PROPOSED FOR LATER TRANSMISSION

Construction, general, Corps of Engineers, civil (under existing legislation, 1956).—A proposed supplemental appropriation in the amount of $6 million is included in the budget for fiscal year 1956 to initiate the dredging of the 40-foot channel in the Delaware River between Philadelphia, Pa., and Trenton, N. J. Submission of the request for supplemental appropriations to the Congress is contingent upon the reaching of agreement with local interests that they will contribute at least $18 million in cash or an equivalent amount of work toward the channel deepening. In the meanwhile, a review is being made of the arrangements contemplated for the replacement of obstructive bridges across the channel, toward the end of securing suitable agreements for local sharing of costs under principles similar to those set forth in Public Law 647, approved June 21, 1940.

Proposed supplemental appropriation			$6,000,000
Obligated balance carried forward			−3,000,000
Total expenditures (out of current authorizations)			3,000,000

General investigations, Corps of Engineers, civil (under proposed legislation, 1956).—There is included in the budget for fiscal year 1956 a supplemental appropriation of $1 million to initiate a comprehensive investigation and report on various international plans for the economic development of power from tidal flows in Passamaquoddy Bay. An investigation of the Passamaquoddy project will involve detailed analyses of the numerous factors pertaining to an unusual type of power development. The cost of these preauthorization studies is estimated at $3 million.

Participating projects, Corps of Engineers, civil (under proposed legislation, 1956).—There is included in the budget for fiscal year 1956 a supplemental appropriation of $10 million to provide for the Federal share, in cooperation with States, local governments, or private groups, in the development of partnership water resources projects. Of the total provided, $5 million is proposed for application as follows: Cougar Reservoir, Oreg., $2 million; Green Peter Reservoir, Oreg. (including White Bridge Reservoir), $1 million; and Rocky Reach Reservoir, Wash., $2 million. The balance of $5 million is for application to similar projects as yet unspecified.

Operating expenses, Canal Zone Government (under existing legislation, 1955).—A supplemental estimate of $300,000 for fiscal year 1955 is proposed for later transmission. Of this amount, $100,000 is necessitated by added workload placed upon Canal Zone Government hospitals as a result of section 107 of the Civil Functions Appropriation Act, 1955, approved June 30, 1954, and will be fully reimbursed by revenue covered into the Treasury. The application of Public Law 737, approved September 1, 1954, results in an additional minimum requirement of $200,000 for payment of employees' home leave travel expense.

PROGRAM AND PERFORMANCE

The laws enforced by the Administration are designed to protect consumers against adulterated and misbranded foods, drugs, cosmetics, therapeutic devices, and caustic poisons. Control is exercised through factory and warehouse inspections and examinations of interstate and import shipments.

1. *General enforcement operations.*—Inspections of domestic plants and examinations of interstate shipments are planned according to the relative incidence and seriousness of probable violations. This involves about 96,000 manufacturers, shippers, and warehouses. Many retail establishments are subject to the prohibition against adulteration or misbranding of articles from interstate sources. Violations are reported to the Department of Justice with appropriate recommendations for legal action. Voluntary compliance with the law is promoted and many corrections are effected without court action. Standards for foods, and tolerances for poisonous substances in foods are promulgated after investigations and formal hearings.

Workload data are as follows:

PROGRAM AND PERFORMANCE

1. *Instruction and administration.*—Gallaudet College is the only college in the country exclusively devoted to the advanced education of the deaf and to training teachers of the deaf. It also operates Kendall School for the elementary and secondary education of deaf children primarily from the District of Columbia and surrounding areas. The college plans a small research program relating to the educational problems of those whose hearing is impaired. The estimate provides for additional staff and increased salaries.

PROGRAM AND PERFORMANCE

The University consists of an undergraduate college, a graduate school offering the master's degree, and eight professional schools. Federal funds provide 52.5 percent of the operating costs.

1. *General administration.*—The University is administered by a private board of trustees and staff of officers.

2. *Resident instruction and departmental research.*—This activity includes all direct expenditures for the operation of the educational program in the 10 schools and colleges. The estimate provides for additional medical faculty and for increases in teaching salaries.

3. *Library.*—The general library serves the needs of 10 schools and colleges, and supervises, in part, the professional collections.

4. *Operation and maintenance of the physical plant.*—The operation and maintenance staff services 44 buildings located on the University's 60-acre campus. The estimate provides for additional staff to maintain an expanded physical plant and for repairs to buildings and grounds.

5. *Auxiliary enterprises and noneducational expenses.*—The dormitories, food services, book stores and athletic program included under this activity are self-supporting. The noneducational expenses cover cost of student aid program.

PROGRAM AND PERFORMANCE

Payments are made for operating expenses of schools in districts where Federal activities account for a significant part of enrollments. A supplemental appropriation of $19,200,000 is anticipated for 1955 primarily as a result of the enactment of Public Law 732, in the last session of Congress, which postponed for one year the effective date of a provision that school districts absorb a greater portion of the impact of Federal activities on attendance. The application of this provision in 1956 will reduce budgetary requirements by $9,200,000.

PROGRAM AND PERFORMANCE

Grants are made for school construction in districts overburdened by Federal activities. Public Law 731 extended for an additional 2 years the program authorized by title III of Public Law 815, as amended. A supplemental appropriation of $70 million is estimated for 1955 to initiate the extended program, and the budget for 1956 provides the remaining amounts to pay for projects for eligible school districts.

PUBLIC HEALTH SERVICE

INTRODUCTORY STATEMENT

The Service attends to the Federal interest in safeguarding public health by: Providing grants-in-aid and technical and consultative services to States for such public health services as the prevention and control of disease, and hospital planning and construction; conducting scientific research and investigations in biology and medicine; enforcing foreign and interstate quarantine regulations; collecting and disseminating information on health problems; and providing medical and hospital care for legal beneficiaries. To perform these major functions the Service is organized into four bureaus: The National Institutes of Health in the research and investigations area; the Bureau of State Services in the Federal-State cooperative health program area; the Bureau of Medical Services in the medical care, hospital, and foreign quarantine area; and the Office of the Surgeon General in the area of administration, formulation of general policy, and planning.

For necessary expenses in carrying out the Public Health Service Act, as amended (42 U. S. C., ch. 6A) (hereinafter referred to as the Act), and other Acts, including expenses for active commissioned officers in the Reserve Corps and for not to exceed one thousand five hundred commissioned officers in the Regular Corps, *and purchase of not to exceed one hundred and sixty passenger motor vehicles, of which one hundred and ten shall be for replacement only,* as follows: (*Department of Health, Education, and Welfare Appropriation Act, 1955.*)

Assistance to States, General, Public Health Service

Assistance to States, general: To carry out the purposes, not otherwise specifically provided for, of section 314 (c) of the Act; to provide consultative services to States pursuant to section 311 of the Act; to make field investigations and demonstrations pursuant to section 301 of the Act; to provide for collecting and compiling mortality, morbidity, and vital statistics; and not to exceed $1,000 for entertainment of officials of other countries when specifically authorized by the Surgeon General; [$13,000,000, of which not more than $2,400,000 shall be available for personal services] *$13,660,000.* (*Department of Health, Education, and Welfare Appropriation Act, 1955.*)

Appropriated 1955, **$13,000,000** Estimate 1956, [a] **$13,660,000**

[a] Includes $600,000 for activities previously carried under "Sanitary engineering activities, Public Health Service." Excludes $18,000 for activities transferred in the estimates to "Salaries and expenses, Office of the Secretary of Health, Education, and Welfare." The amounts obligated in 1954 and 1955 are shown in the schedule as comparative transfers.

PROGRAM AND PERFORMANCE

1. *Grants to States for venereal disease control.*—This activity supports casefinding and treatment in selected areas where venereal disease prevalence still remains high, with particular emphasis on: (*a*) areas with large complements of military and defense-industrial workers; (*b*) areas containing large numbers of transients; and (*c*) areas with high venereal disease incidence rates among young age groups.

2. *Direct operations*—(*a*) *Clinical and laboratory research.*—Research and evaluation activities are directed toward maintenance of uniformly satisfactory nationwide serologic services; development of an immunizing agent for syphilis; evaluation of more effective methods of therapy; and analysis and evaluation of activity and morbidity data to alert health workers to the development of potential problem areas and the effectiveness of control procedures.

(*b*) *Technical assistance to States.*—Epidemiologic services are directed toward the maintenance of nationwide and international epidemiologic intelligence and the control of venereal disease in areas of particular concern to health of agricultural, industrial, and military personnel and in numerous small high-prevalence areas that might become the foci for spread of infection. Consultation is furnished to States through the regional offices in determining problem areas, infection sources, and control techniques required. Scientific information and educational media are prepared and disseminated through State agencies.

PROGRAM AND PERFORMANCE

This program provides facilities and services for the investigation, prevention, and suppression of communicable and other preventable diseases other than tuberculosis and venereal diseases, by the development, advancement, and dissemination of knowledge and techniques.

1. *General disease-prevention and control activities.*—Scientific and technical services in the fields of epidemiology, medicine, and biology including reference diagnostic laboratory services are made available to State and local health departments. Investigations, consultation, and demonstrations are among the methods used in furnishing these services. Public health workers are trained in laboratory and other public health techniques and training materials are produced for use by the States and other agencies. In 1955 approximately 37,000 laboratory specimens will be processed, an estimated 750 persons will take training in the more than 25 study courses, about 50 new audiovisual productions will be completed and more than 10,000 films will be loaned or sold. In addition, problems related to airborne and vectorborne diseases, including insect resistance to insecticides and to the use of economic poisons will be studied. The estimate includes an increase to provide for the production of diagnostic reagents not available commercially.

2. *Specific disease-prevention and control activities.*—These programs assist in the prevention and suppression of certain important communicable diseases including poliomyelitis, encephalitis, and other virus diseases; dysentery and other diarrheal diseases; rabies and other animalborne diseases; plague and other ratborne diseases; and murine typhus fever.

3. *General epidemic and disaster aid.*—This small fund is utilized to prevent and control outbreaks of disease in disaster areas, and to provide disease control assistance during epidemics, upon request of State health officers. During 1954 aid was provided in 34 emergencies in 19 States and Alaska.

PROGRAM AND PERFORMANCE

This program is concerned with the identification of public health problems related to our environment and the development of adequate control measures in the support of sanitary engineering activities of States and localities.

1. *Environmental research activities.*—This includes the basic and applied research and investigations into environmental health problems carried on at the Robert A. Taft Sanitary Engineering Center in Cincinnati, Ohio. The estimate provides for an expansion of research into the problems of community air pollution and food sanitation, in addition to strengthening the basic scientific staff of the center.

2. *Water supply and water pollution control.*—This consists of cooperation with State and interstate agencies and with industry in the formulation and execution of their water pollution control and water supply programs. Programs include (*a*) development of water pollution control programs on a watershed basis involving interstate agreement and cooperation; (*b*) expanded research on effects of pollution on water uses and practical means to abate pollution caused by industrial wastes and sewage; (*c*) increased Federal enforcement activity in interstate pollution abatement; (*d*) development of methods for the economic evaluation of the effects of pollution control programs on the total economy of a region; (*e*) development of plans for meeting domestic and industrial water supply needs through analysis of regional water resource potentials; and (*f*) integration of water supply and water pollution aspects into interagency river basin resource development programs.

3. *Radiological health services.*—These services include the development of public health techniques for controlling radiation hazards, investigations of methods of disposing of radioactive wastes, training of State and local personnel to solve radiological public health problems, and the collection, analysis, and dissemination of information on radiological health.

4. *General sanitation activities.*—This activity implements the direct Federal responsibility for health protection of passengers aboard interstate carriers. It includes certification of interstate milk and shellfish shippers, field studies, investigations, demonstrations, and technical assistance to States in milk and foodborne disease control, home accident prevention, and basic sanitation problems.

5. *Administration.*

6. *Construction, Robert A. Taft Sanitary Engineering Center.*—Construction of the center will be completed with the funds provided in fiscal year 1955. The equipping of the building will be completed with funds requested for 1956 under the appropriation "Buildings and facilities, Cincinnati, Ohio."

PROGRAM AND PERFORMANCE

These activities supplement and strengthen the services of the Territorial Department of Health to meet the needs of an expanded military and civilian population in Alaska. The Public Health Service conducts field and laboratory investigations of the disease problems of the Territory, many of which are different from those in continental United States.

1. *Special grant for general health purposes.*—This grant supplements Territorial, local, and other funds available to the Alaska Department of Health.

2. *Direct operations—(a) Technical assistance.*—The Public Health Service assists Alaska through loans of personnel, procurement of supplies, and provision of other services relating to control of venereal diseases and tuberculosis and to sanitation and other general health problems.

(*b*) *Field and laboratory investigations.*—The Service is conducting long-range studies in Alaska in environmental sanitation, epidemiology, entomology, animal-borne diseases transmissible to man, biochemistry and nutrition, and physiology.

(*c*) *Administration.*

PROGRAM AND PERFORMANCE

The Federal Government provides financial assistance to States and Territories, local governments, and nonprofit agencies to defray part of the costs of construction of hospitals, rehabilitation facilities, diagnostic or diagnostic and treatment centers, nursing homes, public health centers, and related health facilities.

The hospital survey and construction program which has been delegated the responsibility of carrying out these activities operates under two authorizations. The first is the annual authorization of $150 million for the construction of hospitals, public health centers, and related health facilities pursuant to Public Law 380 (approved Oct. 25, 1949). The second is the annual authorization of $60 million for the construction of diagnostic or diagnostic and treatment centers, hospitals for the chronically ill and impaired, rehabilitation facilities, and nursing homes pursuant to Public Law 482 (approved July 12, 1954). The funds are authorized to be appropriated for each fiscal year up to and including 1957 for allocation to the States and Territories on the basis of population and economic need. PROGRAM AND PERFORMANCE

Sixteen hospitals and 121 outpatient facilities are operated to furnish medical and dental care to legal beneficiaries of the Service. The major beneficiary groups are American seamen, Coast Guardsmen and their dependents, Bureau of Employees' Compensation cases, persons afflicted with leprosy, and narcotic addicts. Medical care is also provided to foreign seamen and beneficiaries of other Federal agencies on a reimbursable basis.

1. *Operation of hospitals.*—This activity consists of 12 general hospitals, 1 tuberculosis hospital, 2 neuropsychiatric hospitals which specialize in the treatment of narcotic addiction, and the National Leprosarium at Carville, La. Inpatient loads and outpatient visits in 1956 are expected to be as shown in the table below:

2. *Operation of outpatient clinics and offices.*—This activity consists of 25 full-time outpatient clinics and 96 outpatient offices. There were 523,240 visits in 1954, with 540,000 and 510,000 visits expected in 1955 and 1956, respectively.

3. *Operation of health units.*—The Service operates a health program for the Department of Health, Education, and Welfare and conducts programs for other Federal agencies on a reimbursable basis.

4. *Coast Guard medical services.*—Medical services are provided by the Service for Coast Guard personnel at shore stations and on vessels.

5. *Development and coordination of nursing resources.*—Ways are studied of increasing nursing service throughout the country, of securing better distribution of nursing personnel, and achieving better use of nurse time.

6. *Personnel detailed to other agencies.*—Medical and dental personnel are detailed to certain other Federal agencies on a reimbursable basis.

7. *Payments to Hawaii.*—Grants are made to the Territory of Hawaii to defray the cost of care and treatment of persons afflicted with leprosy. Average daily patient load is expected to rise from 338 in 1954 to 345 in 1956.

Indian Health Activities, Public Health Service

Indian health activities: For expenses necessary to enable the Surgeon General to carry out the purposes of the Act of August 5, 1954 (Public Law 568), including services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a) (including not to exceed $10,000 for such services at rates not to exceed $100 per diem for individuals, when authorized by the Surgeon General); hire of passenger motor vehicles and aircraft; purchase of reprints; payment for telephone service in private residences in the field, when authorized under regulations approved by the Secretary; and the purposes set forth in sections 321 and 509 of the Public Health Service Act; $33,590,000: Provided, That the Surgeon General is authorized to transfer from this appropriation to other appropriations of the Department of Health, Education, and Welfare such amounts as the Secretary may determine are required in such appropriations for Indian health activities.

Estimate 1956, [a] **$33,590,000**

[a] Estimate is for activities previously carried under appropriations as follows:

"Education and welfare services, Bureau of Indian Affairs"	$32,260,000
"Resources management, Bureau of Indian Affairs"	1,030,000
"General administrative expenses, Bureau of Indian Affairs"	300,000

The amounts obligated in 1954 and 1955 are shown in the schedule as comparative transfers.

PROGRAM AND PERFORMANCE

The responsibilities of the Department of the Interior relating to the conservation of the health of Indians were transferred to the Department of Health, Education, and Welfare, Public Health Service, by Public Law 568, effective July 1, 1955.

1. *Hospital health services.*—This activity consists of 48 general hospitals, 5 medical centers, and 4 tuberculosis sanatoria. Of the 57 hospitals, 49 are in the United States and 8 in Alaska. Inpatient loads and outpatient visits are expected to increase from current levels, as shown in the following table:

AVERAGE DAILY PATIENT LOAD AND ANNUAL TOTAL OUTPATIENT VISITS

Hospital patients:	*1954 actual*	*1955 estimate*	*1956 estimate*

Total	914	1,375	1,856

3. *Field health services.*—These include programs in sanitation, health education, maternal and child health, school health, tuberculosis, and other communicable disease control, and oral health. These services are provided through health centers, clinics, and other field units operated directly by the Service, as well as under contract with State and local health departments.

4. *Program direction and management services.*—This provides for program direction and management services in Washington and centralized management services in the field necessitated by the numerous small hospitals and stations.

PROGRAM AND PERFORMANCE

The seven research institutes of the National Institutes of Health are Cancer, Mental Health, Heart, Dental, Arthritis and Metabolic Diseases, Microbiology, and Neurological Diseases and Blindness.

Funds for the total National Institutes of Health activities are provided by this appropriation for medical research not directly related to the specific institutes, in addition to separate appropriations for each of the above-named institutes. Funds for the seven institute appropriations are pooled to finance all research services provided centrally, including those contained in the newly opened clinical research center building. One-third of the new center is devoted to research beds (500 capacity), of which an estimated 425 will be activated by June 30, 1956.

1. *Grants for research and training.*—These grants are made to medical schools and other institutions for research and to individuals for research training. The 1956 funds will provide for support of approximately 567 research projects and 287 research fellowships. The increase over 1955 is for nurse utilization studies and water-pollution research.

2. *Direct operations—(a) Research.*—The research services provided centrally for all institutes' research programs are financed through this account by reimbursements from each individual institute's appropriation. The additional reimbursements shown for 1956 over 1955 are to meet increased service requirements as a result of the expanded joint laboratory-clinical research programs to be conducted in connection with the new clinical research center building.

(b) *Review and approval of research and training grants.*—This subactivity covers complete administration of grants under this appropriation and those similar functions for the institutes which are best performed on a centralized basis.

(c) *Administration.*—This subactivity is financed through reimbursements from the several institutes' appropriations. Overall program direction and central administrative services are provided in support of all research programs.

PROGRAM AND PERFORMANCE

1. *Grants*—(*a*) *Grants for research and training.*—These grants are made to medical and dental schools, other institutions, and to individuals for research projects and training. Funds for 1955 will support approximately 680 research projects 229 research fellowships and 270 training grants to individuals and to schools of medicine, dentistry, and osteopathy. The estimate provides for continuation at the same dollar level.

(*b*) *Grants for detection, diagnosis, and other control services.*—Funds are provided to States and Territories on a formula basis for strengthening State and local clinical and educational services.

(*c*) *Grants for special control projects.*—Grants are made to local health agencies, universities, hospitals, and nonprofit professional organizations to develop, initiate, or establish improved types of cancer control techniques and devices.

2. *Direct operations*—(*a*) *Research.*—Research is conducted in biology, biochemistry, biophysics and radiology, internal medicine and surgery, pathology, chemotherapy, and epidemiology. The increase in 1956 over 1955 provides for expansion in the areas of radiation and general medicine in conjunction with increased utilization of the clinical center research facilities.

(*b*) *Other direct operations.*—These operations include consultative services to States and other organizations, review of applications for research grants, fellowships, and teaching stipends, and general program direction and administration.

PROGRAM AND PERFORMANCE

1. *Grants*—(a) *Grants for research and training.*—These grants are made to medical schools and other institutions for research and training and to individuals for training under the research fellowship program. Funds in 1955 are supporting approximately 224 research projects, 43 fellowships, and 294 training grants. The estimate for 1956 provides for an increase in fellowships and training grants.

(b) *Grants for detection, diagnosis, and other preventive and control services.*—Grants are made to States and Territories on a formula basis to assist in establishing, improving, and maintaining community mental health programs. The estimate provides for expanding this program.

2. *Direct operations*—(a) *Research.*—Laboratory and clinical research is conducted in neurochemistry, neurophysiology, psychology, neuropsychiatric studies, socio-environmental studies, and neuropharmacology (including narcotics and barbiturate addiction). Technical services also are provided. The increases requested in 1956 will provide for the further development toward a well-balanced research program through increased utilization of clinical center facilities, and for an expansion of biometric activities.

(b) *Other direct operations.*—These operations include review of applications for grants; promotion of training; consultative services to States; demonstrations and field studies in developing preventive and outpatient services; and general program direction and administration. The estimate provides for an increase in these activities.

PROGRAM AND PERFORMANCE

1. *Grants—(a) Grants for research and training.*—These grants are made to medical schools, other institutions, and to individuals for research projects and training. The 1955 program includes funds for approximately 674 research projects; 227 fellowships; and 209 training grants. The 1956 estimate provides for continuing the current program level.

(b) Grants for detection, diagnosis, and other control activities.—These grants are made to States to provide clinical and other services to heart-disease patients; to furnish training and technical information to physicians, nurses, and public-health workers; and to conduct case-finding surveys and related activities.

2. *Direct operations—(a) Research.*—Research is conducted in new and improved therapeutic agents, arteriosclerosis, diagnostic instrumentation, and in clinical medicine made possible with the facilities provided by the clinical center on such problems as coronary artery disease, hypertension, congestive heart failure, and related problems. The increase in 1956 over 1955 is to utilize more fully the new clinical center research facility in the conduct of a broader clinically oriented research program.

(b) Other direct operations.—These operations include review of applications for grants; consultative services to States; field studies and demonstrations on improved methods of conducting local control programs; and general program direction and administration.

PROGRAM AND PERFORMANCE

1. *Grants*—(*a*) *Grants for research and training.*—These grants are made to dental schools, other institutions, and to individuals for research and training. Funds for 1955 will support approximately 46 research projects and 23 research fellowships. Estimates for 1956 propose continuation of operations at the level provided during 1955.

2. *Direct operations*—(*a*) *Research.*—Research is conducted in the fields of periodontal diseases, growth and development, oral surgery, bacteriology, pathology, histology, oral and biological chemistry, epidemiology, and biometry. The increase in 1956 over 1955 provides for the costs connected with carrying the 1955 expanding program for a full year in 1956, and for nominal acceleration of the intramural research program.

(*b*) *Other direct operations.*—These operations include review of applications for grants and fellowships, consultative services to States, development and application of dental disease control procedures, development of clinical methods and facilities, and program direction and administration.

PROGRAM AND PERFORMANCE

1. *Grants for research and training.*—These grants are made to medical schools, other institutions, and to individuals for research and training. The 1955 program will provide support for approximately 399 research projects, 34 fellowships, and 75 training grants. The 1956 estimate maintains the 1955 program level.

PUBLIC HEALTH SERVICE—Continued

Arthritis and Metabolic Disease Activities, Public Health Service—Continued

2. *Direct operations*—(*a*) *Research.*—Laboratory research is conducted in the fields of biochemistry and nutrition, physical biology, chemistry, pharmacology and toxicology, and pathology. Clinical investigations are channeled into two major areas of study, namely, arthritis and metabolic diseases, with particular emphasis on such conditions as arthritis, diabetes, gout, obesity, disorders of the liver, blood, and bones, and abnormalities of the endocrine system. The increases in 1956 over 1955 are to utilize more fully the Clinical Center research facility in the conduct of a broader research program.

(*b*) *Other direct operations.*—These operations include review of applications for grants and general program direction and administration.

PROGRAM AND PERFORMANCE

1. *Grants for research and training.*—These grants are made to medical schools, other institutions, and to individuals for research and training. 1956 funds will support approximately 234 research projects and 30 research fellowships.

2. *Direct operations*—(*a*) *Research.*—Laboratory, field, and clinical research is conducted in the broad field of microbiology with emphasis on infectious and parasitic diseases including poliomyelitis, encephalitis, influenza, common cold and upper respiratory diseases, rheumatic fever, toxoplasmosis, and diseases of children, particularly those which cause debilitating effects in later years. In addition, this Institute administers the Biologics Control Act under which 10,148 control tests and 202 inspections of manufacturing installations were made in fiscal 1954. A substantial reorientation of this activity will be required in 1955 and 1956 to ensure the safety of the new poliomyelitis vaccine. The increase in 1956 will continue the 1955 program and will allow for increases in the clinical investigations staffing and the poliomyelitis vaccine testing program.

(*b*) *Other direct operations.*—These operations include the review of grant and fellowship applications and general program direction and administration.

PROGRAM AND PERFORMANCE

1. *Grants for research and training.*—These grants are made to medical schools, other institutions, and to individuals for research and training. The 1955 budget is supporting approximately 390 research grants, 33 research fellowships, and 81 training grants.

2. *Direct operations*—(*a*) *Research.*—Laboratory and clinical investigations are being conducted on disorders of the brain, spinal cord and peripheral nerves, such as epilepsy, cerebral palsy, multiple sclerosis, apoplexy and Parkinson's disease; on neuromuscular disorders, such as muscular dystrophy; and on visual and other sensory disorders, such as glaucoma, uveitis, cataract, and hearing impairments. The increases in 1956 over 1955 are for full-year costs of conducting intramural operations starting during 1955 and to expand research efforts in the fields of multiple sclerosis, sensory disorders, and epidemiology.

(*b*) *Other direct operations.*—These comprise program direction and administration for the total Institute program, and for review, approval, and management of the research and training grants programs.

PROGRAM AND PERFORMANCE

The old-age and survivors insurance program provides partial protection to workers, self-employed persons, and their families against the economic hazards of old age and death. Tax contributions from employers, employees and self-employed persons are deposited in the Federal Old-Age and Survivors Insurance Trust Fund, out of which benefit payments and administrative costs are paid.

Public Law 761, approved September 1, 1954, amended the Social Security Act by (1) extending coverage to about 10 million additional persons, (2) setting up disability-freeze provisions aimed at protecting the benefit rights of individuals, (3) raising benefit payments, and (4) liberalizing the retirement test. As a result, workloads will be substantially increased in both 1955 and 1956 and will continue at a higher level in subsequent years.

Total additional requirements stemming from the 1954 amendments (Public Law 761) are estimated at $16,240,000 in fiscal year 1955. A supplemental appropriation of $5,000,000 was voted by Congress. An additional supplemental for $11,240,000 will be requested later in fiscal year 1955.

1. *Maintenance of accounts of earnings.*—Eligibility for insurance benefits and the amount of benefits are based on wages reported by employers for their employees and on earnings reported by self-employed individuals which are recorded by the Bureau in individual accounts. The volume of work is not subject to control by the Bureau but depends upon economic conditions and the level of employment. Although the workload for this activity has become relatively stabilized, it will grow gradually each year as the level of employment increases.

	1954 actual	*1955 estimate*	*1956 estimate*
Earnings items received (old program)	220,924,428	212,457,000	227,288,000
1954 amendments		500,000	7,200,000
Total	220,924,428	212,957,000	234,488,000

2. *Development, determination and certification for payment of claims for insurance benefits.*—Claims for insurance benefits are received from prospective beneficiaries in the Bureau's district offices. When a claimant's rights to benefits have been established in accordance with law, the Bureau authorizes the Treasury Department to pay the initial benefit. Claims receipts under the "old program" are expected to decrease in 1955 and 1956 from the abnormally high levels of 1953 and 1954. However, substantial increases in claims will result from the 1954 amendments as shown below:

	1954 actual	*1955 estimate*	*1956 estimate*
New claims received (old program)	1,887,677	1,861,000	1,855,000
1954 amendments		280,000	285,000
Total	1,887,677	2,141,000	2,140,000

In addition to the increases shown above, the Bureau is confronted for the first time with claims resulting from the disability-freeze provisions of the 1954 amendments (395,000 in 1955 and 500,000 in 1956). The initial impact of this provision began January 1, 1955, when such applications were accepted for the first time.

3. *Recertification monthly of awarded claims.*—The beneficiary roll requires constant revision so that checks may be mailed promptly each month to beneficiaries whose entitlement continues, and so that checks may be discontinued when entitlement ceases. The number of beneficiaries on the rolls increased sharply in 1954 and will continue to grow larger for many years until the program reaches maturity.

Beneficiaries on roll at end of year (old program)	*1954 actual*	*1955 estimate*	*1956 estimate*
	6,818,277	7,585,000	8,277,000
1954 amendments		330,000	620,000
Total	6,818,277	7,915,000	8,897,000

Benefit payments to beneficiaries under the program continue to rise with the increasing number of persons on the roll and the higher average benefits.

PROGRAM AND PERFORMANCE

Grants for old-age assistance, aid to dependent children, the blind, and the permanently and totally disabled are made to States that have plans for these programs approved by the Department of Health, Education, and Welfare. Fifty-three jurisdictions, including all the States, the District of Columbia, Alaska, Hawaii, Puerto Rico, and the Virgin Islands, have approved plans for old-age assistance and aid to the blind; 52 jurisdictions have plans for aid to dependent children; and 42 jurisdictions have plans for aid to the permanently and totally disabled.

The Social Security Act Amendments of 1952 made additional Federal funds available to all jurisdictions, except Puerto Rico and the Virgin Islands, by raising the maximum on the amount of the payments in which the Federal Government shares and by changing the formula for computing the Federal share. These amendments, which became effective on October 1, 1952, and were due to expire on September 30, 1954, were extended for a 2-year period to September 30, 1956, by Public Law 761, approved September 1, 1954. Under these amendments, the maximum on individual assistance payments in which the Federal Government shares is $55 in the adult categories; and for aid to dependent children, $30 for the first child, $21 for each additional child, and $30 for a needy adult relative with whom any dependent child is living. The Federal share in the adult categories is four-fifths of the first $25 of the average monthly assistance payment, plus one-half of the remainder within the Federal maximums on individual payments; and in aid to dependent children, four-fifths of the first $15 of the average monthly assistance payment per recipient, including the needy relative, plus one-half the remainder within the Federal maximums on individual payments.

For 1956, the total amount of Federal, State, and local expenditures for assistance and administration is estimated at $2,540,000,000, of which $1,415,500,000 represents the Federal share. The appropriation request of $1,400,000,000 is $15,500,000 less than the estimated Federal share, because the States will have available for expenditure an estimated $15,500,000 representing the Federal share of collections and adjustments for prior years.

The regular appropriation for public assistance grants for 1955 was $1,200,000,000 based on program trends explained in the budget of the United States for fiscal year 1955. It is estimated that a supplemental appropriation of $238,000,000 will be required for several reasons. The figure in the budget did not include any amount for an adjustment for advances to States from the 1955 appropriation to cover 1954 requirements which amount to a total of $9,307,748. The amount of the 1955 appropriation available for 1955 requirements was reduced accordingly; this reduction was offset in part by an increase, above the figure in the budget, in the estimated amount of collections and adjustments in Federal funds in 1955. In addition, the figures in the budget represented an underestimate of about $223,000,000 in requirements for assistance expenditures and $5,500,000 in requirements for State and local administration. The underestimate in requirements for assistance expenditures for 1955 was due to changes in provisions for Federal participation and in program trends not anticipated at the time the 1955 appropriation request was acted upon: (1) The 1952 amendments, due to expire on September 30, 1954, were extended; (2) the number of recipients of old-age assistance declined less rapidly than anticipated; and (3) the number of recipients of aid to dependent children increased.

The estimate of $1,400,000,000 for 1956 is based on the assumption that the number of recipients of old-age assistance and aid to dependent children will decline from 1955 to 1956 and that average monthly payments under all four programs will be somewhat lower in 1956 than in 1955. The budget does not include an amount for additional State plans for aid to the permanently and totally disabled that may be approved and in operation in the fiscal year 1956; it includes an estimated increase in the number of recipients under programs already in operation. A small increase in the number receiving aid to the blind also is anticipated.

The figures used in the tables appearing under the activities below, include the supplemental needed for 1955 requirements of $223,000,000 for assistance and $5,500,000 for administration; however, the figures shown in the activity schedule do not include these amounts.

1. *Payments to recipients.*—(*a*) *Old-age assistance.*—The average number of recipients per month for 1956 is estimated at 1 percent fewer than was estimated for 1955. The estimated average monthly payment is $1.06 less than the estimate for 1955.

2. *State and local administration.*—The grants to States include 50 percent of the administrative costs that are found by the Department of Health, Education, and Welfare to be necessary for the proper and efficient administration of the State public assistance programs. The Federal share is for the salaries and expenses of about 47,000 State and local personnel. The increase for 1956 of $500,000 represents larger expenditures for the relatively new program of aid to the permanently and totally disabled, which are in part offset by the estimated decline in administrative expense for old-age assistance and aid to dependent children.

PROGRAM AND PERFORMANCE

The Bureau of Public Assistance administers Federal grants to States for old-age assistance, aid to dependent children, aid to the blind, and aid to the permanently and totally disabled.

1. *Develop and consult on program policies and standards.*—Conditions are clarified under which States may use Federal funds in carrying out the purposes of the public assistance programs and standards are formulated for the development of efficient administration of these programs. Consultation is provided to State agencies on specialized subjects.

2. *Review State plans and grants, evaluate State operations.*—State plans and State and local operations are reviewed and consultative services are provided to the States with regard to their current operating problems and development of their programs.

3. *Collect and interpret statistics.*—These data are for the use of State agencies and for Federal purposes. Special statistical studies are conducted to evaluate the public assistance programs.

4. *Administration.*

PROGRAM AND PERFORMANCE

The Bureau investigates and reports on the health and welfare of children and administers grants to the States for extending and improving maternal and child health services, crippled children's services, and child welfare services.

1. *Development of State and local health services for children.*—Policies and requirements for State maternal and child health and crippled children's programs are developed; State plans are reviewed and approved; consultative services are given to State agencies, other public and voluntary agencies and organizations, and educational institutions engaged in training professional personnel; and guides and recommendations are prepared on the provision of child health services.

2. *Development of State and local social services for children.*—The same approach is used for the child welfare services as for the child health services.

3. *Technical assistance to States and communities for juvenile delinquency programs.*—Consultation is given to States, communities, and organizations, both public and voluntary, on standards and methods for care and treatment of juvenile delinquents, on content of State or local programs, and on problems of organization and coordination on a statewide or local basis; assistance is given to State agencies and educational institutions in planning for training of professional and nonprofessional personnel in the field of juvenile delinquency.

4. *Research in child life and services for children.*—Studies on child health and welfare, particularly social and economic problems, are conducted, and the programs and services for children are evaluated. The results are interpreted to the lay and professional public through pamphlets and bulletins.

5. *Information for parents and others working with children.*—Publications are prepared and distributed on child health and welfare services. Upon request, assistance is given to States in interpreting their child health and welfare programs.

6. *Administration.*

PROGRAM AND PERFORMANCE

The States are required to match one-half of the amounts appropriated for maternal and child health services and crippled children's services, and the remaining funds are distributed to the States in proportion to their financial need. The States are required by law to pay part of the cost of child welfare services, but the share is not specified.

1. *Maternal and child health services.*—Grants are provided to States for the extension and improvement of health services for mothers and children, especially in rural areas.

2. *Crippled children's services.*—Grants are made to States to extend and improve services for crippled children including medical, surgical, corrective, and other care, especially in rural areas.

3. *Child welfare services.*—Grants aid States to establish, extend, and strengthen, especially in rural areas and other areas of special need, child welfare services for the protection and care of homeless, dependent, and neglected children, and children in danger of becoming delinquent, and for the return of runaway children to their homes in other States.

Total obligations	2,194,410	2,145,480	2,390,000

PROGRAM AND PERFORMANCE

This office is responsible for the organization, integration, and evaluation of all field activities, the direction and supervision of grant-in-aid audits, the development of State merit systems, and the supervision of surplus property activities.

1. *Field administration.*—General supervision over the 9 Department regional offices is provided. Regional directors carry out Department policies and provide general administrative supervision over representatives located in the regional offices. Field activities of the Department which do not operate out of a regional office are subject to review by the regional director, particularly with reference to public and intergovernmental relations.

2. *Grant-in-aid audits.*—This office audits the 25 grant-in-aid programs administered by the Department. Approximately 2,175 audits of State programs and school and hospital construction projects will be made in fiscal year 1956.

3. *Division of State merit systems.*—State personnel plans and operations are reviewed and State agencies are aided in complying with merit system requirements under Federal law. The division's activities relate to 17 types of grants-in-aid, and apply to 70 State merit systems and 294 State agencies administering the grant programs.

PROGRAM AND PERFORMANCE

Under delegation of responsibility from the Federal Civil Defense Administration and by assignment from the Secretary, constituent agencies of the Department plan national programs, develop technical guidance, and direct Federal activities as follows:

1. *Federal-State civilian emergency assistance program.*—Plans are made for providing financial assistance for the temporary relief of civilians injured or in want, and for the acquisition, transportation, and payment for clothing of civilians under attack conditions.

2. *Extraordinary food and drug inspection services.*—Training is given to key food and drug enforcement officials in each State in the effect of special weapons upon food and drugs and in appropriate decontamination and salvage procedures.

The long-range effects of atomic burst upon the safety and nutritional quality of foods, the vulnerability of commercially packaged basic foodstuffs to overt bacterial warfare attack, and preliminary study of the susceptibility of commercial foods to covert bacterial warfare and chemical warfare attack during processing are studied.

3. *Public health activities.*—Research and planning to combat communicable diseases, biological and chemical warfare against humans and destruction of community health facilities are performed. Protection measures to minimize injury to personnel and reduce damage to hospitals and water, sewer, and other public-health facilities are devised. A national program designed to provide Public Health Service reserve professional personnel for use in attacked areas is developed and maintained.

4. *Educational activities.*—Professional assistance is provided for planning, development, and distribution of materials to integrate the teaching of civil defense skills, knowledge, and fundamentals of behavior during emergencies. Technical guidance is given concerning the provision of shelter and other protective measures designed to minimize injury to school personnel and facilities.

5. *Executive direction.*—Civil defense activities of constituents of the Department are supervised and directed. Legal assistance is furnished to constituent units of the Department, security safeguards are provided, and coordination with the Federal Civil Defense Administration is maintained.

BUSINESS-TYPE STATEMENTS

PROGRAM AND PERFORMANCE

Federal credit unions are cooperative associations organized for the purpose of promoting thrift and creating a source of credit for provident and productive purposes for their members. In fiscal year 1954, fees paid by Federal credit unions defrayed the major operating costs of this program. Supervision fees collected annually do not become available for operating expenses until the latter half of the fiscal year, making it necessary for the Bureau to have adequate working capital. Consequently, Congress appropriated in 1954 additional working capital in the form of a loan of $250,000 to be repaid in annual installments with interest over a 10-year period beginning with fiscal year 1956. During this period the Bureau will have to repay this loan and also to accumulate replacement working capital, thereby enabling it to be self-financing as well as self-supporting.

The Bureau carries on three major activities: (1) Investigating and chartering new Federal credit unions; (2) supervising and guiding both new and established Federal credit unions, including making periodic examinations of their financial condition and operating practices; and (3) giving administrative direction to the foregoing activities. Statistics relating to activities are shown below:

	1954 actual	*1955 estimate*	*1956 estimate*
Number Federal credit unions chartered	854	800	723
Number regular examinations	6,145	7,486	8,213
Number operating Federal credit unions as of Dec. 31 of previous calendar year	6,578	7,302	8,032
Assets of Federal credit unions as of Dec. 31 of previous calendar year	$854,232,007	$1,064,566,239	$1,308,193,833

A net operating income of $41,987 was realized in fiscal year 1954. A net operating income is estimated in fiscal years 1955 and 1956 at $96,429 and $134,470. This income is being reserved to accumulate sufficient working capital to enable the Bureau to be self-financing when the Treasury loan is repaid. Retained earnings of $314,948 transferred in 1954 from supervision of Federal credit unions, Social Security Administration, consist of cash, $280,627; selected working capital, −$17,291; and other assets (net), $51,612.

PROPOSED FOR LATER TRANSMISSION

Payments to school districts, Office of Education (under existing legislation, 1955).—A supplemental request of $19,200,000 is anticipated for 1955 primarily as a result of the 1 year postponement (by Public Law 732, 83d Cong.) to fiscal year 1956, of the provision that school districts absorb a greater portion of the impact of Federal activities on school attendance.

AMOUNTS AVAILABLE FOR OBLIGATION AND ANALYSIS OF EXPENDITURES

Expenditures are distributed as follows:			
Out of current authorizations		14,000,000	
Out of prior authorizations			5,200,000

Assistance for school construction, Office of Education (under existing legislation, 1955).—A supplemental request of $70 million is anticipated for 1955 as a result of enactment in 1954 of a 2-year extension of the school construction aid program for districts whose enrollments have increased because of Federal activities. In connection with this supplemental request a rescission of $25 million is proposed in balances available for previous construction aid programs under Public Law 815 (81st Cong.) and Public Law 246 (83d Cong.), shown on the preceding pages under the titles "School construction, Office of Education," and "Assistance for school construction, Office of Education."

Proposed supplemental appropriation		$238,000,000	
Total expenditures (out of current authorizations)		238,000,000	

Bureau of Old-Age and Survivors Insurance, Social Security Administration (trust account) (under existing legislation).—Broadened coverage, expanded loads, increased benefits, addition of the disability freeze program and other improvements provided under Public Law 761 enacted September 1, 1954, will require an increase of $11,240,000 (and $28,000 for "Salaries and expenses, office of field administration, office of the Secretary of Health, Education, and Welfare) for 1955 in the limitations upon the amounts which may be expended from the Federal old-age and survivors insurance trust fund.

Reinsurance of private health plans (under proposed legislation, 1956).—Legislation will be proposed to establish a revolving fund to reinsure private health insurance plans against a part of the additional risk of providing broader protection. Special emphasis will be given to plans providing protection for lower-income families, protection for rural families, and protection against major medical expense and other plans providing for other areas, groups and types of new or broadened benefits where coverage is inadequate. The legislation would authorize a capitalization of $100 million. Also, actuarial advisory assistance would be made available to assist development of improved plans. Although the reinsurance program is expected to become self-sustaining in due time, an estimated $25 million will be requested for initial capitalization and administrative expenses.

Loan guaranties for health facilities (under proposed legislation, 1956).—Legislation will be proposed to provide a guaranty of loans made by private lending institutions to construct or rehabilitate medical facilities. The legislation will authorize a contingent liability of $200 million at any one time with Presidential authority to authorize an additional $150 million. Insurance premiums of not more than 1 percent will be charged. A 1956 supplemental of $10,500,000 will be proposed for initial capitalization of the revolving fund and for administrative costs.

Grants to States for public assistance (medical services) (under proposed legislation, 1956).—Legislation will be proposed to provide Federal matching funds for 50 percent of the expenditures by State and local welfare departments for medical care payments in behalf of assistance recipients in the four federally aided categories. The maximum amount of such expenditures in which the Federal Government would share is derived by multiplying $6 per month by the number of adults on the public assistance rolls, and $3 per month by the number of minors on the rolls. A supplemental appropriation of $20 million is forecast.

Extension and improvement of other health and welfare activities (under proposed legislation, 1956).—Legislation will be proposed to extend and improve the several grant formulas under which the Federal Government assists States in carrying out special public health activities, including water pollution studies and maternal and child health and welfare services. Special legislation will be proposed to stimulate improvement of programs providing for the mentally ill. A grant program is recommended to assist States in providing for treatment and rehabilitation of delinquent youth. To alleviate shortages of both practical and professional nurses, grant programs will be proposed which are designed to assist in training more personnel and to encourage better nurse utilization. Supplemental appropriations of $16,250,000 are forecast.

Buford	1957	86,000	86,000
Cheatham	1958	36,000	36,000

1. *System operation and maintenance.*—Provision is made for (*a*) scheduling and dispatching power generation, (*b*) scheduling storage and release of water, (*c*) administering contractual operation requirements, and (*d*) determining methods of coordinating operation of generating plants to obtain maximum utilization of resources.

2. *Purchase of energy and wheeling charges.*—Provision is made for the payment of wheeling fees and for the purchase of firming energy in connection with disposal of power from the John H. Kerr project under the existing contract with the Virginia Electric and Power Company.

3. *Power contracts and rates.*—Power generated at the Wolf Creek, Center Hill, Dale Hollow, and Allatoona projects and part of the power generated at the John H. Kerr and Clark Hill projects is being sold under long-term agreements with public bodies, cooperatives, the Tennessee Valley Authority and private utility companies. Provision is

made for continued contract negotiations with public bodies, cooperatives, the Tennessee Valley Authority, and private utility companies for arrangements to dispose of power generated at the Jim Woodruff, Old Hickory, Cheatham, and Buford projects and the remaining output of the Clark Hill and John H. Kerr projects. In addition the activity includes (*a*) billing and servicing contracts, (*b*) development of wholesale power rates, and (*c*) participation in determination of the cost of amortizing the Federal Government's investment in power facilities. Gross revenues, which are deposited in the Treasury, amounted to $7,931,023 in fiscal year 1954 and are estimated at $11,000,000 and $14,300,000 in 1955 and 1956.

4. *General Administration.*

PROGRAM AND PERFORMANCE

The Administration markets power developed at multiple-purpose projects constructed by the Corps of Engineers in four southwestern States. To perform this function the Administration (*a*) operates and maintains a system of high-voltage transmission lines and related facilities, and (*b*) contracts for the use of transmission facilities and for the sale, purchase, and interchange of power with other systems in the area.

Gross revenues, which are deposited in the Treasury, amounted to $4,773,836 in fiscal year 1954, and are estimated at $4,600,000 and $6,300,000 for 1955 and 1956.

PROGRAM AND PERFORMANCE

The Administration has constructed transmission facilities from Federal generating facilities to load centers and to points of interconnection with other electric power systems in the southwestern area. These facilities are coordinated with power plants at the following dams of the Corps of Engineers, all of which are in operation except for Blakely Mountain which will be on the line during the current year:

Project	*Installed capacity (kilowatts)*
Denison	70,000
Norfork	70,000
Narrows	17,000
Bull Shoals	160,000
Fort Gibson	45,000
Whitney	30,000
Tenkiller Ferry	34,000
Blakely Mountain	75,000

Completion of the entire transmission system and service facilities to connect new customers to the system is contemplated during the current year. No additional construction is proposed during 1956.

PROGRAM AND PERFORMANCE

A continuing fund of $300,000, maintained from power receipts, is available to defray expenses incurred under emergency conditions and to insure continuity of service. Prior to 1955 this fund was also used to finance the purchase of power and payment of wheeling charges (16 U. S. C. 825s–1), such charges now being financed from the operation and maintenance appropriation.

PROGRAM AND PERFORMANCE

The Oil and Gas Division provides coordination and advice to the Federal Government on all phases of petroleum and gas, both United States and abroad, to assure adequate development, distribution, and utilization of resources and facilities to meet civilian and military requirements. Petroleum supply and demand studies are made to define and alleviate actual or potential deficiencies. All agencies of the Government and the industries are informed on oil and gas matters important to national security.

PROGRAM AND PERFORMANCE

The Office of the Solicitor acts as legal adviser to the Secretary and the heads of the constituent bureaus of the Department. Prior to fiscal year 1955, each bureau had its own legal staff with the Solicitor exercising only very general supervision and control. During fiscal year 1955, all staffs were consolidated into a single integrated office so that the Solicitor will have direct control of legal matters and so that there may be unified and uniform law applicable to departmental programs.

BONNEVILLE POWER ADMINISTRATION

INTRODUCTORY STATEMENT

The Administration markets electric power produced in Federal generating plants in the Pacific Northwest constructed by the Corps of Engineers and the Bureau of Reclamation. Generating capacity was made available during the past year from McNary Dam and Lookout Point Dam. Additional units are being installed in these two projects, and units will be installed at the Dexter and Albeni Falls projects during the current year. During 1956 initial capacity will be available from Chief Joseph Dam. The Bonneville program for 1956 provides for continued construction, operation and maintenance of high voltage transmission facilities to transmit the output of Federal power plants to load centers and to interconnect the Federal system with non-Federal utility systems.

Streamflow conditions are considerably above median in the Columbia Basin and adjacent areas. All interruptible industrial loads and firm loads of the Administration are being served with Federal system resources. Due to favorable water conditions during the current storage drawdown period, even if streamflows hereafter reduce to minimum levels, practically all of the region's firm load will be carried with hydroelectric power. In addition, with the use of available steam generated power and imports, all of the interruptible industrial load can be supplied.

Many groups in the Pacific Northwest are planning to add generation to meet requirements after fiscal year 1961, at which time the Federal projects now under construction will be completed. In addition to participating in the planning for certain multiple-purpose projects, Bonneville Power Administration and other Federal agencies work with non-Federal agencies, public and private, to assist in the coordination of water resource development.

BONNEVILLE POWER ADMINISTRATION—Con.

Gross operating revenues, which are deposited in the Treasury, totaled $45,216,652 in fiscal year 1954 and are estimated at $52,832,000 and $61,473,000 in 1955 and 1956. These estimates assume median water conditions and if critical water conditions should prevail, revenues might decrease by as much as $4,000,000.

Legislation is being proposed to authorize a business-type budget and provide for direct use of power revenues to repay to the Treasury the Federal investment in power facilities and defray the cost of operation and maintenance of the transmission system.

CONSTRUCTION

Construction, Bonneville Power Administration

For construction and acquisition of transmission lines, substations, and appurtenant facilities, as authorized by law, to remain available until expended, [$24,314,000: *Provided*, That, during the current fiscal year, not more than $6,250,000 of the funds available under this appropriation heading shall be used for personal services and not more than $750,000 shall be used for travel expenses] *$16,456,000.*

PROGRAM AND PERFORMANCE

During 1956 transmission facilities will be constructed to conform with generation schedules as follows:

Project	Jurisdiction	First generation (fiscal year)	Maximum capacity (kilowatts) Current or first year	Maximum capacity (kilowatts) Total scheduled
Bonneville	Corps of Engineers	In operation	564,000	564,000
Grand Coulee	Bureau of Reclamation	do	2,300,000	2,300,000

Chief Joseph	Corps of Engineers	1956	458,000	1,220,000
The Dalles	do	1958	359,000	1,256,000

By January 1959 the maximum capacity of the Federal power system in the Pacific Northwest will be 6,419,000 kilowatts as compared with 3,827,000 kilowatts in January 1955. In addition to basic main grid requirements, the budget for fiscal year 1956 provides for additional service connections at appropriate delivery voltages.

PROGRAM AND PERFORMANCE

This program provides for the operation and maintenance of the Administration's regional high voltage electric grid system, and for commercial and administrative expenses in connection with the marketing of electric power at wholesale from Federal dams in the Pacific Northwest.

1. *System operation and maintenance.*—This activity includes the scheduling and dispatching of power, the operation of substations, the maintenance of transmission lines, substations and other electrical facilities, load estimating, the integration of resources, and system engineering.

BONNEVILLE POWER ADMINISTRATION—Con.

OPERATION AND MAINTENANCE—continued

Operation and Maintenance, Bonneville Power Administration—Continued

Transmission facilities of the Administration are being expanded as increased generating capacity becomes available. It will be necessary to man newly energized substations, schedule and dispatch the increased power supply, and provide service through additional points of delivery and interconnection. Additional maintenance personnel will be required throughout the transmission area to maintain the expanded system at levels adequate to insure safe and continuous operation. Power resources and requirements work will be continued to obtain the fullest utilization of generating capacity, streamflows and stored water. The following table shows the rising trend in several of the more important indices of the operation and maintenance activity.

	1954 actual	*1955 estimate*	*1956 estimate*
Transmission lines, structure-mile years	5,710	6,193	6,555
Number of substations	158	172	175

Sales of energy (millions of kilowatt-hours)	18,764	22,575	26,623
Number of customers	114	117	117
Points of delivery	307	324	332

2. *Power contracts and rates.*—This activity includes the negotiation of power sales contracts, billing and servicing contracts, and establishment of wholesale rate schedules.

3. *General administration.*

BUREAU OF LAND MANAGEMENT

INTRODUCTORY STATEMENT

The Bureau administers 470 million acres of public lands in the United States and Alaska in the interest of conserving forest, range, mineral and water resources. In addition, the Bureau has responsibility for mineral resources on 265 million acres of land under the jurisdiction of other Federal agencies and private land with mineral rights reserved to the United States.

The total receipts in fiscal year 1956 from revenue producing activities of the Bureau are estimated to be about $190 million. Of this amount, $34 million will be paid to the States and counties in accordance with law, and the remaining $156 million will be deposited in the Treasury.

MANAGEMENT OF LANDS AND RESOURCES

Management of Lands and Resources, Bureau of Land Management

For expenses necessary for protection, use, improvement, development, disposal, cadastral surveying, classification, and performance of other functions, as authorized by law, in the management of lands and their resources under the jurisdiction of the Bureau of Land Management, [$11,913,000] *including $35,000 for the operation and maintenance of access roads on the revested Oregon and California Railroad grant lands, $13,400,000: Provided,* That this appropriation may be expended on a reimbursable basis for surveys of lands other than those under the jurisdiction of the Bureau of Land Management: *Provided further,* That, for the [purpose] *purposes* of surveying federally controlled or intermingled lands *and operation and maintenance of access roads,* contributions toward the [cost] *costs* thereof may be accepted. (*5 U. S. C. 133a, 133y, 485; 16 U. S. C. 583, 594; 43 U. S. C. 1, 2, 54, 72, 129, 315; 50 Stat. 874j; Interior Department Appropriation Act, 1955.*)

PROGRAM AND PERFORMANCE

1. *Lease and disposal of land and mineral resources.*—Applications for all types of land use and for leasing of mineral resources, principally oil and gas, are received and acted upon. The necessary field investigations are made to determine the best use of resources. The increase for 1956 is to handle the increase in workload.

Cases pending, start of year	37,774	41,089	58,062	53,000
New and reactivated cases	67,587	99,799	104,000	110,000
Cases closed	64,272	82,826	109,062	131,000
Cases pending, end of year	41,089	58,062	53,000	32,000

2. *Management of grazing lands.*—The use of 170 million acres of the Federal range by 30,000 livestock growers is supervised. Proper management of these lands increases the grazing capacity by reducing overuse or unseasonal use, trespass, and protects them against fire and erosion. The increase for 1956 is to provide more effective management.

3. *Forestry.*—Over 5 million acres of commercial forest lands in the United States and 40 million acres in Alaska, plus 110 million acres of woodland, are managed. It is estimated that the 1956 program will permit marketing 751 million board-feet of timber having a stumpage value of $14.4 million.

4. *Cadastral surveys.*—These surveys are an integral phase of the land management program and are required to locate and identify legal boundaries of lands under application for lease or disposal, for administering timber sales and the management of forest lands, and to provide legal descriptions necessary to the work of other Government agencies concerned with Federal land, and to permit certain States to receive patents to land granted them when they entered the Union.

5. *Soil and moisture conservation.*—The 1956 program plans treatment of 1,087,000 acres of public lands with measures to prevent runoff and erosion and to rehabilitate areas which are in critical condition. Emphasis will be placed on cooperative programs with other agencies in river basin areas.

6. *Squaw Butte experiment station.*—In cooperation with the Oregon State Agricultural College, studies are made of management problems on the western ranges.

7. *Fire suppression.*—Provision is made for fighting fire on or threatening public lands under the Bureau's jurisdiction. An anticipated supplemental appropriation for 1955 in the amount of $300,000 is included elsewhere in the Budget.

8. *Maintenance of physical facilities.*—Provision is made for the care and preservation of the Bureau's equipment shelters and storehouses.

9. *Maintenance of access roads.*—Provision is made for maintaining timber access roads constructed in the revested Oregon and California Railroad grant lands area of Oregon. The funds for this purpose are to be reimbursed to the Treasury from the Oregon and California land-grant fund.

10. *Weed control.*—Provision is made for treating 105,000 acres infested by halogeton and other poisonous and noxious weeds. Since the inception of the program in 1952, 369,000 acres have been treated.

11. *General administration.*—In addition to normal administrative services, provision is made for the collection and distribution of receipts estimated to total about $190 million in fiscal year 1956.

BUREAU OF INDIAN AFFAIRS

INTRODUCTORY STATEMENT

The responsibility of the United States toward the Indian people and the natives of Alaska includes protection and development of trust property and the furnishing of services not otherwise available to Indians and which are normally provided other citizens through Government and private agencies. Active programs are being aimed toward the integration of like services to Indians and non-Indians through the same sources and toward increased Indian participation in the management of Indian-owned resources. States and counties are participating at an increasing rate in the service programs, usually with financing by the United States, demanded because of the tax-exempt status of Indian lands. The ultimate goal of the entire program is to have the Indian people and the natives of Alaska take their proper place in the social and economic life of the Nation on the same basis as other citizens.

[HEALTH,] EDUCATION[,] AND WELFARE SERVICES

Education and Welfare Services, Bureau of Indian Affairs

PROGRAM AND PERFORMANCE

The Bureau furnishes education, welfare, relocation, and law and order services to Indians in the continental United States and to the natives of Alaska.

1. *Educational assistance, facilities, and services.*—Financial assistance is extended to public schools enrolling Indian children under State and district contracts. Where such facilities are inadequate or nonexistent, the Bureau operates boarding and day schools.

Foster home care	2,122	2,223	2,591
Total	8,828	8,613	8,591

3. *Relocation services.*—The relocation program assists Indians from reservations to settle and secure permanent employment in non-Indian communities away from the reservation, and to adjust to the new living and working conditions encountered. Financial assistance to move to and settle in the new community where employment opportunities have been developed is provided to those Indians who wish to relocate but do not have enough resources to leave the reservation.

4. *Maintaining law and order.*—Police services and tribal court operations are financed on Indian reservations, and special officers direct enforcement of Federal law.

PROGRAM AND PERFORMANCE

This program promotes the economic advancement of the Indians through the utilization of their resources.

1. *Forest and rangelands.*—This covers management, protection, and utilization of Indian forest, range, and wildlife resources on nearly 50 million acres.

	1954 actual	*1955 estimate*	*1956 estimate*
Timber cut:			
Million board-feet	567	567	567
Dollar value	$9,239,000	$9,239,000	$9,239,000
Number of cattle units grazed	975,000	975,000	975,000

2. *Fire suppression.*—This is to fight fires on or threatening Indian reservations.

3. *Agricultural and industrial assistance.*—Improved methods in farming, homemaking, and the use of credit for agricultural and small-business enterprises are taught Indians to enable them to improve their economic condition through their own efforts.

4. *Soil and moisture conservation.*—Land-use practices based on land inventories and soil-conservation plans are introduced to control erosion and promote more effective utilization of soil and water resources. Approximately 31 million acres, or 55 percent of Indian-owned lands, are severely or critically eroded. The job of soil and moisture conservation is approximately 14 percent completed.

5. *Operation, repair, and maintenance of Indian irrigation systems.*—Approximately 300 irrigation systems serving about 864,000 acres of Indian and mixed-ownership lands are operated and maintained. About 80 percent of the cost is financed from collections from water users.

6. *Repair and maintenance, roads and trails.*—This activity is now being financed under "Road construction and maintenance (liquidation of contract authorization), Bureau of Indian Affairs."

7. *Development of Indian arts and crafts.*—Production and marketing of the products of Indian crafts are fostered through formation of production groups; establishing standards; and improving markets, design, and production methods.

8. *Management of Indian trust property.*—Banking services are provided for Indians; land is purchased, sold, exchanged, and leased; estates are probated; and Indian property and money rights are safeguarded. The increase will permit accelerating consolidation and disposal of fractionated land holdings, especially in those areas where withdrawal of Federal supervision may soon be accomplished.

9. *Repair and maintenance of buildings and utilities.*—Federal buildings and their related utility and communication systems are maintained.

10. *Weed control.*—This is a program for the control and eradication principally of the poisonous weed halogeton.

BUREAU OF RECLAMATION

INTRODUCTORY STATEMENT

The Bureau plans, constructs, and operates facilities to irrigate lands, furnish domestic water supplies, and develop related hydroelectric power and flood control in the 17 Western States. Activities in Alaska include operation of the Eklutna power project.

Appropriations to the Bureau are made from the general fund and from three special funds. The special funds are (*a*) the reclamation fund, largely derived from certain irrigation and power revenues; receipts from the sale, lease, and rental of public lands; and certain oil and mineral revenues; (*b*) the Colorado River dam fund, derived from the revenues of the Boulder Canyon project; and (*c*) the Colorado River development fund, derived from transfers of money from the Colorado River dam

The total appropriation request amounts to $175,916,000. This represents an increase of $13,540,570 compared with the adjusted appropriations of the current fiscal year and an increase of $32,246,340 compared with the preceding fiscal year.

For carrying out the functions of the Bureau of Reclamation as provided in the Federal reclamation laws (Act of June 17, 1902, 32 Stat. 388, and Acts amendatory thereof or supplementary thereto) and other Acts applicable to that Bureau, as follows:

GENERAL INVESTIGATIONS

General Investigations, Bureau of Reclamation

For engineering and economic investigations of proposed Federal reclamation projects and studies of water conservation and development plans; [engineering and economic investigations, as a basis for legislation, and for reports thereon to Congress, relating to projects for the development and utilization of the water resources of Alaska;] formulating plans and preparing designs and specifications for authorized Federal reclamation projects or parts thereof prior to initial allocation of appropriations for construction of such projects or parts; and activities preliminary to the reconstruction, rehabilitation and betterment, financial adjustment, or extension of existing projects; to remain available until expended, [$3,350,000] *$5,175,000*, of which [$2,750,000] *$4,492,812* shall be derived from the reclamation fund and [$500,000] *$532,188* shall be derived from the Colorado River development fund: *Provided*, That none of this appropriation shall be used for more than one-half of the cost of an investigation requested by a State, municipality, or other interest: *Provided further*, That, [except as herein expressly provided] *pending the enactment of authorizing legislation* with respect to investigations in Alaska, no part of this appropriation shall be expended in the conduct of *such* activities [which are not authorized by law].

[For an additional amount for "General investigations", $400,000, to be derived from the reclamation fund.] (*Interior Department Appropriation Act, 1955; Supplemental Appropriation Act, 1955.*)

PROGRAM AND PERFORMANCE

Surveys and investigations are made to determine the feasibility of potential reclamation projects; detailed plans are developed for authorized projects prior to appropriation of construction funds; and investigations are made for rehabilitation of existing Federal reclamation projects. Total investigations scheduled, excluding a number of investigations for which stream gaging only is in progress, are as follows:

The appropriation request for this activity is $5,175,000, an increase of $1,448,690 over the adjusted appropriation for the current fiscal year.

1. *Engineering and economic investigations.*—These are made to plan the development of river basins; to make feasibility investigations of potential projects, prior to authorization; and to make general engineering and research studies of reclamation problems either independently or in cooperation with local, State, or other Federal agencies. The estimate includes $50,000 from the general fund of the Treasury for investigations of three specific projects in the Territory of Hawaii as authorized by Public Law 634.

2. *Advance planning.*—Detailed field data are collected, definite plans are prepared, and repayment plans completed for authorized projects, prior to obtaining appropriations for construction.

3. *Investigations of existing projects.*—These are made to determine the need and make plans for rehabilitation, financial adjustments, or water conservation on existing Federal reclamation projects.

4. *Alaskan investigations.*—These engineering and economic investigations relating to projects for the develop-

PROGRAM AND PERFORMANCE

The work consists of preparation of designs and specifications subsequent to initial allocation for construction, award, and servicing of construction contracts, construction of authorized projects, operation and maintenance during construction of completed features of projects, and rehabilitation of existing facilities. Basin investigations and advance planning for units of Missouri River Basin are also included.

This appropriation request of $142,341,000 represents an increase of $8,932,134 over the adjusted appropriation for the current fiscal year. This increase is due principally to the initiation of construction on five new projects and on new features of continuing projects.

Details of the program are shown on the following table. Accomplishments during the fiscal year are largely the result of the application of prior year appropriations. To a large extent the fiscal year 1956 program will be reflected in future year accomplishments. Bureau operations during 1956 will provide facilities for 252,000 additional acres of irrigated land and 12,000 kilowatts of new power-generating capacity.

The program is to be financed by $142,341,000 of new construction appropriation and $1,715,281 from prior year funds. Of the new appropriation, 67 percent will be used to finance work on 5 major projects and 4 units and divisions in the Missouri River Basin in the construction stage as shown in the table below.

An amount of $17 million is being proposed for later transmission and appears at the end of this chapter.

PROGRAM AND PERFORMANCE

Provision is made for operation and maintenance of (*a*) the power-generating and transmission facilities of completed projects (except the Fort Peck transmission system financed under a revolving fund), and the irrigation and water-supply facilities on certain projects; (*b*) the Colorado River front work and levee system; and (*c*) Boulder City, Nevada. Provision is also made for soil and moisture conservation operations and halogeton control on public lands under jurisdiction of the Bureau.

The Bureau operates and maintains the power-generation and transmission facilities, and generally the storage dams and reservoirs, of completed projects. Where necessary, the irrigation works are also operated and maintained until the water users are able to undertake the responsibilities. In 1956 a total of 40 projects and 19 Missouri River Basin units and divisions will be operated and maintained for irrigation, power, municipal and industrial water supplies. Of these, 17 have power

SPECIAL FUNDS

Sums herein referred to as being derived from the reclamation fund, the Colorado River dam fund, or the Colorado River development fund, are appropriated from the special funds in the Treasury created by the Act of June 17, 1902 (43 U. S. C. 391), the Act of December 21, 1928 (43 U. S. C. 617a), and the Act of July 19, 1940 (43 U. S. C. 618a), respectively. Such sums shall be transferred, upon request of the Secretary, to be merged with and expended under the heads herein specified; and the unexpended balances of sums transferred for expenditure under the heads "Operation and Maintenance" and "General Administrative Expenses" shall revert and be credited to the special fund from which derived.

ADMINISTRATIVE PROVISIONS

Appropriations to the Bureau of Reclamation shall be available for purchase of [one aircraft] *not to exceed two hundred forty-five passenger motor vehicles for replacement only*; payment of claims for damage to or loss of property, personal injury, or death arising out of activities of the Bureau of Reclamation; *uniforms or allowances therefor, as authorized by the Act of September 1, 1954 (68 Stat. 1114)*: payment, except as otherwise provided for, of compensation and expense of persons on the rolls of the Bureau of Reclamation appointed as authorized by law to represent the United States in the negotiation and administration of interstate compacts without reimbursement or return under the reclamation laws; rewards for information or evidence concerning violations of law involving property under the jurisdiction of the Bureau of Reclamation; performance of the functions specified under the head "Operation and Maintenance Administration", Bureau of Reclamation, in the Interior Department Appropriation Act, 1945; preparation and dissemination of useful information including recordings, photographs, and photographic prints; and studies of recreational uses of reservoir areas, and investigation and recovery of archeological and paleontological remains in such areas in the same manner as provided for in the Act of August 21, 1935 (16 U. S. C. 461–467): *Provided*, That no part of any appropriation made herein shall be available pursuant to the Act of April 19, 1945 (43 U. S. C. 377), for expenses other than those incurred on behalf of specific reclamation projects except "General Administrative Expenses" and amounts provided for reconnaissance, basin surveys, and general engineering and research under the head "General Investigations".

Allotments to the Missouri River Basin project from the appropriation under the head "Construction and Rehabilitation" shall be available additionally for said project for those functions of the Bureau of Reclamation provided for under the head "General Investigations" (but this authorization shall not preclude use of the appropriation under said head within that area), and for the continuation of investigations by agencies of the Department on a general plan for the development of the Missouri River Basin. Such allotments may be expended through or in cooperation with State and other Federal agencies, and advances to such agencies are hereby authorized.

Sums appropriated herein which are expended in the performance of reimbursable functions of the Bureau of Reclamation shall be returnable to the extent and in the manner provided by law.

No part of any appropriation for the Bureau of Reclamation, contained in this Act or in any prior Act, which represents amounts earned under the terms of a contract but remaining unpaid, shall be obligated for any other purpose, regardless of when such amounts are to be paid: *Provided*, That the incurring of any obligation prohibited by this paragraph shall be deemed a violation of section 3679 of the Revised Statutes, as amended (31 U. S. C. 665).

No funds appropriated to the Bureau of Reclamation for operation and maintenance, except those derived from advances by water users, shall be used for the particular benefit of lands (a) within the boundaries of an irrigation district, (b) of any member of a water users' organization, or (c) of any individual, when such district, organization, or individual is in arrears for more than twelve months in the payment of charges due under a contract entered into with the United States pursuant to laws administered by the Bureau of Reclamation.

Not to exceed $225,000 may be expended from the appropriation "Construction and Rehabilitation" for work by force account on any one project or Missouri Basin unit and then only when such work is unsuitable for contract or no acceptable bid has been received and, other than otherwise provided in this paragraph or as may be necessary to meet local emergencies, not to exceed 12 per centum of the construction allotment for any project from the appropriation "Construction and Rehabilitation" contained in this Act shall be available for construction work by force account. (*Interior Department Appropriation Act, 1955.*)

PROGRAM AND PERFORMANCE

The program of the Geological Survey is planned to provide basic and scientific data concerning the water, land, and mineral resources of the Nation, and to supervise the leasing of minerals on Federal and Indian lands. The Survey conducts topographic and geologic surveys and mapping, explores and appraises our mineral and water resources, classifies the public lands for mineral and waterpower potential, and supervises drilling and mining operations on Federal and Indian lands.

1. *Topographic surveys and mapping.*—Topographic maps portray the natural and man-made features of the earth's surface and are used in all operations which require detailed terrain information, such as (*a*) geologic investigations, (*b*) engineering development, and (*c*) the national defense. The long-range objective is to obtain topographic map coverage of the United States, its Territories and possessions. The immediate program provides topographic maps of the areas in which mineral and water investigations or engineering development and construction projects are most imminent, and the areas which the Department of Defense has assigned high priority for mapping due to military and civil defense requirements. In 1956 standard maps for an estimated 106,000 square miles of the United States and its Territories will be compiled, compared with 106,000 in 1954 and 104,000 in 1955.

2. *Geologic and mineral resource surveys and mapping.*—Investigations are directed toward (*a*) providing an accurate appraisal of the Nation's mineral and mineral fuel resources, (*b*) scientific exploration for additional sources of essential minerals, and (c) developing basic data on surface and subsurface geologic conditions for use in the planning, construction, and development of engineering projects. The program is accomplished by systematic geologic mapping aided by special investigations in supporting sciences, such as geophysics, geochemistry, petrology, and paleontology. Significant contributions have been made through the development of new techniques to aid in the search for additional mineral resources.

GEOLOGICAL SURVEY—Continued

SURVEYS, INVESTIGATIONS, AND RESEARCH—continued

Surveys, Investigations, and Research, Geological Survey—Con.

Geologic mapping is now progressing at the rate of 44,000 square miles of territory annually.

3. *Water resources investigations.*—Surface and underground water supplies are investigated to provide information essential in planning water-supply projects for military, industrial, and domestic expansion, as well as irrigation, hydroelectric power, navigation, flood control, highway and bridge design, and land-use projects. The program includes determinations of the flow, stage, and sediment discharge of rivers; reservoir contents; locations and safe yields of underground waters; the chemical quality and temperature of waters; and the availability of water supplies as related to present and future demands. The program for 1956 will be a continuation of the collection and interpretation of basic water facts and of the development of new techniques and principles of procedure in hydrologic studies.

4. *Soil and moisture conservation.*—Basic data and advice concerning hydrologic and geologic problems are provided to other bureaus for the improvement and maintenance of the productive values of the 282 million acres of Federal land under the stewardship of the Department of the Interior. The program will include surveys of the rates of erosion, evaluation of the effects of soil and moisture treatment measures on hydrologic factors, and evaluation studies to provide data for improving the design of remedial measures.

5. *Classification of lands.*—Federally owned and controlled lands are classified as to their mineral and water-power values as a basis for public-land administration prescribed by numerous mineral leasing and land disposal laws. Owing to the rapid rate of development of the Nation's mineral resources, increased demands are being made upon the Survey for mineral classification services. Requests for land classification totaled approximately 62,200 in 1954 and are estimated to reach 75,000 in 1956.

6. *Supervision of mining and oil and gas leases.*—Prospecting, development, and production of minerals on leased Federal and Indian lands are regulated and supervised. In the current year, some 129,000 leased properties, oil wells, and mines in 38 States and Alaska are expected to produce oil, gas, and other minerals valued at $540 million and render royalty returns of about $54 million. The States which produce the minerals receive 37½ percent of the royalties; the Reclamation fund, 52½ percent; and 10 percent is retained in the Treasury. In 1956, it is anticipated that the leased properties, mines, and wells requiring supervision will approximate 138,000, and that the production and royalty values will reach $570 million and $57 million, respectively.

7. *General administration—Plans and specifications, special-purpose buildings.*—The 1956 program contemplates completion of plans and specifications prerequisite to contracting for buildings in the vicinity of Washington, D. C.

PROGRAM AND PERFORMANCE

Provision is made for conserving, evaluating, and developing mineral resources.

1. *Fuels.*—(*a*) *Coal.*—Scientific research and engineering investigations and tests are carried out on the chemical and physical properties of coal and its mining, preparation, combustion, carbonization, and gasification. Coal samples are analyzed; a fuel economy service is performed for Government agencies; efficiency of coal-mining methods is evaluated; methods for improving the mechanized mining of anthracite are studied; and economic and statistical studies are performed.

(*b*) *Petroleum and natural gas.*—Six programs are carried on: (1) Engineering research on problems connected with the development and production of petroleum and natural gas, and scientific and technologic research on secondary recovery methods in producing petroleum; (2) studies of transportation and storage problems; (3) studies involving the chemistry and refining of petroleum and natural gas; (4) fundamental research to determine the thermodynamic properties of hydrocarbons; (5) statistical and economic studies of petroleum and natural gas; and (6) maintenance of buildings and research facilities.

(*c*) *Synthetic liquid fuels.*—Laboratory research is conducted and pilot plants are operated for the production of synthetic liquid fuels from coal and oil shale. The primary objective is to conserve and increase the liquid fuel resources of the Nation by the direct hydrogenation of coal, by the production and hydrogenation of synthesis gas from coal, by mining and retorting oil shale and refining shale oil, and by the underground gasification of coal.

(*d*) *Helium.*—Scientific and technologic research is carried on in resources, production, storage, and utilization of helium.

2. *Minerals and metals.*—Investigations and research are conducted to improve mining technology, examine ore deposits, discover metallurgical processes to make better use of low-grade ores, develop substitutes for scarce commodities, and statistical and economic information are analyzed and disseminated.

3. *Control of fires in coal deposits.*—Fires in inactive or abandoned deposits on public lands or private property are controlled or extinguished. Expenditures in connection with fires in operating mines are limited to the conduct of surveys, investigations, and research.

BUREAU OF MINES—Continued

HEALTH AND SAFETY—continued

Health and Safety, Bureau of Mines—Continued

PROGRAM AND PERFORMANCE

The appropriation supports: (1) investigation of accidents and rescue work in the mineral industries, (2) coal-mine inspections and investigations, and (3) explosives and explosions testing and research.

1. *Investigation of accidents and rescue work.*—Operations under this activity are designed to reduce working hazards, safeguard the health of workers, and promote efficiency in the mineral industries. The Bureau encourages accident prevention through education and safety organizations, exhibits, and demonstrations; gives instruction in accident prevention, first-aid, and mine-rescue methods; investigates explosions, fires, and other serious accidents in mines and mineral-industry plants; investigates and develops safety devices for the mineral industries; conducts research on the support of mine roof, tests equipment for use in mines and plants where explosive atmospheres may be encountered; and performs field and laboratory studies of ventilation of mines, methods of allaying mineral dusts, prevention of dust accumulations, effective use of rock dust to prevent widespread coal-dust explosions, and blasting practices.

2. *Mine inspections and investigations.*—The objectives for the fiscal year 1956 are (*a*) to inspect, at least once annually, every active coal mine regularly employing more than 14 men underground, and to take action to require compliance with mandatory provisions and make recommendations to gain compliance with the voluntary provisions of law, and (*b*) to inspect annually, or as necessary, underground coal mines regularly employing less than 15 men, and all strip mines, and to report on hazards observed with appropriate recommendations to correct the hazards.

SUMMARY OF COAL-MINE INSPECTION WORK

January–December 1953, inclusive	*Underground employment*		*Strip mines*	*Total*
	Less than 15 men	*15 or more men*		
Active coal mines	4,655	1,847	1,113	7,615
Individual coal mines inspected	3,216	1,688	340	5,244
Coal-mine inspections	4,219	3,664	348	8,231

3. *Explosives and explosions testing and research.*—Research is conducted to discover causes of explosions in coal mines and to improve methods of preventing explosions. Tests are conducted on explosives and blasting devices to determine their permissibility for use in coal mines or their suitability for use in other mining operations and the conditions under which they can be used safely.

services made necessary by the continued increase in visitation to park areas. Actual and estimated visitors and revenue receipts are as follows:

	1954 estimate	*1955 estimate*	*1956 estimate*
Visitors	48,000,000	50,000,000	52,000,000
Receipts	$4,037,551	$5,086,000	$5,895,000

Entrance fees were increased during fiscal year 1955 and further increases will be in effect during 1956.

2. *Forestry and fire control.*—Forests, brushland, or grassland on over 11 million acres are protected from fire, destructive insects, diseases, and other preventable damage. The increase proposed for 1956 is primarily for fire protection.

3. *Soil and moisture conservation.*—The 1956 program will permit corrective measures on 32 of the most critical problem areas.

4. *Park and recreation programs.*—Studies are made of the park, parkway, and recreational potentialities of the United States and its Territories, frequently in cooperation with Federal, State, and local agencies; technical and scientific services and guidance essential to management, protection, and public use are provided in the fields of biology, geology, history, and archeology; and investigations are made to determine whether agencies receiving surplus Federal real property with a recreational potential are utilizing those properties in conformity with terms of the transfer agreements. The proposed increase for 1956 is primarily for studies of the recreational potentialities of Federal water control projects sponsored by the Bureau of Reclamation or the Corps of Engineers.

5. *Concessions management.*—There are 170 major concessionaires operating in parks and other areas. Contracts are negotiated, or permits issued; rates are established; services to be rendered are determined; and records are audited.

PROGRAM AND PERFORMANCE

1. *Roads and trails.*—Approximately 6,816 miles of roads and parkways and 8,100 miles of trails will be maintained during the 1956 fiscal year.

2. *Buildings, utilities, and other facilities.*—Buildings, utilities, and other improvements valued at about $175 million not including those in the District of Columbia and environs, are maintained and operated, and objects of historic and scientific value are preserved. The increase for 1956 will permit a modest reduction in the maintenance backlog.

PROGRAM AND PERFORMANCE

1. *Buildings, utilities, and other facilities.*—The 1955 and 1956 programs are designed principally to meet increased public use needs.

2. *Acquisition of lands and water rights.*—Approximately 700,000 acres of privately owned lands standing in the way of development and public use are located within the areas administered. Rights to water must be obtained, frequently by purchase, in many of the areas for use of visitors and employees, and for fire protection. The obligations for 1954 and 1955 under the subactivity "lands" includes approximately $1,843,000 and $2,050,000 respectively for the Independence National Historical Park acquisition program. This program is scheduled for completion during 1955.

3. *Parkways.*[1]

4. *Roads and trails.*[1]

[1] The obligations for the parkways and roads and trails programs shown under this appropriation are against carryover balances of appropriations made prior to fiscal year 1955 for programs authorized under the Federal Highway Act of 1952. Programs authorized under the Federal Highway Act of 1954 are being obligated against the contract authority provided by that act and are shown under the appropriation entitled "Construction (liquidation of contract authorization), National Park Service."

PROGRAM AND PERFORMANCE

1. *Administration of fish and game laws.*—These laws apply to the fisheries and game of Alaska, the protection of migratory birds and certain game mammals, the interstate transportation of fish, and the enforcement of international agreements.

2. *Propagation and distribution of food fishes.*—Eighty-seven fish-cultural stations are currently operated to produce fish and eggs for the propagation of commercial food and game fishes. Fish screens and other protective devices are maintained on Federal areas in the West. Management programs are developed for the fishing waters on public lands in cooperation with other Federal agencies.

3. *Mammal and bird reservations.*—Two hundred and seventy-five refuges, consisting of more than 18 million acres, are operated for the conservation of migratory waterfowl and for the preservation and propagation of rare birds and mammals.

4. *River basin studies.*—To insure that adequate measures are taken for the conservation and development of fish and wildlife, studies are made of proposed Federal power, navigation, irrigation, and drainage projects.

5. *Control of predatory animals and injurious rodents.*—Such control is exercised on public lands. Technical information and correlation and supervision of cooperative programs are provided to protect livestock, game, poultry, forage, crops, forests, structures, foods, and feeds from destruction by harmful animals.

6. *Soil and moisture conservation.*—Nearly 5.5 million acres in 63 refuges within the continental United States are critically eroded or severely depleted. A long-range program for developing a conservation plan for each of these refuges has been initiated. Work is now being done on 24 refuges.

7. *Management and investigations of fish and wildlife resources of Alaska, including construction.*—Twenty-five percent of the receipts from sales of fur sealskins and other products are used to supplement other appropriations for management and investigations of fish and wildlife resources of Alaska, including construction.

PROGRAM AND PERFORMANCE

1. *Research on fish and fisheries.*—Research is conducted (*a*) to learn more about variations in abundance of important food fishes and other aquatic animals; (*b*) to discover declining species and better measures for conserving, developing, and managing the fishery resources; and (*c*) to improve the cultivation of aquatic animals, including shellfish.

2. *Exploration, development, and utilization of fishery resources.*—Services of benefit to the commercial fishing industry include: (*a*) exploring for fish and improving fishing gear and methods; (*b*) developing and demonstrating more efficient means of handling, processing, storing, and marketing fishery products; (*c*) compiling and publishing commercial fishery statistics, including operation of seven market news offices; and (*d*) collecting and disseminating economic data on the industry, including business trends and foreign trade.

3. *Research on birds and mammals.*—Research is carried on in migratory wildlife and wildlife management and conservation practices. In addition, wildlife research units are maintained in cooperation with States and universities to give technical training in wildlife management, carry on research, and demonstrate improved management practices.

4. *Research on fish migration over dams.*—Investigations are conducted to acquire knowledge of the factors influencing the direction and rate of movement of anadromous fish over dams, so that these factors may be known in designing future dams.

PROGRAM AND PERFORMANCE

Provision is made for the offices of the Governors of Alaska, Hawaii, the Virgin Islands, Guam, and American Samoa; for the legislatures, as defined by law; for the care of the mentally ill in Alaska; and in American Samoa, for the judiciary and for essential safety, health, education, and welfare services including construction.

The net decrease of $723,502 in appropriation results primarily from the enactment of the Revised Organic Act of the Virgin Islands (Public Law 517, approved July 22, 1954) which discontinues the grants to the Virgin Islands formerly paid from this appropriation.

PROGRAM AND PERFORMANCE

Under the terms of the Trusteeship Agreement between the United States and the Security Council of the United Nations, the United States exercises full powers of administration, legislation and jurisdiction over the territory and has undertaken obligations to promote the political, economic, and educational advancement of the inhabitants.

The territory encompasses some 3,000,000 square miles of ocean over which are scattered 2,141 islands with a land area of 687 square miles. The population is approximately 58,000. The Department of the Interior is responsible for administration of all the territory except the islands of Saipan and the Tinian group which are under Navy jurisdiction as critical defense areas.

1. *High Commissioner's Office.*

2. *Judiciary.*—Provision is made for the High Court of the Trust Territory, the Court of Appeals, and the lesser courts of the territory.

3. *Grants.*—Grants are required in addition to local revenues for health, education, and other services as well as for the cost of maintaining and providing the necessary facilities of the government of the territory. The costs of government are distributed as follows:

By function	*1954 actual*	*1955 estimate*	*1956 estimate*
a. Health, education, and other services	$1,326,305	$1,439,000	$1,443,000

d. Construction		700,000	700,000
e. General administration	1,314,921	1,482,300	1,459,500
Total cost of government	5,822,087	6,242,500	6,215,000
Deduct:			
1953 balance applied $66,821			
Local revenues 1,570,266	1,637,087	1,357,500	1,330,000
Total grants	4,185,000	4,885,000	4,885,000

(*a*) *Health, education and other services.*—The government of the territory operates 5 hospitals with a total of 271 beds. There are 145 public elementary and 5 intermediate schools as well as a small central high school at Truk. Total public school enrollment for 1953 was approximately 8,000. The government is assisting in the development of island resources and encourages the people in their efforts in the direction of self-government and also provides for the public safety and other customary services.

(*b*) *Operation and maintenance.*—The physical plant of the government, such as powerplants, docks, warehouses, quarters, trucks, and other equipment, requires abnormally costly maintenance which increases annually, because of their dilapidated condition resulting from long use in the tropical climate.

(*c*) *Transportation services.*—At present, two 4,800-ton, four 250-ton diesel-powered cargo vessels, 2 small sailing schooners, and 4 PBY-type airplanes are operated under contract to provide for the transportation of supplies, copra exports, trade goods, and passengers throughout the territory.

(*d*) *Construction.*—A 10-year program was started in fiscal year 1955 for construction of facilities to replace the rapidly deteriorating temporary, advanced-base type plant installed by the Navy during and immediately following World War II.

PROGRAM AND PERFORMANCE

The highway system of Alaska is being extended and constantly improved to meet military requirements and the increasing civilian needs.

1. *Preparation of plans.*—Surveys are conducted and designs prepared for new road and bridge construction projects and for the improvement of existing roads and structures in advance of Congressional authorization. Cadastral surveys of existing roads must be made for right-of-way identification.

2. *Construction in progress.*—The 1956 program consists of the following projects: (*a*) continuation of construction, and improvement of the Taylor Highway, which is now 90 percent complete; (*b*) asphalt surfacing of 75 miles of the Richardson Highway; (*c*) continuation of stage construction of the Denali Highway connecting Mount McKinley National Park with the Richardson Highway. Project is now 60 percent complete; (*d*) continuation of construction and improvement of Sterling Highway by paving; (*e*) further extension of access roads to new homestead and industrial areas.

3. *Reconstruction.*—Improvements will be continued on existing roads and bridges to raise them to accepted standards in order to meet conditions imposed by increasing traffic and to eliminate hazardous conditions.

4. *New construction.*—It is proposed to initiate construction of a $2,500,000 highway connecting the City of Nenana with the inter-connected highway system of Alaska. This highway will traverse rich agricultural areas and will also be a link in the proposed highway extending into coal fields of Healy and Lignite Creeks, and eventually will provide a loop through McKinley Park to the Denali Highway.

PROGRAM AND PERFORMANCE

Under the Revised Organic Act of the Virgin Islands (Public Law 517, approved July 22, 1954), Federal appropriations for construction of public works will no longer be made. Completion of the program carried on heretofore under this appropriation will depend upon the action of the local legislature in appropriating for the needs of the Virgin Islands out of the internal revenues granted by the new organic act. Through June 30, 1955, there will have been obligated $10,789,000 out of a program estimated to cost $14,693,000, leaving a balance of $3,904,000 to be provided by the local government.

PROGRAM AND PERFORMANCE

1. *Departmental direction.*—The Office of the Secretary and the Under Secretary and the division of information provide top departmental direction and contact with the public.

2. *Program direction and coordination.*—The Secretary is aided by three Assistant Secretaries and the technical review staff. Staff assistance is provided on matters of policy within the Department's responsibilities for promoting the domestic welfare and the conservation and development of the country's natural resources. The 1956 estimate provides for two additional staff assistants to the Assistant Secretaries.

3. *Administrative management services.*—Under the direction of the Administrative Assistant Secretary, budget and finance, management improvement, property management, personnel, and administrative service and security operations are carried on. The 1956 estimate provides for strengthening of the inspection, security, audit and property functions, and for increased emphasis on department-wide safety programs.

4. *General services.*—Provision is made for services such as printing and binding, telephone, health, and library.

PROGRAM AND PERFORMANCE

Assistance is given the 48 States, Alaska, Hawaii, Puerto Rico, and the Virgin Islands by appropriation of funds equal to the tax revenue from firearm, shell, and cartridge manufacture (16 U. S. C. 669–669j).

1. *Federal-aid payments to States for wildlife restoration projects.*—These payments also cover construction necessary to make land or water areas available for such projects, and for wildlife management research necessary for efficient administration.

2. *Administration of Federal aid to States for wildlife restoration projects.*—State plans are examined, and audits of State expenditures and inspections of projects are made.

3. *Carrying out provisions of the Migratory Bird Conservation Act.*—Funds apportioned but not expended by the States within 2 fiscal years are used by the Service to carry out the Migratory Bird Conservation Act.

PROGRAM AND PERFORMANCE

Seventy-five percent of the net proceeds from the sale of wildlife-refuge products are appropriated for refuge maintenance and enforcement activities, the remainder being paid to the counties in which the refuges are located (16 U. S. C. 715s).

1. *Refuge maintenance.*—This includes construction and improvement of buildings, roads, and other facilities of national wildlife refugees.

2. *Enforcement activities.*—These activities deal with the enforcement of the Migratory Bird Treaty Act of 1918, as amended (16 U. S. C. 703–711).

Payments to the Virgin Islands—1955, $4,000,000; 1956, $4,000,000.

PROGRAM AND PERFORMANCE

The local revenues collected annually by the government of the Virgin Islands are matched by a payment out of the annual internal revenue taxes collected by the United States on Virgin Islands products transported to the United States. The balance of such internal revenue taxes will also be paid to the Virgin Islands during fiscal years 1955 and 1956 to provide a fund of not to exceed $5 million at the end of any fiscal year, to be used for emergency purposes. The payments to the Virgin Islands may be expended as the Territorial Legislature determines, with the approval of the President of the United States or his designated representative (Revised Organic Act of the Virgin Islands, Public Law 517, approved July 22, 1954).

REVOLVING AND MANAGEMENT FUNDS

PUBLIC ENTERPRISE FUNDS

BUREAU OF INDIAN AFFAIRS

Revolving Fund for Loans, Bureau of Indian Affairs

BUSINESS-TYPE STATEMENTS

PROGRAM AND PERFORMANCE

This fund is used to assist Indians in acquiring livestock, farm, and other equipment and in establishing tribal enterprises (25 U. S. C. 470, 471, 631). This fund and miscellaneous tribal funds provide the only source of loans for the great majority of Indians who cannot borrow from ordinary commercial credit sources because of their low economic status and lack of bankable security. The principal of the fund consists of appropriations from the United States Treasury and cattle settlements. Cattle settlements are payments made by the Indians for breeding stock furnished by the Government generally prior to establishment of this fund. As of June 30, 1955, the principal will consist of $13,799,600 in appropriations and an estimated $1,541,233 in cattle settlements for a total of $15,340,833.

Loans made in fiscal year 1954 totaled $453,322. It is expected that $1,300,000 will be loaned in 1955 and $1,400,000 in 1956. Funds provided by operations totaled $1,718,069 in 1954, and are estimated at $825,000 in 1956. Operations in 1956 will thus result in budgetary expenditures of $575,000.

The fund accumulated a deficit in the early years of operation when interest income was small and administrative expenses were paid from the principal fund. This deficit was $844,049 as of June 30, 1954, and is expected to be increased to $1,305,625 by June 30, 1956.

BUREAU OF RECLAMATION

Continuing Fund for Emergency Expenses, Fort Peck Project, Montana

BUSINESS-TYPE STATEMENTS

PROGRAM AND PERFORMANCE

This fund is used to defray the operating expenses of the generation and transmission of power from Fort Peck project, Corps of Engineers, and to defray emergency expenses to insure continuous operation (16 U. S. C. 833). It receives revenues from the sale of electric energy. Receipts in excess of current operating needs may be retained so as to maintain a continuing emergency fund of $500,000. The balance is paid into the Treasury as miscellaneous receipts toward the cost of amortization and interest of the dam, reservoir, and powerplant allocated to power and of transmission. Such payments totaled $1,302,992 in 1954 and are estimated at $1,723,080 in 1955 and $2,281,550 in 1956.

The operation of the Fort Peck project power and transmission facilities are financed by this fund and capital outlays for transmission by the appropriation "Construction and rehabilitation, Bureau of Reclamation." Capital outlays for the dam, reservoir, and powerplant are financed by Corps of Engineers appropriations. The following statements consolidate the financing from the "Continuing fund for emergency expenses, Fort Peck project, Montana" and "Construction and rehabilitation, Bureau of Reclamation."

BUREAU OF MINES

Development and Operation of Helium Properties, Bureau of Mines

BUSINESS-TYPE STATEMENTS

PROGRAM AND PERFORMANCE

This fund is used for the production of helium, primarily for the Army, Navy, Air Force, and the Atomic Energy Commission, who reimburse the fund for products received. Sales are also made to non-Federal consumers for medical, scientific, and commercial use (50 U. S. C. 164). As of June 30, 1954, the net appropriated capital consisted of appropriations of $17,971,969, less $6,935,156 in write-offs and disposals. Production of helium will be increased during 1956 upon the completion of a $6,000,000 facility recently approved by the Congress. The added volume, coupled with an increase in price, is expected to eliminate the deficit of $272,388 at June 30, 1954, and provide a cash surplus which is being retained in the fund pending determination of the total expenses incident to the current expansion program.

PURPOSE AND FINANCIAL ORGANIZATION

This revolving fund, derived from the earnings of the Railroad, is used for operating expenses and maintenance charges as well as improvements and additions (48 U. S. C. 301–308).

The Government's investment in the railroad as of July 1, 1954, was $128,926,729, of which $15,747,997 was donations from other agencies. The investment consists of $111,620,813 for fixed assets and other assets including working capital, amounting to $17,305,916.

ANALYSIS OF BUDGET PROGRAMS

1. *Rail line operation.*—This consists in the operation of the railroad in handling of freight and passenger traffic on 470 miles of mainline and 66 miles of branch line. Funds applied to expenses for 1954 were $15,707,372 and are estimated to be $13,027,800 for 1955 and 1956 respectively. Decreases in construction traffic in 1956 are expected to be offset by increases in coal shipments.

Funds applied to acquisition of assets during 1956 are estimated at $10,713,105 and are mainly for the reconstruction of the Seward to Portage line and construction of the Seward dock.

2. *River boat operations.*—This consists of handling freight traffic on the Tanana and Yukon Rivers by river boats and barge service. Funds applied to expenses for 1954 were $316,306 and are estimated to be $279,000 for 1955 and 1956 respectively.

3. *Hotels and mess operations.*—These include the hotels, messhouses and work crews' messes. Funds applied to expenses for 1954 were $820,387 and are estimated to be $661,200 for 1955 and 1956 respectively.

4. *Commissary operations.*—This operation was discontinued as of May 31, 1954.

FINANCING OPERATIONS

An appropriation of $4,100,000 is requested for 1956 to complete the reconstruction of the Seward to Portage line.

OPERATING RESULTS AND RETAINED EARNINGS

A net operating profit of $719,525 occurred in 1954. A net operating profit of $1,974,000 is estimated for 1955, and the same for 1956. It is anticipated that the total deficit of $13,373,386 as of June 30, 1954, will decrease to $9,425,386 as of June 30, 1956.

PROGRAM AND PERFORMANCE

The Puerto Rico Reconstruction Administration, established in 1935 to increase employment by useful projects, is financed from the Puerto Rico revolving fund, and derives its income largely from rentals, collections on loans and mortgages, and lease and purchase contracts (49 Stat. 1135). Congress has directed liquidation of the Puerto Rico Reconstruction Administration by February 15, 1955 (Public Law 276, approved Aug. 15, 1953). The 1955 program reflects liquidation costs as well as ordinary operating costs for approximately 8 months.

The Company was incorporated on December 8, 1947, by proclamation of the Naval Governor of Guam with the consent of the Guam Legislature. The Company bought Micronesian products for resale in the world market, and bought trade goods for resale to the Micronesians. Operations terminated December 31, 1954, in accordance with Public Law 172, approved July 31, 1953. Private trading companies will henceforth perform the function of the Company. It is expected that, when fully liquidated, the Company will show an earned surplus of approximately $1.1 million which will be returned to the U. S. Government either in cash or in property.

BUSINESS-TYPE STATEMENTS

PURPOSE AND FINANCIAL ORGANIZATION

The Corporation was created to promote the economic development of the Virgin Islands (63 Stat. 350). Appropriations not to exceed $9 million were authorized to be made to a revolving fund in the Treasury, based upon annual budgets submitted by the Corporation. The appropriation of additional funds as grants to finance specific programs not primarily of a revenue-producing character and to reimburse the Corporation for operating losses is also authorized.

ANALYSIS OF BUDGET PROGRAMS

1. *Loan program.*—Loans at 5 percent interest are made (*a*) to aid farmers in agricultural diversification and to improve livestock production, and (*b*) to aid commercial or industrial undertakings in the Virgin Islands when loans are not available from other sources. It is estimated that loans will be made to approximately 470 farmers during fiscal year 1956.

2. *Sales and rentals program.*—The principal business of the Corporation is the growing of sugarcane and the manufacture and sale of sugar. Production statistics are as follows:

	1954 actual	*1955 estimate*	*1956 estimate*
Sugarcane production:			
Acres harvested	3,042	2,273	2,500
Tons harvested	65,994	54,500	62,500
Tons per acre	22	24	25
Total cost	$472,506	$381,500	$421,900
Cost per ton	$7.16	$7.00	$6.75
Sugar manufacture:			
Tons of cane ground:			
Corporation cane	65,994	54,500	62,500
Purchased cane	36,469	54,000	62,000
	102,463	108,500	124,500
Tons of sugar produced	9,613	10,850	12,450
Yield per ton of cane	9.5%	10%	10%
Total cost	$1,239,556	$1,247,800	$1,394,400
Cost per ton	$128.94	$115.00	$112.00
Gross profit or loss (−) per ton:			
Manufacturing expense	$128.94	$115.00	$112.00
Shipping and selling expense	17.64	18.00	18.00
Total expense	146.58	133.00	130.00
Income	132.81	127.58	127.50
Loss (−)	−13.77	−5.42	−2.50

The substantial loss in 1954 resulted from a severe drought in the fall of 1953 which sharply reduced the tonnage harvested. Although uncertain growing conditions will always make the production of sugar a precarious enterprise in the Virgin Islands, it is believed that losses can be materially reduced by improved efficiency of the mill and in the field operations. Improvements now being adopted are expected to minimize losses in future years.

In addition to the sugar operations this activity also includes the rental of property (principally tractors, a distillery, and employee housing), and during part of 1954, the operation of the Bluebeard's Castle Hotel. During 1954 the hotel was sold, and the sale of the distillery is planned for 1955.

3. *Power program.*—The Corporation operates all of the power facilities in the Virgin Islands consisting of the powerplants on St. Thomas and St. Croix and the associated distribution lines.

4. *Non-revenue-producing activities.*—During fiscal year 1956 these will include a water and soil conservation program, and a forest development program. Assistance to the Virgin Islands in the development of tourism will cease in fiscal year 1955. Under the revised organic act of the Virgin Islands approved July 22, 1954, the Government of the Virgin Islands will receive sufficient revenue to assume full responsibility for the development of tourism.

5. *Administrative expenses.*—It is proposed that for 1956 the Corporation operate under a limitation of $160,000. The increase of $30,000 is to cover the reclassification of certain expenses previously classed as nonadministrative.

FINANCING OPERATIONS

An appropriation of $390,000 is requested for 1956 of which $130,000 is to finance non-revenue-producing activities, and $260,000 is to restore working capital to the minimum requirements for 1956 operations.

OPERATING RESULTS AND RETAINED EARNINGS

Operations resulted in a net loss of $567,780 for 1954. Losses for 1955 and 1956 are estimated at $473,500 and $411,400. These losses occur in the sugar operations. Management improvements are being put into effect which should reduce future losses. However, the losses derived from the poor growing conditions in the Virgin Islands cannot be offset entirely by improved management.

[REDUCTIONS IN APPROPRIATIONS]

[Amounts available to the Department of the Interior from appropriations are hereby reduced in the sums hereinafter set forth, such sums to be carried to the surplus fund and covered into the Treasury immediately upon the approval of this Act:]

[BUREAU OF RECLAMATION]

[Construction and Rehabilitation: Missouri Basin Project, Missouri Diversion Unit, $1,700,000.] (*Department of the Interior Appropriation Act, 1955.*)

GENERAL PROVISIONS

SEC. 101. Notwithstanding any provision of law to the contrary, aliens may be employed during the current fiscal year in the field service of the Department for periods of not more than thirty days in cases of emergency caused by fire, flood, storm, act of God, or sabotage.

SEC. 102. Appropriations in this Act available for travel expenses shall be available for expenses of attendance of officers and employees at meetings or conventions of members of societies or associations concerned with the work of the bureau or office for which the appropriation concerned is made.

SEC. 103. Appropriations made in this Act shall be available for expenditure or transfer (within each bureau or office), with the approval of the Secretary, for the emergency reconstruction, replacement or repair of buildings, utilities, or other facilities or equipment damaged or destroyed by fire, flood, storm, or other unavoidable causes: *Provided*, That no funds shall be made available under this authority until funds specifically made available to the Department of the Interior for emergencies shall have been exhausted.

SEC. 104. The Secretary may authorize the expenditure or transfer (within each bureau or office) of any appropriation in this Act, in addition to the amounts included in the budget programs of the several agencies, for the suppression or emergency prevention of forest or range fires on or threatening lands under jurisdiction of the Department of the Interior: *Provided*, That appropriations made in this Act for fire suppression purposes shall be available for the payment of obligations incurred during the preceding fiscal year.

SEC. 105. Appropriations made in this Act shall be available for operation of warehouses, garages, shops, and similar facilities, wherever consolidation of activities will contribute to efficiency or economy, and said appropriations shall be reimbursed for services rendered to any other activity in the same manner as authorized by the Act of June 30, 1932 (31 U. S. C. 686): *Provided*, That reimbursements for cost of supplies, materials and equipment, and for services

GENERAL PROVISIONS—Continued

rendered may be credited to the appropriation current at the time such reimbursements are received.

SEC. 106. Appropriations made in this Act shall be available for services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a), when authorized by the Secretary, at rates not to exceed $100 per diem for individuals, and in total amount not to exceed $250,000; maintenance and operation of aircraft; hire of passenger motor vehicles; purchase of reprints; payment for telephone service in private residences in the field, when authorized under regulations approved by the Secretary; and the payment of dues, when authorized by the Secretary, for library membership in societies or associations which issue publications to members only or at a price to members lower than to subscribers who are not members.

[SEC. 107. Funds appropriated in this title shall be available for the purchase of not to exceed two hundred and twenty-seven passenger motor vehicles (including one at not to exceed $2,750) of which two hundred shall be for replacement only; and the Secretary is authorized to make such transfers of motor vehicles, between bureaus and offices, without transfer of funds, as may be required in carrying out the operations of the Department.]

SEC. [108] *107* (a) Not to exceed $200,000 of the funds appropriated in this title shall be available to pay the compensation of all persons the budget estimates for personal services heretofore submitted to the Congress for the fiscal year [1955] *1956* contemplated would be employed by such department, agency, or corporation during such fiscal year in the performance of—

(1) function performed by a person designated as an information specialist, information and editorial specialist, publications and information coordinator, press relations officer or counsel, photographer, radio expert, television expert, motion picture expert, or publicity expert, or designated by any similar title, or

(2) functions performed by persons who assist persons performing the functions described in (1) in drafting, preparing, editing, typing, duplicating or disseminating public information, publications or releases, radio or television scripts, magazine articles, photographs, motion picture and similar material, shall be available to pay the compensation of persons performing the functions described in (1) or (2).

(b) This section shall not apply to the preparation for publication of reports and maps resulting from authorized scientific and engineering investigations and surveys, to photography incident to the compilation and reproduction of maps and reports, or publications of the National Park Service, or to photocopying of permanent records for preservation.

[SEC. 702. Limitations on amounts to be expended for personal services under appropriations in the Interior Department Appropriation Act, 1955 (Public Law 465, Eighty-third Congress), shall not apply to lump-sum leave payments pursuant to the Act of December 21, 1944 (5 U. S. C. 61b–d).]

[SEC. 703. The limitation for personal services under the heading "Construction, Bonneville Power Administration", contained in the Interior Department Appropriation Act, 1955 (Public Law 465, Eighty-third Congress), is hereby increased from $6,250,000 to $6,750,000.]

[SEC. 704. Funds appropriated under the heading, "Administration of Territories" in the Interior Department Appropriation Act, 1955 (Public Law Numbered 465, Eighty-third Congress) shall be available to carry out the provisions of the Revised Organic Act of the Virgin Islands (Public Law Numbered 517, Eighty-third Congress).] *(Department of the Interior Appropriation Act, 1955; Supplemental Appropriation Act, 1955.)*

SEC. 401. No part of any appropriation contained in this Act, or of the funds available for expenditure by any corporation included in this Act, shall be used to pay the salary or wages of any person who engages in a strike against the Government of the United States or who is a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or who advocates, or is a member of an organization that advocates, the overthrow of the Government of the United States by force or violence: *Provided,* That for the purposes hereof an affidavit shall be considered prima facie evidence that the person making the affidavit has not contrary to the provisions of this section engaged in a strike against the Government of the United States, is not a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or that such person does not advocate, and is not a member of an organization that advocates, the overthrow of the Government of the United States by force or violence: *Provided further,* That any person who engages in a strike against the Government of the United States or who is a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or who advocates, or who is a member of an organization that advocates, the overthrow of the Government of the United States by force or violence, and accepts employment the salary or wages for which are paid from any appropriation or fund contained in this Act shall be guilty of a felony and, upon conviction, shall be fined not more than $1,000 or imprisoned for not more than one year, or both: *Provided further,* That the above penalty clause shall be in addition to, and not in substitution for, any other provisions of existing law: *Provided further,* That in cases of emergency, caused by fire, flood, storm, act of God, or sabotage, persons may be employed for periods of not more than thirty days and be paid salaries and wages without the necessity of inquiring into their membership in any organization.

CURRENT AUTHORIZATIONS

INTRODUCTORY STATEMENT

The Department serves primarily as the law office of the Federal Government, providing the President and heads of executive agencies with legal counsel. It also investigates alleged violations of Federal law, prosecutes offenders before the Federal courts, maintains prisons for the incarceration of those sentenced, and protects the interests of the Government in civil matters. The departmental program is made up of the work of (1) the law offices; (2) the Federal Bureau of Investigation; (3) the Immigration and Naturalization Service; (4) the Federal Prison System including Federal Prison Industries, Inc.; and (5) the Office of Alien Property.

PROGRAM AND PERFORMANCE

The Government is represented in each of the 94 judicial districts by a United States attorney and a United States marshal. The United States attorney is responsible for the Government's legal interests in his district. The marshal has custody of all Federal offenders until released by the courts or confined in prison. He also acts as agent of the court in the service of process.

Workload in both these offices has shown a steady increase over the past few years and there is no indication that this trend will be reversed. The increase provides for additional staff and related costs to meet a growing workload and begin reduction of backlogs.

PROGRAM AND PERFORMANCE

The Federal Bureau of Investigation, as the investigative arm of the Department of Justice, obtains evidence for use in civil litigation and prosecution of violations of Federal law. By statute and Executive order it is charged with the primary responsibility in matters related to the Nation's internal security. As a service agency, the Federal Bureau of Investigation assists all law enforcement agencies in identification and technical matters.

The $88,000,000 appropriation request for the fiscal year 1956 represents an increase of $9,718,000 when compared with the fiscal year 1955. $8,595,000 of increase due to (1) Sec. 208 (a), Public Law 763, and (2) change in method of financing program initiated in fiscal year 1955. Heavy responsibilities in the field of criminal, internal security, and subversive activities are responsible for the increased needs.

1. *Security and criminal investigations.*—This activity encompasses not only investigative responsibilities in the general criminal and subversive fields, but also coordination of appropriate records and maintenance of communications systems. Information is made available to other Government agencies having an official interest therein. Expanding internal security responsibilities, together with upward trends in major criminal categories, forecast further increases in this activity.

2. *Identification by fingerprints.*—The Identification Division provides a national repository of identification data based on fingerprint records. Criminal records, including fingerprints, are acquired, classified, preserved, and exchanged with other duly authorized law enforcement agencies. At the close of fiscal year 1954, fingerprint records on file numbered 131,337,295. The 1956 budget request includes necessary amounts for servicing this collection and processing an estimated 5,229,339 acquisitions.

3. *Operation of criminal and scientific laboratory.*—The Federal Bureau of Investigation laboratory is a service agency for the field staff of the Federal Bureau of Investigation and is available without charge to all duly constituted law enforcement organizations. Examinations conducted during the fiscal year 1954 totaled 126,518, an increase of 4.5 percent over those experienced during the 1953 fiscal year. Continuing increases are anticipated throughout fiscal year 1956.

4. *Training schools and inspectional services.*—The Bureau conducts instructional courses for its personnel and that of other law enforcement agencies. The instruction embodies a comprehensive program designed to improve all aspects of law enforcement activities, including management, administration, efficiency, and investigative techniques.

5. *General administration.*

PROGRAM AND PERFORMANCE

The Service administers and enforces the laws relating to immigration and naturalization.

The increase is to strengthen the border patrol, with particular emphasis on the Mexican border, to where it can do an effective job in preventing illegal entries and in apprehending those who have illegally entered the United States. A supplemental appropriation for that purpose is anticipated for 1955.

1. *Inspection for admission into the United States.*—Control is maintained at border points, seaports, and airports over the entry of persons into the United States.

PROGRAM AND PERFORMANCE

1. *Custody, care, and treatment of prisoners in Federal institutions.*—The program for 1956 contemplates an average inmate population of 21,400, an increase of 1,700 over the number appropriated for in 1955. The increase in funds required is due to the larger workload and to bring the appropriated funds up near the level of actual costs in 1954. Funds required under this activity, exclusive of salaries, are in direct relation to the average inmate population and are based on a cost per inmate per day of 73.5 cents.

2. *Maintenance and operation of institutions.*—There are 27 regular institutions operated throughout the United States (6 penitentiaries, 3 reformatories, 1 institution for women, 1 medical center, 3 juvenile institutions, 8 correctional institutions, 1 jail, and 4 camps). The present normal capacity for the 27 institutions is 18,883. As of June 30, 1954, there were 20,121 inmates. Deferred maintenance needs and increased costs are reflected in the estimates.

3. *Support of United States prisoners in Alaska.*—This covers maintenance and operation of eight Federal jails and support of prisoners in non-Federal jails in Alaska.

4. *Medical services (Allocation to Public Health Service).*—Personnel detailed from the Public Health Service furnish medical care to prisoners.

5. *General administration.*

PURPOSE AND ORGANIZATION

The Corporation is authorized (18 U. S. C. 4121–4128) to establish and operate industries in Federal penal and correctional institutions to give employment to inmates, to give opportunities to acquire knowledge and skill in trades and occupations and to assist the discharged inmate in finding civilian employment. In addition to paying expenses from operating income, a total of $27,250,000 has been paid in dividends to the United States Treasury since the Corporation started operations on January 1, 1935. The Corporation started with $4.2 million net assets of the Industries Division of the Bureau of Prisons; and has since increased its capital to $4.9 million. All products and services of the Corporation are sold exclusively to the Bureau of Prisons and other Federal agencies.

ANALYSIS OF BUDGET PROGRAMS

The industrial program employed 3,525 inmates last year on a 40-hour week. Employment of 3,650 is expected this year and 3,750 during 1956. During the past year industrial activities were diversified among 30 different lines of industry in 49 shops at 19 locations. Three new industries will start operations this year. They are a tire recapping shop at Petersburg, Va.; a furniture repair and refinishing shop at Texarkana, Tex.; and a clothing factory at Camp Cooke, Calif. Operations started at Camp Cooke in August 1954 on an order of 78,000 pairs of trousers for the Army. The brush shop at Texarkana, Tex., where floor sweep brushes were made was transferred to the brush shop at Leavenworth to make room for the new furniture repair and refinishing shop at Texarkana which started operations August 18, 1954.

The vocational training program which is financed from profits earned by inmates working in the industrial shops had a training enrollment of 9,606 inmates during 1954 as follows:

Types of training:	*Number of training groups*	*Number receiving training*	*Number completing training*
Agricultural	38	1,027	454

FEDERAL PRISON INDUSTRIES, INC.—Continued

It is estimated that 10,000 inmates will receive training during 1955 and 10,500 in 1956. In addition to the inauguration of Ashland, Ky., as the first youth center under the Youth Corrections Act other special features of 1954 include approval of the vocational training program at the Federal Reformatory at Petersburg, Va., by the Virginia State Department of Education and approval of the automotive shop and the machine shop at the United States Penitentiary at McNeil Island, Wash., by the apprenticeship councils of Tacoma for apprenticeship training in those two shops.

Thirteen of the major institutions have met the standards and requirements of the State boards for vocational training in which the institutions are located. These State boards have approved 214 shops and industrial projects and those trainees who successfully complete these courses are granted certificates of achievement by the State. Six hundred and ninety-eight trainees successfully completed the main courses and received certificates of achievement from the State boards. The Federal correctional institution at Tallahassee, Fla., and the new youth center at Ashland, Ky., are working with their respective State boards to establish standards and meet established requirements.

The meritorious monetary award program, under which inmates performing outstanding services in institutional operations may be rewarded financially, provided awards to 4,159 inmates during 1954, as indicated in the table on program highlights.

Administrative expense exclusive of depreciation was $335,418 in fiscal year 1954, is limited to $377,000 in 1955; and has been included in the 1956 budget at $377,000. Vocational expense exclusive of depreciation and after taking account of related revenues was $417,128 in fiscal year 1954; is limited to $473,000 in 1955 and is included in the 1956 budget program for $473,000.

FINANCING OPERATIONS

Profit from 1954 operations resulted in a minus budgetary expenditure of $3,334,925, while it is expected that receipts will exceed expenditures by $1,647,266 for 1955 and $1,981,600 for 1956. Dividends of $2,750,000 were paid into the United States Treasury during 1954 and it is believed that $2,100,000 and $2,000,000 will be paid during 1955 and 1956, which will make total payments to the United States Treasury of $31,350,000 since the Corporation was organized.

OPERATING RESULTS AND RETAINED EARNINGS

Income.—Net income of $2,361,533 was realized from 1954 sales of $20,668,570. Net income of $2,400,000 is expected in 1955 and $2,500,000 in 1956 from sales of $21,000,000 for each of the years 1955 and 1956.

Expenses.—Cost of sales, excluding depreciation, amounted to $16,705,400 during 1954 as compared with $17,078,712 in 1953. The percentage of cost of sales to sales was 81 percent in 1954 as compared with 80 percent in 1953. Cost of sales, excluding depreciation, is estimated at $16,868,400 for 1955 and $16,763,400 for 1956.

Retained earnings.—As of June 30, 1954, the Corporation's cumulative earnings amounted to $40,623,267 from which dividends amounting to $27,250,000 have been paid into the Treasury of the United States and the balance of $13,373,267 has been reinvested in the business in the form of working capital, plant and equipment. It is expected that retained earnings will increase to $14,173,267 by June 30, 1956.

PROGRAM AND PERFORMANCE

An amount of $473,000 is requested for development of preparedness programs relating to manpower mobilization and civil defense and for research on employment problems of the older worker.

1. *Development of economic and statistical manpower mobilization data.*—This activity includes the preparation of estimates of military and production manpower requirements.

2. *Relating civilian and military uses of manpower.*—This activity includes the development of studies of the relationship between civilian and military skills.

3. *Development of methods and plans for the recruitment and utilization of civilian manpower.*—This activity includes the development of plans to bring into the labor force in each area the kind and numbers of workers as they are needed, and to distribute such workers where they are most needed; a review of World War II experience and the devising of methods to discourage haphazard and unjustified shifting of workers between jobs, and to discourage employers from recruiting workers from jobs where they should remain; the development of plans for achieving the most efficient use of manpower under conditions of mobilization; and the development of specific plans to increase the supply of trained personnel to meet the production needs.

4. *Development of plans and methods for maintenance of income during emergencies.*—This activity includes the development of alternative plans of maintaining family income for conversion unemployment, long-term unemployment and injured persons and dependent survivors of an attack and the planning of a national program for methods of compensation for authorized workers in a civil defense emergency.

5. *Research on restrictive employment practices against the older worker.*—This activity includes studies to find what is needed to overcome age restrictive hiring policies and practices.

6. *Administrative services.*

PROGRAM AND PERFORMANCE

The Bureau develops and encourages the adoption of sound labor standards, designs and promotes programs aimed at the reduction of occupational injuries, promotes improved conditions for young workers, promotes improvement in working and living conditions of migrant agricultural workers, serves as a clearinghouse of information on all types of labor law and administration, and administers the union-registration functions of the Labor-Management Relations Act, 1947. An increase is requested in 1956 to step up its efforts for improvement of State workmen's compensation coverage and benefits.

1. *Development and promotion of sound labor laws and labor practices—(a) Legislative standards and State services.*—Technical assistance, advice, and information are given to States on labor law administration. Federal-State agreements are negotiated to eliminate duplication in labor law administration. Cooperation with other Federal agencies and with voluntary organizations is maintained, and advisory and technical assistance is given to State officials, committees, and voluntary groups on ways to improve working and living conditions of domestic farm migrant workers.

(b) Safe working conditions.—In cooperation with State labor departments, labor organizations, and other groups, training courses are conducted for State factory safety inspectors; State agencies are assisted in planning industry-wide safety programs in especially hazardous industries; service is provided for the President's Conference on Occupational Safety; Federal agencies are assisted in promotion of safety programs and inspection advisory service and training courses are conducted in accordance with the

provisions of the Federal Employees' Compensation Act and the Longshoremen's and Harbor Workers' Compensation Act.

(*c*) *Youth employment.*—Child labor and youth employment research aims to meet the needs of young workers, and child labor regulations are developed under the Fair Labor Standards Act.

(*d*) *International labor.*—Technical reports are prepared for the International Labor Organization.

(*e*) *Employment of the physically handicapped.*—The office of the President's Committee provides for a continuing program of public information and education to advance the employment of handicapped citizens, and cooperates with all groups interested in the employment of the handicapped, including Government agencies, private groups, and individuals. The office conducts continuous liaison with voluntary citizen members of the Committee and provides programs, plans and materials for governors' committees in the States and Territories. In addition, it works through various standing committees to carry out the national program for the handicapped and coordinates the efforts of all interested public and private groups in connection with the annual observance of National Employ the Physically Handicapped Week the first full week in October.

2. *Registration of labor union data.*—These are financial and organizational data required to be filed as a condition of union use of the facilities of the National Labor Relations Board.

3. *Executive direction and management services.*

PROGRAM AND PERFORMANCE

The Bureau conducts a program for the maintenance of a high level of skills in the work force through training for employed workers. Industry is encouraged and assisted to organize and conduct training of volume and quality adequate to meet current and future skills requirements, under standards which will tend to assure the greatest benefit to the worker, the employer, and the public. Primary emphasis is placed upon training which will provide workers with versatility of skills and maturity of judgment.

1. *Encouragement and assistance to industry.*—Industrial management and labor are encouraged to organize and conduct training programs for workers. Assistance is provided to industry in technical and operational aspects of such programs. Cooperative arrangements are established with State agencies engaged in similar activities.

2. *Development of information regarding skill requirements.*—Information regarding skill requirements resulting from economic trends is developed and disseminated.

3. *Promulgation and maintenance of standards.*—Labor standards tending to assure maximum benefit to workers, employers, and the public are developed and disseminated so as to secure wide application in training programs.

4. *Development of training techniques.*—A body of training technology is developed through analysis and evaluation of techniques and methods and through the provision of a technical clearinghouse service.

5. *Executive direction and management.*

PROGRAM AND PERFORMANCE

The Bureau of Employment Security carries out the Federal responsibilities of the public employment and unemployment insurance programs. Obligations for 1956 are estimated to be $5,100,000, an increase of $307,500 from 1955 due to new legislation and increased workload.

1. *Veterans' placement service.*—This includes helping State local employment offices in rendering suitable counseling and placement services to veterans and promoting the interest of employers in employing veterans.

2. *Farm placement service.*—This service guides the interstate movement of migratory workers in cooperation with the farm placement activities of the States.

3. *Collection and interpretation of labor market information.*—Facts and figures are reported and analyzed on (*a*) the administrative operations of the unemployment insurance and employment service programs; (*b*) supply, demand, and utilization of labor by areas, industries, and occupations.

4. *Assistance in maintaining public employment services.*—Effective employment service is promoted by assistance to the States on (*a*) organization and management; (*b*) counseling and testing of veterans, handicapped workers, and others in the field of occupational adjustment; and (*c*) employer contact programs.

5. *Unemployment insurance service.*—State laws and interpretation are reviewed to assure comformity with the requirements of the Federal law. Proposals are developed and surveys made to improve the existing programs. The unemployment compensation program for veterans and the unemployment compensation program for Federal employees are administered through the States.

6. *Field guidance, financing, and auditing of State operations.*—Technical assistance is provided to State agencies, and the administrative needs of the States are evaluated as a basis for making grants. Annual audits are made.

7. *Executive direction and management.*

8. *Central administrative services.*

PROGRAM AND PERFORMANCE

Grants are made to the States for administration of the unemployment compensation and employment service programs.

The increase of $20,780,000 in the appropriation requested is due primarily to increases in workloads expected to accompany the economic developments assumed for 1956, increases in average annual State salary rates and new legislation extending the coverage and responsibilities of the program. The average annual State salary rate was $3,718 in 1954 and is expected to rise to $3,800 in 1956.

1. *Unemployment compensation activities.*—These consist of determining the tax liability of each employer, collecting the taxes and auditing the employer's records; maintaining a record of each employee's wages; accepting initial claims for benefits; processing claims to determine eligibility and the amount and duration of benefits; taking continued claims and verifying the claimant's continuing eligibility; making benefit payments; and conducting hearings and making decisions on appeals. The 1954 workloads for continued claims and benefit payments are based partially on biweekly claimstaking, whereas, the 1955 and 1956 workloads are based on weekly claimstaking.

3. *State administration.*—Provides leadership and planning for the unemployment compensation and employment service activities in the central and local offices as well as legal, fiscal, personnel, training and research activities.

4. *Veterans' unemployment compensation.*—These consist of accepting veterans' initial claims for unemployment benefits; processing such claims to determine veteran status; taking continued claims and verifying claimant's continuing eligibility; paying benefits; conducting hearings and making decisions on appeals. The increase in cost is due primarily to the increase in the number of veterans eligible for these payments. The benefit payments are provided by the "Unemployment compensation for veterans" appropriation.

5. *Unemployment compensation for Federal employees.*—These consist of accepting Federal employees' initial claims for unemployment benefits; processing claims to determine eligibility, and the amount and duration of benefits; taking continued claims and verifying claimants' continuing eligibility; making benefit payments; conducting hearings and making decisions on appeals; registering persons seeking jobs, testing, counseling, and making placements. The benefit payments are provided by the "Unemployment compensation for Federal employees" appropriation. This program became effective January 1, 1955.

[1] Based on estimated workloads including the proposed supplemental of $20,000,000 for "Unemployment compensation for Federal employees."

6. *Contingencies.*—This fund is used to meet unforeseen increases in the number of claims filed, in State salary rates, due to changes in State compensation plans embracing employees of the State generally, and changes in State unemployment compensation laws.

7. *Financing adjustment for advances to the States.*—Because of State legal requirements, funds must be made available to the States before the start of the fiscal year. In June 1954, $49,830,000 was obligated for advance—though only $47,330,000 was disbursed—to the States from the 1955 appropriations. This advance provided funds for estimated operations during July–September 1954. However, the amount to be advanced in June 1955 from the 1956 appropriation will be $21,000,000 to provide for estimated operations during July 1955. As a result, Federal obligations in 1955 are $28,830,000 less than the program obligations of the States.

purposes. Authority for importing Mexican agricultural workers expires December 31, 1955.

1. *Determining foreign labor requirements.*—The agricultural areas needing foreign workers and the number of workers required are determined.

2. *Supplying foreign labor requirements.*—Workers are recruited in Mexico and transported to centers in the United States where the employer contracts for their use. Transportation costs are charged to the farm labor supply revolving fund. In 1954, 215,000 workers were contracted and an estimated 350,000 will be contracted in 1955. The overall cost, including revolving fund expenses, for supplying a Mexican agricultural worker averaged $14.26 in 1954 and is estimated to be $11.83 in 1955.

3. *Determining compliance with contract provisions.*—Complaints of contract violations are investigated, and housing and other perquisites required by the contract are inspected. In 1954, 2,800 complaints were investigated and 2,300 housing and other facilities were inspected.

4. *Farm labor analysis.*—Foreign labor reports are developed and States assisted in preparing them.

5. *Legal services.*—Legal services for all activities of the program are provided.

6. *Management and administrative services.*

7. *Field direction.*—Regional supervision and coordination of reception center activities.

8. *Liquidation cost.* For liquidation if authority to import Mexican agricultural workers is not extended beyond December 31, 1955.

PROGRAM AND PERFORMANCE

The Bureau is the principal factfinding agency of the Department. It develops economic data affecting labor for use in policy determinations by the Department, other agencies, and the Congress and for the use of business, labor, and other parts of the public.

Direct appropriation obligations are estimated to be $6,845,000 for 1956, an increase of $1,495,000 compared with 1955, principally for improvement and expansion of existing statistical series.

1. *Collection, analysis, and publication of labor and economic statistics.*—This information serves as a basis for labor-management negotiations, establishment of current trends and developments in the national economy, improvement of industrial safety programs, and for similar purposes.

2. *Central administrative services.*—Management of the Bureau's fiscal and administrative service functions, and publication program. Included in this activity are allocations for such nonlabor costs as are not, from an accountability standpoint, readily allocated to other program activities.

3. *Executive direction and program coordination.*

PROGRAM AND PERFORMANCE

The Bureau establishes standards and policies that will promote the welfare of wage-earning women, improve their working conditions, increase their efficiency, and advance their opportunities for profitable employment. It investigates and reports on matters relating to the welfare of some 19 million women workers, who constitute nearly one-third of the labor force in the United States.

1. *Investigating and reporting on conditions affecting women workers.*—The Bureau collects and analyzes basic economic data relating to women workers; plans and conducts studies on special problems affecting them; and prepares reports.

2. *Promotion of standards and policies.*—Facts and services are made available through publications, correspondence, and fieldwork to advance the welfare and effective utilization of women workers.

3. *Advisory services on legislation affecting the welfare of women workers.*—Technical and advisory services are furnished State and Federal agencies, the international bodies, women's organizations, civic groups, and individuals in the various fields of women's labor law and civil and political status.

4. *Executive direction and management services.*

PROGRAM AND PERFORMANCE

The Division administers the Fair Labor Standards Act and the Walsh-Healey Public Contracts Act to obtain compliance with minimum standards respecting wages, hours, and other employment conditions in industries engaged in interstate commerce or the production of goods for commerce and in establishments furnishing goods to the Government.

1. *Promotion of compliance and enforcement.*—Information media are used to minimize unintentional violations, and employing establishments are inspected on a selected basis in order to assist employers in meeting legal requirements and workers in recovering wages unlawfully withheld. During 1954, 39,430 nonagricultural establishments were investigated, of which 52 percent were found in violation of the basic provisions of either or both acts. The number of underpaid employees was 141,368 and the amount of back wages found due was $13,774,248, of which employers have agreed to pay $6,485,545. Of the 3,592 farms visited in 1954, 1,193 were found to be employing 4,389 children illegally. The volume of investigations proposed for 1955 and 1956 is at the same level as 1954.

2. *Wage standards and determinations.*—Prevailing wage determinations are planned in six industries in 1955 and 1956. It is proposed to convene during 1956, two industry committees to review wages in Puerto Rican industries and one industry committee to review wage rates in the Virgin Islands. Regulations are formulated governing the approval of subminimum wages for learners, apprentices, messengers, and handicapped workers. Over 8,000 applications for subminimum wage certificates were acted upon in 1954; a somewhat smaller workload is estimated for 1955 and 1956.

3. *Regulations and interpretations.*—Regulations and interpretations are prepared to give effect in all respects to the Fair Labor Standards Act.

4. *Executive direction and management.*

5. *Central administrative services.*

BUSINESS-TYPE STATEMENTS

PROGRAM AND PERFORMANCE

Fees for each worker contracted are paid by agricultural employers. These fees are used to meet transportation and subsistence costs involved in importing Mexican farm workers (65 Stat. 741). When the program was first established the fee for initially contracting a worker was $15 and the fee for obtaining workers upon the termination of a worker's contract with another employer was $7.50. These fees have been successively reduced until now they are $3 and $1 respectively.

The net effect on budget expenditures for the first 6 months of fiscal year 1956 is estimated at $836,908. The present fees were set to reduce accumulated earnings resulting from the first 2 years of operation. Retained earnings as of December 31, 1955, are estimated to be $308,600.

Authority for importing Mexican agricultural workers expires December 31, 1955, and the estimates therefore do not extend beyond that date.

INTRODUCTORY STATEMENT

The Department delivers the mails and performs related services to the public, including provision of money orders and postal savings. Because postal business reflects general economic conditions, the upward trend in the national economy has brought with it a large increase in mail volume.

The operation of the postal service is financed from postal revenue. Any deficit is met by the Treasury. Specific authority to incur obligations for operation is contained in five appropriations: (1) administration, (2) operations, (3) transportation, (4) finance, and (5) facilities.

Of the total request 93 percent is for the operations, and transportation appropriations, and 7 percent for the other three appropriations.

Summary statement of revenue, expenses, and volume of business:

	1954 unaudited	*1955 estimate*	*1956 estimate*

Total obligations	13,316,576	15,322,565	16,285,500

PROGRAM AND PERFORMANCE

This appropriation finances the overall direction and administration of the postal service. This includes the administration of personnel, legal services, and the Post Office Inspection Service.

The total appropriation request of $16,282,000, an increase of $962,935 over estimated obligations for the current fiscal year continues the program to strengthen top management.

1. *Executive direction.*—The immediate office of the Postmaster General, the advisory board, the office of the executive assistant to the deputy postmaster general, headquarters services personnel and the office of the chief industrial engineer comprise this activity.

2. *Personnel administration.*—The bureau of personnel will give policy direction to all phases of personnel administration as it affects approximately 500,000 employees.

3. *Legal service.*—The solicitor is the legal adviser to the Postmaster General. His duties also involve the adjudication and approval for payment of damage claims and losses claimed in postmasters' accounts.

4. *Inspection service.*—Investigations or surveys are made of all phases of the postal service including methods and procedures; manpower use and needs; problems involving transportation, storage, and handling of mail; accounts; buildings; the vehicle service; violations of postal laws; and complaints regarding personnel and service. The estimate for 1956 proposes 86 additional inspectors with necessary supporting personnel and related expenses.

1. *Administration of post office operations.*—Provision is made for 15 regional offices in consonance with the decentralization program of the Postmaster General under authority of Reorganization Plan No. 3. The estimate provides for the staffing of 15 regions, which are anticipated will have been established by the end of fiscal year 1955. The administration within local post offices is also under this activity. Salaries of postmasters and supervisory employees are determined in relation to receipts of their offices during the preceding calendar year. The estimate for 1956 reflects changes in salaries of these officials which are based on increased receipts in calendar year 1954.

[1] Gross postal receipts on which salaries of postmasters are determined.

The estimate for 1956 provides for an increase in manpower to (*a*) permit staffing of regional offices and (*b*) more adequate supervision to increase employee productivity.

2. *Mail handling and window service.*—This activity covers the handling of incoming and outgoing mail in post offices, window services to the public, and contract station service.

Mail volume is estimated to increase 3 percent in 1956 over 1955 and provision is made for this increased volume.

PROGRAM AND PERFORMANCE

This appropriation covers all items involving the transportation of mail by air, land, or water and the cost of administrative personnel in the Bureau of Transportation at Washington. Included are the cost of star route service, highway post offices, short-haul truck service, railroad and electric car service, and airmail service.

The estimate for airmail service, both domestic and foreign, covers service cost only.

The appropriation request for 1956 is $675,241,000, an increase of $11,978,385 compared with estimated obligations for the current fiscal year.

1. *Administration of postal transportation.*—In addition to the administrative headquarters office at Washington, provision is made for the United States share of the cost of maintaining the Universal Postal Union and the Postal Union of the Americas and Spain.

2. *Mail handling in transit.*—Mail is processed and distributed in terminal railway post offices, railway post offices, highway post offices, at airmail fields, and at short-haul truck terminals.

1956 estimate	39,715	71,421	55,240	.7190

3. *Water transportation.*—This covers the cost of transportation by power boat and steamship, and the handling and stevedoring at ports in the United States and its territories.

The increase requested for powerboat service is primarily for increases in volume of mail to Hawaii and Alaska incident to growth of population and military activities in these territories.

[1] Excludes Detroit River service.

4. *Truck transportation.*—Star route service is provided to and between post offices not afforded other means of transportation, and for supplemental service for offices where there is not adequate mail supply. The increase requested will provide 180 additional routes, and renewal of contracts at higher rates to provide larger and more efficient equipment to handle increased mail volume.

DATA RELATING TO TRANSPORTATION BY STAR ROUTE

1956 estimate	11,929	252,400	42,626,309	16.89

Mobile highway post offices provide mail distribution in Government-owned or contract vehicles where adequate train service does not exist. The estimate provides 15 additional contract routes to offset discontinued railroad service, and the conversion of all routes from Government-operated to contract routes. It has been found that the cost per mile for operation of Government highway post offices is approximately 2 cents per mile higher than contract service.

[1] Includes compensation of operators and depreciation.
[2] Includes cost of rehabilitation and engine replacement.

Short-haul truck service is provided for transportation diverted from railroads because of lower rates or improved service resulting therefrom. The expansion of this service is the result of a long-range program to transport by the most economical and expeditious means.

DATA RELATING TO SHORT-HAUL TRUCK SERVICE

	Number of routes	*Scheduled miles of travel*	*Annual rate of obligations*	*Average per mile (cents)*
1952	270	20,245,159	$4,536,828	22.41

1956 estimate	736	52,866,144	11,539,443	21.83

5. *Rail transportation.*—This covers transportation by rail in the continental United States, Alaska, and Puerto Rico. The estimate provides for increased mail volume, offset by further diversion of short hauls from rail to truck.

[1] Includes retroactive mail pay settlement of $152,000,000 ordered by Interstate Commerce Commission on Dec. 4, 1950, for period Feb. 19, 1947, to Dec. 31, 1950.

6. *Air transportation.*—This covers transportation between points within the United States and Alaska, to United States Territories and possessions, and to foreign countries. The estimates for 1956 cover only the cost of service. The air mail subsidy is paid by the Civil Aeronautics Board.

DATA RELATING TO THE DOMESTIC AIR MAIL CARRIERS

1956 estimate	353,434	37,600,000	10.64

[1] Excludes subsidy payments.

7. *Terminal and transportation charges by foreign countries.*—Payments are made to foreign countries, in accordance with international postal conventions or agreements, for the transportation and handling of mails of United States origin. The decrease in estimated payments is due to the settlement of accounts on a more current basis and the consequent elimination of many payments for service in prior years from current year funds.

PROGRAM AND PERFORMANCE

Provision is made for supervision by the bureau of finance of the financial transactions of the postal service, including the audit and control functions, the procurement, sale and distribution of stamps and other accountable paper, postal savings, and the sale of money orders. The postal service handles over $20,000,000,000 in transactions annually.

Significant progress has been made in the program to modernize the Department's fiscal administration in 1955. This has included the reorganization of the bureau of finance to provide effective departmentwide control over all fiscal activities, including the controllership function within the bureau. Continuing progress in 1956 will require additional technical personnel for staffing of regional offices.

PROGRAM AND PERFORMANCE

Programs administered by the Bureau of Facilities are financed from this appropriation, including expenses necessary for the operation of the bureau's activities in Washington, D. C., and at other points in the field; purchase, rental, operation, and maintenance of vehicles for local transportation of mail; lease and rental of quarters, and procurement of services, supplies, and equipment for operation of buildings used by the Postal Service; operation of the mail equipment shops in Washington, D. C.; procurement and distribution of services, supplies, and equipment for the operation of the Postal Service.

The requested increase of $11,755,500 over the current fiscal year will provide for the anticipated increase in mail volume and for improvement in working conditions in postal facilities.

1. *Administration of postal facilities.*—Provision for employees at the Washington headquarters and at regional offices throughout the country is included in the estimate for this activity. The estimate provides additional funds in 1956 to meet the full year cost of the regional staff and specialists in the departmental staff which were added in 1955.

2. *Local transportation.*—This activity estimate provides for the purchase, rental, maintenance, and operating expenses of motor vehicles required for local delivery of mail. The estimate is predicated upon (1) the replacement of high-priced hired vehicles with Government-owned vehicles involving the purchase of 2,200 ¾-ton trucks for this purpose, (2) the addition of 300 ¾-ton trucks for expansion of the fleet for increased mail volume and extensions of service, and (3) the replacement of 700 old trucks with an equal number of ¾-ton trucks. An overall

increase in operations and maintenance costs, due to expansion of the fleet, is also provided for.

3. *Operation of buildings.*—This activity covers the rents, fuel, utility services, and maintenance for all leased quarters and Federal buildings operated by the Post Office Department. Included also are communications services, and continuation of the light, color, and ventilation program in Federal buildings. The amount requested will increase occupancy of rented space by about 4,000,000 square feet in 1956.

PROGRAM AND PERFORMANCE

The activities described below include both the cost of programs directly chargeable to this appropriation and the cost of rendering services on a reimbursable basis to other appropriations and agencies, such as the United States Information Agency and the Foreign Operations Administration.

1. *Executive direction and policy formulation.*—The Secretary is assisted in formulation of policy and direction of the Department's activities by the appropriate staff officers, specialized offices, and functional bureaus of the Department.

2. *Conduct of diplomatic and consular relations with foreign countries.*—This includes the representation of the United States and its citizens, political and economic negotiations and reporting, issuance of passports and visas, and other services.

3. *Conduct of diplomatic relations with international organizations.*—In collaboration with other Government agencies, United States policy is developed and coordinated on political and security issues and in such specialized fields as world health, education, labor, and refugee activities.

4. *Domestic public information and liaison.*—This provides for informing the American public on international policies and also keeping the Department informed on public opinion relative to foreign policy and issues.

5. *Central program services.*—These provide personnel and physical security measures, cryptographic media for insuring the security of messages transmitted to all parts of the world, translating and interpreting services, and coordination of governmental foreign reporting requirements.

6. *Administrative and staff activities.*—These relate largely to (1) central control of the worldwide organizational, management, personnel, budgetary and fiscal operations of the Department; (2) administration of a global communications system for all civilian activities of the Government; and (3) purchase and distribution of administrative supplies and equipment.

A supplemental appropriation for 1955 is being proposed for later transmission and is printed elsewhere in this chapter.

PROGRAM AND PERFORMANCE

This appropriation finances regular boundary activities consisting of general administration, general engineering, and project investigations.

1. *General administration.*—The functions essential to fulfillment of the basic responsibilities of the section are conducted under this activity. They include (*a*) administration and policy formulation on behalf of the United States in connection with the applicable treaties and agreements in force, (*b*) negotiation with the Mexican section of agreements for the solution of international problems delegated to the Commission, and (*c*) supervision of the administrative services of the United States section.

2. *General engineering.*—This provides for (*a*) technical engineering guidance and supervision of accounting for international division of boundary waters, and of planning, constructing, operating and maintaining international projects, and (*b*) general engineering studies relating to international problems of a continuing nature or which have not developed sufficiently to become identifiable projects.

3. *Project investigations.*—These consist of preliminary examinations aimed at development of specific recommendations to the two Governments for joint projects for the solution of international problems. Proposed examinations for fiscal year 1956 include (*a*) the lower Colorado River flood control problem, below Imperial Dam, and (*e*) the disposal of sewage from the border cities of San Ysidro, Calif., and Tijuana, Mexico.

[CONSTRUCTION]

Construction, International Boundary and Water Commission, United States and Mexico, State

[For detailed plan preparation and construction of projects authorized by the Convention concluded February 1, 1933, between the United States and Mexico, the Acts approved August 19, 1935, as amended (22 U. S. C. 277–277f), August 29, 1935 (49 Stat. 961), June 4, 1936 (49 Stat. 1463), June 28, 1941 (22 U. S. C. 277f), September 13, 1950 (Public Law 786), and the projects stipulated in the treaty between the United States and Mexico signed at Washington on February 3, 1944, $300,000, to remain available until expended: *Provided*, That no expenditures shall be made for the lower Rio Grande flood-control project for construction on any land, site, or easement in connection with this project except such as has been acquired by donation and the title thereto has been approved by the Attorney General of the United States: *Provided further*, That the Anzalduas Diversion Dam shall not be operated for irrigation or water supply purposes in the United States unless suitable arrangements have been made with the prospective water users for repayment to the Government of such portions of the costs of said dam as shall have been allocated to such purposes by the Secretary of State.] (*Department of State Appropriation Act, 1955.*)

3. Nogales flood control, Arizona			15,000
Obligations incurred	3,336,293	3,404,923	2,650,833

PROGRAM AND PERFORMANCE

This appropriation finances the construction activities of the United States section of the Commission.

1. *Rio Grande dams.*—Prior year funds will finance the completion of land acquisition and minor construction in 1955 on the Falcon Dam project. Investigations will be completed in 1955 for determination of the site, capacity and general plans of the Diablo Dam and Reservoir.

2. *Lower Rio Grande flood control.*—It is expected that all necessary rights-of-way will be conveyed to the United States for the Anzalduas Dam and construction will be commenced in 1955. Upon completion it will be possible to equitably divide floodwaters between the United States and Mexico and to limit floods in the Brownsville and Matamoros area. Work to be performed in 1955 and 1956 will be financed from prior year funds that are available for this activity.

3. *Nogales flood control.*—Existing works will be modified. Prior year funds are available for this work.

PROGRAM AND PERFORMANCE

The objective of the international educational exchange program is to promote the foreign policy of the United States by the exchange of key persons, who build up a receptive climate of public opinion overseas in which our actions and policies can be correctly interpreted. To realize this objective, exchanges are made between the United States and over 75 foreign countries. Such exchanges include persons who participate as private citizens in such activities as teaching, study, research, professional observation, lecturing, or the acquiring of specialized practical experience. The estimate provides for the participation of 5,433 foreign and 1,727 United States citizens, assistance to certain American sponsored schools in the other American Republics and services to a large number of exchanges under private auspices.

PROGRAM AND PERFORMANCE

Provision is made for the United States expenses in Germany and Austria of carrying out our responsibilities under the recent contractual agreements with Western Germany, our remaining occupation functions in West Berlin and Austria, and the more normal diplomatic, political, and consular activities in these countries. German and Austrian educational exchange activities previously financed from this appropriation, are provided for under "International Educational Exchange Activities," Department of State.

The decrease of $1,144,785 proposed for 1956 reflects principally the reduction in expenses deemed possible because of the return of sovereignty to Western Germany.

GENERAL PROVISIONS—DEPARTMENT OF STATE

SEC. 102. Contracts entered into in foreign countries involving expenditures from any of the appropriations under this title shall not be subject to the provisions of section 3741 of the Revised Statutes (41 U. S. C. 22).

SEC. 103. The exchange of funds for payment of expenses in connection with the operation of diplomatic and consular establishments abroad shall not be subject to the provisions of section 3651 of the Revised Statutes (31 U. S. C. 543).

SEC. 104. Appropriations under this title available for expenses in connection with travel of personnel outside the continental United States, including travel of dependents and transportation of personal effects, household goods, or automobiles of such personnel shall be available for such expenses when any part of such travel or transportation begins in the current fiscal year pursuant to travel orders issued in that year, notwithstanding the fact that such travel or transportation may not be completed during the current fiscal year.

SEC. 105. Notwithstanding the provisions of section 16a of the Act of August 2, 1946 (5 U. S. C. 78 (a)), Government-owned vehicles may be used in foreign countries for transportation of United States Government employees from their residence to the office and return when public transportation facilities are unsafe or are not available: *Provided*, That each Chief of Mission shall have prior authority from the Secretary of State to approve such transportation.

SEC. 106. Appropriations under this title for "Salaries and expenses", "International contingencies", and "Missions to international organizations" are available for reimbursement of the General Services Administration for security guard services for protection of confidential files.

SEC. 107. The Secretary of State, with the approval of the Bureau of the Budget, shall prescribe the maximum rates (not to exceed $12 per day) of per diem in lieu of subsistence (or of similar allowances therefor) payable while away from their own countries to foreign participants in any exchange of persons program, or in any program of furnishing technical information and assistance, under the jurisdiction of any Government agency, and said rates may be fixed without regard to any provision of law in limitation thereof.

SEC. 108. No part of any appropriation contained in this title shall be used to pay the salary or expenses of any person assigned to or serving in any office of any of the several States of the United States or any political subdivision thereof.

SEC. 109. None of the funds appropriated in this title shall be used (1) to pay the United States contribution to any international organization which engages in the direct or indirect promotion of the principle or doctrine of one world government or one world citizenship; (2) for the promotion, direct or indirect, of the principle or doctrine of one world government or one world citizenship.

SEC. 110. It is the sense of the Congress that the Communist Chinese Government should not be admitted to membership in the United Nations as the respresentative of China. (*Department of State Appropriation Act, 1955.*)

PROGRAM AND PERFORMANCE

The appropriation estimate for the fiscal year 1956 as compared with the 1955 appropriation reflects an increase of $51,300.

1. *Processing deposits of withheld tax payments.*—Employers and certain business enterprises, deposit monthly, with designated banks, excise, withheld income, and withheld social security taxes to the credit of the Treasurer of the United States. They receive from the Federal Reserve banks, acting as fiscal agents of the Treasury, depositary receipts which the employers attach to their returns as evidence of payment of taxes. The proportionate share of the expense relating to the issuance and verification of these receipts is charged against the Federal old-age and survivors insurance trust fund. The work volume is estimated at 6,225,000 depositary receipts in the fiscal years 1955 and 1956, which is approximately the same as 1954.

2. *Financial reporting and maintenance of the Government's central accounts.*—The central accounts include control accounts on appropriations, receipts, and expenditures and provide data for the Daily Treasury Statement. This activity also includes the preparation and publication of financial reports on the Government's fiscal operations, such as the annual Combined Statement of Receipts, Expenditures, and Balances; the Monthly Report of Appropriations, Expenditures, and Balances; the Secretary's Annual Report and the Treasury Bulletin. The volume of accounting items is estimated at 4,710,000 for the fiscal years 1955 and 1956 as compared with 4,685,093 in 1954.

3. *Development and installation of accounting and reporting systems.*—Technical advice and assistance in accounting is furnished all bureaus and offices of the Treasury. In addition, staff is assigned to participate in the governmentwide accounting improvement program.

4. *Processing investments, loans, claims, collections, and surety bonds.*—Investments in interest-bearing securities are processed for certain funds, such as the Federal old-age and survivors trust fund, the unemployment trust fund, the veterans insurance trust fund, and various Government retirement funds. The work includes purchase and disposal of securities, processing capital stock subscriptions of Government corporations, payment of international and other claims and examination of the financial condition of companies issuing surety bonds in favor of the United States. The work volume expressed in number of transactions is estimated at 302,100 for the fiscal year 1955 and 303,300 for the fiscal year 1956, as compared with 330,292 for 1954.

5. *Supervision of the Federal depositary system.*—Banking facilities are provided for all agencies of the Government through the designation of selected institutions to act as official depositaries of the Government's funds. Workload is expected to increase in 1955 as follows:

	1954 actual	*1955 estimate*	*1956 estimate*
Number of depositaries	3,296	3,330	3,400
Authorizations, end of year	7,155	7,478	7,518

PROGRAM AND PERFORMANCE

The Division of Disbursement, through its Washington and regional offices, makes payments for civilian Federal agencies, except the Post Office Department and certain Government corporations; and issues savings bonds for Federal employees under the payroll savings plan.

Direct obligations are estimated to be $15,575,000 for 1956, an increase of $725,000 compared with 1955. For the fiscal year 1956 the Division will be required to handle over 17.4 million additional payments of which 16.4 million are for the Social Security Administration. The Division makes payments for certain corporations on a reimbursable basis.

The funds required are determined by multiplying the volume of work or the number of units to be processed by the unit cost per item as shown in the following tables.

PROGRAM AND PERFORMANCE

This appropriation provides funds for the conduct of all public debt operations and the promotion of the sale of United States savings bonds and stamps.

1. *Issuance, servicing, and retirement of savings bonds.*—This consists of (1) the manufacture, receipt, custody, and distribution of bond stocks; (2) the issuance of bonds and maintenance of records relating thereto; (3) adjudicating claims for the replacement or payment of lost, stolen, or mutilated bonds; (4) handling reissues and other transactions incident to servicing outstanding bonds; (5) retiring bonds; and (6) semiannual payments of interest on Series G, H, and K bonds.

Total	3,833	4,300	3,300

3. *Verification and destruction of unfit United States currency.*—Activity transferred to Office of the Treasurer.

4. *Maintenance and audit of public debt accounts.*—Control accounts are maintained over all transactions affecting the public debt. Provision is also made for the audit and verification of security stocks and the performance of other internal audit functions.

5. *Promotion of the sale of savings bonds.*—This consists of continuous sales promotion efforts using press, radio, other advertising media, and organized groups, augmented by concentrated sales campaigns, with strong emphasis on payroll-savings plans. Current promotion programs have four major aims: (1) increase number of bond buyers and cash sales of E and H bonds; (2) encourage holding of maturing E bonds; (3) urge buyers to purchase larger denominations instead of $25 bonds, thereby reducing administrative costs to Government; and (4) inform more Americans of the terms of the E and H bonds.

6. *Executive direction.*

PROGRAM AND PERFORMANCE

This office (*a*) receives, keeps, and disburses the moneys of the United States; (*b*) receives, stores, issues, transfers, and retires currency; (*c*) redeems Government securities; (*d*) maintains fiscal accounts; and (*e*) prepares related financial statements and reports.

1. *Processing checks, deposits, and claims.*—This consists of maintaining checking accounts of Government disbursing officers and Government-owned corporations; processing documents crediting Government accounts; directing the activities of Federal Reserve banks when they act as agents of the Treasurer in paying Government checks; and performing certain functions in connection with claims relating to lost, stolen, destroyed, and fraudulently negotiated checks. The increasing checkload for social security has resulted in a constant increase in workload.

PROGRAM AND PERFORMANCE

Activities of the Bureau of the Mint include the manufacture of coins; the receipt of deposits of gold and silver bullion; the safeguarding of the Government's holdings of monetary metals; and the refining of gold and silver bullion (see minor coinage profit and the silver profit funds).

The amount requested for 1956 is $800,000 less than appropriated for 1955, and is based on the reduction in the coinage activity and curtailing the refinery program.

1. *Manufacture of coins (domestic).*—Production of coins is the major activity of the Bureau of the Mint. The funds allotted will only permit production of approximately 830 million coins in fiscal year 1956.

Salaries and Expenses, Bureau of the Mint—Continued

3. *Protection of monetary metals and coins.*—Protection of the Government's holdings of gold and silver bullion and coin is maintained by armed guards and modern protective devices at seven Mint institutions.

4. *Refining gold and silver bullion.*—Gold and silver bullion are refined in order to facilitate accountability, protection, and storage; and to bring the bullion up to a degree of purity suitable for use in the world markets. Charges are made against depositors of gold and silver for refinery services, but receipts are not available for payment of refining costs. During fiscal year 1954, $120,256 were deposited to miscellaneous receipts.

PROGRAM AND PERFORMANCE

The Coast Guard enforces maritime law, provides for limited security of ports and waterfront facilities, saves life and property, provides navigational aids to maritime commerce in navigable waters, promotes the efficiency and safety of the American merchant marine, and maintains military readiness to serve as a part of the Navy in time of war or national emergency.

1. *Vessel operations.*—Multifunctional vessels are stationed at strategic points along the coasts and inland waterways for the purpose of effecting search and rescue; tending aids to navigation; operating ocean weather stations; operating an international ice patrol and ice observation service in the North Atlantic Ocean; performing limited ice breaking in navigable lakes, rivers, canals and in harbors; and for law enforcement.

The financing for 5⅞ ocean weather stations on the basis of 3 cutters per station was provided by the Department of Defense as a defense requirement for 1955. Subsequent to this arrangement, an International Civil Aviation Organization agreement in January 1954 established the United States obligation for an additional one-third station making a total of 6 stations (4 in the Atlantic and 2 in the Pacific). Eighteen cutters are programed for the operation of the 6 ocean stations in 1956, with financing again being provided by the Department of Defense. As before, these vessels perform the dual functions of ocean weather duty and search and rescue.

The 8 additional 95-foot boats being constructed during the current year for harbor entrance patrol duty will be ready for operation during 1956. No other vessel operational changes are contemplated for 1956.

2. *Aviation operations.*—Aircraft are maintained at air stations and detachments for the search and rescue operations; assisting in logistic work in isolated areas; assisting in Federal law enforcement; and conducting aerial reconnaissance for the International Ice Patrol.

The 1956 program provides for the operation of the same number of aircraft and aviation facilities as in 1955.

3. *Shore stations and aids operations.*—Bases and lifeboat stations are situated at strategic points for search, rescue, and law enforcement and for maintaining aids to navigation. Port security units patrol major harbor entrances; control anchorage areas; supervise the loading and unloading of dangerous cargoes; and screen merchant seamen and longshoremen to keep subversive elements from merchant vessels and critical waterfront areas. Critical waterfront areas have been patrolled since the inauguration of the port security program in 1951. In 1956 the harbor entrance patrol is being extended to New London, Conn., Charleston, S. C. and San Diego, Calif. The remainder of the program remains unchanged.

Buoys, lighthouses, lightships, fog signal stations, radiobeacons, and loran stations are maintained as navigational aids in the waters of the United States, its territories and military bases overseas. Radio stations are maintained to provide radio communication incident to all Coast Guard operations. Marine inspection offices and detachments administer laws and issue regulations on safety equipment and inspection of merchant vessels, and on licensing and certification of Merchant Marine officers and crews. They review plans for construction or alteration of merchant vessels; investigate marine accidents, and hold hearings on disciplinary cases.

The Gulf of Mexico loran chain consisting of 3 stations is being transferred from the Air Force during 1955 for operation on a reimbursable basis.

There are no other significant changes planned in these operations in fiscal year 1956.

4. *Repair and supply facilities.*—Repair and supply facilities are maintained at strategic points for support of Coast Guard operating units. Also, two facilities are maintained for testing, developing, or adapting materiel for safer and more effective Coast Guard or marine use.

5. *Training and recruiting facilities.*—This activity embraces the Coast Guard Academy for the training of cadets, the training units for recruits and prospective petty officers, the cost of training programs outside of the Coast Guard and the recruiting stations.

6. *Administration and operational control.*—This activity provides for execution, direction and coordination of all Coast Guard activities, for internal auditing and

inspection, and for administrative services to operating units. It includes the operation of headquarters at Washington, D. C., district and area offices, and regional inspection offices. It also includes personnel assigned to liaison with other agencies.

7. *Other military personnel expense.*—This activity provides for certain military personnel expenses such as pay of personnel in hospitals and in transit; expense of permanent changes of station, including travel of dependents and transportation of household effects; mustering-out pay; terminal leave pay, severance pay; and recreation expense.

8. *Supporting programs.*—This activity consists of programs for procurement of ammunition and maintenance of ordnance, printing, transportation of materials, and vehicle, boat, and electronic equipment replacement. All of these programs have such general applicability that they cannot readily be charged directly to units.

PROGRAM AND PERFORMANCE

This appropriation provides for the acquisition or construction of new or replacement vessels, aircraft, shore stations, and aids to navigation.

1. *Vessels.*—It is intended to develop preliminary design plans looking toward the eventual replacement of the obsolescent 125-foot and 165-foot class of patrol boats with a more versatile and effective type of vessel.

2. *Aviation facilities.*—Procurement of 3 P5M type aircraft for the replacement of overage seaplanes, and the construction of nose hangars at 2 air stations are programed for 1956.

3. *Shore stations and navigational aids.*—Only a few of the most urgent priority projects at lifeboat stations, light stations, and loran transmitting stations are scheduled for 1956. Also included is a limited amount for new establishments of aids to navigation, or extensions of existing systems, to meet the requirements of mariners or to mark channels improved by Army engineers. Plans for replacement of a lightship with a fixed light are also to be developed.

4. *Repair and supply facilities.*—Construction of replacement waterfront bulkheading at one depot is planned to protect Government property and permit better utilization of the facility.

5. *Loran station construction.*—The estimate for 1956 includes no funds for construction of loran stations.

PROGRAM AND PERFORMANCE

The Coast Guard maintains a trained reserve of officer and enlisted personnel to augment the regular service in time of war or national emergency. The number of personnel in a drill pay status for fiscal year 1956 will remain on the same level as fiscal year 1955. The 1956 program provides for the restoration of 48 paid drills in the training program for the same number of trainees in 1955 where they were afforded only 36 paid drills within the limited funds available. The 1956 program also provides active duty for training for 1,633 more trainees than was provided in 1955.

Training is accomplished in conformance with the Armed Forces Reserve Act of 1952 under categories A, B, and D as indicated below. The man-days of training planned for 1955 and 1956 are as follows:

REVOLVING AND MANAGEMENT FUNDS

PUBLIC ENTERPRISE FUNDS

The following corporations and agencies, respectively, are hereby authorized to make such expenditures, within the limits of funds and borrowing authority available to each such corporation or agency and in accord with law, and to make such contracts and commitments without regard to fiscal year limitations as provided by section 104 of the Government Corporation Control Act, as amended, as may be necessary in carrying out the programs set forth in the Budget for the fiscal year [1955] *1956* for each such corporation or agency, except as hereinafter provided:

OFFICE OF THE SECRETARY

FEDERAL FACILITIES CORPORATION

INTRODUCTORY STATEMENT

The Federal Facilities Corporation, created on June 30, 1954, under the provisions of the Rubber Act of 1948, and Executive Order 10539, assumed responsibility for the synthetic rubber and tin programs formerly operated by the Reconstruction Finance Corporation. The Corporation is under the control and direction of the Secretary of the Treasury.

BUSINESS-TYPE STATEMENTS

PURPOSE AND FINANCIAL ORGANIZATION

The primary purpose of the Federal Facilities Corporation is to administer the operation of the Government-owned synthetic rubber facilities until the disposal of the properties is completed according to the provisions of the Rubber Producing Facilities Disposal Act. In addition, the Corporation is responsible for the operation of the Government's tin program during the period while the ultimate disposition of the program is being reviewed by the Congress.

The synthetic rubber and tin programs are financed with funds arising from the operations of these programs. To the extent that funds realized from these programs exceed requirements, they are deposited in the Treasury as miscellaneous receipts.

ANALYSIS OF BUDGET PROGRAMS

Synthetic rubber.—It is anticipated that sale of the synthetic rubber facilities will be consummated before the close of fiscal year 1955. The amounts to be received from the sale of these facilities, and the terms under which they will be sold, cannot be determined until the disposal program recommended by the Rubber Producing Facilities Disposal Commission has been presented to and reviewed by the Congress. For the purposes of the budget, however, the projected financial transactions relating to the sale of the facilities are based on the depreciated book value of the plants.

For fiscal year 1956, the synthetic rubber budget program provides for disposal to private interests of such inventories of finished rubber as may not be included with the sale of the rubber producing facilities. The budget

Federal Reserve Bank of St. Louis

also provides for the protection and standby maintenance of such rubber producing facilities as may not be included in the disposal program approved by the Congress. Provision is also made for continuation of the Government's synthetic rubber research program in fiscal year 1956, pending submission to the Congress of the President's recommendations as to continuation of such research.

Tin.—The budget provides for operations of the Government-owned tin smelter only until June 30, 1955. Meanwhile the Congress has undertaken to review this program with a report expected by March 15, 1955.

ADMINISTRATIVE EXPENSES

Administrative expenses consist of salaries and related costs of personnel engaged in the supervision and control of the programs conducted by the Corporation, together with the rental costs of office space. Under the assumptions stated above, it is estimated that administrative expenses for fiscal year 1956 will be $800,000, of which $700,000 will be related to the wind-up of the synthetic rubber program and $100,000 to the tin program. In fiscal year 1955, with the synthetic rubber and tin programs both in operation, administrative expenses are estimated to be $1,954,000. Comparable expenses during fiscal year 1954 were $2,032,900.

FINANCING OPERATIONS

Under the assumptions stated above regarding the sale of the synthetic rubber plants and the operation of the tin smelter, it is estimated that the amounts to be paid to the Treasury from the programs conducted by Federal Facilities Corporation will be $193,200,500 and $37,334,105 for fiscal years 1955 and 1956, respectively.

Liquidation of Reconstruction Finance Corporation

INTRODUCTORY STATEMENT

The Secretary of the Treasury is responsible for the liquidation of RFC including (*a*) all lending functions remaining with RFC, after giving effect to the transfers made in accordance with the RFC Liquidation Act and Reorganization Plan No. 2 of 1954, (*b*) certain World War II assets, and (*c*) the Smaller War Plants Corporation.

Effect on budget expenditures.—The net budgetary effects resulting from liquidation of the RFC programs in fiscal years 1955 and 1956 are as follows:

Liquidation of Lending Programs

PROGRAM HIGHLIGHTS

[In millions]

Outstanding at end of year:	*1954 actual* [1]	*1955 estimate*	*1956 estimate*
Loans, securities, and investments	$272.0	$177.1	$79.5
Commitments	39.3	12.5	5.0

[1] After giving effect to transfers under the RFC Liquidation Act and Reorganization Plan No. 2 of 1954.

The lending activities of RFC were financed from (*a*) $100 million of capital stock issued to and held by the Secretary of the Treasury, (*b*) retained earnings to the extent of $250 million (after reasonable reserves for losses), and (*c*) borrowings from the Treasury as needed.

Analysis of budget program.—After giving effect to the assets transferred to other Government agencies under the provisions of the RFC Liquidation Act and Reorganization Plan No. 2 of 1954, the following categories of loans, securities, and investments remained for liquidation at the start of fiscal year 1955:

[In millions]

Loans to business enterprises	$181.3
Equity in business loan pool	26.2
Railroad securities	9.9
Financial institution securities	30.3
Public agency securities	24.3
	272.0

In addition to the foregoing, there was outstanding $39.3 million in loan commitments and agreements to purchase deferred participations in loans made by private financial institutions.

The liquidation of RFC assets is being carried out as expeditiously as possible under the general policy of securing the highest possible return on the Government's investment. During fiscal year 1955 it is estimated that $100.4 million will be realized from RFC loans, securities, and investments. Realizations in fiscal year 1956 are estimated to be $93.1 million.

Administrative expenses.—The administrative expenses of liquidating the RFC consist of the salaries and related costs of personnel engaged in liquidating the Corporation's assets, together with rental costs of office space.

A limitation of $3,500,000 was placed on the administrative expenses of liquidating the RFC in fiscal year 1955. Of this, $839,725 was transferred to other Government agencies under Reorganization Plan No. 2 of 1954. In addition, it is estimated that $175,275 of the amount authorized will not be required in fiscal year 1955. Thus, $2,485,000 is the amount of the fiscal year 1955 limitation which is comparable to the $1,400,000 estimated for administrative expenses in fiscal year 1956.

The reduction of $1,085,000 results from (*a*) the smaller workload anticipated during fiscal year 1956, (*b*) savings due to reorganization and improved operating procedures, and (*c*) elimination of costs incurred in closing RFC's field loan agencies which will not be repeated in fiscal year 1956.

Financing operations.—On June 30, 1954, the Corporation's borrowings from the Treasury amounted to $154 million. In connection with the functions transferred to other Government agencies, RFC notes to the Treasury in the amount of $147.3 million were also transferred. The remaining RFC notes to the Treasury were repaid early in fiscal year 1955.

During fiscal year 1955, it is expected that $176 million of RFC's retained earnings will be paid into the Treasury as a liquidating dividend. In addition, $34,288,019, representing the results of fiscal year 1954 operations, was paid as a dividend to the Treasury early in fiscal year 1955.

In fiscal year 1956, it is estimated that the remaining $75 million of retained earnings will be returned to the Treasury as a liquidating dividend, and that $40 million of the Corporation's capital stock will be retired. In addition, during fiscal year 1956, there will be paid into the Treasury a dividend of $12,340,087, representing the results of fiscal year 1955 operations.

Operating results.—A comparison of income and expense for liquidation of the RFC lending programs is provided in the following table:

LIQUIDATION OF WORLD WAR II ASSETS AND PRODUCTION PROGRAMS

PROGRAM HIGHLIGHTS

	1955 estimate	*1956 estimate*
Total assets (after allowance for losses) as of June 30	$32,707,490	$24,324,000
Net income	5,494,500	2,423,510

Analysis of budget program.—On June 30, 1954, after giving effect to transfers to other Government agencies under the provisions of Reorganization Plan No. 2 of 1954, the total assets of the program amounted to $36.2 million. Of the total, $13.4 million has been liquidated, leaving a balance of $22.9 million to be liquidated. The composition of this balance is as follows:

[In millions]

Note receivable	$12.3
Property, plant, and equipment:	
Under lease	1.9
Held for disposal by GSA	.1
Conditional sales contracts	4.3
Land grant freight claims	2.2
Other receivables	2.1
	22.9

It is estimated that the value of the unliquidated assets will have been reduced to $21.2 million by June 30, 1955, and to $14.3 million by June 30, 1956.

Administrative expenses.—The administrative expenses of liquidating the remaining World War II assets are estimated to be $205,000 in fiscal year 1955 and $75,000 in fiscal year 1956.

Financing operations.—To the extent that funds realized from the liquidation of World War II assets exceed requirements of the program, they are paid into the Treasury as miscellaneous receipts. It is estimated that payments of $8.9 million and $10.8 million will be made in fiscal years 1955 and 1956, respectively.

Operating results.—The operating results estimated for the program to liquidate the remaining World War II assets are summarized in the following table:

SMALLER WAR PLANTS CORPORATION

INTRODUCTORY STATEMENT

The liquidation of the assets of the Smaller War Plants Corporation is being carried out under the direction of the Secretary of the Treasury.

On June 30, 1954, the unliquidated assets of this program amounted to $1.6 million, including 10 loans with unpaid balances of $1.1 million, 4 properties valued at $94,350, and notes, contracts, deficiency judgments, and other receivables appraised at $287,800.

It is estimated that the value of the unliquidated assets will be reduced to $650,000 by June 30, 1955, and further reduced to $410,000 by the close of fiscal year 1956. Liquidation proceeds estimated at $600,000 will be paid into the Treasury in fiscal year 1956.

Civil Defense Loans

INTRODUCTORY STATEMENT

Functions of the Reconstruction Finance Corporation under section 409 of the Federal Civil Defense Act of 1950 were transferred to the Treasury on September 28, 1953 (sec. 104, Public Law 163, approved July 30, 1953).

The Secretary of the Treasury is authorized to purchase securities or make loans (including participations therein and guarantees thereof) to aid in financing projects for civil defense purposes upon certification by the Federal Civil Defense Administrator. Such investments are limited to a total of $250 million outstanding at any one time. The activities authorized are financed by borrowings from the Treasury.

PROGRAM HIGHLIGHTS

Analysis of program.—Nine commitments had been authorized under this program, totaling $6,665,659 as of June 30, 1954. All of the amounts authorized have been to assist in financing construction of hospitals. Loans outstanding on June 30, 1954, amounted to $2,154,830, and undisbursed commitments totaled $4,510,829. Included in the undisbursed commitments is $1,215,000 representing agreements to participate in loans made by banks.

It is anticipated that additional commitments will be made amounting to $2,800,000 in fiscal year 1955 and $1,900,000 in fiscal year 1956. Loan commitments are limited to cases for which private financing is unavailable. No direct loans are authorized if financing can be arranged on a deferred participation basis with banks or other financial institutions.

Disbursements on outstanding loan commitments are estimated to be $3,295,829 in fiscal year 1955 and $1,000,000 in fiscal year 1956. Loan repayments are estimated as $165,659 and $285,000 for fiscal years 1955 and 1956, respectively.

Administrative expenses.—Salaries and related expenses of the personnel engaged in processing loan applications and servicing outstanding loan commitments are estimated at $50,000 in each of fiscal years 1955 and 1956. Fifty applications were received up to June 30, 1954, and it is estimated 20 will be received in each of the years 1955 and 1956.

Financing operations.—Borrowings from the Treasury amounted to $2,138,970 at the end of fiscal year 1954. Additional borrowings of $3,073,530 and $537,000 are estimated for fiscal years 1955 and 1956, respectively. No repayments are anticipated for fiscal years 1955 and 1956.

Operating results.—Income from interest and fees exceeded expenses by $29,437 in 1954. With greater interest income anticipated for fiscal years 1955 and 1956, it is estimated that net income for these years will be $66,563 and $170,500, respectively, bringing the retained earnings to $266,500 by June 30, 1956.

Fund for Payment of Government Losses in Shipment

BUSINESS-TYPE STATEMENTS

PROGRAM AND PERFORMANCE

This revolving fund was created as self-insurance to cover claims resulting from losses in shipment of Government property such as coin, currency, and securities. Since these claims are only partially offset by recoveries, the deficit has gradually increased until it amounted to $678,670 as of June 30, 1954 (5 U. S. C. 134).

bonds, as well as most of the minor evidences of a financial character issued by the United States, such as, postage, internal revenue, customs, and savings stamps. In addition, the Bureau prints Federal transportation requests, checks, commissions, certificates, permits, warrants, etc. The Bureau also prints bonds, postage, and internal revenue stamps for the governments of insular possessions.

The Bureau operates under a working capital fund of $3,250,000 (31 U. S. C. 181–181e). All work is performed on a reimbursable basis, and business-type accounting and budget procedures are employed.

ANALYSIS OF BUDGET PROGRAM

The anticipated work volume is based on estimates of requirements submitted by the agencies served. The program comprises the following activities:

1. *Engraving and printing—(a) Currency.*—It is expected that the level of production in 1955 and 1956 will be approximately 25 percent less than that for 1954.

(*b*) *Stamps.*—The anticipated increase in 1955 and 1956 as compared with 1954 is due to an estimated increase in the demand for revenue stamps of approximately 17 percent and 10 percent for postage stamps.

(*c*) *Paper checks, commissions, certificates, etc.*—The estimated program for these items in 1955 and 1956 is approximately 40 percent larger than for 1954.

(*d*) *Securities.*—The anticipated decrease in production in 1955 and 1956 as compared with 1954 is due primarily to the decision of the Post Office Department to have postal savings certificates manufactured in punchcard form. Inasmuch as the Bureau is not equipped to process the certificates in this manner, purchases hereafter will be made from a commercial source. However, the decrease in 1955 was offset by an increase of approximately 10,000,000 additional United States savings bonds for the Bureau of the Public Debt.

2. *Operation and maintenance of the incinerator and space utilized by other agencies.*—Charges are made to other agencies, on an actual cost basis, for use of the incinerator and for the cost of maintenance services provided for the space which they occupy in the Bureau's buildings.

3. *Purchase of card checks.*—Because the Bureau is not equipped to manufacture punchcard check forms, purchases are made from a commercial source, based on estimates of requirements submitted by agencies served.

FINANCIAL RESULTS

A surplus of $71,797 accrued to the Bureau of Engraving and Printing fund as a result of operations during the fiscal year 1954. This amount was reduced by $29,060, representing the estimated net loss to the Government due to a theft of $160,000 in completed currency notes by an employee of the Bureau. The balance of $42,737 will be returned to the general fund of the Treasury.

COAST GUARD

Coast Guard Supply Fund

BUSINESS-TYPE STATEMENTS

PROGRAM AND PERFORMANCE

General stores material, uniform clothing, and commissary supplies are procured under this revolving fund which is reimbursed as issues are made (14 U. S. C. 650). During fiscal year 1954 there was a net increase of $4,575 in the fund, due principally to surplus adjustments related to prior year operations which offset losses from revaluation of inventories of uniform clothing and excess general stores material transferred from inventory for disposal. During 1955 and 1956 it is estimated that receipts from sales will be entirely offset by cost of goods sold.

Coast Guard Yard Fund

BUSINESS-TYPE STATEMENTS

PROGRAM AND PERFORMANCE

This fund finances industrial operations in the Coast Guard Yard, Curtis Bay, Md., consisting principally of (*a*) vessel construction, repair, and alterations; (*b*) small-boat construction and repair; (*c*) buoy manufacture; (*d*) electronics maintenance; and (*e*) miscellaneous manufacturing (14 U. S. C. 648). All costs except depreciation for replacement of structures are recovered in charges for work performed.

For 1956, operations are expected to be at a level slightly lower than for the current year. Retained earnings as of the end of June 1956 are estimated to be $316,902.

EXPLANATORY STATEMENT

GENERAL STATEMENT

The District of Columbia constitutes a political entity in which are exercised not only municipal but also county and State functions, such as public education, administration of justice, promotion of family welfare, care of the indigent, custody of mental defectives and delinquents, protection of the interests of labor, metropolitan area planning, etc.

Congress is empowered "to exercise exclusive legislation in all cases whatsoever" on behalf of the District of Columbia as the seat of government of the United States. Congress acts in municipal matters as a city council, and in dealing with the broader aspects of the local government, as a county board and a State legislature. In this connection, Congress enacts measures to provide revenues from residents of the District and appropriates the money thus raised to carry on the government of the District of Columbia. District revenues from all sources are covered into the United States Treasury and credited either to the general fund, the highway fund, the water fund, the sanitary sewage works fund, the motor-vehicle parking fund, or a trust fund, and no expenditure can be made from any of these funds, other than trust funds, without specific appropriation by Congress.

Under the law, the District estimates of appropriation are submitted to the Bureau of the Budget for incorporation in the Budget of the United States. The Bureau, however, does not examine the estimates of the District in minute detail, but confines its attention more to matters of policy which concern the Federal Government and present and proposed revenue measures required to balance the District budget.

The detailed estimates for the fiscal year 1956 include requests for the second year of the public-works program. This construction will extend over a 10-year period and will provide increased water supply, sewers, highways and bridges, schools, hospitals, and other buildings. There is also reflected the reduction in number of District agencies as a result of Reorganization Plan No. 5 of 1952.

The estimates of revenues for the general, highway, water, sanitary sewage works, motor-vehicle parking, and trust funds are found in supporting statement No. 1. Estimates of obligations for the same funds are shown in supporting statement No. 2. Attention is also directed to the summary of operations table at the beginning of this chapter.

GENERAL FUND

Revenues accruing to the general fund of the District of Columbia are used to finance the administrative offices, retirement funds, schools, libraries, police, fire, health, recreation, welfare, corrections, sanitation, public buildings construction, and other activities. These revenues are realized from real, personal, and other property taxes; sales and gross receipts taxes on alcoholic beverages, cigarettes, insurance, motor vehicles, public utilities, gross sales, and other sources; licenses and permits; individual, unincorporated business, and corporation income taxes; inheritance and estate taxes; certain earnings and miscellaneous revenues; and the Federal payment. The largest item of revenue in the general fund comes from realty and personal property taxes, and amounts to approximately 42 percent of the total. The levy is based on an estimated assessed valuation of $2,290,000,000 taxed at the rate of $2.20 per $100 for realty and $2 per $100 for personal property. The estimated valuation is $45 million higher in 1956 than for the current year.

The estimate of general-fund revenue availability on the present tax base for the fiscal year 1956, including the presently authorized Federal payment of $20 million and a surplus of $1,913,011 from 1955, amounts to $137,535,011. The estimated funds required (with no reserve for supplementals) total $138,395,500. This requirement exceeds the revenue availability by $860,489. However, experience has demonstrated that approximately 1 percent of appropriations for operating expenses remain unobligated at the end of any budget year and consequently there will be sufficient funds available to pay the actual obligations. Furthermore, the revenues from new taxes, effective in the fiscal year 1955, are based on insufficient experience to establish a firm estimate. A later review may increase the revenue availability. If there should be a decrease, it will be necessary for the Commissioners to review the various programs and revenue measures and submit appropriate revisions.

General-fund estimates of appropriation for 1956, based on current legislation, are $138,395,500 and show an overall increase of $765,408 (approximately one-half of 1 percent). This increase results from an increase in operating expenses of $3,977,408 and a decrease in capital outlay of $3,212,000. The increase in operating expenses, amounting to about 3.4 percent, results largely from increases for Federal obligations, staffing new buildings, maintenance costs, and public assistance.

Although capital outlay in the general fund shows a decrease of $3,212,000, the amount available for expenditure in 1956 is $17,722,000 against $17,864,000 for 1955, or a decrease of only $142,000, when an adjustment is made for deferred appropriations. The largest items in capital outlay provide for new schools, a branch library in Woodridge, a new firehouse, a Women's Bureau for the Metropolitan Police, an operating suite at the District of Columbia General Hospital, beginning a Youth Correctional Center at Lorton, Va., new buildings at the Children's Center, and stormwater sewers.

HIGHWAY FUND

Highway-fund revenues are realized from a gasoline tax, part of the automotive registration and weight tax, motor-vehicle fees of various types, and paving assessments. The estimated revenues from these sources for the fiscal year 1956, including available surplus and a Federal loan of $6 million, total $20,881,500 which is the amount of the estimated obligations.

Estimates of appropriation chargeable to the highway fund for 1956 show an overall increase of 16 percent over the 1955 estimates. The increase is largely reflected in increases in capital outlay in the Department of Highways.

WATER FUND

Water-fund revenues are derived from the sale of water to residents of the District of Columbia, to Arlington County, Va., and to the Federal Government; and from miscellaneous receipts. The total revenue availability in the water fund, including Federal loans of $3 million amount to $10,871,816 which will be $138,716 in excess of the estimated obligations for 1956.

The estimates of appropriation for the water fund for the fiscal year 1956 amount to $10,733,100 which is an

increase of $747,797 over the 1955 estimates (approximately 7 percent).

SANITARY SEWAGE WORKS FUND

Revenues accrue to this fund from a charge based on the amount of water used by both private consumers and the Federal Government. There will also be an assessment for installation of sanitary sewers and payments from the State of Maryland. This total revenue availability, including a Federal loan of $700,000 for 1956 will amount to $4,218,700 which leaves a surplus of $65,414.

MOTOR-VEHICLE PARKING FUND

This fund is derived from parking-meter receipts and is used to pay the administrative expenses of that agency and is available for the acquisition, creation, and operation of public off-street parking facilities as a necessary incident to insuring in the public interest the free circulation of traffic in and through the District. An increase of $321,254 is requested for 1956 which will be used to expand the fringe parking program. It is estimated that the surplus at the end of 1956 will amount to $927,766.

PROGRAM AND PERFORMANCE

1. *Administration.*—In addition to the normal administration of the department, overall supervision of the District's administrative and fiscal matters are provided.

2. *Administrative services.*—Centralized facilities, service, and assistance are provided the departments in such matters as mail, files, space, real property management, motor vehicle assignments, official travel, binding and reproduction, and miscellaneous other general housekeeping duties.

3. *Budget.*—Budgetary instructions, policies, and procedures are developed, agency programs and departmental budget requests are reviewed and coordinated, the budget document prepared, appropriations are apportioned, and reporting plans and forms are prepared.

4. *Finance*—(*a*) *Accounting.*—Decisions and reports on the legality or propriety of proposed obligations and expenditures are prepared and the accounting systems in the District government are installed and supervised. Payrolls are prepared, the payroll-savings plan and employees' life-insurance programs are operated in addition to the compilation of records and reports pertinent to retirement accounting. Accounting information and reports of the financial status and condition of the District government are prepared.

(*b*) *Assessing.*—The laws relating to the assessment of real property, tangible personal property used in business, gross earnings of banks and building associations, gross receipts of public utility and title companies, special assessments for public improvements, and tax programs are administered, and certain miscellaneous rents and fees are determined.

(*c*) *Collection.*—All revenues are collected and deposited daily with the Treasurer of the United States and distribution of all payments and receipts into respective revenue accounts are made and erroneous collections refunded. The District of Columbia cigarette tax law is administered and alcoholic beverage tax stamps are sold.

(*d*) *Disbursing.*—All funds for the operation and maintenance of the District government from 400 appropriation and special fund accounts are disbursed.

5. *Internal auditing.*—Departmental operations and administration of various funds are reviewed primarily for the purpose of evaluating the performance of each agency in discharging its financial obligations and to aid in improving the reporting to top management.

6. *Management.*—Programs and plans are developed for improved organization and procedures and guidance is provided the departments in their administrative improvement programs.

7. *Personnel.*—Personnel policies are established and procedures formulated, and surveillance over the execution of the District's personnel regulations is maintained through advice and counsel to the departments. The District's employee-disability compensation and safety programs are administered.

8. *Procurement.*—All procurement operations of the government of the District of Columbia are coordinated whereby commodities are procured by the agency or by direct delivery, whichever is more economical. The 1956 budget provides for an expansion of centralized services in connection with all construction contracts for the District to provide for the public works program.

Total obligations	877,609	933,204	984,800

PROGRAM AND PERFORMANCE

1. *Control of alcoholic beverages.*—The manufacture, sale, storage, importation, exportation, and transportation of alcoholic beverages are controlled.

2. *Administration of parole laws.*—The policies and procedures to be utilized in the consideration of parole cases are prescribed, and prisoners released on parole and good-time release are supervised. Recommendations are made to the court for a reduction in the minimum sentence of a prisoner when appropriate.

3. *Death investigations.*—All violent deaths and certain unattended natural deaths are investigated, and, when necessary, post mortem examinations are performed and inquests held. The 1956 increase provides for certain emergency repairs on the building.

4. *Administration of insurance laws.*—Approximately 600 insurance companies and their representatives are licensed annually, resulting in the collection of approximately $2,000,000 per annum in premium taxes, fees, and penalties. Through the financial examination of companies, insurance rates are established and regulated.

5. *Administration of wage, safety, and hours laws.*—The wage, safety, and hours laws are administered, minimum wage rates established for women and minors, compliance with hours law secured, and safety standards established for employees. Certificates for the employment of students are issued.

6. *Filing and recording property and corporation papers.*—Certificates of incorporation, land records, chattels, miscellaneous corporation papers, and automobile liens are recorded. The 1956 estimates contain an increase for the expansion of facilities to administer the Business Corporation Act.

7. *Investigation and regulation of public utilities.*—Utility rates are regulated through investigations of operating costs and expenditures, rate structures, security issues,

costs of property, depreciation rates, and fair rates of return. Inspections are made to ascertain adequacy of facilities and standards of service, accuracy of electric and gas meters, quality of gas, and adequacy of taxicab insurance.

8. *Planning and zoning.*—Studies and recommendations are made in connection with the regulation of the size and use of buildings, yards, and other open spaces in the District of Columbia. Preliminary reports and maps are prepared in connection with petitions to change the zoning map and regulations. Appeals to the board of zoning adjustment are handled. The 1956 increase provides facilities for the revision of the zoning regulations and map of the District of Columbia.

PROGRAM AND PERFORMANCE

1. *Administration.*—In addition to general supervision and administrative services, the telephone and radio communication facilities and the fire-alarm system are maintained.

2. *Firefighting.*—The present firefighting force of 31 engine companies, 17 truck companies, 2 rescue squads and 1 fireboat is rated class 1 by the National Board of Fire Underwriters. This highest rating is shared only by three other cities in the Nation.

3. *Fire prevention.*—A staff of 35 officers and inspectors enforce laws and regulations pertaining to fire protection through rigid inspections of buildings, structures, storage facilities, etc. Cause and origin of fires are investigated and appropriate records maintained. In 1954, fire loss dropped from $2.31 to $1.99 per capita which is well below the median of $3.86 for 584 cities reporting.

4. *Apparatus maintenance.*—A small staff of officers, members, and mechanics maintain and repair fire apparatus, and other vehicles, tools, and appliances. Periodic tests of hose, tools, and apparatus are conducted and supervised. Technical specifications for purchase of new fire apparatus are prepared.

5. *Training.*—A full-time staff of five instructors and members instruct new recruits in firefighting procedure, and all firefighting personnel in hydraulics, fire pump, and aerial ladder operation. It evaluates new firefighting appliances and techniques and makes appropriate recommendations for their consideration and adoption. It also conducts inservice training at company quarters of personnel assigned thereto.

6. *Medical service.*—Medical treatment is provided for personnel of the Metropolitan Police Department, White House and Park Police, and Fire Department at the clinic, patients' homes, hospitals, and scenes of emergency. Physical examinations are made of civilian eligibles being considered for appointment to the District government service.

PROGRAM AND PERFORMANCE

1. *Juvenile Court.*—The court has exclusive jurisdiction in matters involving dependent and delinquent children, and has concurrent jurisdiction with the United States District Court in matters of support of legitimate family members in destitute circumstances. During the last fiscal year there were 5,514 complaints involving children. Complaints in adult support cases numbered 2,439 and in paternity cases 769. Money collected and disbursed from support orders and fines amounted to $484,029 in 1954. Based on the last several years, it is probable that there will be an approximate 15 percent increase in volume in the coming year.

2. *Municipal Court.*—The court has original jurisdiction concurrently with the United States District Court with respect to violations of municipal ordinances, and crimes and offenses not punishable by imprisonment in the penitentiary, except libel, conspiracy, and violations of the post office and pension laws of the United States. It has exclusive jurisdiction of civil actions, including counterclaims and cross-claims, in which the claimed value of personal property or the debt or damages claimed does not exceed $3,000. During the fiscal year 1954, there were 184,462 new cases filed in the court and the cash income from fees, fines, and forfeitures amounted to $1,865,441. An increase in the number of cases is expected in 1955 and 1956.

3. *Municipal Court of Appeals.*—Appeals from the municipal and juvenile courts are heard and decided. Applications for allowance of appeal are considered from the small claims branch, and in criminal proceedings where the penalty is less than $50. The number of cases appealed ranges between 150 and 200 per year. It is anticipated that in 1956 there will be an increase in the number of appeals of right and applications for allowance of appeal filed.

4. *District of Columbia Tax Court.*—Appeals from assessments made by the taxing authority of the District are heard and decided. The Court disposed of 51 appeals, of which 7 involved inheritance taxes, 8 franchise and income taxes, 10 excise taxes, 8 sales and use taxes, 13 real estate taxes, and 5 personal property taxes. Refunds in the amount of $38,236.22 were ordered.

5. *United States courts.*—Provision is made for payment of services rendered the District by the United States courts (United States Court of Appeals for the District of Columbia Circuit and the United States District Court for the District of Columbia); the Department of Justice (offices of the United States attorney and the United States marshal for the District of Columbia). The General Services Administration is reimbursed for one-half of the cost of operation, maintenance, and repair of the Federal Courts Building.

PROGRAM AND PERFORMANCE

The Department of Public Health renders preventive and corrective public-health services through clinics, hospitals, laboratories, inspectional and health education services.

1. *Administration.*—In addition to administrative services to the bureaus, there are performed functions involving vital statistics, health education, investigation of eligibility of persons desiring medical care, and the Hill-Burton hospital construction program.

2. *Disease control.*—In 1954, the following services were rendered: 1,642 cancer-detection examinations, 7,117 mental hygiene patient services, 14,671 patient services in alcoholic rehabilitation, 59,806 tuberculosis clinic visits, 57,989 venereal disease clinic visits, 57,463 immunizations against communicable diseases, and 1,630 physician visits to home-care patients.

3. *Maternal and child health.*—Preventive diagnostic, treatment, and rehabilitation services are provided for infants, preschool, and crippled and handicapped children. There were 114,559 clinic visits in 1954. Health services for children in schools are also provided, and 132,189 visits to school physicians were made in 1954.

4. *Public health nursing.*—Public health nursing service in clinics and homes is provided. In 1954, 166,915 visits were made to patients in homes, clinics, schools, and hospitals.

5. *Laboratories and pharmacies.*—Bacteriological, chemical, and serological examinations are made and the pharmacy service is operated. In 1954, 884,000 laboratory examinations were made and 75,528 prescriptions were filled.

6. *Dental health.*—Provision is made for a public health dental program for schools, health centers, hospitals, and institutions. Educational, preventive, and clinic services are provided. In 1954, 269,327 services were rendered.

7. *Food and public health engineering.*—Inspections are made of dairy farms, dairy plants, food-handling establishments, rooming houses, and other licensed establishments which serve the public and which can endanger the public health because of environmental conditions. In 1954, 183,672 inspections were made.

8. *District of Columbia General Hospital.*—This general hospital has a rated capacity of 1,382 patients and provided an average of 1,065 days of inpatient care in fiscal year 1954 with 108,077 clinic visits and 36,633 emergency-room treatments.

9. *Glenn Dale Hospital.*—In 1954, this 660-bed tuberculosis hospital located at Glenn Dale, Md., provided an average fo 596 days of inpatient care.

10. *Medical charities.*—Provision is made for the care of indigent inpatients and outpatients in 8 private hospitals and 2 institutions on a contract basis. In 1954, 47,726 days ward care, 18,325 radiographs, 10,015 emergency room treatments, 110,141 clinic visits, and 8,149 ambulance runs were provided.

11. *Freedmen's Hospital.*—Provision is made for the care of indigent residents of the District of Columbia in Freedmen's Hospital. In 1954, a daily average number of 40.1 general patients and 46.8 tuberculosis patients were given care and 22,460 clinic visits were made at District expense.

12. *Saint Elizabeths Hospital.*—Provision is made for the care of indigent insane residents of the District of Columbia. In 1954, a daily average of 5,313 patients were so maintained.

PROGRAM AND PERFORMANCE

1. *Executive direction.* This covers planning and broad control of institutions and services.

2. *Custody and care of prisoners.*—It is estimated that an average of 4,175 prisoners will be confined during 1956, an increase of 375 over 1955. Exclusive of all employees' salaries for 1956, 75 cents is provided per day for each prisoner, substantially the same as provided for 1955. Reimbursement is received for Federal prisoners maintained in institutions of the Department. During 1954, reimbursement in the amount of $371,814 was received for the support of an average daily number of 357. For 1956, reimbursement in the amount of $400,000 has been estimated for the support of approximately 425 prisoners.

3. *Maintenance and operation of institutions.*—This activity provides for the operation of four institutions, the jail division in Washington, the reformatory division for men, the reformatory division for women, and the workhouse division for men. The present normal capacity of the institutions is 3,400. Plans to meet the additional needs of the increasing population through expansion at one of the institutions and to commence erection of an additional institution are contained in the 1955 and 1956 capital outlay estimates. Funds to operate three new structures are also included in the 1956 estimates.

4. *Support of District prisoners in Federal institutions.*—This covers the cost of maintaining adult District prisoners in Federal correctional institutions. During 1954, a daily average of approximately 568 District prisoners were maintained at an average daily cost of $3.80. For 1956, it is estimated that the number will level off at slightly less than the 1954 average number.

6. *Junior village.*—Facilities are provided for the temporary custody, training, and care of dependent and neglected children of 6 months to 14 years of age.

7. *Municipal lodging house.*—Overnight care is provided to homeless indigent men.

8. *Temporary home for soldiers and sailors.*—Temporary lodging facilities are provided, including meals, to veterans who are without resources and are in this city with reference to claims or other activities connected with their military service.

9. *Children's center.*—The District Training School provides facilities for the care and treatment of mentally ill beneficiaries of the District committed by the United States District Court in an effort to prepare them for safe and useful community life within the limits of their capacity. The facilities include the operation of a farm wherein the inmates derive therapeutic benefits in addition to the produce value supplied to the institution. The remainder of the program provides protective institutional care and rehabilitates the children found by the Juvenile Court to be delinquent, truant, and/or beyond parental control. The increase for 1956 over 1955 will staff and maintain the new unit with an institutional capacity of 500 on a part-year basis.

PROGRAM AND PERFORMANCE

This Department administers the laws with respect to the control of construction, use, erection, maintenance, repair, inspection, and removal of all buildings and their appurtenances, within the District of Columbia, with the exception of public buildings or premises owned by the United States. Administers and interprets all laws and regulations governing housing in the District of Columbia.

1. *Administration.*—In addition to administrative and management services, this covers the initiation and review of existing regulations and preparation of new or revised regulations governing the Department's activities; the preparation of fee schedules; and the preparation of procedural manuals for licensing, permit issuance, and inspection.

2. *Inspection.*—Applications and plans for new construction, alteration or repairs, and mechanical equipment and appurtenances installed in or on buildings are examined and approved and inspections are made to assure that performed work is in conformance with the applicable legal requirements. The standard weights and measures law is enforced and municipal markets supervised and operated, including plant protection, police enforcements, repair, and collections. There were 330,512 inspections in 1954. The inspection load is expected to be increased by 115,000 inspections annually due to the housing inspection and window air-conditioning programs.

3. *Licenses and permit.*—Licenses and permits are issued for the operation of businesses; building and certain other types of construction and alteration or repair; building use; and other miscellaneous matters requiring a license or permit. Central files are maintained for all divisions.

4. *Housing.*—Administers and executes the District government's program for improving housing under the housing regulations. Conducts all initial inspections of housing under the housing regulations of the District of Columbia, with the exception of those performed by the Fire Department. Supervises ways and methods to assure adherence to proper standards of hygiene for human habitation and related matters in residential premises.

PROGRAM AND PERFORMANCE

1. *Administration.*—This covers administrative and management services.

2. *Planning, design, and engineering.*—Provision is made for design, engineering, and landscaping services in connection with improvement programs and field surveys and traffic analysis for planning purposes.

3. *Care of trees and parking.*—This covers the propagation, planting, and maintenance of trees and shrubs along highway facilities and the maintenance of horticultural features of grounds and public parkings.

4. *Electrical.*—The electrical facilities of the Highway Department are designed, constructed, and installed. Electrical engineering services are provided to other departments. Telephone, radio, telegraph, police patrol, fire alarm, and air-raid warning systems, electric traffic signals, and parking meters are installed and maintained. Radio dispatching equipment and the District switchboard are operated. Electrical apparatus and installations on public space are inspected.

5. *Construction and maintenance of streets.*—Streets, sidewalks, and alleys are constructed and maintained. Analysis and tests of materials are performed and improved specifications for paving mixes developed. Assistance is provided in snow removal and street sanding operations. Contract and force account work in construction and maintenance of streets is inspected.

6. *Construction and maintenance of bridges.*—The construction of bridges, retaining walls, tunnels, culverts, viaducts, wharves, and railroad bridges is supervised and inspected. Municipally owned bridges and structures are maintained, guarded, operated, and inspected for safety and control of the maximum loads.

7. *Mobile equipment.*—The policies, procedures, and standards for the maintenance and repair of vehicular and construction equipment are established and repair shops are operated.

Facilitation of motor-vehicle parking—1954, $100,036; 1955, $235,406; 1956, $561,300.

PROGRAM AND PERFORMANCE

Facilitation of motor-vehicle parking.—Continuing surveys and analyses of off-street parking were conducted to stimulate, encourage, aid and cooperate with private enterprise in providing off-street parking. In 1954 private enterprise, aided by the agency, provided 2,572 spaces in the downtown area. During 1955 it is anticipated private enterprise will provide 2,400 such additional spaces with the agency providing 1,000 spaces in the fringe areas. In 1956 it is anticipated private enterprise will add 4,000 more spaces in the central business district with the agency providing 3,800 spaces in fringe areas for a total of 7,800 spaces. The accomplishments and proposed programs are in accord with the Motor Vehicle Parking Act of 1942, and serve to reduce congestion on streets, expedite the movement of people, including transit vehicles, strengthen the economic stability of the community and delay blight and decentralization.

PROGRAM AND PERFORMANCE

1. *Administration.*—In addition to executive direction and administrative and management services, this covers representation of the District on the Interstate Commission on the Potomac River Basin.

2. *Planning, design, and engineering.*—Programs, drawings, specifications, cost estimates, and construction contracts for capital improvements of the District sanitary engineering facilities are prepared. Information is furnished to the public on sanitary engineering facilities and their availability.

3. *Sanitation.*—This covers cleaning of streets and alleys, including coordination of snow removal and the collection and disposal of ashes, garbage, rubbish and catch basin cleaning.

5. *Construction and repair.*—Supervision is given the construction of sewerage and water distribution facilities, including mains, reservoirs, tanks, pumping stations, sewage treatment plant additions, etc., and major repairs are made to the sewer and water systems of the District. Surveys are performed and detailed drawings made of finished work.

6. *Sewer operations.*—The sewerage system of the District is operated and maintained, including the main sewage pumping station, the sewage treatment plant, 4 auxiliary sewage pumping stations, and 5 automatic stations for highway underpasses.

7. *Water operations.*—Water processed by the Corps of Engineers, Department of the Army, is received and pumped at proper elevations for distribution throughout the District and qualified adjacent areas.

PROGRAM AND PERFORMANCE

The Washington Aqueduct, under the control of the Chief of Engineers, Department of the Army, provides an adequate supply of purified water to the District of Columbia, Arlington County and Falls Church, Va., and for certain Federal establishments in the adjacent environs.

1. *Administration.*—This covers executive direction and administrative and management services, including warehousing and issuance of supplies, civil defense, custodial services, legal and personnel services, protective security, policymaking, and preparation and justification of budgetary estimates. In addition, 1,184 purchase orders were processed in fiscal year 1954.

2. *Purification.*—During 1954 there were processed, purified and fluoridated 60.46 billion gallons of water through two filtration plants and 5,158 tons of alum syrup were manufactured; 8,107 tons of chemicals were applied, including 493 tons of sodium silicofluoride. Quality control was maintained by laboratory examination for chemical, bacteriological and fluorine content of approximately 99,000 water samples collected from 107 sampling points.

3. *Pumping.*—Water is pumped from the Potomac River for processing through the Dalecarlia and McMillan filter plants, and to the distribution system. Total energy consumed in 1954 was 35,235,000 kilowatt-hours, of which 3,767,000 kilowatt-hours were generated by the hydroelectric station and 31,468,000 kilowatt-hours were purchased. Demand requirements were 65,786 kilowatts.

4. *Transmission.*—Approximately 10 miles of force mains transmit water to 5 underground water service reservoirs for storage and subsequent distribution in the District of Columbia and Arlington County, Va., systems.

5. *Maintenance.*—In 1954, 119,400 man-hours were applied to making normal operating plant repairs and 25,500 man-hours applied to normal plant betterments. Twenty-three plant pumping units and 151 pieces of mobile equipment of various types were maintained.

6. *Collection.*—Intake of water at Great Falls, 14 miles from the city, is accomplished by the operation of screens and gates by which the water enters the transmission system. This operation includes the removal of ice and debris. Deficiencies in raw-water supply are made up by the operation of temporarily converted hydroelectric station machinery.

7. *Construction.*—The water supply system plant expansion program, period (1950–70), includes the force account and contract construction of capital outlay and miscellaneous betterment projects. Fiscal year 1954 capital outlay expenditures were $911,995. During fiscal years 1955 and 1956, active construction work will be in progress on the third high service transmission main, Dalecarlia pumping station, Little Falls pumping station, dam and tunnel, McMillan chemical building, and the third high service reservoir at Reno (first half).

8. *Engineering.*—This activity prepares reports, designs, specifications, and project cost estimates and supervises architect-engineer services, in conformance with increased water supply system expansion program contained in House Document 480, and furnishes like services as required for operating the existing plant.
