1. Maintenance, repair, and operation	347,718	161,310	161,310
Obligations incurred	3,048,191	3,199,565	3,370,565

PROGRAM AND PERFORMANCE

1. *Maintenance, repair, and operation.*—Responsible for the administration, maintenance, operation, and improvement of the portion of the National Capital Park system within the District of Columbia, which includes 780 reservations, with a total area of 6,939.99 acres. This represents an increase of 5.93 acres during the past fiscal year. It is anticipated that the areas and acreages to be maintained during this fiscal year will be approximately the same.

2. *United States Park Police.*—Responsible for the protection of the National Capital Park system within the District of Columbia through the enforcement of laws and regulations designed to afford the maximum benefits and enjoyment by the public using them and safeguarding the public properties. Funds appropriated are required to insure adequate protection.

CAPITAL OUTLAY—Continued

DEPARTMENT OF HIGHWAYS—continued

Capital Outlay, Department of Highways, District of Columbia—Continued

section 15 of the Act of August 2, 1946 (5 U. S. C. 55a), and for engineering and incidental expenses: *Provided further,* That this appropriation and the appropriation "Operating expenses, Department of Highways" shall be available for the construction and repair of pavements of street railways, in accordance with the provisions of the Merger Act (47 Stat. 752), and the proportion of the amount thus expended which under the terms of the said Act is required to be paid by the street-railway company shall be collected, upon the neglect or the refusal of such street-railway company to make such payment, from the said street-railway company in the manner provided by section 5 of the Act of June 11, 1878, and shall be deposited to the credit of the appropriation for the fiscal year in which it is collected: *Provided further, That in the relocation, or abandonment and removal, of any street railway tracks made necessary for traffic regulation or for physical improvement of the street upon which such tracks are located, the Commissioners of the District of Columbia are authorized to negotiate with the street railway company owning such tracks for the purpose of determining the amount to be paid out of this appropriation by the District of Columbia to the said street railway company for the cost of relocation or removal of the said tracks, including consideration of the remaining undepreciated cost of tracks abandoned and removed for such purposes: Provided further,* That in connection with projects to be undertaken as Federal-aid projects under the provisions of the Federal Aid Highway Act of December 20, 1944, as amended, the Commissioners are authorized to enter into contract or contracts for those projects in such amounts as shall be approved by the Bureau of Public Roads, Department of Commerce: *Provided further,* That the Commissioners are hereby authorized to construct grade-crossing elimination and other wholly District construction projects or those authorized under section 8 of the Act of June 16, 1936 (49 Stat. 1521), and section 1 (b) of the Federal Aid Highway Act of 1938, as amended, in accordance with the provisions of said Acts, and this appropriation may be used for payment to contractors and other expenses in connection with the expenses of surveys, design, construction, and inspection pending reimbursement to the District of Columbia by the Bureau of Public Roads, Department of Commerce, or other parties participating in such projects, reimbursement to be credited to the appropriation from which payment was made: *Provided further,* That the Commissioners are authorized to fix or alter the respective widths of sidewalks and roadways (including tree spaces and parking) of all highways that may be improved under appropriations contained in this Act: *Provided further,* That no appropriation in this Act shall be available for repairing, resurfacing, or paving any street, avenue, or roadway by private contract unless the specifications for such work shall be so prepared as to permit of fair and open competition in paving materials as well as in price: *Provided further,* That in addition to the provision of existing law requiring contractors to keep new pavements in repair for a period of one year from the date of the completion of the work, the Commissioners shall further require that where repairs are necessary during the four years following the said one-year period, due to inferior work or defective materials, such repairs shall be made at the expense of the contractor, and the bond furnished by the contractor shall be liable for such expense: *Provided further,* That this appropriation and the appropriation "Operating expenses, Department of Highways" shall be available for advance payments to Federal agencies for work to be performed, when ordered by the Commissioners, subject to subsequent adjustment. *(1 D. C. Code 721; 7 D. C. Code 101–131, 501–524, 601–634, 701–710, 801–806; Reorganization Plan No. 5 of 1952, 1 D. C. Code, Appendix, Order No. 53; District of Columbia Appropriation Act, 1955.)*

Total obligations	4,793,533	23,538,811	17,797,000

PROGRAM AND PERFORMANCE

1. *Major improvement projects.*—This covers construction of highways and streets under the Federal-aid highway acts and the public works program. It also includes the cost of plans and making surveys, including traffic origin and destination surveys for the determination of future construction projects. The work scheduled represents a part of the proposed 10-year program, and the completion of projects previously initiated.

2. *Rights-of-way.*—This covers the acquisition of property in connection with the Federal-aid and public works programs.

3. *Street improvements and extensions.*—The work in this category is in the nature of minor construction and is chargeable wholly against District funds. Included is paving, repaving, and surfacing; grading; curbs, gutters, and shoulders; resurfacing; changes in drainage structures; improving unpaved streets; assessment and permit work, and the construction of minor structures.

4. *Electrical improvements.*—Includes the following types of work: Street lighting, replacement and new installations of fire alarm and police call boxes, and municipal telephone facilities in District institutions.

Obligations Payable Out Of Reimbursements From Other Accounts			
3. Storm drainage	49,381		
Obligations incurred	5,310,065	12,739,356	10,397,000

PROGRAM AND PERFORMANCE

All capital outlay construction is in accord with the public works program.

1. *Water distribution.*—In addition to the necessary extensions of the water distribution system for new building and in advance of paving, major trunk water-main construction to relieve and supplement the existing system will be continued through the starting of a major reinforcement of the central city area. Water storage facilities for the central city and Anacostia supply would also be initiated.

2. *Sewage disposal—(a) Sewers.*—Sanitary sewer extensions are planned as required by new developments and in advance of paving to convey all sewage to a point of safe discharge. The relief of trunk and intercepting sewers which have become inadequate is part of the sanitary sewer program.

(*b*) *Sewage treatment plant.*—Additions to the plant are programed to continue construction of secondary treatment units in order to reduce the pollution of the Potomac in the metropolitan area. The funds requested will complete the first half of these plant facilities.

3. *Storm drainage.*—The storm water sewer system in the District is severely overtaxed and even entirely lacking in some areas. This program attacks the weakest points each year to bring the eventual solution somewhat closer. The ultimate solution will be reached only after many years of continuous effort and expenditure.

4. Water transmission	13,650		
Obligations incurred	4,915,632	15,852,433	3,210,000

PROGRAM AND PERFORMANCE

Current funds available and present estimates are in accord with the furtherance of the Washington Aqueduct future water supply, and construction program, as set forth in House Document No. 480, 79th Congress, 2d session.

1. *Water collection.*—The average discharge of the Potomac River at the intakes is 7,500 million gallons daily. Present plant maximum intake capacity is 216 million gallons daily from the Potomac River. The Little Falls pumping station, dam and tunnel will increase plant intake sustained capacity initially by 350 million gallons daily and ultimately by 500 million gallons daily.

2. *Water purification.*—The filtration plant capacities at present are as follows: McMillan, 125 million gallons daily and Dalecarlia, 109 million gallons daily. The new Dalecarlia filter and chemical buildings will increase Dalecarlia by 56 million gallons daily, increasing total plant capacity from 234 million gallons daily to 290 million gallons daily.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

3. *Water storage.*—Existing filtered water storage capacity is 80 million gallons which results in a 48 million gallons daily working capacity. The completion of the Third High reservoir at Reno (first half) and placing in service the 30 million gallon reservoir at Dalecarlia will increase the filtered water storage capacity to 130 million gallons and the working capacity to 70 million gallons daily.

4. *Water transmission.*—This activity includes the new main pumping station at Dalecarlia, the hydroelectric plant, the Third High service transmission main, and the installation of meters to gage water consumption by the Federal Government.

5. *Acquisition of lands.*—The safeguarding of Washington Aqueduct facilities requires the acquisition of essential land parcels.

OBLIGATIONS BY OBJECTS

Object classification	1954 actual	1955 estimate	1956 estimate
Direct Obligations			
10 Lands and structures	$4,901,982	$15,852,433	$3,210,000

Medical services—1954, $117,492; 1955, $88,795; 1956, $76,000.

PROGRAM AND PERFORMANCE

This fund is derived by a 6 percent deduction from the license fees for the manufacture or sale of alcoholic beverages, except for retailers' license, class E, imposed by section 11 of the District of Columbia Alcoholic Beverage Control Act, as amended. The fund is used to establish and maintain a program for the rehabilitation of alcoholics, promote temperance, and provide for the medical and scientific treatment of persons found to be alcoholics by the courts of the District of Columbia (61 Stat. 746, 747).

GENERAL PROVISIONS

SEC. 2. Except as otherwise provided herein, all vouchers covering expenditures of appropriations contained in this Act shall be audited before payment by or under the jurisdiction only of the accounting officer for the District of Columbia and the vouchers as approved shall be paid by checks issued by the Disbursing Officer without countersignature.

SEC. 3. No part of any appropriation contained in this Act shall be used to pay the salary or wages of any person who engages in a strike against the Government of the United States or the government of the District of Columbia, or who is a member of an organization of Government employees that asserts the right to strike against the Government of the United States or the government of the District of Columbia, or who advocates, or is a member of an organization that advocates, the overthrow of the Government of the United States by force or violence: *Provided*, That for the purposes hereof an affidavit shall be considered prima facie evidence that the person making the affidavit has not contrary to the provisions of this section engaged in a strike against the Government of the United States or the government of the District of Columbia, is not a member of an organization of Government employees that asserts the right to strike against the Government of the United States or the government of the District of Columbia, or that such person does not advocate, and is not a member of an organization that advocates, the overthrow of the Government of the United States by force or violence: *Provided further*, That any person who engages in a strike against the Government of the United States or the government of the District of Columbia or who is a member of an organization of Government employees that asserts the right to strike against the Government of the United States or the government of the District of Columbia, or who advocates, or who is a member of an organization that advocates, the overthrow of the Government of the United States by force or violence, and accepts employment the salary or wages for which are paid from any appropriation contained in this Act shall be guilty of a felony and, upon conviction, shall be fined not more than $1,000 or imprisoned for not more than one year, or both: *Provided further*, That the above penalty clause shall be in addition to, and not in substitution for, any other provisions of existing law.

SEC. 4. Whenever in this Act an amount is specified within an appropriation for particular purposes or object of expenditure, such amount, unless otherwise specified, shall be considered as the maximum amount which may be expended for said purpose or object rather than an amount set apart exclusively therefor.

[SEC. 5. Hereafter work performed for repairs and improvements may be by contract or otherwise, as determined by the Commissioners; and the Commissioners are authorized to establish a working fund for such purposes without fiscal year limitation, said fund to be reimbursed for repairs and improvements performed under that fund from funds available for these purposes, and payments are authorized to be made to said fund in advance if required by the Director of Buildings and Grounds, subject to subsequent adjustments, from funds available for repairs and improvements, and such working fund shall be available for necessary expenses including allowances for privately owned automobiles.]

SEC. [6] *5*. Appropriations in this Act shall be available, when authorized or approved by the Commissioners, for allowances for privately owned automobiles used for the performance of official duties at 7 cents per mile but not to exceed $22 a month for each automobile, unless otherwise therein specifically provided, except that [forty] *52* such allowances at not more than $360 each per annum may be authorized or approved by the Commissioners: *Provided*, That the total expenditures for this purpose shall not exceed [$75,040] *$83,000*, excluding the automobile allowances for the deportation of nonresident insane by the Department of Public Health and the transportation of indigent persons and the placing of children by the Department of Public Welfare.

Federal Reserve Bank of St. Louis

GENERAL PROVISIONS—Continued

SEC. [7] *6.* Appropriations in this Act shall be available for the payment of dues and expenses of attendance at meetings of organizations concerned with the work of the District of Columbia government, when authorized by the Commissioners: *Provided*, That the total expenditures for this purpose shall not exceed [$25,000] *$31,000.*

SEC. [8] *7.* The Commissioners are hereby authorized in their discretion to invest and reinvest at any time in United States Government securities, with the approval of the Secretary of the Treasury, any part of the general, special, or trust funds, of the District of Columbia, not needed to meet current expenses, to deposit the interest accruing from such investments to the credit of the fund from which the investment was made, and the Secretary of the Treasury is authorized to sell or exchange such securities for other Government securities, and deposit the proceeds to the credit of the appropriate fund.

SEC. [9] *8.* Appropriations in this Act shall be available when authorized by the Commissioners, for services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a).

SEC. [10] *9.* The disbursing officer of the District of Columbia is authorized to advance to officials upon requisitions previously approved by the accounting officer of the District of Columbia, not to exceed at any one time sums of money as follows:

Director of Licenses and Inspections, $400, to be used exclusively in connection with investigation of short weights and measures;

Librarian of the Public Library, $50 at the first of each month, for the purchase of certain books, pamphlets, periodicals, newspapers, or other printed materials;

Superintendent of recreation, $4,000, to be used for the expense of conducting activities of the Recreation Board under the trust fund created by the Act of April 29, 1942 (56 Stat. 261);

Chief of Police, $5,000, to be used in the prevention and detection of crime;

Chief probation officer of the juvenile court, $50, upon requisition previously approved by the judge of the juvenile court, to be expended for travel expenses to secure the return of absconding probationers;

Director, Department of Corrections, $1,000, to be used only in returning escaped prisoners, conditional releasees, parolees, and for the payment of cash gratuities to prisoners on release;

Director of Public Health, $900, to be used for deportation of nonresident insane;

Director of Public Welfare, $1,100, to be used for placing and visiting children, returning parolees and wards of the Department of Public Welfare, and deportation of nonresident indigent persons including maintenance pending transportation;

Superintendent of Schools, $1,000, which shall be used in connection with the central food services.

SEC. [11] *10.* Appropriations in this Act shall not be used for or in connection with the preparation, issuance, publication, or enforcement of any regulation or order of the Public Utilities Commission requiring the installation of meters in taxicabs, or for or in connection with the licensing of any vehicle to be operated as a taxicab except for operation in accordance with such system of uniform zones and rates and regulations applicable thereto as shall have been prescribed by the Public Utilities Commission.

SEC. [12] *11.* Appropriations in this Act shall not be available for the payment of rates for electric street lighting in excess of those authorized to be paid in the fiscal year 1927, and payment for electric current for new forms of street lighting shall not exceed 2 cents per kilowatt-hour for current consumed.

SEC. [13] *12.* All motor-propelled passenger-carrying vehicles (including watercraft) owned by the District of Columbia shall be operated and utilized in conformity with section 16 of the Act of August 2, 1946 (5 U. S. C. 77, 78), and shall be under the direction and control of the Commissioners, who may from time to time alter or change the assignment for use thereof, or direct the alteration or interchangeable use of any of the same by officers and employees of the District, except as otherwise provided in this Act. "Official purposes" shall not apply to the Commissioners of the District of Columbia or in cases of officers and employees the character of whose duties makes such transportation necessary, but only as to such latter cases when the same is approved by the Commissioners. No motor vehicles shall be transferred from the police or fire departments to any other branch of the government of the District of Columbia.

SEC. [14] *13.* Appropriations contained in this Act for the Department of Highways and the Department of Sanitary Engineering shall be available for snow and ice control work when ordered by the Commissioners in writing.

[SEC. 15. The Secretary of the Treasury is authorized to consolidate under appropriate current account titles the unexpended balances of such unexpired District of Columbia appropriations of prior years as may be requested by the Commissioners.]

[SEC. 16. The Commissioners are authorized to construct on land owned by the District of Columbia at the District of Columbia Village a storehouse building for educational surplus property at a cost of not to exceed $30,000, to be paid from the permanent revolving fund created by the Act of August 16, 1950 (64 Stat. 450).]

SEC. [17] *14.* The Commissioners are authorized to establish a *permanent* working fund without fiscal-year limitation for the purpose of printing, duplicating, and photographing; and the unexpended balances in the miscellaneous trust fund accounts "Operating Account, Printing" and "Operating Account, Blueprinting" shall be deposited to said working fund; and the fund shall be reimbursed for all services performed thereunder.

[SEC. 18. The Commissioners are authorized to establish a permanent working fund, which shall be available without fiscal-year limitation, for necessary expenses of maintenance and repair of vehicles of the Government of the District of Columbia; and said fund shall be reimbursed, or credited in advance if required by the Director, Department of Highways, for the costs of all work performed thereunder.]

SEC. 15. The Commissioners are authorized to establish a permanent working capital fund for the Department of Sanitary Engineering, to be available without fiscal-year limitation, for the purpose of financing initially all authorized expenditures of that department, including the purchase of materials and supplies and the replacement (but not original purchase, except when appropriations hereafter may be made therefor) of interchangeable equipment, including passenger motor vehicles. Reimbursements for such expenditures shall be made to the fund at regular intervals (at least monthly), on the basis of usage, from appropriations made for the Department of Sanitary Engineering. Advances may be made to the fund, if required for specific capital expenditures, from the amounts appropriated for such capital expenditures. The fund shall consist initially of the obligated funds at June 30, 1955, appropriated in prior years for operating expenses, together with inventories of materials, supplies, and interchangeable equipment on hand at June 30, 1955. (District of Columbia Appropriation Act, 1955.)

INTRODUCTION TO PART III

Part III of the budget contains summary tables on trust and deposit funds, detailed schedules and explanatory statements on the various trust funds, and memorandum information on consolidated working funds.

TRUST AND DEPOSIT FUNDS DISTINGUISHED

The funds which are covered in the summary tables in this part of the budget are of two types, as follows:

Trust funds are those funds which are established to account for receipts which are held in trust by the Government for use in carrying out specific purposes and programs in accordance with a trust agreement or a statute. Within the category of trust funds, there is a small subcategory of *trust revolving funds,* which are trust funds used to carry on a cycle of business-type operations.

Deposit funds are those funds which are established to account for collections that are either (*a*) held in suspense temporarily and later refunded or paid into some other fund of the Government, or (*b*) held by the Government as banker or agent for others, being paid out in lump-sums at the direction of the owner. Such funds are not available for paying salaries, expenses, grants, or other expenditures of the Government.

While the transactions in these groups of funds are a part of the financial program of the Government, the trust and deposit funds are not owned by the Government; hence these transactions are excluded from the budget totals.

TRUST FUND RECEIPTS, AUTHORIZATIONS, AND EXPENDITURES

Basis of stating trust receipts.—Table 8 summarizes trust fund receipts, and table 9 gives figures by agency and account. Such receipts include all money paid into the Treasury to the credit of the trust funds, including contributions to the trust funds from the general fund. Sales and redemptions of investments in U. S. Government securities are excluded from receipts, and are listed in special analysis J of part IV.

Trust authorizations.—Trust fund receipts must be appropriated before they can be spent. These appropriations are summarized in table 8 and listed in table 10.

Most trust funds are appropriated by permanent law, not requiring further action by Congress. Usually the appropriations equal the receipts of the year. In a few cases receipts of trust funds can be spent only in accordance with appropriations enacted by Congress from year to year. Examples are funds of the Soldiers' Home and the municipal revenues of the District of Columbia. In a few other cases trust fund receipts are permanently appropriated for benefit payments, but limitations on administrative expenses payable out of the trust funds are imposed by annual action of the Congress.

Basis of stating trust expenditures.—Table 8 summarizes the trust fund expenditures, and table 10 gives figures by agency and account. These expenditures are stated on a checks-issued basis, less refunds collected. Net investments in United States Government securities are excluded from the figures, and are listed in special analysis J of part IV.

Trust revolving funds.—The small group of funds which constitute trust revolving funds represent an exception to the basis stated immediately above. The collections of trust revolving funds, instead of being taken into the tables as receipts and authorizations, are deducted from expenditures; thus the expenditures of such funds are stated on a net basis.

DEPOSIT FUND EXPENDITURES

Tables 8 and 10 include a figure on deposit fund expenditures; table 11 gives details by agencies. The expenditures of such funds are on a net basis; that is, the collections are deducted from checks issued, and the resulting figure is shown as an expenditure. Checks issued include those written to move money into other funds, as well as those written for refunds and the return of money to depositors. When the collections are larger than the checks issued, the amount shown as an expenditure is a negative item.

NET ACCUMULATION IN TRUST AND DEPOSIT FUNDS

Table 8 shows the net accumulation in all the trust and deposit funds. This represents the result obtained when the trust and deposit fund expenditures are subtracted from the trust receipts of the year. Since trust and deposit funds, as well as Federal funds, affect the total cash balance of the Treasury and the total public debt, the final figures on table 8 are carried forward into table 3 of part I.

DETAIL OF TRUST FUND ESTIMATES

The detailed material following table 11 covers the trust funds which do not require annual action by Congress (those requiring annual authorizations or limitations are in part II). The material here follows the general format of the similar material in part II. However, no appropriation language appears here, and the narrative statement of "Program and performance" usually consists only of an explanation of the source of money for the fund, the purposes for which it is authorized to be spent, and the legal citations.

CONSOLIDATED WORKING FUND ESTIMATES

Consolidated working funds are used to account for advances of moneys from one agency to another, where the advances are for the purpose of providing interagency services of a current nature, usually within the fiscal year in which advanced.

For informational purposes, the details on the consolidated working funds appear at the end of part III of the budget. These schedules are printed to make the budget complete regarding the personal services, other obligations, and work of the various agencies. The breakdown of the obligations of the performing agency is shown here according to the actual object involved—personal services, travel, supplies, etc.

In the appropriation schedules for the agencies purchasing the services (in part II) the total obligation therefor is included in the single object class which reflects the nature of the transaction to that agency, usually "07 Other contractual services." In the portion of part II which relates to the performing agency, a brief schedule summarizes the balance and net expenditures of all the consolidated working funds of that agency.

OBLIGATIONS BY ACTIVITIES

Description	1954 actual	1955 estimate	1956 estimate
1. Acquisition of library materials	$21,918	$15,000	$15,000
2. Organization of the collections	23,110	50,000	25,000
3. Reader and reference services	395,463	455,279	385,000
Obligations incurred	440,491	520,279	425,000

PROGRAM AND PERFORMANCE

Gift funds are contributed for immediate disbursement by the Librarian in the interest of the Library, its collections, or its services for the purposes specified in each case (2 U. S. C. 160; 31 U. S. C. 725s). The three principal purposes are acquisition of library materials, organization of the collections, and providing reader and reference services.

1. *Acquisition of library materials.*—During 1954, this included the procurement of rare books and manuscripts for the Library of Congress, the procurement of government documents for the Library of Congress and cooperating libraries, and assistance in the selection of Polish materials for addition to the collections.

2. *Organization of the collections.*—During 1954, the preparation of the 16th edition of Decimal Classification was begun, assistance was provided for cataloging of Cyrillic publications, and progress was made toward the completion of a catalog of Chinese rare books.

3. *Reader and reference services.*—These services include the preparation of bibliographies, indexes, digests, and check lists; lectures; surveys of bibliographic services; musical concerts; and recording and furtherance of musical research, composition, performance, and appreciation.

OBLIGATIONS BY OBJECTS

Object classification	1954 actual	1955 estimate	1956 estimate
01 Personal services	$368,903	$428,629	$371,350

OBLIGATIONS BY ACTIVITIES

Description	1954 actual	1955 estimate	1956 estimate
1. Acquisition of library materials	$950	$850	$850
2. Reader and reference services	8,965	11,300	13,800
Obligations incurred	9,915	12,150	14,650

PROGRAM AND PERFORMANCE

Income from investments held by the Treasury for the benefit of the Library of Congress is subject to disbursement by the Librarian for the purposes in each case specified (2 U. S. C. 157; 31 U. S. C. 725s). The purposes are acquisition of library materials and reader and reference services.

1. *Acquisition of library materials.*—Provides for the purchase of fine arts and Hispanic materials.

2. *Reader and reference services.*—Maintains the Hispanic room, the chair in English poetry of the Library, furthers musical composition, performance, and appreciation, and provides for bibliographic services.

OBLIGATIONS BY OBJECTS

Unobligated balance carried forward	−2,584,032	−2,584,032	−2,584,032
Obligations incurred			

PROGRAM AND PERFORMANCE

This fund represents gifts or bequests deposited by the Trust Fund Board with the Treasurer of the United States as a permanent loan to the United States, the interest upon which, at 4 percent per annum, is available to the Librarian for the purposes specified by the donors. (See Library of Congress, payment of interest on permanent loan.) The total of such principal held by the Treasurer may not exceed $5,000,000 (2 U. S. C. 158; 31 U. S. C. 725s). Of the total principal amounting to $2,584,032, $1,010,867 is for music activities, $382,779 for fine arts, $307,040 for American history, $162,052 for Hispanic activities, $151,150 for poetry and literature, and the remaining $570,144 for miscellaneous purposes.

Payment of Interest on Bequest of Gertrude M. Hubbard, Library of Congress

Appropriated (estimate) 1955, **$800** Estimate 1956, **$800**

AMOUNTS AVAILABLE FOR OBLIGATION

	1954 actual	1955 estimate	1956 estimate
Appropriation or estimate	$800	$800	$800

Total available for obligation	5,723	5,827	800
Unobligated balance carried forward	−5,027		
Obligations incurred	696	5,827	800

OBLIGATIONS BY ACTIVITIES

Purchase of fine prints—1954, $696; 1955, $5,827; 1956, $800.

PROGRAM AND PERFORMANCE

The act of August 20, 1912, appropriates out of any money not otherwise appropriated a sum equivalent to interest at 4 percent per annum on a principal fund of $20,000 held in trust by the Treasury under the will of Gertrude M. Hubbard. The amount so appropriated, together with any unexpended balances from prior years, is available each year for the purchase of engravings and etchings to be added to the Gardiner Greene Hubbard collection (37 Stat. 319).

OBLIGATIONS BY OBJECTS

09 Equipment (books and library materials)—1954, $696; 1955, $5,827; 1956, $800.

ANALYSIS OF EXPENDITURES

Obligations incurred during the year (total expenditures)—1954, $696; 1955, $5,827; 1956, $800.

Payment of Interest on Permanent Loan, Library of Congress

Appropriated (estimate) 1955, **$103,361** Estimate 1956, **$103,361**

PROGRAM AND PERFORMANCE

This fund consists of interest on the Library of Congress trust fund, permanent loan.

1. *Acquisition of library materials.*—Provides for materials such as Hispanic, fine arts, American history, and European archival materials related to American history.

2. *Reader and reference services.*—Aids in development, study, and appreciation of music, and maintains Library chairs in American history, fine arts, aeronautics, and geography. In 1954, music accounted for $42,886 and will continue as the major item in 1955 and 1956.

Obligations incurred	411,686,083	448,506,023	487,359,000

PROGRAM AND PERFORMANCE

This fund is used to pay annuities to retired employees or their survivors, to make refunds to former employees who have left the service, and to pay claims for employees who have died before their annuities are paid in full (5 U. S. C., chap. 14, 66 Stat. 622, 722). It is estimated that as of June 30, 1956, there will be 316,718 persons on the annuity roll, compared with 291,745 as of June 30, 1955, and 266,757 as of June 30, 1954. The unfunded liability of the fund amounted to $10,582,994,000 as of June 30, 1954.

Employees Life Insurance Fund, Civil Service Commission

PROGRAM AND PERFORMANCE

This fund finances the payment of group life-insurance premiums to private insurance companies under the Federal Employees' Group Life Insurance Act of 1954 (68 Stat. 736) and administrative expenses incurred by the Civil Service Commission.

There is withheld 25 cents biweekly for each $1,000 of life insurance from the salary of participating employees under age 65. The Government contributes from appropriations or funds used for the payment of salaries, one-half the amount withheld from the employees.

The Civil Service Commission is authorized to arrange with any nonprofit association of Federal employees for the assumption by the fund of any existing life-insurance agreements of such association with its members, retired or otherwise separated from the Federal service. Such obligations may be insured with any qualifying insurance company or companies. Retained earnings are expected to be $1,858,200 by June 30, 1956, but they will be reduced to the extent that the Commission assumes obligations not fully covered by assets of Federal employee associations.

Appropriated 1955, **$1,000** Estimate 1956, **$1,000**

AMOUNTS AVAILABLE FOR OBLIGATION

	1954 actual	1955 estimate	1956 estimate
Appropriation or estimate	$28	$1,000	$1,000
Unobligated balance brought forward	8,975	7,687	4,687
Total available for obligation	9,003	8,687	5,687
Unobligated balance carried forward	−7,687	−4,687	−3,000
Obligations incurred	1,316	4,000	2,687

OBLIGATIONS BY ACTIVITIES

Proceeds from estates of American citizens who die abroad—1954, $1,316; 1955, $4,000; 1956, $2,687.

PROGRAM AND PERFORMANCE

Proceeds of personal estates left by citizens of the United States who die abroad, other than seamen belonging to any vessel, are transmitted to the General Accounting Office to be held in this trust account for the legal claimants (22 U. S. C. 1175).

OBLIGATIONS BY OBJECTS

13 Refunds, awards, and indemnities—1954, $1,316; 1955, $4,000; 1956, $2,687.

ANALYSIS OF EXPENDITURES

Obligations incurred during the year (total expenditures)—1954, $1,316; 1955, $4,000; 1956, $2,687.

NATIONAL CAPITAL HOUSING AUTHORITY

Operation and Maintenance, Properties Aided By or Leased From Public Housing Administration, National Capital Housing Authority

PROGRAM AND PERFORMANCE

Under title II of the District of Columbia Alley Dwelling Act (48 Stat. 930, as amended) the Authority operates 5,828 dwelling units and is developing 3,084 additional low rent dwelling units. All operations under title II are financed by rental income or by loans serviced by rental income and Federal contribution received from the Public Housing Administration. The activities are supervised by the Public Housing Administration and are included in the consolidated estimates of that agency.

Net income from operation of war housing, re-use barracks and of properties transferred to local ownership for low-rent use is paid to the Public Housing Administration. Other low-rent properties will operate at a deficit with the difference between income and expense being met by Federal contribution. The Federal contributions permit the Authority to reduce rents for low income tenants below cost levels.

A. *Statement of sources and application of funds*

	1954 actual	1955 estimate	1956 estimate
FUNDS APPLIED			
To operations:			
Acquisition of assets: Fixed assets	$10,084,266	$7,375,522	$14,611,413
Expenses, excluding depreciation	2,416,164	1,989,788	1,965,802
Payments to Public Housing Administration	266,123	191,619	23,060
Payments to District of Columbia Government		324,640	
Reduction of Public Housing Administration contributions	189,908	85,998	328,818
Increase in selected working capital		610,149	417,290
Total applied to operations	12,956,461	10,577,716	17,346,383
To non-Treasury financing:			
Retirement of temporary loan notes	15,262,000	13,083,000	13,686,000
Retirement of Public Housing Administration loan notes	149,523	212,677	
Retirement of bonds	165,000	189,000	340,000
Interest on notes and bonds:			
Capitalized in land, structures and equipment	169,337	359,000	900,000
Paid from trust receipts (nonoperating expense)	330,842	441,000	600,000

Description	1954 actual	1955 estimate	1956 estimate
1. Retirement and survivor benefit payments	$512,170,656	$546,000,000	$581,100,000
2. Interest payments under Public Law 234	11,595,000	9,551,000	7,500,000
3. Administrative expenses	5,863,069	6,108,000	6,100,000
Obligations incurred	529,628,725	561,659,000	594,700,000

PROGRAM AND PERFORMANCE

Under the railroad retirement system, workers and employers contribute in the form of taxes on wages toward benefits which are payable when workers reach 65, become disabled, or die. These contributions are appropriated to this trust fund and invested in Government securities bearing interest of at least 3 percent.

The status of the fund is as follows:

	1954 actual	*1955 estimate*	*1956 estimate*
Investments in United States securities at beginning of year	$3,142,803,000	$3,345,255,000	$3,488,500,000
Uninvested cash	40,408,204	[1] 72,491,599	49,946,599
Balance of fund at beginning of year	3,183,211,204	3,417,746,599	3,538,446,599
Cash income during the year:			
Taxes	[1] 603,022,785	600,000,000	625,000,000
Payments for military service credits from General Fund	34,852,000		
Interest on investments	98,658,516	101,500,000	106,000,000
Total annual income	736,533,301	701,500,000	731,000,000
Total available during year	3,919,744,505	4,119,246,599	4,269,446,599
Cash outgo during year:			
Benefit payments and claims	484,583,315	565,149,000	576,400,000
Interest payments to the old-age and survivors insurance trust fund	11,595,000	9,551,000	7,500,000
Administrative expenses	5,819,591	6,100,000	6,100,000
Total annual outgo	501,997,906	580,800,000	590,000,000
Investments in United States securities at end of year	3,345,255,000	3,488,500,000	3,626,038,000
Uninvested cash	[1] 72,491,599	49,946,599	53,408,599
Balance of fund at end of year	3,417,746,599	3,538,446,599	3,679,446,599

[1] Excludes $18,790 of tax collections reported as cash income to this fund in 1955.

Income.—The tax base was increased from $300 a month to $350 for each worker by Public Law 746, approved August 31, 1954.

1. *Retirement and survivor benefit payments.*—Payments will increase, both because the fund is maturing, and because laws enacted in 1954 increase the benefits payable Public Law 398 (approved June 16, 1954); Public Law 746 (approved Aug. 31, 1954); and Public Law 761 (approved Sept. 1, 1954).

2. *Interest payments under Public Law 234.*—Interest is paid to the Federal old-age and survivors insurance trust

PROGRAM AND PERFORMANCE

The Railroad Retirement Board administers an unemployment and sickness insurance system and an employment service to find jobs for unemployment benefit recipients. The administrative costs of this system are provided through a permanent appropriation of 0.2 percent of taxable payroll to this fund. As of June 30 of each year, any balance in this fund in excess of $6,000,000 is transferred to the railroad unemployment insurance account in the unemployment trust fund (45 U. S. C. 361).

Public Law 746 (approved Aug. 31, 1954) increased unemployment and sickness benefits, effective July 1, 1954, by establishing a higher benefit-rate schedule, and by providing that the benefit rate for any employee will not be less than half of his regular daily rate of pay for his last railroad job in the base year up to a maximum rate of $8.50. Employer contributions for unemployment and sickness benefits will be paid on employee earnings up to $350 a month instead of $300.

1. *Maintenance of accounts of employee earnings.*—The amounts of insurance payments for unemployment, sickness, and maternity benefits are based upon individual records of earnings and daily wage rates. The principal workload is the processing of compensation items which is carried on simultaneously with a like requirement under the retirement program, the costs being shared proportionately between the two programs. Compensation items were 6,311,723 in 1954 and are estimated at 5,495,300 and 5,740,900 in 1955 and 1956.

2. *Processing and certification for payment of unemployment insurance claims.*—This embraces the work of paying benefits to unemployed railroad workers and conducting an employment service to find jobs for unemployment benefit recipients. Individual claims for unemployment compensation are filed locally and certified for payment through regional offices. The number of claims for unemployment compensation fluctuates widely due to economic changes affecting the railroad industry. Unemployment claims were 2,118,103 in 1954 and are estimated at 2,000,000 and 1,800,000 in 1955 and 1956.

3. *Processing and certification for payment of sickness and maternity claims.*—Unlike unemployment claims, these claims are filed by mail and certified for payment through the regional offices of the Board. The volume of claims for sickness is relatively stable. Sickness claims were 942,271 in 1954 and are estimated at 936,000 in 1955 and 1956.

4. *General administration.*—Except for certain basic activities solely supported and concerned only with this program, general administration costs are shared between this program and the retirement program on a measured basis.

1. Payments of World War I adjusted-service certificates	$191,568	$185,997	$180,000
2. Excess funds covered into Treasury as miscellaneous receipts	500,000		
Obligations incurred	691,568	185,997	180,000

PROGRAM AND PERFORMANCE

The fund, established by appropriation from the general fund of the Treasury, is used to pay adjusted-service certificates issued to veterans of World War I upon maturity or upon demand. The principal of the fund is invested in United States securities and interest income therefrom is also available to make payments. Only a small portion of the certificates remain unpaid (38 U. S. C. 646–647).

Obligations incurred	632,074,966	543,509,000	528,785,000

PROGRAM AND PERFORMANCE

All premiums paid for national service life insurance and the earned interest are deposited to the credit of the national service life insurance fund. This fund bears the liabilities under insurance outstanding including payment of dividends and refunds of unearned premiums to the policyholders. Payments are made to the fund from the national service life insurance appropriation for (*a*) payments on death or disability claims which are traceable to the extra hazards of military or naval service and (*b*) payments on death and disability claims occurring while waiver of national service life insurance premiums was in effect under provisions of the Servicemen's Indemnity and Insurance Act of 1951 (38 U. S. C. 805, 807, 823). As indicated on the statement of obligations by activities, certain obligations of this fund are offset by other claims of the fund.

The fund is operated on a commercial basis to the greatest extent possible consistent with special provisions of law. Administrative expenses are charged to the appropriation General operating expenses, Veterans Administration. The Secretary of the Treasury invests any amounts not needed in current operations (38 U. S. C. 805a, 806). Financial statements for the 1953 calendar year follow:

STATEMENT OF INCOME AND DISBURSEMENTS FOR THE CALENDAR YEAR 1953

INCOME

PROGRAM AND PERFORMANCE

Premiums paid for insurance issued under provisions of the War Risk Insurance Act, as amended, and earned interest are deposited to the credit of this fund and are available for payment of losses, dividends, refunds, and other benefits provided by the act.

The military and naval insurance appropriation pays the fund for (*a*) losses suffered by reason of the extra hazard of military or naval service, and (*b*) the net amount of risk on all United States Government life insurance death and total permanent disability claims occurring while the insured was under waiver of premium provisions of the Servicemen's Indemnity and Insurance Act of 1951. As indicated on the statement of obligations by activities, certain obligations of this fund are offset by other claims of the fund.

The fund is operated on a commercial basis to the greatest extent possible consistent with special provisions of law. Administrative expenses are charged to the appropriation General operating expenses, Veterans Administration. The Secretary of the Treasury invests amounts not needed in current operations (38 U. S. C. 443, 511–558, 805a). Financial statements for the 1953 calendar year follow:

STATEMENT OF INCOME AND DISBURSEMENTS FOR THE CALENDAR YEAR 1953

INCOME

Premiums	$31,826,992
Dividends deposited to accumulate at interest	1,221,831
Interest	50,902,559
Reimbursements from the U. S. Government	924,316
Total income	84,875,698

8. Obligations under reimbursements from non-Federal sources	123		
Obligations incurred	8,321,789	9,000,000	9,000,000

PROGRAM AND PERFORMANCE

Advances, including deposits from purchasers of timber, are received and used for cooperative work in forest investigations, protection and improvement of the national forests, and protection, reforestation, and administration of private lands. Except for deposits by purchasers of national forest timber (16 U. S. C. 576b), this fund is also available for refunds to the contributors of amounts in excess of their share of the costs (16 U. S. C. 498, 572, 572a, 576b, 581; 31 U. S. C. 725s).

SOIL CONSERVATION SERVICE

Payments in Lieu of Taxes and Operation and Maintenance Costs, Water Conservation and Utilization Projects

PROGRAM AND PERFORMANCE

Receipts from leasing of project lands owned by the United States are used for payments in lieu of taxes to local government taxing units and for some operation and maintenance costs of the resettlement features of the projects, until land development for irrigation is completed and farm units are returned to private ownership. Funds not needed for expenses or payments in lieu of taxes are paid into miscellaneous receipts of the Treasury (40 U. S. C. 431–434).

A. *Statement of sources and application of funds*

	1954 actual	1955 estimate	1956 estimate
FUNDS APPLIED			
To operations: Expenses:			
Payments in lieu of taxes	$72	$1,385	$700
Payment of earnings to Treasury	16,356	16,241	
Increase in selected working capital items	1,898		
Total applied to operations	18,326	17,626	700
To financing: Increase in Treasury cash			1,170
Total funds applied	18,326	17,626	1,870
FUNDS PROVIDED			
By operations: Income: Land leasing	16,719	10,924	1,870
By financing: Decrease in Treasury cash	1,607	6,702	
Total funds provided	18,326	17,626	1,870
EFFECT ON TRUST EXPENDITURES			
Funds applied to operations	$18,326	$17,626	$700
Funds provided by operations	16,719	10,924	1,870
Net effect on trust expenditures	1,607	6,702	−1,170

Obligations incurred	5,082,355	5,678,500	5,682,000

OBLIGATIONS BY ACTIVITIES

Providing technical and other assistance to farmers and ranchers in participating counties pursuant to agreements executed with individual State and county committees—1954, $5,082,355; 1955, $5,678,500; 1956, $5,682,000.

PROGRAM AND PERFORMANCE

Individual county committees may apply for technical and other assistance in the planning and installation of conservation practices. Upon such application, amounts are allotted to the Soil Conservation Service from the appropriation "Agricultural conservation program" to provide farmers and ranchers with such assistance on a cost sharing basis under the agricultural conservation program. This assistance is over and above that which would be furnished under the regular Soil Conservation Service program to soil conservation districts.

(*f*) Cottonseed		37,275	37,275
Obligations incurred	12,148,991	12,172,600	12,463,600

PROGRAM AND PERFORMANCE

A permissive inspection and grading service for farm products is provided upon application of interested parties. This service is supported primarily by fees and, to a limited extent, by direct appropriations made to the Agricultural Marketing Service. In fiscal year 1955 only the permissive inspection and grading services on fresh fruits and vegetables, poultry and eggs, and naval stores are partially supported by appropriations. This schedule reflects the amount of fees received and the payment of salaries and other necessary expenses (7 U. S. C. 91–99; 1621–1627).

FARMERS' HOME ADMINISTRATION

State Rural Rehabilitation Funds, Farmers' Home Administration, Department of Agriculture

PROGRAM AND PERFORMANCE

These funds are being administered through the Farmers' Home Administration, under agreements with 42 individual States for use in carrying out the purposes of titles I and II of the Bankhead-Jones Farm Tenant Act, as amended. In these States, production-and-subsistence type loans are made at 5 percent interest. Also, in some States, farm-ownership type loans are made from these funds and insured under the regular Farmers' Home Administration insured-loan program at 3½ percent plus a 1 percent insurance charge. The entire program assets of the 42 States in the program are being administered by the Farmers' Home Administration, with the exception of $2,662,591 which was returned to and held by several States for use in rural rehabilitation.

It is estimated that a total of 4,940 loans, amounting to $13,400,000, will be made in 1956, 4,780 loans, amounting to $13,000,000, in 1955, compared with 5,077 in 1954, amounting to $10,027,889.

A. *Statement of sources and application of funds*

	1954 actual	1955 estimate	1956 estimate
FUNDS APPLIED			
To operations:			
Acquisition of assets:			
Loans made	$10,027,889	$13,000,000	$13,400,000
Acquired security or collateral	7,438		
Judgments	7,623	5,000	4,000

OBLIGATIONS BY ACTIVITIES

Description	1954 actual	1955 estimate	1956 estimate
1. Special statistical studies:			
(*a*) Age and citizenship searches	$357,704	$345,643	$321,080
(*b*) Special statistical work	694,082	644,701	598,920
Obligations incurred	1,051,786	990,344	920,000

PROGRAM AND PERFORMANCE

The Bureau performs special statistical work, at cost, for individuals and firms requesting such data. In addition, the Bureau furnishes age and citizenship data from past census records on a fee basis. Funds received for these purposes are used to pay expenses incurred in performance of such work (49 Stat. 293; 46 Stat. 21).

OBLIGATIONS BY ACTIVITIES

Installation, operation, and maintenance of air-navigation facilities—1954, $52,037; 1955, $54,399.

PROGRAM AND PERFORMANCE

This fund represents advance payments from States, counties, and municipalities for the establishment, maintenance, and operation of air-navigation aids, as may be required in the public interest (49 U. S. C. 452).

For fiscal year 1956, language has been included under the heading Operation and regulation, Civil Aeronautics Administration, to provide for crediting to this appropriation funds received for the maintenance and operation of all air-navigation facilities. Advance payments for construction and installation of air-navigation aids will continue to be credited to this fund.

ANALYSIS OF EXPENDITURES

	1954 actual	1955 estimate	1956 estimate
Obligated balance brought forward	$531,632	$796,277	$1,000,000
Obligations incurred during the year	2,204,157	3,390,396	1,000,000
	2,735,789	4,186,673	2,000,000
Obligated balance carried forward	−796,277	−1,000,000	
Total expenditures	1,939,512	3,186,673	2,000,000

Allocations Received From Other Appropriation Accounts

NOTE.—Obligations incurred under allocations from other appropriations are shown in the schedules of the parent appropriations, as follows:
"Advances from Greece and Turkey for assistance, Executive Office of the President" (trust fund).
"Cooperative work, Forest Service," Department of Agriculture (trust fund).

NATIONAL BUREAU OF STANDARDS

Gifts and Bequests, National Bureau of Standards

Appropriated (estimate) 1955, **$68,400** Estimate 1956, **$46,000**

AMOUNTS AVAILABLE FOR OBLIGATION

	1954 actual	1955 estimate	1956 estimate
Appropriation or estimate	$80,648	$68,400	$46,000
Unobligated balance brought forward	8,604	53,608	22,400
Reimbursements from non-Federal sources	9,200		
Total available for obligation	98,452	122,008	68,400
Unobligated balance carried forward	−53,608	−22,400	
Obligations incurred	44,844	99,608	68,400

NOTE.—Reimbursements from non-Federal sources are for the purpose of aiding or facilitating the work of the Bureau (15 U. S. C. 278c).

OBLIGATIONS BY ACTIVITIES

Description	1954 actual	1955 estimate	1956 estimate
1. Research	$26,261	$86,100	$64,517
2. Development	3,595	6,625	3,883
3. Testing, calibration, and specifications	9,072	2,799	
4. General technical services	5,916	4,084	
Obligations incurred	44,844	99,608	68,400

PROGRAM AND PERFORMANCE

This trust fund is maintained to account for gifts or bequests for the purpose of aiding or facilitating the work of the National Bureau of Standards (15 U. S. C. 278c).

OBLIGATIONS BY OBJECTS

07 Other contractual services—1954, $44,844; 1955, $99,608; 1956, $68,400.

ANALYSIS OF EXPENDITURES

	1954 actual	1955 estimate	1956 estimate
Obligated balance brought forward	$9,292	$8,849	$16,457
Obligations incurred during the year	44,844	99,608	68,400
	54,136	108,457	84,857
Reimbursements	−9,200		
Obligated balance carried forward	−8,849	−16,457	−12,857
Total expenditures	36,087	92,000	72,000

Special Statistical Work, National Bureau of Standards

Appropriated (estimate) 1955, **$500** Estimate 1956, **$500**

AMOUNTS AVAILABLE FOR OBLIGATION

	1954 actual	1955 estimate	1956 estimate
Appropriation or estimate	$129	$500	$500
Unobligated balance brought forward	2,172	2,172	
Total available for obligation	2,301	2,672	500
Unobligated balance carried forward	−2,172		
Unobligated balance, covered into Treasury as miscellaneous receipts		−848	
Obligations incurred	129	1,824	500

OBLIGATIONS BY ACTIVITIES

General services—1954, $129; 1955, $1,824; 1956, $500.

PROGRAM AND PERFORMANCE

Special statistical work is financed by individuals, firms, and associations making requests for data available from the Bureau (64 Stat. 823).

Obligations incurred	313	900	900

OBLIGATIONS BY ACTIVITIES

Personal needs of indigent patients (obligations incurred)—1954, $313; 1955, $900; 1956, $900.

PROGRAM AND PERFORMANCE

Donations are received and used for patients' benefits as provided by the donors (35 Stat. 592; 48 Stat. 1233, sec. 20).

OBLIGATIONS BY OBJECTS

08 Supplies and materials (obligations incurred)—1954, $313; 1955, $900; 1956, $900.

ANALYSIS OF EXPENDITURES

Obligations incurred during the year (total expenditures)—1954, $313; 1955, $900; 1956, $900.

SOCIAL SECURITY ADMINISTRATION

Salaries and Expenses, Bureau of Old-Age and Survivors Insurance, Social Security Administration

Construction, Bureau of Old-Age and Survivors Insurance, Social Security Administration

NOTE.—The supporting detail of the above items are shown in the Department of Health, Education, and Welfare chapter in part II.

MISCELLANEOUS

Consolidated Working Fund, Department of Health, Education, and Welfare (Trust Fund)

ANALYSIS OF BALANCES AND EXPENDITURES

	1954 actual	1955 estimate	1956 estimate
Obligated balance brought forward	$1,642	$3,410	$7,400
Adjustment in obligations of prior years	47		
Unobligated balance, estimated savings	−3,061		
Obligated balance carried forward	−3,410	−7,400	
Total expenditures	−4,782	−3,990	7,400

NOTE.—The supporting schedules for this consolidation will be found in detail in the working funds section of this chapter.

DEPARTMENT OF THE INTERIOR

BONNEVILLE POWER ADMINISTRATION

Construction of Electric Transmission Lines and Substations, Contributions, Bonneville Power Project

Appropriated (estimate) 1955, **$56,500**

AMOUNTS AVAILABLE FOR OBLIGATION

	1954 actual	1955 estimate	1956 estimate
Appropriation or estimate	$68,464	$56,500	
Unobligated balance brought forward	75,000	131,700	
Total available for obligation	143,464	188,200	
Unobligated balance carried forward	−131,700		
Obligations incurred	11,764	188,200	

OBLIGATIONS BY ACTIVITIES

Construction—1954, $11,764; 1955, $188,200.

PROGRAM AND PERFORMANCE

Various public and private utilities advance funds to provide facilities which are not provided by the agency under its customer service policy. These facilities are of benefit to the Government as well as to the customers and serve to promote greater efficiency on the system, reduce loads on existing facilities, and improve service to customers (50 Stat. 736).

OBLIGATIONS BY OBJECTS

07 Other contractual services—1954, $11,764; 1955, $188,200.

ANALYSIS OF EXPENDITURES

Obligations incurred during the year (total expenditures)—1954, $11,764; 1955, $188,200.

PROGRAM AND PERFORMANCE

The Secretary of the Interior accepts and uses donated moneys for purposes of the National Park and monument system (16 U. S. C. 6). Donations from 28 contributors were received during fiscal year 1954. A donation of $500,000 was received during fiscal year 1955 from a private foundation with the stipulation that it be matched with an equal amount of Federal funds for the purpose of acquiring private inholdings within areas of the National Park system. Federal funds to match this donation were appropriated in the Supplemental Appropriation Act, 1955. The donor has indicated his willingness to make another donation of $500,000 for fiscal year 1956 on the same terms, and there has been included a matching amount in the 1956 estimate for the appropriation, Construction, National Park Service for acquisition of lands and water rights.

DEPARTMENT OF JUSTICE

FEDERAL PRISON SYSTEM

Commissary Funds, Federal Prisons

PROGRAM AND PERFORMANCE

Federal Prison Commissaries sell cigarettes, tobaccos, candies, toiletries, magazines, hobby-craft materials, and educational supplies to inmates. Sales in 1954 totaled $1,370,438, an increase over last year of $105,151. Since 1931 the earned surplus has amounted to $796,882 from which recreational equipment and expansion of facilities and programs have been financed. Also, from these earnings, loans are made to deserving and needy prisoners at the time of release as an aid to their rehabilitation, and inmates are paid to assist in the operation of institution commissaries (18 U. S. C. 4284).

A. *Statement of sources and application of funds*

Alien Property Fund, World War II

PROGRAM AND PERFORMANCE

Seized property in the United States, of the governments or nationals of Germany and Japan, vested in the name of the Attorney General of the United States is prepared for liquidation or sale as soon as practicable. During fiscal year 1954, $60,000,000 was transferred to the war claims fund and it is estimated that $15,000,000 additional will be transferred in 1955. Claims and settlements from such property operations are anticipated to be $5,400,000 in 1955 and $6,300,000 in 1956.

Alien Property Fund, Philippines, World War II

PROGRAM AND PERFORMANCE

Enemy-owned property in the Philippines is administered for the Philippine Government by the Office of Alien Property in the same manner as it administers the funds for World War I and World War II properties (Executive Order 10254).

During the 1954 fiscal year no funds were returned to the Republic of the Philippines. However, it is anticipated that $500,000 will be returned in 1955 and $200,000 returned in 1956. The following statements include the United States dollar equivalent of local currencies of the Philippines which become available without dollar purchase.

A. *Statement of sources and application of funds*

	1954 actual	1955 estimate	1956 estimate
FUNDS APPLIED

7. Tabulations of survey of land-mobile radio services		5,800	
Obligations incurred	58,151	197,180	93,836

PROGRAM AND PERFORMANCE

Funds are advanced by parties outside the Federal Government to finance special statistical studies requested. During 1955 and 1956 the Bureau will collect and analyze store inventory prices for the American Retail Federation; prepare consumer expenditure tabulations for American Petroleum Institute, Roosevelt Foundation and University of Pennsylvania; prepare consumer price index for the city of Milwaukee, Wis.; conduct a survey of housing characteristics for Aluminum Window Manufacturers Association, Ponderosa Pine Woodwork Association and Structural Clay Products Institute; prepare tabulations of a survey of landmobile radio services for Radio-Electronic-Television Manufacturers Association; and conduct a survey to measure expenditures on supplementary employee remuneration and benefits for the National Bureau of Economic Research, Inc. (29 U. S. C. 9a, 9b; 53 Stat. 581).

OBLIGATIONS BY ACTIVITIES

Payment to beneficiaries—1954, $2,204,995; 1955, $2,322,000; 1956, $2,522,000.

PROGRAM AND PERFORMANCE

This fund is used primarily for the payment of annuities to retired Foreign Service officers. It is also used for the refund of contributions made by certain officers who leave the Foreign Service before retirement. The fund is maintained through (1) contribution of 5 percent of the basic annual salaries of all Foreign Service officers; (2) interest on investments; and (3) appropriated funds. It is estimated that approximately 500 annuitants will be paid retirement benefits from this fund during 1956.

The unfunded liability of the fund amounted to $30,706,000 as of December 31, 1953. It is contemplated that coverage of additional employees will increase this amount by more than $20,000,000.

A 1956 estimate of appropriation is proposed for later transmission in the Department of State chapter of part II.

OBLIGATIONS BY OBJECTS

Object classification	1954 actual	1955 estimate	1956 estimate

OBLIGATIONS BY ACTIVITIES

Description	1954 actual	1955 estimate	1956 estimate
1. Benefit payments	$3,275,556,453	$4,300,000,000	$4,800,000,000
2. Construction	63,344	841,996	22,751,000
3. Administration	89,426,272	96,208,725	115,854,467
4. Refund of excess taxes collected	40,500,000	51,000,000	51,000,000
Obligations incurred	3,405,546,069	4,448,050,721	4,989,605,467

PROGRAM AND PERFORMANCE

Under the Federal old-age and survivors insurance system, workers and their employers make annual contributions in the form of taxes on wages toward the benefits which will be payable when the worker reaches 65 or when he dies. An amount equal to the annual contributions, including interest and penalties, is appropriated to this trust fund for benefit payments and administrative expenses, part of which is being used for a building to house the Bureau of Old-Age and Survivors Insurance. The excess of income over outgo and annual interest are invested in Government securities (42 U. S. C. 401).

The status of the fund is as follows:

	1954 actual	*1955 estimate*	*1956 estimate*
Investments in United States securities at beginning of year (par value)	$17,814,387,250	$19,337,092,250	$21,300,000,000
Cash (unexpended balance)	548,761,653	702,724,903	67,105,481
Balance of fund at beginning of year	18,363,148,903	20,039,817,153	21,367,105,481
Cash income during year:			
From taxes	4,537,269,800	5,190,000,000	6,175,000,000
Interest on investments	450,503,883	464,223,909	493,801,286
Deposit by States	93,152,720	120,000,000	130,000,000
Sale of periodicals	67,648	70,000	70,000
Total annual income	5,080,994,051	5,774,293,909	6,798,871,286
Increase in the fund resulting from purchase of securities below par, including interest	434,599	287,836	287,836
Cash outgo during year:			
For benefit payments	3,275,556,453	4,300,000,000	4,800,000,000

Obligations incurred	2,482,539	2,500,000	2,500,000

OBLIGATIONS BY ACTIVITIES

Payment of claims—1954, $2,482,539; 1955, $2,500,000; 1956, $2,500,000.

PROGRAM AND PERFORMANCE

The Foreign Claims Settlement Commission, successor to the commission established by the Settlement of Mexican Claims Act of 1942 (22 U. S. C. 661) adjudicates claims of American nationals against the Government of Mexico. To pay the claims, the act provided for a Mexican claims fund into which would be deposited $40,533,658.95, consisting of $40,000,000 from the Government of Mexico (payable in 16 annual installments) and $533,658.95 appropriated by the Congress of the United States. Currently there are approximately 2,800 accounts maintained pursuant to awards of the Commission.

OBLIGATIONS BY OBJECTS

13 Refunds, awards, and indemnities—1954, $2,482,539; 1955, $2,500,000; 1956, $2,500,000.

ANALYSIS OF EXPENDITURES

Obligations incurred during the year (total expenditures)—1954, $2,482,539; 1955, $2,500,000; 1956, $2,500,000.

National Defense Conditional Gift Fund, Treasury

AMOUNTS AVAILABLE FOR OBLIGATION

Appropriation or estimate (obligations incurred)—1955, $500,527.

OBLIGATIONS BY ACTIVITIES

Payments to other accounts (atomic energy)—1955, $500.527.

PROGRAM AND PERFORMANCE

The Secretary of the Treasury accepts on behalf of the United States any conditional gifts of money or other intangible property to be used for a particular defense purpose. Such intangibles other than money are converted at the best terms available. The moneys held in trust are paid to such of the various appropriation accounts as will best effectuate the intent of the donors (68 Stat. 566).

OBLIGATIONS BY OBJECTS

11 Grants, subsidies, and contributions—1955, $500,527.

ANALYSIS OF EXPENDITURES

Obligations incurred during the year (total expenditures)—1955, $500,527.

OBLIGATIONS BY ACTIVITIES

Payment of claims—1955, $400,000.

PROGRAM AND PERFORMANCE

The Foreign Claims Settlement Commission, successor to the commission in the Department of State established by the International Claims Settlement Act of 1949 (64 Stat. 12), adjudicates claims of the United States and American nationals against various foreign governments and certifies awards to the Secretary of the Treasury for payment out of certain funds received for settlement of the claims. This fund was established to receive certain funds from the Government of Panama under an agreement dated October 11, 1950. Currently there are approximately 100 accounts maintained pursuant to awards of the Commission which will be liquidated by the end of fiscal year 1955.

OBLIGATIONS BY OBJECTS

13 Refunds, awards, and indemnities—1955, $400,000.

ANALYSIS OF EXPENDITURES

Obligations incurred during the year (total expenditures)—1955, $400,000.

Payment of Pre-1934 Bonds of the Government of the Philippines

Appropriated (estimate) 1955, **$145,000** Estimate 1956, **$145,000**

Payment of principal and interest on pre-1934 Philippine bonds—1954, $1,204,484; 1955, $143,471; 1956, $145,000.

PROGRAM AND PERFORMANCE

This trust account was established by the act of March 24, 1934 (22 U. S. C. 1393 (g) (5)), as amended by the Philippine Independence Act of 1939, for the purpose of paying principal and interest on outstanding bonds of the Philippines, its provinces, cities, and municipalities, issued prior to May 1, 1934, under authority of acts of Congress. The value of the outstanding bonds is $6,466,850.

OBLIGATIONS BY OBJECTS

Federal Reserve Bank of St. Louis

INTRODUCTION TO PART IV

Part IV of the budget contains special analyses of budget data and Federal programs. These analyses supplement material appearing in other parts of the budget. Most of the analyses include explanatory material which expands and elaborates these introductory notes.

FEDERAL GOVERNMENT RECEIPTS FROM AND PAYMENTS TO THE PUBLIC

Special Analysis A presents information on the flow of money between the public and the Federal Government as a whole, including both Federal funds and trust (and deposit) funds. Major intragovernmental and noncash transactions are excluded. This analysis also presents a reconciliation with the concept of "cash deposits and withdrawals" as used in the Daily Statement of the United States Treasury.

ANALYSIS OF THE BUDGET BY FUNCTION AND AGENCY

Special Analysis B gives the details for the functional breakdown of authorizations and expenditures. It is compiled by regrouping the figures found in the chapter summaries of part II. The code numbers used in the chapter summaries are the key to the grouping found in this analysis.

DETAILS AND EXPLANATION OF BUDGET RECEIPTS

Special Analysis C presents details on the budget receipts summarized in table 1. It includes a statement explaining the receipt estimates, together with a table giving a classification of receipts by source. The figures include receipts of *both* the general fund and the special funds. The text pertaining to taxes, customs, and refunds is prepared by the Treasury Department.

CHARACTER ANALYSES OF BUDGET EXPENDITURES

Special Analysis D analyzes budget expenditures in terms of the duration and nature of the benefits derived. Expenditures of an *investment* type are shown in two major categories—one for acquisition or improvement of Federal assets, and the other for developmental purposes such as additions to State, local, and private assets, and expenditures for research, education, and health. Expenditures yielding *current* benefits are also grouped in two major categories—one for aids and services to special groups and the other for the remaining current expenditures. Receipts of public enterprise funds are classified according to the same categories as the corresponding expenditures. No adjustments are made for depreciation, obsolescence, allowances for potential losses on loans, and other items not reflected in current expenditure data.

Special Analysis E gives detailed information on the major Federal programs involving direct loans, loan insurance, and loan guaranties. It provides data on commitment authority, commitments, expenditures, repayments, and outstanding loans, guaranties, and insurance.

Special Analysis F provides an analysis of the construction activities of the Federal Government. It presents detailed information on direct Federal public works and Federal grants and loans for public works. It gives summary information on Federal financial assistance for certain international public works, semipublic works, and construction by private business and individuals.

Special Analysis G brings together information on those items in the budget which are for Federal aid to State and local governments. It includes grants-in-aid, shared revenues, and loans (including repayable advances).

Special Analysis H shows the amounts devoted to research and development purposes. It includes both basic and applied research and the construction of research facilities.

FEDERAL ECONOMIC STATISTICAL PROGRAMS

Special Analysis I presents the current level of and recommended budget for the major economic statistical programs of the Federal Government.

SELECTED INVESTMENT AND INTERFUND TRANSACTIONS

Special Analysis J sets forth certain investment and interfund transactions which are not reflected in the expenditures or receipts shown elsewhere in the budget. The first two groups of these are the investments by revolving and trust funds in United States Government securities and the net borrowing or repayment of debt to the public by wholly owned corporations. The totals of these transactions, while not a part of budget expenditures or receipts, affect the financing requirements of the Government as a whole, and therefore are carried forward from this analysis to table 3 in part I. The other group of transactions included in this table constitutes the payments by the revolving funds to the general fund, representing the return of capital or the distribution of earnings; such payments are excluded from budget expenditures and budget receipts in parts I and II of the budget in order to avoid inflating both sides of the budget. They are set forth here to make the record complete.

HISTORICAL COMPARISON OF BUDGET FIGURES

Special Analysis K presents a 10-year comparison of budget receipts and expenditures. The receipts are classified by source and the expenditures by function. Technical notes set forth the changes in classifications since the 1955 budget. As in Special Analysis B, the code numbers appearing in the chapter summaries of part II are the key to the grouping of items in the expenditure section of this analysis.

Special Analysis A

FEDERAL GOVERNMENT RECEIPTS FROM AND PAYMENTS TO THE PUBLIC

This analysis presents information on the flow of money between the public and the Federal Government as a whole.

By definition, the public includes individuals, banks, other private corporations and associations, and unincorporated businesses. The Federal Reserve System, the United States Postal Savings System, State and local governments, foreign governments, and international organizations are also defined as part of the public.

Federal Government receipts and payments include the transactions of trust and deposit funds as well as Federal funds (for definitions of funds see introductions to part I and part III, pages A3 and 1036). They also include certain transactions, as reflected in the records of the United States Treasury, of Government-sponsored enterprises, mainly the Federal home loan banks, Federal Deposit Insurance Corporation, Federal land banks, and the banks for cooperatives. Major intragovernmental and noncash transactions are excluded in the consolidation of Federal transactions.

Use and limitations.—This analysis is significant for many purposes, particularly in helping to evaluate the impact of Federal financial transactions on the economy.

It should be recognized, however, that not only cash flows, but also many other Federal financial activities have important economic effects. For example, the rapid expansion in new appropriations immediately after the attack on Korea stimulated a rise in business activity long before the authorized funds were paid to the public. Likewise, the enactment of a tax measure may affect business activity long before the cash flows involved take place between the Federal Government and the public. Federal guaranties and insurance of private loans (summarized in special analysis E) also influence the economy, even though they normally have little or no impact on Federal receipts from and payments to the public. Certain other Government contractual arrangements, such as the program for the lease-purchase of Government buildings, have economic effects which cannot be measured by the Government payments made in any one year.

Consolidated cash statement.—Data on Federal receipts from and payments to the public represent, in effect, a consolidated cash statement of Federal transactions with the public other than borrowing operations. Major intragovernmental transactions which are reported as both expenditures and receipts in other tables in the budget are eliminated in this special analysis. Noncash items which represent accrued obligations of the Government to make payments in the future are also eliminated in the year of the accrual but are added to expenditures in subsequent years as actual payments are made. Receipts of the Government from exercise of monetary authority (mostly seigniorage on silver) are also excluded, because they do not represent cash received from the public.

The amounts shown for intragovernmental transactions in the following table consist of: (1) expenditures from Federal funds which are receipts in other Federal funds, such as interest on capital investment paid by wholly owned Government corporations to the Treasury; (2) expenditures from Federal funds which are receipts in trust funds, such as the interest paid on United States securities held by trust funds and the payment of the Government to the civil service retirement and disability fund; (3) expenditures from trust funds which are receipts in Federal funds, such as the payment by the old-age and survivors insurance trust fund to the Treasury for expenses incurred mainly in the collection of social security taxes; and (4) expenditures from trust funds which are receipts in other trust funds, such as the payment made by the District of Columbia to the civil service retirement and disability fund.

DERIVATION OF FEDERAL GOVERNMENT RECEIPTS FROM AND PAYMENTS TO THE PUBLIC

[In millions]

Description	1954 actual	1955 estimate	1956 estimate
FEDERAL RECEIPTS FROM THE PUBLIC			
Budget receipts (from table 1)	$64,655	$59,000	$60,000
Trust fund receipts (from table 8)	9,155	9,804	11,283
Less:			
Intragovernmental transactions	2,101	2,111	2,455
Receipts from exercise of monetary authority	73	45	35
Equals: Federal receipts from the public	71,636	66,649	68,793
FEDERAL PAYMENTS TO THE PUBLIC			
Budget expenditures (from table 1)	67,772	63,504	62,408
Trust fund expenditures (from table 8)	7,204	8,404	8,845
Change in clearing account for outstanding checks, etc. (from table 3)	46	64	−67
Less:			
Intragovernmental transactions	2,101	2,111	2,455
Noncash debt transactions (net)	619	740	545
Plus: Net expenditures or receipts (−) of Government-sponsored enterprises	−435	−96	49
Equals. Federal payments to the public	71,868	69,026	68,235
Excess of Federal receipts from the public			558
Excess of Federal payments to the public	232	2,377	

The noncash items which are eliminated in the above table consist of: (1) interest accrued on savings bonds which will not be paid in cash until the bonds are redeemed; and (2) United States securities issued in payment of an obligation which will be redeemed for cash at a later date. When the savings bonds are redeemed, the amount of interest actually paid to the public is then included. Likewise, when the noncash securities are redeemed (for example, Armed Forces leave bonds issued in 1947 which are still being cashed), these cash payments are then included in payments to the public.

Operating payments and receipts of Government-sponsored enterprises are included on a net basis in payments to the public. Generally, these enterprises obtain funds for their operations through direct borrowing or through cashing United States securities they hold; they apply the net income received in their regular operations to the redemption of their obligations in the market and to the purchase of United States securities.

Complete detail of all the individual adjustment items in the above table can be obtained upon request from the Bureau of the Budget.

Reconciliation with Treasury cash deposits and withdrawals.—The daily statement of the United States Treasury presents, on a daily basis, a consolidated cash statement of Treasury operating transactions. These published figures for Treasury cash deposits and withdrawals differ conceptually from Federal receipts from and payments to the public.

RECONCILIATION OF FEDERAL GOVERNMENT RECEIPTS FROM THE PUBLIC WITH TREASURY CASH DEPOSITS

[In millions]

Description	1954 actual	1955 estimate	1956 estimate
Federal receipts from the public	$71,636	$66,649	$68,793
Plus:			
Receipts from exercise of monetary authority	73	45	35
Treasury receipts transferred from Government agencies' bank balances outside the Treasury	13	18	16
Adjustment in actual year for different reporting bases	+59		
Equals: Treasury cash deposits	71,781	66,711	68,845

As shown above, Treasury cash deposits include receipts from the exercise of monetary authority and receipts from Government agencies which are paid with funds not held by the Treasurer of the United States (for example, funds to the credit of a Government agency in a commercial bank). By definition, both of these items are not Federal Government cash receipts from the public.

For the fiscal year 1954, the daily statement carried figures on Treasury cash deposits and withdrawals within a few days after the end of the year. To accomplish this rapid reporting of the year's transactions, the Treasury Department uses a different system from that which it utilizes in reporting budget receipts and expenditures. Hence, the above table includes an adjustment for differences in reporting.

A reporting adjustment is also necessary to reconcile Federal payments to the public with cash withdrawals from the Treasury. This adjustment is of the same amount as that used in the above table. It is the same amount because the excess of cash deposits over withdrawals (or vice versa) affects the Government's cash balance and/or outstanding debt, and these two basic accounts are the same for each reporting system.

RECONCILIATION OF FEDERAL GOVERNMENT PAYMENTS TO THE PUBLIC WITH TREASURY CASH WITHDRAWALS

[In millions]

Description	1954 actual	1955 estimate	1956 estimate
Federal payments to the public	$71,868	$69,026	$68,235
Less payments to the public not clearing through accounts of the United States Treasurer:			
From cash held outside Treasury [1]	−270	−73	−16
From proceeds of sales in the market of United States securities and agency obligations (net) [2]	264		
Adjustment in actual year for different reporting bases	+59		
Equals: Cash withdrawals from Treasury	71,933	69,099	68,251

[1] Represents change in Government agencies' bank balances outside Treasury minus payments made from those balances to Treasury receipt accounts. Minus sign (−) indicates increase in cash balances.

[2] Includes only net sales of Government agencies and trust funds which were not made through the Treasurer of the United States.

Federal payments to the public differ from cash withdrawals from the Treasury by including payments made from Government accounts not in the name of the Treasurer of the United States. For example, if the Government cash balances outside the Treasury decrease, Federal payments to the public are greater than cash withdrawals from Treasury; if such balances rise, Federal payments to the public are smaller than cash withdrawals from Treasury.

Federal cash borrowing from the public.—In the long run, the amount of Federal cash borrowing (or repayment of borrowing) from the public is affected primarily by the excess of payments to the public over receipts. Funds obtained in one year through Government borrowing are sometimes not utilized until the early part of the next year, and thereby affect the annual changes in the Government's cash balances. Receipts from the exercise of monetary authority (mostly seigniorage on silver) reduce the needs for cash borrowing by a relatively small degree.

FEDERAL GOVERNMENT CASH BORROWING FROM THE PUBLIC

[In millions]

Description	1954 actual	1955 estimate	1956 estimate
Excess of Federal payments to the public, or receipts (−)	$232	$2,377	−$558
Increase in cash balances, or decrease (−)	2,353	−1,711	
Less receipts from exercise of monetary authority	73	45	35
Equals: Net Federal cash borrowing from the public, or repayment of borrowing (−)	2,512	621	−593

The figures shown in the above table for Federal cash borrowing from the public include the net borrowing of the Treasury through sales and redemptions of United States Government securities to the public. They also include the net borrowing of Government agencies and Government-sponsored enterprises through sales of their own securities in the market. Excluded, however, are changes in the public debt which do not represent direct cash borrowing from the public. Major examples of these exclusions are (1) issuance of United States Government securities to Government trust funds, such as the old-age and survivors insurance trust fund, and (2) the addition to the public debt of certain noncash transactions such as the amount of interest accruing on savings bonds which is not paid in cash until the bonds are redeemed.

RECONCILIATION OF CHANGE IN PUBLIC DEBT WITH FEDERAL GOVERNMENT CASH BORROWING FROM THE PUBLIC

[In millions]

Description	1954 actual	1955 estimate	1956 estimate
Increase in public debt (from table 3)	$5,189	$3,040	$1,700
Plus increase or decrease (−) in obligations of Government enterprises held by the public (net):			
Wholly owned enterprises	−14	754	827
Government-sponsored enterprises	11	21	175
Less:			
Investments of Government agencies, trust funds, and Government-sponsored enterprises in public debt securities	2,055	2,455	2,751
Net increase in public debt from noncash transactions	619	740	545
Equals: Net Federal cash borrowing from the public, or repayment of borrowing (−)	2,512	621	−593

Federal receipts from the public by major source and payments to the public by major program.—The table on the following page presents information comparable to that which has appeared in annual budget documents for the past 6 years. Supporting schedules showing the detailed derivation of the figures in this table can be obtained upon request from the Bureau of the Budget.

Special Analysis B

ANALYSIS OF BUDGET BY FUNCTION AND AGENCY

This special analysis supplies data on new obligational authority by function, and provides supporting detail for the expenditures included in the tables of the budget message, and in tables 1 and 7 of part I.

For each function and subfunction, data are listed by agencies. In order to find the appropriation items which make up the amounts shown for the agency, it is necessary to look in the chapter summary for that agency. Each entry in the chapter summary is coded to indicate the subfunction in which it is classified.

The functional classification used in this budget summarizes authorizations and expenditures according to the major purposes of the Government. Each function brings together programs which are related to a broad purpose, regardless of the agency responsible. Each major function is divided into several subfunctions which are groups of programs directed to a selected field within the broader category. Changes made in the classification this year are specified in a note in special analysis K.

For purposes of this classification each appropriation account and each special fund, revolving fund, and management fund is treated as a unit. Exceptions are made, and accounts are split into two or more categories, in only nine cases. This necessarily involves some close decisions in borderline cases, and it means that programs with secondary significance for some major functions will be included in another category because another purpose predominates in the particular appropriation. Thus, to secure a comprehensive total of all Government programs related to education, for example, it would be necessary to provide a special tabulation, counting in this category some appropriations which might also be relevant to other categories.

For each major function and subfunction, expenditures are shown on a gross basis, with a deduction for receipts of public enterprise funds to arrive at net budget expenditures for the function or subfunction.

Whereas this special analysis presents both authorizations and expenditures for major functions, subfunctions and agencies over a 3-year period, special analysis K shows expenditures for the major functions and subfunctions over a 10-year period. Special analysis A shows payments to the public, classified by major function. The functional categories are also used in the analyses summarizing Federal activities in public works and other construction, Federal aid to State and local governments, and Federal research and development programs.

Special Analysis C

EXPLANATION OF THE ESTIMATES OF RECEIPTS

The estimates of receipts from taxes and customs for the current and ensuing fiscal years are prepared in December of each year by the Treasury Department. In general, the estimates of miscellaneous receipts are prepared by the agency depositing the receipts in the Treasury. In accordance with the practice of previous years, the following discussion deals only with estimates based on existing legislation. The estimates assume a rise in business activity, personal income, and corporate profits from present levels.

BUDGET RECEIPTS

Actual budget receipts amounted to $64,655 million in the fiscal year 1954. Estimated receipts in 1955 and 1956 are expected to decline to $58,810 million and $57,737 million, respectively, principally because of the greatly enlarged revenue effect of changes in tax laws. The effect of the across-the-board reduction in individual income tax rates effective January 1, 1954, will be much greater in 1955 and 1956 than in fiscal year 1954. The termination of the excess profits tax on January 1, 1954, which had no appreciable effect in the fiscal year 1954, reduces receipts from this source to a small amount in the fiscal year 1955 and to a negligible magnitude in 1956. The Excise Tax Reduction Act of 1954, effective April 1, 1954, did not have an appreciable effect on receipts in the fiscal year 1954. Receipts in the fiscal years 1955 and 1956 will reflect the full effect of this legislation. The fiscal year 1955 will be the first year affected by the general revision of the Internal Revenue Code enacted in 1954.

Other factors will reduce receipts in the fiscal year 1956 below fiscal year 1955 levels. Reductions in the corporation income tax and certain excise taxes on April 1, 1955, are scheduled under present law. Receipts from the corporation income tax in fiscal year 1956 will not be augmented by the speedup in payments affecting receipts in the immediately preceding 5 years under the Revenue Act of 1950.

FISCAL YEAR 1955

Actual receipts in the fiscal year 1954 and estimated receipts in the fiscal year 1955 are compared by major sources in the following table:

Budget receipts (by source)

[In millions of dollars]

Source	1954 actual	1955 estimate	Increase (+) or decrease (−) 1955 over 1954
Individual income tax	32,382.7	30,700.0	−1,682.7
Corporation income and excess profits taxes	21,522.9	18,466.0	−3,056.9
Excise taxes	10,014.4	8,883.0	−1,131.4
Employment taxes	5,425.4	6,080.0	+654.6
Estate and gift taxes	945.0	930.0	−15.0
Customs	562.0	570.0	+8.0
Internal revenue not otherwise classified	9.1		−9.1
Miscellaneous receipts	2,311.3	2,302.0	−9.3
Total receipts	73,172.9	67,931.0	−5,241.9
Deduct—			
(a) Transfer to Federal old-age and survivors insurance trust fund	4,537.3	5,190.0	+652.7
(b) Transfer to railroad retirement account	603.0	600.0	−3.0
(c) Refunds of receipts	3,377.2	3,331.0	−46.2
Budget receipts	64,655.4	58,810.0	−5,845.4

Substantial declines in receipts from the most important revenue sources are estimated in the fiscal year 1955. The reductions estimated under the individual income tax and excise taxes are due to tax legislation. The decrease in receipts from the corporation income and excess profits taxes, which is more than half of the decline in budget receipts, reflects the contraction of corporate profits in the calendar year 1954 as well as changes in law. Employment taxes provide the only substantial increase in receipts in 1955 but this increase does not carry through to budget receipts since the major portion of employment tax collections are transferred to trust funds. The full year effect of the increase in tax rates effective January 1, 1954, and the effect of additional legislation enacted in 1954 are primarily responsible for the increase in receipts from employment taxes.

Individual income tax.—Receipts from the individual income tax are estimated to be $30,700 million in the fiscal year 1955. This is a decrease of $1,683 million from actual receipts in the fiscal year 1954. The across-the-board reduction in tax rates commencing January 1, 1954, is fully effective in the fiscal year 1955 while it had only a partial effect in the fiscal year 1954. The general revision of the Internal Revenue Code enacted in 1954 is first effective in the fiscal year 1955. The reduction in receipts caused by these changes in law is much greater than the increase resulting from the rise in incomes affecting receipts in the fiscal year 1955 over the levels underlying 1954 receipts.

Corporation income and excess profits taxes.—A sharp decline is anticipated in corporation tax receipts in the fiscal year 1955. The level of corporate profits for the calendar year 1954 is estimated to be substantially less than in 1953. The termination of the excess profits tax which will have a significant effect on receipts in the fiscal year 1955 reduced 1954 receipts by a negligible amount. The initial revenue reduction under the corporation provisions of the general revision of the Internal Revenue Code comes in the fiscal year 1955. The combined effect of these factors is to reduce corporation income and excess profits tax receipts from $21,523 million in the fiscal year 1954 to $18,466 million in 1955.

Excise taxes.—Receipts from this source, by major groups, are listed in the table below:

[In millions of dollars]

Source	1954 actual	1955 estimate	Increase (+) or decrease (−) 1955 over 1954
Alcohol taxes	2,797.7	2,669.0	−128.7
Tobacco taxes	1,580.5	1,541.0	−39.5
Stamp taxes	90.0	97.0	+7.0
Manufacturers' excise taxes	2,691.6	2,765.0	+73.4
Retailers' excise taxes	438.3	307.0	−131.3
Miscellaneous excise taxes	1,937.4	1,504.0	−433.4
Unclassified depositary receipts	478.9		−478.9
Total excise taxes	10,014.4	8,883.0	−1,131.4

Excise tax receipts in the fiscal year 1955 are estimated to amount to $8,883 million. This is a decrease of $1,131 million from 1954 receipts of $10,014 million. The full-year effect in the fiscal year 1955 of the Excise Tax Reduction Act of 1954 as compared with the relatively small part-

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

year effect in the fiscal year 1954, plus the effect of reductions scheduled to take effect April 1, 1955, under present law, are primarily responsible for the decrease in receipts.

The amounts reported in the detailed table appearing on pages 1149–1152 and in the group totals above understate the revenue in the fiscal year 1954 from individual taxes in the manufacturers', retailers', and miscellaneous excise tax groups. Beginning July 1, 1954, the bulk of these taxes was paid monthly by direct deposits by taxpayers in Federal Reserve banks and commercial banks designated as Government depositaries. At the time of deposit the taxpayer indicates a liability under the general category excise taxes. Tax returns showing the specific tax or taxes for which liability has been incurred (and in most cases payment already made) are filed quarterly with directors of internal revenue. These quarterly tax returns are the basis of the amounts reported for specific taxes in the manufacturers', retailers', and miscellaneous excise tax groups. In the first year of operation of this system—the fiscal year 1954—the lag between time of payment and filing of tax returns results in an understatement of revenues allocated to specific taxes. The magnitude of this understatement is indicated by the amount designated as unclassified depositary receipts.

Employment taxes.—The yield of the employment taxes is shown in the table below:

[In millions of dollars]

Source	1954 actual	1955 estimate	Increase (+) or decrease (−) 1955 over 1954
Federal Insurance Contributions Act	4,537.3	5,190.0	+652.7
Federal Unemployment Tax Act	285.1	290.0	+4.9
Railroad Retirement Tax Act	603.0	600.0	−3.0
Total employment taxes	5,425.4	6,080.0	+654.6
Deduct—			
(*a*) Transfer to Federal old-age and survivors insurance trust fund	4,537.3	5,190.0	+652.7
(*b*) Transfer to railroad retirement account	603.0	600.0	−3.0
Net employment taxes	285.1	290.0	+4.9

Receipts from the Federal Insurance Contributions Act are estimated to amount to $5,190 million in the fiscal year 1955. This is an increase of $653 million over actual receipts in the preceding year. The full year effect of the increase in tax rate from 1½ to 2 percent each on employers and employees, effective January 1, 1954, is mainly responsible for this increase.

Estate and gift taxes.—Receipts from estate and gift taxes are estimated to be $930 million in the fiscal year 1955, a slight decrease from actual receipts in 1954.

Customs.—The estimate of receipts from customs in the fiscal year 1955 is $570 million, slightly above the amount collected in the fiscal year 1954.

Miscellaneous receipts.—No appreciable change from 1954 levels is expected in the fiscal year 1955.

Refunds of receipts.—Refunds of receipts in the fiscal year 1955 are estimated to decrease slightly from actual refunds in the fiscal year 1954 to $3,331 million.

FISCAL YEAR 1956

Estimated receipts in the fiscal years 1955 and 1956 are compared by major sources in the following table:

Budget receipts (by source)

[In millions of dollars]

Source	1955 estimate	1956 estimate	Increase (+) or decrease (−) 1956 over 1955
Individual income tax	30,700.0	32,500.0	+1,800.0
Corporation income and excess profits taxes	18,466.0	15,984.0	−2,482.0
Excise taxes	8,883.0	8,328.0	−555.0
Employment taxes	6,080.0	7,095.0	+1,015.0
Estate and gift taxes	930.0	970.0	+40.0
Customs	570.0	570.0	
Miscellaneous receipts	2,302.0	2,486.0	+184.0
Total receipts	67,931.0	67,933.0	+2.0
Deduct—			
(*a*) Transfer to Federal old-age and survivors insurance trust fund	5,190.0	6,175.0	+985.0
(*b*) Transfer to railroad retirement account	600.0	625.0	+25.0
(*c*) Refunds of receipts	3,331.0	3,396.0	+65.0
Budget receipts	58,810.0	57,737.0	−1,073.0

Total budget receipts in the fiscal year 1956 are estimated to amount to $57,737 million. This is a decrease of $1,073 million from the estimate for the fiscal year 1955. Receipts from the individual income tax are expected to increase because of the anticipated rise in income levels. This expansion, however, is more than offset by the large decreases estimated for receipts from the corporation income tax and excise taxes. The decrease in tax rates scheduled as of April 1, 1955, is responsible for all of the decrease in excise taxes and for part of the drop in the corporation tax receipts. Corporation receipts are also adversely affected by the termination of the acceleration in corporation installment payments under the Revenue Act of 1950.

Individual income tax.—Receipts from the individual income tax are estimated to be $32,500 million in the fiscal year 1956, $1,800 million greater than the amount estimated for the fiscal year 1955, reflecting the expected rise in income levels.

Corporation income and excess profits taxes.—Receipts from corporate income taxation are estimated to amount to $15,984 million in the fiscal year 1956, decreasing $2,482 million in comparison with estimated receipts in the fiscal year 1955. Receipts in the fiscal year 1956 are substantially determined by corporate profits in the calendar year 1955; fiscal year 1955 receipts are largely dependent upon corporate profits in the calendar year 1954. While profits in the calendar year 1955 are expected to increase appreciably over the 1954 level, tax receipts in the fiscal year 1956 will be reduced by the five percentage-point drop in the corporation normal tax, effective April 1, 1955.

An additional explanatory factor in the projected 1955–56 drop in corporate tax receipts is the termination of the temporary increase in fiscal year receipts resulting from the year-by-year acceleration of corporation installment payments required under the revenue act of 1950. This acceleration terminates, for most corporate taxpayers, in the fiscal year 1955. In that year, calendar year corporations will pay their 1954 liabilities in two equal installments, both of which fall in the same fiscal year. Prior to the requirements of the 1950 act, tax liabilities were paid in four installments divided equally between two fiscal years. The effect of the 1950 act was to increase receipts from calendar year corporations by 10 percent in each of the fiscal years 1951 through 1955.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

Acceleration of corporate tax payments is continued by the Internal Revenue Code of 1954. However, in contrast to the acceleration of payments under the 1950 Revenue Act, the acceleration of payments under the 1954 act will not increase fiscal year receipts appreciably since the payments of calendar year corporations which comprise most of the corporate group will continue to be made in the same fiscal year.

Corporations will be required to make payments of estimated taxes during the current tax liability year. These payments of estimated tax will increase gradually beginning in the fiscal year 1956 until corporations are again paying four equal installments. In the fiscal year 1960, calendar year corporations will be required to pay their calendar year 1959 liability in four equal installments—in September and December 1959 and March and June 1960.

Excise taxes.—Receipts from this source by major groups are listed in the following table:

[In millions of dollars]

Source	1955 estimate	1956 estimate	Increase (+) or decrease (−) 1956 over 1955
Alcohol taxes	2,669.0	2,622.0	−47.0
Tobacco taxes	1,541.0	1,443.0	−98.0
Stamp taxes	97.0	97.0	
Manufacturers' excise taxes	2,765.0	2,300.0	−465.0
Retailers' excise taxes	307.0	319.0	+12.0
Miscellaneous excise taxes	1,504.0	1,547.0	+43.0
Total excise taxes	8,883.0	8,328.0	−555.0

Decreases are estimated for the fiscal year 1956 in receipts in the alcohol, tobacco, and manufacturers' excise tax groups. Each of these groups contains taxes for which, under present law, the rates are scheduled to decrease on April 1, 1955. The full-year effect of these reductions, as compared with the part-year effect in the fiscal year 1955, is responsible for the decreases in these groups. One tax in the miscellaneous tax group is also scheduled for reduction but the revenue consequence is small. In this group and in the retailers' group, tax receipts increase in the fiscal year 1956 reflecting an expected increase in the consumption of taxable goods and services.

Employment taxes.—The detail of the yields of the employment taxes is shown in the table below:

[In millions of dollars]

Source	1955 estimate	1956 estimate	Increase (+) or decrease (−) 1956 over 1955
Federal Insurance Contributions Act	5,190.0	6,175.0	+985.0
Federal Unemployment Tax Act	290.0	295.0	+5.0
Railroad Retirement Tax Act	600.0	625.0	+25.0
Total employment taxes	6,080.0	7,095.0	+1,015.0
Deduct—			
(*a*) Transfer to Federal old-age and survivors insurance trust fund	5,190.0	6,175.0	+985.0
(*b*) Transfer to railroad retirement account	600.0	625.0	+25.0
Net employment taxes	290.0	295.0	+5.0

The large increase in receipts from the Federal Insurance Contributions Act reflects an increase in coverage and an increase in the maximum amounts subject to tax from $3,600 to $4,200 a year, as well as rising income levels.

Estate and gift taxes.—Receipts from estate and gift taxes are estimated to be $970 million in the fiscal year 1956. This represents a small increase over the amount estimated for the fiscal year 1955.

Customs.—Customs receipts are estimated to be $570 million in the fiscal year 1956, unchanged from fiscal year 1955.

Miscellaneous receipts.—Miscellaneous receipts are estimated to rise slightly to $2,486 million in the fiscal year 1956.

Refunds of receipts.—Refunds of receipts are estimated to amount to $3,396 million in the fiscal year 1956. This is an increase of $65 million above the estimate for the previous year.

Special Analysis D

INVESTMENT, OPERATING, AND OTHER BUDGET EXPENDITURES

INTRODUCTION

Like the functional classification in special analysis B and the agency classification in part II of the budget, this analysis of Government expenditures is designed to contribute to a general understanding of total budget expenditures and of budgetary problems. It classifies Government expenditures according to those which yield benefits beyond the current fiscal year and those expenditures which in the main yield benefits within the year in which the expenditure is made.

Expenditures of an investment type, that is, those yielding benefits over a period of years, are shown in two major categories—one for the acquisition and improvement of assets by the Federal Government and the other for other broad developmental purposes such as additions to State, local, and private assets and expenditures for research, education, and health, which contribute to the physical productivity of the economy or increase the technical skills and knowledge of individuals. Expenditures which yield benefits currently are also grouped in two major categories—one for aids and services to special groups and the other for current operating expenses.

Comparison with a capital budget.—This analysis is not a capital budget. A capital budget as prepared by some foreign governments and State and local governmental units usually provides separate financing for major capital outlays. The capital outlays may be entirely excluded from the current budgets of these governments or they may be amortized over a period of years by annual charges to the budget. In the Federal budget, however, investment items are usually shown in the same way as expenditures for other purposes and hence included in arriving at the budget surplus or deficit.

A capital budget would also require computing and recording annually an allowance for depreciation and obsolescence on existing physical assets, an allowance for anticipated losses on loan programs, a recognition of any assets given away, and the profits or losses on sales of assets at a figure different from their book value. This analysis makes no provision for such changes in assets. Hence, it does not indicate the extent to which annual increases in investment are offset by depreciation and other changes in existing assets.

On the basis of private accounting practices, investment expenditures would not only be confined to increases in claims or assets owned by the Federal Government, but would also cover all such assets, including office equipment and motor vehicles. With respect to investments in Federal assets, this analysis is limited to major outlays, such as public works construction and military aircraft and ships. On the other hand, this analysis is broader than private accounting practice regarding capital items, since expenditures are viewed in terms of their effect on the economy as a whole; hence, it includes also, as the second major type of investment expenditures, additions to State, local, or private assets or other Federal expenditures whose major objective is to improve the productivity of the Nation.

Recoverability of certain types of expenditures.—The greater part of Federal expenditures for loans, for investment in commodity inventories, and for construction of powerplants is ultimately returned to the Treasury. However, Federal expenditures for most other investment-type programs are not generally expected to be recovered by specific revenues. Developmental expenditures, however, usually increase the wealth and income of the Nation and often indirectly expand Federal tax revenues over a long period of years. Expenditures of certain Government programs are also financed by the appropriation of part or all of the special receipts which are collected from licenses and fees charged for various special services.

As in the 1955 budget document, this analysis presents expenditures of public enterprise funds on a gross as well as a net basis, in order to indicate the full scope of their operations. The receipt totals indicated in the analysis are only those which are deposited in the revolving funds of such enterprises. Receipts paid directly to the Treasury are excluded from this analysis.

Significant subcategories.—In addition to the four major categories of expenditures already mentioned, this analysis shows separately the expenditures for major national security programs (as defined in special analysis B) and civil programs. Since major national security expenditures represent a large proportion of total budget outlays, such a distinction helps to appraise the significance of outlays within each of the major divisions. For example, military expenditures for fixed assets and other developmental purposes are not usually intended to achieve the same objectives as civil outlays for assets.

Separate subcategories are also shown for expenditures for direct Federal programs, grants-in-aid or loans to State and local governments, and payments to trust funds. Special analysis G gives details on Federal aid to State and local governments and contains a table summarizing these aids according to the major categories of this analysis.

SPECIAL CLASSIFICATION

This special analysis contains for the first time a supplementary rearrangement of the major groups of budget expenditures into five general categories: (1) Current expenses for civil operations and administration, (2) interest, (3) civil benefits, (4) protection, and (5) reserves for proposed legislation and contingencies. A summary table appears on page M12 of the President's budget message. Further details are shown in table 1 on the next page.

Current expenses for civil operations and administration.—The expenditures shown under this heading are predominantly the traditional expenses for civil operations and administration of the Federal Government. Here are found the bulk of the expenditures for the legislative branch, the judiciary, the President's office, the various regulatory activities of the Government, and the administrative expenses of many Cabinet departments and independent agencies. These expenditures are shown on table 2 as a separate subcategory ("Other civil") under the main heading of "Other services and current operating expenses." It should be noted that all construction of civil public works (including construction of Government office buildings) is excluded from this category, although expenses for repair, maintenance, and operation of civil public works are included.

Interest.—This category is identical with that entitled "Interest" in special analysis B. Interest expenditures are predominantly for the public debt. Relatively small expenditures are also made for interest on refunds and on uninvested trust funds.

Expenditures for other developmental purposes (major national security)	915	1,285	1,617	1,616	1,546	1,649
Current expenses for aids and special services (international)	4,311	4,596	5,659	5,012	4,292	4,733
Repair, maintenance, and operation of physical assets (major national security)	5,828	12,232	10,383	9,401	7,909	8,613
Other national security operation and administration	8,474	12,831	12,882	11,920	11,163	11,296
Unallocated reduction in estimates (major national security)						−1,750
Total	25,626	46,002	51,979	47,863	41,673	41,475
Undistributed:						
Reserves for legislation and contingencies					100	325
Adjustment to daily Treasury statement	−705	−855				
Net budget expenditures	44,058	65,410	74,274	67,772	63,504	62,408

Civil benefits.—A large number of programs designed to yield benefits to the Nation generally or to various groups and geographic areas are classified as civil benefits. Except for major national security programs this category contains all of the net budget expenditures shown in table 2 for (1) additions to Federal assets, (2) other developmental purposes, and (3) current expenses for aids and special services (other than international). The largest single program in this category is aid to veterans, for which net expenditures in the fiscal year 1956 are estimated to be 38 percent of all civil benefits.

Other large outlays classified as civil benefits aid agriculture, business, labor, homeowners and tenants, and public assistance recipients. The additions to Federal assets included in this category are loans (net), inventory accumulations, and the construction of civil public works.

Protection.—Expenditures for protection cover all of the items under the heading of major national security in special analysis B plus current expenses for international (civil) programs as shown in table 5.

Undistributed.—There are a number of miscellaneous expenditure items which cannot be allocated to any of the four preceding categories. These items are the reserves for proposed legislation and contingencies and, for the fiscal years 1951 and 1952, the adjustment to the daily Treasury statement basis of reporting budget expenditures. As a result of recent improvement in Federal financial reporting, this adjustment is no longer applicable.

SUMMARY OF SPECIAL ANALYSIS D

Table 2 summarizes expenditures according to the major categories of special analysis D, showing gross and net expenditures, and applicable receipts, for both the major national security and civil components. About $22.7 billion of estimated net budget expenditures for the fiscal year 1956 represent outlays for the acquisition and improvement of assets and for other development purposes. Most of these net outlays, $18.6 billion, are for major national security programs. Current expenses for aids, services, and operations are estimated at $41.2 billion, net, for the fiscal year 1956. Most of these net outlays, $23.6 billion, are also for major national security programs.

The estimated reduction of $1.1 billion in net budget expenditures from 1955 to 1956 is the net result of several decreases and increases:

1. Savings and downward adjustments of $1.8 billion in the expenditures for military functions of the Department of Defense which it is not feasible to allocate among the various categories of major national security expenditures.

2. A reduction of $1.1 billion in investment-type expenditures for additions to Federal assets, predominantly reductions in net loans and major commodity inventories for civil programs.

3. An aggregate increase of $1.8 billion for all other categories shown in table 2. About one-half of this increase is for the operation and administration of major national security programs.

ADDITIONS TO FEDERAL ASSETS

Expenditures in this category represent direct investment by the Federal Government in loans and federally owned physical assets. Net expenditures for such additions to assets are estimated to total $18.9 billion in the fiscal year 1956, $1.1 billion below 1955. About 90 percent of total net expenditures in this category are for major national security programs, mostly for military equipment. The 1956 figure for this category does not reflect the expenditure reduction in major national security programs which is not allocated by categories.

Loans.—Direct loans of Federal agencies consist mainly of loans to farmers and homeowners, to public and private agencies serving these two groups, and to private business

*Less than one-half million.

and foreign governments. The Congress has provided that most loan programs operate on a revolving basis. However, the Rural Electrification Administration and the Farmers' Home Administration and a few inactive or smaller loan programs are by law on a nonrevolving basis, with collections on outstanding loans going directly to miscellaneous receipts of the Treasury. In table 3, loans made through revolving funds are included on both a gross and a net basis. Since net expenditures for loans reflect only a fraction of total Government loan activity, gross disbursements more accurately measure the total loan operations of the Government.

In the fiscal year 1956, gross disbursements for loans are estimated to decrease by $1,150 million from 1955. Collections and other receipts from loans are estimated to decrease by $711 million. As a result, net budget expenditures for loans are estimated to decline by $439 million between the fiscal years 1955 and 1956.

Net loans to domestic private borrowers in the fiscal year 1956 are estimated to be $384 million lower than in 1955. Of this amount, $355 million represents a reduction in net loans to private borrowers by the Housing and Home Finance Agency. Most other major loan programs show smaller changes in net expenditures from 1955. An analysis of major credit programs of the Federal Government is contained in special analysis E. In that analysis loan expenditures are shown net of all receipts including collections going directly into miscellaneous receipts of the Treasury.

Public works—sites and direct construction.—This category includes all Federal expenditures for sites and federally constructed civil public works projects, military installations, and other national security facilities which are owned by the United States, including those outside the continental United States. A summary of these and related programs is given in special analysis F.

Total estimated expenditures for direct Federal public works of $3.4 billion in 1956 represent a decline of $170 million from the 1955 total. About 70 percent of these expenditures for 1956 will be direct public works for major

Federal Reserve Bank of St. Louis

national security programs. Expenditures for construction of atomic energy facilities are estimated to decline while military construction expenditures are estimated to rise in 1956. This comparison does not reflect the unallocated reduction in major national security expenditures. Civil public works expenditures, mainly for water resources and related developments and veterans' hospitals, are estimated to decline from $1,177 million in 1955 to $977 million in 1956.

Major commodity inventories.—Gross purchases of commodities held for resale or in stockpiles are expected to total $3,550 million in the fiscal year 1956, exceeding sales by $1,346 million. Total purchases include transportation costs, administrative expenses, and storage costs where these are normally included in costs of goods sold.

Net expenditures for stockpiling strategic and critical materials (other than fissionable materials) are estimated at $751 million in the fiscal year 1956. By June 30, 1956, the stockpile inventory is expected to reach an estimated $6.3 billion. Net acquisition of farm commodities by the Commodity Credit Corporation under its farm price-support program is estimated at $431 million in the fiscal year 1956. The value of the Corporation's inventory of commodities as of June 30, 1956, is estimated to total $4.5 billion.

Major equipment.—Expenditures for major equipment are estimated at $12.8 billion in 1956, almost the same as in 1955. These expenditures represent, predominantly, purchases of aircraft, naval vessels, tanks, and other major national security equipment needs, as well as construction of merchant ships. Again, the figure for 1956 does not reflect the unallocated reduction in major national security expenditures. Purchases of office equipment, automobiles, furniture and fixtures, etc., are classified as current operating expenses.

Other physical assets—acquisition and improvement.—Expenditures for other physical assets will rise in 1956, mainly because of increased expenditures for the current construction program (other than research and development plant) of the Atomic Energy Commission. This subcategory also includes reforestation and range improvements and real property purchased or acquired as collateral on defaulted loans.

EXPENDITURES FOR OTHER DEVELOPMENTAL PURPOSES

This category includes Federal expenditures which add to the productivity of the economy over a period of years but which do not directly add to Federal physical and financial assets. Programs which yield the bulk of their benefits immediately are excluded, even though they may also contribute to the longer run economic development of the Nation.

Expenditures for military research and development account for almost half of the total expenditures in this category in 1956. Higher grants to the States for construction of highways are responsible for most of the increase over 1955.

State and local physical assets.—In the fiscal year 1956, the Federal Government will spend an estimated $897 million on physical assets to be acquired by State and local governments. These outlays, in the form of grants-in-aid such as the Federal-aid highway program, are $59 million higher than in the preceding year.

Private physical assets.—Federal expenditures which directly add to privately owned physical assets consist predominantly of payments for conservation and improvement of private farms and grants to States for private

TABLE 4.—*Expenditures for other developmental purposes*

Net expenditures for other developmental purposes	3,224	3,345	3,703

NOTE.—Estimates for the fiscal year 1956 do not reflect the expenditure reduction in major national security programs which is not allocated by categories.

hospitals and other health facilities. Expenditures for both of these programs are estimated to rise moderately.

Education, training, and health.—An estimated $388 million of net budget expenditures in the fiscal year 1956 will be for developmental purposes in the fields of education, training, and health, an estimated increase of $47 million over 1955. Designed to promote the knowledge, skills, longevity, and physical vigor of the population, most of these programs are conducted through grants to State and local governments. Included here are school-operating aid to school districts especially affected by defense activities, and grants to States for programs of vocational education, vocational rehabilitation, maternal and child welfare, public health, and agricultural extension work. Closely related are several major items classified in other categories—principally the veterans' education program, which is classified as aids and special services for veterans; the operating expenses of hospital services and medical care programs; and the training of military personnel or other persons in Government service.

Research and development.—The Federal Government contributes, in part, to technological and economic progress through its varied programs of research and development. Net expenditures for such programs in the fiscal year 1956 are estimated at $1,966 million, $137 million above 1955. About 84 percent of this total is for major national security research and development, including the work of the Department of Defense and the Atomic Energy Commission.

Definitions of research and development, in this analysis, are those used in special analysis H on page 1195, and agree generally with those used by the National Science Foundation for its analyses of Federal Government activities in this general area.

Engineering and natural resource surveys.—An estimated $48 million of net budget expenditures in the fiscal year 1956 will be for investigations and surveys for public works programs, topographic mapping, land classification, forest investigations, and other basic surveys. The largest programs of this type are administered by the Geological Survey, the Bureau of Reclamation, and the Coast and Geodetic Survey.

CURRENT EXPENSES FOR AIDS AND SPECIAL SERVICES

This category covers current expenditures for programs which primarily provide aids or special services to one or more specific groups. Investment-type expenditures (included in the preceding categories) which provide

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

substantial benefits to various economic groups, such as loans, public works, and research programs, are excluded. However, this category does contain the administrative and other operating expenses and operating receipts arising from loan programs and from investments in physical assets which benefit specific groups, as well as maintenance costs of any physical assets providing aids and special services. Some of these economic groups also receive benefits from special Federal tax provisions and other nonexpenditure aids, which are not included in this analysis. Approximately 70 percent of expenditures for aids and special services are for civil programs, which are estimated at $8.9 billion, net, for the fiscal year 1956, $234 million below the fiscal year 1955.

Agriculture.—Current expenses predominantly for the benefit of farmers consist chiefly of losses realized on the price-support program, expenses of the International Wheat Agreement, Sugar Act payments, expenditures for removal of surplus commodities, and administrative expenses of loan programs and other aids to farmers. Other major expenditures for aids to farmers classified elsewhere in this analysis are provided through loans, conservation payments, and reclamation and other developmental aids. Farmers also benefit indirectly from the school lunch, international, and other programs which are intended primarily for other purposes.

In the fiscal year 1956, current expenses for programs directly benefiting farmers are estimated at $750 million, net, $245 million below 1955.

Business.—The major types of current Federal expenditures primarily benefiting private business are the Government payment to the Post Office to pay the losses arising primarily from second-, third-, and fourth-class mail; maritime operating subsidies, and navigation and other aids to the shipping industry; and various aids to air navigation. Largely as a result of the proposed increase in postal rates, net expenditures for these purposes in the fiscal year 1956 are expected to decline to $537 million, $213 million below 1955.

Labor.—The largest current Federal expenditure benefiting labor is for the Federal-State program of unemployment insurance and public employment offices, in which the Federal Department of Labor makes grants to the States to cover the full cost of administering these services. This program also benefits employers by recruiting workers to fill job vacancies. Also in this category are the mine safety work of the Bureau of Mines and some administrative expenses of the Department of Labor. These expenditures for the fiscal year 1956, totaling $348 million, net, represent an increase of $76 million over the preceding year.

Homeowners and tenants.—Since loans for the benefit of homeowners and tenants are classified in this analysis as investment-type expenditures, current expenditures consist chiefly of grants to local authorities for low-rent public housing and for slum clearance and urban renewal. These are increasing, as the local agencies complete the plans for the projects and become eligible for the grants. However, receipts for the insurance of mortgages and saving and loan share accounts, and the earnings from holdings of mortgages and other housing loans exceed current gross expenditures for housing in all 3 years shown in the budget.

Veterans.—Current net expenditures for aids to veterans in the fiscal year 1956 are estimated at $4.5 billion, $189 million above 1955. Compensation and pension benefits account for more than half of the estimated 1956 total in this subcategory. The monthly compensation payments are to veterans with service-connected disabilities and to the families of deceased veterans. Pensions are paid in non-service-connected cases.

Other important current aids to veterans are hospital and medical care and readjustment benefits for veterans of World War II and the Korean conflict. Included are outlays for education and training of veterans who enroll in schools and colleges, or vocational training on the job or farm; losses under the loan-guaranty programs; and veterans' unemployment allowances.

International.—In the fiscal year 1956, $3.7 billion or almost 80 percent of total expenditures in this subcategory is for the military part of the mutual security program. About three-fifths of expenditures under this program will be to furnish military equipment and training to friendly nations. Nonmilitary parts of the mutual security expenditures are primarily to strengthen the economies of nations with larger military forces than they can support.

Other aids and special services.—Many other Federal programs involve current expenditures for aids and special services providing major benefits for more than one of the above groups or for other groups. The bulk of such expenditures is grants to help provide public assistance to those in need, including the aged, the blind, the permanently and totally disabled, and dependent children. Other

major programs include grants to States to help finance low-priced school lunches, hospital operation and medical care by the Public Health Service, and various aids to Indians. These expenditures in the fiscal year 1956 are expected to be $74 million less than in 1955.

OTHER SERVICES AND CURRENT OPERATING EXPENSES

All other expenditures for Government services or for current operations are included in this major category. In the main, the activities are the basic Government operations of maintaining a military establishment, conducting foreign affairs, making or enforcing laws, collecting taxes, managing and paying interest on the public debt, sharing the retirement costs of civilian employees, and operating the postal service.

Current expenditures for major national security, mostly for operation and maintenance of military facilities and for pay and subsistence of military personnel, dominate this category. It should be noted that the 1956 figures in this major category do not reflect the unallocated expenditure reduction in major national security programs. The largest component of civil expenditures is for interest. All other current civil expenses in 1956 will total about $2.3 billion, an increase of $335 million above 1955.

Repair, maintenance, and operation of physical assets excluding special services.—Expenditures to repair, maintain, and operate physical assets are chiefly for maintenance and operation of atomic energy facilities; military structures, equipment, and facilities; and general-purpose public buildings. They also pay for operating certain public assets such as flood-control reservoirs, irrigation works, power facilities, public lands, and national forests.

Net expenditures for civil repair, maintenance, and operation are estimated at $227 million in the fiscal year 1956, $15 million below fiscal year 1955. Outlays for the operation and maintenance of structures, equipment, and facilities for major national security programs are estimated at $8.6 billion, an increase of $704 million from the 1955 level.

Regulation and control.—Most of the major departments and agencies and many smaller agencies have regulatory or law-enforcement responsibilities. These include the normal law-enforcement activities of the Department of Justice, the Treasury, and the judiciary, as well as the operations of the independent regulatory agencies. Expenditures for regulation and control are estimated to rise to $455 million in 1956, $24 million higher than in 1955.

Operation and maintenance of the postal system.—Since the postal deficit is included under current expenses for aids and special services, this category includes all remaining expenditures and the receipts of the Post Office, which are of the same magnitude and therefore cancel out on a net basis. Gross expenditures and receipts in this subcategory for the fiscal year 1956 are estimated at $2.5 billion.

Operation and administration of other civil activities.—All other governmentwide or multiple-purpose expenditures for civil programs will increase from $1,242 million in 1955 to $1,569 million in 1956. These consist of expenditures for the conduct of foreign affairs; expenditures for tax collection, public debt administration, and other financing activities; expenditures for consideration and enactment of legislation; central procurement, record-keeping, payment of claims, and various other miscellaneous direct Federal programs not elsewhere classified. The largest increase in this subcategory over the 1955 level, $186 million, is in the recommended Government payment—as employer—for Federal civilian employees' retirement.

Other major national security operation and administration.—Expenditures in this category are estimated to rise from the 1955 level of $11.2 billion to $11.3 billion in the fiscal year 1956. They represent predominantly pay and subsistence for military personnel together with smaller but substantial expenditures for civilian components, industrial mobilization, and various departmentwide activities of the Department of Defense.

Interest.—These expenditures include interest on the public debt and smaller amounts of interest on refunds of receipts and on uninvested trust funds. Principally, because of a somewhat lower pattern of interest rates, expenditures for interest are expected to be $180 million lower in the fiscal year 1956 than in 1955.

Special Analysis E

FEDERAL CREDIT PROGRAMS

Introduction

Federal credit programs are an important method for the achievement of public policy objectives. For example, as part of the Federal programs for improvement of housing and encouragement of home ownership, Federal agencies currently insure or guarantee about 40 percent of all outstanding home-mortgage loans. Similarly, financial assistance in the form of credit is an important part of the Federal program of encouraging efficient family-size farm units. Loans to help restore international economic stability and promote the economic development of underdeveloped areas have been a significant part of the Government's international program in recent years. Federal loans to business are primarily to help meet defense needs and to assist small businesses to obtain financing; they account for only a very small part of business credit. Apart from influences in these specific areas, Federal credit programs exert a powerful influence on the general level of economic activity.

The impact of Federal credit programs on the Federal budget is relatively small when compared with the large amount of credit extended or guaranteed. The most important reason for this is the predominance of Federal insurance and guarantees of private loans in recent years, discussed more fully later in this analysis. Such programs normally involve little or no budget expenditures except in cases when defaults require the guaranteeing or insuring agencies to take over private loans. Secondly, a substantial share of new commitments, both for insurance and guarantees and for direct loans, are canceled or expire without being used by the lending institution or the borrower. Finally, collections on loans in most cases directly offset disbursements on new loans, with the result that net expenditures are much less than gross expenditures; often net receipts occur.

Federal credit programs are intended to supplement rather than to substitute for private credit. They have expanded greatly in the postwar period. Direct loans outstanding increased from about $5 billion in 1945 to more than $15 billion on June 30, 1954. However, this amount was only 5 percent of the estimated private debt of $318 billion outstanding on that date. Private loans partly or wholly guaranteed by Federal agencies have increased nearly sevenfold since 1945 to $40 billion, comprising an additional 13 percent of total private debt.

Coverage of Special Analysis

This special analysis presents a broad picture both of direct Federal loans and investments, and of Federal loan insurance and loan guaranty programs. It summarizes new commitments, disbursements and repayments, loans outstanding and guarantees in force, new commitment authority, and status of credit authority of 19 major Federal credit programs. These programs account for nearly all new commitments of Federal credit agencies in the fiscal year 1956.

The analysis covers major credit programs of wholly owned Government enterprises, whether corporate or noncorporate. Included also are major credit operations of other departments and agencies, not primarily engaged in lending activities, such as the Treasury Department loan to the United Kingdom in 1947. Loan programs of important quasi-public agencies are excluded from the tables, but are discussed separately.

The analysis excludes interagency credit, such as borrowing from the Treasury by other Government agencies, whether for loan or other programs. Credit extended in connection with sales by the Federal Government, such as credit to finance sales of war surplus goods, is also in general excluded.

Summary

Total new commitments for major Federal credit programs for the fiscal year 1956 are estimated at $20.5 billion (table 1). Of this total, credit aids for housing and related programs, including loans and guaranties by the Housing and Home Finance Agency and the Veterans Administration, account for $15.1 billion, or about 75 percent; those for agricultural programs account for $4.6 billion, or 23 percent. The increase in 1956 over 1954 and 1955 reflects primarily more liberal mortgage insurance authorized by the Housing Act of 1954 and greater availability of mortgage funds.

Table 1.—*Commitments and expenditures for major Federal credit programs classified by agency or program*

Total budget expenditures	----	----	----	−582	858	419

[1] Not available.

As indicated in detail in table 3 below, expenditures and receipts of major credit programs will be roughly in balance in 1956. The reduction in net expenditures from 1955 is accounted for by curtailment of the exceptionally large disbursements by the Federal National Mortgage Association in 1955.

New Commitments

New commitments provide the best single measure of the trends in most Federal credit programs. They also provide the best indication of trends in the economic impact of these programs, since changes in the magnitude of new commitments usually lead to corresponding changes in the volume of loans disbursed either by public agencies or private lenders.

In this study, commitments are defined as approvals by Federal agencies of direct loans or of insurance or guarantees of private loans. They are shown on a gross basis,

Federal Reserve Bank of St. Louis

without deductions for commitments which do not result in an actual credit extension. The amounts shown are the principal amounts of the loans; for several guaranty and insurance programs these exceed the Government's contingent liability, since the unguaranteed or uninsured portions are also included.

As table 2 indicates, commitments for Federal guaranties and insurance of private loans account for about 80 percent of total new commitments in 1956. This high proportion arises from legal requirements or administrative policy of making direct loans only where private credit, even with Government guarantee or insurance, is not available on reasonable terms, and from recent revisions in interest rates and other terms designed to make guaranteed and insured loans more attractive to private lenders. Many of the direct loans and investments also encourage private lending, for example, purchases of mortgages by the Federal National Mortgage Association from private financial institutions and discounts by the Federal Intermediate Credit banks of short-term farm credit extended by private lenders.

Direct loans and investments.—New commitments of $4.1 billion for direct loans and investments in 1956 continue approximately the 1954 and 1955 levels. The slum clearance and urban renewal program continues to expand as more projects go beyond the planning stage. The lending program of the Export-Import Bank is being expanded.

[1] Not available.

Guaranties and insurance.—New commitments for Federal guaranties and insurance of private loans are estimated at $16.4 billion in the fiscal year 1956, compared to $14.9 billion in 1955 and $11.8 billion in 1954. Guaranties and insurance of housing mortgages will be substantially higher as a result of easier mortgage market conditions during the period and the liberal insurance programs authorized in the Housing Act of 1954. The price support operations of the Commodity Credit Corporation are declining during the period primarily because of continuation of acreage restrictions and lower support levels on some commodities.

Overlap in commitments.—Total commitments may overstate by 1 to 2 billion dollars the net amount of credit assistance by the Federal Government, especially for housing credit. This is because two or more types of Federal assistance are sometimes provided for the same borrower or the same property at different stages in the financing process. No adjustment is made for this overlap, since the amount in any single year is difficult to estimate.

A substantial share of the housing initially constructed with the aid of mortgage insurance by the Federal Housing Administration is ultimately sold to veterans who finance their purchases with mortgages guaranteed by the Veterans Administration. The Federal National Mortgage Association purchases or participates only in mortgages previously insured by the Federal Housing Administration or guaranteed by the Veterans Administration.

Similarly, local housing authorities normally finance most or all of the construction of low-rent units with temporary loans made or directly guaranteed by the Public Housing Administration. These temporary obligations, however, are refinanced by sale of long-term obligations to private investors on the security of Federal annual contribution contracts. This refinancing accounts for part of the increase in commitments by the Public Housing Administration.

DISBURSEMENTS AND REPAYMENTS

Direct loans and investments can have a major impact on the Federal budget, since the difference between disbursements and repayments represents Federal expenditures or receipts. Federal guaranties and insurance of private loans, on the other hand, ordinarily have only a minor effect on Federal expenditures, since they result primarily in expenditures by private financial institutions. Only if they have been taken over by Federal agencies as a result of defaults or otherwise are they reflected in budget expenditures. Net expenditures for Federal credit assistance give, therefore, only a partial picture of the economic impact of these programs.

Net expenditures of all Government lending programs—with the exception of loans from trust funds or by quasi-public agencies—are included in the budget totals. In most cases, collections are offset directly against expenditures; in a few major programs, however, they go directly to miscellaneous receipts and, therefore, do not affect budget expenditures.

Expenditures of most loan programs are shown in most budget tables on a net basis, i. e., they reflect loan disbursements less repayments of old loans. In table 1 of this analysis, expenditures for loans are shown on a net basis. However, to indicate more clearly the total volume of loans, table 3 shows both gross loan disbursements and repayments (including those going directly to miscellaneous receipts of the Treasury). The difference between these two columns represents the net addition to or reduction in Federal loan assets (excluding chargeoffs and recoveries) for the major credit programs during the fiscal year. To bring total expenditures for loans into line with budget expenditures, net expenditures of minor Federal programs and an adjustment for repayments going directly to miscellaneous receipts are shown.

Other agencies or programs	−40		135		40	
Adjustment for repayments going directly into miscellaneous receipts	220		244		269	
Total budget expenditures	−582		858		419	

In both tables 1 and 3, expenditure figures represent disbursements and repayments of loans only, and exclude all income and expense items. Losses actually incurred and written off are not included because no cash transaction is involved. Consistent with the general definition of budget expenditures, investments in and sales of United States Government securities are excluded.

In the fiscal year 1956 gross loan disbursements of major Federal credit programs are estimated at $6.7 billion and repayments at $6.6 billion. Net expenditures of $110 million are thus only a minor fraction of the gross level of activity. Of the total repayments, $269 million will go directly to miscellaneous receipts, chiefly repayment of loans by the Farmers' Home Administration, the Rural Electrification Administration, and the Treasury loan to the United Kingdom. Allowing for this adjustment, together with net expenditures of $40 million for relatively minor credit programs, net budget expenditures for loans will amount to an estimated $419 million.

Gross disbursements in 1956 are expected to be substantially below the 1955 level. Most of this decline is accounted for by reduced expenditures of the Commodity Credit Corporation as a result of continued acreage restrictions, lower support levels on some commodities, and reduced purchases of dairy products.

Repayments in 1956 are estimated at $6.6 billion, compared to $7.6 billion in 1954 and 1955. The reduction in 1956 results in large part from a decrease in private financing of commodity loans; in 1956 a substantially smaller volume of commodity loans will be available to serve as collateral for certificates of interest to be sold to banks and private lenders.

Measured in terms of both disbursements and repayments, the Federal Intermediate Credit Banks represent one of the most active direct lending programs primarily because of the short-term nature of their advances which are frequently renewed; net expenditures of the banks in 1956 will be only about 2 percent of gross disbursements. On the other hand, current levels of repayments are small when compared with current disbursements in the case of relatively new programs, such as college housing and the Small Business Administration, as well as for programs with predominantly long-term loans such as the Rural Electrification Administration or the Foreign Operations Administration.

Neither current repayments nor net expenditures provide any measure of the ultimate recoverability of the loans made. As indicated in the detailed statements on individual programs, interest or premiums cover expenses and losses for many programs. In some, the legislative mandates make losses probable from time to time, such as the nonrecourse loans of the Commodity Credit Corporation and the loan-guarantee programs of the Veterans Administration.

LOANS OUTSTANDING AND GUARANTIES IN FORCE

The best index of the level of Federal credit programs over a period of years is provided by the total of their outstanding loans, guaranties, and insurance in force.

Outstanding loans and investments by the end of the fiscal year 1956 are estimated at $16.2 billion, approximately the same as the end of the 1955 (table 4). About half of this represents loans to foreign borrowers, including the outstanding loan of $3.5 billion to the United Kingdom, loans of $2.7 billion by the Export-Import Bank, and $1.8 billion by the Foreign Operations Administration.

http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

gage loans by the Veterans Administration and the Federal Housing Administration. These two programs account for 90 percent of all outstanding guaranties and insurance.

The amounts shown include both the guaranteed and unguaranteed portion of outstanding loans in order to give a clearer picture of the economic impact of these programs and to tie in better with banking statistics. They do not, however, indicate the estimated contingent liability of the Federal Government, which is shown in table 6. The major program on which the contingent liability differs materially from the principal amount of the loans is the veterans' loan-guarantee program. By the end of the fiscal year 1956, the outstanding amount of such loans will be about $11 billion higher than the Government liability.

The probability that the Government will be called upon to take over any substantial part of the guaranteed or insured portion of outstanding loans is small, except in a national financial emergency. Sizable assets are available to minimize any potential losses. Moreover, in the case of most mortgage insurance programs charging premiums, income in the past has been sufficient not only to cover expenses and current losses, but also to build up substantial reserves.

New Commitment Authority

New commitment authority includes any additional loan or loan guaranty authority made available or recommended. There are several kinds of new commitment authority. Budget authorizations are those included in budget totals of new obligational authority; they consist either of appropriations or of authorizations to expend from public debt receipts. Other authorizations, which do not normally give rise to budget expenditures, consist of insurance and guarantee authorizations and conditional authorizations which become available only under specified conditions.

TABLE 5.—*New commitment authority for major Federal credit programs classified by type of authorization, agency, or major program*

[1] Not available.

Table 5 summarizes new commitment authority of the 15 major credit programs which will receive additional authority during the period. New commitment authority for the fiscal year 1956 is estimated at $8.2 billion compared to $9.9 billion in 1955. The sharp reduction from 1955 results primarily from reduced requirements of the Commodity Credit Corporation for its price support operations. More than 80 percent of the new authority is required for guaranties and insurance of housing loans by the Federal Housing Administration and Veterans Administration.

New commitment authority for most credit programs is provided by Congress in the basic legislation rather than in appropriation acts. For example, the lending authority of the Export-Import Bank and the Small Business Administration, the borrowing authority of the Commodity Credit Corporation and the Public Housing Administration, and the various mortgage insurance authorizations of the Federal Housing Administration are all prescribed in the statutes governing these programs. Since new commitments can generally be financed out of uncommitted balances of prior authorizations, or out of funds made available by collections on outstanding loans, requests for new commitment authority in any one year are limited to relatively few credit programs. For example, in the fiscal year 1956, new commitment authority is requested for only five major programs—the Veterans Administration's direct loans, the Rural Electrification Administration, the Farmers' Home Administration, the Small Business Administration, and the Federal Housing Administration; in addition, restoration of capital impairment is requested for the Commodity Credit Corporation. In several other programs, however, authority will become available in 1956 without additional action by the Congress.

In several important cases, the authority provided by the basic statute is indefinite. The most important examples are guaranties and insurance of loans by the Veterans Administration, guaranties of defense production loans under section 301 of the Defense Production Act, and indirect guaranties of local housing authority obligations issued on the security of annual contribution contracts of the Public Housing Administration. In these cases, the tabulations show new authorizations equal to the net amount of the guaranteed or insured portion of new commitments.

A second type of new authority indefinite in amount exists in the case of loan programs where the authority can also be used for grants, purchase commitments, or other nonlending purposes. Major examples during the 3-year period are the programs of the Commodity Credit Corporation and the Foreign Operations Administration. In these programs all the new obligational authority provided could legally be used for loans, but is not likely to be so used. Dollar loans by the Foreign Operations Administration in 1955 and 1956 account for only a relatively small part of the total assistance program, so that it would be misleading to include the total amount of the mutual security program as new obligational authority for loan assistance. The data, therefore, show amounts for new authority adequate to finance estimated new commitments. Loans and guaranties by the Commodity Credit Corporation account for a substantial part of its program. Its total new obligational authority is, therefore, included, even though some of it will be used for nonlending purposes.

Status of Credit Authority

Unlike most other Government programs, commitment authority for the major credit programs is not normally provided for a single year, but remains available in most instances until utilized or until the statutory authority for the program expires. Hence, with only a few exceptions, the existing authority represents the cumulative total of amounts made available in prior years.

Cumulative net authority.—Three major types of commitment authority have been provided for Federal credit programs. A majority of the major programs operate on a revolving-fund basis, that is, collections on outstanding loans and expirations of insurance commitments permit reuse of the original authority. Limitations on such programs are ordinarily in terms of maximum amounts of loans outstanding, maximum borrowings from the Treasury, or maximum amounts of insurance or guaranty liability. Leading examples include almost all lending programs of Government corporations and the insurance programs of the Federal Housing Administration.

[1] Not available.

In the case of several noncorporate loan and loan insurance programs a maximum limitation is placed upon the total volume of loans and loan insurance commitments. Funds collected on such loans and expirations of such insurance are not available for reuse. Typical examples are the direct loan program of the Rural Electrification Administration and the direct loan and insurance program of the Farmers' Home Administration.

A few programs are not governed by any specific dollar limitations. These are limited only indirectly by the provisions of the statute or of the agency's regulations governing eligibility for Federal credit assistance. The amount committed depends primarily on the number of applications. The most important example is the loan guaranty and insurance program of the Veterans Administration. The loan guaranties authorized under section 301 of the Defense Production Act are also not specifically limited.

In the case of both the Commodity Credit Corporation and lending programs under the Defense Production Act, loans are financed from obligational authority which also finances nonlending programs. For the purposes of this analysis, the net authority available at the beginning of the year for these loan programs is set equal to the total available authority after deducting authority committed for nonlending programs. An exception is made for the Foreign Operations Administration, because its dollar loans account for only a small and indefinite part of the total assistance given under the mutual security program in 1955 and 1956. Its authority at the beginning of the year is, therefore, shown as equal to loans outstanding and undisbursed commitments at the beginning of the year.

Credit authority available at the beginning of the fiscal year 1956 is estimated at $64.5 billion (table 6). New commitment authority of $8.2 billion is estimated to become available during the year. On the other hand, estimated expirations, certain repayments, and other reductions in outstanding authority amount to $3.9 billion. The net authority available at the end of the fiscal year 1956 is, therefore, estimated at $68.8 billion.

Charges against authority.—In addition to the $56.7 billion of outstanding loans and guaranties (shown in detail in table 4 but excluding here the portion of private loans not guaranteed or insured by the Federal Government), charges against the available authority include undisbursed commitments. These are expected to total $6.8 billion on June 30, 1956.

Uncommitted authority.—For major Federal credit programs as a whole, commitment authority at the end of the fiscal year 1956 is estimated to exceed charges against the authority by $5.3 billion. Of this unused lending authority, $1.5 billion is accounted for by the Commodity Credit Corporation, an additional $1.5 billion by the Export-Import Bank, and the remainder almost entirely by several programs administered by the Housing and Home Finance Agency.

Since the indefinite authority of loan guaranty programs not subject to specific limitations is shown as equal

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

to charges against the authority, the total uncommitted authority in table 6 does not reflect the fact that these guaranty programs could be expanded substantially under presently available authority. However, about 70 percent of the cumulative authority is subject to definite limitations.

Since this analysis is limited to major active or liquidating credit programs, substantial amounts of uncommitted standby authority of other programs are excluded. The most important examples are the $3 billion borrowing authority for the Federal Deposit Insurance Corporation, $1 billion for the Federal home loan banks, and $750 million for the Federal Savings and Loan Insurance Corportation. These are unlikely to be used unless a national financial emergency occurs.

Quasi-Public Credit Programs

The Federal Government also has a measure of responsibility for the credit programs of certain mixed-ownership corporations and other public agencies operating in whole or in part with private funds. The most important are the banks for cooperatives, the Federal land banks, the Federal home loan banks, the Federal Reserve banks, and the newly established secondary mortgage market activity of the Federal National Mortgage Association.

The 12 regional banks for cooperatives make loans to agricultural cooperatives. Most of the stock in the banks is still owned by the Federal Government and the banks are supervised by the Farm Credit Administration. Loans outstanding at the end of the fiscal year 1954 were $305 million, compared to $319 million in 1953.

The 12 Federal land banks are now privately owned, but are sponsored by the Government and operate under the supervision of the Farm Credit Administration. These banks provide mortgage credit to farmers at relatively low interest rates through individual national farm loan associations. The amount of loans outstanding at the end of 1954 was $1,242 million, compared with $1,136 million a year earlier.

The 11 Federal home-loan banks are also now privately owned, but are supervised by the Home Loan Bank Board and have authority to borrow $1 billion from the Treasury, if necessary. These banks make both short-term and long-term advances to member savings and loan associations on the security of home mortgages or Treasury obligations, as well as unsecured short-term loans. Advances outstanding on June 30, 1954, were $675 million.

All of the stock in the 12 Federal Reserve banks is provided by the member banks, but the policies of the Federal Reserve System are controlled by the Board of Governors. Moreover, the Reserve banks, after paying 6 percent dividends to the member banks, pay 90 percent of their remaining profits to the Treasury, and their entire surplus reverts to the Treasury in the event of liquidation. As part of their normal central banking functions, the Reserve banks stand ready to make short-term discounts and advances for member institutions and also have a small program of direct loans to industry. The amount of discounts, advances, and industrial loans outstanding on June 30, 1954, was $38 million with discounts and advances seasonally low on that date. One month later, they were $185 million.

The Housing Act of 1954 established as a part of the new Federal National Mortgage Association a fiscally separate unit, partially privately financed, to engage in secondary mortgage market operations. The new unit is intended to help make mortgage funds available throughout the country at market rates of interest. It may purchase only Government insured and guaranteed mortgages meeting the usual standards of private investors, and its operations must be self-supporting. The activity is financed initially by a Government stock subscription of approximately $92 million transferred from the earlier Association; private mortgage sellers are also required to buy stock, with provision for ultimate retirement of the Government stock. The Association may issue unguaranteed debentures; the Secretary of the Treasury may purchase up to $1 billion of these. It is estimated that at the end of 1956, its portfolio of mortgages will total $168 million.

Major Agencies or Programs

HOUSING AND HOME FINANCE AGENCY

Five major credit programs of the Housing and Home Finance Agency are included in this analysis. In addition, there are a number of minor programs—most of which are in liquidation—which are administered in the Agency.

Federal National Mortgage Association.—Under the Housing Act of 1954, the Federal National Mortgage Association was reconstituted as three fiscally independent activities—for secondary market operations, special assistance functions, and management and liquidating functions—under a single management. The secondary market activity is discussed above as a quasi-public credit program because of its partially private ownership.

The special assistance activity is intended to assist groups or areas otherwise unable to obtain private financing and to help prevent declines in housing activity. Authority is provided by transfer from the old Association to make advance commitments, and to purchase $200 million in mortgages. In addition the Association can purchase $100 million in immediate participations of 20 percent in mortgages and make deferred participation agreements to purchase the remaining 80 percent of such mortgages in case of default. This activity in 1955 and 1956 will be largely directed toward supporting the construction and rehabilitation of housing in urban renewal areas. New commitments in 1956 are estimated at $61 million in mortgages, $102 million in immediate participations and $406 million in deferred participations.

The management and liquidating activity of the new Federal National Mortgage Association consists of the liquidation of the $3 billion in mortgages and undisbursed commitments of the predecessor association. No new commitments can be made and mortgage purchase authority expires as mortgages are sold or repaid. Authority is provided to substitute private financing for Treasury borrowing through the sale of unguaranteed debentures. Because of the large volume of undisbursed commitments, mortgage purchases under the management and liquidating activity rise to $628 million in 1955, falling in 1956 to $102 million. The outstanding mortgage portfolio at the end of 1956 is estimated at $2,263 million compared with $2,555 million at the end of 1955.

Slum clearance and urban renewal.—Under the Housing Act of 1954, the Housing and Home Finance Administrator is authorized to make loans and grants to local public agencies for the planning and execution of slum clearance and urban renewal projects. Loans are made to cover the cost of project planning, and for the temporary financing of project development. In addition, private temporary loans may be guaranteed through the pledge by local agencies of the Federal loan commitment.

Digitized for FRASER

Federal Reserve Bank of St. Louis

Borrowing authority of $1 billion is available for these purposes.

The level of loan activity is determined primarily by the number of projects in the development stage. Planning has been completed in an increasing number of communities and projects have entered the actual development stage, so that financing needs are increasing. New loan commitments are estimated to increase from $55 million in 1954 to $138 million in 1955 and $283 million in 1956. Net loan expenditures are expected, however, to remain at relatively low levels because of the short-term maturity of the loans, and the increasing use of guaranteed private financing in lieu of direct Federal loans.

The current interest rate on these loans is 2⅝ percent. Administrative expenses are financed from a separate appropriation.

College housing loans.—The Housing and Home Finance Administrator is authorized under the Housing Act of 1950 to make 40-year loans to colleges and universities for the construction of dormitories and student and faculty homes. The President has thus far released $200 million of the available commitment authority of $300 million and the budget assumes the release of an additional $25 million in 1956. It is estimated that at the end of 1956 there will be $117 million in loans outstanding and $38 million of undisbursed commitments. Virtually all of the remaining authority will be reserved for institutions which have applications in process.

The interest rate on new loans is 3¼ percent. Loans are made only if the borrower is unable to obtain private financing at 3⅛ percent or less. As a result of efforts to interest private lenders in these loans, commitments canceled because of private financing totaled $9 million in 1954 and are estimated at $16 million in 1955 and $30 million in 1956.

Federal Housing Administration.—The Federal Housing Administration is authorized to insure against default (*a*) the full principal amount of a wide variety of mortgage loans on new and existing housing, and (*b*) up to 90 percent of the principal amount on unsecured home improvement loans. The basic program for 1- to 4-family housing accounts for the bulk of mortgage insurance activity, but insurance is also provided for mortgages on rental housing, housing under cooperative ownership, and housing on military reservations and in critical defense areas. Approximately 18 percent of all outstanding home mortgages are insured by the Administration.

New insurance commitments, chiefly on mortgages, are expected to rise sharply in 1955 and 1956 as a result of (*a*) higher loan-to-value ratios and longer maturities permitted by the Housing Act of 1954, (*b*) three new and more liberal mortgage insurance programs for housing in urban renewal areas, for displaced slum dwellers and for servicemen, authorized by the same act, and (*c*) the easing of the mortgage market since early 1954. In 1956, it is estimated that commitments will be made for insurance of mortgages on nearly 800,000 homes and for 1,500,000 home improvement loans.

The Administration's program is fully self-supporting. Insurance premiums, fees, and other income will cover all current expenses and add substantially to the reserve against future losses. The current maximum interest rate is 4½ percent for insured home mortgages and 4¼ percent for mortgages on rental housing, exclusive of the insurance premium.

Public Housing Administration.—Under the Housing Act of 1949, the Public Housing Administration makes loans and grants to assist local authorities in the construction of low-rent public housing. These loans and grants are made under annual contribution contracts between the Administration and local authorities. The annual contribution contracts provide for (1) loan commitments by the Administration not to exceed 90 percent of project development costs, and (2) the payment of annual Federal contributions over a 40-year period to cover debt service on the bonds used to finance the project permanently.

Commitments under annual contribution contracts are either disbursed as direct Federal advances or used to guarantee private temporary loans. Most frequently, a direct Federal advance is made initially and later refunded with guaranteed financing. Ordinarily long-term bonds are sold to private investors prior to completion of construction, and all temporary financing, both direct and guaranteed, is retired. However, under some circumstances, the period of temporary financing may be indefinitely extended. The Administration's borrowing authority for these purposes is $1.5 billion. Because of the decline in the number of units under construction, the volume of temporary financing, including both public and private loans, will decline during 1955 and 1956. During 1954, most of the Public Housing Administration portfolio was refunded with private loans; holdings will have been reduced by 1956 to minimum levels reflecting current program requirements.

Prior to completion of construction, the units are permanently financed by the local housing authority through the sale of 40-year serial bonds to private investors. While not directly guaranteed by the Federal Government, these local housing authority bonds are treated in this analysis as guaranteed obligations by virtue of the Government contract to pay annual contributions covering debt service. The outstanding permanent financing is expected to increase from $1.3 billion at the end of 1954 to $2.4 billion by the end of 1956, reflecting the completion and permanent financing of a large number of units started in earlier years.

On direct Federal loans, local authorities are charged at the present time an interest rate of 2⅝ percent. In recent months interest rates on private temporary loans have been less than 1 percent and on long-term loans have ranged between 2⅕ and 2½ percent, depending primarily on variations in market rates of interest.

VETERANS ADMINISTRATION

This analysis includes the loan guaranty and insurance programs and the direct housing loan program authorized under the Servicemen's Readjustment Act of 1944, as amended. It excludes minor lending activities of the Veterans Administration, such as the policy loans made by the veterans' life insurance funds and a few very small inactive programs.

Loan guaranties and insurance.—The Administrator of Veterans' Affairs guarantees housing, business, and farm loans made by private lenders to World War II and Korean War veterans. By June 30, 1954, approximately 3,720,000 loans of all types had been guaranteed, of which 92 percent were for homes, 6 percent for business, and 2 percent for farms; currently housing loans account for nearly 99 percent. It is estimated that loan guaranties approved will increase from 333,000 in the fiscal year 1954 to 465,000 in 1956. This increase reflects the greater demand for housing and the increased availability of mortgage credit. There is no statutory limit on the total

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

amount of the loans. The maximum interest rate on guaranteed or insured loans is 4½ percent.

Under existing legislation, the Government is liable for all losses on most loans up to 60 percent of the principal amount, or $7,500, whichever is less. No charge is made by the Government for its guaranty. Administrative expenses are paid from the general operating expenses appropriation of the Veterans Administration and claims are paid from a general appropriation for veterans' readjustment benefits. Net losses on claims paid up to June 30, 1954, amounted to about $32 million.

Direct housing loans.—In areas where the guaranty program is ineffective because of lack of private loans at 4½ percent interest, the Veterans' Administrator may make loans directly to veterans for the purchase or construction of homes (including farm housing) at 4½ percent interest. It is estimated that by June 30, 1955, about 79,000 direct loans will have been made. The present law expires on June 30, 1955, but the President is recommending its extension until July 25, 1957, the expiration date for the loan guaranty and insurance program for World War II veterans.

DEPARTMENT OF AGRICULTURE

Four major credit programs of the Department of Agriculture are included in this analysis.

Rural Electrification Administration.—Since 1935, the Rural Electrification Administration has been making loans with 35-year maturities, chiefly to cooperatives, to finance construction of electrical distribution, transmission, and generating facilities to serve rural areas without central-station service. Since 1950, similar loans have been made to finance construction and improvement of rural telephone systems.

New obligational authority is provided annually in the budget to finance these programs. New commitments for 1956 will be $265 million, compared to $240 million in 1955. Higher commitments are anticipated in both the electrification and the telephone programs. The great bulk of expenditures in 1956 will arise from commitments made in previous years; undisbursed commitments of $626 million at the end of 1956 will be the basis for disbursements for nearly 3 years, on the average.

Interest rates are set by statute at 2 percent, somewhat below the present cost of long-term money to the Treasury of about 2½ percent. Administrative expenses are financed by a separate appropriation. Collections of principal and interest are deposited in miscellaneous receipts of the Treasury. Out of a total of about $2.4 billion of loans so far, losses have been less than $50,000.

Farmers' Home Administration.—The Farmers' Home Administration makes loans to farmers unable to obtain credit from other sources for farm operating expenses and crop production, farm ownership and improvement, and for soil and water conservation activities. Loans are intended to strengthen the family-type farm and encourage better farming methods. These loan programs are financed by annual authorizations. The Administration may also insure a maximum of $100 million a year in long-term mortgage loans under the farm ownership program and a maximum of $25 million a year under the soil and water loan program.

Although new direct loan commitments of $147 million in 1956 will be at a slightly lower level than in 1955, the volume of loans insured by the Administration is expected to increase from $33 million in 1955 to $70 million in 1956. This increase results from the greater attractiveness of insured loans to private lenders as a result of higher interest rates authorized in recent legislation. The Secretary of Agriculture has authorized interest rates on insured farm ownership and soil and water loans of 4½ percent, of which one-half percent represents the insurance premium and one-half percent a charge for administrative expenses.

The interest rate on most of the direct loans is 5 percent. Administrative expenses are covered by separate appropriations. Collections of interest and principal go into miscellaneous receipts of the Treasury.

Commodity Credit Corporation.—In carrying out the Government's program of supporting prices of agricultural commodities, the Commodity Credit Corporation makes direct loans to farmers, guarantees loans made by private lending agencies, and issues certificates of interest in its loans to private banks. Loans and guaranties enable farmers to market their commodities in an orderly manner and secure prices for such commodities in line with the standards set forth in law. All loans are backed by commodities and borrowers may discharge their obligations without personal liability by turning over pledged commodities to the Corporation. These forfeitures of collateral are treated as repayments of loans in this analysis. The Corporation also makes loans for the construction or improvement of farm-storage facilities.

The Corporation's borrowing authority was increased from $6,750 million to $10 billion during 1954 and 1955. No additional borrowing authority is requested for price support activities in 1956. However, a $190 million appropriation will be needed to restore the impairment of the Corporation's capital resulting from 1954 operations and from advances made to finance certain 1954 programs of the Department of Agriculture. New commitments in the fiscal year 1956 are estimated at $2,069 million as compared with $2,400 million in 1955. Repayments of direct loans in 1956 are estimated at $2,741 million, almost identical to estimated disbursements.

Less use will be made of private financing in the 1956 price support program than in 1955. Present indications are that a smaller volume of commodity loans will be available in 1956 to serve as collateral for certificates of interest to be sold to private lenders. This will not affect the Corporation's use of borrowing authority, but will increase direct expenditures by an amount equal to the decline in outstanding certificates of interest.

In line with the trend of interest rates on short-term Government and private borrowings, the Corporation reduced interest rates on 1954 crop loans from 4 to 3½ percent; the lender's share in the case of guaranties was established at 1¾ percent, plus service charges.

Disaster loans.—The Secretary of Agriculture has a revolving fund administered through the Farmers' Home Administration from which emergency loans may be made to farmers and stockmen suffering from production disasters and unable to obtain credit from other sources. As a part of the emergency drought assistance program of the current fiscal year, the Congress made available an additional $90 million for disaster loans at 3 percent interest, and for special livestock loans at 5 percent interest. New commitments in 1956 are expected to be less than one-half the 1954 and 1955 levels, and repayments are estimated to exceed disbursements by $38 million.

FARM CREDIT ADMINISTRATION

The Farm Credit Administration supervises the Federal intermediate credit banks, production credit corporations, the Federal Farm Mortgage Corporation (in liquidation), the Federal land banks, and the banks for cooperatives.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

All except the Federal intermediate credit banks are either quasi-public agencies or relatively inactive in extending credit.

Federal intermediate credit banks.—The 12 Federal intermediate credit banks extend credit to production credit associations and privately capitalized farm-lending institutions by discounting short-term notes to help finance the production needs of farmers. To finance their operations, the banks sell short-term debentures to the public. The banks may have obligations outstanding of not more than 10 times their capital and surplus. Their capital and surplus can be increased by additional subscriptions from a revolving fund in the Treasury. The total obligational authority of $1,098 million available on June 30, 1954, includes these potential increases in the banks' funds.

New commitments of these banks have risen steadily in recent years, mainly as a result of expanding farm production and rising costs. Reduced farm income and the resulting need to renew loans also have contributed to the rise in commitments. In 1956 they are expected to amount to $1,966 million, which is almost 10 percent higher than in 1954. Repayments, however, will nearly cover disbursements, with net expenditures estimated at $40 million.

Interest rates charged vary with the costs of funds to the individual banks, and on January 1, 1955, ranged from 1¾ to 2 percent. They are set high enough to cover all expenses. One-quarter of the net income of the banks is paid to the Treasury as a statutory franchise tax and the rest is added to their surplus and reserves, which on June 30, 1954, amounted to $50 million.

EXPANSION OF DEFENSE PRODUCTION

Under the Defense Production Act, the President is authorized to make loans or advances or to guarantee loans for expansion of defense production. Numerous agencies participate in these programs. The Defense Production Act expires on June 30, 1955, but the President has requested its extension for 2 years.

Loan guaranties.—Under section 301 of the Defense Production Act, the Departments of the Army, the Navy, the Air Force, Commerce, the Interior, and Agriculture, the Atomic Energy Commission, and the General Services Administration are authorized to guarantee loans by public or private financing institutions to defense contractors and subcontractors. The Federal Reserve banks act as fiscal agents for the guaranties of private loans, and the procedure is governed by the Federal Reserve Board's regulation V. No specific limitation is placed on the amount of loan guaranties.

From the beginning of the program in September 1950 to the end of December 1954, about 1,375 V-loans, totaling $2.5 billion were authorized by the procurement agencies. About 90 percent of the guaranties have been authorized by the Departments of the Air Force, the Army, and the Navy, primarily to speed the production of aircraft and aircraft parts, electronics and communication equipment, tanks, weapons, and ammunition. Guaranties by the General Services Administration to expand production of aluminum and other basic minerals and metals account for nearly all of the remainder. The volume of new commitments will continue to decline in 1956 as expansion goals are being reached.

To cover administrative expenses and possible losses, charges are made for guaranties, depending upon the proportion of the loan guaranteed. This proportion has averaged about 80 percent. The guaranteed portion of loans must be purchased by the procurement agency upon request of the lender. So far, income has substantially exceeded expenses.

Loans and advances.—Under section 302 of the Defense Production Act, the President is authorized to make direct loans or to participate in private loans for the expansion of industrial capacity, development of technological processes, or production of essential materials. The President has delegated this authority to the Treasury Department since the liquidation of the Reconstruction Finance Corporation, and to the Export-Import Bank. The authority is available for borrowers upon certification by the appropriate defense agency as to essentiality to the defense effort. Certifications of loans to the Reconstruction Finance Corporation totaled about $212 million on June 30, 1954, of which most was to assist in expanding the production of copper, steel, and other basic minerals and metals. Loans by the Export-Import Bank account for only a relatively small part of the total. No new commitments are anticipated in 1955 and 1956, since most of the planned expansion is already underway.

Under section 303 of the same act, the General Services Administration makes advances on purchase commitments for strategic minerals and metals and industrial equipment. No new advances are expected in 1955 and 1956.

Interest rates charged on both loans and advances are generally 5 percent. No net ultimate cost is expected.

SMALL BUSINESS ADMINISTRATION

The Small Business Administration was created on July 30, 1953, and since the expiration of the lending authority of the Reconstruction Finance Corporation on September 29, 1953, has been authorized to make loans to small business and to victims of disasters. The legislative authority for these programs expires on June 30, 1955, but the President has requested its extension.

Loans to small business are authorized up to a total of $150 million outstanding at any one time. The maximum loan to any one borrower is $150,000, and maximum maturity generally 10 years. Loans may be made only if financial assistance is not otherwise available on reasonable terms and if there is reasonable assurance of repayment. Moreover, direct loans are made only where the extension of credit jointly with private banks is not possible. The budget assumes that the 1955 level of about 1,200 loans will continue in 1956. More than two-thirds of the loans made so far have been made jointly with private banks. The current interest rate on small business loans is 6 percent.

The Administrator also has broad authority to make loans to victims of floods or other disasters. His policy is to designate disaster areas, residents of which are eligible for special financial assistance. There is no limit on the amount that may be loaned to each borrower, but the aggregate outstanding at any one time may not exceed $25 million. Loans for housing may have maturities up to 20 years, but other loans are limited to 10 years. Current interest rates are 3 percent for disaster housing loans, and 5 percent for other disaster loans. The Small Business Administration also administers disaster loans previously made by the Reconstruction Finance Corporation.

Appropriations of $80 million have been made to finance the small business and disaster loan programs since the agency was established. It is estimated that an additional $15 million will be needed to finance loans in 1955, and $65 million in 1956.

Federal Reserve Bank of St. Louis

TREASURY DEPARTMENT

The only credit programs administered by the Treasury Department and included in this analysis are the liquidation of Reconstruction Finance Corporation loans and the 1947 loan to the United Kingdom. The Treasury Department also makes a small amount of civil defense loans. The President has proposed that the Treasury be authorized to invest $35 million in 1956 as the United States share of the initial capital of a proposed International Finance Corporation.

Reconstruction Finance Corporation.—The Reconstruction Finance Corporation Liquidation Act terminated the authority of the Corporation to make new loan commitments on September 28, 1953, and provided for complete termination of the Corporation on June 30, 1954. The Corporation's foreign loans have been transferred for liquidation to the Export-Import Bank, certain mortgages to the Federal National Mortgage Association, disaster loans to the Small Business Administration, and business and public agency loans to the Treasury Department. During the 3-year period from June 30, 1953, to June 30, 1956, business loans and commitments will have been reduced from $458 million to about $53 million.

Loan to United Kingdom.—A loan of $3,750 million was made to the United Kingdom in 1947 and 1948. It is a 50-year loan at 2-percent interest. Repayments of principal have been made on schedule, beginning in 1951. They are deposited directly in miscellaneous receipts and are not available for new loans.

EXPORT-IMPORT BANK OF WASHINGTON

The Export-Import Bank is the principal foreign lending agency of the Government, with total lending and insurance authority of $5 billion. Its major function is the promotion of trade between the United States and foreign countries. It extends loans to finance American exports and imports and the development of sources of strategic materials, and to promote the economic development of underdeveloped countries. The Bank also acts as an agent for the Foreign Operations Administration in administering loans and makes a limited number of loans under authority of the Defense Production Act. In 1953 the Bank was authorized to use up to $100 million of its lending authority to insure American exporters against certain risks of expropriation and confiscation.

Increased emphasis is being placed by the Bank on guaranteeing loans, rather than making loans directly. The Bank has also instituted a system of extending lines of credit to approved exporters. Loan maturities vary from several months on export credits to a number of years on developmental loans. Interest rates vary with the type of loan and are directly related to prevailing yields on United States Government securities; they are lower on loans made to or guaranteed by a foreign government. Present rates range from 3½ percent on short-term export credits to 6 percent on certain long-term unguaranteed loans. Losses have been extremely small and income is more than adequate to cover costs; reserves amounting to $300 million on June 30, 1954, have been set aside for future contingencies. Annual dividends are being paid to the Treasury at the rate of 2¼ percent on capital stock.

FOREIGN OPERATIONS ADMINISTRATION

The Foreign Operations Administration and its predecessor organizations—the Economic Cooperation Administration, the Mutual Security Agency and the Technical Cooperation Administration—have made loans to foreign governments as part of a broad program to assist in the restoration of economic stability and to promote the economic development of underdeveloped areas in the free world.

More than half of the loans were made during 1949, shortly after passage of the Foreign Assistance Act of 1948. Most of the loans are administered by the Export-Import Bank as agent for the Foreign Operations Administration. Their maturities are 28 years, except a loan to India which is for 30 years, and basic materials development loans which are for 10 to 20 years. Interest charges on most outstanding loans are 2½ percent. However, interest on loans for the development of basic materials is generally 5 percent. Costs of administering the loans are financed from funds available for the general administration of the agency. The first significant repayments are expected in 1956.

Special Analysis F

FEDERAL ACTIVITIES IN PUBLIC WORKS AND OTHER CONSTRUCTION

Federal construction activities are an important part of the total construction activities of the Nation. Direct Federal construction currently constitutes about 9 percent of total construction, and federally aided State and local construction represents another 4 percent. In addition, substantial amounts of other public and private construction result from various types of Federal financial assistance to public and private organizations and to individuals. These Federal construction activities create demands for materials, equipment and labor which have an important bearing on the level of economic activity throughout the Nation, and have a direct effect on the total volume of construction. For these reasons an overall analysis of Federal construction activities is useful in an appraisal of this aspect of the Federal Government's program.

The following analysis describes the various Federal construction activities and presents, in the tables on pages 1183 to 1188, a summary of the authorizations and expenditures for direct Federal construction and for grant and loan programs to aid State and local construction. Detailed information on these activities is presented in part II of the budget under the agency responsible for the activity. A reconciliation of the public works expenditures with the major categories of special analysis D, entitled "Investment, operating, and other budget expenditures," is shown on page 1183.

The various programs of the Federal Government require a wide variety of facilities and structures. These range from small buildings to large river basin developments or military installations. Some of these facilities are provided directly by the Federal Government, either as civil or national security public works. In other cases the Government aids in the construction of non-Federal public works in which there is a national interest through loans or grants to States and local governments, or through participation in cooperative projects. The private construction industry builds most of these facilities and structures under contract with Federal, State, or local agencies.

The volume and types of Federal construction vary from year to year as national needs and objectives change. Economic and fiscal policies, the level of construction costs, and the magnitude of State, local, and private construction also affect the Federal program.

The expenditures shown for public works and other construction in this analysis are budget expenditures rather than the value of work put in place during the year. Although budget expenditures in a continuing program approximate the value of work put in place on federally owned projects, they include only the Federal portion of the cost of the State and local public works aided. Also, Federal expenditures do not reflect the substantial volume of private construction resulting from Federal incentives to industry and individuals.

Total Federal expenditures for public works are estimated at $4.2 billion for each of the fiscal years 1955 and 1956, as compared with $4.4 billion in 1954. Expenditures for national security public works are expected to increase slightly in 1956 over 1955, but will be materially below the level of 1954. In 1956, an increase in expenditures for military construction will more than offset a decrease in expenditures for atomic energy facilities. Civil public works expenditures are expected to decline slightly in 1956, but will be considerably larger than in 1954, due primarily to the large volume of refinancing in 1954 of low-rent housing loans by private capital, and the consequent large repayments to the Government. Other major changes in the Federal civil public works programs in 1956 are an increase in grants to States for Federal-aid highways and a decrease in expenditures for natural resources development.

TABLE 1.—*Total Federal public works expenditures*

[In millions]

Type	1954 actual	1955 estimate	1956 estimate
Civil public works:			
Federally owned projects	$1,273	$1,177	$977
Grants to State and local governments	720	822	886
Loans to State and local governments (net)	[a] 403	[a] 84	26
Total, civil public works	1,591	1,914	1,889
National security public works:			
Military public works	1,712	1,430	1,782
Atomic energy and other construction	1,092	834	511
Total, national security public works	2,803	2,263	2,293
Total, all Federal public works	4,394	4,177	4,182

[a] Deduct, excess of repayments over loans.

NOTE.—Totals may not add due to rounding.

In addition to expenditures for publicly owned civil and national security public works, an estimated $343 million will be spent in 1956 for Federal assistance to construction activities of various semipublic bodies and private nonprofit groups, as well as some international agencies.

Civil Public Works

The term "civil public works" as used in this analysis includes all those public construction activities, financed or aided by the Federal Government, which are required for the civil functions of the Nation, as distinguished from those works required for our national security programs. Recommendations for civil public works expenditures in 1956 reflect the administration's continued objective of reducing budget expenditures to the minimum level consistent with Federal responsibilities. This is being accomplished by relying on private initiative to the fullest possible extent, by encouraging State and local interests to formulate plans and to undertake developments on their own responsibility, by sharing in the development of resources where national responsibilities are involved, and by undertaking as Federal developments those essential projects which are beyond the capacity of local initiative, public or private.

As examples of this policy, the Federal Government is acquiring needed post offices and other public buildings by the lease-purchase of privately constructed facilities. Private refinancing of Federal loans for low-rent public housing is resulting in returns to the Public Housing Administration of capital funds advanced to finance the low-rent public housing program. Also, Federal participation in a number of Federal-local partnership projects is proposed for the development of water resources in 1956, and some comprehensive developments are proposed for Federal undertaking. The substantial increase in the Federal-aid highway program authorized in the 1954 Federal-Aid Highway Act recognizes the need to relieve critical highway congestion which seriously affects the Nation's commerce.

CONTINUING AND NEW WORK

Table 3 shows civil public works according to whether they are continuing or new, and indicates the amounts required after the fiscal year 1956 to complete the work programed in this budget.

Approximately 92 percent of the total expenditures for Federal civil public works in the fiscal year 1956 will be for projects and programs started in earlier years. Expenditures for continuation of this work in 1956 are estimated at $1.7 billion, with $6.7 billion required in later years to complete. Included in this continuing work are a number of large water resources projects which require several years to complete.

Expenditures for new projects and programs in 1956 are estimated at $156 million, with $2.5 billion required thereafter to complete. A total of 39 authorized water resources projects and 2 resumptions are recommended for starting in 1956 by the Bureau of Reclamation and the Corps of Engineers. Of these, 5 are irrigation or water supply projects of the Bureau of Reclamation. Included in the program of the Corps of Engineers are 10 new local flood protection projects and 1 resumption; 2 new flood control projects of broader scope; 14 new navigation projects and 1 resumption; and 8 beach erosion control projects. The budget also provides, under proposed legislation, for the Bureau of Reclamation to start the Upper Colorado River development in five Western States and the Fryingpan-Arkansas development in Colorado. In addition, funds are included under proposed legislation for Federal participation in 1956 in three State or local water resource projects, and it is contemplated that other partnership projects will be started as specific proposals are developed. A number of watershed protection projects will also be started in 1956, with Federal assistance under the Watershed Protection and Flood Prevention Act enacted last year.

The Federal Aid Highway Act of 1954 provides for a substantially enlarged highway construction program in the fiscal years 1956 and 1957. Other projects to be started include three veterans' hospitals, for which funds are currently available, new research facilities for the National Advisory Committee for Aeronautics, and a new Federal building in Alaska.

TABLE 3.—*Estimated cost of the 1956 civil public works program, by new and continuing work* [1]

[In millions]

Program	Total estimated cost	Expenditures		
		Cumulative to June 30, 1955	1956 estimate	Required to complete
Continuing work:				
Direct Federal construction:				
Corps of Engineers	$6,051.6	$3,296.3	$367.3	$2,388.0
Bureau of Reclamation	3,603.8	2,380.9	134.3	1,088.6

INVESTIGATIONS AND STATUS OF PLANNED AND AUTHORIZED PROJECTS

Efficient and economical design and construction of public works require adequate basic data and surveys and careful preparation of plans for these facilities prior to construction. Effective use of public works for countercyclical purposes also requires that they be planned well in advance so as to be available for undertaking when economic conditions and budgetary policy warrant. Construction expenditures in this analysis do not include costs of basic data collection and preliminary surveys; however, they do include detailed project planning costs.

Basic data.—The programs for collection of basic data, designed to meet a wide variety of nationally important needs, provide data for use in the preliminary planning and investigation of Federal and other construction projects. A total of $45 million is recommended in the fiscal year 1956 for general coverage data collection, including geodetic surveys and topographic mapping, geologic and soil surveys, and assembly of hydrologic and climatologic data.

Preliminary surveys.—Careful preliminary investigation to determine engineering and economic feasibility is required to produce well-conceived construction projects. Inadequate examination of the factors involved in project formulation before authorization may result in approval of projects having questionable justification or in seriously underestimating project costs. Appropriations and allotments totaling $10 million are recommended for the fiscal year 1956 for preliminary investigations of river basin and other construction programs. In addition, $1 million is included under proposed legislation for a survey to determine whether hydroelectric power can be economically developed from the tides of Passamaquoddy Bay.

The comprehensive interagency surveys of the Arkansas-White and Red River Basins and the New England-New York area, authorized by the 1950 Flood Control Act, are expected to be completed by June 30, 1955, except for the final processing of the survey reports.

Detailed planning.—Preparation of project plans in advance of construction provides for orderly programing of project construction and may prevent expensive changes in project designs during the construction period. Such planning also provides an opportunity to verify the economic feasibility and the relative merits of projects as well as the estimated costs, before construction is started. Funds for advance preparation of plans in the fiscal year 1956 are estimated at $13 million. This total includes $7 million to enable the Corps of Engineers and the Bureau of Reclamation to plan a limited number of high-priority projects already authorized by the Congress. In addition, a substantial amount of planning is carried on as construction progresses on large water resources projects.

The budget also provides $8.5 million for the Housing and Home Finance Agency for the purpose of advancing funds to State and local agencies to assist in the advance planning of their public works. This amount represents the remainder of the authorization provided in the Housing Act of 1954.

Authorized reserve.—An adequate authorized reserve of soundly conceived projects is necessary to permit a wise selection of projects for starting in accordance with program needs and economic and budgetary requirements. Agency reports indicate that, on the basis of present costs, $10.5 billion of work has been authorized, either by general or specific legislation, and is scheduled in the agencies' advance programs. About $8 billion of this authorized work is included in the river basin programs of the Corps of Engineers and the Bureau of Reclamation.

TABLE 4.—*Reserve of authorized projects and programs after fiscal year 1956, by agency*

	Total cost of projects (billions)
Projects authorized by specific legislation:	
Corps of Engineers	$5. 9
Bureau of Reclamation	2. 1
Other agencies	. 6
Projects or programs considered to be authorized by general legislation:	
Civil Aeronautics Administration	. 4
Forest Service	. 3
National Park Service	. 3
Fish and Wildlife Service	. 2
Other agencies	. 7
Total	10. 5

Planned projects.—By the end of fiscal year 1955, Federal agencies will have an estimated $1 billion of authorized Federal projects planned to a stage where construction could be started, and advance planning in various stages of completion on an additional $3.4 billion. Comparable totals for 1956 are estimated at $1.9 billion and $3.7 billion, respectively. Most of this planned reserve consists of water resources projects. By the end of 1956, the Corps of Engineers will have completed planning on about $858 million of work, and the Bureau of Reclamation about $297 million. In addition, the Corps of Engineers will have planning in process on another $2.2 billion of work, and the Bureau of Reclamation will have planning underway on $893 million of work. Also, a substantial amount of planning has been done by State and local agencies on highways, airports, and hospitals for which Federal grants are authorized.

PROGRAMS BY MAJOR FUNCTION AND TYPE OF FACILITY

Civil public works expenditures are listed in table 5 according to the major functions used in this budget for the classification of Federal programs, with subclassifications according to the type of facility involved. Most functions require some public works. In some cases, expenditures for such works represent only a small part of the total cost of the functional program. For example, expenditures in 1956 for construction under the agriculture function are estimated to be $21 million out of a total for the function of $2.3 billion. In contrast, about two-thirds of the expenditures under the natural resources function are for various types of construction. About 83 percent of the civil public works expenditures in 1956 will be for two major functions—natural resources and commerce and manpower.

The type of financial assistance to non-Federal interests for civil public works also varies among the functions. For example, the national interest in highway and air transportation is furthered by grants to State and local governments for highway and airport construction. On the other hand, low-rent housing construction is financed by loans to local public housing authorities.

NATURAL RESOURCES

The natural resources programs include the multiple-purpose control and development of rivers and streams for flood control, irrigation, hydroelectric power, municipal water supply and other purposes, and the conservation and development of land, forest, mineral, recreational, and fish and wildlife resources. Expenditures for these purposes will amount to $671 million in 1956, compared with $840 million in 1955. By far the largest proportion of these expenditures are for water resources developments.

Corps of Engineers.—The water resources program of the Corps of Engineers is nationwide in scope, except for the Tennessee Valley area. It involves the construction of multiple-purpose storage reservoirs for flood control, hydroelectric power and related purposes; the construction of protecting levees and flood walls; the improvement of channels; and beach erosion control works. Navigation projects of the Corps of Engineers are discussed in this analysis under the commerce and manpower section.

In 1956, construction will be continued on 20 multiple-purpose projects and on 72 predominantly flood-control projects. The multiple-purpose projects are widely distributed throughout the country. For flood control, emphasis will continue on protective works on the Mississippi River and its principal tributaries, particularly the Missouri. Large flood-control projects are also underway in the Los Angeles and Central Valley areas of California and in central and southern Florida. Twenty-five flood-control projects now underway will be substantially completed in 1956.

Ten new local flood protection projects, which will provide benefits primarily to urban and industrial areas, are recommended for starting in 1956. Resumption of work is also proposed on one local protection project. Five of the new local protection projects will be completed in 1956. The Eagle Gorge flood control reservoir project in the State of Washington, on which there will be substantial local contributions, and a major new feature of the lower Mississippi River flood control project to prevent diversion of the Mississippi into the Atchafalaya River and to protect very large existing investments, are also included in this budget.

Beach erosion control activities of the Corps of Engineers are limited to Federal participation in the cost of the protection and improvement of shores and beaches owned by States, municipalities, or other political subdivisions. The proposed 1956 appropriation for the Corps of Engineers will reimburse local interests for the Federal share of work accomplished through 1956 on eight projects.

Bureau of Reclamation.—The Bureau's program for development of water resources for irrigation and other purposes in the 17 Western States consists primarily of continuation of construction on 52 irrigation and power projects, including 22 units of the Missouri River Basin program. Six of these projects will be completed during the fiscal year 1956. Rehabilitation work on 8 reclamation projects constructed in prior years is also scheduled for the 1956 program. About two-thirds of the recommended funds will be for 9 major developments as follows: Central Valley and Solano projects in California, Columbia Basin in Washington, Palisades in Idaho, Weber Basin in Utah, Lower Marias in Montana, Bostwick division in Nebraska-Kansas, Glendo unit in Wyoming, and additions to the electric power transmission system in the Missouri River Basin.

Bureau of Reclamation facilities scheduled for completion in 1956 will provide full water supply for 126,900 new acres and supplemental water supply for 125,100 acres of presently irrigated lands.

The 1956 budget provides funds for starting five authorized irrigation and water supply projects by the Bureau of Reclamation. In the selection of these projects, consideration was given to more efficient utilization of available water supplies and to the proportion of the irrigation investment to be repaid by water users. In addition, funds are recommended under proposed legislation for the initiation of work on the Upper Colorado River Basin development and the Fryingpan-Arkansas development. The development of the Upper Colorado River Basin in the States of Arizona, Colorado, New Mexico, Utah, and Wyoming will assure the availability of water and power necessary for the economic growth of the region. The Fryingpan-Arkansas development in Colorado will divert

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

water from the Colorado River Basin to the Arkansas River Basin to augment existing water supplies. Total cost of these two major developments is estimated at $1.1 billion, with first-year expenditures of $5 million.

International Boundary and Water Commission.—The Commission participates with a similar agency of Mexico in the construction of water conservation and control facilities on the Rio Grande River. The 1956 program of the Commission consists of completion of construction on Falcon Dam and continuation of construction of Anzalduas Dam to be started in 1955. Total 1956 expenditures are estimated at $2.3 million.

Tennessee Valley Authority.—The water resources development program of the Authority is generally similar to the Corps of Engineers except that it is confined to the Tennessee River Basin. The agency also has a number of steam-electric generating stations with necessary distribution facilities, both completed and under construction, to assist in supplying the needs of consumers, including the Atomic Energy Commission, in the TVA power area. The 1956 program of the Authority provides for completion of 6 steam-electric and 2 hydroelectric generating units and construction of important additions to the transmission system. Budget expenditures for these public works are estimated at $80 million.

Summary of Federal electric power activities.—A large part of the construction under Federal water resource development programs includes provisions for generation of electric power. This power is produced by hydroelectric facilities included in multiple-purpose reservoir projects such as those constructed by the Corps of Engineers, Bureau of Reclamation and the Tennessee Valley Authority. In addition, the TVA has in operation and under construction steam-electric generating plants.

Generating capacity installed by Federal agencies now amounts to 14.07 million kilowatts, or about 14 percent of the total capacity of the class 1 utility systems in the United States. An additional 5 million kilowatts of capacity is scheduled for completion during the calendar years 1955 and 1956, which will bring the total Federal capacity to 19.07 million kilowatts. When all projects now under construction are completed, total capacity will be about 21.51 million kilowatts.

TABLE 6.—*Federal electric power generation presently scheduled (name-plate capacity)*

[Million kilowatts]

Agency	Dec. 31, 1954	Total scheduled
Corps of Engineers	2.91	6.73
Bureau of Reclamation	4.75	5.26
Tennessee Valley Authority	6.35	9.46
International Boundary and Water Commission	.06	.06
Total	14.07	21.51

In the fiscal year 1956 additional transmission lines required for the integration and marketing of federally produced power will be constructed by the Bonneville Power Administration, the Bureau of Reclamation and the Tennessee Valley Authority. A total of 1,230 miles of transmission lines will be added to existing Federal systems during that year, bringing the total in operation to about 26,900 miles.

Federal participation in partnership water resources projects.—In line with the administration's policy of participating with non-Federal interests in the development of water resources where national interests are involved, this budget includes $20 million under proposed legislation to enable the Bureau of Reclamation and the Corps of Engineers to participate in such cooperative projects. For example, it is expected that local interests will finance the power facilities for the Cougar and Green Peter-White Bridge projects in Oregon and the Rocky Reach project in Washington, and that the Federal Government will construct or finance the nonpower facilities such as flood control. Assistance will be given to other partnership projects as specific proposals are developed. In addition, provision will be made for cooperation in authorized partnership projects, such as Priest Rapids in Washington and Markham Ferry in Oklahoma, when satisfactory arrangements have been completed.

Summary of water resources and related development.—While the major part of water resources development is classified under the natural resources function, other water resource developments are carried out under programs for agriculture and agricultural resources and commerce and manpower. Expenditures for all of these water resources and related developments are brought together in table 7.

TABLE 7.—*Expenditures for water resources and related development* [1]

[In millions]

Type	Functional code No.	1954 actual	1955 estimate	1956 estimate
Predominantly single-purpose projects:				
Flood control works:

Federal Reserve Bank of St. Louis

Other natural resources programs.—Expenditures for other public works programs under the natural resources function will amount to $77 million in the fiscal year 1956, as compared with $64 million in 1955. Work under these programs includes construction of roads and trails in the national forests, national parks and on other public lands, and continuation of work on 6 national parkways. Provision is also made for the construction of buildings, utilities, and other facilities to help accommodate the increasing number of visitors at the 180 national park, monument and other areas. Construction by the Bureau of Indian Affairs includes work on almost 500 miles of roads and trails, on irrigation systems, and on buildings and utilities needed principally for the Indian educational program. Fish hatchery and other construction will be undertaken by the Fish and Wildlife Service, and the Bureau of Mines will continue construction of helium production facilities.

COMMERCE AND MANPOWER

The public works activities under this function include various transportation facilities, housing and community development, and construction of defense related industrial production facilities. Transportation facilities constructed or financed by the Federal Government include highways and roads, air and water navigation aids and facilities, and the Alaska Railroad. Expenditures for transportation facilities, amounting to $873 million, account for 46 percent of the expenditures for civil public works in 1956.

Public roads.—The Bureau of Public Roads administers a program of grants to States to aid in the construction of highways, and also constructs highways in the national forests and other public lands. The 1954 act provides $875 million in new contract authority for the Federal-aid highway program for each of the fiscal years 1956 and 1957, as compared with $575 million for each of the years 1954 and 1955. Expenditures under this program are estimated at $667 million in 1956, and, under the new authorizations, will continue to increase in later years. The Federal-aid highway systems now have a combined total length of about 698,000 miles. Other highway and road expenditures by this agency will provide in 1955 and 1956 for construction and improvement of some 1,000 miles of forest highways.

Water navigation aids and facilities.—The largest expenditures in this area are by the Corps of Engineers. Navigation projects of the Corps of Engineers include improvement of channels and harbors, construction of locks, dams, canals, and alteration of obstructive bridges, as well as navigation features of some multiple-purpose projects. In 1956, construction will be continued on 26 navigation projects, including 6 channel and harbor projects and 2 lock and dam projects which will be substantially completed in that year. Construction will be initiated on 14 new navigation projects and resumed on 1 project. The new projects include alteration of three obstructive bridges, widening of the Calumet-Sag Waterway in Illinois to accommodate the steadily increasing traffic, and dredging of the Delaware River channel between Philadelphia and Trenton, contingent upon completion of arrangements for adequate cost sharing in some form.

The Saint Lawrence Seaway Development Corporation is constructing that part of the Saint Lawrence Seaway which is in United States territory. Related navigation improvements will be built by Canada, and the power development of the Saint Lawrence River will be constructed by the State of New York and the Province of Ontario. Estimated Federal expenditures in 1956 on construction of the seaway amount to $22 million.

Other work in this category includes provision of navigation aids by the United States Coast Guard and transportation facilities by the Panama Canal Company. This Company will continue work on projects to increase the capacity of the Panama Canal and to convert electric generating and lock operating equipment from 25- to 60-cycle electric current.

Airports and air navigation and research facilities.—With the virtual completion of the $75 million wind tunnel in 1955, expenditures on research facilities by the National Advisory Committee for Aeronautics are expected to decrease to $16 million in 1956. New projects proposed for starting in the 1956 budget include special facilities for the investigation of nuclear propulsion problems and high-speed phenomena, as well as a number of improvements of existing facilities at the Committee's Langley, Ames, and Lewis laboratories. The total cost of these new facilities will be $13 million.

Grants-in-aid for construction of airports, and installation of air navigation facilities to implement the common civil-military Federal airway systems, administered by the Civil Aeronautics Administration, will require $35 million in 1956.

Other transportation facilities.—The Office of Territories will continue construction in 1956 on roads in Alaska and on the Alaska Railroad, and will spend $19 million for these purposes.

Housing and community facilities.—The Federal Government encourages the construction of low-rent public housing units through loans to local housing authorities. The 1956 budget provides for starting construction of 35,000 units. In addition, it is estimated that 25,000 units will be completed in that year. Other expenditures consist largely of payments on grant commitments for defense community facilities, loans for public facilities and provision of public works in Alaska.

Funds are also provided, under the Housing Act of 1954, for grants to municipalities to assist in community planning and for advances to State and local agencies for preparation of project plans.

Finance, commerce, and industry.—The Government-owned nickel plant at Nicaro, Cuba, is being expanded from 14,000 to 24,500 tons annual capacity of nickel production at a cost of $43 million, and will be completed by the end of fiscal 1956. Contracts have already been executed by General Services Administration.

VETERANS' SERVICES AND BENEFITS

During the fiscal year 1956 work will continue on the construction program for Veterans Administration hospitals authorized in 1947 and subsequent years. This program consists of 78 hospital projects to provide 38,420 beds, 12 projects for conversion of bed facilities at existing hospitals to accommodate other types of patients, a new regional office on a hospital site, and major alteration and renovation of existing hospitals and homes. Sixty-nine hospital projects and 10 conversion projects have been

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

completed. Five hospitals will be under construction in 1956, including three to be started during the year with funds provided in previous years. The 3 hospital starts are the new 1,000-bed hospitals at San Francisco, Calif., and Cleveland, Ohio, and a 680-bed addition to replace temporary construction at Long Beach, Calif.

Other activities under this function include work by the Quartermaster General of the Army to maintain existing monuments and cemeteries and to provide additional grave sites, and construction by the American Battle Monuments Commission on 14 cemeteries in foreign countries.

INTERNATIONAL AFFAIRS AND FINANCE

Public works activities under this function provide for the construction of office buildings for the United States Government abroad, for living quarters where necessary, and for radio facilities of the United States Information Agency.

WELFARE, HEALTH, AND EDUCATION

Health facilities.—The program of the Department of Health, Education, and Welfare for sharing in the costs of constructing non-Federal general hospitals and public health centers was expanded through legislation enacted in 1954 to include medical diagnostic and treatment centers, rehabilitation facilities, nursing homes and chronic disease hospitals. Only the grants made to public agencies are included in the public works section of this analysis; those for private nonprofit facilities are shown in table 8. Expenditures in 1956 for grants will amount to $29 million for general hospitals and public health centers and $26 million for other medical facilities. Total Federal assistance under these programs will have amounted to $456 million by the end of 1956 for facilities costing about $1.3 billion.

During 1954 responsibility for medical care and treatment of the Indian population was transferred to the Department of Health, Education, and Welfare. In fiscal year 1956, about $3 million will be spent on construction of additional medical and related facilities for the Indians.

The 1956 construction program for St. Elizabeths Hospital, Washington, D. C., includes completion of a new treatment building, a chapel, and major repair and rehabilitation work.

Education and research facilities.—Federal grants are made for school construction in defense areas and in districts burdened by Federal activities. These grants constitute the major part of public works expenditures for education, and are estimated at $94 million in 1956, compared with $134 million in 1955.

Construction of research facilities in 1956 will include completion of the radio laboratory building for the National Bureau of Standards at Boulder, Colo., and continuation of construction of a new geomagnetic observatory at Fredericksburg, Va., for the Coast and Geodetic Survey.

Prison facilities.—The Federal Prison System will continue construction in 1956 of the farm building program at 14 institutions, and the general rehabilitation and extension of facilities throughout the service. Other construction, by Federal Prison Industries, Incorporated, will provide maximum employment and training opportunities for prisoners.

AGRICULTURE AND AGRICULTURAL RESOURCES

The Department of Agriculture will continue the program of upstream conservation and flood-prevention work, including construction of diversion ditches, floodways, and floodwater-retarding structures in 11 watershed areas, authorized under the 1936 Flood Control Act, and in a number of small pilot watershed treatment areas for which funds were first appropriated for 1954. An increase in funds is provided for the program started in 1955 under the new Watershed Protection and Flood Prevention Act. Under this act the Department cooperates with States and local groups in installing works of improvement in small watersheds to prevent damages from soil erosion, floodwater, and sedimentation, and to further the conservation, development, utilization, and disposal of water. Total expenditures on works of improvement under these three programs will amount to $15 million in 1956.

Other construction work by the Department of Agriculture in 1956 includes completion of the Plum Island Animal Disease Laboratory in New York State, and completion of construction of grain storage facilities.

GENERAL GOVERNMENT

Public works classified under this function include the administrative buildings required to carry on the Government's business. The 1956 program of the General Services Administration, which constructs most of these facilities, contemplates the completion of various court facilities; a Federal supply and records building, Kansas City, Mo.; and work on two post offices in Chicago, Ill. Construction will be started on a new post office and court house at Nome, Alaska. The program also proposes the completion of acquisition of sites for which commitments have been made in prior years. Included also is a program of major replacements and improvements, both outside and inside the District of Columbia. In addition to the foregoing programs, the Congress, in 1954, provided authority to acquire needed Federal public buildings by means of lease-purchase agreements. This program is discussed in a later section on "Other Federal activities in construction."

Other direct Federal construction in this category includes work by the Weather Bureau on facilities at Cape Hatteras, N. C., and Canton Island in the Pacific Ocean.

In addition, the Federal Government provides assistance, through grants and loans, for construction of facilities in the Territories and the District of Columbia. The Office of Territories will assist in major repairs and rehabilitation of hospital facilities in Samoa, and rehabilitation or construction of schools, hospitals, powerplants and various other facilities in the Pacific Islands Trust Territory.

National Security Construction

Department of Defense, military public works.—The military public works program includes both overseas and domestic operational, tactical, logistical, training, and testing facilities for the Air Force, Army, and Navy. Additional facilities are also being constructed for the civilian components reserves and the National Guard. Construction of housing and operational buildings for the Alaska communications system is continuing. In fiscal years 1955 and 1956, emphasis will be placed on the further development of those Navy airfields used for training and for operation of jet aircraft.

The provision of shore facilities to serve the large type aircraft carriers now under construction will be continued.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

The Air Force will expand the aircraft control and warning system, and will continue the construction of additional continental air defense bases. The Army will concentrate on the completion of antiaircraft guided missile facilities, new overseas troop bases, and modernization of its existing troop bases at home. Expenditures for the above purposes are estimated at $1.4 billion in fiscal year 1955, and $1.8 billion in fiscal year 1956.

Atomic Energy Commission.—Expenditures by the Atomic Energy Commission for construction in 1956 will be chiefly for the large production plants started in prior years, but will be substantially less than in 1955 and 1954 as these plants approach completion. Work will continue also on the atomic power reactor at Shippingport, Pa., the very large particle accelerator at Brookhaven National Laboratory and other research and development facilities. New projects proposed for 1956 will include improvements to existing production plants, several prototype or developmental atomic reactors with associated facilities, a medical research center, additional weapons storage facilities, and some residential housing and community construction. No new obligational authority is required because existing unobligated balances are adequate to cover anticipated 1956 requirements.

Other Federal Activities in Construction

In addition to publicly owned civil and national security public works, there are other types of Federal activities, involving loans, loan guaranties, grants, or direct Federal expenditures, which affect construction. The distinguishing feature of these expenditures is that they contribute principally to the physical assets of international public bodies, of semipublic and private groups, or of individuals, whereas public works are limited both in the foregoing sections of this analysis and in special analysis D, "Investment, operating and other budget expenditures," to additions to Federal, State, and local governmental physical assets.

INTERNATIONAL AND SEMIPUBLIC WORKS

One important group of these programs consists of Federal assistance for international public works and semipublic works programs, shown in table 8.

TABLE 8.—*Federal expenditures for international and semipublic works (not including civil public works)*

[In millions]

Program	1954 actual	1955 estimate	1956 estimate
Rama Road, Nicaragua	(*)	$1.0	$3.0
Inter-American Highway	$2.7	4.6	5.8
The Philippines, grants for veterans' hospital construction	4.5	7.1	3.3
Grants for nonpublic hospital construction	40.5	36.1	45.0
Grants for hospital facilities in the District of Columbia	.5	1.7	.8
Rural Electrification Administration loans, gross	210.0	210.0	225.0
Loans to educational institutions, gross	34.9	40.8	28.2
Howard University, construction	1.7	5.0	7.0
Gallaudet College	(*)	.1	.6
Federal old-age and survivors insurance building (trust funds)	.1	.8	22.8
United States Soldiers' Home (trust funds)	4.4	1.7	1.1
Total	299.3	308.9	342.6

*Less than $50,000.

As part of our international responsibilities, the United States is helping to construct inter-American highways in Costa Rica and Nicaragua and to build hospitals in the Philippines for the veterans. Table 8 does not indicate the assistance given under the NATO and mutual security programs for the construction of facilities needed in the common defense.

The largest expenditures for semipublic works programs are those of the Rural Electrification Administration. This agency makes loans primarily to rural cooperatives to finance electrification facilities and rural telephones. Electrification loans approved through the calendar year 1954 total $2.9 billion. Approximately 92 percent of the farms in the United States now have central station electric service and the electrification program of this agency is, therefore, largely concerned with financing additional generating facilities and heavier distribution systems, required by increased customer demands. The telephone loan program was initiated in 1950 when only 38 percent of farms had telephones. About 460,000 subscribers will be provided with modern telephone service under approved loans now totaling $209 million.

Grants are made to States for construction of both public and privately owned hospital and other medical facilities. This program was expanded in 1954 to include nurses' homes, chronic disease hospitals, diagnostic clinics and other facilities. The grants for public facilities are classified as public works and are discussed elsewhere in this analysis. Grants for private facilities, most of them operated on a nonprofit basis, represent about 45 percent of total medical facilities grants and will amount to $45 million in 1956.

Under proposed legislation, the Federal Government will, in 1956, also encourage construction of more adequate medical facilities through the guarantee of private loans for such construction.

The Housing and Home Finance agency assists colleges and universities in arranging for the private financing of dormitory facilities, and provides loans for the construction of facilities in those instances where private financing is not available. Gross loans in 1956 are expected to amount to $32 million.

The Bureau of Old Age and Survivors Insurance will start construction in 1956 on a new building to house its central operations, to cost about $23 million. This building will be financed from the Federal Old Age and Survivors Insurance Trust Funds.

AIDS FOR PRIVATE CONSTRUCTION

Another group of Federal programs, consisting of loans, loan guaranties, tax concessions, and occasionally, grants, direct aid, and other incentives, stimulates construction by farmers, homeowners, and businesses. This construction adds up to an important segment of the Nation's total construction.

In the field of housing, the Federal Housing Administration and the Veterans Administration operate programs for the insurance or guarantee of mortgages on private homes, under which substantial amounts of private housing are financed. In 1956, increased private investment in housing will be encouraged through more liberal mortgage insurance, and the Federal Housing Administration will also insure mortgages on new and rehabilitated houses in urban blighted areas and on low-cost housing for families displaced by slum clearance.

The Farmers' Home Administration makes direct loans for farmhouses, buildings, and water facilities, and insures private loans for these purposes. The Department of Agriculture's program for watershed protection and flood prevention encourages construction of water-control structures on farmers' lands. The Commodity Credit

http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

Corporation makes loans for the construction or expansion of grain-storage facilities and provides storage-use guaranties to encourage commercial construction of such facilities.

The Congress, in 1954, provided authority to acquire needed Federal public buildings by means of lease-purchase agreements with private interests, rather than by direct Federal construction. Expenditures for planning and sites will amount to $3 million in 1956. Under this program the Federal Government will contract with private interests to construct needed new Government buildings, to remodel existing Government buildings, or to buy existing private buildings, with payments extending over a period of 10 to 25 years. At the end of the period the Federal Government will own the buildings.

Summary of Federal expenditures for public works according to categories used in special analysis D. "Investment, operating, and other budget expenditures"

Public works listed under—	1954 actual	1955 estimate	1956 estimate
Additions to Federal assets:			
Loans to State and local governments (net)	[a] $402	[a] $84	$27
Public works—sites and direct construction:			
Civil	1,273	1,177	977
National security	2,803	2,263	2,293
Expenditures for other developmental purposes: State and local physical assets: Grants-in-aid	720	822	886
Total public works	4,394	4,177	4,182

[a] Deduct, excess of repayments over loans.

Special Analysis G

FEDERAL AID TO STATE AND LOCAL GOVERNMENTS

Net budget expenditures for Federal aid in the fiscal year 1956 are estimated at $3,570 million, 6 percent of all Federal budget expenditures. This total, which includes grants-in-aid, revenues shared with the States or their subdivisions, and loans to States and other public bodies, is $320 million above the revised estimate for the same purposes in the current fiscal year. Individual programs are listed in the detailed table included in this special analysis.

Table 1 shows Federal-aid expenditures for the years 1948 through 1956 along with their relative budgetary importance for the Federal Government and the State and local governments.

TABLE 1.—*Federal-aid expenditures in relation to total Federal budget expenditures and total State-local revenues from their own sources*

Fiscal year	Federal expenditures for aid to State and local governments (millions)	Federal-aid expenditures as percent of—	
		Total Federal expenditures	State-local revenues[1]
1948	$1,657	5	8
1949	1,803	5	8
1950	2,269	6	10
1951	2,434	5	9
1952	2,604	4	9
1953	2,857	4	9
1954	2,657	4	8
1955 estimated	3,251	5	(2)
1956 estimated	3,570	6	(2)

[1] Based on compilations published by the governments division, Bureau of the Census.
[2] Not available.

The Commission on Intergovernmental Relations, established and continued by laws enacted in 1953 and 1954, is at present completing its studies of the division of responsibilities between the Federal Government and the State and local governments. It is giving particular attention to Federal grants-in-aid and other aids to States and their subdivisions, as well as tax sources, governmental functions, and intergovernmental tax immunities. It is scheduled to report to the President and the Congress during 1955.

General description.—Federal aid is a device of intergovernmental cooperation through which the Federal Government participates in selected State and local programs of national interest. Most Federal aid takes the form of grants-in-aid. In the estimates for the fiscal year 1956, net budget expenditures for grants total $3,435 million, including $58 million under proposed legislation; shared revenues total $76 million; and loans, $59 million.

Aid to the District of Columbia and the Territories is included in the total of Federal aid. Federal administrative expenses incurred in providing aid to State and local governments are excluded.

In the case of grants-in-aid, the Federal financial participation is not based on a particular service rendered specifically for the Federal Government by the State or local government, but instead supports a State or locally administered program. In most cases, the distribution of Federal funds among the States is determined by a formula set forth in the basic law.

The laws governing grants-in-aid programs contain provisions restricting Federal expenditures to specified purposes. States or local governments seeking to qualify for grants are usually required to meet certain conditions and standards on such matters as State or local financial participation, approval of State plans, the designation of an administering agency, a merit system of personnel selection, reporting system, and audits. In their details, these Federal requirements vary considerably among programs.

Legislation governing a few grants-in-aid programs permits aid to private nonprofit agencies or institutions. The hospital construction program of the Department of Health, Education, and Welfare is an illustration. It is estimated that 45 percent of Federal expenditures for this purpose in the fiscal year 1956 will be used for private hospitals and other private health facilities. The program, nevertheless, is one in which the States have a central role through the preparation of statewide programs, the approval of individual projects, and the channeling of the Federal payments. Therefore the entire amount authorized and spent for the program is included as Federal aid in this table, but the amount going to private institutions is also indicated separately. Payments for privately-owned hospital facilities in the District of Columbia are also included as Federal aid; they are part of a local hospital program and are in addition to aid received under the general State-aid hospital construction program.

On the other hand, certain Federal programs may incidentally involve grants to particular State or local governmental agencies, even though they are not primarily programs of grants-in-aid or loans to State or local governments. For example, the Public Health Service and National Science Foundation make research grants to colleges and universities, including some State and local institutions. These payments are not included in the tabulation.

Payments of unemployment allowances to military veterans of the Korean conflict and to former Federal civilian employees are considered direct Federal programs. The States, as a service to the Federal Government, make the benefit payments through their unemployment compensation offices as agents of the Federal Government, and their expenses of administration are paid by the Government as part of its general grants-in-aid for unemployment compensation and employment service administration. These administrative costs in the States are not separately identifiable and are therefore included in the Federal-aid total even though the benefit payments are excluded.

In a few instances, grants-in-kind are made, usually involving commodities, services, or structures; wherever these can be identified in the budget they have been included in this analysis. Principal among them are grants of agricultural commodities to schools and welfare departments. On the other hand, the donation of previously-acquired property or its sale at less than cost is not reflected. For example, the tabulation omits grants of surplus public housing properties to local agencies which, on the basis of original cost, are estimated at $45,589,000 in the fiscal year 1954, $52,141,000 in 1955, and $34,648,000 in 1956.

Shared revenues comprise (*a*) payments to States and localities of a portion of the proceeds from the sale of certain Federal property, products, and services; and (*b*) payment to the Territories of certain Federal tax collections derived within their boundaries or from transactions affecting them. Shared revenues from property and products are derived mainly from public lands in the west, and the Federal law usually requires that the State or local share be used for schools or for schools and roads in the county where the Federal lands are located. The payment of tax collections to the Territories (e. g., internal-

Federal Reserve Bank of St. Louis

revenue collections for Puerto Rico) are included in this analysis this year for the first time.

Loans are made to State or local governmental bodies by several Federal agencies for specified types of public improvements, such as low-rent public housing, slum clearance, and urban renewal, by the Housing and Home Finance Agency. Also included in the category of loans are certain advances made by the same agency for the planning of non-Federal public works; these advances are not repayable unless the planned projects are carried out. Advances are also made by the Federal Civil Defense Administration in the operation of its supply procurement fund, which represents a central purchasing operation for State and local civil defense stocks. Like the District of Columbia hospital program, part of the Alaska public works expenditures represents Federal advances of funds to be repaid by the government of the Territory.

Budget expenditures for loans in most cases are net amounts, representing for any year the gross amount of loans and advances minus credits for certain collections during the year. As estimated for the fiscal year 1956, gross disbursements for this purpose are estimated at $592 million, collections at $533 million and the net excess of loans over collections at $59 million. In a few cases, collections are not deducted from gross disbursements but, instead, are credited directly to miscellaneous receipts of the Treasury. These collections (which are shown in special analysis C as repayments of loans, by States, municipalities, and other public bodies) totaled $3,855,000 in the fiscal year 1954 and are estimated at $274,000 in 1955 and $124,000 in 1956. The decline results from a reclassification of certain programs for which the receipts are included after 1954 in public-enterprise funds.

Major programs.—In the budget estimates for the fiscal year 1956, grants to State and local governments account for three-quarters of all the expenditures estimated for welfare, health, and education, and about half of net budget expenditures for commerce and manpower.

The largest grant program is public assistance, for which the budget includes $1,400 million under existing laws and $20 million under proposed legislation to improve medical care for assistance recipients. The next largest grant is for the construction of highways, estimated at $669 million of expenditures in the fiscal year 1956.

Major nonconstruction grant programs, besides public assistance, include aid for school operation in areas especially affected by Federal activities, administrative costs of unemployment compensation and employment services, provision of school lunches and milk, public health services, vocational rehabilitation, and vocational education.

Major construction grant programs, besides Federal aid for highways, are for schools in areas especially affected by Federal activities, for hospitals and other health facilities, and for airports.

Legislation enacted during the past year expanded the scope of the vocational rehabilitation grants, increased the amount of this aid to States, and revised the formula governing the distribution of the funds among the States. In addition, the hospital construction program was broadened in scope to include other types of health facilities and the amount available for grants was increased.

Another development was introduction of the new school milk program which provides $50 million a year in the fiscal years 1955 and 1956 to encourage increased consumption of milk by schoolchildren. This is in addition to contributions of surplus commodities financed from the appropriation for the national school lunch program and from other appropriations. Expenditures from the school lunch appropriation in the fiscal years 1954 and 1955 include $67 million for cash payments to States and $15 million for commodities. The recommended appropriation for this program for 1956 covers only cash payments to the States and the costs of administration. However, the school milk program and distribution of other commodities, together with the school lunch appropriation, will make Federal support of the overall school lunch program larger than ever before.

This budget contains several new legislative proposals affecting Federal aid. In addition to the public assistance revision mentioned above, these comprise extension and revision of public health grants, including those for mental health and maternal and child health and welfare; grants for juvenile delinquency control, for strengthening State industrial safety programs, for water resources development, and for drainage of anthracite mines.

Factors affecting aid expenditures and allocations.—The amounts expended for most programs of Federal aid are subject to two kinds of limitation: The establishment of maximum amounts in the basic authorizing laws and the necessity for annual appropriations by the Congress. However, in the public assistance program the Federal payment is a reimbursement to the States of a portion of their expenditures. The amount paid to each State is determined by a statutory formula applied to actual caseloads and individual benefit rates established by the State. Consequently, the amount appropriated in advance does not necessarily limit the total of Federal payments for a given year. Congress customarily provides a deficiency appropriation if this is necessary to match the claims submitted by the States.

Most Federal grant-in-aid statutes provide for the allocation of money among the States according to formulas containing specified measures of need, such as population, per-capita income, the incidence of certain diseases, area, or road mileage. These formulas vary considerably from one program to another, depending on the nature of the activity or services for which the aid is given. A few grants are allocated to States as a percentage of State expenditures within specified statutory limitations. Other grants are distributed as an equal amount to each State. Some allocation formulas are statutory while others are established by the administering Federal agency on the basis of criteria listed in the laws.

The newly enacted vocational rehabilitation formula provides for variation by States in both the allotment of funds and the requisite matching share, in inverse proportion to per-capita income. Similar formulas are recommended in this budget for grants-in-aid in the field of health, including maternal and child health.

Citations to the basic laws are included in the pertinent appropriation language in part II of the budget, which also contains the appropriation accounts from which the detailed table in this analysis is compiled. Summary information about the formulas as well as the statutory citations for grants-in-aid and shared revenues are published annually by the Treasury Department in tabular form in the *Annual Report of the Secretary of the Treasury on the State of the Finances.*

Relationship to other budget figures.—All the amounts shown in this special analysis represent budget expenditures, as defined in the introduction to part I. In most cases, the expenditures in a given fiscal year correspond closely to the amount of the appropriation, but in some instances the expenditures for grants or loans are made from an appropriation which also finances direct Federal operations or Federal administrative expenses. When this occurs, the amounts tabulated in this analysis ordi-

Federal Reserve Bank of St. Louis

narily represent an estimate of that part of the expenditure which is paid as aid to State and local governments. Also, there are certain programs—chiefly construction—where there are substantial differences between appropriations (or other authority to incur obligations) for any year and expenditures in that year. This arises from the fact that construction projects usually cannot be completed and paid for within a fiscal year. In 1956, for example, the hospital construction and school construction programs of the Department of Health, Education, and Welfare show substantial differences between appropriation and expenditure estimates.

The detailed tabulation of Federal expenditures for aid to State and local governments is arranged according to the functional classification used in the budget message. In order that this analysis may be related readily to the analysis of investment, operating, and other budget expenditures presented in special analysis D, that tabulation shows separately in each category the amounts of Federal aid to State and local governments. In table 2, following, the Federal-aid programs are recapitulated to follow the outline of special analysis D.

TABLE 2.—*Expenditures for Federal aid to State and local governments classified as "Investment, operating, and other expenditures"*

[In millions]

Category	1954 actual	1955 estimate	1956 estimate
Additions to Federal assets: Loans to State and local governments	[a] $395	[a] $75	$59
Expenditures for other developmental purposes:			
State and local physical assets	734	838	897
Private physical assets	41	40	49
Education, training, and health	205	228	253
Research and development	13	20	26
Engineering and natural resource surveys		2	4
Total, other developmental purposes	993	1,128	1,229
Current expenses for aids and special services:			
Agriculture	171	226	263
Labor	203	195	247
Home owners and tenants	56	115	147
Veterans	6	7	8
Other aids and special services	1,524	1,538	1,505
Total, current expenses for aids and special services	1,960	2,081	2,170
Other services and current operating expenses: Shared revenues and grants-in-aid	99	117	113
Total, Federal aid to State and local governments	2,657	3,251	3,570

[a] Deduct, excess of repayments and collections over expenditures.

NOTE.—Slight differences in the totals in special analyses D and G result from rounding.

Similarly, table 3 relates this special analysis of Federal aid to special analysis F which tabulates budget expenditures for public works. About one-fourth of all Federal-aid expenditures is for public works, mostly public roads.

Other financial relationships.—Apart from grants-in-aid, loans, and shared revenues, many other Federal expenditures and policies affect the finances of State and local governments. Types of transactions not covered in the tabulation of aids include the following:

(*a*) Reimbursements for various specific services, such as payments to public educational institutions for tuition of veterans and of students from the Armed Forces and payments to local governments for care of Federal prisoners in local institutions.

(*b*) Contractual payments to public institutions for research and training in specified fields.

TABLE 3.—*Federal-aid expenditures for civil public works*

[In millions]

Type of aid and function	1954 actual	1955 estimate	1956 estimate
Grants-in-aid:			
Welfare, health, and education:			
Social security, welfare, and health [1]	$51	$44	$55
Education and general research	105	134	94
Agriculture and agricultural resources	6	12	13
Natural resources	[2]	[2]	20
Commerce and manpower:			
Transportation and communications	540	605	688
Housing and community development	18	19	8
General government		8	8
Total, grants-in-aid for public works	720	822	886
Loans and repayable advances:			
Welfare, health, and education: Social security, welfare, and health	1	4	6
Commerce and manpower: Housing and community development	[a] 405	[a] 91	8
General government	1	3	12
Total loans and repayable advances	[a] 403	[a] 84	26
Total, Federal aid to State and local governments for public works	317	738	912

[a] Deduct, excess of repayments and collections over expenditures.
[1] Does not include grants for construction of private nonprofit hospitals.
[2] Less than one-half million.

(*c*) The value of surplus educational and hospital supplies, materials, and equipment, and of housing and other real estate donated or sold at substantial discounts to State and local agencies. The surplus public housing mentioned earlier is in this category of omitted grants-in-kind.

(*d*) The payments of property taxes, or payments in lieu of property taxes, made upon Federal property under the provisions of nearly a score of laws. When such payments are based upon a percentage of revenues, however, as in the case of the Tennessee Valley Authority, they are included in the shared-revenue section of the table.

(*e*) The transfer to the unemployment trust fund of the excess of receipts from the Federal unemployment tax over operating costs of the Federal-State unemployment compensation and placement program. This annual transfer, first made in the fiscal year 1955 under legislation enacted last year, is devoted initially to setting up a reserve of $200 million from which loans can be made to States which deplete their own reserves for benefit payments. Such loans, if made, will be trust fund transactions and therefore would not be reflected in the tabulation of Federal aid.

Likewise, the table does not reflect various indirect financial benefits accruing to State and local governments, such as the lower interest rates which those governments may enjoy because of exemption from Federal income tax of interest paid on State and local debt; the indirect Federal guaranty of municipal obligations issued for low-rent housing and urban renewal; deductions of State and local income, property, and other taxes from personal and corporate incomes in computing Federal income tax; services which may be rendered to other governmental units by Federal agencies in the ordinary course of their operations; and some programs administered cooperatively for the purposes of both the State and Federal Governments, such as agricultural crop reporting or the National Guard.

Some of these financial benefits, of course, have counterparts in the form of services rendered or occasional payments made to the Federal Government by the States or their subdivisions.

Special Analysis H

FEDERAL RESEARCH AND DEVELOPMENT PROGRAMS

For the fiscal year 1956, net budget expenditures for research and development programs of the Federal Government are estimated at $2,218 million. This represents an increase of $147 million over 1955 and $123 million over 1954. Included in these amounts are expenditures for the conduct of research and for increase of research and development plant, as summarized in table 1.

Table 1.—*Total Federal research and development expenditures*

[In millions]

	1954 actual	1955 estimate	1956 estimate
Conduct of research and development	$1,844.5	$1,829.2	$1,966.4
Increase of research and development plant	250.2	241.8	251.3
Total	2,094.7	2,071.0	2,217.7

The largest share of the Federal research and development budget is devoted to military and related research and development in the major national security programs of the Department of Defense and the Atomic Energy Commission. This has increased substantially since the beginning of World War II. Other research has increased less rapidly but, as table 2 indicates, has not been subject to as much fluctuation.

Table 2.—*Division of Federal expenditures for research and development between major national security and other programs*

[In millions]

Fiscal year	Major national security	Other	Total
1940	$29	$68	$97
1941	152	70	222
1942	227	63	290
1943	534	76	610
1944	1,304	79	1,383
1945	1,511	95	1,606
1946	845	90	935
1947	807	109	916
1948	736	129	865
1949	938	159	1,097
1950	926	217	1,143
1951	1,125	217	1,342
1952	1,632	207	1,839
1953	1,908	200	2,108
1954	1,804	291	2,095
1955 (estimated)	1,746	325	2,071
1956 (estimated)	1,863	355	2,218

It is estimated that the expenditures of the Federal Government for research and development represent approximately half the total expenditures of the Nation for this purpose. Outside the Government, private industry spends the greatest amount, for research, with considerably lesser amounts provided from funds available to educational institutions, research institutes, and State and local governments.

Within the Federal Government, the National Science Foundation provides general coordination with respect to basic research. The Foundation is studying the scientific activities of the Nation as a basis for recommending to the President policies to strengthen the national scientific effort and to define the role of the Federal Government. Initial reports are expected during the coming year.

The amounts shown in this analysis include funds expended for basic research and for developmental and applied research (all of which are included in "conduct of research and development") and for research facilities. Basic research is estimated to account for less than 10 percent of the total.

Expenditures of the Government for the conduct of research and development comprise the costs of those activities in which the primary aim is to develop new knowledge or to apply existing knowledge to new uses. These activities may be performed in Government facilities or in the facilities of private or State or local government organizations using Federal funds in cooperative projects or through grants or contracts. Such organizations include universities, research institutes, and industrial concerns. Generally excluded from conduct of research are expenditures for routine testing, mapping and surveys, experimental production, information, and training activities. Several of the statistical programs shown in special analysis I are included also in this special analysis.

Expenditures for increase of research and development plant include amounts for physical facilities, such as land, buildings, or equipment, regardless of whether the facility is to be used by the Government or a private organization and regardless of where title rests.

Research and development expenditures of the Department of Defense account for 68 percent of the Federal total, and expenditures of the Atomic Energy Commission 16 percent. The remaining expenditures are distributed among other Government departments and agencies. The activities of the individual Federal agencies engaged in research and development are described below.

All expenditures shown in this special analysis are net budget expenditures as defined in the introduction to part I of the budget. They include estimated expenditures from supplemental appropriations proposed for later transs mittal to the Congress, as well as from appropriation previously enacted or recommended in this budget.

Department of Defense—Military Functions

The objective of the research and development programs of the Department of Defense is to make significant improvements in the weapons, equipment, and techniques of the Armed Forces. The principal emphasis continues to be on developments which will make possible wider and more effective use of the capabilities of nuclear weapons, and which, under conditions of atomic warfare, will improve the continental air defenses and increase the mobility of the combat forces. In each program, a major consideration is that the new weapons and equipment developed must be reliable and practical in operation and should, where possible, reduce the overall costs of military preparedness and operations. The Department of Defense program is primarily concerned with applied research and development, but some support is also given to basic research directly related to current development programs or likely to have future military significance.

Table 3 summarizes the Department of Defense expenditures shown in the detailed tables.

Table 3.—*Expenditures of the Department of Defense for research and development*

[In millions]

Functional classification	1954 actual	1955 estimate	1956 estimate
050 Major national security:			
Conduct of research and development	$1,384.8	$1,307.0	$1,368.9
Increase of research and development plant	145.2	150.0	150.0
Total, Department of Defense	1,530.0	1,457.0	1,518.9

CONDUCT OF RESEARCH AND DEVELOPMENT

The expenditures for conduct of research and development by the Department of Defense in this special analysis are the amounts covered in the research and development category of the Department's budget. This category includes contracts with industry and non-profit institutions and work conducted in the research and development laboratories and test stations of the Department. While estimates on this basis give a fair indication of the costs directly related to the Department's research and development program, they exclude substantial costs associated with research and development which are carried in other budget categories, such as pay and allowances of military personnel, production in quantity of prototypes of new weapons and equipment for test and evaluation, and procurement of certain standard supplies and military equipment used in research, development, and test activities. The construction of research and development facilities is included in the military public works category, discussed separately below.

TABLE 4.—*Expenditures of the military departments for conduct of research and development*

[In millions]

Military department	1954 actual	1955 estimate	1956 estimate
Army	$395.7	$372.0	$382.0
Navy	475.8	431.0	431.9
Air Force	513.3	504.0	550.0
Office of the Secretary of Defense			5.0
Total	1,384.8	1,307.0	1,368.9

The 1956 budget reflects changes in budgeting for research and development in the Department of Defense which are designed to facilitate management and to bring about greater uniformity among the three military departments in the classification of the programs and in the budgeting for indirect costs for the operation of research and development facilities. The expenditures shown in table 4 for the research and development category include $31.5 million in the fiscal year 1956 for indirect costs which in prior years were charged to other categories. Table 5 summarizes total obligations and expenditures for the major programs, adjusted to be fully comparable to the 1956 budget recommendations for new obligational authority.

TABLE 5.—*Obligations and expenditures, by program, of the Department of Defense for conduct of research and development*

[In millions]

Program	1954 actual	1955 estimate	1956 estimate
Obligations and New Obligational Authority			
1. Aircraft	$269.8	$263.0	$281.2
2. Guided missiles	231.4	254.1	242.4
3. Ships and small craft	59.6	68.4	72.5
4. Combat and support vehicles	19.9	21.5	18.4
5. Artillery and other weapons	13.0	9.5	8.2
6. Ammunition	122.6	125.2	119.5
7. Other equipment	124.6	127.2	136.1
8. Military sciences	173.5	190.1	186.8
9. Operation and management of facilities	266.3	325.1	340.5
Total planned obligations	1,280.7	1,384.1	1,405.6
Unobligated balance brought forward from prior year	−154.8	−193.9	−148.0
Unobligated balance carried forward to next year	193.9	148.0	77.3
Unobligated balance, estimated savings	85.1		
Emergency fund, Department of Defense		24.0	35.0
Total new obligational authority	1,404.9	1,362.2	1,369.9
Expenditures			
Total expenditures, research and development category	1,384.8	1,307.0	1,368.9
Amounts charged to other categories	31.4	43.5	22.0
Total expenditures (comparable to above)	1,416.2	1,350.5	1,390.9

NOTE.—Programs 1 through 6 include related equipment.

Expenditures of the Department for conduct of research and development, as shown above, will decline somewhat in 1955, as a result of major program revisions made in 1953 and 1954. They will increase again in 1956, because of higher outlays for the operation of test ranges and other facilities.

Within the Department of Defense, the research and development program is administered by the three military departments under the general direction of the Secretary of Defense. About 60 percent of the expenditures are for work performed under contracts with industry and nonprofit institutions; the remainder goes for work in Department of Defense facilities and for the administration of the entire program. The composition of the planned 1956 program is shown in table 6.

TABLE 6.—*Obligations and expenditures, by program, of the military departments for conduct of research and development in the fiscal year 1956*

[In millions]

Program	Army	Navy	Air Force	Total
Obligations and New Obligational Authority				
1. Aircraft	$17.6	$108.5	$155.1	$281.2
2. Guided missiles	75.6	61.8	105.0	242.4
3. Ships and small craft	.3	72.2		72.5
4. Combat and support vehicles	17.4		1.0	18.4
5. Artillery and other weapons	7.3	.9		8.2
6. Ammunition	44.4	58.3	16.8	119.5
7. Other equipment	57.3	27.0	51.8	136.1
8. Military sciences	66.9	57.6	62.3	186.8
9. Operation and management of facilities	80.7	45.6	214.2	340.5
Total planned obligations	367.5	431.9	606.2	1,405.6
Unobligated balance brought forward from prior year	−51.5	−5.0	−91.5	−148.0
Unobligated balance carried forward to next year	17.0	5.0	55.3	77.3
Total, new obligational authority, military departments	333.0	431.9	570.0	1,334.9
Emergency fund, Department of Defense				35.0
Total new obligational authority				1,369.9
Expenditures				
Total expenditures, research and development category, military departments	382.0	431.9	550.0	1,363.9
Amounts charged to other categories			22.0	22.0
Total expenditures comparable to above, military departments	382.0	431.9	572.0	1,385.9
Office of the Secretary of Defense				5.0
Total expenditures (comparable to above)				1,390.9

NOTE.—Programs 1 through 6 include related equipment.

1. *Aircraft and related equipment.*—This program supports the development of all types of piloted combat and support aircraft for the Air Force, Navy, and Marine Corps; small support aircraft for the Army; and related propulsion systems, armament, and other equipment.

2. *Guided missiles and related equipment.*—The programs of the three services in this field are for research and development of air-, surface-, and ship-launched guided missiles and pilotless aircraft systems for use against surface and air targets; target drones; and related equipment and components.

3. *Ships and small craft and related equipment.*—The Navy program includes research and development for ships, submarines, and small craft, and the related propulsion systems, armament, and other equipment. The Army program is for small craft for transport, reconnaissance, and assault use.

4. *Combat and support vehicles and related equipment.*—The Army program covers tanks, self-propelled artillery, amphibious vehicles, and other combat vehicles; general and special purpose support vehicles; and related equipment and components. The Air Force program is for special purpose vehicles and equipment.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

5. *Artillery and other weapons and related equipment.*—The Army program includes field guns, rocket launchers, small arms, and their equipment. The Navy has a small program for specialized weapons for the Marine Corps and Navy.

6. *Ammunition and related equipment.*—This program covers research and development of all types of ammunition items and components.

7. *Other equipment.*—Under this program the three services conduct research and development of communications, navigation, detection, warning, reconnaissance, training, medical, and other types of equipment not directly related to other programs.

8. *Military sciences.*—This covers the development of materials, components, and techniques not directly related to other programs and basic and applied scientific research of general applicability to military requirements.

9. *Operation and management of facilities.*—These amounts are for costs of research, development, and test facilities not charged directly to other programs.

INCREASE OF RESEARCH AND DEVELOPMENT PLANT

Expenditures shown in this analysis for increase of research and development plant of the Department of Defense include estimates of total public works construction at those installations which have research, development, or testing as their principal mission; and also estimates of that part of construction at other installations which is in support of the research and development program. The construction program for the fiscal year 1956 represents continuation of projects authorized in previous years and initiation of new projects for which authorization is to be requested. Minor increases of research and development plant are included in the estimates for conduct of research and development.

TABLE 7.—*Expenditures of the military departments for increase of research and development plant*

[In millions]

Military department	1954 actual	1955 estimate	1956 estimate
Army	$30.5	$35.0	$25.0
Navy	30.0	15.0	20.0
Air Force	84.7	100.0	105.0
Total	145.2	150.0	150.0

ATOMIC ENERGY COMMISSION

The Atomic Energy Commission conducts research in the physical and life sciences and carries on engineering development work. Its objectives are to promote the improvement of fissionable material production processes, the design of more effective weapons, the production of useful power from atomic energy, a better understanding of nuclear phenomena, and the protection of people and the environment against the hazards of atomic energy operations. This research and development work is performed at laboratories and other facilities owned by the Commission and operated by private contractors, as well as in universities and other institutions. Although much of the research effort is undertaken to meet military needs, it yields information which often contributes to progress in non-military fields. Moreover, a growing portion of the Commission's research program is devoted to developing peaceful applications of nuclear energy.

Table 8 indicates expenditures by major programs.

TABLE 8.—*Expenditures of the Atomic Energy Commission for research and development*

[In millions]

Functional classification and program	Conduct of research and development			Increase in research and development plant		
	1954 actual	1955 estimate	1956 estimate	1954 actual	1955 estimate	1956 estimate
050 Major national security:						
Production and weapons	$96.0	$87.1	$97.0	$4.2	$9.7	$8.3
Reactor development	70.6	84.9	112.6	23.2	18.3	27.8
Physical research	38.4	39.8	43.4	4.3	9.7	13.6
Biology and medicine	24.5	26.5	26.4	1.5	1.3	3.5
Equipment not included above				11.6	11.4	11.4
Total	229.5	238.3	279.4	44.8	50.4	64.6

The production and weapons research programs consist largely of work in the physical sciences and engineering to devise more efficient production processes and equipment, and improved and varied types of weapons.

Work in reactor development is devoted primarily to producing useful power from atomic reactors, both for the generation of industrial electric energy and for propulsion of naval ships and military aircraft. Substantially increased emphasis will be given in 1956 to the development of industrial atomic power at economic rates. More extensive cooperation between Government and industry in power reactor development is expected to speed accomplishment of this objective. Development of naval and aircraft propulsion reactors and small stationary power reactors is carried on in response to military needs. General development work on reactor materials and components, heat transfer systems, and related problems supplements the work on specific reactor designs and yields knowledge applicable to many reactor designs. Construction of experimental models and prototypes contributing to the development of specific reactor designs will increase in 1956.

The program of research in the physical sciences supports the Commission's immediate and longer-range objectives for utilizing nuclear energy. This research helps to provide a fundamental understanding of nuclear structure and forces. Basic to this effort is the development and operation of particle accelerators, including machines of very high energies. Expenditures for the construction of such machines will increase in 1956. Exploration is also made into the chemical, physical, and metallurgical properties of materials used in the Commission's program.

In the fields of biology and medicine, the research and development work of the Commission is devoted primarily to protecting the health and safety of personnel employed in the atomic energy program; safeguarding the Nation against radiation hazards peculiar to atomic energy operations; and exploiting the use of nuclear phenomena and radioisotopes in the biological and medical sciences for the general welfare. To facilitate this research, construction will begin in 1956 on a medical research center, including a medical reactor, which will replace the existing center at the Brookhaven National Laboratory, Upton, Long Island.

NATIONAL ADVISORY COMMITTEE FOR AERONAUTICS

The National Advisory Committee for Aeronautics conducts basic and applied research in the fields of aerodynamics, powerplants, aircraft structures, and aircraft operating problems.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

TABLE 9.—*Expenditures of the National Advisory Committee on Aeronautics for research and development*

[In millions]

Functional classification	1954 actual	1955 estimate	1956 estimate
450 Commerce and manpower	$89.5	$72.0	$76.0

This research is performed primarily in support of the military aircraft and guided missiles program of the Department of Defense, although much of it will also contribute ultimately to improving the performance and safety of commercial aviation. In addition, part of the Committee's current effort is devoted to resolving specific problems in connection with particular military aircraft, missiles, and engines. In order to provide additional effort in certain fields of critical military importance, an increase in expenditures for the conduct of research is planned, beginning in the current fiscal year. The total research and development expenditures of the Committee, however, will be substantially lower than in 1954 because of a drop in expenditures for research plant.

The Committee's work is carried on principally at its three major laboratories and two flight stations, supplemented to a limited extent by research sponsored at scientific and educational institutions and other Government agencies. Three large supersonic wind tunnels, constructed at the laboratories under authority of the Unitary Wind Tunnel Plan Act of 1949, are currently being completed and will be in operation throughout the fiscal year 1956. Additional facilities are proposed to permit further investigation of nuclear propulsion problems and high-speed flight phenomena.

DEPARTMENT OF AGRICULTURE

The research program of the Department of Agriculture is concerned with the production, storage, distribution, and utilization of agricultural products and with human nutrition and home economics. This program is carried out in facilities operated by the Department, through grants to State agricultural experiment stations, and in cooperative research projects chiefly with these stations.

TABLE 10.—*Expenditures of the Department of Agriculture for research and development*

[In millions]

Functional classification	1954 actual	1955 estimate	1956 estimate
350 Agricultural and agricultural resources	$53.7	$69.3	$78.6
400 Natural resources	4.5	6.0	6.2
Total, Department of Agriculture	58.2	75.3	84.8

The major portion of this program is administered by the Agricultural Research Service, which engages in or supports crop research, farm and land management research, livestock research, human nutrition and home economics research, and agricultural product utilization research. The only significant increase in agricultural research and development plant is in the Government research facilities now under construction at Plum Island, N. Y., for a comprehensive attack on foot-and-mouth disease and other dangerous diseases of animals.

The Agricultural Marketing Service carries on a substantial research program to study means of increasing the efficiency of distribution of agricultural commodities through better marketing practices, facilities, and equipment.

Another important research program of the Department is conducted by the Forest Service. The research has four main purposes: to provide owners and managers with a sound basis for protection, utilization, and management of the resources of timber, range, and watershed lands; to develop measures for the protection of forests from damage by fires, insects, and diseases; to improve forest products and prevent their waste; and to develop more efficient harvesting and utilization of forest products.

Other research activities of the Department are conducted by the Farmer Cooperative Service, which assists farmer-owned cooperatives in improving their business operations; and the Foreign Agricultural Service, which seeks to enlarge foreign markets for American agricultural products.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

The research and development activities of the Department place emphasis upon improvement in the health, education, and welfare of the Nation

TABLE 11.—*Expenditures of the Department of Health, Education, and Welfare for research and development*

[In millions]

Functional classification and program	1954 actual	1955 estimate	1956 estimate
Welfare, health, and education:			
200 Social security, welfare, and health:			
Public Health Service	$60.4	$65.4	$67.4
Other	1.1	1.1	1.2
300 Education and general research	.4	.4	.6
Commerce and manpower:			
250 Housing and community development		.1	.2
Total, Department of Health, Education, and Welfare	61.9	67.0	69.4

The principal research programs of the Department are in the Public Health Service. Research is also conducted by the Food and Drug Administration, the Office of Education, and the Social Security Administration. These functions are conducted in Federal facilities and through grants to universities and other research organizations.

The Public Health Service conducts or supports research in the diagnosis, cause, and treatment of illnesses of the population. Special emphasis upon medical and clinical research problems related to particular diseases is provided through activity conducted in the National Institutes of Health, organized as Institutes for Cancer, Heart, Mental Health, Dental Health, Arthritis and Metabolic Diseases, Microbiology, and Neurology and Blindness.

The increase in 1956 reflects further expansion of operations of the National Institutes of Health in the new clinical and laboratory facility. Research beds in use will increase from 373 at the end of the current fiscal year to 425 at the close of 1956. In addition, increases are provided for intensified research in mental health, nurse utilization studies, and water pollution.

Other units within the Public Health Service provide for research in methods to improve control of infectious and communicable diseases and such environmental health problems as sanitation, air pollution, and water pollution. Increases are provided for research in the problems of air and water pollution in 1956. The new facilities of the Robert A. Taft Sanitary Engineering Center will be available for work on these and other environmental problems. Efforts are also directed toward analysis and evaluation of professional health personnel utilization, supply and demand, and many other broad areas affecting the health of the Nation. Of the research expendi-

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

tures of the Public Health Service, about 60 percent is for research grants to medical schools, other institutions, and individuals. The remainder is for direct Federal research activities in Government facilities.

The Social Security Administration conducts research studies relating to children's health and welfare, retirement and old-age assistance, and social welfare. The research by the Food and Drug Administration is aimed chiefly toward development of improved test techniques and the formulation of standards of purity and safety for foods, drugs, therapeutic devices, cosmetics, and related products. The Office of Education studies major problems in the field of education, such as school facility requirements, analyses of trends in school enrollment, and educational financing. The 1956 budget includes expenditures under a new program of cooperative research in education with universities and State educational agencies.

Department of Commerce

Research activities of the Department of Commerce are centered chiefly in the Bureau of the Census, the National Bureau of Standards, and the Maritime Administration.

TABLE 12.—*Expenditures of the Department of Commerce for research and development*

[In millions]

Functional classification	1954 actual	1955 estimate	1956 estimate
Welfare, health, and education:			
300 Education and general research	$15.0	$33.8	$23.8
Commerce and manpower:			
450 Transportation and communication	3.1	8.5	11.9
500 Finance, commerce, and industry	1.0	1.0	1.2
General government:			
600 General government	.6	.5	.5
Total, Department of Commerce	19.7	43.8	37.4

As the principal fact-finding and statistical agency of the Federal Government, the Bureau of the Census takes major periodic censuses of population, housing, agriculture, business, and manufactures. The Bureau also collects and compiles current data based on sample surveys in these and other fields. As part of the governmentwide program to provide better statistics, increased expenditures are anticipated in 1956 to enlarge and improve certain of the Census Bureau's current series, including those relating to the labor force, and to provide for an intercensal survey of the Nation's housing. Total expenditures for the Bureau will, however, decline in 1956 as a result of completing the collection of data for periodic economic and agriculture censuses.

The National Bureau of Standards establishes and maintains the national standards of measurement and serves as a research center of the Federal Government in the physical sciences. To meet its responsibilities for the establishment, maintenance, and improvement of fundamental standards of measurement, the Bureau conducts basic and applied research and development programs in a number of fields of physical science, including electricity and electronics, optics and metrology, atomic and radiation physics, chemistry, mechanics, mineral products, building technology, applied mathematics, and radio propagation and standards. An increase in the Bureau's expenditures is estimated for the fiscal year 1956 to enable it to serve more adequately the scientific needs of industry, Federal agencies, State and local governments, and universities.

Major emphasis is being given by the Maritime Administration in 1955 to experimental modernization of four reserve fleet Liberty ships. This work will include lengthening of hulls and installation of new types of propulsion machinery and cargo handling gear to increase the efficiency of reserve fleet Liberty ships in the event of their need in national emergency. The 1956 budget provides for continuing these experiments and for expanding research in ship design and cargo handling. Development of a new tug prototype is also proposed.

Other research programs are administered in the Civil Aeronautics Administration, the Bureau of Public Roads, the Coast and Geodetic Survey, the Office of Business Economics, and the Bureau of Foreign Commerce.

Department of the Interior

The Department of the Interior devotes its research expenditures primarily to programs of the Bureau of Mines, the Geological Survey, and the Fish and Wildlife Service.

TABLE 13.—*Expenditures of the Department of the Interior for research and development*

[In millions]

Functional classification	1954 actual	1955 estimate	1956 estimate
Natural resources:			
400 Natural resources	$33.4	$32.0	$30.9
Commerce and manpower:			
550 Labor and manpower	.4	.4	.4
Total, Department of the Interior	33.8	32.4	31.3

The Bureau of Mines conducts research on industry problems involving coal, petroleum, natural gas, helium, and minerals; and also engages in research to improve the health and safe working conditions of miners. It investigates the coking properties of coals and uses of solid fuels including oil shale; it studies problems in the production, storage, and transportation of oil and natural gas; it investigates mineral deposits and carries on experiments to determine the most economical methods of treating marginal ores; and it seeks to improve the utilization of minerals and metals in plentiful supply and to develop substitutes for those in short supply.

Research by the Geological Survey is directed toward studies of mineral, mineral fuel, and water resources through field and laboratory research. A primary objective is the discovery and development of new principles and techniques which aid in the search for and full recovery of the Nation's mineral resources.

The Fish and Wildlife Service makes basic studies of the fish and wildlife resources of the Nation and the surrounding waters. It undertakes research to develop more effective methods of increasing the production of various species and of providing protection against unlimited exploitation and depletion of these resources.

Other research programs of the Department devoted to the conservation and development of our natural resources are administered by the Bonneville Power Administration, the Bureau of Reclamation, and the National Park Service.

National Science Foundation

Basic research is supported by the National Science Foundation in the mathematical, physical, medical, biological, engineering, and other sciences through a program of research grants. These grants are made to educational, industrial, governmental, and other research institutions or to individuals. The 1956 budget proposes a strengthening of basic research support through the Foundation in recognition of the urgent need for such research as a basis for future technological progress. The Congress recognized the need for increasing support of research by the Foundation by removing in the fiscal year 1954 the previous limitation of $15 million on annual appropriations.

Federal Reserve Bank of St. Louis

TABLE 14.—*Expenditures of the National Science Foundation for research and development*

[In millions]

Functional classification	1954 actual	1955 estimate	1956 estimate
Welfare, health, and education:			
300 Education and general research	$4.3	$7.3	$17.4

Executive Order 10521, issued March 17, 1954, focuses in the Foundation principal responsibility for support of general purpose basic research by the Federal Government. The order also emphasizes the responsibility of the Foundation to continue studies of the scientific activities of the country, as a basis for recommending to the President policies regarding the role of the Government in the conduct and support of scientific research.

In addition to its regular research activities, the Foundation is providing support for the United States program for the International Geophysical Year scheduled for 1957–58, a worldwide scientific undertaking involving concurrent research in geophysics by more than 30 nations. This undertaking involves securing and sharing on a multilateral basis scientific data which will assist our own technological advancement in such fields as weather forecasting and control, radio communications, navigation, and upper atmosphere flight. The United States program will be generally confined to the Western Hemisphere, including an anticipated expedition to the Antarctic. The expenditures in 1955 and 1956 reflect primarily advance procurement of major equipment and supply items which are needed to carry out the United States program.

GENERAL SERVICES ADMINISTRATION

Using funds available to the President under the Defense Production Act, the General Services Administration places contracts, primarily with private industry, for research and development to expand the supply of strategic and critical raw materials such as titanium and nickel. Small amounts are spent directly from General Services Administration appropriations for research in abaca fiber production.

TABLE 15.—*Expenditures of the General Services Administration for research and development*

From funds appropriated to the President for expansion of defense production	$1.8	$6.9	$14.0
Abaca fiber program		.1	.1
Total	1.8	7.0	14.1

Included in the research program for expansion of defense production are geological investigations of mineral deposits; methods of processing low-grade ores; development of substitutes for materials in short supply; and pilot plant testing of new processes for producing strategic and critical materials.

DEPARTMENT OF LABOR

The research of the Department of Labor is centered in the Bureau of Labor Statistics which collects, analyzes, and publishes labor and economic statistics on manpower and employment, prices and cost of living, wages and industrial relations, housing and public construction, measurement of productivity, industrial injuries, and foreign labor conditions. Additional expenditures in 1956 are principally attributable to expanded studies on the subjects of employment and unemployment.

TABLE 16.—*Expenditures of the Department of Labor for research and development*

[In millions]

Functional classification	1954 actual	1955 estimate	1956 estimate
Commerce and manpower:			
550 Labor and manpower	$5.6	$5.5	$6.9

TREASURY DEPARTMENT AND RECONSTRUCTION FINANCE CORPORATION

The research and development work of the Treasury Department is largely in the Federal Facilities Corporation. The Corporation engages in a program to maintain a technologically advanced and rapidly expandable domestic synthetic rubber producing industry adequate for national defense and essential civilian requirements. This program was previously administered by the Reconstruction Finance Corporation and expenditures in the fiscal year 1954 are shown for the earlier corporation. The Coast Guard and the Bureau of Engraving and Printing also make expenditures for research and development.

TABLE 17.—*Expenditures of the Treasury Department and Reconstruction Finance Corporation for research and development*

[In millions]

Functional classification	1954 actual	1955 estimate	1956 estimate
Commerce and manpower:			
450 Transportation and communication	$0.3	$0.3	$0.3

General government:			
600 General government	.2	.2	.2
Total, Treasury Department and Reconstruction Finance Corporation	5.3	4.7	4.7

TENNESSEE VALLEY AUTHORITY

The Tennessee Valley Authority conducts research to aid in the unified development of the resources of the Tennessee Valley region, to develop and test new or improved chemical fertilizers, and to improve the efficiency of its manufacturing and other operations.

TABLE 18.—*Expenditures of the Tennessee Valley Authority for research and development*

[In millions]

Functional classification	1954 actual	1955 estimate	1956 estimate
400 Natural resources	$2.2	$2.1	$2.2

OTHER AGENCIES

A number of other Federal agencies also conduct programs of research so that they may better perform their responsibilities. These include the Post Office Department, the Federal Civil Defense Administration, the United States Information Agency, the Federal Communications Commission, the Interstate Commerce Commission, the Smithsonian Institution, the Tariff Commission, and the Advisory Committee on Weather Control.

Special Analysis I

FEDERAL ECONOMIC STATISTICAL PROGRAMS

This analysis presents the current and recommended levels of the major economic statistical programs of the Federal Government. It is intended to facilitate evaluation of the overall system of Government statistics by specific subject-matter areas and to show the proposed changes in the budget recommendations for the fiscal year 1956 for statistics of employment and unemployment, construction and housing, and other important areas of economic conditions or activities.

A sound and balanced statistical system is a necessary basis for sound administrative policies. The needs of business, agriculture, labor, and Government for accurate and prompt knowledge of the ebbs and flows in all major areas of our economic life require improvement and strengthening of our basic system of statistical intelligence.

CURRENT PROGRAMS

For a number of years the current programs of the statistical agencies have operated at a nearly fixed level, despite increases in operating costs. There have been no major expansions in these programs to keep pace with the demands for improved measures of changing economic conditions, although the major economic censuses, which are essential as benchmarks, were initiated in the fiscal year 1955. To meet the demands for better current measures, for the fiscal year 1956 the budget provides increases amounting to $4.8 million, as shown in the following summary:

Direct obligations for major current statistical programs, by broad subject areas

[In millions]

Program	1954 actual	1955 estimate	1956 estimate
Employment and unemployment, wages, industrial injuries	$4.9	$4.9	$6.8
Prices and price indexes	1.6	1.7	2.0
Construction and housing	0.5	0.5	1.5
Production and distribution	14.5	15.7	16.6
Population and vital statistics	1.5	1.5	1.6
National income and analysis of business trends; State and local governments	3.2	3.1	3.5
Electronic equipment development			0.2
Total, major current programs	26.2	27.4	32.2

This table does not include all the current statistical programs of the Government. Many of the Government's statistical activities, including some which contribute to our overall system of economic information, are closely tied to and frequently part of administrative operations—for example, reporting activities which arise from the unemployment insurance operations of the Bureau of Employment Security. The agencies whose programs are included, in whole or in part, in this subject-matter summary are shown in the table at the end of this special analysis.

Employment and unemployment, wages, industrial injuries.—The number of persons employed, their hours of work and wages, and the number of those looking for work are of concern to the Government in formulating policy and to businessmen, labor groups, and the general public as a guide in making many day-to-day economic decisions. Information on labor turnover (industrial hires, lay-offs, and quits) throws additional light on the current economic situation.

One of the problems of most concern in recent months has been the nature of the impact of unemployment during the period of adjustment from an unusually high level of defense spending. The need for greater detail on the labor force, further improvement of statistics on the extent and incidence of unemployment, and more information on the employment situation and outlook in specific areas has been made apparent during the transition period. Increases are recommended for the fiscal year 1956 to enable the Bureau of the Census and the Bureau of Labor Statistics to strengthen their respective programs in this vital area.

Provision is also made for some extension in the fiscal year 1956 of the industry and community wage surveys conducted by the Bureau of Labor Statistics, and for expansion of the BLS statistics on industrial accidents to increase their usefulness in promoting safety.

Prices and price indexes.—The collection of price data and the computation of indexes of prices and the cost of living are a basic element in our system of economic intelligence. The statistical series currently maintained in this area by the Bureau of Labor Statistics and the Department of Agriculture are of strategic importance in many different connections—notably, for example, use of the BLS consumer price index as a factor in setting wage rates for millions of workers, and use of agricultural price indexes in determining parity ratios.

Postwar revisions have been completed of the BLS consumer price index and wholesale price index. For the fiscal year 1956 the budget includes a major survey by the Agricultural Marketing Service to obtain the present pattern of farmers' expenditures to determine if there is need for revising or reweighting the index of prices paid by farmers. This survey will also supply information needed for analysis of many farm problems.

Construction and housing.—Construction is a major economic activity, carried on by thousands of small builders scattered throughout the Nation. Because of its sensitivity to economic conditions and the dependence placed upon it by so many related activities, adequate information on construction is of key significance in appraising economic trends. Estimates now available are limited to the number of new nonfarm dwelling units started and the dollar volume of all new construction activity. The latter series is based on scattered data and can be relied on to reflect only long-term trends or substantial changes in the activity.

For the fiscal year 1956 the budget includes a major increase for the construction statistics program of the Business and Defense Services Administration, to improve the soundness and reliability of the new-construction activity series and to permit compilation of data on expenditures for alterations and repairs and on residential vacancies. Provision is also made for the Bureau of Labor Statistics to obtain statistics on characteristics of new housing being built and on the organization and structure of the home-building industry, and to initiate studies of materials and labor requirements for construction.

In addition to the increase for this area included under Current Programs, the budget for the fiscal year 1956 provides for an intercensal housing survey, as noted below under Periodic Census Programs.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

Production and distribution.—The broad area of production and distribution includes work of the Department of Agriculture on farm economics, market research, crop and livestock estimates, and related subjects, and work of other agencies—primarily the Bureau of the Census—on current business and industrial statistics, foreign trade and shipping, and related matters.

Farm production costs and farming methods have drastically changed under the impact of new technology, and the survey of present patterns of farmers' expenditures proposed for 1956 will aid in analysis of farm income and farm practices. Provision is also made in the Agricultural Marketing Service for further market research and improvements in the accuracy of the estimates and forecasts of crop and livestock production. In the Agricultural Research Service, the budget provides for further work in the fiscal year 1956 on the economics of production, designed to develop information to help improve farm practices.

The 1956 budget also provides for annual sample surveys of retail trade and manufacturing activity by the Bureau of the Census.

Population and vital statistics.—The only increase provided in this area for the fiscal year 1956 is recommended to enable the National Office of Vital Statistics to reduce the time lag in publishing reports of vital statistics. The increase in the number of certificates of births and other vital events to be processed and tabulated has resulted in excessive time lags in the publication of these reports.

National income and analysis of business trends; State and local governments.—The Office of Business Economics in the Department of Commerce is responsible for making estimates of the national income and gross national product and other national accounts. A small increase is included in the budget for the fiscal year 1956 for the work of this office on analysis of national economic trends, primarily to provide for use in the national income-product accounts of the results of the business censuses being taken this year.

The quarterly financial reports program, which collects income statements and balance sheets from manufacturing corporations, is one of the important analytic tools for determining present and prospective levels of economic activity. This program is conducted jointly by the Federal Trade Commission and the Securities and Exchange Commission. For the fiscal year 1956 the budget provides for increasing the usefulness of this program by enlarging its scope to include mining and trade corporations.

Tabulations of income tax returns by the Internal Revenue Service are used as benchmarks for most current series on the financial condition of business and for major components of the national income and product accounts.

State and local governments in toto represent an important segment of the national economy, spending over $30 billion a year. For the fiscal year 1956 the budget provides for filling a gap in our information in this area by including funds for the Bureau of the Census to develop annual State-by-State estimates of expenditures, receipts, and changes in debt of State and local governments.

Electronic equipment development.—Efforts in the fiscal year 1956 directed toward developing specialized electronic equipment for use in the censuses of business, manufactures, and mineral industries scheduled for 1958 and the censuses of population, housing, and agriculture scheduled for 1960 will result in significant reductions in the costs of these censuses and in the time required between enumeration and publication of many of the basic tabulations. Funds for development of this equipment are included in the regular 1956 budget for the Bureau of the Census.

PERIODIC CENSUS PROGRAMS

Censuses of agriculture, business (wholesale and retail trade and the service trades), manufactures, and mineral industries are scheduled at 5-year intervals. These periodic canvasses of all establishments and farms are important to business and agriculture and serve as benchmarks by means of which the accuracy of many Government and private statistical series is maintained, and the trends shown by current series are evaluated. The major costs of the present censuses, which cover the calendar year 1954, were provided for in the appropriations enacted for the fiscal year 1955. The budget for the fiscal year 1956 includes funds for the completion of these censuses.

An intercensal housing survey to be made by the Bureau of the Census is also included in the budget for the fiscal year 1956. This survey will obtain needed information on the number and characteristics of the Nation's housing units, and on changes in the amount of housing since the 1950 decennial census of housing.

Direct obligations for major economic statistical programs, by agency
