quality wood and unpopular species, development of new wood products, reduction of costs of logging and utilization of wood products, development of basic knowledge and discoveries, and dissemination of findings to meet the needs of the forest owner, primary manufacturer, wood fabricator, and ultimate consumer.

(*c*) *Forest resources investigations.*—These are conducted to inventory and appraise the condition of forest lands, volume and quality of standing timber, ownership of timber resources, annual growth and depletion, potential need for timber products, and other information on supply, production, and utilization. On July 1, 1950, about 420,000,000 acres of forest land had been initially inventoried in the field, and 100,000,000 acres of the area needing resurvey had been covered.

FOREST DEVELOPMENT ROADS AND TRAILS

Forest Development Roads and Trails, Department of Agriculture—

For expenses necessary for carrying out the provisions of section 23 of the Federal Highway Act approved November 9, 1921, as amended (23 U. S. C. 23, 23a), relating to forest development roads and trails, including the construction, reconstruction, and maintenance of roads and trails on experimental areas under Forest Service administration, [$10,348,000] *$17,500,000,* which sum is authorized to be appropriated by the [Act] *Acts* of June 29, 1948 (Public Law 834), *and September 7, 1950 (Public Law 769),* to remain available until expended: *Provided,* That this appropriation shall be available for the rental, purchase, construction, or alteration of buildings necessary for the storage and repair of equipment and supplies used for road and trail construction and maintenance, but the total cost of any such building purchased, altered, or constructed under this authorization shall not exceed $15,000 with the exception that any building erected, purchased, or acquired, the cost of which was $15,000 or more, may be improved within any fiscal year by an amount not to exceed 2 per centum of the cost of such buildings certified by the Chief of the Forest Service. (*Department of Agriculture Appropriation Act, 1951.*)

Appropriated 1951, **$10,348,000** Estimate 1952, [a] **$17,500,000**
Appropriated (adjusted) 1951, **$10,592,600**

[a] Includes $94,900 for activities previously carried under "Salaries and expenses, Forest Service." The amounts obligated in 1950 and 1951 are shown in the schedule as comparative transfers.

PROGRAM AND PERFORMANCE

Forest development roads and trails provide transportation routes essential for the protection and management of 181 million acres of national forest land. They are generally earth or gravel surfaced and considerably below

FOREST SERVICE—Continued

FOREST DEVELOPMENT ROADS AND TRAILS—continued

Forest Development Roads and Trails, Department of Agriculture—Continued

highway standards in other respects. Horse and foot trails supplement the road system. The existing system consists of approximately 107,700 miles of roads and 127,300 miles of trails.

During 1952, maintenance will require approximately $8,370,000 and will include the repair of about 170 bridges at an estimated cost of $960,000 and gravel surfacing on about 230 miles of roads, as well as the normal recurring work. The remainder will be used for improvement and new construction, primarily for roads to presently inaccessible areas. An estimated $2,000,000 of construction funds must be used to replace and improve about 340 old timber bridges that are dangerous for present-day loads.

Total obligations	399,224	250,000	100,000

PROGRAM AND PERFORMANCE

Lands are acquired to protect the watersheds of navigable streams and to increase the production of timber. The National Forest Reservation Commission, composed of the Secretaries of the Army, Interior, and Agriculture, two Senators, and two Representatives, has approved establishment of 78 national forest purchase units in 33 States, located mainly in the eastern half of the United States. The lands in these units are predominantly wild lands of high watershed importance or well adapted to timber production. Many of them have been heavily logged, unwisely cultivated, or otherwise abused.

Less than one-half of the land suitable for national forest purposes within established purchase units has been acquired; there remain 23 million acres to be purchased. The present value of all forest lands purchased under this authorization to date is estimated to be at least $180,000,000, which is twice their cost, including the expense of acquisition.

OBLIGATIONS BY ACTIVITIES

Acquisition of lands for national forests—1950, $399,224; 1951, $250,000; 1952, $100,000.

PROGRAM AND PERFORMANCE

Forest lands are acquired to preserve the wilderness conditions of a part of the Superior National Forest in Minnesota. Preservation of the wilderness conditions of this area necessitates consolidated public ownership and hence the acquisition of privately owned land within the area. There are approximately 43,000 acres of privately owned land within the area, of which 40,000 acres are planned for purchase. Approximately 3,000 acres were purchased in fiscal year 1950, 8,000 acres are planned for purchase in 1951, and 12,000 acres in 1952.

OBLIGATIONS BY ACTIVITIES

Acquisition of forest land, Superior National Forest, Minn.—1950, $66,576; 1951, $158,424; 1952, $150,000.

Unobligated balance, estimated savings	−39,421		
Total obligations	96,819	142,000	142,000

PROGRAM AND PERFORMANCE

Certain counties in California, Nevada, and Utah have consented to the use of national forest receipts they would normally receive for their road and school funds, for the purchase by the Government of privately owned lands within the national forests to aid in the control of soil erosion and flood damage. Thus far, 127,624 acres have been acquired, and the purchase of an additional 455,075 acres is considered necessary to meet the objectives of the program.

General accounts:

STATE AND PRIVATE FORESTRY COOPERATION

State and Private Forestry Cooperation, Department of Agriculture—

For expenses necessary for cooperation with the various States in forest-fire prevention and suppression, in forest tree planting, in forest management and processing, and in farm forestry extension, pursuant to the Act of August 25, 1950 (Public Law 729), and sections 1, 2, 3, 4, and 5 of the Act of June 7, 1924 (16 U. S. C. 564–568a), and Acts supplementary thereto; advising timberland owners, associations, and other appropriate agencies in the application of forest management principles to federally owned lands leased to States and to private forest lands, and advising wood-using industries in processing of forest products, so as to attain sustained-yield management, the conservation of the timber resources, the productivity of forest lands, and the stabilization of employment and economic continuance of forest industries; $10,820,000. (16 U. S. C. 581; Department of Agriculture Appropriation Act, 1951.)

Estimate 1952, [a] **$10,820,000**

[a] Estimate is for activities previously carried under appropriations as follows:
"Salaries and expenses, Forest Service" $67,800
"Forest fire cooperation, Department of Agriculture" 9,468,600
"Farm and other private forestry cooperation, Department of Agriculture" 1,283,600
The amounts obligated in 1950 and 1951 are shown in the schedule as comparative transfers.

PROGRAM AND PERFORMANCE

This program, for the most part carried on in cooperation with the States, encourages private timber growing through assistance in preventing and suppressing forest fires, reforestation of denuded areas, good management of woodlands, and farm forestry extension work.

Privately owned forest lands comprise three-fourths of the Nation's commercial forest area and produce 90 percent of all timber cut. The program concentrates on small forest properties in private ownership because (*a*) 76 percent of the private commercial forest acreage is in small holdings averaging only about 62 acres each, (*b*) the small-owner group comprises 99 percent of private forest owners, and (*c*) present cutting practices are poorest on these small properties and their owners lack the technical knowledge or skills necessary to put their woodlands in productive condition.

(1) *Cooperation in forest fire control.*—Assistance is furnished 43 States and 1 Territory in preventing and suppressing forest fires on private and State-owned lands. This assistance includes financial aid; training in fire fighting techniques; procurement and development of better fire tools, equipment, radio, and communication facilities; and direction of a Nation-wide campaign to reduce the number of man-caused forest fires. The status of protection on these non-Federal areas on January 1, 1950, was—

	Million acres
Now protected (including areas with, as yet, substandard protection)	357
Without protection	70
Total	427

There were 17.7 million acres of private forest land added to the protected area during the calendar year 1949; and acreage burned on protected areas was held to 0.65 percent as against an estimated 15.59 percent on unprotected lands.

During calendar year 1949 a total of $28,804,880 was expended, 62 percent by the States and counties, 7 percent by private owners, and 31 percent by the Federal Government.

(2) *Cooperation in forest tree planting.*—To encourage woodland owners to plant trees on the more than 60 million acres of denuded or poorly stocked, privately owned forest land, planting stock is provided at less than cost. The States grow the trees, and the Federal participation consists of sharing part of the cost with the States. State contributions to the program in fiscal year 1950, were $758,755, and the Federal appropriation was $224,600.

Since this program began in 1924, about 2,000,000 acres of successful plantations have been established. In 1950, approximately 200,000 acres of privately owned land were planted, most of which was under this program. It is expected that there will be substantial increases in the acreage planted in 1951.

(3) *Cooperation in forest management and processing.*—In cooperation with State foresters, 225 projects in 1,000 counties are operated to aid small woodland owners in applying good management to their timber holdings. In each project a forester assists small owners in technical timber management and marketing problems. In 1950, 22,828 individual small owners were helped to apply improved management practices on 2,542,564 acres of woodland. Under the act of August 25, 1950, Public Law 729, it will be possible to give small processors of primary forest products somewhat similar technical service assistance.

(4) *Cooperation in farm forestry extension.*—As a part of State agricultural extension services, forestry specialists operating mainly through county agricultural agents carry out forestry educational work among farmers. The work includes group demonstrations, meetings, training schools, development of subject matter and visual-aid materials, press and radio releases on tree planting, woodland management, marketing and utilization of farm woodland crops, and wood preservation. In calendar year 1949 this work was carried on in 2,475 counties.

(5) *General forestry assistance.*—Assistance is given in response to inquiries from private consulting foresters, State foresters, professional forestry schools, industrial foresters, from other Federal departments, and the general public. Information or technical assistance is given by field technicians of the Service and involves numerous field surveys, consultations, etc. Also included in this item is administration of nearly 500,000 acres of federally owned forest land under long-term lease to the States.

[FOREST-FIRE COOPERATION]

Forest Fire Cooperation, Department of Agriculture—

[For cooperation with the various States or other appropriate agencies in forest-fire prevention and suppression and the protection of timbered and cut-over lands in accordance with the provisions of sections 1, 2, and 3 of the Act approved June 7, 1924, as amended (16 U. S. C. 564–566), $9,500,000.] (*Department of Agriculture Appropriation Act, 1951.*)

Appropriated 1951, **$9,500,000**

NOTE.—Estimate of $9,468,600 for activities previously carried under this title has been transferred in the estimates to "State and private forestry cooperation, Department of Agriculture." The amounts obligated in 1950 and 1951 are shown in the schedule as comparative transfers.

[FARM AND OTHER PRIVATE FORESTRY COOPERATION]

Farm and Other Private Forestry Cooperation, Department of Agriculture—

[To enable the Secretary through the Forest Service to advise timberland owners and associations, wood-using industries or other appropriate agencies in the application of forest management principles to federally owned lands leased to States and to private forest lands, so as to attain sustained-yield management, the conservation of the timber resources, the productivity of forest lands, and the stabilization of employment and economic continuance of forest industries, and to carry into effect, through such agencies of the Department as he may designate, the provisions of the Cooperative Farm Forestry Act, approved May 18, 1937 (16 U. S. C. 568b), (not to exceed $785,034) and the provisions of sections 4 (not to exceed $449,200) and 5 (not to exceed $65,766) of the Act approved June 7, 1924 (16 U. S. C. 567–568), and Acts supplementary thereto; $1,300,000.] (*16 U. S. C. 564, 568a, 581; Department of Agriculture Appropriation Act, 1951.*)

Appropriated 1951, **$1,300,000**

NOTE.—Estimate of $1,283,600 for activities previously carried under this title has been transferred in the estimates to "State and private forestry cooperation, Department of Agriculture." The amounts obligated in 1950 and 1951 are shown in the schedule as comparative transfers.

Payment to Minnesota (Cook, Lake, and Saint Louis Counties) From the National Forests Fund—

Appropriated (estimate) 1951, **$45,000** Estimate 1952, **$45,000**

FUNDS AVAILABLE FOR OBLIGATION

Appropriation or estimate—1950, $43,548; 1951, $45,000; 1952, $45,000.

PROGRAM AND PERFORMANCE

Under the act of June 22, 1948, the Secretary of the Treasury, upon certification of the Secretary of Agriculture, pays the State of Minnesota at the close of each fiscal year an amount equivalent to three-fourths of 1 percent of the appraised value of certain Superior National Forest lands in the counties of Cook, Lake, and St. Louis for distribution to these counties (16 U. S. C. 577g).

OBLIGATIONS BY ACTIVITIES

Payment to Minnesota (Cook, Lake, and Saint Louis Counties) from the national forests fund—1950, $43,548; 1951, $45,000; 1952, $45,000.

OBLIGATIONS BY OBJECTS

11 Grants, subsidies, and contributions—1950, $43,548; 1951, $45,000; 1952, $45,000.

Payments, Sale of Lands and Timber, Department of Agriculture—

FUNDS AVAILABLE FOR OBLIGATION

Appropriation or estimate—1950, $2,854.

OBLIGATIONS BY ACTIVITIES

Refunds of payments for sale of land and timber—1952, $2,854.

OBLIGATIONS BY OBJECTS

13 Refunds, awards, and indemnities—1950, $2,854.

Payments to States and Territories From the National Forests Fund—

Appropriated (est.) 1951, **$8,372,747** Estimate 1952, **$10,354,017**

FUNDS AVAILABLE FOR OBLIGATION

Appropriation or estimate—1950, $7,753,275; 1951, $8,372,747; 1952, $10,354,017.

PROGRAM AND PERFORMANCE

With minor exceptions, 25 percent of all money received from the national forests during any fiscal year is paid to the States and Territories for the benefit of public schools and public roads of the county in which such national forests are situated (16 U. S. C. 500).

PROGRAM AND PERFORMANCE

Flood-control activities of the Department are directed toward reduction of damages caused by floodwaters and sediment. Principal benefits accrue in the upstream areas and along tributary streams, but downstream reaches also benefit. About 75 percent of all floodwater and sediment damage is caused by frequent floods on relatively small tributary streams.

Activities are of two types: (1) Examination and survey of watersheds and preparation of reports setting forth watershed conditions and recommending measures to retard run-off and waterflow and prevent erosion; and (2) installation of the measures making up the programs of work set forth in the reports and approved by the Congress.

Survey reports, after review within the Department, by other concerned Federal agencies, and by the concerned States, are transmitted to the Congress for consideration. If the recommended programs are approved by the Congress, the Department then proceeds to install the authorized measures.

Floodwater and sediment damages are prevented or reduced through measures taken to increase the infiltration and storage of rainfall in the soil and retard and control runoff. The measures mitigate flood damage and reduce the volume of sediment that is deposited in river channels and main-stream reservoirs.

In general, the measures which provide conservation benefits and help to increase production are installed by landowners and operators with technical assistance and special materials and equipment provided by the Department. Measures which principally benefit downstream areas and communities are installed primarily at public (Federal, State, and local) expense and, when installed on nonpublic lands, are maintained by landowners and other local interests.

Preliminary examination or survey work was in progress on 62 watersheds in 1950, is scheduled for 47 watersheds in 1951, and is proposed for 14 individual or groups of watersheds in 1952. Continuation of installation of works of improvement on the 11 authorized watersheds is proposed for 1952. Work is continuing on the plan for the agricultural phases of the Columbia basin area development.

The estimate for 1952 also contemplates an increase of $250,000 for work leading to the preparation of the agricultural phases of comprehensive plans for the development and utilization of the resources of the Arkansas-White-Red and the New England-New York areas and to assist in the preparation of reports for transmittal to Congress. Data obtained from flood-control surveys will be used in conjunction with data for other agricultural phases in formulating these more comprehensive agricultural programs.

SOIL CONSERVATION SERVICE

SALARIES AND EXPENSES

Salaries and Expenses, Soil Conservation Service—

For necessary expenses for carrying out the provisions of the Act of April 27, 1935 (16 U. S. C. 590a–590f), title III of the Act of July 22, 1937 (7 U. S. C. 1010–1012), and the Act of August 11, 1945 (7 U. S. C. 1011 note), including research and investigations into the character, cause, extent, history, and effects of erosion, soil and moisture depletion, and methods of soil and water conservation (including the construction and hydrologic phases of farm irrigation and land drainage, and the construction, operation, and maintenance of experimental watersheds, stations, laboratories, plots, and installations); making conservation surveys and plans and establishing measures to conserve soil and water (including farm irrigation and land drainage and such special measures as may be necessary to prevent floods and the siltation of reservoirs); establishment and operation of conservation nurseries; development and management of land utilization project lands and facilities; dissemination of information; purchase and erection or alteration of permanent buildings; operation and mantenance of aircraft; and furnishing of subsistence to employees; $54,278,000: Provided, That the cost of any permanent building purchased, erected, or as improved, exclusive of the cost of constructing a water supply or sanitary system and connecting the same to any such building and with the exception of buildings acquired in conjunction with land being purchased for other purposes, shall not exceed $2,500, except for eight buildings to be constructed or improved at a cost not to exceed $15,000 per building and except that alterations or improvements to other existing permanent buildings costing $2,500 or more may be

SALARIES AND EXPENSES—continued

Salaries and Expenses, Soil Conservation Service—Continued

made in any fiscal year in an amount not to exceed $500 per building: Provided further, That no part of this appropriation shall be available for the construction of any such building on land not owned by the Government: Provided further, That in the State of Missouri where the State has established a central State agency authorized to enter into agreements with the United States or any of its agencies on policies and general programs for the saving of its soil by the extension of Federal aid to any soil conservation district in such State, the agreements made by or on behalf of the United States with any such soil conservation district shall have the prior approval of such central State agency before they shall become effective as to such district: Provided further, That no part of this appropriation may be expended for soil and water conservation operations under the Act of April 27, 1935 (16 U. S. C. 590a–590f), in demonstration projects: Provided further, That not to exceed $5,000 may be used for employment pursuant to the second sentence of section 706 (a) of the Organic Act of 1944 (5 U. S. C. 574), as amended by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a).

[For expenses necessary to carry out the provisions of the Act approved April 27, 1935 (16 U. S. C. 590a–590f), which provides for a national program of erosion control and soil and water conservation, furnishing of subsistence to employees, operation and maintenance of aircraft, and the purchase and erection or alteration of permanent buildings: *Provided*, That the cost of any building purchased, erected, or as improved, exclusive of the cost of constructing a water supply or sanitary system and connecting the same with any such building, shall not exceed $2,500 except where buildings are acquired in conjunction with land being purchased for other purposes and except for eight buildings to be constructed at a cost not to exceed $15,000 per building: *Provided further*, That no money appropriated in this chapter shall be available for the construction of any such building on land not owned by the Government: *Provided further*, That in the State of Missouri where the State has established a central State agency authorized to enter into agreements with the United States or any of its agencies on policies and general programs for the saving of its soil by the extension of Federal aid to any soil conservation district in such State, the agreements made by or on behalf of the United States with any such soil conservation district shall have the prior approval of such central State agency before they shall become effective as to such district, as follows:]

[Soil conservation research: For research and investigations into the character, cause, extent, history, and effects of erosion, soil and moisture depletion and methods of soil and water conservation (including the construction and hydrologic phases of farm irrigation and land drainage, and water regulation to conserve the soil and reduce fire hazards in the Everglades region of Florida, except that expenditures for all work in the Everglades region shall be limited to a sum not in excess of funds made available for such work by the State of Florida, or political subdivisions thereof); and for construction, operation, and maintenance of experimental watersheds, stations, laboratories, plots, and installations, $1,500,000.]

[Soil conservation operations: For carrying out preventive measures to conserve soil and water, including such special measures as may be necessary to prevent floods and the siltation of reservoirs, and including the improvement of farm irrigation and land drainage, the establishment and operation of conservation nurseries, the making of conservation plans and surveys, and the dissemination of information, $52,400,000: *Provided*, That no part of this appropriation may be expended for soil and water conservation operations in demonstration projects: *Provided further*, That not to exceed $5,000 may be used for employment pursuant to the second sentence of section 706 (a) of the Organic Act of 1944 (5 U. S. C. 574), as amended by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a).] *(5 U. S. C. 511–512—establishing the Department of Agriculture; 565a; 7 U. S. C. 1010–1012, 1387; 16 U. S. C. 590a–590f—establishing the Soil Conservation Service; 590q–1; Department of Agriculture Appropriation Act, 1951.)*

PROGRAM AND PERFORMANCE

The Soil Conservation Service is the technical agency of the Department which aids in bringing about physical adjustments in land use to conserve soil and water resources, establish a permanent and balanced agriculture, and reduce the hazards of floods and sedimentation.

1. *Development and improvement of conservation practices and techniques.*—Studies are conducted to determine the character, causes, effects, and extent of soil and water loss and to develop, adapt, and improve conservation farming practices and methods which will adequately protect our land and water resources. Development and improvement of practices is accomplished by (*a*) laboratory and plot work to develop basic information, (*b*) experiment station field scale trials of practices, and (*c*) adaptation and testing of practices for application over extensive areas in close cooperation with the staff working on the planning and application of conservation practices on the land. This work is conducted in cooperation with the State agricultural experiment stations and other Department of Agriculture agencies and is correlated with the programs of the Agricultural Research Administration.

2. *Assistance to soil conservation districts and other cooperators.*—Assistance is rendered to local soil conservation districts of the States and Territories in developing and carrying out locally adapted programs. This assistance includes (*a*) the making of conservation surveys to determine use capabilities and conservation needs of farm and ranch land; (*b*) technical assistance in developing and applying conservation farm plans for the best possible use of the farmer's land, labor, equipment, and financial resources; (*c*) the loan of special equipment not otherwise

http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

readily available to the farmer; (*d*) the grant of limited quantities of trees, new or improved strains of grass or legume seed, and other conservation plant materials; and (*e*) stream-flow forecasts (developed from snow surveys) which serve as a basis for efficient seasonal utilization of water available for irrigation and other purposes in the Western States. It is estimated that 2,585 conservation districts covering 92 percent of the total farms in the United States, will have been organized and will request assistance by the end of fiscal year 1952 compared with 2,435 districts covering 87 percent of the total farms, estimated to be organized by the end of fiscal year 1951.

In cooperation with other Federal and State agencies, limited assistance is also given to farmers and ranchers outside conservation districts.

FISCAL YEAR ACCOMPLISHMENTS AND COSTS

Description	1950 actual	1951 estimate	1952 estimate
Conservation surveys:			
Acres surveyed	31,467,217	33,000,000	35,500,000
Amount obligated	$3,653,695	$3,687,600	$3,664,000
Cost per acre	$0.12	$0.11	$0.10
Conservation farm planning:			
Acres planned	38,777,825	39,000,000	39,000,000
Amount obligated	$15,406,245	$15,549,000	$15,452,500
Cost per acre	$0.40	$0.40	$0.40
Conservation treatment (assistance furnished in establishing practices):			
Acres treated	26,071,342	26,500,000	26,500,000
Amount obligated	$29,926,971	$30,197,157	$30,014,200
Cost per acre	$1.15	$1.14	$1.13
Improvement and maintenance of conservation plans, amount obligated	$2,439,115	$2,461,700	$2,446,300

3. *Development and management of land utilization projects.*—This activity provides for the development and management of 74 submarginal land projects in 30 States and administers the leases on 33 other areas which are managed by State agencies. These projects cover 7,332,060 acres. Revegetation and other development work is done on these lands to prevent further damage, achieve proper land use, and improve the agricultural economy of the communities affected. Developed lands and facilities are made available to local farmers and ranchers at equitable rates under specific use conditions. Of the net revenue, 75 percent is returned to the Federal Treasury and 25 percent is paid to the counties in which the lands are located, to be used for school and road purposes. Revenue received from use of the lands amounted to $925,820 in the calendar year 1949, and is estimated at $900,000 in each of the calendar years 1950 and 1951.

PROGRAM AND PERFORMANCE

This program is carried on cooperatively with the Bureau of Reclamation, which has responsibility for the construction of the primary water supply features such as dams, reservoirs, and principal canals. The Service is responsible for the development, and ultimate sale of, efficient irrigation farming units.

1. *Land development.*—Land classification and topographic surveys are made and project lands are subdivided into economic-sized farm units. The land is cleared and leveled, and farm ditches, laterals, drains, and other water-control structures are constructed.

2. *Land management, settlement, and technical guidance.*—In order to protect and improve Government-owned project lands, developed farm units are leased to local people under specific use conditions or are planted to protective cover crops pending their sale to qualified farm families. The selling price of the completed farm units is based on the earning power of the land and is calculated to return to the Federal Treasury an amount not less than the reimbursable cost of development with interest at 3 percent over a 40-year amortization period. Technical guidance, to insure efficient irrigation and conservation farming methods, is furnished to operators of the land within the project area until the project is closed.

Of the 19 projects originally authorized for development, 8 are completed, 3 are scheduled to be completed during the fiscal year 1952, 2 are scheduled to be completed by 1956, and 6 are inactive due to inflationary land prices and other changes since they were authorized.

PRODUCTION AND MARKETING ADMINISTRATION

CONSERVATION AND USE OF AGRICULTURAL LAND RESOURCES

Conservation and Use of Agricultural Land Resources, Department of Agriculture—

To enable the Secretary to carry into effect the provisions of sections 7 to 17, inclusive, of the Soil Conservation and Domestic Allotment Act, approved February 29, 1936, as amended (16 U. S. C. 590g–590q), including not to exceed $6,000 for the preparation and display of exhibits, including such displays at State, interstate, and international fairs within the United States; [$282,500,000] *$285,000,000*, to remain available until December 31 of the next succeeding fiscal year for compliance with the program of soil-building practices and soil- and water-conserving practices authorized under this head in the Department of Agriculture Appropriation Act, [1950] *1951*, carried out during the period July 1, [1949] *1950*, to December 31, [1950] *1951*, inclusive: *Provided*, That not to exceed [$25,500,000] *$25,250,000* of the total sum provided under this head shall be available during the current fiscal year for salaries and other administrative expenses for carrying out such program, the cost of aerial photographs, however, not to be charged to such limitation; but not more than [$5,000,000] *$4,966,000* shall be transferred to the appropriation account, "Administrative expenses, section 392, Agricultural Adjustment Act of 1938": *Provided further*, That payments to claimants hereunder may be made upon the certificate of the claimant, which certificate shall be in such form as the Secretary may prescribe, that he has carried out the conservation practice or practices and has complied with all other requirements as conditions for such payments and that the statements and information contained in the application for payment are correct and true, to the best of his knowledge and belief, under the penalties of title 18, United States Code: *Provided further*, That none of the funds herein appropriated or made available for the functions assigned to the Agricultural Adjustment Agency pursuant to the Executive Order Numbered 9069, of February 23, 1942, shall be used to pay the salaries or expenses of any regional information employees or any State information employees, but this shall not preclude the answering of inquiries or supplying of information at the county level to individual farmers: *Provided further*, That such amount shall be available for salaries and other administrative expenses in connection with the formulation and administration of the [1951] *1952* program of soil-building practices and soil- and water-conserving practices, under the Act of February 29, 1936, as amended (amounting to $285,000,000, including administration, and formulated on the basis of a distribution of the funds available for payments and grants among the several States in accordance with their conservation needs as determined by the Secretary, except that the proportion allocated to any State shall not be reduced more than 15 per centum from the distribution for the next preceding program year, and no participant shall receive more than $2,500); but the payments or grants under such programs shall be conditioned upon the utilization of land with respect to which such payments or grants are to be made in conformity with farming practices which will encourage and provide for soil-building and soil- and water-conserving practices in the most practical and effective manner and adapted to conditions in the several States, as determined and approved by the State committees appointed pursuant to section 8 (b) of the Soil Conservation and Domestic Allotment Act, as amended (16 U. S. C. 590h (b)), for the respective States: *Provided further*, That not to exceed 5 per centum of the allocation for the agricultural conservation program for any county may be allotted with the approval of the State committee to the Soil Conservation Service for services of its technicians in formulating and carrying out the agricultural conservation program and the funds so allotted shall not be utilized by the Soil Conservation Service for any purpose other than technical and other assistance in such county: *Provided further*, That such amounts shall be available for the purchase of seeds, fertilizers, lime, trees, or any other farming materials, or any soil-terracing services, and making grants thereof to agricultural producers to aid them in carrying out farming practices approved by the Secretary under programs provided for herein: *Provided further*, That no part of any funds available to the Department, or any bureau, office, corporation, or other agency constituting a part of such Department, shall be used in the current fiscal year for the payment of salary or travel expenses of any person who has been convicted of violating the Act entitled "An Act to prevent pernicious political activities", approved August 2, 1939, as amended, or who has been found in accordance with the provisions of title 18, United States Code, section 1913, to have violated or attempted to violate such section which prohibits the use of Federal appropriations for the payment of personal services or other expenses designed to influence in any manner a Member of Congress to favor or oppose any legislation or appropriation by Congress except upon request of any Member or through the proper official channels. (*Public Law 817, approved September 23, 1950; Department of Agriculture Appropriation Act, 1951.*)

PROGRAM AND PERFORMANCE

The agricultural conservation program is designed to restore and maintain the national soil and water resources by encouraging and assisting farmers to carry out on their farms approved soil-building and soil- and water-conserving practices in greater volume and variety than would be performed without such assistance.

Financial and other assistance under the program is available, on request, to all farmers in the 48 States, Territories, Puerto Rico, and the Virgin Islands. Funds are distributed among the States and insular areas on the basis of their conservation needs, which are estimated on the basis of the physical characteristics of the land, climatic conditions, crops grown, and the extent of particular practices needed to prevent wind and water erosion, to conserve water and improve its utilization for agricultural purposes, and to maintain and increase soil fertility.

Assistance is offered on individual farms for practices which represent orderly progress toward the accomplishment of practical conservation farming. It averages less than 50 percent of the cost of carrying out approved practices, and consists of materials, services, and reimbursement payments. Practices for which assistance is offered generally include four major classes (1) construction practices such as terracing and leveling land; (2) establishing and improving pastures of perennial grasses and other permanent cover; (3) growing annual or permanent cover crops; and (4) applying minerals such as lime, phosphate, and potash to pasture and hay-land sods.

The 1951 program puts increased emphasis on those practices which will assist farmers to reduce their soil-depleting, cash-crop acreage and shift to a grass-, legume-, and livestock-type of farming. Soil and water conserving uses are being emphasized for land taken out of soil-depleting crops which are in abundant supply. Assistance will again be offered for increasing seed production acreages of perennial range and pasture grasses or pasture legumes which usually are not grown commercially for seed or are grown only to a limited extent in relation to needs. Approximately 3,100,000 farmers will participate in the 1951 program, the same as in 1950 and about 7 percent more than participated in the 1949 program. The volume and extent of the practices carried out will increase slightly over the 1950 program and materially over the 1949 program.

In addition to making provision for meeting the costs of the 1951 program the estimates propose an authorization of $285,000,000 for a 1952 program.

This appropriation is credited with loans from the Commodity Credit Corporation to be used in making advances for the purchase of conservation materials from January 1 to June 30 of each year. Repayment of any outstanding loans is made during the succeeding fiscal year from appropriated funds, with interest at least equal to the cost of money to the Corporation. The loans are shown in the preceding schedule of funds available for obligation, and repayments are scheduled as follows:

SCHEDULE OF REPAYMENTS

	In 1950	In 1951	In 1952	Total, 1950–52
Repaid from appropriations for fiscal years:				
1948	$4,000,000			$4,000,000
1949	9,000,000			9,000,000
1950	4,000,000	$17,012,278		21,012,278
1951		15,007,142		15,007,142
1952			$23,750,000	23,750,000
Total	17,000,000	32,019,420	23,750,000	72,769,420

Farmer-elected county and community committeemen administer the program locally. They assist in the development and formulation of the program, thus assuring its consistency with local needs. In each State the program is administered by a committee of three to five resident farmers appointed by the Secretary. The State committee with the assistance of soil and crop specialists of agricultural agencies in the State assists in the development and formulation of the national program. It establishes the State program within the framework of the national program as approved by the Secretary.

PROGRAM AND PERFORMANCE

This account has been established pursuant to the Agricultural Adjustment Act of 1938, to facilitate administration of programs assigned to the Production and Marketing Administration. Funds available to that agency are transferred to this account in amounts estimated by the Secretary to be required in the Washington and State offices for carrying out such programs. The amounts so transferred are within the limitations established for administrative expenses under the respective appropriations from which such transfers are made.

PROGRAM AND PERFORMANCE

This account has been established, pursuant to the Agricultural Adjustment Act of 1938, to facilitate administration of programs assigned to Production and Marketing Administration county committees. Funds available to the Production and Marketing Administration are transferred to this account in amounts estimated by the Secretary to be required by the committees for carrying out the programs assigned to them.

ACREAGE ALLOTMENTS AND MARKETING QUOTAS

Acreage Allotments and Marketing Quotas, Department of Agriculture—

To enable the Secretary to formulate and carry out acreage allotment and marketing quota programs pursuant to the provisions of title III of the Agricultural Adjustment Act of 1938, as amended (7 U. S. C. 1301–1393), [$32,300,000] *$24,000,000*, of which not more than [$5,500,000] *$4,900,000* shall be transferred to the appropriation account "Administrative expenses, section 392, Agricultural Adjustment Act of 1938" [: *Provided*, That $4,000,000 of this appropriation shall be placed in reserve pending determination by the Secretary as to necessity of marketing quotas on the 1951 crops of wheat, corn, and rice, to be released in such amounts and at such times as determined by the Bureau of the Budget to be necessary in connection with such marketing quotas]. (*Public Law 471, approved Mar. 31, 1950; Public Law 561, approved June 16, 1950; Department of Agriculture Appropriation Act, 1951.*)

PROGRAM AND PERFORMANCE

Acreage allotments and marketing quotas are designed to assist in stabilizing violent fluctuations in supplies, marketings, and prices of the basic commodities, tobacco, peanuts, cotton, wheat, corn, and rice.

Acreage allotments.—Acreage allotments are used to adjust production either upward or downward as conditions warrant, thereby assuring an adequate supply of the basic commodities and at the same time preventing diversion of acreage, labor, and equipment to the production of these commodities at the expense of other needed food, feed, and fiber crops. When adjustments are necessary, a national acreage allotment is established which, based upon normal or average yield, will result in production ample for domestic consumption, exports, and adequate reserves. In general, the acreage available for allotment in a State or county is apportioned by farmer-elected county committeemen. Acreage allotments in themselves do not constitute an enforced limitation on production but compliance with acreage allotments may be used as a condition of eligibility under price support or other programs administered by the Department. However, compliance with acreage allotments is mandatory when marketing quotas are in effect.

Marketing quotas.—Marketing quotas provide a means whereby farmers can effectively adjust marketings in line with demand so as to obtain fair prices and a fair share of the market available for the commodities they produce. When it becomes necessary to make adjustments in the marketings of the basic commodities, a determination is made of the amount needed to be produced which, when added to the supplies on hand, will provide a normal supply. The number of acres needed to produce the normal supply is established, and the production from this acreage approximates the national marketing quota. Within a specified time after the proclamation of quotas, a referendum is held of farmers engaged in producing the commodity for which a quota is proclaimed. To be in effect, quotas must be approved by two-thirds of those voting. Once approved, quotas apply to all producers of the crop. As a means of encouraging farmers to plant within allotted acreages, penalties at rates specified in the act are imposed upon the farm marketing excess of cotton, wheat, corn, and rice and on the sale of tobacco and peanuts produced on the acreage in excess of the farm acreage allotment. Quotas may be increased, suspended, or terminated under certain demand and supply conditions, in the interest of consumers or in national emergencies.

For the 1950 crops, acreage allotments and marketing quotas are in effect on flue-cured, burley, fire-cured, dark air-cured, and Virginia sun-cured tobacco, peanuts, and cotton; and acreage allotments are in effect on wheat, corn, and rice. Marketing quotas will be in effect on the 1951 crops of flue-cured, burley, fire-cured, dark air-cured, Virginia sun-cured, and eight types of cigar filler and binder tobacco and peanuts. Acreage allotments will be in effect on the 1951 crops of wheat, corn, and rice.

SUGAR ACT *PROGRAM*

Sugar Act Program, Department of Agriculture—

To enable the Secretary to carry into effect the provisions of the Sugar Act of 1948 (7 U. S. C. 1101–1160), [$63,750,000] *$73,300,000*, to remain available until June 30 of the next succeeding fiscal year: *Provided*, That expenditures (including transfers) from this appropriation for other than payments to sugar producers shall not exceed [$1,500,000] *$1,545,000*. (*Department of Agriculture Appropriation Act, 1951.*)

Annual definite appropriation:

Adjusted appropriation or estimate	58,885,740	62,675,000	72,225,000

PROGRAM AND PERFORMANCE

The sugar program is designed to provide domestic household and industrial consumers with adequate supplies of sugar at reasonable prices which will at the same time fairly and equitably maintain and protect the welfare of the domestic sugar industry.

Quotas.—Quotas, based upon consumption estimates, regulate the entry of sugar into the continental United States from foreign areas and the marketing of sugar by domestic areas. Statutory quotas are established for the five domestic sugar-producing areas and for the Republic of the Philippines. The difference between the sum of these quotas and the consumption estimate is divided between Cuba and foreign countries other than Cuba and the Republic of the Philippines on a 98.64 and 1.36 percent basis respectively. In the event any area is unable to fill its quota, the unfilled portion is prorated to other areas which can supply the sugar.

Marketing allotments.—Farm marketing allotments for sugarcane and sugar beets are established by the Secretary when it is necessary to restrict production to conform to the quota for the area and normal carry-over requirements. These allotments are based upon past production and each farm is allotted its share of the quota and carry-over for the area.

Marketing allotments are the quantities each sugar processor may market within the quota for his producing area. Quotas are allotted whenever the Secretary finds it necessary to assure orderly marketing and to assure all interested persons an equitable opportunity to market sugar.

1. *Payments to sugar producers.*—Payments are made to domestic producers of cane and beets who meet specified conditions of employment, production, and marketing. Special payments are also made for bona fide abandonment of planted acreage and crop deficiencies on harvested acreages.

2. *Operating expenses.*—Expenses of field personnel are principally incurred by the Production and Marketing Administration State and county offices for establishing production controls, making payments to producers, and checking compliance. Departmental personnel are engaged primarily in determining sugar consumption requirements, establishing quotas and allotments, making fair wage and price determinations, establishing production and marketing controls where necessary and formulating over-all policies and procedures.

The increased estimate for 1952 is to provide for payments on the 1951 crop and to complete payments on the 1950 crop.

PROGRAM AND PERFORMANCE

Federal assistance, in the form of both funds and food, is provided to States and Territories for use in serving lunches to school children, thus improving the health and well-being of the Nation's children and broadening the market for agricultural food commodities. Each State's portion of the total funds available is determined by means of a formula provided in the act, which takes into account the number of children aged 5 to 17 in the State and the relationship between the per capita income of the State and the average United States per capita income.

Federal funds paid to any State must be matched from sources within the State. Beginning in 1951, States must contribute $1.50 for each Federal dollar contributed. In the past year, this requirement was more than adequately met, the States contributing an average of approximately $4.50 for every Federal dollar.

The program in each State is operated according to the terms of an agreement entered into by the State educational agency (which administers the program within the State) and the Department of Agriculture. Schools make application to the State agency and, if accepted for participation in the program, are reimbursed for a part of the food cost of each meal served.

In addition to the cash assistance, food is purchased by the Department and distributed to schools. In these purchases, consideration is given to (1) the current market supply to assure that the more abundant foods are purchased, and (2) the nutritional value of the foods so they may assist in meeting the minimum nutritional requirements. The national school lunch program provides the largest single outlet for surplus commodities purchased under authority of section 32 of the Agricultural Adjustment Act, as amended, and an important outlet for price-support commodities distributed in accordance with section 416 of the Agricultural Act of 1949.

During 1950, almost 8,000,000 children benefited from this program. About 1,300,000,000 meals were served, utilizing almost $237,000,000 worth of agricultural commodities. About 23 percent of this amount was contributed from federally owned stocks acquired under its surplus-removal and price-support activities.

PROGRAM AND PERFORMANCE

Section 32 of the Agricultural Adjustment Act, as amended (7 U. S. C. 612c), appropriates an amount equal to 30 percent of customs receipts during each calendar year, and, beginning with 1950, authorizes the continued use of available balances to the extent of $300,000,000 for the removal from the market of agricultural surpluses and for administration of marketing agreements and orders. The method for handling surpluses is determined at the time the need arises and is based upon the most effective means of relieving the market and utilizing the commodities through existing outlets or by developing new outlets.

1. *Direct Government purchases.*—These are commonly used for preventing price collapses of perishable commodities and their ultimate waste. The commodities are distributed to schools, institutions, and welfare agencies.

2. *Encouragement of exportation.*—Differential payments are made to exporters to enable them to purchase surplus commodities on the domestic market and sell them on the world market at competitive world prices. In addition, under the provisions of the Foreign Assistance Act of 1948, these funds may be used to encourage exports of commodities purchased under Commodity Credit Corporation price support programs.

3. *Diversion to byproducts or new uses.*—Differential payments are made to processors to enable them to purchase the surplus commodities on the domestic market, divert them to byproducts or new uses, and sell them at prices comparable to competing products. Through this method of surplus removal, prices are not only maintained during the period of emergency surpluses, but new markets for the commodity are encouraged and established.

4. *Surplus removal operating expenses.*—Use of locally produced commodities is encouraged through supervisory assistance to food-preservation centers and school kitchen and institutional canneries on the preservation of surplus perishable foods for year-around use. Greater consumption of abundant food is also promoted through the food trade, radio, and the press, thereby reducing the need for direct Government removal of surpluses.

5. *Marketing agreements and orders.*—These serve to strengthen prices by establishing and maintaining orderly market conditions for milk, tree fruits, tree nuts, and vegetables. Milk marketing agreements establish minimum prices that handlers or distributors are required to pay producers. For tree fruits, tree nuts, and vegetables, marketing agreements designate the quantity, quality, and rate of shipment from the producing area to all markets, but not the price. These agreements are voluntary arrangements and are put into effect upon request from the industry only after extensive hearings, investigations, and referenda among producers. Administration at the local level is financed by assessments upon handlers.

Under the economic assumptions on which the 1952 Budget is based, it is assumed that a substantial balance of 1951 funds will be available in 1952. It is also estimated that $150,000,000 will be available during the fiscal year 1952, which represents 30 percent of customs receipts collected during calendar year 1950.

Language is provided under the head "International Wheat Agreement" to reimburse Commodity Credit Corporation, for fiscal year 1950 costs, from this appropriation.

INTERNATIONAL WHEAT AGREEMENT

International Wheat Agreement, Department of Agriculture—

To enable the Secretary of Agriculture to make payment to the Commodity Credit Corporation for net costs incurred during the fiscal year 1950 in carrying out its functions under the International Wheat Agreement Act of 1949 (7 U. S. C. 1641–1642), there is hereby made available $76,808,000 of the funds appropriated for the current fiscal year by section 32 of the Act of August 24, 1935, as amended (7 U. S. C. 612 (c)), such amount to be without regard to the 25 per centum limitation contained in said section 32.

Estimate (adjusted) 1952, **$76,808,000**

FUNDS AVAILABLE FOR OBLIGATION

Adjusted appropriation: Transferred from "Removal of surplus agricultural commodities, Department of Agriculture," pursuant to 1952 Department of Agriculture Appropriation Act—1952, $76,808,000.

PROGRAM AND PERFORMANCE

The International Wheat Agreement, ratified by the United States Senate on June 13, 1949, introduces an element of stability in the world wheat trade. It assures supplies of wheat to importing countries and markets for wheat to exporting countries at equitable and stable prices; thus, eliminating many of the hardships caused by burdensome surpluses and critical shortages.

In accordance with the International Wheat Agreement Act of 1949 capital funds of the Commodity Credit Corporation were used in the fiscal year 1950 to pay (1) the difference between the price specified in the agreement and the domestic market price and (2) administrative and other related costs. During fiscal 1950 approximately 135 million bushels of wheat and flour (wheat equivalent) were exported pursuant to the agreement. The proposed language would reimburse the Commodity Credit Corporation for its 1950 costs in connection with these exports from funds appropriated under the item "Removal of surplus agricultural commodities."

OBLIGATIONS BY ACTIVITIES

Description	1950 actual	1951 estimate	1952 estimate
Reimbursement to Commodity Credit Corporation for fiscal year 1950:			
1. Program costs			$75,507,686
2. Administrative expenses			129,036
3. Interest costs			1,171,278
Total obligations			76,808,000

OBLIGATIONS BY OBJECTS

07 Other contractual services: Reimbursement to Commodity Credit Corporation, $76,808,000.

MARKETING SERVICES

Marketing Services, Department of Agriculture—

For expenses necessary for acquiring and diffusing market information on agricultural commodities, food products and by-products, the standardization, classification, grading, handling, storage and marketing thereof, including the demonstration and promotion of the use of uniform standards of classification of American farm and food products throughout the world, the analysis of cotton fiber, the classing of cotton for producer members of cotton quality improvement groups, the establishment of classification standards and maintenance of an inspection service for tobacco (7 U. S. C. 471–476, 501–508, 511–511q); for investigating and certifying, in one or more jurisdictions, to shippers and other interested parties the class, quality, and condition of any agricultural commodity or food product, whether raw or processed, and any product containing an agricultural commodity or derivative thereof when offered for interstate shipment or when received at such important central markets as the Secretary may from time to time designate, or at points which may be conveniently reached therefrom under such rules and regulations as he may prescribe, including the collection of such fees as are reasonable and as nearly as may cover the cost of the service rendered; for performing the duties imposed upon the Secretary by chapter 14 of the Internal Revenue Code relating to cotton futures (26 U. S. C. 1920–1935); and for carrying into effect the United States Cotton Standards Act (7 U. S. C. 51–65), the United States Grain Standards Act (7 U. S. C. 71–87), the Naval Stores Act (7 U. S. C. 91–99), section 201 (a) to 201 (d), inclusive, of title II of the Agricultural Adjustment Act of 1938 (7 U.S. C. 1291), including not to exceed $25,000 for employment at rates not to exceed $100 per diem, pursuant to the second sentence of section 706 (a), of the Organic Act of 1944 (5 U. S. C. 574), as amended by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a), the Acts to provide standards for containers for fruits and vegetables (15 U. S. C. 251–257i), the United States Warehouse Act (7 U. S. C. 241–273), the Federal Seed Act (7 U. S. C. 1551–1610), the Packers and Stockyards Act (7 U. S. C. 181–229), the Federal Insecticide, Fungicide, and Rodenticide Act (7 U. S. C. 135–135k), and the Tobacco Plant and Seed Exportation Act (7 U. S. C. 516), $11,396,000.

[For expenses necessary in conducting investigations, experiments, and demonstrations, as follows:]

[Market news service: For collecting, publishing, and distributing, by telegraph, mail, or otherwise, timely information on the market supply and demand, commercial movement, location, disposition, quality, condition, and market prices of livestock, meats, fish, and animal products, dairy and poultry products (including broilers), fruits and vegetables, peanuts and their products, grain, hay, feeds, cottonseed, and seeds, and other agricultural products, $2,118,500.]

[Market inspection of farm products: For the investigation and certification, in one or more jurisdictions, to shippers and other interested parties of the class, quality, and condition of any agricultural commodity or food product, whether raw, dried, canned, or otherwise processed, and any product containing an agricultural commodity or derivative thereof when offered for interstate shipment or when received at such important central markets as the Secretary may from time to time designate, or at points which may be conveniently reached therefrom under such rules and regulations as he may prescribe, including payment of such fees as will be reasonable and as nearly as may be to cover the cost for the service rendered, $780,000.]

[Marketing farm products: For acquiring and diffusing among the people of the United States useful information relative to the needed supplies, standardization, classification, grading, preparation for market, handling, transportation, storage, and marketing of farm and food products, including the demonstration and promotion of the use of uniform standards of classification of American farm and food products throughout the world, for making analyses of cotton fiber as provided by the Act of April 7, 1941 (7 U. S. C. 473d), for carrying out the provisions of section 201 (a) to 201 (d), inclusive, of title II of the Agricultural Adjustment Act of 1938 (7 U. S. C. 1291), including not to exceed $25,000 for employment at rates not to exceed $100 per diem, pursuant to the second sentence of section 706 (a), of the Organic Act of 1944 (5 U. S. C. 574), as amended by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a), and not to exceed $20,000 for transportation and other necessary expenses including not to exceed $10 per diem of persons serving without compensation while away from their homes or regular places of business, $1,260,000: *Provided*, That the Secretary may make available to any bureau, office, or agency of the Department such amounts from this appropriation as may be necessary to carry out the functions for which this appropriation is made, and any such amounts shall be in addition to amounts transferred or otherwise made available to appropriation items in this Act.]

[Tobacco Acts: To carry into effect the provisions of the Act to establish and promote the use of standards of classification for tobacco, to provide and maintain an official tobacco-inspection service, approved August 23, 1935 (7 U. S. C. 511–511q), the Act to provide for the collection and publication of statistics of tobacco by the Department, approved January 14, 1929 (7 U. S. C. 501–508), as amended, and the Act to prohibit the exportation of tobacco seed and plants, approved June 5, 1940 (7 U. S. C. 516), $1,660,500.]

[Cotton Statistics, Classing, Standards and Futures Acts: To carry into effect the provisions of the Act authorizing the Secretary to collect and publish statistics of the grade and staple length of cotton, approved March 3, 1927, as amended by the Act of April 13, 1937 (7 U. S. C. 471–476), and to perform the duties imposed upon him by chapter 14 of the Internal Revenue Code relating to cotton futures (26 U. S. C. 1920–1935), and to carry into effect the provisions of the United States Cotton Standards Act, approved March 4, 1923, as amended (7 U. S. C. 51–65), $1,675,000.]

[Marketing regulatory Acts: For expenses necessary to carry into effect the provisions of the Perishable Agricultural Commodities Act, as amended (7 U. S. C. 499a–499r), the Act to prevent the destruction or dumping of farm produce (7 U. S. C. 491–497), the Act to provide standards for baskets and containers for fruits and vegetables, as amended (15 U. S. C. 251–256), the Act to fix standards for hampers, round stave baskets, and splint baskets for fruits and vegetables (15 U. S. C. 257–257i), the Act to provide export standards for apples and pears (7 U. S. C. 581–589), the United States Grain Standards Act (7 U. S. C. 71–87), the United States Warehouse Act (7 U. S. C. 241–273), the Federal Seed Act (7 U. S. C. 1551–1610), the Packers and Stockyards Act, as amended (7 U. S. C. 181–229), the Naval Stores Act (7 U. S. C. 91–99), and the Federal Insecticide, Fungicide, and Rodenticide Act (7 U. S. C. 135–135k), $3,495,000.] *(5 U. S. C. 511–512, 541b, 575; 7 U. S. C. 415a–415e, 423, 581–589; 21 U. S. C. 94a; 31 U. S. C. 725d; Department of Agriculture Appropriation Act, 1951.)*

Annual definite appropriation:

Appropriated 1951, **$10,989,000** Estimate 1952, [a] **$11,396,000**
Appropriated (adjusted) 1951, **$11,155,500**

[a] Excludes $1,000 for activities transferred in the estimates to "Salaries and expenses, Office of Information, Department of Agriculture." The amounts obligated in 1950 and 1951 are shown in the schedule as comparative transfers.

PRODUCTION AND MARKETING ADMINISTRATION—Continued

MARKETING SERVICES—Continued

Marketing Services, Department of Agriculture—Continued

modities to describe quality and condition and providing a classing, grading, and inspection service to apply these standards and grades on a uniform and unbiased basis; (3) development and improvement of marketing methods and practices; (4) obtaining reasonable and equitable freight rates for farm products; and (5) providing for the administration of the marketing regulatory laws.

1. *Market news service.*—This service, carried out cooperatively with 39 States and Hawaii, provides timely and reliable market information to farmers, consumers, and handlers of farm commodities. Periodic reports include information on market prices, supply, demand, commercial movement, location, disposition, quality and condition of specified agricultural commodities. To obtain this information, market news reporters interview buyers and sellers at markets daily during trading hours. They inspect records, observe transactions, collect reports of rail and truck unloads, warehousemen's stocks in storage, and make numerous contacts with other groups. Reports are issued in major producing and distributing centers through permanent and seasonal offices in more than 100 cities and towns. Mail, press, radio, telephone, telegraph, bulletin board, and trade and farm publications are used to disseminate information. In 1950 almost 35 million mimeographed reports were distributed; from 1 to 14 broadcasts were made daily over each of 1,172 different radio stations; and reports were reprinted regularly in more than 1,200 daily newspapers and in many weekly, semimonthly and monthly farm papers.

2. *Inspection, grading and classing, and standardization activities.*—This work assists farmers in obtaining returns for their products commensurate with quality. This is accomplished by (*a*) establishing United States standards of quality for agricultural commodities that will accurately describe and facilitate a uniform and objective determination of their quality and condition; (*b*) providing an impartial inspection, classing and grading service for producers, dealers and others on the basis of these standards and grades, and (*c*) broadening the knowledge, acceptance and use of such standards by producers, dealers, manufacturers, consumers and others through demonstrations, training courses, color charts and photographs, plaster models, preparation and loan or sale of copies of standards, etc.

Fees are charged for all inspection, classing, and grading except tobacco graded at designated auction markets and cotton classed for farmers who are members of Smith-Doxey cotton quality improvement groups. Fees for commercial work performed under cooperative agreements with States or private agencies are used to pay for salaries and other expenses of the inspection force (see also "Expenses and refunds, inspection and grading of farm products"). Revenue for commercial work not under cooperative agreement is deposited in the Treasury. In the fiscal year 1950 approximately 76.5 percent of the total Federal cost of this project was covered by fees or revenue.

The extent of inspection, grading and classing in 1950 for major commodities was as follows:

Commodity	Unit	Volume
Cotton	Bales	15,732,526
Tobacco	Pounds	2,140,768,020
Grain	Bushels	4,036,356,000
Fresh fruits and vegetables	Carlots	1,253,658
Meats	Pounds	2,615,739,000
Rice, beans, and peas	do	3,104,823,800
Dairy products (butter, cheese, dry skim milk)	do	1,650,879,659
Eggs	Cases	14,272,824
Poultry	Pounds	901,636,462
Canned fruits and vegetables	Cases	87,407,498
Other processed fruits and vegetables	Pounds	1,209,073,869
Turpentine	Gallons	8,335,043
Rosin	Drums	807,973

3. *Improvement of marketing practices.*—This activity consists of (*a*) studies to improve marketing methods, marketing practices, and processing techniques, and (*b*) development of basic principles for improvement of market and storage facilities. These activities are designed to point the way to a more efficient marketing system needed to move large quantities of products from farm to consumer in as good condition as possible with reasonable marketing costs.

4. *Freight rates for farm products.*—Producers of agricultural products are assisted in obtaining and maintaining equitable transportation rates and services through participation by the Department in their behalf in cases before the Interstate Commerce Commission and through informal negotiations with carriers or groups of carriers. During the past fiscal year the Department took an active part in 41 cases before the ICC and conducted 41 informal negotiations with carriers. The last of a series of three general over-all rail rate increase cases was brought to a conclusion in the fiscal year 1950. The following table shows by commodity the scope of the activity during 1950:

Type of actions:	*No. of actions*
Cotton and cottonseed	5
Dairy and poultry	6
Fruits and vegetables	25
Grain and grain products	16
Livestock and meats	6
Wool and mohair	2
General motor carrier rates	15
General rail rates	7
Total	82

5. *Regulatory activities.*—This work involves the administration of the Standard Container, United States Warehouse, Federal Seed, Packers and Stockyards, Naval Stores, Federal Insecticide, Fungicide, and Rodenticide, and the Tobacco Plant and Seed Exportation Acts. These laws are designed primarily to protect farmers and others from financial loss or personal injury resulting from deceptive, careless, and fraudulent marketing practices. Specific activities and problems to be solved vary in detail for each act, but the method for administering each follows the same general pattern and includes two or more of the following activities: (*a*) licensing or registration; (*b*) supervision of operations of licensees to assure compliance with the acts; (*c*) collection and testing of samples; and (*d*) handling of violations. This work has expanded substantially in recent years. The number of warehouses licensed under the United States Warehouse Act increased from 1372 in 1949 to 1443 in 1950. Over 92 percent of these were warehouses primarily for storing grain (861) and cotton (472). The licensed warehouse capacity for grain increased from 336,353,000 bushels in 1949 to 380,097,000 bushels in 1950 and for cotton from 10,608,000 bales in 1949 to 11,027,000 bales in 1950.

Inspection of imported seeds, mandatory under the Federal Seed Act, remained at a high level. A total of 102,225,000 pounds of seed were offered for importation. This was an increase of approximately 55 percent from 1947 and 1948.

Federal Reserve Bank of St. Louis

During fiscal year 1950 there were 108 additional yards posted for supervision under the Packers and Stockyards Act. As of June 30, 1950, there were 314 stockyards posted for supervision under this act and approximately 300 additional yards meet the act's requirements for posting.

Most of the enforcement activities under the Naval Stores Act are concerned with turpentine because of the ease with which it can be adulterated with other liquids. During 1950, 166 samples were collected and 11 violations detected and corrective action taken on each.

Activities under the Insecticide, Fungicide and Rodenticide Act include registration of all economic poisons sold in interstate commerce, enforcement of regulations and development of testing methods to adequately carry out enforcement work. In 1950 the Department registered 7,200 economic poisons and wrote 14,900 letters of criticism in connection with improper labeling. Enforcement activities in 1950 included the collection and analysis of 2,221 samples of which 570 were found to be misbranded or adulterated products. The actions taken as a result of these violations included 91 warnings, 438 citations, 67 seizures and 12 prosecutions. Some expansion of enforcement activities is planned for 1952 to attempt to bring about better compliance with this act.

PROGRAM AND PERFORMANCE

The Third Deficiency Appropriation Act, 1937 (50 Stat. 762), provided that not to exceed $65,000,000 of the funds available under section 32 of the act approved August 24, 1935 (7 U. S. C. 612c), in each of the fiscal years 1938 and 1939 shall be available until expended for a price-adjustment payment with respect to the 1937 cotton crop to cotton producers who complied with the provisions of the Agricultural Adjustment Act of 1938. Operations are now limited to payment or adjustment of claims made by producers.

PROGRAM AND PERFORMANCE

The Perishable Agricultural Commodities Act was amended on June 15, 1950, increasing license fees, and authorizing the establishment of a special fund into which fees are to be deposited and from which are paid expenses of administration. This schedule reflects the initial appropriation creating the fund and the amount of fees received which are held in trust for payment of expenses of administering the Perishable Agricultural Commodities, Produce Agency, and Export Apple and Pear Acts. (7 U. S. C. 499a–499r, as amended by Public Law 554, 81st Cong., approved June 15, 1950; 7 U. S. C. 491–497, 581–589).

These acts assure equitable treatment to farmers and others in the marketing of fresh and frozen fruits and vegetables. Commission merchants, dealers and brokers handling these products in interstate and foreign commerce are licensed. Complaints of violations are investigated and violations dealt with by (1) working out informal settlements agreeable to both parties; (2) obtaining, through formal decisions, payments of reparation awards between parties; and (3) suspension or revocation of license or publication of the facts. About 26,000 licenses are now in effect and complaints average more than 55 per week.

PROGRAM AND PERFORMANCE

Enforcement of the Commodity Exchange Act requires supervision over futures trading in 19 commodities on 18 exchanges to prevent price manipulation and corners and insure honesty and fair dealing.

1. *Licensing.*—Commission merchants and floor brokers are registered annually. Exchange rules and regulations are reviewed to insure that legal requirements are met.

2. *Supervision of futures trading.*—This embraces (*a*) compilation, audit, tabulation, and review of trade reports and current market analyses; (*b*) enforcement of speculative limits; (*c*) review of market news and letters; (*d*) maintenance of a quotation and ticker service; (*e*) analysis of cash commodity transactions; (*f*) cooperative activities with control committees of contract markets; (*g*) observance of floor trading; and (*h*) compilation and publication of market information.

3. *Audits.*—Misuse of customers' funds is prevented by (*a*) audit and examination of books of futures commission merchants with 695 audits covering 25,768 customers' accounts made in 1950; and (*b*) analysis of brokers' and traders' books and financial statements.

4. *Investigations.*—Alleged and apparent violations of the law and regulations are investigated, and trade-practice surveys are made to discover violations and compile legal evidence. During 1950, 30 investigations and 4 trade-practice surveys were completed.

5. *Establishment of speculative limits.*—During 1951, it is anticipated that speculative limits will be placed upon soybeans, eggs, lard, cottonseed oil, soybean oil, and wool tops.

RURAL ELECTRIFICATION ADMINISTRATION

To carry into effect the provisions of the Rural Electrification Act of 1936, as amended (7 U. S. C. 901–[915] *924*), as follows:

SALARIES AND EXPENSES

Salaries and Expenses, Rural Electrification Administration, Department of Agriculture—

For administrative expenses, including not to exceed $500 for financial and credit reports, [$8,550,000] *and not to exceed $150,000 for employment pursuant to the second sentence of section 706 (a) of the Organic Act of 1944 (5 U. S. C. 574), as amended by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a), $8,500,000 (5 U. S. C. 511–512—establishing the Department of Agriculture; 7 U. S. C. 901–924—establishing the Rural Electrification Administration; Department of Agriculture Appropriation Act, 1951.*)

Annual definite appropriation:

Appropriated 1951, **$8,550,000** Estimate 1952, [a] **$8,500,000**

[a] Excludes $400 for activities transferred in the estimates to "Salaries and expenses, Office of Information, Department of Agriculture." The amounts obligated in 1950 and 1951 are shown in the schedule as comparative transfers.

PROGRAM AND PERFORMANCE

The Rural Electrification Administration conducts two major lending programs: (*a*) To finance facilities necessary to bring electric energy to persons in rural areas who are not receiving central station service; and (*b*) to furnish and improve telephone service in rural areas. All loans must be self-liquidating within a period of not to exceed 35 years and bear interest at the rate of 2 percent per year. Loans are also made for shorter periods at 2 percent interest to borrowers to be reloaned to consumers for the installation of electrical and plumbing appliances and equipment.

The rural electrification program was initiated in 1935, at which time less than 11 percent of the farms in the country had electric service. As of June 30, 1950, the percentage of electrified farms in the country had risen to approximately 86 percent.

Fifty percent of the funds made available for electrification loans in any given year are reserved for loans in the various States on the basis of the proportion that each State's unelectrified farms bear to the total number of farms in the country without central station service. The other 50 percent may be loaned at the discretion of the Administrator, but not more than 10 percent may be loaned in any one State or Territory (7 U. S. C. 903 (c), (d), and (e)). In many States the number of electrified farms exceeds the national average of about 86 percent. Increasing consumption of power requires "heavying-up" of lines and facilities—yet the State allotment formula cited above operates to reduce the amount of funds that can be allocated to these States. The appropriation language would waive application of this formula, and will permit the carrying out of the same program with an authorization of $100,000,000 as would otherwise require an authorization of $220,000,000.

Data with respect to the electrification program follow:

Item	1950 actual	1951 estimate	1952 estimate
Total loans, accumulative (since 1935)	$2,205,470,314	$2,505,000,000	$2,725,000,000
Total advances to borrowers, accumulative	$1,559,087,178	$1,860,000,000	$2,110,000,000
Loans, annual, net	$375,151,456	$300,000,000	$220,000,000
Advances, annual	$286,658,652	$301,000,000	$250,000,000
Amount of principal repaid, accumulative	$145,525,428	$174,400,000	$206,800,000
Amount of interest paid, accumulative	$98,664,751	$114,300,000	$131,900,000
Value of construction work in progress (end of year)	$836,000,000	$800,000,000	$750,000,000
Miles energized, accumulative	1,018,336	1,181,000	1,301,000
Miles energized, annual	178,651	163,000	120,000
Consumers connected, accumulative	3,251,787	3,632,000	3,932,000
Consumers connected, annual	473,607	380,000	300,000
Number of borrowers	1,070	1,080	1,090

The growing demand of farmers for electric power will maintain a high demand for loans to increase capacities of existing systems.

The rural telephone program was undertaken during the fiscal year 1950 at which time about 40 percent of the farms in the United States had telephone service, much of it of very unsatisfactory quality. Loan applications were received from 486 applicants in the amount of $57,458,110 in the first 6 months of operation of the program. These applications would provide service to an estimated 143,290 new rural subscribers and improved service to 116,144 present subscribers. Through June 30, 1950, loan allocations had been made in the amount of $3,426,500 to provide telephone service to 9,848 new rural subscribers and to improve service to 6,989 present rural subscribers. These allocations were to 15 commercial companies and 2 new cooperatives. The total of loans in fiscal 1951 is expected to amount to $30,000,000.

1. *Loan analysis and system development.*—Studies are made to determine whether area coverage is being achieved and whether the proposed construction will result in a self-liquidating system. Field assistance is given in planning systems to extend adequate, dependable electric or telephone service to the maximum number of users on an economically sound basis. Assistance is given in preparing requests for loans, new companies are advised with regard to their problems of initial organization, and borrowers are assisted in developing programs to advise their consumers regarding the most beneficial and profitable uses of electric energy. Electrification borrowers are assisted in locating sources of power at reasonable cost.

2. *Engineering and technical standards.*—Engineering review is given to the design and construction of physical facilities to insure that construction conforms to approved standards and is adequate to meet the needs of rural consumers. Engineering appraisals are made of facilities operated by applicants for rural telephone loans as an aid in evaluating the property and in estimating the extent and the cost of necessary improvements. Assistance is given to electrification borrowers in establishing standards of physical operation, planning maintenance programs, and applying the best engineering practices to the technical problems of rendering good service.

Standards are developed for the design and construction of telephone and power facilities and for materials to be used in such construction. Special studies are made of the performance of system equipment under actual service conditions, methods of preventive maintenance for rural systems, etc. Through contracts with organizations having suitable laboratory facilities, it is contemplated that special studies will be made of the most advanced methods and materials available for rural telephone service.

3. *Management advisory activities.*—Management advisory assistance is furnished to borrowers on a selective basis of need in keeping with the Administration's policy of encouraging borrowers to assume full responsibility for their operations as soon as they are able to do so. Particular attention is given to borrowers who are delinquent, have unusually difficult management problems, or have adverse financial trends. Initial assistance and training is provided new managers. Advice and assistance is given to cooperative borrowers in cooperative principles, functioning, organization, and ways to secure active member participation in cooperative affairs, to insure the stability necessary to the security of the loans.

4. *Loan auditing, collecting, and accounting.*—Functions include: (*a*) Maintenance of accounting records of loan funds; (*b*) examination and approval of requisitions for

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

advances of loan funds; (*c*) computation and recording of billings and collections; (*d*) assistance to borrowers in establishing proper books of account and maintaining sound accounting practices; and (*e*) auditing of borrowers' accounting records. Consistent with the policy of having borrowers assume full responsibility for their operations, the more firmly established borrowers—roughly 20 percent during 1950—have been asked to employ certified public accountants for auditing their general accounts. The Administration continues to audit all borrowers' construction fund accounts.

FARMERS' HOME ADMINISTRATION

Farmers' Home Administration, Department of Agriculture—

To carry into effect the provisions of titles I, II, and the related provisions of title IV of the Bankhead-Jones Farm Tenant Act, as amended (7 U. S. C. 1000–1031), the Farmers' Home Administration Act of 1946 (7 U. S. C. 1001, note; 31 U. S. C. 82h; 12 U. S. C. 371; 35 D. C. Code 535; 60 Stat. 1062–1080); the Act of July 30, 1946 (40 U. S. C. 436–439); [the Act of October 19, 1949 (Public Law 361);] the Act of August 28, 1937, as amended (16 U. S. C. 590r–590x, 590z–5), for the development of facilities for water storage and utilization in the arid and semiarid areas of the United States; [and] the provisions of title V of the Housing Act of 1949 relating to financial assistance for farm housing [(Public Law 171, approved July 15, 1949)] *(42 U. S. C. 1471–1483); the Rural Rehabilitation Corporation Trust Liquidation Act, approved May 3, 1950 (Public Law 499); and the Act to direct the Secretary of Agriculture to convey certain mineral interests, approved September 6, 1950 (Public Law 760)*, as follows:

LOAN AUTHORIZATION

For loans (including payments in lieu of taxes and taxes under section 50 of the Bankhead-Jones Farm Tenant Act, as amended, and advances incident to the acquisition and preservation of security of obligations under the foregoing several authorities): Title I and section 43 of title IV of the Bankhead-Jones Farm Tenant Act, as amended and title V of the Housing Act of 1949 (except grants under 504 (a)) [$65,000,000] *$38,000,000,* of which not to exceed [$3,500,000] *$5,000,000* of the amount available for the purposes of title I and section 43 of the Bankhead-Jones Farm Tenant Act, as amended, may be distributed to States and Territories without regard to farm population and prevalence of tenancy, in addition to the amount otherwise distributed thereto, for loans in reclamation projects and to entrymen on unpatented public land (sums available for loans under title V of the Housing Act of 1949 to remain available until expended); title II of the Bankhead-Jones Farm Tenant Act, as amended, [$85,000,000] *$110,000,000;* the Act of August 28, 1937, as amended, [$4,000,000] *$5,000,000: Provided,* That not to exceed the foregoing several amounts shall be borrowed in one account from the Secretary of the Treasury, on the request of the Secretary of Agriculture at such rate of interest as

FARMERS' HOME ADMINISTRATION—Continued

Farmers' Home Administration, Department of Agriculture—Con.

may be determined by the Secretary of the Treasury, but not in excess of 3 per centum per annum; and the Secretary of the Treasury is hereby authorized and directed to lend such sums to the Secretary upon the security of any obligations of borrowers from the Secretary under the provisions of said Acts: *Provided further*, That the Secretary may utilize proceeds from payments of principal and interest under such Acts to repay the Secretary of the Treasury the amounts borrowed therefrom for the purposes of such Acts: *Provided further*, That for the purpose of making loans pursuant to the foregoing authority, the Secretary of the Treasury is authorized to use as a public-debt transaction the proceeds from the sale of any securities issued under the Second Liberty Bond Act, as amended, and the purposes for which securities may be issued under that Act are extended to include such loans to the Secretary: *Provided further*, That repayments to the Secretary of the Treasury on such loans shall be treated as a public-debt transaction.

GRANTS

For grants and for the grant portion of combination loans and grants for the purpose of section 504 (a) of the Housing Act of 1949, [$650,000] *$200,000*, to remain available until expended.

SALARIES AND EXPENSES

For the making, servicing, and collecting of loans and insured mortgages, the servicing and collecting of loans made under prior authority, the liquidation of assets transferred to Farmers Home Administration pursuant to the Farmers Home Administration Act of 1946, [and] the extension of financial assistance under the Housing Act of 1949, *and the administration of assets transferred under subsection 2 (f) of the Act of May 3, 1950*, [$28,500,000] *$29,700,000*, together with a transfer to this appropriation item of not to exceed [$80,000] *$230,000* of the fees and administrative expense charges made available by subsections (d) and (e) of section 12 of the Bankhead-Jones Farm Tenant Act, as amended.

[LOAN AUTHORIZATION]

[For an additional amount for "Loan Authorization" for loans under title II of the Bankhead-Jones Farm Tenant Act, as amended, $18,000,000, to be borrowed from the Secretary of the Treasury in the manner authorized under this head in the General Appropriation Act, 1951: *Provided*, That none of the funds hereby authorized shall be used for loans other than to farmers and stockmen who suffered production disasters in areas designated pursuant to Public Law 38 (81st Congress).] (*Department of Agriculture Appropriation Act, 1951; Supplemental Appropriation Act, 1951.*)

PROGRAM AND PERFORMANCE

The Farmers' Home Administration makes (*a*) direct loans to farmers and insures loans to them for the purchase, enlargement, or development of family-size farms, (*b*) loans and grants for the improvement of dwellings and other farm buildings, (*c*) loans for farm operating expenses, and (*d*) in the arid and semiarid areas in 17 Western States loans for water facilities. Loans are made only to farmers unable to secure credit from other sources at reasonable rates.

1. *Farm ownership and farm housing loans*—(*a*) *Ownership loans.*—Direct farm-ownership loans for the purchase or improvement of family-type farms are made to tenants, sharecroppers, farm laborers, owners of inadequate or underimproved farms, and eligible veterans up to the full normal value of the farm at 4 percent interest for periods up to 40 years. Public Law 361, Eighty-first Congress, authorizing loans to homestead entrymen on public lands and those contracting for purchase of other lands of the United States on reclamation projects, will bring about a substantial increase in the number of such loans in 1951 and 1952. Loans made by private lenders to eligible applicants for the purchase or improvement of family-type farms are insured in amounts up to 90 percent of the normal value of such farms. Loans are for periods up to 40 years at 3 percent interest, plus one-half of 1 percent as an insurance premium and one-half of 1 percent toward administrative expenses. The Administration services these loans, makes collections, and pays the lender. It is expected that 7,500 loans will be insured in 1952.

NUMBER OF INITIAL LOANS

Type	1950 actual	1951 estimate	1952 estimate
Direct farm ownership loans	1,747	2,710	1,720
Insured mortgage loans	2,268	4,500	7,500

(*b*) *Building loans.*—These are made to farm owners for periods up to 33 years at 4 percent interest to construct, improve, alter, repair, or replace farm dwellings and other farm buildings. It is estimated that about 6,270 loans will be made in 1951 and about 5,990 in 1952. During the 8 months the program was in operation in 1950, 3,989 loans were made.

(*c*) *Enlargement and development loans.*—Loans for farm enlargement and development are made at 4 percent interest to farm owners to enable them to develop sufficient income to support a better standard of living.

2. *Farm housing repair and improvement grants.*—Grants alone or in combination with loans are made to farm owners to make dwellings and other farm buildings safe and sanitary. About 320 grants alone and 120 grants in combination with loans will be made in 1952. A total of 203 grants were made during the 8 months of operation in fiscal 1950.

3. *Production and subsistence loans.*—Loans are made at 5 percent interest to provide reasonable farm and home operating credit for the purchase of livestock, feed, seeds,

Federal Reserve Bank of St. Louis

farm equipment and other farm needs. The increase for 1952 will permit a greater number of loans to be made to present and new settlers on reclamation projects in the West who are unable to secure adequate operating credit from other sources. About 101,000 farmers are estimated to receive loans in fiscal 1952. This compares to about 100,000 in 1951 and 91,249 who received loans in fiscal 1950.

4. *Water facilities loans.*—For the effective development and utilization of the limited water supplies available in the arid and semiarid areas of 17 Western States, loans are made to farmers and groups of farmers at 3 percent interest. Increased demands for loans will occur in 1951 and 1952 due to Public Law 361, 81st Congress, authorizing loans to new homesteaders on public land or others contracting for the purchase of land of the United States in reclamation projects.

NUMBER OF INITIAL LOANS

	1950 actual	1951 estimate	1952 estimate
Individuals	1,202	1,550	1,910
Groups	16	20	24

5. *Salaries and expenses.*—County supervisors, assisted by appraisers and engineers working on a State-wide basis, are responsible for reviewing loan applications, securing the approval of the county committee, and making the loans. Farm and home plans are prepared by the borrower and the county supervisor for most loans, to provide the borrower with a basis for effective use of his land and labor resources. County office personnel are responsible for collecting and servicing outstanding loans. The compromise, adjustment, or cancellation of debts owed the Government as authorized by law is extensive, involving 179,391 borrowers in 1950 and an estimated 170,000 and 150,000, respectively, in 1951 and 1952.

Collection of principal and interest in 1950 and corresponding estimates for 1951 and 1952 are as follows:

	1950 actual	1951 estimate	1952 estimate
Direct farm ownership loans	$21,276,051	$23,000,000	$25,000,000
Farm housing loans	19,383	726,600	1,613,000
Production and subsistence loans	78,904,061	86,400,000	93,607,000
Water facilities loans	1,068,839	1,495,000	2,070,000
Total	101,268,334	111,621,600	122,290,000

[1] This statement excludes contingent liabilities of $21,513,814 in 1950, $53,494,000 in 1951, and $105,990,000 in 1952.

Allocations Received From Other Appropriation Accounts—

NOTE.—Obligations incurred under allocations from other appropriations are shown in the schedule of the parent appropriation, as follows:

"Disaster loans, etc., revolving fund, Department of Agriculture."

EXTENSION SERVICE

PAYMENTS TO STATES, HAWAII, ALASKA, AND PUERTO RICO

Payments to States, Hawaii, Alaska, and Puerto Rico, Extension Service—

For payments to the States, Hawaii, Alaska, and Puerto Rico, for cooperative agricultural extension work as follows:

Capper-Ketcham, Bankhead-Jones, and related Acts: Capper-Ketcham Act, the Act approved May 22, 1928 (7 U. S. C. 343a, 343b), $1,480,000; Bankhead-Jones Act, section 21, title II, of the Act approved June 29, 1935 (7 U. S. C. 343c), $12,000,000; Bankhead-Jones Act, section 23, title II, of the Act approved June 29, 1935, as amended by the Act of June 6, 1945 (7 U. S. C. 343d–1), $12,500,000; additional extension work, the Act approved April 24, 1939, as amended (7 U. S. C. 343c–1), $555,000; Alaska, the Act approved February 23, 1929 (7 U. S. C. 386c), extending the benefits of the Smith-Lever Act to the Territory of Alaska, $13,950, and the Act approved October 27, 1949 ([Public Law 417] *7 U. S. C. 343d–4, 5*), extending to the Territory of Alaska the benefits of the Capper-Ketcham Act and sections 21 and 23 of title II of the Bankhead-Jones Act, $42,150; Puerto Rico, section 3 of the Act of March 4, 1931 (7 U. S. C. 386f), authorizing extension of the Capper-Ketcham Act to Puerto Rico, $31,348; the Act approved August 28, 1937 (7 U. S. C. 343f–343g), extending the benefits of section 21 of the Bankhead-Jones Act to Puerto Rico, $408,000, and the Act approved

PROGRAM AND PERFORMANCE

These payments to States finance a Nation-wide educational system of cooperative extension work in agriculture and home economics for improving the economic welfare, nutrition and health, and family and community life of rural people by helping them to help themselves. Efforts to increase the technical knowledge of rural people for more efficient farms, better homes, and higher standards of living are the basic core of extension work. Funds are distributed to each State, Alaska, Puerto Rico, and Hawaii, partly on the basis of prescribed amounts and partly on the basis of rural population, farm population, and, within limitations as the Secretary may determine. The entire costs of this cooperative service are currently shared as follows: Federal appropriations, 42 percent; State appropriations, 33 percent; county appropriations, 22 percent; and other local sources, 3 percent.

The funds are used within the States for the employment of specialists, county agents, home demonstration agents, and 4–H Club agents, who make available to rural people the results of agricultural and home economic research. The specialists keep county workers advised of new scientific developments and their application to local problems, and prepare materials which the local agents may use in their educational programs. The work of the county agents constitutes the major activity in most States. The county agents work with farmers in introducing improved farm management, conservation, and marketing practices. Another major activity is the training of rural young people through community 4–H Clubs, which now have 1,886,214 members enrolled. Home demonstration work involving food and nutrition, family economics, home management, clothing and textiles, parent and family life education, housing and house furnishings, and consumer education is also conducted with homemakers.

Up to 2 percent of the appropriation for payments to States under section 23, title II of the Bankhead-Jones Act is available for expenses of the Federal Extension Service and is used for the same general purposes set forth under the item "Salaries and expenses, administration and coordination of extension work."

PROGRAM AND PERFORMANCE

The Federal Extension Service provides leadership for a Nation-wide system of education for rural people in cooperation with extension agencies of the several States and Territories.

1. *General administration and business service.*—This consists of the development of programs, policies, and procedures and of the general business operations necessary to efficient administration.

2. *Review and analysis of State budgets, projects, and plans and examination of State expenditures from Federal payments.*—State budgets, projects, and annual plans for extension work are reviewed and analyzed; Federal funds are allocated to the individual States; and State expenditures are examined for compliance with requirements of law.

3. *Planning and coordination of State and county extension work.*—Provision is made for the general supervision of State and county extension activities, and the effective planning and coordination of these programs.

4. *Development of technical subject matter for use by State extension forces.*—Cooperative programs are developed between the Service and other agencies of the Department to provide State and county extension forces with results of research and information on national programs for agriculture. State extension services are aided by adapting the findings of agricultural technology to the needs of rural people.

5. *Field studies of extension work, and the training of extension workers.*—Teaching methods and procedures are evaluated in relation to objectives. Short periods of in-service training are planned and conducted for extension personnel.

6. *Preparation and distribution of visual material and literature to Department and State extension forces.*—Programs of visual and information aids are developed for educational use, including the distribution of slidefilms, movies, photographs, charts, and publications.

7. *Program development and coordination of extension agricultural economics.*—Assistance is given to the States in developing and improving their educational programs on special economic problems of agriculture and rural life.

PROGRAM AND PERFORMANCE

Payments are made to the States annually to spread and encourage the application of useful and practical information on agriculture and home economics (7 U. S. C. 341–348; 386b–386f). Under statutory provisions, $10,000 is paid to each State, Hawaii, and Puerto Rico; the remainder is distributed on the basis of rural population and matched by the receiving jurisdiction. For a more complete description of this work see statement under "Payments to States, Hawaii, Alaska, and Puerto Rico, for cooperative agricultural extension work."

OBLIGATIONS BY ACTIVITIES

Payments for cooperative agricultural extension work—1950, $4,704,710; 1951, $4,704,710; 1952, $4,704,710.

PROGRAM AND PERFORMANCE

The Office of the Secretary is responsible for the over-all planning, coordination, and administration of the Department's programs, and also provides for those services which are required on a Department-wide basis.

1. *General administration.*—The Secretary, the Under Secretary, the Assistant Secretary, and their staffs develop policies to meet changing conditions, interpret and execute policies formulated by Congress, coordinate activities within the Department and with related activities in other departments, and provide leadership for the Department's participation in international programs.

OFFICE OF THE SECRETARY—Continued

Salaries and Expenses, Office of Secretary of Agriculture—Con.

2. *Personnel administration and service.*—Promulgates departmental policies and procedures on classification, job evaluation, salary and wage administration, recruitment, placement, retirement, separation, leave, safety, employee relations, training, organization, discipline, investigations, and health. Directs and reviews agency operations in these fields.

3. *Budgetary and financial administration and service.*—Carries out departmental functions and provides leadership and coordination in the budgetary, fiscal, property and supply management, and related activities of the Department; formulates and promulgates departmental policies and procedures, reviews and evaluates programs and legislative proposals for budgetary, financial, and related implications, and cooperates in effecting improvements in the management and operation of work programs administered by the Department.

4. *General operations.*—Provision is made for the housing of Department activities; communications and records management; technical and engineering advice in acquisition, utilization, and maintenance of equipment; general coordination of technical operations in aerial photographic, planimetric, topographic, cadastral, and mosaic mapping projects and liaison on mapping and aerial survey operations; administrative and budgetary functions for the Office of the Secretary; and administrative services in the District of Columbia, including the Department post office.

5. *Office of Hearing Examiners.*—Hearing examiners hold quasi-legislative hearings for the Department and quasi-judicial hearings in disciplinary matters and on petitions filed by private parties. Rule-making and adjudicatory hearings are held under the Agricultural Marketing Agreement Act of 1937, the Packers and Stockyards Act, the Commodity Exchange Act, the Perishable Agricultural Commodities Act, the Sugar Act of 1948, and the Anti-Hog-Cholera Serum and Hog-Cholera Virus Act of 1935.

PROGRAM AND PERFORMANCE

These funds are available for emergency loans to farmers and stockmen suffering production disasters (11 U. S. C. 1148). Upon determination by the Secretary that any area or region has suffered a production disaster causing a need for agricultural credit not readily available from commercial banks, cooperative lending agencies, or other responsible sources, loans are made for periods consistent with the borrowers' ability to repay at a 3-percent interest rate. Loans are also made at 3-percent interest to bona fide fur farmers unable to obtain necessary credit from other sources to enable them to carry on their present fur-farming operations (62 Stat. 1183).

To June 30, 1950, production-disaster loans have been made in 992 counties in 35 States. During the same period, loans to fur farmers have been made in 13 States. Principal advances for production-disaster loans and loans to fur farmers amounted to $32,247,739, of which $2,116,613 had matured on June 30, 1950, and $1,762,839 had been paid. In addition, $66,363 in interest payments had been received.

Public Law 665 (Aug. 5, 1950) authorized loans to farmers in areas where the Regional Agricultural Credit Corporation had made credit available, beginning in 1941, if the Secretary finds a continued need for such credit. Loans under this authority are being made in fiscal 1951 to orchardists in the State of Washington.

General account:

Working Capital Fund, Department of Agriculture—

FUNDS AVAILABLE FOR OBLIGATION

	1950 actual	1951 estimate	1952 estimate
Prior year balance available	$465,107	$449,410	$425,000
Reimbursements for services performed	1,391,915	1,382,290	1,397,932
Total available for obligation	1,857,022	1,831,700	1,822,932
Balance available in subsequent year	−449,410	−425,000	−400,000
Total obligations	1,407,612	1,406,700	1,422,932

PROGRAM AND PERFORMANCE

This fund of $400,000, without fiscal year limitation, is available for financing, on a reimbursable basis, central duplicating, photographic, tabulating, motor-transport, and supply services for the Department and such other services as the Secretary, with the approval of the Director of the Bureau of the Budget, determines may be performed more advantageously as central services. Advances are made from this fund for operation of these services, pending reimbursement from applicable funds of bureaus and agencies at rates so computed as to make the services completely self-sustaining and maintain the integrity of the original fund (5 U. S. C. 542–1).

OBLIGATIONS BY ACTIVITIES

Central duplicating, photographic, motor-transport, and supply service for the Department—1950, $1,407,612; 1951, $1,406,700; 1952, $1,422,932.

Total obligations	2,551,994	2,731,100	2,670,000

PROGRAM AND PERFORMANCE

The Office of the Solicitor performs all legal work arising from the activities of the Department. It represents the Department in quasi-legislative and quasi-judicial hearings. All criminal matters are reviewed for reference to the Department of Justice, and all matters relating to the institution or defense of civil cases in court are referred to the Department of Justice except where authorized for direct handling by this office. In civil cases, the Office prepares pleadings and briefs and participates in the trial of cases in court. It gives special attention to civil cases in the appellate courts arising under the regulatory programs of the Department.

1. *Agricultural credit.*—Legal services are provided for the Farm Credit Administration, including coordination of the legal work of the banks and corporations comprising the cooperative farm credit system. Legal services are also provided for the Farmers Home Administration.

2. *Commodity credit, production, and adjustment programs.*—Legal services are provided in connection with price-support activities, foreign and domestic procurement, export and domestic disposal of agricultural surpluses, national school-lunch program, agricultural conservation, farm-marketing quotas, crop insurance, Sugar Act programs, claims settlement and adjustment, wartime

OFFICE OF THE SOLICITOR—Continued

Salaries and Expenses, Office of Solicitor, Department of Agriculture—Continued

facilities acquired, international trade and commodity agreements, and import restrictions under section 22, Agricultural Adjustment Act (1933), as amended. The Solicitor serves as general counsel for both the Commodity Credit Corporation and the Federal Crop Insurance Corporation.

3. *Lands, forestry, research, and general legal services.*—Legal and abstracting services are provided in connection with the acquisition and exchange of forest lands, operation and management of the national forests, soil-conservation districts and other public lands, flood control, and agricultural research projects. General legal services for the Department, such as drafting legislation, claims adjudication and litigation, prosecution of patents and patent appeals and interferences, land-condemnation suits, trespass litigation, as well as legal matters relating to personnel and general departmental administration are also provided.

4. *Marketing and regulatory laws.*—Legal services are provided in connection with the administration and enforcement of the numerous quarantine acts and the statutes relating to the marketing and distribution of agricultural commodities involving formal and informal rule making and adjudicatory administrative proceedings, as well as litigation. The Office of the Solicitor represents the Secretary in proceedings before the Interstate Commerce Commission and other regulatory bodies involving freight rates and practices on farm commodities and in appeals from the decisions of such bodies to the courts.

5. *Rural electrification and telephone programs.*—Legal services include review and approval of loan and security documents; servicing of loans; review and approval of borrowers' construction and other contracts, titles, easements, franchises, and rights-of-way; and participation in litigation before State regulatory bodies and in the courts.

PROGRAM AND PERFORMANCE

Economic data and other information on foreign production and consumption of farm products are collected, interpreted, and disseminated. Information obtained is used to advise American farmers and business organizations handling farm products of important developments abroad that affect their interests and to provide Congress, other agencies of Government, and United States representatives at international conferences with information helpful in determining questions of policy concerning agricultural affairs.

1. *Foreign agricultural production and consumption and its effect on United States agriculture.*—Under this activity the Office makes (*a*) foreign market analyses by commodities and countries of major agricultural exports, (*b*) competition analyses for each country which grows crops competing with those of the United States, and (*c*) supply analyses of crops imported into the United States in large quantity.

2. *Foreign financial and trade policies and practices affecting United States agricultural trade.*—Limited analysis is made of agricultural production, consumption, and food import policy in key foreign countries. Agricultural interests are also represented in tariff negotiations and international economic and fiscal policy discussions.

3. *Representation in international agricultural activities.*—This includes participation in international study groups on cotton, sugar, and wool; limited participation in the International Wheat Council; coordinating United States participation in the Food and Agriculture Organization of the United Nations; and limited representation of agriculture in formulating policy of other international organizations which affect United States farm interests. In 1952, new international commodity agreements are likely to be considered on sugar, cotton, and wool.

4. *Contacts with United States officials abroad.*—Representatives of the Office make visits abroad for the purpose of appraising conditions and improving the liaison facilities through which agricultural attachés assigned to embassies in foreign countries report on agricultural developments.

OBLIGATIONS BY ACTIVITIES

Description	1950 actual	1951 estimate	1952 estimate
Direct Obligations			
1. Foreign agricultural production and consumption and its effect on United States agriculture	$279,861	$263,800	$263,800

for the purposes enumerated as follows: For preparation and display of exhibits, [$109,959] *$104,725*; for preparation, distribution, and display of motion and sound pictures, [$58,700] *$75,600*; for farmers' bulletins, which shall be adapted to the interests of the people of the different sections of the country, an equal proportion of four-fifths of which shall be delivered to or sent out under the addressed franks furnished by the Senators, Representatives, and Delegates in Congress, as they shall direct (7 U. S. C. 417) and not less than two hundred thirty thousand eight hundred and fifty copies for the use of the Senate and House of Representatives of part 2 of the annual report of the Secretary (known as the Yearbook of Agriculture), as authorized by section 73 of the Act of January 12, 1895 (44 U. S. C. 241), $611,128: *Provided*, That [when and to the extent that in the judgment of the Secretary agricultural exhibits and motion and sound pictures relating to the programs of the various agencies of the Department authorized by Congress can be more advantageously prepared, displayed, or distributed by the Office of Information, as the central agency of the Department therefor,] additional funds *for preparation and display of agricultural motion pictures and exhibits relating to the programs of the various agencies of the Department authorized by Congress,* not exceeding [$300,000 for these purposes] *$150,000,* may be transferred to and made a part of this appropriation, from the funds applicable, and shall be available for the objects specified herein: *Provided further*, That in the preparation of motion pictures or exhibits by the Department, not exceeding a total of $10,000 may be used for employment pursuant to the second sentence of section 706 (a) of the Organic Act of 1944 (5 U. S. C. 574), as amended by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a): *Provided further*, That no part of this appropriation shall be used for the establishment or maintenance of regional or State field offices, or for the compensation of employees in such offices [except that not to exceed $10,000 may be used to maintain the San Francisco radio office]. (*Department of Agriculture Appropriation Act, 1951.*)

Annual definite appropriation:

Appropriated 1951, **$1,265,800** Estimate 1952, [a] **$1,271,000**

[a] Includes $19,000 for activities transferred in the estimates from appropriations as follows:

"Salaries and expenses, human nutrition and home economics, Agricultural Research Administration"	$1,900
"Salaries and expenses, animal industry, Agricultural Research Administration"	2,900
"Salaries and expenses, dairy industry, Agricultural Research Administration"	500
"Salaries and expenses, plant industry, soils, and agricultural engineering, Agricultural Research Administration"	650
"Salaries and expenses, entomology and plant quarantine, Agricultural Research Administration"	700
"Control of forest pests, Department of Agriculture"	250
"Salaries and expenses, Forest Service"	4,700

PROGRAM AND PERFORMANCE

The Office exercises general supervision and coordination of information activities within the Department, involving publications, printed reports, exhibits, motion pictures, and radio and television activities.

Publications reporting on the results of research or conveying information which will aid agriculture are distributed through Members of Congress, the Federal-State Cooperative Extension Service, and in response to direct requests. These publications consist of farmers' bulletins, leaflets, technical bulletins, reports, program aids, periodicals, and a general Department directory. Distribution work entails inventory controls of publications and response to about 1,000,000 inquiries a year. The Office edits manuscripts for such publications, arranges for illustrations, determines distribution, and procures printing services.

The annual Yearbook of Agriculture, compiled and edited by the Office, is a complete treatise of information on a subject of major importance. The Office also prepares the annual report of the Secretary, which analyzes agricultural trends and discusses major questions of agricultural policy. Special articles and reports, as well as general background information, are also supplied upon frequent requests from national magazines, encyclopedic annuals, and trade publications.

Exhibits explaining developments of significance to farmers are supplied to some 35 large State and interstate fairs annually. Assistance is also given agencies of the Department in the preparation of small exhibits of limited use. The Office's studio and laboratory facilities produce motion pictures financed by Department agencies. Distribution of films is made through 72 cooperating State film libraries.

The Department's activities require the editing of about 2,800 press releases, and crop, price, and market reports. Digests, newsletters, and other services are available to press associations, daily newspapers, and farm publications. Radio is used to reach farmers through local farm

PROGRAM AND PERFORMANCE

The library procures and preserves books, periodicals, and other information material concerning agriculture. By law and by agreement with the Library of Congress, the Department library serves as the National Agriculture Library. It collects current and historical published material and organizes it for maximum service to the Department and the public.

There are six branch libraries with general collections serving the Department in designated geographical areas and six specialized field branches serving major field research installations of the Department.

1. *General agricultural library services.*—The library on June 30, 1950, had in its stacks about 1,000,000 volumes on agriculture and related subjects, to which will be added about 55,000 volumes in 1951 and about the same number of volumes in 1952. In addition, the library receives annually about 350,000 separate issues of periodicals, many of which are later bound into volumes.

A general agricultural bibliography is issued monthly. During the fiscal year 1950, it contained 89,060 references. Special bibliographies are prepared as needed to meet the requirements of the Department.

During fiscal year 1950, 203,134 reference questions were answered and 1,466,546 loans of books and other publications (including photo copies in lieu of loans) were made.

2. *Specialized services to research.*—Special bibliographies are compiled for research agencies of the Department, and the services of six field branch libraries are designed to serve major segments of the Department's research programs.

During the fiscal year 1950, receipts from the sale of bibliographies and photographic reproductions of materials amounted to $48,007 and are estimated to be about the same in 1951 and about $40,000 in 1952.

GENERAL PROVISIONS

SEC. [401] *301.* Within the unit limit of cost fixed by law, the lump-sum appropriations and authorizations made for the Department under this chapter shall be available for the purchase, *in addition to those specifically provided for*, of not to exceed [497] *532* passenger motor vehicles for replacement only and for the hire of such vehicles, necessary in the conduct of the work of the Department outside the District of Columbia.

SEC. [402] *302.* Provisions of law prohibiting or restricting the employment of aliens shall not apply to (1) the temporary employment of translators when competent citizen translators are not available; (2) employment in cases of emergency of persons in the field service of the Department for periods of not more than sixty days; and (3) employment under the appropriation for the Office of Foreign Agricultural Relations.

[SEC. 403. Appropriations and authorizations made in this chapter shall be available for health service programs as authorized by law (5 U. S. C. 150).]

[SEC. 404. Funds available to the Department during the current fiscal year shall be available for the payment of tort claims pursuant to law (28 U. S. C. 2672).]

[SEC. 405. Funds available to the Department of Agriculture during the current fiscal year may be expended for personal services in the District of Columbia.]

[SEC. 406. Funds available to the Department of Agriculture may be used for printing and binding, including the purchase of reprints of scientific and technical articles.]

SEC. [407] *303.* Of appropriations herein made which are available for the purchase of lands, not to exceed $1 may be expended for each option to purchase any particular tract or tracts of land.

SEC. [408] *304.* No part of the funds appropriated by this chapter shall be used for the payment of any officer or employee of the Department who, as such officer or employee, or on behalf of the Department or any division, commission, or bureau thereof, issues, or causes to be issued, any prediction, oral or written, or forecast, except as to damage threatened or caused by insects and pests, with respect to future prices of cotton or the trend of same.

SEC. [409] *305.* Except to provide materials required in or incident to research or experimental work where no suitable domestic product is available, no part of the funds appropriated by this chapter shall be expended in the purchase of twine manufactured from commodities or materials produced outside of the United States.

SEC. [410] *306.* Not less than $575,000 shall be available for contracts in accordance with section 10 (a) of the Act of August 14, 1946 (7 U. S. C. 427i) from appropriations herein made for the Bureau of Agricultural Economics; Bureau of Animal Industry; Bureau of Dairy Industry; Bureau of Plant Industry, Soils, and Agricultural Engineering; Bureau of Entomology and Plant Quarantine; Bureau of Agricultural and Industrial Chemistry; Bureau of Human Nutrition and Home Economics; and the Forest Service.

[SEC. 411. Of the funds appropriated in this chapter for travel expenses, $791,888 shall be carried to the surplus fund and covered into the Treasury within thirty days after enactment of this Act; but such amount shall be credited toward any other reduction in amounts available for such travel expenses resulting from decreases in appropriations made by this Act below the budget estimates.]

FEDERAL CROP INSURANCE CORPORATION

[Submitted under the Government Corporation Control Act]

Number of commodities insured	10	25	30
Number of contracts in force	166,000	307,257	434,300
Estimated insurance liability	$162,000	$256,000	$475,000
Premiums	$11,514	$14,332	$22,148
Indemnities	$15,645	$12,178	$19,933
Net gain (or loss (−)) for the year	−$3,957	$2,232	$2,254

PURPOSE AND FINANCIAL ORGANIZATION

The Federal Crop Insurance Corporation was created to furnish protection for the farmer's investment in producing crops against loss from unavoidable causes (7 U. S. C. 1501–1519). The ultimate objective is to make crop insurance protection available to all farmers who desire it. All insurance programs are being presently conducted on a gradual expansion basis to develop the experience necessary to operate successful national programs. All farmers in the insurance program pay premiums which reflect the risk of producing their crops. The premiums are used to pay current insurance losses and accumulate reserves for catastrophic losses.

Capital funds.—The Corporation has authorized capital stock of $100,000,000 (7 U. S. C. 1504, 1504a) to be subscribed by the United States of America. The Secretary of the Treasury holds receipts for $27,000,000 of the authorized capital stock, leaving $73,000,000 unissued,

Federal Reserve Bank of St. Louis

The earned surplus as of June 30, 1952, is estimated at $6,601,866, making a total capital of $33,601,866.

Analysis of Budget Programs

Crop year 1951 and 1952 programs will be generally the same as that for 1950. Main objectives are the securing of an adequate and properly distributed participation level, the refinement of rates and coverages, and the expansion of the program in 1951 to additional counties as provided in Public Law 268, approved August 25, 1949. The attainment of these objectives will give representative experience, spread risks, avoid adverse selectivity, and lower unit costs. The 1951 insurance program will be offered in 877 counties on wheat, cotton, flax, corn, tobacco, beans, and multiple crops. The program will not be expanded in 1952 because of national defense activities. It is estimated that 434,300 contracts will be in force in crop year 1951 and 486,800 in crop year 1952.

Two broad types of coverage are offered: namely, commodity and monetary. Commodity insurance guarantees production in bushels or pounds of the commodity and is being used as the higher-coverage type designed to provide protection approximating the investment in the crop. Monetary insurance, guaranteeing an amount in dollars, is a lower-premium and lower-coverage type offering protection for out-of-pocket costs. Premiums and indemnities are based on the same fixed price which eliminates costly hedging operations. Premium rates are refined and coverages constantly revised to avoid overinsurance. This is essential to comply with the provision of the act which limits the insurance coverage generally to the level of the investment in the crop. The mutual concept of insurance provides that county premium rates will reflect the actual loss experience of each county. The corporation is strengthening this policy, with the result that there is a greater personal interest on the part of each policyholder to see that an efficient and sound program is operated in his county.

An insurance policy covering a single crop is used in the greater number of counties. For diversified farming areas, there is used a multiple-crop insurance policy which covers a number of crops. Under this policy the coverage for all crops insured on the farm is combined, and a loss under the policy arises only when the value of the total production of the insured crops does not equal the combined coverage. The farmer benefits from the more comprehensive coverage and the lower premium rates resulting from combined coverage; the Corporation assumes less potential liability through the greater spread of risk.

The capital funds of the Corporation and county insurance reserves are best protected by prompt collection of all premiums and efficient loss adjustment work. A 5-percent discount plan for early payment of premiums is now in effect on all programs. Farmers are becoming more aware of the reduced costs of insurance by taking advantage of the discount, and early payment of premiums is reducing the collection costs. The loss adjustment staff has steadily gained proficiency each year as a result of systematic training and experience and protects the Corporation and the insured by seeing that only justifiable losses are paid.

Program administration.—The crop insurance programs are developed and analyzed mainly in the headquarters office and are administered in the field through 31 State offices and through cooperative agreement with the Production and Marketing Administration. Program accounting and contract servicing functions are performed by the branch office in Chicago. Annual appropriations of not to exceed $12,000,000 for any fiscal year to cover the administrative and operating expenses of the Corporation are authorized (7 U. S. C. 1516a). Administrative expenses for fiscal year 1952 are estimated to be $8,200,000.

Financial Review

Crop year 1949 results corresponded generally with the crop conditions that prevailed in the insurance counties. The wheat yield was the lowest in 10 years, dropping to as low as 40 to 50 percent of average in much of the spring-wheat area. In the central and eastern parts of the Cotton Belt there were widespread areas where the 1949 yield ranged below 40 percent of normal yield. Since wheat and cotton represent the two largest insurance programs, net operating results show indemnities exceeding premiums by $3,957,267.

Crop year 1950 experience appears favorable for all commodities except cotton. Unfavorable weather conditions, a mild winter, and a rainy growing season have increased boll weevil infestation, with a resulting poor cotton crop. However, over-all insurance operations are expected to show a net income of $2,232,140. It is impossible to predict crop conditions for the 1951 crop year. Nevertheless, a net income of $2,254,100 is estimated for crop year 1951, based on the assumption that 90 percent of the premiums earned will be paid out in indemnities. This assumption is predicated on the structure of premium rates which are so established as to provide a 10-percent reserve for unforeseen losses.

The following table gives a summary of insurance operations for fiscal years 1950, 1951, and 1952.

Summary of insurance operations

[Fiscal years ending June 30, 1950, 1951, and 1952]

FEDERAL CROP INSURANCE CORPORATION—Con.

Summary of insurance operations—Continued

Description	1950 actual		1951 estimate (1950 crop year)	1952 estimate (1951 crop year)
	Prior crop year adjustments	Crop year 1949		
Multiple crops:				
Premiums	−$5	$136,678	$1,268,700	$2,323,000
Indemnities	203	22,149	470,400	2,090,700
Profit (or loss (−))	−208	114,529	798,300	232,300
Other:				
Premiums				153,000
Indemnities				137,700
Profit				15,300
Other income and expense (net)	159,301	174,381	78,340	39,300
Addition to reserve for contingencies	134,290			
Net income (or loss (−))	289,181	−3,957,267	2,232,140	2,254,100

The Corporation is in a sound financial condition. The total earned surplus, estimated at $6,601,866 on June 30, 1952, is comprised of the insurance reserves, consisting of the excess of premiums over indemnities. These reserves are accumulated in accordance with sound insurance principles in good crop years and will be used by the Corporation in absorbing losses during below-average crop years.

Net accounts receivable are expected to decrease during 1951. Firmer collection policies and discount incentives for prepayment of premiums are expected to hold receivables to the lowest possible amount. The expansion of the insurance program in crop year 1951 will result in an increase in the volume of accounts. With collections estimated at 95 percent of premiums earned, the larger volume of business will tend to increase receivables as indicated in 1952.

The allowance for uncollectible accounts is composed of estimated bad debts for crop years prior to 1948 and one-half of 1 percent of insurance premiums of 1948 and subsequent years. The large reserve results mainly from the unfavorable collection experience encountered in those counties where the program could no longer be offered following the 1947 crop year. About 61 percent of the outstanding accounts as of June 30, 1948, have been collected by special collectors and with the assistance of the Department of Justice and the Solicitor's Office of the Department of Agriculture. Efforts to collect the remaining balance are being continued.

The results of the Corporation's operations, due largely to the fact that administrative expenses are paid from appropriated funds, is estimated to result in net budgetary expenditures of $7,900,101 in 1951 and $5,973,600 in 1952.

The total investment of the United States Government is estimated to be $31,347,766 as of June 30, 1951, and $33,601,866 on June 30, 1952, consisting of $27,000,000 non-interest-bearing capital stock and fully reserved earned surplus.

Balance at end of fiscal year	2,115,626	4,347,766	6,601,866
Unreserved:			
Balance at beginning of fiscal year	−72,865,710		
Adjustments:			
Prior fiscal years	−134,290		
Cancellation of stock	73,000,000		
Balance at end of fiscal year			
Total earned surplus	2,115,626	4,347,766	6,601,866

[1] Amounts shown reflect fiscal year transactions, consisting of items for several crop years. For crop year itemization, see table in narrative.

NOTE.—Administrative expenses are not included as operating expenses for the reason that premium income is not intended to cover such expenses. The premium rates established do not include any provision for recovering the cost of administering the program which is in accordance with the provisions of the Federal Crop Insurance Act, as amended. Funds required for administrative expenses are provided by the Congress through annual appropriations. Such expenses are estimated to be $59,014,542 from date of organization through June 30, 1950.

Purpose and Financial Organization [1]

The Commodity Credit Corporation engages in buying, selling, lending, and other activities with respect to agricultural commodities, their products, foods, feeds, and fibers for the purpose of stabilizing, supporting, and protecting farm income and prices; assisting in the maintenance of balanced and adequate supplies of such commodities; and facilitating their orderly distribution. The Corporation also makes available materials and facilities required in connection with the production and marketing of such commodities.

The Corporation is managed by a board of directors, subject to the general supervision and direction of the Secretary of Agriculture, who is an ex officio director and the chairman of the board. Besides the Secretary, the

[1] A more detailed statement describing the creation, purposes, authorities, and financial structure of the Corporation is contained in the Budget of the United States, 1948, as supplemented by subsequent budgets.

Federal Reserve Bank of St. Louis

COMMODITY CREDIT CORPORATION—Continued

board consists of six members appointed by the President and confirmed by the Senate.

In addition, the Corporation has a bipartisan advisory board of five members appointed by the President to survey the general policies of the Corporation.

The Corporation has an authorized capital stock of $100,000,000, all of which is held by the United States. The Corporation's borrowing authority was increased from $4,750,000,000 to $6,750,000,000 by Public Law 579, approved June 28, 1950. On June 30, 1950, borrowings outstanding amounted to $3,193,201,303.

Analysis of Budget Programs

The budget of the Corporation for 1952 is based on six types of programs: (1) Price support program, (2) supply program, (3) foreign purchase program, (4) commodity export program, (5) storage facilities program, and (6) loan to Secretary of Agriculture for agricultural conservation purposes.

In addition to these programs, the Secretary of Agriculture, under statutory authority, has determined that Corporation funds should be transferred for use in the eradication of foot-and-mouth and other contagious diseases of animals, subject to full subsequent reimbursement. As of June 30, 1950, advances, interest on such advances, and related charges amounted to $128,726,146. Against this sum, reimbursements and related receipts amounting to $86,208,259, including direct appropriations of $59,400,000 to the Secretary of Agriculture, have been applied as credits.

The Corporation's budget estimates for 1951 and 1952 are based on the assumptions (*a*) that national income and industrial activity will continue their upward trend; (*b*) that agricultural prices will tend to stabilize at or near the levels prevailing during the last 6 months of the calendar year 1950; (*c*) that yields will be in line with recent averages; (*d*) that production will continue at high levels in the crop years 1950 and 1951; (*e*) that acreage allotments will be in effect for 1951 crops of all basic commodities other than cotton; and (*f*) that marketing quotas will be in effect on peanuts and certain kinds of tobacco.

In considering these estimates, it should be recognized that it is extremely difficult to estimate fund requirements for the year beginning July 1, 1951. They are dependent upon weather conditions and the volume of agricultural production in this country, and in foreign countries, economic conditions generally, food needs in the occupied areas and other foreign countries, availability of dollar exchange, and many other complex and unpredictable factors.

1. *Price support program.*—Support operations will be carried out under the Corporation's charter powers (particularly sections 5 (a) and (d)), in conformity with the Agricultural Act of 1949 (Public Law 439, approved October 31, 1949), supplemented by Public Law 163, approved July 28, 1945, with respect to tobacco, and by Public Law 471, approved March 31, 1950, with respect to peanuts. The latter act also provides that "for the crop year 1951 and thereafter no price support shall be made available for any Irish potatoes unless marketing quotas are in effect with respect to such potatoes." Existing legislation does not authorize the establishment of such marketing quotas. Price support commodities are disposed of pursuant to the authorities contained in sections 407 and 416 of the Agricultural Act of 1949 (Public Law 439, approved October 31, 1949), section 112 (e) of the Foreign Assistance Act of 1948 (Public Law 472, approved April 3, 1948), and Public Law 85, approved June 7, 1949.

In carrying out its price support program, the Corporation follows the policy of utilizing normal trade facilities to the fullest practicable extent. When loans are made to farmers, the Corporation makes use of local banks, cooperatives, and other private lending agencies. Agreements are also entered into under which cooperative associations, banks, and other agencies may make and service loans as direct agents of the Corporation and be reimbursed for such services on a fee basis.

The dollar volume of price support operations in 1950 was more than 20 percent below the record high reached in 1949, though still higher than in any other fiscal year. Some of the factors contributing to this downward trend were a decrease of approximately 4 percent in the over-all volume of 1949 crop production as compared with the volume of 1948 crops, a somewhat lower dollar support price on most commodities, and a greater demand for cotton.

Purchase agreements permit producers to secure price support without the necessity of taking out a loan. These agreements now provide that the Corporation will purchase such quantities of eligible commodities as the producer elects to deliver within the maximum quantity covered in the agreements. These agreements generally are available during the same period that loans are available, and the producer must declare his intention to deliver under the purchase agreement within the 30-day period preceding the loan maturity date. Purchase agreements have been available on food and feed grains, flaxseed, soybeans, peas, beans, tung nuts, and seeds.

The value of the Corporation's inventories of commodities increased in 1950, primarily as a result of substantial acquisitions of corn, cotton, wheat, dairy products, linseed oil, beans, and grain sorghums. It is anticipated that these inventories will decrease in 1951, due principally to the sale of the Corporation's stocks of cotton. Substantial sales of corn, dairy products, eggs, and linseed oil will be the principal cause of the expected decrease in 1952.

2. *Supply program.*—The Corporation procures foods, agricultural commodities, their products, and related materials to supply the requirements of Government agencies, foreign governments, and relief and rehabilitation agencies, and to meet domestic requirements. Foods, agricultural commodities, and their products are procured or aid is given in their procurement to facilitate distribution or to meet anticipated requirements during periods of short supply. The Corporation may also make available materials and facilities required in connection with the production and marketing of agricultural commodities.

The supply program is carried out under the authority contained in the Corporation's charter, particularly sections 5 (b) and 5 (c) thereof.

Operations are conducted in accordance with procedures and policies reasonably calculated to assure compliance with section 4 of the act of July 16, 1943 (15 U. S. C. 713a–9), which requires that the Corporation be fully reimbursed for services performed, losses sustained, and operating costs incurred for commodities purchased or delivered to or on behalf of any other Government agency.

The volume of supply program activities decreased substantially in 1950; this declining trend is expected to continue in 1951 and 1952. Principal factors causing the sharp drop in 1950 were (*a*) the decline in foreign demand due to increased agricultural production in Europe; (*b*) the shortage of dollar exchange; (*c*) the use of commodities obtained as a result of price support operations to meet

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

supply program requirements; and (*d*) the increased volume of shipments by commercial firms on their own account. It is assumed that the effect of these factors will increase in 1951 and 1952.

3. *Foreign purchase program.*—The Corporation purchases abroad such foods, agricultural commodities, their products, and related facilities as are needed to meet both foreign and domestic requirements. In the past, these purchases have consisted largely of commodities in short supply. This program is carried out pursuant to the Corporation's charter authority, particularly sections 5 (b) and 5 (c) thereof.

It is anticipated that the volume of foreign purchase program activities will increase in 1951 due primarily to the purchase of wool for the military stockpile authorized by the Supplemental Appropriation Act, 1951, approved September 7, 1950. The only activity now estimated for 1952 is the purchase of Mexican meat to fill requirements of the Economic Cooperation Administration.

4. *Commodity export program.*—The Corporation exports, causes to be exported, or aids in the development of export markets for agricultural commodities and products. This program is carried out under the authority contained in the Corporation charter, particularly sections 5 (d) and 5 (f).

Under the International Wheat Agreement (7 U. S. C. 1641, 1642), the United States has guaranteed to supply about 225 million bushels of wheat or wheat products to participating nations at prices not in excess of $1.80 per bushel, Port Arthur basis. The President, acting through the Corporation, is to make available such quantities of wheat and wheat flour to importing countries, and at such prices, as may be necessary to exercise the rights, obtain the benefits, and fulfill the obligations of the United States under the International Wheat Agreement. In turn, the Corporation was enabled to use its general borrowing authority to pay current obligations and then be repaid from appropriations made specifically to cover the costs of the International Wheat Agreement. Pending such reimbursement, the Corporation is authorized to establish the net costs of operations under the agreement as a receivable.

The Corporation's net costs charged to the International Wheat Agreement, amounted to $75,636,722 in 1950; and it is estimated that these costs will amount to $117,071,278 in 1951 and $114,028,722 in 1952. The budget assumes that the Corporation will be reimbursed in 1952 for the costs incurred in 1950 by transfer from appropriated funds.

5. *Storage facilities program.*—The Corporation (*a*) purchases and maintains granaries and equipment for care and storage of grain owned or controlled by the Corporation; (*b*) makes loans for the construction or expansion of farm storage facilities; (*c*) provides storage-use guaranties to encourage the construction of commercial storage facilities; and (*d*) undertakes such other operations as are necessary to provide storage adequate to carry out effectively and efficiently the Corporation's programs.

During 1950, the Corporation increased storage capacity by 409,498,877 bushels through purchase and erection of structures, by 46,951,762 bushels through loan activities, and by over 80,000,000 bushels through storage-use guaranties. In order to provide adequate storage facilities in 1951 and 1952, it is estimated that the Corporation will be required to (*a*) purchase granaries and bins having a total capacity of 225,000,000 bushels in 1951 and of 100,000,000 bushels in 1952; (*b*) make loans on facilities having a total capacity of 93,000,000 bushels in 1951 and of 74,000,000 bushels in 1952; and (*c*) issue storage-use guaranties covering storage facilities with a total capacity of 75,000,000 bushels in each of the fiscal years 1951 and 1952.

6. *Loan to Secretary of Agriculture for agricultural conservation purposes.*—Section 391 (c) of the Agricultural Adjustment Act of 1938, as amended (7 U. S. C. 1391), requires the Corporation to lend to the Secretary of Agriculture during each fiscal year such sums, not to exceed $50,000,000, as he estimates will be required to make advances for the purchase of conservation materials from January 1 to June 30 of each year. Repayment of such loans is made during the succeeding fiscal year from appropriated funds, with interest at least equal to the cost of money to the Corporation. In 1950, a loan of $25,000,000 was made; it is estimated that, in 1951, a loan of $40,750,000 and, in 1952, one of $23,750,000 will be made.

Administrative expenses.—These cover the costs of the general supervisory and operating staff engaged in carrying out the programs of the Corporation, estimated costs of the audit by the General Accounting Office, and rental costs representing a proportionate share of the office space of the Production and Marketing Administration based on services performed for the Corporation. Expenses necessary in connection with the acquisition, operation, maintenance, improvement, or disposition of any real or personal property belonging to the Corporation or in which it has an interest (including special services performed on a contract or fee basis, but not including other personal services) are treated as nonadministrative expenses, as provided in the language carried annually in the appropriation act. It is contemplated that in 1952 the Corporation will treat as nonadministrative expenses those types of expenses so treated in the fiscal years 1949, 1950, and 1951. It is also contemplated that administrative expenses will be accounted for on an obligation basis as in the current and prior years.

Administrative services are performed for the Corporation by the Production and Marketing Administration, and the Corporation assumes an equitable share of these costs. In addition, the Corporation utilizes the services of other agencies when it is advantageous to do so. The requested authorization for administrative expenses does not include any amount for administrative expenses incurred in connection with the foreign purchase and supply programs; the budget for 1952 contemplates that the Corporation will be fully reimbursed for such expenses. Such reimbursements, which are generally obtained through a mark-up on invoices evidencing sales under these programs, are credited on the books of the Corporation to an income account which, in turn, is charged with all of the administrative expenses incurred in connection with these programs. Balances remaining in this account at the end of any fiscal year are used in succeeding fiscal years to defray administrative expenses incurred in connection with these programs, including, of course, the expense of liquidating all phases of these programs. The mark-up is established at a rate which is so determined and applied as to provide full reimbursement on an over-all basis for all administrative expenses in connection with the foreign purchase and supply programs and takes into account the fact that with respect to particular commodities, sales, or operations the mark-up may be more or less than the exact administrative expenses incurred. The rate of mark-up is adjusted from time to time as conditions warrant.

Actual expenses for 1950 and estimates for 1951 and 1952 are reflected in the schedule, "Administrative expenses, Commodity Credit Corporation"; the estimates for 1952 include a limitation of $20,200,000 for costs of

COMMODITY CREDIT CORPORATION—Continued

administration exclusive of reimbursements for services performed. Should the character and volume of operations reflected in the program estimates change, additional administrative funds may be required.

Financial Review

The Corporation's assets, which consist principally of price support loans receivable and inventories, were valued at $3,244,850,944 as of June 30, 1950. It is estimated that total assets will amount to $2,695,461,967 as of June 30, 1951, and $2,801,300,000 as of June 30, 1952. The estimated decrease in assets in 1951 is caused primarily by the decrease in cotton loans and liquidation of the Corporation's cotton inventory anticipated as a result of the short 1950 crop and unusually high demand. The increase anticipated in 1952 over the 1951 level is expected to result primarily from increases in the wheat inventory and cotton loans outstanding.

The changes in the Corporation's assets are also reflected in its principal liabilities and obligations. Its borrowings from the Treasury and banks amounted to $3,193,201,303 as of June 30, 1950; it is estimated that borrowings from the Treasury will amount to $2,555,000,000 as of June 30, 1951, and $2,469,000,000 as of June 30, 1952. The anticipated decrease in borrowings as of June 30, 1951, results in part from the restoration of capital as of June 30, 1949, which was approved on September 6, 1950, and the restoration of capital as of June 30, 1950, which it is anticipated will be made in 1951. The Corporation's direct and contingent liabilities (principally price support loans held by banks and purchase agreements) amounted to $787,814,773 as of June 30, 1950; it is estimated that these obligations will amount to $441,012,000 as of June 30, 1951, and $490,442,000 as of June 30, 1952.

The net budgetary expenditure was $1,674,380,693 in 1950. It is estimated that net budgetary receipts will amount to $149,502,639 in 1951 and net budgetary expenditures will amount to $253,441,070 in 1952. The net loss for 1950, including both realized losses and adjustments in valuation allowances, amounted to $627,721,359. It is estimated that the net loss for 1951 will amount to $35,000,000 and for 1952 to $200,000,000.

Most of the loans for price support purposes are nonrecourse loans, secured by the pledge or mortgage of agricultural commodities. Loans bear interest at 3 percent. The Corporation stands ready to purchase at any time any of its commodity loans held by private lending agencies if the loan papers are in proper order. Loans on newly constructed farm storage facilities are secured by chattel or real-estate mortgages and bear interest at 4 percent. The Corporation guarantees the loans made by lending agencies and is obligated to purchase such loans in default more than 12 months. Loans are reflected in the accounts of the Corporation at the unpaid balance, but reserves are provided, when required, to reflect the amount of estimated losses upon disposition of the balances due or collateral acquired.

Commodities owned by the Corporation are divided into two broad classifications: (1) Those acquired as a result of price support operations, and (2) those purchased under the Corporation's supply and foreign purchase programs. Inventories are recorded at cost, including storage, transportation, and accessorial expenses. Due to the varied nature of the many commodities included in the inventory and the related trade practices in storing and handling, the cost is determined by the "first-in, first-out" method for some commodities and by the "average cost" or "individual lot cost" method for other commodities. In each case a consistent practice is followed.

The Corporation acquires price-support commodities by purchase or by surrender of commodities mortgaged as loan collateral and foreclosure of pledged commodities. In some instances (e. g., cotton) loan collateral commodities are "pooled" for the account of producers. Under the pooling arrangement, producers have an interest in any net proceeds resulting from sale. Inventory valuation reserves are established to reduce inventories to the estimated realizable value based on all known factors, including ultimate disposition. No reserves are established for commodities in the supply program inventory, since such commodities are acquired under commitments providing for disposition on a basis calculated to recover full cost.

The Corporation's operations are financed by capital funds and borrowings from the Treasury and from private lending agencies. In accordance with the charter of the Corporation, interest on the capital is being paid the Treasury at the rate of 1.875 percent. The interest rate on borrowings from the Treasury is 1.25 percent. These interest rates are at levels which reimburse the Treasury for its borrowing costs, considering the type of borrowings involved. Funds are borrowed from private lending agencies when the Corporation desires to utilize such agencies in carrying out a particular operation in addition to obtaining funds. All borrowing agreements with private lending agencies are approved by the Secretary of the Treasury. Present indications are that the borrowing authority of $6,750,000,000 is adequate to cover all of the Corporation's obligations in 1952.

Restoration of capital.—An appraisal of all the assets and liabilities of the Corporation is made each year by the Secretary of the Treasury for the purpose of determining the net worth of the Corporation. If such appraisal establishes the net worth as less than $100,000,000, the Secretary of the Treasury shall restore the amount of such capital impairment; if the appraisal establishes the net worth more than $100,000,000, the Corporation shall pay the surplus to the Treasury. A summary of the actual and estimated capital impairment, restoration of capital by the Secretary of the Treasury, and payments to the Treasury is given in schedule C–4.

The Corporation's books show a deficit of $798,236,490 as of June 30, 1950, consisting of $627,721,359, being the net loss for 1950, and $170,515,131, being the deficit on June 30, 1949. On September 6, 1950, a restoration of $66,698,457 was approved to cover the deficit in 1949. The difference between the deficit shown on the books of the Corporation as of June 30, 1949, and the amount of this restoration of capital resulted from the net adjustments based on the Secretary of the Treasury's appraisal of the Corporation's assets and liabilities as of June 30, 1949. These adjustments were based on the provision of the act of March 8, 1938, which defines asset values for appraisal purposes as the lower of cost or average market prices for the month of June. The Corporation, however, takes into consideration prospective sales outlets, the effect of production and price support levels on market prices, and the costs of carrying the assets in arriving at their estimated value. While the actual amount of the restoration of capital will depend on the amount of the capital impairment established by the Secretary of the Treasury as of June 30, 1950, the estimated amount shown in the budget language proposing a restoration of capital and in the financial statements ($427,000,000) is based on Treasury valuation principles rather than the deficit ($798,236,490) as shown on the books of the Corporation.

SCHEDULE C–4.—*Commodity Credit Corporation: Analysis of surplus and results of Treasury appraisals*

[Oct. 17, 1933, to June 30, 1952]

PART 1—ANALYSIS OF SURPLUS

	Cumulative Oct. 17, 1933, to June 30, 1949	1950 fiscal year actual		1951 fiscal year estimate		1952 fiscal year estimate	
		Year	Cumulative	Year	Cumulative	Year	Cumulative
Net operating gain or loss (−), excluding cost of wartime consumer subsidy program	−$522,165,588	−$627,608,008	−$1,149,773,596	−$35,000,000	−$1,184,773,596	−$200,000,000	**−$1,384,773,596**
Adjustments for recovery of price support losses:							
Charges to reserve for postwar price support	500,000,000		500,000,000		500,000,000		500,000,000
Recovery from Secretary of the Treasury [1]	56,239,432		56,239,432		56,239,132		56,239,432
Net operating gain or loss (—), excluding cost of wartime consumer subsidy program	34,073,844	−627,608,008	−593,534,164	−35,000,000	−628,534,164	−200,000,000	−828,534,164
Cost of wartime consumer subsidy program	−2,101,956,519	−113,351	−2,102,069,870		−2,102,069,870		−2,102,069,870
Net restoration of capital from U. S. Treasury as determined by Treasury appraisals (see pt. 2):							
Under Delaware charter	1,897,367,544		1,897,367,544		1,897,367,544		1,897,367,544
Under Federal charter				493,698,457	493,698,457	339,538,033	833,236,490
Net surplus or deficit (−)	[2] −170,515,131	−627,721,359	−798,236,490	458,698,457	−339,538,033	139,538,033	−200,000,000

PART 2—RESULTS OF TREASURY APPRAISALS

Appraisal period	Restoration of capital impairment as determined by appraisal		Analysis of capital impairment	
	Cumulative	Appraisal period	CCC program and operating expenses, excluding wartime consumer subsidies	Wartime consumer subsidies
Under Delaware charter				
Oct. 17, 1933–Mar. 31, 1938	$94,285,405	$94,285,405	$94,285,405	
Year ending Mar. 31:				
1939	213,885,323	119,599,918	119,599,918

15 months ending June 30, 1945 [5]	1,322,171,966	921,456,561	45,222,906	876,233,655
Year ending June 30:				
1946	1,964,004,046	641,832,080	−208,705,074	850,537,154
1947	1,946,310,554	−17,693,492	12,081,998	−29,775,490
1948	1,897,367,544	−48,943,010	−44,917,881	−4,025,129
Total under Delaware charter	1,897,367,544	1,897,367,544	−206,824,757	2,104,192,301
Net surplus, CCC programs and operating expenses			206,824,757	
Net impairment, wartime consumer subsidies				2,104,192,301
Under Federal charter				
Year ending June 30:				
1949	66,698,457	66,698,457	68,934,239	−2,235,782
1950 (estimate)	493,698,457	427,000,000	426,886,649	113,351
1951 (estimate)	833,236,490	339,538,033	339,538,033	
1952 (estimate)	1,033,236,490	200,000,000	200,000,000	
Total under Federal charter	1,033,236,490	1,033,236,490	1,035,358,921	−2,122,431
Net impairment, CCC programs and operating expenses			1,035,358,921	
Net surplus, wartime consumer subsidies (liquidation activities)				−2,122,431

[1] Pursuant to the Foreign Aid Act of 1947 (Public Law 389, 80th Cong.) and Third Supplemental Appropriation Act of 1948 (Public Law 393, 80th Cong.).

[2] The Treasury appraisal established the capital impairment as $66,698,457. However, actual restoration was not effected until Sept. 6, 1950.

[3] Estimated amount applicable to appraisal period.

[4] The impairment of $39,436,885 for the appraisal period ending Mar. 31, 1943, was not restored until after the following year's appraisal and is included in the amount shown for 1944 appraisal period.

[5] The act of Mar. 8, 1938 (U. S. C., 1940 ed., supp. III, title 15, sec. 713–A–1), as amended by the act approved Apr. 12, 1945, changed the date of appraisal to June 30 of each year. Therefore, the impairment as of June 30, 1945, covers a 15-month period,

PROGRAM AND PERFORMANCE

The Farm Credit Administration provides a coordinated credit system for agriculture through Farm Credit banks and corporations which make credit available to farmers and farmers' cooperatives. It also provides research and technical assistance to farmers' cooperatives.

The Administration obtains its funds for administrative expenses from two sources, (*a*) direct appropriation and (*b*) assessments against Farm Credit banks and corporations. The distribution is determined by comprehensive cost analysis and is in proportion to the services rendered.

1. *Supervision and examination of and facilities and services to Farm Credit banks and corporations.*—This consists of supervision and annual examination of: (*a*) 12 Federal land banks (wholly farmer owned), (*b*) 12 production credit corporations (wholly Government-owned), (*c*) 13 banks for cooperatives (mixed ownership), (*d*) 12 Federal intermediate credit banks (wholly Government-owned), (*e*) one Federal Farm Mortgage Corporation (wholly Government-owned), (*f*) 1,230 national farm loan associations, and (*g*) 500 production credit associations. In addition, facilities and services are furnished, such as preparation and distribution of reports, preparation and submission of budgets, custody of collateral for bonds and debentures, credit research, development of appraisal standards and policies, development and distribution of information on farm credit problems, and assistance to the various banks and corporations in arranging their financing and investments.

2. *Research and technical assistance, including facilities and services to farmers' cooperatives.*—Research studies relating to the operations of farmers' cooperative associations are conducted, and technical assistance is given to these associations. The program seeks to improve the methods of operation and practices of cooperative associations. The Administration works closely with State and Federal agricultural research and extension groups and participates in farm cooperative conferences called by agricultural colleges and similar agencies.

Earned surplus, June 30	$49,029,069	$41,094,469	$42,571,569

PURPOSE AND FINANCIAL ORGANIZATION

The Federal Farm Mortgage Corporation was established for the following purposes: (1) To provide funds for the making of loans to farmers by the Land Bank Commissioner, (2) to make funds available to the Federal land banks to assist them in their financing during periods of emergency, and (3) to make loans to joint stock land banks. The Commissioner's lending authority expired July 1, 1947 (12 U. S. C. 1020 et seq.).

Authorized capital stock of $200,000,000 was subscribed to by the Governor of the Farm Credit Administration on behalf of the United States. Under subsequent statutory authority, the Corporation repaid $199,990,000 into a revolving fund in the Treasury of the United States. This amount was paid into the surplus fund of the United States Treasury in accordance with the Department of Agriculture Appropriation Act, 1951.

With the approval of the Secretary of the Treasury, the Corporation has authority to issue and have outstanding at any one time bonds not to exceed $500,000,000, which are unconditionally guaranteed both as to principal and interest by the United States.

The services and facilities of the Farm Credit Administration, Federal land banks, and national farm loan associations are utilized to carry out the functions of the Corporation.

ANALYSIS OF BUDGET PROGRAM

Budgetary requirements of the Corporation for the fiscal year 1952 depend upon the rate of liquidation of its assets. Liquidation during fiscal 1950 and the estimated repayment of loans for fiscal 1951 and 1952 are reflected in statements A and C.

Administrative expenses.—These expenses represent reimbursements to the Federal land banks for services performed as agent of the Corporation, payment to the United States Treasury and Federal Reserve banks for expenses in handling bond transactions and checking accounts for the Corporation, cost of audit by the General Accounting Office, and miscellaneous items. Total administrative expenses for fiscal year 1950 were $1,421,219 and these expenses for the fiscal years 1951 and 1952 are estimated at $1,280,000 and $1,100,000, respectively.

FINANCIAL REVIEW

Fiscal year 1950 operations resulted in a net budgetary receipt of $18,800,744. Fiscal 1951 and 1952 operations are expected to reflect net budgetary receipts of $12,574,200 and $9,714,000, respectively.

Income and expenses.—Operating income for the fiscal year 1950 amounted to $3,067,553, and it is expected that $2,338,100 and $1,811,300 will be realized in 1951 and 1952, respectively. The resulting net income, after adjustment of valuation allowances and other additions, amounts to $3,368,038 in 1950 and will be about $2,065,400 in 1951 and $1,477,100 in 1952. Expenses, exclusive of charge-offs, for fiscal year 1950 were $1,641,183; comparable expenses for 1951 and 1952 are estimated to be $1,440,600 and $1,233,700, respectively.

Assets and liabilities.—Mortgage loans, purchase money mortgages, sales contracts, etc., outstanding as of June 30, 1950, amounted to $52,855,627 and are estimated at June 30, 1951 and 1952, at $40,688,627 and $31,683,627, respectively. The Corporation had funds on deposit with the United States Treasury for the liquidation of all matured bonds held by the public at June 30, 1950, amounting to $841,400, and matured interest thereon of $100,415.

Investment of United States Government.—Capital stock has been reduced to $10,000. It is not contemplated that there will be a further reduction. Earned surplus at June 30, 1950, amounted to $49,029,069 and is estimated at June 30, 1951 and 1952, at $41,094,469 and $42,571,569, respectively. The Corporation declared and paid into the general fund of the Treasury during 1950 dividends amounting to $17,000,000.

FARM CREDIT ADMINISTRATION—Continued

SCHEDULE C–1.—*Federal Farm Mortgage Corporation: Position with respect to borrowing authority*

[Fiscal years ending June 30, 1950, 1951, and 1952]

	1950 actual	1951 estimate	1952 estimate
Bonds outstanding at end of year (statement C)	$841,400	$631,400	$473,400
Maximum balance of bonds outstanding during year	1,187,900	841,400	631,400
Balance of borrowing authority available	498,812,100	499,158,600	499,368,600
Authorized borrowings	500,000,000	500,000,000	500,000,000

SCHEDULE C–2.—*Federal Farm Mortgage Corporation: Status of loans receivable*

[As of June 30, 1949 and 1950]

	June 30, 1949	June 30, 1950
First mortgage loans:		
Number:		
Current	27,759	22,700
Delinquent	2,402	2,314
Total	30,161	25,014
Unpaid principal	$26,237,848	$20,278,771
Second mortgage loans:		
Number:		
Current	39,126	30,403
Delinquent	4,093	3,731
Total	43,219	34,134
Unpaid principal	$39,258,728	$29,215,258
Purchase money mortgages, contracts, etc.:		
Number:		
Current	3,159	2,567
Delinquent	302	315
Total	3,461	2,882
Unpaid principal	$4,122,065	$3,234,451
Other items: Amount [1]	$161,763	$127,147
Total:		
Number:		
Current	70,044	55,670
Delinquent	6,797	6,360
Total	76,841	62,030
Amount	$69,780,404	$52,855,627

[1] Includes extensions, loans in foreclosure, and loans in suspense. Number not available.

Administrative Expenses, Federal Farm Mortgage Corporation—

Federal Farm Mortgage Corporation: Not to exceed [$1,280,000] *$1,100,000* (to be computed on an accrual basis) of the funds of the Corporation shall be available for administrative expenses, including employment on a contract or fee basis of persons, firms, and corporations for the performance of special services, including legal services, and the use of the services and facilities of Federal land banks, national farm loan associations, Federal Reserve banks, and agencies of the Government as authorized by the Act of January 31, 1934 (12 U. S. C. 1020–1020h); and said total sum shall be exclusive of services and facilities furnished and examinations made by the Farm Credit Administration central office, interest expense, and expenses in connection with the acquisition, operation, maintenance, improvement, protection, or disposition of real or personal property belonging to the Corporation or in which it has an interest: *Provided*, That promptly after June 30 of each fiscal year all cash funds in excess of the estimated operating requirements for the current fiscal year shall be declared as dividends and paid into the general fund of the Treasury: *Provided further*, That the aggregate amount of bonds the Corporation may issue and have outstanding at any one time shall not exceed $500,000,000. (*Department of Agriculture Appropriation Act, 1951.*)

FUNDS AVAILABLE FOR ADMINISTRATIVE EXPENSES

	1950 actual	1951 estimate	1952 estimate

Purpose and Financial Organization

The 12 Federal intermediate credit banks serve as banks of discount for agriculture and do not make loans directly to individuals or accept deposits of funds otherwise than as collateral security. Each bank operates under the direction of a board of directors, composed of the members of the district farm credit board and is supervised by the Intermediate Credit Commissioner, who is responsible to the Governor of the Farm Credit Administration. (12 U. S. C. 1021–22; 640b and 640d.)

The Government's present capital investment in the banks is $60,000,000, consisting of $5,000,000 of paid-in capital for each of the 12 banks. Paid-in surplus of $500,000, supplied to one of the banks in June 1948 out of the revolving fund of $40,000,000 was returned to the revolving fund in June 1950 (12 U. S. C. 1131i (e)).

Analysis of Budget Program

Lending activities.—The demand upon these banks for credit continues at a high level. The volume of loans and discounts expected in 1952 is 4.8 percent over the estimated amount for 1951 and 12 percent over the volume handled in 1950. Among factors contributing to the current trend are continued high production costs, an increasing number of loans to new borrowers offered to the banks, prospects for larger carry-overs, and renewals resulting from unfavorable crop yields in some areas, and reduced prices for some commodities in 1949 and 1950.

Financing activities.—To finance their lending operations during 1952, the banks expect to issue $1,000,788,000 of consolidated collateral trust debentures and to borrow $61,500,000 from commercial banks for short periods. The United States assumes no liability for the debentures or other obligations of the Federal intermediate credit banks (12 U. S. C. 1043).

Administrative expenses.—These expenses, which are paid out of income, amounted to $1,357,020 in 1950 and are estimated at $1,496,000 for 1951 and $1,496,000 for 1952.

Financial Review

Income.—Interest income from loans and discounts, United States securities, and other sources was $12,298,337 in 1950 and is estimated at $12,486,100 for 1951 and $13,240,100 for 1952. On June 30, 1950, the loan and discount rate of each bank was 2 percent per annum (2½ percent in Puerto Rico). No changes in rates are contemplated in 1951 or 1952 unless rates in the money markets change materially. Net income, which was $2,804,641 in 1950, is expected to be $2,072,200 in 1951 and $2,168,400 in 1952.

Interest costs.—Interest and other costs on borrowed money were $8,142,007 in 1950 and are estimated to be $8,676,000 in 1951 and $9,276,000 in 1952. The average cost of money obtained through sales of debentures was 1.53 percent per annum in 1950 and is expected to be 1.6 percent in 1951 and 1952. Interest costs are affected by general money market conditions, and rates are subject to considerable fluctuation.

Earned surplus.—The distribution of net income of the banks is prescribed by law (12 U. S. C. 1072). Out of such income, $1,230,000 was transferred to reserve for contingencies in 1950, and it is expected that $1,025,000 will be transferred in both 1951 and 1952. A 25-percent franchise tax of $393,660 was paid in 1950, and payments of $261,800 and $285,900 are anticipated in 1951 and 1952. Total franchise taxes paid by the banks from organization to June 30, 1950, aggregate $8,013,182. The balance of net income each year is carried to unreserved surplus. The total earned surplus is retained in the system as contemplated by law. These surplus reserves, together with paid-in capital, form the capital structure on which the issuance of securities is based.

Loans and discounts.—Loans and discounts outstanding on June 30, 1950, amounted to $591,189,290. No loss to the intermediate credit banks on these loans and discounts is in prospect. It is estimated that loans and discounts outstanding will amount to $633,030,290 on June 30, 1951, and $680,028,290 on June 30, 1952.

Investments.—The banks held $45,730,791 (par value $45,254,000) of United States securities at June 30, 1950, and it is estimated that such holdings will be $45,193,591 at June 30, 1951, and $45,155,891 at June 30, 1952. These investments are an important factor in enabling the banks to obtain funds in the investment markets at reasonable rates. They are used from time to time as collateral for debentures and to secure short-term bank borrowings.

Liabilities.—Unmatured consolidated debentures and notes payable outstanding, which account for all except about 1 percent of the banks' liabilities, totaled $552,425,000 on June 30, 1950, and are expected to increase to $594,835,000 on June 30, 1951, and to $643,018,000 on June 30, 1952.

Investment of United States Government.—No change in the amount of paid-in capital funds invested in the banks is contemplated in either 1951 or 1952, although in 1950 their debt-to-capital ratio reached the highest level in the history of the system. Should additional capital be required to enable the banks to meet the credit needs of eligible borrowers, the revolving fund of $40,000,000 in the United States Treasury, established for that purpose, is available for subscription to additional capital stock or paid-in surplus by the Governor of the Farm Credit Administration (with the approval of the Secretary of the Treasury).

Borrowing authority.—The aggregate amount of debentures and other similar obligations which any Federal intermediate credit bank may have outstanding may not exceed 10 times its surplus and paid-in capital (12 U. S. C. 1041). The ratio of outstanding debentures and notes payable to capital and surplus of the system was 5.6 to 1 on June 30, 1950, and reached an all-time high of 6.5 to 1 during 1950. The point at which buyer resistance may develop, with resulting higher interest costs, will depend to a considerable extent upon the money markets and general economic conditions affecting agriculture.

PROGRAM AND PERFORMANCE

This revolving fund is available for investment in capital stock and paid-in surplus of the Federal intermediate credit banks (12 U. S. C. 1131i (e)).

PRODUCTION CREDIT CORPORATIONS

[Submitted under the Government Corporation Control Act]

Program Highlights

Factors related to local production credit associations supervised and partially capitalized by the 12 production credit corporations	1950 actual	1951 estimate	1952 estimate
Number of production credit associations	502	501	500
Number of associations completely owned by farmers and stockmen	134	200	300
Number of farmer stockholders	461,000	481,000	500,000
Number of loans made	282,693	305,000	320,000
Amount of loans made	$968,000,000	$1,050,000,000	$1,140,000,000
Capital stock owned by farmers and stockmen	$67,193,000	$73,500,000	$79,000,000
Accumulated reserves of associations	$61,127,000	$67,500,000	$73,000,000
Capital stock of associations owned by production credit corporations	$18,066,000	$13,785,000	$10,470,000

Purpose and Financial Organization

The production credit system provides permanent short-term credit facilities on a cooperative basis for farmers and stockmen. The system includes in each of the 12 farm credit districts a production credit corporation established to organize, provide supplemental capital for, and supervise the local production credit associations which are the lending cooperatives. The capital stock of the production credit corporations is provided from the revolving fund of $90,000,000 in the United States Treasury. The paid-in capital of the corporations, $42,235,000 at June 30, 1950, and most of their surplus are invested in class A stock of production credit associations and in United States bonds. Each of the 12 corporations operates within its own financial structure under its district board of directors (12 U. S. C. 1131 et seq.). The corporations are supervised by the Production Credit Commissioner who is responsible to the Governor of the Farm Credit Administration.

Analysis of Budget Program

Organizing, providing supplemental capital for, and supervising production credit associations.—Production credit associations have been established to serve all the continental United States and Puerto Rico. A typical association serves six counties. Many associations have one or more field offices in addition to their main offices. The principal factor governing administrative expenses is the supervision of these associations. This is aimed at: (1) sound, constructive, and dependable credit service to farmers; (2) efficient and economical operations of the local associations; (3) convenient service throughout the associations' territories; and (4) an adequate financial structure and eventual complete local ownership for each association.

A complete annual credit review including examination of the outstanding loans is made of each association. This analysis of outstanding loans and lending policies and procedures forms the basis for working with associations on maintenance of sound credit, avoidance of undue losses, means for providing adequate service, and provides training in analysis of loans. The credit review has grown in complexity due to increases in credit losses in recent years, and a greater number of loans requiring special supervisory attention. One of the important problems expected in 1952 is to provide sound credit for required agricultural production without contributing to inflationary tendencies.

The corporations conduct periodic operating reviews and audits of the associations. These assure the maintenance of proper efficiency, accounting standards, and control of funds. The corporations are required to prescribe association loan policies, interest rates and reserves; approve certain classes of loans and dividend payments; approve association officers, directors, and their compensation.

An important objective is to have all associations on a self-supporting basis. From an income standpoint the initial phases have been substantially accomplished, however, the corporations must give continued attention to prevent any reversal and, in some cases, to improve the level of net operating income. The corporations work with associations to develop a strong capital structure and adequate reserves through determination of each association's needs; devising ways and means for obtaining the capital needs from among the membership and, where appropriate, increasing income from loans or reducing expenses. By these means the corporations had been enabled to reduce their investment in class A stock of associations from $90,000,000 in 1934 to $18,066,000 at June 30, 1950. At that date, 134 of the 502 associations were completely owned by farmers and stockmen. There is expected to be a further net reduction in the investment of the corporations in association capital stock of $4,281,000 in 1951 and $3,315,000 in 1952. By June 30, 1952, it is estimated that 300 associations will be completely locally owned.

Administrative expenses of the 12 corporations amounted to $1,338,715 in 1950 and are estimated at $1,358,000 for 1951 and $1,358,000 for 1952.

Financial Review

The Government's capital investment, all of which is noninterest bearing, in the production credit corporations is expected to be reduced to $36,235,000 by a payment of $3,000,000 in 1951 and $3,000,000 in 1952 to the revolving fund. The surpluses of the corporations, aggregating $16,801,372 at June 30, 1950, safeguard the Government's investment in their capital stock and directly influence the amount of paid-in capital required. Since 1949, by reason of a special payment of $30,000,000 into the surplus fund of the Treasury in that year and a corresponding reduction in their investments, the income of the corporations has not been sufficient to defray all expenses. The net loss in 1950 was $339,291 and is estimated at $533,900 and $518,100 for 1951 and 1952, respectively. The earned surpluses of the 12 corporations are expected to aggregate $15,749,372 at June 30, 1952.

Purchases and sales of securities estimated for 1951 and 1952 result primarily from the continued reduction of the corporations' liability under bond repurchase agreements with the associations.

Total obligations			

BANKS FOR COOPERATIVES

The Farm Credit Act of 1933, as amended, provides that capital funds required by the banks for cooperatives would be obtained from the revolving fund of the Agricultural Marketing Act (12 U. S. C. 1134b–1134i) and from cooperatives obtaining loans from the banks (12 U. S. C. 1134k). Present provisions of the law (12 U. S. C. 1134k) make it mandatory that capital stock in the bank for cooperatives owned by a cooperative association which has paid its indebtedness to the bank be retired and canceled upon request by the association. Because of this requirement the amount of capital stock in the banks owned by farmers' cooperatives ordinarily varies with the amount of loans outstanding and has never constituted more than a comparatively small part of the capital needs of the banks. As of June 30, 1950, stock owned by cooperatives and deposits of cooperatives in the guaranty fund totaled $14,085,900 or only 7.31 percent of the total capital stock of the banks.

The desirability of eventual ownership of the banks for cooperatives by the agricultural cooperatives of the country has been recognized for a number of years. After long consideration a bill to accomplish this objective was introduced in both Houses during the Eightieth Congress. Hearings were held by both Houses and the bill reported out by the House Committee on Agriculture. No final action was taken on the bill by the Eightieth Congress. A similar bill was introduced in the House of Representatives during the Eighty-first Congress and passed by the House of Representatives, but no final action was taken by the Senate. This proposed legislation provided for the eventual retirement of the capital stock in the banks owned by the Federal Government through (1) the purchase of stock by cooperatives in relation to the amount of interest paid on loans from the banks, (2) the issuance of stock in the form of patronage dividends, and (3) the direct sale of stock to cooperatives.

BANKS FOR COOPERATIVES

Combined statement of condition—June 30, 1950

Assets:			
Cash			$21,621,222
U. S. Government securities (par $42,788,000)			43,466,993
Loans to cooperative associations		$244,552,932	
Less reserve		3,150,015	
			241,402,917
Other assets		7,426,849	
Less reserve		2,414,314	
			5,012,535
Total assets			311,503,667
Liabilities and capital:			
Unmatured debentures outstanding			30,000,000

Statement of proposed obligations for purchase and hire of passenger motor vehicles for the fiscal year 1952

DEPARTMENT OF AGRICULTURE

Appropriation	Motor vehicles to be purchased		Old vehicles to be exchanged		Net cost of vehicles to be purchased	Old vehicles still to be used	Cost of hire of motor vehicles	Public purpose and users
	Number	Gross cost	Number	Allowance (estimated)				
RESEARCH AND MARKETING ACT OF 1946								
Research and Marketing Act of 1946, Department of Agriculture.	----------	----------	----------	----------	----------	5	----------	For use by technical assistants where public transportation is inadequate or not available in supervising, directing, and carrying out the research and marketing service work authorized by the Research and Marketing Act.
BUREAU OF AGRICULTURAL ECONOMICS								
Salaries and expenses, Bureau of Agricultural Economics:								
Economic investigations	2	$2,800	2	$800	$2,000	11	$200	For use of research specialists engaged in field work on farm management and land use problems at various points throughout the United States.
Crop and livestock estimates	9	12,600	9	3,600	9,000	26	300	For use of statisticians in charge of the preparation of crop and livestock estimates in important agricultural areas.
Total, Bureau of Agricultural Economics	11	15,400	11	4,400	11,000	37	500	
AGRICULTURAL RESEARCH ADMINISTRATION								
OFFICE OF ADMINISTRATOR								
Salaries and expenses, Office of Administrator, Agricultural Research Administration.	----------	----------	----------	----------	----------	8	----------	For transportation of the Research Administrator and members of his staff on official business in the District of Columbia, and for use of officials in supervising and inspecting the maintenance and operation of the Agricultural Research Center, Beltsville, Md., an area of approximately 11,700 acres.
RESEARCH ON STRATEGIC AND CRITICAL AGRICULTURAL MATERIALS								
Research on strategic and critical agricultural materials, Department of Agriculture.	----------	----------	----------	----------	----------	4	----------	For use by technical workers and their assistants in planning and carrying forward the work of the Department on agricultural materials determined to be strategic and critical pursuant to sec. 7 (b) of the Stock Piling Act.
RESEARCH ON AGRICULTURAL PROBLEMS OF ALASKA								
Research on agricultural problems of Alaska, Department of Agriculture.	----------	----------	----------	----------	----------	1	----------	For use of director and technical assistants in connection with planning and carrying forward the research program on agricultural problems of Alaska.
OFFICE OF EXPERIMENT STATIONS								
Salaries and expenses, experiment stations, Agricultural Research Administration.	----------	----------	----------	----------	----------	2	----------	Director and other employees of Federal Experiment Station in Puerto Rico in conducting outlying experiments, visiting cooperative experiments, and carrying out the various lines of research throughout the island.
BUREAU OF HUMAN NUTRITION AND HOME ECONOMICS								
Salaries and expenses, human nutrition and home economics, Agricultural Research Administration.	----------	----------	----------	----------	----------	1	----------	For travel by officials of the Bureau to enable personnel to operate more adequately at the sites of various projects carried on by the Bureau at the Agricultural Research Center.
BUREAU OF ANIMAL INDUSTRY								
Salaries and expenses, animal industry, Agricultural Research Administration:								
Animal research	6	8,400	6	2,400	6,000	39	----------	Travel by officials of field experiment stations in surrounding territory and the more remote parts of stations on work relating to animal research.
Animal disease control and eradication.	73	102,200	73	29,200	73,000	586	----------	Travel to farms, ranches, and other premises in the field; and to establishments producing anti-hog-cholera serum and hog-cholera virus, ports of entry, and other points in urban areas on regulatory work.
Meat inspection	6	8,400	6	2,400	6,000	61	----------	Travel by inspectional personnel to abattoirs and meat-packing plants in urban centers, including the field station in the District of Columbia, in carrying out the provisions of laws relating to the Federal inspection of meat and meat food products.
Eradication of foot-and-mouth disease.	(1)	----------	(1)	----------	----------	[1] 85	----------	Travel in Mexico and along the Mexican-United States border in connection with the control and eradication of foot-and-mouth disease.
Total, Bureau of Animal Industry.	85	119,000	85	34,000	85,000	771	----------	
DAIRY INDUSTRY								
Salaries and expenses, dairy industry, Agricultural Research Administration.	----------	----------	----------	----------	----------	4	----------	For use of officials of the Bureau located in the field for official travel to towns adjacent to official stations to purchase supplies and to farms in vicinity of station to inspect cooperative experiments.
BUREAU OF AGRICULTURAL AND INDUSTRIAL CHEMISTRY								
Salaries and expenses, Bureau of Agricultural and Industrial Chemistry.	----------	----------	----------	----------	----------	12	----------	For travel by officials of the divisions and regional research laboratories of the Bureau in making field trips throughout the areas served by these organizational units in official conduct of business for the Bureau of Agricultural and Industrial Chemistry.

Total, Department of Agriculture.	10	108,000	10	10,500	97,500	27	97,000	

PROPOSED FOR LATER TRANSMISSION

Control of forest pests.—A supplemental of $1.5 million for fiscal year 1951 will be required (*a*) to continue and possibly conclude the cooperative effort begun 2 years ago to combat a widespread outbreak of spruce budworm in Oregon and Washington, and (*b*) to combat infestations of mountain pine beetles which are attacking valuable white pine trees in two national forests in northern Idaho.

Forest roads and trails.—A supplemental of $5 million for the fiscal year 1951 is urgently needed for the construction of roads to provide access to timber in national forests. The demand for timber is increasing and will accelerate with increasing defense requirements.

PROGRAM AND PERFORMANCE

Besides the Secretary, the Office of the Secretary consists of those who advise and assist him in his duties and responsibilities as head of the Department, and central administrative services.

1. *Executive direction of the Department.*—Policy guidance and general supervision are provided by the Secretary, the Under Secretary, the Under Secretary (Transportation), the Assistant Secretary (Air), the Assistant Secretary (International Affairs), and the Assistant Secretary (Administration). The creation of the Office of Under Secretary for Transportation in 1951 accounts for the increase over 1950; the 1952 estimate contemplates full operation of the Office of the Under Secretary, vacant since May 1, 1950.

2. *Departmental staff services.*—Staff assistance in the general management and administration of the Department is furnished by the Office of the Solicitor, the Office of Program Planning, the Office of Publications, the Office of Budget and Management, and the Office of Personnel Administration. Additional work on transportation policy will be assumed in 1951.

3. *Administrative services.*—These include centralized accounting, personnel, and general administrative services for the Office of the Secretary, the Office of Technical and Scientific Services, and the Bureau of Foreign and Domestic Commerce.

OBLIGATIONS BY ACTIVITIES

PROGRAM AND PERFORMANCE

The Office of Technical Services collects and compiles valuable technical data primarily from Government research and makes this information available upon request to business, industry, and the general public. In addition, the Office refers to the armed services and other Government agencies scientific or technical information having immediate or potential practical value of significance to them and carries out the Department's responsibilities for protection of United States Government patents in foreign countries. The increase requested for 1952 will provide expansion in foreign patent protection work and in referrals of technical data to other agencies.

Total obligations	6,823,966	7,007,000	7,170,000

PROGRAM AND PERFORMANCE

Provision is made for the administration of the several major censuses and the annually recurring programs.

1. *Age and citizenship certification.*—Census records are maintained to answer public inquiries about age, place of birth, and citizenship.

2. *Current census statistics.*—Current statistical information is collected and disseminated on such subjects as volume of production of the principal manufactured commodities; values, quantities, and shipping weights of imports and exports; revenue, debt, expenditures, and employment of State and local governments; and the country's population. In addition, statistical summaries such as the Statistical Abstract of the United States and special reports representing authoritative compilations of national and local series are compiled and published.

3. *General administration.*—Direction of the work of the Bureau and common administrative services are provided.

PROGRAM AND PERFORMANCE

The estimate for fiscal year 1952 covers the remaining cost of the general census of population, agriculture, irrigation, drainage, unemployment, and housing which was taken as of April 1, 1950. The enumeration has been completed except for certain supplementary data on residential financing. The official count of population which furnishes the basis for apportionment of Members of Congress by States has been completed. During 1952 work will continue on tabulating and publishing the information that has been collected. Certain preliminary reports will be forthcoming during fiscal year 1951. The bulk of the reports on the subjects covered by this general census will be released in fiscal years 1952 and 1953. The estimated total cost of the census, including preparatory work, will be less than $90,000,000 against an estimate of $92,000,000 a year ago.

OBLIGATIONS BY ACTIVITIES

Description	1950 actual	1951 estimate	1952 estimate

PROGRAM AND PERFORMANCE

The 1952 census of governments, estimated to cost $2,250,000, will provide data on taxes, governmental receipts, expenditures, indebtedness, and employees of States, counties, cities, and other governmental units. Public Law 767, Eighty-first Congress, requires a quinquennial census covering those subjects beginning with the year 1952. During 1952 the initial collection phase of the census will be undertaken.

BUREAU OF THE CENSUS—Continued

Censuses of Business, Transportation, Manufactures and Mineral Industries, Bureau of the Census—

Censuses of business, transportation, manufactures and mineral industries: For expenses necessary to prepare for taking, compiling, and publishing the censuses of business, transportation, manufactures, and mineral industries as authorized by law, including personal services by contract or otherwise at rates to be fixed by the Secretary of Commerce without regard to the Classification Act of 1949; services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a), at rates for individuals not to exceed $50 per diem; and additional compensation of Federal employees temporarily detailed for field work under this appropriation; $300,000, to remain available until December 31, 1953. (13 U. S. C. 121–123.)

Estimate 1952, **$300,000**

FUNDS AVAILABLE FOR OBLIGATION

Appropriation or estimate—1952, $300,000.

PROGRAM AND PERFORMANCE

The 1953 censuses of business, transportation, manufacturers, and mineral industries will provide data on the volume of production and trade, the number, size, geographical distribution, and other characteristics of the Nation's business and industrial activity. These funds provide for the initial planning and preparatory work, such as development and pretesting of report forms, establishment of control lists of business firms, and investigation of enumeration problems of types of businesses to be included in these censuses for the first time as a result of Public Law 671, Eightieth Congress. It is planned to furnish industrial concerns with the general inquiries to be covered in the censuses in advance of the census year to assist the reporting companies in furnishing complete and accurate information at the least expense to them.

PROGRAM AND PERFORMANCE

The 1948 census of business, estimated to cost $13,445,136, provides data on the number of establishments, sales, inventories, credit, employment, payroll, and related data on the wholesale, retail, and service trades. Selected data is furnished for each county and for each city of more than 2,500 population. Most of the data will be released during fiscal year 1951 with the entire project scheduled for completion by December 31, 1951.

CIVIL AERONAUTICS ADMINISTRATION

INTRODUCTORY STATEMENT

The Civil Aeronautics Administration provides aeronautical services to the public and industry in the field of civil aviation. These services include controlling air traffic, certifying as to the competency of airmen and airworthiness of aircraft, developing and installing improved aids to air navigation, administering a Federal grant-in-aid program for a national system of airports and related activities including the operation of Washington National Airport.

Salaries and Expenses, Civil Aeronautics Administration—

Salaries and expenses: For necessary expenses of the Civil Aeronautics Administration in carrying out the provisions of the Civil Aeronautics Act of 1938, as amended (49 U. S. C. 401), *the Act of August 8, 1950 (Public Law 670)*, and other Acts incident to the enforcement of safety regulations; maintenance and operation of air navigation facilities and air traffic control; furnishing advisory service to States and other public and private agencies in connection with the construction or improvement of airports and landing areas; and the disposal of surplus airports; including [personal services in the District of Columbia;] hire of aircraft (not exceeding [$420,000] *$395,000*); the operation and maintenance of eighty-five aircraft; [printing and binding] contract stenographic reporting services; fees and mileage of expert and other witnesses; examination of estimates of appropriations in the field; purchase (not to exceed [ten] *twenty-six*, for replacement only) and hire of passenger motor vehicles; *and* purchase and repair of skis and snowshoes; [and salaries and traveling expenses, together with tuition (not to exceed $20,000) and other contractual expenses in connection therewith, of employees detailed to attend courses of training conducted by the Government or other organizations serving aviation; $98,500,000] *$102,800,000*, and the Departments of the Air Force, Army and Navy, are authorized to transfer to the Civil Aeronautics Administration without charge, subject to the approval of the Bureau of the Budget, aircraft (for replacement only), aircraft engines, parts, flight equipment, and hangar, line, and shop equipment surplus to the needs of such Departments: *Provided*, That there may be credited to this appropriation, funds received from States, counties, municipalities, and other public authorities for expenses incurred in the maintenance and operation of airport traffic control towers. (*49 U. S. C. 401–680; 49 U. S. C. 171–184; 50 U. S. C. App. 1622 (g), Convention on International Civil Aviation Treaty, dated Apr. 4, 1947; Act of June 16, 1948, Public Law 647, 80th Cong.; Act of Oct. 1, 1947, Public Law 311, 81st Cong.; Department of Commerce Appropriation Act, 1951.*)

PROGRAM AND PERFORMANCE

This appropriation provides for the major operating programs, including the operation and maintenance of air-navigation facilities serving 65,000 miles of primary air routes and of landing aids at terminal airports; and the enforcement of the civil air regulations promulgated by the Civil Aeronautics Board to insure safety in the manufacture, maintenance, and operation of aircraft.

1. *Operation of Federal airways.*—The Federal airways system is maintained and operated to provide (*a*) radio range stations, markers, homing beacons and light beacons for the safe navigation of aircraft, and instrument landing systems, precision approach radar and approach light lanes to safeguard aircraft landings during adverse weather conditions; (*b*) intermediate landing fields as emergency landing areas between principal airports; (*c*) airport traffic control towers, air route traffic control centers and airport surveillance radar for safe, orderly, and efficient separation of aircraft in flight; (*d*) aeronautical communications stations for collection and dissemination of airway weather information and for two-way communication with aircraft in flight; and (*e*) auxiliary facilities, such as teletype and interphone communication circuits, power plants, monitoring devices, remote receiving and control devices, and operational quarters.

The increase of $5,081,846 proposed for 1952 will provide $2,543,180 to continue on a full-year basis the operation of air navigation facilities authorized for part of the current year and to cover mandatory increases in salary costs for existing personnel, and $1,774,021 to operate facilities which will be commissioned during 1952; and $764,645 for new or expanded services designed to improve the airway system and increase the efficiency and reliability of flight activities.

2. *Aviation safety.*—Inspections and certifications are made of (*a*) aircraft for airworthiness; (*b*) airmen for

Federal Reserve Bank of St. Louis

CIVIL AERONAUTICS ADMINISTRATION—Con.

Salaries and Expenses, Civil Aeronautics Administration—Con.

competency and physical fitness; (*c*) operators of aircraft to insure safe operating practices; and (*d*) air agencies, such as flight and mechanic schools, to insure competency.

3. *Airport development.*—Periodic examinations are made of some 6,400 public, commercial, military, and private airports to gather facility data for planning purposes and for dissemination to the aviation public. Specific examinations are made to ensure compliance with the terms and conditions under which airports have been transferred to cities and other local agencies as surplus to military needs or under which grants of Federal funds or equipment have been made. The program also includes advisory services for airport managers on engineering, operating, and management problems.

4. *Aviation development.*—Programs of aviation education are promoted, information on flight facilities and conditions of flight is published, and the development and adaptation of equipment and aircraft best suited for personal, industrial, and agricultural purposes is encouraged.

5. *General counsel.*—Legal advice and services are provided for all programs administered by the Civil Aeronautics Administration, including the enforcement of laws and rules relating to the administration of the Civil Air Regulations.

6. *Aviation information.*—The Office of Information directs and coordinates the dissemination of information on aviation activities and advises the Administrator on public information policies.

7. *Operation of aircraft.*—A fleet of 85 aircraft is operated to (*a*) flight check air navigation and landing facilities, (*b*) maintain the pilot proficiency of aviation safety agents, and (*c*) provide for necessary air administrative travel. Additional flying time for pilot proficiency training is obtained through the rental of aircraft.

8. *Executive direction.*—Executive direction of all programs within the Civil Aeronautics Administration is provided by the Administrator, assisted by his immediate staff and the regional administrators in 10 regions.

9. *Staff and administrative services.*—Staff assistance in planning and evaluating agency operations and programs and general administrative services are provided by special staff offices in the central office in Washington and in the regional offices.

10. *Interfunctional.*—This activity finances the common services for passenger vehicles, rents and utilities, communications, and office supplies and equipment.

PROGRAM AND PERFORMANCE

This is a program for the construction of a network of airways facilities, including navigation and landing aids, intermediate landing fields, traffic control centers and towers, and communications stations, along the primary air routes and at important airports to improve the safety and reliability of all-weather flight operations. This network extends throughout the continental United States and the Territories and possessions. The 1952 estimate includes new program authorization in the amount of $25,150,000, plus $12,000,000 for liquidation of obligations incurred under prior-year contract authority. Of the amount requested for new program, $17,293,320 is for continuing implementation during 1952 of the common transition system, recommended by the Radio Technical Commission for Aeronautics. This system includes such aids as precision approach and surveillance radar, instrument landing systems, distance measuring equipment, and omni-directional radio ranges. The new program also includes $7,856,680 for the improvement of existing facilities and services, particularly in areas of high traffic density. Work of this type covers projects for (*a*) the relocation, modernization, and improvement of traffic control centers, airport traffic control towers, and communications stations; (*b*) relocation and improvement of existing air navigation and landing aids; and (*c*) maintenance repairs to intermediate landing fields.

PROGRAM AND PERFORMANCE

1. *Development of improved aeronautical facilities through service testing and evaluation.*—The Administration maintains a laboratory for developing, service testing, and evaluating aeronautical devices and instruments. Development work, in general, is confined to the improvement or adaptation to aeronautical needs of products already fabricated. Studies are carried out with respect to aircraft power plants, instruments, and appliances; soil moisture, runway paving, and airport facilities; and air navigation, landing, and traffic control facilities.

2. *Administration.*—This includes executive direction and general housekeeping services.

PROGRAM AND PERFORMANCE

The Washington National Airport is operated by the Administration to provide air terminal facilities for the Nation's Capital and to serve as a model for airport management. In 1952, the airport revenues are expected to total $1,468,850. This represents an estimated increase in revenues of $117,500 resulting from Government ownership of fueling facilities and increased landing fee rates.

PROGRAM AND PERFORMANCE

1. *Grants for construction of airports.*—Grants-in-aid are made to local sponsors for projects at airports which are part of a national airport system capable of meeting the needs of civil aviation and nontactical military air operations. In 1951 work is scheduled on 186 airports.

The appropriation requested for 1952 will permit making grants in the amount of $15,500,000 for 146 airports having a sufficient volume of traffic to warrant the operation of an airport traffic control tower.

In addition, $4,500,000 will be allocated primarily to locations that have been certificated for air transport service but that are now receiving only limited service or no service at all because of inadequate facilities

Maintenance and Operation of Public Airports, Territory of Alaska, Civil Aeronautics Administration—

Maintenance and operation of public airports, Territory of Alaska: For expenses necessary for the maintenance, improvement, and operation of public airports in the Territory of Alaska, as authorized by law (48 U. S. C. 485 c–h); including arms and ammunition; $450,000.

Estimate 1952, **$450,000**

FUNDS AVAILABLE FOR OBLIGATION

Appropriation or estimate—1952, $450,000.

PROGRAM AND PERFORMANCE

Terminal-type airports will be operated by the Administration at Anchorage and Fairbanks, Alaska, to provide adequate facilities for the Territory's civil aviation need in these areas. Construction of the basic facilities at the two airports is expected to be completed prior to July 1, 1951, and a full-year's requirements for operating and maintenance activities are provided in this request.

OBLIGATIONS BY ACTIVITIES

PROGRAM AND PERFORMANCE

This is a program administered by the Air Navigation Development Board, composed of representatives of the Civil Aeronautics Administration and the Department of Defense, for the development of a system of aids to air navigation and traffic control which will meet the common needs of civil aviation and military nontactical air operations. The work involves research, experimentation, and development of new devices required for safety and regularity of flight under all-weather conditions for joint use by civil and military aircraft.

1. *Research and development on airways facilities.*—The program is divided into transition and ultimate phases. The transition program consists primarily of completing the development of several traffic control aids, such as airport time utilization equipment and airport surface detection equipment, on which development is already well advanced and which are planned to be placed in operation by 1953. The ultimate, or long-range, program is scheduled to extend through 1959. It provides for the further development of existing navigation and traffic control aids and the development of new-type aids, requiring extended basic research and the application of the latest scientific discoveries and techniques.

During 1952 activity on transition program projects will be limited primarily to the flight testing and evaluation of prototypes developed under prior year contracts. On the ultimate program, basic development studies will be continued, and development contracts will be let for specific equipments not yet under way.

2. *Administration.*—This activity provides for a small technical staff and the over-all administration of the program.

OBLIGATIONS BY ACTIVITIES

CIVIL AERONAUTICS ADMINISTRATION—Con.

Claims, Federal Airport Act, Civil Aeronautics Administration—Continued

PROGRAM AND PERFORMANCE

Public agencies are reimbursed for the necessary rehabilitation or repair of public airports which have been substantially damaged by Federal agencies. Thirty-three claims have been certified by the Administrator to Congress in the amount of $2,864,130. Rehabilitation work has been completed on 5 airports and is in progress on 21 sites.

OBLIGATIONS BY ACTIVITIES

Rehabilitation and repair of public airports damaged by Federal agencies—1950, $1,900,612; 1951, $963,518.

OBLIGATIONS BY OBJECTS

13 Refunds, awards, and indemnities—1950, $1,900,612; 1951, $963,518.

Total obligations	3,649,243	3,500,000	3,900,000

PROGRAM AND PERFORMANCE

The Civil Aeronautics Board regulates the economic aspects of United States civil air transportation, promulgates safety rules and standards, investigates and analyzes aircraft accidents, and participates in the development of international air transportation.

1. *Economic regulation.*—This activity applies to the regulation of mail, passenger, and property rates, routes and services, trade practices, and carrier agreements. The Board reviews and passes upon requests for changes in rates and existing air routes and services, and prohibits unfair or destructive competitive practices. It approves carrier consolidations, mergers, interlocking relationships, and other agreements affecting the control of American flag carriers. Permits are issued to foreign air carriers for service to the United States. The Board also prescribes accounting systems and investigates and enforces violations of the Civil Aeronautics Act or Board regulations. Economic studies are directed toward improvement of the air-route pattern and the development of airline cost standards.

The conversion of the mail-rate structure to a permanent basis will continue to be a major objective of the Board during 1952. The increased program provides for expansion primarily in the critical areas of mail and commercial rates, routes, and enforcement, in order to handle the work on a more current basis.

2. *Safety regulation.*—This activity involves promulgation of new or amended Civil Air Regulations; the coordination of the Civil Air Regulations with international safety standards and practices; and adjudication of complaints alleging violations of these regulations. In 1952 the Board proposes to speed up its program for revision of the Civil Air Regulations and the integration of United States standards with those adopted by the International Civil Aviation Organization, and to increase its safety enforcement activities.

3. *Accident investigation and analysis.*—The Board investigates civil-aircraft accidents to determine their probable cause; conducts investigations of potential aeronautical hazards; and recommends and institutes accident preventive measures. In 1952 it is proposed to increase the current program of accident-prevention work by a more comprehensive study of the factors which contribute to the cause of accidents and to effect a greater exchange of safety data between the Board, aircraft manufacturers, and aircraft operators.

4. *Executive direction.*—General executive direction, governed by general policies of the Board, is provided by the Chairman, assisted by the Executive Director.

5. *Administration.*—General administrative services are provided for the entire Board. In 1952 it is proposed to establish a fiscal and property-services section in order to strengthen management controls.

OBLIGATIONS BY ACTIVITIES

Description	1950 actual	1951 estimate	1952 estimate
Direct Obligations			
1. Economic regulation	$1,993,316	$1,866,077	$2,077,900

COAST AND GEODETIC SURVEY

Salaries and Expenses, Coast and Geodetic Survey, Department of Commerce—

Salaries and expenses: For expenses necessary to carry out the provisions of the Act of August 6, 1947 (33 U. S. C. 883a–883i), including purchase of not to exceed six passenger motor vehicles, of which four shall be for replacement only; lease of sites and the erection of temporary buildings for tide, magnetic or seismological observations; hire of aircraft; operation, maintenance, and repair of an airplane; extra compensation at not to exceed $15 per month to each member of the crew of a vessel when assigned duties as recorder or instrument observer, and at not to exceed $1 per day for each station to employees of other Federal agencies while making oceanographic observations or tending seismographs; not to exceed $25,000 for services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a); pay, allowances, gratuities, transportation of dependents and household effects, and payment of funeral expenses, as authorized by law, for not to exceed 185 commissioned officers on the active list; and pay of commissioned officers retired in accordance with law; $12,450,000: Provided, That the Departments of the Army, Navy, and Air Force are authorized during the current fiscal year to transfer without reimbursement to the Coast and Geodetic Survey, subject to the approval of the Bureau of the Budget, landing craft, launches, marine engines, electronic equipment, automotive vehicles, parts, equipment, and supplies, excess to the needs of such Departments, which will serve to expedite surveys in Alaska for national defense. (5 U. S. C. 591, 597; 33 U. S. C. 851, 852, 853a–853r, 854–858, 860–865, 870, 873, 874, 883a–883i.)

Estimate 1952, [a] **$12,450,000**

[a] Estimate is for activities previously carried under appropriations as follows:
"Salaries and expenses, departmental" $4,091,750
"Salaries and expenses, field" 6,718,750
"Pay and allowances, commissioned officers" 1,639,500
The amounts obligated in 1950 and 1951 are shown in the schedule as comparative transfers.

FUNDS AVAILABLE FOR OBLIGATION

	1950 actual	1951 estimate	1952 estimate
Direct Obligations			
Appropriation or estimate			$12,450,000
Comparative transfer from—			
"Salaries and expenses, departmental"	$3,840,704	$3,775,000	
"Salaries and expenses, field"	5,935,392	6,125,000	
"Pay and allowances, commissioned officers"	1,379,606	1,465,000	
Total direct obligations	11,155,702	11,365,000	12,450,000
Reimbursable Obligations			
Reimbursements for services performed			137,700
Comparative transfer from—			
"Salaries and expenses, departmental"	176,900	109,900	
"Salaries and expenses, field"	44,975	27,800	
Total reimbursable obligations	221,875	137,700	137,700
Total obligations	11,377,577	11,502,700	12,587,700

PROGRAM AND PERFORMANCE

1. *Surveys and charts for marine and air navigation.*—Hydrographic, topographic, tide, current, magnetic, and aeronautical surveys are made to secure information for nautical and aeronautical charts and tables. Surveys are mainly accomplished through operation of survey ships, tide stations, magnetic observatories, and shore units engaged in inshore hydrographic surveys, obtaining and interpreting aerial photographs for topographic mapping, and field checking aeronautical charts. In 1950, 70,373 miles of water depths were measured and 80,000 will be measured in 1952. In square miles the hydrography completed in 1950 was 25,885 and the estimate for 1952 is 30,000.

Nautical and aeronautical charts and tables are compiled, printed, and distributed. Production of charts and tables is as follows:

CHARTS PRINTED AND DISTRIBUTED

	1950 actual	1951 estimate	1952 estimate
Nautical charts	888,661	1,100,000	1,100,000
Aeronautical and airport and radio facility charts	23,981,372	29,250,000	35,000,000
Special charts	1,610,000	1,800,000	2,000,000
Coast pilots, tide tables, and current tables	99,720	127,000	137,000

2. *Geodetic control.*—Surveys are made to determine latitude and longitude of monumented stations and elevations of bench marks to provide necessary basic data for charting and mapping and for the economical and efficient planning of many engineering projects. The Coast and Geodetic Survey acts as a central agency in providing basic control data for all other Government agencies. Projects are integrated with those of other agencies under priorities established by conference. In 1950, 89,320 square miles of these basic surveys were completed. It is estimated that 85,000 and 100,000 square miles will be surveyed in 1951 and 1952, respectively. The latitudes and longitudes of 6,098 positions were determined in 1950, and the estimate for 1952 is 6,500. The elevations of 4,106 bench marks were determined in 1950, as compared to an estimate for 1952 of 4,500.

3. *Earthquake investigation.*—Earthquakes are investigated to determine their location and severity and to obtain engineering data for the design of earthquake resistive structures. Annually, about 700 earthquakes are located, of which 140 are strong earthquakes accurately located. The Bureau operates 13 seismograph stations and collaborates with 15 universities for the location of distant earthquakes, operates 63 strong-motion stations in the seismic area of the Western States, and field investigates an average of 8 severe earthquakes annually.

4. *Instrument services.*—This activity provides for (*a*) the invention, design, maintenance, storage, and issuance of intricate instruments used in surveying and processing operations, and (*b*) the Bureau's receiving and shipping facilities.

5. *Commissioned officers.*—This activity provides for the pay and allowances of the Bureau's corps of commissioned officers on the active and retired lists. The commissioned corps constitutes a permanent force of engineers which is assigned to the operation of ships engaged in coastal surveys, the direction and execution of other classes of surveys, and administrative and other duties in the Bureau's Washington office.

6. *Administration.*—This activity provides administrative, personnel, accounting, budget, and management services, operation of the Bureau's technical library, and secretarial and clerical services to the Director and his aides.

OBLIGATIONS BY ACTIVITIES

Description	1950 actual	1951 estimate	1952 estimate
Direct Obligations

PROGRAM AND PERFORMANCE

The Bureau participates in the formulation of Government policies affecting domestic and international trade, collects and distributes economic data, and analyzes national business trends.

1. *Analyses of national economic trends.*—Basic indicators of the condition of the national economy and current analyses of business trends are prepared and distributed to the public.

2. *Promotion of industry and trade.*—Information of value to the business community is compiled, analyzed, and disseminated. During 1951 and 1952 this work is being sharply curtailed because trade-promotion programs are being replaced by defense-mobilization activities.

3. *Administration.*—Provision is made for the direction of the policies and supervision of the Bureau's programs.

OBLIGATIONS BY ACTIVITIES

Total obligations	2,061,596	2,220,000	2,130,000

PROGRAM AND PERFORMANCE

The 42 field offices of the Department, located in important industrial and commercial centers of the United States, are the medium through which the information and services of the Department are made available to the business community. These field offices also gather information on local business conditions for the use of the Department and other agencies of Government.

1. *Promotion of industry and trade.*—Foreign-trade services cover all phases of export and import operations, including guidance on regulations and restrictions in effect here and abroad. In domestic trade, assistance and information are provided on Government procurement, marketing and distribution problems, current economic trends, and related matters. A large part of these efforts in 1951 and 1952 is closely related to defense production activities.

2. *Administration.*—Central direction is furnished for the administration of the field offices.

PROGRAM AND PERFORMANCE

Legislative authority for this activity expires on June 30, 1951. Because of the importance of the export control operation in limiting the shipment of strategic items abroad, new legislation will be introduced. Requirements for this program in 1952 are included in the supplemental appropriation "Economic stabilization and allocations," under Funds Appropriated to the President. Expansion of this operation will take place in 1951, with funds made available by a supplemental appropriation estimated at $925,000.

MARITIME ACTIVITIES

Ship Construction, Department of Commerce—

Ship construction: [For new ship construction, including reconditioning and betterment, as authorized by title V of the Merchant Marine Act, 1936 (except for construction of one prototype vessel under title VII of said Act), $35,000,000, of which $30,000,000 is for payment of obligations for new ship construction incurred under authority granted in the Independent Offices Appropriation Act, 1948; and, in addition, the Commission is authorized to enter into contracts for new ship construction in an amount not to exceed $63,000,000: *Provided,* That not to exceed $64,875,000 of the funds and contract authority made available for new ship construction, including reconditioning and betterment, in the Independent Offices Appropriation Act, 1950, shall continue to be available until December 31, 1950: *Provided further,* That no part of this appropriation or contract authorization shall be used (1) to start any new ship construction for which an estimate was not included in the budget for the current fiscal year; or (2) to start any new ship construction the currently estimated cost of which exceeds by 10 per centum the estimated cost included therefor in such budget unless the Director of the Bureau of the Budget specifically approves the start of such ship construction and the Director shall submit forthwith a detailed explanation thereof to the Committees on Appropriations of the Senate and of the House of Representatives; and, as used herein, the term "budget" includes the detailed justification supporting the budget estimates.] *For the payment of obligations incurred on or after July 1, 1946, for ship construction, reconditioning and betterments, pursuant to the Merchant Marine Act, 1936, as amended, and the authority granted under the head "United States Maritime Commission" in the several appropriation acts for the fiscal years 1947, 1948, 1949, 1950, and 1951, $105,000,000: Provided, That the unexpended balance of funds heretofore appropriated for the liquidation of said obligations shall remain available for that purpose until expended.*

[The appropriation and contract authority made available for "Ship construction" by the General Appropriation Act, 1951, shall be available for the purchase or requisition of vessels under authority now or hereafter vested in the Secretary of Commerce.] (*Independent Offices Appropriation Act, 1951; Supplemental Appropriation Act, 1951.*)

PROGRAM AND PERFORMANCE

There is now pending a supplemental request for the reauthorization of fiscal year 1950 and 1951 appropriations and contract authorizations, which would permit the construction of fast national defense-type cargo vessels. It is proposed to initiate this program during fiscal year 1951, and the final number and types of ships to be built are subject to the decision of the Secretary of Commerce, as approved by the President.

SUMMARY OF POSTWAR NEW SHIP CONSTRUCTION PROGRAM

	Estimated cost	Operator	Service	Scheduled completion
Vessels under contract: 1 superliner	[1] $80,000,000	U. S. Lines	North Atlantic.	Apr. 3, 1952
2 passenger-cargo vessels	57,000,000	American Export Lines.	North Atlantic-Mediterranean.	Jan. 10, 1951 Apr. 9, 1951
3 military dependent transports.	[2] 54,750,000			Sept. 15, 1951 Nov. 15, 1951 Jan. 15, 1952
1 cargo prototype	6,600,000			May 15, 1951
Additional contracts contemplated for 1951: fast cargo vessels.	126,063,950			Sept. 1, 1952 Nov. 1, 1952 Jan. 1, 1953 Mar. 1, 1953

[1] Including $4,126,000 to be financed by transfer from the Department of Defense.

PROGRAM AND PERFORMANCE

Operating-differential contracts with United States citizens operating vessels in foreign commerce, provide for payments of the differential between their operating costs and those of competing foreign operators. Payments are based upon the total accrued subsidy cost, less the estimated annual recapturable profits. Subsidy accrual is determined by (1) the cost differentials between United States and competing foreign lines on five major elements of operating costs; (2) the number of vessels subsidized; and (3) the number and duration of voyages during the year by subsidized vessels. Estimated recapturable profits applied as an offset to subsidy accruals represent a contingent liability of the Government for succeeding years to the extent that profits, averaged over the 10-year recapture period of the contract, fall below an average of 10 percent.

3-YEAR COMPARISON OF OPERATING-DIFFERENTIAL SUBSIDY ACTIVITIES

	1950 actual	1951 estimate	1952 estimate
Number of subsidized ships	254	262	264
Number of subsidized voyages	1,371	1,434	1,523
Subsidy accrual	$55,755,000	$60,627,000	$64,606,000
Subsidy withheld	15,967,000	3,242,000	6,969,000
Subsidy payable	39,788,000	57,385,000	57,637,000
Cumulative subsidy withheld	49,398,000	52,640,000	59,609,000

OBLIGATIONS BY ACTIVITIES

Operating-differential subsidies—1950, $5,784,601; 1951, $53,993,040; 1952, $59,347,089.

OBLIGATIONS BY OBJECTS

11 Grants, subsidies, and contributions—1950, $5,784,601; 1951, $53,993,040; 1952, $59,347,089.

Salaries and Expenses, Maritime Activities, Department of Commerce—

Salaries and expenses: For expenses necessary for carrying into effect the Merchant Marine Act, 1936, and other laws administered by the [United States Maritime Commission, $19,903,300] *Federal Maritime Board and the Maritime Administration, $17,610,000,* within limitations as follows:

Administrative expenses, including [personal services in the District of Columbia; printing and binding;] not to exceed $2,000 for newspapers and periodicals; purchase of five passenger motor vehicles, for replacement only; [not to exceed $17,700 for] services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a); not to exceed $1,125 for entertainment of officials of other countries when specifically authorized by the [Chairman; payment of tort claims pursuant to law (28 U. S. C. 2672); and $50,000] *Maritime Administrator; and $152,500* to be available exclusively for ship structure research, testing and models; [$9,271,700] *$8,895,000: Provided,* That the [Maritime Commission] *Maritime Administration* is authorized to dispense with the administrative audit of agents' accounts covering voyages beginning prior to April 1, 1949;

Maintenance of shipyard facilities, [$452,000] *operation of warehouses, and maintenance and operation of terminals, $2,215,000;*

[Operation of warehouses, $436,000;]

Reserve fleet expenses, [$8,978,600] *$6,500,000.*

PROGRAM AND PERFORMANCE

1. *General administrative expenses.*—This activity provides for the general administrative expenses of the Maritime Administration and the Federal Maritime Board. Among the activities carried on are the supervision of the ship construction and operating-differential subsidy programs, regulation of merchant shipping engaged in international trade, headquarters supervision over the reserve fleet and the various marine facilities owned by the Administration, and purchase and sale or charter of Government-owned vessels. Reductions are based upon a decrease in backlog, associated with wartime and postwar operating programs, and with the anticipated completion of several vessels now under construction.

2. *Maintenance of shipyard facilities.*—During 1951, it was necessary to direct maintenance funds to the provision of a security force at the four reserve shipyards. A greater backlog of maintenance has resulted. The 1952 estimate provides for the same maintenance force authorized for 1951, together with $246,000 for major contract repairs, and the continuation of the increased security force.

3. *Operation of warehouses.*—Five domestic warehouses are operated for the storage, receipt, and issuance of materials and equipment for current operations. The immediate availability of vital marine equipment stored in these warehouses proved invaluable in the urgent activation of reserve fleet vessels upon the outbreak of hostilities in Korea.

4. *Reserve fleet expense.*—As a result of the Korean emergency, many vessels have been withdrawn from the reserve fleets for operation or for repairs to place them in stand-by condition. Although present world conditions make it difficult to predict requirements for reserve fleet vessels, it is estimated at this time that by June 30, 1952, the basic preservation of fleet vessels will attain approximately 90 percent of completion; one-half of the recurring preservation schedule for fiscal year 1952 will be performed; and the cathodic method of bottom preservation will be applied to the entire fleet with the exception of a number of vessels in the Mobile, Ala., fleet.

5. *Maintenance and operation of terminals.*—The four Government-owned marine terminals, which are leased to commercial operators, have a substantial backlog of repair and replacement work. The estimate provides for the same maintenance force as in 1951, together with contract repair work costing $326,000. Net revenue for 1952 is estimated to be $622,000.

Total obligations	5,934,994	4,449,570	3,725,800

PROGRAM AND PERFORMANCE

This program is for the training of officers and seamen for service in the United States maritime industry.

1. *Cadet-midshipmen training.*—The Merchant Marine Academy at Kings Point, N. Y., offers a 4-year course of training, including 1 year of active duty at sea, designed to qualify graduates for licenses as merchant marine officers, and for commissions as ensigns in the Naval Reserve. The 1952 estimate provides for uniform and textbook allowances rather than pay to cadets as previously provided. The Academy provides subsistence, quarters, tuition, and medical care of cadets. The new allowances are intended to place these cadets on an approximate parity with midshipmen in the other Naval Reserve officers' training program.

2. *Upgrade and specialist training.*—Upgrade and specialist training for men already in the maritime industry is provided at the Sheepshead Bay, N. Y., and Alameda, Calif., training schools. These estimates make no provision for trainee pay.

3. *Correspondence training.*—The United States Maritime Service Institute provides training to officers and crews at sea by means of correspondence courses.

4. *District training supervisors' and enrolling offices.*—These offices are located at New York, N. Y., New Orleans, La., and San Francisco, Calif. Their functions primarily consist of supervision and instruction of cadet-midshipmen during their year of active duty at sea.

5. *Medical services.*—The United States Public Health Service is reimbursed for doctors, dentists, and nurses detailed to the training stations and for medical supplies furnished. In addition, a program of preventive medicine is carried on for all other maritime activities.

6. *Custodial activity, St. Petersburg, Fla.*—The training of inexperienced seamen at this station was discontinued in March 1950. As in fiscal year 1951, the training station and the training vessel *American Mariner* will continue to be maintained in a custodial status.

7. *Administration.*—This activity provides administration of all phases of the program for training licensed and unlicensed personnel.

OBLIGATIONS BY ACTIVITIES

Description	1950 actual	1951 estimate	1952 estimate
Direct Obligations			
1. Cadet-midshipmen training:			
(a) Kings Point, N. Y.	$2,463,350	$2,444,520	$2,045,900

VESSEL OPERATING FUNCTIONS

Vessel Operating Functions, Maritime Activities, Department of Commerce—

[Vessel operating functions: For expenses (other than administrative expenses) necessary for liquidating the operating functions transferred to the United States Maritime Commission by section 202 of the Naval Appropriation Act, 1947 (60 Stat. 501), $764,760, together with not to exceed $150,000 of the unobligated balance for this purpose contained in the Third Deficiency Appropriation Act, 1949, which latter sum, together with not to exceed $150,000 of the amount herein appropriated, shall be available for liquidation of liens or claims which may take precedence over the Government's preferred mortgage on vessels, and other expenses necessary to protect the Government's interest in vessels sold or chartered: *Provided*, That receipts from such functions during the current fiscal year shall be deposited in the Treasury as miscellaneous receipts.]

[No additional vessels shall be allocated under charter, nor shall any vessel be continued under charter by reason of any extension of chartering authority beyond June 30, 1949, unless the charterer shall agree that the Commission shall have no obligation upon redelivery to accept or pay for consumable stores, bunkers, and slop-chest items, except with respect to such minimum amounts of bunkers as the Commission considers advisable to be retained on the vessel and that prior to such redelivery all consumable stores, slop-chest items, and bunkers over and above such minimums shall be removed from the vessel by the charterer at his own expense.] *(Independent Offices Appropriation Act, 1951.)*

PROGRAM AND PERFORMANCE

This estimate is to provide funds for the payment of claims and the liquidation of other obligations incurred under this appropriation under terms of the Independent Offices Appropriation Act, 1948. This appropriation act provided for a lesser amount of cash than the amount of obligational authority extended for 1948, and additional cash will be required for the liquidation of such obligations during 1952.

[REPAIR OF RESERVE FLEET VESSELS]

Repair of Reserve Fleet Vessels, Department of Commerce—

[For expenses necessary for the repair, activation, and deactivation of vessels of the reserve fleet, $18,000,000; of which not to exceed $310,000 may be transferred to the appropriation "Salaries and expenses" for necessary administrative and warehouse costs without regard to limitations thereon in said appropriation: *Provided*, That this appropriation shall be available for deactivation only of those vessels activated under this appropriation.] (*Supplemental Appropriation Act, 1951.*)

Granted	16,378	18,000	18,000
Renewed	3,573	4,000	4,000
Republished	4,873	2,000	2,000

1. *Legal counsel, appeals, and interferences.*—Legal and quasi-judicial facilities are provided for disposition of patent and trade-mark cases in appeal or interference proceedings within the Office, for representation of the Commissioner before the Federal courts, and for the prosecution of proceedings for disbarment and suspension of attorneys and agents from practice before the Patent Office.

2. *Patent examining operation.*—Patent applications are examined to determine the patentability of claimed inventions. For 1952, disposal of applications is expected to exceed the intake of new applications by a margin of about 26,000. This will permit some further liquidation of the huge backlog of over 200,000 applications awaiting disposal. Continued emphasis will be given to increasing the average per capita production of a more stabilized force of experienced examiners. Workload figures are:

	1950 actual	1951 estimate	1952 estimate
Patents, excluding designs:			
New applications received	69,294	70,000	70,000
Applications disposed of	80,141	87,000	96,000
Applications pending—end of year	219,334	202,334	176,334
Design patents:			
New applications received	7,308	7,000	7,000
Applications disposed of	8,711	9,000	9,000
Applications pending—end of year	10,512	8,512	6,512

Federal Reserve Bank of St. Louis

PATENT OFFICE—Continued

Salaries and Expenses, Patent Office—Continued

3. *Trade-mark examining operation.*—Trade-mark applications are examined to determine the registrability of marks. Processing of applications for renewal and republication of marks is expected to continue on a current basis, with a volume of about 4,000 renewals and 2,000 republications. Workload figures on registrations are:

	1950 actual	1951 estimate	1952 estimate
New applications received	18,755	18,000	18,000
Applications disposed of	22,605	25,000	25,000
Applications pending—end of year	37,730	30,730	23,730

4. *Patent and trade-mark services.*—This activity provides for issuance and publication of patents and trademarks; services pertaining to their sale, distribution, storage, and reproduction; preparation and sale to the public of photographic copies of documents and records; recording of assignments; maintenance of a scientific library and search room; registering patents available for license or sale; and related services to facilitate the examination process or to meet the requirements of agencies and individuals requesting such services. Printing and reproduction of the weekly issue of patents, trade-marks, and the Official Gazette, as required by law, is included. Provision is made in the budget year for additional printing cost incident to increased patent issues.

5. *Executive direction.*—This includes all functions and activities of the office of the Commissioner, who determines policy, prescribes rules of practice, and directs overall operations.

6. *Staff and administrative services.*—This consists of general administrative services for the Patent Office.

BUREAU OF PUBLIC ROADS

INTRODUCTORY STATEMENT

The Bureau of Public Roads administers the Federal-aid highway program for the improvement of primary, secondary, and urban highways, and cooperates with the Forest Service, the National Park Service, and other Federal agencies in the improvement of highways in the national forests, parks, and other Federal areas.

General administrative expenses: [For the employment of persons and means, including rent,] *Necessary expenses of administration, including* advertising (including advertising in the city of Washington for work to be performed in areas adjacent thereto), [printing and binding, purchase of periodicals,] purchase of [one hundred] *ninety-four* passenger motor vehicles *of which ninety are* for replacement only, [health service program as authorized by law (5 U. S. C. 150), and the preparation, distribution, and display of exhibits, in the city of Washington and elsewhere for the purpose of conducting research and investigational studies, either independently or in cooperation with State highway departments, or other agencies, including studies of highway administration, legislation, finance, economics, transport, construction, operation, maintenance, utilization, and safety, and of street and highway traffic control; investigations and experiments in the best methods of road making, especially by the use of local materials; studies of types of mechanical plants and appliances used for road building and maintenance, and of methods of road repair and maintenance suited to the needs of different localities; for] *and the* maintenance and repairs of experimental highways[; for furnishing expert advice on these subjects; for collating, reporting, and illustrating the results of same; and for preparing, publishing, and distributing bulletins and reports; to], *shall* be paid, *in accordance with law,* from [any moneys] *appropriations* available [from the administrative funds provided under the Act of July 11, 1916, as amended (23 U. S. C. 21), or as otherwise provided] *to the Bureau of Public Roads.*

[For] *Of the total amount available from appropriations of the Bureau of Public Roads for general administrative expenses, pursuant to the provisions of section 21 of the Act of November 9, 1921, as amended (23 U. S. C. 21), $100,000 shall be available for* all necessary expenses to enable the President to utilize the services of the Bureau of Public Roads in fulfilling the obligations of the United States under the Convention on the Pan-American Highway Between the United States and Other American Republics[, signed at Buenos Aires, December 23, 1936, and proclaimed September 16, 1937] (51 Stat. 152), [for the continuation of] cooperation with several governments, members of the Pan American Union, in connection with the survey and construction of the Inter-American Highway [as provided in public resolution, approved March 4, 1929 (Public Resolution 104), as amended or supplemented], and for performing engineering service in Pan-American countries for and upon the request of any agency or governmental corporation of the United States[, $100,000 to be derived from the administrative funds provided under the Act of July 11, 1916, as amended or supplemented (23 U. S. C. 21), or as otherwise provided]. (*23 U. S. C. 21; section 6 of the Act of June 29, 1948, 62 Stat. 1105; Department of Commerce Appropriation Act, 1951.*)

Federal-Aid Postwar Highways, Bureau of Public Roads, Department of Commerce—

Federal-aid postwar highways: For carrying out the provisions of the [Federal-Aid Highway Acts of 1944 and 1948 (58 Stat. 838; 62 Stat. 1105)] *Act of July 11, 1916, as amended and supplemented (23 U. S. C. 1–22, 24–105, 107–117),* to remain available until expended, [$385,000,000] *$420,000,000,* which sum is composed of [$263,491,000] *$334,491,000,* the remainder of the amount authorized to be appropriated for the [third postwar] fiscal year [by section 2 of the Federal-Aid Highway Act of 1944] *1950 and* [$115,509,000] *$80,509,000,* a part of the amount authorized to be appropriated for the fiscal year [1950 by section 1 of the Federal-Aid Highway Act of 1948] *1951,* and [$1,828,050] *$3,214,713* and [$4,171,950] *$1,785,287,* the latter sums being for reimbursement of the sums expended for the repair or reconstruction of highways and bridges which have been damaged or destroyed by floods, hurricanes, or landslides, as provided by section [3] *4* of the Act approved [June 18, 1934] *June 8, 1938,* and section 7 of the Act approved July 13, 1943 (23 U. S. C. 13a and 13b). (*Department of Commerce Appropriation Act, 1951.*)

Appropriated 1951, **$385,000,000** Estimate 1952, **$420,000,000**
Appropriated (adjusted) 1951, **$384,950,000**

PROGRAM AND PERFORMANCE

1. *Grants for construction.*—Under the regular Federal-aid program, grants are made to States for the improvement of highways on the Federal-aid primary, secondary, and urban highway systems. In general, grants are matched on an equal basis by State funds. Annual postwar authorizations of appropriations have been provided in the Federal-Aid Highway Acts of 1944, 1948, and 1950, the current level of authorizations being $500,000,000. During 1950 a total of 19,669 miles and 3,007 bridges on the three systems were completed at a cost of $815,374,114, of which $415,375,183 was the Federal share. As of July 1, 1950, work was under contract or plans approved for 21,514 miles and 3,720 bridges estimated to cost $1,265,552,683, of which $626,425,320 were Federal funds.

The funds requested will be used to reimburse the States for the Federal share of the cost of work done on approved projects. The 1952 program of new projects will be restricted to those contributing to the national defense or to meeting essential civilian requirements.

2. *Administration.*—Administrative, engineering, and research expenses are met by deductions of 3¾ percent from the Federal-aid authorizations. Highway research is carried out independently as well as in cooperation with State highway departments.

Elimination of Grade Crossings, Bureau of Public Roads, Department of Commerce—

Elimination of grade crossings: For the elimination of hazards to life at railroad grade crossings, [including the separation or protection of grades at crossings, the reconstruction of existing railroad grade-crossing structures, and the relocation of highways to eliminate grade crossings,] to remain available until expended, [$4,600,000] *$5,211,925*, which sum is a part of the amount authorized to be appropriated for the fiscal year 1943 by section 5 of the Act approved September 5, 1940 (54 Stat. 869): *Provided, That the amounts authorized for the elimination of grade crossing hazards by said section and apportioned to Hawaii are hereby reduced by $188,075. (Department of Commerce Appropriation Act, 1951.)*

Appropriated 1951, **$4,600,000** Estimate 1952, **$5,211,925**

FUNDS AVAILABLE FOR OBLIGATION

	1950 actual	1951 estimate	1952 estimate
Appropriation or estimate		$4,600,000	$5,211,925
Applied to contract authorization		−4,600,000	−5,211,925
Prior year balance available (contract authorization)	$7,351,163	3,369,397	188,075
Total available for obligation	7,351,163	3,369,397	188,075
Balance available in subsequent year (contract authorization)	−3,369,397	−188,075	
Contract authorization not required for obligation			−188,075
Total obligations	3,981,766	3,181,322	

PROGRAM AND PERFORMANCE

New projects for the elimination of hazards at grade crossings are now undertaken as part of the regular Federal-aid program. The 1952 estimate represents the unappropriated balance of authorizations made in prior years and will be used to reimburse States for the cost of work done. Hazards at some 5,500 grade crossings have been eliminated at a cost of approximately $200,000,000.

OBLIGATIONS BY ACTIVITIES

Grants for construction for eliminating grade crossing hazards—1950, $3,981,766; 1951, $3,181,322.

OBLIGATIONS BY OBJECTS

11 Grants, subsidies, and contributions.—1950, $3,981,766; 1951, $3,181,322.

PROGRAM AND PERFORMANCE

1. *Construction of forest highways.*—The Bureau provides for the survey, construction, reconstruction, and maintenance of national forest highways. Principal forest highways are on the Federal-aid and State highway systems. Projects are jointly selected by the States, the Forest Service, and the Bureau on the basis of their contribution to the national defense or to essential civilian requirements, especially the production of timber. During 1950 a total of 541 miles was completed at a cost of $20,181,365. Work under construction or for which plans were approved at the beginning of fiscal year 1951 provided for improving 841 miles, involving $34,359,132 of forest-highway funds.

The 1952 program provides for approximately the same level of construction as in 1950 and as planned for 1951; it will exceed the current annual authorization of $20,000,000 because of the availability of prior-year funds.

2. *Administration.*—Provision is made for general administration, supervision, and planning.

3. *Forest Service administration.*—Transfers are made to the Forest Service to cover its administrative cost under the forest-highway program.

OBLIGATIONS BY ACTIVITIES

Description	1950 actual	1951 estimate	1952 estimate

Tongass Forest Highways, Alaska, Bureau of Public Roads, Department of Commerce—

Tongass Forest Highways, Alaska: For surveys, construction, reconstruction, and maintenance of Tongass forest highways in Alaska in accordance with the provisions of section 3 of the Federal-Aid Highway Act of 1950, $3,500,000, to remain available until expended.

Estimate 1952, **$3,500,000**

FUNDS AVAILABLE FOR OBLIGATION

Appropriation or estimate—1952, $3,500,000.

PROGRAM AND PERFORMANCE

This program provides for the improvement of forest highways in the Tongass National Forest area in Alaska to meet the needs of new industries, particularly plants for wood pulp production. A supplemental estimate for 1951 of $3,500,000 has also been included in the budget for the first stages of the work.

OBLIGATIONS BY ACTIVITIES

Construction of forest highways in Alaska—1952, $3,500,000.

PROGRAM AND PERFORMANCE

1. *Construction of the Inter-American Highway.*—Work is to be continued on the survey and construction of the Inter-American Highway in cooperation with the Central-American countries. A supplemental estimate of $4,000,000 for 1951 has been submitted to permit resumption of work in each country. Special emphasis in 1951 and 1952 will be directed toward eliminating impassable gaps.

The following tabulation shows the present status of the highway:

	Miles	Percent
Paved mileage	524	33
All-weather mileage	800	50
Dry-weather mileage	42	2
Impassable mileage	239	15
Total	1,605	100

2. *Administration.*—A small staff is maintained in Washington and in each of the Central-American countries.

Access Roads (Act of September 7, 1950)—

FUNDS AVAILABLE FOR OBLIGATION

Contract authorization—1951, $2,000,000.

PROGRAM AND PERFORMANCE

The Federal-Aid Highway Act of 1950 authorized $10,000,000 for access roads to national defense establishments under the provisions of the Defense Highway Act of 1941. The access road program of World War II of approximately $290,000,000, including $272,000,000 of Federal funds, has been completed. With increased emphasis on national defense, the existing roads to some defense facilities require improvement, and a supplemental estimate for 1951 of $5,000,000 has been included in the budget for this purpose. Projects must be certified as important to the national defense by the Secretary of Defense.

OBLIGATIONS BY ACTIVITIES

Construction of access roads—1951, $2,000,000.

OBLIGATIONS BY OBJECTS

11 Grants, subsidies, and contributions—1951, $2,000,000.

GENERAL PROVISIONS—BUREAU OF PUBLIC ROADS

[In carrying out the provisions of "An Act to provide that the United States shall aid the States in the construction of rural post roads, and for other purposes", as amended and supplemented (23 U. S. C. 1–117), none] *None* of the money appropriated for the work of the Bureau of Public Roads during the current fiscal year shall be paid to any State on account of any project on which convict labor shall be employed, [except] *but* this provision shall not apply to [convict] labor performed by convicts on parole or probation[: *Provided*, That during].

During the current fiscal year[, whenever performing] authorized engineering or other services in connection with the survey, construction, and maintenance, or improvement of roads *may be performed* for other Government agencies, cooperating foreign countries and State cooperating agencies [the charge] *and reimbursement* for such services (*which* may include depreciation on engineering and road-building equipment used[, and the amounts received on account of such charges]) shall be credited to the appropriation concerned[: *Provided further*, That during].

During the current fiscal year [the] appropriations for the work of the Bureau of Public Roads shall be available for [meeting the] expenses of warehouse maintenance and the procurement, care, and handling of supplies, materials, and equipment [stored therein] for distribution to projects under the supervision of the Bureau of Public Roads, [and] *or* for sale [and for] *or* distribution to other Government activities, cooperating foreign countries and State cooperating agencies, *and* the cost of such supplies and materials or the value of such equipment (including the cost of transportation and handling) [to] *may* be reimbursed to *current applicable* appropriations [current at the time additional supplies, materials, or equipment are procured, from the appropriation chargeable with the cost or value of such supplies, materials, or equipment: *Provided further*, That the appropriations available].

Appropriations to the Bureau of Public Roads may be used in emergency for medical supplies and services and other assistance necessary for the immediate relief of employees engaged on hazardous work under that Bureau, and for temporary services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a), but at rates for individuals not in excess of [$50], *$100* per diem[: *Provided further*, That not to exceed $3,000,000, to be derived from the administrative funds provided under the Act of July 11, 1916, as amended or supplemented (23 U. S. C. 21), shall be available until expended for continuing the construction of a laboratory, on a site already acquired, for permanent quarters for the testing and research work of the Bureau of Public Roads]. (*23 U. S. C. 1–117; Department of Commerce Appropriation Act, 1951.*)

PROGRAM AND PERFORMANCE

This program provides for administration of the National Bureau of Standards, including maintenance and operation of its physical plant, and improvements thereto.

1. *Administration.*—This activity consists of the Office of the Director, and budget, accounting, management, personnel, and other administrative services.

2. *Maintenance and operation of buildings and grounds.*—The Bureau's physical plant includes 20 major and numerous minor laboratory buildings within an area of 68 acres. Maintenance and operation includes costs of maintenance, repair, and protection of buildings and grounds, and operation of the power plant.

3. *Alterations and improvements.*—This activity provides for costs of construction and other work required to effect necessary improvements in the Bureau's facilities. The 1952 estimates include an amount of $275,000 for continuation of the work of rehabilitating and modernizing the Bureau's plumbing and heating system.

PROGRAM AND PERFORMANCE

1. *Fundamental research.*—Investigations of fundamental physical phenomena are conducted, and physical constants and properties of materials are determined when such data are of great importance to scientific or manufacturing interests.

2. *Applied research.*—Fundamental scientific knowledge is applied to develop more effective use of new scientific and technological processes, materials and equipment. The properties and processing characteristics of industrial materials, structures, equipment and commodities are determined. Investigations are made of fundamental physical phenomena arising in connection with development of specific technical devices.

3. *Development.*—Standards of measurement, instruments, instrumentation techniques, methods of measurement and analysis, and commodity testing techniques are developed. New testing devices, and special devices for national defense and for improvement of technical operations of Federal agencies are designed and constructed. Materials and technological processes in fields of importance to national welfare and defense are developed. The Bureau also has custody of the national standards of measurement, and it compares standards used in scientific investigations, engineering, manufacturing, commerce and educational institutions with standards adopted or recognized by the Government.

4. *Testing, calibration and specifications.*—This activity provides for calibration of instruments, preparation of standard samples, analyses of substances and similar services related to the standards of physical measurement; formulation of specifications and standards for commodities and equipment; acceptance and surveillance testing of commodities, materials and equipment for the Federal Government; and technical investigative and advisory services related to regulatory or judicial functions of governmental agencies.

5. *General services.*—A number of general services are performed for other government agencies, including compilation and dissemination of scientific and technical data; production of substances and materials for specific needs in the Federal Government; and operation of special technical installations and services.

PROGRAM AND PERFORMANCE

The Central Radio Propagation Laboratory conducts research on the propagation of radio waves of all frequencies; develops methods and techniques for applying the results of this research to practical problems; provides a center of information and consulting services on radio wave propagation problems for all other Government agencies; and develops, maintains, and provides calibration services for the national primary standards of measurement of all electrical quantities at all radio frequencies.

1. *Fundamental research.*—This research activity is concerned with the fundamental physics of the atmosphere and effects of solar and cosmic radiation on it insofar as these phenomena affect radio propagation. The long range improvement of radio communication is critically dependent upon progress in this phase of the program.

2. *Applied research.*—This activity is concerned primarily with the improvement of techniques for the prediction of maximum usable frequencies for radio sky-wave transmission and the improvement of standards, instruments, and measurement methods in the entire radio frequency range.

3. *Development.*—This activity is concerned with the development of equipment and standards for the precise measurement of electrical quantities at radio frequencies and with the development of equipment, systems, and techniques useful for improvement of radio communication at all frequencies.

4. *Testing, calibration, and specifications.*—This activity provides for the calibration of instruments against the national standards of measurement in this field.

5. *General services.*—This activity is concerned with the collection of data on propagation of radio waves from all parts of the world, both from the Bureau's own field stations and from those of other cooperating laboratories, and with the analysis and dissemination of these data for prediction of radio propagation conditions. It also includes the provision of consultative services to other Government agencies, especially the Department of Defense.

struction and equipping of a radio laboratory, and a guided-missiles laboratory. Construction of these buildings was authorized at a cost of $4,475,000 for the radio laboratory, and $1,900,000 for the guided-missile laboratory. An appropriation of $500,000 was provided for fiscal year 1951 to provide for the cost of drawing plans and specifications, and contract authorization of $5,675,000 was provided to permit the awarding of contracts for construction and equipping of the buildings. The appropriation of $3,915,000 is proposed for liquidation of obligations incurred in 1951 for the construction and equipping of the radio laboratory building.

PROGRAM AND PERFORMANCE

The Deficiency Appropriation Act of 1950 (Public Law 583, approved June 29, 1950) appropriated the sum of $3,000,000 for the establishment of a working capital fund at the National Bureau of Standards. The amount of this appropriation was deposited in a special deposit account, and the activities in this act are set forth herein under the appropriation title "Working capital fund, National Bureau of Standards."

PROGRAM AND PERFORMANCE

The sum of $3,000,000 was appropriated in fiscal year 1950 (Public Law 583, approved June 29, 1950) for the establishment of a working capital fund at the National Bureau of Standards. This fund is reimbursed from applicable appropriations of the Bureau for work done for the National Bureau of Standards and from funds of other Government agencies for facilities and services furnished to such agencies. Reimbursements include handling and related charges, reserves for depreciation of equipment, accrued leave, building construction, and alterations directly related to the work for which reimbursement is made.

PROGRAM AND PERFORMANCE

The Weather Bureau collects and disseminates weather information and issues forecasts and warnings of weather conditions over all United States territory and waters.

1. *General weather services.*—A network of observational stations is maintained on land and ocean ships, and a continuous weather watch is carried out along and adjacent to the civil airways for the primary purpose of providing up-to-the-minute flight weather intelligence. Also, several thousand part-time cooperative stations observe temperature, precipitation, and river stages daily.

In addition to weather forecasts and warnings for the general public, field offices and stations of the Weather Bureau issue hurricane forecasts and warnings for the Gulf and Atlantic coasts and storm warnings for ocean and Great Lakes shipping; furnish weather briefings for aircraft pilots and regular forecasts of aviation weather along domestic and international air routes; provide fire-weather forecasts and warnings for fire-control and forest conservation agencies; and maintain a continuous watch of river stages over the country in order to forecast flood

WEATHER BUREAU—Continued

Salaries and Expenses, Weather Bureau, Department of Commerce—Continued

conditions and to collect information required in planning, constructing, and operating dams, locks, and reclamation or irrigation projects. The weather data obtained from all sources provide the necessary statistical basis for meteorological research, climatological studies and services, and hydrologic studies and analyses.

Information on present weather is collected and disseminated to the public and special users of weather data, and information on past weather is described in comprehensive statistical summaries and digests made available through various Weather Bureau publications.

Cooperative international exchange of standardized weather data is obtained both through bilateral negotiations and the International Meteorological Organization. These exchanges assist in forecasting storms and cold waves that affect the United States and in providing service for ocean vessels and aircraft in international operations.

The increased program for 1952 will provide in the main for establishment of four new field stations and additional staff and equipment for international aviation weather forecasting, weather service in the Pacific trust territories, Arctic operations, and upper-air soundings over the ocean.

2. *Research.*—This activity is directed mainly to applied research and development of improved methods for forecasting of weather events and trends. Some exploration and experimentation is directed to physical principles governing meteorological phenomena. In order to provide a more comprehensive foundation for research and a basic tool for forecasting, the historical series of daily Northern Hemisphere weather maps will be extended and published in 1952.

3. *Administration.*—Executive direction, staff work, and administrative services are performed in Washington and five regional offices in the field.

Bulk	1,869,334	1,983,000	1,986,000
North-bound	1,543,891	1,632,000	1,637,000
South-bound	1,097,503	1,181,000	1,186,000
Cargo ton miles	2,375,627,677	2,488,247,000	2,497,057,000
Railroad tonnage	1,173,891	1,399,000	1,404,000
Net loss	$785,637	$534,100	$740,300

PURPOSE AND FINANCIAL ORGANIZATION

The chief purpose of the Inland Waterways Corporation is to demonstrate the feasibility of water transportation on the inland rivers and to extend the benefits of this service to the public. In addition to the officers appointed by the Secretary of Commerce, the Corporation has an advisory board consisting of a chairman and six recognized business leaders selected for 5-year terms by the Secretary of Commerce. The bylaws of the Corporation provide that each of the members shall represent one of the several sections of the country served by the Inland Waterways Corporation. The Corporation originally had an authorized capital of $5 million. In 1928, this was increased to $15 million. Paid-in surplus of $12,298,165 represents the appraised value of equipment and facilities transferred to the Corporation when it was chartered. (49 U. S. C. 151–153.)

ANALYSIS OF BUDGET PROGRAMS

Budgetary requirements of the Corporation vary markedly with the effect produced on revenues and operating plans by the usual hazards and uncertainties of water transportation. Ice conditions, floods, and high and low water are some of the natural unpredictable factors encountered, for example, while the poor condition of floating and terminal equipment, freight-car shortages, and work stoppages also disrupt operating plans and reduce revenues.

The budget program of the Corporation for fiscal year 1952 consists of (1) common carrier operations, (2) capital replacements, and (3) lending activities. The level at which the various activities of the Corporation are projected for fiscal years 1951 and 1952 represents an increase over that of 1950.

Common carrier operations.—The Corporation, operating under the trade name Federal Barge Lines, provides the most complete common carrier barge service offered on the Mississippi, Illinois, Missouri, and Warrior Rivers. All types of freight, except livestock and perishables, are transported on 3,300 miles of inland rivers with 21 towboats and 264 barges. Operations are conducted through numerous private terminals as well as through 21 general merchandise facilities. A railroad switching facility operating between Port Birmingham and Ensley, Ala., provides a connecting link between the Corporation's facilities and the trunk-line railroads serving the Southeast.

In September 1950, a new and greatly improved service was inaugurated on a trial basis between New Orleans, St. Louis, and Chicago in order to provide merchandise shippers with a fast and dependable schedule. This

Federal Reserve Bank of St. Louis

INLAND WATERWAYS CORPORATION—Continued

service, which will utilize the integrated tow and conventional steamboat and barges, is expected not only to increase greatly the flow of merchandise and package freight but also to furnish a very effective comparison of the merits of integrated operation versus conventional operation.

The operations of the Corporation are divided into two water-line segments, the Mississippi system and Warrior division, and the railroad switching facility. The budget estimates for 1952 are based on an anticipated water-line tonnage of 2,823,000 single-count tons, of which 2,690,000 tons will be handled on the Mississippi system and 133,000 tons on the Warrior division. These estimates represent an increase of 181,606 tons over the tonnage transported in 1950. Railroad traffic is estimated to reach 1,404,000 tons.

Merchandise traffic in 1950 reached the highest level since 1942 and is estimated to rise further to 837,000 tons in 1952, of which 747,000 tons will be carried on the Mississippi system and 90,000 tons on the Warrior division. Bulk traffic in 1950 continued to move in tonnage equaling the capacity of the Corporation's equipment. Bulk tonnage is estimated to be 1,986,000 tons in 1952. The Mississippi system is allocated 1,943,000 tons and the Warrior division 43,000 tons. Railroad traffic is estimated to be 1,404,000 tons in 1952, or 230,109 tons more than in 1950, due primarily to the anticipated increase in import ore and steel products. Water-line revenue freight tonnage shown below, by divisions, contains duplications inasmuch as some traffic moves over more than one division.

Division	1950 actual	1951 estimate	1952 estimate
	Tons	*Tons*	*Tons*
Lower Mississippi River	2,055,738	2,018,387	2,025,336
Upper Mississippi River	447,517	616,811	617,550
Illinois River	864,506	994,687	997,260
Missouri River	100,662	96,624	97,110
Warrior River	99,518	131,000	133,000
Railroad	1,173,891	1,399,000	1,404,000

Based on single-count tonnage estimates, total income for fiscal year 1952 will average $3.99 per ton, as compared with $3.98 per ton in 1951 and $3.72 per ton in 1950. Expenses averaged $3.98 per ton in fiscal year 1950, and are estimated at $4.17 per ton in 1951 and $4.25 per ton in 1952.

The decision of the Interstate Commerce Commission in the long-contested joint barge-rail rate case has been appealed by the railroads to the Supreme Court. Should the Court sustain the Interstate Commerce Commission's decision, it is expected that there will be an even greater increase in tonnage of merchandise traffic than has been experienced in the past 4 years.

Capital replacements.—Since all of the capital stock authorized has been subscribed, the Corporation is entirely dependent on funds derived from operations, which precludes necessary large-scale capital improvements. Limited replacements of deteriorated barge equipment are contemplated.

Capital expenditures in 1950 for barges, barge equipment, and improvements to shop and store facilities, totaled $961,509. Estimates for 1951 and 1952 anticipate the expenditure of $1,500,000 and $1,000,000, respectively, to be used primarily for new barges. In February 1950, 12 barges were ordered, which will provide a completely integrated operation with sufficient turn-around capacity and will be used in the recently inaugurated express service. However, a much larger replacement has been made necessary by the complete or partial condemnation of 119 barges for cargo insurance which represents 45 percent of the barge equipment owned by the Corporation. This factor, together with the increasingly higher maintenance costs, precludes profitable operation of a common-carrier service.

Lending activities.—The Corporation is authorized to make loans to States, municipalities, and transportation companies that will contribute to the improvement of transportation facilities along the inland waterways (49 U. S. C. 141). On June 30, 1950, one loan of $92,247 was outstanding to the board of commissioners, port of New Orleans, a State authority. No new loans are contemplated during fiscal years 1951 and 1952.

Administrative expenses.—The Corporation is subject to the regulations of the Interstate Commerce Commission. Administrative expenses for water and railroad operations are those set forth under the title "General expenses" in the Commission's uniform system of accounts for carriers by water.

Administrative expenses in fiscal year 1952 are estimated to be $481,200, as compared with $492,200 and $427,163 in fiscal years 1951 and 1950, respectively.

Financial Review

It is anticipated that $1 million will be spent from the general fund of the Treasury to increase the outstanding capital stock of the Corporation in 1951. No expenditures from the Treasury are forecast in 1952.

In 1950, the Corporation's gross operating income was $9,822,177, and it is expected to be $11,187,900 in 1951 and $11,264,000 in 1952. These increases represent anticipated higher transportation revenues through increased merchandise traffic and additional cargo capacity provided by new barges. Expenses and losses of $10,607,814 in 1950 applied to income resulted in a loss of $785,637. In 1951, expenses estimated at $11,722,000 are expected to result in losses of $534,100. Losses of $740,300 in 1952, with expenses of $12,004,300, are forecast. The major portion of these increased expenses is occasioned by higher transportation, maintenance, and depreciation costs, as well as rising insurance expenses due to the condition of the barges, which leads to increased damage claims.

Despite operating economies effected, profitable operation appears unlikely unless modern equipment is provided in the immediate future. Until additional capital stock is authorized, no appropriation can be secured to replace deteriorated equipment. Continued lack of a large-scale rehabilitation program will eventually lead to curtailment and suspension of service on segments of the system.

The Government's investment in the Corporation consists of capital stock, property transferred without reimbursement, and the accumulated deficit from operations. The total investment on June 30, 1950, was $11,910,492 and is anticipated to be $12,376,392 and $11,636,092 by June 30, 1951, and 1952, respectively.

PROPOSED FOR LATER TRANSMISSION

Land acquisition, additional Washington airport, Civil Aeronautics Administration.—Of the estimated requirement of $2,150,000 for the acquisition of land for an additional airport in the vicinity of Washington, D. C., $1,000,000 has already been appropriated. The budget includes the balance of $1,150,000 as an anticipated supplemental for 1951.

Claims, Federal Airport Act, Civil Aeronautics Administration.—The Federal Airport Act authorizes reimbursements to local public agencies for the rehabilitation or repair of public airports which have been substantially damaged by Federal agencies. Supplemental appropriations of $3,600,000 and $4,400,000 for 1951 and 1952, respectively, are anticipated for this purpose.

Tongass Forest highways, Alaska, Bureau of Public Roads.—The Federal-Aid Highway Act of 1950 authorized $3,500,000 annually for 1951 and 1952 for improvement of roads in the Tongass National Forest. These roads are essential to the development of timber resources in this area. A supplemental appropriation for 1951 for the authorized amount is anticipated in order to get this work under way.

Public lands highways, Bureau of Public Roads.—A supplemental estimate for 1951 of $2,500,000 is anticipated for the liquidation of obligations incurred pursuant to contract authorization of this amount provided in the Federal-Aid Highway Act of 1950. Public lands highways projects cover sections of routes, principally on the Federal-aid system, which the States with large areas of public lands are unable to finance.

Marine war risk insurance revolving fund, maritime activities.—A supplemental appropriation of $10,000,000 is anticipated for 1951 to provide working capital for the revolving fund created under the terms of Public Law 763 (81st Cong.). This act authorizes the Secretary of Commerce to issue marine war risk insurance and reinsurance when he finds that such insurance cannot be obtained from private underwriters under reasonable terms and conditions.

CIVIL FUNCTIONS, DEPARTMENT OF THE ARMY
QUARTERMASTER CORPS

CEMETERIAL EXPENSES

Cemeterial Expenses, Department of the Army—

Cemeterial expenses: For maintaining and improving national cemeteries, including personal services and fuel for superintendents; purchase of [grave sites] *land, as authorized by law; purchase of three passenger motor vehicles, of which two shall be for replacement only*; maintenance of the Arlington Memorial Amphitheater, chapel, and grounds in the Arlington National Cemetery, and that portion of Congressional Cemetery to which the United States has title and the graves of those buried therein, including Confederate graves, and the burial site of Pushmataha, a Choctaw Indian chief; repair to roadways but not to more than a single approach road to any national cemetery; for headstones or markers for unmarked graves [of members of the armed forces] under the Act of July 1, 1948 (24 U. S. C. 279a, b)[, and civilians interred in post cemeteries]; for maintenance of monuments, tablets, roads, fences, and so forth, made and constructed by the United States in Cuba and China to mark the places where American soldiers fell; maintenance of the Confederate Mound in Oakwood Cemetery at Chicago, the Confederate Stockade Cemetery at Johnstons Island, the Confederate burial plats owned by the United States in Confederate Cemetery at North Alton, the Confederate Cemetery, Camp Chase, at Columbus, the Confederate Cemetery at Point Lookout, and the Confederate Cemetery at Rock Island; and for maintenance of graves used by the Army for burials in commercial cemeteries; [$5,000,000] *$4,485,000*: *Provided*, That no railroad shall be permitted upon any right-of-way which may have been acquired by the United States leading to a national cemetery, or to encroach upon any roads or walks constructed thereon and maintained by the United States: *Provided further*, That no part of this appropriation shall be used for repairing any roadway not owned by the United States within the corporate limits of any city, town, or village: *Provided further, That this appropriation shall not be obligated for construction of a superintendent's lodge or family quarters at a cost per unit in excess of $14,000, but such limitation may be increased by such additional amounts as may be required to provide office space, public comfort rooms, or space for the storage of Government property within the same structure.* (*24 U. S. C. 271, 273, 274–276, 278, 283, 288, 290; Civil Functions Appropriation Act, 1951.*)

Appropriated 1951, **$5,000,000** Estimate 1952, [a] **$4,485,000**

[a] Includes $425,000 for activities previously carried under "Salaries, Department of the Army," Office of the Quartermaster General. The amounts obligated in 1950 and 1951 are shown in the schedule as comparative transfers.

Total obligations	4,732,926	5,358,374	4,485,000

PROGRAM AND PERFORMANCE

1. *Procurement of headstones.*—It is planned to procure about 77,500 headstones in fiscal year 1952 at an average price slightly lower than last year. Requirements in 1952 compare to 92,500 headstones in 1951 and 85,762 headstones in 1950. Requirements for 1952 include 2,300 applications carried over from 1951.

2. *Construction and acquisition of land.*—In addition to acquisition of 20 acres for expansion of Fort Gibson Cemetery, it is contemplated to provide for replacement of obsolete small structures and for construction of additions to storage and administrative space, including the replacement of one set of superintendent's living quarters.

3. *Maintenance and utilities.*—Provision is made for electric, water, and gas service; for maintenance under contract of 4 national cemeteries, 18 soldier's lots, and 8 Confederate cemeteries; and for contractual maintenance of vehicles and power equipment. Contractual buildings and grounds maintenance that cannot be done by cemetery caretaker forces is included.

4. *Operating expenses, including interments.*—These expenses are for 86 national cemeteries containing 3,400 acres. Total acreage will be 3,420 at end of 1952. On June 30, 1950, there were 527,531 grave sites occupied. Additional burials are estimated at 15,300 for 1951 and 15,800 for 1952.

5. *Administration.*—Provision is made, within the Office of the Quartermaster General, for the staff necessary for interdepartmental coordination of policies and procedures in development and operation of national cemeteries. The staff also provides technical supervision for the establishment, operation, and maintenance of cemeteries, together with the procurement of Government headstones and markers for graves.

PROGRAM AND PERFORMANCE

Of total fatalities from World War II numbering 358,967, it is estimated that the remains of 281,000 will be recovered and 77,967 cannot be recovered. More than 280,500 remains have been recovered and final disposition has been completed on 278,155. Approximately 500 remains will be on hand for disposition between June 30, 1951, and December 31, 1951, the date of the program's completion.

CORPS OF ENGINEERS

INTRODUCTORY STATEMENT

The Corps of Engineers, under the supervision of the Secretary of the Army, is responsible for maintenance and improvement of the rivers and harbors of the Nation in the interest of navigation, control of floods, related hydroelectric power development, and allied water uses. Its responsibilities include the planning, construction, and operation of the projects under its jurisdiction. The corps is also responsible for the protection and preservation of the navigable waters.

RIVERS AND HARBORS AND FLOOD CONTROL

The following appropriations for rivers and harbors and flood control shall be expended under the direction of the Secretary of the Army and the supervision of the Chief of Engineers, and shall remain available until expended: *Provided,* That *not to exceed $1,675,000 shall be available for the current fiscal year from such appropriations for* the services of such [additional technical and clerical] *civilian* personnel as the Secretary of the Army may deem necessary [may] *to* be employed [only] in the Office of the Chief of Engineers, to carry into effect the various appropriations for rivers and harbors and flood control, surveys, and preparation for and the consideration of river and harbor and flood-control estimates and bills[, to be paid from such appropriations: *Provided further,* That the expenditures on this account for the current fiscal year shall not exceed $1,525,000]: *Provided further,* That the various appropriations for rivers and harbors and flood control may be used for the purchase (for replacement only) in the current fiscal year of three hundred and [fifty] *seventeen* passenger motor vehicles and [one motorboat] *two motorboats* (to be acquired from surplus stock where practicable) and the [purchase (not to exceed one, to be acquired from surplus stock where practicable),] maintenance, repair, and operation of aircraft[: *Provided further,* That the various appropriations for rivers and harbors and flood control shall be available for payments to school districts as authorized by law]. (*Civil Functions Appropriation Act, 1951.*)

RIVERS AND HARBORS

Maintenance and Improvement of Existing River and Harbor Works—

Maintenance and improvement of existing river and harbor works: For *expenses necessary for* the preservation and maintenance of existing river and harbor works, and for the prosecution of such projects heretofore authorized as may be most desirable in the interests of commerce and navigation; for surveys of northern and northwestern lakes and other boundary and connecting waters as heretofore authorized, including the preparation, correction, printing, and issuing of charts and bulletins, and the investigation of lake levels; for prevention of obstructive and injurious deposits within the harbor and adjacent waters of New York City; for expenses of the California Débris Commission in carrying on the work authorized by the Act approved March 1, 1893, as amended (33 U. S. C. 661, 678, and 683); for removing sunken vessels or craft obstructing or endangering navigation as authorized by law; for operating and maintaining, keeping in repair, and continuing in use without interruption any lock, canal (except the Panama Canal), canalized river, or other public works for the use and benefit of navigation belonging to the United States; for payment annually of tuition fees of not to exceed [seventy-six] *one hundred* student officers of the Corps of Engineers at civil technical institutions under the provisions of section 127a of the National Defense Act, as amended (10 U. S. C. 535); for examinations, surveys, and contingencies of rivers and harbors; for the execution of detailed investigations and the preparation of plans and specifications for projects heretofore authorized; for examination of estimates of appropriations in the field; for [printing and binding and office supplies and equipment required in the Office of the Chief of Engineers to carry out the purposes of this appropriation, including such] printing, either during a recess or session of Congress, of surveys authorized by law, and such surveys as may be printed during a recess of Congress shall be printed, with illustrations, as documents of the next succeeding session of Congress; [$198,811,500] *$220,240,000*: *Provided,* That no part of this appropriation shall be expended for any preliminary examination, survey, project, or estimate not authorized by law: *Provided*

CORPS OF ENGINEERS—Continued

RIVERS AND HARBORS—continued

Maintenance and Improvement of Existing River and Harbor Works—Continued

further, That from this appropriation the Secretary of the Army may, in his discretion and on the recommendation of the Chief of Engineers based on the recommendation by the Board of *Engineers for* Rivers and Harbors in the review of a report or reports authorized by law, expend such sums as may be necessary for the maintenance of harbor channels provided by a State, municipality, or other public agency outside of harbor lines and serving essential needs of general commerce and navigation, such work to be subject to the conditions recommended by the Chief of Engineers in his report or reports thereon: *Provided further,* That not to exceed $5,000 of the amount herein appropriated shall be available for the support and maintenance of the Permanent International Commission of the Congress of Navigation and for the payment of the expenses of the properly accredited delegates of the United States to the meeting of the Congresses and of the Commission: *Provided further,* That from this appropriation not to exceed [$2,700,000] *$1,740,000* shall be available for transfer to the Secretary of the Interior for expenditure for the purposes of and in accordance with the provisions of the Act of August 8, 1946 (16 U. S. C. 756), and the Act of August 14, 1946. *(16 U. S. C. 661–666; 33 U. S. C. 1, 5, 414–415, 441, 451, 540, 541; Civil Functions Appropriation Act, 1951.)*

Appropriated 1951, [a] **$202,811,500** Estimate 1952, **$220,240,000**

[a] Includes $4,000,000 appropriated in the Supplemental Appropriation Act, 1951.

PROGRAM AND PERFORMANCE

MAJOR CAPITAL OUTLAY

1. *Construction.*—There are 2,287 authorized river and harbor projects or separately authorized modifications thereof which will provide 28,000 miles of improved waterways, 490 locks and dams, and 270 harbors. In the calendar year 1949, commerce on this system amounted to 740 million tons. The present status of this program is as follows:

Status	Number of projects [1]	Estimated cost of authorized projects, in millions				
		Total	To June 30, 1950	1951	1952	Balance to complete
Completed	1,681	$812.4	$779.2			[2]$33.2
Under way [3]	233	2,760.6	1,152.5	$115.5	$119.4	1,373.2
Balance authorized	373	2,553.0	11.6	1.2	31.0	2,509.2
Total	2,287	6,126.0	1,943.3	116.7	150.4	3,915.6

[1] Includes authorized modifications of original projects.
[2] Features of completed projects which probably will not be required.
[3] All active uncompleted projects for which construction funds have been appropriated.

The requested appropriation for construction in 1952 provides (1) $117.6 million for the continuation of 35 projects which will require an additional $830.7 million for their completion; (2) $30.0 million for the initiation of construction of 3 multiple-purpose projects whose total estimated cost is $471.4 million; and (3) $1.8 million for the completion of 2 projects costing $9.4 million.

Of the $149.4 million requested, 62 percent will be applied to 5 projects, namely, Jim Woodruff Lock and Dam, Ga. and Fla.; McNary Lock and Dam, Wash. and Oreg.; The Dalles Lock and Dam, Wash. and Oreg.; Old Hickory Lock and Dam, Tenn.; and Chief Joseph Dam, Wash.

Jim Woodruff Lock and Dam on the Apalachicola River was started in the fiscal year 1947 and will provide water storage for power and facilities for navigation and flood control. Schedules call for closure of the river in June 1953 and the first of three 10,000 kw. units for power generation to be in operation in December 1953. Present completion schedules call for 35 percent and 50 percent completion at end of fiscal years 1951 and 1952, respectively.

McNary Lock and Dam on the Columbia River was started in the fiscal year 1947 and will provide water storage for power and navigation and facilities for flood control. Closure of the river is scheduled to be effected in December 1950 and the first of fourteen 70,000 kw. units for power generation is scheduled to be on the line in December 1953. With the installation of the additional 13 units, the total capacity will be 980,000 kw. At the end of fiscal year 1951, the project will be 42 percent complete and the progress scheduled for fiscal year 1952 will raise completion to 59 percent.

The Dalles Lock and Dam on the Columbia River was authorized in 1950 and construction will be initiated in fiscal year 1952. The scheduled initial closure date is August 1955 and the first two of fourteen 70,000 kw. units for power generation are scheduled to be on the line in November 1956. At the end of fiscal year 1952 the project will be six percent completed.

Old Hickory Lock and Dam on the Cumberland River was authorized in 1946 and construction will be initiated in fiscal year 1952. The scheduled closure date is July 1953 and the first of four 25,000 kw. units for power generation is scheduled to be on the line in December 1953. At the end of fiscal year 1952 the project will be 16 percent completed.

Chief Joseph Dam on the Columbia River was started in the fiscal year 1950 and will provide water storage primarily for power. The scheduled closure date is September 1955 and 4 of the presently scheduled 20 units of 64,000 kw. each are anticipated to be placed on the line in December 1955. With the installation of the remaining 16 units, the total capacity will be 1,280,000 kw. Current schedules provide for 13 percent of completion at the end of fiscal year 1951 and 23 percent at the end of fiscal year 1952.

The program for hopper dredge replacement has been completed. Four dredges, each of 3,000 cubic yards capacity, were completed in 1947, and a fifth dredge of 8,000 cubic yards capacity, for use in the New York Harbor area, was completed in 1949.

2. *Planning.*—Design studies and contract plans and specifications are prepared to establish project features and cost estimates and to place the projects in readiness for construction.

Advance planning has been essentially completed on 256 projects or separately authorized modifications thereof, estimated to cost $750 million. During 1952 advance

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

planning activities will proceed on 9 projects having a total estimated cost of $1.3 billion.

CURRENT EXPENSES

1. *Operation and maintenance of projects.*—The estimate for 1952 provides $41.1 million for operation and maintenance of 163 channels and harbors, $20 million for the operation and care of locks and dams at 48 projects, and $1.6 million for the operation and care of the Fort Peck and Bonneville multiple-purpose dam and reservoir projects.

2. *Operation and maintenance, special.*—The Corps of Engineers is responsible for the marking and removal of wrecks, sunken vessels, and other obstructions which are a menace to safe navigation. The facilities of the United States Coast Guard are usually utilized for the marking of such obstructions to navigation and the Coast Guard is reimbursed by the Corps of Engineers for the expense therefor.

The Chief of Engineers is authorized to allot $300,000 annually for the protection, clearing, and straightening of channels of navigable waters and their tributaries when, in his opinion, such work is advantageous to navigation or flood control.

3. *Examinations and surveys.*—Preliminary examinations and surveys are made to determine the necessity of proposed improvements in regard to the economic needs for navigation and related water uses. If the examination report is favorable, detailed survey reports are made to determine (1) the best plan for improvement from the standpoint of utility and regional planning, (2) the estimated cost and the benefits to be derived, and (3) the local cooperation which will be required. Examination and survey reports are developed in cooperation with other interested Federal agencies and the affected States.

Beach erosion investigations are conducted, mainly in cooperation with States and local agencies, to determine means for shore erosion prevention and the restoration and development of beaches. Plans are developed for remedial work and recommendations made as to the extent of Federal participation.

The reduced scope of these activities in 1951 and 1952 as shown in the following table reflects the general curtailment effected as a result of the defense effort:

SUMMARY OF EXAMINATION AND SURVEY ACTIVITIES

General:			
Completed (reports prepared)	3	5	2
Continued	6	4	4
Initiated	3	2	1

Northern and northwestern lakes, including the Great Lakes and their connecting channels, with a total water surface area of 95,000 square miles and a shore line of 3,300 miles, are surveyed for the purposes of furnishing charts to lake navigators and determining necessary improvements.

4. *Regulation.*—The California Débris Commission regulates hydraulic mining within the Sacramento and San Joaquin Basins to prevent resulting debris from being carried into navigable waterways or otherwise causing damage.

To prevent illegal deposits in New York Harbor, disposal areas are specified, patrols maintained, and notices issued of the laws and regulations pertaining to the harbor. Approximately 2,800 permits for the disposal of 31.5 million cubic yards of dredged material and refuse are issued annually.

In addition, miscellaneous inspections and investigations are made, permits are issued, and harbor lines are established to protect and preserve navigable waters; and commercial statistics are collected.

5. *Administration.*—Provision is made for the direction and supervision of the river and harbor program in the Office of the Chief of Engineers, together with the work of the River and Harbor Board and the Beach Erosion Board. The latter concerns itself with beach erosion control and shore protection. The River and Harbor Board reviews all field examination and survey reports for flood control as well as river and harbor improvements, and also compiles statistical data received from the field offices on waterborne commerce.

OBLIGATIONS BY ACTIVITIES

Description	1950 actual	1951 estimate	1952 estimate
Direct Obligations			
MAJOR CAPITAL OUTLAY			
1. Construction:			
(a) Channels and harbors:			
(1) Wrangell Narrows, Alaska	$399,451	$750,000	$247,000
(2) San Diego River and Mission Bay, Calif	2,232,592	1,500,000	510,000
(3) Canaveral Harbor, Fla	115,028	607,274	1,316,000
(4) Jacksonville Harbor, Fla	735,000	800,000	2,000,000
(5) Jacksonville to Miami Waterway, Fla	16,000	500,000	2,350,000
(6) Savannah Harbor, Ga	395,173	550,592	370,000
(7) Mississippi River between the Ohio and Missouri Rivers: Chain of Rocks Canal	9,000,000	8,500,000	5,200,000
(8) Ohio River open channel improvement	120,131	328,984	175,000
(9) Missouri River, Kansas City, Mo., to mouth	1,892,372	2,251,982	2,300,000
(10) Missouri River, Kansas City, Mo., to Sioux City, Iowa	2,896,794	3,755,457	4,000,000
(11) Calcasieu River and Pass, La	907,027	600,351	1,025,000
(12) Gulf Intracoastal Waterway between Apalachee Bay, Fla., and the Mexican border (New Orleans District)	2,388,659	3,407,775	4,900,000
(13) Baltimore Harbor and Channels, Md	656,039	653,194	800,000
(14) Fall River Harbor, Mass	1,020,909	268,265	400,000
(15) Harrison County shore protection, Miss		360,000	773,000
(16) Newark Bay, Hackensack and Passaic Rivers, N.J	697,651	1,202,349	732,000
(17) New York and New Jersey Channels	1,067,278	2,678,152	1,414,000
(18) Buffalo Harbor, N. Y	563,288	932,702	305,000
(19) Hudson River Channel, N. Y	330,643	369,357	250,000

PROGRAM AND PERFORMANCE

This program provides for the alteration of railroad bridges found to be unreasonable obstructions to navigation. The work is performed by the bridge owner who is required to contribute a portion of the cost proportionate to benefits derived by him (such as for increased carrying capacity) while the United States bears the portion attributable to the necessities of navigation. In 1952, it is expected that the alteration of Norfolk & Portsmouth Belt Line Railroad Co. bridge over Elizabeth River at Norfolk, Va., will be completed.

FLOOD CONTROL

Flood Control, General—

Flood control, general: For *expenses necessary for* the construction and maintenance of certain public works on rivers and harbors for flood control, and for other purposes, in accordance with the provisions of the Flood Control Act, approved June 22, 1936, as amended and supplemented, including [printing and binding, and office supplies and equipment required in the Office of the Chief of Engineers to carry out the purposes of this appropriation, and for] preliminary examinations, surveys, and contingencies in connection with flood control, [$383,408,250] *$328,865,000*: *Provided*, That funds appropriated herein may be used for flood-control work on the Salmon River, Alaska, as authorized by law: *Provided further*, That funds appropriated herein may be used to execute detailed surveys, and prepare plans and specifications, necessary for the construction of flood-control projects heretofore or hereafter authorized or for flood-control projects considered for selection in accordance with the provisions of section 4 of the Flood Control Act approved June 28, 1938, and section 3 of the Flood Control Act approved August 18, 1941 (55 Stat. 638): *Provided further*, That the expenditure of funds for completing the necessary surveys shall not be construed as a commitment of the Government to the construction of any project [: *Provided further*, That the section entitled "National Military Establishment" in Public Law 343, Eighty-first Congress, first session, providing appropriations for the project at Mandan, North Dakota, is hereby amended to authorize reimbursement to local interests for such work as they may have done in providing interior drainage facilities at Mandan, subsequent to appropriation of funds for construction, as a part of the local flood protection project, insofar as such drainage facilities shall be approved by the Chief of Engineers and found to have been done in accordance with the authorized project: *Provided further*, That such payment shall not exceed the sum of $76,000]. (*33 U. S. C. 701–701n, 705; Civil Functions Appropriation Act, 1951.*)

Appropriated 1951, [a] **$386,308,250** Estimate 1952, **$328,365,000**
Appropriated (adjusted) 1951, [a] **$385,308,250**

[a] Includes $2,900,000 appropriated in the Supplemental Appropriation Act, 1951.

PROGRAM AND PERFORMANCE

MAJOR CAPITAL OUTLAY

1. *Construction.*—The national flood-control program authorized by Congress includes 1,018 projects varying from local protection works, such as channel improvement and levee and flood wall construction, to multiple-purpose reservoirs for flood control and water-use conservation. The present status of this program is as follows:

Status	Number of projects	Estimated cost of authorized projects, in millions				
		Total	To June 30, 1950	1951	1952	Balance to complete
Completed	232	$462.4	$462.4			
Under way [1]	183	3,284.3	1,247.6	$352.8	$307.7	$1,376.2
Balance authorized	603	4,460.0	26.4	2.9	7.0	4,423.7
Total	1,018	8,206.7	1,736.4	355.7	314.7	5,799.9

[1] All uncompleted projects for which construction funds have been appropriated.

The requested appropriation for construction in 1952 provides $306.1 million for the continuation of 59 projects whose total estimated cost is $2.7 billion and will require future appropriations of $1.1 billion for their completion; $1.6 million for completion of 5 projects whose total estimated cost is $14.4 million; $5 million for the initiation of construction of 1 project whose total estimated cost is $44.9 million; and $2.5 million for other construction activities authorized by law.

Of the $312.7 million contained in the estimate for construction of 65 flood-control projects, approximately 57 percent will be applied to 9 projects, namely, Bull Shoals Dam and Reservoir, Mo. and Ark.; Clark Hill Dam and Reservoir, Ga. and S. C.; Albeni Falls Dam and Reservoir, Idaho; Buggs Island Dam and Reservoir, N. C. and Va.; Garrison Dam and Reservoir, N. Dak.; Detroit Dam and Reservoir, Oreg.; Lookout Point Dam and Reservoir, Oreg.; Conemaugh Dam and Reservoir, Pa.; and Fort Randall Dam and Reservoir, S. Dak.

a. Bull Shoals Dam and Reservoir on the White River was started in the fiscal year 1947 and will provide 5,408,000 acre-feet of water storage for flood control and power. Closure of dam was effected in June 1949 and generation of power from the first of eight 40,000 kw. units is scheduled for March 1952. During 1951, construction of the dam and appurtenances will be carried to completion and the entire project carried to 77 percent completion. At the end of fiscal year 1952 the project is scheduled to be 96 percent complete.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

b. Clark Hill Reservoir on the Savannah River was started in the fiscal year 1946 and will provide 2,900,000 acre-feet of reservoir storage for flood control, power, and navigation. The scheduled date for completion of closure is April 1952 and for the generation of power from the first of seven 40,000 kw. units is October 1952. At the end of fiscal year 1951 the project will be 66 percent complete and is scheduled to be brought to 89 percent completion during fiscal year 1952.

c. Albeni Falls Dam and Reservoir on the Pend Oreille River was started in fiscal year 1951. It will provide 1,140,000 acre-feet of water storage for flood control, power, and navigation. Usable storage will be provided by August 1952. Permanent closure is scheduled for November 1953 and generation of power from the first of three 14,200 kw. units is scheduled for August 1954. Construction is scheduled to be 9 percent complete at the end of fiscal year 1951 and carried to 41 percent of completion by the end of fiscal year 1952.

d. Buggs Island Dam and Reservoir on the Roanoke River was started in fiscal year 1946 and will provide 2,921,000 acre-feet of reservoir storage for flood control, power, and navigation. The scheduled closure date is March 1952 and the first of six 32,000 kw. power units is scheduled to be placed on the line in October 1952. In addition, there is a 12,000 kw. service unit. The project is scheduled to be 68 percent completed at the end of fiscal year 1951 and 87 percent completed at the end of fiscal year 1952.

e. Garrison Dam and Reservoir on the Missouri River was started in the fiscal year 1946 and will provide 23,000,000 acre-feet of reservoir storage for flood control, power, navigation, and irrigation. Present schedules contemplate closure of the dam in the summer of 1953 and generation of power from the first of three 80,000 kw. units in the spring of 1955. Provision has been made for future installation of two additional 80,000 kw. units, making an ultimate total capacity of 400,000 kw. The project is expected to be 42 percent complete at the end of fiscal year 1951 and 56 percent at the end of fiscal year 1952.

f. Detroit Dam and Reservoir on the North Santiam River was started in fiscal year 1947 and will provide 455,000 acre-feet of water storage for flood control, power, navigation, and irrigation. Closure is scheduled for the summer of 1952 for the main dam and in the fall of 1953 for the reregulating dam. Generation of power from the first of two 50,000 kw. units at the main dam is scheduled for June 1953 and from the 18,000 kw. unit at the reregulating dam in the fall of 1953. The percentages of completion at the end of fiscal years 1951 and 1952 are scheduled to be 52 and 76, respectively.

g. Lookout Point Dam and Reservoir on the Willamette River was started in fiscal year 1950 and will provide 456,000 acre-feet of reservoir storage for flood control, power, navigation, and irrigation. Closure of the main dam is scheduled for the summer of 1952 and for the reregulating dam in the spring of 1955. Of the three 38,333 kw. units of power installation at the main dam the first unit is scheduled to come on the line in December 1954 and the 15,000 kw. unit at the reregulating dam is scheduled for June 1955. The present completion schedule calls for 39 percent at the end of fiscal year 1951 and 57 percent at the end of 1952.

h. Conemaugh Dam and Reservoir on the Conemaugh River was started in the fiscal year 1947 and will provide 274,000 acre-feet of water storage for flood control. Closure is scheduled for December 1951. The project is expected to be 75 percent completed by the end of fiscal year 1951 and 95 percent at the end of 1952.

i. Fort Randall Dam and Reservoir on the Missouri River was started in fiscal year 1947 and will provide 6,200,000 acre-feet of reservoir storage for flood control, power, and navigation. Closure of the dam is anticipated in July 1952 and the first of eight 40,000 kw. units for the generation of power is scheduled to be on the line in April 1954. The project is scheduled to be 52 percent complete at the end of fiscal year 1951 and 73 percent at the end of fiscal year 1952.

2. *Planning.*—Design studies and contract plans and specifications are prepared to establish project features and cost estimates in preparation for construction.

Advance planning has been essentially completed on 46 projects estimated to cost $330.5 million. During 1952 advance planning activities will proceed on 29 additional projects having a total estimated cost of $768.7 million.

CURRENT EXPENSES

1. *Operation and maintenance.*—The estimate for 1952 provides $2.6 million for the operation and maintenance of 64 flood-control reservoirs, $2.1 million for the operation and maintenance of 11 multiple-purpose reservoirs, and $0.6 million for the maintenance of 16 local protection projects constructed under section 2 of the 1938 Flood Control Act. Three flood-control reservoirs, three multiple-purpose reservoirs, and two local flood-protection projects are included for the first time.

2. *Preliminary examinations, surveys, and miscellaneous study programs.*—Preliminary examinations and surveys are made to determine the necessity of proposed improvements in regard to the economic needs for flood control and related water uses. If the examination is favorable, detailed survey reports are made to determine (1) the best plan for improvement from the standpoint of utility and regional planning, (2) the estimated cost and the benefits to be derived, and (3) the local cooperation which will be required. Examination and survey reports are developed in cooperation with other interested Federal agencies and the affected States.

The reduced scope of these activities in 1951 and 1952 as shown in the following table reflects the general curtailment effected as a result of the defense effort.

SUMMARY OF EXAMINATION AND SURVEY ACTIVITIES

	1950 actual	1951 estimate	1952 estimate
Investigation:			
Completed (reports prepared)	95	90	70
Continued	620	210	165
Initiated	134	30	18

3. *Administration.*—Provision is made for the direction and supervision of the flood-control program in the Office, Chief of Engineers.

PROGRAM AND PERFORMANCE

MAJOR CAPITAL OUTLAY

Construction.—This project provides for protection from floods of the lower Mississippi Valley from Cape Girardeau, Mo., to the Gulf of Mexico and includes the main alluvial stream, the basins of the St. Francis and White, Grand Prairie-Bayou Meto, Yazoo, Tensas, Atchafalaya Rivers and Bayou LaFourche and the alluvial lands around Lake Pontchartrain. The adopted plan calls for raising and strengthening about 1,600 miles of existing levees along the main river and for enlarging or constructing some 1,700 miles of levees on tributaries and in side basins, for three floodways and one large spillway, for extensive channel improvements and bank stabilization on the main river, for dredging of the main river to provide a navigation channel 12 feet deep and 300 feet wide from Baton Rouge, La., to Cairo, Ill., and for five flood-detention reservoirs on minor tributaries.

The total authorization for flood control and improvement of the lower Mississippi River in its alluvial valley is $1,292 million, of which $675 million had been appropriated up to June 30, 1950.

The main river levees are about 70 percent complete and the main river-bank stabilization is nearly 44 percent complete. Progress on the side basins and on minor tributaries varies from work not yet started to 70 to 80 percent completion of units that have been under way for several years. With the expenditure of funds requested for fiscal year 1952 the main river levees will be 73 percent complete and main river-bank stabilization will be 50 percent complete. These funds will also permit progress in the side basins on minor tributaries.

Federal Reserve Bank of St. Louis

CURRENT EXPENSES

1. *Maintenance.*—The estimate for 1952 is for normal maintenance of work already in place on the main river and in the side basins.

2. *Administration.*—This item covers services of such technical and clerical personnel in the Office, Chief of Engineers, as are necessary for the execution of this project, including planning, construction, and maintenance features.

Total obligations	3,392,270	2,380,767	1,000,000

PROGRAM AND PERFORMANCE

This project will provide protection to approximately 800,000 acres of land in the Sacramento River Valley, including the cities of Sacramento and Marysville and other communities. Reconstruction of old levees, construction of new levees, channel improvement, and bank protection measures are being undertaken.

Work accomplished includes 70 million cubic yards of material placed in levees, five weirs constructed, and channel improvements. The appropriation requested for 1952 will carry on essential work under this project at a reduced rate.

OBLIGATIONS BY ACTIVITIES

Construction of local flood protection works—1950, $3,392,270; 1951, $2,380,767; 1952, $1,000,000.

OBLIGATIONS BY OBJECTS

NIAGARA POWER DEVELOPMENT

Niagara Power Development—

For engineering and economic investigations, pending authorization for construction, of projects for development and utilization for power purposes of the waters of the Niagara River, allocated to the United States under the treaty between the United States of America and Canada, ratified by the United States Senate on October 9, 1950, $2,000,000, to remain available until expended.

Estimate 1952, **$2,000,000**

FUNDS AVAILABLE FOR OBLIGATION

Appropriation or estimate—1952, $2,000,000.

PROGRAM AND PERFORMANCE

This program will provide for engineering and economic investigations of the power redevelopment possibilities at Niagara Falls. At the request of the International Joint Commission, the Corps of Engineers is now engaged in investigations and studies of the nature and scope of remedial works necessary to preserve the beauty of Niagara Falls under conditions expected to prevail when the Niagara River is fully utilized for power purposes. The study of the power features will be fully integrated with the study of the remedial measures and with proposals of the Canadian Government for the redevelopment of the Canadian power plants. A supplemental estimate in the amount of $450,000 is anticipated for fiscal year 1951.

OBLIGATIONS BY ACTIVITIES

Surveys and investigations, Niagara Power Development—1952, $2,000,000.

Total obligations	152,665	152,662	150,000

PROGRAM AND PERFORMANCE

Fifty percent of the proceeds from certain licenses issued by the Federal Power Commission for constructing, operating, and maintaining dams, conduits, reservoirs, etc., are appropriated for maintenance and operation of Federal dams and other navigation structures and for improvement of navigable waters. Moneys derived from such appropriations are used to supplement funds available under the title "Maintenance and improvement of existing river and harbor work" (16 U. S. C. 810; 31 U. S. C. 725c).

OBLIGATIONS BY ACTIVITIES

Maintenance and operation of dams and other improvements of navigable waters—1950, $152,665; 1951, $152,662; 1952, $150,000.

The Plant Account, Corps of Engineers—

The Plant Account was established under authority granted by the Secretary of War on December 13, 1934, to provide for the ownership, operation, and maintenance of plant, equipment, buildings, grounds, shops, storehouses, supplies and materials, and other assets used in connection with the planning, construction, operation, and maintenance of the various projects. It also serves as a medium for temporarily carrying various distributive costs chargeable to the projects such as personal services, overhead, leave, and other deferred and clearing charges. The Plant Account is operated under the appropriations "Maintenance and improvement of existing river and harbor works," "Flood control, general," and "Flood control, Mississippi River and tributaries." The original funds and assets for establishment of the Plant Account were secured by transfer from projects. The only specific appropriations made for acquisition of new plant in recent years were made in the amount of $18,565,000 under the item "Construction of hopper dredges."

CORPS OF ENGINEERS, PLANT ACCOUNT

Statement of sources and application of funds

[June 30, 1950, 1951, and 1952]

	1950 actual	1951 estimate	1952 estimate
FUNDS APPLIED			
To acquisition of assets:			
Plant	$10,436,324	$39,239,834	$6,993,498

Add savings from appropriation	3,964		
Balance carried forward	39,629,129	32,674,129	38,559,129

PROGRAM AND PERFORMANCE

This fund consists of receipts from court-martial fines, forfeitures by desertion, effects of deserters and of escaped military prisoners, withheld pay of the Army and Air Force, bequests, effects of persons dying while subject to military law, collections from retired soldiers, escheatments, miscellaneous sales, interest on Soldiers' Home permanent fund, and transfers made from trust fund appropriation account "Estates of deceased soldiers, Regular Army." The receipts and the balance are available for obligation and expenditure only when appropriated by annual acts of Congress (24 U. S. C. 44, 45; 31 U. S. C. 725s).

Expenses, United States Soldiers' Home (Trust Fund)—

For maintenance and operation of the United States Soldiers' Home, to be paid from the Soldiers' Home permanent fund, [$2,395,000] *$3,215,000, of which $373,000 shall remain available until expended for equipment for the new construction provided under this head in the Supplemental Appropriation Act, 1951: Provided,* That this appropriation shall not be available for the payment of hospitalization of members of the Home in United States Army hospitals at rates in excess of those prescribed by the Secretary of the Army, upon the recommendation of the Board of Commissioners of the Home and the Surgeon General of the Army.

[For an additional amount for "United States Soldiers' Home", to be paid from the Soldiers' Home permanent fund, $12,750,000, to remain available until expended, for the construction of an 842-bed domiciliary barracks and a 210-bed hospital building including necessary site improvements and provision for outside utilities at the United States Soldiers' Home, to make improvements and renovate certain buildings in the present hospital group, to provide for the elimination of fire hazards and to replace outside steam lines at existing facilities.] *(5 U. S. C. 59b; 24 U. S. C. 41–60; 31 U. S. C. 711 (12), 725s (a); Civil Functions Appropriation Act, 1951; Supplemental Appropriation Act, 1951.)*

Annual trust appropriation:
Appropriated 1951, **$15,145,000** Estimate 1952, **$3,215,000**

FUNDS AVAILABLE FOR OBLIGATION

	1950 actual	1951 estimate	1952 estimate
Appropriation or estimate	$2,428,000	$15,145,000	$3,215,000
Unobligated balance, estimated savings	−3,964		
Total obligations	2,424,036	15,145,000	3,215,000

PROGRAM AND PERFORMANCE

The United States Soldiers' Home was established to provide a home and other authorized benefits for the relief and support of certain old, invalid, or disabled soldiers of the Regular Army of the United States. Funds for maintenance and operation of the Home are appropriated from the Soldiers' Home permanent fund and not from the general fund of the Treasury.

1. *Hospital activities.*—As a part of the Home, there is maintained a hospital which will care for a daily average of 332 patients during fiscal year 1952. In addition, 47 patients will receive specialized care in other Government hospitals.

2. *Domiciliary activities.*—Approximately 1,100 members of the Home will be cared for in domiciliary barracks. This represents operation at virtually 100 percent of the present capacity of the Home.

3. *Farm activities.*—No provision is made for including these activities in the 1952 budget. The farm will be discontinued, effective June 30, 1951.

4. *Administration.*—Responsibility for administration of the Home is vested in a Board of Commissioners composed of the following officers of the Army, ex officio: The Adjutant General, the Judge Advocate General, the Quartermaster General, the Surgeon General, the Chief of Engineers, the Chief of Finance, and the Governor of the Home, the latter selected by the President of the United States.

5. *Permanent improvements.*—Provision is made for the procurement of portable initial equipment for the new hospital and domiciliary facilities.

GOVERNMENT AND RELIEF IN OCCUPIED AREAS

Government and Relief in Occupied Areas, Department of the Army—

[For expenses, not otherwise provided for, necessary to meet the responsibilities and obligations of the United States in connection with the government or occupation of certain foreign areas (except Germany), including personal services in the District of Columbia and elsewhere and, subject to such authorizations and limitations as may be prescribed by the head of the department or agency concerned, tuition, personal allowances (not to exceed $10 per day), travel expenses (not to exceed those authorized for like United States military or civilian personnel), and fees incident to instruction in the United States or elsewhere of such persons as may be required to carry out the provisions of this appropriation; travel expenses and transportation; services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a), at rates not in excess of $50 per diem for individuals; health service program as authorized by law (5 U. S. C. 150); payment of claims pursuant to law (28 U. S. C. 2672); translation rights, photographic work, educational exhibits, and dissemination of information, including preview and review expenses incident thereto; expenses incident to the operation of schools in Japan for American children who are dependents of Government personnel; printing and binding; purchase and hire of passenger motor vehicles and aircraft; repair and maintenance of buildings, utilities, facilities, and appurtenances; contingencies for the United States commanders, commissioners, or other administrators of foreign areas, to be expended in their respective discretions (not exceeding amounts authorized or approved by the head of the department or agency concerned); such minimum supplies for the civilian populations of such areas as may be essential to prevent starvation, disease, or unrest, prejudicial to the objectives sought to be accomplished; and such supplies, commodities, and equipment as may be essential to carry out the purposes of this appropriation; $288,000,000, of which not to exceed $18,200,000 shall be available for administrative expenses: *Provided*, That the general provisions of the appropriation Act for the fiscal year 1951 for the military functions of the Department of the Army shall apply to expenditures made by that Department from this appropriation: *Provided further*, That expenditures from this appropriation may be made outside continental United States, when necessary to carry out its purposes, without regard to sections 355, 1136, 3648, and 3734, Revised Statutes, as amended, civil service or classification laws, or provisions of law prohibiting payment of any person not a citizen of the United States: *Provided further*, That expenditures from this appropriation may be made, when necessary to carry out its purposes, without regard to section 3709, Revised Statutes, as amended, and the Armed Services Procurement Act of 1947 (41 U. S. C. 151–161): *Provided further*, That expenditures may be made hereunder for the purposes of economic rehabilitation in such occupied areas in such manner as to be consistent with the general objectives of the Economic Cooperation Act of 1948, as amended: *Provided further*, That funds appropriated hereunder and unexpended at the time of the termination of occupation by the United States, of any area for which such funds are made available, may be expended by the President for the procurement of such commodities and technical services, and commodities procured from funds herein or heretofore appropriated for government and relief in occupied areas and not delivered to such an area prior to the time of the termination of occupation, may be utilized by the President, as may be necessary to assist in the maintenance of the political and economic stability of such areas: *Provided further*, That before any such assistance is made available, an agreement shall be entered into between the United States and the recognized government or authority with respect to such area containing such undertakings by such government or authority as the President may determine to be necessary in order to assure the efficient use of such assistance in furtherance of such purposes: *Provided further*, That such agreement shall, when applicable, include requirements and undertakings corresponding to the requirements and undertakings specified in sections 5, 6, and 7 of the Foreign Aid Act of 1947 (Public Law 389, approved December 17, 1947): *Provided further*, That funds appropriated hereunder may be used, insofar as practicable, and under such rules and regulations as may be prescribed by the head of the department or agency concerned to pay ocean transportation charges from United States ports, including territorial ports, to ports in Japan and the Ryukyus for the movement of supplies donated to, or purchased by, United States voluntary nonprofit relief agencies registered with and recommended by the Advisory Committee on Voluntary Foreign Aid or of relief packages consigned to individuals residing in such countries: *Provided further*, That under the rules and regulations to be prescribed, the head of the department or agency concerned shall fix and pay a uniform rate per pound for the ocean transportation of all relief packages of food or other general classification of commodities shipped to Japan or the Ryukyus regardless of methods of shipment and higher rates charged by particular agencies of transportation, but this proviso shall not apply to shipments made by individuals to individuals: *Provided further*, That the President may transfer to any other department or agency any function or functions provided for under this appropriation, and there shall be transferred to any such department or agency such unobligated balances of this appropriation and, without reimbursement and without regard to the appropriation from which procured, such property as the Director of the Bureau of the Budget shall determine to relate primarily to any function or functions so transferred; and any funds so transferred may be expended either under the authority contained herein or under the authority governing the activities of the department or agency concerned.] (*Foreign Aid Appropriation Act, 1951.*)

PROGRAM AND PERFORMANCE

United States objectives in occupied areas include the prevention of disease and unrest among the civilian populations, and the promotion of economic recovery leading to eventual self-support. In 1950 and 1951, the program applied to Japan and the Ryukyu Islands; it included the

GOVERNMENT AND RELIEF IN OCCUPIED AREAS—Continued

Government and Relief in Occupied Areas, Department of the Army—Continued

program in Germany until its transfer on October 16, 1949, to the Department of State and to the Economic Cooperation Administration, and the program in Austria until its transfer on October 15, 1950, to the Department of State.

The estimated requirement of $150,000,000 in 1952 for the remaining areas are shown as an anticipated supplemental under "Civil functions, Department of Defense." Details will be submitted at a later date.

1. *Economic aid.*—This covers requirements of all goods and services which must be furnished to meet basic relief needs and to maintain the momentum of economic recovery in Japan and the Ryukyu Islands. The progressive reductions in the amount and cost of economic aid furnished reflect the increasing ability of these areas to support themselves.

(*a*) *Grain, food, and kindred products.*—Basic foodstuffs are needed for the civilian populations to supplement those foods which are produced domestically or which cannot be secured from the proceeds of exports.

(*b*) *Fertilizer materials and seeds.*—Fertilizers and seeds furnished in prior years have already greatly increased the level of domestic food production; in addition, the rehabilitation of the nitrogenous fertilizer industry in Japan has made it possible to increase substantially the domestic supply.

(*c*) *Petroleum and petroleum products.*—Domestic resources furnished only a small portion of the total petroleum products needed. The cost of the import program financed under this activity has been reduced progressively as a result of the rehabilitation of domestic refining capacity and by financing imports from proceeds of exports.

(*d*) *Raw and semifinished industrial materials.*—These include only those materials which cannot be procured with proceeds of exports.

(*e*) *Industrial machinery, repair and replacement parts, supplies, service equipment, and motor vehicles and parts.*—The Ryukyu Islands need machinery for the rehabilitation of small manufacturing industries, materials, and equipment for the repair and replacement of fishing and water transportation craft, equipment for the maintenance of power and communication facilities, and equipment for governmental activities under the sponsorship of Military Government. A small amount for motor vehicles and replacement parts is included.

(*f*) *Transportation of commodities.*—Current plans call for a partial restoration of the Japanese merchant marine, particularly vessels of a size and speed required for ocean transportation. It is expected that an increasing proportion of cargoes will be carried in Japanese vessels.

2. *Administration and reorientation.*—Military government expenditures in Japan and the Ryukyu Islands for these purposes have been progressively decreased, reflecting the growing measure of responsibility assumed by the local civilian governments.

(*a*) *Administration.*—Provision is made for civilian employees at headquarters and in the field, travel, permanent change of station, and incidental operating expenses.

(*b*) *Reorientation.*—The reorientation program, designed to instill the ideals and practices of democratic government, provides also for the interchange of students and leaders from the occupied areas to observe and study the customs, ideals, and institutions in the United States.

THE PANAMA CANAL—Continued

CANAL ZONE GOVERNMENT—Continued

Canal Zone Government—Continued

of functions. These activities relate to the population of the Canal Zone which numbered 52,300 as of April 1950.

It is expected that the operation of these activities will continue in 1952 at about the same level as 1951 considering that certain activities have been transferred from the former appropriation, "Maintenance and operation, Panama Canal." Under improvements and betterments, it is proposed to rehabilitate refrigerated and dry storage facilities at Gorgas Hospital, continue road and street replacements, and to provide a small amount for miscellaneous minor improvements for all activities under this appropriation.

The appropriation request is based on gross requirements and reimbursements and payments received, including the payment by the Panama Canal Company for the net cost of operation of the Canal Zone government, will be deposited into the Treasury as miscellaneous receipts.

PROGRAM AND PERFORMANCE

The erection in the Canal Zone of a suitable memorial to Maj. Gen. George W. Goethals was authorized by an act of Congress approved August 23, 1935. The expenditure authorization was $160,000. Some funds were expended for plans, and there was a bill in the last Congress authorizing an additional $140,000 in order to provide sufficient funds to carry out the purpose of erecting this memorial.

PROGRAM AND PERFORMANCE

Pursuant to article VII of the 1903 Treaty with the Republic of Panama, contract was entered into in 1907 between the Isthmian Canal Commission (Panama Canal) and the Republic of Panama, under which the Commission constructed the water distribution and sewage systems, as well as some paving in the cities of Panama and Colon, in order to provide necessary utilities for those cities. The Panama Canal has maintained the water and sewage systems and pavements, and extends and improves them on properly authorized and approved requests by the Republic of Panama. The Canal has collected the water rentals from the water consumers and applies the proceeds thereof to cover the cost of the water; maintenance, extension, and improvement of the systems; amortization of the investment; and interest at the rate of 2 percent on the unamortized balance. By congressional authorization and Executive Order 9551 the water and sewage systems in Panama and Colon were transferred to the Republic of Panama, effective January 1, 1946. The surplus from proceeds as of that date has been applied to extending and improving water and sewage systems and paving in the cities of Panama and Colon, and the balance remaining for these purposes is shown below under the heading "Paving of streets and extension of water and sewage systems."

OBLIGATIONS BY ACTIVITIES

Paving of streets and extension of water and sewage systems—1950, $115,812; 1951, $263,922; 1952, $50,000.

OBLIGATIONS BY OBJECTS

PANAMA [RAILROAD] *CANAL* COMPANY

[Submitted under the Government Corporation Control Act]

Purpose and Financial Organization

The Panama Canal Company is a continuation of the Panama Railroad Company, a wholly owned Government corporation. The charter of the corporation, prescribed by Public Law 808, Eightieth Congress, was amended by Public Law 841, Eighty-first Congress, to provide for the merger of the activities of the Panama Canal (except the civil government of the Canal Zone) with those of the Panama Railroad Company into a single organization.

The law authorizes the President to make the merger by transferring to the Corporation the Panama Canal and facilities and appurtenances related thereto. The President has announced his intention to make the transfer effective at the close of business June 30, 1951, and the Secretary of the Army and the Board of Directors of the Corporation are drafting plans to make the reorganization effective by that date.

At the present time, the Government's capital investment in the Panama Railroad Company is $7 million. The Company has retained earnings of approximately $26 million, and it has paid dividends to the Treasury in past years amounting to approximately $25 million.

The value of the assets to be transferred to the Corporation at the time of the merger will be at such amounts as may be agreed upon between the Corporation and the Panama Canal, subject to approval of the Director of the Bureau of the Budget. For the purpose of these estimates (in advance of the actual determination of the value of the assets), it is assumed for the purpose of the 1952 budget that the value of assets to be transferred from the present Panama Canal organization to the Corporation is approximately $498.5 million. Of this sum $12.9 million is estimated to be in the form of working capital and $485.6 million in the form of fixed assets. The portion of the latter which represents interest during construction, $129 million, is estimated to be an investment in the Corporation which will not be required to bear interest to the Treasury; the remainder of the investment transferred to the Corporation is to be interest bearing.

Assets now carried on the books of the Panama Canal at approximately $150 million have tentatively been omitted from these estimates pending further study. Such assets include the work done to date on the Third Locks, certain properties which may be allocable to national defense, and other assets which may have suffered obsolescence or substantial loss in earning capacity.

The management of the Corporation is vested in a Board of Directors which consists of the Governor of the Canal Zone and from 8 to 12 other persons appointed by the Secretary of the Army. The Board is required to appraise at least annually the Company's necessary working capital requirements, including authorized plant expansion, and arrange to pay into the Treasury as dividends the amount of funds in excess thereof.

The Corporation is authorized to borrow without interest from a revolving fund of $10 million established in the Treasury. No loans have been made from this fund. None are contemplated during the fiscal years 1951 and 1952.

Analysis of Budget Programs

Activity categories.—The operations of the Panama Canal Company will consist of a variety of activities which for budget purposes are tentatively grouped in three main categories: (1) Canal activities, (2) commercial activities, and (3) quarters.

The Canal activities will consist of those functions directly related to the waterway and handling of ships, such as the marine operation, maintenance of the Canal channel, locks, and other similar activities. The commercial activities will include all of the functions of the original Panama Railroad Company, plus many other service activities transferred from the Panama Canal, as indicated in schedule B–1. Quarters is an activity transferred from the Panama Canal, relating to the furnishing of housing.

An appropriate share of the administrative and general expenses, which in total are a joint cost of the Company and of the Canal Zone Government, is included in the expenses shown for most activities of the Company and in the expenses of the Canal Zone Government.

Distribution of costs.—After determining the net income or net expense of each activity of the Company, and the expense of the Canal Zone Government, a further distribution of costs will be made as follows: (1) The net loss on quarters will be distributed to Canal activities, commercial activities, and the Canal Zone Government; and (2) the expenditures for the Canal Zone Government, other than a few activities designated as nonrecoverable, will be distributed between the cost of Canal activities and of commercial activities. The Corporation is required to make a payment to the Treasury each year which includes this cost of the civil government.

The proportions used in these estimates for distributing such costs are only preliminary and should not be considered as a measure or a commitment of the allocations which will actually be made after the relationship between certain of the detailed activities has been finally determined.

Rates used in income estimates.—The rates employed in estimating income during the fiscal year 1952 are not to be regarded as establishing the specific rate structures which will be adopted after the reorganization has been effected, but merely for a presentation of the budget program. When the plan of reorganization has been fully developed and approved by the President pursuant to law and the properties properly allocated to function and activity and their fair value fixed, the basis for determining equitable

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

rates will be provided. Such revisions in rates as may then prove necessary will be adopted and announced. For example, the estimates for 1952 do not show the increase in income which will probably have to be obtained through higher rates or charges for services rendered, particularly for some of the commercial activities and quarters.

It is expected that the rates charged for the various activities will be carefully considered by the Board of Directors of the new Company and that appropriate changes will be made in the rates within the next year.

Canal activities.—The estimates are based on the assumption that the general level of business activities during fiscal year 1952 will be approximately at the July 1950 level. On this basis and at present rates, the gross income from operations of the Canal, including credits for the tolls of military ships, would be $26,131,000. Expenses are estimated to total $28,063,000 after deducting intra-agency transactions and after including $7,467,000 for interest on the Government's investment based on the preliminary evaluation of assets. With no change in rates, this would result in a deficit of $1,932,000. As indicated above, however, the actual determination of the properties and assets to be transferred to the Corporation which may affect the interest charge, will be made later. Also, the estimates of income projected for fiscal year 1952 are based upon the present volume of business and any increase would necessarily alter the situation concerning the deficit. The amounts shown should not be construed or be interpreted as intended to make any commitment as to any specific base for computation of canal tolls or as any determination of the exact rate which may finally be adopted. For the purpose of submission of this budget, however, a rate increase is projected, to be effective for the latter half of the fiscal year (allowing time for the Corporation to give due notice), which is estimated to produce $1,380,000 of additional income, thus bringing the deficit down to $552,000.

Commercial activities.—The gross income from commercial activities during the fiscal year 1952, exclusive of income from costs of commodities sold and intra-agency transactions, is estimated to be $19,936,000. Expenses, exclusive of costs of commodities sold and intra-agency transactions, are estimated at $22,335,000, including $2,384,000 as a proportion of Canal Zone Government expenses and $620,000 for interest payable to the United States Treasury. This indicates a net deficit from operations of $2,399,000. It may be entirely attributed to classifying interest and the proportionate cost of Canal Zone Government as expenses of commercial activities; before assignment of these two factors the operations would produce a net income of $605,000 to be applied toward payment of interest to the Treasury.

Quarters.—The gross rental income from quarters is estimated to be $2,216,000 in 1952. Expenses applicable to this income are anticipated to be $2,688,000. The resulting loss of $472,000 is allotted to canal and commercial activities and the Canal Zone Government.

Administrative expenses.—The administrative expenses of the Company for the fiscal year 1952 are estimated at $300,000, based upon normal administrative control over the operations of the Company and allowing $45,000 for the cost of the audit by the General Accounting Office. This activity includes the cost of the president's office and the immediately related staff.

Financial Review

Operating results.—Based on the estimated amounts shown, the operation of the Company as a whole will in fiscal 1952 result in a deficit of $2,951,000, after making allowance for $8,336,000 interest payable to the United States Treasury at a rate of 2½ percent on the interest-bearing investments of the Company. This includes provision for depreciation of the Company's physical plant but does not provide for amortization on nondepreciable assets to the total value of about $255,436,000. It also takes into account accrued liabilities for all expenses not settled at the close of the fiscal year. During the fiscal year 1952 it is not contemplated that any dividends will be paid by the Company into the Treasury of the United States. Details of income and expenses are presented in statement B.

Capital expenditures.—In the fiscal year 1952 the capital expenditures are estimated at approximately $14,000,000. The principal items will be $11,070,000 for employees' quarters in continuation of the comprehensive housing program initiated by the Panama Canal, and $1,570,800 to be expended in connection with a new cold-storage warehouse and ice-cream and milk-bottling plant for the Commissary Division.

Commodities, supplies, and materials.—The inventories of the Company are estimated to total $14,765,000 at June 30, 1951, and are carried on the books at cost. They are corrected periodically based on physical checks during the fiscal year. Merchandise held for sale consists of $4,328,000, principally in commissary stock, $6,000,000 in storehouse stock, and $4,437,000 in other stock, principally for floating plant. No significant change is estimated in inventories at the close of fiscal year 1952.

Land, structures, and equipment.—Items of plant and equipment are in general recorded on the books at actual cost, including cost of installation, and depreciation on the depreciable assets is charged on the straight-line method, based on estimated service lives. As stated above, nondepreciable assets are estimated at about $255,436,000, for which no provision is being made for amortization. For budget purposes the assets transferred from the Panama Canal are shown at their depreciated values and, to be consistent, the assets of the Panama Railroad Company are likewise shown at their depreciated values. The depreciation accruals will be continued in sufficient amounts which would permit recovery of the investment over the useful life of the assets as originally fixed.

The total investment of the Company in land, structures, and equipment as of June 30, 1951, after deducting the portion charged off as depreciation, is tentatively estimated to be $316,568,000, and it is estimated that at the close of the fiscal year 1952 it will amount to $326,547,000. In addition, titles and treaty rights are capitalized at a total of $59,593,000. Interest during construction, amounting to $128,991,000, is included on the balance sheet, but is excluded from the investment for interest purposes, in conformity with section 412 (e) of Public Law 841. The increase in 1952 includes provision for the capital expenditures detailed in schedule A (1).

PROGRAM AND PERFORMANCE

In accordance with section 254 of title 2 of the Canal Zone Code (Public Law 808, 80th Cong.), there has been deposited in the Treasury in fiscal year 1948 the sum of $10,000,000 to be maintained in the Treasury as a separate fund from which the corporation may borrow, for limited periods, not to exceed $10,000,000 for any authorized purpose of the corporation. Repayments shall be redeposited in said fund and will be available for subsequent loans. Loans to the corporation from this fund shall not bear interest.

GENERAL PROVISIONS

SEC. 102. No part of any appropriation contained in this chapter shall be used directly or indirectly, except for temporary employment in case of emergency, for the payment of any civilian for services rendered by him on the Canal Zone while occupying a skilled, technical, clerical, administrative, executive, or supervisory position unless such person is a citizen of the United States of America or of the Republic of Panama: *Provided, however,* (1) That, notwithstanding the provision in the Act approved August 11, 1939 (53 Stat. 1409) limiting employment in the above-mentioned positions to citizens of the United States from and after the date of approval of said Act, citizens of Panama may be employed in such positions; (2) that at no time shall the number of Panamanian citizens employed in the above-mentioned positions exceed the

GENERAL PROVISIONS—Continued

number of citizens of the United States so employed, if United States citizens are available in continental United States or on the Canal Zone; (3) that nothing in this chapter shall prohibit the continued employment of any person who shall have rendered fifteen or more years of faithful and honorable service on the Canal Zone; (4) that in the selection of personnel for skilled, technical, administrative, clerical, supervisory, or executive positions, the controlling factors in filling these positions shall be efficiency, experience, training, and education; (5) that all citizens of Panama and the United States rendering skilled, technical, clerical, administrative, executive, or supervisory service on the Canal Zone under the terms of this chapter (a) shall normally be employed not more than forty hours per week, (b) may receive as compensation equal rates of pay based upon rates paid for similar employment in continental United States plus 25 per centum; (6) this entire section shall apply only to persons employed in skilled, technical, clerical, administrative, executive, or supervisory positions on the Canal Zone directly or indirectly by any branch of the United States Government or by any corporation or company whose stock is owned wholly or in part by the United States Government: *Provided further*, That the President may suspend from time to time in whole or in part compliance with this section if he should deem such course to be in the public interest.

SEC. 103. The Governor of the [Panama] Canal *Zone* and the Chief of Engineers, Department of the Army, are authorized to employ services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a), in amounts not exceeding $15,000 for the [Panama] Canal *Zone Government* and not exceeding $150,000 for the Corps of Engineers, Department of the Army: *Provided*, That the rates for individuals shall not exceed $100 per diem.

SEC. 104. Appropriations for civil functions of the Department of the Army may be used for [the payment of claims pursuant to law (31 U. S. C. 223c; 28 U. S. C. 2672);] examination of estimates of appropriations in the field [; and for health programs as authorized by law (5 U. S. C. 150)]. (*"Civil Functions Appropriation Act, 1951"*.)

Total, civil functions, Department of the Army, general and special appropriations:

Appropriated 1951, **$986,036,350** Estimate 1952, **$641,950,000**
Appropriated (adjusted) 1951, **$983,792,590**

REDUCTION IN APPROPRIATION

The appropriation granted under the head, "Cemeterial expenses, no year," in the "Civil Functions Appropriations Act, 1949" is reduced by the sum of $27,000,000.

Statement of proposed obligations for purchase and hire of passenger motor vehicles for the fiscal year 1952

PROPOSED FOR LATER TRANSMISSION

Government and relief in occupied areas.—An estimated requirement of $150 million in 1952, under existing legislation, will be submitted in detail at a later date. This will provide for economic recovery, basic relief needs, and reorientation in connection with the occupation of Japan and the Ryukyu Islands.

Niagara power development project, Corps of Engineers, civil functions.—There is included in the Budget a supplemental appropriation of $450,000 for 1951 for engineering and economic investigations and reports relating to projects for the development and utilization for power purposes of the waters of the Niagara River allocated to the United States under treaty between the United States and Canada, ratified by the United States Senate on August 9, 1950.

St. Lawrence Seaway and power project.—There is included in the Budget for fiscal year 1952 under proposed legislation, a supplemental appropriation of $20 million to initiate construction of the St. Lawrence Seaway and power project.

PROGRAM AND PERFORMANCE

1. *Departmental direction.*—Besides the Offices of the Secretary and the Under Secretary, this activity includes the Division of Information.

2. *Program direction and coordination.*—The Secretary is aided by three assistant secretaries, the program staff, and field committees. Staff assistance is provided on matters of policy within the Department's responsibilities for promoting the domestic welfare and the conservation and development of the country's natural resources.

3. *Administrative management services.*—This activity provides for the recently created Office of the Administrative Assistant Secretary, budget and finance, management improvement, property management, personnel and administrative service operations.

4. *Legal services.*—The Solicitor's Office provides legal advice to the Secretary and other departmental officers.

5. *General services.*—Provision is made for services, such as printing and binding, telephone, health, and library.

Construction, Southeastern Power Administration, Office of the Secretary—

For construction and acquisition of transmission lines, substations, and appurtenant facilities, and for administrative expenses connected therewith, in carrying out the provisions of section 5 of the Flood Control Act of 1944 (16 U. S. C. 825s), as applied to the southeastern power area, $4,000,000, to remain available until expended.

Estimate 1952, **$4,000,000**

FUNDS AVAILABLE FOR OBLIGATION

Appropriation or estimate—1952, $4,000,000.

PROGRAM AND PERFORMANCE

The construction program of the Southeastern Power Administration is planned to provide matching of transmission facilities with scheduled generation at multiple-purpose hydroelectric projects of the Department of the Army in an area which ultimately will embrace ten southeastern States. Existing transmission facilities are inadequate to accomplish the transfer of large blocks of power made available at projects under construction to load centers and provide for an integrated operation in connection with these plants. To the extent that arrangements can be made which are in the best interests of the Federal Government and consistent with section 5 of the Flood Control Act of 1944, use will be made of surplus capacity in existing transmission facilities. However, additional facilities will be required. In order to meet generation schedules of the Corps of Engineers projects through 1953 shown in the following tabulation, this estimate proposes planning and construction of transmission facilities to dispose of power from Buggs Island and Clark Hill. Funds are also proposed for planning and engineering surveys for marketing power from projects scheduled for later years. Supplemental funds are contemplated for 1951 to initiate facilities to dispose of power from Buggs Island.

Project	First generation (fiscal year)	Installed capacity (kilowatts)	
		Present or first year	Ultimate
Dale Hollow	In operation	36,000	54,000
Allatoona	In operation	72,000	108,000
Center Hill	In operation	135,000	135,000
Wolf Creek	1952	180,000	270,000
Philpott	1953	14,000	14,000
Buggs Island	1953	204,000	204,000
Clark Hill	1953	120,000	280,000

OBLIGATIONS BY ACTIVITIES

New construction—1952, $4,000,000.

Federal Reserve Bank of St. Louis

ing plants constructed and being constructed by the Department of the Army. Revenues from plants now in operation which accrued during 1949 and 1950 were $1,329,591 with estimated revenues for 1951 in excess of $2,000,000 and for 1952 in excess of $4,000,000.

1. *System operation and maintenance.*—In 1952 power will be marketed from three plants on the Cumberland River in Tennessee and Kentucky through the Tennessee Valley Authority and one plant on the Coosa River in Georgia. Additions to the staff will be required to develop plans for the transmission maintenance program, power dispatching, water release, and power sales scheduling in connection with the disposal of power from three new plants located in Virginia, North Carolina, South Carolina, and Georgia, which will begin generation in 1953.

2. *Power marketing.*—The Administration will be responsible for the disposal of power from 869,000 kilowatts of installed generating capacity by the end of 1953. Cooperatives and public bodies have preference rights to this power. It is necessary for the Administration to negotiate and service contracts to carry out this responsibility, including contracts with other utility systems for the interconnection and integration of their systems with the Government's system and for the interchange, sale, and purchase of power.

3. *General administration.*—Due to expansion of the operation and maintenance and power marketing activities in 1952, additional funds are necessary for the administration of the program.

OBLIGATIONS BY ACTIVITIES

Description	1950 actual	1951 estimate	1952 estimate
1. System operation and maintenance			$82,236
2. Power marketing			126,214
3. General administration	$55,878	$150,000	91,550
Total obligations	55,878	150,000	300,000

ADMINISTRATIVE PROVISIONS

Appropriations of the Southeastern Power Administration shall be available for purchase of not to exceed seven passenger motor vehicles. Appropriations made herein to the Southeastern Power Administration shall be available in one fund, except that the appropriation herein made for operation and maintenance shall be available only for the service of the current fiscal year.

Permanent indefinite appropriation, special account:

CONTINUING FUND, SOUTHEASTERN POWER ADMINISTRATION

Continuing Fund, Southeastern Power Administration, Office of the Secretary—

All receipts from the transmission and sale of electric power and energy under the provisions of section 5 of the Flood Control Act of December 22, 1944 (16 U. S. C. 825s), generated or purchased in the southeastern power area, shall be covered into the Treasury of the United States as miscellaneous receipts, except that the Treasury shall set up and maintain from such receipts a continuing fund of $200,000, and said fund shall be placed to the credit of the Secretary, and shall be subject to check by him to defray expenses of rental of facilities and purchase of electric power and energy for the purposes of said section of the above cited Act and emergency expenses necessary to insure continuity of electric service and continuous operation of Government facilities in said area.

Estimate 1952, **$200,000**

FUNDS AVAILABLE FOR OBLIGATION

Appropriation or estimate—1952, $200,000.

PROGRAM AND PERFORMANCE

This proposed continuing fund of $200,000, to be derived from receipts from the transmission and sale of electric power and energy generated or purchased in the southeastern power area, will be used to defray emergency expenses necessary to insure the continuity of electric service and continuous operation of facilities, expenses of rentals for the use of facilities and all costs in connection with the purchase of electric power and energy to the extent necessary to firm up the Federal system.

OBLIGATIONS BY ACTIVITIES

Emergency expenses and purchase of power and service charges—1952, $200,000.

OBLIGATIONS BY OBJECTS

07 Other contractual services—1952, $200,000.

General accounts:

CONSTRUCTION, SOUTHWESTERN POWER ADMINISTRATION

Construction, Southwestern Power Administration, Office of the Secretary—

For construction and acquisition of transmission lines, substations, and appurtenant facilities, and for administrative expenses connected therewith, in carrying out the provisions of section 5 of the Flood Control Act of 1944 (16 U. S. C. 825s), as applied to the southwestern power area, to remain available until expended, [$8,620,000] *$4,100,000,* of which not to exceed [$5,000,000] *$600,000* is for liquidation of obligations incurred pursuant to authority previously granted[; and, in addition, the Secretary is authorized to enter into contracts for the purposes of this appropriation in an amount not to exceed $1,730,000: *Provided,* That the unexpended balances of funds appropriated under the head "Construction, operation, and maintenance, power transmission facilities" in the Interior Department Appropriation Act, 1950, for the foregoing purposes shall be transferred to and merged with this appropriation]. (*Interior Department Appropriation Act, 1951.*)

Appropriated 1951, **$8,620,000** Estimate 1952, [a] **$4,100,000**

[a] Excludes $427,300 for activities transferred in the estimates to "Operation and maintenance, Southwestern Power Administration." The amounts obligated in 1950 and 1951 are shown in the schedule as comparative transfers.

CONSTRUCTION, SOUTHWESTERN POWER ADMINISTRATION—con.

Construction, Southwestern Power Administration, Office of the Secretary—Continued

FUNDS AVAILABLE FOR OBLIGATION—Continued

	1950 actual	1951 estimate	1952 estimate
Comparative transfer to "Operation and maintenance, Southwestern Power Administration"	−$240,606	−$453,442	
Total obligations	5,868,223	6,806,920	$4,200,000

NOTE.—The transfer from "Construction, operation, and maintenance, power transmission facilities," excludes $211,132 of obligated appropriation balances also transferred.

PROGRAM AND PERFORMANCE

During 1952, the Administration will carry forward the construction of transmission facilities to interconnect Federal generating facilities with other systems. Completion of Federal transmission facilities is planned in accordance with scheduled generating facilities of power cooperatives and municipalities, as well as the Corps of Engineers. Generation schedules of the Corps of Engineers in the southwestern area through 1953 are shown below:

Project	First generation (fiscal year)	Installed capacity (kilowatts)	
		Present or first year	Ultimate
Denison	In operation	70,000	175,000
Norfork	In operation	70,000	140,000
Narrows	In operation	17,000	25,500
Bull Shoals	1952	80,000	320,000
Whitney	1953	30,000	30,000
Fort Gibson	1953	45,000	67,500
Tenkiller Ferry	1953	34,000	34,000

1. *Construction in progress.*—Transmission facilities will be completed in Oklahoma and Missouri to provide major interconnections with the Rural Electrification Administration-financed Western Electric and KAMO transmission cooperatives, and the city of Springfield, Mo. In addition, construction will be completed on facilities to interconnect Fort Gibson and Tenkiller Ferry projects with the main trunk line.

2. *New construction and additions.*—Provision is made for purchase through General Services Administration of an existing Federal transmission line from Denison Dam to Payne, Tex.; acquisition of emergency and operating equipment; construction of short extensions from existing lines of the Government, private utilities and cooperatives, including improvements and additions to Government owned or operated transmission facilities; and the development of plans for future program.

OBLIGATIONS BY ACTIVITIES

Description	1950 actual	1951 estimate	1952 estimate
1. Construction in progress		$4,989,313	$2,635,000
2. New construction and additions	$5,868,223	1,817,607	1,555,000
Total obligations	5,868,223	6,806,920	4,200,000

OBLIGATIONS BY OBJECTS

Object classification	1950 actual	1951 estimate	1952 estimate
Total number of permanent positions	112	160	157
Full-time equivalent of all other positions	5	5	
Average number of all employees	80	157	153
01 Personal services:			
Permanent positions	$299,547	$575,644	$645,714
Part-time and temporary positions	8,331	11,748	
Regular pay in excess of 52-week base	1,830		2,936
Payment above basic rates	2,998	3,770	3,350
Total personal services [1]	312,706	591,162	652,000
02 Travel	31,658	62,581	65,000
03 Transportation of things	7,325	4,230	3,000
04 Communication services	2,891	13,786	11,000

Total obligations	5,868,223	6,806,920	4,200,000

[1] These figures were derived by applying the percentage of the total applicable to this appropriation on the basis of an analysis of specific activities. Since the Southwestern Power Administration realizes definite economies from conducting the operation and maintenance program and the construction program on an integrated staff basis, it is not possible in many cases to assign individual positions to a specific program.

OPERATION AND MAINTENANCE, SOUTHWESTERN POWER ADMINISTRATION

Operation and Maintenance, Southwestern Power Administration, Office of the Secretary—

For necessary expenses of operation and maintenance of power transmission facilities and of marketing electric power and energy pursuant to the provisions of section 5 of the Flood Control Act of 1944 (16 U. S. C. 825s), as applied to the southwestern power area, [$760,000] *$1,300,000. (Interior Department Appropriation Act, 1951.)*

Appropriated 1951, **$760,000** Estimate 1952, [a] **$1,300,000**

[a] Includes $427,300 for activities previously carried under "Construction, Southwestern Power Administration." The amounts obligated in 1950 and 1951 are shown in the schedule as comparative transfers.

FUNDS AVAILABLE FOR OBLIGATION

	1950 actual	1951 estimate	1952 estimate
Appropriation or estimate		$760,000	$1,300,000
Comparative transfer from—			
"Construction, operation, and maintenance, power transmission facilities, southwestern power area"	$280,809		
"Construction, Southwestern Power Administration"	240,606	453,442	
Total obligations	521,415	1,213,442	1,300,000

PROGRAM AND PERFORMANCE

The Administration markets surplus hydroelectric power from multiple-purpose projects constructed by the Department of the Army in six Southwestern States. To perform these functions, it operates and maintains a system of high-voltage transmission lines and related facilities and contracts for the use of transmission and appurtenant facilities of others, and for the sale, purchase, and interchange of power.

1. *System operation and maintenance.*—In 1952, the Administration will operate and maintain 1,007 miles of transmission lines and 11 substations and switching stations for the marketing of power from the Norfork, Denison, and Narrows projects. Power scheduling and dispatching will be increased to permit servicing of 137

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

metered points of connection with customers, including private utilities.

2. *Power marketing.*—The Administration will have available for marketing an estimated 426,000 kilowatts of power by the end of 1953. Existing sales contracts will be serviced to meet changing conditions of available power with requirements; negotiations will be undertaken with prospective customers; and investigations will be made of rate bases, disposition of existing and potential power, and the integration of facilities with systems of cooperatives, public bodies, and private companies.

3. *General administration.*—This represents administrative overhead expenses not specifically assignable to a particular electric function. The estimate proposes financing in this activity of $427,300 for expenses previously included in the appropriation for construction.

OBLIGATIONS BY ACTIVITIES

BONNEVILLE POWER ADMINISTRATION

INTRODUCTORY STATEMENT

The Bonneville Power Administration markets power developed at Federal generating plants in the Pacific Northwest. Power requirements continue to exceed available generating capacity, and there are indications that even under normal business conditions they will continue in this trend through 1954. The intensified defense effort has affected the power situation and since July 1950, the Administration has agreed to supply 160,000 kilowatts of additional interruptible power for defense loads. Some firm power will be available for these loads in 1953 when Hungry Horse Dam is in operation. It will be possible to supply additional power only to those plants capable of using interruptible power during the next 3 years unless firm power service for national defense industries is allocated even at the risk of curtailing general service in the region.

Revenues in fiscal year 1950 were $31,200,000. 1951 and 1952 revenues are estimated at $32,600,000 and $33,800,000.

CONSTRUCTION

Construction, Bonneville Power Administration, Department of the Interior—

For construction and acquisition of transmission lines, substations, and appurtenant facilities, as authorized by law, to remain available until expended, [$39,500,000] *$69,500,000* of which not to exceed [$17,000,000] *$21,000,000* is for liquidation of obligations incurred pursuant to authority previously granted[; and, in addition, the Administrator is authorized to enter into contracts for the purposes of this appropriation in an amount not to exceed $20,000,000: *Provided*, That unexpended balances of prior year appropriations, including unused balances of related contract authorizations, for the foregoing purposes shall be transferred to and merged with this appropriation]. (*16 U. S. C. 832–832l; Executive Order 8526; 43 U. S. C. 593-A; 16 U. S. C. 825s; 59 Stat. 10, 21–22; Interior Department Appropriation Act, 1951.*)

Appropriated 1951, **$39,500,000** Estimate 1952, **$69,500,000**

FUNDS AVAILABLE FOR OBLIGATION

	1950 actual	1951 estimate	1952 estimate
Direct Obligations			
Appropriation or estimate		$39,500,000	$69,500,000
Applied to contract authorization		−17,000,000	−21,000,000

Total available for obligation		42,500,000	48,500,000
Comparative transfer from "Construction, operation, and maintenance, Bonneville power transmission system"	$32,925,173	753,799	
Total direct obligations	32,925,173	43,253,799	48,500,000
Reimbursable Obligations			
Reimbursements for services performed		200,000	50,000
Comparative transfer from "Construction, operation, and maintenance, Bonneville power transmission system"	314,518		
Total obligations	33,239,691	43,453,799	48,550,000

PROGRAM AND PERFORMANCE

During 1952, the Administration will carry forward construction of transmission facilities previously approved by the Congress and initiate construction of new facilities to conform with generation schedules through 1955 as follows:

Project	Jurisdiction	First generation (fiscal year)	Maximum capacity (kilowatts)	
			Present or first year	Ultimate
Bonneville	Corps of Engineers	In operation	564,000	564,000
Grand Coulee	Bureau of Reclamation	do	1,932,000	2,172,000
Hungry Horse	do	1953	150,000	300,000
Detroit	Corps of Engineers	1953	50,000	100,000
McNary	do	1954	210,000	980,000
Big Cliff	do	1954	18,000	18,000
Albeni Falls	do	1955	42,600	42,600
Lookout Point	do	1955	115,000	115,000
Dexter	do	1955	15,000	15,000
Hells Canyon	Bureau of Reclamation	1955	200,000	900,000

Between now and the end of 1955, the generation to be added by eight new plants, along with the generating capacity still to be added at Grand Coulee, require additional transmission facilities.

In addition to requirements for the basic system of 230 kilovolt lines and substations interconnecting the sources of power and the loads, the budget provides facilities to supply power to adjacent areas and for connection of customers with this basic grid at appropriate lower voltages.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

Also, plans initiated in 1951 will continue to be developed in connection with the marketing of power from Chief Joseph Dam now under construction by the Corps of Engineers, as well as Hells Canyon, Ice Harbor and The Dalles dams, for which initiation of construction is contemplated in this budget.

Supplemental appropriations during 1951 are contemplated for the acceleration of construction of facilities to serve increasing loads, primarily for defense installations, in Oregon, Washington, and Montana.

[1] These figures were derived by applying the percentage of the total applicable to this appropriation on the basis of an analysis of specific activities. Since the Bonneville Power Administration realizes definite economies from conducting the construction program and the operation and maintenance program on an integrated staff basis, it is not possible in many cases to assign individual positions to a specific program. This method of prosecuting the Administration's programs is reflected in administrative provisions contained in appropriation language for the Bonneville Power Administration.

OPERATION AND MAINTENANCE

Operation and Maintenance, Bonneville Power Administration, Department of the Interior—

For necessary expenses of operation and maintenance of the Bonneville transmission system and of marketing electric power and energy, [$5,000,000] *$5,500,000.* (*16 U. S. C. 832–832l; Executive Order 8526; 43 U. S. C. 598-A; 16 U. S. C. 825s; 59 Stat. 10, 21–22; Interior Department Appropriation Act, 1951.*)

Appropriated 1951, **$5,000,000** Estimate 1952, **$5,500,000**

FUNDS AVAILABLE FOR OBLIGATION

	1950 actual	1951 estimate	1952 estimate
Appropriation or estimate		$5,000,000	$5,500,000
Comparative transfer from "Construction, operation, and maintenance, Bonneville power transmission system"	$4,096,494		
Total obligations	4,096,494	5,000,000	5,500,000

PROGRAM AND PERFORMANCE

This program provides for management of the Administration's regional power network and for power marketing and administration in connection with the disposition of Federal power at wholesale from Bonneville and Grand Coulee Dams.

1. *Maintenance of transmission system.*—The Federal transmission system in the Pacific Northwest is expanding to provide for the region's power requirements in line with increased generating capacity from Federal hydroelectric projects. The following table indicates the facilities in service as of June 30, 1950, and facilities scheduled for operation as of June 30, 1951, and June 30, 1952:

TRANSMISSION FACILITIES AND POWER CAPABILITIES

	June 30, 1950	June 30, 1951	June 30, 1952
Circuit miles of transmission lines	4,041	4,377	5,019
Number of substations	108	123	132
Capacity of substations (kilovolt-amperes)	3,389,808	3,949,300	4,831,300
Energy available in average water year, (megawatt-hours)	13,490,400	14,830,680	15,400,080

Extension of the Federal power system requires additional maintenance crews throughout the transmission area.

2. *Operation of transmission system.*—The growth of the transmission system will increase the complexity and extent of operations in 1952. It will be necessary to man newly energized substations, to schedule and dispatch power, to transmit the additional energy available to the Federal system in fiscal year 1952, and to provide service to the additional customers and metering points which will be provided in fiscal year 1952, as indicated in the following table:

	June 30, 1951	June 30, 1952
Number of customers	110	119
Number of points of delivery	246	259

3. *Power marketing.*—Major aspects of this work are related to the planning of transmission facilities, the engineering of potential transmission requirements based on load forecasts, the determination of economic feasibility of these transmission additions, negotiations for new or revised power contracts, development of wholesale power rates, review of resale power rates, and preparation and collection of power bills. Integration of new generating plants now being constructed, and those authorized for

OPERATION AND MAINTENANCE—continued

Operation and Maintenance, Bonneville Power Administration, Department of the Interior—Continued

future construction with existing plants on the Columbia River, requires detailed consideration of operating plans in order to achieve maximum benefits from the Federal Government's investment in power facilities.

4. *General administration.*—Program management activities, fiscal and administrative services, and other activities not specifically assignable to the operation and maintenance of the system are provided. The 1952 estimates for these items are directly related to maintenance and operation activities which increase due to the addition of new transmission facilities.

OBLIGATIONS BY ACTIVITIES

NOTE.—These figures were derived by applying the percentage of the total applicable to this appropriation on the basis of an analysis of specific activities. Since the Bonneville Power Administration realizes definite economies from conducting the construction program and the operation and maintenance program on an integrated staff basis, it is not possible in many cases to assign individual positions to a specific program. This method of prosecuting the Administration's programs is reflected in administrative provisions contained in appropriation language for the Bonneville Power Administration.

ADMINISTRATIVE PROVISIONS

Appropriations of the Bonneville Power Administration shall be available to carry out all the duties imposed upon the Administrator pursuant to law, including [personal services in the District of Columbia;] *services as authorized by Section 15 of the Act of August 2, 1946 (5 U. S. C. 55a), at rates not to exceed $100 per diem for individuals, when authorized by the Secretary;* purchase [(] *of* not to exceed [seventeen] *twenty-two passenger motor vehicles* of which twelve shall be for replacement only[)] and hire of passenger motor vehicles]; *and* purchase (not to exceed two) of aircraft[; and printing and binding]. Appropriations made herein to the Bonneville Power Administration shall be available in one fund, except that the appropriation herein made for operation and maintenance shall be available only for the service of the current fiscal year.

[Not to exceed 12 per centum of the appropriation for construction herein made for the Bonneville Power Administration shall be available for construction work by force account or on a hired-labor basis, except in case of emergencies, local in character, so declared by the Bonneville Power Administrator.] *(16 U. S. C. 832–832l; Executive Order 8526; 43 U. S. C. 593–A; 16 U. S. C. 825s; 59 Stat 10, 21–22; Interior Department Appropriation Act, 1951.)*

PROGRAM AND PERFORMANCE

The Bureau administers 737 million acres of public land in the United States and Alaska in the interest of conserving forest, range, mineral, and water resources.

1. *Lease and disposal of lands and mineral resources.*—An increase is proposed for 1952 to reduce the backlog of applications for leases, permits, land patents, and sale of lands, etc., thereby increasing the revenue to the Federal Government and opening new lands for exploration and development. The figures are:

	1950 actual	1951 estimate	1952 estimate
Number of applications filed and reopened	43,499	46,000	48,000
Number of cases completed	49,483	50,220	56,700
Backlog of cases at end of year	39,763	35,543	26,843
Treasury receipts from this source	$30,275,000	$32,500,000	$34,250,000

2. *Land classification.*—Before disposal, lands must be examined to determine whether they are most suitable for agriculture, grazing, forestry or other purposes. Information on which to base planning operations is lacking for more than 300 million acres of land in the United States and Alaska. The 1952 program is designed to reduce accumulated backlog, to satisfy demands for agricultural settlement in Alaska, and to provide for additional classification by areas.

3. *Management of grazing lands.*—Increased emphasis is proposed on the protection of the range from fire and erosion, the issuance of term permits instead of temporary licenses, determining the proper degree of stocking to prevent overgrazing, and better control over the use of the 170 million acres of public range land by 30,000 users. Treasury receipts from the program are expected to rise from $1.5 million in 1950 to over $2 million in 1952.

4. *Forest management.*—The Bureau manages 60 million acres of forest land of which 125 million are in Alaska. With the opening of access roads to new timber stands and accelerated sales to meet the increased demand for timber, the Bureau expects to collect $9,000,000 in 1952 as compared to $4,005,155 in 1950. The 1952 program contemplates a continuation of the establishment of sustained-yield units of timber, additional inventorying and a sales program designed to meet the current needs.

5. *Cadastral surveys.*—Fifteen percent or over 113 million acres of the total area of 11 Western States, and over 99 percent or over 350 million acres of the total area of Alaska remains to be surveyed for legal land boundaries. The 1952 program will provide original survey and also resurveys of areas in the most urgent need for such basic data.

6. *Soil and moisture conservation.*—Seventy-six million acres of public land (almost 50 percent of the land in grazing districts) are in a state of severe to critical erosion. Some measure of rehabilitation has been undertaken on 17 million acres. The 1952 estimates provide for this work on the same scale as in fiscal year 1951.

7. *Squaw Butte experiment station.*—The Bureau will continue experiments on methods for rehabilitating, stabilizing, and utilizing range lands.

8. *Fire suppression.*—The 1952 estimate provides for the cost of suppressing fires on or threatening lands under the Bureau's jurisdiction.

9. *General administration.*—The general supervision and business administration of the Bureau, including all organization, legal, and general administrative services, is included in this activity. The 1952 program contemplates strengthening of the accounting staff and small additions to the group engaged in other business activities.

CONSTRUCTION

Construction, Bureau of Land Management—

For construction of access roads on the revested Oregon and California Railroad and reconveyed Coos Bay Wagon Road grant lands; acquisition of rights-of-way and of existing connecting roads adjacent to such lands; and for acquisition, construction, or reconstruction of buildings and appurtenant facilities in Alaska; to remain available until expended, [$700,000, of which not to exceed $200,000 is for liquidation of obligations incurred pursuant to authority granted under the head "Revested Oregon and California Railroad and reconveyed Coos Bay Wagon Road grant lands" in the Interior Department Appropriation Act, 1950] *$1,000,000*: *Provided*, That the [amounts of appropriation made] *amount appropriated* herein for road construction shall be transferred to the Bureau of Public Roads, Department of Commerce. (*50 Stat. 874; 16 U. S. C. 594; 43 U. S. C. 2; Interior Department Appropriation Act, 1951.*)

Appropriated 1951, **$700,000** Estimate 1952, **$1,000,000**

FUNDS AVAILABLE FOR OBLIGATION

	1950 actual	1951 estimate	1952 estimate
Appropriation or estimate		$700,000	$1,000,000
Unobligated balance, savings under sec. 1214		−50,000	
Total obligations		650,000	1,000,000

PROGRAM AND PERFORMANCE

1. *Access roads.*—This is to continue a program begun with the 1951 appropriation of constructing access roads to stands of high quality timber in the revested Oregon and California grant lands area of western Oregon. This will allow a more intensive harvesting of timber under sustained-yield management plans. Heretofore it has not been possible, except under favored conditions, to log areas of mature timber remote from traveled roads and as a result, timber ready for market has been lost by becoming over-age and subject to deterioration through disease, insect pests, and fire.

PROGRAM AND PERFORMANCE

Fifteen percent of moneys deposited in the Oregon and California land grant fund are for payment of deficiencies in taxes to counties in which the lands are situated (50 Stat. 875).

Excess Payments, Coos Bay Wagon Road Grant Lands—

Appropriated (estimate) 1951, **$10,000** Estimate 1952, **$10,000**

FUNDS AVAILABLE FOR OBLIGATION

Appropriation or estimate—1950, $25; 1951, $10,000; 1952, $10,000.

PROGRAM AND PERFORMANCE

Refunds are made of excess payments for timber and other receipts derived from the Coos Bay Wagon Road grant lands in Oregon (40 Stat. 1179; 53 Stat. 753–754; Comp. Gen. decision A–91687, B–6728, Dec. 16, 1940).

OBLIGATIONS BY ACTIVITIES

Refunds of excess payments—1950, $25; 1951, $10,000; 1952, $10,000.

OBLIGATIONS BY OBJECTS

13 Refunds, awards, and indemnities—1950, $25; 1951, $10,000; 1952, $10,000.

Excess Payments, Oregon and California Grant Lands—

PROGRAM AND PERFORMANCE

Refunds are made of excess payments for timber and other receipts derived from the Oregon and California grant lands (39 Stat. 218; 44 Stat. 915; 50 Stat. 874; Comp. Gen. Decision A–91687, B–6728, Dec. 16, 1940).

OBLIGATIONS BY ACTIVITIES

Refunds of excess payments—1950, $13,598; 1951, $2,291; 1952, $10,000.

OBLIGATIONS BY OBJECTS

13 Refunds, awards, and indemnities—1950, $13,598, 1951, $2,291; 1952, $10,000.

Payments to Coos and Douglas Counties, Oregon, in lieu of taxes on Coos Bay Wagon Road Grant Lands—

Appropriated (estimate) 1951, **$285,182** Estimate 1952, **$350,000**

FUNDS AVAILABLE FOR OBLIGATION

Appropriation or estimate—1950, $43,955; 1951, $285,182; 1952, $350,000.

PROGRAM AND PERFORMANCE

Payments in lieu of taxes, of not to exceed 75 percent of the receipts derived in any 1 year from the Coos Bay Wagon Road grant lands in Oregon, are made to Coos and Douglas Counties to be used for common schools, roads, highways, bridges, and port districts (53 Stat. 753–754).

OBLIGATIONS BY ACTIVITIES

Payments in lieu of taxes—1950, $43,955; 1951, $285,182; 1952, $350,000.

OBLIGATIONS BY OBJECTS

11 Grants, subsidies, and contributions—1950, $43,955; 1951, $285,182; 1952, $350,000.

Payments to Counties, Oregon and California Grant Lands—

Appropriated (est.) 1951, **$1,812,457** Estimate 1952, **$3,750,000**

FUNDS AVAILABLE FOR OBLIGATION

Appropriation or estimate—1950, $1,761,766; 1951, $1,812,457; 1952, $3,750,000.

PROGRAM AND PERFORMANCE

This appropriation of 50 percent of all moneys deposited in the Oregon and California land grant fund is for payment to the counties in which the lands revested under the act of June 9, 1916 (39 Stat. 218), are situated. Moneys are used as other county funds.

OBLIGATIONS BY ACTIVITIES

Payments to counties—1950, $1,761,766; 1951, $1,812,457; 1952, $3,750,000.

OBLIGATIONS BY OBJECTS

11 Grants, subsidies, and contributions—1950, $1,761,766; 1951, $1,812,457; 1952, $3,750,000.

Total obligations		11,819,942	14,700,000

PROGRAM AND PERFORMANCE

This appropriation of 37½ percent of the amounts derived from bonuses, royalties, and rentals under the provisions of the Mineral Leasing Act (30 U. S. C. 191), and 37½ percent of moneys received from bonuses, royalties and rentals from leases of potash deposits (30 U. S. C. 285), is for payment to the States or Territory of Alaska within the boundaries of which the leased lands or deposits are or were located. This appropriation replaces "Payments to States and Alaska, receipts from mineral leasing, public lands."

OBLIGATIONS BY ACTIVITIES

Payments to States from receipts—1951, $11,819,942; 1952, $14,700,000.

OBLIGATIONS BY OBJECTS

11 Grants, subsidies, and contributions—1951, $11,819,942; 1952, $14,700,000.

Payments to Territory of Alaska, Income and Proceeds, Alaska School Lands—

Prior year balance available		229	
Total available for obligation	727	979	750
Balance available in subsequent year	−229		
Total obligations	498	979	750

PROGRAM AND PERFORMANCE

The entire proceeds or income derived by the United States from sale of timber and disposition of the lands or the minerals therein from sections 16 and 36 in each township are paid to the Territorial treasurer for the support of common schools, and the proceeds derived from section 33 in each township in the Tanana Valley for the support of a Territorial agricultural college and school of mines (38 Stat. 1214; 53 Stat. 1243; 48 U. S. C. 353).

OBLIGATIONS BY ACTIVITIES

Payments for support of common schools—1950, $498; 1951, $979; 1952, $750.

OBLIGATIONS BY OBJECTS

11 Grants, subsidies, and contributions—1950, $498; 1951, $979; 1952, $750.

Allocations Received From Other Appropriation Accounts—

NOTE.—Obligations incurred under allocations from other appropriations are shown in the schedules of the parent appropriations, as follows:
"Control of forest pests, Department of Agriculture (white pine blister rust control)."
"Construction and rehabilitation, Bureau of Reclamation."

Total, Bureau of Land Management, general and special appropriations:

Appropriated **1951, $23,228,837** Estimate 1952, **$29,397,350**

BUREAU OF INDIAN AFFAIRS

INTRODUCTORY STATEMENT

The United States has two major responsibilities toward the Indian people and the natives of Alaska. The most basic of these is the management of trust property, including its protection and development; the second is to provide services which otherwise are not available to Indians and which are normally provided other citizens through Government and private agencies. To discharge these responsibilities, it is necessary to provide health, education, and welfare services; manage, protect, and develop Indian resources; construct, operate, and maintain buildings and utilities, roads, and irrigation systems; and to provide credit to Indian tribes for the purpose of promoting the economic development of the tribes and of their members. The adequate discharge of these two major responsibilities will prepare the various Indian and native groups in the United States and Alaska to assume responsibility for their own affairs and eventually take their proper place in the social and economic life of the Nation.

HEALTH, EDUCATION, AND WELFARE SERVICES

Health, Education, and Welfare Services, Indian Affairs—

For expenses necessary to provide health, education, and welfare services for Indians, either directly or in cooperation with States and other organizations, including payment (in advance or from date of admission) of care, tuition, assistance, and other expenses of Indians in boarding homes, institutions, or schools; grants and other assistance to needy Indians; maintenance of law and order, and payment of rewards for information or evidence concerning violations of law on Indian reservations or lands; *and* operation of Indian arts and crafts shops and museums; [and per diem in lieu of subsistence and other expenses of Indians participating in folk festivals; $40,252,328] *$43,600,000.*

[For an additional amount for "Health, Education, and Welfare Services" for the purpose of cooperating with Independent School District Numbered 5, Cass County, Minnesota, at Walker, Minnesota, for the construction, extension, equipment, and improvement of public school facilities at Walker, Minnesota, as authorized by the Act of July 1, 1940 (54 Stat. 707, 708), the Act of July 24, 1947 (61 Stat. 414), and the Act of August 17, 1950 (Public Law 709, Eighty-first Congress), $80,000, to remain available until expended.] *(25 U. S. C. 13; 48 U. S. C. 169, 250a, 250f; 5 U. S. C. 5a; Act of Apr. 19, 1950, Public Law 474; Interior Department Appropriation Act, 1951; Supplemental Appropriation Act, 1951.)*

Appropriated 1951, [a] **$40,332,328** Estimate 1952, **$43,600,000**

[a] Includes $80,000 appropriated in the Supplemental Appropriation Act, 1951.

Total reimbursable obligations	507,083	204,418	87,214
Total obligations	33,616,211	40,205,861	43,687,214

PROGRAM AND PERFORMANCE

1. *Hospitals, disease preventive, and curative services.*—Sixty-three hospitals, sanatorium and medical centers are operated. In addition, preventive and curative health services are provided by medical personnel working among the Indians. During 1952, it is estimated that an average of 2,905 patients per day will receive in-patient care, compared with 2,825 in 1951 and 2,493 in 1950.

2. *Educational assistance, facilities, and services.*—During the budget year the Bureau will operate boarding and day schools in the United States and Alaska for an enrollment of 32,885 Indian pupils where available public-school facilities are inadequate or are nonexistent. Financial assistance will be extended to public-school districts on behalf of an estimated 21,846 Indian children in public schools. Provision is also made for the care of 1,423 Indian children in mission schools and for the education and care of a limited number of physically handicapped children of school age in non-Federal institutions.

3. *Welfare and guidance services.*—Programs under this activity consist of welfare services to Indian children and adults and technical and advisory services to governing bodies of Indian tribes. The 1952 estimate provides for a social-service caseload of about 5,784 persons per month, compared with 6,100 for 1951 and 8,755 for 1950. Foster-home care is provided for 450 children in 1952, compared with 430 in 1951 and 423 in 1950.

4. *Placement services.*—Assistance in finding job opportunities outside reservations will be given to Indians who live on overcrowded reservations, both to relieve the overcrowding and to aid in integration of the Indian people with the general population. Placement personnel will be stationed at area field offices, on reservations, and in offices at several selected cities. Staff offices are proposed at or near reservations and in some industrial and commercial areas to arrange training, movement, employment, and housing for Indians. The increasing needs for manpower in industry and agriculture will benefit, in part, from this program. The new program for 1952 contemplates assistance to about 1,500 families, or 2,400 individuals.

5. *Maintaining law and order.*—A small increase in 1952 will provide for further improvement in law-enforcement activities.

PROGRAM AND PERFORMANCE

1. *Forest and range lands.*—This program embraces the management, protection, and utilization of Indian forest, range, range water, and wildlife resources on nearly 50 million acres of Indian lands. In 1950, approximately 623 million board-feet of timber was cut on Indian lands, having a stumpage value in excess of $5,650,000. It is proposed to make a moderate increase in timber cuts in 1951 and 1952. About 840,000 head of livestock were grazed on Indian lands in 1950. The grazing value of this use exceeded $5,000,000.

2. *Fire suppression.*—This program is for suppression or emergency prevention of fires on or threatening Indian reservations.

3. *Agricultural and industrial assistance.*—Improved methods in farming, homemaking, and the use of credit for agricultural and small-business enterprises are taught Indians to enable them to improve their economic condition through their own efforts.

4. *Soil and moisture conservation.*—The economic rehabilitation of the Indian people is fostered through the development and initiation of land-use practices to check loss of productive soil by erosion and promote more effective utilization of their soil and water resources. Approximately 27 million acres, or 48 percent, of Indian-owned lands are severely or critically eroded. Indian beneficiaries are contributing the equivalent of $7 for each $1 expended under this program. The value of

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

increased production on 17 reservations for the past year was $27 for each $1 expended under this program.

5. *Operation, repair, and maintenance of Indian irrigation systems.*—Approximately 300 irrigation projects on Indian lands, involving about 100,000 acres, are operated and maintained. About 70 percent of the cost of operating these projects is financed from collections.

6. *Repair and maintenance of roads and trails.*—Over 20,000 miles of roads serving isolated Indian areas are maintained where local government road-maintenance organizations usually do not exist.

7. *Development of Indian arts and crafts.*—This activity fosters production and marketing of the products of Indian crafts through assisting the organization of production groups; establishing standards of quality and genuineness; and improving markets, design, and production methods.

8. *Management of Indian trust property.*—This activity provides accounting service in connection with Indian trust funds not on deposit in the United States Treasury; the purchase, sale, and lease of tribal lands, and the probate of Indian estates; and the safeguarding of Indian rights as related to Indian property and individual and tribal moneys.

9. *Repair and maintenance of buildings and utilities.*—This activity provides for the maintenance of buildings, utilities, and communication systems on Indian reservations.

PROGRAM AND PERFORMANCE

1. *Buildings and utilities.*—This activity provides for the construction of hospitals, schools, school dormitories, quarters, office, and other buildings; improvement to sewage and water works; major repairs and rehabilitation of existing buildings and utilities; preparation of plans; and engineering, supervision, and surveys.

2. *Roads and trails.*—The work proposed is principally the rebuilding of worn-out, unsafe, and low-standard roads and bridges on Indian reservations. The 1952 program contemplates the continuation of the road program on the Navajo and Hopi reservations and the completion of small projects under way at other jurisdictions.

3. *Irrigation systems.*—This work consists of the construction, extension, and rehabilitation of irrigation systems and land subjugation on Indian reservations. The major portion of the work in 1952 will be performed on the Colorado River, Navajo-Hopi, and Flathead Indian Reservations and the Wapato project.

4. *Land acquisition.*—These funds are used to acquire lands which are essential to Indian farming and stock raising and for proper administration of forest lands. This program will be deferred in 1952.

PROGRAM AND PERFORMANCE

This fund is used to assist Indians in acquiring livestock, farm, and other equipment needed to establish themselves in productive activities and establishing tribal enterprises. This fund and miscellaneous tribal funds provide the only source of loans for the great majority of Indians who cannot borrow from banks on personal notes or chattel mortgages and cannot obtain loans from other credit sources because of the restricted nature of their property.

TRIBAL FUNDS

Trust accounts:

Indian Tribal Funds—

In addition to the tribal funds authorized to be expended by existing law, there is hereby appropriated [$2,437,965] *$2,075,000* from tribal funds not otherwise available for expenditure for the benefit of Indians and Indian tribes, including pay and travel expenses of employees; care, tuition and other assistance to Indian children attending public and private schools (which may be paid in advance or from date of admission); purchase of land and improvements on land, title to which shall be taken in the name of the United States in trust for the tribe for which purchased; lease of lands and water rights; [printing and binding;] compensation and expenses of attorneys and other persons employed by Indian tribes under approved contracts; pay, travel and other expenses of tribal officers, councils, and committees thereof, or other tribal organizations, including mileage for use of privately owned automobiles and per diem in lieu of subsistence at rates established administratively but not to exceed those applicable to civilian employees of the Government; relief of Indians, without regard to section 7 of the Act of May 27, 1930 (46 Stat. 391), including cash grants; and employment of a recreational director for the Menominee Reservation and a curator for the Osage Museum, each of whom shall be appointed with the approval of the respective tribal councils and without regard to the classification laws: *Provided*, That in addition to the amount appropriated herein, tribal funds may be advanced to Indian tribes during the current fiscal year for such purposes as may be designated by the governing body of the particular tribe involved and approved by the Secretary [. Any tribal funds advanced under this authority shall be reported to the Congress in the annual Budget for the fiscal year 1952]: *Provided further*, That no part of this appropriation shall be used for the acquisition of land or water rights within the States of Nevada, Oregon, Washington, and Wyoming, either inside or outside the boundaries of existing Indian reservations. (*25 U. S. C. 123; Interior Department Appropriation Act, 1951.*)

BUREAU OF RECLAMATION

INTRODUCTORY STATEMENT

The Bureau of Reclamation plans, constructs, and operates facilities to irrigate arid lands, furnish domestic water supplies, control floods, and develop related hydroelectric power in the 17 Western States. Activities in Alaska include water-resources investigations as well as construction on the Eklutna power project. The planning and construction program is coordinated with related facilities constructed, or planned to be constructed, by other agencies. The costs of construction, maintenance, and operations allocated to irrigation, water supply, and power are reimbursable to the Federal Government. Construction costs allocated to flood control, navigation, and fish and wildlife conservation are borne by the Federal Government. Operation and maintenance costs for these functions are presently reimbursable.

Appropriations to the Bureau are made from the general fund of the Treasury and three special funds. The special funds are (*a*) the reclamation fund, derived from certain irrigation and power revenues, and receipts from the sale, lease, and rental of certain public lands in the Western States; (*b*) the Colorado River dam fund, derived from the revenues of the Boulder Canyon project; and (*c*) the Colorado River development fund, derived from transfers of money from the Colorado River dam fund. The estimates of appropriation for 1952 are summarized by source as follows:

SUMMARY OF 1952 ESTIMATES OF APPROPRIATION

ANNUAL APPROPRIATION, GENERAL AND SPECIAL FUNDS

Annual appropriation	Total	General fund	Reclamation fund	Colorado River dam fund	Colorado River development fund
General investigations	$5,500,000	$235,000	$4,765,000		$500,000
Construction and rehabilitation	223,690,000	190,819,600	32,870,400		
Operation and maintenance	16,385,000	1,830,100	12,883,900	$1,671,000	
General administrative expenses	6,000,000		6,000,000		
Emergency fund, irrigation and power systems	500,000		500,000		
Total	252,075,000	192,884,700	57,019,300	1,671,000	500,000

For carrying out the functions of the Bureau of Reclamation as provided in the Federal reclamation laws (Act of June 17, 1902, 32 Stat. 388, and Acts amendatory thereof or supplementary thereto) and other Acts *and treaties* applicable to that Bureau, as follows:

GENERAL INVESTIGATIONS

General Investigations, Bureau of Reclamation, Department of the Interior—

For engineering and economic investigations of proposed Federal reclamation projects and studies of water conservation and development plans; engineering and economic investigations, as a basis for legislation, and for reports thereon to Congress, relating to projects for the development and utilization of the water resources of Alaska; formulating plans and preparing designs and specifications for authorized Federal reclamation projects or parts thereof prior to *initial allocation of* appropriations for construction of such projects or parts; and activities preliminary to the reconstruction, rehabilitation and betterment, financial adjustment, or extension of existing projects; to remain available until expended, [$5,875,000] *$5,500,000*, of which [$5,116,000] *$4,765,000* shall be derived from the reclamation fund and $500,000 shall be derived from the Colorado River development fund: *Provided*, That the expenditure of any sums from this appropriation for investigations of any nature requested by States, municipalities, or other interests shall be upon the basis of the State, municipality, or other interest advancing at least 50 per centum of the estimated cost of such investigations[: *Provided further*, That the limitation on the amount available for surveys and preconstruction work in connection with the North Side pumping division, Minidoka project, Idaho, stated in the Interior Department Appropriation Act, 1950, is increased from $725,000 to $1,000,000: *Provided further*, That, except as herein expressly provided with respect to investigations in Alaska, no part of this appropriation shall be expended in the conduct of activities which are not authorized by law]. (*Interior Department Appropriation Act, 1951.*)

Appropriated 1951, **$5,875,000** Estimate 1952, **$5,500,000**

NOTE.—The transfers shown above exclude $669,810 of obligated appropriation balances also transferred from appropriations as follows:

"Reclamation fund, special fund"	$579,386
"Colorado River development fund"	74,717
"General fund: Investigations, water power resources of Alaska"	15,707

PROGRAM AND PERFORMANCE

Surveys and investigations are performed to determine feasibility of potential reclamation projects. Detailed plans are developed for authorized projects prior to appropriation of construction funds. Examinations of existing projects pertaining to rehabilitation and necessary financial adjustments are made. Investigations of all types are scheduled as follows:

INVESTIGATIONS

	1950 actual	1951 estimate	1952 estimate
Completed	16	69	50
Continued	159	126	93
Initiated	39	25	4

1. *Engineering and economic investigations.*—Investigations are conducted to establish plans for development of river basins or subbasins, including detailed investigations of potential projects, prior to authorization. The program for 1952 provides for the completion of reports of investigation as to feasibility on some 20 potential projects. The estimate also provides for the initiation of a small program of research on basic properties of construction materials in the Denver laboratory of the chief engineer and studies of economic uses of materials and similar engineering investigations.

2. *Advance planning.*—Detailed field data are collected, designs and specifications prepared, and repayment plans completed, for authorized projects, prior to requesting appropriation for construction.

3. *Investigation of existing projects.*—Surveys, investigations, and other activities are performed to determine the necessity for, and extent of, reconstruction, rehabilitation and betterment, financial adjustment, and water conservation on existing projects.

4. *Alaskan investigations.*—Engineering and economic investigations relating to projects for the development and utilization of the water resources of Alaska will be continued.

CONSTRUCTION AND REHABILITATION

Construction and Rehabilitation, Bureau of Reclamation, Department of the Interior—

For construction and rehabilitation of authorized reclamation projects or parts thereof (including power transmission facilities) and for other related activities, as authorized by law, to remain available until expended, [$295,828,000] *$223,690,000*, of which [$25,135,700] *$32,870,400* shall be derived from the reclamation fund[, and in addition thereto the Commissioner of Reclamation is hereby authorized to incur obligations and enter into contracts for additional work, materials, and equipment in an amount not exceeding $3,000,000 for power transmission lines and substations in the fiscal year 1951: *Provided,* That hereafter when funds appropriated under this head are transferred to the credit of the appropriate regional disbursing officer of the Treasury Department for expenditure in connection with Hoover Dam and related works, such funds, solely for the purpose of computing interest on advances under the provisions of section 2 of the Act of December 21, 1928, as amended (43 U. S. C. 617a (b), 617a (d), 618e), shall be considered as if advanced to the Colorado River Dam fund: *Provided further,* That $3,000,000 of the funds provided in this paragraph plus $3,000,000 contract authority shall be available for construction of transmission lines and substations in South Dakota, to include a transmission loop from Fort Randall through the load centers of Armour, Huron, Aberdeen, Andover, Watertown, Brookings, Sioux Falls, and Gavins Point to Fort Randall, and lines from Fort Randall to Winner and from Rapid City to Midland: *Provided further,* That in order to promote agreement among the States of Nebraska, Wyoming, and Colorado and to avoid any possible alteration of existing vested water rights, no part of this or of any prior appropriation shall be used for construction or for further commitment for construction of the Glendo unit or any feature thereof, until a definite plan report thereon has been completed, reviewed by the States of Nebraska, Wyoming, and Colorado, and approved by the Congress: *Provided further,* That no part of this or prior appropriations shall be used for construction, nor for further commitments to construction of Moorhead Dam and Reservoir, Montana, or any feature thereof until a definite plan report thereon has been completed, reviewed by the States of Wyoming and Montana, and approved by the Congress].

Of the amount appropriated under the preceding paragraph, [$1,600,000 is for liquidation of the contract authority granted under the appropriation "Reclamation fund, special fund, construction, Santa Barbara County project, California, Cachuma unit", in the Interior Department Appropriation Act, 1949; $225,700 is for partial liquidation of the contract authority granted under the appropriation "General fund, construction, advances to Colorado River dam fund, Boulder Canyon project (All-American Canal)" in the Interior Department Appropriation Act, 1950; $1,000,000 is for liquidation of the contract authority provided under the appropriation "General fund, construction, Fort Sumner project, New Mexico", in the Interior Department Appropriation Act, 1950; and $1,770,000] *$1,000,000* is for partial liquidation of the contract authority granted under the appropriation "General fund, construction, Missouri River Basin", in the Interior Department Appropriation Act, 1950. (*Interior Department Appropriation Act, 1951; Supplemental Appropriation Act, 1951.*)

Appropriated 1951, [a] **$296,928,000** Estimate 1952, **$223,690,000**

[a] Includes $1,100,000 appropriated in the Supplemental Appropriation Act, 1951.

PROGRAM AND PERFORMANCE

This program provides for the collection of preconstruction data, the preparation of designs and specifications, the award and servicing of construction contracts, the construction of authorized projects, and for the rehabilitation of existing projects.

1. *Construction.*—The 1952 program requires $228.8 million, which include $226.0 million for the continuation of work on 35 projects and 29 units in the Missouri River basin which are ready for or under construction, and continuation of investigations on other units; $1.5 million for the virtual completion of 5 projects; and $1.3 million for initiation of construction on 1 division of a power project. This program is to be financed by $219.7 million in new construction appropriations and $9.1 million from estimated balances from prior year funds. The following table indicates the present status:

ESTIMATED COST OF AUTHORIZED PROJECTS

Construction status	Number of projects, divisions, and units	Total estimated obligations	Obligations to June 30, 1950	Estimated obligations 1951	Estimated obligations 1952	Balance to complete
		Millions	*Millions*	*Millions*	*Millions*	*Millions*
Completed	46	$246.4	$246.4			
Continuing	[1] 80	5,778.4	1,632.6	$294.7	$227.5	$3,624.6
Initiated, fiscal year 1952	1	6.6	0.3		1.3	5.0
Balance authorized	6	169.0	2.4	1.6		165.0

[1] Includes 29 phase A units in the Missouri River basin.

Completed construction provides irrigation facilities to serve over 5,600,000 acres and power generating capacity of 3,168,400 kilowatts. Construction activities during 1951 and 1952 will provide facilities to irrigate an additional 546,000 acres of land in 1951 and 427,400 acres in 1952, and the installed generating capacity will be increased by 663,100 kilowatts in 1951 and 447,200 kilowatts in 1952.

[1] In addition, $3,000,000 contract authorization for the Missouri Basin project granted under the head "Construction and rehabilitation," in Public Law 759, approved September 6, 1950, was reserved under sec. 1214 of said act.

[2] $1,000,000 advanced from "Reclamation trust fund" minus $1,000,000 applied to contract authorization.

(*a*) *Major projects.*—Of the total construction appropriation, 73 percent will be required to finance 5 major projects.

The Hungry Horse project 1952 program will be allocated $22,972,000. Construction of dam, power plant, switchyard, and tunnel will continue at a peak rate with over 1,000,000 cubic yards of concrete being placed. Supply and supporting contracts will be active on a program leading to initial operation of 142,500-kilowatt generating capacity late in calendar year 1952.

The Columbia Basin project 1952 program will be allocated $27,900,000. The last two generating units will be installed, adding 216,000 kilowatts, making a total installed capacity of 1,974,000 kilowatts, and major installations in the powerhouses and switchyards will be virtually completed. Construction will continue on canals, laterals, and other irrigation facilities supplying irrigation to 67,800 acres within a gross area of 87,000 acres scheduled for 1952.

The Colorado-Big Thompson project 1952 program will be allocated $19,300,000. Construction will be continued on irrigation, generation, and transmission facilities leading to availability of water for 206,000 additional acres in 1952 and 96,250 kilowatts additional generating capacity in 1954.

The Central Valley project 1952 program will be allocated $38,350,000. Construction will continue on the initial project features, with the Friant-Kern and Madera canals being completed. Work will continue on the Delta-Mendota canal and the project distribution systems. Construction of Folsom power facilities will be under way. Work will continue on power transmission lines. Some 27,000 additional acres of land will be made irrigable during the year.

The Missouri River Basin 1952 program will be allotted $58,673,600. New funds will be expended on 19 units in the construction stage, of which 5 will be completed except for construction of additional drainage facilities as the need develops. Investigation and preconstruction activities and cooperative activities with other agencies will be continued. An additional 16,200 kilowatts of generating capacity and irrigation water for 29,100 acres of land will be made available during the year.

(*b*) *Remaining projects.*—A total allocation of $52,494,400 will be made to the 29 remaining projects to complete

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

construction of 5 projects and to continue construction on the remainder. An increase in installed power generating capacity of 215,000 kilowatts and in irrigated land of 97,500 acres will be realized during 1952.

2. *Rehabilitation and betterment.*—The rehabilitation of existing projects consists principally of the replacement of obsolete or deteriorated structures and equipment in order to preserve the older projects in a satisfactory operating condition. The rehabilitation program for 1952, under an allocation of $4,000,000, consists of work on 12 projects estimated to cost a total of $31,000,000.

OBLIGATIONS BY ACTIVITIES

OPERATION AND MAINTENANCE

Operation and Maintenance, Bureau of Reclamation, Department of the Interior—

For operation and maintenance of reclamation projects or parts thereof and of other facilities, as authorized by law; and for a soil and moisture conservation program on lands under the jurisdiction of the Bureau of Reclamation, pursuant to law, [$15,491,000] *$16,385,000*, of which [$12,001,400] *$12,883,900* shall be derived from the reclamation fund and [$1,808,000] *$1,671,000* shall be derived from the Colorado River dam fund: *Provided*, That funds advanced for operation and maintenance of reclamation projects or parts thereof shall be deposited to the credit of this appropriation and may be expended for the same objects and in the same manner as sums appropriated herein may be expended, and the unexpended balances of such advances shall be credited to the appropriation for the next succeeding fiscal year: *Provided further, That after December 31, 1951, no part of any appropriation contained in this act shall be used for payment of the cost of operation and maintenance of Imperial Dam and the All-American Canal and appurtenant works to and including Pilot Knob check and wasteway (engineer station 1098) for the purpose of diversion or carriage of water for any water user, district, or association unless and until arrangements, satisfactory to the Secretary, shall have been made for payment annually to the United States of the part of such cost allocable to such water user, district, or association. (Interior Department Appropriation Act, 1951.)*

Appropriated 1951, **$15,491,000** Estimate 1952, **$16,385,000**

Total reimbursable obligations	672,283	587,500	551,400
Total obligations	13,599,931	18,243,757	19,282,460

PROGRAM AND PERFORMANCE

The Bureau has completed to an operating stage 66 reclamation projects or divisions of projects, some of which are multipurpose projects having irrigation and power generating and transmission facilities. Forty-seven irrigation projects or portions of projects have been transferred to water users' organizations for operation and maintenance for which appropriations are not required.

It is the continuing policy of the Bureau of Reclamation to encourage water users to operate their own irrigation distribution systems as soon as they can adequately assume this responsibility. Arrangements with the irrigation districts generally provide for retention of the reservoir systems for operation by the United States. Due to the highly technical problems involved in the operation of the integrated power systems, including high-voltage transmission facilities, the Bureau operates and maintains these systems.

1. *Operation and maintenance of irrigation facilities.*—Funds will be required in fiscal year 1952 for the operation and maintenance of the Bureau's irrigation systems. The irrigation systems on 30 projects or divisions of projects

Federal Reserve Bank of St. Louis

BUREAU OF RECLAMATION—Continued

OPERATION AND MAINTENANCE—continued

Operation and Maintenance, Bureau of Reclamation, Department of the Interior—Continued

will include 61 storage dams, 31 diversion dams, 96 pumping plants, 11,967 miles of canals and laterals, 3,548 miles of drains, 1,440 miles of telephone lines, and 5,707 miles of operating roads. These facilities will provide irrigation water for 4,534,336 acres in 1952, an increase of 73,830 acres over 1951.

2. *Operation and maintenance of power facilities.*—Funds will be required in fiscal year 1952 for the operation and maintenance of the Bureau's power systems developed in connection with multipurpose projects. The power systems on 14 projects include 23 power plants and 4,800 miles of high-voltage transmission lines. This does not include the Fort Peck project transmission system which is operated by a continuing fund. Energy sales and revenues for electric operations at all reclamation plants, including Hoover Dam power plant, are shown in the following tabulation:

Fiscal year	Energy sales in million kilowatt hours	Revenue in dollars
1950	19,766	$35,343,000
1951	20,785	36,570,000
1952	21,797	42,222,000

Increase in energy sales and revenue result from the addition of 639,100 kilowatts in fiscal year 1951 and 431,000 kilowatts in fiscal year 1952. Surplus electric energy is sold at wholesale to customers such as municipalities, REA cooperatives, and other Government agencies having preference rights under law, and private utilities. Replacements and improvements of power systems are financed from operation and maintenance funds.

3. *Lower Colorado River front work and levee system.*—The estimate provides for the alleviation of current river-control problems incident to construction and operation of major storage dams in the lower Colorado River, the maintenance of river-control facilities, and the recording of river behavior from Lee Ferry to the Mexican border.

4. *Soil and moisture conservation.*—This activity provides for soil and moisture conservation measures on approximately 15 million acres of public land under Reclamation withdrawal. This work includes revegetation of overgrazed or denuded lands, development of water-spreading structures, construction of check dams and water drops, and removal of salt cedar growths.

GENERAL ADMINISTRATIVE EXPENSES

General Administrative Expenses, Bureau of Reclamation, Department of the Interior—

For necessary expenses of general administration and related functions in the offices of the Commissioner of Reclamation and in the regional offices of the Bureau of Reclamation, [$7,200,000] *$6,000,000*, to be derived from the reclamation fund and to be nonreimbursable pursuant to the Act of April 19, 1945 (43 U. S. C. 377): *Provided*, That no part of any other appropriation in this Act shall be available for activities or functions budgeted for the current fiscal year as general administrative expenses[: *Provided further*, That not exceeding $150,000 of funds available for expenditure under this appropriation shall be used for salaries and expenses in connection with information work]. (*Interior Department Appropriation Act, 1951*)

Appropriated 1951, **$7,200,000** Estimate 1952, **$6,000,000**

Total reimbursable obligations	33,826	12,300	
Total obligations	4,363,853	6,876,300	6,000,000

PROGRAM AND PERFORMANCE

The over-all administrative functions of the Bureau are provided for under this appropriation. These functions consist of (1) the determination of policy and direction of the Bureau's programs and (2) general supervision and review of operations.

1. (*a*) *Departmental and Denver offices.*—These offices establish policy and give general direction, coordination, and review to the entire reclamation program.

(*b*) *Regional offices.*—The seven regional offices carry on administration and supervision activities on a region-wide basis as distinguished from project supervision. The proposed fiscal year 1952 appropriation provides for a continuation of administration and supervisory activity at somewhat less than fiscal year 1951 reflecting the decrease in the fiscal year 1952 construction and rehabilitation program.

TRANSFER OF CERTAIN FACILITIES, FORT PECK PROJECT, MONTANA

The Secretary of the Army is hereby authorized to transfer to the Department of the Interior without exchange of funds, all of the right, title, and interest of the Department of the Army in and to the following facilities, including rights-of-way (except that portion of the rights-of-way within the Fort Peck Reservoir area), but there shall be reserved the right to use the power facilities for the purpose of transmitting power to the Fort Peck project during emergency periods when the Fort Peck power plant is not functioning: (a) the Fort Peck-Rainbow (Great Falls) 161 kilovolt transmission line; (b) the Rainbow (Great Falls) terminal facilities; and (c) the Fort Peck-Whatley 50 kilovolt transmission line and substation.

SPECIAL FUNDS

Special Funds, Bureau of Reclamation, Department of the Interior—

Sums herein referred to as being derived from the reclamation fund, the Colorado River dam fund, or the Colorado River development fund, are appropriated from the special funds in the Treasury created by the Act of June 17, 1902 (43 U. S. C. 391), the Act of December 21, 1928 (43 U. S. C. 617a), and the Act of July 19, 1940 (43 U. S. C. 618a), respectively. Such sums shall be transferred, upon request of the Secretary, to be merged with and expended under the heads herein specified; and the unexpended balances of sums transferred for expenditure under the heads "Operation and maintenance" and "General administrative expenses" shall revert and be credited to the special fund from which derived.

[PRIOR YEAR APPROPRIATIONS]

[Except for the emergency fund established in the First Deficiency Appropriation Act, 1949, the unexpended balances on June 30, 1950, of sums heretofore appropriated for the Bureau of Reclamation which were made available until expended shall be classified under

Digitized for FRASER

the corresponding heads herein established, shall be transferred to and merged with the amounts appropriated under those headings, and shall be available for the purposes therein specified.]

ADMINISTRATIVE PROVISIONS

Appropriations to the Bureau of Reclamation shall be available for [personal services in the District of Columbia;] purchase [(] *of* not to exceed [two hundred] *one hundred and twenty-nine passenger motor vehicles* for replacement only[) and hire of passenger motor vehicles; purchase of not to exceed three aircraft for replacement only; printing and binding; not to exceed $100,000 for]; services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a), including such services at rates for individuals not to exceed $100 per day[, when authorized by the Secretary]; payment of claims for damage to or loss of property, personal injury, or death arising out of activities of the Bureau of Reclamation; payment, except as otherwise provided for, of compensation and expense of persons on the rolls of the Bureau of Reclamation appointed as authorized by law to represent the United States in the negotiation and administration of interstate compacts without reimbursement or return under the reclamation laws; rewards for information or evidence concerning violations of law involving property under the jurisdiction of the Bureau of Reclamation; [payments to school districts as authorized by law (43 U. S. C. 385a and 618 (a) (e)), including payments on account of dependents of employees in field offices in project areas engaged in construction and related activities;] performance of the functions specified under the head "Operation and Maintenance Administration", Bureau of Reclamation, in the Interior Department Appropriation Act, 1945; preparation and dissemination of useful information including recordings, photographs, and photographic prints; and studies of recreational uses of reservoir areas, [as authorized by law] *and investigation and recovery of archaeological and paleontological remains in such areas in the same manner as provided for in the Act of August 21, 1935 (16 U. S. C. 461–467)*: *Provided*, That no part of any appropriation made herein shall be available pursuant to the Act of April 19, 1945 (43 U. S. C. 377), for expenses other than those incurred on behalf of specific reclamation projects except [$7,200,000 under the head] "General Administrative Expenses" and [$1,193,205 ($197,925] *amounts provided* for reconnaissance, [$769,080 for] basin surveys, and [$226,200 for] general engineering and research[)] under the head "General Investigations."

Allotments to the Missouri River Basin project from the appropriation under the head "Construction and rehabilitation" shall be available additionally for said project for those functions of the Bureau of Reclamation provided for under the head "General investigations" (but this authorization shall not preclude use of the appropriation under said head within that area), and for the continuation of investigations by agencies of the Department on a general plan for the development of the Missouri River Basin. Such allotments may be expended through or in cooperation with State and other Federal agencies, and advances to such agencies are hereby authorized.

Sums appropriated herein which are expended in the performance of functions of the Bureau of Reclamation shall be reimbursable or returnable to the extent and in the manner provided by law.

Any agency of the United States Government having title thereto is authorized to transfer to the Bureau of Reclamation, without reimbursement, parts, equipment and supplies for aircraft excess to its needs.

No part of any appropriation for the Bureau of Reclamation, contained in this chapter or in any prior Act, which represents amounts earned under the terms of a contract but remaining unpaid, shall be obligated for any other purpose, regardless of when such amounts are to be paid: *Provided*, That the incurring of any obligation prohibited by this paragraph shall be deemed a violation of section 665 of title 31 of the United States Code.

No funds appropriated to the Bureau of Reclamation for operation and maintenance, except those derived from advances by water users, shall be used for the particular benefit of lands (a) within the boundaries of an irrigation district, (b) of any member of a water users' organization, or (c) of any individual, when such district, organization, or individual is in arrears for more than twelve months in the payment of charges due under a contract entered into with the United States pursuant to laws administered by the Bureau of Reclamation.

[Not to exceed 12 per centum of the construction allotment made by the Bureau of Reclamation for any project from the appropriation "Construction and Rehabilitation" contained in this chapter shall be available for construction work by force account or on a hired-labor basis; except that not to exceed $225,000 may on approval of the Commissioner be expended for construction work by force account on any one project or Missouri Basin unit when the work is unsuitable for contract or when excessive bids are received; and except in cases of emergencies local in character, so declared by the Commissioner.]

[APPROPRIATION OF CERTAIN PAYMENTS]

[There are hereby appropriated from the reclamation fund such sums as may be necessary after June 30, 1950, to make payments, to the extent authorized by the Act of May 25, 1948 (62 Stat. 273), to the Farmers' Irrigation District on behalf of the Northport Irrigation District (North Platte project, Nebraska-Wyoming) for water carriage in accordance with contracts entered into pursuant to said act.]

[REFUNDS AND RETURNS]

[There are hereby appropriated such amounts as may be necessary after June 30, 1950, for the Bureau of Reclamation to refund overcollections, and to return deposits in excess of amounts applied to the purposes for which the deposits were accepted, each such refund or return to be derived from the account into which such overcollection or deposit shall have been covered.]

[TRANSFER OF EPHRATA AIR FORCE BASE]

[For the purpose of assisting in the construction, operation, and maintenance, and settlement programs on the Columbia Basin project in the State of Washington, the Armed Services, General Services Administration, or other Federal agency having ownership or custody thereof or interest therein, is authorized and directed to transfer to the Bureau of Reclamation, without reimbursement or transfer of funds, all of their right, title, and interest to certain buildings, facilities, and equipment at the Ephrata Air Force Base, Ephrata, Washington, including the following buildings in accordance with block and building numbers: Block 800, building numbered 68; block 1900, buildings numbered 10, 11, 12, 13, 14, 16, 17; block 2000, four buildings numbered 75, two buildings numbered 56; block 3000, buildings numbered 56, 131, 58; block 2900, buildings numbered 59, 53, 55, 57, 66, 89, 90, 85, 84, 124, 141, two buildings numbered 60, two buildings numbered 64, two buildings numbered 65; block 3300, eleven buildings numbered 28; block 3400, seven buildings numbered 28; block 3500, buildings numbered 43, 46; block 3600, buildings numbered 34, 35, 36, 38, two buildings numbered 37; block 3700, buildings numbered 35, 38, four buildings numbered 31, two buildings numbered 32, two buildings numbered 34, two buildings numbered 37; block 3800, buildings numbered 35, 38, 39, 42, two buildings numbered 37; block 4300, buildings numbered 19, 20, 21, 22; block 4400, buildings numbered 113, 114, two buildings numbered 112; block 4600, buildings numbered 134; block 4700, buildings numbered 94, 95, 96, 99, 109, 100, 35, 108, 104, 110, six buildings numbered 97; block 4800, buildings numbered 53, 40, 102, 101, 103, 105, 107, 111, two buildings numbered 32, five buildings numbered 106, three buildings numbered 98, together with one sewage-disposal plant numbered 116, one water tank numbered 115, one well, one flag pole numbered 118, two garbage racks numbered 155, two garbage racks numbered 158, one wash rack numbered 63, two grease racks numbered 62, and sewer system, water lines, electric-power lines, railroad spur and siding, road improvements, and all other facilities and equipment incident to the foregoing property, and including land and rights-of-way formerly under Reclamation withdrawal to other federally owned land on which said buildings are situate, which have heretofore or which may hereafter be declared surplus to the needs of the Armed Forces: *Provided*, That amounts equal to the value of all property transferred hereunder and used shall be charged, in the same manner as appropriations are charged, as part of the construction or appropriate other costs of the Columbia Basin project, such value to be determined by appraisal approved by the Administrator of General Services of the market value of such property current at the time of transfer hereunder less expenditures on such property by the Bureau of Reclamation prior to such transfer.]

PROGRAM AND PERFORMANCE

All revenues received from the operation of the Boulder Canyon project are deposited to the credit of the Colorado River dam fund. The fund is available for the payment of the expenses of operation and maintenance of the project, pursuant to appropriation acts; for repayment of amounts advanced by the Treasury for construction and for other purposes; for the payment of interest on the amounts advanced; and for annual payments of $300,000 to each of the States of Arizona and Nevada.

Reimbursable Obligations			
Reimbursement for services performed	5,729		
Total obligations	387,921	435,000	400,000

PROGRAM AND PERFORMANCE

There is appropriated such portion of the receipts derived from the sale and transmission of electric energy from the Corps of Engineers Fort Peck project as are needed to maintain a continuing fund of $500,000 to defray the operating expense of generation and transmission of power delivered to the Bureau of Reclamation for disposal, to defray emergency expenditures, and to insure continuous operation. All receipts in excess of this requirement are covered into the general fund of the Treasury (16 U. S. C. 833).

GEOLOGICAL SURVEY

SURVEYS, INVESTIGATIONS, AND RESEARCH

Surveys, Investigations, and Research, Geological Survey—

For expenses necessary for the Geological Survey to perform surveys, investigations, and research covering topography, geology, and the mineral and water resources of the United States, its territories and possessions; classify lands as to mineral character and water and power resources; give engineering supervision to power permits and Federal Power Commission licenses; enforce departmental regulations applicable to oil, gas, and other mining leases, permits, licenses, and operating contracts; and publish and disseminate data relative to the foregoing activities; [$19,382,000] *$22,900,000,* of which [$3,100,000] *$3,300,000* shall be available only for cooperation with States or municipalities for water resources investigations: *Provided,* That the share of the Geological Survey in any topographic mapping or water resources investigations carried on in cooperation with any State or municipality shall not exceed 50 per centum of the cost thereof. (*43 U. S. C. 31; Interior Department Appropriation Act, 1951.*)

Annual definite appropriation:

Appropriated 1951, **$19,382,000** Estimate 1952, **$22,900,000**

PROGRAM AND PERFORMANCE

The Geological Survey (*a*) performs geologic and topographic surveys, (*b*) makes water resource investigations, (*c*) classifies the public lands as to mineral and water value, and (*d*) supervises drilling and mining operations on public lands.

1. *Topographic surveys and mapping.*—Topographic maps of the United States, its Territories, and possessions are prepared for use of Government agencies and the public. For 1952, an estimated 65,000 square miles of engineering and general-purpose maps will be compiled, compared with 51,200 in 1950 and 61,000 in 1951. Nearly three-fourths of the total area of the United States and Alaska remains to be adequately mapped. The program proposed for 1952, to be financed by direct appropriation, State cooperative offerings, and an allocation from Missouri River Basin development funds, will provide for the mapping of about one-fiftieth of the 2½ million square miles that still remain to be mapped.

Federal Reserve Bank of St. Louis

GEOLOGICAL SURVEY—Continued

SURVEYS, INVESTIGATIONS, AND RESEARCH—continued

Surveys, Investigations, and Research, Geological Survey—Con.

2. *Geologic and mineral resource surveys and mapping.*—Geologic and related scientific activities are aimed at (1) providing an accurate appraisal of the Nation's mineral resources, (2) scientific exploration for additional mineral resources, and (3) developing basic data on terrain and foundation conditions. The program is accomplished by systematic geologic mapping aided by special investigations in supporting sciences, such as geophysics, geochemistry, petrology, and paleontology. Increases in 1952 provide for (*a*) acceleration of mineral resources studies, particularly the initiation of additional studies of deposits of the most critical of the strategic minerals; (*b*) increasing the scope of investigations of mineral fuels, with particular emphasis on potential petroleum-producing areas; (*c*) marked expansion in general service geologic mapping to provide basic data for civilian and military construction; and (*d*) remodeling space in the Denver Federal Center to provide specialized laboratories and offices.

3. *Water resources investigations.*—These investigations provide basic water facts required for economical development and best use of the Nation's water resources. The program includes measurement of the flow, stage, sediment discharge, and reservoir content of rivers; surveys showing locations and safe yields of underground waters; determination of chemical quality and temperature of waters; studies of the availability of water supplies within selected areas in relation to current and potential utilization or demand; and performance of related research. Expansion of the program during 1952 will be directed toward the collection of information particularly in deficient areas where additional water is required to meet the needs of increasing per capita consumption and the demands of industrial mobilization.

4. *Soil and moisture conservation.*—Hydrologic and geologic information and advice is furnished to the land management bureaus in connection with the planning, surveys, and investigations preliminary to taking measures for soil and moisture conservation on land under the jurisdiction of the Department of the Interior.

5. *Classification of lands.*—Progressive investigation and classification is made of Federal lands with respect to mineral and water-power resources. All phases of this work and those of the companion activity, "Supervision of mining and oil and gas leases" are requisite to the functioning of the system of public-land administration prescribed by the various mineral leasing laws. The overall workload borne by this activity has shown a remarkable annual increase for many years, principally due to the unprecedented development of this Nation's oil and gas deposits. Increased funds included for 1952 will provide an operating staff some two times larger than it was 10 years ago to handle a workload that is estimated to be six times greater.

6. *Supervision of mining and oil and gas leases.*—Prospecting, development, and production of minerals under some 37,000 leased properties are supervised. During the past 7 years there has been a tremendous increase in the value of minerals produced ($149,000,000 to $378,000,000) and royalties earned ($11,660,000 to $35,000,000) from the supervised properties. There has been a threefold increase in the number of producing mines, producing wells, and leased properties during this period. Increased funds for 1952 will provide an operating staff about 25 percent greater than in 1944 to handle a workload that is estimated at more than 200 percent greater.

7. *General administration.*—Provides for the general business administration of the Geological Survey.

OBLIGATIONS BY ACTIVITIES

Description	1950 actual	1951 estimate	1952 estimate

PROGRAM AND PERFORMANCE

Water wells are developed by the Department when prospectors drilling for oil and gas on public lands strike water. Proceeds from the sale of water from these wells are used to develop additional wells as new water supplies are opened through prospecting operations (30 U. S. C. 221–229).

BUREAU OF MINES

CONSERVATION AND DEVELOPMENT OF MINERAL RESOURCES

Conservation and Development of Mineral Resources, Bureau of Mines—

For expenses necessary for promoting the conservation, exploration, development, production, and utilization of mineral resources, including fuels, in the United States, its Territories, and possessions; developing synthetics and substitutes; producing and distributing helium; and controlling fires in inactive coal deposits on public lands, and on private lands, with the consent of the owner; [$17,758,000] *$17,950,000*: *Provided*, That the Secretary is hereby authorized and directed to make suitable arrangements with owners of private property or with a State or its subdivisions for payment in the current fiscal year of a sum equal to not less than one-half the amount of expenditure to be made for control or extinguishment of fires in inactive coal deposits from funds provided under the authorization of this Act except that expenditure of Federal funds for this purpose in any privately owned operating coal mine shall be limited to investigation and supervision. *(30 U. S. C. 1–11, 321–325; 50 U. S. C. 161–166; Interior Department Appropriation Act, 1951.)*

Appropriated 1951, [a] **$18,008,000** Estimate 1952, **$17,950,000**

[a] Includes $250,000 appropriated in the Supplemental Appropriation Act, 1951.

Total obligations	16,514,530	17,959,000	18,302,200

PROGRAM AND PERFORMANCE

This program provides for conserving, evaluating, and developing mineral resources.

1. *Fuels—(a) Coal.*—The Bureau conducts scientific research and engineering investigations and tests on the chemical and physical properties of coal and its mining, preparation, combustion, carbonization, and gasification. It samples and analyzes coal; performs a fuel economy service for Government agencies; estimates coking coal reserves; evaluates efficiency of coal-mining methods; studies methods for dewatering anthracite mines and improving the mechanized mining of anthracite; investigates problems of coal preparation, fuel combustion, and gas, coke, and byproduct properties of American coal; operates lignite and anthracite research laboratories; and performs economic and statistical studies.

The program for 1952 includes accelerated mining and preparation research designed to augment our dwindling supplies of coking coal. Operation of the lignite research laboratory at Grand Forks, N. Dak., and the anthracite research laboratory at Schuylkill Haven, Pa., on about the scale authorized by the Congress is proposed.

(*b*) *Petroleum and natural gas.*—The program for petroleum and natural gas comprises seven projects, as follows: (1) Engineering research on problems connected with the development and production of petroleum and

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

natural gas, (2) scientific and technologic research on secondary recovery methods of producing petroleum, (3) studies dealing with transportation and storage problems, (4) scientific studies involving the chemistry and refining of petroleum and natural gas, (5) fundamental research to determine the thermodynamic properties of hydrocarbons, (6) statistical and economic studies of petroleum and natural gas, and (7) maintenance of buildings and facilities conducting research on petroleum. The requested increase for 1952 will permit a more adequate program for petroleum technologic and scientific research.

(*c*) *Synthetic liquid fuels.*—Appropriations aggregating $85,000,000 have been authorized to conduct laboratory research and to develop and operate demonstration plants for the production of synthetic liquid fuels from coal, oil shale, and agricultural and forest products. The primary objective of this program is to conserve and increase the liquid-fuel resources of the Nation. All major construction of demonstration plants have been completed.

(*d*) *Helium.*—The Bureau conducts a scientific and technologic research program in resources, production, storage, and utilization of helium to assure supplies for the future, to improve methods of production and handling, and to advance use of helium in lighter-than-air crafts, metallurgy, production of atomic energy, medical treatment, and various other industrial and scientific applications.

2. *Minerals and metals.*—The Bureau conducts investigations and research in the field of metals and other minerals. The program includes improvement of mining technology through laboratory research and field experimentation and testing; examining ore deposits and developing marginal and submarginal reserves; discovering and improving metallurgical processes to make better use of low-grade ores; investigating the recovery of waste metals and scrap; developing substitutes for scarce commodities; and collecting, analyzing, and disseminating statistical and economic information.

3. *Control of fires in inactive coal deposits.*—The Bureau is engaged in controlling or extinguishing fires on public lands or those in inactive or abandoned deposits on private property.

OBLIGATIONS BY ACTIVITIES

Description	1950 actual	1951 estimate	1952 estimate
Direct Obligations			
1. Fuels:			
(*a*) Coal	$1,822,099	$2,018,807	$2,060,000

Comparative transfer from "Coal-mine inspections and investigations, Bureau of Mines"	4,906		
Total obligations	3,786,437	3,805,000	3,790,000

PROGRAM AND PERFORMANCE

The Bureau performs (1) investigations of accidents and rescue work in disasters affecting the minerals industries, (2) coal-mine inspections and investigations, and (3) explosives and explosions testing and research.

1. *Investigation of accidents and rescue work.*—Operations under this activity are designed to reduce working hazards, safeguard the health of workers, and promote efficiency in the mineral industries. The Bureau encourages accident prevention through education and safety organizations, exhibits, and demonstrations; gives instruction in first-aid and mine-rescue methods; investigates explosions, fires, and other serious accidents in mines and mineral industry plants; investigates and develops safety devices for the mineral industries; tests equipment for use in mines and plants where explosive atmospheres may be encountered;

Federal Reserve Bank of St. Louis

BUREAU OF MINES—Continued

HEALTH AND SAFETY—continued

Health and Safety, Bureau of Mines—Continued

and performs field and laboratory studies of ventilation of mines, methods of allaying mineral dusts, prevention of dust accumulations, effective use of rock dust to prevent widespread coal-dust explosions, and blasting practices.

2. *Mine inspections and investigations.*—All coal mines employing 25 or more men and a great number employing less than 25 men are inspected one or more times annually. Every phase of mining activity is investigated, and reports are prepared covering the hazards observed, with recommendations to eliminate or alleviate the hazards. Copies of each report are sent to the mine management, State mining department, and local and national union headquarters (if an organized mine).

COAL MINES INSPECTED DURING FISCAL YEAR 1950

	Underground mines employing—		Strip mines	Total
	Less than 25 men	25 and more men		
Number of coal mines in the United States	4,864	2,143	894	7,901
Number of individual coal mines inspected	3,242	2,123	309	5,674
Total number of Federal inspections of coal mines	4,279	3,553	351	8,183

3. *Explosives and explosions research and testing.*—The Bureau conducts research to discover causes of explosions in coal mines and to improve methods of preventing explosions. This program includes investigations of various phases of manufacture, transportation, storage, and use of explosives, as well as the causes and prevention of explosions of inflammable dusts, vapors, and gases throughout the mineral industries. Tests are conducted on explosives and blasting devices to determine their permissibility for use in coal mines or their suitability for use in other mining operations and the conditions under which they can be used safely. Fundamental scientific research on the explosibility and flammability of gases and vapors is a continuing project. In many phases of this program, the Bureau cooperates with industry associations and scientific groups, particularly in the development of safer explosives and of safe procedures to minimize and eliminate disasters.

OBLIGATIONS BY ACTIVITIES

Description	1950 actual	1951 estimate	1952 estimate

PROGRAM AND PERFORMANCE

1. *New laboratory facilities.*—Provision is made for the conversion, rehabilitation, and equipment of additional space at the Denver Federal Center to provide facilities suitable for laboratory, office, and storage space to accelerate the program planned for 1952.

2. *Drainage tunnel, Leadville, Colo.*—The 1952 program for the drainage tunnel provides for further drilling to make available reserves principally of lead and zinc.

3. *Synthetic liquid fuels.*—The funds included under this appropriation will provide for minor construction and alterations from process improvements in laboratories and pilot demonstration plants.

NATIONAL PARK SERVICE

INTRODUCTORY STATEMENT

The fundamental purpose of the National Park Service is to promote and regulate the use of national parks, monuments, and other areas, and to conserve the scenic, natural, and historic objects and the wildlife contained therein, to leave them unimpaired for use of future generations. The Service also makes studies and plans of park, parkway, and recreational areas in cooperation with other Federal agencies, States, and localities; administers recreational areas of national significance; and preserves for public benefit historic sites, buildings, and objects of national significance.

MANAGEMENT AND PROTECTION

Management and Protection, National Park Service—

For expenses necessary for the management and protection of the areas and facilities administered by the National Park Service, including protection of lands in process of condemnation; and for plans, investigations, and studies of the recreational resources (exclusive of preparation of detailed plans and working drawings) and archaeological values in river basins of the United States (except the Missouri River Basin); [$7,688,700] *$8,176,000*: *Provided*, That [the unexpended balance of the appropriation under the head "Mississippi River Parkway" in the Second Supplemental Appropriation Act, 1950, shall be transferred to and merged with this appropriation] *not to exceed $49,000 of the appropriation granted under this head for the fiscal year 1951 shall remain available during the current fiscal year.* *(5 U. S. C. 124–132, 133t, note p. 90; 16 U. S. C. 1, 2–4, 17j–2, 21, 41, 46–48, 80, 81, 91, 111, 121, 141, 151, 156, 159, 161, 191, 201, 211, 214, 221–251, 341, 344, 347, 361, 391, 401–404, 406–408, 409, 410–410d, 422–423j, 424–430, 430f, 430i, 430t, 431–433, 446, 460, 461–467; 24 U. S. C. 278; Act of Mar. 2, 1927 (44 Stat. 1264); Act of May 23, 1928 (45 Stat. 721); Act of Feb. 25, 1929 (46 Stat. 1300); Act of Mar. 4, 1929 (45 Stat. 1558); Act of May 28, 1930 (46 Stat. 431); Act of May 29, 1930 (46 Stat. 484); Act of Mar. 4, 1931 (46 Stat. 1522); Act of Mar. 2, 1933 (47 Stat. 1420); Act of Apr. 25, 1947 (61 Stat. 52); Act of June 30, 1949 (63 Stat. 377); Act of Aug. 17, 1949 (63 Stat. 612); Interior Department Appropriation Act, 1951.)*

Appropriated 1951, [a] **$7,728,700** Estimate 1952, [b] **$8,176,000**
Appropriated (adjusted) 1951, [a] **$7,818,700**

[a] Includes $40,000 appropriated in the Supplemental Appropriation Act, 1951.
[b] Includes $70,354 for activities previously carried under "Maintenance and rehabilitation of physical facilities, National Park Service." The amounts obligated in 1950 and 1951 are shown in the schedule as comparative transfers.

NOTE.—The transfer from "Mississippi River Parkway, National Park Service" shown above excludes $3,916 of obligated appropriation balances also transferred.

PROGRAM AND PERFORMANCE

1. *Management of park and other areas.*—The 1952 program contemplates the management of 182 areas, com-

Digitized for FRASER

Federal Reserve Bank of St. Louis

prising approximately 23,800,000 acres located in 38 States, the District of Columbia, Alaska, Hawaii, and Puerto Rico, including five additional areas and full year operation of the Independence National Historical Park, Pa., which will be operated for only 6 months in 1951. Visitors to, and receipts from, the areas are as follows:

	1949 actual	1950 actual	1951 estimate	1952 estimate
Visitors	31,864,180	32,780,232	33,500,000	33,500,000
Revenues	$3,467,606	$3,527,607	$3,700,000	$3,700,000

2. *Forestry and fire control.*—The Service protects over 6,500,000 acres of virgin forests and over 3,100,000 acres of brush and grasslands from fire and insect depredation. The 1952 program contemplates slight increases in general expenses and additional fire control services, and includes an estimate to cover costs of fighting forest fires, to obviate the necessity of securing funds for those purposes through supplemental or deficiency estimates.

3. *Soil and moisture conservation.*—Corrective and preventive measures are programed for 24 of 70 problem areas, as compared to 20 areas programed for work in 1951.

4. *Plans and investigations.*—The Service investigates reservoir projects to determine recreational potentialities of project sites being developed by other Federal agencies, and cooperates with States and their political subdivisions in planning for the development of recreational resources; studies and reports upon the feasibility of establishing parks and parkways; in cooperation with the Smithsonian Institution and State institutions, surveys archeological sites subject to destruction through dam construction or other causes, and excavates sites of major importance to salvage archeological remains; conducts historical, archeological, and biological research in connection with established or proposed park or monument areas; and prepares master plans for the ultimate development of those areas. The 1952 program contemplates a decrease mainly because of near completion of the Mississippi River Parkway survey.

Total obligations	7,859,555	8,327,151	8,547,763

PROGRAM AND PERFORMANCE

1. *Roads and trails.*—As of July 1, 1950, the Service maintained 5,775 miles of roads and parkways, and 7,658 miles of trails. Road maintenance estimated to cost $558 per mile in 1951 will be reduced to $544 per mile during the budget year because of an increase in mileages to be maintained. This is approximately $240 less per mile than the national average cost during the first half of 1949.

2. *Buildings and utilities, etc.*—Buildings, utilities, and other improvements maintained and operated by the Service are conservatively valued at more than $145,000,000, not including those in the areas administered by National Capital Parks. This includes all types of utility facilities found in metropolitan areas, which served approximately 32,750,000 visitors during the 1950 travel year. Prehistoric ruins, memorials, and historic structures are preserved, as well as thousands of invaluable scientific, historical, and archeological artifacts. The 1952 program makes provision for operating five additional areas, and for full year operation of the Independence National Historical Park, Pa., which will be operated for only 6 months in 1951.

NOTE.—The transfer from other appropriations shown above excludes $6,026,079 of obligated appropriation balances also transferred as follows:

"Water rights, National Park Service"	$1,141
"Acquisition of lands, National Park Service"	141,217
"Independence National Historical Park, Pa., National Park Service"	48,441
"Parkways, National Park Service"	1,959,098
"Roads and trails, National Park Service"	2,181,378
"Physical improvements, buildings, and utilities, National Park Service"	1,190,726
"Roads, trails, utilities, and buildings, National Park Service"	504,078

PROGRAM AND PERFORMANCE

1. *Parkways.*—The estimated cost of completing the construction of eight authorized parkways, including roads, buildings, utilities, and other facilities, is shown in the following tabulation:

Parkways	Mileages (June 30, 1950)		Estimated cost to complete
	Completed or started	Uncompleted	
1. Baltimore-Washington	6	12	$13,000,000
2. Blue Ridge	347	130	46,118,900
3. Chesapeake and Ohio Canal		168	21,384,600
4. Colonial	12	10	2,885,900
5. Foothills		77	22,156,500
6. George Washington Memorial	15	[1] 34	19,237,500
7. Natchez Trace	148	302	79,037,900
8. Suitland	9	(2)	1,437,500
Total	537	733	205,258,200

[1] 4 lanes; 68 miles of dual lane.
[2] 9 miles of paving to be completed.

It is estimated that contracts totaling $2,000,000 will be awarded for 7 miles of work on the Baltimore-Washington Parkway during 1952 as compared to an estimated $4,500,000 for work during 1951, and $825,000 is included for the Suitland Parkway.

2. *Roads and trails.*—There are 5,171 miles of roads (exclusive of parkways) in the areas administered by the Service. An additional 1,397 miles are needed to complete the road systems and 1,739 miles need reconstructing. Approximately 98 miles are programed for 1951 and approximately 105 miles in 1952.

3. *Buildings and utilities, etc.*—The 1952 estimate contemplates construction principally of those facilities needed to meet critical housing needs of employees, extension of utilities to meet the increasing public use load, and extension of campground facilities.

4. *Acquisition of lands and water rights.*—There are approximately 536,000 acres of privately owned lands within the boundaries of areas administered by the Service, having a prewar value of approximately $20,000,000. The 1952 program contemplates the acquisition of certain of these lands and other lands for which specific legislation has been enacted in addition to acquiring water rights and the liquidation of prior year contractual authorization for acquiring properties necessary to the establishment of the Independence National Historical Park, Philadelphia, Pa.

OBLIGATIONS BY ACTIVITIES

FISH AND WILDLIFE SERVICE

INTRODUCTORY STATEMENT

The Service conducts research, management, and demonstration programs designed to conserve and restore the fishery and wildlife resources of the United States, its Territories and possessions, both for recreational and economic utilization. Its activities prevent the depletion and misuse of these living natural resources, permit such maximum use and enjoyment of them as may be consistent with their maintenance at sustained levels of abundance year after year, and promote more efficient methods of utilizing the resources in order to enhance the economic benefits derived therefrom. The Service, pursuant to various international agreements, discharges obligations of the United States Government with respect to international programs for the study and management of those marine and terrestrial wildlife resources the United States utilizes in common with other countries.

MANAGEMENT OF RESOURCES

Management of Resources, Fish and Wildlife Service—

For expenses necessary for conservation, management, protection, and utilization of fish and wildlife resources, and for the performance of other authorized functions related to such resources; operation of the industrial properties within the Crab Orchard National Wildlife Refuge (61 Stat. 770); maintenance of the herd of long-horned cattle on the Wichita Mountains Wildlife Refuge; purchase or rent of land, and functions related to wildlife management in California (16 U. S. C. 695–695c); and not to exceed $30,000 for payment, in the discretion of the Secretary, for information or evidence concerning violations of laws administered by the Fish and Wildlife Service; [$7,082,000] *$6,870,000. (5 U. S. C. 133t; 7 U. S. C. 426; 16 U. S. C. 590a–590f, 659, 661–666c, 667–668d, 671–674d, 684–686, 690–691d, 701, 703–711, 715–715s, 718–718h, 721–731, 744–751, 755–757, 772–772i, 776–776f, 781–785, 811, 851–856; 18 U. S. C. 41–44; 43 U. S. C. 315k; 48 U. S. C. 192–211, 220–248b; Act of May 21, 1930, 46 Stat. 371; Act of Aug. 9, 1950, Public Law 676; Act of Sept. 7, 1950, Public Law 764; Act of Sept. 27, 1950, Public Law 845; Interior Department Appropriation Act, 1951.)*

PROGRAM AND PERFORMANCE

1. *Administration of fish and game laws.*—The Service administers and enforces Federal laws relating to the fisheries and game of Alaska, the protection of migratory birds and certain game mammals, and the act regulating the interstate transportation of black bass or other game fish illegally taken or transported from a State in violation of its law. Provisions of international agreements are also carried out under this activity. Estimates for 1952 provide for operations at a slightly higher level than in 1951, due in part to additional responsibilities imposed by new legislation.

2. *Propagation and distribution of food fishes.*—Ninety-nine fish cultural stations are operated to produce fish and eggs for the propagation of commercial food and game fishes. Production for the calendar year 1949 included over 55 million eggs, 587 million fry, 106 million fingerlings, and 1.5 million fish 6 inches or over in length. Fresh water mussels are propagated in the Mississippi River and tributaries. Fish screens and other fish protective devices are maintained on Federal areas in the West. The increase proposed for 1952 is mostly for the operation of new and expanded hatcheries.

3. *Mammal and bird reservations.*—Two hundred and eighty-two refuges, comprising over 18 million acres of land, are operated for the conservation of migratory waterfowl and for the preservation and propagation of rare birds and mammals.

4. *River basin studies.*—Studies and surveys are made of areas affected by proposed Federal power, navigation, and irrigation projects, to insure that adequate measures are taken for the conservation and development of fish and wildlife. A limited expansion of these studies is proposed for 1952, principally in the New England-New York area.

5. *Control of predatory animals and injurious rodents.*—This activity provides for the protection of sheep, cattle, poultry, and game from destruction by predatory animals, and for the prevention of destruction of cultivated crops, range forage, fruit crops, stored food and feed supplies, timber resources, and irrigation structures by injurious rodents. The Service develops and tests improved methods for predator and rodent control that will not injure valuable and harmless forms of wildlife or domestic livestock.

6. *Soil and moisture conservation.*—The Service administers 262 national wildlife refuges, comprising more than 9.3 million acres of land within the Continental United States, of which 63 refuges, comprising nearly 5.5 million acres, are critically eroded or severely depleted. A long-range program for developing a soil and moisture conservation plan for each of these refuges as a means to better land-utilization has been initiated. This plan is currently active with respect to 23 refuges.

PROGRAM AND PERFORMANCE

This program provides for research on fish and fisheries; exploration, development, and utilization of fishery resources; and research on birds and mammals.

1. *Research on fish and fisheries.*—Fishery research activities are conducted (*a*) to discover the nature, extent, and causes of variations in abundance of important food fishes and other aquatic animals; (*b*) to discover declining species and to recommend measures for conserving, developing, and managing the fishery resources; and (*c*) to improve the cultivation of aquatic animals, including shellfish. Plans for 1952 provide for expanding the west coast pilchard fishery investigations and to cover investigations authorized by new legislation.

2. *Exploration, development, and utilization of fishery resources.*—The following services in connection with the commercial fishing industry are provided: (*a*) exploratory fishing to locate and determine the character and size of fishery resources and devising and demonstrating improved types of commercial fishing gear and fishing methods; (*b*) developing and demonstrating more efficient methods for handling, processing, storing, and marketing fishery products, and encouraging consumption; (*c*) collecting, compiling, and publishing commercial fishery statistics, including operation of seven fishery market news offices; (*d*) collecting, interpreting, and disseminating economic data on the fisheries industry, including employment, transportation, distribution, business trends, and foreign trade; and (*e*) administering the provisions of the act authorizing associations of producers of aquatic products. Plans for 1952 contemplate expanding the program of exploratory fishing and gear development, fishery technological studies, and a small increase for commercial fishery statistics, based for the most part on new legislation.

3. *Research on birds and mammals.*—This program provides for (*a*) determining annually the status of migratory wildlife to provide data for administering the Migratory Bird Treaty Act, including population and condition of nesting areas; (*b*) improving management and conservation practices by determining wildlife populations, the causes of depletion, and methods for increasing wildlife, and developing methods of control of obnoxious birds and animals; and (*c*) operating wildlife research units in cooperation with States and universities to give technical training in wildlife management, to carry on research, and to demonstrate improved management practices.

PROGRAM AND PERFORMANCE

1. *Fish facilities.*—Projects proposed for 1952 are (*a*) continuation at a reduced rate of the program, initiated in 1950, for the construction and improvement of fish hatcheries; (*b*) the construction of a patrol boat, one weir and one weir tender in Alaska; and (*c*) improvements at biological laboratories at Beaufort, N. C.; and Milford, Conn.

2. *Wildlife facilities.*—Projects proposed are (*a*) continuation of the 3-year program of construction of water-control structures at the Lower Klamath Refuge in California; and (*b*) construction of housing and other facilities at two different points in Alaska to facilitate law-enforcement operations.

PROGRAM AND PERFORMANCE

Receipts from the sale of Federal hunting stamps are set aside in a special fund, the Migratory Bird Conservation Fund (16 U. S. C. 718–718h; 63 Stat. 599).

1. *Enforcement of Migratory Waterfowl Hunting Stamp and Migratory Bird Treaty Acts.*—Ten percent of the fund available is for expenses in enforcing the migratory bird acts, and for expenses of the Post Office Department for engraving, issuing, and accounting for the stamps.

2. *Acquisition, development, and maintenance of migratory bird refuges.*—Not less than 90 percent of the migratory bird conservation fund is for the acquisition and administration of areas for migratory bird sanctuaries, for investigations of the highest utilization of refuges, and for the protection and increase of migratory waterfowl.

PROGRAM AND PERFORMANCE

The Federal Aid in Wildlife Restoration Act (16 U. S. C. 669–669j), authorizes assistance to the States, Alaska, Hawaii, Puerto Rico, and the Virgin Islands, in restoring wildlife and in working out better methods for its management. The act authorizes the appropriation of funds collected through the tax imposed on firearms, shells, and cartridges, which is paid by the manufacturers, and is covered into a special fund in the Treasury known as the "Federal Aid to Wildlife Restoration Fund."

1. *Federal aid payments to States for wildlife restoration projects.*—Payments are made for wildlife restoration projects, including construction necessary to make land or water areas available for such projects, and for wildlife management research necessary for efficient administration.

2. *Administration of Federal aid to States for wildlife restoration projects.*—This activity provides for the expenses of making examinations of State plans, biological investigations of areas to be acquired or developed, appraisals of lands to be purchased, engineering studies of proposed developmental work, audits of State expenditures, and inspections of projects.

3. *Carrying out provisions of the Migratory Bird Conservation Act.*—The Federal Aid in Wildlife Restoration Act provides that funds apportioned to the States shall be available for expenditure until the end of the fiscal year following that for which the apportionment was made. If the funds are not expended by the States within that time, they become available for expenditure by the Fish and Wildlife Service to carry out the provisions of the Migratory Bird Conservation Act.

FEDERAL AID IN FISH RESTORATION AND MANAGEMENT

Federal Aid in Fish Restoration and Management, Fish and Wildlife Service—

For carrying out the provisions of the Act of August 9, 1950 (Public Law 681), amounts equal to the revenues described in section 3 of said Act and credited during the next preceding fiscal year and each fiscal year thereafter, to remain available until expended. (*5 U. S. C. 133t.*)

Estimate 1952, **$3,000,000**

FUNDS AVAILABLE FOR OBLIGATION

	1950 actual	1951 estimate	1952 estimate
Appropriation or estimate			$3,000,000
Balance available in subsequent year			−900,000
Total obligations			2,100,000

PROGRAM AND PERFORMANCE

The Federal Aid to Fish Restoration Act of August 9, 1950 (64 Stat. 430), authorizes assistance to the States, Alaska, Hawaii, Puerto Rico, and the Virgin Islands, in restoring fish and in working out better methods in fish management. The act authorizes the appropriation of funds collected through the 10 percent excise tax imposed by section 3406 of the Internal Revenue Code on fishing rods, creels, reels, and artificial lures, baits, and flies, to carry out the purposes of the act. Under language recommended in 1952, permanent appropriation of these receipts is proposed.

1. *Federal aid payments to States for fish restoration and management projects.*—Payments are made for fish restoration and management projects for fish of material value for sport or recreation and for research into problems of fish management and culture necessary for efficient administration and regulation; the formulation and adoption of plans for restocking waters with food and game fishes; the selection, restoration, and improvement of areas adaptable as hatching, feeding, resting or breeding places for fish including acquisition and development of areas suitable for such purposes.

2. *Administration of Federal aid to States for fish restoration and management.*—This activity provides for the expenses of making examinations of State plans, investigations of areas to be acquired, developed or improved for fish, appraisals of lands, engineering studies of proposed development work, the audits of State expenditures, administrative services, and inspections of projects.

[MANAGEMENT OF NATIONAL WILDLIFE REFUGES]

Management of National Wildlife Refuges, Fish and Wildlife Service—

[For management of national wildlife refuges, including the construction, improvement, repair, and alteration of buildings, roads, and other facilities, and enforcement of the Migratory Bird Treaty Act of July 3, 1918, as amended (16 U. S. C. 703–711), amounts equal to 75 per centum of the net proceeds received during the next preceding fiscal year and each fiscal year thereafter under the provisions of section 401 of the Act of June 15, 1935 (16 U. S. C. 715s), to remain available until expended.] (*5 U. S. C. 133t; Interior Department Appropriation Act, 1951.*)

Appropriated 1951, **$324,899** Estimate 1952, **$300,000**

PROGRAM AND PERFORMANCE

This is a new appropriation, as authorized by the act approved September 27, 1950 (64 Stat. 1071). The act authorizes the appropriation of an amount not exceeding the total proceeds of sales of fur sealskins and other products of the wildlife resources of the Pribilof Islands during the preceding fiscal year. The program provides for (*a*) management of the Alaska fur seal herd and protection of walruses and sea lions; (*b*) furnishing food, clothing, shelter, schooling, medical attention, and other necessities of life to approximately 525 natives of the islands; (*c*) maintenance of buildings and roads; (*d*) operation of a byproducts plant for utilizing fur seal carcasses; and (*e*) maintenance and operation of a supply vessel. The average annual take of sealskins in the 5-year period ending with the 1950 season was 65,438. The average annual net receipts covered into the Treasury from the fur seal industry for the same period have exceeded $1,780,000. The net receipts from this source for the fiscal year 1951 are estimated to be $2,690,000.

PROGRAM AND PERFORMANCE

1. *Territory of Alaska.*—The salary of the Governor and the expenses of his office, the travel expenses of the legislators, and the cost of caring for the Alaskan mentally ill are provided for under this activity.

2. *Territory of Hawaii.*—This activity provides for the salary of the Governor and the expenses of his office, and the pay and travel expenses of the legislators.

3. *Virgin Islands.*—This activity provides for the salary of the Governor and the expenses of his office, the support of services essential to the public safety, health, and welfare of the municipalities of St. Thomas and St. John, and St. Croix, and the program of agricultural extension services, veterinary services, and demonstrations in practical farming.

4. *Guam.*—The administration of the island of Guam was transferred from the Department of the Navy to the Department of the Interior on August 1, 1950. This activity provides for the salary of the Governor and the expenses of his office, and the per diem of the legislators.

5. *American Samoa.*—By an agreement between the Interior and Navy Departments, approved by the President, the administration of American Samoa will be transferred from Navy to Interior on July 1, 1951. This activity provides for the salary and expenses of the Governor's office, the legislature, the judiciary, and services essential to the public safety, health, and welfare of the Samoan people.

6. *Trust Territory.*—By agreement between the Interior and Navy Departments, approved by the President, the administration of the Trust Territory of the Pacific Islands will be transferred from Navy to Interior on July 1, 1951. This activity provides for the salary and expenses of the office of the High Commissioner, salaries and expenses of the judiciary, and essential services for the public safety, health, and welfare in the trust territory.

7. *General administration.*—The Office of Territories observes and reports political and economic progress in the territorial areas, originates and implements Federal policy in the territories, represents the Governors in Washington, participates in foreign policy matters concerning or arising from our territorial interests, and is responsible for supervision of the Alaska Railroad, the Alaska Road Commission, care of Alaskan insane, and the Puerto Rico Reconstruction Administration, in addition to working with the president and board of directors of the Virgin Islands Corporation. In 1952 the Island Trading Company of Micronesia will be added to the responsibilities of the Office.

PROGRAM AND PERFORMANCE

Reorganization Plan No. 15 of 1950 transferred jurisdiction of the Alaska public works program from the General Services Administration to the Department of the Interior. Congress authorized a total of $70,000,000 to provide a 5-year program of public works for the development of the Territory of Alaska, of which not less than 50 percent is recoverable from the Territorial government or other public bodies. At the end of fiscal year 1950 construction contracts totaling $539,000 had been let for 2 projects. During fiscal year 1951 it is estimated that contracts totaling $7,644,000 will be let for 33 additional or going projects. The program proposed for 1952 contemplates the letting of construction contracts amounting to $9,500,000 for approximately 31 projects for such public facilities as schools, hospitals, streets, and water and sewer systems.

PROGRAM AND PERFORMANCE

The program proposed for 1952 will permit progress at a rate commensurate with most urgent civilian and military needs.

1. *Preparation and plans.*—Surveys are made and plans prepared for road projects in advance of congressional authorization.

2. *Construction in progress.*—Work is continuing on the asphalt surfacing of major roads. By the end of the fiscal year 1951 it is estimated that 1,076.7 miles of the Richardson, Glenn, Alaska, and Haines Highways and the Tok Cutoff Road will be surfaced, or contracts will have been let for surfacing. Funds estimated for 1952 will permit advancement of work on the new road from the Alaska Highway to Eagle; approximately 20 miles of local farm and industrial roads will be built; and about 25 miles of the Richardson Highway-Mount McKinley Park Road will be constructed.

3. *Reconstruction.*—Improvement work on the Tok Cutoff Road will be completed in preparation for surfacing. Work will be continued on modernization of other roads and bridges to bring them up to accepted standards and to eliminate dangerous conditions.

4. *New construction.*—Provision is made for construction of a road of high military priority connecting the military airport at Naknek with the ship port; for beginning hard surfacing of the Turnagain Arm Road, and for partial reconstruction of the remainder of the Seward-Anchorage Highway; and for a new bridge to replace a dangerous structure at Fairbanks.

Comparative transfer from "Construction and maintenance of roads, bridges, and trails, Alaska"	$1,911,300		
Total obligations	1,911,300	2,600,000	3,300,000

PROGRAM AND PERFORMANCE

The highway system of Alaska is being extended and improved to accommodate increasing civilian and military traffic needs and on July 1, 1951, will consist of 359 miles of paved highway, 617 miles of through graveled roads, 1,037 miles of feeder roads, and 1,128 miles of isolated local and farm roads. The increase proposed for 1952 is to provide summer maintenance and repair funds for all roads and to keep principal routes open on a year-round basis, including snow removal on several major routes to meet military freighting and tactical movement needs. It also provides maintenance funds for additional mileage which will be added to the system during the fiscal year 1952. The 1952 estimates are based on the same costs per mile as those for 1951, except that 1952 estimates

Digitized for FRASER

PROGRAM AND PERFORMANCE

Reorganization Plan No. 15 of 1950 transferred jurisdiction of the Virgin Islands public works program from the General Services Administration to the Department of the Interior. Congress authorized a total of $10,028,420 to provide a program of public works to raise the economic standards in the Virgin Islands. At the end of fiscal year 1950 construction contracts totaling $1,224,370 had been let for 3 projects. During fiscal year 1951 it is estimated that contracts totaling $1,266,000 will be let for 4 additional or going projects. The program proposed for 1952 contemplates the completion of some of the urgently needed facilities originally approved by Congress and reflects the letting of contracts totaling $862,500 for 6 projects.

OFFICE OF TERRITORIES [AND ISLAND POSSESSIONS]—Continued

Permanent indefinite appropriation, special account:

OPERATION AND MAINTENANCE, ALASKA RAILROAD

Alaska Railroad Special Fund—

The Alaska Railroad Special Fund shall continue available until expended for the work authorized by law, including [personal services in the District of Columbia;] operation of facilities under the jurisdiction of the railroad in Mount McKinley National Park; operation and maintenance of oceangoing or coastwise vessels by ownership, charter, or arrangement with other branches of the Government service, for the purpose of providing additional facilities for transportation of freight, passengers, or mail, when deemed necessary for the benefit and development of industries or travel in the area served; and payment of compensation and expenses as authorized by section 42 of the Act of September 7, 1916 (5 U. S. C. 793), to be reimbursed as therein provided: *Provided*, That no one other than the general manager of said railroad, and one assistant general manager at not to exceed $13,000 per annum, shall be paid an annual salary out of said fund of more than $11,000. (*48 U. S. C. 301–308; Interior Department Appropriation Act, 1951.*)

Appropriated (est.) 1951, **$14,500,000** Estimate 1952, **$15,000,000**
Appropriated (adjusted estimate) 1951, **$46,000,000**
Estimate (adjusted) 1952, **$17,500,000**

PROGRAM AND PERFORMANCE

1. *Operation and maintenance.*—The Alaska Railroad is authorized to use its revenues to meet maintenance charges and operating expenses (48 U. S. C. 301–308). The basic purposes of the railroad are to facilitate national defense and aid in the development of the Territory.

It operates 470 miles of track between Seward and Fairbanks and approximately 65 miles of branch lines. In 1950 the railroad carried 875,561 tons of revenue freight a total of 141,261,000 ton-miles, as compared with 763,267 revenue tons carried a total of 132,000,000 ton-miles in 1949. This represents an increase of 400 percent over prewar year tonnage and more than a 30 percent increase over the peak war-year tonnage of 627,847, which occurred in 1944. Hotels at McKinley National Park, Curry, and Healey are also operated and maintained by the railroad. During 1950 two river steamers plying between Nenana, Fort Yukon, and Marshall carried over 200 revenue tons more than the 5,100 tons hauled in 1949.

The following table indicates the result of operations for 1950 and the estimates for 1951 and 1952:

OPERATING REVENUES AND EXPENSES

	1950 actual	1951 estimate	1952 estimate
Revenues:			
Rail line (including hotels and restaurants)	$11, 562, 915	$11, 900, 000	$12, 400, 000
River boats	104, 886	100, 000	100, 000
Total revenues	11, 667, 801	12, 000, 000	12, 500, 000
Expenses:			
Rail line (including hotels and restaurants)	11, 433, 153	11, 300, 000	11, 800, 000
River boats	230, 879	200, 000	200, 000
Total expenses	11, 664, 032	11, 500, 000	12, 000, 000
Net earnings	3, 769	500, 000	500, 000
Cumulative earned surplus from 1916 (or deficit (−))	−712, 629	−212, 629	287, 371

2. *Construction.*—A rehabilitation program for the Alaska Railroad was begun in 1948. During the fiscal years 1948 through 1951 a total of $68,000,000 was appropriated for this purpose and the railroad was able to apply $5,395,449 from its revenue funds during that period, making a total of $73,395,449 applied to the rehabilitation program. In addition to the foregoing, a supplemental appropriation of $1,500,000 was granted in 1951 for emergency repairs to certain trestles and reconstruction of bridges in the Seward to Portage area. The estimate for 1952 includes $1,000,000 to complete the rehabilitation program and $1,500,000 for the purchase of a river boat and two barges, for necessary repairs and improvements of marine ways at Nenana, and for essential roadway repairs and improvements to the Eielson branch line.

The actual obligations prior to 1951 and the estimated obligations for 1951 and 1952 are as follows:

	Prior to 1951	1951	1952	Total
Roadway and track	$34, 305, 182	$2, 124, 837	$1, 000, 000	$37, 430, 019
Bridges, trestles, culverts, and tunnels	2, 583, 851	2, 934, 537		5, 518, 388
Buildings	11, 686, 931	6, 584, 342		18, 271, 273
Locomotives and rolling stock	5, 337, 457	730, 284		6, 067, 741
Communications	587, 028	76, 000		663, 028
Transportation	5, 895, 000	550, 000		6, 445, 000
Total rehabilitation	60, 395, 449	13, 000, 000	1, 000, 000	74, 395, 449
Emergency construction and equipment		1, 500, 000	1. 500, 000	3, 000, 000

Expenditures for locomotives and rolling stock are largely for conversion and overhaul of such equipment acquired from Government surplus railroad equipment.

PROGRAM AND PERFORMANCE

The Puerto Rico Reconstruction Administration was established under the Emergency Relief Appropriation Act of 1935 to provide relief and to increase employment by providing for useful projects. This activity is financed from allotments from the Puerto Rico revolving fund, established by Congress in 1936, and derives its income largely from rentals, collections on loans and mortgages, and lease and purchase contracts.

Appropriated 1951, **$89,928,180** Estimate 1952, **$62,600,000**

GENERAL PROVISIONS—DEPARTMENT OF THE INTERIOR

SEC. 102. Appropriations made in this chapter shall be available for the purchase of station wagons without such vehicles being considered as passenger motor vehicles.

SEC. 103. Notwithstanding any provision of law to the contrary, aliens may be employed during the current fiscal year in the field service of the Department for periods of not more than thirty days in cases of emergency caused by fire, flood, storm, act of God, or sabotage.

SEC. 104. Appropriations in this chapter available for travel expenses shall be available, under regulations prescribed by the Secretary, for expenses of attendance of officers and employees at meetings or conventions of members of societies or associations concerned with the work of the bureau or office for which the appropriation concerned is made.

SEC. 105. Appropriations made in this chapter shall be available *for expenditure or transfer*, with the approval of the Secretary, for the emergency reconstruction, replacement or repair of buildings, utilities, or other facilities or equipment damaged or destroyed by fire, flood, storm, or other unavoidable causes: *Provided*, That no funds shall be made available under this authority until funds specifically made available to the Department of the Interior for emergencies shall have been exhausted.

SEC. 106. The Secretary may authorize the [use] *expenditure or transfer* of any appropriation in this chapter, in addition to the amounts included in the budget programs of the several agencies, for the suppression or emergency prevention of forest or range fires on or threatening lands under jurisdiction of the Department of the Interior: *Provided*, That appropriations made in this chapter for fire suppression purposes shall be available for the payment of obligations incurred during the preceding fiscal year.

SEC. 107. Appropriations made in this chapter shall be available for operation of warehouses, garages, shops, and similar facilities, wherever consolidation of activities will contribute to efficiency or economy, and said appropriations shall be reimbursed for services rendered to any other activity in the same manner as authorized by the Act of June 30, 1932 (31 U. S. C. 686): *Provided*, That reimbursements for cost of supplies, materials and equipment, and for services rendered may be credited to the appropriation current at the time such reimbursements are received.

SEC. 108. Appropriations made in this chapter shall be available for services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a) when authorized by the Secretary; maintenance and operation of aircraft; *hire of passenger motor vehicles;* examination of estimates of appropriations in the field; payment for telephone service in private residences in the field, when authorized under regulations approved by the Secretary; [health service programs as authorized by law (5 U. S. C. 150); payment of tort claims pursuant to law (28 U. S. C. 2672);] and the payment of dues, when authorized by the Secretary, for library membership in societies or associations which issue publications to members only or at a price to members lower than to subscribers who are not members.

SEC. 109. During the current fiscal year the head of any Department or establishment of the Government having funds available for scientific and technical investigations within the scope of the functions of the Department of the Interior may, with the approval of the Secretary, transfer to the Department such sums as may be necessary therefor, which sums so transferred may be expended for the same objects and in the same manner as sums appropriated herein but without their limitations.

GENERAL PROVISIONS—DEPARTMENT OF THE INTERIOR—Continued

SEC. 110. Transfers to the Department of the Interior, pursuant to the Federal Property and Administrative Services Act of 1949, of equipment, material and supplies, excess to the needs of Federal agencies may be made at the request of the Secretary without reimbursement or transfer of funds when required by the Department for operations conducted in Territories and island possessions.

SEC. 111. Appropriations made in this chapter shall be available, with the approval of the Secretary, for rendering technical advice to the Governments of Guam, American Samoa, and the Trust Territory of the Pacific Islands. (*Interior Department Appropriation Act, 1951.*)

VIRGIN ISLANDS CORPORATION

[Submitted under the Government Corporation Control Act]

Interest from loans	$84	$3,100	$16,200
Power program income	$78,471	$81,000	$397,000
Net gain (or loss (−)) for the year	−$291,693	−$37,000	−$177,300

PURPOSE AND FINANCIAL ORGANIZATION

The Virgin Islands Corporation was created by the act of June 30, 1949 (63 Stat. 350), to promote the economic development of the Virgin Islands. Appropriations not to exceed $9,000,000 were authorized to be made to a revolving fund in the Treasury, based upon annual budgets submitted by the Corporation. The appropriation of additional funds as grants to finance specific programs not primarily of a revenue-producing character and to reimburse the Corporation for operating losses is also authorized. The act limited appropriations to $2,750,000 for the fiscal years 1950 and 1951.

ANALYSIS OF BUDGET PROGRAMS

The Corporation will carry out substantially the following activities during the fiscal year 1952: (1) Production and sale of sugar, including assistance to small farmers growing cane—(*a*) capital investments, (*b*) replenishment of operating capital, and (*c*) new operating capital; (2) related activities—(*a*) development of tourist trade, (*b*) water and soil conservation, (*c*) agricultural diversification and marketing, and (*d*) industrial and commercial development; and (3) power program.

1. *Production and sale of sugar, including assistance to small farmers growing cane.*—This will be the main activity during 1952. Machinery and equipment is now being purchased to harvest and process the 1951 sugarcane crop, which will be considerably larger than originally estimated due to the methods of cultivation instituted by the Corporation during the past fiscal year. It is anticipated that the estimated loss for 1951 will be reduced by $373,400. The improved methods of cane cultivation are also being used by the small growers (approximately 600), who will be able to make use of the Corporation's machinery and equipment to increase the yield of their cane lands.

(*a*) *Capital investments.*—The 1952 program contemplates expenditures for buildings and land improvements, to house more adequately the Corporation's agricultural workers; for additional wells; and for machinery and equipment to increase the scientific development of agricultural activities such as cane cultivation, irrigation, and water and soil conservation practices.

(*b*) *Replenishment of operating capital.*—Up to the 1950 sugarcane harvest, the factory ground approximately 650 tons daily for a 4½-day week. During 1950, production was increased to approximately 900 tons daily for a 6½-day week, and it is expected that by 1952 the production will be advanced to 1,500 tons daily. The factory's capacity is adequate for this volume, but major improvements are necessary to insure the economic processing of cane and handling of sugar. Capital investments are also being made in 1951 for (1) warehouse storage for sugars prior to shipment to the United States; (2) additional housing facilities for workers needed in the cultivation of sugarcane; (3) erection of a shed for protection of the Corporation's rolling stock; (4) purchase of equipment for rental in continuing water and soil conservation practices as prescribed by the Soil Conservation Service; and (5) office furniture and equipment, principally accounting machines.

It has therefore been necessary to use operating capital in 1951 to provide funds for these capital investments and to request appropriations for 1952 to replenish the operating capital.

(*c*) *New operating capital.*—The agricultural (sugarcane) and sugar mill operations have greatly expanded since the original request of $875,000 was made for operating capital. An additional amount of $836,000 is required to finance operations during 1952. The principal source of income is from sugar operations; and since this income is not received until the latter part of the fiscal year and the first half of the following fiscal year, it is essential that adequate operating capital be provided.

2. *Related activities.*—The 1952 program contemplates expenditures for (*a*) development of tourist trade—the establishment of golf courses and beach houses which will bring substantially increased revenues to the islands; for (*b*) water and soil conservation—provision of equipment for rental to farmers to carry out conservation practices approved by the Soil Conservation Service and a fund for loans totaling $100,000 to assist where necessary in financing such practices; for (*c*) agricultural diversification and marketing—provision of equipment and structures for production of livestock and poultry feed and advances to small growers to encourage growing of feed for local requirements and developing a diversified agriculture; and for (*d*) industrial and commercial development—provision of loans to aid small-business ventures.

3. *Power program.*—It is planned to replace the present Rural Electric Division with a Power Division to assume the responsibility for all power activities in the Virgin Islands.

Administrative expenses.—It is proposed that for 1952 the Corporation operate under a limitation for administrative expenses of $130,000.

FINANCIAL REVIEW

Effect on budgetary expenditures.—Funds made available in 1950 to the Corporation resulted in net budgetary expenditures of $1,509,971. It is anticipated that the effect on budget expenditures will be about $50,793 in 1951 and $2,140,160 in 1952.

Operating results.—The Corporation operated at a loss of $291,693 in 1950, and the loss in 1951 is expected to be

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

reduced to approximately $37,000 due to an unusually good growing season. In 1952, the loss is anticipated to be about $177,300. Losses sustained by the General Operations Division are offset by grants appropriated from the general fund of the United States Treasury.

Capital assets.—The Corporation acquired the assets and assumed the liabilities of its predecessor, the Virgin Islands Company, including property operated by that company on behalf of the United States. In addition, the Government's interest in the Bluebeard's Castle hotel was transferred to the Corporation. The net book value of these properties as of July 1, 1949, was $1,080,726, which may be subject to adjustment after the 1950 audit has been made.

Investment of the United States Government.—The Government's investment at June 30, 1950, amounted to $3,333,829, of which $2,682,377 is interest bearing. It is anticipated that the interest-bearing investment will be $2,722,397 and the non-interest-bearing investment will be $659,535 at the end of the fiscal year 1951. The total investment is expected to increase $3,144,846 at June 30, 1952, represented by increased advances from the revolving fund, an increase in notes payable to the Rural Electrification Administration, and a reduction in deficit.

Revolving Fund, Virgin Islands Corporation—

Revolving fund: For an additional amount for the revolving fund established under this head in the Supplemental Appropriation Act, 1950, to provide for advances to the Virgin Islands Corporation as authorized by law, $3,285,000.

Estimate 1952, **$3,285,000**

FUNDS AVAILABLE FOR OBLIGATION

	1950 actual	1951 estimate	1952 estimate
Appropriation or estimate	$1,250,000		$3,285,000
Prior year balance available		$20	
Balance transferred from "Grants to Virgin Islands Corporation"			251,617
Total available for obligation	1,250,000	20	3,536,617
Balance available in subsequent year	−20		
Total obligations (statement A)	1,249,980	20	3,536,617

PROGRAM AND PERFORMANCE

In 1952, $3,285,000 will be drawn from this fund to be used to assist in financing the operations of the Corporation.

OBLIGATIONS BY ACTIVITIES

Loans—1950, $1,249,980; 1951, $20; 1952, $3,536,617.

OBLIGATIONS BY OBJECTS

16 Investments and loans—1950, $1,249,980; 1951, $20; 1952, $3,536,617.

GRANTS

Grants to Virgin Islands Corporation—

For payment to the Virgin Islands Corporation in the form of grants, [$474,000,] for [estimated losses to be sustained] *expenses incurred* during the *current* fiscal [years 1950 and 1951] *year*, as authorized by section 8 ([a]*b*) of the Virgin Islands Corporation Act, in the conduct of activities budgeted as predominantly [revenue] *nonrevenue* producing, *$130,000: Provided, That funds appropriated under this head in the Interior Department Appropriation Act, 1951, for estimated losses to be sustained during the fiscal year 1951, shall remain available for estimated losses to be sustained during the fiscal year 1952: Provided further, That an amount equal to the excess of grants for estimated losses for revenue producing activities over the actual loss for the fiscal year 1951 and the estimated loss for the fiscal year 1952 shall be transferred from the appropriation for "Grants" to the "Revolving Fund, Virgin Islands Corporation" and shall be merged therewith.* (*Interior Department Appropriation Act, 1951.*)

Appropriated 1951, **$474,000** Estimate 1952, **$130,000**

FUNDS AVAILABLE FOR OBLIGATION

Total, Department of the Interior	8	$120,000	7	$12,600	$107,400	61	512,400	

PROPOSED FOR LATER TRANSMISSION

Construction, Bonneville Power Administration, Department of the Interior.—It will be necessary to accelerate construction of previously approved transmission facilities from Maupin to Klamath Falls, Oreg., through Madras and Redmond and to place orders and begin design of a substation at Chemawa, Oreg. Rapidly increasing power demands in southwest Oregon, to be met in part by interconnections with California facilities, and in the Salem and Oregon City areas require advancing the energization of these facilities to the second quarter of 1953. An estimated supplemental appropriation for 1951 in the amount of $2,450,000 is included in the budget for this purpose.

Hells Canyon power project, Bureau of Reclamation.—It is proposed to initiate construction on this project in fiscal year 1952 if authorized. An amount of $8,000,000 is included in the budget as an estimated 1952 supplemental appropriation.

INTRODUCTORY STATEMENT

The Department of Justice is primarily the law office of the Federal Government. Its officers and employees detect violations of the Federal criminal law, prosecute offenders before the courts, and maintain in prisons those who are sentenced. They proceed at civil law in upholding the authority and protecting the revenues of the Government. Legal counsel and opinions are provided the President and heads of executive agencies. Components of the Department, in addition to the law offices, include the Federal Bureau of Investigation, the Immigration and Naturalization Service, the Federal Prison System, and the Office of Alien Property.

During 1952 the activities of the Department will be considerably increased as a result of the enactment of the Internal Security Act.

LEGAL ACTIVITIES AND GENERAL ADMINISTRATION

SALARIES AND EXPENSES, GENERAL ADMINISTRATION

Salaries and Expenses, General Administration, Department of Justice—

For expenses necessary for the administration of the Department of Justice and for [investigation of the official acts, records, and accounts of officers and offices of United States and territorial courts] *examination of judicial offices*, including [personal services in the District of Columbia;] purchase of [one] *three* passenger motor [vehicle at not to exceed $4,000,] *vehicles* for replacement only; [services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a);] miscellaneous and emergency expenses authorized or approved by the Attorney General or his Administrative Assistant; special attorneys and special assistants to the Attorney General; and examination of estimates of appropriations in the field; [$2,175,000] *$2,363,000. (5 U. S. C. 22a, 291, 294, 301, 306, 312; 8 U. S. C. 136, 155, 213, 214; 18 U. S. C. 3570, 4201–4207; 28 U. S. C. 507b, 547c; 31 U. S. PROGRAM AND PERFORMANCE

1. *Executive direction.*—The Attorney General, aided by the Deputy Attorney General, directs and supervises the programs and activities of the Department, including determination of the Department's position with respect to proposed or pending legislation and the conduct of the Department's public relations.

2. *Administrative reviews and appeals.*—Designated staff assisting the Attorney General reviews requests for pardon and acts for the Attorney General in parole matters and in application of certain provisions of the immigration laws.

Authority to pardon persons convicted of law violation rests with the President, who is provided with the recommendations of the Attorney General as prepared by the pardon attorney. Approximately 1,200 applications are considered each year.

The Board of Immigration Appeals reviews the recommendations of the Commissioner of Immigration and Naturalization affecting the admission, exclusion, and deportation of aliens. Approximately 5,000 appeals come before the Board each year.

The Board of Parole has sole authority to grant or revoke paroles of Federal prisoners; it considers about 12,000 requests for parole each year. It supervises approximately 5,400 persons to whom parole has been granted, as well as about 2,500 persons conditionally released after serving their minimum sentence.

3. *Administrative services.*—The Administrative Assistant Attorney General supervises the administrative service functions of the Department. Complete service is furnished for the smaller offices and divisions; coordination and general supervision are given the administrative service units of the larger divisions and bureaus, for which certain services of procurement and supply are also performed in instances where these functions can be more effectively performed centrally.

Total obligations	7,175,475	7,472,500	9,072,000

PROGRAM AND PERFORMANCE

1. *Conduct of Supreme Court proceedings and coordination of appellate matters.*—The Solicitor General has charge of all appellate matters and represents the Government before the Supreme Court of the United States. Some 500 cases before the Supreme Court and about 900 determinations in appellate matters are handled in this office each year, a rate which is expected to continue during 1952.

2. *General tax matters.*—The Tax Division is charged with the prosecution or defense in all cases arising out of the internal-revenue laws (except liquor tax law violations), enforcement of tax liens, and other matters relating to Federal taxes. Results of the intensified enforcement drive by the Department of the Treasury in collection of internal-revenue taxes are reflected in increased cases in the Tax Division, which obtains collections through court action or defends actions brought for tax refunds. Increasing workload, particularly in civil cases, will require additional staff during 1952.

3. *Criminal matters.*—The Criminal Division has charge of all actions in criminal law except those specially assigned to the Tax and Antitrust Divisions. Increased activities, including a substantial expansion in the internal security and civil-rights programs are anticipated in 1952.

4. *Claims and general civil matters.*—The Claims Division is responsible for the prosection or defense of all Federal civil suits and claims except those assigned to the Tax, Customs, and Lands Divisions, and the Office of Alien Property. The continuing high volume of cases and claims, involving more than $4,000,000,000, and the growing backlog of cases in which the potential loss to the Government in interest alone amounts to many millions of dollars, accounts for the increase in this activity reflected in the 1952 estimate.

5. *Customs matters.*—The Customs Division protects the customs revenues by defending the decisions of collectors of customs against claims of importers for lower duties. An increase in cases filed, and the prospect of further increases in imports under recent trade agreements and currency devaluation, are reflected in a slightly enlarged staff estimated for 1952.

6. *Land matters.*—The Lands Division has charge of all civil suits and matters relating to title, possession, and use of Federal lands and natural resources. It also represents the United States in all civil litigation pertaining to Indians and Indian affairs. Pending work in this Division increased 15 percent during the year ending June 30, 1950, notwithstanding an increase of 42 percent in the number of cases closed.

7. *Preparation of legal opinions.*—The Assistant Attorney General provides counsel and opinions to executive agencies, and reviews, as to form and legality, proposed executive orders and proclamations submitted by direction of the President.

OBLIGATIONS BY ACTIVITIES

PROGRAM AND PERFORMANCE

1. *Litigation and legal review.*—The primary function of the Division is enforcement, involving the preparation of instructions for investigations to be performed by the Federal Bureau of Investigation, analysis of available evidence, and preparation and presentation of cases to grand juries and courts.

2. *Judgments and judgment enforcement.*—Staff negotiates, reviews, and interprets consent judgments, and obtains modifications and enforces compliance with such judgments when required.

3. *Antimonopoly clearance for disposal of surplus property.*—Staff reviews proposed disposition of surplus Government properties when valued in excess of $1,000,000, and properties vested from enemy alien ownership, for possible effects on competitive markets. It also reviews voluntary allocation plans proposed by industry.

4. *Small-business assistance.*—Relief by negotiation is sought for individual complainants, notably in obtaining revisions of governmental specifications to permit small business to proffer bids to supply materials or commodities.

5. *Economic investigations.*—Staff furnishes advice on the economic aspects of antitrust actions planned.

6. *Executive direction.*—The Assistant Attorney General, with the assistance of his personal staff, determines the policies and procedures to be followed in antitrust matters.

7. *Administrative services.*—The housekeeping function of the Division includes a legal reference service as well as the usual administrative services.

PROGRAM AND PERFORMANCE

The Federal Government is represented in each of the 94 judicial districts by a United States attorney and a United States marshal, under the direction of the Attorney General. A new district has been established at Guam. The United States attorney is responsible for the Government's interests at law in his district; coordination between districts and assistance in specific matters are provided by the several assistant attorneys general. The marshal is largely an officer serving the local Federal courts, responsible for the custody of prisoners and the service of process. He also serves as disbursing officer for activities of the Department and the Judiciary in his district.
