INTRODUCTION

Pursuant to the provisions of 31 U. S. C. 11 and other applicable laws, the budget for the fiscal year 1955 contains the President's recommendations for the work program and financial program of the Government for the 12 months beginning July 1, 1954, and ending June 30, 1955. It also presents comparable information for the fiscal years 1953 (actual) and 1954 (partly actual and partly estimated).

The material in the budget covers both groups of funds administered by agencies of the Government—Federal funds (owned by the Government), and trust and deposit funds (held in trust or in suspense by the Government), although only the Federal funds are included in the budget totals.

The budget document consists of the President's Budget Message and four parts which contain summary tables, detailed data, and special analyses.

In the Budget Message, which is presented in two parts (pp. M5 through M104), appear the general statement of the President's financial program and an outline of his major recommendations.

Part I of the document (pp. A1 through A17) contains nine summary tables on Federal funds and on the public debt. Each of these tables is designed to bring together in one or two pages some overall aspect of the Federal budget.

Part II (pp. 1 through 1008) contains the details of the budget for Federal funds, including various types of tables and schedules, explanatory statements of the work to be performed and the money needed, and the text of the language proposed for enactment by Congress on each item of authorization. This part also includes material on funds of the municipal government of the District of Columbia, and a few other trust funds which require congressional action. It is divided into chapters for the major organization units of the Government.

Part III (pp. 1009 through 1096) contains summary tables on trust funds (including a figure for each year on net deposit fund expenditures), detailed schedules and explanatory statements on the various trust funds, and memorandum information on consolidated working funds which are established to account for certain advances from one agency to another for interagency services.

Part IV (pp. 1097 through 1168) contains special analyses of budget data and Federal programs. Some of these give details for certain summary figures appearing in part I—for example, a classification of budget receipts by source, and a classification of budget expenditures according to functions and subfunctions. Several of the other special analyses in part IV contain materials which cut across the entire Federal program.

An appendix, printed separately, contains more detailed information on personal services by grade and title, and repeats schedules of obligations by objects from part II of the budget.

Introductory statements at the beginning of each part give further explanations of budget format. The introduction to part I (pp. A3 and A4) summarizes some of the more important facts with respect to the structure of the budget system, the concept of the budget surplus and deficit, types of authorizations and the meaning of some of the terms used in the budget.

BUDGET MESSAGE OF THE PRESIDENT

To the Congress of the United States:

I am transmitting herewith the Budget of the United States for the fiscal year ending June 30, 1955.

The budget message is divided into two parts. The first part is a general statement summarizing the budget and a number of its most important aspects. The second part includes pertinent details of my tax and legislative programs, and of the budget. Together the two parts comprise my budget message.

When this administration took office on January 20 of last year one of its first concerns was the budget for the 1954 fiscal year, which had been sent to the Congress on January 9, 1953, by the previous administration. With the cooperation of the Congress that budget promptly was revised and reduced. This new budget is the first prepared entirely by this administration.

It provides adequately, in my judgment, for the national defense and the international responsibilities of the Nation—responsibilities which we must undertake as a leader of the free world. On the success of this leadership depends our national security and prosperity. The budget also provides adequately for the current needs of the Government and for constructive forward steps in our domestic responsibilities and programs.

The recommended budget continues the strengthening of our military posture; our progress in the development and production of atomic weapons; the expansion of our system of continental defense; assistance in the development of the military strength of friendly nations; and programs for rapid mobilization if an emergency should arise.

Authority is recommended for new and advanced work on the peacetime uses of atomic energy in the earnest hope that present international relations can be improved and the wonders of nuclear power can be turned gradually to the development of a more abundant life for ourselves and all mankind.

The budget contains provisions for legislative recommendations for expanding the coverage and increasing the benefits of our social security system; for promoting better housing conditions and more widespread home ownership in the Nation; for improving our system of education; for conserving our natural resources; for helping prevent the ravages of floods and soil erosion; for encouraging the expansion of adequate health and hospital care for our people; and for other constructive domestic purposes designed to strengthen the foundations of a stable and prosperous economy.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

This budget continues the progress that has been made during the past year in reducing both requests for new appropriations and Government expenditures. The reductions in expenditures already accomplished, together with those now proposed, justify the tax reductions which took effect January 1 and the further tax revisions I am recommending. These lower taxes will encourage continued high capital investment and consumer purchases. Despite the substantial loss of revenue caused by these tax reductions, we have moved closer to a balanced budget.

One of the first problems of this administration was to bring the budget under better control. That was substantially accomplished in the revision of the original budget document for the fiscal year 1954. Now an amount approximately equal to the savings made in this new budget is being returned to the public in tax reductions and tax revisions. This amount substantially exceeds the estimated budget deficit.

In preparing this budget the administration has directed its attention to essential activities and programs rather than to those which some might consider desirable and appropriate, at this time, for the Federal Government to undertake. It assumes fairly stable conditions, internally and externally, during the period it covers. It allows for the continuing heavy demands of the national security programs on the budget. But as we continue to reduce and eliminate the less desirable or the unnecessary Government expenditures, it will become possible to turn to other purposes which are the most desirable in terms of their benefits to all of the people.

This budget marks the beginning of a movement to shift to State and local governments and to private enterprise Federal activities which can be more appropriately and more efficiently carried on in that way. The lending activities of the Reconstruction Finance Corporation; the services provided by the Inland Waterways Corporation; certain agricultural activities; and some aspects of our health, education, and welfare programs are examples of this type of action. In those cases where Federal participation is necessary, the effort of this administration is to develop partnerships rather than an exclusive and often paternalistic position for the Federal Government.

This budget also benefits from material savings from the decreased costs of Federal operations resulting from our constant effort to improve the management of Government activities and to find better and less expensive ways of doing the things which must be done by the Federal Government.

The total effect of the recommendations for the 1955 budget, under existing and proposed legislation, is shown with comparable figures for earlier years in the following table. The table also reflects certain

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

technical adjustments for 1955 and prior years which do not affect the budget surplus or deficit and are described in part II of this message. Both receipts and expenditures include, insofar as can be determined, the estimated budgetary results of my recommendations for new legislation.

BUDGET TOTALS

[Fiscal years. In billions]

	1950 actual	1951 actual	1952 actual	1953 actual	[1] 1954 estimated		1955 estimated
					Budget document	Current	
New authority to incur obligations	$49.3	$82.9	$91.4	$80.2	$71.8	$60.7	$56.3
Receipts:							
Under existing legislation	36.5	47.5	61.4	64.6	68.0	67.4	61.5
Under proposed legislation						.2	1.2
Total receipts	36.5	47.5	61.4	64.6	68.0	67.6	62.7
Expenditures:							
Under existing legislation	39.6	44.0	65.4	74.0	75.6	70.9	64.5
Under proposed legislation					2.3	[2]	1.1
Total expenditures	39.6	44.0	65.4	74.0	77.9	70.9	65.6
Surplus (+) or deficit (−)	−3.1	+3.5	−4.0	−9.4	−9.9	−3.3	−2.9
Cumulative unspent balances of appropriations at end of year	[3] 14.1	[3] 50.3	68.8	78.7	67.4	66.5	54.1

[1] References to 1954 are to the 1954 budget document of January 9, 1953, as presented to the Congress, and to currently revised budget estimates.
[2] Less than 50 million dollars.
[3] Estimated. Detailed accounting data are not available.

General budget policy.—This administration is dedicated to greater efficiency and economy in meeting the Nation's security requirements and the necessary and valid functions of the Government.

The current estimates of the 1954 budget show that the requests for new appropriations were reduced about 12.5 billion dollars, new obligational authority was reduced more than 11 billion dollars, and expenditures were reduced 7 billion dollars below the totals estimated in the 1954 budget document of the previous administration.

Similar reductions continue in the budget recommended for the fiscal year 1955. Recommended new obligational authority is 4.4 billion dollars less than the current estimate for the fiscal year 1954, 15.5 billion dollars less than recommended for that year in the 1954 budget document, and 23.9 billion dollars less than in 1953. Estimated expenditures for the fiscal year 1955 are 5.3 billion dollars less

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

than the current estimate for the fiscal year 1954, 12.3 billion dollars less than recommended in the 1954 budget document, and 8.4 billion dollars less than in 1953.

Thus, new obligational authority has been reduced 15.5 billion dollars and estimated expenditures have been reduced 12.3 billion dollars since this administration took office.

These reductions justified lower taxes. Without tax reductions, a budget surplus was in sight for the fiscal year 1955.

So that most of the new savings could be passed along to the taxpayers of the Nation as a whole, with beneficial effects on our entire economy, I believed it best to adopt a course leading toward the twin goals of a balanced budget and tax reductions.

The reductions in 1954 expenditures were devoted to reducing the large deficit forecast in the 1954 budget document. The anticipated savings in 1955 budget expenditures already have been reflected in the tax reductions of January 1 of this year and are also reflected in the tax revisions I am recommending in this message.

Together these tax reductions will total nearly 5 billion dollars.

We will still have a budgetary deficit of slightly less than 3 billion dollars for the fiscal year 1955, as now estimated. But we will continue determined efforts for economy to reduce that deficit during the 1955 fiscal year.

Furthermore, despite the loss of cash revenue from the tax reductions and revisions, the total cash transactions of the Government with the public are now estimated to show a small cash surplus for the fiscal year 1955.

Budget totals, fiscal year 1954.—The actual budget deficit for the fiscal year 1953 was 9.4 billion dollars. The budget deficit for the fiscal year 1954, indicated in the 1954 budget document, was 9.9 billion dollars. The current estimates of the budget for that year show a budgetary deficit of 3.3 billion dollars.

Total Government cash transactions with the public include the receipts and payments of the social security and other trust funds which are not considered part of the budget. In 1953 the excess of cash payments to the public over receipts from the public was 5.3 billion dollars. The 1954 budget document estimated an excess of cash payments of 6.6 billion dollars. Present estimates indicate an excess of cash payments over receipts in 1954 of more than 200 million dollars, a reduction of 6.4 billion dollars in the cash deficit originally estimated.

Budget totals, fiscal year 1955.—The budget for the fiscal year 1955 is estimated to show a deficit of 2.9 billion dollars.

Federal Reserve Bank of St. Louis

Fiscal year:	Deficits (in billions)
1952	$4.0
1953	9.4
1954:	
As estimated, January 9, 1953	9.9
Revised estimate	3.3
1955 estimate	2.9

The presently estimated deficit for the 1955 fiscal year is in sharp contrast to a deficit forecast made by the Bureau of the Budget prior to transmission to the Congress of the 1954 budget document. This projection of the programs in existence and contemplated in the 1954 budget document, under the tax laws as they then existed, indicated a deficit for the 1955 fiscal year about five times greater than the deficit now estimated.

Budget receipts and expenditures for the fiscal year 1955 are estimated as follows:

	Receipts (in billions)	Expenditures (in billions)
Under existing legislation	$61.5	$64.5
Under proposed legislation	1.2	1.1
Total	62.7	65.6

Budget receipts allow for an estimated loss of revenue, totaling nearly 5 billion dollars, from the tax reduction which took effect January 1 and from the cost of recommended tax revisions, insofar as these will apply to the 1955 fiscal year. On a full-year basis the revenue loss will approach 6 billion dollars.

The total cash transactions of the Government with the public show an estimated excess of receipts from the public over payments to the public of more than 100 million dollars in the fiscal year 1955.

This record of progress toward a balanced budget is the result of a determined and continuous effort to bring the financial affairs of the Government under control.

New obligational authority.—My recommendations for new appropriations and other new obligational authority for the fiscal year 1955 amount to 56.3 billion dollars, a further reduction from the amounts enacted during the last several years.

Fiscal year:	New obligational authority (in billions)
1952	$91.4
1953	80.2
1954:	
As estimated, January 9, 1953	71.8
Revised estimate	60.7
1955, as recommended	56.3

270000—54——1

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

New obligational authority includes new appropriations, additions to borrowing authority, and certain adjustments to the authority of agencies to incur obligations. The above figures are on a comparable basis, reflecting certain adjustments in composition and definition made in this budget, partly to conform to congressional practices. Details are shown in the second part of this message.

The accumulated unexpended balances of prior appropriations as of June 30, 1953, of 78.7 billion dollars, will be reduced to 66.5 billion dollars by June 30, 1954, and to 54.1 billion dollars by June 30, 1955, as now projected.

The lower levels of new obligational authority and of accumulated unexpended balances for 1954 and 1955 lead to less expenditures in these and in future years. In the revision of the 1954 budget and in the 1955 budget the trend clearly is toward a balanced budget.

Budget expenditures.—Total budget expenditures in the fiscal year 1955 are estimated at 65.6 billion dollars.

Fiscal year:	*Expenditures (in billions)*
1952	$65.4
1953	74.0
1954:	
As estimated, January 9, 1953	77.9
Revised estimate	70.9
1955 estimate	65.6

Proposed expenditure programs for 1955 fall in three broad categories: national security, major programs relatively uncontrollable under existing and proposed legislation, and all other Government programs.

Expenditures for major national security programs—for the military functions of the Department of Defense, the mutual military program, atomic energy, and stockpiling of strategic materials—dominate the budget and are estimated at 44.9 billion dollars in the fiscal year 1955. This compares with a presently estimated 48.7 billion dollars in 1954 and 50.3 billion dollars in 1953. These amounts are about the same percentage of total budget expenditures in each of the 3 years.

Closely related to these major security programs are other activities for national security included elsewhere in the budget. Our foreign economic assistance and information programs are particularly essential to deter aggression and strengthen the world forces for peace.

Proposed reductions in major national security expenditures in 1955 represent the largest single element of reduction from the current year's level of expenditures. I emphasize, however, that these savings result from revisions in programs, from shifts in emphasis, from better

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

balanced procurement, and from improved management and operations. Our security is being strengthened—not weakened. Further, while expenditures for some programs in this category will be reduced, others will be increased.

Of the four major national security programs, proposed 1955 expenditures for the Atomic Energy Commission and for the mutual military program will be at the highest levels since the initiation of the two programs.

Within the Department of Defense the fiscal year 1955 expenditures on behalf of our airpower will be the largest since World War II. Allocations of expenditures for our continental defense program will be greater than in any previous year.

Expenditures for stockpiling—the fourth of the principal programs in the major national security category—will be less than in the fiscal year 1954, as a result of approaching fulfillment of stockpile requirements in certain categories and of lower world market prices for materials still required for the stockpile.

Budget expenditures for certain Government activities are, by law, relatively nondiscretionary, and depend largely on factors outside the annual budgetary process. While relatively few in number these represent a large amount of dollars and the budget each year has to provide funds for them. For example, once the laws are placed on the statute books, grants to States for many purposes depend upon the extent to which States take advantage of Federal grant-in-aid programs; veterans' pensions depend upon the number of qualified veteran applicants; farm price supports depend upon the size of crops and the demand for supported commodities; and interest payments on the national debt depend upon the amount of the debt and the rate of interest.

In the fiscal year 1955 it is estimated that budget expenditures of 14.1 billion dollars will be required to support these programs. This amount is about the same as presently estimated for 1954 and almost 800 million dollars less than similar expenditures in the fiscal year 1953.

Budget expenditures for other Government activities, which contain more elements controllable through the budget process, are reduced an estimated 2.2 billion dollars below the fiscal year 1953 and 1.5 billion dollars below the present estimate for 1954. This is a reduction, over the two fiscal years, of about 25 percent in the cost of these numerous day-to-day operations of the Government. These activities cover, in number, a large majority of the items in the budget, although the amount involved is about one-tenth of total budget expenditures.

Some substantial reductions in this category will result from a lessened postal deficit and management and program savings in many other departments. On the other hand, estimated expenditures for

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

the Tennessee Valley Authority, urban development and redevelopment, college housing loans, the National Science Foundation, fish and wildlife resources, the school lunch program, and several other programs of domestic importance will be the largest in our history.

Budget receipts and taxes.—Budget receipts under existing and proposed legislation are estimated to be 62.7 billion dollars in the fiscal year 1955. This is 4.9 billion dollars less than presently estimated 1954 receipts; 1.9 billion dollars less than 1953, and 1.3 billion dollars more than 1952.

Total Government expenditures and taxes are now so high that we must choose our path carefully between inadequate revenues on the one hand and repressive taxation on the other. I am anxious to have taxes reduced as fast as that can be done without building up inflationary deficits. It is the determined purpose of this administration to make further reductions in taxes as rapidly as justified by prospective revenues and reductions in expenditures. The objective will be to return to the people, to spend for themselves and in their own way, the largest possible share of the money that the Government has been spending for them.

The start toward tax reductions is justified only because of success in reducing expenditures and improving the budgetary outlook. That outlook permits me to make some proposals for tax reform and reductions for millions of taxpayers at this time which represent much-needed improvements in our tax system. These proposals are directed toward removing the most serious tax hardships and tax complications, and reducing the tax barriers to continued economic growth. The proposals will encourage the initiative and investment which stimulate production and productivity and create bigger payrolls and more and better jobs. The details of these proposals are many and represent much cooperative work by the House Ways and Means Committee and its staff and the Treasury Department. In part II of my budget message, I list and describe 25 important tax revisions.

I do not believe that the budgetary situation will permit further reductions of taxes at this time. Hence, I repeat my recommendations of last May that the reductions in the general corporate income tax be deferred for 1 year; that the excise tax rates, scheduled to be reduced on April 1, including those on liquor, tobacco, automobiles, and gasoline, be continued at present rates; and that any adjustments in the other excise taxes be such as to maintain the total yield which we are now receiving from this source.

Debt management.—A sound dollar is the cornerstone of financing policy under this administration. The problem of debt management

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

is not only one of offering securities for cash or refunding which the market will take, but of appraising the economic situation and adapting financing plans to it, so that as far as possible debt management does not contribute to either inflation or deflation.

This means close cooperation with the Federal Reserve System, whose duty it is under the law to administer the money supply, with these same objectives in view.

Nearly three-quarters of the debt we inherited a year ago matures within less than 5 years or is redeemable at the holder's option. Too large a proportion is in the hands of banks. This is the result of financing over a period of years too largely by short term issues at artificially low interest rates maintained by Federal Reserve support. These policies contributed to cheapening the dollar.

A start has been made in lengthening the maturities of the debt, as well as obtaining a wider distribution among individuals and other nonbank investors. In our 1953 debt operations, maturities were lengthened in 5 out of 9 times.

There is every reason to look forward with confidence to this country's ability to put its financial house in better order without serious disruption of credits or markets. The stream of the Nation's savings is huge, larger than ever before; the financial system is sound. With a reasonable assurance of sound money of stable buying power there is no better investment than securities of the United States Government.

The national debt is now close to the legal limit of 275 billion dollars. In view of the wide swings in receipts and expenditures and their unpredictability, it is not prudent to operate the huge business of the United States Government in such a straitjacket as the present debt limit.

These difficulties will become worse as we move forward in the year. We shall be close to the debt limit and our cash balances will be dangerously low on several occasions in the first half of the calendar year.

In the second half of the calendar year, when tax receipts are seasonally low, there will be no way of operating within the present debt limit.

For these reasons, I renew my request to the Congress to raise the debt limit.

Proposed legislation.—Legislative proposals are reflected in separate messages or are included in the appropriate sections of part II of this message.

A summary of the budgetary impact of the legislative program also is given in part II.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

In summary, I emphasize that this budget carries out the policy of this administration to move toward reduced taxes and reduced Government spending as rapidly as our national security and well-being will permit.

By using necessity—rather than mere desirability—as the test for our expenditures, we will reduce the share of the national income which is spent by the Government. We are convinced that more progress and sounder progress will be made over the years as the largest possible share of our national income is left with individual citizens to make their own countless decisions as to what they will spend, what they will buy, and what they will save and invest. Government must play a vital role in maintaining economic growth and stability. But I believe that our development, since the early days of the Republic, has been based on the fact that we left a great share of our national income to be used by a provident people with a will to venture. Their actions have stimulated the American genius for creative initiative and thus multiplied our productivity.

This budget proposes that such progressive economic growth will be fostered by continuing emphasis on efficiency and economy in Government, reduced Government expenditures, reduced taxes, and a reduced deficit. The reduced request for new obligational authority promises further that, barring unforeseen circumstances, the budgets I shall recommend in the future will be directed toward the same objectives.

DWIGHT D. EISENHOWER.

JANUARY 21, 1954.

BUDGET MESSAGE OF THE PRESIDENT

PART II

To the Congress of the United States:

This, the second part of my budget message, discusses in considerable detail my recommended program for the Government for the fiscal year 1955.

I now present and describe my legislative proposals for taxes, and summarize my other legislative proposals, indicating their budgetary impact. This is followed by a presentation and discussion of the pertinent details of the budget.

TAX PROPOSALS

Our whole system of taxation needs revision and overhauling. It has grown haphazardly over many years. The tax system should be completely revised.

Revision of the tax system is needed to make tax burdens fairer for millions of individual taxpayers. It is needed to restore normal incentives for sustained production and economic growth. The country's economy has continued to grow during recent years with artificial support from recurring inflation. This is not a solid foundation for prosperity. We must restore conditions which will permit traditional American initiative and production genius to push on to ever higher standards of living and employment. Among these conditions, a fair tax system with minimum restraints on small and growing businesses is especially important.

I believe that this proposed tax revision is the next important step we should take in easing our tax burdens. After it is completed, further reductions in expenditures can be applied to our two objectives of balancing the budget and reducing tax rates.

A year ago I asked the Secretary of the Treasury to undertake a complete review of the tax system and make recommendations for changes. The Committee on Ways and Means of the House of Representatives had already started constructive examination of the tax laws with the same objectives. Extensive hearings were held by the committee during the late spring and summer.

The proposed revisions are the result of a year's intensive work. The collaboration between congressional and Treasury staffs in the development of a tax revision bill has been very close. It may, I hope, provide a precedent for similar collaboration in other fields of legislation.

I shall not list here all the detailed points developed for the revision of the tax laws. The following recommendations cover the major points.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

They will substantially reduce the more glaring inequities, thereby helping vast numbers of our people in their individual tax burdens. They will reduce the more serious restraints on production and economic growth. They will promote investment, which provides new and better methods of production and creates additional payrolls and more jobs.

The revisions will also make the law simpler and surer, with benefits to both taxpayers and the Government. They will in many ways prevent abuses by which some taxpayers now avoid their rightful share of tax burdens by taking unfair advantage of technicalities.

1. *Children earning over 600 dollars.*—At present, parents cannot claim as a dependent any child who earns over 600 dollars a year. This discourages children in school or college from earning as much as they can to help in their support. I recommend that a parent should be permitted to continue to claim a child as a dependent regardless of the child's earnings if he is under 18 or away from home at school, as long as he is in fact still supported by the parent. Such dependents should, of course, continue to pay their own income tax on earnings above 600 dollars.

2. *Heads of families.*—At present, a widow or widower with dependent children is denied the full benefit of income-splitting available to married couples. It seems unfair to tax the income of a surviving parent with dependent children at higher rates than were applied to the family income before the death of one of the partners in a marriage. I recommend that widows and widowers with dependent children be allowed to split their income as is now done by married couples.

This same tax treatment should be authorized for single people supporting dependent parents. Furthermore, the present requirement that dependent parents must live with their children for the children to qualify for this tax treatment should be removed. It is often best for elderly people to be able to live in their own homes, and the tax laws should not put a penalty on family arrangements of this sort.

3. *Foster children as dependents.*—At present, foster children and children in process of adoption may not be claimed as dependents. I recommend that such children be allowed as dependents.

4. *Expenses of child care.*—Some tax allowance can properly be given for actual costs of providing care for the small children of widows or widowers who have to work outside the home. The same tax privilege should be given to working mothers who, because their

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

husbands are incapacitated, provide the principal support of their families.

5. *Medical expenses.*—The present tax allowances for unusual medical expenses are too limited to cover the many tragic emergencies which occur in too many families. I recommend that a tax allowance be given for medical expenses in excess of 3 percent of income instead of 5 percent as at present. I recommend further that the present ceiling of 1,250 dollars for a single person with a maximum ceiling of 5,000 dollars for a family should be doubled so that the maximum for a family will be 10,000 dollars. However, to avoid abuses in medical deductions, I recommend that the definition of medical expenses be tightened to exclude both ordinary household supplies and certain indirect travel expenses.

6. *Medical insurance and sick benefits for employees.*—Insurance and other plans adopted by employers to protect their employees against the risks of sickness should be encouraged by removing the present uncertainties in the tax law. It should be made clear that the employer's share of the costs of providing such protection on a group basis will not be treated as income on which the employee is liable for tax. This principle should be applied to medical and hospital insurance as well as to a full or partial continuation of earnings during a sickness.

There should be no tax discrimination between plans insured with an outside insurance company and those financed directly by the employer. At present, payments received by a person while sick are entirely nontaxable if made under an insured plan. This makes it possible for a person subject to high tax rates to have a much larger net income while on sick leave than while at work. To prevent abuses, I recommend that a limit of 100 dollars a week be placed on tax-free benefits, but this exemption should be extended only to plans meeting certain general standards.

7. *Pension and profit-sharing plans for employees.*—The conditions for qualification for special tax treatment of employers' pension plans are too involved. Such plans are desirable. I recommend that the rules be simplified and that greater discretion be given in establishing plans for different groups of employees, so long as there is no discrimination in favor of key executives or stockholders.

Under present law, the value of a future pension to a surviving widow or child of an employee is included in the husband's taxable estate, even though the survivors may not live to receive the full benefits and there may be no cash available to pay the tax. I recom-

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

mend that such value should not be included in an estate but that the survivors continue to pay tax on the pension in the same manner that it was taxed to the person first receiving it.

At the same time, to avoid unfair competition with ordinary tax-paying businesses, I recommend that pension trusts be restricted in the same manner as tax-exempt foundations. They should also be subject to rules in regard to percentage distribution of their assets comparable to those applying to regulated investment companies.

8. *Taxation of annuities.*—Under the present tax law, a person buying an annuity is taxed on a relatively large part of each payment until his cost is fully recovered, at which time the full amount becomes taxable. The tax rule is so strict that often a person is not likely to get his capital back tax free unless he lives beyond his life expectancy. I recommend that the tax treatment of annuities be determined on the basis of the life expectancy of the person receiving it. This will permit the hundreds of thousands of people who buy annuities to recover their capital free of tax over their life expectancies and will avoid any change in the tax status of an annuity during a person's lifetime.

9. *Double taxation of dividends.*—At present, business income is taxed to both the corporation as it is earned and to the millions of stockholders as it is paid out in dividends. This double taxation is bad from two standpoints. It is unfair and it discourages investment. I recommend that a start be made in the removal of this double taxation by allowing stockholders a credit against their own income taxes as a partial offset for the corporate tax previously paid. This will promote investment which in turn means business expansion and more production and jobs.

Specifically, I recommend that the credit be allowed on an increasing scale over the next 3 years. For this year, I recommend that a credit of 5 percent be allowed; for 1955, a credit of 10 percent; and, in 1956 and later years, 15 percent. To avoid shifts in the payment dates of corporation dividends, these credits should apply to dividends received after July 31 of each year. To give the full benefit immediately to small stockholders, I recommend that the first 50 dollars of dividends be completely exempted from tax in 1954 and that the first 100 dollars be exempted in 1955 and later years.

10. *Estimated returns.*—The burden on those required to file estimated tax returns should be reduced by increasing the number of optional ways in which an individual can estimate his tax without being subject to penalty for an underestimate. I recommend also that the penalties resulting from underestimates be simplified by being stated as a 6-percent interest charge on deficiencies.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

11. *Filing date.*—To reduce the burdens of preparing and filing returns in the early months of the year, I recommend that the March 15 filing date for individuals be changed to April 15.

In the taxation of business the same objectives of fairness, simplicity, and reduction of tax barriers to production and normal economic growth are important. The present tax law should be revised on the basis of these standards.

Particular attention should be given in the revision of the law to the problems of small and growing business concerns. I cannot emphasize too strongly the social and economic importance of an environment which will encourage the formation, growth, and continued independent existence of new companies.

12. *Depreciation.*—A liberalization of the tax treatment of depreciation would have far-reaching effects on all business and be especially helpful in the expansion of small business whether conducted as individual proprietorships, partnerships, or corporations. At present, buildings, equipment, and machinery are usually written off uniformly over their estimated useful lives. The deductions allowed, especially in the early years, are often below the actual depreciation. This discourages long-range investment on which the risks cannot be clearly foreseen. It discourages the early replacement of old equipment with new and improved equipment. And it makes it more difficult to secure financing for capital investment, particularly for small business organizations.

I recommend that the tax treatment of depreciation be substantially changed to reduce these restrictions on new investment, which provides a basis for economic growth, increased production, and improved standards of living. It will help the manufacturer in buying new machinery and the storekeeper in expanding and modernizing his establishment. It will help the farmer get new equipment. All of this means many more jobs.

Specifically, I recommend that business be allowed more freedom in using straight-line depreciation and in selecting other methods of depreciation. Larger depreciation charges should be allowed in the early years of life of property by the use of the declining-balance method of depreciation at rates double those permitted under the straight-line method. Other methods which give larger depreciation in early years should be accepted, so long as they do not produce deductions which exceed those available under the declining-balance method.

The new methods of depreciation should be allowed for all investments in buildings, equipment, and machinery made after January 1, 1954. This would include farm buildings and equipment and new construction of commercial and industrial buildings and rental housing.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

Faster depreciation, it should be noted, will merely shift the tax deductions from later to earlier years. It will not increase total deductions. The change should, in fact, increase Government revenues over the years because of the stimulation which it will give to enterprise and expansion.

In addition to the tax treatment of depreciation, which is important for all business, there are other features of the tax law which are of special importance to small business.

13. *Research and development expenses.*—At present, companies are often not permitted to deduct currently for research or development expenses. This rule is especially burdensome to small concerns because large companies with established research laboratories can usually get immediate deductions. I recommend that all companies be given an option to capitalize or to write off currently their expenses arising from research and development work. Our tradition of initiative and rapid technical improvements must not be hampered by adverse tax rules.

14. *Accumulation of earnings.*—At present, the penalty tax on excessive accumulations of corporate earnings operates to discourage the growth of small companies which are peculiarly dependent on retained earnings for expansion. The tax in some form is necessary to prevent avoidance of individual taxes by stockholders, but I recommend that the law be changed to make the Government assume the burden of proof that a retention of earnings is unreasonable.

15. *Taxation of partnerships.*—The tax law applicable to partnerships is complex and uncertain. I recommend that it be simplified and made definite. It should be possible to form partnerships and make changes in them without undue tax complications.

16. *Optional tax treatment for certain corporations and partnerships.*—Small businesses should be able to operate under whatever form of organization is desirable for their particular circumstances, without incurring unnecessary tax penalties. To secure this result, I recommend that corporations with a small number of active stockholders be given the option to be taxed as partnerships and that certain partnerships be given the option to be taxed as corporations.

17. *Corporate reorganizations.*—The tax law applicable to reorganizations and recapitalizations of corporations is also complex and uncertain. This part of the law should be simplified and made sufficiently definite to permit people to know in advance the tax consequences of their actions.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

The owners of small corporations frequently find it necessary to rearrange their interests in a corporation in anticipation of estate taxes, to secure new capital, or to make stock available for a new management group. I recommend that the tax law permit tax-free rearrangements of stockholders' interests in corporations, so long as no corporate earnings are withdrawn. Such changes will remove some of the tax pressures which force the sale of independent companies to larger corporations. At the same time, the law should be tightened to prevent abuses by which corporate earnings are withdrawn through the issuance and redemption of corporate securities. It should also be amended to avoid abuses through the purchase of corporations to acquire their rights to loss carryovers.

18. *Loss carryback.*—At present, losses may be carried back and offset against prior earnings for 1 year and carried forward to be offset against future earnings for 5 years. I recommend that the carryback be extended to 2 years. This will benefit established companies which become distressed. The 5-year carryforward should be continued to permit new businesses to offset their early losses against later profits.

19. *Soil conservation expenses.*—At present, only limited and uncertain tax deductions are allowed for soil conservation expenses on farms. I recommend that such deductions be allowed up to 25 percent of the farmer's gross income.

20. *Accounting definitions.*—Tax accounting should be brought more nearly in line with accepted business accounting by allowing prepaid income to be taxed as it is earned rather than as it is received, and by allowing reserves to be established for known future expenses.

21. *Multiple surtax exemptions, consolidated returns, and intercorporate dividends.*—I recommend that the law be tightened to remove abuses from the use of multiple corporations in a single enterprise. I also recommend that the penalty tax on consolidated returns and intercorporate dividends be removed over a 3-year period.

22. *Business income from foreign sources.*—I recommend that the taxation of income from foreign business investments be modified in several respects. The investment climate and business environment abroad are much more important than our own tax laws in influencing the international flow of capital and business. Nonetheless, our capital and management know-how can be helpful in furthering economic development in other countries, and is desired by many of them. Our tax laws should contain no penalties against United

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

States investment abroad, and within reasonable limits should encourage private investment which should supplant Government economic aid.

Specifically, I recommend the following new provisions in our taxation of business income from foreign sources:

(*a*) Business income from foreign subsidiaries or from segregated foreign branches which operate and elect to be taxed as subsidiaries should be taxed at a rate 14 percentage points lower than the regular corporate rate. This lower rate of tax should apply only to earnings after January 1, 1954.

(*b*) The present definition of foreign taxes which may be credited against the United States income tax should be broadened to include any tax other than an income tax which is the principal form of taxation on business in a country, except turnover, general sales or excise taxes, and social security taxes. This country, by its tax laws, should not bring indirect pressure on other countries to adapt their tax systems and rates to ours.

(*c*) The overall limitation on foreign tax credits should be removed. This limitation discourages companies operating profitably in one foreign country from starting business in another foreign country where operations at a loss may be expected in the first few years.

(*d*) Regulated investment companies concentrating on foreign investments should be permitted to pass on to their stockholders the credit for foreign taxes which would be available on direct individual investments.

23. *Payment dates of corporation income tax.*—Over the past several years, corporation income tax payments have been gradually shifted forward into the first two of the regular quarterly dates. By 1955, the entire tax will be due in two equal installments in March and June.

The irregularity of tax receipts increases the problems in managing the public debt and is an unsettling influence in the money markets. The irregularity of tax payments also may make it harder for corporations to manage their own financing.

I recommend that, beginning in the fall of 1955, a start be made in smoothing out corporation income tax payments by requiring advance payments in September and December before the end of the taxable year. Each of these payments should be made at 5 percent of the amount due for the entire year in 1955, rising to 25 percent each in 1959 and later years.

These advance payments will require estimates of income for the year somewhat comparable to those now required of individuals. Though estimates of profits are difficult to make accurately, no

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

payments will be required before the middle of the ninth month of a business year.

24. *Administrative provisions.*—The administrative features of the tax laws are unnecessarily complex. Different provisions have been adopted over the years to deal with particular problems, with little regard to consistency. Specifically, I recommend that the parts of the law covering assessments, collections, interest and penalties, the statute of limitations, and other administrative provisions be simplified and brought together in one place. This will result in savings to both taxpayers and the Government.

An effective and fair administration of the tax laws is vital to every individual in the country. The Internal Revenue Service has been revitalized during the past year and is being organized and managed on a basis that will assure fair and equal treatment to all taxpayers, maximum realization of taxes from revenue laws, and the contribution by each taxpayer of the share of the cost of Government that Congress intends that he should make.

The regulations and administration of the tax laws are being tightened to prevent abuses by which a small minority of taxpayers avoid their fair share of taxes by misuse of expense accounts and other improper practices.

25. *General simplification of tax laws and other revisions.*—The revision of the tax laws should be comprehensive. Many unnecessary complications have developed over the years. The entire Internal Revenue Code needs rewriting and reorganization.

Jointly, the Treasury Department and the staff of the congressional committees have developed many recommendations for changes other than those which I have described here. Some of these relate to the estate and gift tax, and the administrative provisions of the excise taxes.

The review of the present tax system in the Treasury Department has not yet led to final conclusions in many other situations that require further study before any recommendations for change can be properly made. These subjects include the tax treatment of capital gains and losses, the special problems of the oil and mining industries, the tax treatment of cooperatives and organizations which are wholly or partially tax exempt, as well as the provision of retirement income for people not covered by pension plans.

The tax reforms and revisions covered by the foregoing 25 recommendations make the income tax system fairer to individuals and less burdensome on production and continued economic growth. After their adoption, further reductions in Government expenditures will make possible additional reductions in the deficit and tax rates.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

I do not believe that the budgetary situation justifies any tax reductions beyond those involved in the proposed tax revision and in the tax changes which occurred on January 1. Accordingly, I repeat my recommendation of last May that the reduction in the general corporate income tax rate be deferred for another year.

Excise taxes provide a relatively small proportion of our total tax revenues. In the fiscal year 1955, they are estimated to produce 10 billion dollars at existing rates as compared with 20 billion dollars from corporation income taxation and 30 billion dollars from individual income taxes. Of this 10 billion dollars, more than half comes from the excise taxes on liquor, tobacco, and gasoline.

Because of the present need for revenue, I recommend that the excise taxes scheduled to be reduced on April 1, including those on liquor, tobacco, automobiles, and gasoline, be continued at present rates; and that any adjustments in the other excise taxes be such as to maintain the total yield which we are now receiving from this source.

SUMMARY OF OTHER LEGISLATIVE PROPOSALS

The administration has developed a dynamic, progressive, and at the same time wholly practical legislative program. Its major outlines are set forth in the State of the Union Message, which I delivered to the Congress on January 7. Since that date, I have forwarded to the Congress the details of my recommendations with respect to the steps which I believe should be taken: (1) To modernize and make effective our agricultural laws (January 11); (2) to bring up to date and to improve the Labor-Management Relations Act of 1947 (January 11); (3) to extend and make more equitable the old-age and survivors insurance system (January 14); (4) to chart a new course in Federal cooperation and support for putting up-to-date medical and hospital care at the disposal of our citizens (January 18). On January 25 I shall present a program which will, for the first time, bring together into a coordinated and forward-looking set of policies the housing and community development programs of the Federal Government. Within a few days thereafter, I expect to make certain recommendations with respect to amendments to the Atomic Energy Act. These are discussed in more detail in subsequent sections of this message.

These measures, together with the legislative proposals which will be presented in the course of the next several months with respect to foreign assistance and trade, are the foundation stones for the legislative program of this administration. All of them call for extensions of existing legislation or the enactment of new legislation. All of them are necessary. They will help us to protect the freedom of our people, to maintain a strong and growing economy, and to concern ourselves with the human problems of the individual citizen.

SUMMARY OF OTHER LEGISLATIVE PROPOSALS

1955 BUDGET

[Fiscal years. In millions]

Function and program	1954–1955	
	Recommended new obligational authority	Estimated expenditures
EXTENSION OF PRESENT MAJOR PROGRAMS		
National security:		
Military public works, Department of Defense	$1,108.0	$100.0
Mutual military program	2,500.0	700.0
International affairs and finance:		
Mutual economic and technical cooperation	875.0	300.0
Surplus agricultural commodities disposal	300.0	----------
Contributions to voluntary international programs	135.0	70.0
Agriculture and agricultural resources: Increase in borrowing authority of the Commodity Credit Corporation	1,750.0	----------
Transportation and communication:		
Federal-aid highway program	575.0	----------
Forest highways	22.5	----------
Subtotal, extension of present major programs	7,265.5	1,170.0
NEW LEGISLATIVE PROGRAM		
Social security, welfare, and health:		
Grants to States for public assistance	108.0	108.0
Expansion of grants for hospital construction	62.6	5.6
Program to stimulate wider coverage and greater benefits from private health insurance	26.2	1.1
Expansion of vocational rehabilitation services for the disabled	8.8	7.8
Creation of a National Commission for Health Improvement	0.3	0.3
Housing and community development: Advance planning of local public works	[1] 10.0	3.0
Education and general research:		
Program to strengthen the Office of Education	0.3	0.3
National Conference on Education	[1] 2.0	[2] 1.8
Agriculture and agricultural resources: Cooperation with State and local agencies on watershed protection	3.0	2.4
Natural resources:		
Aid for non-Federal development of water resources	10.0	10.0
Federal projects	0.5	0.4
Transportation and communication:		
St. Lawrence Seaway	105.0	5.8
Proposed postal rate increases (increased revenues)	−240.0	−240.0
Labor and manpower: Expansion of unemployment compensation coverage: Administrative costs	22.1	22.0
General government:		
Unemployment compensation for Federal civilian employees	25.0	25.0
Increase in Federal payment to the District of Columbia	10.0	10.0
District of Columbia public works program	7.0	5.0
Subtotal, new legislative program:		
1954	12.0	1.5
1955	148.8	−33.0
Total legislative proposals:		
Fiscal year 1954	12.0	1.5
Fiscal year 1955	7,414.3	1,137.0

[1] Recommended for the fiscal year 1954.

[2] Includes 1.5 million dollars in the fiscal year 1954.

270000—54——II

PROPOSED LEGISLATION AFFECTING TRUST FUNDS

1955 BUDGET

[In millions]

Function and program	1955 estimated
Social security, welfare, and health:	
Expansion and improvement of old-age and survivors insurance:	
Additional receipts	$100.0
Additional disbursements	408.0
Net accumulation in reserve	−308.0
Labor and manpower:	
Extension of coverage of unemployment insurance:	
Additional deposits by States	145.0
Additional withdrawals by States	60.0
Net accumulation in reserve	85.0

Keyed to these foundation stones are the other individual measures which I have already recommended or which I shall recommend as soon as the necessary information upon which to base recommendations can be prepared. To some extent these other measures are basically improvements in program and are less precisely definable in terms of new costs attributed to them.

To the extent that it has been possible to assess with reasonable accuracy the cost of major measures in the legislative program, estimates have been included in this budget. These estimates are summarized above. One recommendation, the proposed increase in postal rates, would add to Federal revenues. Other minor measures, in themselves too small to be identified in summary tables, are discussed and recommended in respective summary sections and chapters of this budget. Their total cost is small and has been adequately provided for in the reserve for contingencies.

DISCUSSION OF THE BUDGET

I now present and describe pertinent details of the budget. The figures shown in the budget are careful estimates based on present and foreseeable conditions. Changes in the budget can result from congressional action. Still others can result from economic factors which change the price of goods purchased by the Government or the incomes received and taxes paid by the citizens of the Nation. Changes in international and domestic conditions could alter this budget before the end of the fiscal year 1955.

The presentation of the figures in the budget for the fiscal year 1955 reflects two significant clarifications.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

First, the appropriation to the railroad retirement trust fund equal to the taxes under the Railroad Retirement Tax Act has been excluded from the totals of budget expenditures and deducted from the total of budget receipts. This does not affect the budget surplus or deficit, and has been applied to the figures for all the years shown in this budget so that they are on a comparable basis.

This change properly presents an item which has previously overstated both budget receipts and expenditures in an equal amount. The collection of employment taxes on the railroad industry is in effect collections for a trust fund and not for Government operations. Their transfer to the trust fund should be made directly as a deduction from receipts and not shown as a budget expenditure.

The second significant clarifying change in presentation relates to the fact that the budget expenditure totals in the past have understated the scope of the Government's activities in that they included only the net basis of the spending by a number of enterprises which are engaged in business-type operations with the public. In the course of carrying out their functions, each of these public enterprises receives money from its customers or clients—interest and collections on loans or payments for goods delivered or services rendered. By law, most public enterprises may use their receipts and collections to carry on the operations for which they were created. These receipts and collections from the public in the fiscal year 1955 total 11 billion dollars.

The public enterprise activities are carried on through "revolving funds." Some of the enterprises are organized as Government corporations; others, such as the Post Office, are unincorporated.

In the summary tables of previous budgets, the receipts of such funds were subtracted from expenditures and only the difference was reported as a budget expenditure. In those cases where receipts exceeded expenditures for the year a negative figure was included in the summary expenditure tables. While the use of either the gross figures or the net figures produces an identical effect on the budget surplus or deficit, the former method of presenting only net figures in the summary tables did not reveal the full scope of the Government's financial transactions.

When Government agencies engaged in lending activities use their collections on old loans to make new loans, the net expenditure figure fails to disclose the volume of new lending and the new risks involved.

In this budget, the summary tables present the expenditures of the public enterprise funds on both a gross and net basis. The difference reveals the magnitude of receipts from the public in the "revolving funds."

Federal Reserve Bank of St. Louis

BUDGET RECEIPTS

The estimates of budget receipts for the fiscal year 1955 in the following table are in accordance with my recommendations for taxes, and are based upon the continuation of business conditions, personal income, and corporation profits at substantially the present high levels.

BUDGET RECEIPTS

[Fiscal years. In millions]

Source	1953 actual	1954 estimated	1955 estimated
Individual income taxes:			
Existing legislation	[1] $32,478	$33,433	$30,908
Proposed legislation			−585
Corporation income taxes:			
Existing legislation	21,595	22,809	19,694
Proposed legislation			570
Excise taxes:			
Existing legislation	9,943	10,038	9,221
Proposed legislation		189	1,018
Employment taxes:			
Federal Insurance Contributions Act:			
Existing legislation	[1] 4,086	4,600	5,369
Proposed legislation			100
Federal Unemployment Tax Act:			
Existing legislation	276	290	292
Proposed legislation			16
Railroad Retirement Tax Act	626	640	640
Railroad Unemployment Insurance Act	10		
Estate and gift taxes	891	955	955
Customs	613	590	590
Internal revenue not otherwise classified	49		
Miscellaneous receipts	1,827	2,313	2,454
Total receipts	72,394	75,857	71,242
Deduct:			
Appropriation to Federal old-age and survivors insurance trust fund:			
Existing legislation	4,086	4,600	5,369
Proposed legislation			100
Appropriation to railroad retirement trust fund	625	640	640
Refunds of receipts:			
Existing legislation	3,120	2,988	2,644
Proposed legislation			−153
Adjustment to daily Treasury statement basis	+30		
Budget receipts	64,593	67,629	62,642

[1] Estimated.

Budget receipts exclude refunds of overpayments made to taxpayers and also exclude the employment taxes which are appropriated and transferred to the old-age and survivors insurance trust fund and to the railroad retirement trust fund. Since these items are also excluded from budget expenditures, the surplus or deficit is not affected.

Federal Reserve Bank of St. Louis

APPROPRIATIONS AND OTHER BUDGET AUTHORIZATIONS

New obligational authority represents the total of all new authorizations enacted by the Congress permitting Government agencies to incur financial obligations. In addition to new appropriations, it includes mainly authorizations to enter into contracts prior to the enactment of appropriations, and authorizations to make expenditures from borrowed money.

NEW OBLIGATIONAL AUTHORITY BY MAJOR PROGRAM

[Fiscal years. In billions]

Major program	1953 actual	1954 estimated		1955 recommended
		Budget document [1]	Current estimate	
National security	$57.2	$49.1	$39.3	$34.9
Veterans' services and benefits	4.1	4.6	4.2	4.0
International affairs and finance	2.2	1.9	1.2	1.5
Social security, welfare, and health	1.9	1.9	1.9	1.8
Housing and community development	1.5	.7	.6	.2
Education and general research	.3	.2	.2	.2
Agriculture and agricultural resources	1.3	1.5	2.3	2.8
Natural resources	1.4	1.4	1.0	1.0
Transportation and communication	1.9	2.1	1.8	1.5
Finance, commerce, and industry	.1	.1	.1	[2]
Labor and manpower	.3	.3	.3	.3
General government	1.4	1.5	1.1	1.0
Interest	6.6	6.4	6.6	6.9
Reserve for contingencies	----------	.1	.1	.2
Total	80.2	71.8	60.7	56.3

[1] Adjusted for purposes of comparability.
[2] Less than 50 million dollars.

In prior years, new obligational authority has included all reappropriations. In conformity with congressional procedures, this budget does not include as new obligational authority reappropriations for two large programs, the mutual security program, and the construction program of the Atomic Energy Commission. These are authorized annually but are in effect continuing programs. The resulting reduction in reported new obligational authority is offset by a corresponding increase in the unspent balances of appropriations brought forward from one fiscal year to the next. New obligational authority in this budget also excludes the appropriation equivalent to taxes for the railroad retirement account, which has been discussed elsewhere. These changes are set forth in the following table:

NEW OBLIGATIONAL AUTHORITY—RECONCILIATION

[Fiscal years. In millions]

Description	1953 actual	1954 estimated		1955 estimated
		Budget document	Current	
New obligational authority, midyear review basis	$81,373	$72,883	$63,981	
Deduct reappropriations for:				
Mutual security program	447		1,944	
Atomic Energy Commission—construction	65	404	679	
Appropriations for railroad retirement taxes	625	660	640	
New obligational authority, present basis	80,236	71,819	60,718	$56,283
Deduct authorizations other than current appropriations	7,879	7,504	8,889	9,260
Current appropriations	72,357	64,315	[1] 51,829	47,023

[1] Includes supplemental appropriations estimated in this budget at about 0.5 billion dollars; hence appropriations actually enacted are 51.3 billion dollars.

The Congress enacted increasing amounts of new obligational authority after the beginning of hostilities in Korea in June 1950. This new obligational authority was much greater than the amount of budget expenditures for each year and also greater than budget receipts in each year. Thus it represented commitments for future spending in excess of the revenues then being provided by the tax system.

The estimate of total appropriations and other authorizations for the fiscal year 1954 and, likewise, the total of my recommendations for new obligational authority for the fiscal year 1955 are less than estimated budget expenditures and also less than estimated budget receipts for the corresponding years. This is in direct contrast to the substantial excess of appropriations over revenues in recent prior years. It means we now are reducing the large amount of outstanding unfinanced commitments incurred under past appropriations and are making possible lower future levels of expenditures.

The major national security programs still require the largest part of our new budgetary authorizations. Of the total new obligational authority recommended for the fiscal year 1955, 34.9 billion dollars, or about 62 percent, is for the military functions of the Department of Defense, the atomic energy program, the mutual military program with our allied nations of the free world, and the stockpiling of strategic and critical materials.

In the detailed review which the appropriations committees and the Congress make of the operations of each agency and its budget proposals before enacting new obligational authority it is necessary to have the budget proposals set forth separately for each agency. Part II

Digitized for FRASER

Federal Reserve Bank of St. Louis

of the 1955 budget document is organized on such a basis. It presents summary and detailed information on my recommended appropriations for each agency. The individual appropriations are supported by schedules which reconcile the amount of the appropriation recommended with the obligations which are expected to be incurred. The obligation figures are reconciled with the estimated expenditures. The activities carried on within the appropriations and the workloads involved are also described for individual appropriations.

This grouping of the budget proposals by agencies, as contrasted with grouping by program or function principally employed in the budget summaries, is not only required for congressional action but is also the essential presentation for those of our citizens who are interested in following the progress of the budget proposals in the Congress.

The following table is derived from part II of the 1955 budget document. It shows that the new obligational authority I am recommending for the fiscal year 1955 is 56.3 billion dollars. This is 35.1 billion

NEW OBLIGATIONAL AUTHORITY BY AGENCY

dollars less than the highest post-Korean amount of 91.4 billion dollars enacted for the fiscal year 1952. It is 15.5 billion dollars less than the amount recommended to Congress for the fiscal year 1954, in the budget document dated January 9, 1953, and 4.4 billion dollars less than the currently revised estimate for the fiscal year 1954.

UNEXPENDED BALANCES

In some cases, a considerable time period elapses between the enactment of an appropriation and the expenditure of all the Federal funds appropriated. For example, several years may elapse between the time a contract is negotiated pursuant to an appropriation for aircraft or other heavy military equipment and the time all the equipment ordered has been delivered and paid for by the Government. Thus many of the expenditures being made by the Government in the fiscal years 1954 and 1955 result from obligational authority enacted and from contracts negotiated in prior years.

During the fiscal year 1955, it is estimated that 45 percent of total budget expenditures will be from obligations incurred under appropriations and other authorizations enacted in years before 1955, and 55 percent will be from the new obligational authority I am recommending for 1955.

The reductions in appropriations that were made last year and the further reductions I am recommending for the fiscal year 1955 decrease the accumulated backlog of outstanding commitments which lead to later budget expenditures. Balances of appropriations unexpended at the end of the year and still available for expenditure during the next year are shown in the following table for each fiscal year since 1950. The amounts shown have been modified to reflect related technical changes in handling reappropriation items (see pp. M29–M30) and to restrict unexpended balances to items of appropriations, excluding, for example, public debt authorizations. For the most part,

UNEXPENDED BALANCES OF APPROPRIATIONS

[In billions]

Fiscal year	Amount brought forward into the year	Amount carried over to next year
1950	[1] $11.5	[1] $14.1
1951	[1] 14.1	[1] 50.3
1952	[1] 50.3	68.8
1953	68.8	78.7
1954 estimated	78.7	66.5

these appropriation balances have been obligated or committed, but the expenditures take place one or more fiscal years after the enactment of the appropriation.

BUDGET EXPENDITURES

Budget expenditures in the fiscal year 1955 are estimated at 65.6 billion dollars, a reduction of 5.3 billion dollars from the revised estimate of the fiscal year 1954 expenditures, a reduction of 12.3 billion dollars from the expenditures estimated in the 1954 budget document, and a reduction of 8.4 billion dollars from actual expenditures in the fiscal year 1953.

As mentioned earlier, the summary tables in the budget have been made more revealing by the presentation of expenditures of public enterprises on both a gross and a net basis. The difference between the gross and net figures reveals the magnitude of the receipts and collections of the "revolving funds" which are used for making new loans and other expenditures.

BUDGET EXPENDITURES BY MAJOR PROGRAM

[Fiscal years. In millions]

Major program	1955 estimated			1954 estimated		1953 actual

Federal Reserve Bank of St. Louis

In the summary tables of this budget, these receipts are labeled "applicable receipts of public enterprise funds." The table on the preceding page shows both gross and net figures for the fiscal year 1955, compared with net figures (on the old basis) for 1954 and 1953.

The fuller presentation in the summary tables does not have any effect on the budget surplus or deficit, or upon the changes in the public debt. Nor does it indicate any new method of financing these Government-owned enterprises. However, it does give a more complete disclosure of the Government's financial transactions with the general public.

As indicated in the preceding table, the term "budget expenditures" refers to the net expenditure figures. The term "gross expenditures" will be used wherever the activities of public enterprises are discussed on a gross basis. The table which follows shows the gross figures for all 3 years, reduced to the older net basis by a single deduction for each year at the bottom of the table.

GROSS EXPENDITURES BY MAJOR PROGRAM

[Fiscal years. In millions]

Major program	1953 actual	1954 estimated		1955 estimated
		Budget document	Current estimate	
National security	$50,274	$54,700	$48,721	$44,860
Veterans' services and benefits	4,327	4,590	4,190	4,223
International affairs and finance	2,656	2,604	2,249	1,885
Social security, welfare, and health	1,910	1,921	1,947	1,807
Housing and community development	2,118	1,696	2,357	1,903
Education and general research	277	288	278	223
Agriculture and agricultural resources	6,448	6,362	8,087	6,752
Natural resources	1,499	1,568	1,349	1,337
Transportation and communication	4,474	4,570	4,446	4,277
Finance, commerce, and industry	1,205	897	1,151	917
Labor and manpower	284	306	267	282
General government	1,444	1,558	1,178	1,164
Interest	6,583	6,420	6,600	6,875
Reserve for contingencies		40	75	150
Adjustment to daily Treasury statement basis	−292			
Subtotal	83,207	87,520	82,895	76,655
Deduct applicable receipts of public enterprise funds	9,225	9,593	11,993	11,085
Budget expenditures (net)	73,982	77,927	70,902	65,570

The figures for gross expenditures in this and related tables are derived from the detailed accounts of each Government agency contained in part II of the 1955 budget document. On this basis, both

Digitized for FRASER

Federal Reserve Bank of St. Louis

the gross expenditures and the applicable receipts include some transactions relating to private bank loans guaranteed by the Commodity Credit Corporation and by the Export-Import Bank which involve no use of governmental funds. These amounts are:

GROSS EXPENDITURES AND APPLICABLE RECEIPTS, GUARANTEED LOANS

[Fiscal years. In millions]

Program and agency	1953 actual	1954 estimated		1955 estimated
		Budget document	Current estimate	
International affairs and finance: Export-Import Bank	$4	$5	$82	$188
Agriculture and agricultural resources: Commodity Credit Corporation	340	383	1,564	274

In the sections of this message discussing international affairs and agriculture, these figures are excluded from the totals to make them comparable to the basis used in other public enterprise accounts. This has no effect on net budget expenditures.

My recommendations for each of the major programs of Government listed in the above tables are discussed in detail later in this message. Budget expenditures by agency are described in detail in part II of the 1955 budget document, and are summarized in the table on the following page.

The analysis on page M37 shows that budget expenditures for the national security program and for those items which are relatively fixed under provisions of existing and proposed legislation amount to an estimated 59 billion dollars in the fiscal year 1955, 90 percent of all budget expenditures.

The remaining "all other," 6.6 billion dollars, or 10 percent of the total, include some items related to the first two categories. For example, those related to our national security effort are the international programs for economic development, the Selective Service System, and civil defense. Examples of programs which are partly controllable through the budgetary process are the mortgage purchases of the Federal National Mortgage Association and a few relatively small grant-in-aid programs. The bulk of this category is made up of expenditures for the day-to-day operations of the Government, such as law enforcement and administration, tax collection, the various regulatory agencies, the administration of other services rendered to the public, and the cost of direct civil public works.

[1] Adjusted for purposes of comparability except for reorganization transfers.
[2] Less than 500,000 dollars.

The record of budget expenditures since the outbreak of aggression in Korea in June 1950 shows considerable variation in the relative changes from year to year in the three major categories shown. While expenditures for national security have risen markedly and those for uncontrollable major programs have fluctuated within rather narrow limits, Government spending in all other categories has been steadily declining.

RECEIPTS FROM AND PAYMENTS TO THE PUBLIC

Budget receipts, expenditures, and the budget surplus or deficit reflect transactions of funds which belong to the Federal Government. There are many other financial transactions of the Federal Government which involve funds the Government holds in trust for others, such as the social security trust funds. The transactions of these trust funds are shown separately in part III of the 1955 budget docu-

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

ment. They are not included in the budget totals of receipts and expenditures. As a rule, the trust funds are now building up accumulations; that is, as they build reserves for future liabilities, they are currently taking in more money than they pay out.

By consolidating the trust funds with the budget transactions, and by eliminating intragovernmental and certain noncash transactions, it is possible to obtain a measure of the flow of money between the Federal Government as a whole and the public. Such a consolidation is presented and explained in Special Analysis A, "Receipts from and payments to the public," on page 1099. It is sometimes called the "consolidated cash statement."

RECEIPTS FROM AND PAYMENTS TO THE PUBLIC, EXCLUDING BORROWING

[Fiscal years. In millions]

	1953 actual	1954 estimated		1955 estimated
		Budget document	Current estimate	
Cash receipts from the public	$71,282	$75,150	$74,932	$70,842
Cash payments to the public	76,554	81,797	75,166	70,727
Excess of cash receipts				115
Excess of cash payments	5,272	6,647	234	

The trust funds of our social security system reflect the increase in rate provided under existing law and the expected increase in payments resulting from proposed legislation increasing the coverage and benefits.

If the automatic increase in rate had taken place with no recommendation for increased coverage and benefits, the excess of cash receipts over payments estimated for the fiscal year 1955 would have been a greater amount.

NATIONAL SECURITY

This budget is based on a new concept for planning and financing our national security program, which was partially applied in the budget revision recommended last spring for the fiscal year 1954. Our military planning in previous years had been based on several successive assumed fixed dates of maximum danger, which were extended from time to time with procurement and personnel plans focused to achieve maximum readiness by each such date. This budget is aimed instead at providing a strong military position which can be maintained over the extended period of uneasy peace.

It points toward the creation, maintenance, and full exploitation of modern airpower. Our military planners and those of the other nations of the free world agree as to the importance of airpower. But

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

air forces must be complemented with land forces, amphibious forces, antisubmarine warfare forces, and fighting ships. The added emphasis on airpower complements our plans for improving continental defense against possible enemy attack. We expect to continue to improve the combat effectiveness of our forces by the application of new weapons and new techniques, and ultimately achieve far greater flexibility than heretofore attainable. The reassembly of our strategic reserve forces will be as dictated by world conditions and the forces kept in a high state of readiness to cope with any possible acts of aggression. This budget aims toward building to a maximum effectiveness all of this complex of military strength. It provides greater expenditures for airpower in the fiscal year 1955 than in any year since the close of World War II. The reorientation of our defense strategy makes this possible within a lower level of total expenditures for national security.

With the shift in emphasis to the full exploitation of airpower and modern weapons, we are in a position to support strong national security programs over an indefinite period with less of a drain on our manpower, material, and financial resources.

Today there is a truce in Korea. After 3 years of hostilities, we are now in the first year of an armed peace. But we are a long way from achieving the kind of peace that is our goal. As long as the Communist threat to the free world exists, we must plan to maintain effective military strength in close cooperation with the other nations of the free world.

Our basic security objective is to prevent another outbreak of aggression. We must create the necessary deterrent to any possible aggressor by maintaining a strong military position at home and abroad. To do this takes determination, human and material resources, and careful planning.

The national security section of the budget includes not only the military functions of the Department of Defense, but also the mutual military program, the development of atomic energy, and the stockpiling of strategic and critical materials. These four major programs are related and designed for the basic purpose of our security. They complement each other and must be assessed in conjunction with the long-range planning which underlies the fiscal and legislative programs of this administration.

The previous history of our military budgets has been one of feast or famine, depending upon the state of world affairs. In peacetime, appropriations have customarily been much reduced. In wartime, financial considerations have been largely ignored. Our present budgetary plans represent a departure from these practices. They provide for the continued maintenance of a strong military force

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

which is within the financial capability of a sound economy. We cannot afford to build military strength by sacrificing economic strength. We must keep strong in all respects.

It will be noted from the table on page M42 that expenditures for the Department of Defense and the stockpiling program have been reduced in the fiscal year 1954 and I am recommending a further reduction for the fiscal year 1955. The reduction in the total Department of Defense expenditures will be effected despite the fact that expenditures for aircraft, shipbuilding, electronics, guided missiles, construction, research and development, and many other defense programs will continue at close to record peacetime levels. I am also recommending some increased expenditures in the fiscal year 1955 for the mutual military program and for atomic energy which will bring expenditures for these two programs to record levels. Nevertheless total spending for national security is estimated to decline about 1.6 billion dollars from the fiscal year 1953 to 1954, and an additional 3.9 billion dollars from 1954 to 1955.

This decline in national security expenditures reflects the dynamic long-range plan recommended by the Joint Chiefs of Staff for our military forces, the savings resulting from the economies effected by this administration, the cessation of hostilities in Korea, and the decrease in procurement—particularly with respect to vehicles, ammunition, and soft goods—made possible by the improved supplies and materiel position.

The defense team, both military and civilian, is working hard toward improvement of the organization, procedures, and methods of the entire Defense Establishment. Already much progress has been made. The Office of the Secretary of Defense has been reorganized, and the administrative structures of the three military departments are under review, with the purpose of making the Secretaries of these departments truly responsible administrators and establishing clearer lines of responsibility within this concept. This will help in achieving the maximum economies that can be realized through improved management and administration.

Considerable progress has been made in standardizing military procurement, and it is planned to reduce sharply the present approximately 4 million different procurement items. This alone will ultimately save hundreds of millions of dollars in procurement, warehousing, and distribution costs. The adoption of commercial maintenance practices for aircraft, vehicles, and other equipment is currently saving millions of dollars.

Better transportation methods are being worked out which will produce additional economies. Savings are also being effected in

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

personnel, procurement, and supply activities. Through these and similar economy programs, more defense for the taxpayers' dollar will be realized.

Consistent with these plans for a sustained military capability at the lowest possible cost is an integrated plan of continental and civil defense. Such planning is necessary in order to hold our civilian losses from possible enemy attack to a minimum.

Last summer I told the American people that "the Soviets now have the capability of atomic attack upon us, and such capability will increase with the passage of time." I made this statement shortly after it was established that the Soviet Union had successfully detonated a thermonuclear device which, if successfully converted into an offensive weapon and if exploded over our American cities, would be capable of effecting unprecedented destruction.

The administration has taken a number of actions to deal with this serious prospect. Funds are included in the Department of Defense budget to expand the system of continental defense which coordinates the actions of our radar outposts and our air, naval, and land forces. It will provide improved early warning of enemy attack and the men and equipment to resist any such attack. Expenditures for continental defense in the fiscal year 1955 are expected to be greater than ever before in our history.

This budget reflects a new concept of civil defense which takes account of the destructive threat of modern weapons and which emphasizes improved warning of impending attack and planning for the dispersal of populations of potential target cities in advance of enemy attack.

Much planning, organization, and training remains to be done, however, to make this strategy of civil defense fully effective at all levels of government. It will be the Federal responsibility, as reflected in this budget, to provide warning of impending attacks, and to stockpile medical supplies. The Federal Government will not assume the responsibilities which belong to local governments and volunteer forces, but will supplement State and local resources, provide necessary information on weapons effects, and advise and assist States and localities.

Many activities throughout the budget are related, directly and indirectly, to the national security. They are not all classified as national security for many reasons. Civil defense is one of these activities. The major part of continental defense is in the military budget, but, because of the community aspect of the civil defense program, funds for it are included as heretofore in the section on housing and community development.

Department of Defense.—The total of the first six items listed in the preceding table indicates the portion of our national security expenditures which is used for the direct support of our military forces. For these items the budget recommends 31.0 billion dollars of new obliga-

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

tional authority and estimates expenditures of 37.6 billion dollars in the fiscal year 1955. These expenditures are 4.0 billion dollars less than the amount now estimated for 1954. The revised estimate for 1954 is 2.1 billion dollars less than the actual spending in 1953—in marked contrast with the expectation in the budget document of January 9, 1953, that such expenditures in the fiscal year 1954 would exceed those in 1953.

The changing military situation following the sudden attack on Korea brought unbalanced programs and uncoordinated financing during the fiscal years 1951 to 1953. Steps have been, and will continue to be, taken by this administration to bring these factors into balance. One result has been the elimination of the previously forecast increase in expenditures in 1954. Because of the long lead-time needed to procure military equipment, the expenditures have not come down to the level of the new obligational authority. In 1954, with new obligational authority of 34.5 billion dollars, the expenditures are estimated to be 41.6 billion dollars. Likewise, in 1955, though I am recommending 31 billion dollars in new obligational authority, the expenditures are estimated at 37.6 billion dollars.

At the outbreak of hostilities in Korea we had about 1.5 million men under arms. The Korean fighting and general defense buildup brought this figure up to an average of 2.4 million in the fiscal year 1951; to an average of 3.5 million in fiscal year 1952 and a peak strength of 3.7 million in the last quarter of that fiscal year; and to an average of 3.6 million in fiscal year 1953.

Recently, I announced our plan to withdraw two Army divisions from Korea and return them to the United States as an initial step in the progressive reduction of United States ground forces in Korea. This withdrawal is made possible by the cessation of hostilities, the increased mobility and striking power of our air and other combat forces, and by the increasing capabilities of the Republic of Korea forces. This action does not impair our readiness and capacity to oppose any possible renewal of Communist aggression with even greater effect than heretofore if this should be necessary. United States military forces in the Far East will be maintained at appropriate levels, with emphasis on highly mobile naval, air, and amphibious units. Funds are provided to the Department of Defense in this budget for the continued support of Republic of Korea forces at a high level of effectiveness.

As the striking power of our combat forces is progressively increased by the application of technological advances and the growth of airpower, the number of military personnel is being reduced. Total military personnel is scheduled to be reduced from the present level of more than 3.4 million to approximately 3.3 million by June

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

30, 1954, and a little over 3 million by June 30, 1955. On this basis, this budget provides for an average of 3.2 million military personnel during the fiscal year 1955, compared with an average of 3.4 million during the fiscal year 1954.

The efficiency of our combat forces is contingent upon having experienced, well-trained career personnel. In the State of the Union Message I indicated that pay alone will not retain in the Armed Forces, in competition with industry, the necessary proportion of long-term personnel. We must provide a more generous use of other benefits important to service morale.

Under the long-range plan recommended by the Joint Chiefs of Staff, the number of Army divisions may be less than those currently organized, but increased mobility and the availability of modern weapons will provide each division with increasingly greater striking power. As part of the program to improve continental defense, the number of guided-missile antiaircraft battalions will be increased substantially.

At the present time, the Air Force, Navy, and Marine air forces have a total active inventory of approximately 33,000 aircraft, of which approximately one-third are jet aircraft. The emphasis on airpower is reflected in the objective of increasing the active aircraft inventory to more than 40,000 during the next 3 years, with more than half of these aircraft to be jets. At that time the Air Force will have 137 wings—of which 126 will be combat wings—augmented by appropriate combat support units. Naval airpower will include 16 carrier air groups and 15 antisubmarine warfare squadrons, while the Marines will maintain 3 Marine air wings. In each case, these units will be supplemented by appropriate combat support units.

The Navy, in addition to increasing its effective air strength, will continue to modernize the fleet, with emphasis on the combatant elements. The Marine Corps will maintain three combat-ready divisions.

The military plan for forces to be maintained in the fiscal year 1955 permits a reduction of approximately 600 million dollars in the expenditures required for military pay, allowances, and other direct military personnel costs. Operation and maintenance—sometimes called housekeeping—is being held to a minimum, and expenditures in this area will be reduced.

Major procurement expenditures as a whole will decline by about 15 percent from 1954 levels, but the 14.5 billion dollars expected to be spent for this purpose will still be almost four times as great as the amount spent during the fiscal year 1951—the first year of buildup following the attack in Korea. Because the capital investment will already have been made for much new equipment and for a considera-

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

ble portion of the desired mobilization reserve of materiel and supplies, expenditures for vehicles, ammunition, production equipment, and some other major equipment items will be lower in 1955. The accumulation of mobilization reserves is being scheduled over an extended period of time, with a view toward keeping production facilities of key military items in continued production. Provision of capital equipment and modernization of aircraft will continue at a rapid pace in 1955, and expenditures for aircraft procurement for the Air Force and naval aviation will be at the same general level as in 1954. Aircraft procurement expenditures will account for 22 percent of total Department of Defense expenditures in 1955, compared with 20 percent in 1954, 17 percent in 1953, and 13 percent in 1952. Shipbuilding expenditures will continue at approximately the same level as in 1954, but the new obligational authority I am recommending will provide for a slightly higher level of shipbuilding in the years immediately ahead in order to meet the problem of "block obsolescence" of the fleet, a major portion of which was built during World War II.

Expenditures for military public works in the fiscal year 1955 will be maintained at the 1954 level, as work progresses on air bases, antiaircraft and radar sites, and other necessary installations. Expenditures for reserve components are expected to increase by about 20 percent as the buildup of a vigorous reserve program continues. Research and development will continue at a high level.

The following table shows, by major cost category, the elements making up the Department of Defense budget.

DEPARTMENT OF DEFENSE

Mutual military program.—Because our own national security is vitally dependent on the continued strength of our allies throughout the free world, we have undertaken over the past several years to assist them in building the military forces necessary to deter Communist aggression from without or subversion from within. Since the beginning of the mutual defense assistance program in fiscal year 1950, when the armed strength of the free world was at low ebb, 18 billion dollars have been made available to furnish military equipment and training to friendly nations. More than half of this amount will have been spent by the end of the fiscal year 1954. This assistance, combined with their own resources, enables our allies and friends to equip and train an equivalent of 175 army divisions, about 220 air force squadrons, nearly 1,500 naval aircraft, over 440 naval vessels, and related combat and logistic units to back up these forces.

These friendly forces located in key strategic areas for the defense of the free world are largely supported by the countries themselves. In addition, substantial forces are exclusively supported by our allies. Without all of these forces the United States would be faced with a potential defense burden so costly that it could well sap the economic vitality of our Nation. These forces constitute an integral part of the military strength of the free world.

Since the mutual military program is so closely integrated with our own military plans and program, it is shown this year in the defense chapter of part II of the budget, and is discussed here as part of our national security program. Because the mutual military program is also an integral part of our foreign policy, the Secretary of Defense will continue to carry out his responsibilities for the mutual military program under the foreign policy guidance of the Secretary of State and within the terms of the mutual security legislation passed by the Congress.

In this budget, mutual military program funds are shown under the new obligational authority of the Department of Defense. However, this arrangement is being reviewed and my recommendations will be set forth in connection with the authorizing legislation I shall recommend to the Congress. This authorizing legislation should permit adjustments in the composition of our aid programs to meet changing needs due to new international developments. It is therefore essential that the Congress maintain the present Presidential powers of transferability of all foreign assistance funds, whether for military, technical, or economic assistance.

The recent Paris meeting of the North Atlantic Treaty Organization set realistic force goals for the 14 member nations, which will provide for a substantial increase in the defensive strength of NATO. The mutual military program provides the bulk of the initial equipment

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

and certain mobilization reserves needed to meet these new goals. Meanwhile, our allies are themselves carrying heavy burdens. Their military budgets during the period of this program exceed by many times the value of the equipment we have so far delivered. They have expressed their determination to continue their efforts at high levels.

Despite the progress which NATO has made, we are nevertheless faced with a serious need to achieve the unity in Europe which is necessary for strength and security in the North Atlantic area. As is well known, the treaty constituting the European Defense Community is not as yet in effect. It is not necessary for me to dwell on the reasons why the EDC is urgently needed. However, I am convinced that the Europeans who must decide on this essential next step toward building a European community are fully aware of what is at stake and will in the near future reach their decisions.

NATO is engaged in a reappraisal of strategy and tactics to reflect the prospective availability of atomic and other new weapons. These studies, to be meaningful, require the dissemination of certain information regarding atomic weapons to NATO commanders. This will have a significant impact on NATO planning and provide a greater measure of security for all. I shall recommend that the Congress amend the Atomic Energy Act to permit us to disseminate classified information to our allies with regard to the tactical use of atomic weapons. This, of course, would be accomplished under stringent security regulations. It is essential that action on this matter be taken by the Congress during the current session.

In Indochina, where the French Union and Associated States forces are holding back Communist efforts to expand into the free areas of Asia, the United States is making a major contribution by providing military equipment and other military support. The amount as well as the timeliness of this military assistance will be an important factor in improving the situation. Additional native forces must be trained and equipped to preserve the defensive strength of Indochina. This assistance is required to enable these gallant forces to sustain an offensive that will provide the opportunity for victory.

We have helped the Chinese Nationalist forces to strengthen the defense of the Island of Formosa. This assistance will be continued as will assistance to other countries of the free world such as the Philippines, Thailand, and some of the American Republics.

The mutual military program, like our domestic military program, is now designed to build strength for the long pull rather than meet a given target date. Accordingly, we will concentrate on helping equip forces which our allies can themselves support over a long period of time, with minimum dependence upon aid from the United States.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

We have succeeded in substantially reducing the need for additional funds in fiscal year 1955 compared to previous years.

Our mutual security program continues in two related parts—the economic and technical program is much smaller in amount than the mutual military program and is discussed in a later section under international affairs. In that section is a comparative summary of the combined program.

Development and control of atomic energy.—In my speech before the United Nations on December 8, 1953, I made proposals looking toward a resolution of the atomic danger which threatens the world. My budgetary recommendations for the program of the Atomic Energy Commission for the fiscal year 1955 contemplate both new efforts to advance peacetime applications of atomic energy and also additional production of fissionable materials. All men of good will hope that these fissionable materials, which can be used both for peace and for military defense, will ultimately be used solely for peace and the benefit of all mankind.

Under the recommendations in this budget, expenditures of the Atomic Energy Commission will rise in the fiscal year 1955 to the highest point in our history. Operating costs will rise significantly as newly completed plants are brought into production. Capital expenditures will continue at a high level as construction goes forward on major new plants authorized in recent years. New obligational authority recommended in 1955 is above that provided in 1954, because of the expansion in operations. Initiation of new construction projects will be at a lower level than in recent years, and they will be limited essentially to facilities directly related to the production program and to several urgently needed research and development facilities. In all areas of activity the Commission is making strenuous efforts to effect economies; results are being accomplished in the reduction of unit costs.

The increase in expenditures for operations from 912 million dollars in the fiscal year 1954 to 1,182 million dollars in 1955 is due primarily to expanded operations at the Commission's facilities at Oak Ridge, Paducah, Portsmouth, Hanford, and Savannah River, as plants are completed and placed in operation. To meet the greater requirements for raw materials for this enlarged productive capacity, increased amounts of uranium ores and concentrates will be purchased. Due to vigorous efforts in recent years to expand our sources of supply in this country and abroad, increased amounts are now being made available to match the increase in requirements.

Atomic reactor development will be focused particularly upon the development of industrial atomic power for peacetime uses. The

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

Commission will move forward on the construction of a large atomic power reactor to be initiated in the fiscal year 1954, marking a significant advance in the technology of peacetime atomic power. Research and development, including construction of experimental facilities, will continue also on several other types of reactors which show promise of ultimately producing power at economic rates.

The launching—this month—of the first atomic submarine, the U. S. S. *Nautilus*, will be followed in the fiscal year 1955 by the launching of the U. S. S. *Seawolf*, a second atomic submarine of different design. Research on the more difficult problems of aircraft propulsion by atomic energy will continue.

With the advent of various technical developments relating to atomic power and with the greater availability of raw materials and fissionable materials, the time has arrived for modification of the existing atomic energy legislation to encourage wider participation by private industry and by other public and private groups in this country in the development of this new and uniquely attractive energy source for peaceful purposes. Such widespread participation will be a stimulating and leavening force in this important field and will be consistent with the best traditions of American industrial development. The congressional Joint Committee on Atomic Energy last summer held public hearings which have served a most useful purpose of identifying and developing both the problems and the opportunities which emerge as preparations are made to depart from the Federal Government's existing monopoly in this field. Legislation is being recommended to the Congress which would encourage such participation and yet retain in the Federal Government the necessary controls over this awesome force.

Further amendment of the Atomic Energy Act is needed also to enable us to realize the full value of our atomic energy development for the defense of the free world. I shall recommend amendments which would permit, with adequate safeguards, a greater degree of exchange of classified information with our allies, in order to strengthen their military defenses—as already mentioned—and to enable them to participate more fully in the development of atomic power for peacetime purposes. I shall recommend also an amendment which would permit the transfer of fissionable material to friendly nations to assist them in peacetime atomic power development, particularly those nations which are supplying us with uranium raw materials. This proposed amendment, as well as the previously mentioned amendment, will provide adequate safeguards for the security of the United States. These legislative recommendations are independent of my recent proposal for the establishment of an international agency to advance the peacetime benefits of atomic energy, for which additional legislation would be needed.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

It is now feasible to plan to terminate Federal ownership and operation of the towns of Oak Ridge, Tennessee, and Richland, Washington. To enable the citizens of these communities to manage their own affairs in a more normal fashion, legislation will be recommended which would permit them to purchase their own homes and to establish self-government in these communities.

Stockpiling of strategic and critical materials.—Considerable progress has been made in the fulfillment of the national stockpile goals, and further substantial progress is expected during the fiscal year 1955. By the end of 1955 about 50 of the 73 materials objectives will be virtually completed. Consequently, expenditures will decline sharply from 919 million dollars in 1953 to 770 million dollars in 1954 and 585 million dollars in 1955. The total value of all stockpile objectives is estimated at 7.2 billion dollars, of which about 5.5 billion will be on hand by June 30, 1955, to meet industrial and mobilization requirements in times of emergency. In addition to these direct expenditures from stockpile appropriations, the borrowing authority provided under the Defense Production Act, discussed in the finance, commerce, and industry section of this message, is used primarily for expanding the supply of critical materials. Net expenditures under this authority are estimated at 381 million dollars in the fiscal year 1954 and 308 million dollars in 1955. Therefore, a total of nearly 900 million dollars will be spent in the fiscal year 1955 to assure an adequate supply of critical materials in the event of an emergency.

VETERANS' SERVICES AND BENEFITS

Since 1940 the number of veterans has risen nearly fivefold and it is still increasing rapidly as men are discharged from the Armed Forces. There are now more than 20 million veterans, who, with their families, constitute 40 percent of our people. Over 300 laws provide a variety of special benefits and services to this large segment of our population.

It is our firm obligation to help our veterans overcome the handicaps which they incurred in the service of the Nation so they can return to their normal civilian pursuits. We must first of all do what we can to ease the burdens of veterans disabled in service and the families of those who have died from service causes. This is our primary responsibility, and generous benefits to them are the core of our veterans' programs.

Secondly, we must make available readjustment aids through well-conceived and properly administered programs for those veterans discharged after service during national emergencies.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

Finally, we must remember that the best way to help our millions of veterans is by making it possible for them to share fully in the economic and social gains of our country. This means assuring them adequate job opportunities. It also means assuring them, both during and after military service, of the same protection under the broad social-security programs that is provided for nonveterans. Progress in achieving these objectives will lessen the need for pensions and other special benefits for the vast majority of veterans who, fortunately, did not incur disabilities during their service.

The appropriations recommended in this budget will enable the Government to discharge fully our obligations to veterans in the coming fiscal year. Funds are included to provide for all essential benefits and services, in some cases exceeding the amounts spent in any previous year. At the same time allowance has been made for anticipated savings from improvements in efficiency, resulting in part from a general reorganization of the Veterans Administration.

VETERANS' SERVICES AND BENEFITS

[Fiscal years. In millions]

Program or agency	Expenditures			Recommended new obligational authority for 1955

[1] Compares with new obligational authority of 4,132 million dollars in 1953 and 4,229 million dollars in 1954.

Readjustment benefits.—Education and training and loan guaranty benefits are provided for veterans of World War II and the current emergency. In addition, special vocational rehabilitation assistance

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

is provided for service-disabled veterans of both periods, and unemployment compensation is available to veterans of the Korean conflict.

Expenditures of 652 million dollars for all readjustment benefits in the fiscal year 1955 are estimated to be about 8 percent higher than in the current year. While expenditures for benefits to veterans of the Korean conflict are increasing, outlays for education and training, rehabilitation, and loan guaranty benefits to World War II veterans are declining. Thus, the proportion of total outlays for all readjustment benefits going to veterans of the Korean conflict is expected to rise from about one-half to about four-fifths in the one year.

During the fiscal year 1955 an average enrollment of 537,000 veterans—more than 30,000 above the previous year—is expected in school, job, and farm training courses. Of this number, an estimated 412,000 are veterans of the Korean conflict.

A decline in expenditures for loan guaranty and other benefits from 1953 to 1955 reflects the discontinuance of payment by the Government of a gratuity up to 160 dollars on each guaranteed loan issued after September 1, 1953.

Unemployment compensation payments to veterans will increase. This is the result of the growth in the number of eligible veterans. While existing legislation was intended to provide benefits during the transition period after discharge, it does not include a limit on the time during which veterans may apply for unemployment compensation. I recommend that the law be changed to provide for a time limit for filing claims after discharge. This should provide reasonable time for veterans to make their readjustment to civilian life and to establish benefit rights under the general unemployment compensation program. Limits are now provided in the Servicemen's Readjustment Assistance Act for other benefits.

Compensation and pensions.—The estimated expenditures of 2.5 billion dollars will provide for compensation and pension benefits to an average of 3.3 million individuals and families. This total includes nearly 1.8 billion dollars in compensation payments to service-disabled veterans and families of those veterans who have died from service-connected causes, and 700 million dollars for non-service-connected pensions. It also includes 45 million dollars for subsistence payments to an average of 20,000 disabled veterans in the vocational rehabilitation program and for 115,000 burial awards.

Expenditures for compensation and pensions have increased sharply in the last decade, and the long-run outlook on the basis of present laws and veteran population is that these expenditures will rise to double their present annual amount within several decades. At the same time, a large proportion of the present or potential recipients

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

of these benefits will also qualify for payments under the Government's old-age and survivors insurance program.

While the conditions under which veterans are entitled to compensation and pension benefits are largely specified by law, the Administrator of Veterans' Affairs necessarily has important responsibilities for their administration, and the budget estimates for the fiscal year 1955 assume additional efforts to prevent unsound practices and abuses.

Insurance and servicemen's indemnities.—The Government reimburses the veterans' insurance trust funds for payments made for deaths traceable to war hazards in the case of policyholders under the national service life insurance contracts issued mostly to World War II veterans and under the United States Government life insurance policies issued to veterans of earlier periods. The Government also pays certain other insurance benefits directly to policyholders. Insurance payments are expected to decline from 84 million dollars in the fiscal year 1954 to 45 million dollars in 1955.

Since the enactment of the Servicemen's Indemnity Act of 1951 as a substitute for a Government life insurance program, the families of servicemen who die on duty or within 120 days after separation are paid benefits at the rate of $92.90 a month for 10 years. These payments are expected to increase 41 percent from the 1954 level to 30 million dollars in 1955.

Hospital and medical care.—The estimates for current expenses of the veterans' hospital and medical programs will provide for an average of 110,200 patients in Veterans Administration and contract hospitals and 25,700 members in Veterans Administration and State domiciliary facilities during the fiscal year 1955. The cost of caring for the increase of about 2 percent in the hospital load compared to the level now estimated for 1954 is offset, however, by lower amounts for the medical and dental outpatient care programs. The lower estimates for the dental outpatient care program are based primarily upon the recommendation that the Congress extend for 1955 the language enacted for the fiscal year 1954 in Public Law 149, 83d Congress, limiting dental treatment for noncompensable disabilities to those cases for which application for treatment is made within one year of discharge.

The budget includes recommended new obligational authority of 44 million dollars for new construction and improvements, including 30 million dollars to complete new hospitals at San Francisco and Topeka, toward which the Congress made an initial appropriation for the fiscal year 1954.

http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

I am recommending increased appropriations to provide for an average employment in the Veterans Administration medical and hospital programs of 136,000 during the fiscal year 1955, an increase of 10,500 from average employment in 1953 and 3,000 more than in the current year. This increase provides for operation of the new hospital facilities which have been constructed.

Other services and administration.—General administrative expenses of the Veterans Administration are estimated to decline further in the coming year as the result of declining workloads for readjustment of World War II veterans as well as improved performance resulting from better organization and greater efficiency. Average employment of 35,600 in Veterans Administration nonmedical programs is estimated for 1955, 11 percent below employment in the current year and 17 percent less than in 1953.

Trust funds.—Under the United States Government life insurance and national service life insurance trust funds, nearly 7 million policies continue in force, carrying 44 billion dollars of life insurance issued before enactment of the Servicemen's Indemnity Act of 1951. The receipts of these funds now roughly balance their disbursements. The transactions of these, as of other, trust funds are not included in the budget totals.

Federal Reserve Bank of St. Louis

affairs and move toward a lasting peace. The budget for international affairs and finance includes funds required for the conduct of our foreign affairs, for the programs for economic and technical development abroad, and for our foreign information and exchange program.

The mutual military program, which was formerly included in the budget along with these programs under the heading "International security and foreign relations" has been discussed in this budget message as part of the national security program. At the same time, military assistance is intimately related to and must be administered in the furtherance of our foreign policy.

The extent of our assistance under both the mutual military program and mutual economic and technical program is shown in a summary table below. This table covers all components of the present mutual security program. This entire program is directed toward the establishment of conditions overseas which, in one way or another, contribute to our own security and well-being.

MUTUAL SECURITY PROGRAMS, MILITARY AND ECONOMIC

[Fiscal years. In millions]

	1953 actual	1954 estimated	1955 recommended or estimated
Expenditures:			
Mutual military program	$3,954	$4,200	$4,275
Mutual economic and technical program	1,702	1,300	1,125
Total	5,656	5,500	5,400
New obligational authority:			
Mutual military program [1]	4,236	3,800	2,500
Mutual economic and technical program [2]	1,907	926	1,010
Total	6,143	4,726	3,510

[1] Does not include reappropriations of $321 million for 1953 and $1,763 million for 1954.
[2] Does not include reappropriations of $128 million for 1953 and $179 million for 1954.

Our national security and international programs are designed to deter would-be aggressors against the United States and other nations of the free world, and to strengthen our efforts for peace by all appropriate means including diplomatic negotiations with the Soviets. With a position of strength, an effective conduct of our foreign relations by the Department of State is the keystone of our efforts to win our way to peace. There has never been a time when the future security and welfare of our country were more dependent upon the exercise of wise leadership in the realm of world affairs. My recommendation for funds for the Department of State will enable it to meet this challenge.

Federal Reserve Bank of St. Louis

Some countries are still facing such economic conditions that they are not able solely by their own efforts to support the desired military effort or to provide for the economic growth and progress essential to our mutual objectives. It is thus still necessary that supplementary goods, services, and technical skills be provided by the United States. It is for these purposes that funds for economic and technical development are requested for fiscal year 1955.

Through our information and exchange program we are attempting to achieve a clear understanding by others of our aims, objectives, and way of life and a better understanding by us of the aspirations and cultures of other countries. Such mutual understanding increases our ability to exercise strong, sympathetic, and cooperative leadership in the mutual efforts of free peoples to achieve their common goals.

[1] Gross expenditures exclude private bank loans guaranteed by the Export-Import Bank and net repayments thereof in the amounts of 4 million dollars in 1953, 82 million dollars in 1954, and 188 million dollars in 1955. Such amounts are included in table 1 and Special Analysis B.

During the past year progress has been made toward the accomplishment of the objectives of our international programs. Not only have our allies and friends grown in military strength, but also a continued high level of production and increased gold and dollar reserves have permitted European countries to become more nearly self-supporting. This improvement makes it possible for estimates of expenditures for economic and technical programs included in this budget to be significantly lower than the already reduced level of the fiscal year 1954. Significant contributory factors in this progress have been our assistance in past years and the positive and constructive fiscal and other economic measures which have been taken by the other countries themselves. As a result the fiscal year 1955 represents, in a sense, a

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

period of transition from heavy dependence by a large number of countries upon massive bilateral economic assistance from the United States to the use of such assistance in more limited circumstances. Progress in such a transition will generally depend upon the extent to which our own policies, and those of our friends, contribute to increased private investment, increased exports to the United States, internal financial and economic reforms in some countries, and multilateral cooperation for the achievement of strong and self-supporting economies.

Conduct of foreign affairs.—The burden of the vastly enlarged responsibility involved in our international affairs falls heavily upon the Department of State since the Secretary of State is the officer responsible, under the President, for the development and control of all foreign policy and for the conduct of our relations with foreign governments and international agencies. Successful discharge of this broad responsibility calls for wise and informed diplomatic support to our national leaders in negotiations carried on at the highest levels as at Bermuda and Berlin. It requires the day-to-day representation of our national interest through some 273 diplomatic missions and consular offices abroad. We also must continue to give our firm support to the United Nations and other international organizations, and bear a part of the costs of these organizations and their programs. A successful administration of our foreign policy requires the State Department to report and appraise political, economic, and social conditions and trends abroad; to provide foreign policy guidance to all agencies carrying on programs overseas; and to coordinate in the field all foreign policy aspects of overseas programs. Finally, advice must be furnished as to the foreign policy implications of domestic programs.

Net budget expenditures for the conduct of foreign affairs in the fiscal year 1955 are estimated at 125 million dollars. This expenditure represents a decrease of 4 million dollars from 1954, resulting from reduction of personnel and other costs of the Department of State including the curtailment of civilian occupation activities in Germany.

Economic and technical development.—Net budget expenditures for economic and technical development in the fiscal year 1955 are estimated at 1,028 million dollars, compared with 1,555 million dollars in the fiscal year 1954 and 1,960 million dollars in 1953.

This budget, as did the fiscal year 1954 budget, reflects proportionately greater emphasis on programs in Asia, Africa, and Latin America. It contemplates new appropriations for aid to very few European countries.

270000—54——IV

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

In the Far East there is a need for contributions to provide for relief in Korea and, now that hostilities have been terminated, for an expanded reconstruction program for that war-devastated country. Funds are also recommended to maintain the strength and security of Formosa and to support further the effort of our friends combating Communist aggression in Indochina. This budget also provides for technical assistance and economic development in India, Pakistan, the Philippines, and other nations of Asia to encourage continued progress in their efforts to improve the living conditions of their people.

With respect to the Near East the budget provides for helping relieve the plight of Arab refugees through contributions to the United Nations refugee agency, and for technical assistance and supplementary economic development in the Arab States, Israel, and Iran.

Provision is also made in the budget for continuing the technical assistance program for Latin America. This program, which has existed for a number of years, contributes to a reduction of social and economic problems upon which communism feeds and which hampers the development of stable and growing economies.

Surplus agricultural commodities.—I plan to request authority soon to use a part of our accumulated surpluses of agricultural products to assist in strengthening the economies of friendly countries, and otherwise to contribute to the accomplishment of our foreign policy objectives. Authority will be requested to use for this purpose over a 3-year period up to 1 billion dollars worth of commodities held by the Commodity Credit Corporation. This budget anticipates a request for a supplemental appropriation of 300 million dollars for the fiscal year 1955 to reimburse that Corporation for commodities used.

This program for use of agricultural surpluses is designed to complement our general program of economic and technical development and must be closely coordinated with it. The program for use of surplus agricultural commodities involves the use of stocks held by the Commodity Credit Corporation. No additional budget expenditures will be required for these commodities.

It should be emphasized in connection with this program that it is purely temporary, predicated upon adoption of our domestic agricultural program which should not involve the continued accumulation of large surpluses. Special safeguards will be provided which will require that commodities furnished must be in addition to amounts which otherwise would have been imported and must not displace the usual marketings of the United States and friendly countries.

Foreign information and exchange activities.—This budget includes expenditures of 97 million dollars for foreign information and exchange activities, including those functions conducted by the new

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

United States Information Agency. This is an increase of 2 million dollars over the expenditures for foreign information and exchange programs in the fiscal year 1954.

In October, on the advice of the National Security Council, I directed the United States Information Agency to develop programs which would show the peoples of other nations that the objectives and policies of the United States will advance their legitimate aspirations for freedom, progress, and peace. I believe that if the peoples of the world know our objectives and policies, they will join with us in the common effort to resist the threat of Communist imperialism and to achieve our mutual goals. It is essential that the United States Information Agency have the tools to carry out this mission.

The United States Information Agency will reach 77 free countries through radio, press, motion pictures, or information centers and will reach 10 Iron Curtain countries through radio broadcasts.

My budget recommendations for information and exchange activities include 15 million dollars of new obligational authority for educational exchange programs. These programs are designed to promote a receptive climate of public opinion overseas through the exchange between the United States and over 70 foreign countries of students and persons who are leaders important to the present or future of their nations.

SOCIAL SECURITY, WELFARE, AND HEALTH

I believe that, along with the essentials of protecting the freedom of our people and maintaining a strong and growing economy, we must make greater and more successful efforts than we have made in the past to strengthen social security and improve the health of our citizens. In so doing, we build for the future, and we prove to the watching world that a free Nation can and will find the means, despite the tensions of these times, to progress toward a better society.

The keystone of our social security program today is the system of old-age and survivors insurance, under which nearly 70 million people are insured and 6 million people are presently receiving benefits. The economic protection afforded by this social insurance is now accepted as basic in our society. Yet there are serious defects in the system. In my recent social security message, I submitted specific recommendations to remedy these defects.

The legislation to improve old-age and survivors insurance will not directly affect the budget totals, since this program is financed through payroll taxes which go into a trust fund, and the expenditures are made from the fund rather than from the general budget accounts. However, the legislation should lessen the need for expenditures from

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

the general budget accounts to help the States pay public assistance to the needy aged and to dependent children, as old-age and survivors insurance takes over a larger and larger role in providing them with basic protection.

To reflect this development, legislation is being prepared to reduce Federal grants to States for old-age assistance as old-age and survivors insurance continues to take over an increasing share of the load. My social security message has set forth these recommendations in more detail.

[1] Less than 500,000 dollars.

[2] Compares with new obligational authority of 1,886 million dollars in 1953 and 1,919 million dollars in 1954.

This administration flatly opposes the socialization of medicine. Under the traditional American approach, private and nonprofit medical and hospital insurance programs have grown steadily and now cover a large segment of the population. Yet there is still a long way to go. Many families are not protected; many health costs are not insured. Positive action to promote the health of all our people has been recommended in my recent message.

The budget estimates for the fiscal year 1955 provide for the costs of the proposed legislation to improve the health of the people and also for the improvements and expansion of vocational rehabilitation

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

services for the disabled. Experience has proved that these efforts pay for themselves many times over.

Including the proposed legislation, net budget expenditures for social security, welfare, and health in the fiscal year 1955 are estimated at 1,807 million dollars. This is 140 million dollars less than estimated expenditures in 1954. The decline results mainly from an expected reduction in public assistance grants to the States.

Public assistance.—Under present law the Federal Government contributes, according to a statutory formula, to State expenditures for assistance payments to four groups of people in need—dependent children, the aged, the blind, and the totally disabled. With the expansion of the social security program, it is now feasible to recommend a new formula for public assistance grants which will more adequately recognize the varying financial needs of the several States and the appropriate role of the Federal Government in meeting these needs. The legislation which I am recommending would provide for a permanent formula to replace the present temporary increase in the Federal share which expires next September 30. This new formula includes specific provision for a related reduction in Federal grants to States for old-age assistance as the improved old-age and survivors insurance program takes over an increasing share of the load. A transition period for adjusting both Federal and State procedures will be necessary.

The decrease of nearly 100 million dollars in estimated expenditures for public assistance is made possible primarily by the proposed improvement in old-age and survivors insurance, which will reduce the need for supplementation by public assistance.

Promotion of public health.—The budget provides for initiating our new program to help assure adequate medical and hospital services. The main elements of this program are:

(1) Establishment of a limited reinsurance service to encourage private and nonprofit health insurance organizations to offer broader health protection to more families on a basis which would reinsure the special additional risks through premiums modeled on sound insurance principles. The capital for this program will be provided initially by the Federal Government and repaid from fees.

(2) A broadening of the present Federal grant-in-aid program for hospital construction to stimulate provision of diagnostic and treatment centers, rehabilitation facilities, nursing homes, and additional chronic disease hospitals, and to help finance State surveys of their needs for such facilities.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

The new program is estimated to require new obligational authority of 89 million dollars for the fiscal year 1955, of which 7 million dollars would be spent in that year.

Budget expenditures for all public health programs under existing legislation, excluding medical care for military personnel and veterans, are estimated at 281 million dollars in the fiscal year 1955. About one-half of this amount will be for grants to universities and medical schools for medical research and training, for clinical and laboratory research conducted by the Federal Government, and for operation of the Public Health Service hospitals. The Public Health Service hospitals primarily furnish hospital and medical care to American merchant seamen. The budget provides funds to continue these special services while the Department of Health, Education, and Welfare has this program under review.

Other expenditures will be for grants-in-aid to State governments and local communities for hospital construction, general health services, maternal and child health, and the control of specific diseases, such as tuberculosis, cancer, mental illness, and heart ailments. With the major communicable diseases, including tuberculosis and venereal diseases, diminishing in importance as public health problems, greater emphasis is being given to the chronic diseases which are becoming more prevalent.

Vocational rehabilitation program.—The estimate for the present program of vocational rehabilitation reflects congressional action, taken in the 1954 appropriation act, to require that a larger portion of the program be financed by the States. To revitalize the vocational rehabilitation program, I have recommended that we redefine our objectives so as to make possible a substantial increase in the number of persons rehabilitated.

School lunch program.—Budget expenditures shown for the school lunch program for fiscal years prior to 1955 include funds for the purchase of commodities for distribution to the States, as well as for cash payments to the States. The amount recommended for 1955 will maintain cash payments to the States at the same level as in 1954. In addition, it is expected that larger Federal contributions of surplus agricultural commodities will be made to the program. These contributions are financed from a permanent appropriation to the Department of Agriculture. As a result, total Federal aid for the school lunch program, including cash payments and surplus foods distributed under the program for the children are estimated at 218 million dollars in the fiscal year 1955 compared with 206 million dollars in 1954.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

Railroad retirement.—As described earlier, the railroad retirement program is reported in this Budget in the same manner as the old-age and survivors insurance program and appears in the tables on that basis. The change does not affect the budget deficit.

Trust funds.—The old-age and survivors insurance system is operated through a trust fund, which receives the payroll contributions and pays the benefits and administrative expenses. The tax rate rose to 2 percent each on employers and employees, effective January 1, 1954. My proposals for expanding and improving the program will raise receipts by an estimated 100 million dollars, benefit disbursements by 400 million dollars, and administrative expense by 8 million dollars in the fiscal year 1955.

The Government also operates separate retirement programs for railroad workers, mentioned above, and for Federal civilian employees.

HOUSING AND COMMUNITY DEVELOPMENT

Good housing and the development of adequate community facilities are essential to the welfare of our people and to the stability and growth of our economy. Over the years the Federal Government has undertaken a wide variety of programs to assist our citizens in obtaining better housing. These programs, however, have been designed in the main to meet short-run emergencies or they have been developed piecemeal without a clear underlying policy. As a result, housing laws have become a patchwork which only experts can understand. Excessive reliance has been placed on direct participation by the Federal Government in areas where, properly encouraged, local governments or private enterprise could have carried a larger share of the total responsibility. Different Federal programs have too often worked at cross-purposes, resulting in heavy expense without commensurate gains. In some instances, they have aggravated inflationary price increases instead of working toward lower housing cost for the ultimate consumer. Finally, the weaknesses in the organization of Federal housing activities have prevented us from realizing the full potentialities of present programs.

At my request, the Advisory Committee on Housing Policies and Programs, under the chairmanship of the Housing Administrator, has intensively examined all Federal housing activities. After consideration of its report and the Administrator's recommendations, I am proposing a series of changes which have three important objectives: First, they would reorient existing programs to emphasize the initiative of private enterprise and the role of local governments. Second, they would fill important gaps in the present housing program and at the same time eliminate numerous unnecessary and obsolete activities. Third, they would strengthen the administration of these programs to assure the most economical and effective use of Federal funds in improving the housing conditions of the Nation.

To carry out these proposals I shall recommend major changes in legislative authority. I shall also submit a reorganization plan which will permit a more logical grouping of operating programs and give the Housing Administrator appropriate authority to supervise these programs and to determine major policies. Pending final decision on important details, estimates for these proposals are not specifically set forth in this budget. However, they will not have a significant effect on the Federal budget in the fiscal year 1955.

Most housing and community development programs involve both expenditures and receipts. In the fiscal year 1955 gross expenditures

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

will total an estimated 1,903 million dollars, but receipts will exceed these expenditures by 277 million dollars. These net receipts compare with net expenditures of 549 million dollars in 1953 and the revised estimate of net expenditures of 57 million dollars in 1954. The great improvement in the fiscal outlook over the 2 years reflects mainly the fact that purchases of mortgages by the Federal National Mortgage Association are declining and sales are rising. Increased private financing for the public housing program is also reducing the need for Federal outlays.

[1] Compares with new obligational authority of 1,526 million dollars in 1953 and 628 million dollars in 1954.

Urban development and redevelopment.—Too many families in our cities today are living in substandard housing in deteriorating and slum neighborhoods. Since 1949 the Federal Government has been providing loans and grants to local governments for clearance and redevelopment of slum areas. Most local projects approved for Federal assistance are still in the planning stage, but by the end of the fiscal

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

year 1955, clearance and redevelopment operations will be completed or underway for 180 projects, compared to 43 projects begun by June 30, 1953. Net expenditures in 1955 are estimated to rise to 48 million dollars, of which 39 million dollars represents grants to local communities to cover two-thirds of the net cost of projects which they have completed, or on which they have made substantial progress.

This acceleration is encouraging, but clearing slums provides only a partial answer. Effective progress in redeveloping our cities will require (1) enlistment of greater local and private participation, (2) slum prevention as well as elimination, and (3) rehabilitation of rundown houses and neighborhoods. To help attain these objectives, I shall recommend legislation broadening the present program to authorize loans and grants for the conservation, rehabilitation, and renewal of neighborhood areas. Important changes should also be made in mortgage insurance authority of the Federal Housing Administration and in the low-rent public housing program, so that these programs can contribute more effectively to sound redevelopment. All of these aids should be fully coordinated and should be provided only in areas where the local community has adopted and is carrying out its part of an effective program to arrest urban decay.

Federal Housing Administration.—As one of the major Federal aids to private housing, the Government insures mortgage loans made to finance housing construction or purchase. In the fiscal year 1955 under existing programs the construction of an estimated 190,000 new homes and the purchase of 126,000 existing homes will be financed with the aid of mortgages insured by the Federal Housing Administration. Receipts from premium income and other sources will exceed expenditures by an estimated 69 million dollars.

To encourage the substitution of private financing for Federal outlays in the areas of greatest housing need, I shall urge the Congress to authorize two new mortgage insurance programs, as well as to liberalize certain existing programs. Specifically, the Federal Housing Administration should now be authorized to insure private credit used for the rehabilitation of obsolete neighborhoods. It should also be given authority, on an experimental basis, to insure mortgages with small down payments and with the balance payable over a long period, to finance inexpensive homes for lower income families, particularly families displaced by rehabilitation and slum-clearance programs. Additional authority should be provided to adjust down payments and maturities for insured mortgages to the extent consistent with overall economic policy. I shall also recommend simplification of the basic housing laws by the elimination of numerous inactive or unnecessary programs and by simplification of the structure and opera-

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

tions of the existing mortgage insurance funds. At the same time, measures will be recommended to strengthen the insurance funds.

Federal National Mortgage Association.—The Federal National Mortgage Association buys and sells mortgages insured by the Federal Housing Administration or guaranteed by the Veterans Administration. Gross expenditures are estimated at 488 million dollars in the fiscal year 1955, mainly for purchase of mortgages to finance military and defense housing under commitments made in earlier years. By 1955 the supply of private funds is expected to be adequate in most areas to provide financing for most other types of mortgages without Federal support.

The policy of this administration is to sell the mortgages now held by the Association as rapidly as the mortgage market permits. Assuming satisfactory market conditions, receipts from these sales and from other sources in 1955 will exceed expenditures by an estimated 166 million dollars. This contrasts with net expenditures of 379 million dollars in 1953, and 62 million dollars estimated for 1954.

The legislation which I shall propose would provide authority to establish, from time to time, maximum interest rates and other terms on insured and guaranteed mortgages with the objective of encouraging an adequate, but not excessive, supply of private mortgage funds for all parts of the country. This proposal would make unnecessary in the future large Government purchases of mortgages such as were required in the past, whenever interest rates made such mortgages unattractive to private lenders. I shall also recommend the initiation of a new program, financed in large part from private funds, to furnish many of the secondary market facilities now provided by the Federal National Mortgage Association.

Other aids to private housing.—Net expenditures for direct housing loans to veterans are estimated at 44 million dollars in the fiscal year 1955, compared with 78 million dollars in 1954. Sales of loans to private investors are expected to rise as a result of the recent increase in the rate of interest on these loans. Under existing law, disbursements will be made during 1955 only on loans for which commitments are made prior to the expiration of lending authority on June 30, 1954.

Authority for farm housing loans under title V of the Housing Act should be permitted to expire on June 30, 1954. Most of the essential needs can be met under other authorities and funds available to the Farmers' Home Administration.

The loans of three other programs will be substantially liquidated in the fiscal year 1954. These include mortgages held by the Reconstruction Finance Corporation, loans made by the Housing Adminis-

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

trator to the Alaska Housing Authority, and loans to various prefabricated housing manufacturers.

Public housing.—As already indicated, I shall propose a new mortgage insurance program and other measures to encourage provision of private housing for low-income families. If these proposals prove effective, the need for future construction of low-rent public housing will be reduced. As an interim measure, however, the present public housing program should be continued at the level considered necessary to meet the needs of low-income families, particularly those displaced by slum-clearance and urban rehabilitation activities. Accordingly, my recommendations for the fiscal year 1955 in this budget would authorize construction of approximately 35,000 low-rent public housing units by local housing authorities, with the assistance of Federal loans and annual contributions adequate to assure the low-rent character of these units.

An estimated 956 million dollars in temporary Federal loans and other expenditures will be necessary to finance the operations of the low-rent and other public housing programs during the fiscal year 1955. Receipts from private refinancing of local housing authority obligations and other sources are estimated to exceed these expenditures by 234 million dollars. All except 8 million dollars of the 77 million dollars in new obligational authority requested is for payment of annual contributions under contracts made in prior years.

College housing.—Under the Housing Act of 1950 the Housing Administrator makes direct loans repayable over 40 years to finance student and faculty housing at colleges and universities. Net expenditures for such loans in 1955 will rise to 58 million dollars, largely under commitments made in prior years. By June 30, 1955, over 200 loans will have been approved. These will finance construction of housing accommodations for about 50,000 students and faculty members. Wherever possible, private financing of these loans will be encouraged.

Provision of community facilities.—The sharp reduction in net expenditures for provision of community facilities reflects mainly liquidation by the Treasury of loans to public agencies which were originally made by the Reconstruction Finance Corporation. No appropriations are being requested at this time for new loans to public agencies.

To encourage State and local governments to prepare for possible future expansion in public works construction, I am recommending legislation to authorize Federal advances to them for planning future construction. If the authority is granted, I shall request a supple-

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

mental appropriation for the fiscal year 1954 of 10 million dollars, with estimated expenditures of 3 million dollars in 1955.

Civil defense.—Expenditures for civil defense are included in housing and community development because of their community aspects, but the program is discussed in this message under national security. Federal expenditures for civil defense are estimated at 68 million dollars in the fiscal year 1955.

EDUCATION AND GENERAL RESEARCH

The citizen in a democracy has the opportunity and the obligation to participate constructively in the affairs of his community and his Nation. To the extent that the educational system provides our citizens with the opportunity for study and learning, the wiser will their decisions be, and the more they can contribute to our way of life.

I do not underestimate the difficulties facing the States and communities in attempting to solve the problems created by the great increase in the number of children of school age, the shortage of qualified teachers, and the overcrowding of classrooms. The effort to overcome these difficulties strains the taxable resources of many communities. At the same time, I do not accept the simple remedy of Federal intervention.

It is my intention to call a national conference on education, composed of educators and interested citizens, to be held after preparatory conferences in the States. This conference will study the facts about the Nation's educational problems and recommend sensible solutions. We can then proceed with confidence on a constructive and effective long-range program. Pending the outcome of these conferences and the development of our educational program, the Federal Government is providing assistance to those communities where school needs have been greatly increased by the activities of the Federal Government.

Budget expenditures for education and general research activities in the fiscal year 1955 are estimated at 223 million dollars. This figure does not include amounts spent for education and research in connection with the military, veterans', atomic energy, and certain other programs—which are classified in other sections of the budget. A comprehensive report on Federal research activities appears in Special Analysis H, page 1157.

Sixty-two percent of the expenditures for education and general research in the fiscal year 1955 will be for grants to those local school districts that have been burdened by Federal activities. Another 13 percent will be for grants to States to help support their vocational education programs and their land-grant colleges. The Federal

Government also assists Howard University and educational institutions for the deaf and blind, and it maintains major library and museum services at the National Capital. Expenditures shown for general-purpose research are for programs of the Census Bureau, the National Bureau of Standards, and the National Science Foundation.

[1] Less than 500,000 dollars.

[2] Compares with new obligational authority of 328 million dollars in 1953 and 217 million dollars in 1954.

Promotion of education.—Responsibility for education in the United States belongs to the State and local governments. The Federal Government has for many years provided financial assistance for land-grant colleges and some other educational activities. The Office of Education also disseminates information on educational trends and good practices. In recent years, the problems of education have been increasing in severity while this service has been reduced. My budget recommendations provide for an expansion of this basic activity.

The proposed national conference and preparatory State conferences will be most important steps toward obtaining effective nationwide recognition of these problems and toward recommending the best solutions and remedies. I recommend immediate enactment of the authorizing legislation and appropriations so that preparations for the individual State conferences as well as the national conference can begin at once.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

Within the appropriation recommended for the Office of Education in this budget is provision to expand the studies and consultations through which it promotes better practices in education. One problem to which particular attention will be given is the meager education received by children of migrant agricultural workers. Because these children move with their parents from State to State, the problem of providing for their education can be solved only through special effort on a cooperative interstate basis.

In addition, I recommend that legislation be enacted which will enable the Office of Education to join its resources with those of State and local agencies, universities, and other educational organizations for the conduct of cooperative research, surveys, and demonstration projects. Legislation is necessary to make this cooperative effort effective.

An advisory committee on education in the Office of the Secretary of Health, Education, and Welfare should be established by law. This recommendation carries forward an objective of the reorganization plan under which the Department was created last year. This committee, composed of lay citizens, would identify educational problems of national concern to be studied by the Office of Education or by experts outside the Government, and would advise on action needed in the light of these studies.

For these new activities directed toward the improvement and strengthening of our basic educational services, I am including 300,000 dollars in the 1955 budget and recommending a 1954 supplemental appropriation of 2 million dollars.

The last session of the Congress enacted legislation to extend temporarily the laws under which assistance has been provided to local school districts burdened by Federal activities, and to improve the original laws so that they will provide the aid economically and to the areas most acutely affected. As a result of these improvements, the recommended appropriation of 59 million dollars for school-operating assistance in the fiscal year 1955 is 14 million dollars below the amount for 1954. This assistance is provided to more than 2,000 school districts, with enrollments of almost 5 million children, of whom almost 1 million qualify for assistance because their presence is related to Federal activities.

The appropriation of 40 million dollars for school construction recommended for 1955, together with the 1954 appropriation of 70 million dollars, will provide for the most urgent classroom needs of the school districts eligible for this aid under the extended program. These funds are being used to help build almost 5,000 classrooms to serve 140,000 children.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

Aid to special groups.—A construction program now underway at Howard University will provide facilities for double the enrollment in the schools of medicine, dentistry, pharmacy, and related health fields. This budget includes funds for the construction of the preclinical medical building, the last unit necessary to make this expanded enrollment possible. Although the university is not limited to any group, it serves as an important center of higher education for Negroes. The expanded enrollment, therefore, will help to alleviate the shortage of doctors, particularly Negro doctors.

Enrollment at the Columbia Institution for the Deaf has been increasing in recent years. Steps now being taken to enable the college to reach an accredited status in the near future include the provision of additional teachers and funds for the construction of a library-classroom building. One-third the cost of this building is being provided by contributions, primarily from former students.

General research.—The National Science Foundation was created by the Congress in recognition of the need to formulate an adequate scientific research policy for the Nation. It is now engaged in intensive studies to that end, and is giving particular attention to the size and composition of the research activities of the Federal Government.

The Congress, at its last session, amended the basic act of the Foundation, removing the ceiling on appropriations to this agency in order to permit steps toward increasing the responsibility of the Foundation for the general-purpose basic research of the Federal Government. Approximately one-half of the 6-million-dollar increase I am recommending in the appropriation for the Foundation for the fiscal year 1955 is in reality a transfer of the responsibility and the financing for certain basic research programs from the Department of Defense to the National Science Foundation. The remainder of the increase is needed to expand basic research.

Within the appropriation for the National Bureau of Standards, there is also provision for an increase in basic research.

Additional basic research is needed to build up the fund of knowledge on which will be based the development of new crops for agriculture, new methods of safeguarding health, new tools for industry, and new weapons. A further important result is the training which basic research projects provide for graduate students in our universities. The number of trained scientists graduating each year falls short of the needs of our growing economy and is still declining. Enlargement of the research program and the related fellowship program will help counteract this trend.

Funds are requested for the fiscal year 1955 to permit the Census Bureau to conduct a sample census of agriculture. This census will provide essential data for current needs.

AGRICULTURE AND AGRICULTURAL RESOURCES

My recommendations for Federal agricultural programs are designed to help in the solution of pressing immediate problems such as the hardships arising from severe drought in major farm areas, the squeeze on livestock producers resulting from lower cattle prices, and the disposal of excess stocks of wheat, cotton, vegetable oils, and dairy products which have been accumulated under provisions of price-support laws presently in force. They also take into account our long-run goals—promotion of a more stable and healthy farm economy, conservation and improvement of our basic agricultural resources, and provision of an adequate supply of food and fiber to match the needs of our increasing population.

the various services the Department renders. Activities have been grouped into major units consisting of closely related programs, and provision has been made for greater emphasis on research and extension work directed to the improvement of farm products, reduction of production and marketing costs, and broadening of both the foreign and the domestic markets for farm products.

Gross expenditures for agricultural programs in the fiscal year 1955 are estimated at 6.5 billion dollars. Repayments of loans and the sale of commodities constitute most of the receipts of the public enterprises carrying on certain of these programs. These receipts are estimated at 4.1 billion dollars. Hence, net budget expenditures in the fiscal year 1955 are estimated at 2.4 billion dollars. This is 288 million dollars less than estimated net expenditures in 1954 and 570 million dollars less than in 1953.

Stabilization of farm prices and farm income.—Price support activities of the Commodity Credit Corporation, which account for nearly one-half of the estimated 1955 net budget expenditures for agriculture and agricultural resources, have dominated the trend of these expenditures in recent years. There is no better evidence of the tremendous budgetary significance of these activities than the increase of about 2.5 billion dollars during the past calendar year in commodities held by the Corporation and in price support loans. Furthermore, present prospects indicate that, under present law, large additional budgetary outlays will be required for these activities in the fiscal year 1955. It is clear, therefore, that a thorough reconsideration by the Congress of the provisions of existing price support laws is needed not only in the interest of farmers, but also in the national interest.

In my recent special message, I recommended improvements in the price support legislation both to deal with the immediate problems arising from our large surpluses of agricultural commodities and to chart a course for the future that will more effectively achieve the goals of farm price supports. In most instances the reduction in budget expenditures which can be expected from improved and more flexible price support provisions will begin to be effective in the fiscal year 1956.

It is impossible, because of many variable factors, to estimate with any certainty the expenditures under these programs. Based upon the best information now available, it appears that the gross price support expenditures of the Commodity Credit Corporation, which reflect mainly the loans made and commodities acquired during the year, will be 3 billion dollars in the fiscal year 1955. Anticipated receipts of 1.9 billion dollars from loan repayments and commodity sales will result in net expenditures in the fiscal year 1955 of 1.1 billion

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

dollars. These net expenditures for price supports are expected to be 47 million dollars lower than in 1954, and 726 million dollars below the high level reached in 1953.

The reduction in expenditures from the 1953 level is due primarily to the application of marketing quotas on wheat and cotton and acreage allotments on corn which are intended to reduce production from the 1954 crops. The estimates for the fiscal years 1954 and 1955 also reflect greater emphasis given to private financing of price support operations. This, coupled with the customary timing for loan maturities, will result in a substantial proportion of the price supports on the 1953 and 1954 crops not becoming a Government expenditure until the loans held by private institutions mature, which will occur in 1955 and subsequent fiscal years.

All obligations of the Commodity Credit Corporation, whether in the form of borrowing from the Treasury or commodity loans held by banks and guaranteed by the Corporation, constitute a use of the statutory borrowing authority of 6.75 billion dollars. With the large volume of commodity loans and inventories now held and the increases expected in 1954 and 1955, it is estimated that the obligations of the Corporation may exceed its present borrowing limit during the annual peak, probably February 1954, and rise to a still higher level in the fiscal year 1955. I shall recommend to the Congress early in this session a supplemental 1954 estimate of 775 million dollars to restore borrowing authority to the Corporation, through cancellation of notes owed the Treasury, in an amount equal to the sum of the Corporation's capital impairment as of June 30, 1953, the advances during 1953 for control of foot-and-mouth disease, and the cost of operations under the International Wheat Agreement. This note cancellation will require immediate action by the Congress to insure that the Corporation can fulfill its statutory responsibilities under the present price support program.

I shall also recommend legislation to increase the borrowing authority of the Corporation by 1.75 billion dollars, effective July 1, 1954. This recommended increase in borrowing authority takes into account the increased commitments by the Government which would result from the proposed increase in the minimum 1954 cotton acreage allotment. While these commitments will be made in the fiscal year 1955, the cash expenditures by the Commodity Credit Corporation will not occur until 1956.

The recommended new obligational authority for the Corporation will meet the minimum foreseeable needs, provided steps are taken through new legislation to place our farm price support program on a sound basis for the future. A further request for additional borrowing authority may be necessary at a later date if conditions result

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

in this amount being insufficient to provide for the commitments and expenditures required during the period the presently applicable price support provisions remain in effect.

Under the revised International Wheat Agreement, which became effective in the fiscal year 1954, our export quota for wheat has been reduced because of the withdrawal of Great Britain from the Agreement. Moreover, the maximum export price has been raised from $1.80 to $2.05 per bushel. As a result, expenditures under this program are expected to be only about two-thirds as much as in 1953 when our guaranteed export quota was larger and the spread between the domestic price and the export price of wheat was wider. While expenditures under the Wheat Agreement will be less in 1955 than in earlier years, the loss of wheat exports may increase wheat surpluses and thus cause larger outlays by the Commodity Credit Corporation under the price support program than would otherwise occur.

The permanent appropriation for the removal of surplus agricultural commodities, enacted in 1935, is equivalent to 30 percent of the customs receipts for the preceding calendar year. In the fiscal year 1955 there will be available from this authority a carryover of 241 million dollars from prior years plus 180 million dollars of new authorization. This total of 421 million dollars compares with estimated expenditures in 1955 of 233 million dollars. Of this amount 150 million dollars of surplus commodities purchased under this program is estimated to be distributed to the national school lunch program in 1955, as compared with 123 million dollars in 1954 and 52 million dollars in 1953. This permanent appropriation will be used also to strengthen the work being done by the Foreign Agricultural Service in cooperation with the Department of State in developing new foreign markets for our agricultural products.

Financing farm ownership and operation.—The Farm Credit Act of 1953, enacted by the last session of the Congress, restored the Farm Credit Administration to an independent status under the supervision of the Federal Farm Credit Board created by that legislation. It is the policy of this administration, through the Farm Credit Administration, to strengthen cooperative credit services on the basis of sound business-credit standards, and to increase farmer participation in the ownership and control of the Federal farm credit system to the end that the investment of the United States in the federally sponsored agricultural credit institutions may be retired within a reasonable time.

The cooperative credit institutions supervised by the Farm Credit Administration make both long- and short-term loans to farmers and to farmers' cooperatives. Short-term loans by the production credit associations are financed largely through the federally owned inter-

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

mediate credit banks. Gross expenditures of these banks, which reflect mainly new loans, are expected to be approximately offset by receipts from loan repayments in the fiscal year 1955.

Direct loans to farmers by the Farmers' Home Administration, primarily for farm ownership, production and subsistence, and water facilities, are intended to supplement the credit services provided by private and cooperative credit agencies. The principal purpose of these loans is to help borrowers improve their financial situation so that they can qualify for private or cooperative credit. In the fiscal year 1955, the regular loan program will be continued at about the same level as that provided in 1954. Collections of principal and interest on old loans, which approximately equal new loans made, go directly into miscellaneous receipts of the Treasury and are not deducted from budget expenditures of this program.

Existing legislation does not provide adequately for the financing of group water facilities and related small water supply projects. Proposals for legislation will be submitted at a later date to broaden the geographical area within which water facilities loans may be made, and to increase the loan limit.

The volume of special disaster loans to farmers increased sharply during the first half of the fiscal year 1954. This increase resulted mainly from loans made to stockmen and other farmers in drought-stricken areas to help them finance feed purchases and thereby avoid drastic liquidation of their livestock holdings. The Federal Government also contributed emergency feed from stocks acquired in price support operations and absorbed a part of the cost of making other feed available to farmers in these areas.

As of December 18, 1953, the Federal Government under this program had committed 52 million dollars to supply 1.4 million tons of feed concentrates and over 5 million dollars to cover the Federal Government's share of the cost of the hay program which is administered by the States. A recommendation will be made to the Congress shortly to assure a continuation of advances to States for assistance in distributing hay to farmers and ranchers in the drought areas. In addition, meat purchases of 86 million dollars by the Government up to December 16, 1953, financed from the permanent appropriation for removal of surplus agricultural commodities, have resulted in the removal of about 780,000 head of cattle from the market. The disaster loan program, along with provision of emergency feed and purchases of meat by the Department of Agriculture, supported livestock prices at a time when the market otherwise would have been more depressed by forced liquidation of livestock. The need for new loans and other emergency assistance is expected to be greatly reduced by the spring of 1954, and collections during the fiscal year 1955 on disaster loans made in prior years should exceed new loans made.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

Financing rural electrification and rural telephones.—The need for rural electrification loans has become less as the proportion of our farms that are electrified has increased. About 91 percent of our farms are now electrified. Only about 42 percent of our farms, however, have telephone service. The budget recommendations for these two programs in the fiscal year 1955 provide loan funds sufficient to finance substantial further expansion of electrification and telephone services in rural areas. In order to reduce the need for future Federal aid, this administration also is exploring possible arrangements whereby more private capital can be made available to finance telephone services in rural areas.

Agricultural land and water resources.—The need for greater emphasis on conservation and development of our agricultural land and water resources was set forth in my special message to the Congress on this matter on July 31, 1953. The budget estimates provide for 66 million dollars under existing legislation to continue and improve the technical and advisory services of the Soil Conservation Service and for related activities.

Additional work should be undertaken with a view to strengthening our vital upstream conservation activities. Farmers increasingly realize that it is in their own interest to do more of this work. Because the Nation as well as farmers and local communities receive benefits, this work should be a joint responsibility. Existing law, however, does not provide an adequate basis for cooperative upstream development. The 1955 budget, therefore, includes 3 million dollars under proposed legislation to permit the Department of Agriculture to cooperate with State and local agencies in the planning and installation on small watersheds of the necessary protective facilities, and to provide for better conservation, development, utilization, and disposal of water. This will supplement the 11 million dollars to be spent under existing law for watershed protection and flood prevention projects.

In conformance with the forward authorization for the 1954 crop year enacted in the 1954 appropriation act, the budget provides 195 million dollars for the agricultural conservation payment program in the fiscal year 1955. A proposed revision of this program will be recommended to the Congress. The proposal involves no expenditures in the fiscal year 1955.

Research and other agricultural services.—To achieve a more efficient and stable agriculture and to provide for the future needs of a growing population, increased attention must be given to research and educational work on problems of agricultural production, soil conservation,

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

and marketing. The 1955 budget includes 112 million dollars for research and extension work, an increase of 18 million dollars over the estimate for the fiscal year 1954. This work is done in cooperation with State and private agencies. The budget recommendations will provide for a needed expansion of research on marketing and utilization of farm products and of other scientific research conducted by Federal agencies, and increased payments to States for related cooperative research programs. This budget also will provide greater Federal contributions to the Federal-State extension program.

The recommended increase in Federal appropriations for cooperative research and extension work is accompanied by a recommended decrease in appropriations for certain regulatory activities carried on jointly with the States. The budget contemplates elimination of Federal contributions for tuberculosis and brucellosis indemnity payments and curtailment of Federal quarantine and similar operations in a number of insect and plant disease programs. The shift in responsibility for continuation of these programs is in accordance with the policy of this administration that the Federal Government should withdraw from activities which we believe can be more appropriately carried on by private enterprise or by State and local governments.

A strengthening of agricultural research and the wide dissemination of improved techniques through extension work will contribute to the efficiency of farm production and marketing, benefiting both producers and consumers. This will provide the solid foundation for a more prosperous and stable agriculture and ultimately for less reliance on Government price support and other financial aids.

NATURAL RESOURCES

My recommendations for the natural resources programs of the Government are based on a reappraisal of the responsibility which the Federal Government should exercise in the development of our resources. At the same time, the recommendations have been made with due regard to our overall fiscal position. To keep the Federal financial burden at a minimum while defense expenditures remain high, some improvements and program expansions which might be desirable have not been included in this budget. Emphasis has been given to careful planning to insure sound development of our natural resources. Such development should be timed, whenever possible, to assist in leveling off peaks and valleys in our economic life.

A strong program of resource conservation and development is necessary to support the progressively expanding demands of our increasing population and to contribute to the economic growth and security of the Nation. Achievement of this goal requires a combined

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

effort on the part of States and local communities, citizens, and the Federal Government. To the greatest extent possible, the responsibility for resource development, and its cost, should be borne by those who receive the benefits. In many instances private interests or State and local governments can best carry on the needed programs. In other instances Federal participation or initiative may be necessary to safeguard the public interest and to accomplish broad national objectives.

[1] Less than 500,000 dollars.

[2] Compares with new obligational authority of 1,396 million dollars in 1953, and 1,026 million dollars in 1954.

Estimated net expenditures of 1.1 billion dollars in the fiscal year 1955 will provide for the management and protection of the resources which belong to all the people and which are under the jurisdiction of the Federal Government. About three-fourths of this total will be for flood control, irrigation, power, and multiple-purpose river basin

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

development. The remainder will be spent on the management, development, and protection of our national forests, parks, and other public lands, and for mineral and fish and wildlife resources and basic surveys. Activities to advance the peacetime applications of atomic energy, which will be of increasing significance in 1955, are discussed with other activities of the Atomic Energy Commission in the national security section of this message.

Land and water resources.—Under my recommendations in this budget, the Federal Government will spend an estimated 858 million dollars for the conservation and development of land and water resources in the fiscal year 1955. A major part of this represents investment in assets which will yield benefits long into the future.

This administration is developing a sound and uniform national policy for the conservation, improvement, and use of water and related land resources, designed to assure that future programs are not only responsive to local requirements but are consistent as well with the needs of the Nation as a whole. As a step in this direction, a statement of principles has been issued on the generation, transmission, and disposal of electric power. Standards for the justification of proposed water resources projects are currently being reviewed by the executive branch. Special attention is being given to requirements for the sharing of costs among private beneficiaries, State and local groups, and the Federal Government. Also, the Congress has established commissions to examine resource programs, as well as other Federal activities, and to make recommendations with respect to them. As the various studies are completed, I shall make specific legislative recommendations to the Congress.

This administration has also taken and will continue to take steps to encourage non-Federal interests to formulate plans and undertake development of water resources, including hydroelectric power, which are consonant with the best use of the natural resources of the area. An outstanding example of cooperation between various levels of government—State, Federal, and international—in multiple-purpose development of a resource is the proposal for the development of the St. Lawrence River. It would also be in the public interest for construction to be undertaken, on a non-Federal basis, to realize the power potential of the Niagara Falls site.

Basic resource surveys and advance engineering and design activities will be carried on in 1955 at rates necessary to provide for further development of our resources. Federal activities in projects or plans will not imply any exclusive reservation of such projects to Federal construction or financing or preclude local participation in them. Needed projects to be constructed by the Federal Government may

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

include those which, because of size and complexity, are beyond the means of local, public or private enterprise.

My budget recommendations also provide for the continuation of river basin work now underway. Less urgent features of the projects, not required for operation of going or completed units, will be deferred. Budget expenditures of the Bureau of Reclamation and the Corps of Engineers include an estimated 443 million dollars in the fiscal year 1955 to carry on construction of about 160 river basin development projects. A substantial amount of these expenditures is for multiple-purpose development for irrigation, flood control, navigation, and hydroelectric power. During the fiscal year 1955, 20 projects will be completed or substantially completed, including 9 flood control projects, 5 irrigation projects, and 6 multiple-purpose projects with power facilities.

In furtherance of the policies of this administration, I am recommending the starting of some new projects or new units of existing projects by the Corps of Engineers and the Bureau of Reclamation, as well as the resumption of some previously deferred projects. The budget recommends commencing work on 6 irrigation and water supply projects, 8 local flood prevention projects, and 8 navigation projects, one of which I recommend starting in the fiscal year 1954 with supplemental funds. In addition, it provides for resumption of work on 2 flood control reservoirs and 2 river and harbor improvements. This work is estimated to cost a total of 184 million dollars, with expenditures of 20 million dollars scheduled for the fiscal year 1955. Together with the St. Lawrence Seaway, this totals to 23 new projects and 4 resumptions in the budget. The navigation projects, including the St. Lawrence Seaway, are discussed in this message with the transportation and communication programs. Recommendations for related watershed protection and flood prevention activities of the Department of Agriculture are discussed in the section on agriculture and agricultural resources.

The new local flood prevention works, to be constructed by the Corps of Engineers, are relatively small projects and can be completed within 3 years. The detailed plans preliminary to construction have been completed. Each of the projects has a favorable ratio of benefits to costs and provides for a reasonable degree of financial cooperation by local interests. Resumption of work is proposed on 2 flood control reservoirs, each of which is about one-third completed.

The new projects recommended for the Bureau of Reclamation include 3 projects already authorized and 2 projects under legislation I am proposing. Commencement of work is also recommended on a new pumping unit of an irrigation project now under construction. These are small or intermediate-sized developments. In their

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

selection, consideration has been given to the benefits of supplemental irrigation for established farming areas, to more intensive and beneficial use of existing water supplies, and to the ability of the water users to make a reasonable repayment of the investment. In the case of one of the projects which requires authorization, I have recommended to the Congress that provision be made in the legislation for repayment within 50 years of all reimbursable costs, and that construction of the project be made contingent on the assumption by the State, together with local organizations, of financial responsibility for reimbursable costs beyond the ability of the water users to repay. This principle is in line with the policy of this administration that, to the greatest extent possible, the cost of these developments should be borne by those who receive the benefits.

In accordance with this administration's policy of encouraging State and local undertakings, there is included in the budget an initial appropriation of 10 million dollars under proposed legislation to enable the Corps of Engineers and the Bureau of Reclamation to cooperate with States, local governments, or private groups in the development of their water resources. It is thought that there are projects on which State and local interests could go forward with some Federal assistance. Such assistance should be provided on an equitable financial basis and should be limited to projects from which benefits would accrue to the general public.

The power policy of this administration recognizes the willingness of State and local groups to participate in providing additional power facilities. Where the necessary transmission facilities are not being provided on reasonable terms by other public or private agencies, the Department of the Interior will construct and operate transmission lines that are economically feasible and are necessary for proper interconnection and operation of Federal generation plants, and those that are required to carry power to load centers within economic transmission distances. As a result of this policy and the approaching completion of transmission systems required for carrying out arrangements for marketing power from Federal projects under construction, combined expenditures of the Bonneville, Southeastern, and Southwestern Power Administrations in the fiscal year 1955 will be less than in 1954.

Under the Federal Power Act, licensees of hydroelectric projects which benefit from headwater impoundments of other projects, either public or private, must make annual payments to the upstream developer in accordance with benefits received. The Federal Government is not required to make similar payments when Federal projects derive such benefits. In simple equity, this should be done. I recommend enactment of legislation which would require such Federal payments.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

Although no appropriations are included in the 1955 budget for new power generation units by the Tennessee Valley Authority, expenditures will increase for continuation of construction of power plants presently underway, and for operation of power plants after they are completed. Expenses for operation of flood control, navigation, and fertilizer facilities will continue at about the 1954 level. Expenditures for power and fertilizer operations are more than offset by the income from sales. In order to provide, with appropriate operating reserves, for reasonable growth in industrial, municipal, and cooperative power loads in the area through the calendar year 1957, arrangements are being made to reduce, by the fall of 1957, existing commitments of the Tennessee Valley Authority to the Atomic Energy Commission by 500,000 to 600,000 kilowatts. This would release the equivalent amount of Tennessee Valley Authority generating capacity to meet increased load requirements of other consumers in the power system and at the same time eliminate the need for appropriating funds from the Treasury to finance additional generating units. In the event, however, that negotiations for furnishing these load requirements for the Atomic Energy Commission from other sources are not consummated as contemplated or new defense loads develop, the question of starting additional generating units by the Tennessee Valley Authority will be reconsidered.

In order to carry out the power policy of this administration which requires an interest charge on the Federal investment in power facilities to reimburse the Treasury for the cost of providing funds, a proposal is being developed for submission to the Congress to provide that an adequate rate of interest be paid to the Treasury on public funds invested in power facilities of the Tennessee Valley Authority. For this purpose, I have requested that a study be undertaken by the agency in cooperation with other executive agencies.

National forests and other public lands.—The development and use of our public lands should be on a businesslike basis with due regard for proper conservation and for the rights and interests of States and private citizens. Programs of the Forest Service and the Bureau of Land Management provide for the management, development, and increasing use of the valuable timber, forage, and mineral resources of the national forests and public lands, and also for the protection and use of these lands for their strategic watershed and other public values. Receipts from the use of these lands, estimated at 154 million dollars in the fiscal year 1955, are shared with the States and counties in which the lands are located.

The budget contemplates the withdrawal of Federal financial participation in certain phases of State and private forestry cooperation,

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

with greater assumption of responsibility by local interests. At the same time, emphasis will be placed by the Forest Service on cooperative research. Increased funds are recommended to complete construction of access roads needed to salvage the timber in the beetle-infested and windblown forest areas of Washington and Oregon.

Expenditures for the management and protection of our national parks, monuments, and historic sites will be somewhat above the current-year level, so as to provide for improved services to the increasing number of visitors. This increase is largely offset by a reduction in expenditures for construction. Federal aid to States for fish and wildlife restoration, financed by special taxes on fishing and hunting goods, will increase.

As a part of the administration's objective of charging reasonable fees for services or facilities provided by the Government for private individuals or groups, consideration is being given to adjustments which would result in increased receipts to the National Park Service, thus returning to the Treasury a larger amount of the costs of maintaining and operating our national parks.

Expenditures on Indian land resources will provide for soil conservation work and further development of water supplies and timber and range resources necessary for their economic development. In the fiscal year 1955 appropriations will be reduced from their level in 1954 as a result of the slowing down or deferring of some construction projects—which will be accomplished without jeopardizing the overall objectives of the Indian programs.

Mineral resources.—I have recently appointed a Cabinet committee to establish guidelines for the prudent use and development of domestic mineral resources and to assure our growing economy of necessary mineral supplies in time of emergency. The report of this committee, expected within the next few weeks, should be helpful in resolving many of the problems facing the mineral producers of the Nation.

The Bureau of Mines will continue its basic research programs in the fiscal year 1955 for the aid of private development of resources, with emphasis on expanding the utilization of minerals in abundant supply and the development of suitable substitutes for materials in short supply. The Federal Government will also encourage private development by undertaking basic resource surveys, providing incentives for exploration of high priority minerals, and assisting in the development of oil and gas reserves of the Outer Continental Shelf.

TRANSPORTATION AND COMMUNICATION

Efficient transportation and communication services are essential to the national economy and the national security. At my request, an intensive reappraisal of Federal responsibilities is underway both by the regular departments and agencies and by special commissions. The general principles guiding this reappraisal are that the national interest will usually be served best by a privately owned and operated industry, which is supported by a minimum of Federal funds or Federal basic facilities and services operated at the lowest feasible cost and financed, where possible, by charges levied on the users of the services.

Federal Reserve Bank of St. Louis

lion dollars, compared with 1,856 million dollars in 1954 and 2,077 million dollars actually expended in 1953. The largest decrease is the anticipated reduction of the postal deficit by operating savings and by increased postal rates. Sizable reductions have also been made in other large programs.

New legislative authority is required to move more rapidly toward putting the postal service on a self-supporting basis and to establish a corporation to operate the Washington National Airport. I am also recommending legislation to permit us to participate in the St. Lawrence Seaway, and to continue and strengthen the Federal-aid highway program.

Promotion of aviation.—The rapid development of aviation has been materially assisted by numerous services and by direct financial assistance provided by the Federal Government. These aids have included basic scientific research in aeronautics, establishment and operation of airways, enforcement of safety regulations, assistance in construction of airports, and direct provision of subsidies to airmail carriers. While need for some aid continues, the increasing maturity of this industry requires thorough reevaluation of the promotional responsibilities of the Federal Government. At my request, the Air Coordinating Committee is now undertaking a comprehensive review of our aviation policy.

With growing maturity, the airline and aircraft manufacturing industries should assume increased responsibility for air safety. Improved procedures of traffic control, elimination of older-type facilities, and curtailment of less essential services should permit an expanded volume of air traffic to be handled safely with reduced Federal expenditures for operating programs. Expenditures for construction programs are likewise declining.

As a result of these developments, expenditures of the Civil Aeronautics Administration can be reduced and we can still fulfill the basic Federal responsibilities for providing air-navigation aids, traffic control, and safety services. Budget expenditures in the fiscal year 1955 are estimated to be 25 million dollars less than in 1954, and 40 million dollars less than in 1953.

I am recommending appropriations for new airways facilities amounting to 5 million dollars, which will permit further progress on the modern very high frequency system of navigation aids and certain other improvements. Pending completion of current studies, no provision is made in the budget for additional appropriations for grants to State and local governmental units for airport construction.

In addition, the time has come when consideration should be given to requiring the users of the airways facilities to share the costs of providing this service.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

Reorganization Plan No. 10 of 1953, transferring the subsidy portion of airmail payments from the Postmaster General to the Civil Aeronautics Board, makes it possible for the first time for Congress to consider this major aid to aviation as a separate budget item. For both 1954 and 1955, these subsidy payments are estimated at approximately 80 million dollars, based primarily on existing route patterns and mail rates. The subsidy expenditures were included in the Post Office Department through September 1953. The separation of compensatory mail payments, which remain in the Post Office, from subsidy payments is a necessary first step toward a more effective review of expenditures for civil aviation as well as for the postal service.

The scientific research in aeronautics conducted by the National Advisory Committee for Aeronautics will continue in the fiscal year 1955 to be devoted almost entirely to support of the military programs for the development of new and improved aircraft, guided missiles, and propulsion systems. The budget provides for a strong continuing program in aeronautical research and for initial operation of the three new large supersonic wind tunnels now under construction. Nevertheless, expenditures will be 14 million dollars less than in the fiscal year 1954 because of the sharp decrease in construction expenditures as projects are completed. The superior performance of our jet aircraft in Korea and the even better performance of newer types now in production has been possible because of the basic research and wind-tunnel testing done in previous years. Much of the work will also contribute eventually to improving the performance, safety, and comfort of civil aircraft. Future possibilities are hinted by the recent performance of our research airplanes, one of which attained a speed of over 1,600 miles per hour—two and one-half times the speed of sound.

Merchant marine.—Federal aid to the merchant marine consists primarily of operating and construction subsidies to offset the differences between American and foreign costs. This program is designed to promote a healthy merchant marine as a nucleus capable of rapid expansion to meet national-defense needs. The sharp reduction in expenditures will result almost entirely from virtual completion of construction of the 35 Mariner-class vessels authorized in 1951.

Expenditures for operating subsidies have been rising steadily, and in 1955 will account for 85 of the 107 million dollars in net expenditures for maritime programs. These increases reflect not only faster payment of earlier obligations but also higher levels of subsidy resulting from the increased operating costs in recent years. The size and rising trend of expenditures for these subsidies make it essential to consider legislative changes to provide for more effective

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

budgetary control consistent with the basic objectives of the maritime program.

Operating programs of the Maritime Administration show a downward trend. By the end of the fiscal year 1955 the emergency operation of Government-owned cargo vessels will be reduced to about 47, compared to a high of 538 in 1952. Ships withdrawn from operation are being maintained in the national-defense reserve fleet to meet future emergency needs.

The physical assets of the Inland Waterways Corporation were sold as of July 1, 1953, in accordance with this administration's policy of removing the Federal Government from an activity which is appropriately private. The terms of sale fully protect the public interest in the continuance of the common-carrier barge service along the Mississippi and Warrior Rivers.

Navigation aids and facilities.—The expanded search-and-rescue facilities of the Coast Guard established in support of Department of Defense activities are being curtailed. Moreover, the fact that our transoceanic civil aviation no longer has a requirement for ocean weather stations has made it possible to reduce the number of these stations to those required by the Department of Defense, which in the future will finance them. These and other realinements will permit Coast Guard financed expenditures to be reduced from 236 million dollars in fiscal 1954 to 190 million dollars in fiscal 1955.

The Corps of Engineers will carry forward at minimum levels the maintenance work required for continued operation of river and harbor projects. Construction will also continue in 1955 at economic rates on 13 channel, harbor, or lock and dam projects, including one project to be initiated by a proposed 1954 supplemental appropriation. Seven other projects will be initiated and 2 deferred projects resumed in 1955. These projects have been selected on the basis of assuring the expeditious movement of traffic in existing harbors or waterways serving important requirements of commerce or national security. Emphasis has been given to small- or intermediate-sized projects for which detailed engineering plans have been completed. Not only do the benefits of these projects exceed their costs, but also, except for four high-priority projects of national interest, local beneficiaries will make a reasonable financial contribution.

In my State of the Union Message I again strongly recommended enactment of legislation to create a Government corporation to work, along with Canada, on the construction and operation of the proposed St. Lawrence Seaway. This proposal, now before the Congress, represents one part of a broad development of the great potential of the St. Lawrence River for electric power and for navigation. The power

270000—54——VI

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

features of the International Rapids section are expected to be constructed in part by the Province of Ontario and in part by the State of New York. The seaway legislation would permit the Federal Government, in cooperation with Canada, to build the remaining navigation facilities needed for ocean-going vessels to reach the Great Lakes. The total amount to be invested by the United States in the seaway is now estimated at 105 million dollars, with first-year expenditures of 6 million dollars. As I have previously indicated, not only would the seaway make a major contribution to national security, but over a period of years the tolls received by the United States from the prospective commercial use should permit the Federal investment to be fully repaid. Joint participation with Canada in this undertaking will assure that all legitimate American interests are taken into account in the construction and operation of this vital transportation link.

Highways.—Expenditures under the Federal-aid highway program of grants to States for highway construction have been rising during the past year, and will continue to rise in the fiscal year 1955 under commitments made pursuant to the Highway Act of 1952. The 1955 expenditures will be the highest in history. Emphasis in the selection of new projects will be given to the national system of interstate highways, which comprises the most important routes for interstate commerce and national defense. Of the 555 million dollars of estimated expenditures under the Federal-aid program in the fiscal year 1955, about 150 million dollars will be spent for projects in the interstate system. Other construction programs of the Bureau of Public Roads will involve expenditures of 27 million dollars, mainly for direct construction of forest highways and defense access roads.

We should give increased attention to eliminating the existing inadequacies of the national system of interstate highways. Pending development and review of detailed proposals for extension of the Federal-aid highway program, I am including under proposed legislation the 575-million-dollar level of the existing authorization. Similarly, I am including the prevailing annual rate of 22.5 million dollars for the forest-highway program. No appreciable expenditures will be made under the proposed authorizations in the fiscal year 1955.

Postal service.—Measured both in dollars and in employees, the postal service is big business. But, in its management, the modern methods which have so greatly increased the efficiency of private business have too often been ignored.

Last February, I announced "a program directed at improving service, while at the same time reducing costs and decreasing deficits."

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

Progress is being made toward achieving these objectives and will continue.

First, we are speeding the delivery of mail by many new steps without significant change in costs of handling. Later window hours, later pickups, changes in transportation patterns and schedules, experiments in carrying first-class mail by air, and many other projects have been made effective or are now being tested. The results will become increasingly apparent in the next year.

Second, to obtain a clear-cut measure of the cost of operating the postal service, the payment of airline subsidies has been transferred by reorganization plan to the Civil Aeronautics Board, and legislation enacted to require Government agencies and the Congress to reimburse the Post Office for the cost of handling their mail.

Third, we have initiated many economies and are planning others. Reduced mail-handling costs through efficient modern techniques already have resulted in substantial savings. This program is well underway but will take a long time to complete, since the new methods will require employee training and development of new machines.

Fourth, the deficit has been further reduced by increases in rates which the Postmaster General could change. Increases in parcel-post rates, foreign-mail rates, and others subject to administrative discretion have in the main put these services on a self-supporting basis.

The results of these and other improvements are already visible in the financial operations and outlook. Despite an estimated increase in mail volume of almost 2 billion pieces, gross expenditures of 2,775 million dollars in the fiscal year 1955 will remain unchanged from 1954. With higher operating revenues, the deficit under existing postal rates will continue to decline:

	Million
1953 (actual)	$659
1954 (estimated)	440
1955 (estimated)	330

No business, public or private, can prosper unless its management is free to use the best available methods of operation and to set prices adequate to cover the costs of an efficient operation. Legislation is already before the Congress to authorize the Post Office Department to acquire needed modern postal facilities, through long-term leases with title acquired at the end of the term. Other legislation is required to correct archaic administrative and personnel practices, and to enable expanded use of more modern transportation methods.

Most important, prompt and favorable action by the Congress is needed to increase postal rates. I am recommending increases in rates sufficient to yield as a minimum an additional 240 million

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

dollars in revenues in the fiscal year 1955. These revenues would reduce the 1955 postal deficit to 90 million dollars. Adequate rates, together with further major economies in postal operations, are expected to put the postal business on a self-supporting basis. This will continue to be our policy.

Regulation.—Three regulatory commissions carry out the Government's responsibility to protect the public interest in reasonable rates and adequate, safe transportation and communication: Interstate Commerce Commission, Federal Communications Commission, and Civil Aeronautics Board. Although their duties have substantially increased in recent years, anticipated improvements in management and procedures make it unnecessary to request any significant appropriation increases. For example, the centralization of administrative responsibility and the reorganization of existing activities in the Interstate Commerce Commission should make possible more effective use of available funds. By the end of the fiscal year 1954, the Federal Communications Commission should be substantially current in handling applications for television stations, so that the funds required for its activities, except for a new program of monitoring frequency usage, will be smaller in the fiscal year 1955 than in 1954.

Receipts of public enterprise funds.—Two-thirds of the gross expenditures of 4,277 million dollars for transportation and communication programs in the fiscal year 1955 will be financed from receipts of public enterprise funds. Postal receipts account for the bulk of these revenues. Substantial receipts are also anticipated from tolls and other revenues of the Panama Canal Company, and from vessel operations of the Maritime Administration.

FINANCE, COMMERCE, AND INDUSTRY

Within the limits set by requirements of national defense and the needs of the national economy, we are steadily reducing direct banking and business operations of the Federal Government. For example, the Reconstruction Finance Corporation is being liquidated, and the Government's synthetic rubber plants are being offered for sale. At the same time, the programs of the Department of Commerce to promote trade and industry are being strengthened and the Small Business Administration has been established to meet the special needs of small business. Regulatory agencies are simplifying their procedures and putting greater stress on cooperation rather than compulsion, without reducing protection to the public.

Gross expenditures for finance, commerce, and industry programs are expected to be 917 million dollars in the fiscal year 1955, a reduc-

Digitized for FRASER

Federal Reserve Bank of St. Louis

tion of 234 million dollars from 1954. About 60 percent of these expenditures are for financial assistance provided under the Defense Production Act. Another 30 percent are for the production programs administered by the Reconstruction Finance Corporation—primarily rubber and tin. Anticipated receipts of these enterprises as a group will decline about as much as their expenditures. Accordingly net expenditures of 162 million dollars in 1955 will be about the same as in 1954.

[1] Compares with new obligational authority of 134 million dollars in 1953 and 97 million dollars in 1954.

Expansion of defense production.—The Defense Production Act authorizes extensive financial assistance to assure expansion of productive capacity and of the materials supply necessary for our defense. With the help of purchase commitments, loans, and advances already made, much of the needed expansion is now under way. As a result, the aluminum productive capacity of the United States has doubled since 1950 and supplies of machine tools, titanium, copper, nickel, and other critical items have also substantially increased.

These programs are financed under the borrowing authority of 2.1 billion dollars provided in the Defense Production Act. Gross expenditures in the fiscal year 1955 are estimated at 546 million dollars. Of this amount 296 million dollars will be spent for purchases of materials and 165 million dollars for loans and advances to producers. Most of these expenditures arise from commitments already

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

outstanding. Since a large part of the materials to be acquired under this authority will be sold to the military stockpile of strategic and critical materials to meet its objectives, this program is intimately related to the stockpiling program discussed in the national security section of this message. Receipts from these sales and from sales to private industry, together with repayments of loans and advances, are estimated at 238 million dollars in 1955, reducing net expenditures to 308 million dollars.

Reconstruction Finance Corporation—production programs.—Expenditures and receipts of the rubber, tin, and abaca fiber programs currently administered by the Reconstruction Finance Corporation will continue to decline sharply in 1955, primarily as a result of reduced operations anticipated in the tin program.

By the end of the present fiscal year, the Government will have completed purchases of tin for the national stockpile. World supplies are already adequate to meet current requirements. As a result, there may no longer be a need for continued operation of the Government tin smelter in 1955. Pending outcome of international negotiations, the budget assumes withdrawal of the Government smelter from operations at the end of the fiscal year 1954.

During the fiscal years 1954 and 1955, annual production of synthetic rubber is estimated at about 600,000 tons—a reduction from the 712,000 tons produced in 1953. Present experience indicates that this level of production will meet all of the anticipated national needs for synthetic rubber. Although the Rubber Facilities Disposal Act authorizes sale of Government plants to private ownership before the end of the fiscal year 1955, plans are not yet far enough advanced to include estimated receipts from such disposal in the 1955 budget.

The production programs will be transferred to another agency before June 30, 1954, as provided in the Reconstruction Finance Corporation Liquidation Act.

Business loans and guarantees.—The regular business loan program of the Reconstruction Finance Corporation is now in liquidation as a result of legislation enacted last year on the recommendation of this administration. The Treasury Department will administer the liquidation after June 30, 1954. We plan to sell a major part of the Corporation's loans to private financial institutions. To meet commitments previously made, some expenditures will continue, but repayments and sales of loans will result in estimated net receipts of 121 million dollars in 1955.

A new program of loans to small businesses has recently been established in the Small Business Administration. The 1955 budget

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

assumes that about 350 loans will be authorized in the fiscal year 1954, and about 700 in 1955. This would almost exhaust the available appropriation of 55 million dollars by the end of 1955. Loans will be made where private credit on reasonable terms is unavailable, and, whenever possible, they will be made jointly with private banks. The Small Business Administration also assists small concerns in obtaining a fair share of Government contracts, and provides them with technical and financial advice.

Department of Commerce.—In accordance with this administration's declared policy, most emergency controls over business have been removed. The business programs of the Department of Commerce have been reorganized to provide a simpler and more effective basis for carrying on both regular business services and continuing responsibilities under the Defense Production Act. The Business and Defense Services Administration provides general services to business, assists in mobilization preparedness, and administers relevant current defense activities. The Bureau of Foreign Commerce assists in promoting international trade, primarily by providing American business with information on opportunities to buy and sell abroad. The Office of Business Economics provides data on the American economy and analyses of economic and business trends for a wide range of business and Government purposes. I am recommending small increases in the appropriations for these programs so that the Department can adequately carry out its responsibilities to foster and promote industry and commerce.

LABOR AND MANPOWER

My budget recommendations for the labor and manpower programs of the Federal Government are designed to help the Nation's productive system function smoothly and efficiently, by providing economic safeguards for workers, by helping bring together jobseekers and jobs, and by helping to recruit the working forces for defense and other industries. Workers will continue to be given protection against substandard wages and working conditions and against income losses due to unemployment. Orderly labor relations will be fostered, and the amicable settlement of disputes will be assisted by mediation.

Including proposed legislation, budget expenditures for labor and manpower programs are estimated at 281 million dollars during the fiscal year 1955, an increase of 16 million dollars from the current fiscal year. Approximately three-fourths of total budget expenditures for these programs is for administering the job placement and unemployment compensation services.

Although many of our workers benefit from the existing Federal-State unemployment compensation system, the present Federal law

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

does not include employees of firms with fewer than eight persons nor does it include Federal civilian employees. I recommend prompt extension of the system to these workers. Seventeen States already provide coverage of most firms with one or more employees, and most other States have legislation which will permit immediate coverage when the Congress acts. Amendments to State laws to achieve full coverage will be needed in only a dozen States. This preparedness on the part of the great majority of States will permit rapid extension of this valuable protection after the Federal law is amended. Additional revenues will more than offset the administrative costs resulting from such extension. An estimate of the benefit costs for Federal employees is included under general government.

[2] Compares with new obligational authority of 282 million dollars in 1953 and 267 million dollars in 1954.

Placement and unemployment compensation administration.—Gross expenditures in the fiscal year 1955 for administering the Federal-State placement and unemployment compensation services under present law are estimated at 192 million dollars, 7 million dollars below the current year. A decrease of about 30 million dollars will result

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

from a change in financial arrangements, by which advance payments to each State before the opening of each fiscal year will be reduced from an amount covering three months' operations to an amount for one month. Part of this reduction will be offset, however, by a higher estimated rate of expenditures for this program resulting from increases in salaries provided by State laws to employees who administer the services, some rise in the expected number of unemployment compensation claimants, and provision for weekly filing of claims and weekly payment of benefits. The weekly claims system, replacing the biweekly method currently in use in most States, will provide more satisfactory service to the claimants and, by permitting more frequent contact, should reduce the possibilities of fraudulent or erroneous payments. These factors may make necessary a request for a supplemental appropriation for the current fiscal year.

This administration has already recommended enactment of legislation to transfer annually to a special account in the unemployment trust fund, an amount equal to the difference between the receipts of the Federal unemployment tax and the administrative costs of operating our joint Federal-State unemployment security program. The initial transfer, based on receipts and expenditures in the fiscal year 1955, would be made at the beginning of the fiscal year 1956.

My recommendations in this budget provide for continued operation of the system for recruiting qualified workers from Mexico for seasonal employment on farms in the United States. These workers are needed to supplement our domestic farm-labor supply. The 1954 appropriation for this recruitment program was based on legislation which was to have expired on December 31, 1953. This authority has now been extended until December 31, 1955, and funds are included in the budget to pay for operations during the rest of the fiscal year 1954, as well as in the fiscal year 1955.

The railroad unemployment insurance taxes and expenditures which were previously included in budget accounts are now entirely included in trust accounts.

Labor standards and training.—Budget expenditures for the minimum-wage and maximum-hour regulatory programs in the fiscal year 1955 are estimated at about the 1954 level.

The social and economic plight of migratory farmworkers has been studied repeatedly. Up to now, little positive action to better these conditions has been taken by the Federal Government. This budget includes a recommended appropriation of 100 thousand dollars to enable the Department of Labor to provide leadership in establishing a cooperative Federal-State program in the fiscal year 1955.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

Military manpower selection.—Although a reduction in military personnel is planned, calls by the Department of Defense in 1955 to replace men drafted in 1953 will require an increase of 676 thousand dollars in estimated expenditures of the Selective Service System. This budget provides also for continuing a small staff for the National Security Training Commission.

Labor relations.—Budget expenditures of 13 million dollars in the fiscal year 1955 are estimated for the independent labor relations agencies—the National Labor Relations Board and the mediation services. Emphasis will be placed on providing improved services to employers and employees of industries and establishments strategically situated in interstate commerce.

Unemployment trust fund.—Under present law, unemployment compensation benefit payments in the fiscal year 1955 are expected to be somewhat higher than in 1954 because of an increase in claims of short duration and liberalization of benefits by States. Receipts in 1955 are estimated somewhat lower than in the current fiscal year. The legislation I am recommending to broaden unemployment compensation coverage will increase both the receipts and the benefit payments. Trust-fund transactions are not included in the totals of budget receipts and expenditures.

Federal financial management.—During the past year the Internal Revenue Service has improved greatly the administration of Federal revenue laws. Further economies will be made by cutting overhead expenses. These savings of several million dollars will be used to strengthen the field audit staff and to obtain more effective collection and enforcement. Auditing of tax returns and settlements are being speeded up. Tax collection has been decentralized so that most decisions in individual cases can now be made in district offices near the taxpayer. The reduced staff in Washington is concerned pri-

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

marily with developing overall policies and assuring uniformity in administration throughout the country. Nevertheless, serious problems remain. For example, despite the improvement in auditing, the backlog of unaudited returns and uncollected accounts has increased for several years. Strenuous efforts are being made to reverse this trend, both to increase collections and to permit a more prompt determination of taxpayers' liabilities.

Further reduction in expenditures by the Bureau of the Public Debt will be achieved in the fiscal year 1955 by revisions in the savings bond promotion program to place greater emphasis on the sale of larger denomination bonds, elimination of uneconomic sales outlets, and other economies. A large volume of savings bonds is now reaching maturity, but redemptions of these matured bonds are relatively low, since most owners are taking advantage of their right to continue to hold them at 3 percent interest.

Central property and records management.—Substantial reductions have been made in the expenditures of the General Services Administration for management of Government property and records. The fiscal year 1955 estimate of 156 million dollars is 23 million dollars below actual 1953 expenditures and 2 million dollars below the revised 1954 estimate. These savings primarily result from material reductions in building space rented for Government use, made possible in part by reductions in the scope of Government operations and accomplished through an aggressive and critical examination of requirements. In addition, numerous savings are being achieved by the General Services Administration which reduce the budget requirements of other agencies throughout the Government. Real property requirements and holdings are being reexamined and property determined to be surplus is being disposed of as rapidly as possible. Purchases of new materials have decreased as a result of elimination of unnecessary inventories by reduction in the number of separate types of items carried in inventories and by better utilization of property already on hand. Significant progress also is being made in controlling the volume of records, in their economical storage, and, when they are no longer essential, in accelerating their disposal.

Civil Service Commission.—As part of the program for strengthening the merit system of the Federal civil service, the budget provides funds to improve the standards used for the recruitment and transfer of personnel and to further the career development of Government employees. The Civil Service Commission expenditures as a whole, however, will decrease with improved management practices and with a decline in prospective workloads for the examination and placement

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

of applicants and for the investigation of persons employed or seeking employment in the Federal service.

I am recommending legislation to strengthen further the merit system and to provide conditions of employment for Federal personnel more nearly comparable to those in private enterprise. Certain legal restrictions initiated at the beginning of the present national emergency on the appointment and promotion of Federal workers should be removed. The present statutory limits on the number of high-level executive and scientific positions should be raised. Government agencies should be permitted to select employees from among the top five rather than the top three on Federal civil-service registers. Existing inequities in overtime-pay practices should be corrected. Building and maintenance workers should be added to the categories of employees paid at rates prevailing locally in private employment for similar occupations. The incentive-awards program should be consolidated and improved in order to eliminate costly administration and to increase employee interest in greater efficiency and economy. The cost of these changes in the main can be absorbed within the appropriations recommended for the agencies concerned.

Unemployment compensation for Federal workers.—I strongly recommend extension of the unemployment compensation system to give Federal employees the same benefits as are now provided to most workers in private employment. This will require an estimated 25 million dollars in expenditures for benefit payments in the fiscal year 1955. This program could be administered under contractual arrangements made through the Department of Labor with existing State unemployment compensation systems.

Retirement for Federal civilian personnel.—An appropriation of 30 million dollars is recommended to permit the continued payment to retired Federal workers of temporary cost-of-living increases as authorized by the Congress in 1952. The budget also includes 2 million dollars to pay annuities under special laws.

The civil-service retirement system is financed jointly by employee contributions and appropriations by the Government. The Congress, at its last session, however, did not appropriate for the Government's payments to the fund. The resumption of these payments is not included in this budget. Recommendations for financing this system as well as other retirement programs for Federal personnel will be determined after the Committee on Retirement Policy for Federal Personnel completes its study and reports to the Congress on or before June 30, 1954.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

Protective services and alien control.—The Federal Bureau of Investigation, as the investigative arm of the Department of Justice, obtains evidence for use in legal actions involving violations of Federal law. The crime rate throughout the country has put an increasing burden on the Bureau. The Bureau also has primary responsibility for coordinating investigations in the executive branch necessary for the Nation's internal security. Such investigations continue at peak levels. It is essential, therefore, that the Bureau staff be adequate to discharge these responsibilities.

District of Columbia.—I strongly recommend enactment of legislation to finance the expanded public works construction urgently needed in the National Capital. This legislation would authorize an increase of 9 million dollars in the annual Federal payment to the general fund of the District of Columbia, and an additional 1 million dollars for full payment for all water and related services. It would authorize 107 million dollars of additional interest-bearing loans to the District over the next decade, of which an estimated 5 million dollars would be spent in the fiscal year 1955. These expenditures by the Federal Government would be accompanied by substantial increases in taxes paid by District taxpayers. This legislation would, for the first time in recent years, place Federal payments to the District government on a level commensurate with the Federal Government's position in and its demands upon the District. It would permit the District to start a long-term program of public works necessary to make the Capital City worthy of our great Nation.

Territories and possessions.—The Federal Government also has special responsibilities for administering the various Territories and possessions, including the Canal Zone and the Trust Territory of the Pacific Islands. Included in this budget are certain necessary increases in expenditures for continuing the civilian administration of the Trust Territory, except those islands in the northern Marianas returned to the jurisdiction of the Navy. I recommend that the Congress enact at an early date legislation establishing the basic form of government for the Trust Territory to replace the present temporary arrangements.

Intergovernmental relations.—A Commission on Intergovernmental Relations is now studying the proper role of the Federal Government in relation to the State and local governments. It is giving particular attention to fiscal relationships, such as Federal grants-in-aid, tax sources, and intergovernmental tax immunities, and will report shortly on certain aspects of its assignment.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

Claims and relief acts.—The payment of certified claims makes up the total expenditure figure of 135 million dollars estimated for claims, judgments, and private relief acts in the fiscal year 1955. Most of these payments are for claims resulting from activities of the Department of Defense. The apparent decline of 14 million dollars in expenditures in the fiscal year 1955 is due to the usual omission in the budget year of any specific estimate for other claims, judgments, and relief acts.

Receipts of public enterprise funds.—The operations of the Virgin Islands Corporation account for most of the 4 million dollars in receipts of public enterprise funds.

INTEREST

Primarily as a result of the large increase in the public debt during World War II, interest payments now account for about 10 percent of Federal expenditures. Interest payments are fixed primarily by the size of the public debt and by interest rates on debt already outstanding.

INTEREST

[Fiscal years. In millions]

Item	Budget expenditures (net)			Recommended new obligational authority for 1955
	1953 actual	1954 estimated	1955 estimated	
Interest on public debt	$6,503	$6,525	$6,800	$6,800
Interest on refunds of receipts	75	70	70	70
Interest on uninvested trust deposits	5	5	5	5
Total	6,583	6,600	6,875	[1] 6,875

[1] Compares with new obligational authority of 6,583 million dollars in 1953 and 6,600 million dollars in 1954.

Interest on the public debt.—Interest payments on the public debt in the fiscal year 1955 are estimated at 6,800 million dollars. This is an increase of 275 million dollars over estimated expenditures for the current fiscal year, and 297 million dollars above actual expenditures in 1953.

The increase in 1955 reflects both the higher average interest rates and the larger public debt. The average rate on the interest-bearing public debt rose from 2.33 percent on June 30, 1952, to 2.41 percent on December 31, 1953, primarily because of the refinancing of maturing obligations at the higher market rates prevailing. As the result of the deficit financing during the same period the public debt has increased from 259 billion dollars to 275 billion dollars (including about one-half billion dollars not subject to the statutory debt limitation).

The budget of the United States is the financial expression of the administration's program for the coming fiscal year. An understanding of its scope and content is a high challenge to every citizen.

When I took office a year ago, I promised the Congress and the people that this administration would seek to chart a fiscal and economic policy which would reduce the planned deficits and bring the budget into balance.

I warned that this would not be easy. There still are heavy national security requirements. Substantial expenditures are by law relatively nondiscretionary. The far-reaching activities of the Federal Government are extremely complex.

Despite these inherent difficulties, we have made great progress. Federal expenditures have been cut substantially, tax reductions have been made justifiable, and the budgetary deficit has been sharply reduced.

We have, furthermore, made appropriate provision for our national security and for our international obligations and we have been able to propose certain increases in Federal expenditures to advance our domestic well-being and to foster economic growth.

I firmly believe, therefore, that this budget represents a plan of government which will not only protect our way of life but will also strengthen our economic base and enhance the welfare of all our people.

DWIGHT D. EISENHOWER.

JANUARY 21, 1954.

INTRODUCTION TO PART I

Part I of the budget (pp. A1 to A17) contains nine summary tables on Federal funds and on the public debt. Each of these tables is designed to bring together in one or two pages some overall aspect of the Federal budget.

TYPES OF FEDERAL FUNDS

The Federal (Government-owned) funds are of four types as follows:

The *general* fund is credited with receipts which are not earmarked by law for a specific purpose, and is charged with expenditures that are payable from appropriations (except appropriations of earmarked receipts) and those payable from borrowing. Both in items and in amounts, most of the Government's business is transacted through the general fund.

Special funds are those which are established to account for receipts that are earmarked by law for a specific purpose. They exclude the funds which carry on a cycle of operations for which there is continuing authority to use the receipts (as described in the next paragraph). Some special funds are subject to annual appropriation by Congress. Others are automatically available under the laws which created the funds.

Revolving funds are those which finance a cycle of operations, in which the expenditures generate receipts which are available for continuing use. They are divided into two subcategories—those with receipts primarily from outside the Government are called *public enterprise* funds, and those with receipts primarily from inside the Government are called *intragovernmental* funds. The former include nearly all of the Government corporations, the postal fund, and various unincorporated enterprises. The latter include various funds for stocking of supplies, for printing operations, and for the performance of services to meet the Government's own needs.

Management funds (including *consolidated working* funds) are those which are created to permit the pooling of advance payments from two or more appropriations to carry out certain activities.

BUDGET RECEIPTS AND EXPENDITURES

Basis of stating budget receipts.—Table 1 includes a summary of budget receipts. Such receipts include all money paid into the Treasury to the credit of the general fund and of special funds. Budget receipts never include money obtained from borrowing. Nor do budget receipts include receipts of revolving and management funds, since these receipts are deducted from expenditures. In those cases where the law provides an indefinite appropriation to a trust fund in an amount equal to certain tax receipts (such as for the old-age and survivors insurance trust fund and the railroad retirement account), the amount thereof is shown as a deduction from general fund receipts and excluded from general fund expenditures. Refunds of receipts are also deducted in arriving at budget receipts.

Basis of stating budget expenditures.—Tables 1, 4, 7, and 9 include information on budget expenditures. Such expenditures cover the general fund, the special funds, and the revolving and management funds. Net budget expenditures are on a *checks-issued* basis. This means that expenditures are reported for the fiscal year in which the checks are issued, or (where no checks are required) the year in which payment is made in cash. Interest on the public debt, including coupon interest and the increase in the redemption value of savings bonds, is included in the year in which it becomes payable, even though the coupons or bonds may not be presented for redemption in the year. Table 1 includes an adjustment figure for the past year to bring the final total to the Daily Treasury Statement expenditure basis.

The expenditures of the general fund and the special funds are generally stated on a *gross* basis; that is, receipts are not deducted from expenditures (except for interagency reimbursements and some incidental reimbursements from outside the Government). In the case of intragovernmental revolving and management funds, expenditures are stated on a net basis; that is, their receipts (most of which come from within the Government and are therefore shown as an expenditure of the paying agency) have been deducted from expenditures of the receiving agency and only the resulting figure is shown as its expenditure.

In the case of public enterprise funds expenditures are reported on both a gross and a net basis. That is, the gross expenditures show the total sums expended, and a deduction in each of the tables indicates their receipts (other than borrowing). The gross figures used here for the public enterprise funds are derived from the business-type budget statements of part II, which show expenditures and receipts on an accrual basis with a single adjustment (on either the expenditure or receipt side but not both) for the conversion from accrual to a checks-issued basis. Therefore, the gross figures used herein for such funds are not strictly on a checks-issued basis, although the net result is on such a basis.

Retirement of Government debt, both direct debt and Government corporation debt, is always excluded from budget expenditure figures. Similarly, investments in United States Government securities (which occur sometimes in the case of Government corporations) are excluded, at par, from the expenditure figures.

Eliminations from both receipts and expenditures.—Certain payments from one fund to another are eliminated from budget receipts and expenditures. This is done in order to avoid inflating both sides of the budget. The payments to the general fund of earnings and dividends on capital of revolving funds, and the return of such capital to the general fund are the items which have been so excluded.

BUDGET SURPLUS, DEFICIT, AND PUBLIC DEBT

Budget surplus and deficit.—The budget surplus or deficit, shown in table 1, represents the difference between the *budget receipts* and *net budget expenditures* of a given year. Cash balances, appropriation balances, and surpluses and deficits of previous years are not a part of the calculation.

The public debt.—The last section of table 1 summarizes and table 3 gives details regarding the effect of each year's operations upon the public debt. The budget surplus or deficit is not the only factor which causes a change in the public debt. The amount which it is necessary to borrow or which it is possible to repay is also influenced

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

by: changes in the Treasury cash balance, the result of trust fund transactions, the use of Government corporation borrowing directly from the public as a means of financing budget expenditures of the corporations (and vice versa in the case of direct repayments of borrowing by the corporations), and the change in the amount of checks outstanding and other items in process of clearance through the accounts.

BUDGET AUTHORIZATIONS

Table 2 summarizes the budget authorizations available and their disposition. Tables 5 and 6 give supplementary information on new authorizations becoming available each year, and table 8 gives supplementary information on the balances at start and end of the year.

The obligation basis.—Expenditures can be made only pursuant to appropriations or other authorizations granted by Congress. Government agencies are generally permitted by law to incur obligations requiring the future payment of money only when they have an appropriation or other authorization available for the purpose. Therefore, authorizations are enacted to cover *obligations* expected to be incurred within the fiscal year rather than to cover only the *expenditures* which are expected to be made during that year in payment of obligations.

Distinction between permanent and current authorizations.—Tables 2 and 6 distinguish *permanent* authorizations and *current* authorizations. The permanent items are those under which additional sums become available from time to time under action previously taken by the Congress; no further action is required each year. Most permanent authorizations are in force until repealed; a few are in effect for only a few years as specified in the law. The current authorizations are those enacted by Congress in or immediately preceding each fiscal year.

Balances.—Many budget authorizations are available for obligation for only 1 year, but some are available for longer periods of time. Even those which expire for obligation at the end of 1 year remain available for making expenditures in payment of such obligations for an additional 2 years, and further expenditures can be made later in payment of such obligations from the *certified claims* account of the Treasury. In the case of salaries and wages, travel, and like items, the lag between obligations and expenditures is usually no more than a few weeks or a few months. In the case of construction, major procurement, certain research contracts and similar items, the lag between obligations and expenditures may be as much as 1 or 2 years, and sometimes is even longer. For some revolving funds and certain other purposes, Congress has granted obligational authority well in advance of specific requirements, as a means of providing for contingencies which may arise. As a result of the foregoing factors, substantial balances of budget authorizations are carried forward from 1 year to the next. Such balances are not in the form of cash, but are bookkeeping authority for the incurring of obligations or the making of expenditures, for which cash must be provided through channels of financial management at the time the expenditures later occur.

Relating expenditures to authorizations.—Tables 2 and 7 summarize the relationship between budget authorizations and budget expenditures. Because old and new authorizations are by law commingled in some of the accounts, no attempt is made in the summary figures to separate actual spending in 1953 between the use of new authorizations and the use of balances. However, the budget presents such a breakdown on an estimated basis for 1954 and 1955. In the case of revolving and management funds, it assumes that the portion of their expenditures chargeable to budget authorizations is equal to the portion of the authorizations credited to the revolving fund during the year. The remainder of the revolving and management fund expenditures (or negative expenditures) are here classified as being charges or credits to balances of such funds.

TYPES OF NEW OBLIGATIONAL AUTHORITY

Appropriations are authorizations to make expenditures from the general fund of the Treasury or from the various special funds. In some cases the authority to incur obligations has previously been granted in the form of contract authorizations; in such cases, the appropriation to permit the payment of such obligations is said to be to *liquidate contract authorizations.* In all other cases appropriations confer authority both to incur new obligations and to pay for them.

Contract authorizations are authorizations to incur obligations prior to the enactment of an appropriation. A contract authorization does not in itself permit the spending of money; hence it must be followed by an appropriation to permit payment of the contracts and other obligations thus incurred.

Authorizations to expend from debt receipts are authorizations to make expenditures from borrowed money. Such authorizations may take these forms: (*a*) Authorizations for the Treasury to make public debt receipts available to a given agency or enterprise, often in exchange for notes of the enterprise; (*b*) authorizations for a Government-owned corporation to borrow directly from the public; and (*c*) cancellation of notes which have been issued by a Government enterprise and are held by the Treasury, where the cancellation has the effect of permitting further expenditures to be made (through restoring previously used authority to borrow from the Treasury).

Reappropriations and reauthorizations are actions to continue available part or all of the unused balances of prior appropriations or authorizations which would otherwise expire. When the authorizations thus continued had been previously granted for current operations of the year, the continuation of their availability into a new year constitutes new obligational authority.

Total new obligational authority shown in tables 2 and 5 is the sum of the various types of authorizations named above, less the portion of appropriations which is for liquidation of prior contract authorizations. This total represents the new authority becoming available in any given year for the purposes of making commitments.

PROPOSED LEGISLATION AND OTHER ITEMS FOR LATER TRANSMISSION

Tables 1, 2, 4, 5, and 6 identify by separate columns the estimates of receipts, authorizations, and expenditures under legislative proposals recommended by the President, and other supplemental authorizations, and expenditures therefrom, which it is expected will be transmitted later. Table 7 identifies such items in a separate stub section. Such estimates include, in addition to the various supplemental estimates which are identified in part II, an allowance for items which cannot be foreseen now but which will be transmitted later when definite amounts can be determined and the needs can be more specifically identified. This allowance is called a *reserve for contingencies;* congressional action upon it will be requested later, not at a single time nor as a single lump-sum item, but in the form of a number of specific appropriations for individual items.

Revolving and management funds (including U. S. Government securities held)	**3, 883**	1, 409		**1, 409**	[a] 842		**[a] 842**
Other amounts available:							
Adjustment of balances upward for claims, etc. (net)	**103**	135		**135**	135		**135**
Authorizations to expend from appropriations of subsequent year	**401**	394		**394**	322		**322**
Authorizations made available in prior year	**−602**	−401		**−401**	−394		**−394**
Total, budget authorizations available	**179, 517**	162, 346	1, 220	**163, 566**	134, 859	8, 373	**143, 232**
EXPENDITURES AND BALANCES							
Expenditures in the year (net) (see table 7):							
Out of new obligational authority		35, 311	396	**35, 707**	34, 858	1, 524	**36, 382**
Out of appropriations to liquidate contract authorizations		698	65	**763**	684		**684**
Out of authorizations to expend from subsequent year appropriations	[3] 74, 274	105		**105**	83		**83**
Out of balances of prior expenditure authorizations		33, 484		**33, 484**	30, 998	16	**31, 014**
Out of balances of revolving and management funds		843		**843**	[a] 2, 353	[a] 240	**[a] 2, 593**
Total, expenditures in the year (net)	[3] 74, 274	70, 441	461	**70, 902**	64, 270	1, 300	**65, 570**
Balances of authorizations and funds ceasing to be available unless reappropriated or reauthorized for the next year	**2, 523**	[4] 5, 778		**[4] 5, 778**	557		**557**
Balances carried forward at end of year [1] (see table 8):							
Appropriations	**78, 699**	66, 439	49	**66, 488**	50, 233	3, 916	**54, 149**
Authorizations to expend from debt receipts	**20, 087**	18, 135	775	**18, 910**	16, 931	2, 624	**19, 555**
Contract authorizations	**2, 525**	2, 395	[2] −65	**2, 330**	1, 686	[2] 533	**2, 219**
Revolving and management funds (including U. S. Government securities held)	**1, 409**	[a] 842		**[a] 842**	1, 182		**1, 182**
Total, expenditures and balances (net)	**179, 517**	162, 346	1, 220	**163, 566**	134, 859	8, 373	**143, 232**

[a] Deduct.

[1] Balances forwarded are divided as follows: Obligated—July 1, 1952, $69,702; 1953, $68,521; 1954, $59,453; 1955, $52,834; and unobligated—July 1, 1952, $29,677; 1953, $34,199; 1954, $27,433; and 1955, $24,271.

[2] Reflects obligations of $65 million under previously granted contract authorization for which appropriations to liquidate are proposed for later transmission.

[3] Excludes adjustment to daily Treasury statement in the amount of −$292 million.

[4] Includes $681 million of unobligated appropriations for the "Mutual military program," to be continued available under proposed legislation.

TABLE 3

EFFECT OF FINANCIAL OPERATIONS ON THE PUBLIC DEBT

Based on existing and proposed legislation

[In millions]

Description	1953 actual	1954 estimate	1955 estimate
Effect of operations on increasing (+) or decreasing (−) public debt held by the public:			
Budget surplus (−) or deficit (+) (from table 1)	+$9,389	+$3,274	+$2,928
Excess of trust receipts over expenditures (−) (from table 10)	−3,643	−2,691	−2,664
Issue (−) or redemption (+) of Government corporation debt to the public (from special analysis I)	+59	−72	−39
Change in Treasury cash balance, increase (+) or decrease (−)	−2,299	+280	
Change in clearing account for outstanding checks, etc., increase (−) or decrease (+)	+312	+7	−19
Total, increase (+) or decrease (−) in public debt held by the public	+3,818	+798	+206
Effect of borrowing from (+) or repayment to (−) Government trust funds and investment accounts:			
Trust funds (from special analysis I)	+3,068	+2,878	+2,979
Government-owned corporations and enterprises (from special analysis I)	+80	+3	+65
Total, increase (+) or decrease (−) in public debt held by Government trust funds and investment accounts	+3,148	+2,881	+3,044
Net increase (+) or decrease (−) in public debt	+6,966	+3,679	+3,250
Public debt at beginning of year	259,105	266,071	269,750
Net increase (+) or decrease (−) in public debt	+6,966	+3,679	+3,250
Public debt at end of year	266,071	[1] 269,750	[1] 273,000

NOTE.—Change in Treasury cash balance reflected above is computed as follows:

	1953	1954	1955
Beginning of year	$6,969	$4,670	$4,950
End of year	4,670	4,950	4,950
Increase (+) or decrease (−)	−2,299	+280	

[1] Because of wide swings in receipts and expenditures and the heavy concentration of taxes in the latter half of the fiscal year, there will be periods during the year when the public debt will be considerably greater than this amount.

INTRODUCTION TO PART II

Part II contains the details of the budget for Federal funds, including various types of tables and schedules, explanatory statements of the work to be performed and the money needed, and the text of the language proposed for enactment by Congress on each item of authorization. This part also includes material on funds of the municipal government of the District of Columbia, and a few other trust funds which require congressional action.

The contents of part II are arranged in chapters reflecting the organization of the Government. Totals from the chapters are carried forward to the tables of part I.

SUMMARIES OF BUDGET AUTHORIZATIONS, EXPENDITURES, AND BALANCES

At the beginning of each chapter a table in large type summarizes budget authorizations available, and a second table summarizes expenditures and other dispositions of the amounts available. Both tables segregate the items proposed for later transmission, for which no details appear in this budget, from those items already enacted or recommended in this document.

Summary of budget authorizations available.—This summary indicates the totals of each type of new obligational authority for the year, the totals of the various types of balances brought forward into the year, and any interchapter transfers or net upward adjustments of budget authorizations. The various types of authorizations are explained in the introduction to part I (pp. A3 and A4).

Summary of expenditures and balances.—This summary indicates the total expenditures for the chapter, the portion of the unspent available amounts which ceases to be available during or at the close of the year, and the balances carried forward into the next year. The figures are taken from the detailed analysis schedules appearing throughout the chapter.

For the years 1954 and 1955, there are estimated the portion of the expenditures which will come out of appropriations or other authorizations granted by Congress for that year, and the expenditures which will come from permanent authorizations and from balances of prior authorizations brought into the year. Additional entries are used where required for expenditures which will come from appropriations made to liquidate prior contract authorizations, and for expenditures from balances and receipts of revolving and management funds. Because old and new authorizations are commingled in some accounts, no attempt is made in the summary figures to separate actual spending in 1953 between old and new authorizations.

In preparing the estimates for 1954 and 1955, it is generally assumed that prior year balances available in commingled accounts will be obligated before the new authorizations are obligated, and that expenditures will reflect the liquidation of those obligations on the basis of previous experience. Where the obligation and expenditure are simultaneous, the first-in, first-out method is used to assign expenditures between old and new authorizations. In the case of revolving funds where budgetary authorizations are commingled with receipts, it is assumed that authorizations are expended in an amount equal to the sums placed in the revolving fund during the year, and that the remaining expenditures or net collections are a charge or credit to balances of the fund.

Summaries of balances.—At the bottom of the foregoing summaries, there is given (*a*) a further analysis of the authorization balances which are carried forward each year, indicating the respective amounts which are obligated and unobligated; and (*b*) a further analysis of the amounts written off or otherwise ceasing to be available each year, indicating the manner of writeoff.

STATEMENT OF AUTHORIZATIONS AND EXPENDITURES BY ACCOUNT TITLE

A detailed listing of the organization units and titles of appropriations and funds shows the budget authorizations and expenditures for each. The accounts are divided into several sections: Current authorizations other than revolving and management funds, permanent authorizations, revolving and management funds, and supplemental items proposed for later transmission.

Types of authorizations other than appropriations are set forth under the applicable appropriation titles, identified by separate stub entries. Functional code numbers appear in a separate column, indicating the category in the functional tables (Special Analyses B and J of part IV) where each account has been included.

Two deductions appear at the end of the table. One deduction, in the authorization column, covers the portion of appropriations which are to liquidate contract authorizations and hence are to be excluded in arriving at new obligational authority. The other deduction, in the expenditure column, is for the receipts of public enterprise funds, which are to be subtracted in arriving at *net* budget expenditures.

A separate double-page table is used for revolving and management funds. This portion of the table shows the total amounts provided by operations, the total amounts applied to operations and the net expenditures (which is the difference between the two other figures just named). Appropriations and other budgetary authorizations to use general fund money for revolving funds are shown in this section. The expenditures for each revolving fund include both the spending from budgetary authorizations and the spending from balances of the fund.

The section on revolving and management funds is divided between public enterprise funds and intragovernmental funds. For the former, the "funds applied" figures and for the latter the "net effect on expenditures" figures are carried into the "gross budget expenditures" of the preceding listing.

ALLOCATIONS AND CONSOLIDATED WORKING FUNDS

For funds appropriated to the President and other appropriations which are allocated by one agency to another for construction, for major procurement, for services to be carried on beyond the year, or for services which by mutual agreement are to be so handled, the amount so allocated is accounted for separately by the receiving agency. The use of the money is shown in a section of the budget under the parent account, rather than in the portion of the budget for the receiving agency.

Most other advances between agencies are accounted for in consolidated working funds. Each such advance is included in an appropriate object class of the parent accounts and the use of all such advances is shown in working fund schedules of the receiving agency.

DETAILED MATERIAL

The display for general and special fund appropriations is illustrated and explained on page 4 and the financial statements used for revolving funds are illustrated and explained on page 5.

The management funds follow the same style as general and special fund accounts with an extra summation of amounts provided and amounts applied, printed at the end of the expenditure analysis schedule. In the case of consolidated working funds, the detail is in part III.

EXPLANATORY ILLUSTRATION OF BUDGETS FOR GENERAL AND SPECIAL FUND ACCOUNTS

APPROPRIATION LANGUAGE

The language proposed by the President for inclusion in the 1955 appropriation acts is printed at the head of each item requiring action. The language in the 1954 appropriation acts is used as a base. Immediately following the language are citations to relevant laws and the appropriations from which the text is taken.

Salaries and Expenses, Office of the Solicitor, Labor

Salaries and expenses: For expenses necessary for the Office of the Solicitor, [$1,475,000: *Provided*, That hereafter the compensation of the Solicitor shall be at a rate equal to the rate established by law for grade GS–18] *$1,482,000.* (*50 U. S. C. 207, 611–622; Executive Order 6166; Reorganization Plan No. 2 of 1949; Reorganization Plan No. 14 of 1950; Reorganization Plan No. 19 of 1950; Departments of Labor and Health, Education, and Welfare Appropriation Act, 1954.*)

Appropriated 1954, $1,475,000 Estimate 1955, $1,482,000

Roman type shows the text used in the 1954 appropriation acts.

Brackets enclose material which it is proposed to omit in 1955.

Italic type indicates proposed new language and figures.

SCHEDULE OF AMOUNTS AVAILABLE

For each account there is shown a brief schedule which lists the appropriations made or required, other sources of money or authority to incur obligations, deductions for the amounts not used within the year, and the amount of "Obligations incurred."

AMOUNTS AVAILABLE FOR OBLIGATION

	1953 actual	1954 estimate	1955 estimate
Appropriation or estimate	$1,764,600	$1,475,000	$1,482,000
Transferred from "Salaries and expenses, Bureau of Employment Security," pursuant to Public Law 452	6,000	.....	.....
Adjusted appropriation or estimate	1,770,600	1,475,000	1,482,000
Reimbursements from other accounts	13,522	.....	.....
Total available for obligation	1,784,122	1,475,000	1,482,000
Unobligated balance, estimated savings	−628	.....	.....
Obligations incurred	1,783,494	1,475,000	1,482,000

Balances not available after the end of the year, to be lapsed.

Obligations refer to orders placed, contracts awarded, and services received during the year, regardless of the time of payment. Appropriations or other obligational authority must be provided by the Congress before obligations can be incurred.

OBLIGATIONS BY ACTIVITIES

Financial requirements are broken down by purpose, program, project, or activity. This breakdown is especially tailored for each agency and account, reflecting the particular duties and responsibilities for which it receives money.

Where reimbursements are received from other accounts of the Government, the obligations chargeable to such reimbursements are often placed in a separate portion of this schedule.

OBLIGATIONS BY ACTIVITIES

Description	1953 actual	1954 estimate	1955 estimate
Direct Obligations			
1. Litigation	$268,615	$198,273	$198,273
2. Interpretations and legal advisory services	280,961	173,736	194,486
3. Wage determinations	222,095	192,167	192,167
4. Legislative advisory services	138,478	108,391	108,391
5. Enforcement of regulatory labor laws (regional offices)	699,221	650,165	636,415
6. Executive direction and management services	160,602	152,268	152,268
Total direct obligations	1,769,972	1,475,000	1,482,000
Obligations Payable Out of Reimbursements From Other Accounts			
2. Interpretations and legal advisory services	$2,549	.....	.....
3. Wage determinations	573	.....	.....
5. Enforcement of regulatory labor laws (regional offices)	2,369	.....	.....
6. Executive direction and management services	8,031	.....	.....
Total obligations payable out of reimbursements from other accounts	13,522	.....	.....
Obligations incurred	1,783,494	1,475,000	1,482,000

Direct obligations are those for which this agency gets the money directly, either by appropriation, contract authorization, reimbursements from outside the Government, or other means.

Obligations shown in this portion of the schedule are financed by other appropriations and accounts, and therefore the amounts shown here are duplicated within the direct obligations section of the paying accounts.

NARRATIVE STATEMENTS

The work planned and services proposed to be carried out are described briefly under each appropriation or fund. Where practicable the narrative statements indicate the expected accomplishment in relation to the financial estimates and give some measures of program and performance. In the case of permanent appropriations, the narrative statements also explain the source of the money and the statutory basis for the appropriation.

PROGRAM AND PERFORMANCE

The Office of the Solicitor serves as legal counsel to the Department and examines the legal aspects of its program.

1. *Litigation.* The enforcement through court action of regulatory labor laws, the more important of which are the Federal wage, hour, and child labor laws, come within the scope of this activity.

6. *Executive direction and management services.*

Headings in the narrative statements usually agree with the schedules of obligations by activities.

Executive direction, administrative services, and similar common overhead activities are merely listed, except when there is some unusual circumstance to be explained.

OBLIGATIONS BY OBJECTS

There is shown for each account a summary of personal services and a classification of the obligations according to a uniform list of objects. These object classes, numbered from 01 to 16, reflect the nature of the things or services purchased, regardless of the purpose or the nature of the program for which they are used.

OBLIGATIONS BY OBJECTS

Object classification	1953 actual	1954 estimate	1955 estimate
Summary of Personal Services			
Total number of permanent positions	306	242	243
Average number of all employees	292	237	238
Average salaries and grades:			
General schedule grades:			
Average salary	$5,571	$5,712	$5,716
Average grade	GS–8.3	GS–8.3	GS–8.3
Personal service obligations:			
Permanent positions	$1,624,213	$1,348,450	$1,355,000
Regular pay in excess of 52-week base	6,280	5,200	5,200
Payment above basic rates	7,782	1,470	1,470
Total personal service obligations	1,638,275	1,355,120	1,361,670
Direct Obligations			
01 Personal services	1,624,753	1,355,120	1,361,670
02 Travel	50,431	52,000	52,000
03 Transportation of things	920	900	900
04 Communication services	19,078	18,750	19,000
05 Rents and utility services	2,673	2,250	2,250
06 Printing and reproduction	9,145	7,200	7,200
07 Other contractual services	23,525	17,400	17,400
Services performed by other agencies	1,104	600	600
08 Supplies and materials	23,415	17,700	17,750
19 Equipment	2,252	1,000	1,000
15 Taxes and assessments	3,675	2,050	2,230
Total direct obligations	1,769,972	1,475,000	1,482,000
Obligations Payable Out of Reimbursements From Other Accounts			
01 Personal services	$13,522	.....	.....
Obligations incurred	1,783,494	$1,475,000	$1,482,000

Permanent positions are those of a full-time nature which are of indefinite duration. They include positions which may be filled by persons with temporary appointments.

Average salaries and average grades are computed arithmetically. The average salary may fall either within or outside the salary range of the average grade.

The obligated balance shown here plus unobligated balances brought forward from prior years (if any) shown in the schedule of amounts available for obligation make up the balance available at the start of the year which is included in the chapter summary data.

ANALYSIS OF EXPENDITURES

This schedule shows the relationship between obligations incurred during the year and the amounts disbursed in the same period. The unliquidated obligations (i. e., obligations which have not yet been paid) at the beginning and end of the year are the principal items in making the bridge from obligations to expenditures.

The schedule also distributes the year's expenditures between those which come from authorizations of the same year, here called "current authorizations" (whether of a permanent or nonpermanent nature), and those which come from authorizations of a prior year.

In the case of management funds additional lines are shown in this schedule to show the total funds provided by operations and applied to operations and the net effect on budgetary expenditures.

ANALYSIS OF EXPENDITURES

	1953 actual	1954 estimate	1955 estimate
Unliquidated obligations, start of year	$55,055	$83,185	$70,185
Obligations incurred during the year	1,783,494	1,475,000	1,482,000
	1,838,549	1,558,185	1,552,185
Deduct:			
Adjustment in obligations of prior years	3,974	.....	.....
Reimbursements	13,522	.....	.....
Obligated balance carried to certified claims account	156	.....	.....
Unliquidated obligations, end of year	83,185	70,185	70,185
Total expenditures	1,737,712	1,488,000	1,482,000
Expenditures are distributed as follows:			
Out of current authorizations	1,686,962	1,405,000	1,412,000
Out of prior authorizations	50,750	83,000	70,000

The obligated balance shown here plus unobligated balances brought forward from prior years (if any) shown in the schedule of amounts available for obligation make up the balance available at the start of the year which is included in the chapter summary data.

Obligations which have been incurred but not yet paid are estimated as closely as possible, but the eventual payment may be in a slightly different amount from the obligation first reported. This line indicates the adjustment required for this reason in expired accounts.

Since the total of obligations includes the reimbursable items, but the expenditure figures are necessarily net of reimbursements (primarily to avoid duplicate accounting for the Government as a whole), it is necessary to deduct reimbursements in arriving at expenditure figures.

This is an example where successive annual appropriations are made. If appropriations of two or more years were merged under the law, a single figure would appear in the 1953 column for expenditures out of both current and prior authorizations.

EXPLANATORY ILLUSTRATION OF BUDGETS FOR REVOLVING FUNDS

The financial statements shown below are regularly used for revolving funds. Such funds also have narrative statements on program and performance. Budgetary authorizations for such funds and limitations on expenses of Government corporations follow the general format illustrated on the opposite page.

STATEMENT OF THE SOURCES AND APPLICATION OF FUNDS

This is a balanced presentation of the amounts becoming available during the year, either in the form of cash or other working capital, and the way in which those amounts have been used.

The statement excludes depreciation, losses on loans, and other transactions which affect neither cash nor other current assets and liabilities. It does reflect transactions which affect cash, accounts receivable, accounts payable, other accrued liabilities, inventories of supplies for administrative purposes, deferred charges and credits.

Both the funds applied and the funds provided parts of the statement are divided between "operations" and Treasury "financing."

For intragovernmental funds, net expenditures (the sum of amounts applied to operations, less amounts provided by operations) are included in budget expenditures.

For public enterprise funds, the total amount applied to operations is included in gross budget expenditures. The sum of amounts provided by operations for such funds make up the deduction for "Receipts of public enterprise funds."

A. *Statement of sources and application of funds*

	1953 actual	1954 estimate	1955 estimate
FUNDS APPLIED			
To operations:			
Acquisition of assets	$4,681	$4,000	$4,000
Expenses	2,003,084	2,076,100	2,029,100
Total applied to operations	2,007,765	2,080,100	2,033,100
To financing:			
Balance of appropriation carried to surplus	1,000,000		
Increase in Treasury cash	38,344		
Total funds applied	3,046,049	2,080,100	2,033,100
FUNDS PROVIDED			
By operations:			
Income: Contracting for workers	2,869,776	2,015,823	1,248,000
Decrease in selected working capital	176,273		
Total provided by operations	3,046,049	2,015,823	1,248,000
By financing: Decrease in Treasury cash		64,277	785,100
Total funds provided	3,046,049	2,080,100	2,033,100
EFFECT ON BUDGET EXPENDITURES			
Funds applied to operations	$2,007,765	$2,080,100	$2,033,100
Funds provided by operations	3,046,049	2,015,823	1,248,000
Net effect on budget expenditures	−1,038,344	64,277	785,100
The above are charged or credited (−) to net receipts of the fund	−1,038,344	64,277	785,100

If the enterprise acquires materials for manufacture or sale, purchases for manufacture or sale are included in expenses, whether or not the materials are used within the year.

Selected working capital items comprise the current assets (other than cash with Treasury, inventories for sale or manufacture, and without deducting any valuation allowances) less the current liabilities (other than reserves). The net amount of such items is indicated in a footnote to Statement C.

Net effect on budgetary expenditures includes the spending of appropriations for the revolving fund as well as the spending of the fund's own receipts. A negative figure here indicates collections in excess of expenditures.

STATEMENT OF INCOME AND EXPENSE

This is a statement of the income and expenses and the resulting profit or loss for the year. This statement is normally on a full accrual basis, including in the expenses sums for depreciation and provision for losses on receivables. It also indicates losses and charge-offs when they occur. In addition, gains or losses from the sale of equipment or other assets appear here.

At the bottom of this statement there is an analysis of the *retained earnings* or cumulative deficit, showing any additions to it during the year, any charges made against it, and the balance at the end of the year.

B. *Statement of income and expense*

	1953 actual	1954 estimate	1955 estimate
Income: Contracting for workers	$2,869,776	$2,015,823	$1,248,000
Expenses:			
Transportation of workers	1,148,212	1,268,200	1,236,860
Food and shelter for workers	775,425	779,900	765,240
Miscellaneous	79,387	28,000	27,000
Subtotal	2,003,024	2,076,100	2,029,100
Depreciation	15,625	16,625	17,625
Total expenses	2,018,649	2,092,725	2,046,725
Net income or loss (−) for the year	851,127	−76,902	−798,725
ANALYSIS OF RETAINED EARNINGS			
Retained earnings, beginning of year	1,044,138	1,895,265	1,818,363
Retained earnings, end of year	1,895,265	1,818,363	1,019,638

Income (as well as expenses) is usually based on the accrual method of accounting.

If the enterprise conducts a sales operation, the cost of goods sold, rather than purchases, is considered an expense in this statement.

Depreciation and other expenses not shown on statement A are indicated separately.

Retained earnings here agrees with the balance sheet. It represents cumulative profits kept in the business, whether in the form of cash, inventories, receivables, or fixed assets.

STATEMENT OF FINANCIAL CONDITION

This is a balance sheet of assets, liabilities, and investment of the Government at the close of the fiscal year. Like the other statements, it is normally on an accrual basis.

When interest is paid on part or all of the investment of the United States Government, this section is broken down to indicate the amount which has been invested by the Government on which the fund pays interest, the amount invested on which the fund does not pay interest, and the retained earnings or deficit.

C. *Statement of financial condition*

	1953 actual	1954 estimate	1955 estimate
ASSETS			
Current assets: Cash with Treasury	$2,723,788	$2,659,511	$1,874,411
Fixed assets:			
Equipment	62,499	66,499	70,499
Less portion charged off as depreciation	30,080	46,705	64,330
Total fixed assets	32,419	19,794	6,169
Total assets	2,756,207	2,679,305	1,880,580
LIABILITIES			
Current liabilities: Accounts payable	860,942	860,942	860,942
INVESTMENT OF U. S. GOVERNMENT			
Retained earnings	1,895,265	1,818,363	1,019,638
Total liabilities and investment of U. S. Government	2,756,207	2,679,305	1,880,580

NOTE.—Cash balance with Treasury, June 30, 1952, $2,685,444.
Selected working capital (other than cash with Treasury) included above is as follows: June 30, 1952,—$684,669; 1953,—$860,942; 1954,—$360,942; 1955,—$860,942.
Excludes contingent liability for undelivered orders as follows: June 30, 1952, $9,450; 1953, $2,470; 1954, $3,000; 1955, $3,000.

Cash with United States Treasury is the sum that the fund has on deposit with the Treasury. It excludes any balances of appropriations (or other authorizations) which have not yet been paid into the fund.

Liabilities normally means what is owed for goods and services which have been received. The remainder of the obligations outstanding, covering items on order which have not yet been received, is shown as a footnote.

The investment of the United States Government indicates the Government's interest as owner, plus the Government's interest as creditor in the form of notes payable to the Treasury where a Government corporation has authorization to borrow on such notes.

The cash balances shown in the footnote and above are used in compiling chapter summary data on balances. The contingent liabilities and commitments, if any, shown in the footnote minus selected working capital make up the obligated portion of the balances. The total cash minus the obligated portion makes up the unobligated portion.

SCHEDULE OF ACCRUED EXPENDITURES BY OBJECTS

This is a schedule of accrued expenditures by uniform object class. Sometimes the details are on an obligation basis, with an adjustment for the change in items on order, ending with the total accrued expenditures.

SCHEDULE A–1. *Accrued expenditures by objects*

Object classification	1953 actual	1954 estimate	1955 estimate
02 Travel	$1,148,212	$1,268,200	$1,236,860
03 Transportation of things	64,987	16,500	15,500
05 Rents and utility services	41,106	42,150	42,150
07 Other contractual services	734,319	737,750	723,090
08 Supplies and materials	14,400	11,500	11,500
09 Equipment	4,681	4,000	4,000
Total accrued expenditures	2,007,705	2,080,100	2,033,100

SENATE—Continued

CONTINGENT EXPENSES OF THE SENATE—Continued

Contingent Expenses, Senate, Communications—Continued

Senators or the President of the Senate, such telephone calls to be in addition to those authorized by the provisions of the Legislative Branch Appropriation Act, 1947 (60 Stat. 392; 2 U. S. C. 46c, 46d, 46e), the First Deficiency Appropriation Act, 1949 (63 Stat. 77; 2 U. S. C. 46d–1), [and] Second Supplemental Appropriation Act, 1952, Public Law 254, Eighty-second Congress, *and Public Law 178, Eighty-third Congress,* $14,550. (*Legislative-Judiciary Appropriation Act, 1954.*)

Appropriated 1954, **$14,550** Estimate 1955, **$14,550**

The Sergeant at Arms is authorized and directed to secure suitable office space in post office or other Federal buildings in the State of each Senator for the use of such Senator and in the city to be designated by him: *Provided,* That in the event suitable space is not available in such buildings and a Senator leases or rents office space elsewhere, the Sergeant at Arms is authorized to approve for payment, from the contingent fund of the Senate, vouchers covering bona fide statements of rentals due in an amount not exceeding $900 per annum for each Senator.

The Secretary of the Senate and the Sergeant of Arms are authorized and directed to protect the funds of their respective offices by purchasing insurance in an amount necessary to protect said funds against loss. Premiums on such insurance shall be paid out of the contingent fund of the Senate, upon vouchers approved by the chairman of the Committee on Rules and Administration.

Salaries or wages paid out of the foregoing items under "Contingent expenses of the Senate" shall be computed at basic rates, plus increased and additional compensation, as authorized and provided by law.

[Effective July 1, 1953, Public Law 479, Seventy-ninth Congress, under the heading "CONTINGENT EXPENSES OF THE SENATE", the last paragraph beginning on page 7 is amended by striking out the amount "$450" and inserting in lieu thereof "$650".]

[Effective July 1, 1953, Public Law 479, Seventh-ninth Congress, as amended by the first paragraph of chapter I, Public Law 254, Eighty-second Congress, hereby is further amended by striking out the word "sixty" and inserting in lieu thereof "ninety", and by striking out the words "three hundred" and inserting in lieu thereof "four hundred and fifty".]

[There is hereby created a committee consisting of six Senators, two from the Committee on Appropriations, two from the Committee on Post Office and Civil Service, and two from the Committee on Rules and Administration to be appointed by the respective chairmen of said committees. It shall be the duty of said committee to study the rates of compensation now being paid officers and employees of the Senate, including employees of the Senate Office Building under the Architect of the Capitol, but excluding administrative and clerical assistants to Senators and committee employees, to determine whether such rates of compensation bear the proper relationship to each other and whether they are in line with rates now paid by the other branch of Congress, and report to the Senate at the beginning of the second session of the Eighty-third Congress, what adjustments, if any, should be made.] (*Legislative-Judiciary Appropriation Act, 1954.*)

Payment to Widows of Deceased Members of the Senate

[For payment to Anna Lee Smith, widow of Willis Smith, late a Senator from the State of North Carolina, $12,500.]

[For payment to Lillian C. Tobey, widow of Charles W. Tobey, late a Senator from the State of New Hampshire, $12,500.]

[For payment to Martha B. Taft, widow of Robert A. Taft, late a Senator from the State of Ohio, $12,500.] (*Supplemental Appropriation Act, 1954.*)

Appropriated 1954, **$37,500**

[INTERPARLIAMENTARY UNION FOR 1953]

Interparliamentary Union for 1953, Senate

[For carrying out the provisions of the Joint Resolution entitled "Joint Resolution authorizing an appropriation to defray the expenses of the Annual Meeting of the Interparliamentary Union for the year 1953, to be held in Washington, District of Columbia", approved July 13, 1953 (Public Law 110, Eighty-third Congress), $150,000, to be disbursed by the Secretary of the Senate, who hereby is authorized to advance to the President of the American Group such sums within the appropriation as may be necessary to defray incidental expenses, to be accounted for in the same manner as provided by law for Senate committees.] (*Supplemental Appropriation Act, 1954.*)

Appropriated 1954, **$150,000**

HOUSE OF REPRESENTATIVES

SALARIES, MILEAGE, AND EXPENSES OF MEMBERS

Salaries of Members and Delegates, House of Representatives

For compensation of Members of the House of Representatives, Delegates from Territories, and the Resident Commissioner from Puerto Rico, $5,492,500. (*Legislative-Judiciary Appropriation Act, 1954.*)

Appropriated 1954, **$5,492,500** Estimate 1955, **$5,492,500**

Mileage and Expenses of Members and Delegates, House of Representatives

For mileage and expense allowance of Members of the House of Representatives, Delegates from Territories, and the Resident Commissioner from Puerto Rico, as authorized by law, $1,273,500. [The proviso under this head in Public Law 471, Eighty-second Congress, is amended to read as follows: "*Provided,* That in the case of taxable years beginning after December 31, 1953, the place of residence of a Member of Congress (including any Delegate and Resident Commissioner) within the State, congressional district, Territory, or possession which he represents in Congress shall be considered his home for the purposes of section 23 (a) (1) (A) of the Internal Revenue Code, but amounts expended by such Member within each taxable year for living expenses shall not be deductible for income tax purposes in excess of $3,000."] *Legislative-Judiciary Appropriation Act, 1954.*)

Capitol Police Board: To enable the Capitol Police Board to provide additional protection for the Capitol Buildings and Grounds, including the Senate and House Office Buildings and the Capitol Power Plant, [$19,110] *$22,345.* Such sum shall only be expended for payment for salaries and other expenses of personnel detailed from the Metropolitan Police of the District of Columbia, and the Commissioners of the District of Columbia are authorized and directed to make such details upon the request of the Board. Personnel so detailed shall, during the period of such detail, serve under the direction and instructions of the Board and is authorized to exercise the same authority as members of such Metropolitan Police and members of the Capitol Police and to perform such other duties as may be assigned by the Board. Reimbursement for salaries and other expenses of such detail personnel shall be made to the government of the District of Columbia, and any sums so reimbursed shall be credited to the appropriation or appropriations from which such salaries and expenses are payable and be available for all the purposes thereof: *Provided,* That any person detailed under the authority of this paragraph or under similar authority in the Legislative Branch Appropriation Act, 1942, and the Second Deficiency Appropriation Act, 1940, from the Metropolitan Police of the District of Columbia shall be deemed a member of such Metropolitan Police during the period or periods of any such detail for all purposes of rank, pay, allowances, privileges, and benefits to the same extent as though such detail had not been made, and at the termination thereof any such person who was a member of such police on July 1, 1940, shall have a status with respect to rank, pay, allowances, privileges, and benefits which is not less than the status of such person in such police at the end of such detail: *Provided further,* That the Commissioners of the District of Columbia are directed to pay the lieutenants detailed under the authority of this paragraph the same salary as that paid in fiscal year [1953] *1954* plus such increases in basic compensation as may be subsequently provided by law so long as these positions are held by the present encumbents. (*Legislative-Judiciary Appropriation Act, 1954.*)

Appropriated 1954, **$19,110** Estimate 1955, **$22,345**

The foregoing amounts under "Capitol Police", shall be disbursed by the Clerk of the House. (*Legislative-Judiciary Appropriation Act, 1954.*)

OFFICE OF THE LEGISLATIVE COUNSEL

Salaries and Expenses, House of Representatives, Legislative Counsel
Salaries and Expenses, Senate, Legislative Counsel

For salaries and expenses of maintenance of the Office of the Legislative Counsel, as authorized by law, including increased and additional compensation as provided by law, [$239,000] *$252,000,* of which [$125,000] *$132,000* shall be disbursed by the Secretary of the Senate and [$114,000] *$120,000* by the Clerk of the House of Representatives. (*Legislative-Judiciary Appropriation Act, 1954.*)

Appropriated 1954, **$239,000** Estimate 1955, **$252,000**

[JOINT COMMITTEE ON REDUCTION OF NONESSENTIAL FEDERAL EXPENDITURES]

Salaries and Contingent Expenses, Senate, Joint Committee on Federal Expenditures

[For an amount to enable the Joint Committee on Reduction of Nonessential Federal Expenditures to carry out the duties imposed upon it by section 601 of the Revenue Act of 1941 (55 Stat. 726), to remain available during the existence of the committee, $20,000, to be disbursed by the Secretary of the Senate.] (*Legislative-Judiciary Appropriation Act, 1954.*)

Appropriated 1954, **$20,000**

EDUCATION OF SENATE AND HOUSE PAGES

Education of Senate, House, and Supreme Court Pages

For education of congressional pages and pages of the Supreme Court, pursuant to section 243 of the Legislative Reorganization Act, 1946, [$43,900] *$47,280,* which amount shall be advanced and credited to the applicable appropriation of the District of Columbia, and the Board of Education of the District of Columbia is hereby authorized to employ such personnel for the education of pages as may be required and to pay compensation for such services in accordance with such rates of compensation as the Board of Education may prescribe. (*Legislative-Judiciary Appropriation Act, 1954.*)

Appropriated 1954, **$43,900** Estimate 1955, **$47,280**

STATEMENT OF APPROPRIATIONS

Statement of Appropriations

For the preparation, under the direction of the Committees on Appropriations of the Senate and House of Representatives, of the statements for the [first] *second* session of the Eighty-third Congress, showing appropriations made, indefinite appropriations, and contracts authorized, together with a chronological history of the regular appropriation bills as required by law, $6,000, to be paid to the persons designated by the chairmen of such committees to supervise the work. (*Legislative-Judiciary Appropriation Act, 1954.*)

Appropriated 1954, **$6,000** Estimate 1955, **$6,000**

LIBRARY OF CONGRESS

INTRODUCTORY STATEMENT

The Library of Congress, established by an act of Congress approved April 24, 1800, is not only the library of the Congress itself, but is also the general library of the Government of the United States, complemented in special fields by other Government libraries. Its collections are comprehensive and varied, and include important manuscripts, maps, music, motion-picture films, sound recordings, prints, photographs, books, periodicals, newspapers, documents of all national governments of the world, oriental literature, etc. In addition to maintenance of the collections and the rendering of general and basic services connected therewith, certain specialized functions are performed: the Legislative Reference Service, copyright, catalog card distribution, and the service of books in raised characters and talking books to the blind. In terms of these broad fields of activity comparative obligations (including only those chargeable to annual appropriations) for 1953 and estimated for 1954 and 1955 are:

	1953 actual	1954 estimate	1955 estimate
General and basic services:			
Acquisitions	$965,685	$981,182	$1,034,562
Organization of the collections	1,423,670	1,456,922	1,536,271
Reader and reference services	1,432,471	1,396,264	1,441,002

Maintenance and protective services	$794,808	$764,902	$790,689
Executive direction and general administrative services	608,832	605,345	701,487
Specialized services:			
Legislative reference service	884,350	901,721	993,837
Copyright	1,083,191	1,100,000	1,153,278
Catalog card distribution service	1,236,219	1,264,800	1,558,757
Books for the blind	991,449	1,000,000	1,000,000
Total obligations	9,420,675	9,471,136	10,209,883

The Library's first obligation is to Congress; the second to other agencies of the Government; and the third to other libraries, scholars, investigators, and the general public.

In addition to funds appropriated annually by Congress, there are also available a number of gift and trust funds, and consolidated and allocated working funds.

Certain responsibilities for the physical equipment, maintenance, and operation of the Library buildings rest by law with the Architect of the Capitol, and estimates for these purposes are carried under the request of that office.

For the general and basic services, the major objectives for 1955 are to enable the Library to meet the increasing number of official inquiries requiring material from recently emphasized geographical and subject areas; to repair its sustaining services which were weakened in favor of developing new area services demanded by the Federal agencies; and to provide necessary flexibility in staff assignments to insure basic adequacy of services. Additions to the staff are proposed to strengthen some of the basic operations which are threatened with a serious breakdown. No new projects are proposed. For the specialized services, the objectives for 1955 are the strengthening of the staff, organization and techniques to meet the demands of Congress (Legislative Reference Service) and of the public (copyright, catalog card distribution, and the service of books for the blind).

Salaries and Expenses, Library of Congress

Salaries and expenses: For necessary expenses of the Library of Congress not otherwise provided for, including compensation of the Librarian Emeritus, as authorized by law; development and maintenance of the Union Catalogs; custody, care, and maintenance of the Library buildings; special clothing; and expenses of the Library of Congress Trust Fund Board not properly chargeable to the income of any trust fund held by the Board; [$4,810,272] *$5,084,011. (2 U. S. C. 131–166; 5 U. S. C. 150; 17 U. S. C. 1–215; 20 U. S. C. 91; 28 U. S. C. 921; 31 U. S. C. 588, 589; 52 Stat. 808; Legislative-Judiciary Appropriation Act, 1954.)*

Total obligations	4,831,959	4,810,272	5,084,011

PROGRAM AND PERFORMANCE

Personal services and incidental expenses required for the basic operations of the Library are financed from this appropriation.

1. *Acquisition of library materials.*—The development of the collections of the Library is planned; materials are procured by purchase, gift, exchange, copyright deposit, transfer, or otherwise; and materials are selected for addition to the permanent collections. The objectives for 1955 are greater selectivity and improved efficiency in the procurement of materials, with emphasis on the acquisition of noncurrent strategic materials and filling serious gaps in the collections; and the strengthening of exchange relations with institutions in important areas. The collections totaled 31,692,679 items as of June 30, 1953, and consisted of 9,846,561 books and pamphlets; 13,239,450 manuscript pieces, and 8,606,668 maps, pieces of music, reels of microfilm, photographs, and other miscellaneous items. Receipts from various sources in 1953, and estimated for 1954 and 1955 are as follows:

Description	1953 actual	1954 estimate	1955 estimate
Purchase	$470,333	$450,000	$480,000
Copyright	408,622	419,000	429,000
Transfer and deposit (principally from Government agencies)	1,012,018	1,100,000	1,100,000
Gift from individual and unofficial sources	1,022,213	800,000	800,000
Exchange	527,522	600,000	600,000
Source not reported (mainly newspaper and periodical issues)	961,523	1,000,000	1,000,000
Total	4,402,231	4,369,000	4,409,000

Of the items received about 1.5 million are added to the permanent collections annually.

2. *Organization of the collections.*—Library materials are cataloged, classified, marked, and arranged; Library of Congress catalogs and the national union catalogs are maintained; and binding operations controlled. The objectives for this activity in 1955 are preliminary control over all materials and an increase in regular cataloging through improved methods and procedures.

Selected performance data for 1953 and estimated for 1954 and 1955 are as follows:

Description	1953 actual	1954 estimate	1955 estimate
Volumes fully cataloged and added to the classified collection	131,696	140,000	140,000
Items otherwise organized for use (without full cataloging)	9,637	12,000	12,000
Cards filed in catalogs	1,404,144	1,450,000	1,450,000
Volumes bound	58,537	65,000	65,000
Items repaired, cleaned, mounted, etc.	189,987	185,000	190,000
Cards received, checked, or filed in National Union Catalog	647,136	700,000	700,000

NOTE.—These figures are for the processing department only and do not reflect cataloging, filing, binding, and related processing operations performed by other departments of the Library (except copyright cataloging of books).

3. *Reader and reference services.*—Books and other library materials are provided within and without the Library, reference and bibliographic assistance is rendered,

Federal Reserve Bank of St. Louis

LIBRARY OF CONGRESS—Continued

Salaries and Expenses, Library of Congress—Continued

and custody of the collections maintained. The objectives of this activity for 1955 are more adequate service to readers during the 52 hours of full service and the 26 hours of limited service; the adjustment of the area and language specialization program in regions of sensitive importance; and the strengthening of basic departmental operations such as the shelving of incoming materials, cataloging of nonbook materials (maps, manuscripts), the selection and preparation of materials for binding, and the interpretation of the collections through the preparation of bibliographies and checklists. The slight upward trend in workload is expected to continue in 1954 and 1955.

Description	1953 actual	1954 estimate	1955 estimate
(*a*) General reader and reference service:			
Books and pamphlets served	1,155,749	1,178,000	1,189,000
Other units of material served	737,451	750,000	775,000
Units issued on loan	199,264	210,000	215,000
Reference inquiries answered (including telephone requests for reference service and loans, aid to readers, and reference conferences)	494,430	525,000	550,000
Reference letters	45,182	50,000	53,000
(*b*) Law library reader and reference service:			
Books and pamphlets served	235,774	250,000	260,000
Reference inquiries answered (including telephone requests for reference service and loans, aid to readers, and reference conferences)	80,540	82,000	82,000
Reference letters	708	850	850

4. *Maintenance and protective services.*—The two Library buildings and the collections and other properties contained therein are maintained, preserved, and protected. A staff of 195 including 82 part-time charwomen, preserves, cleans, and maintains the Library buildings, collections, and grounds, operates telephone switchboards, elevators, check stands, motor vehicles, and the laundry; procures and maintains furniture, office supplies, housekeeping materials and miscellaneous equipment; assigns space; and operates the receiving and stockrooms. Constant alertness by the guard force staff of 76 is necessary to prevent fire and theft, to maintain order, and to provide regular inspections of all areas in both buildings in which is assembled one of the greatest accumulations of national treasures in the world.

5. *Executive direction and general administrative services.*

PROGRAM AND PERFORMANCE

The Copyright Office is responsible for recording and cataloging all copyright applications, assignments and renewals, for supplying copyright information to the public and for collecting and accounting for copyright fees. Title 17 U. S. C. sec. 210 provides that the Register of Copyrights shall print complete and indexed catalogs for each class of copyright entries. The amount requested for fiscal 1955 will enable the Register of Copyrights to publish the Catalog of Copyright Entries and a Bulletin of Copyright Decisions and make them available to the

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

public within a reasonable period. The office is conducted as a business operation. The amount requested for personal services is almost equal to the fees received for services rendered. In addition, the value of books and other library materials deposited in accordance with the Copyright Act and transferred to the Library of Congress are also to be credited to the copyright operation. The income and costs for 1953 and estimates for 1954 and 1955 are as follows:

	1953 actual	1954 estimate	1955 estimate
Income:			
Fees applied	$865,302	$886,934	$908,667
Estimated value of materials deposited	642,713	658,763	674,819
Total income	1,508,015	1,545,697	1,583,486
Costs:			
Salaries	1,008,383	1,026,700	1,079,978
Other costs	74,808	73,300	73,300
Total costs	1,083,191	1,100,000	1,153,278

The objective for 1955 is to keep current with the workload at all times, and to render prompt and efficient service to the public. The program and performance under each of the activities described are predicated on an estimated 229,431 copyright registrations during 1955, an estimated 223,968 during 1954 and an actual 218,506 during 1953. The basis for the estimated increase between 1953 and 1955 is an anticipated increase of 5 percent in registrations.

1. *Receiving and accounting for applications, etc.*—All materials mailed or delivered to the Copyright Office are received, assembled, and routed, accounts maintained for all moneys received, records relating to the registration of copyrights filed and materials deposited in accordance with the Copyright Act. Performance data for 1953 and estimates for 1954 and 1955 are as follows:

Description	1953 actual	1954 estimate	1955 estimate
Registrations	218,506	223,968	229,431
Mail received and dispatched	521,797	534,841	547,886

2. *Examining copyright applications.*—All applications and deposits are examined before issuance of registration certificates or recording of documents to determine whether the provisions of the Copyright Act have been satisfied. Performance data for 1953 and estimates for 1954 and 1955 are as follows:

Description	1953 actual	1954 estimate	1955 estimate
Items examined for registration	283,929	291,027	298,125
Registrations and recordation of documents	225,040	230,666	236,292

3. *Indexing and cataloging all materials received.*—The Register of Copyrights is required to print complete and indexed catalogs of all items registered. The catalog entries prepared by the Copyright Office are made available in part to the Library for its general operations. During 1953 there were 218,506 registrations cataloged and it is estimated there will be 223,968 in 1954 and 229,431 in 1955.

4. *Reference services.*—The Copyright Office makes available to the public information concerning the provisions of the Copyright Act, including procedures, policies and rulings; information concerning registrations is furnished on a fee basis. Obtaining compliance with registration requirements is also part of this activity. Performance data for 1953 and estimates for 1954 and 1955 are as follows:

Description	1953 actual	1954 estimate	1955 estimate
Titles searched	51,861	53,157	54,454
Letters and search reports written	23,124	23,702	24,280

5. *Printing the catalog of copyright entries and bulletins of decisions.*—Catalogs for each class of copyright entries are printed as required by 17 U. S. C. 210, and bulletins of copyright decisions are printed and made available to the public.

6. *General supervision and legal services.*—The work of the Copyright Office is closely coordinated; it includes legal services relating to the status and improvement of copyright law in its foreign as well as domestic aspects, such improvement constituting the major objective under this activity in 1955.

6. Administration	37,040	40,286	40,660
Total obligations	881,350	901,721	993,837

PROGRAM AND PERFORMANCE

To carry out the objectives of the Legislative Reorganization Act of 1946, research reports and digests are prepared and inquiries from Members and committees of Congress are answered. The objectives for 1955 are the readjustment of all activities to an anticipated increase in the number of inquiries and more adequate research coverage in areas of congressional concern.

1. *Authoritative research and analysis.*—The Legislative Reorganization Act of 1946 specifies 21 fields of specific congressional concern. During 1954 the following 12 fields, all carried forward from 1953, are to be covered: International economics, international relations, taxation and fiscal policy, American government and public administration, conservation and natural resources, social welfare, American law, labor economics, engineering and public works, transportation and communications, agriculture, and price economics. It is proposed in 1955 to add one other field, national defense.

2. *General research.*—General research is performed and reports provided, spot reference inquiries answered, graphs, charts, and illustrations prepared, and translations made. Congressional inquiries numbered 50,663 in 1953. A continuation of the increase characteristic of the last decade is anticipated. Assuming that the average annual increase of 10 percent will continue the total for 1954 would be 55,696; and for 1955, 61,265. Sufficient staff is requested for 1955 to provide more adequate handling of the substantial increase in inquiries since 1950, the date of the last appropriation for additional staff.

3. *Preparation of digests, indexes, and abstracts.*—The Digest of Public General Bills covered 9,900 bills during the Eighty-third Congress, first session. It is expected to cover as many during the Eighty-fourth Congress, first session. The card index to the Federal statutes was maintained as an essential reference tool.

4. *Reference files, bibliographic and reader services.*—Reference files containing clippings, pamphlets, and documents are maintained; researchers are supplied with bibliographic and reference tools; selective and comprehensive bibliographies are prepared for Members and committees of Congress; and reader services are provided by the congressional reading room. During 1953, 64,111 reference file items were processed, 12,667 bibliographic entries prepared, 25,513 published items acquired and processed, and 3,328 readers served. With the growth in number and scope of inquiries, there has been a steady increase in this activity which is expected to continue in 1954 and 1955. The additional staff requested is intended to provide for the efficient and expeditious acquisition and processing of research materials.

5. *Index to State legislation.*—Public Law 596, Sixty-ninth Congress, authorized and directed the preparation and reporting to Congress biennially of an index to State legislation together with a supplemental digest of the more important legislation. This activity was discontinued by Congress in fiscal year 1949. Pursuant to resolutions of the Legislative Service Conference, the National Association of State Libraries, the Association of College and Reference Libraries, and the Association of the Bar of New York City, an estimate of the cost of its reinstitution is presented for consideration. No printing costs are involved during 1955 but will be required for 1956.

6. *Administration.*

PROGRAM AND PERFORMANCE

The work of the Card Division is that of a mail-order house doing a business of some $1,000,000 a year. It maintains a stock of over 150,000,000 catalog cards representing some 2,300,000 titles, and fills orders from more than 8,000 regular subscribers in the United States and abroad. It also prepares and offers for sale certain publications. More than 80 percent of this appropriation is chargeable to the cost of card and publication sales, and this cost plus 10 percent statutory profit is returned to the Treasury. The remaining 20 percent represents a service to the Library of Congress. The objectives for 1955 are the greater use of card reproduction by means other than printing to expedite the filling of orders for out-of-print cards; continued improvements and economics in operations; increasing the scope and utility of the Library of Congress catalogs in book form; and extending the usefulness and coverage of New Serial Titles.

It is planned in 1955 to keep within the publication pattern of 1954 by offsetting anticipated increases in certain areas by anticipated decreases in other areas.

1. *Supplying and printing cards for the Library of Congress.*—The number of cards supplied to the Library of Congress in fiscal year 1953 was 4,105,739; estimated for 1954, 4,100,000; and for 1955, 4,100,000.

2. *Supplying and printing cards for other libraries.*—The number of cards printed or otherwise reproduced in fiscal year 1953 for sale to other libraries was 32,936,482; estimated for 1954, 31,000,000, and for 1955, 33,000,000. The number of cards sold in fiscal year 1953 was 21,181,986; estimated for 1954, 23,000,000; and for 1955, 23,000,000.

3. *Preparation, printing, and distribution of technical publications.*—These publications are auxiliary to the cataloging activities of the Library of Congress and include the Classification Schedules, lists of Subject Headings, Rules for Descriptive Cataloging, Cataloging Service Bulletins, and similar publications. Because of the need to reprint a large number of classification schedules, it is anticipated that 1954 expenditures will exceed those of 1953. The 1955 estimates include an item of $25,000, constituting half the cost of printing the sixth edition of Library of Congress Subject Headings. A published catalog of New Serial Titles, funds for which were granted in the 1954 appropriation, will be continued and expanded; there were 563 paid subscriptions for this publication in 1953, 800 are anticipated in 1954, and 1,000 in 1955.

4. *Preparation, printing, and distribution of the Author Catalog.*—The Author Catalog is issued monthly and cumulated quarterly and annually; there were 872 paid subscriptions for all issues in calendar year 1953. Subscribers to this part also receive issues of Films (quarterlies with an annual cumulation), Maps and Atlases, and Music and Phonorecords (both issued on a six-month and annual cumulation). It is estimated that there will be about the same number of subscribers in 1954 as there have been in 1953 and 875 in 1955. Included under this activity is the Armed Forces Medical Library Catalog of which 382 copies were sold in 1953, and sales of 400 copies are estimated for 1954 and 1955.

5. *Preparation, printing, and distribution of the Subject Catalog.*—The Subject Catalog is issued in 3 quarterly volumes and 1 annual cumulation; there were 367 paid subscriptions for calendar year 1953. It is estimated that there will be 375 paid subscriptions in 1954, and about 400 in 1955.

6. *Preparation, printing, and distribution of the 5-year accumulations of the Subject Catalog and the Armed Forces Medical Library Catalog.*—These are special one-time projects for fiscal year 1955. The sale of these catalogs will pay for the costs plus 10 percent profit.

OBLIGATIONS BY ACTIVITIES

Purchase of books and other library materials—1953, $270,929; 1954, $275,931; 1955, $300,000.

PROGRAM AND PERFORMANCE

This appropriation constitutes the only means of acquiring regular domestic trade publications (except for copyright deposits) and many foreign trade publications, both current and noncurrent, from approximately 100 countries or areas. The publications acquired by purchase constitute a most important part of the Library's acquisitions although they represent only a small portion of the material received annually.

The requested increase in fiscal year 1955 is necessary to repair the deficiencies in the Library's acquisitions program during the past 4 years resulting from reduced appropriations during a period when prices of current books, subscriptions, and incidental expenses were increased.

OBLIGATIONS BY ACTIVITIES

Description	1953 actual	1954 estimate	1955 estimate
1. Procurement and distribution	$928,551	$929,648	$934,023
2. Cataloging and reference services	62,898	70,352	65,977
Obligations incurred	991,449	1,000,000	1,000,000

PROGRAM AND PERFORMANCE

The Division for the Blind is responsible for administering a national program to provide reading material for the blind of the United States, United States Territories and possessions. In discharge of this responsibility it executes two closely related operations.

(*a*) It provides books in embossed characters, and talking books with their associated reproducers. The books are distributed through 28 regional libraries which assume responsibility for their custody and circulation. The reproducers are distributed through 55 State agencies.

(*b*) It maintains one of the 28 regional libraries providing service to more than 4,500 readers in the District of Columbia and the States of Maryland, Virginia, North Carolina, and South Carolina. In addition, this regional library offers a national service of a unique collection of Braille books not generally available in the other regional libraries.

The objectives for 1955 are to provide a maximum of satisfaction to the increased reader demand for talking books and to supply reproductions of books in Braille and Moon commensurate with declining reader demand; to prepare, with the assistance of the technical research and development department of the American Foundation for the Blind, new and improved specifications for sound reproduction for the blind; to explore with the research department of the American Printing House for the Blind, improved and more economical techniques of printing in Braille; to seek solutions to some of the more pressing problems confronting regional libraries in the rendering of service, especially the difficulties resulting from accumulations of surplus and little used reading materials; and initiate and develop more effective procedures and techniques in the repair of talking-book machines.

1. *Procurement and distribution.*—Books are selected, purchased and distributed, and talking-book machines are purchased, repaired, and replaced.

Description	1953 actual	1954 estimate	1955 estimate
Talking books purchased (titles)	251	169	180
Embossed books purchased, including magazines (titles)	152	158	133
Talking-book machines:			
Purchased		5,870	5,870
Repaired	8,474	6,197	4,317
Salvaged-scrapped	1,618	3,000	2,500
Records replaced	3,959	6,000	6,000

2. *Cataloging and reference services.*—Catalogs of talking and Braille books are prepared and maintained. A cumulative supplement of talking books for the blind, 1948–53, will be printed in fiscal year 1954. A second supplement of Press Braille will be prepared in 1954 and 1955. A union catalog of hand-copied material available for the blind will be completed in 1955.

ADMINISTRATIVE PROVISIONS

Appropriations in this Act available to the Library of Congress for salaries shall be available for expenses of investigating the loyalty of Library employees; special and temporary services (including employees engaged by the day or hour or in piecework); and services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a).

Not to exceed ten positions in the Library of Congress may be exempt from the provisions of appropriation Acts concerning the employment of aliens during the current fiscal year, but the Librarian shall not make any appointment to any such position until he has ascertained that he cannot secure for such appointments a person in any of the three categories specified in such provisions who possesses the special qualifications for the particular position and also otherwise meets the general requirements for employment in the Library of Congress.

Appropriations in this Act available to the Library of Congress shall be available, in an amount not to exceed $10,000, when specifically authorized by the Librarian, for expenses of attendance at meetings concerned with the function or activity for which the appropriation is made. (*Legislative-Judiciary Appropriation Act, 1954.*)

Obligations incurred	2,794,513	2,820,000	2,987,800

PROGRAM AND PERFORMANCE

The Office of Superintendent of Documents is a division of the Government Printing Office which operates under separate appropriations. The work programs are entirely of a service nature and are of such type that there is no control over the volume of work which the Superintendent of Documents is required by law to perform.

1. *Sales distribution.*—The Superintendent of Documents is authorized by law to sell copies of Government publications purchased from the Public Printer. Acquisition costs are paid from sales receipts, so no appropriation is required for printing sales copies. By provision of law, the sale price is set at the cost of manufacture plus 50 percent. At the end of each fiscal year, excess receipts not required for purchasing additional publications are turned in to the Treasury Department as miscellaneous receipts. For the fiscal year 1953 earned revenue from this source was $1,840,011. It is estimated that miscellaneous receipts earned will be $2,000,000 for 1954 and $2,200,000 for 1955. The number of sales orders has been steadily increasing, and in the last 10 years the volume of orders and the dollar value of publications sold has more than doubled. The current public interest in the Government's publishing program points to a continuing increase in the volume of orders.

2. *Distribution for other agencies and Members of Congress.*—The Superintendent of Documents under provisions of law is required to prepare mailing lists, including the mailing list for the Congressional Record, and to perform mailing operations upon the request of any Government agency and without reimbursement from those agencies. Another legal obligation is to handle the mailing of Farmers' Bulletins, Soil Surveys, and other publications which are allocated to Members of Congress on a quota basis.

3. *Depository library distribution.*—The Superintendent of Documents is required by law to supply one copy of every Government publication, upon request, to more than 540 libraries which are designated depositories for Government publications.

4. *Cataloging and indexing.*—The law provides that the Superintendent of Documents shall prepare and distribute catalogs and indexes of all publications issued by the Federal Government. The Monthly Catalog of United States Government Publications and the Numerical List and Schedule of Volumes are the two principal publications which are issued to discharge legal requirements.

GENERAL PROVISIONS

[SEC. 102. Purchases may hereafter be made from the foregoing appropriations under the "Government Printing Office", as provided for in the Printing Act approved January 12, 1895, and without reference to the Act approved June 30, 1949 (Public Law 152), as amended, concerning purchases for the Federal Government.]

[SEC. 103. In order to keep the expenditures for printing and binding within or under the appropriations therefor, the heads of the various executive departments and independent establishments are hereafter authorized to discontinue the printing of annual or special reports under their respective jurisdictions: *Provided*, That where the printing of such reports is discontinued the original copy thereof shall be kept on file in the offices of the heads of the respective departments or independent establishments for public inspection.]

SEC. [104] *102*. No part of the funds appropriated in this Act shall be used for the maintenance or care of private vehicles.

SEC. [105] *103*. Whenever any office or position not specifically established by the Legislative Pay Act of 1929 is appropriated for herein or whenever the rate of compensation or designation of any position appropriated for herein is different from that specifically established for such position by such Act, the rate of compensation and the designation of the position, or either, appropriated for or provided herein, shall be the permanent law with respect thereto: *Provided*, That the provisions relating to positions and salaries thereof carried in H. Res. 725, 732, and 739 of the Eighty-second Congress, and H. Res. 78, 87, 136, 147, 149, and 206 of the Eighty-third Congress shall be the permanent law with respect thereto.

GENERAL PROVISIONS—Continued

SEC. [106] *104.* No part of any appropriation contained in this Act shall be paid as compensation to any person appointed after June 30, 1935, as an officer or member of the Capitol Police who does not meet the standards to be prescribed for such appointees by the Capitol Police Board: *Provided*, That the Capitol Police Board is hereby authorized to detail police from the House Office, Senate Office, and Capitol Buildings for police duty on the Capitol Grounds. (*Legislative-Judiciary Appropriation Act, 1954.*)

GOVERNMENT PRINTING OFFICE

[REVOLVING FUND]

Government Printing Office Revolving Fund

BUDGETARY AUTHORIZATION SCHEDULES

[For establishment of a revolving fund, effective July 1, 1953, to be available without fiscal year limitation, for expenses necessary for the operation and maintenance of the Government Printing Office (except the Office of Superintendent of Documents), including rental of buildings; expenses of attendance at meetings, when authorized by the Joint Committee on Printing; maintenance and operation of the emergency room; purchase of uniforms for guards; boots, coats, and gloves; repairs and minor alterations to buildings; and expenses authorized in writing by the Joint Committee on Printing for inspection of Government printing activities; $1,000,000; and in addition, the Public Printer shall provide capital for said fund by capitalizing, at fair and reasonable values as jointly determined by him and the Comptroller General, the present inventories, plant (except buildings and land), equipment, and other assets of the Government Printing Office: *Provided*, That the unexpended balances (including the amounts otherwise required to be returned to the Treasury) and the obligations and outstanding commitments of existing appropriations for "Working capital and congressional printing and binding" shall be transferred to this fund. The fund shall be (1) reimbursed for the cost of all services and supplies furnished (including those furnished other appropriations of the Government Printing Office) at rates which shall include charges for overhead and related expenses, depreciation of plant (except buildings and land) and equipment, and accrued leave; (2) credited with all receipts including sales of Government publications, waste, condemned, and surplus property and with payments received for losses or damage to property; and (3) charged with payment into miscellaneous receipts of the Treasury of such part of the receipts from the sales of Government publications as is required by law (44 U. S. C. 71, 72a, 309).]

[An adequate system of accounts for the fund shall be maintained on the accrual method and financial reports prepared on the basis of such accounts. The Public Printer shall prepare and submit an annual business type budget program for the operations under this fund. The activities of the Government Printing Office shall be audited by the General Accounting Office and an audit report furnished annually to the Congress and the Public Printer. For the purposes hereof the Comptroller General shall have such access to the records, files, personnel, and facilities of the Government Printing Office as he may deem necessary.]

[Hereafter any executive department or independent establishment of the Government ordering printing and binding or blank paper and supplies from the Government Printing Office shall pay promptly by check to the Public Printer upon his written request, either in advance or upon completion of the work, all or part of the estimated or actual cost thereof, as the case may be, and bills rendered by the Public Printer in accordance herewith shall not be subject to audit or certification in advance of payment: *Provided*, That proper adjustments on the basis of the actual cost of delivered work paid for in advance shall be made monthly or quarterly and as may be agreed upon by the Public Printer and the department or establishment concerned.] (*Legislative-Judiciary Appropriation Act, 1954.*)

BUSINESS-TYPE STATEMENTS

PURPOSE AND FINANCIAL ORGANIZATION

The Government Printing Office executes orders for printing, binding, and blankbook work, placed by Congress, and the various departments and independent establishments of the Federal Government, and furnishes on order, blank paper, inks, and similar supplies. Operations are based upon the provisions of title 44, U. S. Code, and subject to the authority of the Joint Committee on Printing.

Prior to fiscal year 1954, the amount appropriated each year included the printing and binding authorized to be done for Congress; the printing, binding, and distribution of the Federal Register; and working capital to be returned to the Treasury not later than 6 months after the close of each fiscal year. All work for other agencies of the Government was reimbursed on the basis of actual cost.

Beginning with fiscal year 1954, the Government Printing Office is financed under a revolving fund (provided by Public Law 178, approved Aug. 1, 1953). Operations are

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

on a reimbursable basis, and business-type accounting and budget procedures are employed. The original capital of the fund is $46,682,456.

A separate appropriation has been established for authorized printing and binding for the Congress; for printing, binding, and distribution of the Federal Register; and printing and binding of Government publications authorized by law to be distributed without charge to the recipients (title 44, U. S. Code).

Receipts from sales of publications by the Superintendent of Documents are deposited to the revolving fund and cost of publications paid from same. All profits accruing from these transactions are deposited in the Treasury of the United States and credited to miscellaneous receipts.

A. *Statement of sources and application of funds*

	1953 actual	1954 estimate	1955 estimate
FUNDS APPLIED			
To operations:			
Acquisition of assets: Equipment		$1,364,000	$1,864,000
Expenses		66,679,200	65,733,723
Less depreciation on equipment and building appurtenances		864,000	864,000
Expenses requiring funds		65,815,200	64,869,723
Increase in selected working capital		12,184,242	
Total applied to operations		79,363,442	66,733,723
To financing:			
Payment of earnings to Treasury		2,000,000	2,200,000
Increase in Treasury cash		16,985,203	23,840
Total applied to financing		18,985,203	2,223,840
Total funds applied		98,348,645	68,957,563
FUNDS PROVIDED			
By operations:			
Value of services performed		68,679,200	67,933,723
Working capital absorbed at fund inception		12,290,395	
Decrease in selected working capital			1,023,840

BUREAU OF THE BUDGET—Continued

Salaries and Expenses, Bureau of the Budget—Continued

1. *Office of budget review.*—Budget instructions and procedures are developed, review of agency estimates is coordinated, and the budget document is prepared.

2. *Office of legislative reference.*—Proposed legislation and agency reports on pending legislation, enrolled bills, and proposed Executive orders and proclamations are reviewed for the President.

3. *Office of management and organization.*—Programs and plans are developed for improved Government organization and procedures, and guidance is provided in the work of the Bureau to improve agency management and operations.

4. *Office of statistical standards.*—Proposed agency reporting plans and forms are reviewed, and the Government's statistical activities, coverage, and methods are coordinated and improved.

5. *Program divisions.*—Agency programs, budget requests, and management activities are examined, appropriations are apportioned, proposed changes in agency functions are studied, and agencies are assisted in the improvement of their administration. Responsibility for this work with respect to particular agencies is divided among five divisions: (*a*) commerce and finance, (*b*) international, (*c*) labor and welfare, (*d*) military, and (*e*) resources and civil works.

6. *Field service.*—The field service was abolished effective September 15, 1953.

7. *Administration.*

OBLIGATIONS BY ACTIVITIES

Policy coordination—1953, $155,000; 1954, $215,000; 1955, $215,000.

PROGRAM AND PERFORMANCE

The National Security Council advises the President with respect to the integration of domestic, foreign, and military policies relating to the national security. The Central Intelligence Agency is under the direction of the Council. The Council includes the President, the Vice President, the Secretary of State, the Secretary of Defense, the Director of the Foreign Operations Administration, and the Director of the Office of Defense Mobilization. In addition, the secretaries and under secretaries of other executive departments and of the military departments, the Chairman of the Munitions Board, and the Chairman of the Research and Development Board may serve as members when appointed by the President and confirmed by the Senate. Other high officials attend meetings or participate in Council actions as directed by the President. The Secretary of the Treasury participates in all Council actions, while the Chairman of the Joint Chiefs of Staff, the Director of Central Intelligence, and the Director of the Bureau of the Budget regularly attend Council meetings.

OFFICE OF DEFENSE MOBILIZATION—Continued

[SALARIES AND EXPENSES]—continued

Salaries and Expenses, Office of Defense Mobilization—Con.

PROGRAM AND PERFORMANCE

1. *Direction of defense mobilization program.*—The Office of Defense Mobilization directs and plans the current and future national mobilization effort, and coordinates all mobilization activities of the executive branch of the Government. These activities include production and resources expansion, procurement, manpower, stabilization, transportation, protection of facilities important to the national defense, telecommunications, and control of electromagnetic radiation.

Reorganization Plan No. 3 of 1953 transferred to this agency the functions of the National Security Resources Board concerning the coordination of military, industrial, and civilian mobilization, and the functions of the Munitions Board with respect to stockpiling of strategic and critical materials.

2. *Interdepartmental Radio Advisory Committee.*—The Committee advises the Director concerning the allocation of radio frequencies to Government stations and the coordination and development of Government-wide telecommunications policies.

[Contributions to United Nations Korean Reconstruction Agency: For making contributions authorized by section 303 (a), $50,700,000.]

[In addition to amounts otherwise made available herein, such amounts of 1953 funds as were obligated prior to June 30, 1953, and deobligated thereafter for any reason, shall be available for reobligation for the purposes of this Act during the current fiscal year.]

[GENERAL PROVISIONS]

[SEC. 102. Appropriations in this Act for economic or technical assistance and allocations from any appropriations to the Director for Mutual Security, or the Mutual Security Agency, or the Department of State, shall be available, without limitation on any authority conferred by the Mutual Security Act of 1951, as amended, or any Act continued in effect thereby, for rents in the District of Columbia; expenses of attendance at meetings concerned with the purposes of such appropriations; employment of aliens, by contract, for services abroad; examination of estimates of appropriations in the field; maintenance, operation, and hire of aircraft; hire of passenger motor vehicles and, in addition, passenger motor vehicles abroad may be exchanged or sold and replaced by an equal number of such vehicles; transportation of privately owned automobiles; entertainment within the United States (not to exceed $15,000); exchange of funds without regard to section 3651 of the Revised Statutes (31 U. S. C. 543); loss by exchange; expenditures (not to exceed $50,000) of a confidential character other than entertainment, provided that a certificate of the amount of each such expenditure, the nature of which it is considered inadvisable to specify, shall be made by the Director or Deputy Director of Mutual Security, and every such certificate shall be deemed a sufficient voucher for the amount therein specified; insurance of official motor vehicles in foreign countries; rental of quarters outside the continental limits of the United States to house employees of the United States Government (without regard to section 322 of the Act of June 30, 1932, as amended (40 U. S. C. 278a)), lease, necessary repairs and alterations to quarters; actual expenses of preparing and transporting to their former homes in the United States or elsewhere the remains of persons or members of the families of persons who may die while such persons are away from their homes participating in activities under the Mutual Security Act of 1951, as amended; purchase of uniforms; ice and drinking water for use abroad; and services of commissioned officers of the Public Health Service and of the Coast and Geodetic Survey, and for the purposes of providing such services the Public Health Service may appoint not to exceed twenty officers in the Regular Corps to grades above that of senior assistant, but not above that of director, as otherwise authorized in accordance with section 711 of the Act of July 1, 1944, as amended (42 U. S. C. 211a), and the Coast and Geodetic Survey may appoint for such purposes not to exceed twenty commissioned officers in addition to those otherwise authorized: *Provided*, That not to exceed $57,500,000 shall be available for administrative expenses of the departments and agencies concerned with the administration of the programs provided for herein, and no part of such amount shall be used to pay the salary of any civilian employee at a rate greater than that paid by the State Department for comparable work or services in the same area: *Provided further*, That none of the funds provided herein shall be used after September 30, 1953, to pay any employee a basic salary of $12,000 or more per annum, except that this prohibition shall not apply to two-thirds of the number of employees being paid at the basic salary of $12,000 or more per annum on June 30, 1953: *Provided further*, That appropriations made under this Act shall be available for expenses in connection with travel of personnel outside the continental United States, including travel of dependents and transportation of personal effects, household goods, or automobiles of such personnel when any part of such travel or transportation begins in the current fiscal year pursuant to travel orders issued in that fiscal year, notwithstanding the fact that such travel or transportation may not be completed during the current fiscal year: *Provided further*, That no part of any appropriation contained in this Act shall be available for expense of transportation, packing, crating, temporary storage, drayage, and unpacking of household goods and personal effects in excess of an average of five thousand pounds net but not exceeding nine thousand pounds net in any one shipment, but the limitations imposed herein shall not be applicable in the case of employees transferred to or serving in stations outside the continental United States under orders relieving them from a duty station within the United States prior to August 1, 1953.]

[SEC. 103. Payments made from funds appropriated herein for engineering fees and services to any individual engineering firm on any one project in excess of $25,000 shall be reported to the Committees on Appropriations of the Senate and House of Representatives at least twice annually.]

[SEC. 104. Of the funds appropriated by this Act, except funds appropriated for assistance under sections 541 and 548 of the Mutual Security Act of 1951, as amended, not less than $100,000,000 shall be used to carry out the provisions of section 550.]

[SEC. 105. None of the funds provided by this Act nor any of the counterpart funds generated as a result of assistance under this or any other Act shall be used to make payments on account of the

Federal Reserve Bank of St. Louis

principal or interest on any debt of any foreign government or on any loan made to such government by any other foreign government; nor shall any of these funds be expended for any purpose for which funds have been withdrawn by any recipient country to make payment on such debts: *Provided*, That after September 1, 1953, none of the funds herein appropriated shall be used to make up any deficit to the European Payments Union for any nation of which a dependent area fails to comply with any treaty to which the United States and such dependent area are parties and said failure to comply has been adjudicated adversely to said nation in any court of competent jurisdiction nor shall any of the counterpart funds generated as a result of assistance under this Act be made available to such nation.]

[SEC. 106. The Administrator shall, in providing for the procurement of commodities under authority of this Act, take such steps as may be necessary to assure, so far as is practicable, that at least 50 per centum of the gross tonnage of commodities, procured within the United States out of funds made available under this Act and transported abroad on ocean vessels, is so transported on United States flag vessels to the extent such vessels are available at market rates.]

[SEC. 107. No part of any appropriation contained in this Act shall be used to pay the salary or wages of any person who engages in a strike against the Government of the United States or who is a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or who advocates, or is a member of an organization that advocates, the overthrow of the Government of the United States by force or violence: *Provided*, That for the purposes hereof an affidavit shall be considered prima facie evidence that the person making the affidavit has not contrary to the provisions of this paragraph engaged in a strike against the Government of the United States, is not a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or that such person does not advocate, and is not a member of an organization that advocates, the overthrow of the Government of the United States by force or violence: *Provided further*, That any person who engages in a strike against the Government of the United States or who is a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or who advocates, or who is a member of an organization that advocates, the overthrow of the Government of the United States by force or violence and accepts employment the salary or wages for which are paid from any appropriation or fund contained in this or any other Act shall be guilty of a felony and, upon conviction, shall be fined not more than $1,000 or imprisoned for not more than one year, or both: *Provided further*, That the above penalty clause shall be in addition to, and not in substitution for, any other provisions of existing law.]

[SEC. 108. This Act may be cited as the "Mutual Security Appropriation Act, 1954".] (*67 Stat. 152–161, 478–482; Mutual Security Appropriation Act, 1954.*)

Appropriated 1954, **$4,531,507,000**
Appropriated (adjusted) 1954, **$726,006,827**

NOTE.—Funds appropriated for military assistance under "Mutual Security" for fiscal years 1953 and 1954 are shown in the Department of Defense—military functions chapter.

PROGRAM AND PERFORMANCE

The mutual security program embodies military, economic, and technical assistance to allied countries of the free world. The fiscal year 1954 program represents the third year of unified activity under the Mutual Security Act of 1951 as amended. The United States contribution to this program takes seven principal forms: (*a*) military end-items produced in the United States; (*b*) training of foreign military personnel to assure effective use of the materiel furnished; (*c*) military end-items procured outside the United States under the offshore procurement program; (*d*) financing the manufacture of selected defense end-items in the United Kingdom and France; (*e*) support of the defense effort of certain countries in the form of imports to sustain the military build-up; (*f*) economic and technical assistance; (*g*) contributions to United Nations and other international agencies for mutual security programs of a multilateral nature (1955 appropriation request for certain of these international programs is shown under "Proposed for later transmission" in Department of State chapter). The narrative statements for the military assistance portion of the mutual security program will be found in the Department of Defense chapter under military functions section.

1. *Europe*—(*a*) *Country aid.*—Economic assistance supports the defense efforts of our NATO allies. This assistance makes possible the maintenance of high levels of defense expenditures and, notably in Greece and Turkey, provides support to country development efforts which are designed to increase their capabilities to support these levels without outside assistance. Assistance to Spain is in direct support of the United States agreement with that country. Assistance is also provided to meet the special needs of particular areas.

(*b*) *Technical assistance.*—This program assists the development of expanding economies in Europe through the transfer of ideas rather than the transfer of resources.

2. *Near East and Africa*—(*a*) *Bilateral technical cooperation.*—This program assists the governments of underdeveloped areas of the world in their efforts to reduce the handicaps to economic development. Programs are designed to increase technical skills required for balanced economic growth with emphasis upon increasing food supply and improving health and education.

(*b*) *Special economic assistance.*—Funds are being utilized for developing and improving water resources, transportation, irrigation, reclamation and other facilities designed to increase permanently the economic strength of the area, and for general economic support to prevent privation and accompanying political unrest. The basic economic development of the area will also assist in providing further opportunities for the resettlement of refugees.

(*c*) *Dependent overseas territories.*—Funds are utilized for projects essential to the welfare of the native peoples, the economic growth of the territories, and an increase in the production and flow of basic materials needed by the free world.

3. *Asia and Pacific*—(*a*) *Bilateral technical cooperation.*—Programs for bilateral technical cooperation in South Asia are similar to those described for the Near East and Africa.

(*b*) *Special economic assistance.*—This program provides additional resources for economic development in India and Pakistan, especially in the fields of agriculture and transport. Development of additional water resources and improvement of existing water distribution facilities will bring a larger acreage under effective cultivation.

(*c*) *Economic and technical assistance.*—Funds are provided to countries in the Far East in varying proportions for economic assistance, for development and support of military programs and for technical assistance, mainly in the fields of agriculture, public health, transportation, education and public administration.

(*d*) *Special projects.*—This includes special items usually of an emergency nature financed from appropriations made pursuant to section 303 of the Mutual Defense Assistance Act of 1949 as amended.

4. *American Republics*—(*a*) *Bilateral technical cooperation.*—Programs for bilateral technical cooperation are similar to those described for the Near East and Africa.

(*b*) *Special economic assistance.*—A serious economic crisis in Bolivia resulting from a decline in exports and a consequent reduction in foreign exchange earnings has resulted in an urgent need for assistance to cover foreign exchange costs of essential imports, primarily agricultural commodities.

5. *Nonregional programs*—(*a*) *Movement of migrants.*—Contributions to the Intergovernmental Committee for European Migration facilitate the movement of surplus populations from countries in Western Europe to countries affording resettlement opportunities overseas. The Committee's plan of operations currently calls for the movement of approximately 85,500 European migrants in calendar year 1953 and 117,600 migrants in calendar year 1954.

(*b*) *Ocean freight voluntary relief shipments.*—Voluntary nonprofit relief agencies are reimbursed for ocean freight charges on supplies shipped to countries which have concluded relief agreements.

(*c*) *Escapees.*—Supplementary care and maintenance is provided for certain refugees from behind the Iron Curtain and assistance is rendered for their permanent resettlement.

(*d*) *Control Act expenses.*—The Foreign Operations Administration coordinates United States efforts to deter exports from friendly countries of strategic materials and equipment to countries threatening world peace.

(*e*) *Basic materials development.*—Certain basic materials are in actual or potential short supply among our allies. This program provides for increasing production of such

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

materials in those friendly countries or dependent overseas territories which have important sources of the raw materials. Purchases of raw materials for the United States with local currencies generated from economic assistance to European countries were concluded with enactment of section 1415 of the Supplemental Appropriations Act of 1953 except for liquidation of contracts.

(*f*) *Surplus agricultural commodities.*—In compliance with section 550 of the "Mutual Security Act of 1953," funds have been earmarked for purchase of United States surplus agricultural commodities for sale abroad. Local currencies generated under this program have been programed for (a) military offshore procurement, (b) procurement of supplies and services for economic and technical assistance programs, and (c) military construction projects.

(*g*) *Administration.*

(*h*) *Special food program.*—These funds are used to defray the costs of procuring, packaging, and transporting of foods in generous supply in the United States for distribution abroad to needy people in friendly countries.

(*i*) *Contributions.*—(1) *NATO international civilian headquarters.*—The United States contribution represents its share of financing the international staff serving the North Atlantic Council. (2) *United Nations Relief and Works Agency for Palestine Refugees.*—The Palestine Refugee Agency conducts relief operations and finds homes and jobs for refugees from Palestine. Since May 1950, it has provided subsistence rations for over 870,000 refugees, prevented serious outbreaks of epidemic diseases, surveyed large development projects leading toward refugee employment, supported a primary school program for refugee children, and provided technical training. (3) *Multilateral technical cooperation.*—The United Nations expanded program of technical assistance and the technical cooperation program of the Organization of American States provide technical assistance for the economic development of underdeveloped countries. The aid largely consists of demonstration and pilot projects in health, agriculture, education, social welfare, and other fields, to which the recipient governments also make substantial contributions, and the provision of study and training for their nationals through fellowship grants. (4) *International Children's Welfare Work (UNICEF).*—This fund primarily assists underdeveloped countries in developing long-range maternal and child health and welfare programs. UNICEF aid is currently being given to 75 countries and territories. (5) *United Nations Korean Reconstruction Agency.*—Contributions are made to UNKRA to assist the Koreans and the military authorities in starting reconstruction.

[EMERGENCY MIGRATION] *REFUGEE RELIEF*

Refugee Relief, Executive

For expenses necessary to enable the President, by transfer to such officer or agency of the Government as may be appropriate, to carry out [such migration program as may be authorized by law, including transfer of not to exceed sixty-five passenger motor vehicles from the Mutual Security Agency or the Department of State without reimbursement] *the provisions of the Refugee Relief Act of 1953 (Public Law 203, approved August 7, 1953), including services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a), at rates not in excess of $50 per diem for individuals; printing and binding outside the continental United States without regard to section 11 of the Act of March 1, 1919 (44 U. S. C. 111); hire of passenger motor vehicles; expenses of attendance at meetings concerned with the purpose of this appropriation*; not to exceed [$9,000] *$174,000* for expenses of a confidential nature, to be accounted for solely on the certificate of the officer to whom funds are transferred by the President from this appropriation; and [not to exceed $756,000] *$1,500,000 for capital* for the making of loans; [$3,000,000] *$9,025,000*: *Provided*, [That this paragraph shall be effective only upon the enactment into law, during the first session of the Eighty-third Congress, of either S. 1917 or H. R. 6481] *That funds appropriated herein shall be available in accordance with authority granted hereunder or under authority governing the activities of the Government agencies to which such funds are allocated. (Supplemental Appropriation Act, 1954.)*

Appropriated 1954, **$3,000,000** Estimate 1955, **$9,025,000**

AMOUNTS AVAILABLE FOR OBLIGATION

Appropriation or estimate (obligations incurred)—1954, $3,000,000; 1955, $9,025,000.

OBLIGATIONS BY ACTIVITIES

Description	1953 actual	1954 estimate	1955 estimate
1. Investigation and visa issuance		$2,567,000	$5,800,000
2. Administration of loans		45,000	1,513,000
3. Investigations in occupied areas			663,000
4. Medical examinations		164,000	509,000
5. Immigration inspection		148,000	320,000
6. Occupational selection		76,000	220,000
Obligations incurred		3,000,000	9,025,000

PROGRAM AND PERFORMANCE

Under the provisions of the Refugee Relief Act of 1953 a maximum of 209,000 persons in specified areas of Europe, the Near East and the Far East may be granted special nonquota immigrant visas up to December 31, 1956, for resettlement in the United States. It is the aim to achieve this immigration in a manner consistent with resettlement opportunities existing in the United States particularly with regard to employment and housing. For fiscal year 1955 it is estimated that approximately 65,000 visas will be issued as compared with approximately 15,000 in fiscal year 1954. This budget provides for attaining an average issuance rate of 7,000 per month by the last quarter of fiscal year 1955. It is estimated that for fiscal year 1954 a supplemental appropriation of $1,560,000 will be required and it is proposed for later transmission.

Six of the major departments of Government are involved in this program and perform functions related to their regular activities.

1. *Investigation and visa issuance.*—The Department of State conducts investigations of each applicant's character, and eligibility under the Act. These investigations are conducted in countries other than the United States occupied areas of Germany and Austria where the U. S. Army performs the function. Determination of eligibility under the immigration laws and issuance of visas are also performed. It is estimated that an average of 5,500 visas per month will be issued during 1955.

2. *Administration of loans.*—The Treasury Department will make loans to public or private agencies to finance the transportation of immigrants under the program from ports of entry to places of resettlement in the United States. It is estimated that loans will be required for about 21,000 refugees.

3. *Investigations in occupied areas.*—Investigations in the United States occupied areas of Germany and Austria are conducted by the Counter-Intelligence Corps, Department of the Army.

4. *Medical examinations.*—The Public Health Service gives health screening examinations overseas to persons otherwise eligible to receive visas for admission into the United States. The number of examinations to be given is geared to the estimated number of visas to be issued.

5. *Immigration inspection.*—The Immigration and Naturalization Service participates abroad in the determination of eligibility of applicants to receive visas.

6. *Occupational selection.*—The Department of Labor assists in the verification of the claimed occupation skills and the suitability for the assured employment, and the verification of job assurances filed with the Administrator of the Act.

RELIEF AND REHABILITATION IN KOREA

Relief and Rehabilitation in Korea, Executive

[There are hereby made available out of the funds available to the Department of Defense for the fiscal year 1954 and certified by the Secretary of Defense to be saved as a result of the armistice in Korea, not to exceed $200,000,000 to be available, under such terms and conditions as the President may specify and through such officers or agencies of the United States as he may designate, for relief and rehabilitation in Korea: *Provided*, That funds made available hereunder shall be used only in such parts of Korea as the President deems to be not under Communist control.] (*67 Stat. 425; Supplemental Appropriation Act, 1954.*)

Appropriated 1954, **$0**
Appropriated (adjusted) 1954, **$200,000,000**

AMOUNTS AVAILABLE FOR OBLIGATION

	1953 actual	1954 estimate	1955 estimate
Transferred, pursuant to 67 Stat. 425, from—			
"Maintenance and operations, Army"		$172,000,000	
"Ordnance and facilities, Navy"		10,000,000	
"Ships and facilities, Navy"		18,000,000	
Adjusted appropriation or estimate (obligations incurred)		200,000,000	

PROGRAM AND PERFORMANCE

Grants for relief and rehabilitation.—With the cessation of active hostilities, the United States is providing additional aid to the Republic of Korea for relief and to begin the reconstruction of the economy. In addition, the Army received an appropriation for "Civilian relief in Korea" in 1954. In 1955 all funds for aid supplied directly by the United States are included in the mutual security program. The United States also contributes to the United Nations Korean Reconstruction Agency, for which 1955 funds are included in "Proposed for later transmission" in the Department of State chapter.

OBLIGATIONS BY ACTIVITIES

Grants for relief and rehabilitation—1954, $200,000,000.

BUSINESS-TYPE STATEMENTS

PROGRAM AND PERFORMANCE

Under section 304 (b) of the Defense Production Act of 1950, designated agencies are authorized, with Presidential approval, to incur obligations of $2.1 billion largely for the purpose of making loans and procuring critical materials in furtherance of the defense effort. The obligations are financed by borrowings from the Treasury. The 1951 amendments to the act permit commitments in excess of $2.1 billion so long as ultimate costs do not exceed this amount. Programs undertaken must be certified as essential to the national defense by the Office of Defense Mobilization.

As of September 30, 1953, certifications of borrowing authority were as follows:

General Services Administration	$1,043,858,000
Reconstruction Finance Corporation (Treasury)	275,746,000
Department of Agriculture	46,000,000
Department of the Interior	17,762,000
Export-Import Bank	51,309,000
Total certifications	1,434,675,000
Unused authorization	665,325,000
Total	2,100,000,000

Net increases in certifications are expected to total $200,690,000 between September 30, 1953, and June 30, 1955, so that $464,635,000 will remain available at the end of fiscal year 1955.

General Services Administration.—Borrowing authority of $1,043,858,000 had been certified as of September 30, 1953, to finance the expansion of productive capacity for strategic metals and minerals and other materials. The amount includes $160 million for working capital and $883,858,000 for the probable ultimate net cost as defined in section 304 (b) of the Defense Production Act of 1950, as amended, of which $75,600,000 is for the machine tool pool order and equipment installation programs and $808,258,000 for mineral and metal programs.

In addition to the above, the agency certifies direct loans to be made by the Treasury or Export-Import Bank and participates in determinations with respect to the issuances of accelerated tax amortization certificates; and has been delegated the responsibility for the basic materials development program previously carried on by the Mutual Security Agency, and its successor, the Foreign Operations Agency, in certain countries of Europe, the Near East, and Africa.

Department of Agriculture.—The purchase and resale of agricultural commodities, except forest products, are carried out by the Commodity Credit Corporation, which is reimbursed from this fund for the net costs involved.

During the fiscal year 1953, the program to increase supplies of castor beans was continued. The Corporation has continued the management of inventories of castor beans and oil, American-Egyptian cotton and cottonseed, kenaf seed and fiber, linseed oil, and tung oil acquired under programs initiated in prior years. It is anticipated that all inventories, except linseed oil and cottonseed, will be disposed of before the end of fiscal year 1955.

Net realized losses on purchase and resale operations amounted to $2,719,762, during fiscal year 1953 and are

PUBLIC ENTERPRISE FUNDS—Continued

EXPANSION OF DEFENSE PRODUCTION—Continued

Expansion of Defense Production—Continued

estimated at $8,950,595 and $18,142,898 during fiscal years 1954 and 1955, respectively.

In addition, pursuant to the Defense Production Act, as amended, and executive orders relating thereto, the Secretary of Agriculture may recommend to the Office of Defense Mobilization the certification of certain loans for increasing plant capacity to process or store agricultural commodities. An allocation of $4 million has been made to the Treasury Department for this purpose.

Department of the Interior.—Operations with regard to the expansion of defense production, have been limited to the encouragement of exploration for strategic and critical minerals and metals. As of September 30, 1953, $22 million had been allocated to the Defense Minerals Exploration Administration. As of September 30, 1953, 567 contracts had been entered into, in which the Government's share of estimated costs amounted to $16,544,448 as against a total estimated cost of $27,417,944. It is anticipated that in the fiscal year 1955, 180 additional projects will be entered into which, together with amendments to existing contracts, will involve Government participation of $4,100,000.

The Defense Minerals Exploration Administration had certified as of the end of September 1953, 65 discoveries on projects involving contract amounts of $2,226,489, of which the Government's share is $1,371,771. Reports received through September 1953, indicate that a total of $1,010,251 of Government funds had been spent on these projects. If production takes place within a 10-year period, some part of the Government funds advanced will be repaid according to a royalty arrangement.

Department of the Treasury.—The functions of the Reconstruction Finance Corporation relating to loans made under this authority were transferred to the Treasury Department by Executive Order No. 10489, dated September 26, 1953. By agreement with Treasury, the Corporation continues to exercise these functions as an agent of the Treasury Department.

	Dollars in millions					
	1953 actual		1954 estimate		1955 estimate	
	Number	Amount	Number	Amount	Number	Amount
Defense production loans:						
New commitments	125	$131	2	$25	2	$25
Disbursements	127	75	3	74	2	60
Outstanding, end of year:						
Commitments	30	155	2	106	3	71
Loans	195	123	150	178	123	219

Export-Import Bank of Washington.—Credits subject to the provisions of section 302 of the Defense Production Act of 1950, as amended, for the production abroad of essential materials are authorized only upon receipt by the Export-Import Bank of a certificate of essentiality from the relevant defense agency. Allocations of borrowing authority totaling $125 million have been approved by the Office of Defense Mobilization. Under this authority, credits totaling $51,338,000 had been authorized as of September 30, 1953, principally for production of copper and manganese in Latin America.

Administrative expenses.—Borrowing authority funds used for these expenses are shown in schedule A–1.

Total expenditures (out of prior authorizations)	1,020,000	1,298,000	2,249,000

BUSINESS-TYPE STATEMENTS

PROGRAM AND PERFORMANCE

Section 111 (b) of Public Law 472, Eightieth Congress, as amended, authorizes the Director, Foreign Operations Administration, to issue industrial investment guarantees (including forward contracting) and informational media guarantees up to $200,000,000 to stimulate the flow of private capital into projects abroad which further the purposes of that law. This authority was supplemented by Public Law 118, Eighty-third Congress, which makes guarantee funds available for investments in any country with which the United States has agreed to institute the guarantee program, and which also extends the terms for which guarantees can be issued up to 20 years from the date of issuance.

STATUS OF GUARANTEES OUTSTANDING, BY TYPES

	1953 actual	1954 estimate	1955 estimate
Industrial	$33,707,246	$75,000,000	$125,000,000
Forward contracting	754,000	1,000,000	2,000,000
Informational media	5,038,723	7,938,000	9,638,723
Total outstanding	39,499,969	83,938,000	136,638,723

Industrial investment and forward contracting guarantees.—By the end of fiscal year 1953 a total of $41,154,971 guarantees had been issued, of which $34,461,246 were outstanding. Of this total amount outstanding, $32,133,015 were against risks of inconvertibility, $1,574,231 were against the risk of loss by expropriation, and $754,000 covered forward contracting for the furnishing of capital goods items and related services.

From the inception of the guarantee program until July 1, 1953, no disbursements had been made under any of these industrial investment guarantees and a total of $839,099 in fees had been collected.

Informational media guarantees.—Guarantees up to $10,000,000 may be issued in any fiscal year against the nontransferability of funds in connection with United States investments in enterprises producing or distributing informational media abroad. As of July 1, 1953, a total of $19,257,592 informational media guarantees had been issued since the start of this program, of which $5,038,723 were outstanding. Fees totaling $275,211 had been collected and disbursements of $9,728,937 had been made.

Public Law 400, Eighty-second Congress, stated that the authority to make informational media guarantees should be exercised after June 30, 1952, by any agency or department of the Government designated by the President. Executive Order 10368, dated June 30, 1952, so designated the Department of State. Executive Order 10476, dated August 1, 1953, designated the United States Information Agency as the agency to exercise the authority to make informational media guarantees as of August 1, 1953, and required the Director, Foreign Operations Administration, to make funds available to United States Information Agency for this purpose within the limitations prescribed by law.

INTRAGOVERNMENTAL FUNDS

THE INSTITUTE OF INTER-AMERICAN AFFAIRS

[Submitted under the Government Corporation Control Act]

NOTE.—The estimate of appropriation and expenses for 1955 is included in the item for "Mutual security economic and technical cooperation" under proposed legislation.

The Institute of Inter-American Affairs operates United States bilateral technical assistance programs in Latin America under the mutual security program. The activities of the Institute are consolidated in the item "Mutual security" in the same manner as other allocations under that item and the following corporate statements are presented for informational purposes only.

The Institute has authority to operate as a corporation until 1955 (act of September 3, 1949, Public Law 283). The funds for its 1953 and 1954 programs were derived from the mutual security appropriation. Net expenses in 1953 were about $18.7 million and are estimated at $23.5 million for 1954.

[CORPORATION]

[The following corporation is hereby authorized to make such expenditures, within the limits of funds and borrowing authority available to such corporation or agency and in accord with law, and to make such contracts and commitments without regard to fiscal year limitations as provided by section 104 of the Government Corporation Control Act, as amended, as may be necessary in carrying out the programs set forth in the Budget for the fiscal year 1954 for such corporation:]

[Institute of Inter-American Affairs.] (*67 Stat. 479; Mutual Security Appropriation Act, 1954.*)

PROPOSED FOR LATER TRANSMISSION

Refugee relief program (under existing legislation, 1954).—To continue the program of screening and selecting refugees for admission into the United States beyond the 8 months provided in the appropriation, a supplemental appropriation of $1,560,000 for 1954 is proposed.

ANALYSIS OF EXPENDITURES

	1953 actual	1954 estimate	1955 estimate
Proposed supplemental appropriation		$1,560,000	
Unliquidated obligations, start of year			$360,000
Unliquidated obligations, end of year		360,000	
Expenditures are distributed as follows:			
Out of current authorizations		1,200,000	
Out of prior authorizations			360,000

Mutual security economic and technical cooperation (under proposed legislation, 1955).—Appropriations totaling $875 million are included in this budget for fiscal year 1955 for continuation of the mutual security economic and technical assistance program. The detailed program proposals will be presented to Congress in the near future.

ANALYSIS OF EXPENDITURES

	1953 actual	1954 estimate	1955 estimate
Proposed supplemental appropriation			$875,000,000
Unliquidated obligations, end of year			575,000,000
Expenditures out of current authorizations			300,000,000

Surplus agricultural commodities disposal (under proposed legislation, 1955).—Authority will be requested later to provide surplus agricultural commodities to foreign countries. A supplemental appropriation of $300 million will be required for fiscal year 1955 to reimburse the Commodity Credit Corporation for commodities provided under such authority.

ANALYSIS OF EXPENDITURES

	1953 actual	1954 estimate	1955 estimate
Proposed supplemental appropriation			$300,000,000
Balance available in subsequent year			300,000,000

ATOMIC ENERGY COMMISSION

Operating Expenses, Atomic Energy Commission

Operating expenses: For necessary operating expenses of the Commission in carrying out the purposes of the Atomic Energy Act of 1946, including the employment of aliens; *rental in the District of Columbia;* services authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a); maintenance and operation of aircraft; publication and dissemination of atomic information; purchase, repair, and cleaning of uniforms; purchase of newspapers and periodicals (not to exceed $5,000); official entertainment expenses (not to exceed $5,000); not to exceed [$2,564,130] *$2,841,000* for expenses of travel; reimbursement of the General Services Administration for security guard services; not to exceed [$27,352,000] *$28,300,000* for program direction and administration personnel; and hire of passenger motor vehicles; [$891,781,000] *$1,236,500,000*, together with the unexpended balances, as of June 30, [1953] *1954*, of prior year appropriations made available under this head to the Atomic Energy Commission: *Provided*, That of such amounts $100,000 may be expended for objects of a confidential nature and in any such case the certificate of the Commission as to the amount of the expenditure and that it is deemed inadvisable to specify the nature thereof shall be deemed a sufficient voucher for the sum therein expressed to have been expended: *Provided further*, That from this appropriation transfers of sums may be made to other agencies of the Government for the performance of the work for which this appropriation is made, and in such cases the sums so transferred may be merged with the appropriation to which transferred: *Provided further*, That no part of this appropriation shall be used to pay the salary of any officer or employee (except such officers and employees whose compensation is fixed by law, and scientific and technical personnel) whose position would be subject to the Classification Act of 1949, as amended, if such Act were applicable to such position, at a rate in excess of the rate payable under such Act for positions of equivalent difficulty or responsibility: *Provided further*, That no part of this appropriation shall be used in connection with the payment of a fixed fee to any contractor or firm of contractors engaged under a cost-plus-a-fixed-fee contract or contracts at any installation of the Commission, where that fee for community management is at a rate in excess of $90,000 per annum, or for the operation of a transportation system where that fee is at a rate in excess of $45,000 per annum. (*Atomic Energy Act of 1946 (Public Law 585, approved August 1, 1946) as amended; Second Independent Offices Appropriation Act, 1954.*)

Appropriated 1954, **$891,781,000** Estimate 1955, [b] **$1,236,500,000**
Appropriated (adjusted) 1954, [a] **$886,483,000**

[a] Excludes $5,298,000 for activities to be carried under "Ordnance and facilities, Navy." The amount obligated in 1953 is shown as a comparative transfer.

[b] Excludes $700,000 for activities transferred in the estimates to "Research and development, Army"; and includes $1,300,000 for activities previously carried under "Ships and facilities, Navy." The amounts obligated in 1953 and 1954 are shown in the schedules as comparative transfers.

AMOUNTS AVAILABLE FOR OBLIGATION

	1953 actual	1954 estimate	1955 estimate

NOTE.—Receipts from community operations and from certain other activities are netted against program costs.

PROGRAM AND PERFORMANCE

The Commission manufactures fissionable materials and atomic weapons; conducts research and development aimed at improved weapons, more efficient production of fissionable materials, generation of useful power from atomic energy, and protection of military and civilian personnel against hazards arising from atomic energy operations; and disseminates unclassified technical information to encourage scientific and industrial progress.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

The program is administered in the field through 10 major offices; most of the Commission's activities are carried on in Government-owned facilities by industrial concerns and educational institutions, operating under contracts. Coordination with the armed services is achieved through the Military Liaison Committee of the Department of Defense.

Obligations for operating expenses in 1955 total $1,237,337,000 of which $1,184,986,000 represents 1955 operating costs. The remaining $52,351,000 is for other obligational authority required for changes in inventories, for changes in working capital and unliquidated obligations primarily related to work to be performed subsequent to 1955, and for reimbursable obligations. Operating costs in 1955 are expected to be 27.7 percent greater than the estimated 1954 costs and 66.3 percent greater than actual costs for 1953. The upward trend reflects larger-scale procurement of raw materials; the continued expansion in the production of feed and fissionable materials and weapons as new facilities come into operation; and the efforts to develop varied types of atomic weapons. Other research which includes the development of reactors for industrial power and military uses is continued at approximately the 1954 level.

1. *Source and fissionable materials.*—Uranium ores and concentrates are processed into feed materials (*a*) from which plutonium is synthesized in the reactors now operating or under construction at Hanford, Wash., and Savannah River, S. C., or (*b*) from which the fissionable isotope uranium 235 is extracted in existing and projected plants at Oak Ridge, Tenn., Paducah, Ky., and Portsmouth, Ohio. New foreign sources of uranium will contribute substantial tonnages in 1955, and production from domestic sources will continue to expand. New facilities for producing feed and fissionable materials will provide sharply increased output at lower unit processing costs. Emphasis will continue on development of new equipment and processes to increase yields and improve the quality of products.

2. *Weapons.*—This program encompasses the production of weapons; the development, design, and testing of new weapon types; and the storage, maintenance, and custody of stockpiled weapons. The number of technical personnel employed at certain of the principal weapon development centers will continue to increase. New production installations and expanded facilities at existing installations will be in operation, and weapon tests are planned to be conducted, as development may warrant.

3. *Reactor development.*—Increased emphasis is being placed on new reactor designs to advance the peacetime uses of atomic energy in the field of generation of electrical power. The objective is to achieve large scale generation of electrical energy from atomic reactors comparable in cost to conventional generation. An important early step toward this objective was taken during 1953 when an experimental reactor confirmed the previous theoretical predictions that "breeding" can occur; this reactor produced on a very small scale at least as much fissionable material as it consumed. Several groups of industrial concerns are engaged at their own expense in conducting studies of reactors for producing electricity which could be built and operated by private industry, and additional companies are planning to participate. It is expected that such industrial participation will speed the achievement of large scale economic power generation from reactors.

New reactor designs are also being developed to propel naval vessels and military aircraft. Though oriented primarily toward military needs, this research also provides data for the peacetime uses of reactors. A land-based prototype reactor for the propulsion of a submarine is now in operation. A second, of a different type, will be completed in 1955. Development of aircraft reactors will continue during 1955.

Work on specific reactor designs constitutes about 75 percent of the scientific and technical effort in reactor development. The remainder covers advanced engineering and development, applicable to many reactor designs, on reactor materials and components, systems for heat transfer, shielding, and chemical processing; operation of the experimental facilities at the National Reactor Testing Station in Idaho, and conduct of a school of reactor technology for scientific and engineering personnel in both Government and industry.

4. *Physical research.*—This activity provides for studies and experimental investigations in physics, chemistry, and metallurgy required by the Commission to reach its objectives. The Commission's activities employ unusual materials for which the nuclear, as well as the physical and chemical, properties need to be determined accurately. These materials are used at temperatures and radiation densities which are outside the range of previous industrial experience.

Approximately two-thirds of the cost of physical research is incurred for work carried on in Commission laboratories, and one-third is for research contracted to some 100 universities and other independent institutions. Minor amounts are provided for isotope distribution and the operation of a computing facility.

5. *Biology and medicine.*—Standards are established to insure that the Commission's activities are conducted with safety to both employees and the public. Research is conducted on such problems as the effects of radiation and certain chemicals, of significance in the Commission's operations, on living things and on the biological phenomena of nuclear explosions.

Research includes both investigations on means of minimizing the injurious effects of radioactive materials and on modes of utilizing such substances for human welfare; and broad investigations in fundamental problems of the application of radiobiology to agriculture, animal husbandry, and human medicine. The comprehensive study of tolerance levels of exposure to radioactive contamination continues to be emphasized.

The major portion of the research is carried on at 16 laboratories which are owned by or operated for the Commission, and the remainder, approximately 375 projects, is supported in more than 160 universities, colleges, and hospitals. The program includes the operation of four cancer research facilities in the United States, and two laboratories in Japan for the determination of the effects of atomic bombs on the population.

6. *Community.*—The Commission operates 3 towns with an estimated total population of 75,000: Los Alamos, N. Mex.; Oak Ridge, Tenn.; and Richland, Wash.; and provides limited services at other locations. The estimates are based on the assumption that the Commission will continue to operate these communities through fiscal year 1955. It is estimated that revenues will increase substantially; with only minor increases in costs, revenues will exceed costs in fiscal year 1955 by $1,048,000.

7. *Program direction and administration.*—The costs of general management, technical supervision of program operations, the negotiation and administration of contracts, and other related activities performed by Commission personnel represent 3 percent of total operating costs in 1955 as compared with 3.7 percent in 1954.

ATOMIC ENERGY COMMISSION—Continued

Operating Expenses, Atomic Energy Commission—Continued

Additional positions required for direction and administration of the expanded operating programs of the Commission are offset by reductions incident to completion of certain major construction projects.

8. *Security investigations.*—The Atomic Energy Act of 1946, as amended, requires background investigations by the Civil Service Commission and the Federal Bureau of Investigation of those persons proposed for access to "restricted data" of the atomic energy program. The total number of investigative cases to be completed by the two investigative agencies is estimated at 58,200 for 1955, compared with 65,800 for 1954.

Total expenditures	706,892,436	911,505,470	1,181,852,000
Expenditures are distributed as follows:			
Out of current authorizations	706,892,436	248,964,534	471,765,861
Out of prior authorizations		662,540,936	710,086,139

Plant and Equipment, Atomic Energy Commission

Plant and equipment: For expenses of the Commission in connection with the purchase and construction of plant and the acquisition of equipment and other expenses incidental thereto necessary in carrying out the purposes of the Atomic Energy Act of 1946, including purchase of land and interests in land; purchase of aircraft; purchase [of two hundred and sixty-three passenger-carrying motor vehicles] (*not to exceed four hundred and two* for replacement only [in the event adequate vehicles cannot be obtained by transfer from other departments or agencies]) and hire of passenger motor vehicles; [$166,000,000] *$129,400,000*, to remain available until expended: *Provided*, That [the unexpended balances of prior year appropriations made available under this head shall be merged with this appropriation: *Provided further*, That in addition to funds allocated for research and development for any reactor which will advance technology towards both ship propulsion and the generation of industrial power and for design of such atomic power reactors, the Commission may expend from funds provided under this head such sum as may be necessary, not to exceed $7,000,000, for beginning of construction of such reactors, without regard to any other provision of this Act: *Provided further*, That] funds appropriated under this head may, whenever the Commission determines a need exists, be used for the construction of particle accelerators without regard to any other provision of this Act: [*Provided further*, That no part of the foregoing appropriation shall be available for the construction of any office building, residence, warehouse or similar structure, utility, or other specific portion or unit of a project, unless funds are available for the completion of such building, utility, or other specific portion or unit of such project. The foregoing proviso shall not be construed to prevent the purchase of land for any project, the construction of any new building or procurement of any machinery, equipment or materials therefor, nor any utility nor any portion or unit of a specific project if the funds are available to pay the cost of such land, the cost of such building, machinery, equipment or materials, or the cost of such utility or the cost of any such specific portion or unit of such project:] *Provided further*, That no part of this appropriation shall be used—

(A) to start any new construction project for which an estimate was not included in the budget for the current fiscal year; and

(B) to start any new construction project the currently estimated cost of which exceeds by thirty-five per centum the estimated cost included therefor in such budget: *Provided further*, That the [Commission is authorized to transfer not to exceed $10,000,000 to the Bureau of Public Roads, Department of Commerce, to provide for construction of access roads to the Pike County, Ohio, plant and to the Arco, Idaho, plant of the Commission] *foregoing proviso shall not apply to any project for the alteration, extension, or improvement of technical or production facilities unless such project includes the construction of a new building estimated to cost in excess of $100,000. (Atomic Energy Act of 1946 (Public Law 585, approved August 1, 1946) as amended; Second Independent Offices Appropriation Act, 1954.)*

Appropriated 1954, **$166,000,000** Estimate 1955, **$129,400,000**
Appropriated (adjusted) 1954, [a] **$156,000,000**

[a] Excludes $10,000,000 estimated for transfer to "Access roads, act of Sept. 7, 1950, Bureau of Public Roads."

OBLIGATIONS BY ACTIVITIES—continued

	1953 actual	1954 estimate	1955 estimate
Obligations for facilities—Continued			
Equipment not included in construction projects	$27,403,435	$28,712,031	$29,814,000
Subtotal	2,704,028,343	718,495,576	173,790,000
Reimbursements from non-Federal sources	570,756	400,000	400,000
Obligations incurred	2,704,599,099	718,895,576	174,190,000

NOTE.—Receipts from sale of certain plant and equipment items are netted against project costs.

PROGRAM AND PERFORMANCE

Obligations in 1955 are significantly lower than in either 1954 or 1953; however, expenditures in 1955, while somewhat lower than those estimated for 1954, continue at a high level as work goes forward on major construction projects authorized in previous years.

The appropriation of $129,400,000 for fiscal year 1955 together with estimated savings of $44,390,000 in fiscal year 1954 to be carried forward and $400,000 estimated reimbursements would provide a total obligational authority of $174,190,000. This includes $62.8 million for additional facilities such as uranium ore processing plants and for weapons facilities required as a result of the expansion of production plants previously authorized; and for improvements to existing production facilities to increase production capacities. The estimate also provides $35 million in addition to $5 million previously provided for the construction of the first atomic power reactor to further advances toward the production of economic power; $22.5 million for new research machines and facilities which are necessary to continued advances in atomic science; and $53.5 million for other capital facilities, including $1.6 million for additional housing at Los Alamos, N. Mex., $29.8 million for replacement and other equipment, $11.9 million for additions and improvements to existing facilities, and $10.2 million for other facilities.

Out of prior authorizations		1,217,644,530	1,177,598,000

No part of the appropriations herein made to the Atomic Energy Commission shall be available for payments under any contract hereafter negotiated without advertising by the Commission, except contracts with any foreign government or any agency thereof and contracts for source material with foreign producers, unless such contract includes a clause to the effect that the Comptroller General of the United States or any of his duly authorized representatives shall until the expiration of three years after final payment have access to and the right to examine any directly pertinent books, documents, papers, and records of the contractor or any of his subcontractors engaged in the performance of and involving transactions related to such contracts or subcontracts: *Provided*, That no part of such appropriations shall be available for payments under any such contract which includes any provision precluding an audit by the General Accounting Office of any transaction under such contract.

Any appropriation available under this Act or heretofore made to the Atomic Energy Commission may initially be used during the fiscal year [1954] *1955* to finance the procurement of materials, services, or other costs which are a part of work or activities for which funds have been provided in any other appropriation available to the Commission: *Provided*, That appropriate transfers or adjustments between such appropriations shall subsequently be made for such costs on the basis of actual application determined in accordance with generally accepted accounting principles.

Not to exceed 5 per centum of any appropriation under this head may be transferred to any other such appropriation but no such appropriation shall be increased by more than 5 per centum by any such transfers, and any such transfers shall be reported promptly to the appropriations committees of the House and Senate.

No part of any appropriation herein made to the Atomic Energy Commission shall be used to confer a fellowship on any person who advocates or who is a member of an organization or party that advocates the overthrow of the Government of the United States by force or violence or with respect to whom the Commission finds, upon investigation and report by the Civil Service Commission on the character, associations, and loyalty of whom, that reasonable grounds exist for belief that such person is disloyal to the Government of the United States: *Provided*, That any person who advocates or who is a member of an organization or party that advocates the overthrow of the Government of the United States by force or violence and accepts employment or a fellowship the salary, wages, stipend, grant, or expenses for which are paid from any appropriation contained herein shall be guilty of a felony and, upon conviction, shall be fined not more than $1,000 or imprisoned for not more than one year, or both: *Provided further*, That the above penal clause shall be in addition to, and not in substitution for, any other provisions of existing law. (*Atomic Energy Act of 1946* (*Public Law 585, approved August 1, 1946*) *as amended; Second Independent Offices Appropriation Act, 1954.*)

CIVIL SERVICE COMMISSION

Salaries and Expenses, Civil Service Commission

Salaries and expenses: For necessary expenses, including not to exceed $29,000 for services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a); not to exceed $10,000 for medical examinations performed for veterans by private physicians on a fee basis; travel expenses of examiners acting under the direction of the Commission, and expenses of examinations and investigations held in Washington and elsewhere; not to exceed $100 for the purchase of newspapers and periodicals (excluding scientific, technical, trade or traffic periodicals, for official use); payment in advance for library membership in societies whose publications are available to members only or to members at a price lower than to the general public; not to exceed [$65,000] *$75,000* for performing the duties imposed upon the Commission by the Act of July 19, 1940 (54 Stat. 767); reimbursement of the General Services Administration for security guard services for protection of confidential files; not to exceed [$476,670] *$443,000* for expenses of travel; and not to exceed $5,000 for actuarial services by contract, without regard to section 3709, Revised Statutes, as amended; [$17,000,000] *$15,690,000*: *Provided*, That no details from any executive department or independent establishment in the District of Columbia or elsewhere to the Commission's central office in Washington or to any of its regional offices shall be made during the current fiscal year, but this shall not affect the making of details for service as members of the boards of examiners outside the immediate offices of the Commission in Washington or of the regional directors, nor shall it affect the making of details of persons qualified to serve as expert examiners on special subjects: *Provided further*, That the Civil Service Commission shall have power in case of emergency to transfer or detail any of its employees to or from its office or field force: *Provided further*, That members of the [Loyalty Review] *Fair Employment* Board [in Washington and of the regional loyalty boards in the field], *established by Executive Order 9980 of July 26, 1948*, may be paid actual transportation expenses, and per diem in lieu of subsistence authorized by the Travel Expense Act of 1949 while traveling on official business away from their homes or regular places of business, [and] *including periods* while en route to and from and at the place where their services are to be performed[: *Provided further*, That nothing in section 281 or 283 of title 18, United States Code, or in section 190 of the Revised Statutes (5 U. S. C. 99) shall be deemed to apply to any person because of his appointment for part-time or intermittent service as a member of the Loyalty Review Board or a regional loyalty board in the Civil Service Commission: *Provided further*, That, effective July 1, 1953, or on the date of enactment of this Act if such date is subsequent to July 1, 1953, the Federal Personnel Council, Civil Service Commission, is hereby abolished, and its personnel (at a cost not exceeding $25,000 for the current fiscal year), files, records, and other property are transferred to the Office of the Executive Director, Civil Service Commission].

No part of the appropriations herein made to the Civil Service Commission shall be available for the salaries and expenses of the Legal Examining Unit in the Examining and Personnel Utilization Division of the Commission, established pursuant to Executive Order [Numbered] 9358 of July 1, 1943, or for the compensation or expenses of any member of a board of examiners (1) who has not made affidavit that he has not appeared in any agency proceeding within the preceding two years, and will not thereafter while a board member appear in any agency proceeding, as a party, or in behalf of a party to the proceeding, before an agency in which an applicant is employed who has been rated or will be rated by such member; or (2) who, after making such affidavit, has rated an applicant who at the time of the rating is employed by an agency before which the board member has appeared as a party, or in behalf of a party, within the preceding two years: *Provided*, That the definitions of "agency", "agency proceeding", and "party" in section 2 of the Administrative Procedure Act shall apply to these terms as used herein.

No part of appropriations herein shall be used to pay the compensation of officers and employees of the Civil Service Commission who allocate or reallocate supervisory positions in the classified civil service solely on the size of the group, section, bureau, or other organization unit, or on the number of subordinates supervised. References to size of the group, section, bureau, or other organization unit or the number of subordinates supervised may be given effect only to the extent warranted by the workload of such organization unit and then only in combination with other factors, such as the kind, difficulty, and complexity of work supervised, the degree and scope of responsibility delegated to the supervisor, and the kind, degree, and value of the supervision actually exercised. *(5 U. Obligations incurred	18,351,914	17,202,400	15,849,000

PROGRAM AND PERFORMANCE

As the central personnel agency of the Federal Government, the Civil Service Commission holds competitive examinations, investigates Federal job applicants, sets standards and issues regulations to guide agencies, inspects agencies' personnel programs, administers the Classification Act of 1949, promotes Government-wide training and career development, adjudicates appeals, and administers the Civil Service Retirement System.

1. *Recruiting and examining.*—Most appointments in the competitive civil service will be made under the open competitive merit system through examinations to be held by the offices of the Commission and its boards of examiners which are composed of agency personnel operating under the supervision and direction of the Commission. Veterans are aided in securing the benefits to which they are entitled under law. Through an intensive separated career employee program, qualified career people separated by reductions in force are aided in securing positions. Increased emphasis will be placed on improvement of testing devices, and the development and better use of the most capable employees in the Federal work force.

Production count	1953 actual	1954 estimate	1955 estimate
Examinations announced—			
By the Commission	11,235	14,239	9,218
By boards of examiners	13,245	11,579	10,900
Total	24,480	25,818	20,118
Applications processed—			
By the Commission	575,646	573,715	524,215
By boards of examiners	1,143,204	1,025,828	957,650
Total	1,718,850	1,599,543	1,481,865
Placements made—			
By the Commission	82,363	93,440	88,045
By boards of examiners	241,309	198,200	186,955
Total	323,672	291,640	275,000

2. *Investigation of character and fitness for employment.*—Under Executive Order 10450 the Commission performs services for the agencies in order that they may determine whether applicants or appointees to Federal positions are a security risk. These services include checks and inquiries, limited security investigations, and the maintenance of a security investigations index.

Production count	1953 actual	1954 estimate	1955 estimate
National agency check and inquiry cases	408,856	303,744	286,348
Limited security investigations	18,721	8,421	8,254
Other personal investigations	7,471	7,425	5,924

3. *Position classification.*—The Commission issues standards for allocation of positions under the Classification Act of 1949; conducts a program of audits to insure agency compliance with existing standards; reviews requests for reconsideration of the classification of positions and establishes new minimum and maximum rates of pay for certain groups of employees.

Production count	1953 actual	1954 estimate	1955 estimate
Allocation standards established	611	610	610
Conducting audits	118,980	123,185	116,948

4. *Administration of the retirement systems.*—Administering the Civil Service Retirement Act, the Panama Canal Construction Annuity Act, and the Lighthouse Service Widow's Benefit Act, involves adjudicating annuity, death and benefit claims, claims for refund of contributions to the retirement fund, and service credit claims as well as maintaining the control accounts for the fund and making payments to annuitants and other claimants.

Production count	1953 actual	1954 estimate	1955 estimate
Annuity and death claims	51,569	52,633	52,633
Refund claims	147,386	145,174	145,000
Service credit claims	22,277	22,779	22,750
Inquiries answered	179,678	179,077	179,100

5. *Service records.*—A service record file is maintained on approximately 16,650,000 present and former employees. This file is used in answering inquiries, as a source of status determination, and for auditing certain reports of personnel actions prior to filing.

Production count	1953 actual	1954 estimate	1955 estimate
Personnel actions filed	1,615,306	1,612,164	1,421,582
Personnel actions audited	38,755	62,286	62,534
Status cases determined	175,451	85,089	77,926
Inquiries answered	87,178	86,069	86,069

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

6. *Inspection service.*—The Commission inspects agency personnel operations subject to its review to insure compliance with civil-service laws and regulations, and to stimulate and recommend improvement in personnel practices.

Production count	1953 actual	1954 estimate	1955 estimate
Agencies inspected	2,220	2,411	2,411

7. *Regulatory, appellate, and advisory functions.*—These consist of the formulation of rules and regulations; hearing and taking action on appeals; the administration of the political activities statutes; and the recommendation of measures to the President to promote the accomplishment of the objectives of the rules and regulations.

8. *Executive and administrative services.*

Obligations incurred	998,999	1,200,000	900,000

OBLIGATIONS BY ACTIVITIES

Investigation of United States citizens for employment by international organizations—1953, $998,999; 1954, $1,200,000; 1955, $900,000.

PROGRAM AND PERFORMANCE

The Civil Service Commission and the Federal Bureau of Investigation conduct investigations of United States citizens employed or being considered for employment in international organizations of which the United States is a member. There is also established in the Civil Service Commission an "International Organizations Employees Loyalty Board" which makes advisory determinations under the loyalty standard. The results of these investigations and loyalty determinations are made available to the Secretary General of the United Nations and the heads of other international organizations.

OBLIGATIONS BY OBJECTS

07 Other contractual services—1953, $998,999; 1954, $1,200,000; 1955, $900,000.

ANALYSIS OF EXPENDITURES

CIVIL SERVICE COMMISSION—Continued

Annuities Under Special Acts, Civil Service Commission

Annuities, Panama Canal construction employees and Lighthouse Service widows: For payment of annuities authorized by the Act of May 29, 1944, as amended (48 U. S. C. 1373a), and the Act of August 19, 1950 (64 Stat. 465), [$2,500,000] *$2,354,000.* (*First Independent Offices Appropriation Act, 1954.*)

Appropriated 1954, **$2,500,000** Estimate 1955, **$2,354,000**

AMOUNTS AVAILABLE FOR OBLIGATION

	1953 actual	1954 estimate	1955 estimate
Appropriation or estimate	$2,707,000	$2,500,000	$2,354,000
Unobligated balance, estimated savings	−187,995		
Obligations incurred	2,519,005	2,500,000	2,354,000

OBLIGATIONS BY ACTIVITIES

Payment of annuities to employees engaged in the construction of the Panama Canal and widows of former employees of the Lighthouse Service—1953, $2,519,005; 1954, $2,500,000; 1955, $2,354,000.

PROGRAM AND PERFORMANCE

Annuities are paid to persons who were employed on the construction of the Panama Canal or to their widows, and benefits are paid to widows of former employees of the Lighthouse Service. On June 30, 1953, there were 2,885 Panama Canal annuitants on the roll, as compared with an estimate of 2,755 on June 30, 1954, and of 2,600 on June 30, 1955. On June 30, 1953, there were 356 Lighthouse Service widows on the roll, as compared with an estimate of 371 on June 30, 1954, and 386 on June 30, 1955.

OBLIGATIONS BY OBJECTS

12 Pensions, annuities, and insurance claims—1953, $2,519,005; 1954, $2,500,000; 1955, $2,354,000.

ANALYSIS OF EXPENDITURES

	1953 actual	1954 estimate	1955 estimate
Unliquidated obligations, start of year	$203,885	$197,569	$208,334

Out of current authorizations	2,321,437	2,291,666	2,157,833
Out of prior authorizations	206,674	197,569	208,334

Payment to Civil Service Retirement and Disability Fund (Increases in Annuities), Civil Service Commission

Payment to the civil-service retirement and disability fund for increases in annuities provided by the Act of July 16, 1952: For payment to the "civil-service retirement and disability fund" for the cost, as heretofore determined by the Civil Service Commission, of increases in annuities provided by the Act of July 16, 1952 (66 Stat. 723), for the fiscal year [1954, $31,397,000] *1955, $29,623,000.* (*First Independent Offices Appropriation Act, 1954.*)

Appropriated 1954, **$31,397,000** Estimate 1955, **$29,623,000**

AMOUNTS AVAILABLE FOR OBLIGATION

Appropriation or estimate (obligations incurred)—1954, $31,397,000; 1955, $29,623,000.

OBLIGATIONS BY ACTIVITIES

For the purpose of paying the cost of benefit increases granted by the act of July 16, 1952—1954, $31,397,000; 1955, $29,623,000.

PROGRAM AND PERFORMANCE

Provision is made for the payment of temporary cost-of-living annuity increases from the Civil Service Retirement and Disability Fund as authorized by the Act of July 16, 1952 (66 Stat. 723). The act provides that the increases shall terminate on June 30, 1954, unless appropriation is made to the fund to cover the cost of such increases for the fiscal year 1955.

OBLIGATIONS BY OBJECTS

11 Grants, subsidies, and contributions—1954, $31,397,000; 1955, $29,623,000.

ANALYSIS OF EXPENDITURES

Obligations incurred during the year (total expenditures out of current authorizations)—1954, $31,397,000; 1955, $29,623,000.

Miscellaneous

Payment to Civil Service Retirement and Disability Fund, Civil Service Commission

AMOUNTS AVAILABLE FOR OBLIGATION

Appropriation or estimate (obligations incurred)—1953, $321,450,000.

OBLIGATIONS BY ACTIVITIES

For the purpose of paying the United States share to the retirement fund—1953, $321,450,000.

PROGRAM AND PERFORMANCE

No appropriation was made for the fiscal year 1954, nor are estimates included herein for financing the liability of the United States to the Civil Service Retirement and Disability Fund. Submission of estimates of the amounts required for this item will be considered at such time as the findings and recommendations of the Committee on Retirement Policy for Federal Personnel are made available (66 Stat. 723).

OBLIGATIONS BY OBJECTS

11 Grants, subsidies, and contributions—1953, $321,450,000.

ANALYSIS OF EXPENDITURES

Obligations incurred during the year (total expenditures out of current authorizations)—1953, $321,450,000.

Miscellaneous Expired Accounts, Civil Service Commission

of operation of all departments and agencies in the executive branch; and for preparing reports and recommendations to the Congress designed to (1) improve methods and procedures; (2) eliminate duplication and overlapping of services, activities, and functions; (3) consolidate services, activities, and functions of a similar nature; (4) abolish services, activities, and functions not necessary to the efficient conduct of government; (5) eliminate nonessential services, functions, and activities which are competitive with private enterprise; (6) define responsibilities of officials; and (7) relocate agencies now responsible directly to the President in departments or other agencies.

The Commission will carry out these functions by establishing task forces to conduct studies, formulate recommendations, and write reports designed to accomplish the above objectives. The task forces will consist for the most part of experts and consultants with a national reputation in their fields of work.

OBLIGATIONS BY ACTIVITIES

Defense mobilization—1953, $2,129,799; 1954, $425,000; 1955, $275,000.

PROGRAM AND PERFORMANCE

Under authority delegated by the Director of Defense Mobilization, plans and programs for mobilizing domestic surface transportation, storage, and port facilities in the United States and its Territories and possessions are formulated and carried out. Data with respect to the need for transportation and storage is assembled and the ability of existing facilities to meet the requirements of national defense is analyzed. Recommendations are made to the Office of Defense Mobilization on applications for accelerated tax amortization and defense loans. When necessary the movement of traffic is directed and coordinated in cooperation with Government and private transportation agencies and priorities to insure expeditious movement of national defense traffic are assigned and administered.

Obligations incurred	2,435,767	2,136,500	2,376,000

PROGRAM AND PERFORMANCE

The Administration provides supervision, examination, facilities, and services to a coordinated agricultural credit system of farm credit banks and corporations which make credit available to farmers and their cooperatives. Its administrative expenses are paid from assessments from farm credit banks and corporations. Supplemental assessments of $140,000 are anticipated for 1954.

Provision is made for supervision and annual examination of 12 Federal land banks (wholly farmer-owned); 12 production credit corporations (wholly Government-owned); 13 banks for cooperatives (mixed ownership); 12 Federal intermediate credit banks (wholly Government-owned), the Federal Farm Mortgage Corporation (wholly Government-owned); 1,146 national farm-loan associations; and 500 production-credit associations. These credit institutions are furnished such services as assistance in financing and investments, custody of collateral for bonds and debentures, credit analysis, development of appraisal standards and policies, preparation of reports and budgets, and development and distribution of information on farm credit.

FEDERAL CIVIL DEFENSE ADMINISTRATION

INTRODUCTORY STATEMENT

This Administration is responsible for preparing national plans and programs for the civil defense of the United States and the dissemination of civil defense information. It provides guidance and coordination to the States and their political subdivisions in the development of local defense plans, and makes financial contributions toward certain of their programs. Stockpiles of medical and engineering items are maintained at strategically located sites, to be used after an attack as supplements to local reserves.

OPERATIONS

Operations, Federal Civil Defense Administration

For necessary expenses, not otherwise provided for, in carrying out the provisions of the Federal Civil Defense Act of 1950, as amended (50 U. S. C., App. 2251–2297), including services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a); reimbursement of the Civil Service Commission for full field investigations of employees occupying positions of critical importance from the standpoint of national security; expenses of attendance at meetings concerned with civil defense functions; reimbursement of the General Services Administration for security guard services; not to exceed $9,000 for the purchase of newspapers, periodicals, and teletype news services; and not to exceed $6,000 for emergency and extraordinary expenses to be expended under the direction of the Administrator for such purposes as he deems proper, and his determination thereon shall be final and conclusive; **[$8,525,000]** *$11,000,000.* *(Supplemental Appropriation Act, 1954.)*

Total obligations	8,355,407	8,535,000	11,000,000

PROGRAM AND PERFORMANCE

1. *Civil defense planning.*—Intelligence on modern weapons of mass destruction is obtained, and civil defense implications are determined. From this information National Civil Defense planning is developed. Appropriate research programs are devised and administered,

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

and liaison with other Federal agencies is maintained to provide a coordinated Federal program and to avoid duplication of effort.

2. *Civil defense education services.*—Information on weapons effects and preventive measures that may be taken for survival is provided to the general public in order that a better understanding of civil defense needs is gained and psychological warfare may be combated. Civil defense training methods and devices are developed and made available to State and local organizations.

3. *Operations control services.*—A nationwide attack warning system extending from air defense control centers to State and local control points is provided, as is a secure communications network among Federal installations. Federally owned civil defense stockpiles are maintained at strategic sites. Tactical and logistic civil defense techniques are developed and disseminated. Natural disaster assistance under Public Law 875, 81st Congress, is coordinated.

4. *Technical advisory services.*—Solutions to technical problems of physical damage and casualty care are devised and made available to State and local officials.

5. *Field representation.*—The guidance developed at the national headquarters is made available to the States and municipalities through the regional offices. Close working relationships are developed with State civil defense directors to promote coordination of activity among the States. The regional offices also serve as clearing points for Federal assistance to areas affected by natural disasters.

6. *Executive direction.*

7. *General administration.*

7. Engineering supplies and equipment			5,000,000
Obligations incurred	14,318,730	10,500,000	14,750,000

PROGRAM AND PERFORMANCE

Civil defense funds of States and localities are equally matched for selected types of civil defense organizational equipment and supplies. Federal contributions are made for attack warning, communications, public safety services, medical supplies and equipment, educational services, mass care equipment, and engineering supplies and equipment. No funds are being requested in 1955 for fire equipment under the public safety services program.

Engineering equipment was formerly financed under the appropriation for "Emergency supplies and equipment" and appears as a matching item for the first time in fiscal year 1955.

OBLIGATIONS BY OBJECTS

11 Grants, subsidies, and contributions—1953, $14,318,730; 1954, $10,500,000; 1955, $14,750,000.

2. Broadcast activities	5,662	5,000	
3. Safety and special radio activities	14,775		
4. Field engineering and monitoring activities	86,644	105,600	
5. Common carrier activities	2,400		
6. Executive, staff, and service activities	42,563	36,561	
Total obligations payable out of reimbursements from other accounts	309,061	319,456	
Obligations incurred	6,671,504	7,574,756	7,649,300

PROGRAM AND PERFORMANCE

The Federal Communications Commission regulates interstate and international wire and radio communication.

The Budget proposes a reduction of $705,600 in the regular continuing activities of the Commission primarily to reflect anticipated decreases in application workloads and backlogs for television and safety and special radio services. An offsetting increase of $950,000 will provide for a new activity, frequency usage monitoring.

1. *Applied technical research and frequency allocation.*—Radio wave characteristics, equipment capabilities, and other technical matters are studied in relation to the allocation and assignment of frequencies for the best utilization of the radio spectrum.

2. *Broadcast activities.*—Television (TV), standard (AM), and frequency modulation (FM) broadcasting stations are licensed and regulated. The anticipated decrease in TV backlogs by June 30, 1954, permits a staff reduction in 1955. Pertinent data are shown in the following table:

	Actual		Estimated	
	1952	1953	1954	1955
Stations regulated [1]	3,280	3,802	3,942	4,095
Applications disposed of for new stations or major change of facilities:				
AM	270	441	535	299
FM	135	160	161	160
TV	92	936	691	385

[1] As of June 30 of each year.

3. *Safety and special radio activities.*—Aviation, police, marine, amateur, and other nonbroadcast uses of radio are licensed and regulated. The increase for this activity provided in the 1954 appropriation permitted a substantial reduction in the backlog of applications, thereby permitting a staff reduction in 1955. Pertinent data are summarized below:

	Actual		Estimated	
	1952	1953	1954	1955
Stations regulated [1]	99,425	120,623	141,359	156,599
License applications received	141,553	143,949	145,385	157,145

[1] As of June 30 of each year; excluding amateurs.

4. *Field engineering and monitoring activities.*—(*a*) Regular monitoring and enforcement: Field staff inspects radio stations, gives operator examinations, collects engineering data, monitors the radio spectrum, and locates lost ships and aircraft and illegal sources of radio emissions.

b. Frequency usage monitoring: This program will provide for surveillance of frequency usage in the radio band between 10 kc and 27,500 kc which is important to long-range communications. Monitoring data developed will aid in (1) assignment of frequencies and management of the radio spectrum, (2) international negotiations involving use of radio frequencies, (3) location of clandestine stations, and (4) other national security purposes.

5. *Common carrier activities.*—The Commission approves existing and proposed rates and practices of common carriers, proposed mergers and acquisitions of properties, extensions and reductions in service, construction of facilities, and application for use of radio in communication services.

6. *Executive, staff, and service activities.*—These also include the adjudicatory functions of the Commission.

Description	1953 actual	1954 estimate	1955 estimate
1. Mediation and conciliation of labor disputes	$3,046,141	$2,996,000	$2,970,000
2. Administration	214,476	204,000	200,000
Obligations incurred	3,260,617	3,200,000	3,170,000

PROGRAM AND PERFORMANCE

The Service provides assistance to representatives of labor and management in the mediation or prevention of disputes affecting industries engaged in interstate commerce other than air and rail transportation.

1. *Mediation and conciliation of labor disputes.*—During the past year, the Service authorized the assignment of mediators in more than 20,000 labor-management dispute situations, involving approximately 17,500,000 employees. In addition to the mediation of existing disputes, the Service also seeks to promote a harmonious relationship between labor and management through preventive mediation and other related activities, which will contribute to improved understanding during contract periods.

The net decrease of $30,000 is, in part, accomplished by reducing the number of regional offices from 12 to 8, and a reduction in mediator staff from 229 to 225. The overall reduction is partially offset by increased costs due to security investigations for mediator personnel.

2. *Administration.*

OBLIGATIONS BY ACTIVITIES

Description	1953 actual	1954 estimate	1955 estimate
1. Licensing of non-Federal hydroelectric projects	$696,390	$635,000	$600,000
2. Regulation and surveys, electric power industry	1,067,431	1,084,000	1,033 816
3. Regulation and surveys, natural gas industry	1,599,314	1,771,000	1,680,209
4. Investigations relating to Federal river development projects	391,722	387,000	370,000
5. International Joint Commission	6,834	7,500	7,000
6. Administration	464,330	423,500	458,975
Obligations incurred	4,136,021	4,308,000	4,150,000

PROGRAM AND PERFORMANCE

The Federal Power Commission administers the Federal Power Act and Natural Gas Act and has additional duties under other acts relating to Federal power development.

1. *Licensing of non-Federal hydroelectric projects.*—Licenses are issued to private, State, and municipal interests for proposed and existing hydroelectric projects affecting public lands and streams subject to Federal jurisdiction; construction and operation of projects are inspected; and cost of construction is determined for projects under license to private interests. Pertinent data are:

Description	1953 actual	1954 estimate	1955 estimate
Number of licensed projects	662	685	690
Number of applications pending (end of year)	169	149	109
Total claimed cost (in millions) of major projects	$1,605	$1,650	$1,700
Annual income to Government from licenses	$1,505,829	$1,457,752	$1,714,907

2. *Regulation and surveys, electric power industry.*—Regulation covers the transmission and sale for resale of electric energy in interstate commerce and the rates, accounts, depreciation practices, certain security issues, disposition of properties, mergers, and the interconnection and coordination of facilities of public utilities subject to the Commission's jurisdiction. Statistics and other information about the electric utility industry are gathered and published. Pertinent data are:

Description	By calendar year		
	1952 actual	1953 estimate	1954 estimate
Number of public utilities regulated	210	210	210
Operating revenues (in millions)	$4,200	$4,550	$5,000
Number of utilities reporting for statistical purposes	1,450	1,450	1,450
Operating revenues (in millions)	$6,680	$7,217	$7,794

3. *Regulation and surveys, natural gas industry.*—Regulation covers the transportation and sale for resale of natural gas in interstate commerce, and the rates, accounts, and depreciation and depletion practices. Certificates of public convenience and necessity are issued to natural gas companies subject to the jurisdiction of the Commission. Statistics and other information about the natural gas industry are gathered and published. The continued expansion of the natural gas industry, shown below, has added to the Commission's workload and responsibilities in this field.

Description	By calendar year		
	1952 actual	1953 estimate	1954 estimate
Number of natural gas companies	151	160	170
Operating revenues (in millions)	$2,300	$2,800	$3,400

4. *Investigations relating to Federal river development projects.*—Studies are made of river basins and individual projects proposed by the Departments of the Army and Interior to determine possibilities for conservation, development, and utilization of potential power resources. Review and approval are required of certain proposed rates for sale of power from such projects. Information on the power features of Federal river development projects is furnished to Congress and Federal and State agencies.

Of a potential 109 million kilowatts of hydroelectric energy in the United States, 21.5 million kilowatts were developed as of December 31, 1952. In fiscal year 1953, 118 studies were carried on and it is estimated that action will be required on 125 cases in 1954, and on 130 in 1955.

5. *International Joint Commission.*—This covers participation of the Federal Power Commission in the International Joint Commission which adjudicates controversies between the Governments of the United States and Canada or nationals of the two countries, principally over boundary waters and waters that cross the boundary, and conducts investigations as directed by the two Governments.

6. *Administration.*

Obligations incurred	4,177,234	4,053,800	4,200,000

PROGRAM AND PERFORMANCE

The Commission has the duty of preserving free competitive enterprise through prevention of monopolistic and unfair trade.

1. *Antimonopoly.*—All types of monopolistic restrictions, including price-fixing conspiracies, boycotting, price discriminations, and illegal mergers and acquisitions are corrected; economic data and criteria are brought to bear on monopoly and related problems; and supervision is provided over the registration and operations of associations of American exporters engaged solely in export trade. Funds are requested to provide for an Office of Economic Adviser to the Commission, which is necessary because of the Administrative Procedure Act, and to provide for an Office of Small Business. Funds are also requested to enable financial reports to include wholesale and retail trade and mining corporations.

2. *Antideceptive practices.*—False and misleading advertising and other unfair or deceptive practices are prevented by corrective action, including the affirmative aid of voluntary trade practice conferences; business and the public are protected from the evils of misbranding and nondisclosure of fiber content of manufactured wool products; consumers and merchants are protected from unfair practices with respect to furs and fur products. Funds are also requested for enforcement of the new Flammable Fabrics Act.

3. *Executive direction and management.*—These also include the adjudicatory functions of the Commission.

4. *Administration.*

PROGRAM AND PERFORMANCE

The General Accounting Office settles claims by or against the Government; audits the financial transactions of Government agencies; audits Government corporations, audits and settles fiscal officers' accounts; renders legal decisions relating to Government fiscal matters; conducts investigations relating to the receipt, disbursement, and application of public funds; develops, prescribes, and evaluates accounting systems on a Government-wide basis; and performs other related and necessary functions. During the fiscal year 1953, refunds and collections in the amount of $56,891,625 were made through the audit, investigative, and claims activities of the General Accounting Office.

1. *Office of the Comptroller General.*—The Comptroller General serves Congress by presenting to it reports on matters relating to public funds, with recommendations

Digitized for FRASER

Federal Reserve Bank of St. Louis

GENERAL ACCOUNTING OFFICE—Continued

Salaries and Expenses, General Accounting Office—Continued

and advice. The scope and variety of legislative reports and services to congressional committees continues to broaden, and the number to expand.

2. *Office of the general counsel.*—In addition to preparing decisions and reports the general counsel and his staff participate in conferences with legislative and administrative officials of the Government on the legality or propriety of proposed obligations and expenditures, the sufficiency of proposed legislation, the desirability of new legislation for particular purposes, and like matters. A total of 10,477 legal matters of all types was handled during fiscal year 1953.

3. *Office of investigations.*—This activity comprises (*a*) inspections at irregular intervals of most of the larger Federal installations and activities throughout the country; (*b*) investigations of fraudulent transactions, suspected fraud, or other serious irregularity; and (*c*) surveys of particular subjects of Federal expenditures on a broad and sometimes nationwide basis. The work is carried on in the field and at the spot where it can be best applied in the interest of the Government.

4. *Office of administrative services.*—This office was established during 1953 by transferring the duties and functions of the executive officer, the office of the chief clerk, the records service branch of the division of audits, the payroll, leave and retirement unit of the division of personnel, the administrative finance section, and the duties of the office of administrative planning relative to preparation of budget estimates and records management. This office will prepare and execute the budget, maintain the administrative accounting system, manage records and space, and furnish office services, such as procurement of supplies and equipment, building management, mail and files, and related matters.

5. *Accounting systems division.*—The major work efforts of the accounting systems division will continue to be the cooperative work in the development of accounting systems and improvements in the agencies of the Government. This work is carried out on a day-to-day consultative basis with accounting and management representatives of the individual agencies, and is in furtherance of the objectives of the joint accounting improvement program launched by the Comptroller General with the Secretary of the Treasury and the Director of the Bureau of the Budget.

6. *Claims division.*—All claims by or against the United States are settled in this division with the exception of claims by and against common carriers for transportation items and claims wherein exclusive jurisdiction is conferred upon another agency by law. During 1953, the number of claims settled was 485,886.

7. *Transportation division.*—This activity audits freight and passenger transportation payments for the account of the United States and the settlement of claims involving transportation charges. The transportation audit recovers over $37,000,000 per year for the Government.

8. *Division of personnel.*—The continuance of the reorganization of the General Accounting Office and the resultant reassignment of employees, reduction in force, and position classification work constituted the principal personnel management activities during 1953. The promotion and placement policy was revised to secure stronger emphasis on recognition of merit and effective utilization of manpower. Approximately 60 percent of General Accounting Office employees are now covered by work performance standards; by the end of fiscal year 1955 it is anticipated that an additional 15 percent, for a total of 75 percent of General Accounting Office employees will be covered by these standards.

9. *Division of audits.*—This division performs all of the audit functions, except those involving transportation matters, for which the General Accounting Office is responsible. The audit function is performed primarily for the purpose of (1) furnishing the basis for settling accounts of fiscal officers, and (2) evaluating the performance of each Government agency in discharging its financial obligations. It is the policy to convert the audit to a comprehensive basis wherein the effectiveness of internal agency control is evaluated in lieu of an examination of each individual transaction. The comprehensive audit program covers selected activities of particular government agencies and in some cases the program has been extended to cover entire agencies.

10. *European branch.*—The European branch was established in July 1952 with headquarters in Paris, France, to perform the audit, investigative, legal, and other functions of the General Accounting Office in the European Area, including the Near East and North Africa. Small suboffices have been established in London, England; Frankfurt, Germany; and Rome, Italy.

OBLIGATIONS BY ACTIVITIES

Hearing and adjudication of Indian claims—1953, $91,071; 1954, $115,500; 1955, $117,000.

PROGRAM AND PERFORMANCE

This independent Commission of three members, which is required to complete its work by April 10, 1957, was created to hear and adjudicate claims, existing before August 13, 1946, of American Indian tribes, bands, or other identifiable groups of Indians residing within the territorial limits of the United States or Alaska. Claimants were allowed a period of 5 years from August 13, 1946, within which to submit their claims. There were 852 claims filed by the end of that filing period. Payments of awards are dependent upon subsequent appropriations by Congress. As of June 30, 1953, appropriations totaling $4,089,844 had been made to pay awards.

Total obligations	11,009,031	11,304,000	11,554,229

PROGRAM AND PERFORMANCE

The Commission regulates common carriers engaged in interstate and foreign commerce, including railroads, motor carriers, water carriers, pipelines, and contract carriers by motor vehicle and water.

The estimate for 1955 provides for all of the Commission's activities in one appropriation in lieu of three existing appropriations, chiefly to permit better utilization of field staff. An increase of $216,000 over the 1954 appropriation is proposed primarily to provide full year costs of new positions authorized in the current year's appropriation.

1. *Applications, complaints, and other proceedings.*—This work consists of regulating rates, granting operating authorities, approving abandonment of or extensions of railroad lines, financial reorganizations, and rate agreements between carriers.

2. *Investigation, litigation, legal advice, and compliance.*—Uniform systems of accounts are formulated and policed for all types of carriers; studies are made of operating costs and analyses prepared in relation to rate structures; assistance is rendered in the enforcement of statutes and regulations affecting transportation and carriers; briefs and arguments are prepared in suits to set aside orders of the Commission; examinations are made to ascertain that motor carriers and freight forwarders are adequately insured; and surveys are conducted of motor carriers' operating practices to reduce accidents and to promote safety on the public highways.

3. *Collection and analysis of accounting and statistical data.*—Statistics are compiled from carriers' reports and studies made of operating, financial, and other problems of transportation agencies which are essential to performance of the Commission's duties.

4. *Supervision of rate publications.*—Common and contract carriers' tariffs are examined for compliance with Commission's tariff circular rules, and under certain conditions authority to publish rates on less-than-statutory notice is granted.

5. *Railroad safety and car service.*—Field staff promotes safety of railroad employees and passengers by enforcing compliance with the Locomotive Inspection Act and inspecting safety appliances and signal installations and devices. Car service agents work directly with carriers and shippers in handling problems related to the transportation of property by railroad.

6. *Valuation of railroads and pipelines.*—This work consists of keeping inventory and cost records current and developing elements of value which are used in setting up depreciation reserves, determining costs of service, and approving financial reorganizations.

7. *Administration.*

Railroad Safety, Interstate Commerce Commission

[Railroad safety: For expenses necessary in performing functions authorized by law (45 U. S. C. 1–15, 17–21, 35–46, 61–64; 49 U. S. C. 26) to insure a maximum of safety in the operation of railroads, including authority to investigate, test experimentally, and report on the use and need of any appliances or systems intended to promote the safety of railway operation, including those pertaining to block-signal and train-control systems, as authorized by the joint resolution approved June 30, 1906, and the Sundry Civil Act of May 27, 1908 (45 U. S. C. 35–37), and to require carriers by railroad subject to the Act to install automatic train-stop or train-control devices as prescribed by the Commission (49 U. S. C. 26), including the employment of inspectors and engineers, and including not to exceed $163,050 for expenses of travel, $974,500.] (*First Independent Offices Appropriation Act, 1954.*)

Appropriated 1954, **$974,500**

NOTE.—Estimate of $974,500 for activities previously carried under this title has been transferred in the estimate to "Salaries and expenses, Interstate Commerce Commission." The amounts obligated in 1953 and 1954 are shown in the schedule as comparative transfers.

INTERSTATE COMMISSION ON THE POTOMAC RIVER BASIN

Contribution to Interstate Commission on the Potomac River Basin

Contribution to Interstate Commission on the Potomac River Basin: To enable the Secretary of the Treasury to pay in advance to the Interstate Commission on the Potomac River Basin the Federal contribution toward the expenses of the Commission during the current fiscal year in the administration of its business in the conservancy district established pursuant to the Act of July 11, 1940 (54 Stat. 748), $5,000. (*First Independent Offices Appropriation Act, 1954.*)

Appropriated 1954, **$5,000** Estimate 1955, **$5,000**

AMOUNTS AVAILABLE FOR OBLIGATION

Appropriation or estimate (obligations incurred)—1953, $5,000; 1954, $5,000; 1955, $5,000.

OBLIGATIONS BY ACTIVITIES

Contribution to the Interstate Commission on the Potomac River Basin—1953, $5,000; 1954, $5,000; 1955, $5,000.

PROGRAM AND PERFORMANCE

The Interstate Commission on the Potomac River Basin was created by compact among the four States in the basin, the District of Columbia, and the Federal Government to abate water pollution. The estimates included under this appropriation title represent the Federal Government's pro rata contribution to the general expenses of the Commission.

OBLIGATIONS BY OBJECTS

11 Grants, subsidies, and contributions—1953, $5,000; 1954, $5,000; 1955, $5,000.

ANALYSIS OF EXPENDITURES

Obligations incurred during the year (total expenditures out of current authorizations)—1953, $5,000; 1954, $5,000; 1955, $5,000.

NOTE.—Reimbursements from non-Federal sources above are from the proceeds of sale of personal property (40 U. S. C. 481 (c)).

OBLIGATIONS BY ACTIVITIES

Description	1953 actual	1954 estimate	1955 estimate
1 Aerodynamic research	$24,376,194	$25,064,000	$27,293,000
2. Powerplants research	15,126,357	15,433,000	15,793,000
3. Aircraft structural research	5,915,000	6,178,000	6,593,000
4. Operating problems research	1,832,000	1,985,000	2,092,000
5. Headquarters management and coordination	1,167,243	1,340,000	1,829,000
Obligations incurred	48,416,794	50,000,000	53,600,000

PROGRAM AND PERFORMANCE

The Committee (NACA) conducts scientific research in aeronautics devoted almost entirely to problems of military aviation but having applications to commercial aviation as well. The research is carried on mainly at its three major laboratories and two auxiliary flight stations, supplemented by research sponsored at scientific and educational institutions and other Government agencies. Close coordination with the aeronautical programs of the Department of Defense is maintained through military representation on the NACA and its subcommittees, and NACA representation on the aeronautics and guided missiles committees of the Department of Defense. Most of the research is directed toward obtaining basic scientific and engineering data for continued improvement in the design of military aircraft, missiles, and their powerplants. The increased funds are required for initial staffing and operation of the unitary-plan wind tunnels now under construction at the NACA's Langley, Ames, and Lewis Laboratories.

1. *Aerodynamic research.*—This research seeks to develop the design of aircraft and missiles which can perform effectively in the critical transonic and supersonic speed ranges and at the low speeds of take-off and landing. Data obtained from actual flight tests of high-speed piloted and pilotless aircraft are correlated with wind-tunnel results and theoretical studies.

2. *Powerplants research.*—This research centers on the newer forms of aircraft and missile powerplants, such as turbojet, ram-jet, turbopropeller, and rocket engines.

3. *Aircraft structural research.*—In 1955 emphasis will continue to be placed on structural problems resulting

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

from aerodynamic heating, increased aerodynamic and ground handling loads, thinner wings, and the novel configurations of modern high-speed aircraft.

4. *Operating problems research.*—Continuing studies now underway on aircraft icing, flight through turbulent weather, and the causes and prevention of fires in aircraft are of vital importance to civil as well as military aviation.

5. *Headquarters management and coordination.*—The increased funds are required for security investigations.

Obligations incurred	11,608,888	17,558,591	4,369,000

PROGRAM AND PERFORMANCE

The work of the NACA requires the continuing modernization of its research facilities and the construction of certain additional facilities for conducting research beyond the capabilities of existing equipment.

1. *Aerodynamic research.*—The 1955 estimates provide for alterations to two existing wind tunnels at the Ames Laboratory to increase their usefulness for high-speed aerodynamic research, and for a new facility at the Langley Laboratory for research on the landing and take-off characteristics of high-speed seaplanes.

2. *Powerplants research.*—The 1955 program includes a rocket-engine research facility, alterations to an existing wind tunnel to enlarge its speed range, and additional air-handling equipment for existing facilities for research on propulsion systems, all at the Lewis Laboratory.

OBLIGATIONS BY ACTIVITIES

Maintenance and operation of title I properties—1953, $43,320; 1954, $43,000; 1955, $43,000.

PROGRAM AND PERFORMANCE

The National Capital Housing Authority operates 112 low-rent housing units and 30 nonresidential properties developed or acquired under title I of the District of Columbia Alley Dwelling Act of 1934. The 7,027 units, operated under title II, are financed under a trust revolving fund, the estimates for which appear in part III of this budget.

Operating expenses of title I properties are financed by this appropriation. Under provision of the annual appropriation language rental receipts from this activity are paid into miscellaneous receipts of the Treasury.

Appropriation or estimate (obligations incurred)—1954, $125,000; 1955, $155,000.

OBLIGATIONS BY ACTIVITIES

Planning—1954, $125,000; 1955, $155,000.

PROGRAM AND PERFORMANCE

The National Capital Planning Commission is the central planning agency for the Federal and District Governments to plan the appropriate and orderly development and redevelopment of the National Capital and the conservation of the important natural and historical features thereof. The National Capital Regional Planning Council coordinates planning in the counties and cities of the metropolitan area. A single staff serves both agencies.

Special projects of the Commission in 1955 will include (*a*) review of the District of Columbia's public works program, with emphasis on construction priorities and on economies which may be achieved through closer coordination of Federal and District interests, (*b*) supporting studies for the current revision of the District of Columbia zoning regulations, (*c*) neighborhood planning for current and prospective redevelopment projects, and (*d*) a review of the park, parkway, and playground acquisition program under the Capper-Cramton Act.

Regional Council projects will include (*a*) basic land use studies, (*b*) correlation of economic base surveys made in the various jurisdictions, and (*c*) a regional highway and transportation plan.

These projects are in addition to the routine planning duties which occupy more than half of the time of the two agencies and their joint staff.

Obligations incurred	71,416	289,049	546,400

PROGRAM AND PERFORMANCE

The National Capital Planning Commission (successor to the National Capital Park and Planning Commission) acquires land on behalf of the United States for parks, parkways, and recreation purposes in the District of Columbia and its environs.

1. *George Washington Memorial Parkway.*—Land is acquired along the shores of the Potomac River above and below Washington from Great Falls to Mount Vernon, one-half of the cost of which is borne by the local jurisdictions. Obligations through 1954 will complete acquisition of the Virginia project from Mount Vernon to the Leesburg-Chain Bridge Highway. The 1955 program will carry the parkway upstream to the proposed Cabin John Bridge, at which point it will be 70 percent complete. The 1955 program will complete approximately 80 percent of the parkway in Montgomery County north of Washington. No start has been made in the Maryland section south of Washington.

2. *Extension of National Capital park system into Maryland.*—Land is acquired in cooperation with the Maryland-National Capital Park and Planning Commission for extension of the metropolitan park system into the Maryland environs. The system now includes units of varying length in the valleys of Cabin John Branch, Little Falls Branch, Rock Creek, Sligo Creek, Northwest Branch, Paint Branch, and Anacostia River. The 1955 program has been drastically reduced to include only projects which would be considered necessary even in the event of Federal withdrawal from this program, namely one unit each in Paint Branch and Little Falls Branch Parks which are needed to fill in gaps between existing park lands.

3. *Park, parkway, and playground system in the District of Columbia.*—Land is also acquired in the District of Columbia, with all expenditures being repaid to the United States by the District of Columbia. Acquisitions are part of the Commission's comprehensive plan for the park, parkway, and playground system of the National Capital. The 1955 program is limited to one playground located in the southwest redevelopment area, which will be part of the District of Columbia's contribution to the slum clearance project now under way.

NATIONAL LABOR RELATIONS BOARD

Salaries and Expenses, National Labor Relations Board

Salaries and expenses: For expenses necessary for the National Labor Relations Board to carry out the functions vested in it by the Labor-Management Relations Act, 1947 (29 U. S. C. 141–167), and other laws, including expenses of attendance at meetings concerned with the work of the Board when specifically authorized by the Chairman or the General Counsel; and services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a); [$9,125,000] *$8,700,000*: *Provided*, That no part of this appropriation shall be available to organize or assist in organizing agricultural laborers or used in connection with investigations, hearings, directives, or orders concerning bargaining units composed of agricultural laborers as referred to in section 2 (3) of the Act of July 5, 1935 (49 Stat. 450), and as amended by the Labor-Management Relations Act, 1947, and as defined in section 3 (f) of the Act of June 25, 1938 (52 Stat. 1060), and including in said definition employees engaged in the maintenance and operation of ditches, canals, reservoirs, and waterways when maintained or operated on a mutual, nonprofit basis and at least 95 per centum of the water stored or supplied thereby is used for farming purposes. (*47 U. S. C. 222; Departments of Labor and Health, Education, and Welfare Appropriation Act, 1954.*)

Appropriated 1954, **$9,125,000** Estimate, **$8,700,000**

AMOUNTS AVAILABLE FOR OBLIGATION

	1953 actual	1954 estimate	1955 estimate
Appropriation or estimate	$9,000,000	$9,125,000	$8,700,000
Reimbursements from non-Federal sources	1,377	200	100
Reimbursements from other accounts	3,526		
Total available for obligation	9,004,903	9,125,200	8,700,100
Unobligated balance, estimated savings	−101,936	−94,078	
Obligations incurred	8,902,967	9,031,122	8,700,100

NOTE.—Reimbursements from non-Federal sources above are from the proceeds of sale of personal property (40 U. S. C. 481 (c)).

OBLIGATIONS BY ACTIVITIES

Description	1953 actual	1954 estimate	1955 estimate
1. Field investigation of cases and informal disposition or preparation for formal processing	$5,031,534	$5,009,851	$4,746,094
2. Trial examiner hearing of unfair labor practice cases	701,161	739,894	735,685
3. Board adjudication of cases	1,151,549	1,186,123	1,129,919
4. Securing of compliance with Board orders, including enforcement through court orders	2,018,723	2,095,254	2,088,402
Obligations incurred	8,902,967	9,031,122	8,700,100

PROGRAM AND PERFORMANCE

The Board resolves representation disputes in industry and remedies and prevents unfair labor practices by employers and unions. The estimate does not include funds for representation elections in the building construction industry or for "last offer" elections in national emergency disputes because these elections have not been required to any extent in recent years.

1. *Field investigation of cases and informal disposition or preparation for formal processing.*—Charges of unfair labor practices and petitions for elections to resolve representation disputes are investigated in the regional office in which they are filed. Failing settlement, dismissal, or withdrawal of these cases, they are prepared for public hearing. About 87 percent of the unfair labor practice cases and 73 percent of the election cases are closed without the need for public hearing or further formal action.

CASES PROCESSED IN FIELD [1]

	1953 actual	1954 estimate	1955 estimate
Charges of unfair labor practices	5,937	6,009	5,600
Petitions for representation elections	9,681	9,520	9,260

[1] As distinguished from the number of cases filed.

2. *Trial examiner hearing of unfair labor practice cases.*—Trial examiners conduct public hearings which are the basis of the findings and recommendations set forth in intermediate reports. In fiscal year 1953, 402 reports were issued; for 1954, the estimate is 465; for 1955, 477.

3. *Board adjudication of cases.*—In unfair labor practice cases the trial examiner's intermediate report becomes the Board order unless exceptions are filed within 20 days. Exceptions are filed to approximately 80 percent of the intermediate reports and are referred to the Board for decision. In contested representation cases the Board may either order an election to determine the choice of bargaining representative or dismiss the case.

DECISIONS ISSUED BY THE BOARD

	1953 actual	1954 estimate	1955 estimate
Unfair labor practice	383	300	404
Representation	2,178	1,961	1,998

4. *Securing of compliance with Board orders, including enforcement through court orders.*—If the parties do not voluntarily comply with the Board's orders, the Board must request the courts to enforce its decision. Most of these contested decisions involve unfair labor practices. In 1953, 152 Board decisions of all kinds required court litigation; for 1954, the estimate is 219; and for 1955, 308.

Obligations incurred	4,423,615	8,060,385	14,300,000

PROGRAM AND PERFORMANCE

The Foundation is responsible for developing a national policy for the promotion of basic research and education in the sciences, for evaluating scientific research programs undertaken by the agencies of the Federal Government, for supporting basic research, for awarding graduate fellowships, and for fostering the interchange of scientific information. The Foundation does not operate research laboratories.

The Foundation is to be increasingly responsible for providing support for basic research and for the award of graduate fellowships in the sciences, giving due consideration to the requirements of other Federal agencies for basic research closely related to their operating responsibilities. The appropriation recommended is an increase of $6,000,000 over the current year.

1. *National science policy studies.*—In order to develop current information upon which to establish a national policy for science the Foundation conducts or sponsors studies into all phases of the Nation's scientific effort. These studies include (1) research programs of the Federal Government, (2) research at nonprofit institutions, (3) research in industry, (4) special studies in selected scientific fields, and (5) studies of the supply, demand, and utilization of scientific manpower.

2. *Support of science—(a) Grants for support of research.*—A large part of the increase in research support represents a transfer of the responsibility for certain basic research programs from the Department of Defense to the Foundation. The remainder of the increase is to provide a more adequate level of basic research for the Nation. This support is provided principally through grants to educational and other research institutions for specific projects of outstanding merit.

(*b*) *Grants for training of scientific manpower.*—This estimate provides for approximately 800 graduate fellowships. There is also a limited program to improve the quality of teaching in individual scientific fields.

(*c*) *Review of research and training programs.*—This is for indirect costs associated with the review and approval of grants for research and the award of fellowships.

3. *Scientific information exchange.*—Because of the importance of the prompt exchange of information to the advancement of science, methods are developed to improve the collection, cataloging, and dissemination of scientific information. The attendance of selected American scientists at international scientific meetings is supported.

4. *Executive direction and management.*

Development of policies and standards governing the National Security Training Corps—1953, $35,980; 1954, $55,000; 1955, $55,000.

PROGRAM AND PERFORMANCE

The National Security Training Commission is engaged in studies concerning policies and standards applicable to establishment of the National Security Training Corps. This estimate provides for the continuation of a small staff to study such policies and standards during congressional consideration of universal military training legislation.

PROGRAM AND PERFORMANCE

The Railroad Retirement Board administers the railroad retirement system, financed by employer and employee taxes. This appropriation is for that portion of the administrative expenses of the Board required in the operation of this program, and is derived from the railroad retirement account, a trust fund. The retirement system provides employees' annuities for age and disability, spouses' annuities, survivor benefits, and lump-sum death benefits.

1. *Maintenance of accounts of employee earnings.*—Eligibility for benefits and the amount of benefits are based on compensation reported by employers and recorded by the Board in individual accounts of earnings. The workload of maintaining these records fluctuates with the level of employment in the railroad industry, rates of turnover, and similar factors. This activity is operated jointly with a similar requirement under the railroad unemployment insurance program and the costs are shared on a measured basis.

2. *Processing and certification for payment of initial claims.*—Claims for age and disability annuities, spouses' annuities, survivor benefits, and lump-sum payments are adjudicated and certified to the Treasury for initial payment. The claims load tends to increase each year as more railroad workers seek retirement because of age or disability, and as the spouses of retired employees and the survivors of deceased employees become eligible for benefits. Claims dispositions were 133,378 in 1953 and are estimated to be 139,402 and 141,250 in 1954 and 1955.

3. *Monthly recertification of awarded claims.*—Benefit payments must be authorized each month for those persons on the rolls who continue to remain eligible. The number of beneficiaries on the rolls will continue to increase until the program matures. Number of monthly benefit payments were 6,199,352 in 1953 and are estimated to be 6,605,000 and 6,969,000 in 1954 and 1955.

4. *Hearings and appeals.*—Individuals whose claims for annuities or benefits are disallowed or who dispute the award have the right of appeal to the appeals council, and subsequently to the Board itself. Appeals made were 185 in 1953 and are estimated to be 210 in both 1954 and 1955.

5. *Actuarial services.*—Actuarial studies and estimates are required by the Railroad Retirement Act to determine the adequacy of the tax rate to establish and maintain a sufficient reserve to meet all future payments. Also required by the act are studies to determine the adjustments that would be required between the Federal old-age and survivors insurance trust fund and the railroad retirement account to place the former in the same position in which it would have been if service as an employee under the Railroad Retirement Act after December 31, 1936, had been "employment" under the Social Security Act from that date.

6. *General administration.*—Except for administrative activities supported by and concerned with the retirement program exclusively, the cost of general administration is shared between the retirement and the railroad unemployment insurance programs on a measured basis.

7. *Penalty mail.*

Obligations incurred	5,133,231	5,192,800	5,200,000

PROGRAM AND PERFORMANCE

The Renegotiation Board conducts renegotiation with contractors to eliminate excessive profits in connection with procurement under the national defense program. As of December 1, 1953, determinations of excessive profits amounting to $71,719,049 have been made by the Board since January 1952.

1. *Executive direction.*—The Board, consisting of five statutory appointed members, is responsible for executive direction, review, and final action in all cases.

2. *Staff operations.*—The headquarters staff furnishes technical advice and assistance to the Board and regional organization. All filings by contractors are received in the Washington headquarters and screened to eliminate obvious nonexcessive profit cases; the balance, amounting to about 25 percent of the total filings, is assigned to regional boards for further and more detailed renegotiation procedure. There were 25,400 filings in fiscal year 1953 and filings in 1954 and 1955 are estimated at 44,500 and 25,000, respectively.

3. *Renegotiation operations.*—The six regional boards conduct renegotiation proceedings and make initial determinations. Decisions of the field boards may be appealed to the statutory board, and all cases involving more than $400,000 of renegotiable profits are finally determined by the statutory board. The regional boards completed 2,345 renegotiations in fiscal year 1953 and it is

estimated that 5,320 will be completed in 1954 and 6,700 in 1955. The increase in case completions, without corresponding budget increases, is reflective of higher productivity and improved operating procedures.

Obligations incurred	5,332,182	5,038,000	4,849,000

PROGRAM AND PERFORMANCE

The Commission seeks to protect the interests of the public against fraud in buying and selling securities.

1. *Administration of full disclosure provisions of the securities laws.*—Provision is made for securing compliance with the statutory standards of disclosure in offerings of securities registered with the Commission for public sale and in related periodic reports.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

2. *The prevention and suppression of fraud in securities transactions.*—Investor losses due to fraud are prevented or minimized by prompt investigation where frauds are suspected, through inspection of the accounts of broker-dealer firms, and by surveillance of trading on stock exchanges and in the over-the-counter markets.

3. *Supervision and regulation of securities markets.*—National securities exchanges including over-the-counter markets are regulated.

4. *Regulation of public utility holding companies and investment companies.*—This regulation extends to such matters as the financing of holding companies and their subsidiaries, and other matters relating to servicing arrangements and accounting practices. Geographic integration and corporate simplification of holding company systems has been substantially completed. The regulation of investment companies comprises the registration of foreign and domestic investment companies and supervision over their various activities.

5. *Assistance to courts in reorganization of bankrupt corporations.*—Independent expert assistance is provided in proceedings under chapter X of the Bankruptcy Act. On June 30, 1953, there were 63 cases pending.

6. *Preparation of operational and business statistics.*—Statistical and other data are prepared to provide the Commission and the staff with information needed to administer the securities laws and to produce certain financial data from information filed with the Commission as a part of the overall Government statistical and economic program.

7. *Executive and staff functions.*

8. *Administrative services.*

SELECTIVE SERVICE SYSTEM

[SALARIES AND EXPENSES]

Salaries and Expenses, Selective Service System

Salaries and expenses: For expenses necessary for the operation and maintenance of the Selective Service System, as authorized by title I of the Universal Military Training and Service Act (62 Stat. 604), as amended, including services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a); not to exceed $250 for the purchase of newspapers and periodicals; not to exceed [$80,000] *$75,000* for expenses of travel, National Administration, Planning, Training, and Records Management; not to exceed [$200,000] *$190,000* for expenses of travel, State Administration, Planning, Training, and Records Servicing; $92,500 for the National Selective Service Appeal Board, of which not to exceed $3,875 shall be available for expenses of travel; and [$265,000] *$205,000* for the National Advisory Committee on the Selection of Doctors, Dentists, and Allied Specialists, of which not to exceed [$35,000] *$30,000* shall be available for expenses of travel; [$29,882,400] *$31,500,000*: *Provided*, That during the current fiscal year, the President may exempt this appropriation from the provisions of subsection (c) of section 3679 of the Revised Statutes, as amended, whenever he deems such action to be necessary in the interest of national defense.

Appropriations for the Selective Service System may be used for the destruction of records accumulated under the Selective Training and Service Act of 1940, as amended, which are hereby authorized to be destroyed by the Director of Selective Service after compliance with the procedures for the destruction of records prescribed pursuant to the Records Disposal Act of 1943, as amended (44 U. S. C. 366–380): *Provided*, That no records may be transferred

Obligations incurred	32,179,957	29,882,400	31,500,000

PROGRAM AND PERFORMANCE

The Selective Service System, through the action of 4,000 local and appeal boards registers, classifies, and forwards men for induction in the Armed Forces. It defers from induction those whose civilian employment or training is found necessary to the national health, safety, or interest. In lieu of induction, conscientious objectors are placed in civilian work of national importance. The increase for 1955 is based on the estimate of a greater number of inductions than in 1954.

4. Financial assistance—direct lending		1,296,000	1,650,000
Obligations incurred		3,725,000	4,300,000

PROGRAM AND PERFORMANCE

As successor to the Small Defense Plants Administration, whose statutory authorities expired on July 31, 1953, the Small Business Administration assists in maintaining the stability of small, independent business enterprises through the following programs:

1. *Procurement assistance.*—A larger proportion of Government procurement is assured small business through (*a*) joint determinations with the military and other procurement agencies of procurement to be set aside for production by small firms; (*b*) issuance of certificates of competency to small business concerns having capacity and credit adequate to perform a specific Government contract; (*c*) efforts to increase utilization of small-plant facilities by subcontracts from large prime contractors; (*d*) assistance in the formation of production pools; and (*e*) inventorying of small-business production facilities which can be used for defense and essential civilian production.

2. *Production assistance.*—Technical advice and counsel are given to small firms requesting assistance on problems such as plant layout, materials handling, process engineering, production planning and control, safety engineering, packaging and organization and manpower requirements. Similarly, technical advice and counsel is given to small firms in connection with the conversion from defense to civilian production. Aid is furnished to small firms encountering difficulty in obtaining critical or scarce materials and equipment essential to their performance under contracts. Representation is made to appropriate Federal agencies in connection with any programs involving the control or allocation of materials and equipment to insure a fair and equitable share to small-business concerns.

3. *Financial assistance—other than direct lending.*—Financial management guidance to small firms seeking aid is directed toward (*a*) obviating the necessity for outside financing; (*b*) improving the attractiveness of such concerns as risks for credit and capital when financing is necessary; and (*c*) when necessary, facilitating transactions with the private lending system and with financial aids provided by the Government.

4. *Financial assistance—direct lending.*—This covers the administrative expenses of making loans to small business concerns and victims of floods or other catastrophes. The loans are made from a revolving fund established for this purpose, and funds for administrative expenses are transferred from the revolving fund to the appropriation. A full discussion of the direct lending activities of the Administration is set forth in the narrative statement under the heading, "Revolving fund, Small Business Administration."

PROGRAM AND PERFORMANCE

The Smithsonian Institution maintains public exhibits representative of the arts, American history, aeronautics, anthropology, geology, technology, and zoology; preserves for reference and study purposes millions of valuable items of scientific, cultural, and historical interest; conducts research in the natural sciences and in the history of cultures, technology, and the arts; and participates in the international exchange of scientific literature. The 1955 budget provides for continuing an orderly planned program for rehabilitating exhibits and exhibition buildings. During the current year, 4 exhibition projects and 8 building rehabilitation projects are being undertaken.

1. *Management.*—The management staff plans, directs, and controls the Institution's operations and services.

2. *Operations.*—The Institution will continue to operate 2 museums, 2 scientific bureaus, 2 art galleries, the Canal Zone Biological Area, and the International Exchange Service.

3. *General services.*—Five main exhibition buildings are operated and maintained.

PROGRAM AND PERFORMANCE

The Board determines whether organizations are "Communist-action" or "Communist-front" organizations, or whether individuals required to be registered as officers of either kind of organization or as members of a Communist-action organization should be relieved of such requirement. Petitions, motions, and answers are considered, and hearings thereon are conducted. Reports, Board decisions, and appropriate orders are issued accordingly. In its report dated April 20, 1953, the Board found and determined that the Communist Party of the United States of America is a Communist-action organization, and ordered registration as such. Four Communist-front cases will be completed or nearing completion by the end of the 1954 year, and the remaining work on these and at least an additional four should be heard and fully disposed of in the budget year 1955.

OBLIGATIONS BY ACTIVITIES

Description	1953 actual	1954 estimate	1955 estimate
1. Research, investigations, and reports on international trade, tariffs, and commercial policies	$1,084,001	$1,083,975	$1,116,700
2. Executive direction and administration	191,520	213,400	216,900
Obligations incurred	1,275,521	1,297,375	1,333,600

PROGRAM AND PERFORMANCE

1. *Research, investigations, and reports on international trade, tariffs, and commercial policies.*—It is recommended that this activity be carried forward without substantial change to permit the Commission to meet the continuing needs for its services, including: (*a*) The processing of applications for investigations under the "escape clause" provisions of the Trade Agreements Extension Act of 1951, to determine whether tariff concessions should be modified or withdrawn because increased imports are causing or threatening serious injury to competitive domestic industries; (*b*) investigations under section 22 of the Agricultural Adjustment Act, as amended, requiring import restrictions if needed to safeguard agricultural control programs; and (*c*) the need for expanded collection and analysis of basic data on commodities, production, foreign competition, and related matters, to meet more effectively the foregoing and other needs.

2. *Executive direction and administration.*

Appropriation or estimate	$900,000	$970,000	$1,000,000
Unobligated balance, estimated savings	−903		
Obligations incurred	899,097	970,000	1,000,000

OBLIGATIONS BY ACTIVITIES

Adjudication and administration—1953, $899,097; 1954, $970,000; 1955, $1,000,000.

PROGRAM AND PERFORMANCE

The Tax Court reviews determinations of tax deficiencies made by the Commissioner of Internal Revenue and decides whether there is a deficiency or an overpayment in Federal income, estate, gift, and excess profits taxes, and reviews determinations denying claims for refund of excess profits taxes under the special relief sections of the Code. The Court also reviews determinations of excessive profits on contracts renegotiated by the Federal Government.

Additional funds are required for retired judges' salaries and to cover certain increases in cost of operation resulting from legislative enactments or price increases.

The following tabulation indicates the actual and expected work volume of the Court:

	1952 actual	1953 actual	Percent [1]	1954 estimate	Percent [1]	1955 estimate	Percent [1]
Filed	6,870	7,122	4	6,000	−16	5,800	−3

UNITED STATES INFORMATION AGENCY

Salaries and Expenses, United States Information Agency

Salaries and expenses: For expenses necessary to enable the [Department of State] *United States Information Agency, as authorized by Reorganization Plan Numbered 8 of 1953,* to carry out international information [and educational] activities [as authorized by the United States Information and Educational Exchange Act of 1948 (22 U. S. C. 1431–1479) and the Act of August 9, 1939 (22 U. S. C. 501)], and to administer [the programs authorized by section 32 (b) (2) of the Surplus Property Act of 1944, as amended (50 U. S. C. App. 1641 (b)) (except in Germany and Austria), the Act of August 24, 1949 (20 U. S. C. 222–224), the Act of September 29, 1950 (20 U. S. C. 225) and] the informational media guaranteed program authorized by section 111 (b) (3) of the Economic Cooperation Act of 1948, as amended and continued by section 7 of the Mutual Security Act of 1952 (22 U. S. C. 1509), including rents in the District of Columbia; employment, without regard to the civil-service and classification laws, of (1) persons on a temporary basis (not to exceed $120,000), (2) aliens within the United States, and (3) aliens abroad for service in the United States relating to the translation or narration of colloquial speech in foreign languages (such aliens to be investigated for such employment in accordance with procedures established by the Secretary of State and the Attorney General); travel expenses of aliens employed abroad for service in the United States to and from the United States; salaries, expenses, and allowances of personnel and dependents as authorized by the Foreign Service Act of 1946, as amended (22 U. S. C. 801–1158); expenses of attendance at meetings concerned with activities provided for under this appropriation (not to exceed $6,000); entertainment within the United States (not to exceed [$3,000] *$1,200*); [purchase (not to exceed six) and] hire of passenger motor vehicles; insurance of official motor vehicles in foreign countries when required by the law of such countries; purchase of space in publications abroad, without regard to the provisions of law set forth in 44 U. S. C. 322; services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a) *at rates not in excess of $50 per diem for individuals*; payment of tort claims, in the manner authorized in the first paragraph of section 2672, as amended, of title 28 of the United States Code when such claims arise in foreign countries; advance of funds notwithstanding section 3648 of the Revised Statutes as amended; *purchase of uniforms for personnel employed abroad; dues for library membership in organizations which issue publications to members only, or to members at a price lower than to others; employment of aliens, by contract, for service abroad; purchase of ice and drinking water abroad; payment of excise taxes on negotiable instruments abroad; loss by exchange; cost of transporting to and from a place of storage and the cost of storing the furniture and household and personal effects of an employee of the Foreign Service who is assigned to a post at which he is unable to use his furniture and effects, under such regulations as the Director may prescribe;* actual expenses of preparing and transporting to their former homes the remains of persons, not United States Government employees, who may die away from their homes while participating in activities authorized under this appropriation; radio activities and acquisition and production of motion pictures and visual materials and purchase or rental of technical equipment and facilities therefor, narration, script-writing, translation, and engineering services, by contract or otherwise; [and] *maintenance, improvement, and repair of properties used for information activities in foreign countries; fuel and utilities for Government-owned or leased property abroad; rental or lease for periods not exceeding ten years of offices, buildings, grounds, and living quarters for officers and employees engaged in informational activities abroad; reorientation, and rehabilitation materials and equipment for Germany and Austria; and* purchase of objects for presentation to foreign governments, schools, or organizations; [$75,000,000, of which not less than $5,000,000 shall be available for the payment of terminal leave and related costs] *$89,000,000: Provided,* That not to exceed [$30,000] *$60,000* may be used for representation abroad: *Provided further, That this appropriation shall be available for expenses in connection with travel of personnel outside the continental United States, including travel of dependents and transportation of personal effects, household goods, or automobiles of such personnel, when any part of such travel or transportation begins in the current fiscal year pursuant to travel orders issued in that year, notwithstanding the fact that such travel or transportation may not be completed during the current year: Provided further, That funds may be exchanged for payment of expenses in connection with the operation of information establishments abroad without regard to the provisions of section 3651 of the Revised Statutes (31 U. S. C. 543): Provided further,* That passenger motor vehicles used abroad exclusively for the purposes of this appropriation may be exchanged or sold, pursuant to section 201 (c) of the Act of June 30, 1949 (40 U. S. C. 481 (c)), and the exchange allowances or proceeds of such sales shall be available *without fiscal year limitation* for replacement of an equal number of such vehicles and the cost, including the exchange allowance of each such replacement, except *buses and* station wagons, shall not exceed $1,400: *Provided further,* That, notwithstanding the provisions of section 3679 of the Revised Statutes, as amended (31 U. S. C. 665), the [Department of State] *United States Information Agency* is authorized in making contracts for the use of international short-wave radio stations and facilities, to agree on behalf of the United States to indemnify the owners and operators of said radio stations and facilities from such funds as may be hereafter appropriated for the purpose against loss or damage on account of injury to persons or property arising from such use of said radio stations and facilities: [*Provided further,* That in the acquisition of leasehold interests payments may be made in advance for the entire term or any part thereof: *Provided further,* That funds herein appropriated shall not be used to purchase more than 75 per centum of the effective daily broadcasting time from any person or corporation holding an international short-wave broadcasting license from the Federal Communications Commission without the consent of such licensee:] *Provided further,* That funds appropriated herein shall be available for payment to private organizations abroad in pursuance of contracts entered into for the processing and distribution of motion-picture films[: *Provided further,* That after the effective date of Reorganization Plan No. 8, 1953, existing appointments and assignments to the Foreign Service Reserve for the purposes of foreign information and educational activities which expire within one year of said effective date may be extended for a period of one year in addition to the period of appointment or assignment authorized in section 522 of the Foreign Service Act of 1946 (22 U. S. C. 922): *Provided further,* That upon the effective date of Reorganization Plan Number 8 of 1953, the President may authorize the Director of the United States Information Agency thereby created to carry out (under

Total obligations	128,805,778	92,091,701	91,470,200

PROGRAM AND PERFORMANCE

The purpose of the United States Information Agency is to submit by means of communication techniques persuasive evidence to peoples of other nations which will demonstrate that their own aspirations for freedom, progress, and peace are supported by and advanced by the objectives and policies of the United States. The intention is to encourage foreign peoples to take action consistent with United States national objectives.

These estimates provide for all the overseas information activities of the United States Government, as defined by Reorganization Plan No. 8 of 1953, including activities formerly financed by appropriations for the International Information Administration, Department of State; Government in Occupied Areas, Department of State; and the Mutual Security Agency.

The net decrease of more than one-half a million dollars in obligations is due primarily to a major reduction in radio construction which is nearly offset by (*a*) initiation of new field programs; (*b*) increased media support of field programs; (*c*) greater emphasis on overseas origination of radio broadcasting; and (*d*) commensurate increases in administrative support costs.

1. *Overseas missions.*—The program abroad is carried out through missions in 77 countries and is generally known as the United States Information Service (USIS).

2. *Radio broadcasting program.*—Radio programs are developed, produced, and transmitted throughout the world from transmitters in the United States and overseas in 33 languages, including English. Transcription of radio and television programs are shipped to USIS missions for use on local transmitting stations.

3. *Media services.*—These services provide direct and indirect support for country programs overseas.

(*a*) *Press service.*—Materials are developed about the United States and current international issues, including editorial and "pilot model" materials; worldwide communication facilities are maintained for the transmission of news and feature materials; materials are printed for distribution by overseas missions; missions are provided

Digitized for FRASER

Federal Reserve Bank of St. Louis

UNITED STATES INFORMATION AGENCY—Con.

Salaries and Expenses, United States Information Agency—Con.

with supply support for the production of pamphlets and magazines; photographic materials are produced and sent to the field; and technical and production assistance is given to the missions.

(*b*) *Motion picture service.*—This service supports the overseas missions by providing motion picture film for showings to overseas audiences. New film subjects are developed and produced under contractual arrangements and acquired films are edited and adapted for overseas use. Guidance in the use and distribution of films is supplied to the missions, and provision is made for the supply and maintenance of motion-picture equipment overseas.

(*c*) *Information center service.*—Missions are supplied with collections of American books, documents, periodicals, and Government pamphlets, both in English and in translation; foreign publishers are assisted in the translation and distribution of American books, and American publishers in distributing their products overseas; exhibits are developed in support of planned country programs; and English-teaching materials are supplied to the missions.

4. *Program direction and appraisal.*—Provision is made for the office of the director, the assistant directors for the geographic areas, the office of policy and programs, intelligence research, evaluation activities, and private enterprise cooperation activities.

5. *Administration and staff support.*—Provision is made for the office of general counsel, executive secretariat, congressional and public information staff, secretariat for the United States advisory commission on information, office of security, office of administration and administrative support.

6. *Acquisition and construction of radio facilities.*—This activity covers construction costs; purchase and installation of radio equipment; acquisition of sites for radio installations; research, design, and engineering in connection with construction; and replacement or repair. No additional funds for this activity are requested.

PROGRAM AND PERFORMANCE

This appropriation covers expenses for the general administration of the Veterans Administration and for the management and operation of the agencies' insurance and veterans benefits departments.

The appropriation of $164,700,000 is $28,831,000 less than the amount appropriated for 1954. In addition to downward trends in vocational rehabilitation and education and insurance workloads, the estimate contemplates substantial economies in operations and includes a net transfer of approximately $5,300,000 to other appropriations for certain functions chargeable to the medical programs.

1. *General administration.*—This provides for executive direction of the agency, administrative services for departmental activities, the Board of Veterans Appeals, and the Veterans Education Appeals Board.

2. *Insurance.*—Provision is made for Government insurance to eligible servicemen and veterans.

AVERAGE NUMBER OF ACTIVE POLICIES IN FORCE

	1953 actual	1954 estimate	1955 estimate
U. S. Government life insurance	439,708	420,000	400,000
National service life insurance	6,260,000	6,219,000	5,929,000

3. *Veterans' benefits.*—Veterans' and dependents' claims for compensation, pensions, or other benefits are adjudicated; and guardianship and fiduciary service is furnished helpless or incompetent veterans and minor dependents.

WORKLOAD

Obligations Payable Out of Reimbursements From Other Accounts			
3. General medical hospitals	3,377,767	3,529,600	3,529,600
Total obligations	512,121,052	549,880,000	561,262,500

PROGRAM AND PERFORMANCE

This appropriation covers the operation of all Veterans Administration hospitals. The estimated appropriation for 1955 exceeds the 1954 appropriation by $6,128,000 due to the greater number of hospitals and beds to be operated as a result of the new hospital construction program. The staffing levels per operating bed estimated for fiscal year 1955 are based on the anticipated level of operation during fiscal year 1954. Average employment in the following table is exclusive of full-time equivalent of terminal leave payments.

	1953 actual	1954 estimate	1955 estimate
Neuropsychiatric hospitals:			
Number of hospitals	35	37	40
Average operating beds	51,148	52,365	54,260
Average daily patient load	48,377	49,650	50,600
Average employment	33,460	36,232	37,706
Tuberculosis hospitals:			
Number of hospitals	20	21	21
Average operating beds	8,589	9,070	9,180
Average daily patient load	7,727	8,200	8,200
Average employment	9,610	10,302	10,238
General medical hospitals:			
Number of hospitals	103	109	111
Average operating beds	49,123	52,880	54,260
Average daily patient load	41,871	44,520	46,300
Average employment	62,365	67,010	69,505
Total Veterans Administration hospitals:			
Number of hospitals	158	167	172
Average operating beds	108,860	114,315	117,700
Average daily patient load	97,975	102,370	105,100
Average employment	105,435	113,544	117,449

Contract Hospitalization, Veterans Administration

Contract hospitalization: For care and treatment of beneficiaries of the Veterans Administration in facilities not under the jurisdiction of the Veterans Administration, as authorized by law, [$20,583,100] *$18,891,000*: *Provided*, That allotments and transfers may be made from this appropriation to the Department of Health, Education, and Welfare (Public Health Service), the Army, Navy, Air Force, and Interior Departments, for disbursement by them under the various headings of their applicable appropriations, of such amounts as are necessary for the care and treatment of beneficiaries of the Veterans Administration. (*38 U. S. C. 488a, 697, 706, 706a, 706b, 745; ch. 12 (V. R. 6 (a) and V. R. 10); Second Independent Offices Appropriation Act, 1954.*)

Appropriated 1954, $20,583,100 **Estimate 1955, $18,891,000**

AMOUNTS AVAILABLE FOR OBLIGATION

	1953 actual	1954 estimate	1955 estimate
Appropriation or estimate (obligations incurred)		$20,583,100	$18,891,000
Comparative transfer from "Administration, medical, hospital, and domiciliary services, Veterans Administration"	$21,984,621		
Total obligations	21,984,621	20,583,100	18,891,000

OBLIGATIONS BY ACTIVITIES

Description	1953 actual	1954 estimate	1955 estimate
1. Cost of contract hospitalization:			
(a) Civil hospitals	$7,712,090	$6,919,665	$7,125,881
(b) Municipal and State hospitals	4,565,193	5,223,266	4,725,181
(c) Federal hospitals	9,707,338	8,440,169	7,039,938
Total obligations	21,984,621	20,583,100	18,891,000

PROGRAM AND PERFORMANCE

Veterans are hospitalized in other Federal hospitals for service- and non-service-connected disabilities, where Veterans Administration facilities are not available. Use of non-Federal hospitals is limited to treatment of service-connected disabilities, except that female veterans, veterans in training under Public Law 16, 78th Congress, and veterans in United States Territories and possessions may receive treatment of non-service-connected disabilities in non-Federal hospitals. The reduction of $1,692,100 below 1954 is due to an estimated reduction in average daily patient load.

AVERAGE DAILY LOAD

	1953 actual	1954 estimate	1955 estimate
Civil hospitals	1,871	1,680	1,560
Municipal and State hospitals	2,411	2,236	2,050

Federal Reserve Bank of St. Louis

VETERANS ADMINISTRATION—Continued

Out-patient Care, Veterans Administration—Continued

benefits. Such care is rendered both in Veterans Administration clinics and by private physicians and dentists on a fee basis and includes examinations to ascertain the need for hospitalization, eligibility for compensation, pension, vocational rehabilitation and insurance benefits.

The decrease of $15,933,900 below 1954 results largely from continuing in 1955 the appropriation language enacted in 1954 restricting eligibility for out-patient dental care.

NUMBER OF INDIVIDUALS

Total obligations	2,435,528,506	2,287,871,479	2,535,000,000

PROGRAM AND PERFORMANCE

This provides for all compensation, pensions, and allowances, including emergency officers retirement pay and annuities, and funeral and burial expenses of deceased veterans. An increase of $32,128,521 over the requirements for the current fiscal year is estimated.

Experience indicates that requirements for World War I, non-service-connected pensions and for all World War II and Korean categories of compensation and pensions will continue to increase. In this program and performance statement effect has been given to an anticipated 1954 supplemental appropriation of $215,000,000. The supplemental is not shown in the obligation and expenditure schedules.

Readjustment Benefits, Veterans Administration

Readjustment benefits: For the payment of benefits to or on behalf of veterans as authorized by titles II, III, and V, of the Servicemen's Readjustment Act of 1944, as amended, and title II of the Veterans Readjustment Assistance Act of 1952, [$664,311,000] *and for supplies, equipment, and tuition authorized by part VII and payments authorized by part IX of Veterans Administration Regulation Numbered 1 (a), as amended, $387,000,000, together with the unexpended balance as of June 30, 1954, remaining in the appropriation for "Veterans miscellaneous benefits"* to be immediately available and to remain available until expended: *Provided*, That [from September 1, 1953, to June 30, 1954,] no part of any appropriation to the Veterans Administration shall be available, in connection with any loan authorized by title III of the Servicemen's Readjustment Act of 1944, as amended (38 U. S. C. 694–694n), for payment to the lender by the Administrator of Veterans Affairs, or for credit on the loan, of an amount equivalent to 4 per centum of the amount originally loaned, guaranteed or insured by the Veterans Administration: *Provided further*, That no right to any such payment shall accrue *after September 1, 1953*, [during this period,] but the foregoing proviso shall not apply with respect to payments based on guarantees made, or certificates of commitments issued, prior to said date or commitments for loans made by the Veterans Administration: *Provided further*, That under any contract between a State, or any political subdivision of a State, and the Veterans Administration providing for the furnishing of instruction in a course of institutional on-farm or other training under part VIII of Veterans Regulation Numbered 1 (a), as amended (Public Law 346, Seventy-eighth Congress, as amended) liability authorized by this section by reason of payments of subsistence allowance which were illegal because of failure of the veteran or the course to comply with the applicable statutory, regulatory or contractual requirements shall not be applied to the contracting State, or political subdivision, unless the Administrator of Veterans' Affairs, after investigation, finds that an employee or representative of such State, or political subdivision, conspired with the veteran by, or was guilty of fraud or gross negligence in, falsely reporting to the Veterans Administration that the veteran was in a proper course of training, failing to report unauthorized or excessive absences from, or interruption or discontinuance of, his course of training, or not discovering the failure of the veteran to comply with the applicable statutory, regulatory, or contractual requirements and not promptly terminating the course of training of the veteran. The provisions of this proviso shall be effective as of July 13, 1950, but shall not require repayment of any funds heretofore properly recovered by agreement of the parties to any such contract, and shall not be applicable to any other liabilities or agreements pursuant to such contract. *(12 U. S. C. 1716 (a) (1), 1747 note; 25 U. S. C. 331 note; 38 U. S. C. 693, 694a, 694b, 694d, 694e, 697, 701a, 701g, 724, foll. ch. 12, V. R. 1 (a), part VII note, part VIII, and part IX, par. 1; 64 Stat. 48; 66 Stat. 663; Second Independent Offices Appropriation Act, 1954.)*

Appropriated 1954, **$664,311,000** Estimate 1955, [a] **$387,000,000**
Appropriated (adjusted) 1954, **$663,311,000**

[a] Includes $15,594,066 for activities previously carried under "Veterans miscellaneous benefits, Veterans Administration." The amounts obligated in 1953 and 1954 are shown in the schedule as comparative transfers.

OBLIGATIONS BY ACTIVITIES

Description	1953 actual	1954 estimate	1955 estimate
1. Education and training:			
(a) Subsistence	$378,641,470	$132,000,000	$58,500,000
(b) Tuition	184,389,246	67,500,000	33,000,000
(c) Supplies and equipment	18,530,479	7,200,000	3,510,000
(d) Education and training allowance (Public Law 550)	86,241,379	282,960,000	458,400,000
Total education and training	667,802,574	489,660,000	553,410,000
2. Vocational rehabilitation for disabled veterans:			
(a) Tuition	13,287,464	10,080,000	8,700,000
(b) Supplies and equipment	1,558,893	1,155,000	1,000,000
Total vocational rehabilitation for disabled veterans	14,846,357	11,235,000	9,700,000
3. Loan guaranty:			
(a) Interest gratuities	46,355,684	16,600,000	
(b) Guaranty losses	4,376,630	4,785,000	4,869,000
(c) Loans and property acquired	15,110,138	16,555,000	16,739,000
Total loan guaranty	65,842,452	37,940,000	21,608,000
4. Housing grants for disabled veterans	−5,030,073	5,450,931	5,894,066
5. Readjustment allowances:			
(a) Unemployment allowance	−499,546		
(b) Self-employment allowance	−16,578		
Total obligations	742,945,186	544,285,931	590,612,066

PROGRAM AND PERFORMANCE

These benefits apply to the cost of subsistence, tuition, supplies, and equipment for the training of World War II veterans and to education and training allowances for Korean veterans; tuition, supplies and equipment for disabled veterans requiring rehabilitation; gratuities, claims, and property acquisition costs on veterans' loans; and housing grants for disabled veterans.

1. *Education and training.*—Load forecasts of trainees are based upon an analysis of trends in each of the four major categories of training as follows:

	1953 actual	1954 estimate	1955 estimate
Public Law 346:			
Institutions of higher learning	154,797	70,000	32,000
Institutions below the college level	294,478	105,000	56,000
Institutional on-farm	122,111	50,000	22,000
Job training	42,105	15,000	7,000
Total, Public Law 346	613,491	240,000	117,000
Public Law 550:			
Institutions of higher learning	33,845	117,000	168,000
Institutions below the college level	14,410	75,000	136,000
Institutional on-farm	1,120	12,000	32,000
Job training	6,841	36,000	64,000
Total, Public Law 550	56,216	240,000	400,000
Total, Public Laws 346 and 550	669,707	480,000	517,000

2. *Vocational rehabilitation for disabled veterans.*—Average monthly training load was 31,417 during fiscal year 1953. It is estimated on the basis of current trends that the monthly average will be 23,100 in fiscal year 1954 and 20,000 in fiscal year 1955.

3. *Loan guaranty.*—Loan forecasts are based on current monthly trends and the assumption that construction of housing units will continue at a relatively high level.

4. *Housing grants for disabled veterans.*—This assistance in acquiring suitable housing is provided to veterans with specified total and permanent service-connected disabilities. Of the estimated 6,500 eligible, 4,749 have established their basic eligibility as of June 30, 1953. Of these, 3,275 had made formal application for a grant, and 3,081 applications have been approved.

VETERANS ADMINISTRATION—Continued

Military and Naval Insurance, Veterans Administration—Con.

OBLIGATIONS BY ACTIVITIES

Description	1953 actual	1954 estimate	1955 estimate
1. Monthly payments to beneficiaries:			
(a) Disability awards	$4,407,594	$4,265,730	$4,119,390
(b) Death awards	13,096	12,480	9,480
2. One-sum benefit payments	16,683		
3. Payment to "United States Government life insurance fund, Veterans Administration"	985,179	941,000	885,450
Obligations incurred	5,422,552	5,219,210	5,014,320

PROGRAM AND PERFORMANCE

Payments are made to veterans who suffered permanent and total disability as a result of war service or during the postwar period in which they carried World War I war-risk insurance. Payments are being made to beneficiaries of members of the Armed Forces who died in service or who died in the postwar period during which this type of insurance was in force. Also, payments are made to the United States Government life-insurance fund on account of certain total disability claims and death claims under United States Government life insurance. In addition to the annual appropriation there is authorized a permanent indefinite appropriation, representing war-risk insurance premiums transferred from the United States Government life-insurance fund (38 U. S. C. 442, 517).

Comparative summaries by fiscal years are as follows:

WORKLOAD BY ACTIVITY

OBLIGATIONS BY ACTIVITIES

Description	1953 actual	1954 estimate	1955 estimate
1. Hospital bed-producing projects	$26,651,953	$60,755,067	$34,979,577
2. Conversions at existing hospitals	2,669,672	240,693	
3. Major rehabilitation and modernization at existing hospitals	6,466,511	20,376,317	13,053,875
4. Non-bed-producing projects	6,448,070	1,142,151	5,000
5. Construction of administrative facilities at hospital sites	87,463	81,690	
6. Initial portable equipment	5,286,006	4,498,863	3,234,548
Total obligations	47,609,675	87,094,781	51,273,000

PROGRAM AND PERFORMANCE

This is for the construction of new hospitals and homes and additions to existing hospitals and homes to provide new beds and administrative facilities at hospital sites. Provision also is made for major rehabilitation and modernization of existing hospitals and homes and for the purchase of initial portable equipment.

1. *Hospital bed-producing projects.*—Construction of 77 projects will provide 37,740 new beds.

Digitized for FRASER

Federal Reserve Bank of St. Louis

NEW BEDS

	New hospitals	Additions to existing hospitals	Total
Neuropsychiatric	9,465	1,370	10,835
Tuberculosis	1,200	1,180	2,380
General medical and surgical	23,275	950	24,225
Homes	300		300
Total	34,240	3,500	37,740

Of the total, Army Corps of Engineers is constructing 44 projects, providing 21,918 beds. The remaining 33 projects, providing 15,822 beds, together with the conversions of existing beds, will be constructed by the Administration. The status of hospital-bed construction is as follows:

NUMBER OF BEDS

	1953 actual	1954 estimate	1955 estimate
Under construction beginning of year	13,250	8,700	3,750
Put under construction during year	1,000	3,250	
Completed during year	5,550	8,200	500
Total completed at end of year	24,790	32,990	33,490
Under construction at end of year	8,700	3,750	3,250
Not under construction at end of year	4,250	1,000	1,000

2. *Conversions at existing hospitals.*—Under this program five existing facilities are being adapted to meet current needs due to the changing character of the patient load.

3. *Major rehabilitation and modernization at existing hospitals.*—This program provides for replacement of structures and other construction required to bring old hospitals, insofar as possible, up to the standards of the new hospitals. Also included are major alteration and repair projects costing more than $250,000.

4. *Non-bed-producing projects.*—This covers construction of alterations, improvements, and repairs at hospitals and homes approved prior to 1953 which do not affect the nature or size of the bed capacity. For 1953 and subsequent years, projects of this nature costing more than $250,000 are carried under the major rehabilitation and modernization program; nonbed projects costing less than $250,000 are included under the "Major alterations, improvements, and repairs" appropriation.

5. *Construction of administrative facilities at hospital sites.*—One project, the regional office building in Chicago, Ill., is included in this program. This project was completed in 1953 at a cost of $5.4 million.

6. *Initial portable equipment.*—This is for equipping new hospitals and reequipping existing hospitals undergoing major alterations and improvements.

Total direct payments	916,563	$916,947	$997,317
Obligations incurred	84,656,569	76,211,618	37,210,841

PROGRAM AND PERFORMANCE

Payments are made to the national service life insurance fund to meet (*a*) death claims and waivers of premium where such claims are determined to be due to the extra hazards of military or naval service; (*b*) claims for gratuitous insurance; (*c*) waivers of recovery of erroneous payments or overpayments from the fund; (*d*) certain other direct payments. In addition to the annual appropriation, there is authorized a permanent indefinite appropriation, representing premium payments which in certain cases are made directly to this account (38 U. S. C. 802 (c) (2), 802 (v) (1)).

OBLIGATIONS BY ACTIVITIES

Monthly payments to beneficiaries: Death awards—1953, $11,797,529; 1954, $18,090,903; 1955, $30,000,000.

PROGRAM AND PERFORMANCE

The Servicemen's Indemnity and Insurance Act of 1951 provides that beneficiaries of the servicemen who die while in active service or within a period of 120 days after separation or release from active service, are entitled to receive an indemnity in the amount of $10,000 less any national service life insurance and/or United States Government life insurance carried by the deceased. Payments are to be made to the beneficiaries in 120 equal installments plus interest at the rate of 2¼ percent per annum. In this program and performance statement effect has been given to an anticipated 1954 supplemental appropriation of $3,100,000. The supplemental is not shown in the obligation and expenditures schedules.

Obligations incurred	1,976,884	11,700,000	1,564,000

PROGRAM AND PERFORMANCE

Under the act of July 1, 1948, the Philippine Government may receive grants for (1) the construction and equipping of veterans' hospitals, in the total amount of $22,500,000, and (2) the medical care and treatment of certain veterans in the Philippines, at not to exceed $3,285,000 per annum for 5 years. The authority to reimburse the Philippine Government for the medical care and treatment of certain veterans in the Philippines expires December 31, 1954; consequently the 1955 estimate is predicated on reimbursement for medical care and treatment for the first 6 months of fiscal year 1955 only.

OBLIGATIONS BY OBJECTS

11 Grants, subsidies, and contributions—1953, $1,976,884; 1954, $11,700,000; 1955, $1,564,000.

Major Alterations, Improvements, and Repairs, Veterans Administration

Major alterations, improvements, and repairs: For all necessary expenses of major alterations, improvements, and repairs to regional offices, supply depots, and hospital and domiciliary facilities, $3,400,000, to remain available until expended: Provided, That no part of the foregoing appropriation shall be used to commence any major alteration, improvement, or repair unless funds are available for the completion of such work; and no funds shall be used for such work at any facility if the Veterans Administration is reasonably certain that the installation will be abandoned in the near future. (38 U. S. C. 438j–k; Independent Offices Appropriation Act, 1953.)

Estimate 1955, [a] **$3,400,000**

[a] Includes $310,000 for activities previously carried under "Medical administration and miscellaneous operating expenses, Veterans Administration." The amounts obligated in 1953 and 1954 are shown in the schedule as comparative transfers.

Not to exceed 5 per centum of any appropriation for the current fiscal year for "Compensation and pensions", "Readjustment benefits", "Military and naval insurance", "National service life insurance", and "Servicemen's indemnities", may be transferred, to any other of the mentioned appropriations, but not to exceed 10 per centum of the appropriation so augmented.

Appropriations available to the Veterans Administration for the current fiscal year for salaries and expenses shall be available for services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a).

Appropriations available to the Veterans Administration for the current fiscal year for "Maintenance and operation of hospitals", "Maintenance and operation of domiciliary facilities", and "Outpatient care", shall be available for funeral, burial, and other expenses incidental thereto (except burial awards authorized by Veterans Administration Regulation Numbered 9 (a), as amended), for beneficiaries of the Veterans Administration receiving care under such appropriations.

No part of the appropriations in this Act for the Veterans Administration (except the appropriation for "Hospital and domiciliary facilities") shall be available for the purchase of any site for or toward the construction of any new hospital or home.

Appropriations in this Act for the Veterans Administration for "Maintenance and operation of hospitals" and "Maintenance and operation of domiciliary facilities" may be used to repair, alter, improve, or provide facilities in the several hospitals and homes under the jurisdiction of the Veterans Administration, not otherwise provided for, either by contract, or by the hire of temporary employees and the purchase of materials.

No part of the foregoing appropriations shall be available for hospitalization or examination of any persons except beneficiaries entitled under the laws bestowing such benefits to veterans, unless reimbursement of cost is made to the appropriation at such rates as may be fixed by the Administrator of Veterans Affairs.

The Administrator of Veterans Affairs is hereby authorized, in his discretion, to activate and operate at reasonable standards throughout the fiscal year [1954] *1955* those beds which are needed and which can be staffed, in the following categories: (a) all beds in Veterans Administration hospital and domiciliary facilities and all contract beds that were in use during the fiscal year [1953] *1954*, except those replaced or to be replaced by new construction, (b) all beds in Veterans Administration hospital and domiciliary facilities [and all contract beds] that were closed during the fiscal year [1953], *1954* except those replaced or to be replaced by new construction, and (c) all beds in Veterans Administration hospital and domiciliary facilities constructed in the fiscal years [1953 and 1954; provided] *1954 and 1955: Provided*, that the qualified personnel required for the standard operation and maintenance of such beds can be obtained. (*Second Independent Offices Appropriation Act, 1954.*)

PROGRAM AND PERFORMANCE

The war claims fund consists of moneys derived from enemy assets vested by the Office of Alien Property, Department of Justice. The fund is used to pay the following classes of claims arising out of World War II (and the administrative expenses in connection therewith): (1) Claims of certain American and Filipino prisoners of war of World War II for compensation for food deficiencies while imprisoned and for uncompensated labor and/or inhumane treatment; (2) claims of certain American civilian internees for detention benefits; (3) claims of certain religious organizations or their personnel for reimbursement for assistance rendered Americans, civilian and military and for property loss or damage; (4) claims of certain employees of United States contractors for injury, death, or detention benefits; and (5) claims of certain American civilian internees for disability or death benefits.

Classes (1) through (3) are administered by the War Claims Commission; classes (4) and (5) by the Bureau of Employees' Compensation, Department of Labor.

BUSINESS-TYPE STATEMENTS

PROGRAM AND PERFORMANCE

Guarantees are given on loans made by private sources to finance construction or operation of defense production facilities. Loans may be purchased by the Government if necessary to keep financing in effect. Revenues from guarantee fees and interest on purchased loans are used to pay administrative expenses. Advances from appropriations available for procurement may be made to this fund for its temporary use. Net earnings are retained to meet possible future losses. (Defense Production Act of 1950, sec. 301.)

PURPOSE AND FINANCIAL ORGANIZATION

The Bank is authorized by the Export-Import Bank Act of 1945 (12 U. S. C. 635), as amended, "to aid in financing and to facilitate exports and imports and the exchange of commodities between the United States or any of its Territories or insular possessions and any foreign country or the agencies or nationals thereof." In carrying out its objectives the Bank is guided by the policy of supplementing and encouraging rather than competing with private capital, and generally requires that the loans be made for specific purposes and offer reasonable assurance of repayment. The Bank makes every effort to secure a maximum of private capital participation in its credits.

The Bank also performs functions under the Defense Production Act of 1950, as amended, with respect to loans made for the development of foreign sources and the production abroad of essential materials for the stockpile, and under the Economic Cooperation Act of 1948, as amended, with respect to foreign assistance loans and guaranties. The Bank does not use its own funds for these latter activities, but operates under allocations from the Office of Defense Mobilization and the Foreign Operations Administration.

Under Reorganization Plan No. 5 of 1953, which became law on June 30, 1953, the board of directors was eliminated and all of its functions transferred to a managing director appointed by the President with the advice and consent of the Senate. The managing director is assisted by a deputy director, also appointed by the President with the advice and consent of the Senate, and an assistant director appointed by the managing director under the classified civil service.

The lending and insurance authority of Export-Import Bank is limited to $4.5 billion outstanding at any one time. Pursuant to Public Law 30, Eighty-third Congress, approved May 21, 1953, $100 million has been allocated to provide insurance on commodities in storage in friendly foreign countries.

In lieu of borrowing funds from the Treasury, the Bank may guarantee loans from private sources. This practice will be utilized more extensively in the future than in the recent past.

Funds of the Bank derive from a Treasury subscription to capital stock of $1,000,000,000 and authority to borrow from the Treasury up to $3.5 billion.

ANALYSIS OF BUDGET PROGRAMS

General foreign trade credits—The Bank has extended credits in the following categories to facilitate and assist the export and import trade of the United States:

(*a*) Credits for development projects abroad, generally those requiring American services and installation of American machinery which contribute to the permanency of the foreign trade of the United States by increasing the economic stability of the other nations of the free world;

(*b*) Credits for the development and expansion of foreign sources of strategic and critical materials essential to the defense stockpile and United States industry in general;

(*c*) Credits for the purchase by other countries of United States staple commodities such as raw cotton;

(*d*) Credits authorized in order that a friendly country might receive immediately dollar proceeds of contracts placed in that country under the Mutual Security Program for military supplies and materials to be delivered and paid for at later dates;

Federal Reserve Bank of St. Louis

PUBLIC ENTERPRISE FUNDS—Continued

EXPORT-IMPORT BANK OF WASHINGTON—Continued

Loans From Treasury, Export-Import Bank of Washington—Con.

(*e*) Credits to enable a foreign country to liquidate its past-due dollar accounts in order that its commercial transactions might be placed on a current basis.

Significant examples of general foreign trade credits authorized during the fiscal year 1953 are as follows:

An $18 million credit for the purchase of United States agricultural equipment in favor of the National Economic Development Bank of Brazil; a $17 million credit in favor of the Republic of Portugal to finance the cost of United States materials and equipment for a new railroad in the Province of Mozambique, Portuguese East Africa; a $300 million credit to Brazil to assist in liquidating past-due dollar accounts and place its commerical transactions on a current basis and to avoid an interruption in the trade between the United States and Brazil which is so important to both countries; short-term commodity credits totaling $52 million to Japan and Spain for the export of United States cotton needed for the textile industries of both countries.

Commodity credits	1.1	2.1	5.3
Total	31.7	43.5	45.8

Credits for defense purposes.—Credits for defense purposes are established under the provisions of and from funds available to the Bank under the Export-Import Bank Act of 1945, as amended, when it is determined that the loans applied for can meet the necessary credit requirements.

In order to develop and expand foreign sources of essential and strategic materials the Bank in 1953 committed an additional $57 million to aid in financing the construction of new uranium production plants and related facilities in the Union of South Africa and granted a credit of $19.6 million to the Electricity Supply Commission, an agency of the Government of the Union of South Africa, to finance the expansion of steam electric power facilities. A credit of $67.5 million to Industria e Comercio de Minerios, S. A., was authorized to assist in financing the production of manganese ore from deposits in northern Brazil. Of this amount $15 million was certified by the Defense Materials Procurement Agency. Other small credits were also authorized for the development of sources of such materials.

Total	4.1	5.2	4.1

Small exporters and importers.—Credit facilities are afforded small United States exporters and importers who are unable to secure assistance from commercial banks. Credit utilization for this purpose is approximately $100,000 annually.

Postwar emergency reconstruction and lend-lease termination credits.—These credits to European countries were disbursed during the years immediately following World War II, and the Bank is concerned chiefly with effecting collection of principal and interest due.

DATA ON RECONSTRUCTION CREDITS

[In millions]

	1953 actual	1954 estimate	1955 estimate
Loans outstanding, June 30	$890.2	$848.3	$804.9

	1953 actual	1954 estimate	1955 estimate
Loans outstanding, June 30	$505.9	$485.0	$463.2
Loan principal repayments in the year	22.7	20.9	21.8
Loan interest payments in the year	13.0	11.5	11.4

Lending authority.—Of the $4,500 million of lending authority under the Export-Import Bank Act of 1945, as amended, the loans outstanding at the end of the 1955 fiscal year, as described above, are estimated at $2,741.3 million and undisbursed commitments at $652.9 million. A margin of $1,005.8 million of unused and uncommitted lending authority will remain.

Insurance operations.—The underwriting of insurance on commodities in storage abroad, pursuant to Public Law 30, Eighty-third Congress, is expected to be launched in fiscal year 1954. It is estimated that policies aggregating $100 million will be issued during fiscal year 1954, and $200 million in 1955. Estimated net earnings from pre-

Federal Reserve Bank of St. Louis

miums received to June 30, 1955, total $164,900, to be held as a reserve for insurance policies in force.

Administrative expense limitation.—The limitation proposed by the Bank for fiscal year 1955 is $1,070,000, a reduction of $46,000 from the limitation authorized for 1954.

FINANCING OPERATIONS

Under Export-Import Bank Act.—Outstanding notes as of June 30, 1953, issued by the Bank to the United States Treasury against the borrowing authority of $3,500 million, totaled $1,227.1 million. Actual borrowings and repayments on notes for the fiscal year 1953 as well as estimates for 1954 and 1955 are shown in millions of dollars in the following tabulation:

	1953 actual	1954 estimate	1955 estimate
Borrowings from Treasury	$408.2	$385.0	$199.1
Repayments to Treasury	269.2	276.1	327.5
Net cash withdrawals or deposits (−)	139.0	108.9	−128.4
Deductions:			
Dividend paid	20.0	22.5	22.5
Increase in Bank's cash	1.7	−1.7	
Total deductions	21.7	20.8	22.5
Net budget expenditure or credit (−)	117.3	88.1	−150.9

Lending financed by mutual security and defense funds.—Investment of the United States Government pertaining to lending activities of the Bank under the Mutual Security Act and the Defense Production Act, not shown in the Bank's statement of condition as of June 30, 1953, is represented by outstanding balances of notes issued to the United States Treasury and disbursements made from appropriated funds, as follows:

UNDER MUTUAL SECURITY ACT

Purpose	Notes issued to U. S. Treasury		Appropriated funds utilized
	Face amount	Unpaid balance	
Foreign assistance loans	$1,122,300,000	$1,121,853,496	$181,608,259
Guaranties	200,000,000	3,530,000	
Spanish earmark	62,500,000	36,417,180	
Credit to India	27,254,316	27,198,687	162,402,104
Credit to Afghanistan			1,302,774
Credit to Pakistan			15,000,000
Total	1,412,054,316	1,188,999,363	360,313,137

The above notes have been issued by the Director for Mutual Security and formerly by the Administrator for Economic Cooperation.

UNDER DEFENSE PRODUCTION ACT

Purpose	Notes Issued to Treasury	
	Face amount	Unpaid balance
Loans for production abroad of essential materials	$398,155	$368,441

These notes were issued by the Export-Import Bank, and are repayable from funds collected on the related defense loans. It is anticipated that interest income on these loans will cover operating expenses and any losses.

Payments into general fund of United States Treasury.—Payments made by Export-Import Bank into the United States Treasury as miscellaneous receipts, consisting of profits from the Bank's regular lending activities and other funds received by the Bank are shown in the following schedule:

Activity	1953 actual	1954 estimate	1955 estimate
Export-Import Bank, regular:			
Interest on obligations	$22,975,084	$28,300,000	$31,040,000
Dividends on capital stock	20,000,000	22,500,000	22,500,000
Participation in loan, lend-lease funds	1,120,208	3,500,000	2,379,792
Foreign Operations Administration:			
Interest on obligations	19,287,427	30,155,200	30,566,425
Interest on loans from appropriated funds	[1] 2,204,767	[1] 4,618,400	4,618,400
Defense production: Interest on obligations	4,431	85,000	325,000
Federal Republic of Germany: Interest on agreement dated Feb. 27, 1953		25,000,000	25,000,000
Total	65,591,917	114,158,600	116,429,617

[1] Includes $2,009,644 in 1953, and $2,990,356 in 1954, received from India to be held by Treasury for special purposes per India Emergency Food Aid Act.

OPERATING RESULTS AND RETAINED EARNINGS

Out of the net profit of $51.8 million for the fiscal year ended June 30, 1953, the Bank declared a dividend of $22.5 million on the capital stock of $1 billion, which is held by the United States Treasury. Profits in excess of the dividend each year are added to the accumulated retained earnings of the Bank, estimated to amount to $359.5 million at the end of fiscal year 1955, which will be available for future contingencies.

FINANCIAL CONDITION

Total assets of the Bank, which were $2,438 million at the beginning of fiscal year 1953, are estimated at $2,789 million at the end of fiscal year 1955. This is largely represented by an increase in the loans outstanding. The total investment of the United States Government in the Bank is estimated as of June 30, 1955, at $2,589.6 million, consisting of $1,207.6 million of interest-bearing notes, $1 billion of non-interest-bearing capital stock, and $382 million of total retained earnings.

PUBLIC ENTERPRISE FUNDS—Continued

FARM CREDIT ADMINISTRATION—Continued

Authorization to Expend From Corporate Debt Receipts, Federal Farm Mortgage Corporation—Continued

finance Land Bank Commissioner loans, to purchase Federal land bank bonds, to make secured loans to Federal land banks, to exchange its bonds for Federal land bank bonds, and to obtain necessary funds through sale of its own bonds.

ANALYSIS OF BUDGET PROGRAM

The Land Bank Commissioner's authority to make loans on behalf of the Corporation having expired July 1, 1947 (12 U. S. C. 1016), the Corporation's principal activity is the liquidation of its assets. Budgetary requirements for fiscal year 1955 depend upon the rate of liquidation.

Administrative expenses.—These are payments to the Federal land banks for services performed as agents of the Corporation, reimbursements to the Treasury and Federal Reserve banks for expenses of bond transactions and checking accounts, and cost of audit by the General Accounting Office. Total administrative expenses for 1953 were $834,731, and are estimated at $750,000 for 1954 and $650,000 for 1955.

FINANCING OPERATIONS

During 1953 the Corporation paid a dividend of $9,000,000 to the Treasury, and it is estimated that a $7,000,000 dividend will be paid in 1954.

OPERATING RESULTS

Operations in 1953 resulted in a net budgetary receipt of $9,285,578; net budgetary receipts of $6,266,200 are estimated for 1954 and $4,398,300 for 1955.

Income and expense.—Operating income for 1953 was $1,264,136 and is estimated at $948,000 for 1954 and $710,000 for 1955. The 1953 net income was $1,514,733; the estimate for 1954 is $712,400 and $388,200 for 1955. Expenses (exclusive of chargeoffs) for 1953 were $929,056; comparable expenses for 1954 and 1955 are estimated at $813,600 and $715,300.

LIMITATION ON EXPENSES

Administrative Expenses, Federal Farm Mortgage Corporation

Federal Farm Mortgage Corporation: Not to exceed [$750,000] *$650,000* (to be computed on an accrual basis) of the funds of the Corporation shall be available for administrative expenses, including employment on a contract or fee basis of persons, firms, and corporations for the performance of special services, including legal services, and the use of the services and facilities of Federal land banks, national farm loan associations, Federal Reserve banks, and agencies of the Government as authorized by the Act of January 31, 1934 (12 U. S. C. 1020–1020h); and said total sum shall be exclusive of services and facilities furnished and examinations made by the Farm Credit Administration central office, interest expense, and expenses in connection with the acquisition, operation, maintenance, improvement, protection, or disposition of real or personal property belonging to the Corporation or in which it has an interest: *Provided*, That promptly after June 30 of each fiscal year all cash funds in excess of the estimated operating requirements for the current fiscal year shall be declared as dividends and paid into the general fund of the Treasury: *Provided further*, That the aggregate amount of bonds the Corporation may issue and have outstanding at any one time shall not exceed $500,000,000. (*12 U. S. C. 1020; Department of Agriculture Appropriation Act, 1954.*)

PURPOSE AND FINANCIAL ORGANIZATION

The 12 Federal intermediate credit banks are banks of discount for agriculture. They make no loans directly to individuals and accept deposits only as collateral security. Each bank operates under a board of directors identical with the district farm credit board and is supervised by the Farm Credit Administration (12 U. S. C. 1021–1129). The Government's capital investment in the banks on June 30, 1953, was $65,650,000.

ANALYSIS OF BUDGET PROGRAM

Credit demands are expected to continue at a relatively high level through fiscal 1954 and 1955. More farmers find it necessary to borrow increasingly large proportions of their total production costs as operating costs continue to be high and prices of commodities tend to decline. Lower livestock prices will tend to increase the amount of renewal loans, and many additional farmers are now applying for loans through Production Credit Associations and other financing institutions dealing with the banks. These added demands are expected to more than offset reductions in volume resulting from curtailment of wheat acreages and possible reductions in other crops.

Lending activities.—In 1953, $1,906,139,248 of credit was extended, a decline of 8.2 percent from the 1952 peak of $2,077,272,277. Although the amount of loans and discounts closed in 1953 showed a moderate decline, compared with 1952, the average amount of credit outstanding was 2.6 percent greater in 1953. A loan and discount volume of $1,979,041,000 is estimated for 1954, with an upward trend to $2,132,690,000 forecast for 1955, an increase of 11.9 percent over 1953.

Administrative expenses.—These are paid out of income. Actual 1953 expenses were $1,606,003; they are estimated at $1,690,000 for 1954 and $1,740,000 for 1955.

FINANCING OPERATIONS

To finance their lending operations, the banks expect to issue consolidated collateral trust debentures amounting to $1,297,378,000 in 1954 and $1,361,585,000 in 1955, and to borrow $71,000,000 in 1954 and $65,000,000 in 1955 from commercial banks for short periods. The United States assumes no liability for the debentures or other obligations of the Federal intermediate credit banks. The aggregate amount of debentures and other similar obligations which any Federal intermediate credit bank may have outstanding may not exceed 10 times its surplus and paid-in capital (12 U. S. C. 1041).

OPERATING RESULTS AND RETAINED EARNINGS

Income.—Interest income from loans and discounts, United States securities, and other sources was $23,054,305 in 1953, and is estimated at $24,614,500 for 1954 and $26,807,800 for 1955. The estimated increase in gross interest income is due to the anticipated higher loan volume as well as somewhat higher average interest and discount rate. Net income which was $3,161,829 in 1953 is expected to be $2,103,400 in 1954 and $2,784,800 in 1955.

Interest costs.—Interest and other costs on borrowed money were $18,005,750 in 1953, and are estimated to be $20,532,000 in 1954 and $21,969,000 in 1955. The average cost of outstanding debentures was 2.31 percent per annum in 1953, and is estimated by the banks at 2.75 percent for both 1954 and 1955. Interest costs are affected by general money-market conditions and rates are subject to considerable fluctuation.

Retained earnings.—The distribution of net income of the banks is prescribed by law (12 U. S. C. 1072). Out of such income, $1,615,000 was transferred to reserve for contingencies in 1953 and it is expected that $1,325,000 will be transferred in 1954 and $1,625,000 in 1955. A 25-percent franchise tax of $386,707 was paid in 1953, and payments of $194,600 and $290,000 are anticipated in 1954 and 1955. Total franchise taxes paid by the banks from organization to June 30, 1953, aggregate $8,984,713. The balance of net income each year is carried to unreserved retained earnings and, the total of all retained earnings is held in the system as contemplated by law. Such earnings which totaled $45,289,791 on June 30, 1953, together with paid-in capital and paid-in surplus, form the capital structure on which the issuance of securities is based.

Loans and discounts.—Loans and discounts outstanding on June 30, 1953, amounted to $830,218,669. It is estimated that loans and discounts outstanding will amount to $861,921,669 on June 30, 1954, and $908,820,669 on June 30, 1955.

Investments.—The banks held $51,252,500 par value of United States securities at June 30, 1953, and it is estimated that such holdings will be $49,752,500 on June 30, 1954, and June 30, 1955. These investments are an

important factor in enabling the banks to obtain funds in the investment markets at reasonable rates. They are used from time to time as collateral for debentures and to secure short-term bank borrowings.

Liabilities.—Unmatured consolidated debentures and notes payable outstanding, which account for all except about 1 percent of the banks' liabilities, totaled $787,955,000 on June 30, 1953, and are expected to increase to $820,500,000 on June 30, 1954, and $866,365,000 on June 30, 1955.

FINANCIAL CONDITION

The Government's capital investment of $65,650,000 at June 30, 1953, consisted of $5,000,000 of paid-in capital for each of the 12 banks and a total of $5,650,000 of paid-in surplus supplied to 6 of the banks from late in 1951 through June 30, 1953, out of the U. S. Treasury revolving fund of $40,000,000 (12 U. S. C. 1131i (e)). Repayments to the revolving fund are expected to reduce paid-in surplus to $4,300,000 at June 30, 1954, and to $4,050,000 at the end of 1955.

Number of associations completely owned by farmers and stockmen	283	360	425
Number of farmer stockholders	479,250	487,500	497,300
Number of loans made	270,335	275,000	291,000
Amount of loans made	$1,290,038,908	$1,290,000,000	$1,350,000,000
Capital stock owned by farmers and stockmen	$92,228,217	$95,550,000	$98,950,000
Accumulated reserves of associations	$86,179,127	$92,250,000	$98,150,000
Capital stock of associations owned by production credit corporations	$5,526,500	$4,410,500	$2,365,000

PURPOSE AND FINANCIAL ORGANIZATION

The production credit system is designed to make permanent short-term-credit facilities available to farmers and stockmen on a cooperative basis (12 U. S. C. 1131 et seq.). There is a production credit corporation in each of the 12 farm credit districts. These corporations, under a district board of directors, organize, supervise, and provide supplemental capital for the local production credit associations, which are the lending cooperatives. The capital stock of the production credit corporations comes from the revolving fund of $90,000,000 in the United States Treasury. The corporations are supervised by the Farm Credit Administration.

ANALYSIS OF BUDGET PROGRAM

The principal factor governing administrative expenses is the degree of supervision of these associations, including the prescribing of loan policies, interest rates and reserves; approval of certain classes of loans and dividend payments; and approval of officers, directors, and their compensation. The corporations make an annual credit examination of each association and make periodic operating reviews and audits. The objective is to have all associations wholly member owned, and the corporations have reduced their investment in class A stock of associations from $90,000,000 in 1934 to $5,526,500 on June 30, 1953. At that date 283 associations were completely owned by farmers and stockmen.

Administrative expenses of the 12 corporations were $1,422,558 in 1953 and are estimated at $1,465,000 for 1954 and $1,540,000 for 1955.

FINANCIAL REVIEW

The Government's capital investment in corporations is expected to be reduced to $30,235,000 at June 30, 1955, by a payment to the revolving fund of $4,225,000 in 1954 and $1,500,000 in 1955. Since 1949, by reasons of a special payment of $30,000,000 into the surplus fund of the Treasury in that year and a corresponding reduction in their investments, the corporations have been unable to defray all expenses from current income. The 1953 net loss was $778,931 and losses are estimated at $572,800 for 1954 and $720,700 for 1955, reducing the earned surplus to an aggregate of $13,541,673 on June 30, 1955.

Purchases and sales of securities result primarily from the continued reduction of the corporations' liability under bond repurchase agreements with the associations and the return of Government capital to the revolving fund.

FARM CREDIT ADMINISTRATION MIXED-OWNERSHIP CORPORATIONS

BANKS FOR COOPERATIVES

The banks for cooperatives make loans to finance the production, marketing, and service operations of farmers' cooperatives. The banks' capital funds are from the Agricultural Marketing Act revolving fund (12 U. S. C. 1134b, 1134i), and from borrowing farmers' cooperative associations (12 U. S. C. 1134k). The amount of capital provided by the associations varies with their borrowings. This is because the stock they acquire in conjunction with loans must be retired at their request when the loan is repaid. Stock owned by associations, and their deposits in the guaranty fund, was $17,988,900, 9.15 percent of total capital funds at June 30, 1953.

The objective of eventual ownership of the banks by farmers' cooperatives is recognized in the Farm Credit Act of 1953, which establishes a Federal Farm Credit Board and directs it to recommend means of retiring United States Government investment in the capital stock of the banks.

BUSINESS-TYPE STATEMENTS

PROGRAM AND PERFORMANCE

This fund finances procurement of materials or organizational equipment toward which Federal contributions are made on a matching-fund basis. It is reimbursed for purchases from applicable appropriations and from funds provided by the States (65 Stat. 61). The principal of the fund consists of $5,000,000 appropriated in 1951.

RECONSTRUCTION FINANCE CORPORATION

[Submitted under the Government Corporation Control Act]

INTRODUCTORY STATEMENT

The Reconstruction Finance Corporation Liquidation Act (Public Law 163, 83d Cong.) provided for expiration of the Corporation's succession on June 30, 1954. The lending authority under the RFC Act was terminated as of September 28, 1953. The liquidation of the lending program, the Smaller War Plants Corporation, and miscellaneous assets remaining from World War II defense programs is to be carried out by the Secretary of the Treasury after June 30, 1954. The Secretary of the Treasury is given the authority under section 409 of the Federal Civil Defense Act of 1950 to make loans for civil defense. The lending authority under title III of the Defense Production Act of 1950 is to be transferred to an agency designated by the President (the Secretary of the Treasury was so designated on September 28, 1953). The rubber, tin, and abaca fiber programs are to be transferred to an agency to be designated by the President on or before June 30, 1954. The President is authorized to designate an agency to make loans to States, municipalities, and other public agencies, in a total not to exceed $25 million outstanding at any one time. The authority to make loans under section 714 of the Defense Production Act of 1950, as amended, terminated on July 31, 1953, in accordance with the provisions of that act.

Except for the Defense Production Act loan activity and the production programs, the financial statements, schedules, and narrative statements are shown in the Treasury Department section of this budget. Loan activity under title III of the Defense Production Act of 1950, as amended, is shown under Funds Appropriated to the President, "Expansion of defense production." Since an agency has not yet been designated by the President to operate the rubber, tin, and abaca fiber programs after June 30, 1954, these programs are presented under the Reconstruction Finance Corporation immediately following. No agency has yet been designated to operate the public agency loan program, and no request for an appropriation is being submitted at this time.

BUSINESS-TYPE STATEMENTS

RFC PRODUCTION PROGRAMS

PURPOSE AND FINANCIAL ORGANIZATION

The RFC has been responsible for the operation of the Government's synthetic rubber program, the tin program, and the abaca fiber program (50 U. S. C. App. 1921–1938; 50 U. S. C. 541–546; 50 U. S. C. 98 note). The RFC Liquidation Act provides that functions, powers, duties, and authority of RFC under the acts cited above shall be transferred from RFC by the President prior to June 30, 1954.

The RFC production programs are financed with funds arising from the operations of these programs in accordance with the Government Corporations Appropriation Act of 1949. To the extent that funds realized from these programs exceed requirements, they are deposited in the Treasury as miscellaneous receipts.

ANALYSIS OF BUDGET PROGRAMS

PROGRAM HIGHLIGHTS

[In millions of dollars]

	1953 actual	1954 estimate	1955 estimate
Synthetic rubber:			
Cost of operations	303.2	252.4	245.9
Sales	392.2	309.4	308.9
Tin:			
Cost of operations	179.0	71.2	1.5
Sales	191.4	116.2	
Abaca:			
Cost of operations	6.8	6.7	6.7
Sales	7.4	5.0	6.0

Synthetic rubber.—It is anticipated that the sale of the synthetic-rubber facilities, pursuant to the Rubber Producing Facilities Disposal Act, will take place near the end of fiscal year 1955. However, no receipts from such sale are forecast in this budget.

Based upon anticipated industry requirements in fiscal year 1955, production is estimated at 600,000 long tons at a cost of $219.6 million. It is estimated that all synthetic rubber produced in fiscal year 1955 will be sold during the same year. Actual production in fiscal year 1953 was 712,769 long tons, costing $271.6 million, and for fiscal year 1954 production of 608,900 long tons at a cost of $222.1 million is projected.

Capital expenditures for fiscal year 1955 are estimated at $15 million, all of which is for replacements and process improvements. This compares with $16 million estimated for fiscal year 1954, and $22.1 million expended in fiscal year 1953.

Tin.—Production at the Texas City smelter has been continued since World War II as part of the program to build up an adequate national stockpile of tin. During 1954, deliveries of tin to the national stockpile will be completed, and world tin supplies are now adequate to

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

meet current consumption requirements. Although current international negotiations may necessitate a change in present forecasts, it is assumed that production will cease at the close of fiscal year 1954. The inventories of refined tin remaining will be sold to the General Services Administration under authority contained in the Defense Production Act of 1950, as amended.

Abaca.—Production of abaca fiber on the Government's Central American plantations is estimated at 30 million pounds for fiscal year 1955, as compared with 34.1 million pounds and 27.5 million pounds for fiscal years 1953 and 1954, respectively. Under the terms of a Presidential directive, the area under cultivation to abaca is limited to 25,500 acres.

ADMINISTRATIVE EXPENSES

Administrative expenses consist of salaries and related costs of personnel engaged in the supervision and control of these programs, together with rental costs of office space. These expenses are estimated to be $1.6 million in fiscal year 1955, as compared to $2.7 million and $2.2 million for fiscal years 1953 and 1954, respectively.

FINANCING OPERATIONS

Payments estimated at $218.4 million and $74.6 million, representing the proceeds from the production programs, will be made to the Treasury in fiscal years 1954 and 1955, respectively.

A total of $15 million will be retained at the close of fiscal year 1954 to provide for immediate working capital requirements including the estimated operating loss of the fiber program.

OPERATING RESULTS AND RETAINED EARNINGS

The operating results of the production programs are summarized in the following table:

[In millions of dollars]

	1953 actual	1954 estimate	1955 estimate

LIMITATION ON EXPENSES

Administrative Expenses, Reconstruction Finance Corporation

[Not to exceed $9,500,000 (to be computed on an accrual basis) of the funds of the Reconstruction Finance Corporation shall be available during the current fiscal year for its administrative expenses, including purchase (not to exceed eight for replacement only) and hire of passenger motor vehicles; and use of the services and facilities of the Federal Reserve banks: *Provided*, That as used herein the term "administrative expenses" shall be construed to include all salaries and wages, services performed on a contract or fee basis, and travel and other expenses, including the purchase of equipment and supplies, of administrative offices: *Provided further*, That the limiting amount heretofore stated for administrative expenses shall be increased by an amount which does not exceed the aggregate cost of salaries, wages, travel, and other expenses of persons employed outside the continental United States; the expenses of services performed on a contract or fee basis in connection with termination of contracts or in the performance of legal services; and all administrative expenses reimbursable from other Government agencies: *Provided further*, That the distribution of administrative expenses to the accounts of the Corporation shall be made in accordance with generally recognized accounting principles and practices.] (*Supplemental Appropriation Act, 1954.*)

NOTE.—These schedules exclude $7,100,000 of the limitation on administrative expenses in 1954, which is set forth under Office of the Secretary, Treasury Department.

Loans	10.8	34.8
Commitments	8.7	17.5

PURPOSE AND FINANCIAL ORGANIZATION

This fund finances the lending activities of the Small Business Administration under which loans are made to small business and to victims of floods or other catastrophes. Appropriations up to $175,000,000 are authorized to provide working capital, and loans outstanding may not exceed $150,000,000 for small business loans and $25,000,000 for disaster loans. In the fiscal year 1954 Congress appropriated $55,000,000 for these purposes.

ANALYSIS OF BUDGET PROGRAMS

The responsibility of the Small Business Administration with respect to lending did not begin until September 29, 1953, when the lending authority of the Reconstruction Finance Corporation expired.

It is estimated that approximately 700 small business loans amounting to $35,000,000 will be authorized in fiscal year 1955 as compared to 350 and $17,500,000 in 1954. In addition it is anticipated that approximately 500 loans, amounting to $2,500,000 will be made in 1955 as a result of floods or catastrophes, or the same number and amount as in 1954. Every effort will be made to encourage small business to seek financing in the local community rather than through the facilities of the Federal Government.

PUBLIC ENTERPRISE FUNDS—Continued

SMALL BUSINESS ADMINISTRATION—Continued

[REVOLVING FUND]—continued

Revolving Fund, Small Business Administration—Continued

ADMINISTRATIVE EXPENSES

Administrative expenses are estimated at $1,556,800 for 1954, and $1,650,000 for a full year's operation in 1955.

FINANCING OPERATIONS

Of the $55,000,000 appropriated for working capital, $12,336,847 will be drawn down in 1954 and $25,056,605 in 1955.

OPERATING RESULTS

A net loss of $1,485,297 is estimated for 1954 and $904,566 for 1955. Losses will continue to decline in future years as interest income increases.

FINANCIAL CONDITION

At the end of fiscal year 1955, it is estimated loans receivable will be $34,841,546, as compared with $10,803,759 at the end of fiscal year 1954.

Undisbursed commitments on loans are estimated to amount to $17,500,000 on June 30, 1955, as compared to $8,750,000 on June 30, 1954.

LENDING AUTHORITY

Although $175,000,000 authority outstanding at any one time has been authorized for business and disaster loans, Congress appropriated $55,000,000 in fiscal year 1954. On the basis of the anticipated loans to be authorized, it is estimated that no further appropriations will be required for this purpose through fiscal year 1955.

REVOLVING FUND, SMALL DEFENSE PLANTS ADMINISTRATION

Revolving Fund, Small Defense Plants Administration

The Revolving Fund authorized by paragraph (2) of subsection (a) of section 714 of the Defense Production Act of 1950, as amended, shall remain available during the fiscal year [1954] *1955* for payment of obligations and direct costs under contracts entered into during the fiscal year 1953. (*50 U. S. C. 2163a, as amended; Supplemental Appropriation Act, 1954.*)

BUDGETARY AUTHORIZATION SCHEDULES

AMOUNTS AVAILABLE FOR OBLIGATION

Appropriation or estimate (obligations incurred)—1953, $1,500,000.

ANALYSIS OF EXPENDITURES

Obligations incurred during the year (total expenditures out of current authorizations paid into revolving fund)—1953, $1,500,000.

BUSINESS-TYPE STATEMENTS

This fund was created to finance the taking of prime contracts by the Small Defense Plants Administration from other Government agencies and subcontracting the work to small manufacturers. Reimbursement to the fund is made upon delivery of the completed work to the contracting agency (50 U. S. C. 2163a, as amended).

Appropriations not in excess of $50,000,000 were authorized to provide working capital. In 1953 the present capital of $1,500,000 was appropriated.

Although the Small Defense Plants Administration's statutory authorities expired on July 31, 1953 (pursuant to Public Law 95, 83d Cong.), the authority to use the fund was continued during fiscal year 1954 to permit the orderly liquidation by the Small Business Administration of contracts entered into during fiscal year 1953.

Seven prime contracts totaling $2,315,170 were taken and subcontracted for during fiscal year 1953. During the fiscal year 1954, six of the subcontractors involved will have met their contract requirements or will have indicated their inability to do so. The seventh subcontractor will complete his deliveries early in the fiscal year 1955.

A. *Statement of sources and application of funds*

	1953 actual	1954 estimate	1955 estimate
FUNDS APPLIED			
To operations:			
Acquisition of assets: Financing of subcontractors	$1,023,273	$838,030	
Expenses:			
Contractual cost of goods sold	712,610	1,822,817	$55,770
Administrative expenses	19,433	35,000	
Increase in selected working capital	64,515		
Total applied to operations	1,819,831	2,695,847	55,770
To financing: Increase in Treasury cash	992,200	296,392	51,499

TENNESSEE VALLEY AUTHORITY—Continued

Payment to Tennessee Valley Authority Fund—Continued

for the maintenance or operation of any aircraft for passenger service that is not specifically confined to the active operation of the official business of the Tennessee Valley Authority by officers or employees of such Authority, and not to exceed [$773,000] *$673,000* (exclusive of travel for work in connection with the construction of transmission lines, dams, and steam plants) of funds available to the Tennessee Valley Authority shall be used for expenses of travel: *Provided further,* That no part of funds available for expenditure by this agency shall be used, directly or indirectly, to acquire a building for use as an administrative office of the Tennessee Valley Authority unless and until the Director of the Bureau of the Budget, following a study of the advisability of the proposed acquisition, shall advise the Committees on Appropriations of the Senate and the House of Representatives and the Tennessee Valley Authority that the acquisition has his approval: *Provided further, That there shall be available for resource development activities pursuant to the Tennessee Valley Authority Act of 1933, as amended, not to exceed $1,200,000, of which $600,000 shall be derived from this appropriation and $600,000 shall be derived from proceeds of operations of the Tennessee Valley Authority.*

[Resource development: For resource development activities pursuant to the Tennessee Valley Authority Act of 1933, as amended, $850,000, of which $675,000 shall be from proceeds derived from the operations of the Tennessee Valley Authority.]

[REDUCTION IN APPROPRIATION]

[The sum of $66,000 heretofore appropriated for construction of a combination fertilizer facility is hereby carried to the surplus fund and covered into the Treasury immediately upon the approval of this Act.] (*Second Independent Offices Appropriation Act, 1954.*)

Appropriated 1954, **$188,546,000** Estimate 1955, **$141,800,000**

BUDGETARY AUTHORIZATION SCHEDULES

AMOUNTS AVAILABLE FOR OBLIGATION

Appropriation or estimate (obligations incurred)—1953, $336,027,000; 1954, $188,546,000; 1955, $141,800,000.

ANALYSIS OF EXPENDITURES

Obligations incurred during year (total expenditures out of current authorizations—paid into revolving fund)—1953, $336,027,000; 1954, $188,546,000; 1955, $141,800,000.

Tennessee Valley Authority Fund

BUSINESS-TYPE STATEMENTS

PURPOSE AND FINANCIAL ORGANIZATION

The Tennessee Valley Authority is a wholly owned Government corporation whose primary purposes are to develop the Tennessee River system for navigation, flood control, and power; to provide munitions for national defense; to develop new and improved fertilizers; and to further the development of the Tennessee Valley's agricultural, forestry, industrial, and other resources.

TVA's programs are financed by appropriations and by proceeds from its operations, principally the sale of power and fertilizer materials. Appropriations cover expenses of navigation and flood control operations, research on fertilizer and munitions, resource development activities, and most capital plant additions. Proceeds (referred to in the financial statements as corporate funds) are used in conducting the business of generating, transmitting, and distributing electric energy, including related reservoir operating expenses; and in manufacturing and distributing fertilizer and fertilizer ingredients; appropriation language for fiscal years 1954 and 1955 provides for use of corporate funds in financing part of resource development activities. Section 26 of the TVA Act, as amended, provides for payment into the Treasury of the United States of such proceeds as in the opinion of the TVA Board are not required for these purposes.

ANALYSIS OF BUDGET PROGRAMS

TVA activities are grouped into four major programs (1) navigation, flood control, and power program; (2) fertilizer and munitions program; (3) resource development program; and (4) general service activities. Each of these activities is related to each of the others in both planning and execution, and is conducted to enable the people of the Tennessee Valley to make full and effective use of the area's resources by methods which encourage the enterprise of individual farmers and businessmen, and which strengthen their State and local institutions and agencies.

As shown in statement A following this narrative, the 1955 program would be financed by $141,800,000 of appropriated funds; $227,708,000 provided by operations, principally from the sale of power and fertilizer products; and a $125,172,000 decrease in Treasury cash. The total of $494,680,000 to be applied under the 1955 program consists of $293,805,000 for acquisition of assets, $137,509,000 for operating expenses, $8,194,000 for increases in inventories and other working capital items, and $55,172,000 for retirement of borrowings and payments to the Treasury.

NAVIGATION, FLOOD CONTROL, AND POWER PROGRAM

A major objective of the TVA Act is the unified development and use of the Tennessee River system for navigation, flood control, and power. As of June 30, 1953, the total investment in facilities serving these purposes was $1,113,915,546, and was allocated as follows: navigation, $140,826,003; flood control, $169,608,457; and power, $803,481,086. Principal components are a system of 25 major dams, 23 major hydroelectric generating stations, 10 navigation locks, 9 major fuel-electric generating stations, and a power transmission network of more than 9,000 circuit-miles.

Acquisition of assets.—Expenditures in 1955 for assets serving navigation, flood control, and power are estimated at $292,537,000, of which $162,291,000 represents new obligations ($135,744,000 from appropriated funds and $26,547,000 from corporate funds) and $130,246,000 is for the liquidation of prior year obligations.

SUMMARY OF ESTIMATED OBLIGATIONS

Projects contributing to power supply:	
Continued construction of projects under way:	
Fort Patrick Henry Dam	$344, 000
Hydrogenerating units in 4 existing dams	3, 592, 000
Seven steam plants	117, 713, 000
Total	121, 649, 000
Transmission system facilities	37, 000, 000
Additions and improvements at completed projects	1, 153, 000
Navigation facilities	234, 000
Investigations for future projects	276, 000
Distribution of administrative and general expenses	1, 979, 000
Total	162, 291, 000

Projects now under construction will increase the rated generating capacity of the TVA system, including plants of the Aluminum Co. of America and Cumberland Basin plants of the Department of the Army, from 5,103,000 kilowatts at June 30, 1953, to 9,984,000 kilowatts by December 1957. After allowing for such factors as machine outages and the effects of drawdown of storage reservoirs, the system could carry a load of about 9,500,000 kilowatts. Substantial increases in municipal and cooperative loads will bring the total power demands at that time to an estimated 9,500,000 kilowatts. This demand estimate assumes no new or increased Federal loads and it further assumes a reduction by the fall of 1957 in the Atomic Energy Commission contract requirements from

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

TVA of at least 500,000 kilowatts which are expected to be furnished from other sources.

The estimate of $37,000,000 for transmission facilities consists of $12,000,000 to be financed from appropriated funds and $25,000,000 from corporate funds.

Two major items are included in the estimate of $1,153,000 for additions and improvements at completed projects. An estimate of $345,000 for malaria control construction provides for completion of permanent shoreline improvement work in Kentucky Reservoir and a substantial part of unfinished work on Wheeler Reservoir. An estimate of $222,000 provides for completion of work on the operating mechanisms of 52 spillway gates at Wilson Dam.

The $234,000 estimate for navigation facilities includes funds for continued design work on a new navigation lock at Wilson Dam. The Wilson locks, designed 35 years ago, are outmoded and of substandard size—constituting the worst bottleneck on the Tennessee River.

The estimate for investigations for future projects provides for the orderly planning of additional power and multipurpose facilities in the Tennessee Valley.

Navigation operations.—Improvements on the Tennessee River system provide a modern 9-foot channel from the mouth of the river to Knoxville, Tenn., a distance of 650 miles. The Tennessee Valley is thereby linked with the 7,000-mile deep-draft inland waterways system extending from the Great Lakes to the Gulf of Mexico. The public is making increased use of the navigation channel. In 1933 freight movements on the Tennessee amounted to only 32,600,000 ton-miles, most of it the short haul of local products. In calendar year 1952 this ton-mile figure had increased twenty-four-fold. Direct savings in transportation costs to shippers in 1952 are estimated at $10,000,000.

TVA's job in navigation consists of (1) providing physical facilities adequate to the needs of modern commerce; (2) encouraging and assisting private interests in making an orderly development of terminal facilities and barge line services; and (3) working with shippers, carriers, and others to supply data on the availability and economy of Tennessee River transportation and to coordinate water transportation with other means of transport.

As shown in statement B, the net expense of navigation operations was $2,619,342 in 1953 and is estimated at $2,820,000 in 1954 and $2,809,000 in 1955.

Flood control operations.—The dams on the Tennessee River and its tributaries provide 11,883,000 acre-feet of storage for flood control at the beginning of the flood season. The system of dams has on 15 occasions reduced flood crests at the city of Chattanooga, which presents one of the valley's major flood problems, saving over $45,000,000 in flood damage at this city alone. Communities and agricultural land below the mouth of the Tennessee on the lower Ohio and Mississippi Rivers are also benefited. The TVA system, when high flows occur in the Tennessee River, is able to reduce flood heights at Cairo, Ill., from 2 to 4 feet.

As a supplement to the operation of its system of reservoirs for flood control, TVA's work includes collection and analysis of flood data; studies to improve operations of the existing system; studies of potential flood control projects; and technical advice and assistance to State and local agencies to encourage their assumption of responsibility for solution of local urban and rural flood control problems.

As shown in statement B, the net expense of flood control operations was $2,253,028 in fiscal year 1953 and is estimated at $2,518,000 in 1954 and $2,538,000 in 1955.

Power operations.—The TVA power operations are confined to generation and transmission of power and sales at wholesale to local distribution systems and to certain industries and Government agencies requiring large amounts of power. Power is distributed by 150 local agencies to about 1,300,000 ultimate consumers. As of June 30, 1953, the installed capacity of the system was 5,102,985 kilowatts, including plants of the Army and the Aluminum Co. of America operated as a part of the TVA system. Total system input in fiscal year 1953 was nearly 27,350,000,000 kilowatt-hours and is estimated at about 34,500,000,000 kilowatt-hours for 1954 and about 50,600,000,000 kilowatt-hours for 1955.

Net income from power operations (before interest charges) was $19,301,471 in 1953 and is estimated at $30,495,000 for 1954 and $56,552,000 for 1955. The return on power investment in 1953 of 2.7 percent was below normal because of record low streamflow during the year. A return of about 3.5 percent is expected in 1954, reflecting low reservoir levels at the beginning of the year and continued drought. In 1955, assuming average streamflow conditions, the return on the investment is expected to be approximately 4½ percent, above the average experienced over the 20 years of TVA's power operations. Dry-year conditions would reduce substantially the amount of net income which would be realized.

FERTILIZER AND MUNITIONS PROGRAM

Chemical laboratories at Wilson Dam, Ala., and production facilities at Wilson Dam, Ala., and Columbia, Tenn., form a center of research for the development of new or improved fertilizers and processes for their manufacture. Use of the facilities for national defense takes precedence over other uses.

Acquisition of assets.—The estimate of $782,000 provides for prospecting and acquisition of phosphate lands and for construction work necessary to complete process developments under way and permit continued operation of present facilities.

Fertilizer and munitions development.—Appropriated fund expense in 1955 is estimated at $2,368,000 and covers the cost of research on products and processes, basic agronomic research, and farm test-demonstrations. Corporate fund expense (the cost of manufacturing and distributing fertilizer and munitions) is estimated at $16,743,000. Income from the sale of fertilizer and munitions is estimated at $22,204,000. After provision for depreciation, total expense is estimated at $20,669,000 and net income at $1,535,000.

Research on products and processes consists of (1) exploratory tests, background research, and applied research at the laboratory level; and (2) process development. The latter includes technical and economic evaluation of research results; development of unit operations; design, construction, and operation of pilot plants; improvement of design features and operating procedures of demonstration or large-scale plants; and preparation of engineering and economic studies to facilitate application of the findings by other agencies and industries. Knowledge gained in fertilizer research is applied also to the related field of munitions. Continued attention will be given to processes for the manufacture of high-analysis combination fertilizers and to other processes that do not require scarce sulfuric acid. Expenditures for these activities in 1955 are estimated at $1,315,000.

The 1955 estimate of $241,000 for basic agronomic research covers laboratory, greenhouse, plot, and field tests to determine under controlled conditions the relative

PUBLIC ENTERPRISE FUNDS—Continued

TENNESSEE VALLEY AUTHORITY—Continued

Tennessee Valley Authority Fund—Continued

efficiency of TVA fertilizers. This work is carried out in cooperation with State experiment stations in the 7 valley States and 4 other States.

Estimated direct cost of fertilizer production and distribution is $16,047,000 for 1955, compared to the 1954 estimate of $16,634,000. Income is estimated at $21,508,000 in 1955 and $21,340,000 in 1954. TVA builds and operates large-scale manufacturing units to serve one or more of the following purposes: (1) To demonstrate the technical and commercial feasibility of a new or improved fertilizer process and to encourage its adoption by industry; (2) to supply fertilizers for test-demonstration use on practical farms; (3) to produce new fertilizers in quantities sufficient for widespread introduction to farmers; (4) to produce fertilizers needed to aid the achievement of improved systems of fertilization and of national agricultural production goals; and (5) to supply munitions materials for national defense. Fertilizers produced in excess of amounts required for farm test-demonstrations and other TVA programs are sold to farmers through cooperative and industry distributors for uses designed to improve systems of fertilization. The distributors furnish TVA data concerning fertilizer distribution costs and farmer acceptance. Estimated fertilizer production in 1955 is as follows: Concentrated superphosphate (48 percent P_2O_5), 101,000 tons; calcium metaphosphate (61 percent P_2O_5), 65,000 tons; fused tricalcium phosphate (27 percent P_2O_5), 40,000 tons; and ammonium nitrate (33.5 percent N), 167,000 tons.

Farm test-demonstrations will be conducted in 21 States in 1955 with an estimated 2,656 farms participating. Expense is estimated at $1,101,000 ($405,000 from appropriated funds and $696,000 from corporate funds). Income from farmer payments for fertilizer is estimated at $696,000. Major objectives of the program are introduction to farmers of TVA's experimental fertilizers and demonstration of their effective uses. Another objective relating specifically to the Tennessee Valley is the improvement of agriculture, forestry, and watershed-streamflow relationships.

RESOURCE DEVELOPMENT PROGRAM

The 1955 estimate for resource development is $1,200,000 ($600,000 from appropriated funds and an equal amount from corporate funds). The 1954 appropriation act reduced the funds available for this program to about one-half the actual expenditures in 1953. Measures are being taken to accelerate the development of more State and local responsibility and financing in this field.

The estimate of $127,000 for agricultural resource development provides for securing background information about the agriculture of the region so that the less obvious problems can be identified and appropriate solutions developed. Research and demonstrations are carried out cooperatively on a few of the more urgent agricultural problems peculiar to the region in order to stimulate the efforts of other agencies on them.

The aim of the forest resource development program is to aid the States, counties, landowners, and the timber industry in developing full production and use of the valley's forest resource consistent with the needs of watershed protection. The 1955 estimate of $450,000 provides for research and demonstrations in forest management, reforestation, forest protection, and wood utilization.

The major purpose of TVA's participation in a program of tributary watershed development is to assist in finding and demonstrating ways in which State and local agencies and private groups can work together to solve the problems of resource development in small tributary watersheds. The 1955 estimate of $443,000 provides for research on the effects of changes in land use on the quality and behavior of water in the streams; continuation of demonstrations in the Chestuee and Beech River watersheds; and exploratory work in other watersheds.

Topographic mapping expenditures are estimated at $60,000 for 1955. A substantial portion of the time of TVA's mapping organization is being devoted to reimbursable mapping for the Department of the Army.

The 1955 estimate for general studies and resource development investigations is $120,000. These activities provide data on social and economic trends in the region and on State and local government policies, capacities, and organization. This information is necessary in planning resource development programs and in working with State and local agencies on resource problems.

GENERAL SERVICE ACTIVITIES

Acquisition of assets.—An estimate of $423,000 for general facilities covers replacement of transportation, office, and other equipment used generally throughout TVA activities. A substantial portion of the estimate is for replacement of trucks and other heavy mobile equipment.

Reimbursable services.—The 1955 estimate of $2,781,000 covers services furnished at the request and expense of other agencies. Major items included are operation for the Army of a classified defense facility and mapping services for the Army and the United States Geological Survey.

ADMINISTRATIVE AND GENERAL EXPENSES

Administrative and general expenses as recorded and reported by TVA are those expenses which are common to all of TVA's organizations and functions. They consist primarily of costs of administration and management services which have been centralized in the interest of economy and convenience. These expenses are distributed to the various programs and projects and are included in the program estimates shown on statement A. A summary of the expenses and the distribution are shown in schedule B–5. The 1955 estimate is $4,259,000, the same as the estimate for 1954.

FINANCING OPERATIONS

Funds applied to financing.—Payments to the Treasury scheduled for 1955 include $15,000,000 for retirement of bonds held by the Treasury which have been invested in the power program, an additional payment of $35,000,000 against the investment in the power program, and $5,172,000 from miscellaneous receipts originating in programs other than power.

As of June 30, 1953, interest-bearing bonds sold to and held by Treasury amounted to $34,000,000. After a repayment of $5,000,000 on July 1, 1953, and budgeted repayments of $15,000,000 in 1955, the balance outstanding as of June 30, 1955, will be $14,000,000.

Payment of interest on power investment.—In order to carry out the power policy of the Administration of requiring an interest charge on the Federal investment in power facilities a proposal is being developed for submission to the Congress to provide that an adequate rate of interest be paid to reimburse the Treasury for the cost of money invested in power facilities of TVA. For this purpose a study is being undertaken jointly with the

Federal Reserve Bank of St. Louis

agency and other agencies of the executive branch of the problems involved in its effectuation.

Repayment of investment in power facilities.—Schedule C–1, "Repayment of investment in power program," summarizes the status of repayments of the Treasury's investment in power program assets under the provisions of title II of the Government Corporations Appropriation Act, 1948. Repayments of power investment through June 30, 1955, will total $127,500,000, or about 45 percent ahead of the 40-year schedule required under the 1948 law. This repayment would be affected by any final determinations reached requiring the payment of interest on power investment.

Funds provided by financing.—The 1955 estimate of $266,972,000 consists of the requested appropriation of $141,800,000 and a decrease in Treasury cash of $125,172,000 which results primarily from the liquidation of commitments incurred in prior years.

OPERATING RESULTS AND RETAINED EARNINGS

Statement B summarizes the estimated income and expenses of the various TVA programs. The major source of revenue is power operations for which income in 1955 is estimated at $200,312,000, an increase of $65,392,000 over 1954. Power expenses are estimated at $144,376,000 in 1955, compared to $105,132,000 in 1954. Net power income is estimated at $55,936,000 in 1955, compared to $29,788,000 in 1954. Cumulative net income from power operations is estimated at $311,497,288 through the end of 1955. The estimated net expense of other programs in 1955 is $5,086,000 and the cumulative net expense through the end of 1955 is estimated at $157,777,596.

ANALYSIS OF RETAINED EARNINGS

[Net income from power operations, less net expense of other programs]

	1953 actual		1954 estimate		1955 estimate	
Balance at beginning of year:						
Net income from power operations	$207,146,574		$225,773,288		$255,561,288	
Net expense of other programs	139,883,634		146,888,596		152,691,596	
Total		$67,262,940		$78,884,692		$102,869,692
Net income or expense (−) for the year:						
Power operations	18,626,714		29,788,000		55,936,000	
Navigation operations	−2,619,342		−2,820,000		−2,809,000	
Flood control operations	−2,253,028		−2,518,000		−2,538,000	
Fertilizer and munitions development	79,409		794,000		1,535,000	
Resource development	−2,216,760		−1,262,000		−1,276,000	
Other programs	4,759		3,000		2,000	
Total		11,621,752		23,985,000		50,850,000
Balance at end of year:						
Net income from power operations	225,773,288		255,561,288		311,497,288	
Net expense of other programs	146,888,596		152,691,596		157,777,596	
Total retained earnings		78,884,692		102,869,692		153,719,692

Total non-interest-bearing investment	1,319,667,943	1,653,114,398	1,845,920,421	1,998,416,421
Total investment of U. S. Government	1,358,667,943	1,687,114,398	1,874,920,421	2,012,416,421
Total liabilities and investment of U. S. Government	1,410,313,952	1,741,778,441	1,940,710,383	2,077,957,383

NOTE.—Excludes contingent liability against appropriated funds for undelivered orders as follows: June 30, 1952, $102,632,377; 1953, $247,164,671; 1954, $223,564,671; 1955, $93,293,671. Selected working capital (other than cash with Treasury) included above is as follows: June 30, 1952, —$64,874,948; 1953, —$58,413,679; 1954, —$63,077,679; 1955, —$54,883,679.

[1] This includes the Federal investment in power facilities for which a proposal is being developed for submission to the Congress to provide that an adequate rate of interest be paid to reimburse the Treasury for the cost of money invested in these facilities.

SCHEDULE A–1. *Accrued expenditures by objects*

Object classification	1953 actual	1954 estimate	1955 estimate
Total number of permanent positions	13,469	13,755	14,092
Full-time equivalent of all other positions	8,954	11,654	9,704
Average number of all employees	20,244	24,293	22,782
Average salaries and grades:			
Grades established by the Board of Directors:			
Average salary	$4,648	$4,731	$4,829
Average grade	TVA–4.3	TVA–4.3	TVA–4.3
Ungraded positions: Average salary	$3,841	$4,032	$4,179
01 Personal services:			
Permanent positions	$48,997,775	$56,762,535	$59,935,135
Other positions	50,061,593	63,518,561	52,074,098
Regular pay in excess of 52-week base	201,695	219,275	228,965
Payment above basic rates	4,725,690	4,578,227	4,239,710
Excess of annual leave earned over leave taken	654,380		
Total personal services	104,641,133	125,078,598	116,477,908
02 Travel	1,342,319	1,377,462	1,320,831
03 Transportation of things	12,695,620	17,461,144	24,749,812
04 Communication services	703,309	763,674	767,829
05 Rents and utility services	$1,639,724	$1,612,752	$1,488,634
06 Printing and reproduction	77,448	90,125	71,856
07 Other contractual services	23,467,439	26,128,757	13,837,254
Services performed by other agencies	3,391,521	6,649,300	5,178,300
08 Supplies and materials	62,787,328	80,134,000	92,112,739
09 Equipment	238,436,967	83,426,502	52,157,992
10 Lands and structures	2,173,970	2,129,800	855,100
11 Grants, subsidies, and contributions	7,142,920	7,818,808	8,309,874
13 Refunds, awards, and indemnities	258,470	116,700	102,200
14 Interest	674,969	707,000	616,000
15 Taxes and assessments	568,406	772,740	643,671
Subtotal	460,001,543	354,267,362	318,690,000
Deduct allocated working fund obligations	1,926,895	6,803,000	9,574,000
Obligations incurred	458,074,648	347,464,362	309,116,000
Deduct:			
Change in unliquidated obligations	144,541,912		
Change in inventories and property transfers	4,341,609	5,248,000	8,073,000
Add change in unliquidated obligations		23,600,000	130,271,000
Total accrued expenditures	309,191,127	365,816,362	431,314,000

Rents and other revenues	572,097		608,000		619,000	
Total operating revenues, exclusive of interdivisional sales and rents		$102,534,063		$134,438,000		$199,959,000
Incidental income from recovery of operating expenses:						
Interchange power	2,116,440		127,000			
Sales promotion	130,134		128,000		130,000	
Other	216,031		212,000		208,000	
Subtotal	2,462,605		467,000		338,000	
Interest from long-term receivables	7,362		15,000		15,000	
Total incidental income[1]		2,469,967		482,000		353,000
Total income		105,004,030		134,920,000		200,312,000
Expenses:						
Production:						
Generation	37,154,362		54,181,000		85,918,000	
Purchased power	5,856,721		2,404,000		1,556,000	
Interchange power received	9,940,468		7,894,000		5,118,000	
Total production expense	52,951,551		64,479,000		92,592,000	
Transmission	6,775,385		7,259,000		7,640,000	
Customers' accounting and collecting	107,719		122,000		131,000	
Sales promotion	548,246		635,000		639,000	
Payments in lieu of taxes	3,418,110		3,577,000		4,092,000	
General operating expense	3,696,679		4,383,000		4,665,000	
Interest on funded debt	674,757		707,000		616,000	
Other expense	116,385		130,000		135,000	
Total operating and interest expense	68,288,832		81,292,000		110,510,000	
Less interdivisional sales and rents[2]	2,343,807		2,390,000		2,480,000	
Total direct expenses	65,945,025		78,902,000		108,030,000	
Distribution of administrative and general expenses (schedule B–5)	1,018,319		1,160,000		1,275,000	
Total	66,963,344		80,062,000		109,305,000	
Allocated from multipurpose reservoir operations	1,329,464		1,549,000		1,573,000	
Total expenses before depreciation	68,292,808		81,611,000		110,878,000	
Depreciation on power facilities	16,766,948		22,303,000		32,280,000	
Amortization of electric plant acquisition adjustments	174,321					
Depreciation allocated from multipurpose reservoir operations	1,143,239		1,218,000		1,218,000	
Total expenses		86,377,316		105,132,000		144,376,000
Net income from power operations		18,626,714		29,788,000		55,936,000

NOTE.—In accordance with the uniform system of accounts prescribed by the Federal Power Commission, TVA's published financial statements reflect these items as follows:

[1] Incidental income is deducted from the appropriate operating expense.

[2] Interdivisional sales and rents are included in operating revenues. These departures are made herein for clarity of presentation for budgetary purposes.

Statement of proposed obligations for purchase and hire of passenger motor vehicles for the fiscal year 1955

TENNESSEE VALLEY AUTHORITY

Appropriation	Motor vehicles to be purchased		Old vehicles to be exchanged		Net cost of vehicles to be purchased	Old vehicles still to be used	Cost of hire of motor vehicles	Users and public purpose
	Number	Gross cost	Number	Allowance (estimated)				
Tennessee Valley Authority fund	211	$295,000	211	$125,000	$170,000	634	$33,000	The Tennessee Valley Authority program is conducted in an area of more than 80,000 square miles, with many installations at isolated points. Travel by automobile is very frequently more economical than common carrier and sometimes the only available method of transportation. Tennessee Valley Authority's 845 units are pooled in one fleet and are issued to employees as requested. About 345 units will be used in power operations, maintenance, and transmission construction activities; 200 units in dam and steam plant construction at isolated sites not served by common carrier; 100 units in reservoir operations; and 200 units in forestry, fertilizer, agricultural, administrative, and miscellaneous activities.

Statement of proposed obligations for purchase, maintenance, and operation of aircraft for the fiscal year 1955

TENNESSEE VALLEY AUTHORITY

Appropriation	Aircraft to be purchased		Aircraft to be exchanged		Net cost of aircraft to be purchased	Old aircraft still to be used	Cost of maintenance and operation of aircraft	Users and public purpose
	Number	Gross cost	Number	Allowance (estimated)				
Tennessee Valley Authority fund	1	$45,000	----------	----------	$45,000	8	$160,000	5 helicopters will be used for transmission line patrol, malaria control spraying, reconnaissance, aerial inventories, and air sampling in the vicinity of TVA steam plants for air pollution tests; 2 fixed wing planes will be used for malaria control spraying, emergency transmission line troubleshooting, and reservoir aerial inspection; 1 plane will be used principally for photography and reconnaissance with some use for emergency passenger service; 1 plane will be used principally for the transportation of engineers to widely scattered project and for the transportation of administrative officers on officia business.

VETERANS ADMINISTRATION

[Submitted under the Government Corporations Control Act]

Canteen Service Revolving Fund, Veterans Administration

BUSINESS-TYPE STATEMENTS

PROGRAM AND PERFORMANCE

The Veterans Canteen Service furnishes merchandise and services for the comfort and well-being of veterans in hospitals and homes of the Administration. The Congress has appropriated a total of $4,965,000 to be administered as a revolving fund for the operation of the Veterans Canteen Service. Funds in excess of the needs of the service, totaling $2,708,485, have been returned to the Treasury of the United States, thereby reducing the amount of the funds appropriated to $2,256,515. Of the amount returned, $570,500 was repaid during fiscal year 1953. It is contemplated that additional funds in the amount of $319,458 will be returned to the Treasury during fiscal year 1955 (38 U. S. C. 13–13g).

Direct Loans to Veterans and Reserves, Veterans Administration

BUDGETARY AUTHORIZATION SCHEDULES

AMOUNTS AVAILABLE FOR OBLIGATION

Authorization to expend from public debt receipts: New authorizations (obligations incurred)—1953, $92,090,023; 1954, $98,000,000.

ANALYSIS OF EXPENDITURES

Obligations incurred during the year (total expenditures out of current authorizations—paid into revolving fund)—1953, $92,090,023; 1954, $98,000,000.

BUSINESS-TYPE STATEMENTS

PROGRAM AND PERFORMANCE

Loans are made to veterans, under certain conditions, to finance the purchase or construction of homes or to finance the construction or improvement of farmhouses (38 U. S. C. 694*l*, m; 12 U. S. C. 1747*l* (o)). Public Law 101, 83d Congress, extended the authority to make loans to June 30, 1954, and increased the authority to borrow from the United States Treasury to $377,977,603. Interest is payable at rates determined by the Secretary of the Treasury. Interest at 2 percent was paid during fiscal year 1953.

Proceeds of the sale of loans and repayments of loans are available for making additional loans. Expenses of appraisals and foreclosures are met from interest income. Retained earnings are expected to reach $15,147,577 by June 30, 1955.

Not later than June 30, 1955, all sums in the fund and all moneys received thereafter in repayment of loans will be deposited into the Treasury except the amount determined to be necessary for purposes of liquidation.

Administrative expenses are borne by the appropriation, "General operating expenses, Veterans Administration."

WORKLOAD, AVERAGE LOAN, AND TOTAL COST

	1953 actual	1954 estimate	1955 estimate
Number of loans	12,435	13,637	9,706
Average per loan	$7,134	$7,391	$7,476
Total loans	88,713,294	100,792,000	72,560,000
Repayment of loans	9,089,618	12,603,000	15,000,000
Sale of loans	4,864,362	2,000,000	6,000,000
Writeoffs of loans	3,143	12,000	15,000

Service-Disabled Veterans Insurance Fund

BUDGETARY AUTHORIZATION SCHEDULES

[For an additional amount for "Service Disabled Veterans Insurance Fund", $1,000,000, to be derived by transfer from the appropriation "Readjustment Benefits", and to remain available until expended.] (*38 U. S. C. 821; Supplemental Appropriation Act, 1954.*)

Appropriated 1954, **$0**
Appropriated (adjusted) 1954, **$1,000,000**

AMOUNTS AVAILABLE FOR OBLIGATION

Transferred from "Readjustment benefits, Veterans Administration," pursuant to 67 Stat. 428, (adjusted appropriation or estimate, obligations incurred)—1954, $1,000,000.

ANALYSIS OF EXPENDITURES

Obligations incurred during the year (total expenditures out of current authorizations—paid into the revolving fund)—1954, $1,000,000.

BUSINESS-TYPE STATEMENTS

PROGRAM AND PERFORMANCE

Veterans with disabilities that make them ineligible for commercial insurance, may obtain Government insurance under this fund if application is made within 1 year after the service connection of the disability is determined (38 U. S. C. 821). No dividends are paid on this insurance. The fund receives premiums and pays death claims on such insurance. Administrative expenses are borne by the appropriation "General operating expenses, Veterans Administration." The principal of the fund consists of an appropriation of $1,250,000. The accumulated deficit will increase from $107,180 as of June 30, 1953, to $1,175,180 as of June 30, 1955.

Soldiers' and Sailors' Civil Relief, Veterans Administration

PROGRAM AND PERFORMANCE

This fund is used to guarantee premiums due on commercial private life-insurance policies held by servicemen while they are in service and for 2 years after discharge. The Government guarantees the repayment of any indebtedness not liquidated by the insured himself, but any payments by the Government becomes a debt owed the Government by the insured (50 U. S. C. 510–590; App. 464). A rescission of $500,000 of the present $1,203,000 capital of the fund is proposed.

Expenses of this activity are borne by the appropriation "General operating expenses, Veterans Administration."

Veterans Special Term Insurance Fund

BUSINESS-TYPE STATEMENTS

PROGRAM AND PERFORMANCE

Veterans not covered by national service life insurance may obtain 5-year-level premium term insurance under this fund if application is made within 120 days after separation from active service (38 U. S. C. 822). No dividends will be paid on this insurance. The fund receives premiums and pays death claims. Administrative expenses are borne by the appropriation "General operating expenses, Veterans Administration." The principal of the fund consists of appropriations of $250,000. Net premium receipts are retained to pay future claims. They totaled $455,686 as of June 30, 1953, and are expected to grow to $1,802,086 by June 30, 1955. Amounts not needed in current operations are invested in United States Government securities. Interest income from the investments is available for purposes of the fund.

Vocational Rehabilitation Revolving Fund (Act of March 24, 1943)

BUSINESS-TYPE STATEMENTS

PROGRAM AND PERFORMANCE

This fund is used to make loans up to $100 to disabled veterans eligible for vocational rehabilitation who are without sufficient funds to meet their expenses (57 Stat. 43; 38 U. S. C., ch. 12 note). Repayments are used for new loans. The present capital of $1,500,000 represents net appropriations made from fiscal year 1944 through fiscal year 1950. A rescission of $400,000 of the present $1,500,000 capital of the fund will be proposed during fiscal year 1954.

Expenses for operating the fund are borne by the appropriation "General operating expenses, Veterans Administration."

Investigations, Civil Service Commission

BUSINESS-TYPE STATEMENTS

PROGRAM AND PERFORMANCE

This fund finances, on a reimbursable basis, full field security investigations performed at the request of other departments and agencies of the Government (Public Law 375, approved June 5, 1952). An appropriation of $4,000,000 was made to the fund in 1952 to provide working capital.

VETERANS ADMINISTRATION

Supply Fund, Veterans Administration

[Supply fund: For establishment of a revolving supply fund effective July 1, 1953, to be available without fiscal year limitation for all expenses necessary for the operation and maintenance of a supply system for the Veterans Administration including procurement of supplies and equipment, and personal services, the Administrator is authorized to capitalize, at fair and reasonable values as determined by him, all supplies and materials and depot stocks of equipment on hand or on order: *Provided*, That the fund shall be (1) reimbursed for the cost of all services, equipment and supplies furnished appropriations at rates determined by the Administrator on the basis of estimated or actual direct and indirect cost; (2) credited with advances from appropriations to which services or supplies are to be furnished, and all other receipts resulting from the operation of the fund including the proceeds of disposal of scrap, excess or surplus personal property of the fund, and receipts from carriers and others for loss of or damage to personal property: *Provided further*, That following the close of each fiscal year any net income after making provision for prior losses, if any, shall be covered into the Treasury of the United States as miscellaneous receipts: *Provided further*, That an adequate system of accounts for the fund shall be maintained on the accrual method and financial reports prepared on the basis of such accounts, and that an annual business type budget shall be prepared for the operations under this fund.] (*Second Independent Offices Appropriation Act, 1954.*)

PROGRAM AND PERFORMANCE

The supply fund was established pursuant to the Second Independent Offices Appropriation Act, 1954, which authorized the Administrator to capitalize all supplies and materials and depot stocks of equipment on hand and on order. The fund is used for procurement of supplies, equipment, and miscellaneous contractual services and for operation of the service and reclamation program. Administrative expenses of the depot system are charged to the appropriation "Maintenance and operation of supply depots."

GENERAL PROVISIONS

INDEPENDENT OFFICES—GENERAL PROVISIONS

SEC. 102. Where appropriations in this title are expendable for travel expenses of employees and no specific limitation has been placed thereon, the expenditures for such travel expenses may not exceed the amount set forth therefor in the budget estimates submitted for the appropriations: *Provided, That this section shall not apply to travel performed by uncompensated officials of local boards and appeal boards of the Selective Service System.*

SEC. 103. Where appropriations in this title are expendable for the purchase of newspapers and periodicals and no specific limitation has been placed thereon, the expenditures therefor under each such appropriation may not exceed the amount of $50: *Provided,* That this limitation shall not apply to the purchase of scientific, technical, trade, or traffic periodicals necessary in connection with the performance of the authorized functions of the agencies for which funds are herein provided.

SEC. 104. No part of any appropriation contained in this title shall be available to pay the salary of any person filling a position, other than a temporary position, formerly held by an employee who has left to enter the Armed Forces of the United States and has satisfactorily completed his period of active military or naval service and has within ninety days after his release from such service or from hospitalization continuing after discharge for a period of not more than one year made application for restoration to his former position and has been certified by the Civil Service Commission as still qualified to perform the duties of his former position and has not been restored thereto.

SEC. 105. Appropriations contained in this title, available for expenses of travel shall be available, when specifically authorized by the head of the activity or establishment concerned, for expenses of attendance at meetings of organizations concerned with the function or activity for which the appropriation concerned is made: *Provided,* That appropriations contained in this title shall be available for the examination of estimates of appropriations and activities in the field without regard to limitations on travel contained in such appropriations.

SEC. 106. No part of any appropriations made available by the provisions of this title shall be used for the purchase or sale of real estate or for the purpose of establishing new offices outside the

District of Columbia: *Provided*, That this limitation shall not apply to programs which have been approved by the Congress and appropriations made therefor.

SEC. 107. No part of any appropriation contained in this title shall be used to pay the compensation of any employee engaged in personnel work in excess of the number that would be provided by a ratio of one such employee to one hundred and thirty-five, or a part thereof, full-time, part-time, and intermittent employees of the agency concerned: *Provided*, That for purposes of this section employees shall be considered as engaged in personnel work if they spend half time or more in personnel administration consisting of direction and administration of the personnel program; employment, placement, and separation; job evaluation and classification; employee relations and services; training; wage administration; and processing, recording, and reporting.

SEC. 108. None of the sections under the head "Independent offices, General provisions" in this title shall apply to the Housing and Home Finance Agency *or the Tennessee Valley Authority.*

CORPORATIONS—GENERAL PROVISIONS

SEC. 202. No part of the funds of, or available for expenditure by, any corporation or agency included in this title shall be used to pay the compensation of any employee engaged in personnel work in excess of the number that would be provided by a ratio of one such employee to one hundred and thirty-five, or a part thereof, full-time, part-time, and intermittent employees of the agency concerned: *Provided*, That for purposes of this section employees shall be considered as engaged in personnel work if they spend half-time or more in personnel administration consisting of direction and administration of the personnel program; employment, placement, and separation; job evaluation and classification; employee relations and services; training; committees of expert examiners and boards of civil-service examiners; wage administration; and processing, recording, and reporting.

GENERAL PROVISIONS

SEC. 301. No part of any appropriation contained in this Act, or of the funds available for expenditure by any corporation included in this Act, shall be used to pay the salary or wages of any person who engages in a strike against the Government of the United States or who is a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or who advocates, or is a member of an organization that advocates, the overthrow of the Government of the United States by force or violence: *Provided*, That for the purposes hereof an affidavit shall be considered prima facie evidence that the person making the affidavit has not contrary to the provisions of this section engaged in a strike against the Government of the United States, is not a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or that such person does not advocate, and is not a member of an organization that advocates, the overthrow of the Government of the United States by force or violence: *Provided further*, That any person who engages in a strike against the Government of the United States or who is a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or who advocates, or who is a member of an organization that advocates, the overthrow of the Government of the United States by force or violence and accepts employment the salary or wages for which are paid from any appropriation or fund contained in this Act shall be guilty of a felony and, upon conviction, shall be fined not more than $1,000 or imprisoned for not more than one year, or both: *Provided further*, That the above penalty clause shall be in addition to, and not in substitution for, any other provisions of existing law.

SEC. 302. No part of any appropriation contained in this Act, or of the funds available for expenditure by any corporation or agency included in this Act, shall be used for publicity or propaganda purposes designed to support or defeat legislation pending before the Congress.

[SEC. 303. (a) No part of the money appropriated by this Act to any department, agency, or corporation or made available for expenditure by any department, agency, or corporation which is in excess of 75 per centum of the amount required to pay the compensation of all persons the budget estimates for personal services heretofore submitted to the Congress for the fiscal year 1954 contemplated would be employed by such department, agency, or corporation during such fiscal year in the performance of—]

[(1) functions performed by a person designated as an information specialist, information and editorial specialist, publications and information coordinator, press relations officer or counsel, photographer, radio expert, television expert, motion picture expert, or publicity expert, or designated by any similar title, or]

[(2) functions performed by persons who assist persons performing the functions described in (1) in drafting, preparing, editing, typing, duplicating, or disseminating public information publications or releases, radio or television scripts, magazine articles, photographs, motion pictures, and similar material,

shall be available to pay the compensation of persons performing the functions described in (1) or (2).]

[(b) This section shall not apply: To persons employed by the General Services Administration in the performance of functions or related assisting or supporting functions in connection with the publication of the Federal Register, or to persons engaged in functions of the Civil Service Commission related to (1) the preparation and issuance of materials relating to the recruitment of personnel for the Federal service, and (2) the compilation of the Official Register of the United States, or to any department, agency, or corporation which does not employ more than two persons at any one time in the performance of functions described in paragraphs (1) or (2) of subsection (a) of this section.] (*First Independent Offices Appropriation Act, 1954.*)

[SEC. 102. The general provisions applicable to appropriations contained in title I of the "First Independent Offices Appropriation Act, 1954", shall apply to appropriations contained in this Act, excepting the Tennessee Valley Authority: *Provided*, That the provisions of section 102 of such Act shall not apply to travel performed by uncompensated officials of local boards and appeal boards of the Selective Service System.]

[SEC. 103. No part of any appropriation contained in this Act, or of the funds available for expenditure by any corporation included in this Act, shall be used to pay the salary or wages of any person who engages in a strike against the Government of the United States or who is a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or who advocates, or is a member of an organization that advocates, the overthrow of the Government of the United States by force or violence: *Provided*, That for the purposes hereof an affidavit shall be considered prima facie evidence that the person making the affidavit has not contrary to the provisions of this section engaged in a strike against the Government of the United States, is not a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or that such person does not advocate, and is not a member of an organization that advocates, the overthrow of the Government of the United States by force or violence: *Provided further*, That any person who engages in a strike against the Government of the United States or who is a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or who advocates, or who is a member of an organization that advocates, the overthrow of the Government of the United States by force or violence and accepts employment the salary or wages for which are paid from any appropriation or fund contained in this Act shall be guilty of a felony and, upon conviction, shall be fined not more than $1,000 or imprisoned for not more than one year, or both: *Provided further*, That the above penalty clause shall be in addition to, and not in substitution for, any other provisions of existing law.]

[SEC. 104. No part or any appropriation contained in this Act, or of the funds available for expenditure by any corporation or agency included in this Act, shall be used for publicity or propaganda purposes designed to support or defeat legislation pending before the Congress.] (*Second Independent Offices Appropriation Act, 1954.*)

DEPARTMENTS, AGENCIES, AND CORPORATIONS

SEC. [1301]—. Unless otherwise specifically provided, the maximum amount allowable during the current fiscal year, in accordance with section 16 of the Act of August 2, 1946 (5 U. S. C. 78), for the purchase of any passenger motor vehicle (exclusive of busses, ambulances, and station wagons), is hereby fixed at $1,400.

SEC. [1302]—. Unless otherwise specified and during the current fiscal year, no part of any appropriation contained in this or any other Act shall be used to pay the compensation of any officer or employee of the Government of the United States (including any agency the majority of the stock of which is owned by the Government of the United States) whose post of duty is in continental United States unless such person (1) is a citizen of the United States, (2) is a person in the service of the United States on the date of enactment of this Act, who, being eligible for citizenship, had filed a declaration of intention to become a citizen of the United States prior to such date, (3) is a person who owes allegiance to the United States or (4) is an alien from the Baltic countries lawfully admitted to the United States for permanent residence: *Provided*, That for the purpose of this section, an affidavit signed by any such person shall be consid-

DEPARTMENTS, AGENCIES, AND CORPORATIONS—Continued

ered prima facie evidence that the requirements of this section with respect to his status have been complied with: *Provided further*, That any person making a false affidavit shall be guilty of a felony and, upon conviction, shall be fined not more than $4,000 or imprisoned for not more than one year, or both: *Provided further*, That the above penal clause shall be in addition to, and not in substitution for, any other provisions of existing law: *Provided further*, That any payment made to any officer or employee contrary to the provisions of this section shall be recoverable in action by the Federal Government. This section shall not apply to citizens of the Republic of the Philippines or to nationals of those countries allied with the United States in the current defense effort.

SEC. [1303] —. Appropriations of the executive departments and independent establishments for the current fiscal year, available for expenses of travel or for the expenses of the activity concerned, are hereby made available for living quarters allowances in accordance with the Act of June 26, 1930 (5 U. S. C. 118a), and regulations prescribed thereunder, and cost-of-living allowances similar to those allowed under section 901 (2) of the Foreign Service Act of 1946, in accordance with and to the extent prescribed by regulations of the President, for all civilian officers and employees of the Government permanently stationed in foreign countries: *Provided*, That the availability of appropriations made to the Department of State for carrying out the provisions of the Foreign Service Act of 1946 shall not be affected hereby.

SEC. [1304] —. No part of any appropriation for the current fiscal year contained in this or any other Act shall be paid to any person for the filling of any position for which he or she has been nominated after the Senate has voted not to approve the nomination of said person.

SEC. [1305] —. No part of any appropriation contained in this or any other Act for the current fiscal year shall be used to pay in excess of $4 per volume for the current and future volumes of the United States Code Annotated, and such volumes shall be purchased on condition and with the understanding that latest published cumulative annual pocket parts issued prior to the date of purchase shall be furnished free of charge, or in excess of $4.25 per volume for the current or future volumes of the Lifetime Federal Digest.

SEC. [1306] —. Funds made available by this or any other Act for administrative expenses in the current fiscal year of the corporations and agencies subject to the Government Corporation Control Act, as amended (31 U. S. C. 841), shall be available, in addition to objects for which such funds are otherwise available, for rent in the District of Columbia; [examination of budgets and estimates of appropriations in the field;] services in accordance with section 15 of the Act of August 2, 1946 (5 U. S. C. 55a); and the objects specified under this head, all the provisions of which shall be applicable to the expenditure of such funds unless otherwise specified in the Act by which they are made available: *Provided*, That in the event any functions budgeted as administrative expenses are subsequently transferred to or paid from other funds, the limitations on administrative expenses shall be correspondingly reduced.

SEC. [1307] —. No part of any funds of or available to any wholly owned Government corporation shall be used for the purchase or construction, or in making loans for the purchase or construction of any office building at the seat of Government primarily for occupancy by any department or agency of the United States Government or by any corporation owned by the United States Government.

SEC. [1308] —. No part of any appropriation contained in this Act, or of the funds available for expenditure by any corporation included in this Act, shall be used to pay the salary or wages of any person who engages in a strike against the Government of the United States or who is a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or who advocates, or is a member of an organization that advocates, the overthrow of the Government of the United States by force or violence: *Provided*, That for the purposes hereof an affidavit shall be considered prima facie evidence that the person making the affidavit has not contrary to the provisions of this section engaged in a strike against the Government of the United States, is not a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or that such person does not advocate, and is not a member of an organization that advocates, the overthrow of the Government of the United States by force or violence: *Provided further*, That any person who engages in a strike against the Government of the United States or who is a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or who advocates, or who is a member of an organization that advocates, the overthrow of the Government of the United States by force or violence and accepts employment the salary or wages for which are paid from any appropriation or fund contained in this or any other Act shall be guilty of a felony and, upon conviction, shall be fined not more than $1,000 or imprisoned for not more than one year, or both: *Provided further*, That the above penalty clause shall be in addition to, and not in substitution for, any other provisions of existing law.

[SEC. 1309. No payment shall be made from appropriations in this or any other Act to any officer on the retired lists of the Regular Army, Regular Navy, Regular Marine Corps, Regular Air Force, Regular Coast Guard, Coast and Geodetic Survey, and Public Health Service for a period of two years after retirement who for himself or for others is engaged in the selling of or contracting for the sale of or negotiating for the sale of to any agency of the Department of Defense, the Coast Guard, the Coast and Geodetic Survey, and the Public Health Service any supplies or war materials.]

SEC. [1310] —. During the current fiscal year, personnel and appropriations or funds available for salaries and expenses to any department, agency, or corporation in the executive branch of the Government, shall be transferred to any defense activity under the jurisdiction of such department or agency in such numbers or amounts as may be necessary for the discharge of responsibilities relating to the national defense assigned to such department, agency, or corporation by or pursuant to law.

[SEC. 1311. None of the funds provided by this Act shall be used to pay employees at a rate in excess of that paid for comparable work under the regular appropriations provided to the departments and agencies concerned in the regular 1954 appropriation Acts.]

SEC. [1312] —. During the current fiscal year, the provisions of Bureau of the Budget Circular A-45, dated June 3, 1952, shall be controlling over the activities of all departments, agencies, and corporations of the Government: *Provided*, That said circular may be amended or changed during such year by the Director of the Budget with the approval of the Chairman of the Committee on Appropriations of the House of Representatives: *Provided further*, That the Bureau of the Budget shall make a report to Congress not later than January 31, [1954] *1955*, of the operations of this order upon all departments, agencies, and corporations of the Government: *Provided further*, That, notwithstanding the provisions of any other law, no officer or employee shall be required to occupy any Government-owned quarters unless the head of the agency concerned shall determine that necessary service cannot be rendered or property of the United States cannot be adequately protected otherwise.

SEC. [1313] —. Pursuant to section 1415 of the Act of July 15, 1952 (66 Stat. 662), foreign credits (including currencies) owed to or owned by the United States may be used by Federal agencies for any purpose for which appropriations are made for the current fiscal year (including the carrying out of Acts requiring or authorizing the use of such credits), only when reimbursement therefor is made to the Treasury from the applicable appropriations of the agency concerned: *Provided*, [That such credits may be used until June 30, 1954, without reimbursement to the Treasury, for liquidation of obligations legally incurred against such credits prior to July 1, 1953: *Provided further*,] That such credits received as exchange allowances or proceeds of sales of personal property may be used in whole or part payment for acquisition of similar items, to the extent and in the manner authorized by law, without reimbursement to the Treasury: *Provided further*, That nothing in section 1415 of the Act of July 15, 1952, or in this section shall be construed to prevent the making of new or the carrying out of existing contracts, agreements, or executive agreements for periods in excess of one year, in any case where such contracts, agreements, or executive agreements for periods in excess of one year were permitted prior to the enactment of this Act under section 32 (b) (2) of the Surplus Property Act of 1944, as amended (50 U. S. C. App. 1641 (b) (2)), and the performance of all such contracts, agreements, or executive agreements shall be subject to the availability of appropriations for the purchase of credits as provided by law.

[SEC. 1314. Funds made available in this or any other Act shall hereafter be available for examination of estimates of appropriations in the field and the use of such funds for such purpose shall be subject only to regulations by the standing committees concerned.]

SEC. [1315] —. (a) During the current fiscal year, no part of any appropriation for the executive branch contained in this or any other Act, or of any funds made available for expenditure by any corporation included in this or any other Act, shall be used to pay the compensation of any civilian employee of the Government whose principal or primary duties consist of acting as chauffeur or driver of any Government-owned passenger motor vehicle (other than a bus or ambulance), unless such appropriation is specifically authorized to be used for paying the compensation of employees performing such duties. This subsection shall not apply to—

Federal Reserve Bank of St. Louis

(1) Any person employed by an agency for which appropriations of funds were made available by the Independent Offices Appropriation Act, 1953, and whose place of duty is in a foreign country

(2) Any person acting as chauffeur for—
The President of the United States
The Secretary of State
The Secretary of the Treasury
The Attorney General
The Postmaster General
The Secretary of the Interior
The Undersecretary of the Interior
The Secretary of Agriculture
The Secretary of Commerce

(3) Automobiles operated by—
The Federal Bureau of Investigation
The United States Secret Service
The Departments of State, Justice, Commerce, and Interior, outside the District of Columbia

(4) One-half of the chauffeur-driven automobiles in operation in the Departments of State, Justice, and Commerce on July 1, 1951

(5) Agencies for which appropriations or funds were made available by the Department of Defense Appropriation Act, 1953, or the Civil Functions Appropriation Act, 1953.

(6) The agencies named in subsection (b) of this section.

(b) In no event shall the number of passenger-carrying vehicles which may be operated during the current fiscal year at the seat of government under any appropriation or authorization for the Department of Labor, the Department of Health, Education and Welfare, the National Labor Relations Board, the National Mediation Board, the Railroad Retirement Board, or the Federal Mediation and Conciliation Service exceed 50 per centum of the number in use as of June 30, 1951.

[SEC. 1316. Notwithstanding the provisions of any other law, no funds shall be available in this or any other Act for the purchase of furniture by any department or agency in any branch of the Government if such requirements can reasonably be met, as determined by the Administrator of General Services, by transfer of excess furniture including rehabilitated furniture from other departments and agencies pursuant to the Federal Property and Administrative Services Act of 1949, as amended.]

[SEC. 1317. The appropriations, authorizations, and authority with respect thereto in this Act or any regular annual appropriation Act for the fiscal year 1954 which has not been enacted into law prior to July 1, 1953, shall be available from and including such date for the purposes respectively provided in such appropriations, authorizations, and authority. All obligations incurred during the period between June 30, 1953, and the date of enactment of this Act or the applicable Act in anticipation of such appropriations, authorizations, and authority are hereby ratified and confirmed if in accordance with the respective terms thereof.] *(Supplemental Appropriation Act, 1954.)*

PROPOSED FOR LATER TRANSMISSION

Salaries and expenses, Advisory Committee on Weather Control (under existing legislation, 1954).—Public Law 256, passed late in the last session of Congress, created this Committee to study and evaluate public and private experiments in weather modification. An estimated supplemental appropriation of $150,000 is included in the budget to support the Committee during the latter part of fiscal year 1954 and the entire fiscal year 1955.

ANALYSIS OF EXPENDITURES

	1953 actual	1954 estimate	1955 estimate
Proposed supplemental appropriation		$150,000	
Unliquidated obligations, start of year			$2,000
Unliquidated obligations, end of year		2,000	6,000
Expenditures are distributed as follows:			
Out of current authorizations		28,000	
Out of prior authorizations			116,000

Administrative expenses, Farm Credit Administration (under existing legislation, 1954).—Supplemental assessments of $140,000, to be collected from farm credit banks and corporations, are anticipated for 1954 to provide for the operations of the Farm Credit Administration under the Farm Credit Act of 1953 (67 Stat. 390).

ANALYSIS OF EXPENDITURES

	1953 actual	1954 estimate	1955 estimate
Proposed supplemental appropriation		$140,000	
Unliquidated obligations, start of year			$7,000
Unliquidated obligations, end of year		7,000	
Expenditures are distributed as follows:			
Out of current authorizations		133,000	
Out of prior authorizations			7,000

Arbitration and emergency boards, National Mediation Board (under existing legislation, 1954).—An additional $107,000 will be needed to finance Arbitration and Emergency Boards authorized by sections 7 and 10 of the Railway Labor Act of 1926, as amended.

ANALYSIS OF EXPENDITURES

	1953 actual	1954 estimate	1955 estimate
Proposed supplemental appropriation		$107,000	
Unliquidated obligations, start of year			$10,000
Unliquidated obligations, end of year		10,000	

ANALYSIS OF EXPENDITURES—continued

	1953 actual	1954 estimate	1955 estimate
Expenditures are distributed as follows:			
Out of current authorizations		$97,000	
Out of prior authorizations			$10,000

Salaries and expenses, The Tax Court of the United States (under existing legislation, 1954).—A supplemental appropriation is required for 1954 in the amount of $25,000 to comply with the provisions of the act of August 7, 1953, which provides for the retirement of judges of the Tax Court of the United States. The act requires the retirement of any judge who has served 10 years or more and has attained the age of 70. Under this mandatory provision, 2 of the judges will retire as of December 1, 1953, and will receive retired pay from the judges' payroll of the court.

ANALYSIS OF EXPENDITURES

	1953 actual	1954 estimate	1955 estimate
Proposed supplemental appropriation		$25,000	
Expenditures out of current authorizations		25,000	

Compensation and pensions, Veterans Administration (under existing legislation, 1954).—An amount of $215,000,000 will be required for 1954 to cover uncontrollable compensation and pension loads now anticipated.

ANALYSIS OF EXPENDITURES

	1953 actual	1954 estimate	1955 estimate
Proposed supplemental appropriation		$215,000,000	
Expenditures out of current authorizations		215,000,000	

Servicemen's indemnities, Veterans Administration (under existing legislation, 1954).—A supplemental appropriation of $3,100,000 for 1954 will be required to cover claims costs which are exceeding the original estimate.

ANALYSIS OF EXPENDITURES

GENERAL SERVICES ADMINISTRATION

SUMMARY OF EXPENDITURES AND BALANCES

	1953 actual	1954 estimate	1955 estimate
EXPENDITURES			
From new authorizations enacted or recommended in this document:			
Out of new obligational authority: Current authorizations		$159, 490, 983	$154, 055, 263
Out of appropriations to liquidate contract authorizations			32, 100, 000
Total expenditures from new authorizations enacted or recommended		159, 490, 983	186, 155, 263
Other expenditures:	$1, 108, 509, 799		
Out of balances of prior expenditure authorizations		786, 403, 602	566, 923, 980
Out of receipts and balances of revolving and management funds		[a] 6, 874, 686	79, 237
Total other expenditures		779, 528, 916	567, 003, 217
Total budget expenditures	1, 108, 509, 799	939, 019, 899	753, 158, 480
Deduct receipts of public enterprise funds	1, 671, 513	2, 833, 814	1, 618, 000
Net budget expenditures	1, 106, 838, 286	936, 186, 085	751, 540, 480
BALANCES NOT EXPENDED			
Balances of authorizations and funds ceasing to be available unless reappropriated or reauthorized for the next year	42, 329, 913	33, 461, 945	859, 205
Balances carried forward at end of year in—			
Appropriations enacted or recommended	1, 884, 165, 506	1, 100, 861, 970	535, 082, 727
Contract authorizations	104, 500, 000	74, 500, 000	42, 400, 000
Revolving and management funds	18, 446, 820	25, 159, 096	25, 838, 654
Total balances carried forward at end of year	2, 007, 112, 326	1, 200, 521, 066	603, 321, 381
Net expenditures and balances	3, 156, 280, 525	2, 170, 169, 096	1, 355, 721, 066

SUMMARY OF BALANCES CEASING TO BE AVAILABLE UNLESS REAPPROPRIATED OR REAUTHORIZED BY CONGRESS

	1953 actual	1954 estimate	1955 estimate
Balances rescinded during the year	$33, 375, 000	$30, 000, 000	
Balances expiring and lapsing and adjustment of balances downward (net)	4, 530, 317	465, 721	
Capital transfers from revolving funds to receipt accounts	4, 424, 596	2, 996, 224	$859, 205
Total balances ceasing to be available unless reappropriated or reauthorized by Congress	42, 329, 913	33, 461, 945	859, 205

[a] Deduct, excess of repayments and collections over expenditures.

CURRENT AUTHORIZATIONS

INTRODUCTORY STATEMENT

The Administration serves as the Federal Government's central agency for providing and controlling general property and records management services including provision of office and general-purpose space and related services, supplying common-use commodities and equipment, custody of archival and semipermanent records, and promotion of effective management of real property, personal property, and records. Program operations in these 3 fields of management are grouped under 3 services, Public Buildings Service, Federal Supply Service, and the National Archives and Records Service. A fourth, the Emergency Procurement Service, provides procurement and custody of a stockpile of critical materials and foreign-aid procurement. Program operations are performed mainly through 10 field offices.

Basic operations of the Administration are provided for in three "Operating expenses" appropriations, administrative support for which is provided for in an "Administrative operations" appropriation. Special and emergency programs such as construction of buildings, operation of supply warehouses, stockpiling of critical materials, and other operations are provided for in separate appropriations.

The Administration also serves by delegation from the Office of Defense Mobilization as executor of defense production expansion programs authorized by title III of the Defense Production Act which are financed by allocations of borrowing authority made available to the President. Details of the programs are shown in the "funds appropriated to the President" chapter of the budget.

Operating Expenses, Public Buildings Service, General Services Administration

Operating expenses, Public Buildings Service: For necessary expenses of real property management and related activities as provided by law; including the salary of the Commissioner of Public Buildings at the rate of $16,500 per annum so long as the position is held by the present incumbent; repair and improvement of public buildings and grounds (including furnishings and equipment) under the control of the General Services Administration; rental of buildings in the District of Columbia; restoration of leased premises; moving Government agencies in connection with the assignment, allocation, and transfer of building space; demolition of buildings; acquisition by purchase or otherwise and disposal by sale or otherwise of real estate and interests therein; and not to exceed [$184,750] *$182,000* for expenses of travel; [$98,826,070] *$115,400,000*: *Provided*, That the foregoing appropriation shall not be available to effect the moving of Government agencies from the District of Columbia into buildings acquired to accomplish the dispersal of departmental functions of the executive establishment into areas outside of but accessible to the District of Columbia: *Provided further, That this appropriation shall be available, without regard to section 322 of the Act of June 30, 1932, as amended (40 U. S. C. 278a), for the rental, repair, alteration, and improvement of buildings or parts thereof, heretofore leased under the appropriation for "Emergency operating expenses."* (*First Independent Offices Appropriation Act, 1954.*)

Appropriated 1954, **$98,826,070** Estimate 1955, [a] **$115,400,000**
Appropriated (adjusted) 1954, **$98,818,070**

[a] Includes $17,340,000 for activities previously carried under "Emergency operating expenses, General Services Administration." The amounts obligated in 1953 and 1954 are shown in the schedule as comparative transfers.

PROGRAM AND PERFORMANCE

This appropriation provides for basic operations of the Administration which deal with acquisition, operation, and utilization of general-purpose space, and the maintenance, custody, management, and disposal of real property.

Formerly, regular and emergency operations have been financed by separate appropriations. In effecting substantial over-all reductions in leased space and more efficient space utilization, the emergency operations, which have become relatively stable, no longer are readily separable from regular operations. It is proposed to consolidate financing of both programs under this appropriation for 1955.

The consolidated appropriation request for 1955 is a net decrease of $3,230,070 below comparable amounts appropriated for 1954. The net decrease results from (1) a reduction of $9,665,570, primarily for further space releases and curtailment of certain buildings management and national industrial reserve operations, and (2) increases of $4,966,674 for inclusion of buildings management services previously performed for other agencies on a reimbursable basis, $1,393,326 for renovations and improvements to buildings in the District of Columbia, and $75,500 other.

Digitized for FRASER

Federal Reserve Bank of St. Louis

1. *Buildings management.*—Provision is made for management, operation, maintenance, and protection of 107,857,000 square feet of Government-owned and leased space, including repairs of 43,810,000 square feet of Government-owned space in the District of Columbia and adjacent area; operation of joint-use communications facilities; and other related services. Continued release of rented space due to improved space utilization and reduced requirements of Federal agencies will more than offset the additional workload in 1955, resulting from (1) provision for 2,337,000 square feet of space previously managed on a basis of reimbursement from other agencies, and (2) selected renovations and improvements to buildings in the District of Columbia.

2. *Real estate utilization.*—General-purpose space is assigned and controlled and, where necessary, space is acquired by lease. Real property reported excess to the needs of Federal agencies is screened for further economical Federal use and, if not usable, is declared surplus. Future Federal building projects are investigated. Sites acquired for future construction of Federal buildings are utilized and leased pending construction, real property is appraised, and real property management practices of Federal agencies are examined and improvements prescribed. Increased space utilization analyses and surveys proposed in 1955 will cover 98 million square feet. Past experience indicates that these will save far more than the cost.

3. *National industrial reserve.*—In cooperation with the defense agencies, a reserve of Government-owned industrial plants, machine tools, and industrial equipment is maintained. The estimate for 1955 provides for protection and maintenance on 19 plants as compared with 20 in 1954 and 7,019 tons of machine tools as compared with 6,219.

4. *Surplus property management and disposal.*—Real property declared surplus to the needs of Federal agencies is sold, leased, exchanged, or otherwise disposed of. It is estimated that $27 million will be paid into the Treasury from this activity in 1955.

5. *Public utilities management.*—As a centralized function for all executive agencies, public utility equipment utilization and rate studies are made, contracts are negotiated, reviewed, and renewed, and the Government represented as a user of public utilities services before Federal and State regulatory bodies to obtain utilities service at minimum cost.

6. *Buildings design and supervision.*—All programs involving design, construction, and remodeling of buildings are centrally directed by a staff of technical personnel.

7. *Service administration.*

Direct Obligations			
1. Minor repairs and improvements	$9,186,365	$9,250,000	$9,000,000
2. Major repairs and improvements	4,007,231	5,011,762	3,000,000
3. Post-office work-space improvements		1,000,000	
Total direct obligations	13,193,596	15,261,762	12,000,000
Obligations Payable Out of Reimbursements From Other Accounts			
1. Minor repairs and improvements	190,820	200,000	200,000
Total obligations	13,384,416	15,461,762	12,200,000

PROGRAM AND PERFORMANCE

Repairs, renovations, and improvements are made to more than 5,400 federally owned buildings outside the District of Columbia which were acquired at a cost of approximately $1,000,000,000 and contain nearly 104,000,000 gross square feet of floor space.

1. *Minor repairs and improvements.*—Normal minor repairs costing less than $25,000 per project are made. Increasing age of the buildings and other factors have created an extensive backlog of needed repairs. For 1955 it is proposed to limit this program to only the most urgent work essential to safe operation and prevention of excessive deterioration.

2. *Major repairs and improvements.*—Major repairs and improvements costing more than $25,000 per project are made to selected buildings. The 1955 program provides for some 50 high-priority projects at an average cost of $60,000 each.

3. *Post office work-space improvements.*—Funds for continuing this program for which an initial $1,000,000 was provided in 1954, will be the budgetary responsibility of the Post Office Department in 1955.

PROGRAM AND PERFORMANCE

This appropriation provides for basic operations of the Administration for the establishment on a Government-wide basis of efficient personal property management practices by prescribing inventory levels, standardization of quality, sizes and types of commodities purchased, and effective use of Government-owned property, and by providing contracts for volume purchases, freight traffic rates and routing services, and related operations. Although no increase in total funds is proposed, increased performance is anticipated from improved efficiency and moderate shifts in emphasis between activities.

1. *Supply schedule contracting.*—Term contracts are established for volume purchasing against which agencies can place individual orders, at uniform price advantages, for commodities and services of common use, wherever this method is advantageous to the Government. Savings from price advantages are estimated at over $30 million in 1955, with no change in performance costs.

2. *Traffic management.*—To achieve economies in transportation of property, data on rates, classifications, packaging, and consolidations are furnished to civil agencies. Savings of almost $5 million are estimated for 1955 notwithstanding a reduction in performance costs.

3. *Personal property utilization and disposal.*—Personal property declared excess to the needs of Federal agencies is screened to achieve maximum utilization within the Government and obviate new purchases. The residue is either assigned for donation to State institutions or sold as surplus. Economies resulting from these operations are estimated at $50.7 million in 1955, as compared with $48.6 million in 1954, at a very modest increase in performance costs.

4. *Supply standards.*—Satisfactory standards of quality and other characteristics of common-use commodities are established by developing specifications which establish standards of quality, types, sizes, and varieties of items, and by qualified products lists, for mandatory use by Federal agencies. For 1955 provision is made for 655 specifications and 35 standardization projects, an increase of 15 percent over 1954, at no increase in performance costs.

5. *Inspection.*—Delivery of commodities of specified standards is insured by lot and plant inspections, laboratory tests, and analysis of samples prior to acceptance. Technical inspections of equipment declared excess by other agencies are made to determine the exact nature and condition in order to foster effective utilization.

6. *Supply management.*—Policies, regulations, procedures, and instructions for improving the management of supplies and equipment by civilian agencies are developed and their application and installation coordinated through on-site surveys. Performance for 1955 provides for 25 surveys as compared with 22 programed for 1954, at approximately the same total cost.

7. *Service administration.*

PROGRAM AND PERFORMANCE

This appropriation provides for the operation of the nationwide supply system whereby common-use commodities and services are sold to agencies at cost, from stores stock or by direct delivery, whichever is more economical. Costs of goods and services are initially financed from the revolving general supply fund, subject to reimbursement by the ordering agencies. Sales for 1955 are estimated at $142,484,000 as compared to $135,246,000 in 1954 and $125,736,834 in 1953. The modest increase programed in 1955 over 1954 reflects the net effect of partial implementation of the Administration's program for greater use of these supply facilities by the Department of Defense less general reductions in civilian agency supply support due (1) to reduced program levels and (2) the Administration's directive requiring maximum utilization of agencies' inventories. While total sales in 1955 are 5.4 percent over 1954, the ratio of operating costs to sales reflects a reduction of 8.6 percent, including 5.5 percent from improved business management and 3.1 percent representing certain redistribution costs nonrecurring in 1955. Savings through volume purchasing, consolidated warehousing, and repair and motor pool services are estimated at $37.6 million in 1954 and $38.4 million in 1955.

1. *Stores operations.*—Stocks of common-use commodities are received, warehoused, and sold at cost to agencies through a nationwide decentralized system of stores depots. While the increase in line items on stores sales for 1955 over 1954 is estimated at 1.6 percent, operating costs increase only 0.8 percent.

2. *Direct order purchasing.*—Commodities are procured to maintain sufficient inventories and for direct delivery to agencies. While line items purchased are estimated to increase by 4 percent in 1955 over 1954, operating costs increase only 0.8 percent.

3. *Space and related costs.*—The modest increase in stores sales program in 1955 over 1954 requires no augmentation of inventories. Accordingly, no additional warehouse space is programed.

4. *Direct order inspection.*—Delivery of commodities of specified standards is insured by inspections at contractors' plants or General Services Administration stores depots, laboratory tests, and analyses of samples prior to acceptance. Compared to a 5.7-percent increase in workload over 1954, the cost of inspection increases only 3.6 percent.

5. *Equipment maintenance.*—Supervision is provided over equipment pools and maintenance facilities operated under the general supply fund. Direct operating ex-

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

penses of pools and facilities are financed from that fund and are recovered from agencies or activities utilizing the services.

6. *Administrative operations.*—Accounting, auditing and reporting, budget and personnel administration, stock control, legal, compliance, internal housekeeping, and business services are provided for the foregoing activities. Compared to an increase of 5.4 percent in sales over 1954, the cost of these services is reduced by 4.8 percent.

PROGRAM AND PERFORMANCE

This appropriation provides for basic operations of the Administration which deal with management of the Government's archives and records, including custody and administration of permanent records in the National Archives and of other noncurrent records in Federal records centers, surveillance of records management programs of Government agencies, and filing and publication of Federal laws and regulations. The 1955 budget estimate is 11 percent below the 1954 appropriation.

1. *Records centers.*—Records of Federal agencies which must be retained for a period of time, but are not needed for frequent reference, are brought into and administered in low cost regional records centers until disposition can be effected. A national center at St. Louis administers records of former civilian employees of the Federal Government. The 1955 budget estimate provides for bringing into the regional centers an additional 300,000 cubic feet of records, the scheduled disposal of 200,000 cubic feet of records now in the centers, and for rendering some 525,000 reference services.

2. *Records management.*—Supervision of records management in all Federal agencies as required by the Federal Records Act of 1950 is provided by promulgation of Government-wide policies, regulations, procedures and instructions, and by furnishing technical advice.

3. *National Archives.*—The permanently valuable records of the Government are selected, arranged, cataloged, preserved, and serviced in the Archives of the United States.

4. *Nitrate film conversion.*—A temporary program to convert historically valuable motion-picture holdings of the National Archives from an unstable nitrate base to a permanent safety acetate base is continued at a reduced level.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

Operating Expenses, National Archives and Records Service, General Services Administration—Continued

5. *Federal Register.*—The daily issue of the Federal Register, the Code of Federal Regulations, the United States Government Organization Manual, the slip laws, and the United States Statutes at Large are published within fixed deadlines.

6. *Roosevelt Library.*—Manuscripts, books, photographs, and other historical materials received from Franklin D. Roosevelt and his contemporaries are preserved, cataloged, and serviced.

7. *Microfilming records.*—Permanent records selected because their contents must be preserved, but not necessarily in their original form, can be microfilmed and the originals destroyed. For 1955, as in 1954, no provision is made for the microfilm activity as the program can be deferred until vacant space in the Archives Building is filled.

8. *Service administration.*

PROGRAM AND PERFORMANCE

Basic operations under this appropriation include (1) policy direction for and coordination of all programs of the General Services Administration; and (2) accounting, auditing and reporting, budget and personnel administration, legal, compliance, information, and internal housekeeping services for activities under the three regular "Operating expenses" appropriations, and under other miscellaneous funds where these services are not otherwise provided. Increased efficiency and reduction in several functions are anticipated to reduce costs below 1954 and to facilitate the absorption of costs related to the emergency space programs previously financed by "Emergency operating expenses."

1. Rebate payments	$2,580,733	$6,800,000	$5,616,000
2. Refund payments	2,328,943	500,000	584,000
Obligations incurred	4,909,676	7,300,000	6,200,000

PROGRAM AND PERFORMANCE

Refund and rebate payments due World War II contractors are made upon approval of claims presented under the Revenue Act of 1943 and the Renegotiation Act of 1951, as amended. The total program is estimated at some 4,000 claims with estimated payments of $46,000,000. The current rate and amounts of certifications by the Internal Revenue Service and determinations of The Tax Court of the United States indicate that funds presently available are adequate to meet payments through June 30, 1955.

Strategic and Critical Materials, General Services Administration

Strategic and critical materials: Funds available for this purpose during the current fiscal year shall be available for services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a), and not to exceed [$176,275] *$139,000* of such funds shall be available for expenses of travel: *Provided*, That any funds received as proceeds from sale or other disposition of materials on account of the rotation of stocks under said Act shall be deposited to the credit, and be available for expenditure for the purposes, of this appropriation: *Provided further*, That during the current fiscal year, there shall be no limitation on the value of surplus strategic and critical materials which, in accordance with subsection 6 (a) of the Act of July 23, 1946 (50 U. S. C. 98c (a)), may be transferred to stockpiles established in accordance with said Act. (*First Independent Offices Appropriation Act, 1954.*)

NOTE.—$70,000,000 of the 1953 appropriation for this account is excluded from this schedule and set forth below under the title "Strategic and critical materials (liquidation of contract authorization), General Services Administration."

PROGRAM AND PERFORMANCE

Improvements of private hospital facilities in the District of Columbia are made under legislation authorizing appropriations of $35,000,000.

1. *Hospital center.*—Under appropriations of $2,200,000 and contract authorization of $19,500,000, a site has been acquired and a contract for excavation, grading, and roadways was awarded in October 1953. Award of the main construction contract is scheduled for August 1954, with completion in May 1957.

Contract authorization			12,800,000
Total expenditures	190,542	2,950,000	5,825,000
Expenditures are distributed as follows:			
Out of current authorizations	190,542		
Out of prior authorizations		2,950,000	5,825,000

Hospital Facilities in the District of Columbia (Liquidation of Contract Authorization), General Services Administration

Hospital facilities in the District of Columbia (liquidation of contract authorization): For payment of obligations incurred pursuant to authority provided under the head "Hospital Center, District of Columbia", in the Independent Offices Appropriation Act, 1949, to enter into contracts for construction, $4,500,000, to remain available until expended: Provided, That this amount may be disbursed through the appropriation "Hospital facilities in the District of Columbia", but shall be accounted for separately therein.

Estimate 1955, **$4,500,000**

AMOUNTS AVAILABLE FOR LIQUIDATION OF CONTRACT AUTHORIZATION

	1953 actual	1954 estimate	1955 estimate
Appropriation or estimate			$4,500,000
Applied to contract authorization			−4,500,000
Obligations incurred			

PROGRAM AND PERFORMANCE

Of the total contract authorization of $19,500,000, provided under the head "Hospital facilities in the District of Columbia," it is proposed to liquidate $4,500,000, leaving unfinanced contract authorization of $15,000,000.

ANALYSIS OF EXPENDITURES

Obligations transferred from "Hospital facilities in the District of Columbia, General Services Administration" (total expenditures out of appropriation to liquidate prior year contract authorization, current authorizations)—1955, $4,500,000.

Emergency Operating Expenses, General Services Administration

[Emergency operating expenses: For necessary emergency expenses of the General Services Administration not otherwise provided for, for operation, maintenance, protection, repair, alterations, and improvements of public buildings and grounds (including furnishings and equipment) to the extent that such buildings and grounds are under the control of the General Services Administration for such purposes as are provided for in Public Law 152, Eighty-first Congress, as amended; rental of buildings or parts thereof in the District of Columbia and elsewhere, including repairs, alterations, and improvements necessary for proper use by the Government, without regard to section 322 of the Act of June 30, 1932, as amended (40 U. S. C. 278a); restoration of leased premises; moving Government agencies in connection with the assignment, allocation, and transfer of building space; and not to exceed $24,300 for expenses of travel; $20,000,000: *Provided,* That of this amount, such sums as may be determined by the General Services Administrator to be necessary may be paid into other appropriations of the General Services Administration only for purposes of accounting: *Provided further,* That no part of this appropriation shall be available to effect the moving of Government agencies from the District of Columbia to accomplish the dispersal of departmental functions.]

[For an additional amount for "Emergency operating expenses", $200,000; and appropriations granted under this head for the fiscal year 1954 shall be available to enable the General Services Administration to carry out its functions arising out of the Defense Production Act of 1950, as amended.] (*First Independent Offices Appropriation Act, 1954; Supplemental Appropriation Act, 1954.*)

Appropriated 1954, **$20,200,000**

NOTE.—Estimate for activities previously carried under this title has been transferred in the estimates as follows:

"Operating expenses, Public Buildings Service, General Services Administration" $17,340,000
"Administrative operations, General Services Administration" 307,000

The amounts obligated in 1953 and 1954 are shown in the schedule as comparative transfers.

PROGRAM AND PERFORMANCE

Under a total authorization of $40,000,000, sites are acquired and drawings and specifications prepared for future construction of public building projects. During the past several years, the program has been limited to acquisition of sites and design of high-priority projects to meet defense-connected or critical civilian requirements. Acquisition of 415 sites was authorized under the original program. As of June 30, 1953, 79 sites had been acquired and commitments made for 23 additional sites. The 1955 program will be limited to the completion of purchase of sites for which commitments have been made.

Defense Production Guarantees, General Services Administration

BUSINESS-TYPE STATEMENTS

PROGRAM AND PERFORMANCE

Guarantees are given on loans made by private sources to finance construction or operation of defense production facilities, primarily for expanding the production of machine tools and strategic metals and minerals. Loans may be purchased by the Government, if necessary, to keep financing in effect. Advances from appropriations available for procurement may be made to this fund for its temporary use. Net earnings are retained to meet possible future losses. (Defense Production Act of 1950, sec. 301, as amended.)

BUDGETARY AUTHORIZATION SCHEDULES

AMOUNTS AVAILABLE FOR OBLIGATION

Appropriation or estimate (obligations incurred)—1954, $3,000,000; 1955, $3,000,000.

ANALYSIS OF EXPENDITURES

Obligations incurred during the year (total expenditures out of current authorizations—paid into revolving fund)—1954, $3,000,000; 1955, $3,000,000.

BUSINESS-TYPE STATEMENTS

PROGRAM AND PERFORMANCE

Management, rental, operation, maintenance and protection of Government-owned and leased building space in and outside the District of Columbia for housing Federal agencies; repair and improvement of Government-owned space in the District of Columbia and adjacent area; operation of joint communication facilities and other related building services are initially financed through the buildings management fund, established on January 1, 1953, which is reimbursed from funds appropriated, transferred, or advanced to the General Services Administration (66 Stat. 594).

Any surplus resulting from operations, after making provisions for prior year losses if any, is paid into the Treasury as miscellaneous receipts.

Construction Services, Public Buildings, General Services Administration

BUSINESS-TYPE STATEMENTS

PROGRAM AND PERFORMANCE

Work performed in the acquisition of Federal building sites, preparation of drawings and specifications for the construction, remodeling, renovation, repair, and improvement of buildings, and the supervision of construction activities are financed through reimbursement from funds appropriated, transferred, or advanced to the General Services Administration (40 U. S. C. 296).

During 1953 the surplus of $124,567 on June 30, 1952, was increased by $15,976 due to a reduction in the accrued leave applicable to the reduced staff, leaving a surplus of $140,543 on June 30, 1953, which is considered necessary to cover possible contingencies.

General Supply Fund, General Services Administration

BUSINESS-TYPE STATEMENTS

PROGRAM AND PERFORMANCE

Purchase of materials and services required by the various Federal agencies and the District of Columbia, through a nationwide system of supply centers, is initially financed by the General Supply Fund which is reimbursed on a sales-at-cost basis by the agencies to which the services and materials are sold (41 U. S. C. 7a–c). Expenses for operating the fund are provided for under the appropriation "Expenses, General Supply Fund."

The estimates for 1954 and 1955 provide for small increases in sales reflecting partial implementation of the program for greater use of these supply facilities by the military establishments and for a reduction in supply requirements of civilian agencies due in part to reductions in program levels and from Administration directives requiring maximum utilization of existing inventories. Actual goods and services sold for 1953, and estimates for 1954 and 1955 follow:

[In thousands of dollars]

Fiscal year	Stores issues	Direct delivery	Repair shops	Motor and equipment pools	Total
1953 actual	56,106	67,223	1,185	1,223	125,737
1954 estimated	57,000	75,700	1,042	1,504	135,246
1955 estimated	59,000	80,700	864	1,920	142,484

The investment of the United States Government in the fund is $44,888,671, of which $44,000,000 represents direct appropriations and $888,671 donated assets. This capital is utilized to provide adequate stocks of common-use items required by the agencies. It is also utilized to purchase operating equipment for use in carrying out the fund's objectives, subject to recovery by amortization charges to the using activities.

Any surplus arising out of the fund's operation, as determined by General Accounting Office audit, must be returned to the Treasury as miscellaneous receipts. Earnings from prior years' operations now on hand will be returned to the Treasury by the end of 1954, the payment next year being estimated at $500,000.

Working Capital Fund, General Services Administration

BUSINESS-TYPE STATEMENTS

PROGRAM AND PERFORMANCE

A central blueprinting, photostating, duplicating, and distribution service is financed by a working capital fund pending reimbursements (40 U. S. C. 293). Surplus earnings are deposited into miscellaneous receipts of the Treasury. Through June 30, 1953, a total of $27,566 had been deposited, and it is estimated that $3,015 and $4,205 will be deposited in 1954 and 1955, respectively.

GENERAL SERVICES ADMINISTRATION—GENERAL PROVISIONS

The appropriate foregoing appropriation to the General Services Administration shall be credited with (1) advances or reimbursements for salaries and administrative expenses chargeable against other appropriations of the General Services Administration, and such salaries and expenses may be paid from such foregoing appropriation; (2) cost of maintenance, upkeep, and repair included as part of rentals received from Government corporations pursuant to law (40 U. S. C. 129); (3) reimbursements for services performed in respect to bonds and other obligations under the jurisdiction of the General Services Administration, issued by public authorities, States, or other public bodies, and such services in respect to such bonds or obligations as the Administrator deems necessary and in the public interest may, upon the request and at the expense of the issuing agencies, be provided from the appropriate foregoing appropriation; and (4) appropriations or funds available to other agencies, and transferred to the General Services Administration, in connection with property transferred to the General Services Administration pursuant to the Act of July 2, 1948 (50 U. S. C. 451ff), and such appropriations or funds may, with the approval of the Bureau of the Budget, be so transferred.

During the current fiscal year, no part of any money appropriated in this or any other Act shall be used during any quarter of such fiscal year to purchase within the continental limits of the United States typewriting machines (except bookkeeping and billing machines) at a price which exceeds 90 per centum of the lowest net cash price, plus applicable Federal excise taxes, accorded the most-favored customer (other than the Government, the American National Red Cross, and the purchasers of typewriting machines for educational purposes only) of the manufacturer of such machines during the six-month period immediately preceding such quarter: *Provided*, That the purchase, utilization, and disposal of typewriting machines shall be performed in accordance with the provisions of the Federal Property and Administrative Services Act of 1949, as amended.

Not to exceed five per centum of any appropriation available only for the current fiscal year and made to the General Services Administration by this Act may be transferred to any other such appropriation, but no such appropriation shall be thereby increased more than five per centum. (*First Independent Offices Appropriation Act, 1954.*)

Statement of proposed obligations for purchase and hire of passenger motor vehicles for the fiscal year 1955

GENERAL SERVICES ADMINISTRATION

Appropriation	Motor vehicles to be purchased		Old vehicles to be exchanged		Net cost of vehicles to be purchased	Old vehicles still to be used	Cost of hire of motor vehicles	Users and public purpose
	Number	Gross cost	Number	Allowance (estimated)				
General supply fund	15	$21,000	15	$3,000	$18,000	53		For use in the transaction of official business by officials and appropriate employees of the General Services Administration in connection with: acquisition, construction, management, and disposal of real property; procurement and supply of personal property; records management; inspection of strategic and critical materials in inaccessible locations, storage depots, manufacturing plants and mines; and the maintenance and operation of national industrial reserve plants and facilities.
General supply fund	[1] 10	6,000	10	2,000	4,000			
All appropriations							[2] $6,000	
Station wagon						14		
Bus						1		
Total	25	27,000	25	5,000	22,000	[3] 68	6,000	

[1] Acquisition by transfer from excess reported by other agencies, or forfeitures.
[2] From commercial sources only—excludes motor-pool service provided on a reimbursable basis by the general supply fund.
[3] Excludes 15 passenger motor vehicles to be disposed of in 1954 and 1955 with the understanding that transportation requirements will be provided by hire at locations presently requiring assignment of a vehicle for infrequent use with consequent low mileage.

CURRENT AUTHORIZATIONS

Introductory Statement

The Housing and Home Finance Agency administers the major housing activities of the Federal Government through (1) the Office of the Administrator, including the Federal National Mortgage Association; (2) the Home Loan Bank Board, including the Federal Savings and Loan Insurance Corporation; (3) the Federal Housing Administration; and (4) the Public Housing Administration.

The Administrator is responsible for the general supervision and coordination of the programs and functions of these constituents, serving as principal housing officer of the Federal Government and as Chairman of the National Housing Council. In addition to the other programs and functions of the Agency, the Administrator has been responsible for certain defense activities related to housing and community development.

Most activities and programs of the Agency are financed from corporate or other funds available to the Agency. Activities and programs financed from appropriations are salaries and expenses of the Office of the Administrator (except for the program of housing loans to educational institutions, the several liquidating programs, and the Federal National Mortgage Association); salaries and expenses for the United States Housing Act program of the Public Housing Administration; annual contributions to local housing authorities for maintenance of the low-rent character of public housing projects; and capital grants for local slum clearance and urban redevelopment projects.

OFFICE OF THE ADMINISTRATOR

Salaries and Expenses, Office of the Administrator, Housing and Home Finance Agency

Salaries and expenses: For necessary expenses of the Office of the Administrator, including rent in the District of Columbia; services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a); not to exceed [$193,550] *$169,325* for expenses of travel; expenses of attendance at meetings of organizations concerned with the work of the agency; *purchase of not to exceed ten passenger motor vehicles for replacement only;* and transportation expenses and not to exceed $25 per diem in lieu of subsistence, as authorized by section 5 of the Act of August 2, 1946 (5 U. S. C. 73b–2), for persons serving without compensation as members of any advisory committee established pursuant to title VI of the Housing Act of 1949; [$3,215,550, of which not to exceed $125,000 shall be available for liquidation of the housing research program not later than April 30, 1954] *$2,900,000*: *Provided*, That necessary expenses of inspections and of providing representatives at the site of projects being undertaken by local public agencies pursuant to title I of the Housing Act of 1949 and of projects financed through loans to educational institutions authorized by title IV of the Housing Act of 1950, shall be compensated by such agencies or institutions by the payment of fixed fees which in the aggregate will cover the costs of rendering such services, and expenses for such purpose shall be considered nonadministrative; and for the purpose of providing such inspections, the Administrator may utilize any agency and such agency may accept reimbursement or payment for such services from such institutions or the Administrator, and shall credit such amounts to the appropriations or funds against which such charges have been made, but such nonadministrative expenses shall not exceed $500,000[: *Provided further*, That the Administrator is authorized without regard to any other provisions of law to transfer without reimbursement any project or facility, or part thereof, constructed or provided under title II of the Act of October 14, 1940, as amended (including any personal property related to such project or facility), to any other department or agency, whenever the head of such department or agency so requests after determining that such project or facility is required for the continued operation of or is an integral part of a project or facility under the jurisdiction of such department or agency].

[Salaries and expenses: In addition to amounts appropriated under this head, the Administrator may transfer to this appropriation from any other funds available for administrative expenses not to exceed the sum of $50,000 for studies and surveys which the President may request of the housing policies and programs of the Government and of organization for the administration of such programs, and for expenses of advisers and consultants in connection therewith.] *(5 U. S. C. 133y–16; 42 U. S. C. 1451; 12 U. S. C. 1749; First Independent Offices Appropriation Act, 1954; Supplemental Appropriation Act, 1954.)*

Total obligations	5,298,789	4,516,675	4,243,000

PROGRAM AND PERFORMANCE

The Administrator supervises and coordinates the housing programs and functions of the constituent units of the Agency and exercises direct responsibility for slum clearance and urban redevelopment; for housing loans to educational institutions; for liquidation of certain activities including public works advance planning, provision of defense community facilities, maintenance and disposition of certain Lanham Act public works, loans for Alaska housing, and prefabricated housing; and for secondary mortgage market activities of the Federal National Mortgage Association. The Administrator is also responsible for the management and disposition of publicly financed war and veterans' housing constructed under the Lanham and related acts, though operating responsibility in connection with direct management and disposition activities has been delegated to the Public Housing Commissioner.

The appropriation requested represents a decrease of $315,550. The request reflects continued progress in slum clearance and urban redevelopment, as well as

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

decreases resulting from the termination of the housing research program and of the programing of defense housing and defense community facilities. Funds for the liquidation of public works advance planning, formerly appropriated under this head, are proposed to be authorized for 1955 under the heading "Liquidating programs."

1. *Agency-wide program coordination and supervision.*—Provision is made for coordination and general supervision of the program and activities of the Agency.

2–4. For detail of activities for slum clearance and urban redevelopment, housing loans to educational institutions, and liquidating programs, see revolving and management funds.

5. *Disposition.*—Necessary steps are taken to release Lanham Act properties for disposition by the Public Housing Administration.

6. *Project inspection and audit.*—Provision is made for construction progress inspections and financial audits of slum clearance, college housing, and defense community facilities projects.

Balance of mortgage purchase authority at end of fiscal year	610,093	520,123	1,059,873

PURPOSE AND FINANCIAL ORGANIZATION

The Association is authorized under title III of the National Housing Act to provide a secondary mortgage market for home mortgages insured by the Federal Housing Administration or guaranteed by the Veterans' Administration.

In addition to its role of assistance in strengthening and stabilizing private home financing generally, the Association has been called upon to support special Government housing programs through the issuance of advance commitments for the purchase of mortgages. Most recent among these programs has been the encouragement of private construction of housing in critical defense areas and on or near military installations.

The Administrator, Housing and Home Finance Agency, holds the Association's $21 million capitalization and may borrow from the Treasury for the purchase of mortgages not to exceed a maximum at any time of $3.65 billion.

ANALYSIS OF BUDGET PROGRAMS

It is estimated that purchases of mortgages will decline from $509 million in 1954 to $390 million in 1955. The major share of this decrease results from the substantial completion of the program for housing in critical defense areas.

Under authority granted in the last session of Congress (Public Law 94), the Association inaugurated a one-for-one sales program under which it issues a mortgage purchase commitment contract to purchasers of its mortgages. The commitment contract obligates the Association to purchase within 1 year, if requested, a dollar amount of eligible mortgages equal to the sale value of the mortgages sold. A fee of 1 percent of the total amount of the commitment contract is charged at the time of sale, and one-half of 1 percent is charged on the amount of mortgages repurchased under the commitment contract. This authority expires June 30, 1954.

Continuous efforts to sell mortgages in the portfolio are estimated to result in sales of $435 million in 1955. The increase in sales and the reduction in purchases will result in a net reduction in the mortgage portfolio of $160 million. It is estimated the portfolio will aggregate $2,432 million at the end of 1955.

Administrative expenses. A slight increase in administrative expenses is estimated to provide for the increased sales program.

FINANCING OPERATIONS

Purchases of mortgages are financed by borrowings from the Treasury at interest rates approximating Treasury interest on similar types of loans. Total borrow-

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

ings at the end of 1953 were $2,425 million and are expected to decline to $2,321 million at the end of 1955. Of the total authority of $3,650 million, it is estimated that $1,060 million will be unused at the end of 1955. (See statement C–1.)

The reduction in the portfolio in 1955 will result in a net repayment to the Treasury of $166 million.

OPERATING RESULTS AND RETAINED EARNINGS

The increase in sales of mortgages at a discount in 1955 will reduce the net income from $27 million in 1954 to $11 million in 1955. The Association has followed the policy of periodically paying dividends to the Treasury approximately equal to the net income for the prior year, and under this policy $91 million has been paid to Treasury to date. The increase in interest rates on insured and guaranteed mortgages during calendar year 1953 makes it desirable to establish a reserve to offset losses on the sale of mortgages purchased at lower rates. For this reason, no dividends are forecast in either 1954 or 1955.

Net expenditures	$13,848	$35,548	$57,709

Under title IV of the Housing Act of 1950, the Administrator is authorized to make long-term low-interest loans to institutions of higher learning for construction of student and faculty housing. The $300 million Treasury borrowing authorization has been limited administratively to $100 million at the close of fiscal 1953 and a cumulative $150 million by the end of the current year. Release of an additional $25 million, bringing the cumulative authority to $175 million, is assumed in this budget program.

ANALYSIS OF BUDGET PROGRAM

At the close of fiscal 1953, 214 applications for more than $167 million in loans had been filed. Of these, 95 applications amounting to $88.9 million had been approved to provide housing for 26,571 single students, 302 married students, and 333 faculty members. Based on the heavy volume of inquiries recently received by regional offices, it is estimated that as many as 400 applications will be filed during the current and budget years.

The recent removal of criteria requiring evidence of defense-relatedness has greatly increased the number of eligible institutions, and this is expected to increase the number of smaller loans, reducing the average loan amount from over $900,000 to an estimated $700,000. Within the allowable funds, approvals of 90 loan applications are estimated for 1954 and 52 for 1955.

Administrative expenses.—These are estimated at $375,000 in 1955. Although the volume of loan approvals will decline, the peak of construction workload involving such things as the approval of change orders, review of inspection reports, loan disbursements, and bond purchases will occur in that year.

OPERATING RESULTS AND RETAINED EARNINGS

The only source of income is the net margin between the interest charged the educational institutions and the interest paid the Treasury. The lending rate to institutions on recent loan contracts has been 3.5 percent. Borrowings will bear the rate of 3 percent, or rates on Treasury issues of similar maturity at the time of requisition of funds.

For existing as well as future commitments, the margin between borrowing and lending rates will average around 0.5 percent for the next few years. With a rapidly expanding but rather small portfolio, this margin of slightly over $400,000 will cover administrative costs, but will not maintain a reserve for losses at the current level of 0.25 percent of outstanding loans. However, the risk of loss is believed small in this period, and subsequent augmentation of the reserve level will be facilitated when the active loan approval and construction period is over. At that time administrative costs will decline and a large portfolio will provide a more adequate earning base.

Net expenditures	$21,102	$37,826	$47,590

Title I of the Housing Act of 1949 provides for a program of slum clearance and community development and redevelopment. The act contains a borrowing authorization of $1 billion to finance advances of funds for the planning of local projects, temporary loans for the acquisition and clearance of land and preparation for re-use purposes, and long-term loans to refinance the local investment in portions of projects which are disposed of by lease. Title I also authorizes contracts and appropriations totaling $500 million for capital grants to defray up to two-thirds of net project costs.

ANALYSIS OF BUDGET PROGRAM

Temporary loan and grant commitments are expected to rise sharply as plans receive final approval of local governments and 57 projects enter development in fiscal 1954, followed by 67 in the budget year. It is assumed that 50 percent of costs will be privately financed through local note issues backed by Federal loan commitments, thus holding Government loan disbursements to $47 million in 1954 and $56.8 million in 1955. As shown on statement A, net Federal disbursements will be reduced by $29.1 million and $47.5 million of repayments in the respective years. The parallel action in retirement of loan commitments by repayment of planning advances and use of definitive project funds (i. e., proceeds from sale of land and local and Federal grants) amounts to $16.4 million and $38 million in the 2 years.

Administrative expenses estimated at $1,953,000 are included in the estimate of expenses for the Office of the Administrator.

FINANCING OPERATIONS

Appropriations for capital grants are estimated at $39 million for 1955. This will complete the grants for an

PUBLIC ENTERPRISE FUNDS—Continued

OFFICE OF THE ADMINISTRATOR—Continued

SLUM CLEARANCE AND URBAN REDEVELOPMENT—Continued

estimated 24 redevelopment projects, and provide partial payments as authorized by Public Law 370 on some 60 additional projects.

OPERATING RESULTS AND RETAINED EARNINGS

The net margin of about 0.5 percent between the rate at which money is borrowed from the Treasury and that at which it is loaned to local redevelopment agencies produces approximately $340,000 income for the program. After a $350,000 increase in the reserve for losses on planning advances, the net loss for the year is approximately $15,000, increasing the cumulative deficit to about $900,000.

PUBLIC ENTERPRISE FUNDS—Continued

OFFICE OF THE ADMINISTRATOR—Continued

REVOLVING FUND (LIQUIDATING PROGRAMS)

Revolving Fund (Liquidating Programs), Office of the Administrator, Housing and Home Finance Agency

Revolving fund (liquidating programs): There is established as of June 30, 1954, a revolving fund, and the Administrator is authorized to credit said fund with all moneys hereafter obtained or now held by him, and to account under said fund for all assets and liabilities, in connection with (1) community facilities provided or assisted under title II of the Lanham Act, as amended (42 U. S. C. 1531–1534), or under title III of the Defense Housing and Community Facilities and Services Act of 1951, as amended (42 U. S. C. 1592–1592n); (2) loans or advances made pursuant to title V of the War Mobilization and Reconversion Act of 1944 (58 Stat. 791), or the Act of October 13, 1949 (40 U. S. C. 451–458); (3) functions transferred under Reorganization Plan No. 23 of 1950 (5 U. S. C. 133z–15, note), or authorized under sections 102, 102a, 102b, and 102c of the Housing Act of 1948, as amended (12 U. S. C. 1701g–1701g–3); and (4) notes or other obligations purchased pursuant to the Alaska Housing Act, as amended (48 U. S. C. 484 (a)): Provided, That said fund shall be available for all necessary expenses (including administrative expenses) in connection with the liquidation of the programs carried out pursuant to the foregoing provisions of law, including operation, maintenance, improvement, or disposition of facilities, and for disbursements pursuant to outstanding commitments against moneys herein authorized to be credited to said fund, repayment of obligations to the Treasury, and refinancing and refunding operations on existing loans: Provided further, That any amount in said fund which is determined to be in excess of requirements for the purposes hereof shall be declared and paid as liquidating dividends to the Treasury not less often than annually: Provided further, That during the current fiscal year not to exceed $340,000 shall be available for administrative expenses (including not to exceed $12,450 for travel) for the foregoing purposes, but this amount shall be exclusive of costs of services performed on a contract or fee basis in connection with termination of contracts and legal services on a contract or fee basis and of payment for services and facilities of the Federal Reserve banks or any member thereof, the Federal home-loan banks, and any insured bank within the meaning of the Act of August 23, 1935, as amended, creating the Federal Deposit Insurance Corporation (12 U. S. C. 264) which has been designated by the Secretary of the Treasury as a depository of public money of the United States: Provided further, That after the effective date of this Act no additional notes or obligations shall be purchased from funds appropriated pursuant to the Alaska Housing Act, as amended (48 U. S. C. 484 (d)), except for the furtherance or refinancing of an existing loan: Provided further, That except for extensions, or refinancing, of existing obligations the authority to issue obligations to the Secretary of the Treasury under section 1 (4) of Reorganization Plan No. 23 of 1950 (5 U. S. C. 1332–15, note), shall terminate on June 30, 1954.

PROGRAM HIGHLIGHTS

[Dollars in thousands]

	1953 actual	1954 estimate	1955 estimate
New Federal loan and grant commitments	$25,342	$752	
Program disbursements:			
Loans and other acquisition of assets	15,007	14,975	$332
Grants to local governments	2,434	10,881	3,397
Repayments: Loan repayments and other realization of assets	21,876	32,359	6,544
Administrative expenses:			
Charged to revolving fund	425	338	340
Charged to other accounts	285	147	
Other	515	316	82
Payments to Treasury:			
Net repayment of borrowings	10,000	10,000	2,135
Net repayment of appropriations	−3,500	23,327	8,940

The Office of the Administrator is responsible for six programs which are in some stage of liquidation. To simplify the presentation of the budget, and to exhibit more comprehensive and comprehensible data than was practicable when the programs were considered separately, a single consolidated revolving fund is shown as authorized by the proposed language. The programs are as follows:

1. *Alaska housing program.*—Public Law 52, Eighty-first Congress, as amended by Public Law 531, Eighty-second Congress, authorized a $20 million revolving fund, of which $19 million has been appropriated for loans to assist in developing housing in Alaska. In addition to the $5 million to be returned to the Treasury in accordance with the First Independent Offices Appropriation Act, 1954, the budget program contemplates return of an additional $13.5 million in the current fiscal year, and the remaining $0.5 million in fiscal 1955.

2. *Loans for prefabricated housing.*—Under this program, transferred to the Housing and Home Finance Agency by Reorganization Plan No. 23 and enlarged by Public Law 139, Eighty-second Congress, loans were made to business enterprises for the production and distribution of prefabricated housing components, and for large-scale site development. Funds provided by borrowings from the Treasury are expected to be reduced from $18.8 million as of June 30, 1953, to $2 million on June 30, 1955.

3. *War public works.*—This program was authorized by the Lanham Act (42 U. S. C. 1521) before and during World War II, to serve defense needs. There remains for collection or disposition some $1.7 million in loans to local governments, and public works projects with an original cost of $32.4 million.

4. *Defense community facilities.*—As authorized by Public Law 139, Eighty-second Congress, loans and grants were made to communities to assist in providing facilities in critical defense housing areas. Disbursements of loans and grants will be virtually complete by the close of the budget period, but collection of the loans to local governments will continue over a period of years.

5. *First advance planning.*—Under this program, authorized by title V of the War Mobilization and Reconversion Act of 1944, loans were made to local communities for the planning of non-Federal public works. Some $26.9 million in advances are repayable when the projects thus planned enter construction.

6. *Second advance planning.*—This was authorized by Public Law 352, Eighty-first Congress, and similar to the preceding program. Some $9.8 million in advances are now repayable and an estimated $1.4 million in additional advances will be disbursed in the current year as remaining active planning projects are completed.

ANALYSIS OF BUDGET PROGRAM

As shown in the program highlight table the approval of new Federal financial commitments virtually ceased in 1953. It is estimated that all expansion of financial investment will cease in the current fiscal year; however, the time required for construction of certain water and sewer projects assisted under the defense community facilities program will delay final disbursements of loans and grants until 1955, and one project may run into fiscal 1956. Considerable emphasis in the current and budget years is being laid on the systematic review of outstanding financial commitments and cancellation of those which can be deemed obsolete.

Administrative expenses.—The estimate of $340,000 is nearly $150,000 below the current year. The entire amount is to be drawn from income rather than from income plus appropriated funds as in the current year.

FINANCING OPERATIONS

Net repayments of borrowings and appropriations increase from $6.5 million in 1953 to an estimated peak of $33.3 million in the current year, and decline to $11.1 million in 1955. Since these repayments stem in part from the cash balance at the beginning of the past year, and expenditures under the defense community facilities program are substantial, net budgetary receipts follow a more moderate line of $2.3 million, $1.8 million, and $3.0 million in the respective years.

OPERATING RESULTS AND RETAINED EARNINGS

Substantial losses of $12.4 and $4.4 million are shown in the current and the budget year. The creation of this revolving fund will permit formal recognition of the obsolete character of many local plans completed under the advance planning programs, and of the consequent improbability of repayment. Increases in reserve for losses for this purpose are estimated at $10.1 million in the current year and $3.1 million in fiscal 1955, and are the most important factor in estimated losses. The next in importance are the estimated losses of $2.8 and $1.3 million in the 2 years from disposition of war public works projects. These and other losses are partially offset by net operating income from loans and rental of public works projects.

In view of the recognized liquidating character of the fund, no action is required with respect to the $29.7 million deficit.

PROGRAM HIGHLIGHTS

[As of June 30, 1953, 1954, and 1955. Dollars in thousands]

	1953 actual	1954 estimate	1955 estimate
Number of members	4,096	4,180	4,270
Total assets of members	$23,877,000	$27,750,000	$31,600,000
Savings invested in members	$20,100,000	$23,600,000	$27,100,000
Mortgage loans of members	$19,337,000	$22,500,000	$25,700,000
Insured institutions examined and supervised	3,230	3,380	3,530
Federal home loan bank advances outstanding	$718,000	$785,000	$840,000

PURPOSE AND FINANCIAL ORGANIZATION

The three-member Board supervises the Federal home-loan bank system, the system of Federal savings and loan associations, and the Federal Savings and Loan Insurance Corporation. Net administrative expenses of the Home Loan Bank Board are paid from assessments against the 11 Federal home-loan banks, the Examining Division, and the Federal Savings and Loan Insurance Corporation.

ANALYSIS OF BUDGET PROGRAMS

The Board's budget is based on six activities.

1. *Executive direction and staff services.*—This includes formulation of basic policy and the furnishing of some staff services that are common to the Board and the Insurance Corporation.

2. *Examination and supervision of Federal home loan banks.*—The Board supervises and examines the operations of the Federal home loan banks. Expenses are met from assessments upon the banks.

3. *Supervision of Federal and State-chartered insured institutions.*—The financial condition and operations of each insured institution are analyzed and corrective action is instituted when warranted. Supervision of insured institutions operating under State charter is carried on, cooperatively, under arrangements made with the respective State authorities.

4. *Chartering of Federal savings and loan associations and branches thereof.*—Federal savings and loan associations are chartered and regulated. In the case of new organizations, the Board satisfies itself that proper standards are met before approving the charter. In addition, applications of State-chartered associations for conversion into Federal savings and loan associations are examined.

5. *Fiscal and housekeeping services.*—These consist of auditing; accounting; budgetary and financial reporting; internal budget control; fiscal organization and management; and general housekeeping and common operating services, including printing and reproduction work.

6. *Examination of savings and loan associations.*—Supervisory examinations are made of Federal savings and loan associations, State-chartered associations insured by the Federal Savings and Loan Insurance Corporation, and such uninsured member institutions of the

Home Loan Bank Board Revolving Fund—Continued

Federal home loan bank system as are not examined by State examiners. Audits are also made of over 80 percent of all insured associations. The balance of the insured associations have voluntarily elected to have their audits made by private certified public accountants. An effort will be made by the Board in 1955 to encourage more private audits. Examinations are also made of institutions applying for insurance of accounts and for conversion from a State to a Federal charter when required by the Board. The costs of examinations and audits are assessed against the institutions examined. At the beginning of the fiscal year 1954 there were 3,230 insured institutions with total assets aggregating $21.7 billion.

ADMINISTRATIVE EXPENSES

The Board's estimated administrative expenses for the fiscal year 1955, payable wholly out of income derived from assessments and charges, amount to $787,000, as compared with $775,000 for the fiscal year 1954. These amounts exclude nonadministrative expenses of the Examining Division which are shown separately. Provision is made for the increased workload resulting from stepping up examinations of associations from a 15-month to a 12-month schedule.

FINANCIAL REVIEW

The Board is not incorporated, and has no capital stock. Its assets consist of cash on deposit with the Treasurer of the United States and accounts receivable for the services which it renders. Its liabilities consist essentially of accounts payable.

A. *Statement of sources and application of funds*

	1953 actual	1954 estimate	1955 estimate
FUNDS APPLIED			
To operations:

Home Loan Bank Board Examining Division

PROGRAM HIGHLIGHTS

The Division conducts regular periodic and special supervisory examinations of all Federal savings and loan associations, of State-chartered savings and loan associations which are insured by the Federal Savings and Loan Insurance Corporation, and of noninsured member institutions of the Federal home loan bank system that are not subject to State supervision. When required by the Board, the Division also examines and analyzes the financial condition of institutions which apply for membership in the system, for insurance of accounts or for conversion from a State to a Federal charter. In addition, insured institutions are required to have an audit; approximately 84 percent of the number of such institutions exercise their option of having the Division expand the scope of its examination to include such audit. The institutions examined bear the costs of examination, and the fees charged therefor are calculated to defray all of the operating expenses of the Division. It is proposed in 1955 to examine the associations on the average of once every 12 months as compared with the present 15-month schedule.

The following table reflects the work of the Division:

	1953 actual	1954 estimate	1955 estimate
Examinations completed or to be completed	2,164	2,716	3,150

PROGRAM HIGHLIGHTS

Under the Federal Home Loan Bank Act of 1932 (47 Stat. 725), the Federal Home Loan Bank Board established Federal home loan banks throughout the country. These, together with the building and loan associations and similar institutions which are members of the banks, constitute the Federal home-loan bank system, designed to stabilize and strengthen institutions promoting private thrift and individual home ownership. Authority to borrow from the Treasury in the amount of $1 billion was provided in Public Law 576, 81st Congress. No borrowings have been made to date and none is anticipated in 1955.

Reserves and undivided profits of insured institutions	$1,490,000	$1,760,000	$2,050,000
Corporation's reserve for insurance losses	$128,751	$148,027	$170,627
Percent of administrative limitation to total income	2.3	2.1	1.8

PURPOSE AND FINANCIAL ORGANIZATION

The Federal Savings, and Loan Insurance Corporation, pursuant to title IV of the National Housing Act, as amended, insures savings up to $10,000 in all savings and loan associations which apply and are approved for insurance. The Corporation prevents default of insured institutions through loans, purchases of assets, or cash grants, in order to eliminate conditions which might affect adversely the financial soundness of other insured

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

institutions. The Corporation also may act as receiver for institutions declared in default. When an insured institution declared in default is a Federal savings and loan association, the Corporation is appointed as receiver for the purpose of liquidation. On June 30, 1953, the 3,230 insured associations had resources of $21.7 billion. The Corporation's liability on the insured institutions aggregated nearly $19 billion.

Income from insurance premiums and interest on investments has been sufficient to meet all insurance losses, operating expenses, dividends on capital stock, and to establish a reserve for insurance losses of $128.8 million as of June 30, 1953. The Corporation has authority to borrow up to $750 million from the Treasury, but it has never been needed. Since the time and size of expenditures for the prevention of default and payment of insurance are unpredictable, estimates of these expenditures are omitted from the financial statements.

The Corporation operates under the supervision and direction of the Home Loan Bank Board, which provides certain administrative services and conducts the examination and supervision of insured institutions. The costs of examinations are paid by the institutions examined while the cost of all other services rendered by the Board are paid by the Corporation.

ANALYSIS OF BUDGET PROGRAM

The budget program comprises four activities.

1. *Underwriting.*—This constitutes an analysis and evaluation of insurance risk in connection with applications for insurance of accounts and other applications submitted pursuant to regulatory requirements. The assets of insured institutions have increased $6.8 billion or 46 percent in the last 2 years. The increasing interest in insurance of accounts on the part of uninsured institutions, plus the anticipated rate of growth, will increase the insured liability of the Corporation to an estimated $25.6 billion by June 30, 1955, as compared to $10.5 billion on June 30, 1950.

2. *Prevention of default and payment of insurance.*—The Corporation not only pays insurance in cases of defaulted institutions, but prevents default wherever possible. Through 1953, cash grants in the net amount of $4.9 million were made to 28 institutions to prevent default; in one case purchase of assets (liquidated later without loss) was sufficient to prevent default. Only 7 institutions with aggregate assets of $9.2 million have been placed in liquidation. Insured accounts of $7.6 million were covered and because of liquidating dividends, the loss has been only $309,000. As a result of these activities, the savings of 65,180 investors have been protected against loss.

3. *Analysis of operations.*—The Corporation maintains a constant surveillance of the financial condition of member institutions, the flow of savings, and the character and volume of mortgage lending. Such studies furnish valuable information to the Home Loan Bank Board and the Corporation in connection with their other activities. By selective review of geographical or community areas and phases of operations it is possible to observe factors which may result in an undue concentration of risk. Certain analyses of trends in the fields of thrift and home mortgage finance are made available to member institutions and the public as illustrated by the Corporation's mortgage recording study, which is the only one available in the United States.

4. *Executive direction and fiscal and other administrative services.*—Provision is made for all fiscal and other administrative services as well as management and direction.

Administrative expenses.—The requested authorization to use $455,000 of corporate income in 1955 is based upon the assumption there will be no abnormal demands on the resources of the Corporation and that the requested authorization will permit the Corporation to minimize or avoid unfavorable developments and to handle the anticipated number of applications in connection with insurance of accounts.

FINANCING OPERATIONS

The 1955 program provides for net investments of $12.6 million in United States Treasury bonds and notes as compared with an estimated $11.2 million in 1954 and the actual increase of $8.7 million in 1953. Projections of operations and financial condition indicate that investments held as of June 30, 1955, at par value, will aggregate $242 million.

The Corporation is retiring its original capital stock held by the Secretary of the Treasury at par in amounts equivalent to 50 percent of annual net income. Of the $100 million of original capital stock $23 million has been retired, and with an additional payment of approximately $10.4 million in 1955 the outstanding stock will be reduced to $66.6 million. Funds for stock retirement payments are obtained through the redemption of United States Treasury notes held by the Corporation.

Through June 30, 1953, the Corporation has paid $35.7 million in lieu of dividends on capital stock. It is estimated that additional payments will be made to the Secretary of the Treasury of $1.7 million in 1954 and $1.5 million in 1955.

OPERATING RESULTS AND RETAINED EARNINGS

Income of the Corporation consists primarily of insurance premiums, admission fees, and interest on investments in Government obligations. Total income, since 1934, of $179,223,788 has been applied as follows:

	Percent	Amount
Expenses	4.4	$7,770,533
Insurance losses	2.9	5,208,471
Return on capital stock	20.9	37,493,402
Legal reserve	71.8	128,751,382

Based upon a continuing rapid growth in the aggregate savings and creditor obligations of insured institutions, and an increase in the number of insured associations, the Corporation estimates net income before payment of a return on capital stock for fiscal 1955 of $23.9 million. This amount is $6 million or 36.5 percent above the net income for 1953. After providing for an interest payment in lieu of dividends on the capital stock of $1.3 million for 1955, at a rate determined by the Secretary of the Treasury, the balance of the net income, estimated at $22.6 million will be credited to the insurance reserves of the Corporation.

Because of the estimated insurance liability of $25.7 billion on June 30, 1955, and the statutory provision requiring the Corporation to accumulate a reserve of 5 percent of all insured accounts and creditor obligations, the Corporation does not contemplate returning any earned surplus to the Treasury.

PUBLIC ENTERPRISE FUNDS—Continued

HOME LOAN BANK BOARD—Continued

FEDERAL SAVINGS AND LOAN INSURANCE CORPORATION—Con.

FINANCIAL CONDITION

Total assets of the Corporation amounted to $223.2 million as of June 30, 1953, an increase of $9.3 million or 4.4 percent since the beginning of the year. Investment in Government obligations of $217.6 million represented 97.5 percent of corporate assets. In the absence of insurance losses, it is anticipated that total assets will reach $248.6 million by June 30, 1955.

The Corporation is required by law to accumulate a reserve of 5 percent of all insured accounts and creditor obligations of insured institutions before collection of premiums may be discontinued. As of June 30, 1953, this statutory requirement amounted to approximately $948.5 million. The insurance reserve as of that date amounted to $128.7 million or 0.68 percent of the insured liability of $18,970 million.

Liquidation of Home Owners' Loan Corporation, Home Loan Bank Board

BUSINESS-TYPE STATEMENTS

PROGRAM HIGHLIGHTS

The corporate existence of the Home Owners' Loan Corporation will end in fiscal year 1954. Of the $75,000 made available for final liquidation of the Corporation, $21,071 will be returned to the Treasury. The Home Owners' Loan Corporation liquidation unit will be abolished at the close of October 31, 1953.

urban home owners. The Corporation's lending authority expired on June 12, 1936, and since that time it has been in liquidation. Under the provisions of Public Law 94, 83d Congress (67 Stat. 126), the Corporation's dissolution date is February 3, 1954. All loan accounts have been disposed of, and $13,993,589, representing surplus from its operations, have been turned over to the Treasury. The account will be closed with the final liquidation of interest payable and the payment of matured bonds as presented by the public.

PURPOSE AND FINANCIAL ORGANIZATION

The Administration, created by the National Housing Act of 1934, is a noncorporate business-type agency made subject to the Government Corporation Control Act by the Housing Act of 1948. The principal purposes of the Administration are to stabilize the mortgage market and to improve home-financing practices and housing standards and conditions, through insurance of loans and investments to finance the production, purchase, repair, and improvement of residential structures. On June 30, 1953, a total of $30.8 billion of insurance had been written, of which $16.7 billion was outstanding.

The Administration maintains eight insurance funds: (1) A fund for insuring repair and improvement loans and mortgage loans under title I; (2) a fund for insuring mortgages on individual dwellings under title I (sec. 8); (3) a mutual mortgage insurance fund for insuring mortgages on 1- to 4-family dwellings under title II; (4) a fund for insuring mortgages on multifamily housing projects, including cooperative housing, under title II; (5) a fund for emergency and special-incentive mortgage and loan insurance under title VI; (6) an investment insurance fund for operations under title VII; (7) a military housing insurance fund for operations under title VIII; and (8) a fund for insuring defense housing mortgages under title IX.

The mutual mortgage insurance fund differs from other insurance funds in that insured mortgages are grouped together with others having similar risk characteristics and maturity dates, and the mortgagors in each group receive any excess of fees and premiums paid over losses and expenses allocable to the group.

All of the Administration's insurance programs are income producing. Income is derived from insurance premiums, appraisal and miscellaneous fees, and interest on investments in Government securities.

ANALYSIS OF BUDGET PROGRAMS

The estimates reflect assumptions that the postwar upward movement of residential building and real estate activity has leveled off. It is assumed that under existing legislation there will be approximately 900,000 nonfarm housing starts.

1. *Repair and improvement loan insurance, title I.*—Financial institutions are insured against losses up to 10 percent on loans for the alteration, repair, and improvement of residential properties. The loans insured are

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

characteristically short term, unsecured notes currently averaging around $680. Estimates are set forth below:

	1953 actual	1954 estimate	1955 estimate
Initiation: Loans insured	1,495,846	[1] 2,375,600	1,750,000
Maintenance of insurance in force (number of notes), end of year (classes 1 and 2 only)	3,623,433	4,699,057	4,763,433
Settlement:			
Claims	35,407	40,000	39,000
Average defaulted notes in process of collection	144,300	145,000	147,500

[1] Includes 1954 estimated receipts of $1,900,000; 391,900 backlog from 1953 and 83,700 loans processed but not billed.

2. *Mortgage insurance for homes and multifamily housing, titles I and II.*—Mortgages may be insured on 1- to 4-family structures and on multifamily housing projects up to statutory limits of 80, 90, or 95 percent of appraised value, depending upon the amount and character of the loan involved. Insured mortgages may cover new and existing properties both for rent and for sale, including nonprofit cooperative housing. Insured loans may bear a higher ratio to the value of the mortgaged property, in the lower price and rental ranges, to aid in construction of homes for families of low and moderate income. Estimates are as follows:

	1953 actual	1954 estimate	1955 estimate
Initiation:			
Unit applications examined	486,850	424,900	424,000
Inspections made	836,634	788,400	779,100
Average multifamily units under inspection	14,391	15,100	14,000
Unit mortgages insured	268,542	282,500	292,300
Maintenance of insurance in force, end of year (dwelling units)	1,543,524	1,726,118	1,916,943
Settlement:			
Mortgages terminated (dwelling units)	97,997	99,906	101,475
Properties and mortgages acquired	213	269	269
Properties and mortgages on hand	229	305	324

3. *Special incentive mortgage and loan insurance, and yield insurance on rental housing investments, titles VI and VII.*—Special war-housing mortgage insurance provisions of title VI were continued until April 1948 for home mortgages and until March 1950 for rental project mortgages to provide veterans emergency housing. Other special incentive programs which were added to title VI are: (*a*) Insurance of loans for the manufacture of housing by industrial processes and short-term notes incident to the sale of such housing; (*b*) insurance of mortgages executed in connection with the sale by the Government of certain federally owned housing; and (*c*) insurance of short-term loans to finance the construction, by modern site-fabrication methods, of groups of 25 or more single-family dwellings, as well as for insured long-term financing of properties constructed under this section. Title VII provides for insurance of an annual return of 2¾ percent and a minimum annual amortization of 2 percent on equity investments in rental housing. Estimates are as follows:

	1953 actual	1954 estimate	1955 estimate
Initiation:			
Unit applications examined	399	5,000	5,000
Average multifamily units under inspection	12,555	1,400	200
Unit mortgages, loans, and investments insured	1,113	3,500	4,900
Maintenance of insurance in force (unit mortgages, loans, and investments), end of year	771,126	745,108	719,462
Settlement:			
Mortgages, loans, and investments terminated (dwelling units)	29,650	29,518	30,546
Properties and mortgages acquired	690	426	431
Properties and mortgages on hand	1,513	1,074	685

4. *Military and defense housing, titles VIII and IX.*—Rental housing is provided under title VIII, through use of private capital under insured mortgages, for civilian and military personnel of the armed services and for personnel at atomic-energy installations. This program was originally confined to housing at or near military bases, but was extended to atomic-energy plants by the Defense Housing and Community Facilities and Services Act of 1951. The 1951 act also added title IX under which mortgages found to be acceptable risks in view of needs of national defense may be insured. The housing must be within the limits of programed housing needs in defense areas designated by the President. While these programs expire by operation of law on June 30, 1954, a large amount of construction will continue throughout fiscal 1955 under commitments previously issued.

	1953 actual	1954 estimate	1955 estimate
Initiation:			
Unit applications examined	82,071	25,100

Settlement:			
Mortgages terminated (dwelling units)	27	365	100
Properties and mortgages acquired		205	200
Properties and mortgages on hand		165	225

Administrative expenses.—These are the headquarters expenses in connection with the servicing of insurance in force; the technical, administrative, and fiscal control over insuring operations; and centralized housekeeping activities. Administrative expenses amounted to $4,844,271 in fiscal 1953. The Independent Offices Appropriation Act, 1954, limits administrative expenses to $5,322,800. The estimate for fiscal 1955 is $5,350,000.

FINANCING OPERATIONS

All Federal Housing Administration operations are financed out of income. Mortgage-insurance claims are met by the issuance of debentures, which are subsequently redeemed out of insurance income and the proceeds of the sale of acquired properties and mortgages. In 1953, $41,440,800 of debentures were issued. Debentures to be issued are estimated at $53,308,450 in 1954 and $39,908,000 in 1955. Debentures were retired in 1953 in the amount of $34,093,650. Retirement of debentures in 1954 and 1955, respectively, is estimated at $12,915,200 and $46,127,550.

OPERATING RESULTS AND RETAINED EARNINGS

Operations in 1953 resulted in a net income of $71,783,625. This income was distributed entirely to insurance reserves as follows: (*a*) $40,474,471 was placed in the statutory reserves under the group accounts of the mutual mortgage insurance fund, which are available for losses, expenses, and other charges, as well as for distribution of participation shares to the participating mortgagors of group accounts having credit balances; (*b*) $335,240 was placed in the general reinsurance reserve under the mutual mortgage insurance fund, which is available to cover losses and expenses where group account balances are inadequate; (*c*) $30,973,914 was placed in the general insurance reserves under the nonmutual insurance programs.

Net income is expected to be $85,272,146 in 1954 and $99,548,000 in 1955. In the 2-year period it is estimated that income totaling $92,878,610 will be added to the

PUBLIC ENTERPRISE FUNDS—Continued

FEDERAL HOUSING ADMINISTRATION—Continued

Authorization To Expend From Corporate Debt Receipts—Continued

statutory reserves under the group accounts of the mutual mortgage insurance fund. The general reinsurance reserve under the mutual mortgage insurance fund is expected to receive $10,408,418, while an estimated $81,533,118 of insurance income will be placed in the insurance reserves under nonmutual funds.

Insurance reserves which totaled $258,595,731 on June 30, 1952, increased to $294,566,011 during fiscal 1953 and are expected to reach $371,301,309 by June 30, 1954, and $463,210,109 by June 30, 1955. These reserves are required to meet future insurance losses and expenses and are not available for return to the Treasury.

Collections of $160,684 under the title I claims program were paid into the Treasury in 1953, and it is estimated that $105,000 in 1954 and $62,800 in 1955 will be paid. It is estimated in 1954 that $65,497,433 will be repaid to the Treasury as provided under Public Laws 5 and 94, Eighty-third Congress.

FINANCIAL CONDITION

On June 30, 1952, the total investment of the United States Government and insurance reserves stood at $327,192,903. During 1953 the capital and reserves decreased to $306,628,111 as a result of Public Laws 5 and 94, Eighty-third Congress, which required that the funds advanced by the Treasury be repaid or established as a liability for future repayment. It is estimated that capital and reserves will reach $383,345,557 by June 30, 1954, and $475,242,757 by June 30, 1955.

INSURANCE AUTHORITY

On March 10, 1953, Public Law 5, Eighty-third Congress, increased the title I, section 2, insurance authorization by $500 million, and on June 30, 1953, Public Law 94, Eighty-third Congress, increased the general mortgage insurance authorization under section 217 by $1,500 million. The increases authorized in 1953 provide adequate insurance authorizations to carry all programs through fiscal year 1954. Additional insurance authority will be required for mortgage insurance in 1955.

PUBLIC HOUSING ADMINISTRATION

[Submitted under the Government Corporation Control Act]

INTRODUCTORY STATEMENT

The Administration has direct or delegated responsibility for four programs:

1. Programs for which the Administration is directly responsible are:

(*a*) *United States Housing Act.*—(1) Federally aided low-rent housing under the United States Housing Act of 1937; (2) federally owned slum-clearance and other low-rent projects; (3) the expanded low-rent housing program provided by title III of the Housing Act of 1949; and (4) labor camps transferred from the Department of Agriculture by title II of the Housing Act of 1950.

(*b*) *Subsistence homesteads and greentowns.*—Residual land, farmhouses, and a few subsistence homestead units together with mortgages on property disposed of are all that remain of this liquidating program.

2. Programs administered under delegated authority from the Housing and Home Finance Administrator are:

(*a*) *Public war housing.*—Management and disposition of public war housing projects under the Lanham and related acts, including defense housing developed under authority of the Defense Housing and Community Facilities and Services Act of 1951, as amended.

(*b*) *Veterans' re-use housing.*—Supervision over local management of temporary dwellings for veterans constructed under title V of the Lanham Act and the disposition of such properties by transfer to eligible local bodies as provided in the Housing Act of 1950.

The administrative expenses of the Administration in performing necessary functions for these four programs are separately presented in consolidated form. These expenses are paid from a single fund and distributed on a workload basis to the four programs.

United States Housing Act Program

BUDGETARY AUTHORIZATION SCHEDULES

Administrative Expenses, Public Housing Administration

Administrative expenses: For administrative expenses of the Public Housing Administration, [$6,950,000] *$7,900,000*, to be merged with and expended under the authorization for such expenses contained in title II of this Act. (*First Independent Offices Appropriation Act, 1954.*)

Appropriated 1954, **$6,950,000** Estimate 1955, **$7,900,000**

AMOUNTS AVAILABLE FOR OBLIGATION

Appropriation or estimate (obligations incurred)—1953, $8,000,000; 1954, $6,950,000; 1955, $7,900,000.

ANALYSIS OF EXPENDITURES

Obligations incurred during the year (total expenditures out of current authorizations—paid into the revolving fund)—1953, $8,000,000; 1954, $6,950,000; 1955, $7,900,000.

Annual Contributions, Public Housing Administration

Annual contributions: For the payment of annual contributions to public housing agencies in accordance with section 10 of the United States Housing Act of 1937, as amended (42 U. S. C. 1410), [$32,500,000] *$69,100,000*: *Provided*, That except for payments required on contracts entered into prior to April 18, 1940, no part of this appropriation shall be available for payment to any public housing agency for expenditure in connection with any low-rent housing project, unless the public housing agency shall have adopted regulations prohibiting as a tenant of any such project by rental or occupancy any person other than a citizen of the United States, but such prohibition shall not be applicable in the case of a family of any serviceman or the family of any veteran who has been discharged (other than dishonorably) from, or the family of any serviceman who died in, the Armed Forces of the United States within four years prior to the date of application for admission to such housing: *Provided further*, That all expenditures of this appropriation shall be subject to audit and final settlement by the Comptroller General of the United States under the provisions of the Budget and Accounting Act of 1921, as amended: *Provided further*, That unless the governing body of the locality agrees to its completion, no housing shall be authorized by the Public Housing Administration, or, if under construction continue to be constructed, in any community where the people of that community, by their duly elected representatives, or by referendum, have indicated they do not want it, and such community shall negotiate with the Federal Government for the completion of such housing, or its abandonment, in whole or in part, and shall agree to repay to the Govern-

ment the moneys expended prior to the vote or other formal action whereby the community rejected such housing project for any such projects not to be completed plus such amount as may be required to pay all costs and liquidate all obligations lawfully incurred by the local housing authority prior to such rejection in connection with any project not to be completed: [*Provided further*, That, in any case where the Public Housing Administration (after the approvals on the part of the governing body of the locality required by law) has entered into a financial assistance contract with a local housing authority covering any low-rent housing projects to be constructed in such locality and, (a) thereafter but prior to the effective date of this Act, a majority of the members of the governing body of the locality, and the people of the locality have voted against any such low-rent housing projects, and (b) the local housing authority and the governing body of the locality agree to a modification of the agreement providing the required local cooperation in connection with such low-rent housing projects, the preceding proviso shall not be applicable and: (1) the Public Housing Administration shall not, unless the governing body of the locality shall, by resolution, request such action, (a) authorize the award of any contract for the construction of any such low-rent housing project, or (b) make any further advance of funds on account of any such project for which the main construction contract has not heretofore been awarded, excepting only such funds as may be required by the local housing authority (i) to pay all costs and liquidate all obligations heretofore properly incurred by it in connection with any such project which pursuant to such modification is to be terminated and (ii) to pay costs in connection with the liquidation (including the sale of land or other assets) of any such terminated project; (2) in the liquidation of any such terminated project no claim shall be made by the local housing authority or the Public Housing Administration against the locality or its governing body on account of such termination; (3) the Public Housing Administration shall absorb as a loss, and shall release the local housing authority from, all claims, if any, of said Administration in connection with such terminated project in excess of the net amount realized from the sale by the local housing authority of all land (which if sold to other than a public agency shall be after public advertisement to the highest responsible bidder but if sold to a public agency may be at a price equal to the purchase price of the land, exclusive of improvements, as approved by the Public Housing Commissioner) and other assets acquired and held in connection with such terminated project; and (4) the Secretary of the Treasury shall credit as a payment upon the note or notes of the Public Housing Administration executed and delivered in connection with funds obtained pursuant to section 20 of the United States Housing Act of 1937, as amended, an amount equal to such loss as certified by the Public Housing Commissioner:] *Provided further*, That the record of expenditure of the Public Housing Administration and of the local housing authority on any public housing project shall be open to examination by the responsible authorities of any community in which such project is located, or by the local public housing authority, or by any firm of public accountants retained by either of the foregoing: *Provided further*, That no housing unit constructed under the United States Housing Act of 1937, as amended, shall be occupied by a person who is a member of an organization designated as subversive by the Attorney General: *Provided further*, That the foregoing prohibition shall be enforced by the local housing authority, and that such prohibition shall not impair or affect the powers or obligations of the Public Housing Administration with respect to the making of loans and annual contributions under the United States Housing Act of 1937, as amended: *Provided further*, That notwithstanding the provisions of the United States Housing Act of 1937, as amended, the Public Housing Administration shall not, with respect to projects initiated after March 1, 1949, [(1)] authorize during the fiscal year [1954] *1955* the commencement of construction of in excess of [twenty] *thirty-five* thousand dwelling units [or (2) after the date of approval of this Act, enter into any new agreements, contracts, or other arrangements, preliminary or otherwise, which will ultimately bind the Public Housing Administration during fiscal year 1954 or for any future years with respect to loans or annual contributions for any additional dwelling units or projects unless hereafter authorized by the Congress to do so, and during the fiscal year 1954 the Housing and Home Finance Administrator shall make a complete analysis and study of the low-rent public housing program and, on or before February 1, 1954, shall transmit to the Appropriations Committees of the House and Senate his recommendations with respect to such low-rent public housing program], *and clause (2) of the last proviso under this head in the First Independent Offices Appropriation Act, 1954, shall cease to be effective upon enactment of this Act. (First Independent Offices Appropriation Act, 1954.)*

Appropriated 1954, **$32,500,000** Estimate 1955, **$69,100,000**

AMOUNTS AVAILABLE FOR OBLIGATION

Appropriation or estimate (obligations incurred)—1953, $29,880,000; 1954, $32,500,000; 1955, $69,100,000.

ANALYSIS OF EXPENDITURES

Obligations incurred during the year (total expenditures out of current authorizations—paid into the revolving fund)—1953, $29,880,000; 1954, $32,500,000; 1955, $69,100,000.

Loan Authorizations, United States Housing Act Program

Federal Reserve Bank of St. Louis

ated low-rent housing by authorizing loans, and annual contributions to maintain the low-rent character of the projects. Subsequently, the act of June 28, 1940, permitted the construction of permanent housing for war workers, subject to conversion to low-rent use after the emergency. The program was expanded by the Housing Act of 1949 which authorized the construction of an additional 810,000 housing units over a 6-year period, increased the borrowing power of the Administration to $1.5 billion outstanding at any one time, and increased the authorization to contract for annual contributions to $336 million for periods up to 40 years. The Housing Act of 1950 transferred to the Administration labor supply centers, labor homes, and labor camps administered by the Secretary of Agriculture, to be used for low-income agricultural workers and their families. This act also authorized the transfer of certain permanent war housing projects to local authorities for low-rent use in accordance with the 1937 act, and such projects, when so transferred, are administered as part of the United States Housing Act program.

ANALYSIS OF BUDGET PROGRAMS

The major activities are (*a*) the development and financing of low-rent projects, and (*b*) the management of projects, including the payment of annual contributions, for which an appropriation of $69,100,000 is requested for 1955.

Development and capital financing.—Under the United States Housing Act, low-rent housing is primarily a subject for local determination and control, Federal support being generally confined to making capital loans, paying annual contributions, and reviewing local actions for conformity with law. The cost of the project is limited by the basic act.

Legislative proposals will shortly be submitted to provide for new methods of assisting local communities in making decent homes available for families of low income. These proposals will be based in large part on the recommendations of the President's Advisory Committee on Housing Policies and Programs. They will emphasize the problems of low-income families displaced by slum-prevention and clearance programs.

A transitional period, however, is inevitable until the effectiveness of the new methods in reducing the need for the present program is demonstrated. Meanwhile, the existing low-rent program must be continued at the minimum level adequate to avoid undue hardship to low-income families, and delay of other vital programs requiring relocation of such families. Accordingly, the budget provides for 35,000 additional low-rent units to be started during the fiscal year 1955; correspondingly, language is included to terminate the effect of the special provision included in the Appropriation Act for 1954, which in effect froze the program during the current year pending reexamination by the Housing and Home Finance Administrator and the submission to the Congress of recommendations with respect to the future program.

Private capital in the form of temporary loan notes is utilized during development to the maximum extent practicable in lieu of advances by the Administration. Since the Administration guarantees privately financed notes, they have excellent security and are now being sold at interest rates approximating 1.6 percent per year. All temporary loan notes are retired as soon as the local authority sells to the public long-term bonds for the project, which are secured by the Government's pledge to pay annual contributions.

Approximately 67 percent of development cost is financed through the sale to private investors of bonds maturing in 30 years; the balance is financed by the Administration in the form of permanent notes which mature in the last 10 years of the 40-year period. Most of these permanent notes will be financed by private temporary notes in the same manner as the temporary advances. The budget program for capital financing consists of permanent financing, private temporary financing, and Government financing by loans to local housing authorities. Permanent financing by the sale to private investors of local housing authority long-term bonds and securities is estimated at $492 million in 1954 and $501 million in 1955. Private temporary financing amounted to $714 million on June 30, 1953. It is estimated that private temporary financing will amount to $792 million on June 30, 1954, and $829 million on June 30, 1955. Loans to local housing authorities amounted to $603 million on June 30, 1953, and it is estimated at $436 million on June 30, 1954, and $238 million on June 30, 1955. The reduction in loans to local housing authorities is in large measure occasioned by a program of refinancing $210 million of long-term securities now held by the Government on projects developed prior to the Housing Act of 1949.

The above volume of financing is necessary in order to stay abreast of the financing requirements of the new program and to effect permanent private financing arrangements for portions of the existing program.

The following table summarizes the lending activities of the Administration in 1954 and 1955:

	1954 estimate	1955 estimate
Purchases:		
Preliminary and advance loan notes	$847,900,000	$512,603,000
Permanent and series "B" loan notes	274,690,000	218,312,000
Mortgage loan notes	344,000	
Bonds		110,000,000
Total purchases	1,122,934,000	840,915,000
Repayments:		
Preliminary and advance loan notes	849,097,000	632,033,000
Permanent and series "B" loan notes	260,500,000	261,000,000
Mortgage loan notes	5,138,000	
Bonds	175,545,000	145,000,000
Total repayments	1,290,280,000	1,038,033,000
Net change in loans to local housing authorities	−167,346,000	−197,118,000

Management.—The Administration reviews management operations of the local housing authorities, approves operating budgets, and audits books and records to assure compliance with the law and the orderly and economical operation of the projects. The dwellings are rented to low-income families at rents scaled to what the individual family can pay. Annual Federal contributions are made to cover operating deficits. The local government also contributes to achieving low rents through tax exemption and provision of municipal services.

PUBLIC ENTERPRISE FUNDS—Continued

UNITED STATES HOUSING ACT PROGRAM—Continued

The following table summarizes the annual contribution requirements for all projects:

	1953 actual	1954 estimate	1955 estimate
Number of units eligible	204,815	252,109	319,494
Fixed contribution for projects eligible for payment	$45,091,505	$65,200,000	$97,800,000
Less amounts available for reduction of fixed contribution	19,210,797	21,900,000	28,700,000
Annual contribution requirements	25,880,708	43,300,000	69,100,000

The increased annual contribution requirements in 1955 is caused by a greater number of units eligible for contributions resulting from the completion and permanent financing of new and reactivated projects and the sale to local housing authorities of federally owned projects.

In addition to the above there are the following types of projects which do not receive annual contributions:

(*a*) *Farm-labor centers.*—The majority of these centers have been rehabilitated and sold to local housing authorities under a contract which provides that full title will not be acquired until the end of a 20-year period, during which time the Government will receive net income but will not pay deficits. Of the 39 camps, 36 had been sold as of June 30, 1953.

(*b*) *Public war housing projects transferred to low-rent use.*—The estimate provides for the transfer of 7,500 units in 1954 and an additional 7,500 units in 1955 to local housing authorities for operation as low-rent projects. Under the terms of the transfer all net income will be returned to the United States Treasury for 40 years after the date of transfer.

(*c*) *Public Works Administration projects transferred to local ownership.*—The estimate provides for the transfer of 9,771 units in 1954 and an additional 6,576 units in 1955 to local ownership. The terms of sale will require that all net income be returned to the Government for 40 years after the date of transfer.

(*d*) *Federally owned projects.*—The remaining projects under Federal ownership will receive no annual contribution.

Administrative expenses.—Administrative expenses are estimated at $6,950,000 for 1954 and $7,900,000 for 1955. These amounts are merged with the funds for administrative expenses of the other programs of the Administration into a single fund, which is shown under the estimate for "Administrative expenses, Public Housing Administration."

FINANCING OPERATIONS

The budget program contemplates that outstanding borrowings from the United States Treasury will be decreased by $203,000,000 in 1954 and by an additional $225,000,000 in 1955. These repayments result from (1) a policy of utilizing private temporary financing to the maximum extent feasible, (2) a program of refinancing projects developed under the original Housing Act of 1937 on which the preponderance of the outstanding indebtedness consists of bonds held by the Administration.

PURPOSE AND FINANCIAL ORGANIZATION

This program was undertaken under the provisions of the Lanham Act (42 U. S. C. 1521), before and during World War II, to alleviate the acute shortage of housing for war workers. About one-third of the original program is still in use and serves the needs of veterans, servicemen and their families, and certain defense workers, pending disposition in accordance with law. New projects authorized by the Defense Housing and Community Facilities and Services Act of 1951 are included in the estimates.

Expenses of operation, maintenance, and disposition or removal are paid from rental and other project income.

ANALYSIS OF BUDGET PROGRAMS

The following table shows the status of the program at the end of each fiscal year:

[Number of units]

	1953 actual	1954 estimate	1955 estimate
Temporary dwellings under construction	5,733		
Available for occupancy:			
Public war housing:			
Permanent	105,296	81,796	49,296
Temporary	102,355	76,655	48,255
Defense housing	7,902	15,021	15,021
Total	215,553	173,472	112,572
Inactive temporary housing	16,186	11,886	4,786
Disposed of during the year:			
Permanent	10,968	23,500	32,500
Temporary	45,185	30,000	35,500
Total	56,153	53,500	68,000

Development.—A total of $87.5 million has been appropriated for the construction of defense housing in critical defense areas, as authorized by title III of the Defense Housing and Community Facilities and Services Act of 1951. Of this amount, $17.5 million was rescinded by the First Independent Offices Appropriation Act, 1954. With the $70 million now available, 82 projects with 15,021 units will be completed, of which 47 projects and 7,902 units were under active management as of June 30, 1953.

Management.—About 40 percent of the projects are presently managed directly by the Government and the remainder by local housing authorities under lease agreements which require that all net income be returned to the Government. The following table shows the management status of the program at the end of each fiscal year:

[Number of units]

	1953 actual	1954 estimate	1955 estimate
Federally operated:			
Family dwellings	81,330	77,289	62,789
Trailers	4,729	7,589	7,330
Total	86,059	84,878	70,119
Leased:			
Family dwellings	128,772	88,090	41,949
Dormitories	341	241	241
Trailers	381	263	263
Total	129,494	88,594	42,453
Total active program	215,553	173,472	112,572

The estimates of income and expense projected for 1954 and 1955 were developed through review and consolidation of operating budgets for each project for 1954. Total estimated income and expense show a marked decrease occasioned by the decrease in program resulting from accelerated disposition.

Disposition.—The Housing Act of 1950 authorizes transfers of (1) temporary projects to local public agencies and (2) permanent projects to local public housing agencies for operation as low-rent housing. All public war housing projects have been reviewed with the Defense Establishment and the other interested defense agencies. Projects not needed for defense purposes are being scheduled for disposition.

It is estimated that about half of the permanent units will be sold for cash; i. e., with conventional or Federal Housing Administration insured financing. The remaining sales will be made with the Public Housing Administration taking back a purchase money mortgage.

The following table indicates the number of dwellings, proceeds from sales, and original cost of property disposed of during each fiscal year:

	1953 actual	1954 estimate	1955 estimate
Transfers:			
Permanent (for low-rent use)	7,960	7,500	7,500
Temporary	35,276	20,000	18,000
Sales:			
Permanent	2,986	16,000	25,000
Demolition, removal, and other disposition, temporary	9,931	10,000	17,500
Total dwelling units	56,153	53,500	68,000
Total proceeds from sales	$12,697,360	$52,740,000	$81,675,000
Disposition expenses	1,371,663	4,196,000	5,089,000
Net proceeds	11,325,697	48,544,000	76,586,000
Total cost of housing disposed of	149,536,886	165,750,000	222,950,000

Administrative expenses.—These costs are estimated at $3,858,000 for 1954 and $3,465,000 for 1955. These amounts are merged with the funds for administrative expenses of the other programs of the Administration into a single fund, which is shown under the estimate for "Administrative expenses."

FINANCING OPERATIONS

Receipts not required for operating expenses are paid to the United States Treasury. Payments are estimated at $44,465,561 in 1954 and $63,229,819 in 1955.

OPERATING RESULTS AND RETAINED EARNINGS

As of June 30, 1955, the total estimated development cost of the program, after deducting net transfers of assets to other agencies and programs will amount to $1,475,309,684. Cumulative net income from management operations and net proceeds from disposition (before write-off of assets disposed of) are estimated at $613,569,694 as of June 30, 1955. At that time 42 percent of the total original development cost of the program under the jurisdiction of the Administration will have been returned to the Government. In addition, on June 30, 1955, there will remain in the program housing projects with an estimated book value of $443,946,673.

Inasmuch as the Government's investment in the program consists of appropriated funds, no appropriation action is required with respect to the cumulative deficit.

PUBLIC ENTERPRISE FUNDS—Continued

Homes Conversion Program

BUSINESS-TYPE STATEMENTS

PROGRAM AND PERFORMANCE

This program was substantially liquidated by the end of 1952. During its 10 years of operation, almost 50,000 dwelling units were provided for inmigrant war workers by leasing existing structures and remodeling them.

The original Federal investment of $90,109,401 has returned to the Treasury a total of $29,278,238. Inasmuch as the Government's investment consisted of appropriated funds, no appropriation action is required with respect to the cumulative deficit.

Interest income	$209,331	$350,000	$400,000

PURPOSE AND FINANCIAL ORGANIZATION

This program is operated under section 3 of the act of June 29, 1936 (40 Stat. 2036). Receipts from operations are available for operation, maintenance, administration, and disposition. Final liquidation of substantially all real property is scheduled for completion during 1954.

ANALYSIS OF BUDGET PROGRAMS

Management operations.—As of June 30, 1953, there remained under management the commercial property of 2 greentown projects together with 46 rural farm dwellings and 6,485 acres of vacant land. In addition there were nine subsistence homestead units under lease and purchase contracts. By the end of 1954 management operations will consist of servicing mortgage loan notes, including the regular collection of principal payments.

Disposition.—All property remaining in the greentown projects is scheduled for sale during 1954. Thereafter, disposition operations will be negligible, consisting of the liquidation of six dwellings under lease and purchase contracts.

Administrative expenses.—These costs are estimated at $17,000 for 1954 and $10,000 for 1955. These amounts are merged with the funds for administrative expenses of the other programs of the Administration into a single fund, which is shown under the estimate for "Administrative expenses."

FINANCING OPERATIONS

Payments to the United States Treasury are estimated at $1,931,595 in 1954 and $925,679 in 1955.

OPERATING RESULTS AND RETAINED EARNINGS

As of June 30, 1953, the Government investment in this program amounted to $60,469,782, representing book value at the date of transfer to the Administration. Cumulative net income from management operations and net proceeds from disposition (before writeoff of assets disposed of) are estimated at $32,319,469 as of June 30, 1955, of which $21,945,069 will have been returned to the Treasury. Thus 53 percent of the total investment will have been recovered through operations and disposition.

Inasmuch as the Government's recorded investment in the program consists of funds appropriated to the original construction agency, no appropriation action is required with respect to the cumulative deficit.

	1953 actual	1954 estimate	1955 estimate
Average number of dwelling units available for occupancy	24,552	17,528	12,153
Transfers and other disposition:			
Federally operated		16	1,481
Operated by local bodies	9,491	3,984	4,519
Number of dwelling units at year end:			
Federally operated	1,680	1,664	183
Operated by local bodies	17,844	13,860	9,341

PURPOSE AND FINANCIAL ORGANIZATION

This temporary postwar emergency program was undertaken under title V of the Lanham Act to alleviate the housing difficulties of servicemen, veterans, and their families, including veterans attending educational institutions, by relocation and re-use of surplus Federal structures. Approximately $442.7 million were allotted to the Public Housing Administration for development. Funds derived from the operation of the projects are available for operation and maintenance, for disposition and removal of the projects, and for administrative expenses. Each quarter, operating funds in excess of amounts needed for liquidation of outstanding liabilities are paid to the Treasury (60 Stat. 9).

ANALYSIS OF BUDGET PROGRAMS

Development.—Construction is completed except for final settlement of contractors' claims.

Management.—With the exception of two federally operated projects, all projects are managed by the participating local bodies, with the Administration exercising advisory functions. Federally financed projects are required to return all net income to the Administration. Projects financed in whole or in part by the participating local bodies are authorized to reimburse themselves from net income for their development expenditures. The average number of units in active management and net operating income are shown below:

	1953 actual		1954 estimate		1955 estimate	
	Federally operated	Operated by local bodies	Federally operated	Operated by local bodies	Federally operated	Operated by local bodies
Average number of active units in program	1,680	22,872	1,676	15,852	553	11,600
Net operating income	$159,049	$1,623,600	$63,600	$1,046,200	−$5,300	$696,000

Disposition.—The Housing Act of 1950 requires the transfer to local bodies, without monetary consideration, of projects located on land owned or controlled by the local bodies. The act also authorizes the transfer of such projects located on land owned or controlled by the United States, provided the local body pays for the land. The disposition of one of the two federally operated projects will be completed in 1955. Transfer activity and other disposition are shown in the table below:

	1954 estimate		1955 estimate	
	Projects	Units	Projects	Units
In program at beginning of year:				
Federally operated	2	1,680	2	1,664
Operated by local bodies	120	17,844	90	13,860
Total	122	19,524	92	15,524
Disposition:				
Transfers	20	2,500	7	1,000
Other disposition	10	1,500	33	5,000
Total	30	4,000	40	6,000
In program at year end:				
Federally operated	2	1,664	1	183
Operated by local bodies	90	13,860	51	9,341
Total	92	15,524	52	9,524
Proceeds from sales of property	$205,000		$9,309,606	

Administrative expenses.—These costs are estimated at $150,000 for 1954 and $125,000 for 1955. These amounts are merged with the funds for administrative expenses of the other programs of the Administration into a single fund, which is shown under the estimate for "Administrative expenses, Public Housing Administration."

FINANCING OPERATIONS

Payments of unobligated receipts to the United States Treasury are estimated at $1,201,489 in 1954 and $1,794,750 in 1955.

OPERATING RESULTS AND RETAINED EARNINGS

As of June 30, 1953, total development cost of the program, including net transfers of assets from other agencies and programs, amounted to $482,940,514. Cumulative net income from management operations and net proceeds from disposition (before write-off of assets disposed of) are estimated at $39,866,954 as of June 30, 1955. In addition there will remain for future disposition properties with an estimated book value of $4,543,000. Inasmuch as the Government's investment in the program consists of appropriated funds, no appropriation action is required with respect to the cumulative deficit.

Description	1953 actual	1954 estimate	1955 estimate
1. Development	$6,000,500	$3,606,000	$3,920,000
2. Management	5,739,442	5,623,000	5,496,000
3. Disposition	990,500	1,746,000	2,084,000
Administrative expenses incurred	12,730,442	10,975,000	11,500,000

PROGRAM AND PERFORMANCE

The Housing Act of 1948 (62 Stat. 1268) authorized a consolidated administrative expense budget. Administrative expenses are distributed to each program on a basis of special surveys and analyses of employees' actual working time. The distribution of costs is shown in the following table:

STATEMENT OF SOURCES AND APPLICATION OF FUNDS

	1953 actual	1954 estimate	1955 estimate
FUNDS APPLIED			
To administration of project development activity:			
United States Housing Act program	$4,923,700	$3,366,000	$3,920,000
Defense housing program	1,076,800	240,000	
Total development activity	6,000,500	3,606,000	3,920,000
To administration of project management activity:			
United States Housing Act program	3,234,300	3,584,000	3,980,000
Subsistence homesteads and greentowns program	37,100	12,000	10,000
Public war and defense housing program	2,340,942	1,902,000	1,416,000
Veterans' re-use housing program	127,100	125,000	90,000
Total management activity	5,739,442	5,623,000	5,496,000
To administration of project disposition activity:			
Subsistence homesteads and greentowns program	82,500	5,000	
Public war housing program	870,400	1,716,000	2,049,000
Veterans' re-use housing program	37,600	25,000	35,000
Total disposition activity	990,500	1,746,000	2,084,000
Total funds applied	12,730,442	10,975,000	11,500,000
Unobligated balance	237,293		
Total administrative expense limitation	12,967,735	10,975,000	11,500,000
FUNDS PROVIDED			
By appropriation:			
United States Housing Act program	8,000,000	6,950,000	7,900,000
Defense housing program	1,076,800	240,000	
Total appropriation	9,076,800	7,190,000	7,900,000
By program receipts:			
United States Housing Act program	158,000		
Subsistence homesteads and greentowns program	119,600	17,000	10,000
Public war and defense housing program	3,211,342	3,618,000	3,465,000
Veterans' re-use housing program	164,700	150,000	125,000
Total program receipts	3,653,642	3,785,000	3,600,000
Total funds provided	12,730,442	10,975,000	11,500,000
Unobligated balance	237,293		
Total administrative expense limitation	12,967,735	10,975,000	11,500,000

The Administration's four programs are administered by a single integrated organization. Administrative functions are divided into three major categories: Development, management, and disposition. Each of these categories is summarized below:

Development.—The Housing Act of 1949 authorizes construction starts of 135,000 locally owned low-rent housing units each year subject to change by the President up to 200,000 units or down to 50,000 units depending upon economic conditions.

The First Independent Offices Appropriation Act, 1954 limited construction starts in 1954 to 20,000 units under annual contributions contracts. The budget program authorizes 35,000 units to start construction in 1955.

The Defense Housing and Community Facilities and Services Act of 1951 authorizes $100 million for construction of Federally owned housing in critical defense areas. An appropriation of $87.5 million was made of which $17.5 million was later rescinded. The $70 million thus available is expected to provide about 82 projects with 15,000 dwelling units. It is anticipated that all construction will be completed in fiscal year 1954. The following

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

table presents the development activity by years for all programs:

NUMBER OF DWELLING UNITS

Program	1953 actual	1954 estimate	1955 estimate
United States Housing Act program:			
Commencement of construction authorized	36,722	20,998	35,000
Completed for occupancy	63,735	70,000	25,000
Defense housing development:			
Construction started	9,024	1,400	
Completed for occupancy	7,577	7,119	

Management.—This applies to locally owned projects developed and operated with Federal financial assistance and to federally owned projects. Dependent on the type of program, management is conducted by local authorities which own and operate low-rent housing projects and also lease certain of the federally owned projects; by sponsoring municipalities and educational institutions; by contract managers (real estate brokers), and by the Administration itself in the case of federally operated projects.

A net decrease of 14,894 units under management is expected by June 30, 1955, as a result of disposition of war and veterans' re-use housing by sale, transfer and demolition almost offset by completion of low-rent housing. Management workload by program is as follows:

NUMBER OF DWELLING UNITS UNDER MANAGEMENT AT END OF YEAR

	1953 actual	1954 estimate	1955 estimate
Low-rent public housing	306,934	384,208	416,483
Subsistence homesteads and greentowns program	65	6	3
Public war and defense housing	232,079	185,698	117,698
Veterans' re-use housing	19,524	15,524	9,524
Total management	558,602	585,436	543,708

Disposition.—Liquidation of the Government's interest in war and veterans' re-use housing is proceeding rapidly following an almost complete suspension of this activity at the outbreak of hostilities in Korea, pending a review of the need in the defense effort for existing dwelling units. The budget program contemplates the following disposal of dwelling units:

Program	1953 actual	1954 estimate	1955 estimate
Subsistence homesteads and greentowns:			
Disposed of	1,507	59	3
Public war housing:			
Permanents transferred to low-rent use	7,960	7,500	7,500
Permanents sold or otherwise disposed of	3,008	16,000	25,000
Temporaries transferred to local, public or Federal agencies	35,276	20,000	18,000
Temporaries sold, demolished, or otherwise disposed of	9,909	10,000	17,500
Total	56,153	53,500	68,000
Veterans' re-use housing:			
Disposition by transfer	5,844	2,500	1,000
Disposition by removal or other means	3,647	1,500	5,000
Total	9,491	4,000	6,000
Total disposition	67,151	57,559	74,003

[REDUCTIONS IN APPROPRIATIONS]

[Defense housing: The sum of $17,500,000 of funds heretofore appropriated under this head is hereby rescinded, and such amount shall be covered into the Treasury promptly upon enactment of this Act: *Provided*, That the amount hereby rescinded may be reduced by an amount determined by the Administrator to be required as a reserve for overruns and contingencies in connection with projects heretofore assigned for construction pursuant to Public Law 139 (Eighty-second Congress).]

[Alaska housing: Of amounts heretofore appropriated under this head for the revolving fund authorized by the Alaska Housing Act, Public Law 52 (Eighty-first Congress), the Administrator shall cause to be covered into the Treasury a total of $5,000,000 in one or more deposits as soon as practicable, but not later than June 30, 1954.]

[Advance planning of non-Federal public works: The sum of $4,600,000 of funds heretofore appropriated under this head is hereby rescinded, and such amount shall be covered into the Treasury promptly upon enactment of this Act.] (*First Independent Offices Appropriation Act, 1954.*)

Various officials requiring travel between Federal Housing Administration Washington area buildings are permitted to accompany messengers on the regularly scheduled trips of the 2 vehicles. Third vehicle used for special mail and limited number of passenger trips by top-level officials in the conduct of Government business.
PUBLIC HOUSING ADMINISTRATION								
Administrative expenses, Public Housing Administration.	----------	----------	----------	----------	----------	23	$5,000	For use of Public Housing Administration employees in the prosecution of official business when the use of common carrier is not practicable. Hire of motor vehicles will be made only in areas where no Government vehicle is available on a trip basis.
Total, Housing and Home Finance Agency.	10	14,000	10	3,000	11,000	59	5,000	

PROPOSED FOR LATER TRANSMISSION

Annual contributions, Public Housing Administration (under existing legislation, 1954).—A supplemental appropriation for 1954 in the amount of $10,800,000 is needed to meet contractual obligations for payment of annual contributions on low-rent housing projects.

ANALYSIS OF EXPENDITURES

	1953 actual	1954 estimate	1955 estimate
Proposed supplemental appropriation	----------	$10,800,000	----------
Expenditures out of current authorizations—paid into the revolving fund	----------	10,800,000	----------

Advance planning of local public works, Office of the Administrator, Housing and Home Finance Agency (under proposed legislation, 1954).—A supplemental appropriation is required for 1954 in the amount of $10,000,000 to provide capital for a revolving fund to be authorized under legislation to be proposed. The fund will be employed to make interest-free loans to local governments for the planning of local public works, and thus to help assure continuous local preparation of plans for needed projects. Such loans will be repayable when construction is started, or at the end of 3 years, whichever is earlier.
