CURRENT AUTHORIZATIONS

AGRICULTURAL RESEARCH SERVICE

SALARIES AND EXPENSES

Salaries and Expenses, Agricultural Research Service

For expenses necessary to perform agricultural research relating to production and utilization, to control and eradicate insect pests and plant and animal diseases, and to perform related inspection, quarantine and regulatory work, and meat inspection: Provided, That not to exceed $15,000 of the appropriations hereunder shall be available for employment pursuant to the second sentence of section 706 (a) of the Organic Act of 1944 (5 U. S. C. 574), as amended by section 15 of the Act of August 2, 1946 (5 U. S. C. 55 (a)): Provided further, That appropriations hereunder shall be available for the operation and maintenance of aircraft and the purchase (for replacement only) of not to exceed one, and the construction, alteration, and repair of buildings and improvements, but unless otherwise provided, the cost of constructing any one building (except headhouses connecting greenhouses) shall not exceed $10,000 and the cost of altering any one building during the fiscal year shall not exceed $5,000 or two per centum of the cost of the building, whichever is greater:

Research: For research and demonstrations on the production and utilization of agricultural products, and related research and services, including administration of payments to State Agricultural Experiment Stations; $35,353,000, of which not to exceed $20,000 shall be available for the construction of an office and a laboratory building at the Southeastern Tidewater Field Station, Fleming, Georgia.

Plant and animal disease and pest control: For operations and measures to control and eradicate insect pests and plant and animal diseases and for carrying out assigned inspection, quarantine and regulatory activities, as authorized by law; $15,000,000, of which $500,000 shall be apportioned for use pursuant to section 3679 of the Revised Statutes, as amended, for the control of outbreaks of insects and plant diseases under the joint resolution approved May 9, 1938 (7 U. S. C. 148–148e) to the extent necessary to meet emergency conditions: Provided further, That no part of this appropriation shall be used to pay the cost or value of trees, farm animals, farm crops, or other property injured or destroyed as a result of plant insect and disease control activities except potatoes and tomatoes as authorized under the Golden Nematode Act: Provided further, That, in the discretion of the Secretary, no part of this appropriation shall be expended for the control of sweetpotato weevil in any State until such State has provided cooperation necessary to accomplish this purpose, or for barberry eradication until a sum or sums at least equal to such expenditures shall have been made available by States, counties, or local authorities, or by individuals or organizations for the accomplishment of this purpose, or with respect to the golden nematode except as prescribed in section 4 of the Golden Nematode Act.

Meat inspection: For carrying out the provisions of laws relating to Federal inspection of meat and meat-food products; $14,325,000. (5 U. S. C. 511–512, 524, 563–564, 565a, 576; 7 U. S. PROGRAM AND PERFORMANCE

The Agricultural Research Service conducts fundamental and applied research and demonstrations relating to the production and utilization of agricultural products, and conducts those control and regulatory programs of the Department which involve enforcement of plant and animal quarantines, meat inspection, the control of diseases and insect pests of animals and plants, and related work.

The proposed net decrease consists of: (*a*) Increases to expand and strengthen research relating to the production and utilization of agricultural products; (*b*) decreases in certain control and regulatory activities on insects and plant and animal diseases; and (*c*) an increase for additional inspectors at meatpacking plants.

1. *Research*—(*a*) *Crop research.*—Investigations are conducted to develop improved varieties of food, feed, fiber, and other plants; to improve crop production practices including methods to control plant diseases; to control harmful and utilize beneficial insects affecting farm production; and to develop and test new chemical formulations for the control of crop pests.

(*b*) *Farm and land management research.*—Investigations are conducted to improve fertilizers and soil management and irrigation practices; to develop and improve conservation practices and techniques; to determine the relation of soils to plant, animal and human nutrition; and to apply engineering principles to agriculture. Economics of production research is conducted on profitable adjustments in farming by type and size of farm; efficiency in use of labor, equipment, land, and water; inventory and analysis of land resources; and problems of farm valuation, taxation, debt, tenure, risk, and insurance.

(*c*) *Livestock research.*—Investigations are conducted on all farm livestock, poultry, and domestic fur animals to develop superior strains and types, establish nutritive requirements, determine physiology of reproduction, achieve efficient use of feed and forage in the production of meat, milk, eggs, wool, fur, and other products; develop practical methods of control of diseases and of parasites affecting livestock; and develop improved and efficient management methods and practices.

(*d*) *Administration of payments to States, and Territorial research.*—Research under Federal grant funds at each State agricultural experiment station is administered and coordinated with the research conducted by other States and by agencies of the United States Department of Agriculture. Agricultural experiment stations are operated in Puerto Rico, Virgin Islands, and Alaska.

(*e*) *Human nutrition and home economics research.*—Investigations are conducted on nutritional requirements; the composition and nutritive value of various foods; the principles of utilization underlying consumer selection, preparation, and preservation of foods. Studies are also made of the practices and problems of families in the buying, utilization, and management of food, clothing, housing facilities and other items, and the kind of living achieved by various population groups.

(*f*) *Utilization research.*—Investigations are conducted in the field of chemistry and related physical and biological sciences to develop new and improved foods, feeds, drugs, fabrics, industrial chemicals, and other products from agricultural commodities; to devise improved methods for evaluating the suitability of commodities for processing; to devise better processing methods; to increase the use of byproducts; and to solve waste disposal problems.

2. *Plant and animal disease and pest control*—(*a*) *Plant disease and pest control.*—The work consists of insect and plant disease control and plant quarantine measures designed to protect agriculture from destructive insects and plant diseases. The Federal Insecticide, Fungicide, and Rodenticide Act is administered and enforced.

(*b*) *Animal disease and pest control.*—Measures are devised to exclude from this country communicable diseases of foreign origin; to prevent the spread of diseases through interstate shipments of livestock or distribution of impure or impotent veterinary biologics; to control and eradicate livestock diseases; to maintain, through a marketing agreement with manufacturers and handlers, adequate supplies of hog cholera virus and serum for protection of swine; and to provide continuous inspection of the manufacture of process butter.

3. *Meat inspection.*—Federal meat inspection is conducted to assure a clean and wholesome meat supply for human consumption. The work includes inspection of animals, carcasses and meat, and meat-food products at various stages of handling and processing. Measures are enforced to insure informative labeling and meats imported or exported are inspected. Meat and meat-food

PROGRAM AND PERFORMANCE

Funds are allotted to the agricultural experiment stations of the land-grant colleges in the States, Hawaii, Alaska, and Puerto Rico for agricultural research, including investigations and experiments to promote a permanent and efficient agricultural industry and improvements in the rural home and rural life. The allotments are made partly on the basis of prescribed amounts in the authorizing acts and partly on the basis of need in specific areas to find solutions to agricultural problems. The States are contributing about $5 to each $1 paid by the Federal Government.

The increase proposed is primarily for strengthening the research program at the State, Territorial, and Puerto Rico agricultural experiment stations.

PROGRAM AND PERFORMANCE

On recommendation and approval of the Office of Defense Mobilization, investigations are made of the feasibility of developing domestic sources of supplies of any agricultural material or substitute for it determined by that Office to be strategic and critical. The proposed decrease results from elimination of all research on guayule.

1. *Research on domestic production of natural rubber.*—Investigations were carried on in 1953 and 1954 to make the guayule plant more usable, and to improve the quality of rubber from it.

2. *Investigations of domestic production of vegetable tannins.*—These studies aim at domestic production of crops from which materials for tanning leather can be derived, and development of methods of extracting such materials.

3. *Investigations on vegetable fats and oils.*—These studies seek to develop the domestic production of castor beans.

4. *Investigations on fiber plants.*—This work centers on the domestic production of fibers that can be used for such purposes as lines and ropes on naval vessels and as substitutes for jute.

ERADICATION OF FOOT-AND-MOUTH AND OTHER CONTAGIOUS DISEASES OF ANIMALS AND POULTRY

Eradication of Foot-and-Mouth and Other Contagious Diseases of Animals and Poultry, Agricultural Research Service

For expenses necessary in the arrest and eradication of foot-and-mouth disease, rinderpest, contagious pleuropneumonia, or other contagious or infectious diseases of animals, or European fowl pest and similar diseases in poultry, including the payment of claims growing out of destruction of animals (including poultry) affected by or exposed to, or of materials contaminated by or exposed to, any such disease, when there has been compliance with all lawful quarantine regulations, and for foot-and-mouth disease and rinderpest programs undertaken pursuant to the provisions of the Act of February 28, 1947, and the Act of May 29, 1884, as amended (7 U. S. C. 391; 21 U. S. C. 111–122), including expenses in accordance with section 2 of said Act of February 28, 1947, the Secretary may transfer from other appropriations or funds available to the bureaus, corporations, or agencies of the Department such sums as he may deem necessary, but not to exceed $2,650,000 for eradication of vesicular exanthema of swine, to be available only in an emergency which threatens the livestock or poultry industry of the country, and any unexpended balances of funds transferred under this head in the next preceding fiscal year shall be merged with such transferred amounts: *Provided*, That, except for payments made pursuant to said Act of February 28, 1947, the payment for animals may be made on appraisement based on the meat, egg-production, dairy, or breeding value, but in case of appraisement based on breeding value no appraisement of any animal shall exceed three times its meat, egg-production, or dairy value and, except in case of an extraordinary emergency to be determined by the Secretary, the payment by the United States shall not exceed one-half of any such appraisements: [*Provided further*, That poultry may be appraised in groups when the basis for appraisal is the same for each bird:] *Provided further*, That this appropriation shall be subject to applicable provisions contained in the item "[Office of Administrator] *Salaries and expenses*, Agricultural Research [Administration] *Service*"[: *Provided further*, That the Secretary of the Treasury is hereby authorized and directed to discharge indebtedness of the Commodity Credit Corporation to the Secretary of the Treasury by canceling notes issued by the Corporation to the Secretary of the Treasury in the amount of $7,057,575 for funds transferred and expenses incurred under this head through fiscal year 1952 (including interest thereon through June 30, 1953) pursuant to authority granted in the Department of Agriculture Appropriation Act, 1952]. PROGRAM AND PERFORMANCE

After discovery of foot-and-mouth disease in Mexico in 1946, measures were undertaken to prevent the spread of the disease into the United States and to assist Mexico in control and eradication. Eradication of the disease was accomplished and on September 1, 1952, Mexico was declared free of the disease. However, in May 1953, a new outbreak occurred and cooperative eradication measures have again been undertaken. In February 1952 an outbreak of the disease in Canada made it necessary to undertake protective measures to prevent entry of the disease from that source. Canada was declared free of the disease on March 1, 1953. Due to the unpredictable course of the disease, the Department has been authorized to transfer needed amounts from any funds available to it. Replacements of these transfers have been made from subsequent appropriations and by canceling notes issued by the Commodity Credit Corporation to the Secretary of the Treasury.

On August 1, 1952, an emergency was declared as the result of the spread of vesicular exanthema of swine. The disease has now been identified in 42 States and the

District of Columbia. Cooperative measures have been undertaken to eradicate the disease. Chief means of spread of the disease is through feeding of uncooked garbage. To further eradication efforts, 41 States now have laws or regulations requiring the cooking of garbage fed to swine. The extent of the disease as disclosed by the fall and winter shipping season will indicate the effectiveness of present control measures.

On October 31, 1952, an emergency was declared as the result of the diagnosis of scrapie in California. This destructive virus disease was also diagnosed in Illinois and Ohio in the past fiscal year. Quarantines imposed have been lifted except in Ohio.

Funds for carrying out the eradication of vesicular exanthema and scrapie have been made available from other appropriations of the Department.

EXTENSION SERVICE

INTRODUCTORY STATEMENT

Extension work is a joint undertaking of the U. S. Department of Agriculture, the State land-grant colleges, the counties, and municipalities. It brings to rural people the research results of the Department, the colleges, and other research agencies. Its objective is to help people help themselves to attain greater efficiency in farming, to have better homes, higher standards of living, and a more effective system of marketing and distribution.

PROGRAM AND PERFORMANCE

Funds are distributed to each State, Hawaii, Alaska, and Puerto Rico on the basis of formulas stipulated in the governing acts. The costs of cooperative extension work are currently shared as follows: Federal appropriations, 35.9 percent; State appropriations, 37.8 percent; county appropriations, 23.7 percent; and other local sources, 2.6 percent.

The funds are used within the States for the employment of county agents, county home demonstration agents, county 4–H Club agents, specialists and other staff members who make available, interpret to rural people, and assist them in making application of, the results of agricultural and home-economic research and related information. These agents work directly with farm families, helping them to solve their economic problems, by introducing improved production methods, insect, rodent and disease control, better crop rotation and storage, improvement of dairy herds, livestock and poultry, conservation of the land and water resources, farm forestry, efficient use of the available farm labor and equipment, farm credit, improved marketing methods, farm business management, outlook information, public affairs, nutrition, family economics, home management, clothing and textiles, parent and family life interests, housing and homefurnishings, consumer education and the combination of all these individual segments so that they will work most effectively and profitably on the individual farms and for the benefit of agriculture and the consumers generally. Work with youth, largely through 4–H Clubs, which now have an enrollment of over 2,000,000, includes both agriculture and home economics and, in addition, training in leadership development and citizenship responsibilities. Extension specialists and other State staff members are primarily responsible for developing educational material and assisting county extension agents in conducting effective educational programs with farm families.

Funds authorized under sections 204 (b) and 205 of the Agricultural Marketing Act of 1946 are also distributed to the States, Hawaii, Alaska, and Puerto Rico on a matching basis under approved projects. These funds are used for educational work applicable to the marketing and distribution of agricultural products.

EXTENSION SERVICE—Continued

FEDERAL EXTENSION SERVICE—continued

Federal Extension Service—Continued

in cooperation with the extension services of the States and Territories. Assistance is provided to the States in: (1) Overall policies and relationships, (2) program development and adjustment in line with changing conditions and new technology, (3) organization of staff and work for most efficient use of resources available, (4) evaluation of methods and procedures used, and results obtained, and (5) in-service training for extension personnel.

The Service provides counsel and leadership to the States in adjusting programs and in inaugurating new programs to meet changing economic conditions and new technology and in developing uniform programs on an area basis involving several States where the need exists. An exchange of research findings and programs is provided among States, and between the Department, other research agencies, and the States to insure full availability and incorporation into the State educational programs. The latest information is supplied regarding the program of the Department of direct significance to farm people.

Cooperative assistance is provided in developing agreements with States covering programs of work; State budgets, projects and the annual plans of work are reviewed and analyzed; funds are allocated to individual States; and State expenditures are examined for compliance with requirements of law. Visual and informational aids are developed and made available to the States and counties, and assistance and training is provided in developing and using teaching aids and effective teaching methods.

PROGRAM AND PERFORMANCE

The Farmer Cooperative Service provides farmers' cooperatives with research and technical assistance. Studies are made to improve the organization and the operations of farmers' cooperatives and technical assistance is given them in cooperation with State and Federal agricultural research and extension agencies.

This work was previously carried as an activity under "Administrative expenses, Farm Credit Administration." The Service was transferred to the jurisdiction and control of the Secretary of Agriculture by the Farm Credit Act of 1953 (Public Law 202, Aug. 6, 1953).

FOREST SERVICE

INTRODUCTORY STATEMENT

The Service carries on three primary functions: (1) Protection, development, and use of more than 181,000,000 acres of land in national forests in the United States, Alaska, and Puerto Rico; and the management of land-utilization projects covering some 7,000,000 acres; (2) cooperation with the States and private forest landowners to obtain better fire protection on approximately 427,000,000 acres of forest lands and better forest practices on about 345,000,000 acres of privately owned commercial timber lands, to encourage reforestation, and to stimulate development and management of State, county, and community forests; and (3) forest research and range management research for all forest lands and related ranges to bring about better protection from fire, insects, and diseases; to increase productivity, and to facilitate full utilization of forest, water, and range resources, and more profitable production of timber and forage. Included in these three primary functions are construction and maintenance of roads and trails, control of forest pests, protection against floods, land exchange, and a number of cooperative projects.

SALARIES AND EXPENSES

Salaries and Expenses, Forest Service

For expenses necessary, including not to exceed $15,000 for employment pursuant to the second sentence of section 706 (a) of the Organic Act of 1944 (5 U. S. C. 574), as amended by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a); to experiment and make investigations and report on forestry, national forests, forest fires, *forest insects and diseases*, and lumbering[, but no part of this appropriation shall be used for any experiment or test made outside the jurisdiction of the United States]; to advise the owners of woodlands as to the proper care of the same; to investigate and test American timber and timber trees and their uses, and methods, for the preservative treatment of timber; to seek, through investigations and the planting of native and foreign species, suitable trees for the treeless regions; to erect necessary buildings: *Provided*, That the cost of any building purchased, erected, or as improved, exclusive of the cost of constructing a water-supply or sanitary system and of connecting the same with any such building, and exclusive of the cost of any tower upon which a lookout house may be erected, shall not exceed $18,500 ($22,500 in Alaska) with the exception that any building erected, purchased, or acquired, the cost of which was $18,500 or more, may be improved out of the appropriations made under this Act for the Forest Service by an amount not to exceed 2 per centum of the cost of such building; to protect, administer, and improve the national forests, including tree planting and other measures to prevent erosion, drift, surface wash, soil waste, and the formation of floods, and to conserve water; to ascertain the natural conditions upon and utilize the national forests, to transport and care for fish and game supplied to stock the national forests or the waters therein; *for management of lands acquired under the land utilization program; and* to collate, digest, report, and illustrate the results of experiments and investigations made by the Forest Service: *Provided further*, That the appropriations available to the Forest Service for the current fiscal year may be used for the operation and maintenance of aircraft, and the purchase of not to exceed [three] *four* (for replacement only), and not to exceed $250,000

FOREST SERVICE—Continued

SALARIES AND EXPENSES—continued

Salaries and Expenses, Forest Service—Continued

of such appropriations may be used for the maintenance, improvement, and construction of [airplane] *aircraft* landing fields in, *or adjacent to,* the national forests, as follows:

National forest protection and management: For the administration, protection, use, maintenance, improvement, and development of the national forests, including the establishment and maintenance of forest tree nurseries, including the procurement of tree seed and nursery stock by purchase, production, or otherwise, seeding and tree planting and the care of plantations and young growth; the maintenance of roads and trails and the construction and maintenance of all other improvements necessary for the proper and economical administration, protection, development, and use of the national forests, including experimental areas under Forest Service administration, except that where direct purchases will be more economical than construction, improvements may be purchased; the construction (not to exceed $18,500 for any one structure), equipment, and maintenance of sanitary and recreational facilities; timber cultural operations; development and application of fish and game management plans; propagation and transplanting of plants suitable for planting on semiarid portions of the national forests; estimating and appraising of timber and other resources and development and application of plans for their effective management, sale, and use; expenses of the National Forest Reservation Commission as authorized by section 14 of the Act of March 1, 1911 (16 U. S. C. 514); examination, classification, surveying, and appraisal of land incident to effecting exchanges authorized by law and of lands within the boundaries of the national forests that may be opened to homestead settlement and entry under the Act of June 11, 1906, and the Act of August 10, 1912 (16 U. S. C. 506–509), as provided by the Act of March 4, 1913 (16 U. S. C. 512); investigation and establishment of water rights, including the purchase thereof or of lands or interests in lands or rights-of-way for use and protection of water rights necessary or beneficial in connection with the administration and public use of the national forests; not to exceed $100,000 for the purchase of parcels of land and interests therein in Sanders County, Montana, but such land shall not be acquired without the approval of the local government concerned; and all expenses necessary for the use, maintenance, improvement, protection, and general administration of the national forests[; $29,715,700], *and for the management of lands under title III of the Act of July 22, 1937, and the Act of August 11, 1945 (7 U. S. C. 1010–1012); $28,935,000: Provided, That the Secretary may sell at market value any property located in Yalobusha, Chickasaw, and Pontotoc counties, Mississippi, administered under title III of the Act of July 22, 1937, and suitable for return to private ownership under such terms and conditions as would not conflict with the purposes of said Act.*

Fighting forest fires: For fighting and preventing forest fires on or threatening lands under Forest Service administration, including lands under contract for purchase or in process of condemnation for Forest Service purposes, and for liquidation of obligations incurred in the preceding fiscal year for such purpose, $6,000,000, of which $2,500,000 shall be apportioned for use, pursuant to section 3679 of the Revised Statutes, as amended, to the extent necessary to meet emergency conditions.

Control of forest pests: For the control of white pine blister rust pursuant to the Act of April 26, 1940 (16 U. S. C. 594a), including the development and testing of new control methods, $2,430,000, of which $360,000 shall be available to the Department of the Interior for the control of white pine blister rust on or endangering Federal lands under the jurisdiction of that Department or lands of Indian tribes which are under the jurisdiction of or retained under restrictions of the United States; and for carrying out the Forest Pest Control Act (16 U. S. C., Supp. V, 594–1—594–5), $2,585,000, of which $2,185,000 shall be apportioned for use pursuant to section 3679 of the Revised Statutes, as amended, for the purposes of said Act to the extent necessary under the then existing conditions; $5,015,000.

Forest research: For forest research at forest or range experiment stations, the Forest Products Laboratory, or elsewhere, in accordance with the provisions of sections 1, 2, *3,* 4, 7, 8, 9, and 10 of the Act approved May 22, 1928, as amended (16 U. S. C. 581, 581a–*581c,* 581f–581i), including the construction and maintenance of improvements; fire, silvicultural, watershed, *forest insects and diseases,* and other forest investigations and experiments; investigations and experiments to develop improved methods of management of forest and [other] *related* ranges; experiments, investigations, and tests of forest products; *marketing research and service on timber and timber products;* a comprehensive forest survey; and investigations in forest economics; [$5,350,000] *$6,528,500: Provided,* That funds may be advanced to cooperators under such regulations as the Secretary may prescribe when such action will stimulate or facilitate cooperative work. *(5 U. S. C. 511–512, 524, 565a; 16 U. S. C. 471–583i; 31 U. S. C. 534; Act of June 20, 1910, Public Law 219; Act of August 8, 1953, Public Law 224; Department of Agriculture Appropriation Act, 1954.)*

PROGRAM AND PERFORMANCE

1. *National forest protection and management*—(*a*) *Resource protection and use.*—The national forests are protected from fire, and their resources are managed in such ways as to bring about full utilization and maximum sustained production.

Total receipts	76,463,746	77,100,000	77,100,000

In addition this item provides for management of land utilization projects. In cooperation with local and State agencies, revegetation and other development work has been done on submarginal land projects in 30 States, covering 7,859,605 acres. Developed lands are made available to local farmers and ranchers at equitable rates under specific use conditions. Of the revenue amounting to more than 1½ million dollars annually, 75 percent goes to the Treasury and 25 percent to the counties in which the lands are located.

(*b*) *Resource development.*—Main factors are shown in following table:

(*c*) *Additional measures to accelerate flood prevention.*—In the fiscal years 1953 and 1954 additional funds were provided for measures, which contribute directly to flood prevention, and involve the conservation of watershed lands. While many of these measures are included in the national programs, acceleration of the rate of their application speeds up or intensifies flood-prevention benefits on watersheds where flood-prevention programs are being conducted. They usually consist of measures, such as revegetation, to stabilize and rehabilitate both forest and range lands.

2. *Fighting forest fires.*—This provides for employment of additional manpower and other facilities to suppress forest fires which cannot be controlled by the fire-control organization provided for under the activity "National forest protection and management." A supplemental appropriation of $3,000,000 is anticipated for 1954.

3. *Control of forest pests*—(*a*) *White pine blister rust control.*—Protection of white pine trees from blister rust is provided by removing ribes (alternate host plants) from areas where white pine grows, some of which is done in cooperation with other land-managing agencies. Since this program was initiated in 1918, ribes have been removed from approximately 16,100,000 acres. A small amount of maintenance work is needed on this acreage to keep the ribes suppressed. Approximately 7,400,000 additional acres require further eradication work. The 1955 estimate proposes to reduce the number of acres from which ribes will be removed below 1954, and to eliminate Federal contributions to these operations on State and private lands except for program guidance and technical assistance.

The following table indicates the estimated program for 1954 and 1955 as compared to work done in 1953:

Acres	1953 actual	1954 estimate	1955 estimate
Initial eradication	251,292	148,544	
Rework	1,055,057	1,055,057	975,601
Total	1,306,349	1,203,601	975,601

(*b*) *Forest pest control.*—Operations consist of (*a*) surveys to detect and appraise the danger of insects and plant diseases which injure or destroy forest resources, and (*b*) suppressive measures before extensive damage is done and while areas requiring treatment are small. An increase is proposed to assist in control of known new insect epidemics.

4. *Forest research*—(*a*) *Forest and range management investigations.*—Research is conducted at regional forest experimental stations and elsewhere to provide private and public land managers and owners with a sound basis for protection and management of timber, range, and watershed lands. Studies are conducted to maintain a sustained yield of products at the lowest possible costs; increase forage on range lands for maximum production of livestock without damage to soil, watershed, or other

values; assure maximum regular flow of usable water, and reduce flood and sedimentation.

(*b*) *Forest protection investigations (fire, insects, and diseases).*—Research is conducted at the regional forest experiment stations and elsewhere to develop sound measures for the protection of forests from damage by fire, insects, and diseases. These investigations provide the technical basis for control measures and preventive measures, including predictions of fire danger.

(*c*) *Forest products investigations.*—The work of the Forest Products Laboratory is directed toward improvement of forest products, reduction and utilization of waste, utilization of low-quality wood and unpopular species, development of new wood products, reduction of costs of logging and utilization of wood products, development of basic knowledge and discoveries, and dissemination of findings to meet the needs of the forest owner, primary manufacturer, wood fabricator, and ultimate consumer.

(*d*) *Forest resources investigations.*—These investigations are conducted to inventory and appraise the condition of forest lands, volume and quality of standing timber, ownership of timber resources, annual growth and depletion, potential need for timber products, and other information on supply, production, marketing, and utilization.

PROGRAM AND PERFORMANCE

Roads and trails are essential for the protection and management of the national forests and for the utilization of their resources. The existing system consists of approximately 117,000 miles of earth or gravel-surfaced roads and 120,000 miles of supplemental trails.

The increase in 1955 is to provide for completion of construction of access roads to insect-infested timber in Oregon and Washington.

Included in this program in the fiscal years 1953 and 1954 was the construction and maintenance of roads and trails as a part of or corollary to conservation measures which contribute directly to flood prevention on watershed lands.

PROGRAM AND PERFORMANCE

This program, for the most part carried on in cooperation with the States, encourages private timber growing through assistance in preventing and suppressing forest fires, reforestation of denuded and poorly stocked areas, and good management of woodlands. Privately owned forest lands comprise three-fourths of the Nation's commercial forest area and produce 90 percent of all timber cut. The fire-control program applies to all forest lands within the boundaries of organized protection units. The balance of the program concentrates on small forest properties in private ownership because (*a*) 76 percent of the private commercial forest acreage is in small holdings averaging only about 62 acres each, (*b*) the small-owner group comprises 99 percent of private forest owners, and (*c*) present cutting practices are poorest on these small properties.

1. *Cooperation in forest fire control.*—Assistance is furnished 43 States and Hawaii in preventing and suppressing forest fires on private and State-owned lands by financial aid, training, procurement of equipment, and a nationwide fire-prevention campaign. All but approximately one-seventh of the 427,000,000 acres of non-Federal ownership are now partially covered. During 1952 the acreage burned on protected areas was 1.7 percent as against an estimated 13 percent on unprotected lands. Of the total expenditures under this program, 70 percent is contributed by States and counties, 6 percent by private owners, and 24 percent by the Federal Government.

2. *Cooperation in forest tree planting.*—To encourage woodland owners to plant trees on the more than 60 million acres of inadequately stocked private forest land, the States provide trees at less than cost. In the fiscal years 1953 and 1954 the Federal Government shared the cost with the States to the extent of one-fifth.

3. *Cooperation in forest management and processing.*—In cooperation with State foresters, 262 projects in 1,300 counties were operated in fiscal year 1953 to aid small-woodland owners in applying good management to their timber holdings, covering some 32,000 owners and about 2,800,000 acres. Small processors of primary forest products received similar technical assistance.

4. *General forestry assistance.*—Assistance and advice is given by field technicians in groups of States in response to inquiries in technical forestry fields in which the volume of business in any one State is not sufficient to justify a technician in each individual State.

5. *Additional measures to accelerate flood prevention.*—In the fiscal year 1953 additional funds were provided for measures contributing directly to flood prevention and involving the conservation of watershed lands. While many of these are included in the national programs, acceleration of the rate of their application speeds up or intensifies flood prevention benefits on watersheds where flood prevention programs are being conducted. These measures were applied on non-Federal land within watersheds in cooperation with State and private forest land owners. Work consists of fire control, tree planting, and technical forest management assistance.

OBLIGATIONS BY ACTIVITIES

Acquisition of lands for national forests—1953, $74,296; 1954, $75,000.

PROGRAM AND PERFORMANCE

In the fiscal years 1953 and 1954 funds were provided to acquire lands to protect the watersheds of navigable streams and to increase the production of timber. The National Forest Reservation Commission, composed of 2 Senators, 2 Representatives, the Secretaries of the Army, Interior, and Agriculture, has approved the establishment of 78 national forest purchase units in 33 States, mainly in the eastern half of the United States. The present value of forest lands thus purchased to date is conservatively estimated at $200,000,000, which is more than twice their cost.

Acquisition of forest land, Superior National Forest, Minn.—1953, $31,490; 1954, $214,893; 1955, $100,000.

PROGRAM AND PERFORMANCE

Forest lands are acquired to preserve the wilderness conditions of part of the Superior National Forest in Minnesota. There are approximately 43,000 acres of privately owned land within the area, of which about 40,000 acres have been or will be purchased. Appropriation of the full amount authorized by the act of June 22, 1948 (Public Law 733), was completed in the fiscal year 1953.

PROGRAM AND PERFORMANCE

The Service, in cooperation with State and other agencies, aids in bringing about physical adjustments in land use to conserve soil and water resources, establish a permanent and balanced agriculture, and reduce the hazards of floods and sedimentation.

Proposed decreases are due to elimination of nursery liquidation expense, performance of certain map reproduction work on a reimbursable basis, organization adjustments at other than the field work unit level, and elimination of funds for emergency channel restoration work.

1. *Assistance to soil conservation districts and other cooperators.*—Assistance furnished soil conservation districts and other cooperators in developing and carrying out locally adapted programs in the States and Territories consists in the main of (*a*) soil surveys to provide physical land facts needed for farm and ranch conservation planning, and by other Federal, State, and local agencies and the public; (*b*) technical assistance in developing and applying conservation farm and ranch plans which allow for the best possible use of the farmer's land, labor, equipment, and financial resources; (*c*) loan of special equipment not otherwise readily available to the farmers; (*d*) streamflow forecasts as a basis for efficient seasonal utilization of water in the Western States; and (*e*) observational field testing of promising conservation plant materials.

2. *Additional measures to accelerate flood prevention.*—Land treatment measures which produce direct flood prevention benefits are being installed at an accelerated rate on watersheds where flood prevention programs are being conducted to complement the works of improvement installed under the flood prevention appropriation. Work consists of preparation of subwatershed work plans and assistance to farmers and ranchers in developing conservation farm and ranch plans and installing conservation measures.

3. *Emergency channel restoration in flood-stricken areas.*—Work consists of assistance in restoring the channel capacity of streams and waterways in agricultural areas damaged by floods and includes removing debris and sediment plugs from stream channels, cleaning and reconstructing irrigation canals, drainage ditches, headgates, and outlets, providing protection to stream banks to prevent channel changes, and construction of levees, dikes, barriers, and other stabilizing structures.

PROGRAM AND PERFORMANCE

The Department, in cooperation with local soil conservation districts, watershed organizations, and other local agencies, furnishes technical assistance in the planning and application of conservation treatment measures to protect watershed lands from soil and water loss. Waterflow-retarding structures and other control measures are also installed on a cost-sharing basis with local interests.

Watersheds in which this work is performed were selected on the basis of surveys which show a favorable cost-benefit ratio and where local people and organizations have demonstrated a willingness and ability to assume a share of the cost of installation. All easements and rights-of-way incident to the structural work and all maintenance services pertaining to the completed works of improvement are furnished by local interests. The vegetative practices, changes in land use, and other conservation measures are installed by the farmers cooperating with the local soil conservation districts and watershed organizations.

FLOOD PREVENTION

Flood Prevention, Agriculture

For expenses necessary, in accordance with the Flood Control Act, approved June 22, 1936 (Public Law 738) as amended and supplemented, and in accordance with the provisions of laws relating to the activities of the Department, to make preliminary examinations and surveys, and to perform works of improvement, and to plan the agricultural phases of the development of [the Columbia Basin area,] the Arkansas-White-Red River area, the New England-New York area, [the Missouri River area, and the Mississippi River area,] including not to exceed $100,000 for employment pursuant to the second sentence of section 706 (a) of the Organic Act of 1944 (5 U. S. C. 574), as amended by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a), at rates for individuals not to exceed $100 per diem, to remain available until expended, [$7,000,000] *$5,739,000*, with which shall be merged the unexpended balances of funds heretofore appropriated or transferred to the Department for flood prevention purposes: *Provided*, That no part of such funds shall be used for the purchase of lands in the Yazoo and Little Tallahatchie watersheds without specific approval of the county board of supervisors of the county in which such lands are situated, nor shall any part of such funds be used for the purchase of lands in the counties of Adair, Cherokee, and Sequoyah, in the State of Oklahoma, and Neosho, Cottonwood, Verdigris, Caney, and tributaries in Kansas, without the specific approval of the Board of County Commissioners of the county in which such lands are situated: *Provided further*, That of the funds available herein, not in excess of [$6,286,329] *$5,261,500* (with which shall be merged the unexpended balance of funds heretofore made available for these purposes) may be expended in watersheds heretofore authorized by section 13 of the Flood Control Act of December 22, 1944, for necessary gully control, floodwater detention, and floodway structures in areas other than those over which the Department of the Army has jurisdiction and responsibility. (*Department of Agriculture Appropriation Act, 1954.*)

PROGRAM AND PERFORMANCE

The aim of the Department's flood-prevention work on watersheds is to prevent or reduce floodwater and sediment damage in upstream areas and to reduce sedimentation of river channels and reservoirs.

1. *Preliminary examinations and surveys.*—Preliminary examinations and surveys of authorized watersheds are made to determine flood damage occurring and whether the benefits resulting from installation of a program of works of improvement in each watershed would exceed the cost of installing the improvement measures. Based on these examinations and surveys, reports are prepared and submitted to the Congress recommending the programs and measures that should be installed to retard runoff and waterflow and prevent erosion. For 1955 it is proposed to eliminate all survey work except for six review surveys on watersheds where works of improvement are presently underway.

2. *Works of improvement.*—Improvement measures recommended in survey reports were authorized for installation on 11 watersheds by the Flood Control Act of 1944. Measures primarily for flood prevention, such as floodwater-retarding and sediment-control structures, debris barriers and basins, deflectors, diversion ditches and dikes, riprapping of stream banks, and other channel improvements, are being installed on these watersheds usually by private contractors, on a cost-sharing basis with local interests. Land treatment measures which contribute to flood prevention are installed by private owners with technical and other assistance being provided by the various bureaus of the Department under their regular programs. Measures installed on the watersheds are complementary to the mainstream flood-control structures and works constructed by the Corps of Engineers and other agencies.

3. *General basin investigations in the Arkansas-White-Red River, and New England-New York areas.*—In cooperation with the respective States involved and other Federal agencies, the Department is participating in the preparation of the agricultural phases of comprehensive resource development plans for the Arkansas-White-Red River and the New England-New York areas.

WATER CONSERVATION AND UTILIZATION PROJECTS

Water Conservation and Utilization Projects, Soil Conservation Service

For expenses necessary to carry [into effect] *out* the functions of the Department under the Acts of May 10, 1939 (53 Stat. 685, 719), October 14, 1940 (16 U. S. C. 590y–z–10), as amended and supplemented, June 28, 1949 (Public Law 132), and September 6, 1950 (7 U. S. C. 1033–1039), relating to water conservation and utilization projects, to remain available until expended, [$685,000] *$480,000*, which sum shall be merged with the unexpended balances of funds heretofore appropriated to said Department for the purposes of said Acts. (*Department of Agriculture Appropriation Act, 1954.*)

PROGRAM AND PERFORMANCE

In cooperation with the Bureau of Reclamation, which constructs the dams, reservoirs, and principal canals, the Service develops efficient irrigation farming units on these specific projects for ultimate sale.

1. *Land development.*—Land classification and topographic surveys are made, and project lands are subdivided into farm units of economic size. The land is cleared and leveled, and farm ditches, drains, and other water-control structures are built. Of the four remaining projects, two are scheduled for completion in 1954, one in 1955, and one in 1957. Because two projects will be completed in 1954 and another is near completion, a decrease of $205,000 in the estimate for 1955 is proposed.

2. *Land management, settlement, and technical guidance.*—In order to protect and improve Government-owned project lands, developed farm units are leased to local people under specific use conditions or are planted to protective cover crops pending their sale to qualified farm families. Technical guidance on irrigation and conservation is furnished until the project is closed.

AGRICULTURAL CONSERVATION PROGRAM *SERVICE*

Agricultural Conservation Program, Agriculture

[To enable the Secretary] *For necessary expenses* to carry into effect the provisions of sections 7 to 17, inclusive, of the Soil Conservation and Domestic Allotment Act, approved February 29, 1936, as amended (16 U. S. C. 590g–590q), [including not to exceed $6,000 for the preparation and display of exhibits, including such displays at State, interstate, and international fairs within the United States; $211,982,000] *$195,000,000*, to remain available until December 31 of the next succeeding fiscal year for compliance with the program of soil-building practices and soil- and water-conserving practices authorized under this head in the Department of Agriculture Appropriation Act, [1953] *1954*, carried out during the period July 1, [1952] *1953*, to December 31, [1953] *1954*, inclusive[, of which amount $2,500,000 shall be available for technical assistance in formulating and carrying out agricultural conservation practices and $1,000,000 shall be available for conservation practices related directly to flood prevention work in approved watersheds]: *Provided*, That not to exceed [$26,178,700] *$22,500,000* of the total sum provided under this head shall be available during the current fiscal year for salaries and other administrative expenses for carrying out such program, the cost of aerial photographs, however, not to be charged to such limitation; but not more than [$4,500,000] *$4,020,000* shall be transferred to the appropriation account, "Administrative expenses, section 392, Agricultural Adjustment Act of 1938": *Provided further*, That payments to claimants hereunder may be made upon the certificate of the claimant, which certificate shall be in such form as the Secretary may prescribe, that he has carried out the conservation practice or practices and has complied with all other requirements as conditions for such payments and that the statements and information contained in the application for payment are correct and true, to the best of his knowledge and belief, under the penalties of title 18, United States Code: *Provided further*, That none of the funds herein appropriated or made available for the functions assigned to the Agricultural Adjustment Agency pursuant to the Executive Order Numbered 9069, of February 23, 1942, shall be used to pay the salaries or expenses of any regional information employees or any State information employees, but this shall not preclude the answering of inquiries or supplying of information at the county level to individual farmers: [*Provided further*, That such amount shall be available for salaries and other administrative expenses in connection with the formulation and administration of the 1954 program of soil-building practices and soil- and water-conserving practices, under the Act of February 29, 1936, as amended (amounting to $195,000,000, including administration, and formulated on the basis of a distribution of the funds available for payments and grants among the several States in accordance with their conservation needs as determined by the Secretary, except that the proportion allocated to any State shall not be reduced more than 15 per centum from the distribution for the next preceding program year, and no participant shall receive more than $1,500); but the payments or grants under such programs shall be conditioned upon the utilization of land with respect to which such payments or grants are to be made in conformity with farming practices which will encourage and provide for soil-building and soil- and water-conserving practices in the most practical and effective manner and adapted to conditions in the several States, as determined and approved by the State committees appointed pursuant to section 8 (b) of the Soil Conservation and Domestic Allotment Act, as amended (16 U. S. C. 590h (b)), for the respective States: *Provided further*, That not to exceed 5 per centum of the allocation for the agricultural conservation program for any county may, on the recommendation of such county committee and approval of the State committee, be withheld and allotted to the Soil Conservation Service for services of its technicians in formulating and carrying out the agricultural conservation program in the participating counties, and the funds so allotted may be placed in a single account for each State, and shall not be utilized by the Soil Conservation Service for any purpose other than technical and other assistance in such counties:] *Provided further*, That such amounts shall be available for the purchase of seeds, fertilizers, lime, trees, or any other farming material, or any soil-terracing services, and making grants thereof to agricultural producers to aid them in carrying out farming practices approved by the Secretary under programs provided for herein: *Provided further*, That no part of any funds available to the Department, or any bureau, office, corporation, or other agency constituting a part of such Department, shall be used in the current fiscal year for the payment of salary or travel expenses of any person who has been convicted of violating the Act entitled "An Act to prevent pernicious political activities", approved August 2, 1939, as amended, or who has been found in accordance with the provisions of title 18, United States Code, section 1913, to have violated or attempted to violate such section which prohibits the use of Federal appropriations for the payment of personal services or other expenses designed to influence in any manner a Member of Congress to favor or oppose any legislation or appropriation by Congress except upon request of any Member or through the proper official channels.

[The funds appropriated to the Department of Agriculture in the Act of June 4, 1952 (Public Law 371) shall remain available until December 31, 1954.] (*Supplemental Appropriation Act, 1954; Department of Agriculture Appropriation Act, 1954.*)

PROGRAM AND PERFORMANCE

This program is designed to encourage conservation by sharing with farmers and ranchers the cost of applying approved measures considered as needed in the public interest and which farmers generally would not perform adequately with their own resources.

Funds are distributed among the States and Territories on the basis of conservation needs. The rate of cost-sharing averages less than 50 percent of the cost. Cost-sharing may be in the form of a payment upon completion of the practice, or by furnishing materials or services. Conservation measures include primarily: (1) Establishment of permanent protective cover, (2) improvement and protection of established vegetative cover, (3) conservation and disposal of water, (4) establishment of temporary vegetative cover, and (5) temporary protection of soil from wind and water erosion.

A program is developed for each State and county by the State and county agricultural stabilization and conservation committees, and representatives of the Soil Conservation Service and of the Forest Service, in consultation with representatives of the land-grant colleges, Farmers' Home Administration, State soil conservation committees, local soil conservation districts, the Agricultural Extension Service, and other State or Federal agricultural agencies. The program is administered by farmer-elected county and community committeemen with responsibility assumed by the Soil Conservation Service and Forest Service for the technical phases of permanent-type practices in their respective fields.

Loans from the Commodity Credit Corporation to the Secretary of Agriculture are used to make advances for the purchase of conservation materials or services from January 1 to June 30 of each year; repayment with interest is made during the current fiscal year from balances available from prior years' appropriations or in the succeeding fiscal year from the new funds appropriated.

AGRICULTURAL MARKETING SERVICE

MARKETING RESEARCH AND SERVICE

Marketing Research and Service, Agricultural Marketing Service

For expenses necessary to carry on research and service to improve and develop marketing and distribution relating to agriculture as authorized by the Agricultural Marketing Act of 1946 (7 U. S. C. 1621–1627) and other laws, including the administration of marketing regulatory acts connected therewith:

Marketing research and agricultural estimates: For research and development relating to agricultural marketing and distribution, for analyses relating to farm prices, income and population, and demand for farm products, and for crop and livestock estimates; $10,215,200: Provided, That no part of the funds herein appropriated shall be available for any expense incident to ascertaining, collating, or publishing a report stating the intention of farmers as to the acreage to be planted in cotton, or, for estimates of apple production for other than the commercial crop.

Marketing services: For services relating to agricultural marketing and distribution, for carrying out regulatory acts connected therewith, and for administration and coordination of payments to States; $11,243,300, including not to exceed $25,000 for employment at rates not to exceed $100 per diem, pursuant to the second sentence of section 706 (a) of the Organic Act of 1944 (5 U. S. C. 574), as amended by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a), in carrying out section 201 (a) to 201 (d), inclusive, of title II of the Agricultural Adjustment Act of 1938 (7 U. S. C. 1291) and section 203 (j) of the Agricultural Marketing Act of 1946. (5 U. S. C. 511–512, 541a, 556b, 563–564, 575; 7 U. S. PROGRAM AND PERFORMANCE

The Agricultural Marketing Service, through this appropriation, engages in research and service to improve and develop the marketing and distribution of agricultural commodities.

A net increase of $993,247 is proposed for 1955, composed of (*a*) an increase of $1,512,800 to conserve food and obtain less expensive marketing through such means as reducing food waste and spoilage in marketing channels, saving manpower in handling the products, and finding less costly transportation, storage, and distribution methods; and to assist in developing new or expanded market outlets for agricultural commodities, particularly those that are in surplus supply, and (*b*) a net decrease of $519,553 for inspection, grading, classing, and standardization work, and in other service and regulatory activities. Fees for inspection and grading will be increased to the extent possible to make these services more nearly self-supporting.

1. *Marketing research and agricultural estimates*—(*a*) *Marketing research.*—This is aimed at maintaining and improving quality, reducing costs, and expanding outlets in the marketing of agricultural products. The research, involving cooperation with other public and private agencies, includes studies of (*a*) transportation rates and costs and marketing facilities, equipment, and handling methods; (*b*) the biological, physical, and economic aspects of measuring, maintaining, and improving product quality; (*c*) trade in specific agricultural commodities including measurements of costs and margins, market organization and practices, and improvement in market information, and (*d*) the uses and market acceptance of new and established agricultural products, techniques for analyzing consumer market behavior, market potentials, and methods of merchandising.

(*b*) *Economic and statistical analysis.*—This covers analysis of the agricultural economic situation and outlook including factors affecting price, supply and consumption of farm products; farm income including the establishment of the relationship between farm prices or income and parity standards; and farm population and work force trends including changes in numbers and composition, and comparisons of rural and urban living standards.

(*c*) *Crop and livestock estimates.*—Basic current data on approximately 150 crop and livestock products, prices received and paid by farmers, and farm wage and employment data are gathered and issued in more than 500 reports annually. These are the official estimates for use by farmers, processors, and handlers of agricultural commodities and other Government agencies in connection with adjustment and marketing activities, allocations and price supports and for use in determining parity prices.

2. *Marketing services*—(*a*) *Market news service.*—Timely and reliable market information is provided farmers, processors, handlers, and consumers of farm commodities.

(*b*) *Inspection, grading, classing, and standardization.*—Farmers are assisted in obtaining returns for their products commensurate with quality by providing United States quality standards; an impartial inspection, classing, and grading service; and by broadening the general knowledge, acceptance and use of standards through demonstrations, training courses, and other means. Approximately 76 percent of the total cost of this work was covered by fees or other revenue in 1953.

(*c*) *Freight rate services.*—Producers are assisted in obtaining equitable transportation rates and services through participation by the Department in their behalf in formal cases before the Interstate Commerce Commission and other regulatory bodies, and through informal negotiations with carriers.

(*d*) *Regulatory activities.*—These include the administration of laws designed to protect farmers and others from financial loss or personal injury resulting from deceptive, careless, and fraudulent marketing practices. The laws are administered mainly by licensing or registration, supervision of operations, collection and testing of samples, and handling of violations.

PROGRAM AND PERFORMANCE

Assistance, in the form of both funds and food, is provided to States and Territories for use in serving lunches to school children. Each State's portion of the total funds available is determined by means of a statutory formula which takes into account the number of school-age children in the State and the relationship between the per capita income of the State and the average United States per capita income.

The program is operated according to the terms of an agreement entered into by the State educational agency (which administers the program within the State) and the Department of Agriculture. Schools make application to the State agency and, if accepted for participation in the program, are reimbursed for a part of the food cost of each meal served.

In addition to the cash assistance, part of the school lunch appropriation has been used by the Department of Agriculture to purchase food to be distributed to schools. This program also provides the largest single outlet for surplus commodities purchased under authority of section 32 of the Agricultural Adjustment Act, as amended, and it is contemplated that increasing amounts of such commodities will be available to the school lunch program in 1955.

Continuing availability of substantial quantities of various desirable surplus foods should permit a total Federal contribution to the program in excess of that for 1954, despite a decrease in appropriated funds. Total cash payments to the States will remain unchanged from 1954.

During 1953 about 1,584,000,000 meals were served to almost 9,800,000 children, utilizing over $330,000,000 worth of agricultural commodities. More than 15 percent of this amount represented stocks acquired under the surplus-removal and price-support programs of the Department. The statutory requirement that States contribute $1.50 for each Federal dollar contributed was more than adequately met in 1953.

PROGRAM AND PERFORMANCE

The Foreign Agricultural Service administers programs and policies relating to foreign agriculture and provides information and assistance to agencies of the United States Government, farm and industry groups, and the general public on agricultural conditions and trends abroad, and their effect on American agriculture and the economy of the United States. The Service collects, interprets, and distributes economic information on foreign production and consumption of farm products, and on policy matters affecting trends in production and consumption.

Increases are proposed to (1) determine the extent to which production levels of certain American commodities should be adjusted to meet foreign demands and determine the magnitude of competition in agricultural products; and (2) provide current data on shifts in United States agricultural trade on a geographic basis, including analysis of the factors responsible for such shifts.

1. *International agricultural trade.*—Analyses are made on the foreign agricultural situation, and foreign agricultural and trade policies as they affect trade in American products. Supervision and direction are provided to a worldwide agricultural attaché service, and related marketing and trade-reporting activities. Department activities with respect to government and private international organizations are directed. Department programs are developed for use in international trade and tariff conferences, and liaison with foreign embassies and legations is maintained.

2. *Foreign production and consumption of agricultural products.*—Analyses and interpretations of commodity and trade information obtained through agricultural attachés and other foreign sources are prepared for dissemination to interested trade and agricultural-industry groups in the United States. Basic studies are conducted on the competition of foreign production with American agricultural products in both foreign and domestic markets. Departmental interests are represented at international commodity conferences, and on foreign commodity matters at national conferences.

PROGRAM AND PERFORMANCE

Enforcement of the Commodity Exchange Act requires supervision over futures trading in 20 commodities on 17 exchanges to prevent price manipulation and corners and insure honesty and fair dealing.

1. *Licensing.*—Commission merchants and floor brokers are registered annually. Exchange rules and regulations are reviewed to insure that legal requirements are met.

2. *Supervision of futures trading.*—This embraces (*a*) study, analysis, and publication of market information and other data; (*b*) enforcement of speculative limits; and (*c*) cooperative activities with control committees of contract markets.

3. *Audits.*—Misuse of customers' funds is prevented by (*a*) audit and examination of books of futures commission merchants; and (*b*) analysis of brokers' and traders' books and financial statements.

4. *Investigations.*—Violations of the law and regulations are investigated, and trade practice surveys are made to discover violations and compile legal evidence. The Authority also prepares and presents evidence of violations in administrative hearings and judicial proceedings.

5. *Establishment and review of speculative limits.*—Established speculative limits require continuing review to determine whether market conditions necessitate changes. During 1955, to the extent possible, preliminary work in preparing basic data on trading operations and prices in wool tops, soybean meal, and cottonseed meal will be assembled and analyzed as the first step looking to the establishment of limits on those commodities.

PROGRAM AND PERFORMANCE

Agricultural adjustment programs include acreage allotment and marketing quota programs for basic agricultural commodities. These programs are designed to assist in stabilizing fluctuations in the supply, marketing, and price of specified basic agricultural commodities. Acreage allotments, when necessary, are established at National, State, and county levels (only at State level in the case of tobacco). In general, the acreage allotted to any county is apportioned by farmer-elected county committeemen. National marketing quotas must be proclaimed for basic commodities whenever the supply situation specified in basic legislation requires them. However, quotas do not become effective unless approved by two-thirds of those voting in a referendum of farmers engaged in producing the affected commodity.

SUGAR ACT PROGRAM—continued

Sugar Act Program, Commodity Stabilization Service—Continued

PROGRAM AND PERFORMANCE

To provide consumers with adequate supplies of sugar at reasonable prices and to maintain the welfare of the domestic sugar industry, quotas are established for five domestic sugar-producing areas, the Philippines, Cuba, and other foreign countries. In addition, farm marketing allotments for sugarcane and sugar beets are established by the Secretary when necessary to restrict marketings to conform to the quota for the area and normal carryover requirements.

1. *Payments to sugar producers.*—Payments are made (*a*) to domestic producers of cane and beets who meet specified conditions of employment, production, and marketing; and (*b*) for abandonment of planted acreage and crop deficiencies on harvested acreages due to natural calamities.

2. *Operating expenses.*—These consist mainly of the expenses of (*a*) the agricultural stabilization and conservation State and county offices in establishing production controls, determining compliance, and making payments to producers; and (*b*) of the Service's departmental work in determining sugar consumption requirements, establishing quotas and allotments, making fair wage and price determinations, establishing production and marketing controls where necessary, and formulating overall policies and procedures.

INTERNATIONAL WHEAT AGREEMENT

International Wheat Agreement, Agriculture

[The Secretary of the Treasury is hereby authorized and directed to discharge indebtedness of the Commodity Credit Corporation to the Secretary of the Treasury by canceling notes issued by the Corporation of the Secretary of the Treasury in the amount of $171,740,395 for the net costs during the fiscal year 1952 (including interest thereon through June 30, 1953) under the International Wheat Agreement Act of 1949 (7 U. S. C. 1641–1642).] (*Act of August 1, 1953, Public Law 180; Department of Agriculture Appropriation Act, 1954.*)

PROGRAM AND PERFORMANCE

The International Wheat Agreement operates to provide an assured market for wheat to exporting countries and assured supplies of wheat to importing countries, at stable and equitable prices.

Under authority contained in the International Wheat Agreement Act of 1949, as amended (7 U. S. C. 1641–1642), capital funds of Commodity Credit Corporation are used to pay (*a*) the difference between the price specified in the Agreement and the domestic market price of wheat, and (*b*) administrative and interest costs. A supplemental estimate will be submitted early in this session of Congress to reimburse the Corporation for International Wheat Agreement expenditures applicable to operations during fiscal year 1953. This proposal would authorize the Secretary of the Treasury to cancel notes of Commodity Credit Corporation in the amount of $130,867,992 for costs incurred in the fiscal year 1953 when 223,703,898 bushels of wheat and wheat flour (bushel equivalent) were exported pursuant to the Agreement. The following summary shows, by major cost elements, Commodity Credit Corporation costs since the beginning of International Wheat Agreement operations:

	Fiscal year 1952 (fiscal year 1950 operations)	Fiscal year 1953 (fiscal year 1951 operations)	Fiscal year 1954 (fiscal year 1952 operations)	Fiscal year 1954 supplemental (fiscal year 1953 operations)

PROGRAM AND PERFORMANCE

The Administration conducts two major programs: (*a*) The rural electrification program, to provide electric service to farms and other rural establishments; and (*b*) the rural telephone program, to furnish and improve telephone service in rural areas.

A decrease is estimated for the electrification loan program. The telephone loan program will continue at approximately the 1954 level.

1. *Rural electrification.*—This program is financed through loans which bear 2 percent interest and must be repaid within a period not to exceed 35 years. Loans are also made for shorter periods at 2 percent interest to electrification borrowers to be reloaned to their consumers for wiring and for the installation of electrical and plumbing appliances and equipment. Funds for making loans are borrowed from the Secretary of the Treasury.

When the rural electrification program was initiated in 1935, less than 11 percent of all farms had electric service. On June 30, 1953, the figure had risen to about 91 percent.

2. *Rural telephone.*—Loans are made for the purpose of financing the improvement, expansion, construction, acquisition, and operation of telephone lines and facilities or systems to furnish and improve telephone service in rural areas. The loans bear 2 percent interest and must be repaid within a period not to exceed 35 years. Funds for making loans are borrowed from the Secretary of the Treasury.

The 1950 Census showed 38.3 percent of all farms with telephones, fewer in both number and percentage than in 1920. Cumulative Rural Electrification Administration loans through June 30, 1953, will provide initial or improved service to an estimated 300,000 rural subscribers.

PROGRAM AND PERFORMANCE

A decrease is estimated for the electrification program and an increase of a lesser amount is proposed for additional construction and loan security activities in the telephone program, resulting in a net decrease for both programs.

1. *Administration of rural electrification program.*—To assure that electric service is made available to all farms, borrowers are encouraged to develop their electric systems on an area-coverage basis. Studies are made of loan applications to assure self-liquidating operations. Standards are developed for the design and construction of facilities; engineering studies are carried on to solve complex technical problems; and engineering review of designs and physical facilities is provided where necessary to insure that construction conforms to approved standards and is adequate to meet the needs of rural consumers. Business management consultation is also furnished on a selective basis of need to protect the Government's loan security. All borrowers are required to have their records audited by certified public accounting firms and, as accounting and other financial management problems affecting loan security are revealed by these audits, the Administration, to the extent necessary, works with borrowers on their technical accounting problems.

2. *Administration of rural telephone program.*—Engineering standards are developed to assure that facilities financed are constructed at minimum cost and will render the best possible service. The quality of business management is appraised as part of the consideration of loan applications from existing companies, and consultation in this field is provided where needed. After execution of the loan contract, new borrowers are given technical accounting help in establishing the necessary accounting systems to meet the accounting requirements of regulatory bodies before any funds are advanced for construction. Where necessary for loan security, the Administration assists borrowers with their accounting and other business management problems in order to help them place their operations on a sound basis capable of meeting their loan obligations.

PROGRAM AND PERFORMANCE

For the benefit of farmers unable to secure credit from other sources at reasonable rates, the Administration makes (*a*) direct loans and insures loans for the purchase, enlargment, or development of family-size farms; (*b*) loans for farm operating expenses; and (*c*) loans for water facilities in the arid and semiarid areas in 17 Western States.

The total borrowing authorization requested for loans amounts to $145,500,000, representing a decrease of $36,500,000 below the current year's authorization. This decrease consists of $20,000,000 in production and subsistence loans, and $16,500,000 in farm housing loans.

1. *Farm ownership and farm housing loans*—(*a*) *Farm ownership loans.*—Direct farm-ownership loans for the purchase or improvement of family-type farms are made to tenants, sharecroppers, farm laborers, owners of inadequate farms, and eligible veterans up to the full normal value of the farm at 4 percent interest for periods up to 40 years. Loans for the same purposes made by private lenders to eligible applicants are insured in amounts up to 90 percent of the normal farm value for periods up to 40 years at 3 percent interest, plus one-half of 1 percent as an insurance premium and one-half of 1 percent toward administrative expenses, the Administration services these loans, makes collections, and pays the lender.

(*b*) *Farm housing building loans.*—These are made to farm owners for periods up to 33 years at 4 percent interest to construct, improve, alter, repair, or replace farm buildings. The budget proposes elimination of these loans in 1955.

(*c*) *Farm housing enlargement and development loans.*—Loans for farm enlargement and development are made for periods up to 33 years at 4 percent interest to farm owners. The budget proposes elimination of these loans in 1955.

2. *Production and subsistence loans.*—Loans are made for periods up to 7 years at 5 percent interest to provide reasonable farm and home credit for the purchase of livestock, feed, seed, farm equipment, and other farm necessities.

PROGRAM AND PERFORMANCE

The Office performs all the legal work arising from the activities of the Department and represents the Department in proceedings in connection with the administration of regulatory laws of the Department. The Office assists the Department of Justice by preparing briefs for and participating in the trial of cases in court.

1. *Agricultural credit.*—Legal services are provided the Farmers' Home Administration for its various loan programs. As a result of the Farm Credit Act of 1953 legal work in connection with the Farm Credit Administration will not be financed from this appropriation in fiscal year 1955.

2. *Commodity credit, production, and adjustment programs.*—These legal services deal with price-support activities, domestic and foreign procurement, disposal of agricultural surpluses, national school-lunch program, agricultural conservation, farm-marketing quotas, crop insurance, sugar programs, claims settlement and adjustment, international trade and commodity agreements, and import restrictions. The Solicitor serves as general counsel for both the Commodity Credit Corporation and the Federal Crop Insurance Corporation.

3. *Lands, forestry, research, and general legal services.*—In addition to general legal services rendered for the Department as a whole, legal and abstracting services are provided in connection with the acquisition and exchange of lands; operation and management of the national forests, soil-conservation districts, and other public lands; flood prevention; patents; and agricultural research projects.

4. *Marketing and regulatory laws.*—Legal services are furnished in connection with the administration and enforcement of quarantine acts and legal provisions relating to the marketing and distribution of agricultural commodities.

5. *Rural electrification and telephone programs.*—Legal services are provided for the Rural Electrification Administration, including review and legal approval of loan and security documents; review and legal approval of borrowers' contracts, titles, easements, franchises, rights-of-way; and participation in litigation before State regulatory bodies and in the courts.

PROGRAM AND PERFORMANCE

The Office provides the overall planning, coordination, and administration of the Department's programs, and also supplies certain services on a Department-wide basis.

The proposed net decrease will result in reduction of certain staff services to the agencies of the Department.

1. *General administration.*—The Secretary, the Under Secretary, and the Assistant Secretaries, supported by their staffs, develop policies, execute legislative and administrative policy determinations, maintain liaison with Congress, coordinate activities within the Department and with other departments, and provide direction for the Department as a whole, including its participation in international programs.

2. *Personnel administration and service.*—The Office determines and promulgates departmental policies and procedures relating to classification, job evaluation, salary and wage administration, recruitment, placement, retirement, separation, leave, safety, awards programs, performance ratings, employee relations, training, organization affecting personnel management, discipline, investigations and health. The operational phases of the personnel management program are substantially delegated to the agencies. The Office conducts a periodic review to insure unification of the personnel management program and to measure its effectiveness in the agencies.

3. *Budgetary and financial administration and service.*—Department-wide supervision, leadership, and coordination are provided in the fields of budgetary, fiscal, property, and supply management, and in related activities of the Department. Departmental policies and procedures are formulated and promulgated, programs and legislative proposals are reviewed and evaluated for budgetary, financial, and related implications; and improvements are fostered in the management and operation of work programs administered by the Department.

4. *General operations.*—Provision is made for the housing of Department activities; communications and records management; administrative services and budgetary functions for the Office of the Secretary; and departmental service operations in the District of Columbia, including the Department's post office, telephone switchboard, telegraph office, reproduction and supply services and motor transport service.

5. *Office of hearing examiners.*—These examiners hold hearings in connection with the prescribing of new

PROGRAM AND PERFORMANCE

The Office of Information has responsibility for directing, integrating, and coordinating the information work of the entire Department through press, radio, television, publications, motion pictures, and exhibits as a part of the effective execution of the research, regulatory, administrative, resource conservation, and other programs of the Department. The workload of the Office is dependent to a large extent upon direct requests for information and to legislative requirements.

Publications include farmers' bulletins, leaflets, periodicals, scientific, research and marketing publications, and agricultural statistics. Special information is furnished to national magazines, encyclopedic annuals, and trade publications. Exhibits are supplied to State extension workers for their use in State exhibit showings. Motion pictures for the Department are produced on a reimbursable basis and distributed through 74 cooperating State film libraries. The Department's activities require the editing of about 3,000 periodic crop, price, and market reports and other press releases annually. Digests, newsletters, and other services are made available to press associations, daily newspapers, and farm publications. Radio is used to reach farmers locally and to broadcast regular weekly programs on major networks. Television package programs are prepared for use of land-grant colleges and television farm broadcasters.

PROGRAM AND PERFORMANCE

The library, serving as the National Agricultural Library, procures and preserves books, periodicals, and published materials on agriculture. It is organized into a main office in Washington and five specialized field branches for major field research installations. Various State agencies provide library services to Department employees in designated geographical areas under cooperative agreements. One general branch serves the Beltsville Research Center.

1. *General agricultural library service.*—About 37,000 volumes were added during the fiscal year 1953 to the collection of approximately 1,000,000 volumes on agriculture and related subjects. In addition, about 284,000 separate issues of periodicals are received annually. During 1953, 1,322,234 loans of books and other publications (including photocopies in lieu of loans) were made and 169,355 reference questions were answered. The Bibliography of Agriculture was issued monthly, including a total of 99,983 items.

2. *Specialized services to research.*—Special bibliographies compiled for research purposes and branch services were furnished to major segments of the Department's research programs.

Licensing dealers and handling complaints under the Perishable Agricultural Commodities, Produce Agency, and Export Apple and Pear Acts—1953, $400,338; 1954, $420,987; 1955, $421,800.

PROGRAM AND PERFORMANCE

The purpose of this special fund, into which license fees are deposited, is to administer the Perishable Agricultural Commodities, Produce Agency, and Export Apple and Pear Acts (7 U. S. C. 499a–499s, 491–497, 581–589).

These acts assure equitable treatment to farmers and others in the marketing of fresh and frozen fruits and vegetables. Commission merchants, dealers, and brokers handling these products in interstate and foreign commerce are licensed. Complaints of violations are investigated and violations dealt with by: (1) informal settlements agreeable to both parties, (2) formal decisions involving payments or reparation awards between parties, and (3) suspension or revocation of license or publication of the facts. About 25,450 licenses are now in effect, and complaints average about 50 per week.

PROGRAM AND PERFORMANCE

Under section 32 of the act approved August 24, 1935, as amended (7 U. S. C. 612c), an amount equal to 30 percent of customs receipts during each calendar year and unused balances to the extent of $300,000,000 are available for the removal from the market of agricultural surpluses and for administration of marketing agreements and orders. To prevent price collapse of agricultural commodities and their ultimate waste, surpluses are removed from the market through purchase, export, and diversion programs.

1. *Direct purchases.*—Surplus agricultural commodities generally perishables, are purchased and distributed to the school lunch program, charitable institutions serving needy persons and persons certified by welfare agencies as eligible for relief.

2. *Encouragement of exportation.*—Differential payments are made to enable exporters to purchase surplus commodities on the domestic market and sell them on the world market at competitive world prices.

3. *Diversion to byproducts and new uses.*—Differential payments are made to enable processors to purchase surplus commodities on the domestic market, divert them to byproducts and new uses, and sell them at prices comparable to competing products, thus creating new markets for surplus commodities.

4. *Surplus removal operating expenses.*—These expenses are mainly in connection with purchasing, distributing, exporting, and diverting surplus commodities. In addition, supervisory assistance is furnished local and State groups on the preservation of surpluses for year-round use, and in cooperation with the food trade, press and radio, greater consumption of abundant foods is encouraged.

5. *Marketing agreements and orders.*—Voluntary arrangements between the Secretary and handlers of farm products, put into effect upon request from the industry after hearings, investigations, and referendums among producers, serve to strengthen prices by establishing and maintaining orderly marketing conditions. Orders are in effect for milk, tobacco, tree fruits, tree nuts, and vegetables. Administration at the local level is financed by assessments upon handlers.

6. *Foreign market promotion.*—Maintenance and expansion of foreign markets are promoted by: (1) Providing firsthand information on market situations, (2) negotiating with foreign governments in matters relating to international trade, and (3) placing United States exporters in contact with foreign importers.

7. *Import controls.*—Importation of articles which render ineffective, or tend to interfere with, programs carried out by the Department of Agriculture, is investigated and a brief with recommended action is then submitted to the President.

PURPOSE AND FINANCIAL ORGANIZATION [1]

The Commodity Credit Corporation engages in buying, selling, lending, and other activities with respect to agricultural commodities, their products, foods, feeds, and fibers, for the purpose of stabilizing, supporting, and protecting farm income and prices; assisting in the maintenance of balanced and adequate supplies of such commodities; and facilitating their orderly distribution. The Corporation also makes available materials and facilities required in connection with the production and marketing of such commodities.

The Corporation is managed by a board of directors, subject to the general supervision and direction of the Secretary of Agriculture, who is, ex officio, a director and the Chairman of the Board. Besides the Secretary, the Board consists of six members appointed by the President and confirmed by the Senate. In addition, the Corporation has a bipartisan advisory board of five members appointed by the President to survey the general policies of the Corporation and advise the Secretary with respect thereto.

The Corporation has an authorized capital stock of $100,000,000, all held by the United States, and authority to borrow up to $6,750,000,000.

ANALYSIS OF BUDGET PROGRAMS

The budget is based on six types of programs: (1) price support, (2) supply and foreign purchase, (3) storage facilities, (4) loan to Secretary of Agriculture for agricultural conservation purposes, (5) commodity export, and (6) special activities.

Budget assumptions.—The Corporation's budget estimates for 1954 and 1955 are based on the general assumptions (*a*) that employment, production, and incomes will continue high through fiscal year 1955; (*b*) that prices, on the average, will not exceed the 1953 level; (*c*) that yields will be in line with recent averages; and (*d*) that acreage allotments and marketing quotas will be in effect on the 1954 crops of peanuts, certain kinds of tobacco, wheat and cotton in accordance with existing legislation; and acreage allotments will be in effect on the 1954 crop of corn.

In considering these estimates, it should be recognized that it is extremely difficult to estimate fund requirements for the year ending June 30, 1955. They are dependent upon weather conditions, the volume of agricultural production in this country and in foreign countries, economic conditions generally, food needs in the occupied areas and other foreign countries, availability of dollar exchange, the extent to which acreages formerly devoted to cotton, corn, and wheat will be diverted to other crops, and many other complex and unpredictable factors.

1. *Price-support program.*—Price-support operations are carried out under the Corporation's charter powers (particularly sections 5 (a) and (d)), in conformity with the Agricultural Act of 1949 (63 Stat. 1051), as amended (66 Stat. 758), and with respect to certain types of tobacco, in conformity with the act of July 28, 1945 (59 Stat. 506). Under the Agricultural Act of 1949, as amended, price support is mandatory for six basic commodities—corn, cotton, wheat, rice, peanuts, and tobacco—and designated nonbasic commodities, namely, wool, mohair, tung nuts, honey, milk, butterfat, and the products of milk and butterfat; price support for other nonbasic agricultural commodities is discretionary.

[1] A more detailed statement describing the creation, purposes, authorities, and financial structure of the Corporation is contained in the budget of the United States, 1948, as supplemented by subsequent budgets.

Price support is made available through loans, purchase agreements, and purchases. The producer's commodities serve as collateral for price-support loans. If the producer does not repay his loan, he is not held liable for any deficiency arising from the sale of the collateral unless the loan was obtained through fraudulent representations. Purchase agreements generally are available during the same period that loans are available. By signing a purchase agreement, a producer receives an option to sell to the Corporation any quantity of the commodity which he may elect within the maximum specified in the agreement. When it is not feasible to support prices through loans or purchase agreements, the Corporation purchases commodities during the regular marketing season either from producers directly or through usual trade channels.

Disposition of commodities acquired by the Corporation in its price support operations is made in compliance with section 407 of the Agricultural Act of 1949 (63 Stat. 1055) and other applicable legislation.

In all its price support operations the Corporation utilizes normal trade facilities to the maximum extent practicable. In its lending activities the Corporation uses local banks, cooperatives, and other private lending agencies. Commercial storage facilities are used to a great extent in the storage of loan collateral and in the storage of stocks acquired by the Corporation.

It is estimated that price support loans to be made during fiscal year 1955 will total $1,954,566,500. This compares with a total of $3,080,577,363 estimated for fiscal year 1954 and $2,122,132,034 actually made during fiscal year 1953. The estimated decrease for 1955 is primarily attributable to cotton, corn and wheat and reflects an estimated decreased production of these commodities due to acreage controls. The estimated increase for 1954 over 1953 is due almost entirely to corn and cotton.

The value of the Corporation's inventory of commodities as of June 30, 1955, is estimated to total $4,214,747,884. This compares with an estimated $3,537,368,003 as of June 30, 1954, and an actual inventory of $2,338,736,567 as of June 30, 1953. The major increases in inventory in both of the fiscal years 1954 and 1955 are estimated to be due primarily to acquisitions of corn and wheat.

2. *Supply and foreign purchase program.*—This program is carried out under the authority contained in the Corporation's charter, particularly sections 5 (b) and 5 (c) thereof. The Corporation procures foods, agricultural commodities, their products, and related materials to supply the requirements of Government agencies, foreign governments, and relief and rehabilitation agencies and to meet domestic requirements. Foods, agricultural commodities, and their products are procured or aid is given in their procurement to facilitate distribution or to meet anticipated requirements during period of short supply. The Corporation may also make available materials and facilities required in connection with the production and marketing of agricultural commodities.

Operations are conducted in accordance with procedures and policies reasonably calculated to assure compliance with section 4 of the act of July 16, 1943 (15 U. S. C. 713a–9), which requires that the Corporation be fully reimbursed for services performed, losses sustained, and operating costs incurred for commodities purchased or delivered to or on behalf of any other Government agency.

The main activities now carried on are procurement of commodities for the Department of the Army and the Foreign Operations Administration, and initial financing of certain programs authorized under the Defense Produc-

tion Act to assure adequate supplies of strategic and critical materials. Total acquisitions are estimated at $29,889,803 in the fiscal year 1955 compared with an estimated $79,861,655 for 1954 and actual acquisitions of $101,126,088 during 1953. The estimated decrease for 1955 reflects decreased activity under Defense Production operations and decreased purchases of grain, sugar and processed commodities in the open market for the Army, the Foreign Operations Administration and others.

3. *Storage facilities program.*—This program is carried out under the authority contained in the Corporation's charter, particularly sections 4 (h), 4 (m), and 5 (a). The Corporation (*a*) purchases and maintains granaries and equipment for care and storage of grain owned or controlled by the Corporation; (*b*) makes loans for the construction or expansion of farm storage facilities; (*c*) provides storage-use guaranties to encourage the construction of commercial storage facilities; and (*d*) undertakes other operations necessary to provide storage adequate to carry out the Corporation's programs.

During the latter part of fiscal year 1953 it became necessary to contract for an increase in the storage capacity of Corporation-owned structures by 95,000,000 bushels in certain deficient areas in Kansas, Nebraska, North Dakota, South Dakota, Minnesota, Montana, Iowa, Illinois, Michigan, Wisconsin, and adjoining States. No expansion of Corporation structures is now contemplated during the fiscal year 1955. Storage-use agreements will be made through June 30, 1954, to assure sufficient privately owned storage facilities through 1956. In order to provide adequate farm storage facilities in 1954 and 1955, it is estimated that the Corporation will be required to make loans on facilities having a total capacity of 25,000,000 bushels in 1954 and of 22,000,000 bushels in 1955. In addition, it is estimated that loans to finance the purchase of mechanical driers totaling $200,000 will be made during 1954 compared with $150,000 for 1955.

4. *Loan to Secretary of Agriculture for agricultural conservation purposes.*—Section 391 (c) of the Agricultural Adjustment Act of 1938, as amended (7 U. S. C. 1391), requires the Corporation to lend to the Secretary of Agriculture during each fiscal year such sums, not to exceed $50,000,000, as he estimates will be required to make advances for the purchase of conservation materials from January 1 to June 30 of each year. Repayment is usually made during the succeeding fiscal year from appropriated funds, with interest at least equal to the rate paid by the Corporation. In 1953, a total of $35,410,222 was loaned; it is estimated that $31,000,000 will be loaned during the fiscal year 1954. No loan is estimated in fiscal year 1955 pending enactment of legislation to extend Federal operation of the program after December 31, 1954 (sec. 8 (a) of the Soil Conservation and Domestic Allotment Act, as amended.)

5. *Commodity export program.*—This program is carried out under the authority contained in the Corporation's charter, particularly sections 5 (d) and 5 (f), and the International Wheat Agreement Act of 1949. The Corporation exports, causes to be exported, or aids in the development of export markets for agricultural commodities and products.

The International Wheat Agreement Act of 1949 authorizes the President, acting through the Corporation, to make available such quantities of wheat and wheat flour to importing countries, and at such prices, as may be necessary to exercise the rights, obtain the benefits, and fulfill the obligations of the United States under the International Wheat Agreement. In turn, the Corporation is authorized to use its general borrowing authority to pay current obligations and to be repaid therefor from appropriations made specifically to cover the costs of the International Wheat Agreement. Pending such reimbursement, the Corporation is authorized to establish the net costs of operations under the agreement as a receivable. For 1953 the Corporation's net costs charged to the International Wheat Agreement, including interest through June 30, 1954, were $130,867,992. A proposal to authorize the Secretary of the Treasury to discharge the indebtedness of the Commodity Credit Corporation by canceling notes issued by the Corporation to the Secretary of the Treasury in this amount will be submitted later in the fiscal year 1954.

6. *Special activities.*—Under the provisions of the appropriation item in the Department of Agriculture Appropriation Act, 1954 (Public Law 156, 83d Cong.), entitled "Eradication of foot-and-mouth disease and other contagious diseases of animals and poultry, Agricultural Research Administration," the Secretary of Agriculture has determined that Corporation funds should be transferred for use in the eradication of foot-and-mouth disease in Mexico and the related quarantines, subject to full reimbursement. Similar authority contained in appropriations for prior years has been used in the past primarily in connection with programs in Mexico and to a limited extent for measures to protect the United States against the introduction of foot-and-mouth disease from Canada. For the fiscal year 1953, advances, with interest and related charges through June 30, 1954, amount to $2,086,770. A proposal to authorize the Secretary of the Treasury to reimburse the Commodity Credit Corporation for this amount will be submitted later in the fiscal year 1954 under the item "Eradication of foot-and-mouth disease and other contagious diseases of animals and poultry, Agricultural Research Administration." No advances under this authority in 1955 are reflected in the budget schedules.

Pursuant to authority contained under the head "Marketing services, Production and Marketing Administration," in the Department of Agriculture Appropriation Act, 1952 (7 U. S. C. 414a), the Corporation advances to the Production and Marketing Administration nonadministrative funds for grading tobacco and classing cotton without charge to producers, as authorized by law (7 U. S. C. 473a, 511d). Costs of such grading and classing of those commodities which are not placed under price support are repaid to CCC from subsequent appropriations. Provision for reimbursing the Corporation in the amount of $441,655 is included in the estimates for 1955 under the item "Marketing Services, Production and Marketing Administration." It is estimated that advances of $1,418,900 will be made during fiscal year 1954 and $1,523,600 in fiscal year 1955.

Under the terms of recently enacted legislation, the Commodity Credit Corporation was directed to make available to the President out of its stocks (1) not to exceed one million long tons of wheat, during the period ending June 30, 1954, for transfer to the Government of Pakistan (Public Law 77, 83d Cong.), and (2) commodities valued at not more than $100,000,000, including the Corporation's investment in commodities and handling and delivery costs, for transfer to friendly peoples in meeting famine or other urgent requirements (Public Law

216, 83d Cong.). The latter law provides that no programs of assistance shall be undertaken after March 15, 1954, and both of these laws authorize appropriations to reimburse Commodity Credit Corporation for its costs.

The facilities and stocks of the Corporation are also authorized (Public Law 115, 83d Cong.) to be used by the Secretary for emergency assistance in furnishing feed and seed to farmers, ranchers and stockmen in connection with any major disaster determined by the President to warrant Federal assistance under Public Law 875 (42 U. S. C. 1855). On November 16, 1953, pursuant to the authority of Public Law 875 the President directed the Corporation to furnish supplies of feed acquired by it in carrying out price support operations for use in the drought emergency program, such supplies to be furnished without reimbursement from presently appropriated funds. Feed concentrates, principally cottonseed meal, corn, wheat, oats, and mixed feeds, are furnished at less than market cost to eligible farmers in designated disaster areas. The President also stated that Congress would be requested to take specific action for the purpose of reimbursing the Corporation for losses representing the difference between the value of the feed furnished under the directive and the sales price received by the Corporation. Public Law 175, Eighty-third Congress, appropriated $40,000,000 which has been added to the Corporation's funds for handling, processing, shipping, and other expenses relating to the delivery of the emergency feed supplies to disaster areas.

Administrative expenses.—These are for the operating staff, including the services of employees of the Commodity Stabilization Service engaged in Commodity Credit Corporation activities, services performed by other agencies of the Department, costs of the General Accounting Office audit, and payments to the General Services Administration for space in the District of Columbia.

Expenses in connection with the acquisition, operation, maintenance, improvement, or disposition, including inspection, classing and grading work performed on a fee basis by Federal employees or Federal- or State-licensed inspectors, of real or personal property owned in whole or in part by the Corporation are treated as nonadministrative expenses, as provided in the language of the appropriation act. Expenses treated as nonadministrative in the 1955 estimates are the same as those so treated since 1951. The requested authorization excludes expenses in connection with the supply and foreign purchase program; the budget for 1955 contemplates full reimbursement for these expenses. Such reimbursements will be obtained and used in the fiscal year 1955 in the same manner as in the fiscal years 1953 and 1954.

Administrative expenses for 1953 and estimates for 1954 and 1955 are reflected in the schedule, "Amounts available for administrative expenses." The estimates for 1955 include a limitation of $18,000,000 for costs of administration exclusive of reimbursements for services performed.

Because of the increasing price-support workload during the current fiscal year, present indications are that the 1954 limitation of $17.1 million will be insufficient. As a result, a supplemental estimate to increase this limitation will be submitted early in this session of Congress.

FINANCING OPERATIONS

The Corporation's operations are financed by capital funds and borrowings from the Treasury and from private lending agencies. In 1953 the annual interest rate paid on capital stock was 2 percent, and the rate on borrowings from the Treasury was 2 percent to March 1, 1953, and 2⅛ percent to June 30, 1953. Since that date the interest rate on both capital stock and borrowings from the Treasury is computed at 2½ percent in accordance with a policy of the Treasury Department that the rate shall be based upon the average interest rate on all outstanding marketable obligations of the United States as of the end of the preceding month. Funds are borrowed from private lending agencies when the Corporation desires to utilize such agencies in carrying out a particular operation in addition to obtaining funds. During the fiscal year 1954 the Corporation extended its certificate of interest method of financing cotton loans to other commodities, and the budget estimate anticipates that this plan will continue in effect during the fiscal year 1955. Although this method of financing has no effect on obligations against the Corporation's borrowing authority, it postpones a portion of the actual cash expenditures of Federal funds until subsequent fiscal years. All borrowing agreements with private lending agencies are approved by the Secretary of the Treasury.

Present indications are that the borrowing authority of $6,750,000,000 will not be adequate to cover all of the Corporation's obligations in 1954 unless early provision is made for restoration of capital impairment of the Corporation as of June 30, 1953, and reimbursement to the Corporation for International Wheat Agreement and foot-and-mouth disease program expenditures applicable to obligations during the fiscal year 1953. Supplemental estimates will be submitted early in this session of Congress for such purposes. It also will be necessary to submit a legislative proposal to increase the Corporation's borrowing authority to cover estimated maximum obligations during the fiscal year 1955.

OPERATING RESULTS AND RETAINED EARNINGS

The Corporation's records show that operations resulted in a net budget expenditure of $1,749,253,745 in 1953. It is estimated that such operations will result in net budget expenditures of $1,091,802,791 in 1954 and $1,165,041,296 in 1955. The Treasury, however, does not reflect in the Corporation's checking account note cancellations to reimburse the Corporation for prior years' costs of eradication of foot-and-mouth disease and International Wheat Agreement. For budgetary purposes, therefore, the budget estimates reflect net budget expenditures of $1,942,656,527 for the fiscal year 1953, and estimated net budget expenditures of $1,403,555,523 and $1,165,041,296 for the fiscal years 1954 and 1955, respectively. The net loss for 1953, including both realized losses of $114,283,061 and net increases in valuation allowances of $512,421,166, amounted to $626,704,227. It is estimated that net losses of $911,000,000 and $613,100,000 will be incurred in 1954 and 1955, respectively.

An appraisal of the assets and liabilities of the Corporation is made each year by the Secretary of the Treasury to determine net worth. If the net worth is less than $100,000,000, the Secretary of the Treasury restores the amount of capital impairment; if net worth is more than $100,000,000, the Corporation pays the surplus to the Treasury. A summary of capital impairment, restoration of capital, and payments to the Treasury is given in schedule 4.

There was a deficit of $737,534,574 as of June 30, 1953. A restoration of $96,205,161 was approved to cover the

June 30, 1952, deficit. Differences between deficits shown on the books of the Corporation as of the close of a fiscal year, and the amounts of restoration of capital result from net adjustments based on the Secretary of the Treasury's appraisal of the Corporation's asset and liabilities. The adjustments are based on the provisions of the act of March 8, 1938, which defines asset values for appraisal purposes as the lower of cost or average market prices for the month of June. The Corporation, however, takes into consideration current market prices and support levels, prospective sales outlets and the effect of production and price support levels on market prices in arriving at their estimated value. While the actual amount of the restoration of capital will depend on the amount of the capital impairment established by the Secretary of the Treasury as of June 30, 1953, the estimated amount shown under items proposed for later transmission (not to exceed $642,000,000) is based on the books of the Corporation.

FINANCIAL CONDITION

The Corporation's assets, which consist principally of price support loans receivable and inventories, were valued at $3,520,036,469 as of June 30, 1953, and are estimated at $4,990,288,587 as of June 30, 1954, and $5,116,876,587 as of June 30, 1955. The estimated increase in assets as of June 30, 1955, over June 30, 1953, is caused primarily by the increase in outstanding cotton loans and the increase in corn and wheat inventory.

The changes in the Corporation's assets are also reflected in its principal liabilities. Outstanding borrowings from the Treasury will amount to $3,968,000,000 as of June 30, 1954, and $5,136,000,000 as of June 30, 1955. Other liabilities of the Corporation, principally price support loans held by banks, amounted to $545,571,043 as of June 30, 1953; it is estimated that these liabilities will amount to $1,832,618,000 as of June 30, 1954; and $1,404,306,000 as of June 30, 1955. In addition, the Corporation had contingent liabilities as of June 30, 1953, amounting to $204,428,030. It is estimated that these contingent liabilities, consisting primarily of purchase agreements outstanding, will amount to $139,792,000 and $100,864,000 as of June 30, 1954 and 1955, respectively.

[1] It is anticipated that these losses will be recovered in subsequent years.

[2] Operation and maintenance costs applicable to owned storage structures are reflected as carrying charges on the commodities stored.

[3] Excludes $40,000,000 for handling, processing, shipping, and other expenses relating to delivery of feed to disaster areas recovered from funds appropriated by Public Law 175, 83d Cong. On Nov. 16, 1953, the President directed the Corporation to supply feed at reduced prices without reimbursement from presently appropriated funds.

[4] Excludes cancellation of notes for prior-year costs of (1) eradication of foot-and-mouth disease, and (2) International Wheat Agreement, not credited to the Treasury checking account of Commodity Credit Corporation. Net expenditures after giving effect to credit for these cancellations would be as follows: 1953, $1,749,253,745; and 1954, $1,091,802,791.

PURPOSE AND FINANCIAL ORGANIZATION

The Federal Crop Insurance Corporation was created to furnish protection for the farmer's investment in producing crops against loss from unavoidable causes (7 U. S. C. 1501–1519). All insurance programs are conducted on a limited basis to develop the experience necessary for the operation of a sound all-risk crop insurance plan on a national basis.

Capital stock of $100,000,000 is authorized to be subscribed by the United States (7 U. S. C. 1504, 1504a). The Secretary of the Treasury holds receipts for $27,-

000,000 of the authorized capital stock, leaving $73,000,000 unissued. The earned surplus as of June 30, 1953, was $1,946,521, making a total capital of $28,946,521.

ANALYSIS OF BUDGET PROGRAMS

Although developed and analyzed mainly in the headquarters office, the insurance programs are administered in the field by 19 Federal Crop Insurance Corporation State offices. Subsequent to January 1, 1954, the sales and servicing of contracts at the county level will be performed by private individuals through contractual agreements with the Corporation.

There will be 910 county programs in effect for crop-year 1954 (fiscal year 1955), furnishing coverage on wheat, cotton, flax, corn, tobacco, beans, citrus, and multiple crops. It is estimated that total participation will be 420,000 contracts as compared to 406,630 contracts in force for crop year 1953.

Appropriations of up to $12,000,000 for any fiscal year are authorized for the administrative and operating expenses of the Corporation (7 U. S. C. 1516a). Administrative expenses for the fiscal year 1955 are estimated to be $5,700,000, compared with $7,450,000 in 1954 and $6,918,251 in 1953. Beginning with the 1955 fiscal year, the direct loss adjustment costs incurred by adjusters in connection with crop inspections and loss adjustments will be considered as nonadministrative expense, and as such will be payable from premium income rather than administrative funds.

FINANCING OPERATIONS

The 1952 crop-year program resulted in net budget receipts of $1,097,180 in fiscal year 1953; the 1953 crop-year program is expected to result in net budget expenditures of $1,926,285 in fiscal 1954; and the 1954 crop-year program is expected to result in net budget receipts of $2,580,425 in fiscal 1955.

OPERATING RESULTS AND RETAINED EARNINGS

During the 1952 crop year severe drought situations existed in many of the major producing areas where crop insurance participation was heavy. Until well past the middle of the crop year it appeared that indemnities would exceed total premiums. However, as a result of late rains, mainly in the North Dakota area, and in the Southeastern States, crops recovered to a large extent and the final overall loss ratio for the 1952 crop year was 0.97. The multiple-crop program was the only one for which premiums did not exceed indemnities. In this program there was a deficit of $4 million due mainly to heavy drought losses in the Southwestern States, North Dakota, and Tennessee.

Crop year 1953 (fiscal year 1954) is also one of severe drought disaster in several sections of the country. Based on current estimates, indemnities will exceed premiums by approximately $2½ million.

While it is impossible to accurately predict crop conditions for crop year 1954 (fiscal year 1955), a net income of about $2¾ million is anticipated, based on the assumption that 90 percent of net premiums earned will be expended for indemnity losses and loss adjustment costs. This assumption is predicated on premium rates which are so established as to provide a 10-percent reserve for unforeseen losses.

The following table gives a summary of insurance operations for fiscal years 1953, 1954, and 1955:

BUSINESS-TYPE STATEMENTS

PROGRAM AND PERFORMANCE

Production disaster loans.—Public Law 38, Eighty-first Congress, approved April 6, 1949, abolished the Regional Agricultural Credit Corporation of Washington and transferred its assets to the Secretary of Agriculture. The assets so transferred constitute a revolving fund from which emergency loans for periods consistent with the borrowers' ability to repay are made at 3 percent interest to farmers and stockmen suffering production disasters when the Secretary determines that the area or region involved has suffered a production disaster and finds that agricultural credit is not readily available from other sources (11 U. S. C. 1148). Loans are also made at 5 percent interest to bona fide fur farmers where necessary to protect the Government's interest in existing loans outstanding (62 Stat. 1183).

Emergency drought assistance.—Public Law 115, Eighty-third Congress, amended Public Law 38 to authorize additional assistance to farmers and stockmen as follows: (1) *Economic disaster loans*—Loans at 3 percent interest may be made in any disaster area declared by the President under Public Law 875 (42 U. S. C. 1855), if the Secretary finds that an economic disaster has also caused a need for

agricultural credit that cannot be met temporarily by regularly established lending institutions, including the regular lending programs of the Farmers' Home Administration. (2) *Special livestock loans*—For a period of 2 years subsequent to July 14, 1953, loans may be made at 5 percent interest to established livestock producers who are temporarily unable to secure credit from recognized lenders and who have a reasonable chance of working out their difficulties with supplementary financing. (3) *Emergency assistance in furnishing feed and seed*—Feed for livestock or seeds for planting may be furnished to established farmers, ranchers, or stockmen in connection with any major disaster determined by the President to warrant Federal assistance under Public Law 875 (42 U. S. C. 1855). Under this authority feed concentrates, principally cottonseed meal, corn, wheat, oats, and mixed feeds, are furnished at less than market cost to eligible farmers in designated areas through the facilities of the Commodity Stabilization Service and special State and local drought committees.

Public Law 175, Eighty-third Congress, appropriated $130,000,000 to the fund for the purposes of Public Law 115. Of this, $40,000,000 was specified for furnishing feed, including the charges already incurred under an allocation of $8,000,000 from the President's Disaster Relief Fund to initiate the emergency feed program. In addition, $20,000,000 was added to the regular production and subsistence loan funds of the Farmers Home Administration.

On November 16, 1953, pursuant to the authority of Public Law 875, Eighty-first Congress, the President directed the Commodity Credit Corporation to furnish supplies of feed for use in the drought emergency program, such supplies to be furnished without reimbursement from presently appropriated funds. The President stated his intention to request Congress to take specific action for the purpose of reimbursing the Corporation for losses representing the difference between the value of the feed furnished and the sales price received by the Corporation. Under the directive, costs incurred by the Corporation in handling, processing, shipping, and otherwise distributing supplies of feed continue to be defrayed from the $40,000,000 appropriated by Public Law 175.

The Department is executing agreements with the 12 drought disaster States to assist them in furnishing hay to eligible farmers. Under these agreements the Department contributes one-half the cost of transportation (not to exceed $10 per ton) and the State assumes full responsibility for purchase and distribution. These agreements are presently financed by an allocation of $10,000,000 from the President's Disaster Relief Fund. A proposed supplemental appropriation will be required in 1954 to permit financing this program by the disaster loan revolving fund, including reimbursement to the President's Disaster Relief Fund for obligations incurred under the allocation.

Financial operations under the disaster loan revolving fund and special funds relating to the emergency drought relief are estimated for fiscal year 1954 as follows:

BUSINESS-TYPE STATEMENTS

PROGRAM AND PERFORMANCE

This fund of $400,000, without fiscal year limitation, is available for financing on a reimbursable basis, central duplicating, photographic, motion picture, tabulating, motor transport, and supply services for the Department, and such other services as the Secretary, with the approval of the Director of the Bureau of the Budget, determines may be performed more advantageously as central services. Advances are made from this fund for operation of these services, pending reimbursement from applicable funds of bureaus and agencies at rates so computed as to make the services completely self-sustaining and maintain the integrity of the original fund (5 U. S. C. 542–1).

PROPOSED FOR LATER TRANSMISSION

Salaries and expenses, Forest Service (under existing legislation, 1954).—A supplemental appropriation for 1954 in the amount of $3,000,000 is anticipated for fighting fires on or threatening lands under Forest Service administration.

ANALYSIS OF EXPENDITURES

	1953 actual	1954 estimate	1955 estimate
Proposed supplemental appropriation		$3,000,000	
Unliquidated obligations, start of year			$500,000
Unliquidated obligations, end of year		500,000	
Expenditures are distributed as follows:			
Out of current authorizations		2,500,000	
Out of prior authorizations			500,000

Watershed protection, Soil Conservation Service (under proposed legislation, 1955).—A supplemental appropriation in the sum of $3,000,000 for 1955 is anticipated as a first step to initiate, under permanent comprehensive legislation, an improved program for upstream watershed protection and flood damage prevention in cooperation with States, local groups, and farmers.

ANALYSIS OF EXPENDITURES

	1953 actual	1954 estimate	1955 estimate
Proposed supplemental appropriation			$3,000,000
Unliquidated obligations, end of year			600,000
Expenditures out of current authorizations			2,400,000

Commodity Credit Corporation (under existing legislation, 1954).—It is assumed that legislative action on an anticipated proposal to increase the borrowing authority could not be completed in time to meet peak requirements anticipated in February 1954. Therefore, it is contemplated that rather than include certain appropriation items in the 1955 budget, there will be submitted to the Congress early in the current session supplemental 1954 estimates authorizing the Secretary of the Treasury to cancel notes of the Corporation in an amount equal to (1) the impairment of the Corporation's capital resulting from fiscal 1953 operations (estimated at $642 million), and (2) advance made by the Corporation, and related costs, for other 1953 programs of the Department (International Wheat Agreement, $130,867,992, and eradication of foot-and-mouth disease and other contagious diseases of animals and poultry, $2,086,770). Early enactment of such supplementals will permit continuance of the Corporation's operations through the estimated maximum requirements of February 1954 and will permit a more thorough appraisal of the need for an increase in statutory borrowing authority in the light of price-support and related legislation then being considered by the Congress.

ANALYSIS OF EXPENDITURES

	1953 actual	1954 estimate	1955 estimate
Authorizations to expend from public debt receipts, cancellation of notes:			
Capital impairment		$642,000,000	
International Wheat Agreement		130,867,992	
Eradication of foot-and-mouth disease		2,086,770	
Total		774,954,762	
Prior year balance available (authorization to expend from public debt receipts): Unobligated			$774,954,762
Balance available in subsequent year (authorization to expend from public debt receipts):			
Obligated			−663,524,762
Unobligated		−774,954,762	−111,430,000
Total expenditures			

Commodity Credit Corporation (under proposed legislation, 1955).—The latest estimates of the Corporation's operations indicate that its obligations during February 1955 will exceed its present statutory borrowing authority of $6.75 billion. In addition, it is planned to submit a legislative proposal to the Congress to increase the national cotton acreage allotment to approximately 21 million acres. This increase will result in increased obligations for cotton loans made in fiscal 1955. However, the actual budget expenditure will not materialize until 1956 when the bank-held loans are taken over by the Corporation. In view of the foregoing, it is planned to submit a legislative proposal to the Congress to increase the borrowing authority of the Corporation by $1,750 million.

ANALYSIS OF EXPENDITURES

	1953 actual	1954 estimate	1955 estimate
Authorization to expend from public debt receipts:			
For proposed legislation to increase national cotton acreage allotment			$330,000,000
Other			1,420,000,000
Total			1,750,000,000
Deduct balance available in subsequent year (authorization to expend from public debt receipts)			1,750,000,000

CURRENT AUTHORIZATIONS

INTRODUCTORY STATEMENT

The Department of Commerce promotes the trade and commerce of the United States by providing economic analysis and special services to the business community and serves as the principal organization for carrying out operational and promotional programs of the Government relating to transportation. The continuing work of the Department is carried out by the (1) Office of the Secretary, (2) Bureau of the Census, (3) Business and Defense Services Administration, (4) Bureau of Foreign Commerce, (5) Office of Business Economics, (6) Civil Aeronautics Administration, (7) Coast and Geodetic Survey, (8) Maritime Administration and Federal Maritime Board, (9) Patent Office, (10) Bureau of Public Roads, (11) National Bureau of Standards, and (12) Weather Bureau. The Department also administers export controls through the Bureau of Foreign Commerce, and carries out defense production and mobilization preparedness activities through the Business and Defense Services Administration and the Defense Air Transportation Administration. It also operates the National Shipping Authority.

Transportation and related services account for over 90 percent of the total appropriations requested for 1955. The balance of the requested appropriations is for business activities, economic analysis, and scientific and technical programs.

Appropriations for most activities in the Department for 1955 show a downward trend from 1954. Principal increases are for payment of prior-year commitments for maritime operating subsidies and grants for road construction, and for strengthening the business and economic analysis programs and the basic research and development work of the National Bureau of Standards.

OFFICE OF THE SECRETARY

Salaries and Expenses, Office of the Secretary of Commerce

Salaries and expenses: For necessary expenses of the Office of the Secretary of Commerce (hereafter in this title referred to as the Secretary) including teletype news service (not exceeding $1,000); [$1,750,000] *$2,200,000*; and in addition, in order to provide for additional organization and management surveys of the Department of Commerce, the Secretary may transfer not to exceed $100,000 to this appropriation from any other appropriations available to the Department of Commerce for salaries and expenses for the current fiscal year [and in addition not to exceed $400,000 of the unobligated balances of all annual appropriations available to the Department of Commerce during fiscal year 1953 to be used to cover the costs of reduction-in-force of officers and employees whose services are terminated, which amount may be allotted by the Secretary, to be used exclusively for terminal leave expenses of the offices and bureaus concerned]. BUREAU OF THE CENSUS

INTRODUCTORY STATEMENT

The Bureau is the principal fact-finding and statistical agency of the Federal Government. It is responsible for taking the major censuses of population, housing, agriculture, governmental units, manufactures, mineral industries, the distributive trades, service establishments, and transportation. Current statistics on many of the subjects covered by these major censuses, and on foreign trade, are prepared and published on the basis of data from sample and other surveys and of records and reports made available to the Bureau. Its facilities are utilized

PROGRAM AND PERFORMANCE

In all activities economies are planned which result in a decrease in the program level for 1955.

1. *Operation of Federal airways.*—The Federal airways system is a network of aids to air navigation and traffic control along the primary air routes and at principal airports in the continental United States, the Territories, and possessions. These aids include radio ranges and beacons, instrument landing systems, traffic control centers and towers with associated radar equipments, light beacons and approach light lanes, communication stations, and emergency landing fields. An overall decrease in program level is planned based on decommissioning of certain facilities and combining established operating units. These decreases are offset to some extent by increases required for full-year operation of facilities installed in fiscal year 1954 and for the operation of facilities to be installed in 1955.

2. *Aviation safety.*—Inspections and certifications are made of aircraft, airmen, operators of aircraft, and air agencies to insure safe and competent operation of aircraft.

3. *Airport development.*—Periodic examinations are made of commercial airports to gather facility data used for planning purposes and for dissemination to the public.

Salaries and Expenses, Civil Aeronautics Administration—Con.

Specific examinations are made to insure compliance with the terms and conditions under which airports have been made available to cities and other local agencies. The program provides for a limited amount of advisory service on engineering criteria for public airports.

4. *General counsel.*—This activity includes the enforcement of applicable laws and rules used by the CAA in administering the civil air regulations and, as a staff service to the Administrator, renders legal advice, including preparation and interpretation of legislation and regulations.

5. *Aviation information.*—This office directs and coordinates the dissemination of information on aviation activities, including data on flight facilities and conditions published for the use of all airmen.

6. *Operation of aircraft.*—A fleet of 80 aircraft is operated to (*a*) flight-check air navigation and landing facilities; (*b*) provide for travel by, and maintenance of pilot proficiency for, aviation safety agents; and (*c*) provide for necessary administrative travel by air. Additional flying time for pilot proficiency training is obtained through the rental of aircraft.

7. *Executive direction.*—Provision is made for the planning, direction, and coordination of all activities of the agency through policies and objectives established by the Administrator and implemented by seven regional offices.

8. *Staff and administrative services.*—Staff assistance in planning and evaluating agency operations and programs and general administrative services are provided in headquarters and seven regional offices.

9. *Interfunctional.*—This activity provides common services to Washington and regional offices, including rent and utilities, communications, and supplies.

PROGRAM AND PERFORMANCE

The efficiency and safety of the Federal airways system is being improved by the installation of new air navigation and terminal aids and the modernization of existing facilities. Progress in installing the common civil-military system as recommended by the Radio Technical Commission for Aeronautics is indicated in the following statistical summary:

PROGRAM AND PERFORMANCE

1. *Grants for construction.*—Grants are made to local sponsors for construction at airports which are part of a national system capable of meeting the needs of civil aviation and nontactical military operations. No new funds are requested for grants pending completion of the reevaluation of the role of Federal Government in this program. Progress on projects authorized in prior years is summarized in the following table:

2. *Administration of grants and claims.*—This activity provides for the staff required to administer the program, including claims for damages by Federal agencies as authorized under section 17 of the Federal Airport Act. No appropriation request is submitted for administrative purposes in the 1955 estimates. However, provision is made for authorizing use of $750,000 of the available grant funds for administrative costs.

PROGRAM AND PERFORMANCE

This is for the Department of Commerce portion of a program administered by the Air Navigation Development Board composed of representatives of the Department of Commerce and the Department of Defense, for the development of a system of aids to air navigation and traffic control which will meet the common needs of civil aviation and military nontactical air operations. The work involves research, experimentation, and development of new devices required for safety and regularity of flight under all weather conditions for joint use by civil and military aircraft.

1. *Research and development on airways facilities.*—The total program is divided into three phases: Traffic control, navigation, and supporting safety projects. During 1955, major emphasis will be placed upon air traffic control aids.

2. *Administration.*

PROGRAM AND PERFORMANCE

The Board regulates the economic aspects of air carrier operations, both domestic and international; promulgates safety rules and standards; investigates aircraft accidents; and participates in the development of international air transportation.

1. *Economic regulation.*—This includes granting and denying certificates of public convenience and necessity; prescribing or approving rates and rate practices of air carriers; fixing mail rate compensation; prevention of discrimination or unfair methods of competition; and approval or disapproval of business relationships between air carriers. The major objective during 1955 is to continue to carry out the mail rate program and other related economic regulatory functions in such manner as to insure the least possible outlay of Federal funds.

2. *Safety regulation.*—This consists of promulgation of new or amended Civil Air Regulations; adjudication of complaints alleging violations of these regulations; and the coordination of the Civil Air Regulations with international safety standards and practices.

3. *Accident investigation and analysis.*—Civil aircraft accidents are investigated to determine probable cause; potential hazards are also investigated; and preventive measures are recommended and put into effect.

4. *Legal staff activities.*—Legal advice and assistance is provided on all aspects of economic and safety regulatory activities; opinions of the Board are prepared; and litigation matters are handled.

5. *Executive direction.*

6. *Administration and service activities.*

Payments to Air Carriers, Civil Aeronautics Board

Payments to air carriers: For payments to air carriers of so much of the compensation fixed and determined by the Civil Aeronautics Board under section 406 of the Civil Aeronautics Act of 1938, as amended (49 U. S. C. 486), as is payable by the Civil Aeronautics Board pursuant to Reorganization Plan No. 10 of 1953; $73,000,000, to remain available until expended: Provided, That the unexpended balance of the amount transferred, pursuant to said Plan, from the Post Office Department to the Civil Aeronautics Board for the foregoing purposes, shall be merged with this appropriation. (39 U. S. C. 488 (a); 49 U. S. C. 402.)

Payments to air carriers—1953, $75,708,000; 1954, $80,655,000; 1955, $73,000,000.

PROGRAM AND PERFORMANCE

Under the Civil Aeronautics Act of 1938 the Civil Aeronautics Board fixes rates for the transportation of air mail with the objective of promoting the development of air transportation required for the commerce of the United States, the Postal Service, and the national defense. Many of these rates include an element of subsidy. Under Reorganization Plan No. 10 of 1953 the subsidy portion is paid by the Civil Aeronautics Board, and the service portion is paid by the Post Office Department.

PROGRAM AND PERFORMANCE

The Survey publishes aeronautical and nautical navigation charts of selected areas of the United States, its Territories, and surrounding waters, using data obtained through field surveys. In addition, seismological and geodetic control data are obtained and disseminated, and worldwide tide and current information is compiled and published.

1. *Surveys and charts for marine and air navigation.*—Hydrographic, topographic, tide and current, magnetic, and aeronautical surveys are made to secure information for nautical and aeronautical charts and tables required for safe air and sea navigation.

2. *Geodetic control.*—Surveys are made in the United States and its Territories to determine the horizontal position (latitude and longitude) and the vertical position (elevation above mean sea level) of a network of control points which are permanently marked on the ground. These points are spaced so that adequate survey control is available for topographic, geologic, and other types of mapping, and for planning large-scale engineering projects. The positions and descriptions of these points are published and distributed to Federal, State, and local agencies and the general public.

3. *Earthquake investigation.*—Earthquakes are located and investigated to determine their severity and to obtain engineering data for the design of earthquake-resistant structures. The Bureau operates 13 seismograph stations, field investigates an average of 8 severe earthquakes annually, operates 58 strong-motion stations in the seismic area of the Western States, and collaborates with 14 universities to determine the location of distant earthquakes.

4. *Instrument services.*—These include the design and construction, maintenance, storage, and issuance of intricate instruments used in surveying and processing operations.

5. *Commissioned officers.*—Provision is made for the pay and allowances of the Survey's corps of active commissioned officers and for payments to retired officers.

PROGRAM AND PERFORMANCE

The Business and Defense Services Administration was established on October 1, 1953, pursuant to the authority vested in the Secretary of Commerce by Reorganization Plan No. 5 of 1950, and authority delegated to the Secretary of Commerce under the Defense Production Act of 1950, as amended.

1. *Executive direction.*—Policy guidance, general supervision, and coordination of management activities of the Administration are provided by the Administrator, the Deputy Administrator, and an administrative staff.

2. *Staff services.*—Coordination and formulation of operating programs are performed by a staff of program advisers, an Office of Small Business, and an Office of Distribution.

3. *Industry divisions.*—Twenty-five industry divisions carry out the industrial mobilization programs delegated to the department including priority and allocation controls over materials; studies of mobilization requirements and related productive capacity; postattack industrial planning and plant protection guidance; and recommendations on stockpiling of critical materials and defense production expansion proposals. Responsibilities of the department to foster and promote industry and commerce are also accomplished through the assembly and analysis of industrial and commercial information for use by both the Government and business; and by providing a focal point for cooperation between Government and business in promoting economic stability and growth.

4. *Technical services.*—Scientific and technical data are collected and compiled primarily from Government research and made available upon request to business, industry, the general public, and Government agencies. In addition, direct assistance is furnished (*a*) to industry in the development of voluntary programs for standardization of commodities, and (*b*) to local communities in providing advice and assistance for their participation in the Federal industrial dispersion programs.

5. *Field services.*—The field offices with assistance from local cooperating organizations are the medium through which the information and services of the department are made available to the business community on the local level. These offices also gather information on local business trends and developments for use of the department and other agencies. In addition to providing domestic services, these offices provide services for the Bureau of Foreign Commerce on export and import operations, including guidance on regulations and restrictions in effect here and abroad.

6. *Defense Air Transportation Administration.*—The mobilization of civil aviation resources is planned and directed. Responsibilities include: Allocation of civil aircraft to military support; establishment of an air priorities system; certification for defense loans and tax amortization applications; and administration of war risk insurance.

Export Control, Bureau of Foreign Commerce—Continued

OBLIGATIONS BY ACTIVITIES

Export control—1953, $5,614,766; 1954, $4,100,000; 1955, $3,600,000.

PROGRAM AND PERFORMANCE

Export controls are necessary to protect the domestic economy from excessive drain of scarce commodities, to safeguard the national security by regulating exports of strategic commodities, and to implement United States foreign policy. In the absence of improvement in relations with certain countries, these controls must be continued and, as necessary, extended to other areas to guard against transshipment. The Bureau of Customs is responsible for the policing of shipments at points of export. Legislation providing for these activities expires June 30, 1956.

PROGRAM AND PERFORMANCE

The Office of Business Economics prepares and publishes basic economic indicators.

1. *Preparation of national income and product data.*—Calculations are made of the national income and gross national product, consumption expenditures and other subsidiary measures of the Nation's economic well-being.

2. *Measurement and analysis of current and long-term business trends.*—Business developments are assessed monthly, and the results of continuing analysis of the major underlying factors and long-range business trends are published regularly for business use.

3. *Computation of the balance of international payments of the United States.*—The United States balance of international payments is determined and the official record of foreign expenditures by the United States Government is kept.

4. *Executive direction.*

MARITIME ACTIVITIES

Operating-Differential Subsidies, Maritime Activities, Department of Commerce

Operating-differential subsidies: For the payment of obligations incurred for operating-differential subsidies granted on or after January 1, 1947, as authorized by the Merchant Marine Act, 1936, as amended, and in appropriations heretofore made to the United States Maritime Commission, [$20,000,000] *$85,000,000*, to remain available until expended: *Provided*, That to the extent that the operating-differential subsidy accrual (computed on the basis of parity) is represented on the operator's books by a contingent accounts receivable item against the United States as a partial or complete offset to the recapture accrual, the operator (1) shall be excused from making deposits in the special reserve fund, and (2) as to the amount of such earnings the deposit of which is so excused shall be entitled to the same tax treatment as though it had been deposited in said special reserve fund. To the extent that any amount paid to the operator by the United States reduces the balance in the operator's contingent receivable account against the United States, such amount, unless it is forthwith deposited in the fund, shall be considered as withdrawn under section 607 (h) of the Merchant Marine Act, 1936, as amended: *Provided further*, That nothing contained in this Act, or in any prior appropriation Act, shall be construed to affect the authority provided in section 603 (a) of the Merchant Marine Act, 1936, as amended, (1) to grant operating-differential subsidies on a long-term basis, and (2) to obligate the United States to make future payments in accordance with the terms of such operating-differential subsidy contracts: *Provided further*, That no part of the foregoing appropriation shall be available for obligation, nor any obligation made, for the payment of an operating-differential subsidy for any number of voyages, during the current fiscal year, in excess of sixteen hundred, which number shall include the number of voyages under contracts hereafter awarded and of which one hundred shall be for operators who have not held contracts prior to July 1, 1952. (*Departments of State, Justice, and Commerce Appropriation Act, 1954.*)

Appropriated 1954, [a] **$55,000,000** Estimate 1955, **$85,000,000**

[a] Includes $35,000,000 appropriated in the Supplemental Appropriation Act, 1954.

OBLIGATIONS BY ACTIVITIES

Operating-differential subsidies—1953, $61,729,603; 1954, $57,065,554; 1955, $85,000,000.

PROGRAM AND PERFORMANCE

Contracts with United States citizens operating vessels in foreign commerce provide for payments of the differential between their operating costs and those of foreign competitors. Payments are based upon the total subsidy accrual, less the estimated annual recapturable profits (subsidy withheld). Subsidy accrual is determined by (1) the cost differentials between United States and competing foreign lines on five major elements of operating costs, and (2) the number and duration of voyages during the year by subsidized vessels. Estimated recapturable profits (subsidy withheld) represent a contingent liability to the extent that profits, averaged over the current 10-year recapture period of each contract, fall below 10 percent of capital necessarily employed. A supplemental of $20,000,000 is anticipated for 1954.

PROGRAM AND PERFORMANCE

1. *Administrative expenses.*—These are the administrative expenses incidental to all programs of the Maritime Administration and Federal Maritime Board, except those of maritime training.

2. *Maintenance of shipyard facilities.*—Maintenance and security is provided at four Government-owned reserve shipyards, which are maintained in a partial state of readiness for defense purposes.

3. *Operation of warehouses.*—Five warehouses carry materials and equipment for terminals, reserve shipyards, vessel operations, and repair and outfitting of reserve fleet ships.

4. *Maintenance and operation of terminals.*—It is planned to return the two remaining Government-owned marine terminals to the custody of the Department of the Army during fiscal year 1954. If this cannot be accomplished, attempts will be made to amend the leases with commercial operators to provide for maintenance and repair of these properties at the expense of the lessees. For this reason, no appropriated funds are requested for this activity in fiscal year 1955.

5. *Reserve fleet expense.*—Provision is made for the preservation and security of merchant vessels, maintained for national defense purposes. It is estimated that by June 30, 1955, the basic preservation of vessels in reserve will be 43 percent completed and that 48 percent of the recurring preservation, consisting of backlog and current work in 1955, will be performed and that bottom preservation will be completely applied to all 2,106 ships estimated to be in the eight reserve fleets.

PROGRAM AND PERFORMANCE

Officers and seamen are trained for service in the maritime industry.

1. *Cadet-midshipmen training.*—The Government operates a Merchant Marine Academy at Kings Point, N. Y., for the training of cadets as merchant marine officers.

2. *Upgrade and specialist training.*—Two training stations at Alameda, Calif., and Sheepshead Bay, N. Y., will be closed in 1954 and maintained in 1955 on a custodial basis.

3. *Correspondence training.*—The United States Maritime Service Institute gives correspondence course training to officers and crews at sea. Fees paid by the correspondents in 1955 are expected to cover the total cost of the activity.

4. *District training supervisors' and enrolling offices.*—The offices in New York City, New Orleans, and San Francisco, primarily engaged in supervision of cadet-midshipmen during their year of active duty at sea, will be closed in 1954.

5. *Medical services.*—By reimbursement to the United States Public Health Service, medical care and supplies are furnished at the training stations, and a program of preventive medicine is carried on.

6. *Custodial activity.*—The training stations at St. Petersburg, Fla., Sheepshead Bay, N. Y., and Alameda, Calif., are maintained in an inactive status.

7. *Administration.*

No additional vessels shall be allocated under charter, nor shall any vessel be continued under charter by reason of any extension of chartering authority beyond June 30, 1949, unless the charterer shall agree that the Maritime Administration shall have no obligation upon redelivery to accept or pay for consumable stores, bunkers, and slop-chest items, except with respect to such minimum amounts of bunkers as the Maritime Administration considers advisable to be retained on the vessel and that prior to such redelivery all consumable stores, slop-chest items, and bunkers over and above such minimums shall be removed from the vessel by the charterer at his own expense.

No money made available to the Department of Commerce, for maritime activities, by this or any other Act shall be used in payment for a vessel the title to which is acquired by the Government either by requisition or purchase, or the use of which is taken either by requisition or agreement, or which is insured by the Government and lost while so insured, unless the price or hire to be paid therefor (except in cases where section 802 of the Merchant Marine Act, 1936, as amended, is applicable) is computed in accordance with subsection 902 (a) of said Act, as that subsection is interpreted by the General Accounting Office.

Notwithstanding any other provision of this Act, the Maritime Administration is authorized to furnish utilities and services and make necessary repairs in connection with any lease, contract, or occupancy involving Government property under control of the Maritime Administration, and payments received by the Maritime Administration for utilities, services, and repairs so furnished or made shall be credited to the appropriation charged with the cost thereof: *Provided,* That rental payments under any such lease, contract, or occupancy on account of items other than such utilities, services, or repairs shall be covered into the Treasury as miscellaneous receipts.

No obligations shall be incurred during the current fiscal year from the construction fund established by the Merchant Marine Act, 1936, or otherwise, in excess of the appropriations and limitations contained in this Act, or in any prior appropriation Act, and all receipts which otherwise would be deposited to the credit of said fund shall be covered into the Treasury as miscellaneous receipts. 1. *Administration of patent and trade-mark system.*—Applications are examined to determine the patentability of claimed inventions and the registrability of trade-marks; quasi-judicial functions are performed in appeal or interference proceedings within the Office; patents and trade-marks are issued; copies of records are furnished; and other services relating to the prosecution of applications are provided.

2. *Printing and publication of patent and trade-mark material.*—This activity provides for printing of specifica-

tions and drawings of patents and trade-mark registrations; publication of their issuance and of official notices, rules of practice, laws, and other matter authorized by law; binding of patents, trade-marks, and other reference material for official and public search; and other printing and binding work necessary for the conduct of the business of the Office. The need and use of funds is governed largely by the volume of patent and trade-mark issuances, and related public demand for printed copies sold from stocks maintained by the Office.

3. *Executive direction and administrative services.*

BUREAU OF PUBLIC ROADS

INTRODUCTORY STATEMENT

The Bureau administers the Federal-aid highway program for the improvement of primary, secondary, urban, and interstate highways and cooperates with other Federal agencies in improving highways in national forests, parks, and other Federal areas.

Total appropriations requested amount to $567,000,000. This represents a decrease of $9,461,925 compared with the current fiscal year, including anticipated supplementals.

General administrative expenses: Necessary expenses of administration, including advertising (including advertising in the city of Washington for work to be performed in areas adjacent thereto), [purchase of thirty-five passenger motor vehicles for replacement only,] and the maintenance and repairs of experimental highways, shall be paid, in accordance with law, from appropriations available to the Bureau of Public Roads.

Of the total amount available from appropriations of the Bureau of Public Roads for general administrative expenses, pursuant to the provisions of section 21 of the Act of November 9, 1921, as amended (23 U. S. C. 21), $100,000 shall be available for all necessary expenses to enable the President to utilize the services of the Bureau of Public Roads in fulfilling the obligations of the United States under the Convention on the Pan-American Highway Between the United States and Other American Republics (51 Stat. 152), cooperation with several governments, members of the Pan American Union, in connection with the survey and construction of the Inter-American Highway, and for performing engineering service in Pan-American countries for and upon the request of any agency or governmental corporation of the United States. (*23 U. S. C. 21; section 6 of the Act of June 29, 1948, 62 Stat. 1105; Departments of State, Justice, and Commerce Appropriation Act, 1954.*)

Federal-Aid Highways, Bureau of Public Roads

Federal-aid highways: For carrying out the provisions of the Act of July 11, 1916, as amended and supplemented (23 U. S. C. 1–22, 24–105, 107–117), to remain available until expended, [$475,000,000] *$555,000,000*, which sum is composed of [$387,500,000] *$350,500,000*, the balance of the amount authorized to be appropriated for the fiscal year [1952, $84,500,000] *1953, $201,500,000*, a part of the amount authorized to be appropriated for the fiscal year [1953, and $1,570,352, $867,307 and $562,341] *1954, and $739,424, $364,059, and $1,896,517*, the latter sums being for reimbursement of the sums expended for the repair or reconstruction of highways and bridges which have been damaged or destroyed by floods, hurricanes, or landslides, as provided by section 4 of the Act approved June 8, 1938, section 7 of the Act approved July 13, 1943, and section 9 of the Act approved September 7, 1950, as amended (23 U. S. C. 13a and 13b). (*Departments of State, Justice, and Commerce Appropriation Act, 1954.*)

PROGRAM AND PERFORMANCE

1. *Grants for construction.*—Grants are made to States for the improvement of highways that are part of the Federal-aid primary, secondary, and urban highway systems; in general, these grants are matched on an equal basis by State funds. The three highway systems have a mileage of 216,793, 460,002, and 17,882, respectively. The current annual authorization is $575,000,000.

The funds requested will be used to reimburse the States for the Federal share of the cost of work done on approved

PROGRAM AND PERFORMANCE

1. *Construction.*—Principal forest highways are located on the Federal-aid and State highway systems. Projects are jointly selected by the States, the Forest Service, and the Bureau on the basis of their contribution to the national defense or to essential civilian requirements, especially the production of timber. Actual and estimated progress of the program is summarized in the following table.

shall not apply to labor performed by convicts on parole or probation.

During the current fiscal year authorized engineering or other services in connection with the survey, construction, and maintenance, or improvement of roads may be performed for other Government agencies, cooperating foreign countries and State cooperating agencies and reimbursement for such services (which may include depreciation on engineering and road-building equipment used) shall be credited to the appropriation concerned.

During the current fiscal year appropriations for the work of the Bureau of Public Roads shall be available for expenses of warehouse maintenance and the procurement, care, and handling of supplies, materials, and equipment for distribution to projects under the supervision of the Bureau of Public Roads, or for sale or distribution to other Government activities, cooperating foreign countries and State cooperating agencies, and the cost of such supplies and materials or the value of such equipment (including the cost of transportation and handling) may be reimbursed to current applicable appropriations.

Appropriations to the Bureau of Public Roads may be used in emergency for medical supplies and services and other assistance necessary for the immediate relief of employees engaged on hazardous work under that Bureau, and for temporary services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a), but at rates for individuals not in excess of $100 per diem. *(23 U. S. C. 1–117; Departments of State, Justice, and Commerce Appropriation Act, 1954.)*

NATIONAL BUREAU OF STANDARDS

INTRODUCTORY STATEMENT

The National Bureau of Standards serves as a national laboratory for problems relating to fundamental standards of measurement in the physical sciences, the determination of physical constants, properties of materials, and the development of methods and instruments for precise measurement, and for general and specific research and development in physics, mathematics, chemistry, metallurgy, and engineering. The budget proposes to strengthen the Bureau's direct research and development program in 1955 by $2,000,000.

For expenses necessary in carrying out the provisions of the Act approved March 3, 1901, as amended (15 U. S. C. 271–278c), including improvements to buildings, grounds, and other plant facilities, as authorized by section 2 of the Act of July 21, 1950 (15 U. S. C. 286); building of temporary experimental structures; [and purchase (not to exceed three for replacement only) of passenger motor vehicles;] and not to exceed $50,000 for services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a) [at rates not to exceed $50 per diem for individuals]; as follows: (*Departments of State, Justice, and Commerce Appropriation Act, 1954.*)

Operation and Administration, National Bureau of Standards

PROGRAM AND PERFORMANCE

1. *Research.*—Investigations of fundamental physical phenomena are conducted, and physical constants and properties of materials are determined when such data are of great importance to science or manufacturing interests. Fundamental scientific knowledge is applied to develop more effective use of new scientific and technological processes, materials, and equipment. The properties and processing characteristics of industrial materials, structures, equipment, and commodities are determined. Investigations are made of fundamental physical phenomena arising in connection with development of specific technical devices.

2. *Development.*—Standards of measurement, instruments, instrumentation techniques, methods of measurement and analysis, and commodity testing techniques are developed. New testing devices and special devices for national defense and for improvement of technical operations of Federal agencies are designed and constructed. Materials and technological processes in fields of importance to national welfare and defense are developed.

Research and Testing, National Bureau of Standards—Continued

3. *Testing, calibration, and specifications.*—The Bureau has custody of the national standards of measurement, and it compares standards used in scientific investigations, engineering, manufacturing, commerce, and educational institutions with standards adopted or recognized by the Government. This activity also provides for preparation of standard samples, analyses of substances, and similar services related to the standards of physical measurement; formulation of specifications and standards for commodities and equipment; acceptance and surveillance testing of commodities, materials, and equipment for the Federal Government; and technical investigative and advisory services related to regulatory or judicial functions of governmental agencies.

4. *General scientific services.*—A number of scientific services are performed for other Government agencies, including compilation and dissemination of scientific and technical data, production of substances and materials for specific needs in the Federal Government, and operation of special technical installations and services.

PROGRAM AND PERFORMANCE

The Central Radio Propagation Laboratory conducts research on the propagation of radio waves at all frequencies; develops methods and techniques for applying the results of this research to practical problems; provides a center of information and consulting services on radio wave propagation problems for all other Government agencies; and develops, maintains, and provides calibration services for the national primary standards of measurement of all electrical quantities at all radio frequencies.

1. *Research.*—This is concerned with the fundamental physics of the atmosphere and effects of solar and cosmic radiation on it insofar as these phenomena affect radio propagation. The long-range improvement of radio communication is critically dependent upon progress in this phase of the program. It also includes improvement of techniques for the prediction of maximum usable frequencies for radio sky-wave transmission, and the improvement of standards, instruments, and measurement methods in the entire radio-frequency range.

2. *Development.*—This is concerned with the development of equipment and standards for the precise measurement of electrical quantities at radio frequencies and with the development of equipment, systems, and techniques necessary for improvement of radio communication at all frequencies.

3. *Testing, calibration, and specifications.*—This provides for the calibration of instruments against the national standards of measurement in this field.

4. *General scientific services.*—This is concerned with the collection of data on propagation of radio waves from all parts of the world, both from the Bureau's own field stations and from those of other cooperating laboratories, and with the analysis and dissemination of these data for prediction of radio propagation conditions. Consultative services are provided other Government agencies, especially the Department of Defense.

PROGRAM AND PERFORMANCE

Funds and contract authorizations provided under this appropriation have been used to finance construction of a radio laboratory at Boulder, Colo., and a guided-missile laboratory at Corona, Calif.

In 1951, the guided-missile laboratory received an appropriation of $1,540,000. These funds were used to remodel and equip for laboratory purposes a group of buildings at the United States Naval Hospital, Corona, Calif., occupied in July 1952. During fiscal year 1954, this laboratory was transferred to the Department of Defense.

In 1951, the Boulder Radio Laboratory received appropriations of $360,000 and contract authorizations of $3,915,000. In 1952, $3,800,000 was appropriated to liquidate these obligations, leaving $115,000 of contract authorization to be financed. The 1954 appropriation of $440,000 will finance the transportation of personnel and equipment from Washington to the new laboratory which will be occupied in the latter part of that year.

PROGRAM AND PERFORMANCE

The Weather Bureau observes, records, reports, forecasts, and distributes information on weather conditions and river stages for the benefit of United States commerce, industry, agriculture, and the general public.

1. *General weather services.*—Regular forecasts are issued for United States territory and waters with special emphasis on floods and severe storms. Special forecasts and advisory services are provided for international and domestic aviation; fire-weather forecasts are furnished to assist in conservation of timber resources; and fruit-frost forecasts and warnings are prepared for areas where such crops form a major economic interest. Surface and upper-air observations are taken at several hundred locations to serve forecasting requirements. Current weather information is disseminated widely for the benefit of aviation and other interests. Several thousand voluntary and part-time observers record river stage, temperature, and precipitation readings for use in flood-control and water-use activities. All observational records are combined to form the climatic history of the United States and possessions.

2. *Research.*—Research is directed primarily toward the development of new operational and forecasting techniques directly applicable to major service programs, but also includes some supplemental studies of basic meteorology and meteorological physics.

3. *Administration.*

PROGRAM AND PERFORMANCE

Guarantees are given on loans made by private sources or Federal Reserve banks to facilitate performance of defense production contracts. Revenues derived from guaranty fees are used to pay Federal Reserve banks which serve as fiscal agents. Net earnings of the fund are retained to meet possible future losses. (Defense Production Act of 1950, sec. 301, as amended.)

BUSINESS-TYPE STATEMENTS

PROGRAM AND PERFORMANCE

Title XI of the Merchant Marine Act, 1936, as amended, authorizes the Maritime Administration to insure mortgages on certain classes of ships. Receipts from such insurance are deposited in this fund and are available for the payment of claims. Increased activity in 1955 is anticipated as a result of passage of new legislation (67 Stat. 626) which extended mortgage insurance to vessels operating in foreign trade, including those constructed under title V of the Merchant Marine Act, 1936, as amended.

Vessel Operations Revolving Fund, Maritime Activities

BUSINESS-TYPE STATEMENTS

PROGRAM AND PERFORMANCE

This fund finances the operations for the Government of a fleet of cargo vessels to meet the increased demand since Korea, resulting from the national-defense and foreign-aid programs (65 Stat. 59). The operation of the vessels is carried out by private operators acting as agents of the Maritime Administration.

Vessel operations under the fund reached a peak about April 1, 1952, when 538 ships were operated by general agents. By July 1, 1953, however, this number had fallen to 141. Since the spring of 1952, operating activities have been almost wholly confined to military requirements. There are at the present time 54 vessels operating for these purposes. It is anticipated that the number of ships operated by general agents will be steadily reduced, to the extent that the military situation permits, and as privately owned and operated American-flag vessels can accommodate these needs. The ships withdrawn from service will be returned to the reserve fleet.

War Risk Insurance Revolving Fund, Maritime Activities

BUSINESS-TYPE STATEMENTS

PROGRAM AND PERFORMANCE

This fund was established to provide war-risk insurance in the event that commercial insurance is not available at reasonable terms and conditions during time of war (Merchant Marine Act, 1936, as amended). At present, commercial war-risk insurance policies are subject to an automatic termination clause upon the outbreak of war between any of the four powers—United States, France, Great Britain, and the U. S. S. R.

The Supplemental Appropriation Act, 1952 (65 Stat. 746), authorized the transfer of $10 million from the "Vessel operations revolving fund" to this fund if it became necessary to provide insurance coverage. To

date no transfers have been made and none are anticipated in fiscal years 1954 or 1955. At present the income of the fund comes from fees paid for issuance of insurance binders that provide conditional insurance for 1 year to become effective immediately if commercial insurance is terminated upon outbreak of war between any of the four powers. Arrangements are presently being made to extend the period of coverage from 1 year to the full period of underwriting authority which expires September 7, 1955 (64 Stat. 733), without additional cost to the owners of vessels. Expenses of the fund consist of fees paid to underwriting agents.

INLAND WATERWAYS CORPORATION

[Submitted under the Government Corporation Control Act]

BUSINESS-TYPE STATEMENTS

Inland Waterways Corporation Fund

The following corporation is hereby authorized to make such expenditures, within the limits of funds and borrowing authority available to such corporation and in accord with law, and to make such contracts and commitments without regard to fiscal year limitations as provided by section 104 of the Government Corporation Control Act, as amended, as may be necessary in carrying out the programs set forth in the Budget for the fiscal year [1954] *1955* for such corporation, except as hereinafter provided: (*Departments of State, Justice, and Commerce Appropriation Act, 1954.*)

PROGRAM HIGHLIGHTS

The Inland Waterways Corporation was created by act of Congress June 30, 1924, to develop the inland waterways system of the United States and to demonstrate the economic feasibility of complete common-carrier freight service on the inland waterways. Under this authority the Corporation has operated the Federal Barge Lines, comprising barge-line operations along the Mississippi and Warrior River systems and a railroad-switching facility connecting Port Birmingham with the Birmingham, Ala., industrial area.

The Secretary of Commerce determined that the Federal Barge Lines could more appropriately be operated by private enterprise, and offered it for sale in February 1953. On July 24, 1953, the properties were sold to a subsidiary of the St. Louis Shipbuilding & Steel Co. for $9 million. The sale provides that the purchaser will invest $1 million in new working capital and will repay the purchase price within 11 years, plus interest at 3¾ percent annually. Continuation of common-carrier service in a manner substantially similar to the services previously rendered by the Inland Waterways Corporation is provided for in the agreement.

In the event of breach of contract, the Government has recourse to the courts to enforce performance, to recover damages, or by written notice to terminate the agreement and repossess the facilities sold, acquire equities in new facilities to protect the Government's interest, and demand the surrender of any retained earnings. Breach of contract includes default on principal installments, failure to maintain a minimum working capital of not less than $600,000 net, major defaults in providing transportation service, failure to perform any other agreements of the contract, and assignments to creditors or bankers.

ANALYSIS OF BUDGET PROGRAMS

Under the terms of sale the purchaser assumes all liabilities and receives any income derived from operation of facilities from July 1, 1953, although the Inland Waterways Corporation continued to operate the facilities on his account until September 19, 1953, when the purchaser was granted temporary operating rights from the Interstate Commerce Commission. Accordingly, the Corporation's activities during 1954 and 1955 are limited to:

(*a*) Settling of claims originating prior to July 1, 1953.

(*b*) Collecting receivables retained by the Corporation.

(*c*) Collecting principal and interest payments on the mortgage acquired in the sale.

(*d*) Monitoring the purchaser's operation for compliance with the terms of sale.

OPERATING RESULTS

Operating income, estimated to be $567,800 in 1954, will decline to $321,000 in 1955, as most claims and items relating to prior years' business will be settled during 1954. Operating expenses, estimated to be $772,000 in 1954 and $31,000 in 1955, provide for settlement of claims, adjustments in prior years' business, and administrative expenses for monitoring the purchaser's compliance with the terms of sale. Operating activities will result in a net loss of $204,200 in 1954, and will yield a profit of $290,000 in 1955.

Administrative expenses are estimated at $42,000 in 1954 and $16,000 in 1955. The amount for 1954 includes $15,000 for terminal leave accrued by administrative personnel during the period of Government operation on account for the purchaser.

Capital expenditures of $335,000 were made in 1954 for equipment delivered during the period of Government operation on account for the purchaser.

Repayment of principal on the mortgage and small loans to the port of New Orleans and private stevedores will amount to $475,233 in 1954 and $428,000 in 1955.

FINANCIAL REVIEW

The accumulated deficit of $13,756,256 at the start of fiscal year 1954 will increase to $17,056,145 by the close of the year because of the loss of $3,145,689 on the sale of property and operating losses of $204,200 offset by a gain of $50,000 in adjustments of prior years' income and expenses. Since the Corporation is not required to pay interest on capital stock held by the Treasury, the deficit will be reduced in 1955 and future years by approximately the amount of interest income. During 1954 the Corporation's cash will be transferred from private banks into a Treasury checking account. Accordingly, the Corporation's operations will yield a net reduction in the Government's budget expenditures of $1,641,183 in 1954. In 1955 and future years cash receipts from principal and interest payments, offset by relatively small operating expenses, will reduce budget expenditures.

NATIONAL BUREAU OF STANDARDS

Working Capital Fund, National Bureau of Standards

BUSINESS-TYPE STATEMENTS

PROGRAM AND PERFORMANCE

This fund was established to cover expenses necessary for the maintenance and operation of the National Bureau of Standards, including the furnishing of facilities, and services to other Government agencies (64 Stat. 279). It is reimbursed from applicable appropriations of the Bureau as well as from funds of other agencies for facilities and services furnished. Reimbursements include handling and related charges, depreciation of equipment, accrued leave, and building construction and alterations directly related to the work for which reimbursement is made. The principal of the fund consists of $5,000,000 in appropriations and net donated capital. The reduction in fund activity reflects the transfer of special weapons research and development from the National Bureau of Standards to the Department of Defense in 1954.

PROPOSED FOR LATER TRANSMISSION

Operating-differential subsidies, maritime activities, Department of Commerce (under existing legislation, 1954).—A supplemental appropriation of $20,000,000 is required in 1954 to pay the subsidy bills presented by private ship operators.

ANALYSIS OF EXPENDITURES

	1953 actual	1954 estimate	1955 estimate
Proposed supplemental appropriation		$20,000,000	
Expenditures out of current authorizations		20,000,000	

Federal-aid highways and forest highways, Bureau of Public Roads (under existing legislation, 1954, and proposed legislation 1955).—A supplemental appropriation of $65,000,000 is required for 1954 to reimburse the States for the Federal share of work done under Federal-aid highway authorizations. In addition, since all Federal-aid and forest highway funds heretofore authorized have been apportioned among the States, new authorizing legislation is required to provide new obligational authority for apportionment during fiscal year 1955. Amounts of $575,000,000 for Federal-aid highways and $22,500,000 for forest highways are anticipated for this purpose.

CURRENT AUTHORIZATIONS

INTRODUCTORY STATEMENT

The fiscal year 1955 budget of the Department of Defense reflects the budgetary provision that should be made at this time in consonance with the long-range plan for military forces recommended by the Joint Chiefs of Staff and approved by the National Security Council. This plan is designed to provide a strong military position which will support our domestic and foreign policy objectives and which can be maintained effectively over an extended period of years. The plan calls for improving combat effectiveness by the application of new weapons and new techniques, including full realization of our nuclear capabilities, and provides for the rapid and orderly phasing of programs to improve continental defense against possible enemy attack.

Primary emphasis in this budget is placed on the development, maintenance, and exploitation of modern airpower in the Air Force, naval aviation, and Marine Corps aviation complemented with necessary land, amphibious, submarine, and other well-rounded mobile and versatile combat forces. Such forces, in conjunction with those of other free nations, are necessary to deter aggression and provide the basis for winning a war in the event war is forced upon us.

The fiscal year 1955 budget represents the first Department of Defense budget in recent years in which it has not been necessary to provide, in whole or in part, for the costs of active combat operations. Nevertheless, even with a truce in Korea, provision has had to be made in the fiscal year 1955 budget for costs arising from maintenance of substantial Republic of Korea and United States forces in the Far East.

The fiscal year 1955 budget for the Department of Defense provides for (1) full operation, training, and maintenance of active forces on a combat-ready basis; (2) procurement of materiel and equipment necessary to equip and modernize the active forces; (3) procurement of mobilization reserves of military equipment and supplies in consonance with a program for maintaining an expansible production base rather than placing reliance solely on accumulation of stocks of end items; (4) implementation of a reserve tools and facilities program to eliminate any critical deficiencies in the mobilization production base; (5) continued buildup and modernization of airpower; (6) maintaining an active research and development program; (7) essential military public works required to support the approved forces; and (8) initiation of a program for construction of specialized new types of cargo ships and tankers required for military ocean transportation, especially for operations in Arctic areas.

PROGRAM AND PERFORMANCE

The Secretary of Defense serves as the principal assistant to the President on all matters relating to defense and directs and controls the operation of the Department. He is assisted in these responsibilities by the Deputy Secretary of Defense, nine Assistant Secretaries of Defense, a General Counsel, the Joint Chiefs of Staff, and such special assistants as are required, including the Chairman of the Military Liaison Committee to the Atomic Energy Commission, who also serves as the Assistant to the Secretary of Defense on all atomic energy matters. The nine Assistant Secretaries have been assigned responsibilities in the fields of budget and fiscal affairs, manpower and personnel, legislative and public affairs, international security affairs, research and development, supply and logistics, properties and installations, applications engineering, and health and medical affairs.

Emphasis will be placed on planning balanced programs that can be realistically and efficiently accomplished. Within the framework of national policy the Joint Chiefs of Staff are developing new strategic plans and establishing basic military policy essential to their implementation. Improvements are underway in weapons development and weapons evaluation with the objective of taking maximum advantage of the most modern technology in implementing strategic plans. In order to keep weapons and equipment advantages over potential enemies, basic sciences as well as research and development will be emphasized. More emphasis will be placed on engineering to insure the production of weapons and equipment designed not only for effectiveness in operation but with a view to simplifying maintenance. Plans for standardization of common parts will facilitate better tooling and more efficient production. The methods of establishing requirements for personnel, weapons, equipment, and supplies will be revised to simplify the computation and improve the validity of these requirements. It is planned to establish bills of material on all important items of military equipment. Plans are underway for reduction of excess inventories, particularly of items readily available in the civilian economy and for other improvements and simplification of the supply, storage, and distribution systems. Progress in identification and standardization of items in the supply system should result in fewer items, fewer parts, and greatly reduced inventories. It is planned to dispose of large inventories of excess and obsolete material much of which can be sold. Further improvement in the fiscal management of the Defense Establishment, as authorized under title IV of the National Security Act, will be explored. To this end there has been initiated a comprehensive review of the fiscal, budget, and reporting procedures of the Department of Defense with the objective of establishing a system which will provide the basic information required by management at all levels for analysis and control of defense activities.

Manpower and personnel programs are under continuing review to achieve maximum effective combat forces with fewer personnel in support and overhead activities. Plans for increasing the attractiveness of military service as a career are under study as one measure to reduce expenses and improve the effectiveness of the armed services. The reserve structure will be reviewed with the objective of developing smaller but more efficient reserve components more closely oriented to probable needs and availability of individuals at the time they are needed.

PROGRAM AND PERFORMANCE

Provision is made for all essential maintenance and operational activities of the Army.

1. *Command and management.*—This provides for civilian personnel and other expenses of headquarters at the Department of the Army in Washington, the six Army areas, the Military District of Washington, Army Field Forces, antiaircraft commands, oversea commands, and intermediate major command headquarters.

2. *Evaluation system.*—This covers activities and operations under the Assistant Chief of Staff for Intelligence, including the Army Attaché System, the Counterintelligence Corps Center, the G–2 Central Records Facility, the Army Security Center, the Army Map Service, and certain activities and contingencies related thereto.

3. *Training.*—This provides for the training of individuals, and includes the operation of replacement training centers and training divisions, the Army War College, the Command and General Staff College, the United States Military Academy, and various combat, service and technical schools. Funds are also included for training at civilian institutions, training aids, films and publications, and special field exercises.

4. *Supplies and minor equipment.*—This covers central procurement of supplies and minor equipment used by troops, office supplies and equipment, and installation supplies and equipment.

5. *Procurement operations.*—This provides for the operation of 104 procurement offices throughout the world. It also supports the Army's share of the Government-wide cataloging program.

6. *Supply distribution and maintenance.*—This provides for the storage, distribution, maintenance, and disposal of Army supplies and equipment throughout the world. Included are the operation of 69 supply depots within the United States and 68 in oversea areas, the supply activities at all Army posts and camps, field maintenance of equipment in the hands of troops, the central procurement of repair and replacement parts, and operation of supply control points.

7. *Army Reserve and Reserve Officers' Training Corps.*—This provides for operation of training facilities for the Army Reserve and the Reserve Officers' Training Corps units at camps, institutions, and home stations, operation of Military District headquarters, and recruiting for the Army Reserve.

8. *Joint projects.*—The activities of the Department of Defense for which the Army budgets include the National War College, the Industrial College of the Armed Forces, the Armed Forces Information School, the Armed Forces information and education programs, the Inter-American relations program, the alternate Joint Communication Center, and other activities benefiting the three military services.

9. *Army-wide services.*—Administrative services consist of the Adjutant General records centers, the Criminal Investigation program, penalty mail costs, welfare and morale activities for military personnel, the education of dependents overseas, personnel procurement and processing, expenses of courts, boards, and commissions, and disciplinary barracks. Logistics services include the operation and maintenance of the Army communications network, real estate management and engineer planning, the disposition of remains, the movement of freight, both by commercial line-haul transportation and by the Military Sea Transportation Service, and the operation of ports and other transportation facilities. Comptroller services include the operation of the Army Finance Center, the Army Audit Agency, and finance offices which disburse funds on an Army-wide basis.

10. *Medical care.*—This covers (*a*) medical support of the Army, National Guard, Army Reserve, and Reserve Officers' Training Corps, (*b*) maintenance and operation of medical treatment facilities in the United States and overseas, (*c*) medical care and hospitalization of Army personnel in localities where Army medical facilities are not available, (*d*) training of military personnel in medical specialties, and (*e*) operation and maintenance of medical depots and medical sections of general depots. Provision is made for operation in the continental United States of 56 hospitals, 12 infirmaries, and 106 dispensaries. Average numbers of patients are shown in the following table:

11. *Industrial mobilization.*—This is to maintain in standby condition inactive Government-owned industrial facilities, machine tools and other production equipment, and to develop mobilization plans and schedules.

12. *Other operational activities.*—This covers the costs of tactical operations and miscellaneous support costs of tactical units.

13. *Inactive installations, nonindustrial.*—This supports the maintenance of inactive posts, camps, and stations which are being retained for mobilization requirements.

14. *Support for manufacturing facilities.*—Overhead costs at Government-owned arsenals and other manufacturing facilities (except those financed under the Army Industrial Fund) are financed from this activity. Direct production costs are borne by the appropriations for which work is performed.

15. *Support for research and development.*—Overhead costs of research and development conducted at military installations, which also have other major missions, are financed from this activity. Support costs at research and development installations and all direct costs are borne by appropriations for research and development.

16. *Installation support.*—General housekeeping expenses at military installations, including maintenance of buildings and grounds, local communications, transportation and post administration, have been provided under the various activities above, as follows:

PROGRAM AND PERFORMANCE

This appropriation provides for basic and applied scientific research and for the development and improvement of weapons and equipment for the various types of military operations for which the Army must be prepared. The work is carried on under contracts with industry and other private institutions, and in the research, development, and test facilities operated by the Army and other Government agencies. A major portion of the funds requested for fiscal year 1955 will be applied to important end items already under development which represent a substantial investment of prior year funds.

1. *Air defense operations.*—Developments include new and improved antiaircraft guns and ammunition, surface-to-air guided missiles, and electronic search, detection, and fire-control and countermeasures equipment.

2. *Airborne, amphibious, and supply materiel.*—Developments include materiel for aerial supply, new types of cargo helicopters, heavy drop equipment, special vehicles for marshy and swampy terrain, vehicles suitable for Arctic conditions, and equipment for overbeach operations.

3. *Atomic, biological, and chemical warfare.*—Developments are to provide offensive and defensive capability in these types of warfare.

4. *Personnel, intelligence, and planning.*—Developments include rations, clothing, personal equipment, body armor, and survival aids for use under extreme climatic conditions; training aids for new weapons and equipment; and techniques to improve the classification and utilization of manpower. This activity also covers research on the treatment of wartime casualties and diseases of special military significance, and research on problems of strategy, tactics, and logistics to plan the development and use of new weapons on the most economical basis consistent with combat requirements.

5. *Land combat operations.*—Developments include new and improved tanks, antitank weapons, surface-to-surface guided missiles, land mines and mine warfare equipment, flame warfare equipment, and ammunition.

6. *Supporting research and development.*—This covers research and development of general application to Army requirements.

7. *Boards.*—The four boards of the Army field forces test and evaluate the tactical suitability of newly developed weapons and equipment.

8. *Direct support costs.*—This includes those costs of research and development which are not directly identifiable with other activities.

PROGRAM AND PERFORMANCE

The National Defense Act of 1916 established a national board for the promotion of rifle practice among able-bodied citizens.

1. *Marksmanship training program.*—Assistance is given to 3,430 rifle clubs and schools with a total membership of approximately 167,000, by the loan of rifles and equipment, the issuance of supplies for use in marksmanship practice, and the issuance of trophies, medals, and badges, for marksmanship.

2. *Approval of sales.*—Ammunition, targets, and supplies for rifle practice are sold by the Ordnance Corps to members of the National Rifle Association upon approval of the director of civilian marksmanship. The value of such sales is estimated at $1,000,000.

3. *Administration.*

PROGRAM AND PERFORMANCE

This system provides internal and external long-distance telegraph and telephone service for the Territory of Alaska. In 1953 the value of military and commercial use was $6.2 million; the estimated value in 1954 is $6.6 million, and in 1955, $6.9 million.

1. *Construction of telephone, telegraph, and cable systems.*—No additional construction is planned in 1955.

2. *Construction of radio systems.*—In fiscal year 1955 this project provides for installation of technical equipment in a new building at Kodiak.

3. *Maintenance and operation of the communication system.*—Provision is made for expenses incident to routine maintenance and operation of the system, exclusive of costs of pay, allowances, subsistence, and medical care of military personnel utilized. Additional civilian employees are planned to augment the field maintenance program.

PROGRAM AND PERFORMANCE

Provision is made for the procurement of major supplies and equipment, including ammunition, necessary to equip, maintain, and train the active Army and the reserve forces for fiscal year 1955.

This budget presentation is based upon the concept of placing maximum reliance upon maintaining existing production lines operating at sustaining rates and establishment of production lines at minimum rates for new items proposed to be procured rather than the accumulation of the full reserves necessary to support the current mobilization plan.

1. *Major equipment.*—Provision is made for procurement of weapons and vehicles actually used for combat, such as antiaircraft artillery, recoilless rifles, fire-control equipment, mortars, rifles, machineguns, tanks and tank accessories, self-propelled artillery, etc.; vehicles, both tactical and quasi-commercial, which are used for general purposes; Army aircraft, including liaison aircraft, helicopters, and target equipment used in antiaircraft training; electronics and communications equipment; and other major items of equipment used by the Army such as railroad equipment, bridges, materials-handling equipment, construction equipment, generators, road-building equipment, etc.

2. *Ammunition and guided missiles.*—Provision is made for procurement of ammunition used with conventional weapons, small arms, ground explosives and for those missiles assigned to the Department of the Army for procurement.

3. *Industrial mobilization.*—Provision is made for the rehabilitation and expansion of manufacturing facilities and equipment necessary to establish and maintain an adequate mobilization production base in case of emergency; for pilot-line production and for production engineering tests leading to reduction in the use of critical materials and manpower; and for the lay-away of Government-owned production facilities and equipment as they are released from production.

PROGRAM AND PERFORMANCE

1. *Training, Navy.*—Training and instruction of naval personnel extends from the indoctrination of recruits to technical and specialized instruction at the postgraduate level. Provision is also made for maintenance and operation of training centers, service schools for enlisted personnel and officers, the Naval War College, the Armed Forces Staff College, and the Postgraduate School.

2. *Training, Naval Reserve.*—This provides for the maintenance and operation of Naval Reserve training facilities, except air installations; and the academic instruction of Naval Reserve Officers' Training Corps units and of Reserve officers who have completed active duty under the Naval Aviation College program.

3. *Naval Academy.*—This provides for the education and training of midshipmen and the maintenance and operation of the Naval Academy and the Naval Station at Annapolis, Md.

4. *Personnel support.*—This provides for the recruiting of military personnel and for maintenance and operation of recruiting stations. It also provides for military personnel administration in the field, including appropriate offices in the district headquarters and at other personnel facilities, together with recreational and morale-building activities for naval personnel, such as ship and station libraries, motion-picture programs afloat and in remote areas, chaplains' supplies and equipment, the Family Allowance Activity at Cleveland, Ohio, the Naval Examining Center at Great Lakes, Ill., and the Reserve Officers' Performance Recording Activity at Fort Omaha, Nebr.

5. *Other personnel facilities.*—This provides for maintenance and operation of receiving stations, retraining commands, the Naval Home, and certain personnel facilities in caretaker status.

6. *Research and development.*—Applied personnel research is conducted to develop more effective methods of utilizing human resources for military purposes.

7. *Departmental administration.*

PROGRAM AND PERFORMANCE

This appropriation finances the operating costs of naval aviation, which consists of the air combat forces of the Regular Navy and Marine Corps, supporting service and training forces, the Naval and Marine Air Reserves, all air weapons and air techniques, aeronautical research and development, naval air stations, and related other shore facilities.

1 and 2. *Flight operations, Regular Navy and Naval Reserve.*—Flight operations are programed for 1955 at 1954 force strengths for major units, projected at peacetime flying rates, but reflect the impact of a larger percentage of modern high-performance aircraft comprising the combat operating complements in 1955.

3 and 4. *Aircraft overhaul, Regular Navy and Naval Reserve.*—Provision is made for an overhaul workload to accord with operating strength and level of flight operations programed for 1955. Workload and unit cost factors are based on 1953 experience but reflect prices current in September 1953, wherever price changes have occurred.

5 and 6. *Station operations, Regular Navy and Naval Reserve.*—General operating and maintenance costs of Regular and Reserve Navy and Marine Corps stations, whose missions are predominantly air, are budgeted in 1955 at approximately their 1954 levels except where provision has been made for expanded research and development, increased pilot training, more extensive jet aircraft operations in combat units, and additional overseas operations in the North Atlantic Treaty Organization area.

7. *Alteration and replacement of facilities.*—Provision is made for essential structural repairs and limited replacements of landing aids, shop equipment and ground electronics installations.

8. *Research and development.*—Programs for the development of new and improved types of aircraft, guided missiles, powerplants, electronic equipment, related components, and supporting equipment are covered by this activity.

9. *Industrial mobilization.*—Limited development of new production methods is being undertaken to increase rates of production and lower procurement costs. Provision also is made for the maintenance of Reserve Plants and Production Equipment Reserves.

10. *Guided missile outfitting.*—Outfitting the naval aeronautical organization with test and handling equipment for missile operations, commenced in 1953, will be continued in 1955 to give missile capabilities to a larger number of the Navy's major air combat units.

11. *Supporting equipment, materiel, and services.*—Fleet operations are supported by the procurement of weather instruments, flight trainers, submarine detection materiel, specialized flight clothing, technical publications, essential ground equipment, and photographic equipment. Evaluation of newly developed electronic equipment, maintenance of shipboard catapults and arresting gear, and inspection of newly procured aircraft and equipment also are included.

12. *Departmental administration.*

PROGRAM AND PERFORMANCE

Procurement of new aircraft for the Navy and Marine Corps is financed under this appropriation, together with guided missiles, target drones, training equipment, and aircraft modernization.

1. *Aircraft procurement.*—Procurement requirements for new aircraft are based on attrition, obsolescence, and normal aircraft service life in relation to projected operating forces. The quantity of aircraft to be procured in 1955 will permit continued modernization of operating forces.

2. Guided missile and target drone procurement.—The major portion of the 1955 estimate is for procurement of guided missiles for fleet usage. The balance of the estimate relates to procurement of target drones for fleet training and to evaluation quantities of newly developed guided missile and target drone models that are now ready for technical and service evaluation

3. *Technical equipment for service training.*—Prior to the introduction of new models of aircraft and equipment into fleet units, personnel must be trained in their operation and maintenance. The 1955 estimate covers procurement of advanced types of service equipment and contemplates greater emphasis on training at the advanced specialized level.

4. *Aircraft modernization.*—Whenever practicable, aircraft in inventory are modernized or converted to meet current operational needs and reduce requirements for new aircraft. The 1955 modernization program consists of several aircraft conversion projects and of the procurement of various electronic equipments to improve the operational efficiency of existing aircraft.

PROGRAM AND PERFORMANCE

1. *Maintenance and operation of active fleet.*—Provision is made for the maintenance, operation, and improvement of ships assigned to the active fleet; procurement of ship designs, and shipboard components and repair parts; salvage services; charter and hire of auxiliary vessels, including lighters, tugs, and small craft; activation of reserve vessels; alterations to noncommissioned vessels of the Military Sea Transportation Service; and reimbursement to the Coast Guard for operation of ocean stations.

2. *Maintenance and preservation of reserve fleet.*—This program allows for the continuation of the 5-year overhaul program for reserve vessels initiated in 1951 and limited maintenance on other reserve vessels; provides for maintenance, repair, preservation of hulls, machinery, and ordnance equipment, improvement of reserve fleet ships, and inactivation of active fleet ships.

3. *Maintenance and operation of Naval Reserve Training vessels.*—Provision is made for maintenance, operation, alteration, and improvement of ships assigned to the Naval Reserve training program.

4. *Fuel for ships.*—This includes fuel, water, and utility services for ships and service craft of the active fleet, reserve fleet, and for Naval Reserve training vessels.

5. *Electronics.*—Provision is made for procurement of electronic equipment and maintenance material for ships and naval facilities; shore-installed cryptographic and other instruments; and contractual engineering services for the electronic equipment installed in shore activities.

6. *Fleet support facilities.*—This covers fleet support and plant improvements at 11 naval shipyards and 8 Bureau of Ships laboratories; maintenance, operation and miscellaneous charges at 59 other stations; and expenses of 98 fleet activities assigned to the operating forces. Provision is also made for procurement of equipment (except electronics) for Regular Navy schools, Naval Reserve Training facilities, advanced bases, and harbor defense; and inspection testing and standardization of material and equipment.

7. *Research and development.*—This relates to the improvement in design and operational features of ships and ship equipment.

8. *Industrial mobilization.*—Provision is made for the maintenance, lease administration and security of industrial facilities held in standby condition; care of machine tools and industrial equipment; industry preparedness measures designed to reduce lead and production time so as to improve wartime supply arrangements for essential military equipment; and planning and scheduling mobilization equipment requirements.

9. *Departmental administration.*

PROGRAM AND PERFORMANCE

1. *Research and development.*—To discover new scientific knowledge for military uses, research and development is carried on in Navy laboratories and by contract in universities, private research organizations, and industrial plants.

2. *Maintenance and operation of research facilities.*—This covers maintenance and operation of the Special Devices Center, the Underwater Sound Reference Laboratory, and the operation of six branch offices for field administration of research performed under contract. It also includes capital equipment and minor plant improvements at the Naval Research Laboratory.

3. *Installation and maintenance of training equipment.*—Equipment which simulates operating problems and actual war conditions is utilized for individual and large-scale training to save time, material, and expense.

4. *Patents.*—The interests of the Government are protected in connection with patent disclosures arising from research, development, and industrial activities of the Naval Establishment.

5. *Departmental administration.*

PROGRAM AND PERFORMANCE

1. *Administrative headquarters for naval districts, bases, and stations.*—This is for support of the district headquarters, bases, and stations which direct, coordinate, and supervise the Naval Shore Establishment.

2. *Service-wide communications.*—The naval communication system, a combination of leased and Government-owned communication facilities, supplies rapid and secure worldwide communications to the naval operating forces and the Naval Shore Establishment. Greater emphasis on rapidity of communications is planned by adapting commercial automatic-switching equipment to the needs of the Navy.

3. *Hydrographic Office.*—Hydrographic and oceanographic charts and publications essential for safe navigation and special tactical and strategic projects for the Department of Defense are produced, stocked, and distributed.

4. *Naval Observatory.*—Astronomical data are supplied for safe navigation, accurate time is determined, and time signals and time transmissions are controlled, not only for the Navy but for the Nation. Continuous astronomical observations and research are conducted for the general advancement of navigation and astronomy.

5. *Inter-American affairs and support of international projects.*—Hemispheric defense is improved by standardization of equipment, training, and operation of Latin American navies in accordance with United States Navy standards. Provision is also made for support of Island Government Administration and certain unified commands.

6. *Departmental administration.*—Provision is made for expenses incurred at the seat of government by the Offices of (*a*) the Chief of Naval Operations in commanding the operating forces, (*b*) the Judge Advocate General in providing legal services for the Naval Establishment, and (*c*) the Secretary of the Navy in directing and supervising the Department.

7. *Printing equipment.*—Provision is made for the procurement of equipment for the operation of the Defense Printing Service—Washington and the Navy Printing Service—Field, both of which operate under the Navy industrial fund.

8. *Field services.*—Provision is made for expenses incurred in the field by the Executive Office of the Secretary in administering the Navy-wide records administration, wage and classification, Fleet Home Town News, internal audit, and cost inspection programs.

9. *Penalty mail.*—This activity supports the payment of postage for usage by the Offices of the Chief of Naval Operations, Judge Advocate General, and the Executive Office of the Secretary of penalty mail indicia pursuant to the act of June 25, 1948, as amended by Public Law 286, approved August 15, 1953.

10. *Contingencies of the Navy.*—Expenditures for emergencies and for extraordinary requirements are provided for upon the approval of the Secretary.

PROGRAM AND PERFORMANCE

Naval petroleum reserves set aside by Executive order to be administered by the Navy provide a supplemental emergency source of oil for national defense. A corrective program is underway to prevent the loss of oil in the shallow oil zone of reserve No. 1, Elk Hills, Calif. Reserve No. 2, Buena Vista Hills, Calif., is entirely under lease. Exploration programs in reserve No. 3, Teapot Dome, Wyo., and reserve No. 4, Alaska, have been discontinued and the reserves placed in custodial status. The program at the oil-shale reserves currently involves only custody and minor surveys.

PROGRAM AND PERFORMANCE

Provision is made for (*a*) procurement of new aircraft and guided missiles with initial spares and supporting equipment, (*b*) modernization of in-service aircraft, (*c*) procurement and production administration, and (*d*) industrial mobilization activities.

1. *Aircraft and related procurement.*—New aircraft are procured in relation to the projected aircraft inventory required to support currently planned forces, estimated aircraft losses, obsolescence of aircraft in the inventory, and development of new models. This activity also provides for modernization of in-service aircraft and production facilities for expansion and maintenance of an industrial base. With minor exceptions, the 1955 program is designed to equip the 137-wing force with modern aircraft through fiscal year 1957. Procurement and production administration funds support (1) procurement administration, (2) quality control, and (3) audit of costs incurred by contractor in the performance of contracts.

2. *Guided missiles.*—Guided missiles and associated equipment are procured to increase the combat capabilities of the Air Force in air defense, strategic air, and tactical air operations.

3. *Industrial mobilization.*—The industrial mobilization estimate supports plans to achieve rapid mass production in event of war, and improved manufacturing processes, including the elimination or reduction of the use of critical materials.

DEPARTMENT OF THE AIR FORCE—Continued

MAJOR PROCUREMENT OTHER THAN AIRCRAFT—Continued

Major Procurement Other Than Aircraft, Air Force—Continued

PROGRAM AND PERFORMANCE

Provision is made for ammunition and major items of equipment required by the Air Force, the Air Force Reserves, the Air National Guard (long lead time items only), and the Air ROTC. Substantial reliance is placed on continuation of a flexible production base capable of expansion rather than solely on accumulating large stocks of ammunition and equipment. Reductions have been effected in previous equipment allowances for units and air bases. This has served partially to offset additional requirements for the new units and air bases to be activated.

1. *Weapons and ammunition.*—Ammunition is provided for a combat reserve, for peacetime training of aircrews, and for service test of new types of ammunition. No provision is made for additional small arms.

2. *Ground-powered and marine equipment.*—Provision is made for general and special-purpose vehicles, construction equipment, and materials-handling equipment. No procurement of railroad rolling stock nor utility or rescue boats is contemplated.

3. *Electronics and communications equipment.*—Provision is made for ground electronic equipment, airborne radio and radar equipment for aircraft not factory equipped, navigational aids, equipment for the global communications system, the aircraft control and warning system, tactical control systems, communications security systems, and organizational and base communications equipment.

4. *Training equipment.*—Provision is made for major nonexpendable training aids, including mobile training units, counterpart training devices, radio and radar trainers, and aerial targets and related equipment.

5. *Other major equipment.*—Provision is made for meteorological, radiological, photographic, test, flying field, shop, utilities, food service, and laundry and dry cleaning equipment required for tactical units, air bases, depot, and airfield support.

PROGRAM AND PERFORMANCE

1. *Operation of aircraft.*—Provision is made for (*a*) central procurement of aircraft materials, spares and spare parts (including stock levels required to support the Air National Guard flying-hour program); (*b*) aviation fuel and oil and other propellents; and (*c*) for corrective maintenance to aircraft. The estimate contemplates a build-up of the Air Force from 115 wings at end of fiscal year 1954 toward an authorized 137 wings.

2. *Organization, base and maintenance equipment and supplies.*—To support the authorized personnel, aircraft, installations, and wings, provision is made for central procurement of minor items of equipment and supplies, including spare parts for all Air Force ground equipment. Support of the training program of the Air Force Reserve and Air Reserve Officers' Training Corps and of the stock levels required for the Air National Guard is included.

3. *Logistical support.*—Provision is made for civilian personnel, contractual services, local purchase of supplies, and necessary additional support of (*a*) depot maintenance of the active aircraft inventory, special-purpose vehicles, and equipment; (*b*) operation of the Air Force depot supply system; (*c*) commercial transportation, incident to distribution of materiel through the depot system, of shipments from Air Force depots; shipments from Army, Navy, and other agencies when made for benefit of the Air Force; airlift of personnel and materiel; ocean transportation of civilian personnel and materiel by Military Sea Transport Service; (*d*) commercial and Government contract printing; (*e*) disposition of deceased personnel; and (*f*) maintenance and operation of 37 logistical facilities on a worldwide basis. Similar support is included for Air Reserve Officers' Training Corps and Army air operations.

4. *Training support.*—Provision is made for training of the Regular Air Force, Air Force Reserve, and Air Reserve Officers' Training Corps. Training of Regular Air Force personnel consists of (*a*) basic military training for those entering without prior military service; (*b*) technical training in specialized fields; (*c*) flying training; and (*d*) professional training designed to qualify personnel for positions of greater responsibility. The estimate provides for an average basic military training load of 27,700 compared with 17,300 during 1954. The average 1955 technical training load will be 55,300 as compared to 53,000 for 1954. Pilot training in 1955 will continue at the annual rate of 7,800 to be attained late in 1954. Air Force reservists will receive training at 30 reserve flying training and 85 ground training locations. The Air Reserve Officers' Training Corps activities will be conducted at 188 educational institutions and 2 summer camp sessions.

5. *Operational support.*—Provision is made for (*a*) the maintenance and operation of the installations and facilities required to support the primary combat missions and supporting operational missions assigned to Air Force commands; (*b*) the operation of aircraft control and warning systems and tactical control systems; (*c*) operation of the Aeronautical Chart and Information Service; and (*d*) the supporting operational requirements incident to the air combat maneuvers, rotational movements of Strategic Air Command and Tactical Air Command operational units, Engineer Aviation unit movements, Airways and Air Communications Service, Air Rescue Service, and other supporting services. In 1955 there will be 216 active operational support installations, an increase of 9 over 1954.

PROGRAM AND PERFORMANCE

This appropriation provides for the development and improvement of Air Force weapons and equipment and for basic and applied research in fields of particular concern to the Air Force. The estimate covers the direct costs of research and development, excluding the pay and other related costs of military personnel and ordinary maintenance of research facilities. Most of the work is carried out by contract with industry; a smaller portion is carried out in universities and in Air Force and other governmental facilities.

1. *Aircraft.*—This applies to the study and development of aircraft, including bombers, fighters, interceptors, transports, and helicopters.

2. *Guided missiles.*—This applies to the study and development of pilotless bombers and interceptors, guided

aircraft rockets, and remotely controlled targets and drones.

3. *Propulsion.*—This provides for research and development in the field of aircraft powerplants, propellers, helicopter rotors, and associated equipment.

4. *Electronics.*—This covers research and development of airborne and ground equipment for communications, navigation, and aircraft warning and control.

5. *Armament.*—This covers research and development of offensive and defensive armament, bombing and fire control systems, and ancillary equipment.

6. *Equipment.*—This covers the research and development of equipment for the operation, maintenance, and servicing of piloted and pilotless aircraft, equipment for Air Force personnel, and training equipment, as well as the development of new materials and techniques for the fabrication of materiel.

7. *Sciences.*—This provides for basic and supporting research in physical sciences such as physics and thermodynamics, in the life sciences such as aeromedicine, and in military sciences such as strategic and tactical air operations.

8. *Special projects.*—These are projects of a special nature as directed by Headquarters, United States Air Force.

9. *Laboratory operations.*—This covers the cost of all civilian personnel engaged in Air Force research and development and those technical supplies, equipment, and operating expenses not identifiable with other activities.

PROGRAM AND PERFORMANCE

Provides for pay and allowances, travel, subsistence, and clothing requirements incident to training instruction of Air Force Reserve personnel and Air Reserve Officers' Training Corps students. The U. S. Air Force Reserve long-range program is designed to provide trained units to supplement regular Air Force units and trained individuals to augment regular Air Force organizations and activities consistent with mobilization requirements. The Air Force Reserve Officers' Training Corps program is designed to produce qualified junior officers for the regular Air Force and the Air Force Reserve with particular emphasis on the flying aspect of the Air Force requirement for junior officers.

PROGRAM AND PERFORMANCE

Provision is made for facilities, supplies, equipment, pay and allowances essential for the training, operation, and maintenance of the Air National Guard as a reserve component of the Air Force. During fiscal year 1954, the remaining Air National Guard units that were ordered into active military service in 1952 will have returned to the control of the States. Two additional squadrons were established in fiscal year 1954. At the end of fiscal year 1954 the composition of the guard will be 563 units. At the end of fiscal year 1955 there will be 27 wings and 87 squadrons plus support units totaling 585 units. The personnel plan is summarized as follows:

BUSINESS-TYPE STATEMENTS

PROGRAM AND PERFORMANCE

This fund was created under the National Security Act, as amended (5 U. S. C. 172d), to finance industrial- and commercial-type activities on a reimbursable basis. The Secretary of Defense designates the activities to be financed through this fund.

There are presently operating nine installations, as follows:

Army printing plants: Ogden, Utah, and St. Louis, Mo.

Manufacturing and maintenance divisions, Quartermaster depots: Jeffersonville, Ind., and Philadelphia, Pa.

Ordnance Corps arsenal: Picatinny, N. J.

Diamond Ordnance Fuze Laboratories: Washington, D. C.

Chemical Corps arsenals: Pine Bluff, Ark., and Rocky Mountain, Colo.

Dugway Proving Ground: Tooele, Utah.

It is planned to expand 2 of the above divisions by financing 5 additional installations on or before January 1, 1954, as follows:

Manufacturing and maintenance divisions, Quartermaster depots: Fort Worth, Tex., Richmond, Va., and Ogden, Utah.

Ordnance Corps arsenals: Springfield, Mass., and Watervliet, N. Y.

The plan for further expansion, as rapidly as practicable after January 1, 1954, includes remaining printing plants, Ordnance Corps arsenals, maintenance shops, coffee-roasting plants, and laundry and dry-cleaning plants.

As of June 30, 1953, the principal of the fund consisted of $217,280,000 reappropriated from unexpended balances

PROGRAM AND PERFORMANCE

The Army management fund was created under the National Security Act, as amended (5 U. S. C. 172e), to facilitate the conduct of operations which are financed by two or more appropriations. The corpus of the fund consists of $1,000,000. The activities at present include:

1. *Defense telephone service, Washington.*—This activity finances the operations of the telephone service of the Department of Defense, Washington, D. C.

2. *Ordnance consolidated procurement account.*—This activity finances the procurement of certain items of ordnance supplies, materials, and equipment which are required by more than one appropriation. This activity is to be discontinued June 30, 1954.

3. *Joint construction agency.*—This activity finances the administrative and overhead expenses of the Department of Defense construction programs in western Europe.

Army Stock Fund

BUDGETARY AUTHORIZATION SCHEDULES

AMOUNTS AVAILABLE FOR OBLIGATION

Appropriation or estimates (obligations incurred)—1953, $70,000,000.

ANALYSIS OF EXPENDITURES

Obligations incurred during the year (total expenditures out of current authorizations—paid into revolving fund)—1953, $70,000,000.

BUSINESS-TYPE STATEMENTS

PROGRAM AND PERFORMANCE

This fund operates under the National Security Act, as amended (5 U. S. C. 172d). It finances the procurement of stocks of individual clothing and equipage, subsistence, general quartermaster supplies, medical and dental materials and administrative supplies and equipment used in the Washington, D. C., area. Income is derived from sales of these common-use items to authorized purchasers.

At the present time the fund includes continental United States depot stocks only. In addition to operating stocks, this fund maintains reserve stocks of essential items which cannot be immediately procured in the event of an emergency.

The investment of the Government in the fund will be increased by an estimated $966,494,493 during fiscal year 1954 by the capitalization of depot inventories of subsistence, general quartermaster supplies (including petroleum products), and medical and dental materials. The capital of the fund was reduced in fiscal year 1954 by $285,000,000 by congressional action.

It is planned that the capitalization of depot inventories of additional categories of materiel and of inventories at posts, camps and stations in the continental United States and in overseas areas will further increase the investment of the Government in the fund during fiscal year 1955. Included in these statements is a projected capitalization of $54,000,000 on July 1, 1954, of the worldwide station stocks of medical and dental materiel. Although the additional inventories in other categories to be capitalized, and the transactions affecting such supplies, are not included in these statements, their exclusion is considered to have no material effect on the estimated budget expenditures.

Reimbursements to the fund in fiscal years 1954 and 1955 increase due to the inclusion of additional categories of materiel. Planned purchases by the fund will be less than sales in both fiscal years 1954 and 1955 because of a program to adjust stock levels.

The Government's investment in the fund as of June 30, 1954, is expected to consist of a net amount of $139,100,000 of appropriations and reappropriations and $3,387,400,962 of inventories capitalized by the fund, less accumulated losses of $108,878,471, resulting from inventory price adjustments.

BUSINESS-TYPE STATEMENTS

PROGRAM AND PERFORMANCE

This fund was created under the National Security Act, as amended (5 U. S. C. 172d), to finance inventories of materials and equipment. In accordance with its charter, the fund was placed in operation on July 1, 1953, with stocks on hand and on order at depots, posts, camps, and stations providing initial capital. Income is derived from sales to authorized purchasers.

The fund presently consists of stocks of electronics parts; engineer property, materials, and spare parts; general property, clothing, and equipment; motor transport equipment and spare parts; ordnance spare parts and nonperishable subsistence. Included in the fund are stocks of essential items which cannot be immediately

procured in the event of an emergency. The current plan provides that additional motor transport items and ordnance spare parts will be capitalized in the fund during the latter half of fiscal year 1954.

Reimbursements to the fund increase during fiscal year 1955 primarily because a stock withdrawal credit of approximately $8,000,000 was utilized during fiscal year 1954. Planned purchases from the fund will be less than sales in both years because of a program to draw down stock levels.

Naval Working Fund

PROGRAM AND PERFORMANCE

Advances from other Government agencies, foreign governments, and private individuals, for work or services to be rendered by the Navy, are used to cover the costs of such services. In addition, receipts from the sale of surplus stores of the Navy are used to cover expenses of selling surplus stores; net proceeds of such sales are transferred to the Treasury (31 U. S. C. 643).

BUSINESS-TYPE STATEMENTS

PROGRAM AND PERFORMANCE

This fund was created under the National Security Act, as amended (5 U. S. C. 172d) to finance industrial- and commercial-type activities on a reimbursable basis. The Secretary of Defense designates the activities to be financed through the fund. The activities at present include:

Military Sea Transportation Service.

Naval shipyards at—
Philadelphia, Pa.
Portsmouth, Va.
Charleston, S. C.

Naval ordnance plants at—
York, Pa.
Forest Park, Ill.
Indian Head, Md.

Navy printing plants at—
Twenty-three locations in the field.
Defense printing service, Washington, D. C.

Naval Research Laboratory, Washington, D. C.

Naval Ordnance Laboratory, Corona, Calif.

Marine Corps Clothing and Equipment Factory, Philadelphia, Pa.

A number of these activities appear in the financial statements for the first time in this budget. The Naval clothing factory, Brooklyn, N. Y. appears for the last time, having ceased operations April 30, 1953.

The principal of the fund consists of $312,090,000 reappropriated from unexpended balances of various appropriations, and −$2,314,315 in net capitalized assets representing inventories acquired reduced by liabilities assumed at the time of the transfer of activities to the fund operations.

Of the $312,090,000 reappropriated through the end of the fiscal year 1953, $125,700,000 had been allocated to the operating activities listed above, leaving a balance of $186,390,000 available for allocation. From this balance, allocations will be made to provide working capital for the additional activities proposed to be financed under the fund during the latter part of fiscal year 1954 and during fiscal year 1955 as follows: Seven remaining naval shipyards, Naval Gun Factory, Washington, D. C., naval ordnance plants at Indianapolis, Ind., and Macon, Ga.

PROGRAM AND PERFORMANCE

This fund was created under the National Security Act, as amended (5 U. S. C. 172e), to facilitate the financing of operations supported by two or more appropriations. The corpus of the fund consists of $1,000,000 transferred from the naval procurement fund. Principal operations financed in this manner are the material inspection service, departmental telephone and maintenance services, the Electronics Production Resources Agency, which coordinates the production and allocation of electronics equipment for the Department of Defense.

Navy Stock Fund

BUSINESS-TYPE STATEMENTS

PROGRAM AND PERFORMANCE

This fund, initially established in 1893, now operates under the National Security Act, as amended (5 U. S. C. 172d). It finances the procurement of stocks of general stores material, vehicular equipment repair parts, special shipboard electrical fittings and fixtures, special clothing, clothing and small stores, ship's store and commissary store stock, medical and dental supplies, blood plasma and related items, subsistence, common electronic items, and fuels. Income is derived from sales to authorized purchasers.

Included are worldwide depot and, in general, station stocks. In addition to operating stocks, this fund maintains stocks of essential items which cannot be immediately procured in the event of an emergency.

Reimbursements to the fund decrease during fiscal year 1955, reflecting a decline in sales. Planned purchases by the fund will be less than sales in both fiscal years 1954 and 1955 because of a program to draw down stock levels.

The Government investment in the fund consists of $1,378,077,216 of appropriated money, $523,184,001 of net capitalized assets, and $157,194,481 of retained earnings. Retained earnings decrease in fiscal years 1954 and 1955 because of a program to sell excess stocks which will return less than book value.

BUSINESS-TYPE STATEMENTS

PROGRAM AND PERFORMANCE

This fund was created under the National Security Act, as amended (5 U. S. C. 172d), to finance such industrial or commercial type activities as designated by the Secretary of Defense. The principal of the fund consists of $1,000,000 reappropriated from the unexpended balance of "Maintenance and operations, Air Force," and $40,120 in donated assets. This fund presently finances the Defense Printing Service, San Antonio, Tex.

Additional operations being considered for establishment within this fund as rapidly as is practicable are the additional printing plants under the Air Materiel Command, Military Air Transport Service, bakeries, laundries, and dry cleaning plants.

BUSINESS-TYPE STATEMENTS

PROGRAM AND PERFORMANCE

This fund was created under the National Security Act as amended (5 U. S. C. 172d) to finance inventories of common-use stores, supplies, materials, and equipment within the Department of the Air Force. Income is derived from sales to authorized purchasers.

The fund presently finances procurement of individual clothing, aviation fuels and lubricants and medical and dental supplies. In addition to operating stocks, this fund maintains stocks of essential items which cannot be immediately procured in the event of an emergency.

The capital of the fund was increased in fiscal year 1954 by the capitalization of stocks of aviation fuels and lubricants worldwide and stocks of medical and dental materials in the continental United States. In fiscal year 1955 the capital of the fund will be further increased by the capitalization of stocks of medical and dental material overseas. These additional activities in 1954 and 1955 account for the increase in income in this fund in these years. Planned purchases by the fund will be less than anticipated sales in fiscal year 1955 because of a program to draw down stock levels in clothing and in medical and dental material.

The Government investment in the fund consists of $256,300,000 reappropriated from unexpended balances of various appropriations and capitalized inventories of $533,207,376.

GENERAL PROVISIONS

SEC. 601. During the current fiscal year, the Secretary of Defense and the Secretaries of the Air Force, Army, and Navy, respectively, if they should deem it advantageous to the national defense, and if in their opinions, the existing facilities of the Department of Defense are inadequate, are authorized to procure services in accordance with section 15 of the Act of August 2, 1946 (5 U. S. C. 55a), but at rates for individuals not in excess of $50 per day, and to pay in connection therewith travel expenses of individuals, including actual transportation and per diem in lieu of subsistence while traveling from their homes or places of business to official duty station and return as may be authorized by law: *Provided*, That such contracts may be renewed annually.

SEC. 602. Section 3648, Revised Statutes, shall not apply in the case of payments made from appropriations contained in this Act, (1) to payments made in compliance with the laws of foreign countries or their ministerial regulations, (2) to payments for rent in such countries for such periods as may be necessary to accord with local custom, or (3) to payments made for tuition.

SEC. 603. During the current fiscal year, provisions of law prohibiting the payment of compensation to, or employment of, any person not a citizen of the United States shall not apply to personnel of the Department of Defense.

[SEC. 604. Hereafter, appropriations for the Department of Defense otherwise available for travel or transportation which are current on date of relief from duty station of personnel traveling under orders may be charged with all expenses in connection with such travel including transportation of dependents and household effects, regardless of time of arrival at destination of such personnel.]

[SEC. 605. Hereafter, appropriations for the Department of Defense available for travel shall not be available for expenses incident to attendance at meetings of technical, scientific, professional, or other similar organizations without the approval of the Secretary of the department concerned, or his designee for the purpose.]

[SEC. 606. Hereafter, no part of any money appropriated to the Department of Defense in this or any other Act shall be expended for the payment of any commission on any land purchase contract in excess of 2 per centum of the purchase price.]

SEC. [607] *604*. Such military and naval personnel as may be detailed for duty with agencies not a part of the Department of Defense on a reimbursement basis may be employed in addition to the numbers otherwise authorized and appropriated for.

SEC. [608] *605*. Appropriations contained in this Act shall be available for insurance of official motor vehicles in foreign countries, when required by laws of such countries; payments in advance of expenses determined by the investigating officer to be necessary and in accord with local custom for conducting investigations in foreign countries incident to matters relating to the activities of the department concerned; reimbursement of General Services Administration for security guard services for protection of confidential files; [examination of estimates of appropriations and Department of Defense activities in the field and the use of such appropriations for such purpose shall be subject only to regulation by the standing committees concerned;] and all necessary expenses, at the seat of government of the United States of America or elsewhere, in connection with (1) instruction and training, including tuition, specifically approved by the Secretary of the Department concerned and not otherwise provided for, of civilian employees, and (2) communication and other services and supplies as may be necessary to carry out the purposes of this Act: *Provided*, That no appropriation contained in this Act, and no funds available from prior appropriations to component departments and agencies of the Department of Defense, shall be used to pay tuition or to make other payments to educational institutions in connection with the instruction or training of file clerks, stenographers, and typists receiving, or prospective file clerks, stenographers, and typists who will receive compensation at a rate below the minimum rate of pay for positions allocated to grade GS–5 under the Classification Act of 1949, as amended.

[SEC. 609. Appropriations for the military departments available for procurement or manufacture of supplies, equipment, and materials shall hereafter be available for the purchase or other acquisition of (a) copyrights, letters patent, applications for letters patent, (b) licenses under copyrights, under letters patent, and under applications for letters patent, and (c) designs, processes, and manufacturing data; and shall also be available for the purchase or other acquisition of releases, before suit is brought, for past infringement of letters patent. Any such purchase or other acquisition shall pertain to supplies, equipment, materials, or processes produced or used by or for, or useful to, the department concerned.]

SEC. [610] *606*. Any appropriation available to the Air Force, Army, or the Navy may, under such regulations as the Secretary concerned may prescribe, be used for expenses incident to the maintenance, pay, and allowances of prisoners of war, other persons in Air Force, Army, or Navy custody whose status is determined by the Secretary concerned to be similar to prisoners of war, and persons detained in such custody pursuant to Presidential proclamation.

SEC. [612] *607.* Appropriations available to the Department of Defense for the current fiscal year for construction or maintenance shall be available for minor construction (except family quarters), conversion of and extensions to existing structures, and improvements, at facilities of the Department concerned, but the cost of any project authorized under this section which is not otherwise authorized shall not exceed the following cost limitations, but only one allotment shall be made for any one project or unit: (a) any such project determined by the Secretary of Defense to be urgently required in the interests of national defense, $200,000; (b) any such project determined by the Secretary of the Department concerned to be urgently required in the interests of national defense, $50,000; and (c) any other such project, $25,000: *Provided,* That the cost limitations of this section shall not apply to amounts authorized to be expended for emergency expenses on the approval of the Secretary concerned: *Provided further,* That the cost of converting existing structures to family quarters pursuant to the authority contained in this section shall not exceed $50,000 during the current fiscal year at any single facility of the Department concerned.

SEC. [613] *608.* During the current fiscal year, appropriations otherwise available for construction of family quarters for personnel shall not be obligated for such construction at a cost per family unit in excess of $14,040 on housing units for generals; $12,040 on housing units for majors, lieutenant colonels and colonels, or equivalent; $11,040 on housing units for second lieutenants, lieutenants, captains, and warrant officers, or equivalent; or $10,040 on housing units for enlisted personnel, except that when such units are constructed outside the continental United States or in Alaska, the average cost per unit of all such units shall not exceed $25,850 and in no event shall the individual cost exceed $35,000, except units for the Alaska Communications System the individual cost shall not exceed $40,000.

SEC. [614] *609.* Appropriations for the Department of Defense for the current fiscal year shall be available, (a) except as authorized by the Act of September 30, 1950 (20 U. S. C. 236–244), for primary and secondary schooling for dependents of military and civilian personnel of the Department of Defense residing on military or naval installations or stationed in foreign countries, as authorized for the Navy by section 13 of the Act of August 2, 1946 (5 U. S. C. 421d) in amounts not exceeding an average of [$225] *$250* per student, when the Secretary of the Department concerned finds that schools, if any, available in the locality, are unable to provide adequately for the education of such dependents; (b) for expenses in connection with administration of occupied areas; (c) for payment of rewards as authorized for the Navy by the Act of August 2, 1946, for information leading to the discovery of missing naval property or the recovery thereof.

SEC. [615] *610.* No part of any appropriation contained in this Act shall be used directly or indirectly except for temporary employment in case of emergency, for the payment of any civilian for services rendered by him on the Canal Zone while occupying a skilled, technical, clerical, administrative, executive, or supervisory position unless such person is a citizen of the United States of America or of the Republic of Panama: *Provided, however,* (1) That, notwithstanding the provision in the Act approved August 11, 1939 (53 Stat. 1409), limiting employment in the above-mentioned positions to citizens of the United States from and after the date of approval of said Act, citizens of Panama may be employed in such positions; (2) that at no time shall the number of Panamanian citizens employed in the above-mentioned positions exceed the number of citizens of the United States so employed, if United States citizens are available in continental United States or on the Canal Zone; (3) that nothing in this Act shall prohibit the continued employment of any person who shall have rendered fifteen or more years of faithful and honorable service on the Canal Zone; (4) that in the selection of personnel for skilled, technical, administrative, clerical, supervisory, or executive positions the controlling factors in filling these positions shall be efficiency, experience, training, and education; (5) that all citizens of Panama and the United States rendering skilled, technical, clerical, administrative, executive, or supervisory service on the Canal Zone under the terms of this Act (a) shall normally be employed not more than forty hours per week, (b) may receive as compensation equal rates of pay based upon rates paid for similar employment in continental United States plus 25 per centum; (6) this entire section shall apply only to persons employed in skilled, technical, clerical, administrative, executive, or supervisory positions on the Canal Zone directly or indirectly by any branch of the United States Government or by any corporation or company whose stock is owned wholly or in part by the United States Government: *Provided further,* That the President may suspend from time to time in whole or in part compliance with this section if he should deem such course to be in the public interest.

SEC. [616] *611.* Insofar as practicable, the Secretary of Defense shall assist American small business to participate equitably in the furnishing of commodities and services financed with funds appropriated under this Act by making available or causing to be made available to suppliers in the United States, and particularly to small independent enterprises, information, as far in advance as possible, with respect to purchases proposed to be financed with funds appropriated under this Act, and by making available or causing to be made available to purchasing and contracting agencies of the Department of Defense information as to commodities and services produced and furnished by small independent enterprises in the United States, and by otherwise helping to give small business an opportunity to participate in the furnishing of commodities and services financed with funds appropriated by this Act.

[SEC. 617. Hereafter, commuted rations for enlisted personnel of the uniformed services (as defined in the Career Compensation Act of 1949) on leave, or otherwise authorized to mess separately, shall be equivalent to the cost of the ration as determined by the Secretary of Defense.]

SEC. [618] *612.* No appropriation contained in this Act shall be available for expenses of operation of messes (other than organized messes the operating expenses of which are financed principally from nonappropriated funds) at which meals are sold to officers or civilians except under regulations approved by the Secretary of Defense, which shall (except under unusual or extraordinary circumstances) establish rates for such meals sufficient to provide reimbursement of operating expenses and food costs to the appropriations concerned: *Provided,* That officers and civilians in a travel status receiving a per diem allowance in lieu of subsistence shall be charged at the rate of not less than $2.25 per day: *Provided further,* That for the purposes of this section payments for meals at the rates established hereunder may be made in cash or by deductions from the pay of civilian employees.

SEC. [619] *613.* No part of any appropriation contained in this Act shall be available until expended unless expressly so provided elsewhere in this or some other appropriation Act.

SEC. [620] *614.* No part of any appropriation contained in this Act shall be available for or on account of the supply or replacement of table linen, dishes, glassware, silver, and kitchen utensils for use in the residences or quarters of officers on shore (other than for field messes, messes temporarily set up on shore for bachelor officers and officers attached to seagoing or district defense vessels, to aviation units based on seagoing vessels, to the fleet air bases, to the submarine bases, or to landing forces and expeditions), except in accordance with regulations approved by the Secretary of Defense, which shall provide for uniform practices among all of the services.

[SEC. 621. Hereafter, provisions of the Act of February 9, 1946 (60 Stat. 3), shall be applicable to the appropriations of the Department of Defense for military pay for the current fiscal year, upon certification by the appropriate agency of the department concerned.]

SEC. [622] *615.* Not more than [$10,000,000] *$25,000,000* of the amounts received during the current fiscal year by each of the Departments of the Army, Navy, and Air Force as proceeds from the sale of scrap or salvage materials, shall be available during the current fiscal year for expenses of transportation, demilitarization, and other preparation for sale or salvage of military supplies, equipment, and matériel: *Provided,* That a report of receipts and disbursements under this limitation shall be made quarterly to the Committees on Appropriations of the Congress.

SEC. [623] *616.* During the current fiscal year, the President may exempt appropriations, funds, and contract authorizations, available for military functions under the Department of Defense, from the provisions of subsection (c) of section 3679 of the Revised Statutes, as amended, whenever he deems such action to be necessary in the interest of national defense.

[SEC. 624. No appropriation contained in this Act shall be available in connection with the operation of commissary stores of the agencies of the Department of Defense for the cost of purchase (including commercial transportation in the United States to the place of sale but excluding all transportation outside the United States) and maintenance of operating equipment and supplies, and for the actual or estimated cost of utilities as may be furnished by the Government and of shrinkage, spoilage, and pilferage of merchandise under the control of such commissary stores, except as authorized under regulations promulgated by the Secretaries of the military departments concerned, with the approval of the Secretary of Defense, which regulations shall provide for reimbursement therefor to the appropriations concerned and, notwithstanding any other provision of law, shall provide for the adjustment of the sales prices in such commissary stores to the extent necessary to furnish

sufficient gross revenue from sales of commissary stores to make such reimbursement: *Provided*, That under such regulations as may be issued pursuant to this section all utilities may be furnished without cost to the commissary stores outside the continental United States and in Alaska: *Provided further*, That no appropriation contained in this Act shall, after December 31, 1953, be available in connection with the operation of commissary stores within the continental United States unless the Secretary of Defense has certified that items normally procured from commissary stores are not otherwise available at a reasonable distance and a reasonable price in satisfactory quality and quantity to the military and civilian employees of the Department of Defense: *Provided further*, That commissary stores are hereby authorized to be operated by private persons and privately owned organizations under such regulations as may be approved by the Secretary of Defense.]

SEC. [625] *617*. No part of any appropriation contained in this Act shall be used to pay the salary or wages of any person who engages in a strike against the Government of the United States or who is a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or who advocates, or is a member of an organization that advocates, the overthrow of the Government of the United States by force or violence: *Provided*, That for the purposes hereof an affidavit shall be considered prima facie evidence that the person making the affidavit has not contrary to the provisions of this section engaged in a strike against the Government of the United States, is not a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or that such person does not advocate, and is not a member of an organization that advocates, the overthrow of the Government of the United States by force or violence: *Provided further*, That any person who engages in a strike against the Government of the United States or who is a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or who advocates, or who is a member of an organization that advocates, the overthrow of the Government of the United States by force or violence and accepts employment the salary or wages for which are paid from any appropriation contained in this Act shall be guilty of a felony and, upon conviction, shall be fined not more than $1,000 or imprisoned for not more than one year, or both: *Provided further*, That the above penalty clause shall be in addition to, and not in substitution for, any other provisions of existing law.

SEC. [626] *618*. No part of any money appropriated to the Department of Defense for the current fiscal year shall be expended under any contract (other than a contract for personal services) entered into after the enactment of this Act unless such contract provides—

(1) that the Government may, by written notice to the contractor, terminate the right of such contractor to proceed under such contract if it is found, after notice and hearing, by the Secretary of the military department with which the contract is made, or his designee, that gratuities (in the form of entertainment, gifts, or otherwise) were offered or given by such contractor, or any agent or representative of such contractor, to any officer or employee of the Government with a view toward securing a contract or securing favorable treatment with respect to the awarding or amending, or the making of any determinations with respect to the performing, of such contract: *Provided*, That the existence of the facts upon which such Secretary makes such findings shall be in issue and may be reviewed in any competent court,

(2) that in the event any such contract is so terminated the Government shall be entitled, (A) to pursue the same remedies against the contractor as it could pursue in the event of a breach of the contract by the contractor, and (B) as a penalty in addition to any other damages to which it may be entitled by law, to exemplary damages in an amount not less than three nor more than ten times (as determined by the Secretary or his designee) the costs incurred by any such contractor in providing any such gratuities to any such officer or employee.

SEC. [627] *619*. No funds appropriated in [titles II, III, IV, and V of] this Act *for military functions of the Department of Defense* shall be used for the payment in excess of 475,000 full-time graded civilian employees (including (a) the full-time equivalent of part-time employment, (b) persons who are described as "consultants" or who are compensated on a "when actually employed" basis if such persons are employed on a contract basis or are paid on a per diem basis, and (c) persons employed without compensation if they are reimbursed for expenses) at any one time during the current fiscal year.

SEC. [628] *620*. Notwithstanding any other provision of law, executive order, or regulation, no part of the appropriations in this or any other Act shall be available for any expenses of operating aircraft under the jurisdiction of the Armed Forces for the purpose of proficiency flying except in accordance with regulations issued by the Secretaries of the Departments concerned and approved by the Secretary of Defense which shall establish proficiency standards and maximum and minimum flying hours for this purpose, but not to exceed one hundred hours during the fiscal year [1954] *1955*: *Provided*, That, during the fiscal year [1954] *1955*, without regard to any provision of law or executive order prescribing minimum flight requirements, such regulations may provide for the payment of flight pay at the rates prescribed in section 204 (b) of the Career Compensation Act of 1949 (63 Stat. 802) to certain officers of the Armed Forces otherwise entitled to receive flight pay (1) who have held aeronautical ratings or designations for not less than twenty years, or (2) whose particular assignment outside the United States makes it impractical to participate in regular aerial flights.

[SEC. 629. No part of any appropriation contained in this Act shall be available for expense of transportation, packing, crating, temporary storage, drayage, and unpacking of household goods and personal effects in excess of an average of five thousand pounds net but not exceeding nine thousand pounds net in any one shipment: *Provided*, That the limitations imposed herein shall not be applicable in the case of members transferred to or serving in stations outside the continental United States or in Alaska under orders relieving them from a duty station within the United States prior to July 10, 1952, and who are returned to the United States under orders relieving them from a duty station beyond the United States or in Alaska on or after July 1, 1953.]

SEC. [630] *621*. Vessels under the jurisdiction of the Department of Commerce, the Department of the Army, the Department of the Air Force, or the Department of the Navy may be transferred or otherwise made available without reimbursement to any of such agencies upon the request of the head of one agency and the approval of the agency having jurisdiction of the vessels concerned.

[SEC. 631. (a) During the last quarter of the fiscal year 1954, no funds appropriated by this Act shall be used for the pay, compensation, or allowances of commissioned officer personnel on active duty in the Armed Forces (excluding Reserve officers on active duty training or Reserve officers and Retired officers ordered to active duty for periods of thirty days or less) in excess of the following numbers in each grade:

Ranks	Army	Navy	Air Force	Marine Corps
General of the Army or fleet admiral of the Navy	3	3		
General or admiral	9	7	9	1
Lieutenant general or vice admiral	27	24	23	5
Major general or rear admiral	170	128	152	24
Brigadier general or rear admiral	291	128	244	31
Colonel or captain of the Navy	5, 102	3, 131	4, 349	521

Major or lieutenant commander	18, 250	10, 911	20, 916	2, 620]

[(b) Vacancies within the allowances prescribed by subsection (a) of this section for any grade may be assigned to any lower grade or grades: *Provided*, That the officer of the Army now assigned as special assistant to the Comptroller, Department of Defense, shall, effective May 1, 1954, be considered to hold the grade of major general for all purposes, without regard to subsection (a) hereof, and while so serving shall receive the pay and allowances of an officer of that grade and his length of service, and when retired under any provision of law shall be advanced on the retired list to such grade and shall receive retired or retirement pay at the rate prescribed by law computed on the basis of the basic pay which he would receive if serving on active duty in such grade.]

SEC. [632] *622*. No funds contained in this Act shall be used for the purpose of entering into contracts containing article 15 of the Standard Government Contract until and unless said article is revised and amended to provide an appeal by the contractor to the Court of Claims within ninety days of the date of decision by the Department concerned, authority for which appeal is hereby granted.

[SEC. 633. None of the funds provided in this Act shall be available for training in any legal profession nor for the payment of tuition for training in such profession: *Provided*, That nothing contained in this Act shall prohibit persons now attending law courses from completing same.]

SEC. [634] *623*. Funds provided in this Act for public information and public relations shall not exceed $4,500,000.

SEC. [635] *624*. Not more than 20 per centum of the appropriations in this Act which are limited for obligation during fiscal year [1954] *1955* shall be obligated during the last two months of the fiscal year: *Provided*, That this section shall not apply to active duty training of civilian components.

[SEC. 636. The Secretary of Defense is hereby directed to submit by January 1, 1954, revised tables of organization and tables

of equipment of the Army, Navy, Air Force, and Marine Corps to the Congress, together with recommendations for decreasing the number of personnel positions, clerical positions, supply positions, and other administrative positions so that the combat effectiveness of our Armed Forces may be improved.]

SEC. [637] *625.* During the fiscal year [1954] *1955*, the agencies of the Department of Defense may accept [real property,] the use of real property[, services and commodities] from foreign countries for the [use of the] United States in accordance with mutual defense agreements or occupational arrangements *and may accept services furnished by foreign countries as reciprocal international courtesies or as services customarily made available without charge*; and such agencies may use the same for the support of the United States forces in such areas without specific appropriation therefor.

[SEC. 638. The Secretary of Defense is hereby authorized to establish during the fiscal year 1954 forty-five temporary positions in grades GS–16, 17, and 18: *Provided*, That the total number of positions in these grades available to the Department during fiscal year 1954 shall not exceed one hundred seventy-five including those otherwise authorized.]

SEC. [639] *626.* During the current fiscal year, appropriations available to the Department of Defense for research and development may be used for the purposes of section 4 of the Act of July 16, 1952 (66 Stat. 725).

[SEC. 640. No part of the funds appropriated in this or any other Act shall be available for the payment to any person in the military service who is resident of a United States Territory or possession, of any foreign duty allowances above the authorized allowances for comparable rating in the continental United States unless such person is serving in an area outside the Territory or possession of which he is a resident.]

[SEC. 641. No part of any appropriation contained in this Act shall be used for the payment of tuition or expenses for off-duty training of officers above the grade of first lieutenant in the Army, or comparable grades in the other military services.]

[SEC. 642. Limitations in enrollments, when administratively required to be applied during fiscal year 1954 to membership in the Army, Navy, or Air Force Reserve Officer Training Corps shall be in effect only as to students in the third and fourth year of collegiate training.]

[SEC. 643. Hereafter, units and headquarters of the National Guard and the Air National Guard, whether or not they are in the active service of the United States, shall have the same privilege of free transmission of official mail matter as the Department of Defense.]

SEC. [644] *627.* No part of any appropriation contained in this Act shall be available for the procurement of any article of food, clothing, cotton or wool (whether in the form of fiber or yarn or contained in fabrics, materials, or manufactured articles) not grown, reprocessed, reused, or produced in the United States or its possessions, except to the extent that the Secretary of the Department concerned shall determine that a satisfactory quality and sufficient quantity of any articles of food or clothing or any form of cotton or wool grown, reprocessed, reused, or produced in the United States or its possessions cannot be procured as and when needed at United States market prices and except procurements outside the United States in support of combat operations, procurements by vessels in foreign waters and emergency procurements or procurements of perishable foods by establishments located outside the continental United States, except the Territories of Hawaii and Alaska, for the personnel attached thereto: *Provided*, That nothing herein shall preclude the procurement of foods manufactured or processed in the United States or its possessions: *Provided further*, That no funds herein appropriated shall be used for the payment of a price differential on contracts hereafter made for the purpose of relieving economic dislocations.

[SEC. 645. Effective July 1, 1954, the following statutes or parts thereof are repealed: The second paragraph under the heading "Clothing, and Camp and Garrison Equipage", Act of March 23, 1910 (36 Stat. 243, 257; 10 U. S. C. 1283); the last proviso under the heading "Subsistence of the Army", Act of April 27, 1914 (38 Stat. 351, 361; 10 U. S. C. 1281); the last proviso under the heading "Medical Department", Act of June 12, 1906 (34 Stat. 240, 256; 10 U. S. C. 1285); the first sentence of the twelfth paragraph under the heading "Ordnance Department", Act of April 23, 1904 (33 Stat. 259, 276; 50 U. S. C. 73); that part of the proviso in the twelfth paragraph under the heading "Ordnance Department" which reads as follows "and funds arising from such sales shall be available to replace like ordnance and ordnance stores", Act of April 23, 1904 (33 Stat. 259, 276; 50 U. S. C. 65); the third paragraph under the heading "Office of the Chief Signal Officer", Act of April 27, 1914 (38 Stat. 351, 353; 10 U. S. C. 1282); the first proviso under chapter XX, Act of July 9, 1918 (40 Stat. 845, 893; 10 U. S. C. 1284); section 10, Act of June 26, 1934 (48 Stat. 1224, 1229; 31 U. S. C. 725i): *Provided*, That current applicable appropriations of the Department of Defense may be credited with moneys arising from the disposition of such supplies, goods, and materiel as are not financed under stock funds pursuant to section 405 of the National Security Act, as amended: *Provided further*, That obligations may be incurred against anticipated reimbursements to stock funds in such amounts and for such periods determined by the Secretary of Defense, with the approval of the Director of the Bureau of the Budget, to be necessary to maintain required stock levels not inconsistent with planned operations for the succeeding fiscal year, without regard to fiscal year limitations.]

SEC. [646] *628.* None of the funds appropriated by this Act may be used in the preparation or prosecution of the pending suit in the United States District Court for the Southern District of California, Southern Division, by the United States of America against Fallbrook Public Utility District, a public service corporation of the State of California, and others.

SEC. [647] *629.* None of the funds appropriated in this Act shall be used for the purchase of passenger automobiles except for replacement.

[SEC. 648. None of the funds appropriated in this Act shall be used for the expenses of operating the Armed Services Textile and Apparel Procurement Agency after December 31, 1953.]

[SEC. 649. This Act may be cited as the "Department of Defense Appropriation Act, 1954".]

[SEC. 802. None of the funds appropriated in this chapter shall be expended for payments under a cost-plus-a-fixed-fee contract for work where cost estimates exceed $25,000 to be performed within the continental United States without the specific approval in writing of the Secretary of Defense setting forth the reasons therefor.]

[SEC. 803. None of the funds appropriated in this chapter shall be expended for additional costs involved in expediting construction: *Provided*, That the Secretary of Defense, or his designee for the purpose, shall establish a reasonable completion date for each project, taking into consideration the type and location of the project, the climatic and seasonal conditions affecting the construction and the application of economical construction practices.]

[SEC. 804. None of the funds appropriated in this chapter shall be used for the construction, replacement, or reactivation of any bakery, laundry, or dry-cleaning facility in the United States, its Territories, or possessions, as to which the Secretary of Defense does not certify, in writing, giving his reasons therefor, that the services to be furnished by such facilities are not obtainable from commercial sources at reasonable rates.]

[SEC. 805. Funds appropriated to the Departments of the Army, Navy, and Air Force under the headings "Military Construction", "Alaska Communication System, Construction", "Public Works", and "Acquisition and Construction of Real Property", respectively, in fiscal year 1954 and prior years, are hereby made available for military public works authorized for such departments by any law cited in any of such appropriations or any law enacted during the 1st Session of 83d Congress: *Provided*, That not to exceed $5,000,000 of such funds appropriated to the Department of the Army, and not to exceed $1,500,000 of such funds appropriated to the Department of the Navy, shall be available for the purposes of advance planning as authorized by section 504 of the Act of September 28, 1951 (65 Stat. 364), in addition to amounts previously made available for such purpose: *Provided further*, That no funds shall be obligated under the authority contained in this section on any project authorized in the 1st Session of the 83d Congress until the Department of Defense has come into agreement with the Committees on Appropriations of the House of Representatives and the Senate.]

SEC. [806] *630.* In order more effectively to administer the funds appropriated to the Department of Defense, the President, to the extent he deems it necessary and appropriate in the interest of national defense, may authorize positions in the Department of Defense to be placed temporarily in grades 16, 17, and 18 of the General Schedule of the Classification Act of 1949 in accordance with the procedures and standards of that Act, and such positions shall be additional to the number authorized by section 505 of that Act. Under authority herein, grades 16, 17, and 18 in the Department of Defense may be increased only to the extent that the total of such grades in the Department of Defense shall not exceed [one hundred and eighty, notwithstanding the provisions of section 638 of the Department of Defense Appropriation Act, 1954] *two hundred and ten.* (*Department of Defense Appropriation Act, 1954.*)

PROGRAM AND PERFORMANCE

Military assistance in foreign countries is carried out by the Secretary of Defense under the terms of the Mutual Defense Assistance Act, as amended. These programs of military assistance are distinguished from other forms of foreign aid—and from United States participation in non-NATO international military operations—under their general title "Mutual Defense Assistance Programs."

Appropriations for implementing the mutual defense assistance programs authorized by Congress have heretofore been made to the President. Basic policy guide lines have now been established, and the legislation proposed for continuing the program beyond June 30, 1954, will constitute the basic policy guidance for transfer of material and provision of training and other support to forces of allied nations thereafter. In addition there is included in this estimate amounts for allocation to other agencies for defense support programs to certain countries to assist in covering their costs of augmented forces.

For the allied nations which have assumed military responsibilities in mutual defense projects important to

the United States, there have been programed: (*a*) materiel to complete the equipment of 143 divisions, 96 regimental combat teams, and related combat and logistic support units; (*b*) 221 Air Force squadrons; and (*c*) naval forces of 444 ships, miscellaneous smaller support craft, and 1,456 naval aircraft. These items are valued at $17,026.0 million. To date, approximately 41 percent of this amount has been shipped. To assure the optimum use of this material, 35,000 members of the forces of these friendly nations have been programed for training at a cost of $335 million. To date, approximately 29,000 students have completed training. Sufficient material to comply with section 540 of the Mutual Security Act will be held in United States custody, pending ratification of the European Defense Community Treaty.

While performance under this program has been slower than expected during much of its life, there has nevertheless been a substantial improvement in the military posture of nations allied to us. Equipment has been provided to conduct unit training and to equip forces in being in these friendly nations; technical training systems have been set up by many allies using instructors trained in American military centers to assure consistent high standards in operating, utilizing and maintaining the equipment provided.

As a result of the accomplishments of the program and the substantial progress in meeting deficiencies in the initial equipment of the very large forces brought into being and pledged to mutual security, plus the great strides made by most allied countries since the last war in attaining economic and political stability, the criteria for the program have recently been substantially revised and tightened. These revised criteria will increase the assurance that every piece of equipment provided and every possible man who is trained and equipped with United States aid will be available at the earliest possible time to take an efficient part in the defense of the free world—against both aggression from without and subversion from within. These revised program criteria will also insure that our allies assume a more self-sustaining burden of the cost of maintaining the forces created, thus implementing more fully the "mutual aid" concept of the program.

Prior appropriations for defense activities under the Mutual Defense Assistance Act, since its inception in October 1949, aggregate $18 billion, earmarked as follows:

RIVERS AND HARBORS AND FLOOD CONTROL

INTRODUCTORY STATEMENT

The Corps of Engineers improves and maintains rivers and harbors throughout the continental United States, Puerto Rico, Alaska, the Virgin Islands, and the Hawaiian Islands in the interests of navigation, control of floods, related hydroelectric power development, and allied water uses, including the protection and preservation of navigable waters.

The total appropriation requested amounts to $444.3 million, representing an increase of $21.1 million compared with the current fiscal year and a decrease of $117.6 million compared with the preceding fiscal year. The increase over fiscal year 1954 results primarily from initiation and resumption of construction on a number of small navigation and flood control improvements which represent sound Federal investments and which should no longer be deferred. Approximately 76 percent of the requested appropriation will be applied to construction and 20 percent to operation and maintenance activities.

The following appropriations shall be expended under the direction of the Secretary of the Army and the supervision of the Chief of Engineers for authorized civil functions of the Department of the Army pertaining to rivers and harbors, flood control, beach erosion, and related purposes:

GENERAL INVESTIGATIONS

General Investigations, Corps of Engineers, Civil

For expenses necessary for the collection and study of basic information pertaining to river and harbor, flood control, shore protection, and related projects, and when authorized by law, preliminary examinations, surveys and studies (including cooperative beach erosion studies as authorized in Public Law Numbered 520, Seventy-first Congress, approved July 3, 1930, as amended and supplemented), of projects prior to authorization for construction, to remain available until expended, [$2,867,500] *$2,800,000. PROGRAM AND PERFORMANCE

1. *Examinations and surveys.*—Preliminary examinations and surveys for navigation and flood-control improvements are made to determine the need and economic justification for the proposed improvements. These studies are made in cooperation with appropriate Federal and State agencies and will be restricted to a limited number of high-priority investigations.

In addition, cooperative and general beach erosion investigations are conducted. Cooperative investigations at specific localities are paid for equally by the Federal Government and by State and other local agencies. General investigations along the coasts are made entirely at Federal expense.

Special studies are made in cooperation with State and other Federal agencies in the interest of navigation, flood control, power, and related purposes. Included in this activity are the New England-New York resources survey,

[1] Number of reports opposite "Completed" are those acted upon by the Board of Engineers for Rivers and Harbors or the Beach Erosion Board.

2. *Collection and study of basic data.*—Funds are made available to the Weather Bureau for hydrometeorological studies and for the hydrologic network of precipitation stations and to the Geological Survey for installation, operation, and maintenance of stream gaging stations. Funds are also made available to the Fish and Wildlife Service to investigate the effect of flood control and river and harbor projects of the Corps of Engineers upon fish and wildlife and to recommend corrective measures. Flood studies are made to provide essential general data for use in future design and operation of projects and for flood fighting.

PROGRAM AND PERFORMANCE

The appropriation requested for this activity amounts to $308.3 million and represents an increase of $29.6 million compared with the current fiscal year and a decrease of $101.0 million compared with the preceding fiscal year. Nineteen new projects or project modifications are proposed for initiation with the requested appropriation and one project proposed for initiation in fiscal year 1954 will be continued.

The monetary authorization available for appropriation after fiscal year 1955 for projects in the "Construction, general, Corps of Engineers, civil" program amounts to $3,718.7 million. The status of the active program on June 30, 1953, is shown on the following table. The number and total cost of projects shown as "Balance authorized" includes parts of approved comprehensive basin plans for which monetary authorization for construction is not yet available.

[1] Uncompleted projects in the active program for which construction funds have been appropriated. Includes 84 projects or project modifications having no funds presently available for expenditure.
[2] Includes authorized modifications of original projects.
[3] Excludes snagging and clearing and emergency flood protection works.
[4] Excludes projects tentatively classified as "Inactive" or "Deferred for restudy."

1. *Advance engineering and design.*—Design studies are made to establish project features and cost estimates and contract plans are prepared for construction. The requested appropriation amounts to $2.5 million compared with an appropriation of $1.9 million in 1954 and $1.3 million in 1953. The funds requested will be applied to a small number of high priority projects some of which will be brought to the stage where they would be ready for construction.

2. *Navigation and shore protection projects.*—This activity includes improvement of channels and harbors for navigation by dredging, construction of breakwaters, jetties, dikes, locks, dams, and canals; and construction of groins and other structures for shore protection. The requested appropriation of $36.7 million represents an increase of $12.7 million compared with the current fiscal year and an increase of $3.8 million compared with the preceding fiscal year.

With the requested appropriation, work will be continued on eight channel and harbor projects, of which two will be completed, and on four lock, dam, and canal projects, of which one will be substantially completed. Work will also be continued on the Green River Locks and Dams Nos. 1 and 2, Kentucky, scheduled for initiation in fiscal year 1954. Construction will be initiated or resumed on sections of eight channel and harbor projects and modifications, and one lock and dam. The channel and harbor projects are Redwood City Harbor, Calif.; Housatonic River, Conn.; Calumet Harbor and River, Ill. and Ind.; Portland Harbor, Maine; Duluth-Superior Harbor, Minn. and Wis.; Port Aransas-Corpus Christi Waterway-Tule Lake extension, Texas; Atlantic Intracoastal Waterway-Fairfield drainage district, N. C.; and Missouri River-Omaha to Sioux City, Iowa and Nebr. The first six are deep-draft river and harbor projects. The funds requested for the Missouri River-Omaha to Sioux City will initiate construction of bank stabilization measures in the immediate vicinity of the bridge between Decatur, Nebr., and Onawa, Iowa. The work to be initiated on the Atlantic Intracoastal Waterway-Fairfield drainage district will provide improved drainage and prevent salt-water intrusion resulting from prior construction activities on the waterway. It is anticipated that this work and the features to be initiated at Redwood City Harbor and Calumet Harbor and River will be completed with the funds requested. The lock and dam project to be initiated is the Warrior Lock and Dam, Alabama, which will replace two obsolete locks.

3. *Flood control projects.*—This activity includes local protection projects and flood-control reservoirs without power installations. Local protection projects consist of construction of channel improvements, levees, and floodwalls.

Provision is made for the removal of accumulated snags and other debris and the clearing and straightening of channels in navigable streams and tributaries when such work is necessary in the interest of flood control. Provision is also made for the construction of small flood-control projects not specifically authorized by Congress.

The requested appropriation of $61.7 million for flood-control projects represents an increase of $17.5 million compared with the current fiscal year and a decrease of $34.4 million compared with the preceding fiscal year. Construction will be continued on 41 projects, of which 9 will be substantially completed in fiscal year 1955. Eight new local protection projects will be initiated and work on two flood control reservoir projects will be resumed. Included in this group of projects is Little Missouri River below Murfreesboro, Ark.; Anacostia River, D. C. and Md.; Kawainui Swamp, T. H.; Beardstown, Ill.; Barbourville, Ky.; Adams, Mass.; Batavia, N. Y.; Johnsonburg, Pa.; Coralville Reservoir, Iowa; and Dillon Reservoir, Ohio. The amount requested for Little Missouri River will provide for completion of that project. Of the new appropriation, 50 percent will be used to finance the work on 10 major projects as shown on the following table:

4. *Multiple-purpose projects including power.*—With the requested appropriation of $206.1 million, construction will be continued on 16 multiple-purpose projects with power installations. This represents a decrease of $0.7 million compared with the current fiscal year and a decrease of $70.0 million compared with the preceding fiscal year. Five multiple-purpose projects with power will be substantially completed in fiscal year 1955. Of the new appropriation, 95 percent will be used to finance the work on 13 major projects as shown on the following table:

5. *Lower Columbia River fish sanctuary program.*—A plan to counteract the expected damage to the fisheries resulting from the construction of major dams has been developed by the Fish and Wildlife Service together with the fisheries departments of the States of Oregon and Washington. The program consists of stream improvements, transplanting of salmon runs to improved streams, and the construction of additional hatcheries. Funds in the amount of $1.36 million are included for allocation to the Fish and Wildlife Service to continue this program.

NOTE.—In the course of any one fiscal year loans are made between projects already under construction to permit most effective use of funds on projects approved by Congress. These loans are returned to source upon availability of the next year's appropriations. Negative amounts as used in this tabulation result from adjustments of these loans applied to unobligated balances and are not an indication that total allotments to the project are overobligated.

1954 and a decrease of $8.6 million compared with fiscal year 1953.

1. *Navigation.*—Operation and maintenance funds are proposed for use in fiscal year 1955 on 172 channel and harbor projects, 25 canals and canalized waterways and 3 reservoir projects. Surveys of the northern and northwestern lakes to obtain data for charts and bulletins essential for safe navigation will be continued.

2. *Flood control.*—Ninety-nine flood control reservoirs will be operated and maintained in fiscal year 1955. Provision is made for periodic inspections of completed flood control projects to determine adequacy of compliance by local interests with prescribed maintenance requirements.

3. *Multiple-purpose projects, including power.*—The facilities of 28 multiple-purpose projects with an actual installed capacity at the end of fiscal year 1955 of 3,313,400 kilowatts will be operated and maintained. The request provides for initial operations at two of the projects.

4. *Lower Columbia River fish sanctuary program.*—Funds are allocated to the Fish and Wildlife Service for operation and maintenance of hatcheries and other facilities of this program.

PROGRAM AND PERFORMANCE

1. *Construction.*—Provision is made for flood protection of the lower Mississippi Valley from Cape Girardeau, Mo., to the Gulf of Mexico, including the main alluvial stream, the basins of the St. Francis and White, lower Arkansas, Yazoo, Tensas, Atchafalaya Rivers, and Bayou La Fourche, and the alluvial lands around Lake Pontchartrain. The adopted plan calls for raising and strengthening about 1,600 miles of existing levees along the main river, for enlarging or constructing some 1,700 miles of levees on tributaries and in side basins, for channel improvements and bank stabilization on the main river, for dredging of the main river to provide a navigation channel 12 feet deep and 300 feet wide from Baton Rouge, La., to Cairo, Ill., and for five flood-detention reservoirs on minor tributaries.

The total authorization for flood control and improvement of the lower Mississippi River in its alluvial valley is $1,292.7 million, of which $812.1 million has been appropriated through June 30, 1953.

The total appropriation requested for construction amounts to $30.2 million and provides for continuation of the several features of the adopted project including local protection at Lake Pontchartrain, La. This represents a decrease of $6.4 million compared with the current fiscal year and a decrease of $14.8 million compared with the preceding fiscal year.

With the expenditure of funds requested for fiscal year 1955, the main river levees will be about 78 percent complete, main river-bank stabilization will be about 69 percent complete, and progress will continue on the side basins and on minor tributaries.

2. *Maintenance.*—The total appropriation requested for maintenance amounts to $15.0 million, which is $0.2 million more than the amount appropriated for the current fiscal year and $0.2 million more than appropriated for the preceding fiscal year.

PROGRAM AND PERFORMANCE

A treaty with Canada covering uses of the water of the Niagara River was ratified by the United States Senate on August 9, 1950. This treaty provides for greater power development in the United States and Canada and for works to preserve and enhance the beauty of Niagara Falls under the new conditions. In article II of this treaty the United States and Canada agreed to complete, within 4 years after approval of plans to be recommended by the International Joint Commission, the remedial works which are necessary to enhance the beauty of the falls. The cost of the remedial works are to be divided equally between the United States and Canada. The plans for the remedial works have been approved and a supplemental appropriation act for fiscal year 1954 provided an initial appropriation of $1.5 million for financing the United States share of the cost. The amount of $2.0 million is included to finance the United States share of this project in fiscal year 1955.

PROGRAM AND PERFORMANCE

The Ryukyus Islands are the remaining responsibility under this appropriation. Under the Treaty of Peace with Japan, the United States is empowered to continue to exercise all and any powers of administration, legislation, and jurisdiction over the territory and inhabitants of the Ryukyus Islands. A system of military bases and other installations pertinent to the defense of the Pacific area has been developed in the islands. Since they are of critical strategic importance to the security of the free world, it is expected that the United States will be responsible for their administration for an indefinite period.

To discharge its responsibilities, funds are requested for the following:

1. *Administration.*—This provides for administrative costs in the Ryukyus Islands, and in the Office of Civil Affairs and Military Government in the Department of the Army.

2. *Civil information and education.*—Provision is made for a program of information and education in the Ryukyus Islands conducted through local governmental units, and for advanced study of Ryukyuan students and leaders in the United States.

3. *Aid to Ryukyuan economy.*—To support and maintain economic and political stability, provision is made for a grant to the local Government which will (*a*) compensate indirectly for the cost of extraordinary governmental services provided for the benefit of activities of the United States, (*b*) contribute to restoration of war damage to schools, and (*c*) provide capital to finance rehabilitation projects which will strengthen the economy of the Islands.

PROGRAM AND PERFORMANCE

This fund consists of receipts from fines, forfeitures, and stoppages of pay of regular enlisted personnel of the Army and Air Force, withholding of 10 cents per month from the pay of such personnel, estates of deceased soldiers, other receipts, consisting largely of miscellaneous sales, and interest of 3 percent on the fund balance. The receipts and the balance are available for obligation and expenditure only when appropriated from the fund by Congress.

Maintenance and Operation, United States Soldiers' Home (Trust Fund)
Capital Outlay, United States Soldiers' Home (Trust Fund)

For maintenance and operation of the United States Soldiers' Home, to be paid from the Soldiers' Home permanent fund, [$4,655,000] *$5,134,000*, of which [$529,000] *$1,284,000* shall remain available until expended for [the] *plans and* construction of buildings and facilities[, and $525,000 shall remain available until expended for renovation and expansion of existing boiler plant]: *Provided*, That this appropriation shall not be available for the payment of hospitalization of members of the Home in United States Army hospitals at rates in excess of those prescribed by the Secretary of the Army, upon the recommendation of the Board of Commissioners of the Home and the Surgeon General of the Army. PROGRAM AND PERFORMANCE

The United States Soldiers' Home provides medical and domiciliary care and other authorized benefits for the relief and support of certain old, invalid, or disabled soldiers of the Regular Army and Air Force of the United States. Funds for maintenance and operation of the home are appropriated from the Soldiers' Home permanent fund and not from the general fund of the Treasury.

1. *Medical care.*—As part of the home, there is maintained a hospital which will care for a daily average of 400 patients during fiscal year 1955. In addition, 77 patients will receive specialized care in other Government hospitals.

2. *Domiciliary care.*—An average of 1,332 members will receive domiciliary care.

3. *Administration and central services.*—Included in this activity are all service functions for the home, such as administration, supply, utility services, maintenance, transportation, laundry, and the domiciliary mess.

4. *Permanent improvements.*—The new domiciliary building and hospital nursing unit are expected to be in full operation throughout 1955, but the 1951 supplemental appropriation of $12,750,000 and $529,000 in the regular 1954 appropriation will not be sufficient to complete other authorized projects. Included in the estimate are $1,264,000 for previously authorized projects and expansion of the new hospital to house patients and facilities now in an antiquated building, and $20,000 for preliminary plans for a new service area.

PROGRAM AND PERFORMANCE

This appropriation provides for the usual functions of government and public health, including civil administration, schools, police and fire protection, library, courts, highways and sewers, hospitals and other health services, security operations, and the operation of the Canal Zone postal system.

The proposed increase in appropriation is needed to care for military patients being shifted from military to Canal Zone Government hospitals.

The 1926 agreement with the Republic of Panama provided that the Panama Canal perform garbage collection, garbage disposal, and street cleaning in the terminal cities of Panamá and Colón. At the request of the Republic of Panama, that agreement was terminated on June 30, 1953. The estimates for 1954 and 1955 give effect to the discontinuance of these services.

Pursuant to section 106 of the Civil Functions Appropriation Act, 1954, charges will be made against employees of the Canal Zone Government and the Panama Canal Company for medical and hospital care after December 31, 1953.

The appropriation request is based on gross requirements. All revenues received, including the payment by the Panama Canal Company for the net accrued cost of the operations of Canal Zone Government, are for deposit into the Treasury as miscellaneous receipts.

REVOLVING AND MANAGEMENT FUNDS

PUBLIC ENTERPRISE FUNDS

DEPARTMENT OF THE ARMY

Defense Production Guarantees, Army

PROGRAM AND PERFORMANCE

Guarantees are authorized on loans made by private and public financing institutions to facilitate performance of defense production contracts. Revenues from guaranty fees and interest on purchased loans are used to pay administrative expenses and to purchase, when necessary, guaranteed portions of loans. Net earnings are currently being retained to meet possible future losses. From time to time and at the conclusion of the guaranteed loan program, funds in excess of determined requirements will be transferred to "Miscellaneous receipts of the Treasury." Advances from appropriations available for procurement may be made to this fund for its temporary use (sec. 301, Defense Production Act of 1950, as amended).

PURPOSE AND FINANCIAL ORGANIZATION

The Panama Canal Company is a wholly owned Government corporation operating and maintaining the Panama Canal and necessary supporting facilities. The Company is authorized to obtain appropriations for its capital needs and to cover losses, and may borrow up to $10,000,000 without interest from funds deposited by it with the Treasury under the provisions of Public Law 808, 80th Congress.

The valuation, required by law, of the Panama Canal net assets transferred to the Company under the recent reorganization was begun in December 1952. The cost of significant additions and betterments to the waterway and harbors that were expensed in prior years has been determined, and verification of the proper inclusion of all other major assets in the plant accounts transferred from the Panama Canal has been completed, although all values have not yet been fully verified. In addition, depreciation accruals from 1914 to date have been computed for the major portion of fixed assets heretofore classified as undepreciable which the Company now believes are properly classifiable as depreciable. Under the law, the Director of the Bureau of the Budget must approve the transfer valuations ultimately adopted, and since he has not had an opportunity to review and pass on the foregoing major adjustments and changes in the tentative valuations recently developed by the Company, no effect has been given to them in the 1955 budget document.

As a result the fixed asset values and the investment of the United States Government shown on the accompanying balance sheets and interest and depreciation accruals reported as charges to operations since July 1, 1951, are subject to possible substantial adjustments.

ANALYSIS OF BUDGET PROGRAMS

The operations of the Company have been grouped into (1) canal and related marine operations; (2) auxiliary and supporting service operations consisting of commercial activities, employee services, and other supporting services; and (3) general corporate charges.

Canal and related marine operations.—This covers the maintenance and operation of the canal, marine harbor services, ferry service across the canal, and cost of existing obligations under treaty with the Republic of Panama.

Funds to be applied to acquisition of assets in 1955 amount to $2,205,500 and are mainly to provide for continued widening of a portion of the channel in Gaillard cut from 300 feet to 500 feet, $1,213,300 (expenditures of this nature had previously been charged to operating expenses); beginning a project to increase the dependable capacity of the present canal, $500,000; and conclusion of replacement of locks electrical facilities, $242,000. Locks overhaul expenditures in 1955 consist of work preliminary to the regularly scheduled general overhaul of the Atlantic locks in 1956.

Operating expenditures estimated for this program for 1955 amount to $13,108,200, or approximately the same as 1954.

Commercial.—This consists of marine bunkering and cargo handling, and the operation of the transisthmian railroad, a steamship line between New York and the Canal Zone, and a hotel in Colón, R. P.

Funds to be applied to acquisition of assets in 1955 amount to $738,600 chiefly to provide for replacement of 50 freight cars and to start replacement of electrical facilities on the terminal piers.

Operating expenditures are estimated at $11,141,800 in 1955, practically the same as in 1954.

Employee services.—This covers the providing of housing, commissary, and other essential service facilities to employees.

Funds to be applied to acquisition of assets amount to $2,681,030 in 1955, consisting primarily of continued replacement of housing and of operating equipment for commissary plant.

Operating expenditures which consist chiefly of cost of goods sold are estimated at $27,842,400 in 1955, as compared to $28,201,500 in 1954.

Other supporting services.—This comprises the operation of facilities serving all activities of the Company, and includes such functions as utilities, operation of repair facilities, warehousing and engineering services. These facilities also serve the Armed Forces, employees, and others as required.

Funds to be applied to acquisition of assets amount to $1,801,400 in 1955, mainly to provide for beginning conversion of the power system from 25 cycle to 60 cycle, $612,000; completion of a 30-inch water main, $423,000; booster water pump station, $60,000; continued replacement of motor vehicles, and office, shop, and telephone equipment.

Operating expenditures are estimated at $17,710,300, or about $250,000 over those in 1954.

General corporate charges.—Under this heading are included reimbursements to the Treasury for the net cost of Canal Zone Government and interest, and other general corporate expenses, including administrative expenses under statutory limitation.

Funds to be applied to acquisition of assets in 1955 amount to $75,000 for purchase of electric bookkeeping machines. Other expenditures are estimated at $22,072,600 in 1955, or approximately the same as in 1954.

FINANCING OPERATIONS

In 1953 funds provided by operations exceeded funds applied by $10.5 million. In 1954 and 1955, funds provided are estimated to exceed funds applied by $2.2 and $0.8 million, respectively. The drop in 1955 results from the estimated decline in tolls and other revenues in that year, offset in part by reduced expenditures.

OPERATING RESULTS AND RETAINED EARNINGS

During fiscal year 1953 oceangoing traffic through the Panama Canal attained the highest level in history. Tolls revenues from commercial vessels were some 15 percent greater than the previous record year of 1929. In addition, traffic in the tolls credit class was at an extremely high level, being exceeded only by the war years 1944 through 1946. Total traffic and tolls earnings were sharply up approximately 23 percent from fiscal year 1952 records.

The rate of growth of traffic during the past 2 years is considered to have been due in great measure to the effect of the Korean operations and abnormal political and economic conditions generally. With the cessation of hostilities in Korea it is anticipated that for the next few years there will be some decline from the fiscal year 1953 peak and that the traffic levels thereafter will resume the gradual long-term rate of increase rather than the accelerated rate resulting from the Korean conflict.

General corporate charges have been apportioned in the aggregate between (1) the canal and related marine operations and (2) the auxiliary and supporting service activities as a whole. The latter group has been assessed with a share of these common expenses to the extent that the revenue and distribution credits of each activity exceed the corresponding direct operating costs. The balance of the general charges has been applied against the Company's major mission—the canal and related marine operations—except for certain nonoperating charges in 1953 which are general losses not applicable to the operating activities of the Company.

The net income reported and projected for the canal and related marine operations is subject to possible substantial adjustment as the result of important changes now being considered in the valuation of capital assets and other possible changes referred to in the opening section of this statement. These possible adjustments may reduce net income or increase loss applicable to the canal by as much as $1 to $2 million per year.

The Company will submit during the present session of Congress, an analysis of projected canal traffic volume and expenses which will indicate whether or not the present rate of canal tolls should be changed in the near future. The study will use depreciation and interest accruals based on more definitive property valuations than were available when the present budget was prepared and may

involve somewhat different methods of cost and expense allocation than have been tentatively used thus far.

Substantial amounts of retained earnings of the Company have been invested over the years in plant and equipment. Although the Company foresees the need in the next 3 to 5 years for replacement of important facilities, it will limit accumulation of funds for such purpose and, to the extent it safely can, will return funds to the Treasury with the intention of requesting appropriations to finance capital projects when necessary. A contemplated repayment to the Treasury in the amount of $10 million has been included in the budget program for 1955.

PROGRAM AND PERFORMANCE

Guarantees are authorized on loans made by private and public financing institutions to facilitate performance of defense production contracts. Revenues from guarantee fees and interest on purchased loans are used to pay administrative expenses and to purchase, when necessary, guaranteed portions of loans. Net earnings are currently being retained to meet possible future losses. From time to time and at the conclusion of the guaranteed loan program, funds in excess of determined requirements will be transferred to "Miscellaneous receipts of the Treasury."

PROGRAM AND PERFORMANCE

The fund provides for the ownership, operation, and maintenance of plant, equipment, buildings, shops, storehouses, supplies, and materials, and other assets used in connection with the planning, construction, operation, and maintenance of projects. The fund also serves as a means of financing the procurement of commonly required items, initial payment of distributable general and engineering expenses, and financing of reimbursable work for other Government agencies, elements of the Department of the Army, and private persons. The centralization and financing of these transactions makes it possible to handle through a single fund, bills for such purchases, services, or payrolls regardless of the appropriation or project finally served. Likewise, it permits the accumulation of deferred charges or unapplied costs for application to the appropriation ultimately receiving the benefits of the services. The expenses of the fund are reimbursed by the appropriations which finance the projects using the services, materials, equipment, or facilities.

GENERAL PROVISIONS—Continued

cates, or who is a member of an organization that advocates, the overthrow of the Government of the United States by force or violence and accepts employment the salary or wages for which are paid from any appropriation or fund contained in this Act shall be guilty of a felony and, upon conviction, shall be fined not more than $1,000 or imprisoned for not more than one year, or both: *Provided further,* That the above penalty clause shall be in addition to, and not in substitution for, any other provisions of existing law.

SEC. 103. No part of any appropriation contained in this Act shall be used directly or indirectly, except for temporary employment in case of emergency, for the payment of any civilian for services rendered by him on the Canal Zone while occupying a skilled, technical, clerical, administrative, executive, or supervisory position unless such person is a citizen of the United States of America or of the Republic of Panama: *Provided, however,* (1) That, notwithstanding the provision in the Act approved August 11, 1939 (53 Stat. 1409) limiting employment in the above-mentioned positions to citizens of the United States from and after the date of approval of said Act, citizens of Panama may be employed in such positions; (2) that at no time shall the number of Panamanian citizens employed in the above-mentioned positions exceed the number of citizens of the United States so employed, if United States citizens are available in continental United States or on the Canal Zone; (3) that nothing in this Act shall prohibit the continued employment of any person who shall have rendered fifteen or more years of faithful and honorable service on the Canal Zone; (4) that in the selection of personnel for skilled, technical, administrative, clerical, supervisory, or executive positions, the controlling factors in filling these positions shall be efficiency, experience, training, and education; (5) that all citizens of Panama and the United States rendering skilled, technical, clerical, administrative, executive, or supervisory service on the Canal Zone under the terms of this Act (a) shall normally be employed not more than forty hours per week, (b) may receive as compensation equal rates of pay based upon rates paid for similar employment in continental United States plus 25 per centum; (6) this entire section shall apply only to persons employed in skilled, technical, clerical, administrative, executive, or supervisory positions on the Canal Zone directly or indirectly by any branch of the United States Government or by any corporation or company whose stock is owned wholly or in part by the United States Government: *Provided further,* That the President may suspend from time to time in whole or in part compliance with this section if he should deem such course to be in the public interst.

SEC. 104. The Governor of the Canal Zone is authorized to employ services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a), in an amount not exceeding $15,000: *Provided,* That the rates for individuals shall not exceed $100 per diem.

[SEC. 105. Amounts expended by the Panama Canal Company in maintaining defense facilities in standby condition for the Department of Defense, and amounts expended by the Canal Zone Government in providing school and hospital services for agencies of the United States other than the Panama Canal Company and the Canal Zone Government hereafter shall, notwithstanding any other provision of law, be fully reimbursable to the Panama Canal Company or to the Canal Zone Government, as the case may be, by such other agencies.]

[SEC. 106. No part of the funds of the Canal Zone Government or the Panama Canal Company shall be used after December 31, 1953, for providing free medical and hospital care to employees of the Panama Canal Company or the Canal Zone Government.]

[SEC. 107. No part of the funds of the Panama Canal Company or the Canal Zone Government shall be available hereafter for payment of military personnel assigned to the Panama Canal Company or the Canal Zone Government in excess of their military pay: *Provided,* That this section shall not apply to those officers serving as Governor of the Canal Zone and President, Panama Canal Company and as Lieutenant Governor of the Canal Zone.] (*Civil Functions Appropriations Act, 1954.*)

PROPOSED FOR LATER TRANSMISSION

Construction, general, Corps of Engineers, civil (under existing legislation, 1954).—Funds are required in fiscal year 1954 to initiate reconstruction of Locks and Dams 1 and 2 on the Green River, Ky., so that the waterway will be ready to handle increased coal shipments scheduled to begin in April 1956 to plants producing steam electric power for the Atomic Energy Commission.

ANALYSIS OF EXPENDITURES

PROGRAM AND PERFORMANCE

The laws enforced by the Administration are designed to protect consumers against adulterated and misbranded foods, drugs, cosmetics, therapeutic devices, and caustic poisons. Control is exercised through factory and warehouse inspections and examinations of interstate and import shipments.

1. *General enforcement operations.*—Inspections of domestic plants and examinations of interstate shipments are planned according to the relative incidence and seriousness of probable violations. This involves about 96,000 manufacturers, shippers, and warehouses. In addition, a vast number of retail establishments are subject to the prohibition against adulteration or misbranding of articles from interstate sources. Violations are reported to the Department of Justice with appropriate recommendations for legal action. Voluntary compliance with the law is promoted by every proper means, including warnings about conditions observed during inspection that may result in violations. Many corrections are thus effected without court action. Standards for foods, and tolerances for poisonous substances in foods, and other required regulations are promulgated after investigations and formal hearings. All enforcement operations, both import and domestic, are necessarily restricted and are performed on a highly selective basis.

PROGRAM AND PERFORMANCE

Affiliated with Howard University as the teaching hospital for the university's medical school, this hospital furnishes patient care and trains physicians at the undergraduate level, nurses, and other professional and technical personnel.

Operation of the hospital is financed by receipts from pay patients, reimbursements from the District of Columbia and nearby counties for care of indigent residents, and a direct appropriation. The reduction proposed for 1955 reflects an increase in income from pay patients.

PROGRAM AND PERFORMANCE

This university, operated primarily for the education of Negroes, consists of an undergraduate college, a graduate school offering the master's degree, and eight professional schools. Federal funds provide approximately 51 percent of the operating costs.

1. *General administration.*—The university is administered by a private board of trustees and staff of officers.

2. *Resident instruction and departmental research.*—This activity includes all direct expenditures for the operation of the educational program in the 10 schools and colleges.

3. *General library.*—The general library serves the needs of 10 schools and colleges, and supervises, in part, the professional collections on the campus.

4. *Operation and maintenance of physical plant.*—The operation and maintenance staff services 44 buildings located on the university's 59.8-acre campus.

5. *Auxiliary enterprises and noneducational expense.*—The dormitories, food services, bookstores and athletic program included under this activity are intended to be self-supporting and render service at lowest possible cost. The noneducational expense covers cost of the student-aid program.

PROGRAM AND PERFORMANCE

Appropriated funds or contract authorizations have been made available for 9 buildings and 3 alteration projects. Of the 9 building projects, 2 have been completed and 3 are now under construction. Construction of the remaining four buildings has been delayed indefinitely due to the current need for economy. Of the 3 alteration projects, 1 is completed and 2 are expected to commence during the current fiscal year. The 1955 budget requests funds for the new preclinical medical building and for the construction of facilities to permit the use of commercial electric power.

Total obligations	3,009,389	2,952,100	3,130,000

PROGRAM AND PERFORMANCE

1. *Development of vocational education.*—The States are given assistance in the appraisal and development of their programs.

2. *School assistance in federally affected areas.*—Applications for school construction and school operation expenses in areas where facilities are burdened by Federal activities are examined and acted upon. A small increase is budgeted in 1955 to provide necessary expenses for processing applications and conducting field investigations on construction projects.

3. *Services to State and local school systems.*—Studies are conducted and publications issued on subjects of school administration, instruction and organization of elementary and secondary schools, school and college libraries, visual education, and educational uses of radio. Consultative and advisory services are provided to Federal, State, local, and professional bodies. A substantial part of the increase is proposed to strengthen these fundamental responsibilities.

4. *Services to higher educational institutions.*—Studies are conducted and publications issued dealing with the improvement of higher education. Consultative and advisory services and cooperative relationships are maintained with Federal, State, and local agencies. A small increase is needed to strengthen these basic services.

5. *International educational programs.*—Information is developed and disseminated to the educational systems of other countries; procedures are established for the international exchange of educational personnel; and a foreign student exchange program is administered in cooperation with the Department of State. A small increase is proposed in recognition of the growing demands for service in the international education field.

6. *Program development and coordination.*—Educational trends and needs are determined as a basis for studies to be undertaken. Consultative and advisory services are provided to program offices, and program plans are reviewed and coordination effected. Further assistance is provided through statistical reporting and analysis service and advisory and consultative services in the preparation and distribution of manuscripts, periodicals, reports, and other materials useful to educational personnel. The increase requested is needed to provide a more adequate statistics and publications service.

7. *Administration.*—The increase is to provide for consulting services of leading educators on complex educational problems and for added penalty mail costs.

PROGRAM AND PERFORMANCE

Payments are made for operating expenses of schools in districts overburdened by Federal activities. The budget for 1955 provides a decrease of $8,000,000 because certain restrictive amendments to Public Law 874, enacted at the last session of Congress, become effective July 1, 1954. A supplemental appropriation of $6,000,000 is anticipated for 1954 because other amendments, liberalizing in character, were made effective on July 1, 1953.

PROGRAM AND PERFORMANCE

Grants are made for school construction in districts overburdened by Federal activities. The provisions of Public Law 815 as amended authorize no additional eligibility after fiscal year 1954 and no appropriations after the fiscal year 1955. The budget for 1955 provides the remaining amounts to pay for the most urgent needs of the eligible school districts.

OFFICE OF VOCATIONAL REHABILITATION

Payments to States (Including Alaska, Hawaii, and Puerto Rico), Office of Vocational Rehabilitation

Payments to States (including Alaska, Hawaii, and Puerto Rico): For payments to States (including Alaska, Hawaii, and Puerto Rico) in accordance with the Vocational Rehabilitation Act, as amended (29 U. S. C., ch. 4), including payments, in accordance with regulations of the Secretary, for one-half of necessary expenditures for the acquisition of vending stands or other equipment in accordance with section 3 (a) (3) (C) of said Act for the use of blind persons, such stands or other equipment to be controlled by the State agency, [$23,000,000] *$19,175,000*, of which not to exceed [$195,000] *$160,000* shall be available to the Secretary for providing rehabilitation services to disabled residents of the District of Columbia, as authorized by section 6 of said Act, which latter amount shall be available for administrative expenses in connection with providing such services in the District of Columbia: *Provided*, That not to exceed 15 per centum of the appropriation shall be used for administrative purposes: *Provided further*, That [after payment of amounts certified to be due for prior fiscal years,] the funds herein appropriated shall be apportioned among the States in accordance with regulations promulgated by the Secretary to insure equitable maintenance and improvement of State programs; and the obligation of the United States to any State under such Act for fiscal year [1954] *1955* shall not exceed the amount so apportioned to such State: *Provided further*, That the amount apportioned to a State for fiscal year 1955 shall not exceed one dollar for each 75 cents contributed by the State for the same purpose.

Payments to States (including Alaska, Hawaii, and Puerto Rico), next succeeding fiscal year: For making, after May 31, of the current fiscal year, payments to States in accordance with the Vocational Rehabilitation Act, as amended (including the objects specified in the preceding paragraph), for the first quarter of the next succeeding fiscal year such sums as may be necessary, the obligations incurred and the expenditures made thereunder to be charged to the appropriation therefor for that fiscal year: *Provided*, That the payments made pursuant to this paragraph shall not exceed the amount paid to the States for the first quarter of the current fiscal year. (*Departments of Labor and Health, Education, and Welfare Appropriation Act, 1954.*)

Obligations incurred	22,333,374	23,085,000	19,295,000

PROGRAM AND PERFORMANCE

Grants are made to assist the States in preparing disabled persons for suitable remunerative employment. The 1955 estimate proposes a reduction of $3,825,000 based on estimated State fund availability and the requirement of the 1954 Appropriation Act that each dollar of Federal funds must be matched by 75 cents of State funds.

1. *Purchase of case services.*—Case services are purchased for disabled clients. The $8.5 million provided for this function in 1955 will enable the States to purchase such services for about 90,000 disabled persons.

2. *Counseling, guidance, and placement services.*—State rehabilitation agencies will provide these services to about 221,111 disabled clients in 1955, as compared with 236,462 in 1954.

3. *State administration.*

PUBLIC HEALTH SERVICE

INTRODUCTORY STATEMENT

The Service attends to the Federal interest in safeguarding public health by: Providing grants-in-aid and technical and consultative services to States for such public health services as the prevention and control of disease, and hospital planning and construction; conducting scientific research and investigations in biology and medicine; enforcing foreign and interstate quarantine regulations; collecting and disseminating information on health problems; and providing medical and hospital care for legal beneficiaries. To perform these major functions the Service is organized into four bureaus: The National Institutes of Health in the research and investigations area; the Bureau of State Services in the Federal-State cooperative health program area; the Bureau of Medical Services in the medical care, hospital, and foreign quarantine area; and the Office of the Surgeon General in the area of administration, formulation of general policy, and planning.

For necessary expenses in carrying out the Public Health Service Act, as amended (42 U. S. C., ch. 6A) (hereinafter referred to as the Act), and other Acts, including expenses for active commissioned officers in the Reserve Corps and for not to exceed one thousand five hundred commissioned officers in the Regular Corps, as follows: (*Departments of Labor and Health, Education, and Welfare Appropriation Act, 1954.*)
