INTRODUCTION

Pursuant to the provisions of 31 U. S. C. 11 and other applicable laws, the budget for the fiscal year 1956 contains the President's recommendations for the work program and financial program of the Government for the 12 months beginning July 1, 1955, and ending June 30, 1956. It also presents comparable information for the fiscal years 1954 (actual) and 1955 (partly actual and partly estimated).

The material in the budget covers both groups of funds administered by agencies of the Government—Federal funds (owned by the Government), and trust and deposit funds (held in trust or in suspense by the Government), although only the Federal funds are included in the computation of the budget surplus or deficit.

ARRANGEMENT OF THE BUDGET

The budget document consists of the President's budget message and four parts which contain summary tables, detailed data, and special analyses.

In the budget message, which is presented in two parts (pp. M4 through M85), appear the general statement of the President's financial program and an outline of his major recommendations. The budget message includes four major summary tables.

Part I of the document (pp. A1 through A14) contains seven summary tables on Federal funds and on the public debt. Each of these tables is designed to bring together in one or two pages some overall aspect of the Federal budget.

Part II (pp. 1 through 1033) contains the detail of the budget for Federal funds, including various types of tables and schedules, explanatory statements of the work to be performed and the money needed, and the text of the language proposed for enactment by Congress on each item of authorization. This part also includes material on funds of the municipal government of the District of Columbia, and a few other trust funds which require congressional action. It is divided into chapters for the major organizational units of the Government.

Part III (pp. 1035 through 1127) contains summary tables on trust and deposit funds, detailed schedules and explanatory statements on the various trust funds, and memorandum information on consolidated working funds which are established to account for certain advances from one agency to another for interagency services.

Part IV (pp. 1129 through 1210) contains special analyses of budget data and Federal programs. Some of these give details for certain summary figures appearing in part I—for example, a classification of budget receipts by source, and a classification of budget expenditures according to functions and subfunctions. Several of the other special analyses in part IV contain materials which present different groupings or classifications of data.

An appendix, printed separately, contains more detailed information on personal services by grade and title, and repeats schedules of obligations by objects from part II of the budget.

EXPLANATORY STATEMENTS

Introductory statements at the beginning of each part give further explanations as follows:

Pages A3–A4—Types of funds and budget authorizations; basis of stating receipts and expenditures; concept of budget surplus or deficit.

Pages 3–5—Format of material printed for each agency and each account in part II.

Page 1036—Coverage of material printed for trust, deposit, and consolidated working funds in part III.

Page 1130—Coverage of the special analyses printed in part IV.

Detail will not necessarily add to totals, because of rounding.

BUDGET MESSAGE OF THE PRESIDENT

PART A

To the Congress of the United States:

I am transmitting to you today the Budget of the United States Government for the fiscal year 1956, which begins July 1, 1955.

The first part of this budget message summarizes the budget totals and highlights our policies and plans for next year, particularly as related to the fiscal situation. The second part presents summary tables and also contains my budget recommendations for each major Government activity.

The fiscal and budget story during this past year centers around the fact that we successfully made the adjustment from a wartime to a peacetime type of economy, a truly significant achievement. Aided by a proper fiscal policy, the inevitable dislocations of this adjustment, while difficult for some, have not been serious on the whole. Our present growing prosperity has solid foundations, free from the artificial stimulations of war or inflation. However, the peace in which we live is an insecure peace. We must be constantly on the alert. Along with the other free nations of the world we must continue to strengthen our defenses. At the same time to remain strong for what will apparently be a long period of uncertainty ahead, we must also progressively increase our prosperity and enhance our welfare.

The 1956 budget is based on this outlook. Total expenditures will be reduced. However, I am recommending somewhat increased expenditures in particular areas important to human well-being. Budget expenditures for the fiscal year 1956 are now estimated at 62.4 billion dollars, 1.1 billion dollars less than for the current year. All parts of the administration will continue to work toward further reductions during the year by eliminating nonessentials and by doing necessary things more efficiently.

We must maintain expenditures at the high level needed to guard our national security. Our economy is strong and prosperous but we should not dissipate our economic strength through inflationary deficits. I have therefore recommended to the Congress extension for 1 year of present excise and corporate income tax rates which are scheduled for reduction on April 1, 1955, under present law. If this is done, and employment and production increase as currently anticipated, we can expect budget receipts to rise 1 billion dollars over 1955, to a total of 60 billion dollars in the fiscal year 1956.

On the basis of these estimates of expenditures and receipts, the deficit will be reduced from the presently estimated 4.5 billion dollars in the fiscal year 1955 to an estimated 2.4 billion dollars in 1956. Thus we continue to progress toward a balanced budget.

BUDGET POLICIES

Three broad considerations of national policy have guided me in framing the budget for the fiscal year 1956.

First, we must defend our priceless heritage of political liberty and personal freedom against attack from without and undermining from within. Our efforts to date have helped bring about encouraging results—cessation of fighting, new and stronger alliances, and some lessening of tensions. The growing strength of the United States and its friends is a key factor in the improved outlook for peace. We must continue to build this strength. We must at the same time preserve our liberty at home by fostering the traditional initiative of the American people. We will increase the scope of private activity by continuing to take Government out of those things which the people can do better for themselves, and by undertaking on a partnership basis, wherever possible, those things for which Government action is necessary. Thus, people will be able to keep more of their earnings to use as they wish.

Second, the Government must do its part to advance human welfare and encourage economic growth with constructive actions, but only where our people cannot take the necessary actions for themselves. As far as possible, these steps should be taken in partnership with State and local government and private enterprise. We must do our part to provide the environment for our free enterprise system to keep employment high, to create new jobs, and to raise the standard of living. We must broaden the opportunity for individuals to contribute to the growth of our economy and enjoy the fruits of its productivity.

Third, we must maintain financial strength. Preserving the value of the dollar is a matter of vital concern to each of us. Surely no one would advocate a special tax on the widows and orphans, pensioners, and working people with fixed incomes. Yet inflation acts like a tax which hits these groups hardest. This administration has made a stable dollar and economy in Government operations positive policies from the top down. Expenditure reductions, together with a judicious tax program, effective monetary policy, and careful management of the public debt, will help to assure a stable cost-of-living—continuing our achievement of the past 2 years.

A liberal attitude toward the welfare of people and a conservative approach to the use of their money have shaped this budget. Our determination to keep working toward a balanced budget provides the discipline essential for wise and efficient management of the public business.

Federal Reserve Bank of St. Louis

NEW AUTHORITY TO INCUR OBLIGATIONS

My recommendation for appropriations and other new authority to incur obligations for the fiscal year 1956 is 1.3 billion dollars more than the amount for the fiscal year 1955, primarily because of new requirements for our military services. However, it represents a reduction of 32.8 billion dollars from 1952, 21.7 billion dollars from 1953, and 4.2 billion dollars from 1954.

Fiscal year:	*New authority to incur obligations (in millions)*
1952	$91.4
1953	80.3
1954: As estimated, January 9, 1953	72.2
Actual	62.8
1955 estimated	57.3
1956 recommended	58.6

The new authority to incur obligations which I am recommending for our major national security programs is 2.4 billion dollars greater than in the fiscal year 1955. I am proposing a reduction in the total new authority for all other Government programs, although within this total, I am recommending selective increases.

Part of the reduction in 1955 of new authority for our major national security programs below the amount enacted for 1954 was possible because the military services improved their supply procedures, which resulted in larger use of existing stocks and reduction of the large backlog of unexpended balances. The accumulated unexpended balances of funds appropriated to all Government agencies in prior years are now on their way down to more reasonable levels and the continued downtrend in total unexpended balances will be less rapid in the future than in the fiscal year 1955.

Recommended new authority for 1956 is less than both the anticipated revenues and the estimated expenditures for that year. By holding the level of new authority lower than anticipated revenues, we can continue making progress toward balancing the budget. Likewise, as long as the amount of new authority is less than expenditures, we are continuing on the way toward lower levels of Government spending.

BUDGET EXPENDITURES

In the fiscal year 1956, net budget expenditures are estimated to be 11.9 billion dollars below actual spending in the fiscal year 1953. The record shows that this administration cut Government spending in 1954 by 6.5 billion dollars below 1953, and 10.1 billion dollars below the level estimated for 1954 on January 9, 1953. For 1955, an additional reduction of 4.3 billion dollars is now estimated and still another reduction in spending of 1.1 billion dollars is the present

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

estimate for 1956. The fiscal year 1955 is only half completed and the beginning of 1956 is still 5½ months away. We shall continue working to improve efficiency and to reduce still further the totals now estimated for these years.

Fiscal year:	*Expenditures (in billions)*
1952	$65.4
1953	74.3
1954: As estimated, January 9, 1953	77.9
Actual	67.8
1955 estimated	63.5
1956 estimated	62.4

The stern requirements of our national defense dictate the largest part of our budget, and it is chiefly these requirements which prevent us from decreasing budget expenditures faster at this time. Further progress in reducing expenditures must result in large part from increasing efficiency and from finding better ways of doing the things that must be done. Future savings will be more difficult than those already accomplished. However, we expect to continue reducing the cost of Government.

Major national security.—Expenditures for major national security programs in the fiscal year 1956 are estimated at 40.5 billion dollars, 65 percent of total budget expenditures. This amount includes the cost of new legislation. I am proposing to establish an effective military reserve system and strengthen the career service. This budget provides for more expenditures by the Department of Defense for air power than ever before in peacetime history. New weapons for defensive and retaliatory action are being developed and produced in increasing quantities. High priority is being given to strengthening our continental defense system. Since military supplies are not being consumed in combat, the bulk of the military materiel being produced by our factories is adding to our capacity to defend ourselves. Our defense expenditures are now bringing about a steadily growing strength. Never in our peacetime history have we been as well prepared to defend ourselves as we are now.

We will deliver about the same amount of military equipment to friendly nations as in 1954 and 1955. New atomic energy plants will be placed in operation and more than in any previous year will be spent for peaceful applications of atomic energy. The dollar value of our stockpile of strategic materials is expected to reach 78 percent of the minimum objective, compared with 58 percent in 1954.

International affairs and finance.—Our international programs are closely related to national security. The conduct of our foreign affairs is crucial in preserving peace. We have materially contributed

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

to the strengthening of friendly nations through the economic aspects of the mutual security program. Continuation of such assistance is urgently needed for some countries. Net expenditures for international affairs and finance are estimated to be 1.3 billion dollars, 88 million dollars lower than in the fiscal year 1955.

Keeping our own defenses strong and cooperating with our allies to increase their defenses will deter outside attacks on our freedom. We must at the same time look to the abiding sources of our internal strength—our faith in the power of free men, our individual initiative, and our competitive enterprise.

Commerce and manpower.—We are moving ahead in taking the Government out of business wherever this can properly be done. In addition to selling the Inland Waterways Corporation and liquidating the Reconstruction Finance Corporation, we have already sold or shut down a number of Department of Defense plants for processing scrap and manufacturing paint, clothing, and chlorine. Private industry is performing an increasing share, which has reached almost half, of major equipment overhauls for the Air Force. Most of the synthetic rubber plants have been sold to private purchasers, subject only to congressional approval. These actions not only serve to strengthen our system of private enterprise, but also in many cases reduce Government expenditures and increase tax receipts for cities, counties, and States as well as the Federal Government.

During the past year, legislation was enacted permitting private lenders to make mortgage money available on more liberal terms so that more people can buy their own homes. Local public agencies, aided by private investors, are being encouraged to start comprehensive urban renewal programs. Provision has been made for extension of unemployment insurance to 4 million more workers.

For the coming year, I am recommending that we start a 10-year program to modernize the interstate highway system in cooperation with State and local governments. I am also proposing that we step up aeronautical research, expand air navigation facilities, and help industry build more ships. These activities are important for our national security as well as for our growing economy. I firmly believe that as large a proportion as possible of the expenditures of the Government should be borne by those directly benefiting therefrom. The user charge principle should be further extended. I have recommended to the Congress that postal rates be increased to make the postal system self-supporting in the near future. With the enactment of this legislation, total net expenditures for commerce and manpower in the fiscal year 1956 are expected to be 2.2 billion dollars, 364 million dollars below 1955.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

Natural resources.—An important policy of this Government is to encourage an increased sharing by State and local governments of our long-range development projects. For example, the State of New York and the Province of Ontario are now jointly developing the power resources of the St. Lawrence River without cost to the Federal Government. Under legislation passed last year the Markham Ferry project in Oklahoma and the Priest Rapids project in the State of Washington, both with large power developments, will be built by State or local units, with modest Federal contributions only for those purposes such as flood control which involve national responsibilities. This budget proposes the start of several new construction projects under such partnership arrangements. Thus, we are continuing to develop our natural resources at less cost to the Federal Government. Net budget expenditures of 953 million dollars in 1956 are estimated for natural resources, 180 million dollars less than in 1955.

Agriculture.—Greater freedom from Government direction and control of farming operations will be made possible in future years as a result of the new farm legislation enacted last summer. The flexible supports provided for therein will stimulate the consumption of farm products at home and abroad and will reduce Government expenditures for buying and storing surplus commodities. Greater private participation in the financing of loans to farmers has also been brought about by legislation enacted last year. By increased use of fully insured private loans, the need for direct Federal loans for farm ownership and for soil and water conservation has been reduced. A sound basis has also been provided through the new watershed protection legislation for greater cooperation between the Federal Government and States and local groups in the upstream flood prevention program. In addition, through strengthened agricultural research and educational work, farmers can better work out solutions for their own problems. These steps reduce the dependence of farmers on the Government, encourage farmers to take the initiative in adjusting production to demand, and provide the conditions under which farmers can maintain their incomes with less interference by the Government. The flexible support legislation will not greatly affect expenditures for the fiscal year 1956. Estimated net expenditures for agricultural programs in 1956 will be 2.3 billion dollars, 871 million dollars less than in 1955. This reduction is principally due to the anticipated smaller outlays for farm price supports resulting from acreage restrictions and increased sales.

Welfare, health, and education.—Our policy of partnership with State and local governments and with private enterprise is also enabling

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

us to make significant contributions to human welfare. Our broadened programs of assistance for vocational rehabilitation and for construction of nonprofit hospitals and health centers will encourage greater State, local, and private activity in these fields. The extension of old-age and survivors insurance to 10 million more persons and the increased contribution and benefit rates enacted last year are in keeping with our tradition of self-reliance and will diminish dependence on charity. This budget includes appropriations for the health improvement program which I shall outline in a special message. Increases in some programs, principally for public health and vocational rehabilitation, will be offset by some reductions in other programs. Total expenditures for welfare, health, and education are estimated at 2.3 billion dollars in the fiscal year 1956, about the same as in 1955.

Veterans' services and benefits.—Expenditures for veterans' benefits continue to increase as a result of the growing number of veterans, now estimated at 21 million in civil life, becoming eligible for benefits. Legislation enacted last year raised compensation and pension benefits to our ex-servicemen and women. I have recently issued a proclamation ending the time period for acquiring further rights to readjustment benefits intended for veterans of the Korean conflict. Estimated net expenditures for veterans' programs will be 4.6 billion dollars, about 200 million dollars more than in 1955.

Interest and general government.—Expenditures for interest are estimated to amount to 6.4 billion dollars, 180 million dollars less than in 1955. In the field of general government, I recommend that we increase our expenditures for tax collection and management of Government property as further steps toward efficiency. I also recommend strengthening our law-enforcement agencies, particularly the Federal Bureau of Investigation. Finally, the Government should resume its payments as employer to the civil service retirement fund. As a result of these recommendations and anticipated increases in payments of certified claims, expenditures for general government purposes are expected to rise 344 million dollars to 1.6 billion dollars in the fiscal year 1956.

Special classification of expenditures.—The budget expenditures discussed above may be divided into four large groupings to show the ends for which we pay taxes and also the items which make our budgets big. These groupings are (1) the cost of civil operations and administration, (2) interest, (3) civil benefits to various parts of our society, and (4) the major cost of protection against war.

SPECIAL CLASSIFICATION OF NET BUDGET EXPENDITURES

[Fiscal years. In billions]

	1951 actual	1952 actual	1953 actual	1954 actual	1955 estimated	1956 estimated	
						Amount	Percent
Current expenses for civil operations and administration	$1.9	$2.2	$2.3	$1.9	$1.9	$2.3	4
Interest	5.7	5.9	6.6	6.5	6.6	6.4	10
Civil benefits	11.5	12.2	13.4	11.6	13.3	12.0	19
Protection	25.6	46.0	52.0	47.9	41.7	41.5	67
Undistributed (reserves and adjustments)	−.7	−.9			.1	.3	
Total	44.1	65.4	74.3	67.8	63.5	62.4	100

The expenditures for civil operations and administration of the Government have been obscured for many years by the large expenditures for defense and by the variety and complexity of the domestic and international programs. The cost of keeping the civil functions of the Government running for the fiscal year 1956 is estimated to be 2.3 billion dollars or about 4 percent of the net budget expenditures. This includes most of the expenditures classified as general government plus the expenditures for repair, maintenance, and operation of Government civilian facilities, and for regulatory activities.

The fluctuation shown in the cost of civil operations arises primarily from the contribution made by the Federal Government, as employer, to the civil service retirement fund. This contribution was 321 million dollars in the fiscal year 1953 and 216 million dollars is proposed for 1956. No contributions were made during 1954 or 1955 pending a detailed review of all Federal retirement systems by a special commission. Increased funds are also provided for several departmental operations where there has been a longstanding backlog of work.

Decreasing interest rates during the past 12 months, together with a change in the timing of interest payments, have made possible a forecast for lower expenditures for interest in the fiscal year 1956.

The various civil benefit programs of the Government are estimated to amount to 12 billion dollars in the fiscal year 1956. Expenditures for veterans' benefits represent 38 percent of all civil benefits in that year. The variations in expenditures for farm price supports and mortgage purchases account for part of the changes in total benefit expenditures between the fiscal years 1953 and 1956.

The expenditures for protection, which account for two-thirds of total expenditures, include continental defense at home and mutual defense abroad. The total amount in the fiscal year 1956 consists of the 40.5 billion dollars for major national security programs and

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

1 billion dollars for economic and technical assistance under the mutual security program. In addition, many items of smaller size scattered through other parts of the budget, not included in this category, are related in varying degrees to protection. Examples are the Coast Guard and the Selective Service System.

TAX POLICY

Last year we made great progress in reducing tax burdens and improving the tax structure. Total tax reductions of 7.4 billion dollars became effective. This was the largest tax reduction in any single year in the country's history. It was made possible only by large cuts in Government expenditures. The basic tax law was revised to relieve hardships for millions of individuals and to reduce tax barriers to economic growth.

The budget would have been balanced for the current fiscal year if there had been no tax cuts. However, it was desirable to share the benefits from the large expenditure reductions. This enabled the people to have the extra money to spend for themselves which they retained because of the reduction in their taxes.

In view of the prospective deficit, we cannot afford to have any further loss of revenue this year through reductions in taxes. The corporate tax rate would be automatically reduced under existing legislation from 52 to 47 percent on April 1 with a revenue loss of about 2 billion dollars for a full year unless extended. Under existing law, the excise taxes on liquor, tobacco, gasoline, and automobiles would also be automatically reduced on April 1, with a revenue loss of 1 billion dollars unless appropriate legislation is enacted by the Congress extending them.

In the fiscal year 1956, there will be an automatic revenue reduction (as compared with 1955) of almost 2 billion dollars under existing law, wholly apart from any changes in tax rates. The principal reason is the completion of the plan adopted 5 years ago under which payments of corporate taxes have been moved forward into earlier fiscal years. Fortunately, this reduction in 1956 will be more than offset by increases in revenue due to the economic growth of the country.

Because we must keep our existing revenues intact, I have already recommended to the Congress in my State of the Union Message that existing rates on both excises and corporate incomes be extended for 1 year. Any other course of action would result in either (1) inadequate expenditures for national security, or (2) inflationary borrowing.

During the past year the Treasury Department has continued to examine possible changes in the tax laws concerning which no recommendations were made in the revision of the tax laws last year. As final conclusions are reached by the Department they will be sent to the Congress.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

I have also directed the Secretary of the Treasury promptly to make recommendations for any other changes in the laws which may be found necessary to prevent anyone from avoiding his fair share of the tax burden.

The present tax take of nearly one-fourth of our national income is a serious obstacle to the long-term dynamic growth of the economy which is so necessary for the future. There must be the means for providing more and better jobs not only for those who are working today but also for the millions of young people who will come of working age in future years. The stimulus of further tax reductions is necessary just as soon as they can properly be made.

We must always make adequate provision for our security and other essential services, and further tax reductions can only be made as savings in governmental expenditures or increased revenues resulting from growth in our economy are in sight.

However, further tax reduction remains a firm goal of this administration, and our policy is directed to achieving both the savings in expenditures and the economic growth that will make such reductions possible.

I hope that tax reductions will be so justified next year. If so, I shall recommend a reduction in taxes to spread the relief fairly among all taxpayers in a way which will be the most effective to relieve individual tax burdens and to increase incentive for effort and investment.

DEBT MANAGEMENT

Debt management policy during the past year was keyed to Federal Reserve monetary policy to help assure the ready availability of money and credit needed to sustain a high level of business activity. The Treasury refrained under the special circumstances of 1954 from issuing long-term securities which would compete for long-term money available for the construction of new homes, for business expansion, or for new schools, highways, and hospitals at the State and local government level. At the same time, progress was made in improving the structure of the public debt by some extension of maturities through issuing more intermediate-term bonds. In each major Treasury financing during 1954, except for borrowing through tax anticipation securities, investors had the opportunity to buy securities longer than 1-year certificates. The result was a substantial reduction in the short-term debt.

On December 31, 1954, the public debt subject to the statutory limit was 278.3 billion dollars. We expect to be able to operate this fiscal year within the temporary debt limit of 281 billion dollars voted by the Congress last August. The increase beyond 275 billion dollars provided by this legislation is, however, temporary. The statutory limit will go back to 275 billion dollars on June 30, 1955. We antici-

pate that the heavy tax receipts during the remainder of this fiscal year will enable us to reduce the debt to within that figure by June 30, 1955.

At the start of the new fiscal year in July 1955 the debt will already be pressing against the legal limit. With the present seasonal pattern of tax collections, expenditures will exceed receipts in the first 6 months of the fiscal year 1956 by about 8 billion dollars. Thus, it will not be possible to pay the Government's bills in that period without exceeding the 275 billion dollar limit.

We recognize that the statutory debt limit is valuable as an expression of firm intent to maintain fiscal soundness. With present requirements for national security we have not yet been able to achieve a balanced budget, even though we have made substantial progress toward it. Therefore, I have no alternative but to ask the Congress to again increase the debt limit.

During the past 2 years, we have proved that a free, democratic system can make the adjustment from war to peace without serious economic disturbances. A major factor in this achievement has been the confidence of the people in the ability of the Government to bring its financial affairs under control and to conduct them in a responsible manner.

Our objective of being provident in financial matters has paid and is still paying dividends in general well-being. We have reduced expenditures and eased the crushing load of taxation. We have improved the structure of the public debt and provided a favorable environment for sound monetary policy. We have encouraged private initiative by starting to take the Government out of competition with private enterprise. We have made progress in housing and in protection against personal catastrophe. We are developing our natural resources in partnership with the State and local governments and with private initiative. These steps are designed to assure high and rising employment, a growing prosperity, and a stable dollar.

This administration will continue to exercise the utmost care in the manner in which it uses the taxpayers' money. It will continue to purchase what we must have for our security, well-being, and prosperity with the fewest possible number of dollars. And it will continue to administer the huge Government organization more efficiently. It will put first things first and restrain spending to items of high priority. Our success thus far in reducing taxes, expenditures, and the deficit is the best evidence of the earnestness of our efforts.

With an indestructible faith in the destiny of this country, a faith equal to that of the founders who held that all men are Divinely

endowed with inalienable rights; with full confidence that in the intelligent cooperation of free men is to be found the most effective way of solving group and national problems; with unshaken dedication to the pursuit of peace and justice at home and in the world, we shall continue to sustain our liberties and we shall meet and far surpass the objectives we now set for ourselves in promoting human welfare, happiness, and prosperity.

DWIGHT D. EISENHOWER.

JANUARY 17, 1955.

BUDGET MESSAGE OF THE PRESIDENT

PART B

This second part of the budget message starts with three summary tables. Following these tables is an introduction containing (1) general analyses of budget expenditures from two different viewpoints, (2) a summary of transactions of major trust funds, and (3) a summary of receipts from and payments to the public.

The remainder of the message discusses the nine major groups of Government programs.

To the Congress of the United States:

This second part of my message contains further details regarding budget expenditures and new appropriations and my legislative recommendations. Major trust fund transactions are summarized. Expenditures are analyzed from two different points of view.

Purposes of expenditures.—From one point of view, budget expenditures serve four broad purposes. These were summarized on page M12. Four percent goes for keeping the civil functions of Government running. Another 10 percent is necessary to pay the interest charges on the Government debt. A somewhat larger proportion, 19 percent, is devoted to the costs of various programs combined under the heading of civil benefits. Some of these benefit particular groups or localities. Others are in the nature of more general benefits. Another 67 percent is for the major programs for protection against possible war.

That part of the expenditures of various agencies which is for current expenses of civil operations and administration is shown by agency in the following table:

CURRENT EXPENSES FOR CIVIL OPERATIONS AND ADMINISTRATION

[Fiscal years. In millions]

	1951 actual	1952 actual	1953 actual	1954 actual	1955 estimated	1956 estimated
Legislative branch	$57	$58	$53	$55	$64	$65

Federal Reserve Bank of St. Louis

Expenditures for civil benefits are shown in the following table. These expenditures are partly for the acquisition of assets, which have varying degrees of recoverable value or permanency. Other expenditures are for long-range development, and for current aids and services to various groups.

The largest amount of benefits goes to veterans for compensation and pension payments, hospital and medical care, and readjustment benefits, including vocational training. The next largest current expense for benefits is for public assistance grants to States. Current expenses for agriculture consist of losses realized in disposition of commodities acquired under price support programs, payment for the removal of surplus commodities, administrative expenses of loan programs and other aids to farmers.

EXPENDITURES FOR CIVIL BENEFITS

[Fiscal years. In millions]

	1951 actual	1952 actual	1953 actual	1954 actual	1955 estimated	1956 estimated
Federal assets (loans, construction, major equipment, and additions to commodity inventories)	$1,771	$2,905	$4,672	$2,840	$3,323	$2,013
Long-range development:						
State, local, and private assets (roads, airports, schools, and soil conservation)	961	1,023	1,124	1,022	1,131	1,302
Expenditures for education, training, health, and research and development	1,178	566	602	586	667	754
Current expenses for aids and services:						
Agriculture	905	463	305	540	995	750
Business:						
Post Office	521	670	624	307	267	[1] 15
Other	288	371	310	341	483	522
Labor	203	209	215	216	272	348
Home owners and tenants	−160	−129	−123	−116	−92	−48
Veterans	4,515	4,710	4,178	4,185	4,347	4,536
Public assistance	1,186	1,178	1,330	1,438	1,445	1,420
Other aids	141	186	176	209	420	371
Total	11,509	12,153	13,413	11,570	13,259	11,984

[1] Based on proposed increases in postal rates and postal pay.

Most of the postal deficit for 1954 and 1955 has been included among benefits to private business since the Post Office Department's analysis shows that it arises principally from inadequate second- and third-

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

class mail rates. The proposed rate increase will practically absorb the postal deficit in 1956.

Expenditures for protection, as shown in the next table, likewise include the acquisition of Federal assets, of varying degrees of permanent value, from airbases to aircraft, tanks, trucks, and bombs. Such expenditures also include long-range development, and current expenses. The last mentioned is primarily the cost of military pay and operations. Protection also includes a substantial amount of military equipment and economic and technical assistance furnished under the mutual security program, of which a significant amount goes to Korea and other Far Eastern countries.

EXPENDITURES FOR PROTECTION

[Fiscal years. In millions]

	1951 actual	1952 actual	1953 actual	1954 actual	1955 estimated	1956 estimated
Federal assets (construction, plant and major equipment, and stockpiling)	$6,099	$15,059	$21,438	$19,914	$16,762	$16,934
Long-range development (research and development)	915	1,285	1,617	1,616	1,546	1,649
Current expenses (military pay, operations, maintenance, administration, and military aid abroad)	15,293	27,505	27,219	24,994	22,336	23,625
Current expenses of economic assistance abroad	3,320	2,154	1,705	1,339	1,029	1,017
Unallocated reduction in estimates (Department of Defense)						−1,750
Total	25,626	46,002	51,979	47,863	41,673	41,475

Further details on this classification of net budget expenditures are shown in special analysis D, page 1153.

Controllability of expenditures.—The preceding analysis has indicated the broad purposes of expenditures. It is important that we also consider our budget from another point of view. About one-fourth of the total expenditures can be classified as permitting little or no administrative discretion through the budget process. The level of these expenditures depends upon the provisions of the legislation which authorized the programs and on other factors independent of Executive control.

SUMMARY OF NET BUDGET EXPENDITURES INDICATING CONTROLLABILITY

[Fiscal years. In millions]

Description	1953 actual	1954 actual	1955 estimated	1956 estimated
Major national security programs	$50,274	$46,522	$40,644	$40,458
Major programs not readily subject to administrative discretion through the budget process:				
Veterans' compensation, pensions, and selected benefit programs	3,383	3,297	3,512	3,680
Veterans' unemployment compensation	26	82	131	150
Grants to States for public assistance	1,330	1,438	1,445	1,420
Payment to railroad retirement fund for military service credits	33	35	----------	----------
Agricultural price support (Commodity Credit Corporation)	1,943	1,526	2,159	[1] 1,142
Removal of surplus agricultural commodities	82	178	113	180
Conservation of agricultural land resources	273	171	190	212
Federal-aid highway grants	509	531	600	680
Grants to States for unemployment compensation and employment service administration	202	203	195	245
Payment to the unemployment trust fund	----------	----------	64	87
Claims and relief acts	129	213	163	250
Payments to Federal employees' retirement funds	321	31	30	217
Unemployment compensation for Federal employees	----------	----------	33	40
Legislative and the Judiciary	88	87	102	116
Interest	6,583	6,470	6,558	6,378
Total	14,902	14,262	15,295	14,797
All other	9,098	6,988	7,565	7,153
Total budget expenditures	74,274	67,772	63,504	62,408

[1] For comparability with prior years, includes expenditures (127 million dollars) from appropriations to reimburse Commodity Credit Corporation.

For example, interest depends upon the size of the public debt and the interest rates. Expenditures for veterans' benefits depend upon the benefit rates and the number of eligible veterans. Expenditures for agricultural price supports are affected by such factors as the weather, the level of world prices, and the ability of foreign purchasers to pay dollars. Grants to States are made under formulas fixed in legislation and vary with State participation and general economic conditions. Expenditures for relatively uncontrollable programs will be 14.8 billion dollars in the fiscal year 1956. This will be 498 million dollars less than in 1955. Increases for grants under the Federal-Aid Highway Act of 1954, veterans' benefits, payment of claims, and resumption of the Government's contribution to the civil service retirement and disability fund are more than offset by the decreases expected for agricultural price supports and interest on the public debt.

Digitized for FRASER

Federal Reserve Bank of St. Louis

Expenditures for major national security programs will decline 186 million dollars in the fiscal year 1956. All other Government expenditures are estimated to decline 412 million dollars. Although these latter expenditures are only 11 percent of the total, they include the great majority of the individual appropriation items in the budget. Between the fiscal years 1953 and 1956, these expenditures are estimated to be reduced by 1.9 billion dollars. Included in this total are expenditures for international affairs and finance, and for most of the regular operations of the Government such as enforcing laws, collecting taxes, promoting health, postal service, and civil public works.

Major trust funds.—The budget receipts and expenditures which I have so far discussed reflect only transactions of funds which belong to the Federal Government. In addition, the Federal Government engages in extensive transactions with funds which it does not own but holds in trust for others. The following table summarizes the receipts, expenditures, and balances for the major trust funds. These include the trust funds for veterans' life insurance, old-age and survivors' insurance, railroad retirement, Federal employees retirement, and unemployment compensation. The total receipts and expenditures of the many smaller trust funds which are not included in the table have amounted to about one-half billion dollars annually in recent years.

SUMMARY OF RECEIPTS, EXPENDITURES, AND BALANCES OF MAJOR TRUST FUNDS

[Fiscal years. In millions]

	1954 actual	1955 estimated	1956 estimated
Balance in funds at start of year	$43,057	$44,924	$46,449
Receipts	8,698	9,343	10,882
Expenditures	6,832	7,819	8,245
Balance in funds at close of year	44,924	46,449	49,087

The accumulated balances of these funds will increase substantially from 43.1 billion dollars at the beginning of the fiscal year 1954 to an estimated 49.1 billion dollars at the close of 1956. Most of these balances are invested in special issues of United States Government securities. Receipts of these trust funds include interest on such investments, payroll taxes paid by employers and employees, and premiums paid by veterans for life insurance. Expenditures are primarily for the payment of benefits. Additional information on these funds can be found in part III of the budget document.

Receipts from and payments to the public.—Transactions of trust funds and Federal funds are consolidated to show the total of the Federal Government's receipts from and payments to the public. This statement shows the total flow of funds for the year and is one measure of the inflationary or deflationary impact of Federal fiscal transactions on the national economy; it is not a substitute for the regular budget statements. Details on receipts from and payments to the public are given in special analysis A, on page 1131.

RECEIPTS FROM AND PAYMENTS TO THE PUBLIC, EXCLUDING BORROWING

[Fiscal years. In millions]

	1954 actual	1955 estimated	1956 estimated
Cash receipts from the public	$71,636	$66,649	$68,793
Cash payments to the public	71,868	69,026	68,235
Excess of cash receipts			558
Excess of cash payments	232	2,377	

MAJOR NATIONAL SECURITY

The major national security category of the budget includes not only the military functions of the Department of Defense, but also the development of atomic energy, the stockpiling of strategic and critical materials, and the portions of the mutual security program which consist of military assistance and direct forces support to other free nations. These four major programs are the basic elements of our national security. Other programs with smaller totals and relating to activities which are not so exclusively defense are included under other classifications of the budget. For example, the commerce and manpower section includes the Coast Guard, merchant marine, the Selective Service System, civil defense, aeronautical research, and promotion of defense production.

Expenditures for major national security programs in the fiscal year 1956 are estimated at 40.5 billion dollars. This total is 186 million dollars below that for 1955, and 6.1 billion dollars below the actual 1954 amount. Recommended new authority to incur obligations is greater than for 1955 but less than for 1954. After the cessation of combat operations in Korea, we were able to reduce our 1955 military appropriations because the unobligated balances available were greater than required and the large stocks of supplies on hand permitted the military services to "live off the shelf" to a large degree without replacing the items consumed.

Federal Reserve Bank of St. Louis

Recommendations in this budget for our major national security programs are based on the same philosophy which I recommended and the Congress adopted for the fiscal years 1954 and 1955. I then proposed that we should plan and finance our national security program on a long-term basis that would maintain essential military strength over an indefinite period of time without impairing the basic soundness of the United States economy. This budget continues the concept of no assumed fixed date of maximum danger. Any other concept would lead to an inevitable let-down in strength and produce peaks and valleys in our defense spending and production.

It is essential that we, together with other nations of the free world, maintain a level of military strength which will effectively discourage any would-be aggressor from attacking. We cannot accept less. The effectiveness of our power to deter rests principally upon our capability to retaliate swiftly and decisively and upon our ability to defend ourselves against attack. The advent of nuclear weapons has profoundly affected our concepts of military strategy and tactics as well as our national security policies. Such weapons multiply many fold the striking power of any military force. This budget, therefore, continues the emphasis on the development and maintenance of effective nuclear-air retaliatory power of the Air Force and Naval aviation as the principal deterrent to military aggression. Such power is being supplemented by other military forces of great strength, flexibility, and mobility and by the forces of our allies.

In order to safeguard our striking power and resources, we are giving continued high priority to the accelerated development of continental defense programs.

Priority is also being given to the development and introduction into operating units of new weapons and techniques adapted to the radically changed conditions imposed by the potential of nuclear warfare. This budget also provides for continued improvement in mobilization reserve stocks and for the cost of expanding and strengthening our military manpower reserves as outlined in my special message on this subject.

The complexity of modern military equipment and the revolution in military concepts in this atomic age put an extra premium upon military leadership, skill, and training. Unfortunately, much of our investment in developing trained manpower is being lost, as too many servicemen are rejecting a military career for the attractions they expect from civilian life. My legislative proposals to meet these problems were set forth in my special message on military pay and incentives, and funds for them are provided in this budget.

Department of Defense.—To maintain a strong military posture and assure that our national security policy will adequately support our foreign policy, our military planning must be kept flexible and dynamic. The structure of our military forces must be subjected to continuing review and adjusted to reflect the rapid technological advances of this nuclear and electronic age. A year ago, I approved a long-range plan for our military forces upon which the fiscal year 1955 budget was based. Recent reviews of our plans and policies have resulted in reaffirmation of most of the elements of this long-range plan, but with some changes in timing. Our current military plans, in turn, will be subjected to continuing review so that they—as well as our military equipment—will be kept up-to-date. It is important that we do not attempt to fix our minds or plans upon any particular set of numbers, for today's technological changes may make yesterday's numbers and concepts obsolete.

In my judgment, the military forces and programs upon which this budget is based are accurately adjusted to the national needs.

Under our current plans, the number of military personnel is scheduled to be reduced from the present level of approximately 3.2 million to about 3 million by June 30, 1955, and to something over 2.8 million by June 30, 1956, for an average of approximately 2.9 million personnel during the fiscal year 1956, compared with an average of 3.2 million during the fiscal year 1955. Within this figure, however, the Air Force personnel strength will be somewhat increased.

The cessation of hostilities and the buildup of the Republic of Korea forces have permitted us to withdraw five United States ground divisions from the Far East. We have thus increased the number of divisions in a central reserve of forces which can be deployed where and when needed. In addition, 1⅔ Marine divisions will be withdrawn from the Far East in the near future, so that their capability as a highly trained, combat-ready, amphibious force may be available as part of the central reserve. United States military forces will be maintained at appropriate levels in the Far East, with emphasis on highly mobile naval and air units of unparalleled striking power.

Federal Reserve Bank of St. Louis

The Army has devoted considerable effort to assessing the changes in Army organization and doctrine required to meet the conditions of the atomic battlefield. These studies are continuing, and it appears that the Army of the future will be organized into smaller, but more mobile and self-contained, units with greater fire power. The Navy will operate approximately 1,000 active ships—including 400 warships. The number of carrier air groups is to be increased from the present 16 to 17, and an additional attack carrier equipped with modern aircraft will be added to the fleet. The Navy will continue to maintain 15 antisubmarine warfare squadrons. The Marine Corps will maintain 3 combat-ready divisions and 3 air wings. The current level of approximately 10,000 Naval and Marine operating aircraft will be maintained. The Air Force is continuing its buildup toward a goal of 137 wings, and expects to have 130 wings in being by June 30, 1956—119 of which will be combat wings. The major units of all services will be supplemented by appropriate combat support units. All the services will continue their efforts to increase the proportion of military personnel assigned to combat units.

About two-thirds of the projected Department of Defense expenditures in the fiscal year 1956 will be devoted to air power and related programs—both offensive and defensive. Expenditures for these programs will be the largest in our peacetime history. The active aircraft inventory in combat and supporting units of the Air Force, Navy, and Marine air forces will increase from over 34,000 on June 30, 1954, to 36,000 on June 30, 1956, and will continue to increase in succeeding years toward the present objective of close to 40,000 aircraft. In addition, the Army will maintain 3,600 active aircraft, with more than a 20 percent increase during the next 2 years in the number of helicopters. The growth in our effective air power is far greater than these numbers indicate, for our aircraft continue to increase in size, speed, range, and striking power.

By the end of the fiscal year 1956, the total number of aircraft in combat units of the Air Force, Navy, and Marine Corps will be approximately one-fourth greater than at the beginning of the current fiscal year. The number of jet aircraft in such units will increase by more than one-third during the same period. The increasing modernization of our air power is shown by the fact that by June 30, 1956, the Air Force combat units will be almost 100 percent jet equipped. The proportion of jets in the combat units of the Marines and Navy will increase by approximately 15 percent over the beginning of the current fiscal year.

During the past year, continuing improvements have been made in the management and operations of the Department of Defense. The

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

stock-fund principle, which has been applied in the Navy over a period of years, is now being broadly adopted by the Army and is being initiated in the Air Force. Stock funds have been extended to include 9.3 billion dollars in inventories. Major savings—particularly in the Army—are resulting from the extension of such property accounting and other businesslike management techniques. The Army is now beginning to account for its supplies in terms of dollar value, and is relating its needs and purchases to its inventories. Largely as a result of the Army's more efficient administration of the supplies and financial assets in its stock fund account, operating stocks are being reduced to lower but better-balanced levels. In addition, military installations with 1.6 billion dollars of annual transactions have been put on a businesslike basis through the use of industrial funds.

Military functions of the Department of Defense will require 32.9 billion dollars of new authority to incur obligations in the fiscal year 1956, including proposed legislation. The gross requirements to finance proposed legislation total 3 billion dollars, but I am recommending that 1.5 billion dollars of this be met with currently available funds which can be transferred as a result of actual and prospective savings and adjustments by the Department of Defense.

Total expenditures for military functions of the Department of Defense will be greater than the new obligational authority required. Expenditures have been estimated at 34 billion dollars despite the fact that the present estimates for the many individual Department of Defense programs add to a total of 35.75 billion dollars. The success of the Secretary of Defense to date in introducing improvements in planning and increased efficiency in operations leads him to believe that he will find more opportunities for savings and economies. It is not feasible for the Secretary to predict at this time what the possible savings, slippages, and program adjustments will be in each category of military expenditures but he expects that total expenditures will not exceed 34 billion dollars. Consequently, the anticipated savings and adjustments are shown as an unallocated reduction of 1.75 billion dollars, about 5 percent of the total estimated expenditures of the Department of Defense.

The estimated 34 billion dollars of expenditures for the fiscal year 1956 includes 1 billion dollars for proposed legislation. The total estimate is 375 million dollars lower than the current estimate of expenditures for the fiscal year 1955 and 6.3 billion dollars below expenditures in the fiscal year 1954.

DEPARTMENT OF DEFENSE COSTS BY MAJOR CATEGORIES

[Fiscal years. In millions]

Cost category	Budget expenditures				Recommended new obligational authority for 1956
	1953 actual	1954 actual	1955 estimated	1956 estimated	
Military personnel	$11,556	$10,961	$10,245	$10,295	$10,612
Operation and maintenance	10,379	9,356	7,869	8,576	9,184
Major procurement and production	(17,123)	(15,958)	(12,627)	(12,718)	(9,524)
Aircraft	7,416	8,334	7,557	7,550	6,064
Ships	1,191	1,090	888	999	1,317
Other	8,516	6,534	4,182	4,169	2,143
Military public works	1,913	1,706	1,418	1,749	1,914
Reserve components	522	584	705	927	1,037
Research and development	1,412	1,385	1,307	1,369	1,370
Establishment-wide activities	759	771	719	793	758
Working capital (revolving) funds	−54	−384	−515	−677	
Unallocated reduction in estimates				−1,750	
Reduction through transfers of prior year appropriations					−1,500
Total	43,610	40,336	34,375	34,000	32,899

Military personnel costs, which include the compensation of military personnel, family allowances, subsistence, clothing, and permanent-change-of-station transportation, will be approximately the same in 1956 as during the current fiscal year but about 6 percent below the fiscal year 1954. Although the number of military personnel is scheduled to decrease during the fiscal year 1956, the resulting decrease in expenditures will be more than offset by the added costs of the pay increase and other benefits proposed in my special message. I am again recommending legislation to provide medical care for dependents of members of our Armed Forces in both military and civilian medical facilities. Funds are included in this budget for this proposal. I will also recommend an extension of the Dependents Assistance Act and funds are included in this budget to cover these costs.

Continuing improvements in organization and management of the Department of Defense have resulted in significant savings in the costs of operating and maintaining posts, stations, airbases, aircraft, ships, and other military equipment during the past 2 years. The planned reduction in numbers of military personnel will permit further savings through appropriate reductions in the number of supporting establishments. Nevertheless, total expenditures for operation and maintenance will be greater in the coming fiscal year than during the fiscal year 1955, since the cost reductions will be more than offset by the increasing costs of operating and maintaining the modern

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

equipment being provided for our forces, and for operating our expanding system of continental defense in which all services participate.

Major strides have been made during the past year in expanding the system for defense of continental United States against possible enemy attack. NIKE guided-missile battalions are rapidly being installed for the defense of key potential targets. A separate Continental Air Defense Command, reporting directly to the Joint Chiefs of Staff, has been established. It has operational control over continental defense forces, including (1) Air Force fighter interceptors and aircraft control and warning networks, (2) Army anti-aircraft and guided missile battalions, (3) Navy radar picket ships and air units in the contiguous radar system, and (4) additional forces from other Air Force, Navy, Marine Corps, and Air National Guard fighter and radar units when made available for air defense. Our radar screen is being expanded and existing gaps in coverage are being filled. Our Air Defense forces, as well as the Strategic Air Command and Naval air power, are being kept on an alert basis. A surprise enemy attack would find us with increasing readiness to resist attack and retaliate with devastating effect. These measures inevitably lead to increased operating costs for continental defense, which are now higher than ever before in our history and are still rising.

Expenditures for procurement and production of major items of equipment will continue at approximately the same level as during the current fiscal year and will constitute more than one-third of the total projected expenditures of the Department of Defense. Procurement of aircraft and guided missiles will continue at the same level as during the current year and will account for two-thirds of total major procurement expenditures. Shipbuilding expenditures will increase over the current fiscal year. This budget provides for an increased number of new shipbuilding starts. This continues the program I recommended in the 1955 budget to cope with the problem of "block obsolescence" of the fleet, which was largely built during World War II. Included in the proposed shipbuilding program for the fiscal year 1956 is a fifth carrier of the *Forrestal* class.

Appropriations enacted in prior years have permitted us to build our mobilization stocks of key military items to greater levels than ever before accumulated except in time of war. My recommendations in this budget will permit us to continue the accumulation of reserves of selected types of materiel. They also provide for our operating needs for newer weapons and equipment. As has been the policy of this administration in the past, maximum feasible reliance will also be placed upon keeping military production facilities in operation rather than on accumulating even larger reserve stocks of end-items.

Digitized for FRASER

Federal Reserve Bank of St. Louis

Military construction expenditures during the fiscal year 1956 are expected to increase substantially over the 1955 level, reflecting progress in all Services on construction of bases. A substantial portion of the military public works projects proposed to be undertaken during the fiscal year 1956 are related to the continental defense program. In addition, this budget provides for essential increments to overseas construction programs now nearing completion and for rounding out the facilities needed for the approved military force levels. The program includes a portion of the family housing greatly needed at military installations. Limited provision is also made for replacing a small portion of substandard World War II construction which has passed the point of economical maintenance and operation.

In my special message I recommended urgently needed legislation to create a more effective military reserve. Expenditures for the reserve components are expected to increase markedly during the fiscal year 1956 as a result of this legislation. Reservists in drill pay status are estimated to increase from 697,000 as of June 30, 1954, to about 857,000 at the end of the current fiscal year and a little over 1,000,000 at the end of the fiscal year 1956. In addition, under the terms of the proposed new program, there will be approximately 50,000 reservists in drill pay status who will have completed 6 months' active duty training by the end of the fiscal year 1956.

This budget also provides for continuation of the present high level of research and development in the Department of Defense. Major emphasis is being placed on developments which will more effectively utilize nuclear energy in military operations. New equipment and techniques are being developed to provide the mobility needed to meet the changed requirements of nuclear warfare. We shall continue to concentrate on those programs which show the greatest promise of providing reliable new weapons and significant improvements in both our offensive and defensive capabilities under the conditions of modern warfare. It is my belief that increased returns in military research and development can best come from maintaining a stable high level program. Although this level of program utilizes, either through direct employment or on a contractual basis, about one-half the research scientists and engineers in the United States, it also permits a high level of nonmilitary research and development essential to an expanding economy.

Civil defense.—Civil defense is also an integral part of the overall program for defense of the continental United States against enemy attack. Although the major part of continental defense is in the military budget, expenditures by the Federal Civil Defense Administration are classified in the commerce and manpower section together with those for dealing with peacetime disasters.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

The concept of civil defense adopted last year takes account of the destructive threat of modern weapons and places emphasis on improved warning of impending attack, to allow time for evacuation of potential target cities. Since this policy was announced, the Federal Civil Defense Administration has developed its plans more fully and individual cities have tested mass evacuation. I cannot stress too much that civil defense will succeed or fail in proportion to the willingness of American communities to meet the peril. The Federal Government is developing cooperative methods with State governors, mayors, and voluntary citizen groups, as well as among Federal agencies, in building the civil defense organization. In accordance with the Federal Civil Defense Act of 1950, the primary responsibility for civil defense rests with the States and their political subdivisions.

Development and control of atomic energy.—It is our purpose, working in concert with other nations, to banish the threat of atomic warfare which now confronts the world. Progress is being made toward establishing an international agency for cooperation in developing the peaceful uses of atomic energy, as I proposed to the United Nations on December 8, 1953. The budget of the Atomic Energy Commission for the fiscal year 1956 provides for greater expenditures than ever before on projects to develop peaceful applications of atomic energy. We shall continue unabated our efforts to assure that this great force will be used, not for war, but for the well-being of all mankind. Until such assurance can be achieved, however, we have no alternative but to strengthen further our most effective deterrent to armed aggression—the power of our nuclear weapons stockpile.

Despite a growing program, I am recommending for 1956 only a slight increase over 1955 in new authority to incur obligations because of the availability of large unobligated balances, due partly to savings in construction costs. Total expenditures in the fiscal year 1956 are estimated at 2 billion dollars, 50 million dollars less than in 1955.

Operating expenditures will rise in the fiscal year 1956 to the highest rate yet attained. They will increase from 1.2 billion dollars in 1955 to 1.5 billion dollars in 1956 principally because of an expected higher level of procurement of raw uranium ores and concentrates and because of greater production at the Commission's plants as new facilities are completed and placed in operation. The estimates assume continuing reductions in unit production costs.

Capital expenditures in the fiscal year 1956 will drop considerably as the large new production plants authorized in prior years approach completion. Recommended new construction will include: (1) plant improvements and other facilities to increase the efficiency and capacity of the production complex, (2) certain weapons research facilities,

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

(3) a medical research center, (4) an international training school in reactor technology, and (5) developmental atomic reactor projects.

The national effort to develop industrial atomic power for peacetime uses will go forward with increased vigor. The Atomic Energy Act of 1954 makes possible substantial private activity and investment in the constructive applications of atomic energy. Construction of one large atomic powerplant jointly financed by the Government and industry is already underway. As I stated in my message of February 17, 1954, to the Congress, "It is essential that this program so proceed that this new industry will develop self-reliance and self-sufficiency." Accordingly, it is expected that industry will finance an increasingly larger share of the total national effort in developing power reactor technology. However, to speed progress in getting the new technology established, the Atomic Energy Commission in 1956 will expand substantially its program to develop industrial power reactors. Construction of several experimental reactors will be started in 1955 and 1956. Of these, one of the most significant is a power breeder, designed to produce more fissionable material than it consumes. Nearly 15 million dollars is included in the budget for this project.

Effective progress in military propulsion reactors will continue. The launching in 1954 of the first atomic submarine, the U. S. S. *Nautilus*, will be followed by the launching in 1955 of the U. S. S. *Sea Wolf*, an atomic submarine of different design. In addition, two atomic-powered attack type submarines have been financed by Department of Defense appropriations in the fiscal year 1955. My recommendations for the Department for 1956 include additional submarines of this type. In 1956, development work will proceed on improved types of submarine reactors, and on a reactor to power larger naval vessels. The Atomic Energy Commission and the Department of Defense will expand and accelerate research on atomic powered aircraft, and will continue development work on small transportable power reactors for military use.

The basic—as distinct from applied—research which is fundamental to progress in all aspects of nuclear energy will be pursued energetically and will entail somewhat higher expenditures in 1956, both in the Commission's own laboratories and through support of research in universities and other institutions.

I again recommend that the Congress approve legislation to allow the residents of Oak Ridge, Tennessee, and Richland, Washington, to purchase their homes and establish self-government, thus taking the Federal Government out of the business of owning and governing these communities.

http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

Stockpiling of strategic and critical materials.—A new long-term stockpile level has been established to provide an additional measure of security over and above the minimum goals. Procurement of the additional minerals will generally be limited to instances where purchases at favorable prices will serve both to meet the long-term stockpile objectives and to maintain essential domestic production, as in the case of lead and zinc in the past 6 months.

Preliminary reviews of 50 minerals indicate that the new policy may eventually increase the inventories of materials by 3.3 billion dollars above the 6.5 billion dollars of minimum objectives. By the end of the fiscal year 1956, about 5.1 billion dollars of materials within the minimum objectives, and an additional 1.2 billion dollars toward the long-term objectives will be in inventory, compared with June 1954 levels of 3.8 billion dollars and 700 million dollars, respectively. In considerable measure, this progress is made possible under the Defense Production Act, discussed in the commerce and manpower section of this message.

Mutual security program.—Military assistance and direct forces support help other free nations to train and equip the modern armed forces which are necessary for our security as well as their own. Such assistance is an integral part of our own national security program for it helps to create, in crucial areas of the free world, essential military strength which bolsters our own forces. Because our allies generally provide the major portion of the costs of maintaining the forces, this strength is being created at a relatively low cost to the United States taxpayer.

The military assistance and direct forces support programs are two parts of an integrated mutual security program which in its entirety is designed to provide other nations with the margin of outside assistance which they need to develop and maintain their political, military, and economic strength, which is in our interest. Other parts of this program are discussed in the international affairs and finance section of this message. I shall submit to the Congress proposals for necessary changes in the Mutual Security Act. These will include my specific requests for authorization of appropriations for the fiscal year 1956. Total expenditures for mutual security are estimated at 4.7 billion dollars in the fiscal year 1956, including the provisions for a program in Asia. Recommended new authority to incur obligations is 3.5 billion dollars.

Organization for mutual security operations.—The organizational arrangements to carry on the mutual security program beyond the present fiscal year are now under careful study and I shall in the near future present to the Congress my recommendations regarding them.

Proposed legislation			600	[1] 3,530

[1] Compares with new obligational authority of 4,725 million dollars in 1954 and 2,781 million dollars in 1955.

Military assistance.—The mutual military assistance proposed for the fiscal year 1956 will further help our allies to complete equipping and training the equivalent of more than 180 divisions, 551 combat vessels, 278 air squadrons, and related supporting units. Our assistance goes only for forces determined to be essential by our Joint Chiefs of Staff. It provides only the critical margin of training and equipment which the countries cannot provide for themselves. During the past 5 years we have delivered over 6,000 airplanes, almost 900 naval vessels of all types, 36,000 tanks and combat vehicles, nearly 200,000 transport vehicles, billions of rounds of ammunition, and many other items. Furthermore, specialized training courses have been conducted for officers and technicians from 32 countries.

Expenditures for military assistance in the fiscal year 1956 are estimated at 3.1 billion dollars as compared with 3.6 billion dollars in the fiscal year 1954, and an estimated 2.7 billion dollars in 1955. The decline in estimated expenditures from 1954 to 1955, and the subsequent increase projected for 1956, do not accurately reflect the probable rates of delivery of equipment to our allies during 1956. Actual deliveries are expected to continue in the fiscal years 1955 and 1956 at around the 3-billion dollar level which was attained in the fiscal year 1954. The fluctuations in expenditure estimates are due to a change in the method of financing wherein the Department of Defense finances the production of common type materiel, pending delivery to the mutual security program and subsequent reimbursement of Department of Defense appropriations.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

Much of our mutual military assistance continues to strengthen our allies in the North Atlantic Treaty Organization, and I hope that we may soon begin furnishing certain items of military equipment which will be needed by the new German forces. To the extent that this materiel cannot be financed by the Federal Republic of Germany from its own resources, it will be financed from appropriations made for the mutual security program. The continuing growth of economic strength in Europe and completion of the financing of much of the capital equipment which was required for the initial rapid military buildup will make it possible to reduce military assistance for this area in the immediate future below the level of the last few years.

The military assistance program proposed for the fiscal year 1956 will include aid to Korea which, in previous years, was financed from regular Department of Defense appropriations. We are also proposing the continuation of assistance designed to strengthen further the defenses of Formosa, Japan, and certain other countries in Asia which are presently receiving military assistance.

Expenditures in the fiscal year 1956 will be largely from appropriations made in previous years. At the same time, however, new authority of 1.4 billion dollars, which I am recommending, is needed to incur obligations in the fiscal year 1956 to finance in advance certain new requirements such as the Korean program.

Direct forces support.—The present Mutual Security Act distinguishes between military equipment and those supporting items which are necessary to make the soldiers and weapons effective. These supporting items, commonly referred to as direct forces support, include gasoline, tires, uniforms, medicines, rations, and similar items which all military forces consume every day.

For the fiscal year 1956 I propose that direct forces support be provided to only a few selected countries. These countries, primarily in Asia, are ones where our mutual security requires the maintenance of active forces larger than those which these countries could support from their own resources. In the fiscal year 1956 direct forces support for the armed forces of the Republic of Korea, which was formerly provided for in the Department of Defense budget, will be covered for the first time by the mutual security program.

Direct forces support will continue to be a significant part of the mutual security program for so long as the security of the free world requires that large military forces be maintained in Asia and the Near East. I recommend 630 million dollars of new obligational authority under proposed legislation for this purpose. Expenditures for this program from existing appropriations and from the proposed legislation are estimated at 600 million dollars in the fiscal year 1956, as compared with 550 million dollars in the fiscal year 1955.

INTERNATIONAL AFFAIRS AND FINANCE

During the past year the free world, despite some setbacks, has made heartening progress in building the strength and unity which are so important to our security. In this hemisphere, in Europe, Asia, and Africa, the free nations acted together to strengthen their defenses against international communism, to widen economic cooperation, and to settle long standing disputes which have undermined free world unity. In these developments the United States has played a vital role.

My program for the coming year is designed to consolidate these gains and to make further progress. Particular emphasis will be laid on further strengthening the foreign service organization of the Department of State which carries the burden of foreign policy leadership and negotiations. We are likewise placing emphasis on revision of our several international programs to give appropriate attention to the important trouble spots around the world today.

My budget recommendations for international affairs and finance reflect a coordinated plan for the conduct of foreign affairs, for the expansion of trade and investment, for mutual security economic assistance, and for foreign information. Total net budget expenditures for the fiscal year 1956 are estimated at 1.3 billion dollars, as compared with 1.4 billion dollars for the current year.

Recommended new authority to incur obligations in the fiscal year 1956 amounts to 1.9 billion dollars, 291 million dollars more than for 1955. Major items of this increase in new obligational authority result from increased emphasis on defense support and development assistance in Asia and reimbursement of the Commodity Credit Corporation for emergency assistance in the form of commodities furnished in previous years.

Federal Reserve Bank of St. Louis

International investment activities.—In my recent special message on foreign economic policy, I made recommendations which will enable us to expand foreign trade and investment. As a further step in providing capital to underdeveloped areas through stimulating private investment, the United States is participating with other members of the International Bank for Reconstruction and Development in working out proposals for an International Finance Corporation. Such a corporation, although it could not purchase stock, could provide venture capital by making special types of loans without government guaranties to private enterprises in less developed countries. This budget includes 35 million dollars as the United States' share of the corporation's capital of 100 million dollars.

Moreover, in keeping with legislation approved last year, the Export-Import Bank estimates an increase in direct loans and guaranties of private loans from 460 million dollars in the fiscal year 1955 to 665 million dollars in 1956. It is expected that a significant part of this increase will consist of guaranties of private loans which are not included in gross budget expenditures. New direct loans are expected to be authorized in the amount of 403 million dollars. The collections on old loans, including lend-lease and postwar reconstruction credits in Europe, will exceed disbursements against new direct loans, so that a net receipt of 90 million dollars to the Treasury is estimated in 1956.

Defense support and development assistance.—We anticipate that the trade and investment policies outlined above, and the marked advance in economic strength of many foreign countries over the past 2 years, will increasingly enable us to confine direct Government assistance for defense support and economic development abroad generally to two types of situations, both of which are related intimately to our own future security.

In the first place, we will find it necessary for some time to provide defense support to certain countries which have undertaken a military effort beyond the capacity of their own economies to support. This defense support includes consumption goods and capital equipment to support the general economy, as contrasted with direct forces support which provides assistance to the military forces of the country. In the second place, our national interest will require direct assistance to certain less developed countries where a rate of economic progress which would be impossible without such assistance is essential to their becoming and remaining strong and healthy members of the community of free nations capable of resisting Communist penetration and subversion.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

Employment, production, and foreign exchange reserves in free European countries are generally increasing. Most of these countries can now strengthen their military establishments and at the same time improve their living standards without further United States defense support. In the fiscal year 1955, defense support has been limited to very few countries, and a similar situation is expected to prevail in 1956.

Latin America, an area with which we have well-established trade and investment relations, has a great need for capital for economic development. Nevertheless, if Latin American countries follow a policy of encouraging private investment, domestic and foreign, they should be able to continue to raise the capital needed for further economic growth. In those cases in which private or International Bank resources are not available or not appropriate for financing sound projects, the Export-Import Bank will welcome applications for loans. The new International Finance Corporation, when organized, can also help provide capital. Grants in Latin America have been necessary only in special situations such as in Bolivia and Guatemala.

In Asia, active warfare has only recently ceased and the free countries of this continent continue to face the threat of Communist subversion and external aggression. We therefore have been furnishing and propose to continue to furnish defense support to several countries including Korea, Formosa, Vietnam, Laos, and Cambodia. Some assistance in economic development has been extended to India.

Unless such support is provided, we may expect economic deterioration and dangerous reductions in the military defenses of the free world. Moreover, without such assistance, these countries, most of which border on Russia and Communist China, will not achieve the economic progress which is necessary to meet the threat of Communist subversion. The loss of northern Vietnam makes this support more imperative than ever.

In the Middle East and Africa, we have provided some grant and loan assistance to promote economic development and political stability, and will request funds to continue this type of assistance in the fiscal year 1956. This assistance has gone to Iran, Israel, Lebanon, Jordan, Egypt, and Libya.

My budget proposals for the mutual security program were developed on the assumption that all requirements for that program will be met from appropriations made for that purpose. Therefore if it becomes desirable to utilize foreign currencies accruing from sales of surplus agricultural commodities made under the Agricultural Trade

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

Development and Assistance Act for mutual security purposes, mutual security appropriations will be used to reimburse the Commodity Credit Corporation for currencies so utilized.

Technical cooperation.—Over recent years, technical cooperation has become a continuing part of United States policy toward the rest of the world. American experts help the people in foreign countries, and foreign technicians come to the United States to observe our methods. As a result, millions of people are learning how to produce more food, to improve health and educational standards, and to operate modern industries more effectively. Agreements for technical cooperation are in effect in 68 countries and territories in Latin America, Asia, the Near East, and Africa.

In addition to these bilateral efforts, we have contributed to meeting the total cost of the United Nations technical assistance program, for which experts and financial contributions come from many nations. I am proposing new obligational authority to cover the total proposed contributions of the United States to this program for both calendar years 1955 and 1956.

Refugee and other foreign relief.—The 1953 Refugee Relief Act provides for the admission of 214,000 people beyond regular immigration quotas before December 31, 1956. Approximately 17,000 visas have been granted to date. Sufficient progress has been made on concluding agreements with other countries, organizing staff abroad, and completing arrangements with voluntary agencies in the United States to justify the expectation that the program can be completed in accordance with the provisions of the act. To accomplish this, I recommend an increase for the Department of State appropriation for the fiscal year 1956, and a supplemental appropriation for 1955.

I am also recommending continued United States support of those programs and international agencies through which funds have been made available for relief, rehabilitation, and resettlement of escapees, refugees, and other special groups. These agencies include the Intergovernmental Committee for European Migration, and the United Nations agencies for Palestine refugees, and for emergency aid to children. In addition, this budget makes provision for a small contribution to help the United Nations High Commissioner for Refugees take refugees out of camps and make them part of the local communities.

Foreign information and exchange activities.—The United States Information Agency has done a capable job of redirecting its work and is increasingly effective. It is carrying out its mission in 79 countries through local radio, press, films, and information centers. Its worldwide radio broadcasting is increasingly directed to the coun-

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

tries beyond the Iron Curtain. But the Soviet efforts to divide the United States from other nations of the free world by twisting our motives, as well as its efforts to sow fear and distrust, are mounting in tempo in many areas of the world. I believe it is of the highest importance that our program for telling the truth to peoples of other nations be stepped up to meet the needs of our foreign policy.

The Department of State's educational exchange program is primarily directed toward the exchange of educators, newsmen, labor and management officials, students and others who influence the formation of public opinion abroad. The sharing of ideas strengthens the community of interest so vital to our relations with other people. I recommend that these exchanges be increased, particularly with underdeveloped areas.

Conduct of foreign affairs.—A prerequisite to the achievement of all our international affairs and finance programs is dynamic, positive, and dedicated leadership by the Department of State.

This budget recognizes the essentiality of a stronger and better trained career corps of foreign service officers. We should also provide more adequate facilities for carrying out statutory consular functions. Finally, more comprehensive commercial, labor, and other economic data are necessary to assist American businessmen to increase their foreign investment and trade.

As a result of the recommendations of the Committee on Government Operations of the House of Representatives and a committee of distinguished citizens, we are starting a series of improvements in the foreign service. The foreign service will be expanded to cover departmental positions; officers will be rotated more regularly between United States and foreign posts; and training will be improved. Appropriations to initiate these reforms are recommended.

VETERANS' SERVICES AND BENEFITS

Expenditures for veterans' programs are now rising—reversing the decline from the peak in 1947 as World War II veterans completed their readjustment to civilian life. In the fiscal year 1956, the Federal Government will spend an estimated 4.6 billion dollars for a wide variety of aids to veterans, an increase of 9 percent over the actual outlays in 1954 and 5 percent over 1955. This increase will occur notwithstanding the savings made through improved management of the Veterans Administration, and the long-run outlook under present laws is for continued large increases in payments to veterans.

Three main factors account for this outlook. First, World War II, the Korean conflict, and large defense requirements have increased the present and potential veteran population tremendously. Twenty-one

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

million veterans are now in civilian life, 5 times the number before World War II. An additional 3 million men and women now in the Armed Forces have acquired rights to wartime veterans' benefits by serving during the Korean emergency.

Second, the 3 million veterans of World War I are reaching age 65 and are qualifying for pensions in large numbers. A service-incurred disability is not required for these benefits.

Third, benefits for veterans who served during wartime or an emergency have been increased in scope and liberality. Last year, laws were enacted which will add more than 170 million dollars in estimated expenditures for veterans' benefits for the fiscal year 1956, principally for increased pension and compensation payments.

These facts require sober consideration. Our Government has a responsibility to provide generous assistance to those who have special needs arising from service in the Armed Forces, particularly war service. We must make sure that benefits which are provided to veterans and their survivors are timely and reach those who need them most. At the same time, we must bear in mind that Government policies designed to assist in the maintenance of a prosperous economy and to support social security, health, and other humanitarian programs are all of value to veterans as well as to other people. Since more than two-fifths of all adult males are entitled to veterans' benefits, expenditures for veterans are a budgetary problem of major interest to the whole population.

Our veterans' pension and compensation laws, in particular, are in need of constructive reconsideration. The non-service-connected pension system dates back to the Revolutionary War, and its principles require reexamination in the light of recent developments, including the nearly universal coverage of the old-age and survivors insurance system. The overall system of statutes and regulations governing eligibility and payment rates for service-connected compensation has not had a fundamental review for many years. It also needs to be reappraised in the light of the great improvement in medical and rehabilitation techniques and the actual economic situation of the many beneficiaries.

I am therefore appointing a Commission on Veterans' Pensions to study the entire structure, scope, and philosophy of our veterans' pension and compensation laws in relation to each other and to other Government programs. This budget includes 300,000 dollars for the continuation of the work of this Commission in the fiscal year 1956.

An especially complex and difficult problem exists in the field of survivor benefits for military personnel and veterans, where 4 different agencies now provide 5 major benefits. This problem has received

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

extensive attention within the executive branch and from the Select Committee on Survivor Benefits of the House of Representatives. I hope that our mutual efforts will result in enactment of adequate and improved programs which will include full coverage for military personnel under our basic old-age and survivors insurance program and will properly relate benefits provided military personnel to those for veterans.

I have recently issued a proclamation terminating accrual of eligibility after January 31, 1955, for various benefits authorized for veterans who served during the Korean conflict. Few of those discharged during the fiscal year 1956 will be materially affected by this action. Studies will be undertaken to determine the need for measures to ease the readjustment to civilian life of men required to enter the Armed Forces for 2 years of service.

VETERANS' SERVICES AND BENEFITS

[Fiscal years. In millions]

Program or agency	Expenditures			Recommended new obligational authority for 1956
	1954 actual	1955 estimated	1956 estimated	
Gross expenditures:				
Readjustment benefits:				
Education and training	$546	$602	$587	$587
Loan guaranty and other benefits (Veterans Administration)	76	38	40	40
Unemployment compensation (Department of Labor)	82	131	150	150
Compensation and pensions	2,482	2,679	2,800	2,800
Insurance and servicemen's indemnities	104	72	135	127

Net budget expenditures	4,256	4,431	4,640	

[1] Compares with new obligational authority of 4,272 million dollars in 1954 and 4,285 million dollars in 1955.

Readjustment benefits.—The Veterans' Readjustment Assistance Act of 1952 authorizes education and training, loan guaranty, and unemployment compensation benefits for veterans who served during the Korean conflict. Many World War II veterans are still eligible for loan guaranty benefits and some are still completing their education

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

and training under the original "GI bill." In addition, special vocational rehabilitation aid is provided under other laws for veterans of both conflicts who were disabled in service.

The total estimated expenditures of 777 million dollars for all readjustment benefits in the fiscal year 1956 will be at about the same level as in the current year, and 10 percent higher than in 1954. The proportion of total readjustment benefits going to veterans of the Korean conflict has been increasing, and is expected to exceed 90 percent in the fiscal year 1956.

An average of 516,000 trainees is expected in the school, job, and farm training courses during the fiscal year 1956. One out of each 4 of the 4.7 million veterans eligible for these Korean conflict benefits will have participated in education or training by the end of the fiscal year 1956. The reservoir of potential enrollees is still large, considering that 1 out of each 2 World War II veterans received such benefits.

Budget expenditures under the loan guaranty program have declined sharply since the fiscal year 1954 because payments for the first year of interest on mortgages have ceased. It is expected that 467,000 loans totaling 5 billion dollars will be insured or guaranteed during the fiscal year 1956. Almost all of these loans will be for housing. The estimated 40 million dollars of expenditures in this category for 1956 includes 25 million dollars for acquisition of properties and losses on defaulted guaranteed loans. The other 15 million dollars is for tuition and supplies in the vocational rehabilitation program and grants of up to 10,000 dollars each for special housing for certain severely disabled veterans. Expenditures for the Veterans Administration direct housing loan program under present law and its proposed extension are included among aids for private housing in the commerce and manpower section of this message.

Federal unemployment compensation benefits of 26 dollars a week for a maximum of 26 weeks are payable through State agencies to veterans of the Korean conflict. Where the veteran who is insured under a State unemployment compensation system receives lower benefits from that system, the United States Department of Labor supplements the State benefit. Expenditures for this purpose are increasing as the number of eligible veterans rises. In the fiscal year 1956 an estimated weekly average of 138,000 veterans will receive unemployment benefits, wholly or partly financed by the Federal Government.

These unemployment benefits were intended to assist veterans of the Korean conflict during their transitional period immediately following separation from military service. Possibly by inadvertence, the present provisions were so written that a veteran of the

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

Korean conflict may apply for these benefits at any time up to January 31, 1960, no matter how many years have passed since his discharge. I recommend that the law be amended to limit the time for filing claims to 3 years after separation or enactment of the amendment, whichever is later.

Compensation and pensions.—The upward trend in total expenditures for veterans results mainly from the rise in compensation and pensions. Expenditures for this purpose are estimated to increase more than 300 million dollars from the fiscal year 1954 to 1956, to a total of 2.8 billion dollars. They will equal more than half of all payments from the old-age and survivors insurance system. On the basis of present laws and veteran population, the present annual rate of expenditures for veterans' pensions and compensation is expected to double in 3 or 4 decades.

The estimated expenditures of 2.8 billion dollars include 1.9 billion dollars in payments to nearly 2,486,000 families and veterans for death or disability resulting from service, and 859 million dollars for pension payments in 1,046,000 cases where death or disability was not connected with military service. During the fiscal year 1954, an average of 2,412,000 cases received about 1.7 billion dollars in death and disability compensation benefits, and 716 million dollars in pensions were paid in 902,000 cases. The expenditures for 1956 also include 17 million dollars for 110,000 burial awards and 26 million dollars in subsistence payments to disabled veterans during their vocational rehabilitation.

Insurance and servicemen's indemnities.—Payments for insurance and indemnity benefits go to families of personnel who die in military service. The increase in expenditures in the fiscal year 1956 reflects (1) a steady increase in indemnity benefits, and (2) an unusual increase in insurance expenditures resulting from recently declared deaths of servicemen who were previously reported missing during the hostilities in Korea.

Indemnity benefits of $92.90 a month are paid for 120 months to the family of each serviceman who dies while on active military service or within 120 days after separation. The benefits are reduced proportionately if the serviceman has any Veterans Administration insurance. Payments of 42 million dollars estimated for the fiscal year 1956 are 79 percent higher than in 1954.

While no new national service life insurance or United States Government life insurance has been issued since 1951, previously issued policies continue in force. Where deaths are caused by the hazards of war, or occur during military service while premiums

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

have been waived, the Government reimburses the insurance trust funds for losses. The Government also pays benefits directly to certain policyholders. Budget expenditures for insurance losses are estimated at 93 million dollars in the fiscal year 1956, somewhat more than in 1954 and more than double the amount in 1955.

Hospital and medical care.—A rising patient load in the veterans' hospital and medical program will result in an increase in current expenses for the fiscal year 1956. The average number of patients in Veterans Administration and contract hospitals is expected to rise 4 percent above the 1955 level to 114,500. While the proportion of service-connected cases is slowly increasing as more veterans of the Korean conflct are treated, it is estimated that more than two-thirds of the expenditures in 1956 will still be for patients hospitalized or treated for ailments not connected with military service. The number of persons in Veterans Administration and State homes is estimated to be 25,700 in the fiscal year 1956. The workload for outpatient care to service-incurred dental and medical cases is expected to be about 14 percent below that in 1954, with a total of 2,340,000 examinations and treatments in 1956. About four-fifths of the estimated average employment of 171,000 in the Veterans Administration during the fiscal year 1956 will be in the hospital and medical programs.

The budget includes recommended new authority to incur obligations of 20 million dollars for construction and improvements at Veterans Administration facilities. Most of this is for modernization of existing structures. Expenditures for construction and improvements in the fiscal year 1956 are estimated at 60 million dollars, approximately the same amount as in 1954 and somewhat higher than in 1955. Expenditures will be greater than the recommended new appropriations because funds for three large new hospitals to be built in 1956 were appropriated in previous years.

Other services and administration.—The general operating expenses of the Veterans Administration are estimated to decline further in the fiscal year 1956, reflecting declining workloads in some parts of this agency, especially in the insurance programs, and better organization and management throughout the agency. Average employment in nonmedical activities in 1956 is estimated at 34,500, or 13 percent below the 1954 level.

Trust funds.—Nearly 6 million national service life insurance and United States Government life insurance policies, which provide more than 40 billion dollars of protection, continue in force. About 1 million of these policies are held by personnel still in the Armed Forces,

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

largely on a waiver-of-premium basis. The remainder are held by veterans who pay premiums. As the special dividend payments to the policyholders declared in 1954 and earlier years are completed, the receipts of the insurance trust accounts begin to exceed their disbursements. The transactions in these, as well as other, trust funds are not included in the budget totals.

WELFARE, HEALTH, AND EDUCATION

Major advances have been made in the past year in the fields of social security, health, and education, pursuant to recommendations which I made to the Congress. We have demonstrated that the well-being of our people can be strengthened without yielding to the dangers of centralized power in the Federal Government, and we shall continue firmly to resist any project which would seem to us to involve such dangers. We have found ways to provide greater human security and social opportunity, while restricting the Federal Government's role to that of assisting private action and State and local responsibility with research and technical assistance, social insurance, and grants-in-aid. We believe that these gains can be continued through cooperative action among all levels of American government together with private participation.

In the last Congress, old-age and survivors insurance was extended to 10 million more persons and benefits were improved. Vocational

Federal Reserve Bank of St. Louis

rehabilitation grants to the States have been stepped up toward the objective for 1959 of helping 200,000 people a year to rehabilitate themselves. We have undertaken to aid the construction of medical diagnostic and treatment centers, rehabilitation facilities, nursing homes, and chronic disease hospitals, as well as general hospitals.

To assist in the search for solution of the Nation's serious school problems, the White House Conference on Education was authorized. The Office of Education has been strengthened. Assistance to schools especially affected by Federal activities was extended.

In this budget, I recommend increased appropriations for certain activities, including health research and the training of health personnel, and basic scientific research. I am also proposing new legislation to help fill gaps in present programs for health care, public assistance, and old-age and survivors insurance, and to obtain better coordination among them. Estimates for new legislation include 3 million dollars for grants-in-aid to enable State, local, and private agencies to deal more effectively with juvenile delinquency. I am recommending the enactment of legislation to establish an Advisory Commission on Fine Arts within the Department of Health, Education, and Welfare, to provide recognition of the importance of the further development of our cultural heritage.

Federal Reserve Bank of St. Louis

Budget expenditures for welfare, health, and education, including proposed legislation, are estimated at 2.3 billion dollars in the fiscal year 1956, a decrease of 4 million dollars from 1955. These figures do not include expenditures for health, education, and research which are classified among veterans' benefits or in the military, atomic energy, and other programs in other sections of the budget.

Promotion of public health.—This budget includes funds necessary to assist an expansion of existing services and initiate appropriate new measures which will carry out the objectives of a coordinated health program which I shall outline shortly in a special message to the Congress.

Under existing legislation, budget expenditures for public health are estimated at 321 million dollars in the fiscal year 1956. The principal expenditures are for grants to States for construction of hospitals and other health facilities, public health services, maternal and child health, and the control of various diseases; for research programs, including grants to universities and medical schools; and for operation of Public Health Service hospitals.

Significant items in the 29-million-dollar increase of expenditures over 1955 are for expansion of the research and training activities of the National Institutes of Health, including special emphasis on mental health; construction of more health facilities; an intensified attack on problems of air and water pollution; and strengthened enforcement of the food and drug laws.

I am recommending elsewhere in this message that the Atomic Energy Commission be authorized to build a new medical research center containing a nuclear reactor designed specifically for medical research and therapy. This will be a significant addition to the Nation's facilities for basic research in the field of health.

The new health legislation which I shall recommend will require budget expenditures of approximately 37 million dollars in the fiscal year 1956.

This legislation includes health reinsurance—the best method yet proposed for encouraging adequate health insurance coverage for our people. It includes also the part-year cost of a program of grants-in-aid for medical care for public assistance recipients, shown in the table under proposed legislation for public assistance. Other measures in the health program are designed to foster construction of more adequate medical facilities, training of nurses and other necessary medical personnel, and general improvement of key services in the States and local communities.

Public assistance.—The recent expansion of old-age and survivors insurance should gradually reduce the need for public assistance, with

310000—55——v

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

a consequent saving to all levels of Government in budget outlays for this purpose.

Further savings will result over the long run from amendments to public assistance legislation which I am recommending. The present grant-in-aid formula requires the Federal Government to pay each State 20 dollars of the first 25 dollars of average monthly old-age assistance benefits, and half of the next 30 dollars for any recipient. One of the proposed amendments would modify the public assistance law so that Federal grants can be adjusted downward to reflect gradually, by application to new cases, the number of old-age and survivor insurance beneficiaries who also need supplementary old-age assistance. By limiting to 50 percent the Federal share of old-age assistance for these future recipients of both types of benefits, this amendment would result in a more equitable sharing of costs between the State and Federal governments. The other amendment would encourage States to help needy individuals to become self-supporting or to care for themselves at home.

Other welfare aids and services.—Expenditures of 84 million dollars from the school lunch appropriation in the fiscal years 1954 and 1955 include about 67 million dollars for cash payments to States and nearly all of the rest is for commodities. The appropriation recommended for 1956 covers only the cash payments to the States and the costs of administration. In addition, contributions of surplus commodities, financed mainly from a permanent appropriation to the Department of Agriculture for this purpose, are expected to continue at a high level, so that the combined total of Federal cash payments and food donations will remain approximately the same in 1956 as in 1955. Moreover, the new school milk program authorized by the Agricultural Act of 1954 provides 50 million dollars a year in the fiscal years 1955 and 1956 to encourage increased consumption of milk by schoolchildren. Taken together, these various aids will make Federal support of the overall school lunch program the largest in our history. The expenditures for surplus commodities and school milk are classified under agriculture and agricultural resources.

This budget fully supports the enlarged vocational rehabilitation program enacted last year and will make possible the rehabilitation of 95,000 people in the fiscal year 1956.

The Congress last year provided for the transfer of Indian health services from the Department of the Interior to the Department of Health, Education, and Welfare, where they can be administered with other health programs. The appropriations recommended for the fiscal year 1956 will provide improved medical care for our Indian population.

Social insurance and retirement trust funds.—The Federal Government acts as trustee of three large, publicly sponsored retirement and insurance programs—old-age and survivors insurance, railroad retirement, and Federal employees' retirement. Contributions under these programs, including Federal payments, are collected in the respective trust funds and maintained separately from the budget accounts of the Government.

In connection with old-age and survivors insurance, I am recommending two legislative measures. One is the coordination of income and old-age insurance tax collection procedures to make reporting easier for wage earners and employers and at the same time to reduce Government costs for collecting taxes and paying benefits. The second is extension of this insurance to military personnel and to those Federal civilian personnel not now covered, as the basic part of improved systems of survivorship, disability, and retirement protection, with existing staff retirement systems retained as independent and separate entities. The military retirement pay system should remain unchanged. Certain adjustments in the present civilian personnel retirement systems will be needed.

Promotion of education.—We are all aware that our schools are passing through a period of extraordinary stress. School-age population is increasing faster than classroom space has been enlarged and qualified teachers recruited. In some communities, the available fiscal resources have been strained severely by efforts to meet these needs; in too many States and school districts, the financial support given to schools has not kept pace with recent increases in taxable resources.

The national problem is to find means of overcoming these difficulties within the present framework of responsibilities. In our system of government, the States and their subdivisions have the privilege and the responsibility of providing free public education. The role of the Federal Government has wisely been confined to encouragement and special assistance. I am confident that the overwhelming majority of our people agree that there should be no dilution of that State and local responsibility.

I have called a White House conference this fall of representatives from all the States. Some local and State conferences of citizens and professional educators have already been held in preparation for this national assembly. Others will meet this spring and summer. These meetings will highlight possible long-range solutions to the problems and will place in better perspective the obligations and opportunities of the respective levels of government.

Concurrently, without impairment in any way of State, local, community, and family responsibility, the Federal Government should serve as an effective catalyst in dealing with the problem of classroom shortages. I shall send to the Congress, in February, a special message presenting an affirmative program.

The major Federal expenditure for promotion of education consists of grants to aid school construction and operation in districts where enrollment has grown significantly because of Federal operations.

Federal Reserve Bank of St. Louis

Last year, the Congress extended the temporary program of aid for construction for 2 years. To finance this extension, I am recommending an appropriation of an additional 70 million dollars for the current fiscal year and 24 million dollars for 1956.

The Congress also delayed a requirement that these school districts absorb a greater proportion of the operating costs resulting from increased enrollments. Primarily for this reason, a supplemental appropriation of 19 million dollars will be needed this year. In the fiscal year 1956, greater absorption of the increased enrollments by the local districts will reduce the assistance payments for operations 6 million dollars below 1955, to a total now estimated at 70 million dollars.

The budget recommendations provide for continuing the increase in vocational education grants which was enacted for 1955, and will permit the Office of Education to initiate a program of cooperative research as authorized by the last Congress.

General-purpose research.—Despite our tremendous technological strides in recent years, our national interest requires that we support a strong program of basic research and that we train a greater number of highly qualified scientists and engineers. Accordingly, this budget recommends increased National Science Foundation grants for basic research and for training more graduate students, college instructors, and high school science teachers. It includes also the remaining necessary financial support for United States participation in the International Geophysical Year, a worldwide scientific undertaking which will yield great long-range benefits to this country.

The budget estimates for the Department of Commerce include substantial expansion in the general scientific and technological work of the National Bureau of Standards as recommended by a committee of outstanding scientists.

Another aspect of general-purpose research is the statistical work of the Census Bureau. We do not have all the statistical information required in our dynamic economy. I am therefore recommending a governmentwide effort to improve statistics in those areas where our work has been most handicapped by incomplete information. Increases in appropriations are recommended for the Census Bureau for statistics on the labor force and for an intercensal survey on housing. At the same time, in other parts of the budget, increases are recommended for statistics on agriculture, production, construction, employment, and finance. Details on statistical programs are shown in special analysis I on page 1203.

AGRICULTURE AND AGRICULTURAL RESOURCES

The basic agricultural legislation which I recommended and which the Congress enacted last year will help to promote a stable, prosperous, and free agriculture. By helping farmers solve many of their own problems we shall make possible reduced reliance on Government intervention such as production controls, and on Government spending for support of farm income. The Agricultural Act of 1954 and the Agricultural Trade Development and Assistance Act will facilitate readjustment of farm production, expansion of agricultural exports, and stimulation of domestic consumption of farm products. The Watershed Protection and Flood Prevention Act of 1954 provides a sound basis for Federal partnership with States and local groups in upstream flood prevention and soil and water conservation. The Farmers' Home Administration was given expanded authority to make loans for soil and water conservation, and a basis was provided for greater participation of private lenders in the financing of this and other loan programs.

My recommendations for agricultural programs in this budget will carry forward the broad objectives reflected in this new legislation. They will also continue the steps taken last year to place greater emphasis on research and educational activities. I have confidence in the ability and willingness of farmers to deal with many of their economic problems if given help through expanded agricultural research and advice in making use of the research results.

Gross expenditures for agriculture and agricultural resources in the fiscal year 1956 are estimated at 7.6 billion dollars. Receipts, estimated at about 5.4 billion dollars, consist mainly of collections on loans and sales of commodities. Net budget expenditures are estimated at 2.3 billion dollars in the fiscal year 1956, which is 871 million dollars less than estimated for 1955 and 298 million dollars less than in 1954. The reduction in net budget expenditures for 1956 is primarily due to anticipated smaller outlays for farm price supports.

New authority to incur obligations recommended for the fiscal year 1956 is 1.3 billion dollars, as compared with 2.6 billion dollars in 1955 and 4 billion dollars in 1954. The reduction in 1956 is accounted for almost entirely by the Commodity Credit Corporation. The Corporation's present borrowing authority, which was increased from 6.75 billion dollars to 10 billion dollars during the fiscal years 1954 and 1955, is now expected to be adequate to finance price support activities in the fiscal year 1956.

[1] Net expenditures for the Farmers' Home Administration and for rural electrification and telephone loans do not reflect loan collections, since these collections go directly into miscellaneous receipts of the Treasury. In 1956, these collections are estimated at 152 million dollars and 112 million dollars, respectively.

[2] Compares with new obligational authority of 4,010 million dollars in 1954 and 2,630 million dollars in 1955.

Stabilization of farm prices and farm income.—Establishment of the principle of flexible supports and provision for a gradual shift to modernized parity for the basic agricultural commodities in the legislation enacted last year will encourage farmers to adjust their production to realistic market prices in keeping with the current needs of the economy. Since the transition to the new basis for price supports will be gradual, the benefits for the agricultural economy and for the Nation will not be fully realized for several years.

Based on the best information now available, gross price support expenditures in the fiscal year 1956 are estimated at 4.2 billion dollars, 1.5 billion dollars less than the amount estimated for 1955. These gross expenditures do not represent losses; rather they are outlays for loans and commodities to be acquired during the year, and for redemp-

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

tion of certificates of interest in commodity loans previously sold to private lenders. A substantial part of these outlays will be recovered from collections on loans and sales of commodities in later periods. Receipts from commodity sales and collections on loans in 1956 are estimated at 3.2 billion dollars, resulting in net budget expenditures of 968 million dollars.

The decline in net price support expenditures anticipated in the budget will be brought about by two major factors. First, continuation of acreage restrictions, particularly on 1955 crop year cotton and wheat, and lower support levels on some commodities are expected to result in a lower volume of price support loans. Second, receipts from sales of such commodities as cotton, corn, and wool are expected to increase as our efforts to find new and expanded markets for agricultural products begin to show results. These factors will be offset in part by increased Commodity Credit Corporation expenditures to retire certificates of interest in prior-year crop loans sold to banks and private lenders, because a substantially smaller volume of new commodity loans will be available in 1956 than in 1955 to serve as a basis for certificates of interest. Also, funds of the Corporation will be used to provide for increased milk consumption by schoolchildren and members of the Armed Forces during 1955 and 1956 when supplies of dairy products are expected to be plentiful.

Expenditures in 1956 under the International Wheat Agreement are estimated to be lower than in 1955, but higher than in 1954. In the fiscal year 1954 a total of 119 million bushels of wheat was exported under this program. The average amount paid by the Government to cover the difference between the domestic price and the Wheat Agreement price was 48 cents per bushel. Larger exports under this program are expected in both 1955 and 1956.

In addition to exports under the Wheat Agreement, the Commodity Credit Corporation has offered to sell wheat in limited quantities for export at competitive world prices. Net costs to the Corporation of these additional exports in 1954 were 26 million dollars and are estimated at 59 million dollars in each of the fiscal years 1955 and 1956.

The Corporation may also sell surplus agricultural commodities for foreign currencies under the Agricultural Trade Development and Assistance Act. The law provides for a 3-year program with total cost to the Corporation to be reimbursed by appropriations limited to 700 million dollars. With due regard to the impact on world markets, we are moving ahead in an orderly manner in the negotiation of agreements, and it is expected that transactions completed during the fiscal year 1955 will account for a substantial part of the costs under this Act. Except for expenditures under the International Wheat Agreement, these expenditures for export programs are included in the total shown for the Commodity Credit Corporation,

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

The trade development act is helpful in marketing commodity surpluses and tends to reduce current outlays under the regular price support program. However, it is unwise to rely upon this means as a final solution to our surplus problem. We must continue our efforts to restore a sound position for agriculture in world markets.

Financing farm ownership and operation.—The agricultural credit institutions supervised by the Farm Credit Administration make standard risk loans to farmers and their cooperatives on both a short- and long-term basis. Some of these loans are made with funds obtained through the federally owned intermediate credit banks. New loans of the Federal intermediate credit banks are estimated to be nearly 2 billion dollars in the fiscal year 1956, and will exceed loan collections by 40 million dollars. Receipts from other operations will reduce total net budget expenditures of the Farm Credit Administration to 37 million dollars.

The Farmers' Home Administration makes direct loans to farmers to supplement the credit services provided by private and cooperative credit agencies, and also insures loans by private lenders. By greater reliance on insured loans, the services of the Farmers' Home Administration can be increased without increasing budget expenditures. Under legislation enacted last year the interest rate on insured loans for farm ownership, farm housing, and other improvements has been set at a level that will attract a larger volume of funds from private lenders. Insured loans will also be used to finance an increase in soil and water conservation loans, which the new legislation has made available in all States. In addition, the Farmers' Home Administration can now take second mortgages as security for direct loans. This will permit private lenders to continue as first mortgage holders in the financing of farm ownership and development, thereby increasing the number of borrowers that can be served under that program.

Financing rural electrification and rural telephones.—The programs of the Rural Electrification Administration have brought about great advances for rural America, and this administration will continue to make loans available to meet all legitimate needs for rural electrification and telephones.

The need for electrification loans to provide initial connections of farm homes with central station service is much less than in earlier years. But this is more than offset by larger requirements for improvements of existing systems and for power generation. My budget recommendations, therefore, provide for a higher level of new electrification loans in 1956 than in the current fiscal year.

The rural telephone program is still in an early stage of development. Progress is being made in resolving the various problems involved in

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

achieving adequate telephone service in rural areas. This budget makes provision for new loan authority sufficient to raise the level of telephone loans in 1956 to 80 million dollars, which is 5 million dollars higher than in 1955.

Agricultural land and water resources.—My recommendations for agricultural land and water resources for the fiscal year 1956 recognize the great importance to the Nation of soil and water conservation activities. The new watershed protection legislation enacted last year is a vital part of our conservation program. It provides a practical basis for partnership between the Federal Government and State and local groups in the planning and carrying out of a coordinated program for upstream flood prevention and soil and water conservation. This budget recommends an increase of 4 million dollars for 1956 to provide for the necessary Federal participation in watershed protection projects.

Under the forward authorization for the 1955 crop year agricultural conservation program, contained in the 1955 appropriation act, larger expenditures will be required for payments to farmers in the fiscal year 1956 than in 1955. This program assists farmers in applying sound soil conservation practices and in putting to proper use farm land diverted from its previous use through acreage allotments. Because the problems created by diverted acreage are expected to become progressively less pressing, I am recommending a forward authorization of 175 million dollars for the 1956 crop year as compared with the 250 million dollars provided for the current crop year.

Research and other agricultural services.—Additional research and educational work on problems of agricultural production, soil and water conservation, and marketing of farm products, can make important contributions to a more efficient and stable agriculture capable of meeting the needs of a growing population. These activities not only contribute directly to the solution of immediate problems of farmers, but also benefit consumers of farm products by more efficient production and marketing. The 1956 budget provides for an increase of 9 million dollars in expenditures for research and an increase of 6 million dollars for extension work. These additional amounts are needed to expand the Federal-State cooperative research and extension programs and to strengthen the basic agricultural research program carried on by the Federal Government.

As part of the coordinated plan to improve economic statistics of the Government, this budget includes added funds to strengthen the work of the Department of Agriculture in developing adequate farm income and production statistics. Expenditures for other agricultural

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

services also include 10 million dollars in 1955 and 15 million dollars in 1956 for eradication of brucellosis in cattle. The necessary funds are to be made available by transfer from the Commodity Credit Corporation. This program is designed both to assist in stabilizing the dairy industry and to give added protection to the health of our citizens.

NATURAL RESOURCES

This administration believes that achievement of the resource development basic to the economic progress and security of the Nation requires encouragement of local public and private initiative and, where Federal participation is necessary, emphasis on the partnership aspects of essential cooperative arrangements with State and local governments or with private enterprise. To the greatest extent possible, the responsibility for resource development, and its cost, should be borne by those who receive the benefits. In many instances private interests or State and local governments can best carry on the needed programs. In other instances Federal participation or initiative may be necessary to safeguard the public interest or to accomplish broad national objectives, where projects because of size or complexity are beyond the means or the needs of local public or private enterprise. The Federal Government must be willing and ready to bear the cost of improvements made for national purposes; but in all cases where the partnership principle logically applies there is automatically acquired a concern for economy and efficiency that is often lacking when no local contribution is required.

As a result of this partnership policy and the willingness of State, local, and private interests to undertake or cooperate in the development of our natural resources, it has been possible to reduce Federal expenditures for these programs since the fiscal year 1954. At the same time, we have strengthened our resource development programs.

The conservation and development of our natural resources will require estimated net Federal expenditures of 953 million dollars in the fiscal year 1956, as compared with 1.1 billion dollars in 1955 and 1.2 billion dollars in 1954. About two-thirds of the net expenditures in 1956 will be for flood control, irrigation, power and multiple-purpose river basin development. The other one-third will be largely for the management and development of the national forests, parks, and public lands, and for our fish and wildlife and mineral resources programs. Federal expenditures for natural resources, if wisely made in proper relation to local public and private efforts, are investments for the benefit of the Nation; in many cases they also result in receipts to the Treasury, thus often providing reimbursement in later years for part of the costs incurred.

[1] Compares with new obligational authority of 1,196 million dollars in 1954 and 967 million dollars in 1955.

Land and water resources.—Under the recommendations for the fiscal year 1956, the Federal Government will spend 673 million dollars for the development of land and water resources. A large share of this total—430 million dollars—is for continuation of work on 152 river-basin development projects and units under construction by the Bureau of Reclamation and the Corps of Engineers. Much of this work is multiple-purpose development for irrigation, flood control, navigation, and hydroelectric power. Construction on 37 of these projects will be virtually completed in 1956. Funds recommended for work underway in 1956 will maintain power generation schedules and continue nonpower projects at economical rates. Maintenance and operation activities will be at a level which will provide reasonable protection of the Federal investment.

Federal Reserve Bank of St. Louis

My recommendations are intended to encourage States and local public and private groups to take the initiative in developing our valuable water resources with Federal cooperation where national interests are involved. This budget includes 20 million dollars under proposed legislation to enable the Bureau of Reclamation and the Corps of Engineers to participate, in 1956, in partnership water developments. Five million dollars of this amount is proposed for three multiple-purpose projects with power facilities in the Pacific Northwest. It is expected that local interests will install and operate the power facilities of the Cougar and Green Peter-White Bridge projects in Oregon and that the Corps of Engineers will build the flood control and other facilities in which there is a national interest. Non-Federal interests are also expected to build the Rocky Reach project in Washington, and the Corps of Engineers will assist in financing the nonpower facilities having national benefits. Assistance will be given to other partnership projects as specific proposals are developed. In addition, provision will be made for cooperation in authorized partnership projects, such as Priest Rapids in Washington and Markham Ferry in Oklahoma, when satisfactory arrangements have been completed.

I also recommend enactment of legislation authorizing the Bureau of Reclamation to undertake construction of two comprehensive river-basin improvements which are beyond the capacity of local initiative, public or private, but which are needed for irrigation, power, flood control and municipal and industrial water supply. These are the Upper Colorado River Basin development in the States of Colorado, Utah, Wyoming, Arizona, and New Mexico, and the Fryingpan-Arkansas development in Colorado. The Colorado River development will enable the Upper Basin States to conserve flood waters and to assure the availability of water and power necessary for the economic growth of the region. The total cost of these major developments is estimated at 1.1 billion dollars, with first-year expenditures of 5 million dollars. Sale of power generated at these developments will repay the power investment within 50 years and will make a contribution toward repayment of other investments.

In furtherance of the policy to move forward with needed water use and control projects, the 1956 budget provides for the starting of a number of new authorized Federal projects. For each authorized project recommended, planning has advanced to the stage where the project could be placed under construction early in 1956. Most of the projects are small or intermediate-sized developments, having a high degree of financial participation by local interests or a reasonable excess of benefits over costs. Some of them are essential to

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

permit full functioning of Federal works already completed or under construction.

This budget makes provision for the Bureau of Reclamation to start construction on 5 new irrigation and water supply projects, and for the Corps of Engineers to begin work on 10 local flood protection projects, 2 flood control projects of broader scope, 8 projects for beach erosion control, and 14 navigation projects. It also provides for resumption of work which was suspended a few years ago on 1 local flood protection project and 1 navigation project. These add up to 39 new projects and 2 resumptions. In addition, 2 million dollars is recommended for the construction of a number of small projects to be selected by the Secretary of the Army, none of which may cost more than 150,000 dollars. The total cost of all this new work is estimated at 347 million dollars, of which expenditures of 23 million dollars are contemplated for the fiscal year 1956. The navigation projects included in the above construction starts, at an estimated cost of 198 million dollars, are discussed in the commerce and manpower section of this message.

In the selection of reclamation projects, consideration has been given to (1) more efficient use of present water supply and correction of adverse water supply conditions, and (2) the proportion of the irrigation investment which will be repaid by the water users. The new local flood protection works will provide benefits primarily in highly urban and industrialized areas. The new flood control projects are the Eagle Gorge Reservoir in Washington, on which there will be substantial local contributions in related work and cash, and the Old River Control project in Louisiana. The latter project is essential to prevent the diversion of the Mississippi River to the Atchafalaya River channel, with resultant disruption to the economy of the lower Mississippi River area.

Adequate collection and evaluation of basic data on topography, minerals, soils, and water and weather conditions are essential to provide a sound basis for water resources projects. Current progress in collection of basic data will be continued. It is also essential to prepare adequate project designs prior to construction to assure efficient construction and to safeguard the public investment. I am recommending increased funds for general investigations by the Bureau of Reclamation to assure a proper basis for project authorization. Advance planning of authorized projects by the Corps of Engineers and the Bureau of Reclamation will proceed at a rate which will permit early initiation of construction on projects in accordance with needs and budget policy. This budget also provides 1 million dollars under proposed legislation for a survey to determine whether hydroelectric power can be economically developed from the tremendous tides at Passamaquoddy Bay.

Federal Reserve Bank of St. Louis

Expenditures of the Bonneville, Southeastern and Southwestern Power Administrations in the fiscal year 1956 are in line with the partnership policy whereby State, local, and private interests participate in power development and transmission. The expenditure estimates also reflect the approaching completion of transmission systems for marketing power from Federal projects now under construction.

In order to establish equity between the Federal Government and other interests, I recommended in my 1955 budget message enactment of legislation to provide that the Federal Government make payments to non-Federal owners of water resources projects when Federal hydroelectric power developments benefit from these projects. Payments are now required from other licensees deriving such benefits and I see no reason why the Federal Government should be exempted. I hope the Congress will amend the Federal Power Act during this session to require such Federal payments.

The Tennessee Valley Authority, in the fiscal years 1955 and 1956, will continue installation of steam electric and hydroelectric generation units started in prior years. With construction on some of the facilities nearing completion, gross expenditures of the Authority are estimated to show a very substantial decrease from 431 million dollars in 1955 to 250 million dollars in 1956. Receipts from operations, largely from the sale of power, are expected to increase from 217 million dollars to 248 million dollars. Thus, an approximate balance between expenditures and receipts is estimated for 1956, with net budget expenditures of 2 million dollars.

No appropriations have been recommended for new power generation units in the fiscal years 1955 or 1956 for the Tennessee Valley Authority. After 600,000 kilowatts contracted for by the Atomic Energy Commission with the Mississippi Valley Generating Company become available for replacing power furnished the AEC by TVA, the scheduled capacity of the TVA system will provide for a substantial increase in loads through the calendar year 1958. The Tennessee Valley Authority is giving immediate attention to the possibilities of financing further expansion of its power system by means other than Federal appropriations. The Authority has been requested to complete its studies in time to permit consideration by the Congress at this session of any legislation that may be necessary. It is expected that the power needs for the system will be reexamined after the Congress has had an opportunity to consider legislation to provide for future financing.

Legislation will also be presented to the Congress to provide that an adequate rate of interest be paid to the Treasury on appropriated funds invested in power facilities of the Tennessee Valley Authority.

Federal Reserve Bank of St. Louis

National forest and other public lands.—Forest and range lands managed by the Forest Service and the Bureau of Land Management provide valuable timber, range, and mineral resources. Receipts from these lands are estimated at 165 million dollars in 1956. Part of these receipts are appropriated for payments to the States and counties in which the lands are located. Increased expenditures are recommended in 1956 for construction of forest roads and trails, supervision of timber sales, and soil and moisture conservation work. As a result of Federal cooperative assistance in the past, States are now assuming greater responsibility for forest fire control on non-Federal lands and some reduction in Federal payments is proposed for 1956. Expenditures on Indian lands and resources will provide for management of forest and range lands at the current level, but some increases are recommended for soil and moisture conservation, maintenance of buildings and utilities, and construction of roads.

In the fiscal year 1955, the submerged lands of the Outer Continental Shelf were first offered for drilling for oil and gas under Federal leases. Receipts from these leases, deposited in the Treasury, are estimated at 147 million dollars in 1955 and 100 million dollars in 1956. Leasing of these lands will continue to provide substantial receipts in later years.

Urgent needs for maintenance and for improved services to the increasing number of visitors will require some increase in expenditures for our national parks, monuments, and historic sites. Employment of additional personnel to collect admission fees, together with the increase in fees put into effect during the current year, will result in increased receipts to the Treasury. Parkways, roads, and trails will be extended in 1956, pursuant to authority provided in the Federal Aid Highway Act of 1954.

Mineral resources.—During the past year, the Cabinet Committee on Minerals Policy has recommended, and I have approved, general guidelines for developing mineral resources in accordance with our national security needs. Case by case studies of individual mineral industries will be made to determine within the framework of our overall domestic and foreign economic policies the proper level of efficient domestic production necessary for our mobilization base. Where necessary, the various means available to the Government will be used to support essential parts of the mobilization base. The factfinding and research activities of the Geological Survey and the Bureau of Mines will contribute to this end.

I recommend legislation and a supplemental appropriation in the fiscal year 1955 to enable the Federal Government to cooperate with the State of Pennsylvania in providing facilities for surface water

Federal Reserve Bank of St. Louis

drainage in the anthracite coal region. This will afford protection against the flooding of valuable resources and the decrease in employment which would result if additional mines were closed.

COMMERCE AND MANPOWER

The basic principle underlying budget recommendations for programs in the field of transportation, housing, and business is that the national interest is best served by privately owned and operated industry, which is assisted by a minimum of Federal funds and Federal basic facilities operated at the lowest feasible cost and financed, where possible, by charges levied on the users of the services. Budget recommendations for manpower programs are designed to help the Nation's productive system function smoothly and efficiently, by providing economic safeguards for workers, by helping bring together jobseekers and jobs, and by fostering orderly labor relations and the amicable settlement of disputes.

In the past 2 years, in furtherance of these principles, we have strengthened our major commerce and manpower programs by placing increased reliance on expansion of private investment, by encouraging greater participation of State and local governments, and by providing for the extension of coverage of unemployment insurance. Wherever possible, Federal programs are being placed on a self-supporting basis. As a result, a large share of the Government's operations in these areas is being financed from program receipts, rather than from tax revenues.

After 30 years of discussion, the United States is joining with Canada in constructing the Saint Lawrence Seaway. A joint program is underway with industry to modernize our merchant fleet. Federal aids to States for highway construction have been increased. Positive steps have been taken to promote an economically sound system of air transportation with reduced reliance on Federal subsidies. The Post Office Department has made major improvements in service and substantially reduced its operating deficit. Limited attacks on urban blight through slum clearance have been expanded into a comprehensive urban renewal program. More private investment in housing is being encouraged by more liberal mortgage insurance, by the voluntary home mortgage credit program, and by permitting private investors to retire gradually the Government's investment in the secondary mortgage market. Meanwhile, other housing loans and Government-owned housing are being liquidated as rapidly as feasible. Our production capacity has been expanded to make possible speedier mobilization in case of future emergencies. Provision has been made for extension of coverage of the Federal-State unemployment compensation system to 4 million more workers.

[1] Compares with new obligational authority of 2,846 million dollars in 1954 and 3,381 million dollars in 1955.

The appropriations recommended in this budget will permit even greater progress in the fiscal year 1956 and later. In addition I am recommending legislation (1) to bring the interstate highway system up to modern standards in the next decade; (2) to make the postal system self-supporting; (3) to increase authority for mortgage insurance and urban renewal grants and to authorize contracts for additional public housing units; (4) to extend the Defense Production

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

Act, the Small Business Act, and the veterans' housing loan program beyond their present expiration dates of June 30, 1955; and (5) to raise the minimum wage now provided under the Fair Labor Standards Act and modernize Federal workmen's compensation and other labor laws.

Gross expenditures for commerce and manpower, including proposed legislation, will be reduced from an estimated 7.8 billion dollars in the fiscal year 1955 to 6.9 billion dollars in 1956, primarily because of reduced purchases of mortgages by the Federal National Mortgage Association and lower spending for defense production activities. Assuming enactment of the recommended increase in postal rates, net budget expenditures for 1956 are estimated at less than 2.2 billion dollars, 364 million dollars below 1955.

Highways.—In the past decade and a half we have not kept pace with the rapidly growing needs for highways adequate for economic development and national security. I plan to send a special message to the Congress in the near future recommending a program of coordinated action by Federal, State, and local governments, to overcome major highway deficiencies. The additional budget expenditures, if any, required in the fiscal year 1956 would be relatively minor.

Budget expenditures for highways under present programs will continue to increase as a result of the enlarged program already provided in the Federal Aid Highway Act of 1954. Grants to States (including Federal administrative expenses) will amount to 680 million dollars, with an additional 45 million dollars of expenditures for highways in Federal forests, on public lands, and in Alaska.

Merchant marine.—To continue our program of helping to bring the merchant fleet up to date, I am recommending for the fiscal year 1956 new obligational authority for ship construction of 103 million dollars. These funds will: (1) continue the trade-in-and-build tanker program begun this year; (2) start orderly replacement of cargo ships built during or before World War II; (3) finance construction of two cargo ships and one tanker as prototypes for mass production in an emergency; (4) provide for the construction or conversion of four passenger-cargo ships; and (5) continue essential research and development work on ship design. The appropriation of 103 million dollars will be more than matched by private funds, resulting in total investment of about 225 million dollars in new ship construction. Together with the joint 400-million-dollar program now underway and with expanded naval construction in private yards, it should maintain a substantial nucleus of peacetime shipyard employment.

Payment of subsidies to American ship operators to offset lower operating costs of foreign ships will require appropriations estimated

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

at 115 million dollars in 1956. The rapid rise recently in expenditures for this purpose and the possibility of continued increases make it important to provide more effective budgetary control over the level of subsidized operations. I am, therefore, proposing in this budget to establish a limitation on new long-term contracts to pay operating-differential subsidies. Such a limitation will permit annual review by the President and the Congress of the extent of our future subsidy commitments.

Navigation aids and facilities.—In accordance with legislation enacted last May, the Saint Lawrence Seaway Development Corporation has been established to construct, operate, and maintain that part of the new Seaway located in United States territory. Construction is being pushed at maximum speed because of the Seaway's importance to economic development and national security. Almost one-quarter of the work is scheduled for completion by the end of the fiscal year 1956.

The Corps of Engineers program for rivers and harbors gives primary emphasis to inland waterways and to those navigation projects needed to provide reliable access to important ports or to relieve serious congestion for important established deep draft traffic. The increase in expenditures from 108 million dollars in 1955 to 135 million dollars in 1956 reflects mainly the normal rate of progress on construction of projects started in 1955 and the resumption of urgently needed maintenance of shallow draft channels.

In addition, 14 new navigation projects and the resumption of one project previously suspended are recommended in the fiscal year 1956. These are projects which promise to yield benefits relatively high in comparison to the construction costs involved or which have substantial local participation. With 2 exceptions, these are relatively small or intermediate-sized projects. Dredging of the Delaware River channel between Philadelphia and Trenton is proposed, but specific recommendations will be sent to the Congress only on the basis that provision be made for adequate cost-sharing in some form. Appropriations are recommended to widen the Calumet-Sag Waterway in Illinois to make this vital channel adequate to handle present and steadily increasing traffic needs.

Although expenditures of the Coast Guard will continue to decline from 205 million dollars in 1955 to 193 million dollars in 1956, the basic aids provided for air and water commerce will be maintained at their current strength. In addition, the Coast Guard will again operate the ocean weather-station network for the Department of Defense.

Promotion of aviation.—We have made shifts in Federal aviation programs during the past 2 years in order to reduce assistance no longer

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

required and to concentrate on those Federal aids which are indispensable to the continued rapid progress of aviation.

Since October 1953, when responsibility for subsidy payments to commercial air carriers was placed in the Civil Aeronautics Board, substantial progress has been made in decreasing the level of subsidies. Expenditures by the Civil Aeronautics Board for this purpose in 1955 are now estimated at 70 million dollars compared to 80 million dollars estimated a year ago; a further decline to 63 million dollars is anticipated for 1956. This trend is consistent with the recommendations made by the Air Coordinating Committee after a comprehensive study made at my request of our basic civil aviation policies. In addition, wherever possible, military mail is being carried by commercial airlines, thus not only eliminating Government competition with private business, but also helping to reduce subsidies to the private carriers.

The continuing growth of civil and military air traffic has increased congestion on the airways system—at times restricting aircraft operations in areas of heavy traffic. As a step to maintain high standards of safety and increase the regularity of flights, I am recommending increased appropriations for the Civil Aeronautics Administration for expansion and improvement of air navigation facilities and for more radar traffic control equipment.

With the increasing maturity of civil aviation, the Federal Government soon should be able to reduce substantially its safety promotion and enforcement activities without affecting the present high level of safety. I have requested the early preparation of a plan, in cooperation with industry, to achieve this objective.

I again recommend incorporation of Washington National Airport to provide the administrative flexibility needed for efficient operation of this business-type enterprise.

The work of the National Advisory Committee for Aeronautics is of key significance in strengthening our military aircraft and guided missiles programs and in supporting our continued progress in the air. During recent years we have achieved spectacular success in flying at speeds well beyond the speed of sound. However, we have not yet overcome all problems of structural failure, engine malfunctioning, and lack of stability and control at high speeds. A more intensive effort in these fields is needed in order that the great improvements in performance now known to be possible can be realized in the actual production of military aircraft, engines, and missiles, which represent such an important and costly part of our defense program. For these reasons, I am recommending additional appropriations for both 1955 and 1956 to increase the Committee's research effort in fields of critical military importance.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

Postal service.—Considerable progress is being made in providing better postal service to the American people at lower cost to the taxpayer. Movement of first-class mail has been expedited. Substantial investments have been made in capital improvements and in skilled personnel which are just beginning to pay dividends. Long-term leases are being negotiated which will permit acquisition of needed modern postal facilities. Promising experiments in new equipment are underway which, if successful, will revolutionize mail-handling techniques.

Largely because of these savings, the net expenditures of the Post Office under existing laws have been reduced to the lowest level in the last 8 years. The increased postal rates which I recommended in my special message to the Congress would add 400 million dollars to postal revenues. This would be enough to cover the recommended pay adjustments of 130 million dollars and reduce net expenditures to 24 million dollars in the fiscal year 1956. These steps, together with further major economies now in process, should cause the postal system to become self-supporting in the near future. As a long-run solution, an independent commission should be created to review future rate changes proposed by the Postmaster General in accordance with a basic formula laid down by the Congress.

Urban development and redevelopment.—Under the new urban renewal program authorized by the Housing Act of 1954, local public agencies, jointly with forward-looking private investors, are developing and executing plans to rebuild our major cities and prevent the decay which is making large urban areas unfit for sound economic investment or family life. The act strengthens the previous slum clearance program by (*a*) requiring localities as a condition of Federal aid to have a workable plan to eliminate substandard housing and neighborhood decay; (*b*) providing Federal grants and loans for neighborhood rehabilitation, as well as redevelopment projects; and (*c*) authorizing the Federal Housing Administration to insure mortgages on homes in blighted areas and to help finance new homes for families displaced by slum clearance.

By the end of the fiscal year 1956, an estimated 22 slum clearance projects will be completed, and 364 other slum clearance and urban renewal projects will be underway. Net expenditures will increase from 56 million dollars in 1955 to 94 million dollars in 1956, largely for capital grants to pay the Federal share of project costs. On the basis of experience thus far, private investment and local government expenditures for slum clearance and urban renewal projects will be about four to five times as great as the Federal capital grants.

Before the end of the current fiscal year, the present 500 million dollars in contract authority for capital grants will be committed.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

Accordingly, to permit the program to go forward without delay, I am recommending legislation to provide an additional 100 million dollars in capital grant authority in the fiscal year 1955, and 200 million dollars in each of the two subsequent fiscal years.

Federal Housing Administration.—The Federal Housing Administration is now authorized to insure larger loans with longer maturities, as well as loans to support the urban renewal program and to help servicemen buy homes. Thus, more of our people can buy their own homes. Because of the more liberal terms provided and the increased availability of mortgage credit, applications for mortgage insurance have risen substantially in recent months. On the basis of the present outlook, construction or purchase of almost 800,000 homes and improvement or repair of 1,500,000 other homes will be financed during the fiscal year 1956 by private lenders backed by Government insurance commitments.

The total private investment in both new and existing homes by homeowners and builders, underwritten by the Federal Housing Administration, in the fiscal year 1956 will amount to an estimated 8.3 billion dollars. To meet the expanding needs for mortgage insurance for the remainder of the fiscal year 1955 and through 1956, approximately 5 billion dollars in additional insurance authority will be required.

In recent months both legislative and administrative measures have been taken to eliminate abuses in insurance programs. The budget also includes additional funds to assure more adequate supervision. The increase in premium collections and other income will, however, more than offset the increased supervisory expenditures, and receipts are estimated to exceed expenditures by 67 million dollars in the fiscal year 1956, compared with 42 million dollars in 1955.

Federal National Mortgage Association.—Under the Housing Act of 1954, the Federal National Mortgage Association was reconstituted to comprise financially separate activities for the secondary market, special assistance, and management and liquidating functions. Except for the initial transfer of the Government capital investment of 92 million dollars from the earlier association, the secondary market activity will be financed entirely from private funds and its operations are, therefore, not reflected in this budget. The purpose of this activity is to make sure that mortgage funds are available to meet normal needs in all parts of the Nation at market rates of interest. Private capital will be gradually substituted for the Government investment until the Government funds are fully repaid and the private owners take over responsibility for the program.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

Expenditures and receipts for the other two activities are included in the budget totals. Under the special assistance program, the President can authorize limited purchases of mortgages (*a*) to meet acute housing needs of groups or areas unable to obtain private financing, or (*b*) to prevent a decline in housing activity. In the fiscal years 1955 and 1956, the Association expects to support the financing of about 90,000 housing units, primarily for the urban renewal program. This support will be mainly through commitments to purchase participations in private mortgages. Under the management and liquidating function, the Association will administer the 3.1 billion dollars of mortgages and undisbursed commitments outstanding at the beginning of the fiscal year 1955.

Primarily because of large purchases under previous commitments, expenditures by the Association will exceed receipts by 243 million dollars in the fiscal year 1955. In 1956, however, net receipts of 193 million dollars are anticipated.

Veterans' housing loans.—The Veterans Administration program of direct housing loans expires on June 30, 1955. These loans are made only where guaranteed private mortgages are not available or cannot be secured through the voluntary home mortgage credit program. I recommend legislation continuing this program until expiration of the veterans' loan guaranty program for World War II veterans on July 25, 1957. If permission is granted to use receipts from repayments, as well as from sales, new obligational authority of 100 million dollars should be adequate for the fiscal year 1956.

Public housing.—The aids contained in the Housing Act of 1954, and especially the aids to low-cost housing, will provide the opportunity for the private housing industry to satisfy, eventually, the housing requirements of families of all income groups. In the meantime, it is essential to continue a minimum amount of low-rent public housing construction to meet the critical needs of the lowest income families and to help provide a new place to live for families displaced by urban renewal and slum clearance operations. I recommend a 2-year authorization for contracts with local housing authorities to pay contributions for an additional 35,000 low-rent units each year. Funds necessary for this purpose have been included in this budget.

Liquidation of the emergency World War II public housing program is accelerating. By June 30, 1956, two-thirds of the 195,000 units owned by the Government at the end of 1954 will have been sold, transferred, or demolished. Meanwhile expenditures for the defense housing program started during the Korean emergency will be almost completed.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

Gross expenditures for public housing programs, chiefly temporary construction loans to local authorities and annual contributions for completed projects, are estimated at 604 million dollars in 1956. Receipts, mostly from private refinancing of these Federal loans and rental and sale of emergency housing, will total an estimated 570 million dollars, leaving net expenditures of 34 million dollars.

Other housing and community facilities.—By the end of 1956, the Housing and Home Finance Agency will have approved 297 loans to finance construction of dormitory rooms for about 63,800 students and homes for 1,500 faculty and student families at colleges and universities throughout the Nation. In the past 2 years the Agency has helped to develop a private market for long-term dormitory revenue bonds, formerly rarely bought by private investors. The increasing success in attracting private funds is a major reason for the decline in net expenditures from 41 million dollars to 28 million dollars.

Civil defense and disaster relief.—Expenditures for civil defense are classified with expenditures for dealing with peacetime disasters in the commerce and manpower section, but the program is discussed in the major national security section of this message in view of its close relation to continental defense.

Promotion of defense production.—Gross expenditures for promotion of defense production are expected to decline from 1,061 million dollars in 1955 to 638 million dollars in 1956. Most of this reduction is in the synthetic rubber and tin programs. In accordance with the terms of the Rubber Producing Facilities Disposal Act, the estimates assume that these plants will be sold or leased before June 30, 1955. Most of these facilities have already been sold, subject to congressional approval. Moreover, since purchases of tin for the national stockpile have now been completed and world supplies are ample to meet current needs, no provision is made for continued operation of the Government tin smelter.

Gross expenditures under the Defense Production Act will continue at relatively high levels, primarily to meet previous commitments made to provide guaranteed markets, loans, or grants to producers of critical defense materials. Net expenditures will amount to only a fraction of gross disbursements, since most of the materials purchased are being sold to the stockpile of strategic and critical materials to meet its objectives, and to industry. The stockpile program is discussed in the major national security section of this message.

Under present law, the Defense Production Act expires on June 30, 1955. Since important gaps in our mobilization preparedness require

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

continued Government encouragement, I recommend extension of the act with modifications for 2 years. No increase in the present borrowing authority of 2.1 billion dollars is anticipated at this time.

Business loans and guaranties.—Liquidation of business loans made by the Reconstruction Finance Corporation is well advanced. During the 3-year period from June 30, 1953, to June 30, 1956, business loans and commitments will have been reduced from 458 million dollars to about 53 million dollars through repayments, refinancing, and sales to private financial institutions.

Loans to small businesses by the Small Business Administration have been expanding substantially during the last year. Loans are made only if private credit on reasonable terms is not available, and more than two-thirds of the loans so far extended have been made jointly with private banks. The present authority expires on June 30, 1955, and I recommend its extension. Assuming continuance of the 1955 level of operations, about 1,200 new loans would be authorized in the fiscal year 1956, and additional appropriations of 67 million dollars would be required.

Labor placement and unemployment compensation administration.—Budget expenditures under existing law for administering the joint Federal-State program of employment services and unemployment insurance are estimated at 253 million dollars for the fiscal year 1956, 50 million dollars higher than in the current year. About 29 million dollars of this increase is nonrecurring and results from a change in the timing of funds advanced to the States; this does not affect the level of operations. The rest is largely for State-approved increases in salaries paid to the State employees who administer the program, and for improvements in the placement service.

Legislation enacted last year provides for transferring annually to the unemployment trust fund the excess of receipts from the Federal unemployment tax over operating costs of the program. The excess received during 1955, to be transferred in the fiscal year 1956, is estimated at 87 million dollars, an increase of 23 million dollars over the amount transferred this year. These funds are to be used to set up a reserve of 200 million dollars from which loans can be made to those States which deplete their own reserves for benefit payments.

The present law authorizing the recruiting of qualified workers from Mexico for seasonal farm employment in the United States expires December 31, 1955. However, the need for this service will continue and I shall recommend its extension. Accordingly, my budget recommendations, including proposed legislation, provide funds for the entire fiscal year 1956.

Other labor and manpower programs.—Industrial injuries have been significantly reduced through the efforts of both labor and management, but these injuries still cost us 40 million man-days every year. This is a heavy tax on our economic progress, as well as on the individual employees and employers. Workmen's compensation programs—an important facet of the industrial safety problem—have lagged behind other social insurance programs in recent years. Although workmen's compensation is predominantly a State program, the Federal Government can and should stimulate improvement—especially through studies and clearing house activities. The budget for the fiscal year 1956 provides for studies which will enable the Department of Labor to promote more effective safety programs and assist States in improving their workmen's compensation standards. In addition, I shall recommend legislation which, over the next few years, should aid the States in further developing industrial safety programs. Two million dollars are included for this purpose in 1956.

At present all workmen's compensation payments to Federal employees are provided from a single appropriation. To encourage better safety practices, I shall recommend legislation to shift the financing of some of these benefit payments to the employing Federal agency. Legislation will also be recommended to liberalize workmen's compensation benefits paid to longshoremen and harbor workers under laws administered by the Federal Government.

The apprentice training program of the Department of Labor has contributed to improvement of the skill and versatility of thousands of workers. As our economy continues to expand, many more skilled workers are needed. Accordingly, the budget proposals provide for redirecting and improving Federal participation in these training activities.

As part of a governmentwide program to improve our economic statistics, this budget includes 1.5 million dollars for additional work during the fiscal year 1956 in the labor and manpower field, covering primarily statistics on employment and unemployment, and for basic data for mobilization and civil defense.

Unemployment trust fund.—The following table shows receipts and expenditures of the unemployment trust fund.

UNEMPLOYMENT TRUST FUND

[Fiscal years. In millions]

Item	1954 actual	1955 estimated	1956 estimated
Balance in fund at start of year	$9,246	$8,993	$8,785
Receipts:			
Deposits by States and railroad unemployment taxes	1,268	1,219	1,421
Interest	224	220	204
Transfer from general fund		64	87
Payments: State and railroad withdrawals for benefits	−1,745	−1,712	−1,594
Net accumulation (+) or withdrawal (−)	−253	−209	+118
Balance in fund at close of the year	8,993	8,785	8,903

GENERAL GOVERNMENT

Net expenditures for general government activities are estimated at 1.6 billion dollars for the fiscal year 1956, an increase of 344 million dollars from the fiscal year 1955. The higher level of expenditures in 1956 reflects primarily (*a*) the proposed resumption of payments to the Civil Service Retirement Fund for the Government's share of the cost of current benefits for retired Federal civilian personnel and (*b*) substantially higher payments arising from claims against the Government. Other expenditures for general government cover in the main the costs of such basic Government services as making and enforcing laws, collecting taxes and customs, managing the public debt, and safeguarding and maintaining public buildings and records.

Special allowances are made in the reserves for proposed legislation of this budget for adjustments in the pay and benefits of civilian employees of the Government which I recommended recently in a special message to the Congress. The proposed benefits include a new system of contributory hospitalization and health insurance.

Legislative functions.—Expenditures for legislative activities are estimated to increase from 51 million dollars in 1955 to 63 million dollars in 1956, primarily because of construction of the new Senate Office Building.

[1] Compares with new obligational authority of 1,041 million dollars in 1954 and 1,056 million dollars in 1955.

Federal financial management.—To enable the Internal Revenue Service to make still more progress in equitable and effective enforcement of the revenue laws, I am recommending increased appropriations of 12 million dollars to extend the audit of tax returns. The improved enforcement should result in increased tax receipts from those who have not been paying their fair share. In addition, I am recommending legislation to reduce the frequency of information returns submitted by employers withholding income and social security taxes and to strengthen enforcement of these taxes. These amendments will not only cut down the reporting burden on private business, but will also increase budget receipts, especially in later years. Total expenditures for collection of taxes and customs, for administration of the public debt and for other Federal financial management are estimated at 450 million dollars for the fiscal year 1956.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

Central property and records management.—The General Services Administration is making substantial and continuing economies in the governmentwide management of property and records. Central motor pools are planned for 15 cities, with important savings anticipated. Substantial reductions in office and warehouse space are continuing. As a result of examination of Government real property holdings, the sales program of surplus real property will be accelerated, with the desirable result of returning this property to local tax rolls and increasing budget receipts.

In this budget, I recommend added funds for more adequate repair and improvement of public buildings to protect the Government's investment. Estimated expenditures for central property and records management will therefore rise from 156 million dollars in 1955 to 162 million dollars in 1956.

To help meet the most critical needs for office space, construction of several general-purpose buildings has already been approved under the long-term lease-purchase contract authority provided by the Eighty-third Congress, and additional buildings will be considered as quickly as determinations of need and cost can be made. These buildings will be purchased through annual appropriations for rental payments.

Civil Service Commission.—Under the recent revisions of the Federal civil service rules, a substantially higher proportion of civilian employees will be on a competitive basis. The transition to this system will require additional funds for the Civil Service Commission for administering the necessary examining program, both in the continental United States and overseas.

Retirement for Federal civilian employees.—The civil service retirement and disability system should be financed on a more satisfactory basis. Employees now contribute 6 percent of pay, covering about one-half the currently accruing cost, and the Government is responsible for the rest of the cost. In the past the Government's share of payments to this fund has not been provided on a consistent basis and in the last 2 years appropriations have been deferred pending the report of the Committee on Retirement Policy for Federal Personnel. The Committee's report to the Eighty-third Congress establishes the necessity for a sound and lasting financial basis for the civil service retirement system.

Financing of the civil service system is a problem requiring careful consideration because of its importance to the Federal career service. For 1956 I am recommending a Government contribution of 216

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

million dollars which is estimated to be the difference in that year between the Government's share of current benefit disbursements and the interest earned on its part of the fund. This will serve to maintain at its present level the equity the Government already has built up in the fund through its past contributions.

Other budget expenditures for retired Federal civilian employees are estimated to decline from 32 million dollars in the fiscal year 1955 to 2 million dollars in 1956 because payments for cost-of-living increases under the act of July 16, 1952, will be made from the trust fund.

Unemployment compensation for Federal civilian employees.—Legislation enacted by the last Congress provides for the payment of unemployment compensation benefits to Federal civilian workers. These payments are similar to those available to most workers in private industry and are being paid through existing State unemployment compensation agencies. Payments reimbursing the States for the cost of this program for the fiscal year 1955 are estimated at 33 million dollars, requiring a supplemental appropriation of 20 million dollars. Expenditures are estimated to rise in 1956 to 40 million dollars because for the first time the plan will be in operation for a full fiscal year.

Protective services and alien control.—Increased expenditures for protective services and alien control are recommended to strengthen the border patrol operations of the Immigration and Naturalization Service and to maintain the Federal Bureau of Investigation at its present effectiveness in the fiscal year 1956. The Bureau's work has been increased by added responsibilities for internal security. At the same time, its costs have risen because of recently enacted legislation providing premium pay for FBI agents for overtime and holiday work.

District of Columbia.—Under the new public works program authorized by the Congress last spring, Federal expenditures for the District of Columbia will increase to 34 million dollars in the fiscal year 1956. Of this amount, 22 million dollars represents the Federal Government's share in the costs of District government and public services; loans of 12 million dollars will be made to the District for construction of highways, sewers, and waterworks.

Weather Bureau.—To increase the effectiveness of the weather service, I am recommending replacement of certain obsolete facilities with modern observational equipment. This budget provides for the Weather Bureau to take over operation of 25 upper-air stations and

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

perform certain other activities basic to civilian weather service which are now carried on by the Department of Defense. These proposals will carry out recommendations made by an advisory committee of eminent meteorologists. With the improved program, the expenditures of the Weather Bureau for the fiscal year 1956 are estimated at 29 million dollars, an increase of 4 million dollars over 1955.

Claims and relief acts.—Payments for claims and relief acts are estimated at 250 million dollars for the fiscal year 1956, an increase of 87 million dollars over the 1955 estimate. The increase consists entirely of higher payments for certified claims, which represent, in the main, bills presented for payment after the appropriation involved has lapsed. In the fiscal year 1955 certified claims are expected to be lower than in 1956 because claims which would otherwise have been paid from this account are being paid from certain Department of Defense appropriations which were extended by the Congress for 1 year.

INTEREST

The large interest payments by the Federal Government arise primarily from the tremendous increase in the public debt during World War II. In the fiscal year 1956 they account for about 10 percent of total budget expenditures. The size of the public debt and interest rates on the debt determine the general level of interest expenditures; variations may also occur from year to year from changes in interest payment provisions of specific securities.

INTEREST

[Fiscal years. In millions]

Item	Budget expenditures (net)			Recommended new obligational authority for 1956
	1954 actual	1955 estimated	1956 estimated	
Interest on public debt	$6,382	$6,475	$6,300	$6,300
Interest on refunds of receipts	83	78	73	73
Interest on uninvested trust deposits	5	5	5	5
Total	6,470	6,558	6,378	[1] 6,378

[1] Compares with new obligational authority of 6,470 million dollars in 1954 and 6,558 million dollars in 1955.

Interest on the public debt.—Interest payments on the public debt in the fiscal year 1956 are estimated at 6.3 billion dollars. Although the debt has increased, interest payments are estimated to be 175 million dollars less than in the current year. This decrease reflects

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

primarily the reduction in the calendar year 1954 in interest rates on the outstanding debt. Another reason for the decrease is the unusual concentration in 1955 of interest payments on part of the public debt refunded this year. As an example of both reasons, in the fall of 1954, 7.5 billion dollars of 2⅝ percent certificates were refunded into a 1⅛ percent certificate and a 2⅛ percent bond. A full year's interest was paid in the fiscal year 1955 on the maturing 2⅝ percent certificates; in addition, the first interest payment on the new 2⅛ percent bond will be due in 1955. For these reasons interest payments in 1955 on this 7.5 billion dollar segment of the debt will be about 130 million dollars more than in 1956.

We have made progress in improving the structure of the public debt by lengthening the average maturity. Nevertheless, the average interest rate on the debt has declined from 2.41 percent to 2.29 percent during the last 12 months.

In this message, we have stated our objectives and our proposals for the coming year.

In preparing this budget we have weighed the requirements of each element of our strength in order that we may allocate our resources according to the requirements of the whole. To each is apportioned the full measure required by relative need and permitted by available means. At the same time our awareness of the necessity for efficient, economical, and moral Government and the development of partnerships with State and local governments and with private enterprise permit reductions in total expenditures. A growing prosperity will result in increasing revenues and should make possible both a balanced budget and lower tax rates in the near future.

DWIGHT D. EISENHOWER.

INTRODUCTION TO PART I

Part I of the budget (pp. A1 to A14) contains seven summary tables on Federal funds and on the public debt. Each of these tables is designed to bring together in one or two pages some overall aspect of the Federal budget.

TYPES OF FEDERAL FUNDS

The Federal (Government-owned) funds are of four types as follows:

The *general* fund is credited with receipts which are not earmarked by law for a specific purpose, and is charged with expenditures that are payable from appropriations (except appropriations of earmarked receipts) and those payable from borrowing. Both in number of items and in amounts, most of the Government's business is transacted through the general fund.

Special funds are those which are established to account for receipts that are earmarked by law for a specific purpose. They exclude the funds which carry on a cycle of operations for which there is continuing authority to use the receipts (as described in the next paragraph). Some special funds are subject to annual appropriation by Congress. Others are automatically available under the laws which created the funds.

Revolving funds are those which finance a cycle of operations, in which the expenditures generate receipts which are available for continuing use. They are divided into two subcategories—those with receipts primarily from outside the Government are called *public enterprise* funds, and those with receipts primarily from inside the Government are called *intragovernmental* funds. The former include nearly all of the Government corporations, the postal fund, and various unincorporated enterprises. The latter include various funds for stocking of supplies, for printing operations, and for the performance of services to meet the Government's own needs.

Management funds (including *consolidated working* funds) are those which are created to permit the pooling of advance payments from two or more appropriations to carry out certain activities.

BUDGET RECEIPTS AND EXPENDITURES

Basis of stating budget receipts.—Table 1 includes a summary of budget receipts. Such receipts include all money paid into the Treasury to the credit of the general fund and of special funds. Budget receipts never include money obtained from borrowing. Nor do budget receipts include receipts of revolving and management funds, since these receipts are deducted from expenditures. In those cases where the law provides an indefinite appropriation to a trust fund in an amount equal to certain tax receipts (such as for the old-age and survivors insurance trust fund and the railroad retirement account), the amount thereof is shown as a deduction from general fund receipts and excluded from general fund expenditures. Refunds of receipts are also deducted in arriving at budget receipts.

Basis of stating budget expenditures.—Tables 1, 5, and 7 include information on budget expenditures. Such expenditures cover the general fund, the special funds, and the revolving and management funds. Net budget expenditures are on a *checks-issued* basis. This means that expenditures are reported for the fiscal year in which the checks are issued, or (where no checks are required) the year in which payment is made in cash. Interest on the public debt, including coupon interest and the increase in the redemption value of savings bonds, is included in the year in which it becomes payable, even though the coupons or bonds may not be presented for redemption in the year.

The expenditures of the general fund and the special funds are generally stated on a *gross* basis; that is, receipts are not deducted from expenditures (except for interagency reimbursements and some incidental reimbursements from outside the Government). In the case of intragovernmental revolving and management funds, expenditures are stated on a net basis; that is, their receipts (most of which come from within the Government and are therefore shown as an expenditure of the paying agency) have been deducted from expenditures of the receiving agency and only the resulting figure is shown as its expenditure.

In the case of public enterprise funds, expenditures are reported on both a gross and a net basis. The gross expenditures show the total sums expended, and a deduction in each of the tables indicates their receipts, other than borrowing. (Like budget receipts, public enterprise fund receipts never include money obtained from borrowing.) The gross figures used here for the public enterprise funds are derived from the business-type budget statements of part II, which show expenditures and receipts on an accrual basis with a single adjustment (on either the expenditure or receipt side but not both) for the conversion from accrual to a checks-issued basis. Therefore, the gross figures used herein for such funds are not strictly on a checks-issued basis, although the net result is on such a basis.

Retirement of Government debt, both direct debt and Government corporation debt, is always excluded from budget expenditure figures. Similarly, the par value of investments in United States Government securities (which occur sometimes in the case of Government corporations) are excluded from the expenditure figures.

Eliminations from both receipts and expenditures.—Certain payments from one fund to another are eliminated from budget receipts and expenditures. This is done in order to avoid inflating both sides of the budget. The payments to the general fund of earnings and dividends on capital of revolving funds, and the return of such capital to the general fund are the items which have been so excluded.

BUDGET SURPLUS, DEFICIT, AND PUBLIC DEBT

Budget surplus and deficit.—The budget surplus or deficit, shown in table 1, represents the difference between the *budget receipts* and *net budget expenditures* of a given year. Cash balances, appropriation balances, and surpluses and deficits of previous years are not a part of the calculation.

The public debt.—Table 3 gives details regarding the effect of each year's operations upon the public debt. The budget surplus or deficit is not the only factor which causes a change in the public debt. The amount necessary to borrow or possibly to repay is also influenced by:

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

Changes in cash balances, the result of trust fund transactions, the use of Government corporation borrowing directly from the public as a means of financing budget expenditures of the corporations (and the repayments of such borrowing as an application of public enterprise fund receipts), and the change in the amount of checks outstanding and other items in process of clearance through the accounts.

BUDGET AUTHORIZATIONS

Table 2 summarizes the budget authorizations available and their disposition. Table 4 gives a breakdown by agency of the new authorizations becoming available each year, and table 6 gives supplementary information on the balances at start and end of the year.

The obligation basis.—Expenditures can be made only pursuant to appropriations or other authorizations granted by Congress. Government agencies are generally permitted by law to incur obligations requiring the future payment of money only when they have an appropriation or other authorization available for the purpose. Therefore, authorizations are enacted to cover *obligations* expected to be incurred within the fiscal year rather than to cover only the *expenditures* which are expected to be made during that year in payment of obligations.

Distinction between permanent and current authorizations.—Tables 2 and 4 distinguish *permanent* authorizations and *current* authorizations. The permanent items are those under which additional sums become available from time to time under action previously taken by the Congress; no further action is required each year. Most permanent authorizations are in force until repealed; a few are in effect for only a few years as specified in the law. The current authorizations are those enacted by Congress in or immediately preceding each fiscal year.

Balances.—Many budget authorizations are available for obligation for only 1 year, but some are available for longer periods of time. Even those which expire for obligation at the end of 1 year remain available for making expenditures in payment of such obligations for an additional 2 years, and further expenditures can be made later in payment of such obligations from the *certified claims* account of the Treasury. In the case of salaries and wages, travel, and like items, the lag between obligations and expenditures is usually no more than a few weeks or a few months. In the case of construction, major procurement, certain research contracts and similar items, the lag between obligations and expenditures may be as much as 1 or 2 years, and sometimes is even longer. For some revolving funds and certain other purposes, Congress has granted obligational authority well in advance of specific requirements, as a means of providing for contingencies which may arise. As a result of the foregoing factors, substantial balances of budget authorizations are carried forward from one year to the next. Such balances are not in the form of cash, but are bookkeeping authority for the incurring of obligations or the making of expenditures, for which cash must be provided through channels of financial management at the time the expenditures later occur.

Relating expenditures to authorizations.—Tables 2 and 5 summarize the relationship between budget authorizations and budget expenditures. Because old and new authorizations are by law commingled in some of the accounts, no attempt is made in the summary figures to separate actual spending in 1954 between the use of new authorizations and the use of balances. However, the budget presents such a breakdown on an estimated basis for 1955 and 1956. In the case of revolving and management funds, it assumes that the portion of their expenditures chargeable to budget authorizations is equal to the portion of the authorizations credited to the revolving fund during the year. The remainder of the revolving and management fund expenditures (or negative expenditures) are here classified as being charges or credits to balances of such funds.

TYPES OF NEW OBLIGATIONAL AUTHORITY

Appropriations are authorizations to make expenditures from the general fund of the Treasury or from the various special funds. In some cases the authority to incur obligations has previously been granted in the form of contract authorizations; in such cases, the appropriation to permit the payment of such obligations is said to be to *liquidate contract authorizations*. In all other cases appropriations confer authority both to incur new obligations and to pay for them.

Contract authorizations are authorizations to incur obligations prior to the enactment of an appropriation. A contract authorization does not in itself permit the spending of money; hence it must be followed by an appropriation to permit payment of the contracts and other obligations thus incurred.

Authorizations to expend from debt receipts are authorizations to make expenditures from borrowed money. Such authorizations may take these forms: (*a*) Authorizations for the Treasury to make public debt receipts available to a given agency or enterprise, often in exchange for notes of the enterprise; (*b*) authorizations for a Government-owned corporation to borrow directly from the public; and (*c*) cancellation of notes which have been issued by a Government enterprise and are held by the Treasury, where the cancellation has the effect of permitting further expenditures to be made (through restoring previously used authority to borrow from the Treasury).

Reappropriations and *reauthorizations* are actions to continue available part or all of the unused balances of prior appropriations or authorizations which would otherwise expire. When the authorizations thus continued had been previously granted for current operations of the year, the continuation of their availability into a new year constitutes new obligational authority.

Total new obligational authority shown in table 2 is the sum of the various types of authorizations named above, less the portion of appropriations which is for liquidation of prior contract authorizations. This total represents the new authority becoming available in any given year for the purposes of making commitments.

PROPOSED LEGISLATION AND OTHER ITEMS FOR LATER TRANSMISSION

Tables 1, 2, and 4 identify by separate columns the estimates of receipts, authorizations, and expenditures under legislative proposals recommended by the President, and other supplemental authorizations, and expenditures therefrom, which it is expected will be transmitted later. Table 5 identifies such items in a separate stub section. Such estimates include, in addition to the various supplemental estimates which are identified in part II, allowances for items which cannot be foreseen now but which will be transmitted later when definite amounts can be determined and the needs can be more specifically identified. Congressional action upon these allowances will be requested later, not at a single time nor as a single lump-sum item, but in the form of a number of specific appropriations for individual items.

TABLE 3

EFFECT OF FINANCIAL OPERATIONS ON THE PUBLIC DEBT

Based on existing and proposed legislation

[In millions]

Description	1954 actual	1955 estimate	1956 estimate
Effect of operations on increasing (+) or decreasing (−) public debt held by the public:			
Budget surplus (−) or deficit (+) (from table 1)	+$3,117	+$4,504	+$2,408
Excess of trust receipts over expenditures (−) (from table 8)	−1,951	−1,400	−2,439
Issue (−) or redemption (+) of Government corporation debt to the public (from special analysis J)	+14	−754	−827
Change in cash balance, increase (+) or decrease (−)	+2,353	−1,711	
Change in clearing account for outstanding checks, etc., increase (−) or decrease (+)	+46	+64	−67
Total, increase (+) or decrease (−) in public debt held by the public	+3,579	+703	−925
Effect of borrowing from (+) or repayment to (−) Government trust funds and investment accounts:			
Trust funds (from special analysis J)	+1,686	+2,192	+2,553
Revolving funds (from special analysis J)	−77	+145	+72
Total, increase (+) or decrease (−) in public debt held by Government trust funds and investment accounts	+1,609	+2,337	+2,625
Net increase (+) or decrease (−) in public debt	+5,189	+3,040	+1,700
Public debt at beginning of year	266,071	271,260	274,300
Net increase (+) or decrease (−) in public debt	+5,189	+3,040	+1,700
Public debt at end of year	271,260	[1] 274,300	[1] 276,000

NOTE.—Change in cash balance reflected above is computed as follows:

	1954	1955	1956
Beginning of year:			
Treasury	$4,670	$6,766	$5,000
Held outside the Treasury	588	845	900
End of year:			
Treasury	6,766	5,000	5,000
Held outside the Treasury	845	900	900
Increase (+) or decrease (−)	+2,353	−1,711	

[1] Because of wide swings in receipts and expenditures and the heavy concentration of taxes in the latter half of the fiscal year, there will be periods during the year when the public debt will be considerably greater than this amount.

INTRODUCTION TO PART II

Part II contains the details of the budget for Federal funds, including various types of tables and schedules, explanatory statements of the work to be performed and the money needed, and the text of the language proposed for enactment by Congress on each item of authorization. This part also includes material on funds of the municipal government of the District of Columbia, and a few other trust funds which require congressional action.

The contents of part II are arranged in chapters reflecting the organization of the Government. Totals from the chapters are carried forward to the tables of part I.

SUMMARIES OF BUDGET AUTHORIZATIONS, EXPENDITURES, AND BALANCES

At the beginning of each chapter a table in large type summarizes budget authorizations available, and a second table summarizes expenditures and other dispositions of the amounts available. Both tables segregate the items proposed for later transmission, for which no details appear in this budget, from those items already enacted or recommended in this document.

Summary of budget authorizations available.—This summary indicates the totals of each type of new obligational authority for the year, the totals of the various types of balances brought forward into the year, and any interchapter transfers or net upward adjustments of budget authorizations. The various types of authorizations are explained in the introduction to part I (pp. A3 and A4).

Summary of expenditures and balances.—This summary indicates the total expenditures for the chapter, the portion of the unspent available amounts which ceases to be available during or at the close of the year, and the balances carried forward into the next year. The figures are taken from the detailed analysis schedules appearing throughout the chapter.

For the years 1955 and 1956, there are estimated the portion of the expenditures which will come out of appropriations or other authorizations granted by Congress for that year, and the expenditures which will come from permanent authorizations and from balances of prior authorizations brought into the year. Additional entries are used where required for expenditures which will come from appropriations made to liquidate prior contract authorizations, and for expenditures from balances and receipts of revolving and management funds. Because old and new authorizations are commingled in some accounts, no attempt is made in the summary figures to separate actual spending in 1954 between old and new authorizations.

In preparing the estimates for 1955 and 1956, it is generally assumed that prior year balances available in commingled accounts will be obligated before the new authorizations are obligated, and that expenditures will reflect the liquidation of those obligations on the basis of previous experience. Where the obligation and expenditure are simultaneous, the first-in, first-out method is used to assign expenditures between old and new authorizations. In the case of revolving funds where budgetary authorizations are commingled with receipts, it is assumed that authorizations are expended in an amount equal to the sums placed in the revolving fund during the year, and that the remaining expenditures or net collections are a charge or credit to balances of the fund.

Summaries of balances.—At the bottom of the foregoing summaries, there is given (*a*) a further analysis of the authorization balances which are carried forward each year, indicating the respective amounts which are obligated and unobligated; and (*b*) a further analysis of the amounts written off or otherwise ceasing to be available each year, indicating the manner of writeoff.

STATEMENT OF AUTHORIZATIONS AND EXPENDITURES BY ACCOUNT TITLE

A detailed listing of the organization units and titles of appropriations and funds shows the budget authorizations and expenditures for each. The accounts are divided into several sections: Current authorizations other than revolving and management funds, permanent authorizations, revolving and management funds, and supplemental items proposed for later transmission.

Types of authorizations other than appropriations are set forth under the applicable appropriation titles, identified by separate stub entries. Functional code numbers appear in a separate column, indicating the category in the functional tables (special analyses B and K of part IV) where each account has been included.

Two deductions appear at the end of the table. One deduction, in the authorization column, covers the portion of appropriations which are to liquidate contract authorizations and hence are to be excluded in arriving at new obligational authority. The other deduction, in the expenditure column, is for the receipts of public enterprise funds, which are to be subtracted in arriving at *net* budget expenditures.

A separate double-page table is used for revolving and management funds. This portion of the table shows the total amounts provided by operations, the total amounts applied to operations and the net expenditures (which is the difference between the two other figures just named). Appropriations and other budgetary authorizations to use general fund money for revolving funds are shown in this section. The expenditures for each revolving fund include both the spending from budgetary authorizations and the spending from balances of the fund.

ALLOCATIONS AND CONSOLIDATED WORKING FUNDS

For funds appropriated to the President and other appropriations which are allocated by one agency to another for construction, for major procurement, for services to be carried on beyond the year, or for services which by mutual agreement are to be so handled, the amount so allocated is accounted for separately by the receiving agency. The use of the money is shown in a section of the budget under the parent account, rather than in the portion of the budget for the receiving agency.

Most other advances between agencies are accounted for in consolidated working funds. Each such advance is included in an appropriate object class of the parent accounts and the use of all such advances is shown in working fund schedules of the receiving agency.

DETAILED MATERIAL

The display for general and special fund appropriations is illustrated and explained on page 4 and the financial statements used for revolving funds are illustrated and explained on page 5.

The management funds follow the same style as general and special fund accounts with an extra summation of amounts provided and amounts applied, printed at the end of the expenditure analysis schedule. In the case of consolidated working funds, the detail is in part III.

EXPLANATORY ILLUSTRATION OF BUDGETS FOR GENERAL AND SPECIAL FUND ACCOUNTS

APPROPRIATION LANGUAGE

The language proposed by the President for inclusion in the 1956 appropriation acts is printed at the head of each item requiring action. The language in the 1955 appropriation acts is used as a base. Immediately following the language are citations to relevant laws and the appropriations from which the text is taken.

Salaries and Expenses, Federal Communications Commission

Salaries and expenses: For necessary expenses in performing the duties of the Commission as authorized by law, including newspapers (not to exceed $175), land and structures (not to exceed [$4,000] *$11,500*), special counsel fees, improvement and care of grounds and repairs to buildings (not to exceed $16,000), services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a), purchase of not to exceed [nine] *four* passenger motor vehicles, for replacement only, in the event adequate vehicles cannot be obtained by transfer from other departments or agencies, and not to exceed [$90,000] *$65,000* for expenses of travel, [$6,544,400, together with not to exceed $150,000 of the unobligated balance of funds appropriated for this purpose in the "First Independent Offices Appropriation Act, 1954"] *$6,700,000*. (*Independent Offices Appropriation Act, 1955.*)

Appropriated 1955, **$6,544,400** Estimate 1956, **$6,700,000**

Roman type shows the text used in the 1955 appropriation acts.

Brackets enclose material which it is proposed to omit in 1956.

Italic type indicates proposed new language and figures.

SCHEDULE OF AMOUNTS AVAILABLE

For each account there is shown a brief schedule which lists the appropriations made or required, other sources of money or authority to incur obligations, deductions for the amounts not used within the year, and the amount of "Obligations incurred."

AMOUNTS AVAILABLE FOR OBLIGATION

	1954 actual	1955 estimate	1956 estimate
Appropriation or estimate	$7,400,000	$6,544,400	$6,700,000
Reappropriation of prior year balance	.....	150,000	.....
Reimbursements from non-Federal sources	3,513	4,900	4,500
Reimbursements from other accounts	288,250	376,475	183,835
Total available for obligation	7,691,763	7,075,775	6,888,335
Balance reappropriated for subsequent year	−150,000	.....	.....
Unobligated balance, estimated savings	−259,020	.....	.....
Obligations incurred	7,242,743	7,075,775	6,888,335

NOTE.—Reimbursements from non-Federal sources above are from the proceeds of sale of personal property (40 U. S. C. 481 (c)).

Balances not available after the end of the year, to be lapsed.

Obligations refer to orders placed, contracts awarded, and services received during the year, regardless of the time of payment. Appropriations or other obligational authority must be provided by the Congress before obligations can be incurred.

OBLIGATIONS BY ACTIVITIES

Financial requirements are broken down by purpose, program, project, or activity. This breakdown is especially tailored for each agency and account, reflecting the particular duties and responsibilities for which it receives money.

Where reimbursements are received from other accounts of the Government, the obligations chargeable to such reimbursements are often placed in a separate portion of this schedule.

OBLIGATIONS BY ACTIVITIES

Description	1954 actual	1955 estimate	1956 estimate
Direct Obligations			
1. Applied technical research and frequency allocation	$647,576	$437,090	$431,174
2. Broadcast	1,383,989	1,243,992	1,205,764
3. Safety and special radio services	743,534	705,725	724,375
4. Field engineering and monitoring	2,339,100	2,259,908	2,269,709
5. Common carrier	712,653	726,958	732,022
6. Executive, staff, and service	1,327,639	1,325,617	1,341,456
Total direct obligations	6,954,493	6,699,300	6,704,500
Obligations Payable Out of Reimbursements From Other Accounts			
1. Applied technical research and frequency allocation	134,840	142,000	137,720
2. Broadcast	5,000	5,000	5,000
4. Field engineering and monitoring	115,421	182,600	.....
6. Executive, staff, and service	32,989	46,875	41,115
Total, obligations payable out of reimbursements from other accounts	288,250	376,475	183,835
Obligations incurred	7,242,743	7,075,775	6,888,335

Direct obligations are those for which this agency gets the money directly, either by appropriation, contract authorization, reimbursements from outside the Government, or other means.

Obligations shown in this portion of the schedule are financed by other appropriations and accounts, and therefore the amounts shown here are duplicated within the direct obligations section of the paying accounts.

NARRATIVE STATEMENTS

The work planned and services proposed to be carried out are described briefly under each appropriation or fund. Where practicable the narrative statements indicate the expected accomplishment in relation to the financial estimates and give some measures of program and performance. In the case of permanent appropriations, the narrative statements also explain the source of the money and the statutory basis for the appropriation.

PROGRAM AND PERFORMANCE

The Federal Communications Commission regulates wire and radio communications in interstate and foreign commerce so as to (1) assure adequate common carrier services at reasonable rates and (2) promote the most efficient and beneficial use of the radio spectrum. The budget proposes that rising workloads stemming from the growth of telephone communication systems and increased use of radio and television will be accomplished with substantially the same staff and funds available in fiscal year 1955.

1. *Applied technical research and frequency allocation.*—This activity provides the Commission with the basic information for determining the best utilization of the radio spectrum.

2. *Broadcast.*—Standard broadcast (AM), frequency

Headings in the narrative statements usually agree with the schedules of obligations by activities.

OBLIGATIONS BY OBJECTS

There is shown for each account a summary of personal services and a classification of the obligations according to a uniform list of objects. These object classes, numbered from 01 to 16, reflect the nature of the things or services purchased, regardless of the purpose or the nature of the program for which they are used.

OBLIGATIONS BY OBJECTS

Object classification	1954 actual	1955 estimate	1956 estimate
Summary of Personal Services			
Total number of permanent positions	1,289	1,245	1,138
Average number of all employees	1,122	1,112	1,049
Number of employees at end of year	1,146	1,050	1,065
Average salaries and grades:			
General schedule grades:			
Average salary	$5,702	$5,790	$5,880
Average grade	GS-8.3	GS-8.4	GS-8.6
Personal service obligations:			
Permanent positions	$6,323,388	$6,302,365	$6,127,445
Regular pay in excess of 52-week base	24,320	21,510	23,790
Payment above basic rates	71,995	70,000	57,600
Total personal service obligations	6,419,703	6,396,875	6,208,835
Direct Obligations			
01 Personal services	6,131,453	6,020,400	6,025,000
02 Travel	71,210	65,000	65,000
03 Transportation of things	22,373	15,000	15,000
04 Communications services	165,706	176,000	183,000
05 Rents and utility services	51,471	50,800	50,000
06 Printing and reproduction	58,162	29,000	29,000
07 Other contractual services	96,621	104,400	85,400
Services performed by other agencies	111,045	11,100	24,500
08 Supplies and materials	118,186	114,200	105,000
09 Equipment	155,050	108,900	108,500
10 Land and structures	13,000	4,000	11,500
13 Refunds, awards, and indemnities	210	500	600
Total direct obligations	6,954,493	6,699,300	6,704,500
Obligations Payable Out of Reimbursements From Other Accounts			
01 Personal services	288,250	376,475	183,835
Obligations incurred	7,242,743	7,075,775	6,888,335

Permanent positions are those of a full-time nature which are of indefinite duration. Some are filled by persons with temporary appointments.

This entry represents the number of (a) full-time and regularly scheduled part-time employees in pay status on the last workday in June and (b) intermittent employees who work at any time during June. This is the basis for reports to the Civil Service Commission.

Average salaries and grades are computed arithmetically. The average salary may fall either within or outside the salary range of the average grade.

ANALYSIS OF EXPENDITURES

This schedule shows the relationship between obligations incurred during the year and the amounts disbursed in the same period. The obligated balances (i. e., obligations which have not yet been paid) brought forward and carried forward are the principal items in making the bridge from obligations to expenditures.

The schedule also distributes the year's expenditures between those which come from authorizations of the same year, here called "current authorizations" (whether of a permanent or non-permanent nature), and those which come from authorizations of a prior year.

In the case of management funds additional lines are shown in this schedule to show the total funds provided by operations (receipts) and applied to operations (checks issued) and the net effect on budget expenditures.

ANALYSIS OF EXPENDITURES

	1954 actual	1955 estimate	1956 estimate
Obligated balance brought forward	$212,233	$394,811	$289,211
Obligations incurred during the year	7,242,743	7,075,775	6,888,335
	7,454,976	7,470,586	7,177,546
Adjustment in obligations of prior years	−2,800	.....	.....
Reimbursements	−291,763	−381,375	−188,335
Obligated balance carried to certified claims account	−8,277	.....	.....
Obligated balance carried forward	−394,811	−289,211	−459,211
Total expenditures	6,756,795	6,800,000	6,530,000
Expenditures are distributed as follows:			
Out of current authorizations	6,367,484	6,446,000	6,268,000
Out of prior authorizations	389,311	354,000	262,000

The obligated balance shown here plus the unobligated balance brought forward from prior years (if any) shown in the schedule of amounts available for obligation make up the balance available at the start of the year which is included in the chapter summary data.

Obligations which have been incurred but not yet paid are estimated as closely as possible, but the eventual payment may be in a slightly different amount from the obligation first reported. This line indicates the adjustment required for this reason in expired accounts.

Since the total of obligations includes the reimbursable items, but the expenditure figures are necessarily net of reimbursements (primarily to avoid duplicate accounting for the Government as a whole), it is necessary to deduct reimbursements in arriving at expenditure figures.

This is an example where successive annual appropriations are made. If appropriations of two or more years were merged under the law, a single figure would appear in this column for expenditures out of both current and prior authorizations.

Federal Reserve Bank of St. Louis

EXPLANATORY ILLUSTRATION OF BUDGETS FOR REVOLVING FUNDS

The financial statements shown below are regularly used for revolving funds. Such funds also have narrative statements on program and performance. Budgetary authorizations for such funds and limitations on expenses of Government corporations follow the general format illustrated on the opposite page.

STATEMENT OF SOURCES AND APPLICATION OF FUNDS

This is a balanced presentation of the amounts becoming available during the year, either in the form of cash or other working capital, and the way in which those amounts have been used.

The statement excludes depreciation, losses on loans, and other transactions which affect neither cash nor other current assets and liabilities. It does reflect transactions which affect cash, accounts receivable, accounts payable, other accrued liabilities, inventories of supplies for administrative purposes, deferred charges and credits.

Both the funds applied and the funds provided parts of the statement are divided between "operations" and Treasury "financing."

For intragovernmental funds, net expenditures (the sum of amounts applied to operations, less amounts provided by operations) are included in budget expenditures.

For public enterprise funds, the total amount applied to operations is included in total budget expenditures. The sum of amounts provided by operations for such funds make up the deduction for "Receipts of public enterprise funds."

STATEMENT OF INCOME AND EXPENSE

This is a statement of the income and expenses and the resulting profit or loss for the year. This statement is normally on a full accrual basis, including in the expenses sums for depreciation and provision for losses on receivables. It also indicates losses and chargeoffs when they occur. In addition, gains or losses from the sale of equipment or other assets appear here.

At the bottom of this statement there is an analysis of the retained earnings or cumulative deficit, showing any additions to it during the year, any charges made against it, and the balance at the end of the year.

STATEMENT OF FINANCIAL CONDITION

This is a balance sheet of assets, liabilities, and investment of the Government at the close of the fiscal year. Like the other statements, it is normally on an accrual basis.

When interest is paid on part or all of the investment of the U. S. Government, this section is broken down to indicate the amount which has been invested by the Government on which the fund pays interest, the amount invested on which the fund does not pay interest, and the retained earnings or deficit.

A. Statement of sources and application of funds

	1954 actual	1955 estimate	1956 estimate
FUNDS APPLIED			
To operations:			
Acquisition of assets: Equipment	$13,924	$18,000	$18,000
Expenses:			
Purchase of materials	695,549	800,000	800,000
Other expenses	1,295,559	1,655,000	1,705,000
Increase in selected working capital	89,997		13,332
Selected working capital absorbed	57,372		
Total applied to operations	2,152,401	2,473,000	2,536,332
To financing: Increase in Treasury cash		68,888	
Total funds applied	2,152,401	2,541,888	2,536,332
FUNDS PROVIDED			
By operations:			
Realization of assets: Proceeds from sale of equipment	1,019	800	800
Income:			
Sales of goods and services	2,034,424	2,474,600	2,523,600
Rental income from quarters	5,894	10,400	10,400
Decrease in selected working capital		56,088	
Total provided by operations	2,041,337	2,541,888	2,534,800
By financing: Decrease in Treasury cash	111,064		1,532
Total funds provided	2,152,401	2,541,888	2,536,332
EFFECT ON BUDGET EXPENDITURES			
Funds applied to operations	$2,152,401	$2,473,000	$2,536,332
Funds provided by operations	2,041,337	2,541,888	2,534,800
Net effect on budget expenditures	111,064	−68,888	1,532
The above are charged or credited (−) to net receipts of the fund	111,064	−68,888	1,532

B. Statement of income and expense

	1954 actual	1955 estimate	1956 estimate
Income:			
Sales of goods and services	$2,034,424	$2,474,600	$2,523,600
Rental income from quarters	5,894	10,400	10,400
Total income	2,040,318	2,485,000	2,534,000
Expenses: Cost of materials sold:			
Purchase of materials	695,549	800,000	800,000
Change in materials inventory	351	448	
Cost of materials sold	695,900	800,448	800,000
Other expenses	1,295,559	1,655,000	1,705,000
Depreciation of equipment	30,832	30,000	30,000
Total expenses	2,022,291	2,485,448	2,535,000
Net operating income or loss (−)	18,027	−448	−1,000
Nonoperating income or loss (−):			
Proceeds from sale of fixed assets	1,019	800	800
Net book value of assets sold	915	1,000	1,000
Net nonoperating income or loss (−)	104	−200	−200
Net income or loss (−) for the year	18,131	−648	−1,200
ANALYSIS OF RETAINED EARNINGS			
Retained earnings, beginning of year	30,597	48,728	48,080
Retained earnings, end of year	48,728	48,080	46,880

C. Statement of financial condition

	1954 actual	1955 estimate	1956 estimate
ASSETS			
Current assets:			
Cash with Treasury:			
Operations	$198,444	$267,332	$265,800
Deposit funds	35,031	35,000	35,000
Accounts receivable	438,816	388,816	390,000
Inventory of supplies and materials	89,448	89,000	89,000
Total current assets	761,739	780,148	779,800
Fixed assets:			
Equipment	346,889	355,889	363,889
Less portion charged off as depreciation	194,615	216,615	237,615
Total fixed assets	152,274	139,274	126,274
Total assets	914,013	919,422	906,074
LIABILITIES			
Current liabilities:			
Accounts payable	135,833	147,552	135,860
Accrued expenses	242,087	236,456	236,000
Deposit liabilities	35,031	35,000	35,000
Total liabilities	412,951	419,008	406,860
INVESTMENT OF U. S. GOVERNMENT			
Principal of fund:			
Appropriation	300,000	300,000	300,000
Donated assets, net	152,334	152,334	152,334
Total principal of fund	452,334	452,334	452,334
Retained earnings	48,728	48,080	46,880
Total investment of U. S. Government	501,062	500,414	499,214
Total liabilities and investment of U. S. Government	914,013	919,422	906,074

NOTE.—Excludes contingent liability for undelivered orders as follows: June 30, 1953, $34,754; 1954, $18,809; 1955, $20,000; 1956, $20,000.
Selected working capital (other than cash with Treasury) included above is as follows: June 30, 1953, −$29,101; 1954, $60,896; 1955, $4,808; 1956, $18,140.
Cash balance with Treasury on June 30, 1953, was $309,508.

If the enterprise acquires materials for manufacture or sale, purchases for manufacture or sale are included in expenses in this statement, whether or not the materials are used within the year.

Selected working capital items comprise the current assets (other than cash with Treasury, inventories for sale or manufacture, and without deducting any valuation allowances) less the current liabilities (other than reserves). The net amount of such items is indicated in a footnote to Statement C.

Net effect on budget expenditures includes the spending of appropriations for the revolving fund as well as the spending of the fund's own receipts. A negative figure here indicates collections in excess of expenditures.

Income (as well as expenses) is usually based on the accrual method of accounting.

If the enterprise conducts a sales operation, the cost of goods sold, rather than purchases, is considered an expense in this statement.

Depreciation and other expenses not shown on statement A are indicated separately.

This entry agrees with the balance sheet. It represents cumulative profits kept in the business, whether in the form of cash, inventories, receivables, or fixed assets.

This entry represents cash on deposit with the Treasury. If the fund has any cash in commercial banks, it is also included here. It excludes any balances of appropriations (or other authorizations) which have not yet been paid into the fund.

"Liabilities" normally means what is owed for goods and services which have been received. The remainder of the obligations outstanding, covering items on order which have not yet been received, is shown as a footnote.

The investment of the U. S. Government indicates the Government's interest as owner, plus the Government's interest as creditor in the form of notes payable to the Treasury where a Government corporation has authorization to borrow on such notes.

The cash balances shown in the footnote and above are used in compiling chapter summary data on balances. The contingent liabilities and commitments, if any, shown in the footnote minus selected working capital make up the obligated portion of the balances. The total cash minus the obligated portion makes up the unobligated portion.

Contingent Expenses, Senate, Stationery

Stationery: For stationery for Senators and for the President of the Senate, including $10,000 for stationery for committees and officers of the Senate, $126,400. (*Legislative-Judiciary Appropriation Act, 1955.*)

Appropriated 1955, **$126,400** Estimate 1956, **$126,400**

Contingent Expenses, Senate, Communications

Communications: For an amount for communications which may be expended interchangeably for payment, in accordance with such limitations and restrictions as may be prescribed by the Committee on Rules and Administration, of charges on official telegrams and long-distance telephone calls made by or on behalf of Senators or the President of the Senate, such telephone calls to be in addition to those authorized by the provisions of the Legislative Branch Appropriation Act, 1947 (60 Stat. 392; 2 U. S. C. 46c, 46d, 46e), the First Deficiency Appropriation Act, 1949 (63 Stat. 77; 2 U. S. C. 46d–1), Second Supplemental Appropriation Act, 1952, Public Law 254, Eighty-second Congress, [and] Public Law 178, Eighty-third Congress, *and Public Law 470, Eighty-third Congress,* $14,550. (*Legislative-Judiciary Appropriation Act, 1955.*)

Appropriated 1955, **$14,550** Estimate 1956, **$14,550**

The Sergeant at Arms is authorized and directed to secure suitable office space in post office or other Federal buildings in the State of each Senator for the use of such Senator and in the city to be designated by him: *Provided,* That in the event suitable space is not available in such buildings and a Senator leases or rents office space elsewhere, the Sergeant at Arms is authorized to approve for payment, from the contingent fund of the Senate, vouchers covering bona fide statements of rentals due in an amount not exceeding $900 per annum for each Senator.

The Sergeant at Arms of the Senate is authorized and directed to approve for payment from the contingent fund of the Senate to each Senator an amount not to exceed $150 quarterly, upon certification of each such Senator, for official office expenses incurred in his State.

[Effective July 1, 1954, the paragraph relating to payment of toll charges on official long-distance telephone calls originating and terminating outside of Washington, District of Columbia, under the heading "Contingent Expenses of the Senate" in Public Law 479, Seventy-ninth Congress, as amended, is amended to read as follows:]

["There shall be paid from the contingent fund of the Senate, in accordance with rules and regulations prescribed by the Committee on Rules and Administration of the Senate (1) the toll charges on strictly official long-distance telephone calls originating and terminating outside of Washington, District of Columbia, and (2) the toll charges on strictly official long-distance telephone calls to or from Washington, District of Columbia, in excess of those authorized to be paid under the preceding paragraph, not to exceed $1,200 per year, for each Senator."]

The Secretary of the Senate and the Sergeant at Arms are authorized and directed to protect the funds of their respective offices by purchasing insurance in an amount necessary to protect said funds against loss. Premiums on such insurance shall be paid out of the contingent fund of the Senate, upon vouchers approved by the chairman of the Committee on Rules and Administration.

Salaries or wages paid out of the foregoing items under "Contingent expenses of the Senate" shall be computed at basic rates, plus increased and additional compensation, as authorized and provided by law. (*Legislative-Judiciary Appropriation Act, 1955.*)

Payment to Estates and Widows of Deceased Members of the Senate

[For payment to the estate of Hugh Butler, late a Senator from the State of Nebraska, $12,500.]

[For payment to Clyde Roark Hoey, Junior, and Charles Aycock Hoey, sons, and Isabel Hoey Paul, daughter of Clyde R. Hoey, late a Senator from the State of North Carolina, $12,500.]

[For payment to Emily Nathelle Hunt, widow of Lester C. Hunt, late a Senator from the State of Wyoming, $12,500.] (*Supplemental Appropriation Act, 1955.*)

LIBRARY OF CONGRESS

INTRODUCTORY STATEMENT

The Library of Congress, established by an act of Congress approved April 24, 1800, is not only the library of the Congress itself, but is also the principal general library of the Government of the United States. Its collections are comprehensive and varied, and include outstanding collections of books, periodicals, newspapers, documents of the national governments of the world, literature in the Oriental languages, etc., and manuscripts, maps, music, motion-picture films, sound recordings, prints, and photographs. In addition to maintenance of the collections and the rendering of general and basic services connected therewith, certain specialized functions are performed: the Legislative Reference Service, registration of copyrights, catalog card distribution, and the service of books in raised characters and talking books to the blind. In terms of these broad fields of activity comparative obligations (including only those chargeable to annual appropriations) for 1954 and estimated for 1955 and 1956 are:

	1954 actual	*1955 estimate*	*1956 estimate*
General and basic services:			
Acquisitions	$928,306	$1,006,619	$951,259
Organization of the collections	1,449,029	1,421,754	1,421,754
Reader and reference services	1,393,803	1,367,548	1,367,548
Maintenance and protective services	743,314	729,300	729,300
Executive direction and general administrative services	634,678	622,775	622,775
Specialized services:			
Copyright	1,099,829	1,100,000	1,100,000
Legislative Reference Service	900,758	875,000	875,000
Catalog card distribution service	1,264,580	1,332,000	1,332,000
Books for the blind	991,494	1,000,000	1,000,000
Total obligations	9,405,791	9,454,996	9,399,636

The Library's first obligation is to the Congress; the second, to other agencies of the Government; and the third, to other libraries, scholars, investigators, and the general public.

In addition to funds appropriated annually by Congress, there are also available a number of gift and trust funds, and working funds.

Certain responsibilities for the physical equipment, maintenance and operation of the Library buildings rest by law with the Architect of the Capitol, and estimates for these purposes are carried under the request of that office.

The Library's major objectives for 1956 are to meet the needs of Congress, to satisfy the official inquiries from other Government agencies, and to insure adequacy of public services.

Salaries and Expenses, Library of Congress

Salaries and expenses: For necessary expenses of the Library of Congress not otherwise provided for, including compensation of the Librarian Emeritus, as authorized by law; development and maintenance of the Union Catalogs; custody, care, and maintenance of the Library Buildings; special clothing; and expenses of the Library of Congress Trust Fund Board not properly chargeable to the income of any trust fund held by the Board; $4,717,636. *(2 U. S. C. 131–166; 5 U. S. C. 150; 17 U. S. C. 1–215; 20 U. S. C. 91; 28 U. S. C. 921; 31 U. S. C. 588, 589; 52 Stat. 808; Legislative-Judiciary Appropriation Act, 1955.)*

Obligations incurred	4,808,157	4,717,636	4,717,636

PROGRAM AND PERFORMANCE

Personal services and incidental expenses required for the basic operations of the Library are financed from this appropriation.

1. *Acquisition of library materials.*—The development of the Library's collections is planned; materials are procured by purchase, gift, exchange, copyright deposit, transfer, and official deposit; and materials are selected for addition to the permanent collections. The objectives for 1956 are greater selectivity and improved efficiency in the procurement of materials, with appropriate emphasis on the acquisition of noncurrent strategic materials, and filling serious gaps in the collections and the strengthening of exchange relations with institutions in important areas. The collections totaled 33,152,852 items as of June 30, 1954, and consisted of 10,155,307 books and pamphlets; 14,282,594 manuscript pieces and 8,714,951 maps, pieces of music, reels of microfilm, photographs, and other miscellaneous items. Of the items received about 1½ million are added to the permanent collections annually. Those received from various sources in 1954 and estimated for 1955 and 1956 are as follows:

	1954 actual	*1955 estimate*	*1956 estimate*
Purchase	486,204	480,000	480,000
Copyright	355,262	355,000	360,000
Transfer and deposit (principally from Government agencies)	1,646,987	1,700,000	1,800,000
Gift from individual and unofficial sources	809,030	800,000	800,000
Exchange	434,969	500,000	500,000
Source not reported (mainly newspaper and periodical issues)	1,138,209	1,200,000	1,200,000
Total	4,870,661	5,035,000	5,140,000

2. *Organization of the collections.*—Library materials are cataloged, classified, marked, and arranged; Library of Congress catalogs and the National Union Catalogs are maintained; and binding operations are controlled. The objectives for this activity in 1956 are: preliminary processing control over all materials and adequate cataloging methods and procedures to assure the usefulness of the collections.

Selected performance data for 1954 and estimated for 1955 and 1956 are as follows:

	1954 actual	*1955 estimate*	*1956 estimate*
Volumes fully cataloged and added to the classified collection	122,786	124,000	124,000
Items otherwise organized for use (without full cataloging)	10,265	11,000	11,000
Cards filed in catalogs	1,401,855	1,450,000	1,450,000
Volumes bound	56,383	55,000	57,000
Items repaired, cleaned, mounted, etc	173,797	175,000	175,000
Cards received, checked, or filed in National Union Catalog	682,049	690,000	690,000

NOTE.—These figures are for the processing department only and do not reflect cataloging, filing, binding, and related processing operations performed by other departments of the Library (except copyright cataloging of books).

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

3. *Reader and reference services.*—Books and other library materials are provided within and without the Library, reference and bibliographic assistance is rendered, and custody of the collections is maintained. The objectives of this activity for 1956 are: adequate service to readers during the 52 hours of full service and the 26 hours of limited service weekly; adequate custody and maintenance of the collections; and the interpretation of the collections through the preparation of bibliographies and checklists. The slight upward trend in workload in some of the activities is expected to continue in 1955 and 1956.

	1954 actual	*1955 estimate*	*1956 estimate*
a. General reader and reference service:			
Books and pamphlets served	1,125,430	1,125,000	1,126,000
Other units of material served	695,818	700,000	700,000
Units issued on loan	201,763	205,000	210,000
Reference inquiries answered	409,820	410,000	410,000
Reference letters	61,850	62,000	63,000
b. Law Library reader and reference service:			
Books and pamphlets served	255,431	265,000	275,000
Reference inquiries answered	78,813	82,000	82,000
Reference letters	715	850	850

4. *Maintenance and protective services.*—The two Library buildings and the collections and other properties contained therein are maintained, preserved and protected. A staff of 191 including 82 part-time charwomen, preserves, cleans, and maintains the Library buildings, collections and grounds, operates telephone switchboards, elevators, check stands and motor vehicles; procures and maintains furniture, office supplies, housekeeping materials, and miscellaneous equipment; assigns space; and operates the receiving and stock rooms. The guard force staff of 76 is necessary to prevent fire and theft, to maintain order and to provide regular inspections of all areas in both buildings in which is assembled one of the greatest accumulations of national treasures in the world.

5. *Executive direction and general administrative services.*—

PROGRAM AND PERFORMANCE

The Copyright Office is responsible for recording and cataloging all copyright applications, assignments and renewals, for supplying copyright information to the public and for collecting and accounting for copyright fees. The Register of Copyrights prints complete and indexed catalogs for each class of copyright entries (17 U. S. C. 210). The Office is conducted as a business operation. The amount requested for personal services is almost equal to the fees received for services rendered as indicated in the table which follows. In addition, the value of books and other library materials deposited in accord-

Salaries, and Expenses, Copyright Office, Library of Congress—Continued

ance with the Copyright Act and transferred to the Library of Congress is also to be credited to the copyright operation. The income and costs for 1954 and estimates for 1955 and 1956 are as follows:

	1954 actual	*1955 estimate*	*1956 estimate*
Income:			
Fees applied	$871,463	$893,249	$915,036
Estimated value of materials deposited	680,918	697,930	714,959
Total income	1,552,381	1,591,179	1,629,995
Costs:			
Salaries	1,021,852	1,029,700	1,029,700
Other costs	77,977	70,300	70,300
Total costs	1,099,829	1,100,000	1,100,000

The program and performance under each of the activities described are predicated on an estimated 233,798 copyright registrations during 1956, an estimated 228,231 during 1955, and an actual 222,665 during 1954.

1. *Receiving and accounting for applications, etc.*—All materials mailed or delivered to the Copyright Office are received, assembled, and routed; accounts are maintained for all moneys received; records relating to the registration of copyrights are filed; and materials are deposited in accordance with the Copyright Act. Performance data for 1954 and estimates for 1955 and 1956 are as follows:

	1954 actual	*1955 estimate*	*1956 estimate*
Registrations	222,665	228,231	233,798
Mail received and dispatched	538,518	551,980	565,443

2. *Examining copyright applications.*—All applications and deposits are examined before issuance of registration certificates or recording of documents to determine whether the provisions of the Copyright Act have been satisfied. Performance data for 1954 and estimates for 1955 and 1956 are as follows:

	1954 actual	*1955 estimate*	*1956 estimate*
Items examined for registration	290,035	297,285	304,536
Registrations and recordation of documents	229,088	234,815	240,542

3. *Indexing and cataloging all materials received.*—The Register of Copyrights is required to print complete and indexed catalogs of all items registered. The catalog entries prepared by the Copyright Office are made available in part to the Library for its general operations. There were 222,665 registrations cataloged in 1954 and estimates for 1955 and 1956 are 228,231 and 233,798, respectively.

4. *Reference services.*—The Copyright Office makes available to the public, information concerning the provisions of the Copyright Act, including procedures, policies and rulings; information concerning registrations is furnished on a fee basis. Obtaining compliance with registration requirements is also part of this activity. Performance data for 1954 and estimates for 1955 and 1956 are as follows:

	1954 actual	*1955 estimate*	*1956 estimate*
Titles searched	48,009	49,209	50,409
Letters and search reports written	22,704	23,271	23,839

5. *Printing the catalog of copyright entries and bulletins of decisions.*—Catalogs for each class of copyright entries are printed as required by 17 U. S. C. 210, and bulletins of copyright decisions are printed and made available to the public.

6. *General supervision and legal services.*—The work of the Copyright Office includes legal services relating to the status and improvement of copyright law in its foreign as well as domestic aspects, such improvement constituting the major objective under this activity in 1956.

PROGRAM AND PERFORMANCE

In performing the functions authorized by the Legislative Reorganization Act of 1946, the Legislative Reference Service prepares research reports, digests, etc., in answer to inquiries from Members and committees of Congress.

1. *Authoritative research and analysis.*—The Legislative Reorganization Act of 1946 lists 21 specific fields of congressional concern in which top-level research is authorized. These correspond in general to the spheres of committee activity. During 1955 the following 10 fields, all carried forward from 1954, will continue to be so covered: International economics, international relations, taxation and fiscal policy, American government and public administration, conservation and natural resources, American law, labor economics, engineering and public works, agriculture, and price economics.

2. *General research.*—This activity involves performance of general research, providing research reports, graphs, charts, illustrations, translations, and answering spot reference inquiries. In fiscal 1954, 51,586 congressional inquiries were answered. A continuation of the average annual increase since the last increase of staff in fiscal 1950 is anticipated. The average annual increase being 5 percent, the total for 1955 is estimated at 54,000; and for 1956, 57,000.

3. *Preparation of indexes and digests.*—The Digest of Public General Bills covered 5,176 bills during the part of the Eighty-third Congress, second session, coming within the fiscal year 1954. It is expected that there will be as many bills to be covered during the comparable period in the Eighty-fourth Congress, second session, and, in addition, close to 1,000 concurrent and joint resolutions not previously covered. The preparation of name indexes to an increasing number of committee hearings is to be continued.

4. *Reference files, bibliographic and reader service.*—Reference files, containing clippings, pamphlets and documents, are maintained; researchers are supplied with bibliographic and reference tools; selective and comprehensive bibliographies are prepared for Members and committees of Congress; and reader services are provided by the congressional reading room. During 1954, 71,043 reference file items were processed, 11,863 bibliographic entries prepared, 40,084 published items acquired and processed, and 3,643 readers served. With the growth in number and scope of inquiries, there has been a steady increase in this activity which is expected to continue in 1955 and 1956.

5. *Administration.*—

Obligations incurred	1,264,580	1,332,000	1,332,000

PROGRAM AND PERFORMANCE

The Card Division sells copies of the Library's printed catalog cards and publications in an amount in excess of $1,000,000 a year. It maintains a stock of over 150,000,000 catalog cards representing some 3,000,000 titles, and fills orders from more than 8,000 regular subscribers—mostly libraries—in the United States and abroad. More than 80 percent of this appropriation is recovered in the form of receipts from card and publication sales. Receipts of $1,087,327 were covered into miscellaneous receipts in 1954. The objectives for 1956 are the greater use of card reproduction by means other than printing to expedite the filling of orders for out-of-print cards; continued improvements and economies in operations and increasing the scope and utility of the Library of Congress catalogs in book form.

1. *Supplying and printing cards for the Library of Congress.*—The number of cards supplied to the Library of Congress in fiscal 1954 was 3,555,514; estimated for 1955, 4,000,000; and for 1956, 4,000,000.

2. *Supplying and printing cards for other libraries.*—The number of cards printed or otherwise reproduced in fiscal 1954 for sale to other libraries was 31,789,814; estimated for 1955, 32,000,000, and for 1956, 32,000,000. The number of cards sold in fiscal 1954 was 22,340,000; estimated for 1955, 23,000,000; and for 1956, 23,000,000.

3. *Preparation, printing, and distribution of publications related to cataloging.*—These publications are auxiliary to the cataloging activities of the Library of Congress and

LIBRARY OF CONGRESS—Continued

DISTRIBUTION OF CATALOG CARDS—continued

Salaries and Expenses, Distribution of Catalog Cards, Library of Congress—Continued

include the Classification Schedules, lists of Subject Headings, Rules for Descriptive Cataloging, Cataloging Service Bulletins, and similar publications. It is anticipated that 1956 expenditures will be approximately the same as for 1955.

4. *Preparation, printing, and distribution of the Author Catalog.*—The Author Catalog is issued monthly and cumulated quarterly and annually. Subscribers to the Author Catalog also receive issues of Motion Pictures and Filmstrips (quarterlies with annual cumulation), Maps and Atlases and Music and Phonorecords (both issued on a 6-month basis and annual cumulation). There were 843 paid subscriptions for all issues in calendar year 1954, and it is estimated that there will be 875 subscriptions for 1955 and 900 for 1956. Included under this activity is the Armed Forces Medical Library Catalog of which 385 copies were sold in calendar year 1954. Due to the publication of a quinquennial edition during 1955 no annual will be published. It is anticipated that 400 copies will be sold in 1956.

5. *Preparation, printing, and distribution of the Subject Catalog.*—The Subject Catalog is being issued during calendar year 1954 in 3 quarterly volumes due to the publication of a quinquennial edition covering the calendar years 1950–54. The printing of an annual volume for this Catalog will be resumed with the 1955 Catalog. There were 360 paid subscriptions for calendar year 1954. It is estimated that there will be 400 paid subscriptions in 1955 and about 425 in 1956.

PROGRAM AND PERFORMANCE

The Division for the Blind is responsible for administering a national program to provide reading material for the blind of the United States, United States Territories and possessions. In discharge of this responsibility it executes two closely related operations.

First: It provides books in embossed characters, and talking books with their associated reproducers. The books are distributed through 28 regional libraries which assume responsibility for their custody and circulation. The reproducers are distributed through 55 State agencies.

Second: The division maintains one of the 28 regional libraries providing service to more than 4,500 readers in the District of Columbia and the States of Maryland, Virginia, North Carolina, and South Carolina. In addition, this regional library offers a national service of a unique collection of Braille books not generally available in the other regional libraries.

The objectives for 1956 are: To adjust production of books in raised characters to the declining reader demand; to prepare new and improved specifications for talking books; to explore improved and more economical techniques of printing in Braille; to relieve regional libraries of difficulties resulting from accumulations of little used reading materials; and to develop more economical techniques in the repair of talking book machines.

1. *Procurement and distribution.*—Books are selected, purchased and distributed, and talking book machines are purchased, repaired and replaced.

	1954 actual	*1955 estimate*	*1956 estimate*

LIBRARY OF CONGRESS—Continued

BOOKS FOR THE BLIND—continued

Books for the Blind, Library of Congress—Continued

2. *Cataloging and reference services.*—Catalogs of talking and Braille books are prepared and maintained. A cumulative supplement of talking books for the blind, 1948–53, was printed in fiscal 1954. A second supplement of Press Braille will be prepared in fiscal 1955. A union catalog of hand-copied material available for the blind will be completed in fiscal 1955.

ADMINISTRATIVE PROVISIONS

Appropriations in this Act available to the Library of Congress for salaries shall be available for expenses of investigating the loyalty of Library employees; special and temporary services (including employees engaged by the day or hour or in piecework); and services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a).

Not to exceed ten positions in the Library of Congress may be exempt from the provisions of appropriation Acts concerning the employment of aliens during the current fiscal year, but the Librarian shall not make any appointment to any such position until he has ascertained that he cannot secure for such appointments a person in any of the three categories specified in such provisions who possesses the special qualifications for the particular position and also otherwise meets the general requirements for employment in the Library of Congress.

Appropriations in this Act available to the Library of Congress shall be available, in an amount not to exceed $10,000, when specifically authorized by the Librarian, for expenses of attendance at meetings concerned with the function or activity for which the appropriation is made. (*Legislative-Judiciary Appropriation Act, 1955.*)

2. Distribution for other agencies	10,650	30,000	30,000
Obligations incurred	2,709,456	2,855,000	2,920,400

The Office of Superintendent of Documents is a division of the Government Printing Office which operates under a separate appropriation. The work programs are entirely of a service nature and are of such type that there is no control over the volume of work which the Superintendent of Documents is required by law to perform.

1. *Sales distribution.*—The Superintendent of Documents is authorized by law to sell copies of Government publications purchased from the Public Printer. Acquisition costs are paid from sales receipts, so no appropriation is required for printing sales copies. By provision of law, the sale price is set at the cost of manufacture plus 50 percent. At the end of each fiscal year, excess receipts not required for purchasing additional publications are turned in to the Treasury Department as miscellaneous receipts. For the fiscal year 1954 earned revenue from this source was $1,901,360.74. It is estimated that miscellaneous receipts earned will be $2,000,000 for 1955 and $2,200,000 for 1956. The number of sales orders has been steadily increasing, and in the last 10 years the volume of orders and the dollar value of publications sold has more than doubled. The current public interest in the Government's publishing program points to a continuing increase in the volume of orders.

2. *Distribution for other agencies and Members of Congress.*—The Superintendent of Documents under provisions of law is required to prepare mailing lists, including the mailing list for the Congressional Record, and to perform mailing operations upon the request of any Government agency and without reimbursement from these agencies. Another legal obligation is to handle the mailing of Farmers' Bulletins, Soil Surveys, and other publications which are allocated to Members of Congress on a quota basis.

3. *Depository library distribution.*—The Superintendent of Documents is required by law to supply 1 copy of every Government publication, upon request, to more than 556 libraries which are designated depositories for Government publications.

4. *Cataloging and indexing.*—The law provides that the Superintendent of Documents shall prepare and distribute catalogs and indexes of all publications issued by the Federal Government. The Monthly Catalog of United States Government Publications and the Numerical List and Schedule of Volumes are the two principal publications which are issued to discharge legal requirements.

SUMMARY OF WORKLOAD

	1954 actual	*1955 estimate*	*1956 estimate*
Number of sales orders	2,212,096	2,400,000	2,600,000

[WORKING CAPITAL AND CONGRESSIONAL PRINTING AND BINDING]

[The unexpended balance of the appropriation to the Government Printing Office for "Working capital and congressional printing and binding" for the fiscal year 1943 shall be available, without regard to fiscal year limitation, for payment of a claim settled by the General Accounting Office in favor of the Baltimore and Ohio Railroad in the amount of $703.34 on account of services rendered during the fiscal year 1942.] (*Supplemental Appropriation Act, 1955.*)

GENERAL PROVISIONS

SEC. 102. No part of the funds appropriated in this Act shall be used for the maintenance or care of private vehicles.

SEC. 103. Whenever any office or position not specifically established by the Legislative Pay Act of 1929 is appropriated for herein or whenever the rate of compensation or designation of any position appropriated for herein is different from that specifically established for such position by such Act, the rate of compensation and the designation of the position, or either, appropriated for or provided herein, shall be the permanent law with respect thereto: *Provided*, That the provisions herein for the various items of official expenses of Members, Officers, and Committees of the House, and Clerk Hire for Members shall be the permanent law with respect thereto: *Provided further*, That the provisions relating to positions and salaries thereof carried in H. Res. 118, 221, 254, 355, 364, 392, 401, 427, 428, 474, 486, and 554 of the Eighty-third Congress shall be the permanent law with respect thereto.

SEC. 104. No part of any appropriation contained in this Act shall be paid as compensation to any person appointed after June 30, 1935, as an officer or member of the Capitol Police who does not meet the standards to be prescribed for such appointees by the Capitol Police Board: *Provided*, That the Capitol Police Board is hereby authorized to detail police from the House Office, Senate Office, and Capitol Buildings for police duty on the Capitol Grounds.

SEC. 105. After June 30, 1954, when any person who has been elected a Representative in Congress dies after the commencement of the Congress to which he has been elected, the Sergeant at Arms of the House of Representatives shall pay to the widow, or widower, of such person, or if there is no widow, or widower, to the next of kin or heirs-at-law of such person, any unpaid balance of salary or other sums due such person at the time of his death. (*Legislative Appropriation Act, 1955.*)

BUSINESS-TYPE STATEMENTS

PURPOSE AND FINANCIAL ORGANIZATION

The Government Printing Office executes orders for printing, binding, and blankbook work, placed by Congress, and the various departments and independent establishments of the Federal Government, and furnishes on order, blank paper, inks, and similar supplies. Operations are subject to the authority of the Joint Committee on Printing (U. S. C., title 44).

A separate appropriation has been established for authorized printing and binding for the Congress; for printing, binding, and distribution of the Federal Register; and printing and binding of Government publications authorized by law to be distributed without charge to the recipients (title 44, U. S. C. 71).

All work for Government agencies other than the above is done on a reimbursable basis and financed through this fund.

Receipts from sales of publications by the Superintendent of Documents are deposited to the revolving fund and cost of publications paid from same. All profits ac-

GENERAL PROVISIONS—THE JUDICIARY

SEC. 202. Sixty per centum of the expenditures for the District Court of the United States for the District of Columbia from all appropriations under this title and 30 per centum of the expenditures for the United States Court of Appeals for the District of Columbia from all appropriations under this title shall be reimbursed to the United States from any funds in the Treasury to the credit of the District of Columbia.

SEC. 203. The reports of the United States Court of Appeals for the District of Columbia shall not be sold for a price exceeding that approved by the court and for not more than $6.50 per volume. (*Judiciary Appropriation Act, 1955.*)

GENERAL PROVISIONS

SEC. 301. No part of any appropriation contained in this Act shall be used to pay the salary or wages of any person who engages in a strike against the Government of the United States or who is a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or who advocates, or is a member of an organization that advocates, the overthrow of the Government of the United States by force or violence: *Provided,* That for the purposes hereof an affidavit shall be considered prima facie evidence that the person making the affidavit has not contrary to the provisions of this section, engaged in a strike against the Government of the United States, is not a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or that such person does not advocate, and is not a member of an organization that advocates, the overthrow of the Government of the United States by force or violence: *Provided further,* That any person who engages in a strike against the Government of the United States or who is a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or who advocates, or who is a member of an organization that advocates, the overthrow of the Government of the United States by force or violence, and accepts employment the salary or wages for which are paid from any appropriation or fund contained in this Act shall be guilty of a felony and, upon conviction, shall be fined not more than $1,000 or imprisoned for not more than one year, or both: *Provided further,* That the above penalty clause shall be in addition to, and not in substitution for, any other provisions of existing law.

[SEC. 302. The appropriations, authorizations, and authority with respect thereto in this Act or any regular annual appropriation Act for the fiscal year 1955 which has not been enacted into law prior to July 1, 1954, shall be available from and including such date for the purposes respectively provided in such appropriations, authorizations, and authority. All obligations incurred during the period between June 30, 1954, and the date of enactment of this Act or the applicable Act in anticipation of such appropriations, authorizations, and authority are hereby ratified and confirmed if in accordance with the respective terms thereof.] (*Legislative-Judiciary Appropriation Act, 1955.*)

NOTE.—Reimbursements from non-Federal sources are refunds of lump-sum annual leave payment (67 Stat. 137).

OBLIGATIONS BY ACTIVITIES

Description	1954 actual	1955 estimate	1956 estimate
1. Office of budget review	$373,490	$384,800	$385,100
2. Office of legislative reference	155,709	164,600	162,300
3. Office of management and organization	298,847	348,000	350,700
4. Office of statistical standards	324,126	331,200	308,800
5. Program divisions:			
(a) Commerce and finance	312,819	322,500	322,200
(b) International	220,815	248,200	246,800
(c) Labor and welfare	336,997	343,500	342,500
(d) Military	390,423	400,000	403,600
(e) Resources and civil works	388,899	391,200	388,600
6. Field service	34,322		
7. Administration	454,540	463,500	453,400
Obligations incurred	3,290,987	3,397,500	3,364,000

PROGRAM AND PERFORMANCE

The Bureau assists the President in the discharge of his budgetary, management, and other executive responsibilities.

1. *Office of budget review.*—Budget instructions and procedures are developed, review of agency estimates is coordinated, and the budget document is prepared.

2. *Office of legislative reference.*—Proposed legislation and agency reports on pending legislation, enrolled bills, and proposed Executive orders and proclamations are reviewed for the President.

3. *Office of management and organization.*—Programs and plans are developed for improved Government organization and procedures, and guidance is provided in the work of the Bureau to improve agency management and operations.

4. *Office of statistical standards.*—Proposed agency reporting plans and forms are reviewed, and the Government's statistical activities, coverage, and methods are coordinated and improved.

5. *Program divisions.*—Agency programs, budget requests, and management activities are examined, appropriations are apportioned, proposed changes in agency functions are studied, and agencies are assisted in the improvement of their administration. Responsibility for this work with respect to particular agencies is divided among five divisions: (*a*) commerce and finance, (*b*) international, (*c*) labor and welfare, (*d*) military, and (*e*) resources and civil works.

6. *Field service.*—The field service was abolished effective September 15, 1953.

7. *Administration.*

PROGRAM AND PERFORMANCE

Public Law 875 (approved September 30, 1950) provides for a coordinated effort by the Federal Government in assisting States and political subdivisions affected by major disasters when the States and local public bodies are unable to cope with the situation.

The administration of this program is a responsibility of the Federal Civil Defense Administration pursuant to Executive Order 10427, January 16, 1953. This assignment serves to coordinate disaster operations of the

[EMERGENCY FUND FOR INTERNATIONAL AFFAIRS]

Emergency Fund for International Affairs, Executive

[For expenses necessary to enable the President to take such measures as he deems appropriate to meet extraordinary or unusual circumstances arising in the international affairs of the Government, $5,000,000, to remain available until expended, for use in the President's discretion and without regard to such provisions of law as he may specify: *Provided*, That the President shall transmit to the Committees on Appropriations of the Senate and of the House of Representatives, not less often than quarterly, a full report of expenditures under this appropriation.] (*Supplemental Appropriation Act, 1955.*)

Appropriated 1955, **$5,000,000**

AMOUNTS AVAILABLE FOR OBLIGATION

Appropriation or estimate (obligations incurred)—1955, $5,000,000.

OBLIGATIONS BY ACTIVITIES

Participation in international trade fairs, cultural and artistic activities—1955, $5,000,000.

PROGRAM AND PERFORMANCE

This appropriation is made to the President. The purpose of this fund is to extend United States participation in international trade fairs and expositions and to demonstrate to peoples of other countries our accomplishments in the cultural field, both through direct Government activities and by means of assistance and encouragement to private groups, in order to portray the excellence of our free enterprise system as reflected in our products and our cultural values.

MUTUAL SECURITY

INTRODUCTORY STATEMENT

The mutual security program embodies military, economic, and technical assistance to allied countries of the free world. For 3 prior years, the program was conducted under authority of the Mutual Security Act of 1951, as amended. Grants and loans by the United States in furtherance of this program take three principal forms:

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

MUTUAL SECURITY—Continued

(*a*) *Military assistance* including equipment produced in the United States and abroad, and training for foreign military personnel to assure effective use of materiel furnished; (*b*) *Direct forces support* in the form of specific supplies, equipment, or services to directly assist military forces; (*c*) *Other mutual security programs* including general economic support to enable certain countries to maintain defense forces, assistance in promoting economic development, technical assistance for the less developed areas of the world, and contributions to the United Nations and other international agencies for mutual security programs of a multilateral nature. Of the funds appropriated in fiscal years 1954 and 1955 about $595 million is being used to furnish surplus agricultural commodities. Local currency proceeds from the sale of these commodities by the recipient countries will be used in turn for the various purposes of the mutual security program.

Fiscal year 1954 obligations have neither been certified under section 1311, Public Law 663, nor reviewed by the agencies and the Bureau of the Budget under section 110, Public Law 778. Therefore, entries for obligations incurred and unobligated balances, estimated savings, in the fiscal year 1954 columns are subject to revision.

[For expenses necessary to enable the President to carry out the provisions of the Mutual Security Act of 1954, Public Law 665, approved August 26, 1954, as follows:]

MILITARY ASSISTANCE

Military Assistance, General, Executive
Military Assistance, Infrastructure, Executive
Military Assistance, Europe, Executive
Military Assistance, Near East and Africa, Executive
Military Aid, Near East and Africa, Executive
Military and Other Assistance, Asia and Pacific, Executive
Military Assistance, American Republics, Executive
Mutual Special Weapons Planning, Executive

[Military assistance: For military assistance as authorized by title I, chapter 1, $1,192,700,000 plus unobligated balances, as follows: For general military assistance authorized by section 103, $1,092,700,000 plus not to exceed $2,383,512,729 of unobligated balances; for infrastructure authorized by section 104 (a), $100,000,000, plus not to exceed $39,000,000 of unobligated balances: *Provided*, That such unobligated balances shall be derived from balances of appropriations heretofore made for military assistance (Europe; Near East and Africa; Asia and the Pacific; American Republics; and mutual special weapons planning): *Provided further*, That not to exceed $23,250,000 of such funds shall be available for administrative expenses to carry out the purposes of title I, chapter 1 until June 30, 1955: *Provided further*, That the military supplies and equipment (or the equivalent value thereof as the Secretary of Defense shall determine but not to exceed $200,000,000 in inventory value) which have been procured and processed for delivery to foreign areas and which subsequently are returned to the custody of the United States because of a change in the international situation, shall remain available for military assistance authorized by law, and such amounts shall be in addition to the amounts herein otherwise provided for: *Provided further*, That this limitation on military supplies and equipment shall not apply to capital ships for which title has passed but which have been reclaimed by the Navy Department;] (*Mutual Security Appropriation Act, 1955.*)

PROGRAM AND PERFORMANCE

The major activities of the military assistance program are (1) the provision of materiel for the military forces of allied nations; (2) the training of their military personnel to utilize such materiel; (3) contributions to joint financing of certain international military facilities and activities, especially in the NATO area; and (4) the operation and administrative costs of the program.

For the allied nations which have assumed military responsibilities in mutual defense projects important to the United States, there has been programmed: (*a*) materiel to complete the equipping of 183⅓ divisions, 11 regimental combat teams, and related combat and logistic support units; (*b*) 278 air squadrons; and (*c*) 551 combatant naval vessels, and 182 shore-based maritime naval aircraft. These items are valued at $17,011 million, including the value of excess United States military equipment not charged to military assistance appropriations. To date approximately 59 percent of this amount has been shipped. To assure the optimum use of this materiel, 48,000 members of the forces of these friendly nations have been trained under this program. Sufficient materiel to comply with section 105 (b) (1) of the Mutual Security Act of 1954 will be held in United States custody, pending clarification of the mutual defense arrangements resulting from the 9-power and 4-power treaties.

In accordance with the Mutual Security Appropriation Act, 1955, procedures for financing military assistance activities are being revised. Under the revised procedures equipment on order or to be ordered for military assistance (with the exception of items procured offshore, shipbuilding, and certain items peculiar to this program) is financed from procurement funds of the military services. At the time these orders are placed, funds are reserved in the military assistance account for future reimbursement to the procurement accounts of the military services. Obligations are recorded in the military assistance accounts and payments are made to the procurement accounts upon completion of deliveries.

An effect of these new procedures is to reduce the amount of obligations and expenditures shown in the military assistance schedules for fiscal year 1955. The obligations shown are net of more than $2 billion of these deobligations because of contracts transferred from military assistance accounts to procurement accounts of the military services. Expenditures in 1955 will be substantially lower than the value of aid furnished because equipment will be delivered which was paid for in previous years.

Appropriations available for military assistance through fiscal year 1955 have been earmarked for the following activities (all figures are cumulative from the enactment of the Mutual Defense Assistance Act, October 1949):

	Millions
Department of Defense activities:	
Materiel	$16,581
Supply and shipping of materiel	684
Training of military personnel	407
Development of weapons of advanced design	46
Contributions to internationally financed NATO activities	502
Administration	113
Special projects	95
Subtotal	18,428
Other activities:	
Purchase of surplus agricultural commodities	263
Other aid programs	822
Total	19,513

3. Defense manufacturing	170,000,000	35,000,000	
Total obligations	975,581,598	793,500,000	

PROGRAM AND PERFORMANCE

This program provides additional direct support to the military establishments of certain countries receiving end-items under the military assistance program. This direct support may include civilian type common-use items such as clothing, rations, petroleum products, and medical supplies that can be used by the military; or, it may finance the manufacture of military end-items such as military aircraft in the United Kingdom. A third type may provide the direct financial support of military forces themselves as in Vietnam, Laos, and Cambodia. In all cases, the purpose of direct forces support is the sustenance of military forces important to the mutual defense of the free world. In fiscal year 1954 most of this program was devoted to the support of the military effort in Vietnam, Laos, and Cambodia.

Total obligations	1,187,605,170	1,015,007,961	

PROGRAM AND PERFORMANCE

1. *Defense support.*—These programs provide the supplemental resources required in certain countries to carry on a defense program of the size regarded as necessary for mutual defense. The primary purpose of defense support is the attainment of military objectives rather than the economic benefits which may incidentally accrue to the recipient nation. Defense support contributes to this objective indirectly by providing the economic resources which enable the recipient country to maintain the defense forces it would be unable to support without United States assistance or increasing its capacity to do so in the future.

2. *Development assistance.*—This assistance is given to promote economic development and to create and maintain economic and political stability. Development assistance may provide supplies, commodities, or funds for expanding demonstration of technical cooperation projects throughout a country. The projects or activities aided are those in which the United States and the recipient country share a mutual interest.

3. *Technical cooperation.*—This program provides for the interchange of technical knowledge, experience, techniques, and skills with the people of the less-developed areas of the world to help them further their economic development and increase their standards of living. Teaching, training, and the exchange of information are emphasized and only the supplies and equipment required for effective teaching and demonstration are included. Besides bilateral programs between the United States and other nations, the United States contributes to the multilaterally financed technical assistance program of the Organization of American States and the United Nations expanded technical assistance program. The bilateral programs are coordinated with these multilateral programs to prevent duplication of effort.

4. *Nonregional programs*—(*a*) *Movement of migrants.*—Contributions to the intergovernmental committee for European migration facilitate the movement of surplus populations from countries in Western Europe to countries affording resettlement opportunities elsewhere. The committee plans the movement of approximately 119,000 European migrants in calendar year 1954 and 143,000 migrants in 1955.

(*b*) *Children's welfare.*—The United States contributes to the United Nations children's fund which assists underdeveloped countries in developing long-range children's health and welfare programs.

Federal Reserve Bank of St. Louis

(c) *Refugees from Palestine.*—Contributions to the Palestine refugee agency help conduct relief and resettlement operations for refugees from Palestine. Since May 1950, subsistence rations for over 870,000 refugees have been provided, serious outbreaks of epidemic diseases prevented, large development projects leading toward refugee employment surveyed, a primary school program for refugee children supported, and technical training provided.

(d) *NATO civilian headquarters.*—The contribution to this international organization represents the United States share of financing the international staff serving the North Atlantic council.

(e) *Ocean freight charges.*—Voluntary nonprofit relief agencies are reimbursed for ocean freight charges on supplies shipped to countries which have concluded relief agreements.

(f) *Control act expenses.*—The Foreign Operations Administration coordinates a program to deter exports of strategic materials from friendly countries to potential or actual aggressor nations.

(g) *Strategic materials.*—This program, which assisted friendly nations in developing sources of strategic materials, is in process of liquidation. No funds were appropriated for 1955.

(h) *Escapees.*—Supplementary care and maintenance is provided for certain refugees from behind the Iron Curtain and assistance is rendered for their permanent resettlement.

(i) *Special programs.*—Special grant projects and items of an emergency relief nature are required from time to time for humanitarian purposes or in the interest of the United States.

5. *Administration.*—Administrative expenses are provided for all mutual security programs other than those administered by the Department of Defense.

[Funds appropriated under each paragraph of this Act (other than appropriations under the head of military assistance), including specified amounts of unobligated balances, and amounts certified pursuant to section 1311 of the Supplemental Appropriation Act, 1955, as having been obligated against appropriations heretofore made for the same general purpose as such paragraphs, which amounts are hereby continued available during fiscal year 1955, may be consolidated in one account for each paragraph: *Provided*, That any apparent recorded obligation outstanding on June 30, 1954, against any such appropriations which is not eligible for certification under the terms of section 1311 of the Supplemental Appropriation Act, 1955, may be corrected and certified under section 1311 as an obligation if approved by the Director of the Foreign Operations Administration and the Director of the Budget not later than February 1, 1955.]

[GENERAL PROVISIONS]

[SEC. 102. Appropriations in this Act for the purposes of chapters 2 and 3 of title I and titles II, III, and IV of the Mutual Security Act of 1954, and allocations to the Foreign Operations Administration, from any other appropriations shall be available for rents in the District of Columbia; expenses of attendance at meetings concerned with the purposes of such appropriations, including (notwithstanding the provision of section 9 of the Act of March 4, 1909 (31 U. S. C. 673)), expenses in connection with meetings of persons whose employment is authorized by section 530 of the Mutual Security Act of 1954; employment of aliens, by contract, for services abroad; maintenance, operation, and hire of aircraft; hire of passenger motor vehicles and, in addition, passenger motor vehicles abroad may be exchanged or sold and replaced by an equal number of such vehicles and the cost, including the exchange allowance, of each such replacement shall not exceed $3,000 in the case of an automobile for the chief of any special mission or staff abroad established under section 526, and $1,400 in the case of all other such passenger vehicles except station wagons; transportation of privately owned automobiles; entertainment within the United States (not to exceed $15,000); exchange of funds without regard to section 3651 of the Revised Statutes (31 U. S. C. 543); loss by exchange; expenditures (not to exceed $50,000) of a confidential character other than entertainment, provided that a certificate of the amount of each such expenditure, the nature of which it is considered inadvisable to specify, shall be made by the Director or Deputy Director of the Foreign Operations Administration, and every such certificate shall be deemed a sufficient voucher for the amount therein specified; insurance of official motor vehicles in foreign countries: rental of quarters outside the continental limits of the United States to house employees of the United States Government (without regard to section 322 of the Act of June 30, 1932, as amended (40 U. S. C. 278a)), lease, necessary repairs and alterations to quarters; actual expenses of preparing and transporting to their former homes in the United States or elsewhere the remains of persons or members of the families of persons who may die while such persons are away from their homes participating in activities under the Mutual Security Act of 1954 or other Act administered by the Foreign Operations Administration; purchase of uniforms; employment of chauffeurs for passenger carrying vehicles abroad notwithstanding the provisions of any other law; medical examinations of dependents of overseas personnel or candidates for overseas positions on the same basis as for employees or candidates; payment of per diem in lieu of subsistence to persons participating in any program of furnishing technical information and assistance, while in countries other than their own and other than the continental United States, at rates not in excess of those prescribed by the Standardized Government Travel Regulations, notwithstanding section 107 of the Department of State Appropriation Act, 1955; expenses authorized by the Foreign Service Act of 1946, as amended (22 U. S. C. 801–1158), not otherwise provided for; ice and drinking water for use abroad; and services of commissioned officers of the Public Health Service and of the Coast and Geodetic Survey, and for the purposes of providing such services the Public Health Service may appoint not to exceed twenty officers in the Regular Corps to grades above that of senior assistant, but not above that of director, as otherwise authorized in accordance with section 711 of the Act of July 1, 1944, as amended (42 U. S. C. 211a), and the Coast and Geodetic Survey may appoint for such purposes not to exceed twenty commissioned officers in addition to those otherwise authorized: *Provided*, That no part of the administrative expenses shall be used to pay the salary of any civilian employee at a rate greater than that paid by the State Department for comparable work or services in the same area: *Provided further*, That none of the funds provided herein shall be used to pay any employee a basic salary of $12,000 or more per annum, except that this prohibition shall not apply to two-thirds of the number of employees being paid at the basic salary of $12,000 or more per annum on June 30, 1953, and except that this prohibition shall not apply to employees receiving salaries in excess of $12,000 as the result of general pay raise legislation enacted during the fiscal year 1955, nor to not to exceed six employees assigned to the administration or implementation of the program authorized by section 132 of the Mutual Security Act of 1954: *Provided further*, That appropriations made under this Act shall be available for expenses in connection with travel of personnel outside the continental United States, including travel of dependents and transportation of personal effects, household goods, or automobiles of such personnel when any part of such travel or transportation begins in the current fiscal year pursuant to travel orders issued in that fiscal year, notwithstanding the fact that such travel or transportation may not be completed during the current fiscal year, and cost of transporting to and from a place of storage, and the cost of storing, the furniture and household and personal effects of an employee of the Foreign Operations Administration who is assigned to a post at which he is unable to use his furniture and effects, under such regulations as the Director of the Foreign Operations Administration may prescribe: *Provided further*, That no part of any appropriation contained in this Act shall be available for expense of transportation, packing, crating, temporary storage, drayage, and unpacking of household goods and personal effects in excess of an average of five thousand pounds net but not exceeding nine thousand pounds net in any one shipment, but the limitations imposed herein shall not be applicable in the case of employees transferred to or serving in stations outside the continental United States under orders relieving them from a duty station within the United States prior to August 1, 1953.]

[SEC. 103. Payments made from funds appropriated herein for engineering fees and services to any individual engineering firm on any one project in excess of $25,000 shall be reported to the Committees on Appropriations of the Senate and House of Representatives at least twice annually.]

[SEC. 104. Pursuant to section 1415 of the Supplemental Appropriation Act, 1953, and in addition to other amounts made available pursuant to said section, not to exceed the equivalent of $25,000,000 of foreign currencies or credits owed to or owned by the United States shall remain available until expended, without reimbursement to the Treasury, for liquidation of obligations incurred against such currencies or credits prior to July 1, 1953, pursuant to authority contained in the Mutual Security Act of 1951, as amended, and Acts for which funds were authorized by that Act and hereafter, foreign currencies generated under the provisions of this Act shall be utilized only for the purposes for which the funds providing the commodities which generated the currency were appropriated (except as specifically provided in section 109 of this Act): *Provided*, That the proviso in section 502 (b) of the Mutual Security Act of 1954 is amended as follows: (1) Strike out "Committee on Rules and Administration of the Senate" and insert "Committee on Appropriations of the Senate".]

[SEC. 105. None of the funds provided by this Act nor any of the counterpart funds generated as a result of assistance under this or any other Act shall be used to make payments on account of the principal or interest on any debt of any foreign government or on any loan made to such government by any other foreign government; nor shall any of these funds be expended for any purpose for which funds have been withdrawn by any recipient country to make payment on such debts: *Provided*, That none of the funds herein appropriated shall be used to make up any deficit to the European Payments Union for any nation of which a dependent area fails to comply with any treaty to which the United States and such dependent area are parties and said failure to comply has been adjudicated adversely to said nation in any court of competent jurisdiction nor shall any of the counterpart funds generated as a result of assistance under this Act be made available to such nation.]

[SEC. 106. The Director shall, in providing for the procurement of commodities under authority of this Act, take such steps as may be necessary to assure, so far as is practicable, that at least 50 per centum of the gross tonnage of commodities, procured within the United States out of funds made available under this Act and transported abroad on ocean vessels, is so transported on United States flag vessels to the extent such vessels are available at market rates.]

[SEC. 107. Funds made available pursuant to this Act may not be used for the procurement of equipment or materials outside the United States unless the President or an official of Cabinet rank

Federal Reserve Bank of St. Louis

MUTUAL SECURITY—Continued

designated by him determines that such procurement will not result in one or more of the following conditions:]

[(1) Adverse effects upon the economy of the United States, with special reference to any areas of labor surplus, or upon the industrial mobilization base, which outweigh the strategic and logistic advantages to the United States of procurement abroad;]

[(2) Production of such equipment or materials outside the United States under inadequate safeguards against sabotage or the release to potential enemies of information detrimental to the security of the United States;]

[(3) Unjustifiable cost in comparison with procurement in the United States; and]

[(4) Delays in delivery incompatible with United States defense objectives.]

[SEC. 108. Not more than 25 per centum of any funds made available by this Act shall be obligated during the last two months of the fiscal year.]

[SEC. 109. $55,000,000 of the unobligated balances continued available under this Act shall be available only for the procurement and sale, in accordance with provisions of section 402 of the Mutual Security Act of 1954, of surplus agricultural commodities as assistance to Spain during the current fiscal year: *Provided*, That 80 per centum of the foreign currencies generated hereunder shall be used to strengthen and improve the civilian economy of Spain, the balance to be available for use of the United States: *Provided, however*, That this provision shall not be construed as a precedent or as an abrogation of any agreement heretofore entered into.]

[SEC. 110. Funds heretofore or hereafter allocated to the Department of Defense from any appropriation for military assistance (except funds obligated directly against any such appropriation for offshore procurement or other purposes) shall be accounted for by geographic area and by country solely on the basis of the value of materials delivered and services performed (such value to be determined in accordance with the applicable provisions of law governing the administration of military assistance). Within the limits of amounts available from funds so allocated, the Department of Defense is authorized to incur, in applicable appropriations, obligations in anticipation of reimbursement from such allocations, and no funds so allocated and available shall be withdrawn by administrative action until the Secretary of Defense shall certify that they are not required for liquidation of obligations so incurred. Unobligated amounts of such allocations equal to the value of orders placed with the military departments against such allocations during the current fiscal year shall be reserved and shall remain available until June 30, 1957, for making such reimbursements (except in case of funds obligated directly against such allocations) only upon the basis of materials delivered and services rendered: *Provided*, That reports of items to be delivered against funds reserved as provided herein shall be furnished quarterly by the Secretary of Defense to the Committees on Appropriations of the Senate and the House of Representatives and, not less often than once each quarter beginning with the period ending December 31, 1954, said Secretary shall make a detailed report to the Committees on Appropriations of the Senate and the House of Representatives, on a delivery or service-rendered basis, on all military assistance funds allocated and available to the Department of Defense as of the end of the preceding quarter: *Provided further*, That no reimbursements for materials or services shall be made after June 30, 1955, until the value of materials delivered and services performed shall equal the amount of expenditures made from all appropriations herein and heretofore made for military assistance as of said date: *Provided further*, That in the event the President shall determine that supplies and equipment ordered against funds so allocated are required for the defense of the United States, the amount allocated for supplies and materials required for such purpose shall be returned to the appropriation from which allocated: *Provided further*, That funds appropriated in this Act for military assistance (including specified amounts of unobligated balances), and amounts certified pursuant to section 1311 of the Supplemental Appropriation Act, 1955, as having been obligated against appropriations heretofore made for such purposes, shall be maintained in one account which shall be used for all transactions involving military assistance during the current fiscal year, and no expenditures shall be made from such account except as may be within the limits of the sum of the amounts mentioned in this proviso: *Provided further*, That any apparent recorded obligation exceeding $5,000,000, outstanding on June 30, 1954, which is not eligible for certification under the terms of section 1311 of the Supplemental Appropriation Act, 1955, may be corrected and certified under section 1311 as an obligation if approved by the Secretary of Defense and the Director of the Budget not later than February 1, 1955: *Provided further*, That nothing in this Act shall be construed as making any appropriation or fund available for obligation after June 30, 1955, except as may be necessary for reimbursements authorized herein or as authorized by the Mutual Security Act of 1954.]

[SEC. 111. The appropriations, authorizations, and authority with respect thereto in this Act shall be available from July 1, 1954, for the purposes provided in such appropriations, authorizations, and authority. All obligations incurred during the period between June 30, 1954, and the date of enactment of this Act in anticipation of such appropriations, authorizations, and authority are hereby ratified and confirmed if in accordance with the terms hereof and the terms of Public Law 475, Eighty-third Congress.]

[SEC. 112. Not to exceed $30,000 of the funds appropriated in this Act shall be used to carry out the purposes of section 416 of the Mutual Security Act of 1954.]

[SEC. 113. No part of any appropriation contained in this Act shall be used to pay the salary or wages of any person who engages in a strike against the Government of the United States or who is a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or who advocates, or is a member of an organization that advocates, the overthrow of the Government of the United States by force or violence: *Provided*, That for the purposes hereof an affidavit shall be considered prima facie evidence that the person making the affidavit has not contrary to the provisions of this paragraph engaged in a strike against the Government of the United States, is not a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or that such person does not advocate, and is not a member of an organization that advocates, the overthrow of the Government of the United States by force or violence: *Provided further*, That any person who engages in a strike against the Government of the United States or who is a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or who advocates, or who is a member of an organization that advocates, the overthrow of the Government of the United States by force or violence and accepts employment the salary or wages for which are paid from any appropriation or fund contained in this or any other Act shall be guilty of a felony and, upon conviction, shall be fined not more than $1,000 or imprisoned for not more than one year, or both: *Provided further*, That the above penalty clause shall be in addition to, and not in substitution for, any other provisions of existing law.] (*68 Stat. 832–864, 1219–1226; Mutual Security Appropriation Act, 1955.*)

REFUGEE RELIEF

Refugee Relief, Executive

For expenses necessary to enable the President, by transfer to such officer or agency of the Government as may be appropriate, to carry out the provisions of the Refugee Relief Act of 1953 (Public Law 203, approved August 7, 1953), including services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a), at rates not in excess of $50 per diem for individuals; printing and binding outside the continental United States without regard to section 11 of the Act of March 1, 1919 (44 U. S. C. 111); hire of passenger motor vehicles; expenses of attendance at meetings concerned with the purpose of this appropriation; not to exceed [$150,000] *$89,000* for expenses of a confidential nature, to be accounted for solely on the certificate of the officer to whom funds are transferred by the President from this appropriation; and not to exceed [$600,000] *$2,000,000* for capital for the making of loans; [$8,000,000] *$16,000,000*: *Provided*, That funds appropriated herein shall be available in accordance with authority granted hereunder or under authority governing the activities of the Government agencies to which such funds are allocated. (*Refugee Relief Act of 1953 as amended (Public Law 751, approved Aug. 31, 1954); 50 U. S. C. app., Supplemental Appropriation Act, 1955.*)

PROGRAM AND PERFORMANCE

Under the provisions of the Refugee Relief Act of 1953, a maximum of 209,000 persons in specified areas of Europe, the Near East, and the Far East may be granted special nonquota immigrant visas up to December 31, 1956, for resettlement in the United States. It is the aim to achieve this immigration in a manner consistent with resettlement opportunities existing in the United States, particularly with regard to employment and housing. While only about one-third of the 15,000 visas planned for the first year's operation were issued, sufficient progress has been made in the steps taken by the Government to carry out the program and in the steps taken by private agencies to cooperate with the Government, to justify the expectation that the program will be completed before the termination date of the act. A recent amendment, Public Law 751 (approved Aug. 31, 1954), increases the number of visas which may be used by applicants who have relatives in the United States from 19,000 to a maximum of 94,000. This amendment, because of relative sponsorship, will facilitate both the investigations and the issuance of visas to as many as 36 percent of the applicants who may receive visas under the act. In addition, progress is being made in meeting requirements of the act, such as the agreement by participating countries to take back persons who may have received visas through fraud and the agreement by sponsors to furnish employment, housing, etc., to aliens applying under the act.

Present plans call for the issuance of approximately 47,000 visas in the current fiscal year, 130,000 in fiscal year 1956 and 26,500 in fiscal year 1957 before the act terminates on December 31, 1956. To accomplish this, $1,600,000 in supplemental funds will be required for the current fiscal year, and $16,000,000 for fiscal year 1956.

Six of the major departments of the Government are involved in this program and perform functions related to their regular activities. The operations of each of the agencies are geared to the estimated number of visas to be issued.

1. *Investigation and visa issuance.*—The Department of State conducts investigations of each applicant's character, and eligibility under the act. These investigations are conducted by the State Department in countries other than Germany and Austria where the United States Army performs the function. Determination of eligibility under the immigration laws and issuance of visas is also performed by the State Department.

2. *Administration of loans.*—The Treasury Department makes loans to public or private agencies to finance the transportation of immigrants under the program from ports of entry to places of resettlement in the United States.

3. *Investigations in Germany and Austria.*—Investigations in Germany and Austria are conducted by the counter-intelligence corps, Department of the Army.

4. *Medical examinations.*—The Public Health Service gives health screening examinations overseas to all applicants considered for visas.

REFUGEE RELIEF—Continued

Refugee Relief, Executive—Continued

5. *Immigration inspection.*—The Immigration and Naturalization Service participates abroad in the determination of eligibility and admissability of applicants to receive visas.

6. *Occupational selection.*—The Department of Labor assists in the verification of the occupation skills of applicants and their suitability for the assured employment. It also verifies job assurances filed with the administrator of the act.

BUSINESS-TYPE STATEMENTS

PROGRAM AND PERFORMANCE

Under section 304 (b) of the Defense Production Act of 1950, designated agencies are authorized, with Presidential approval, to incur obligations of $2.1 billion largely for the purpose of making loans and procuring critical materials in furtherance of the defense effort. The obligations are financed by borrowing from the Treasury. The 1951 amendments to the act permit commitments in excess of $2.1 billion so long as estimated costs do not exceed this amount. Programs undertaken must be certified as essential to national defense by the Office of Defense Mobilization. As of June 30, 1954, that Office had authorized programs having a gross value of $8,101,000,000 which required the following allocations of borrowing

PUBLIC ENTERPRISE FUNDS—Continued

EXPANSION OF DEFENSE PRODUCTION—Continued

Expansion of Defense Production—Continued

authority to cover working capital requirements and the estimated net costs to the Government:

General Services Administration	$1,156,499,000
Treasury Department	212,445,000
Department of Agriculture	48,000,000
Department of the Interior	19,561,000
Export-Import Bank	43,810,000
Total certifications	1,480,315,000
Unused authorizations	619,685,000
Total	2,100,000,000

Programs now under study may require new certifications in 1955, having a gross value of over $1 billion and a probable ultimate net cost to the Government of about $200 million. These will be primarily for continued expansion of production of critical materials such as nickel, titanium, and manganese.

Since the act expires on June 30, 1955, the financial statements which follow do not reflect any transactions resulting from programs expected to be certified during fiscal year 1956. However, the budget assumes extension of the Defense Production Act and tentative plans for 1956 call for further expansion of production of nickel, titanium, and a few other materials. Gross value of 1956 certifications are estimated at $600 million with an ultimate net cost to the Government of $75 million. Expenditures for these new programs are shown in a separate schedule at the end of this chapter.

General Services Administration.—Borrowing authority of $1,156,499,000 had been certified as of June 30, 1954, to finance the expansion of productive capacity for strategic metals and minerals and other materials. This amount includes $50 million for working capital and $1,106,499,000 for probable ultimate net cost of specific programs of which $75,600,000 is for the machine tool pool order and equipment installation programs and $1,030,899,000 for mineral and metal programs.

In addition, the agency certifies direct loans to be made by Treasury or Export-Import Bank and participates in determinations with respect to accelerated tax amortization certificates; and has been delegated responsibility for the basic materials development program previously carried on by the Mutual Security Agency, and its successor, the Foreign Operations Administration, in certain countries of Europe, the Near East, and Africa.

One of the major programs financed from this fund involves expansion of nickel production in Cuba. The Cuban Nickel Co. was incorporated in Cuba in 1942 to hold title to and act as custodian of the Government's investment in nickel processing operations in Cuba. The original investment of the U. S. Government was made by the Reconstruction Finance Corporation during World War II, after which the Government's investment was transferred to the General Services Administration. As of June 30, 1954, the net investment in the plant, excluding reactivation and plant expansion costs, was $32,760,031.

Shortly after the start of the Korean emergency, the plant was reactivated at a cost of $11,014,062, of which $10,341,035 was financed from funds appropriated for the strategic and critical materials program and $673,027 from the borrowing authority provided in the Defense Production Act. After the plant resumed operations, the Office of Defense Mobilization authorized additional changes in the plant which required an investment of $9,391,008. More recently, after clearance with the Joint Committee on Defense Production, the Office of Defense Mobilization authorized an expansion in plant capacity of about 75 percent at an estimated cost of $42 million. These later authorizations by the Office of Defense Mobilization are being financed from the borrowing authority provided in the Defense Production Act and the resultant expenditures are reflected in the financial statements which follow under the caption "Minerals and metals program."

The activities of the Cuban Nickel Co., are, at present, confined to performance of such acts as are required of it by Cuban law as proprietor of physical assets in Cuba, and limited maintenance of the plant.

Department of Agriculture.—The purchase and resale of agriculture commodities, except forest products, are carried out by the Commodity Credit Corporation, which is reimbursed from this fund for the net costs involved. During fiscal year 1954, the program to increase supplies of castor beans was continued. The Corporation has continued the management of inventories of castor beans and oil, American-Egyptian cotton and cottonseed, kenaf seed and fiber, linseed oil, and tung oil acquired under programs initiated in prior years. It is anticipated that all inventories, except castor beans, will be disposed of before the end of fiscal year 1955, and that castor beans will be sold during the fiscal year 1956. Net realized losses on purchase and resale operations amounted to $15,751,726 during fiscal year 1954 and are estimated at $41,383,707 and $1,334,381 during fiscal years 1955 and 1956, respectively, including interest costs of borrowings from the U. S. Treasury. In addition, the Secretary of Agriculture may recommend to the Office of Defense Mobilization the certification of loans for increasing plant capacity to process or store agriculture commodities. An allocation of $4 million was made to the Reconstruction Finance Corporation for making such loans, and the functions of the RFC relating to these loans were transferred to the Treasury Department by Executive Order No. 10489.

Department of the Interior.—Operations within the Department of the Interior with regard to the expansion of defense production have been limited to the encouragement of exploration for strategic and critical minerals and metals. From the beginning of the program through July 31, 1954, the Defense Minerals Exploration Administration had entered into 655 contracts, in which the Government's share of estimated costs amounted to $19,453,483, as against a total estimated cost of $31,934,981.

The Administration had also certified, as of the end of July 1954, 136 discoveries on projects involving contract amounts of $6,039,869, of which the Government's share is $3,723,434. Reports received through July 31, 1954, indicate that a total of $2,923,688 of Government funds had been spent on these certified projects. If production takes place on these projects within a 10-year period, some part, at least, of the Government funds advanced will be repaid according to a royalty arrangement.

Treasury Department.—The function of making loans under authority of the Defense Production Act was transferred from the Reconstruction Finance Corporation to the Secretary of the Treasury by Executive Order No. 10489, dated September 26, 1953. Loan applications are considered only upon receipt of certificates of essentiality from the Office of Defense Mobilization or the General Services Administration. Net loan certifications were

Federal Reserve Bank of St. Louis

$290,713,000 on June 30, 1954, against which $149,500,000 had actually been borrowed from the Treasury.

During fiscal year 1954, one loan for $5,906,398 was authorized under this authority. On June 30, 1954, there was outstanding $151,157,084 in 125 loans for expansion of defense production. In addition, there was $98,648,723 in undisbursed commitments, of which $14,912,253 represented commitments on loans in participation with banks wherein disbursement of Treasury funds is deferred.

Disbursements on commitments outstanding as of June 30, 1954, are estimated to be $47,436,740 in fiscal year 1955, and $36,100,000 in fiscal year 1956.

Loans made are being disposed of to private financial institutions and investors wherever possible. During fiscal year 1954, a total of $35,028,275 was realized from sales and repayments of loan obligations. Receipts from these sources are estimated as $11,793,000 and $106,200,000 for fiscal years 1955 and 1956, respectively.

Export-Import Bank.—Pursuant to section 311 of Executive Order No. 10480 of August 14, 1953, the Export-Import Bank, is responsible for making and administering loans under section 302 of the Defense Production Act where the expansion, development, or production so financed is carried on in foreign countries. Loans are financed from the borrowing authority and are made upon receipt of certificates of essentiality issued by the Director of Defense Mobilization or the General Services Administrator.

No certificates were received and no new loans were authorized during fiscal 1954. During the year the bank administered the six active credits previously authorized.

risks. These risks are (1) inconvertibility of local currency receipts from an investment and (2) loss of investment resulting from expropriation or confiscation. The insurance, which may have a maximum term of 20 years, is available for United States investments in any country with which the United States has agreed to institute the guaranty program. Premiums up to 1 percent for the first type of risk and up to 4 percent for the second type are authorized.

When payment is made pursuant to a guaranty, the currency, property, or claims on account of which such payment is made becomes the property of the United States.

STATUS OF GUARANTIES OUTSTANDING BY TYPES

	1954 actual	*1955 estimate*	*1956 estimate*
Industrial	$33,147,585	$75,000,000	$100,000,000
Informational media	4,441,261	7,000,000	9,000,000
Total outstanding	37,588,846	82,000,000	109,000,000

Industrial guaranties.—As of June 30, 1954, a total of $47,601,462 investment guaranties had been issued since the inception of the program in 1948, of which $33,147,585 were outstanding. Of this total amount issued, $45,016,859 were against risks of inconvertibility and $2,584,603 were against the risk of loss by expropriation.

From the inception of the guaranty program until June 30, 1954, no disbursements had been made under any of these investment guaranties and a total of $1,044,961 in fees had been collected.

Informational media guaranties.—Public Law 665 (approved Aug. 26, 1954) authorizes the Director of the United States Information Agency to make guaranties of investments abroad in enterprises producing or distributing informational media consistent with the national interests of the United States. This section provides that the amount of such guaranties in any fiscal year may not exceed $10,000,000. As of June 30, 1954, a total of $24,303,477 informational media guaranties had been issued since the start of this program, of which $4,441,261 were outstanding. Fees totaling $336,885 had been collected and disbursements of $13,991,037 had been made.

PROPOSED FOR LATER TRANSMISSION

Refugee relief, Executive (under existing legislation, 1955).—To allow the program of screening and selecting refugees for admission into the United States to be completed as scheduled by law, a supplemental appropriation of $1,600,000 for 1955 is proposed.

AMOUNTS AVAILABLE FOR OBLIGATION AND ANALYSIS OF EXPENDITURES

	1954 actual	1955 estimate	1956 estimate
Proposed supplemetal appropriation		$1, 600, 000	
Obligated balance brought forward			$600, 000
Obligated balance carried forward		−600, 000	
Total expenditures		1, 000, 000	600, 000
Expenditures are distributed as follows:			
Out of current authorizations		1, 000, 000	
Out of prior authorizations			600, 000

Expansion of defense production (under proposed legislation, 1956).—The budget assumes extension of title III of the Defense Production Act beyond the present expiration date of June 30, 1955. Section 304 (b) of the act includes authorization to expend from public debt receipts in the amount of $2.1 billion of which $537,972,000 is expected to be available for new contracting during fiscal year 1956. Present forecasts indicate a need for continued expansion of the production of titanium, nickel, and a few other critical materials. Such expansion is expected to result in new contracts having an estimated gross value of $600 million and a probable ultimate net cost to the Government of about $75 million. Since the contemplated expansion contracts will be in the nature of long-term commitments, expenditures during 1956 will be relatively small.

AMOUNTS AVAILABLE FOR OBLIGATION AND ANALYSIS OF EXPENDITURES

	1954 actual	1955 estimate	1956 estimate
Unobligated balance transferred from "Expansion of defense production"			$537, 972, 000
Obligated balance of authorization to expend from public debt receipts carried forward			−525, 972, 000
Total expenditures (out of prior authorizations)			12, 000, 000

Military assistance, funds appropriated to the President (under existing and proposed legislation, 1956).—Appropriations in the amount of $1,400,000,000 are required in fiscal year 1956 to finance military assistance programs under legislation to be proposed to the Congress, together with the infrastructure program already authorized.

AMOUNTS AVAILABLE FOR OBLIGATION AND ANALYSIS OF EXPENDITURES

	1954 actual	1955 estimate	1956 estimate
Proposed supplemental appropriation			$1, 400, 000, 000
Obligated balance carried forward			−1,200,000,000
Total expenditures (out of current authorizations)			200, 000, 000

Direct forces support, funds appropriated to the President (under proposed legislation, 1956).—Appropriations in the amount of $630 million will be requested of the Congress to finance programs under legislation to be proposed to the Congress.

AMOUNTS AVAILABLE FOR OBLIGATION AND ANALYSIS OF EXPENDITURES

	1954 actual	1955 estimate	1956 estimate
Proposed supplemental appropriation			$630, 000, 000
Obligated balance carried forward			−530, 000, 000
Total expenditures (out of current authorizations)			100, 000, 000

Other mutual security programs, funds appropriated to the President (under existing and proposed legislation, 1956).—Appropriations in the amount of $1,500,000,000 are required to finance economic, technical, and other assistance programs already authorized or to be authorized for 1956 under legislation to be presented to the Congress.

CURRENT AUTHORIZATIONS

ADVISORY COMMITTEE ON WEATHER CONTROL

[SALARIES AND EXPENSES]

Salaries and Expenses, Advisory Committee on Weather Control

Salaries and expenses: For necessary expenses of the Advisory Committee on Weather Control, established by the Act of August 13, 1953 (67 Stat. 559), including services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a), [$120,000] *$295,000. (Independent Offices Appropriation Act, 1955.)*

Appropriated 1955, **$120,000** Estimate 1956, **$295,000**

AMOUNTS AVAILABLE FOR OBLIGATION

Appropriation or estimate (obligations incurred)—1955, $120,000; 1956, $295,000.

OBLIGATIONS BY ACTIVITIES

Evaluation of experiments in weather modification—1955, $120,000; 1956, $295,000.

PROGRAM AND PERFORMANCE

The committee was established to study and evaluate public and private experiments in weather control. It is proposed to continue statistical evaluation activities and to inaugurate a program of physical evaluation in fiscal year 1956. The committee's final report is due June 30, 1956, and 30 days thereafter it ceases to exist.

PROGRAM AND PERFORMANCE

The Commission procures source materials; manufactures fissionable materials and atomic weapons; conducts research and development aimed at improved weapons, more efficient production of fissionable materials, generation of useful power from atomic energy, and protection of military and civilian personnel against hazards arising from atomic energy operations; disseminates unclassified technical information to encourage scientific and industrial progress; and exercises certain controls over non-Governmental activity in atomic energy development.

The program is administered in the field through 10 major offices. Most of the Commission's activities are carried on in Government-owned facilities by industrial concerns and educational institutions, operating under contracts. Coordination with the armed services is achieved through the Military Liaison Committee of the Department of Defense.

Obligations for operating expenses in 1956 total $1,513,672,000, of which $1,443,793,000 represents 1956 operating costs. The remaining $69,879,000 is for other obligational authority required for changes in inventories, for changes in working capital and obligated balances primarily related to work to be performed subsequent to 1956, and for reimbursable obligations. Operating costs in 1956 are expected to be 21 percent greater than the estimated 1955 costs and 74 percent greater than actual costs for 1954. The upward trend reflects larger-scale procurement of raw materials; continued expansion in the production of feed and fissionable materials and weapons as new facilities come into operation; efforts to develop varied types of atomic weapons; and increases in the development of reactors for industrial power and military uses and in other research.

1. *Source and fissionable materials.*—Uranium ores and concentrates are processed into feed materials (*a*) from which plutonium is produced in the reactors now operating or under construction at Hanford, Wash., and Savannah River, S. C., or (*b*) from which the fissionable isotope, uranium 235, is extracted in plants at Oak Ridge, Tenn., Paducah, Ky., and Portsmouth, Ohio. Foreign sources of uranium will contribute substantial additional tonnages in 1956, and production from domestic sources will continue to expand. New facilities for producing feed and fissionable materials will provide increased output at lower unit processing costs. Work will continue on development of new equipment and processes to increase yields and improve the quality of products.

2. *Weapons.*—This program encompasses the production of weapons; the design, development, and testing of new weapon types; and the storage, maintenance, and custody of stockpiled weapons. Expanded production facilities will be in operation and production of weapons will increase. The number of technical personnel employed at the principal weapon development centers will level off in fiscal year 1956. Weapons tests are planned to be conducted, as development needs may warrant.

3. *Reactor development.*—Increased emphasis is being placed on advancing power reactor technology, in order to assist industry ultimately to achieve large-scale generation of economic electrical energy from atomic reactors. The rate of progress toward this objective will be accelerated in 1956. The most significant domestic development of the past year has been the enactment of the Atomic Energy Act of 1954 and the intensification of private industry's interest and willingness to invest in civilian power reactor development. The foundation on which the national effort rests is the experimental 5-year program of reactor development, predominantly Government-financed and carried out mainly in the Commission's national laboratories. The experimental reactors, including a power breeder, to be constructed as part of this program are not expected to be economic. They will provide technical information needed to design larger and more economical plants, which private industry is expected to design and build. The Commission will cooperate in providing technical information, useful for peaceful applications of atomic energy, to other countries consistent with such international arrangements as may be consummated.

The launching of the atomic-powered submarine U. S. S. *Nautilus* in 1954 will be followed by the launching of the U. S. S. *Sea Wolf* in 1955. New reactor designs are also being developed to propel large naval vessels and military aircraft and to meet military needs for heat and power in remote areas. This research also provides information useful in the development of civilian power reactors.

Work on specific reactor designs constitutes about 85 percent of the scientific and technical effort in reactor development. The remainder covers advanced engineering and development, applicable to many reactor designs, on reactor materials and components, systems for heat transfer, shielding, and chemical processing; operation of the experimental facilities at the National Reactor Testing Station in Idaho; and conduct of schools of reactor technology for scientific and engineering personnel in both Government and industry and from foreign countries.

4. *Physical research.*—This activity comprises theoretical and experimental investigations in physics, chemistry, and metallurgy required to support the Commission's immediate and longer-range objectives for utilizing nuclear energy. Unusual materials are employed in the Commission's activities and their nuclear as well as their chemical and physical properties must be determined. The temperatures and radiation densities at which these materials are used are outside the range of previous experience in industrial technology.

Research is carried on both by Commission laboratories and by some 100 universities and other independent institutes. Several services are provided in support of research

Federal Reserve Bank of St. Louis

ATOMIC ENERGY COMMISSION—Continued

Operating Expenses, Atomic Energy Commission—Continued

activities, including pile irradiation and the distribution of radioisotopes, stable isotopes, and other controlled materials.

5. *Biology and medicine.*—Standards are established to insure that the Commission's activities are conducted with safety to both employees and the public. Research is conducted on such problems as the effects of radiation and certain chemicals (of significance in the Commission's operations) on living things and on the biological phenomena of nuclear explosions. Research includes both investigations on means of minimizing the injurious effects of radioactive materials and on modes of utilizing such substances for human welfare; and broad investigations in fundamental problems of the application of radiobiology to agriculture, animal husbandry, and human medicine. The comprehensive study of tolerance levels of exposure to radioactive contamination continues to be emphasized.

The major portion of the research is carried on at 16 laboratories which are owned by or operated for the Commission and the remainder, approximately 375 projects, is supported in more than 160 universities, colleges, and hospitals. The program includes the operation of 4 cancer research facilities in the United States, and 2 laboratories in Japan for the determination of the effects of atomic bombs on the population.

6. *Community.*—The Commission operates three towns—Oak Ridge, Tenn., Richland, Wash., and Los Alamos, N. Mex.—with an estimated total population in 1956 of 73,500, and provides limited services at other locations. Legislation will be recommended to terminate over a period of time Government ownership and operation of Oak Ridge and Richland, but the estimates are based on the assumption that the Commission will continue to operate these communities through fiscal year 1956. It is estimated that revenues and costs will increase slightly, with revenues exceeding costs in fiscal year 1956 by $2,217,000.

7. *Program direction and administration.*—The costs of general management, technical supervision of program operations, the negotiation and administration of contracts and other related activities performed by Commission personnel represent 2.3 percent of total operating costs in 1956 as compared with 2.8 percent in 1955. The estimate for 1956 reflects a decrease in the number of personnel budgeted at the end of fiscal year 1955 for direction and administration of the atomic energy programs notwithstanding a continued growth in the size of Commission operations.

8. *Security investigations.*—The Atomic Energy Act of 1954 requires background investigations by the Civil Service Commission and the Federal Bureau of Investigation of those persons proposed for access to restricted data of the atomic energy program. The total number of investigative cases to be completed by the two investigative agencies is estimated at 26,500 for 1956, compared with 40,093 for 1955 and 58,618 for 1954.

RELATION OF COSTS TO OBLIGATIONS

Inventories.—Inventories of various kinds including chemicals, electrical, electronic and mechanical supplies, fuels and lubricants, spare parts, special reactor materials, etc., are necessary to carry on the Commission's large-scale production and research programs. New production facilities coming into operation in 1955 and 1956 add to these requirements. The $17,959,000 increase required in 1956 involves $2,413,000 additional for spare parts, and $15,847,000 additional for special reactor materials, partially offset by a decrease of $1,142,000 in current use and other inventories. The year-end balances of inventories from 1953 through 1956 and the changes in inventories are as follows:

	1953 actual	*1954 actual*	*1955 estimate*	*1956 estimate*
Year-end balances	$92,757,528	$88,514,158	$97,076,158	$115,035,158
Changes in inventories		−4,243,370	8,562,000	17,959,000

Working capital and other adjustments.—Changes in working capital and other adjustments are budgeted to reflect the difference between accrued costs, including changes in inventories, and cash expenditures. The credit amounts in 1954 and 1955 represent reductions in fund requirements due to reductions in cash advances to contractors and to increases in accounts payable resulting from the increasing level of costs. The continued decrease in 1956 anticipates a further increase in accounts payable as operating costs continue to rise. The year-end balances of working capital from 1953 through 1956 together with related changes are as follows:

	1953 actual	*1954 actual*	*1955 estimate*	*1956 estimate*
Year-end balances	$13,883,694	−$34,262,410	−$49,447,252	−$60,162,252
Changes in working capital		−48,146,104	−15,184,842	−10,715,000
Other adjustments		1,110,661	4,120,000	4,315,000
Total changes		−47,035,443	−11,064,842	−6,400,000

Obligated balances.—Obligated balances represent the unpaid liabilities of the Commission under contracts and for purchase orders outstanding at the end of the year. Appropriations are required to cover increases in the amount outstanding at the end of any one year over the amount outstanding at the beginning of that year. Prior to 1955, most contracts for the operation of Commission-owned facilities were prefinanced for a full year. In 1955, this advance financing was reduced to 3 months for research facilities and 6 months or less for production facilities. The year-end balances for 1953 through 1956 are as follows:

	1953 actual	*1954 actual*	*1955 estimate*	*1956 estimate*
Year-end balances	$663,152,675	$767,949,049	$581,072,647	$639,120,647
Changes in obligated balances		104,796,374	−186,876,402	58,048,000

ANALYSIS OF EXPENDITURES—continued

	1954 actual	1955 estimate	1956 estimate
Expenditures are distributed as follows:			
Out of current authorizations	$783,488,543	$421,212,109	$874,279,353
Out of prior authorizations		767,949,049	581,072,647

Plant and Equipment, Atomic Energy Commission

[Plant and equipment: For expenses of the Commission in connection with the purchase and construction of plant and the acquisition of equipment and other expenses incidental thereto necessary in carrying out the purposes of the Atomic Energy Act of 1946, including purchase of land and interests in land; purchase of aircraft; purchase (not to exceed two hundred and fifty-eight for replacement only) and hire of passenger motor vehicles; $110,882,400, to remain available until expended: *Provided*, That the unexpended balances of prior year appropriations made available under this head shall be merged with this appropriation: *Provided further*, That in addition to funds allocated for research and development for reactors the Commission may expend from funds provided under this head such sum as may be necessary, not to exceed $7,000,000, for beginning of research or construction of such reactors, without regard to any other provision of this Act: *Provided further*, That no part of the foregoing appropriation shall be available for the construction of any office building, residence, warehouse or similar structure, utility, or other specific portion or unit of a project, unless funds are available for the completion of such building, utility, or other specific portion or unit of such project. The foregoing proviso shall not be construed to prevent the purchase of land for any project, the construction of any new building or procurement of any machinery, equipment or materials therefor, nor any utility nor any portion or unit of a specific project if the funds are available to pay the cost of such land, the cost of such building, machinery, equipment or materials, or the cost of such utility or the cost of any such specific portion or unit of such project: *Provided further*, That no part of this appropriation shall be used—]

[(A) to start any new construction project for which an estimate was not included in the budget for the current fiscal year unless it be a substitute therefor within the limits of cost included in the budget; and]

[(B) to start any new construction project the currently estimated cost of which exceeds by thirty-five per centum the estimated cost included therefor in such budget: *Provided further*, That not to exceed $2,500,000 of the funds herein provided may be transferred to the Bureau of Public Roads, Department of Commerce, for the construction or improvement of access roads in the United States to sources of uranium ore.] (*Atomic Energy Act of 1954* (*Public Law 703, approved Aug. 30, 1954*); *Independent Offices Appropriation Act, 1955.*)

Appropriated 1955, **$110,882,400**

AMOUNTS AVAILABLE FOR OBLIGATION

(Balances for June 30, 1954, are as certified under sec. 1311, Public Law 663, except for allocations to Department of Agriculture, Department of the Navy, and Department of the Army)

	1954 actual	1955 estimate	1956 estimate
Appropriation or estimate	$166,000,000	$110,882,400	
Transferred to "Access roads, act of September 7, 1950, Bureau of Public Roads," pursuant to Public Law 149	−9,991,000		
Adjusted appropriation or estimate	156,009,000	110,882,400	
Unobligated balance brought forward	592,206,986	404,677,738	$435,845,000
Unobligated balance transferred to "Operating expenses, Atomic Energy Commission," pursuant to 1956 appropriation act			−221,845,000
Recovery of prior year obligations	183,519,839	372,856,000	
Reimbursements from non-Federal sources	4,334	500,000	
Reimbursements from other accounts	801,402	825,000	
Total available for obligation	932,541,561	889,741,138	214,000,000

Unobligated balance under "Plant and equipment, Atomic Energy Commission," transferred to schedule shown under the head "Proposed for later transmission" at the end of this chapter			−214,000,000
Obligations incurred	527,863,823	453,896,138	

NOTE.—Reimbursements from non-Federal sources above are for replacement of personal property sold (63 Stat. 377); and donation from Westinghouse Electric Corp. (Public Law 537, approved July 22, 1954).

OBLIGATIONS BY ACTIVITIES

Description	1954 actual	1955 estimate	1956 estimate
Obligations for—			
1. Source and fissionable materials facilities	$410,451,469	$305,168,000	
2. Weapons facilities	41,044,539	43,177,000	
3. Reactor development facilities	31,090,519	48,023,000	
4. Physical research facilities	7,882,095	23,496,000	
5. Biology and medicine facilities	446,489	953,000	
6. Community facilities	3,409,529	4,516,000	
7. Administrative facilities	1,250		
8. Equipment not included in construction projects	32,732,197	27,238,138	
Subtotal	527,058,087	452,571,138	
Reimbursable obligations	805,736	1,325,000	
Obligations incurred	527,863,823	453,896,138	

PROGRAM AND PERFORMANCE

The Atomic Energy Act of 1954 requires statutory authorization of appropriations for real property acquisition and plant acquisition and construction, and there are also limitations upon the use of available funds. Accordingly, appropriation language will be requested in a supplemental transmission. (See under "Proposed for later transmission," page 237.) No new obligational authority will be requested in the supplemental transmission because the unobligated balance of obligational authority brought forward from prior years is more than sufficient to cover anticipated 1956 requirements of $214 million. The excess of $221,845,000 is proposed to be transferred to the Operating Expenses appropriation. Obligations anticipated for 1956 will be lower than in either 1955 or 1954. Expenditures also will decrease significantly as the large new plants started in prior years approach completion.

Of the $214 million of unobligated balances earmarked to cover the anticipated authorization action for plant and equipment for 1956, $59.4 million is proposed for improvements to existing production plants which will increase production at decreased unit costs and for additional production and weapons storage facilities. Proposed also are $34.1 million for the construction of prototype military propulsion reactors and associated facilities and $39.9 million for the construction of developmental power producing reactors, including an experimental power breeder reactor of intermediate size. The estimate also provides funds for additional weapons research laboratory buildings, an international reactor technology training school at Argonne National Laboratory, a medical research center including a reactor at Brookhaven National Laboratory, a new community hospital at Oak Ridge, Tenn., additional residential housing at Los Alamos, N. Mex., and access roads to domestic sources of uranium ores.

[No part of the appropriations herein made to the Atomic Energy Commission shall be available for payments under any contract hereafter negotiated without advertising by the Commission, except contracts with any foreign government or any agency thereof and contracts for source material with foreign producers, unless such contract includes a clause to the effect that the Comptroller General of the United States or any of his duly authorized representatives shall until the expiration of three years after final payment have access to and the right to examine any directly pertinent books, documents, papers, and records of the contractor or any of his subcontractors engaged in the performance of and involving transactions related to such contracts or subcontracts: *Provided*, That no part of such appropriations shall be available for payments under any such contract which includes any provision precluding an audit by the General Accounting Office of any transaction under such contract.]

Any appropriation available under this Act or heretofore made to the Atomic Energy Commission may initially be used subject to limitations in this Act during the fiscal year [1955] *1956* to finance the procurement of materials, services, or other costs which are a part of work or activities for which funds have been provided in any other appropriation available to the Commission: *Provided*, That appropriate transfers or adjustments between such appropriations shall subsequently be made for such costs on the basis of actual application determined in accordance with generally accepted accounting principles.

Not to exceed 5 per centum of any appropriation under this head may be transferred to any other such appropriation but no such appropriation shall be increased by more than 5 per centum by any such transfers, and any such transfers shall be reported promptly to the appropriations committees of the House and Senate.

No part of any appropriation herein made to the Atomic Energy Commission shall be used to confer a fellowship on any person who advocates or who is a member of an organization or party that advocates the overthrow of the Government of the United States by force or violence or with respect to whom the Commission finds, upon investigation and report by the Civil Service Commission on the character, associations, and loyalty of whom, that reasonable grounds exist for belief that such person is disloyal to the Government of the United States: *Provided*, That any person who advocates or who is a member of an organization or party that advocates the overthrow of the Government of the United States by force or violence and accepts employment or a fellowship the salary, wages, stipend, grant, or expenses for which are paid from any appropriation contained herein shall be guilty of a felony and, upon conviction, shall be fined not more than $1,000 or imprisoned for not more than one year, or both: *Provided further*, That the above penal clause shall be in addition to, and not in substitution for, any other provisions of existing law. (*Atomic Energy Act of 1954 (Public Law 703, approved Aug. 30, 1954); Independent Offices Appropriation Act, 1955*).

Miscellaneous

Allocations Received From Other Appropriation Accounts

NOTE.—Obligations incurred under allocations from other appropriations are shown in the schedules of the parent appropriation, as follows:
"Ships and facilities, Navy."
"Aircraft and facilities, Navy."
"Ordnance and facilities, Navy."
"Public works, Navy."
"Aircraft and related procurement, Navy."
"Research and development, Navy."
"Maintenance and operations, Army."
"Research and development, Army."
"Army industrial fund."
"Army management fund."
"Procurement and production, Army."
"Aircraft and related procurement, Air Force."
"Major procurement other than aircraft, Air Force."
"Acquisition and construction of real property, Air Force."
"Research and development, Air Force."
"Maintenance and operations, Air Force."

CIVIL SERVICE COMMISSION

Salaries and Expenses, Civil Service Commission

Salaries and expenses: For necessary expenses, including not to exceed $29,000 for services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a); not to exceed $10,000 for medical examinations performed for veterans by private physicians on a fee basis; travel expenses of examiners acting under the direction of the Commission, and expenses of examinations and investigations held in Washington and elsewhere; not to exceed [$100] *$400* for the purchase of newspapers and periodicals (excluding scientific, technical, trade or traffic periodicals, for official use); payment in advance for library membership in societies whose publications are available to members only or to members at a price lower than to the general public; not to exceed [$65,000] *$85,000* for performing the duties imposed upon the Commission by the Act of July 19, 1940 (54 Stat. 767); reimbursement of the General Services Administration for security guard services for protection of confidential files; not to exceed [$443,000] *$495,000* for expenses of travel; and not to exceed $5,000 for actuarial services by contract, without regard to section 3709, Revised Statutes, as amended; [$15,575,600] *$16,825,000*: *Provided*, That no details from any executive department or independent establishment in the District of Columbia or elsewhere to the Commission's central office in Washington or to any of its regional offices shall be made during the current fiscal year, but this shall not affect the making of details for service as members of the boards of examiners outside the immediate offices of the Commission in Washington or of the regional directors, nor shall it affect the making of details of persons qualified to serve as expert examiners on special subjects: *Provided further*, That the Civil Service Commission shall have power in case of emergency to transfer or detail any of its employees to or from its office or field force: *Provided further, That the Civil Service Commission may transport the privately owned automobile of an employee of the Commission, who is transferred to an official duty station outside the continental United States, from the employee's place of residence to his official duty station and return, whenever it is administratively determined that the privately owned automobile is necessary for the performance of official duties at said duty station.*

No part of the appropriations herein made to the Civil Service Commission shall be available for the salaries and expenses of the Legal Examining Unit in the Examining and Personnel Utilization Division of the Commission, established pursuant to Executive Order 9358 of July 1, 1943, or for the compensation or expenses of any member of a board of examiners (1) who has not made affidavit that he has not appeared in any agency proceeding within the preceding two years, and will not thereafter while a board member appear in any agency proceeding, as a party, or in behalf of a party to the proceeding, before an agency in which an applicant is employed who has been rated or will be rated by such member; or (2) who, after making such affidavit, has rated an applicant who at the time of the rating is employed by an agency before which the board member has appeared as a party, or in behalf of a party, within the preceding two years: *Provided*, That the definitions of "agency", "agency proceeding", and "party" in section 2 of the Administrative Procedure Act shall apply to these terms as used herein.

No part of appropriations herein shall be used to pay the compensation of officers and employees of the Civil Service Commission who allocate or reallocate supervisory positions in the classified civil service solely on the size of the group, section, bureau, or other organization unit, or on the number of subordinates supervised. References to size of the group, section, bureau, or other organization unit or the number of subordinates supervised may be given effect only to the extent warranted by the workload of such organization unit and then only in combination with other factors, such as the kind, difficulty, and complexity of work supervised, the degree and scope of responsibility delegated to the supervisor, and the kind, degree, and value of the supervision actually exercised. *(5 U. Total obligations payable out of reimbursements from other accounts	435,352	471,200	365,000
Obligations incurred	16,756,816	16,046,800	17,190,000

As the central personnel agency of the Federal Government, the Civil Service Commission administers a merit system based on competitive examinations for entrance into the competitive service; investigates Federal job applicants to see that they meet character and suitability requirements for Government employment; inspects agencies' personnel programs to see that they carry out delegated authorities in accordance with requirements of law and Commission standards and to help them improve their personnel programs, and administers the Classification Act of 1949 to assure that pay is based on the principle of equal pay for substantially equal work; administers the Civil Service Retirement System; develops Government-wide training and career development programs to increase the effectiveness of the Federal work force, and sets standards and issues regulations to guide agencies in carrying out effective personnel programs; adjudicates appeals, and administers the political activity statutes; and provides general leadership for the development of a sound Federal personnel system that will contribute to the economic and efficient administration of the Government's business.

1. *Recruiting and examining.*—Most appointments in the competitive civil service will be made under the open competitive merit system through examinations to be held by the Commission and its boards of examiners. These boards are made up of agency personnel operating under direction of the Commission. Appointments through such competitive examinations will be a new type of appoint-

Federal Reserve Bank of St. Louis

ment called "career-conditional". Career-conditional employees will have competitive civil service status after completing probation but for 3 years will stand lower than career employees in case of reduction in force. After completing 3 years of service career-conditional employees will automatically become career. Present indefinite employees who were hired through competitive examinations will be converted to career-conditional or career depending upon whether they have completed 3 years of substantially continuous service. Physically handicapped persons are given special placement attention for Federal employment. Veterans are aided in securing the benefits to which they are entitled under law. An employees' incentive awards program will be established to stimulate the development of new and improved methods and ideas.

Production count	*1954 actual*	*1955 estimate*	*1956 estimate*
Examinations announced:			
By the Commission	14,914	10,000	13,800
By boards of examiners	10,635	11,129	12,195
Total	25,549	21,129	25,995
Applications processed:			
By the Commission	540,722	439,600	539,100
By boards of examiners	841,094	885,538	986,554
Total	1,381,816	1,325,138	1,525,654
Placements made:			
By the commission	71,150	68,900	75,200
By boards of examiners	139,203	143,700	154,000
Total	210,353	212,600	229,200

2. *Investigation of character and fitness for employment.*—The Commission performs services for the agencies in order that they may determine whether applicants or appointees to Federal positions are security risks. The Commission also conducts investigations to establish qualifications or suitability for employment as well as certain other personal investigations.

Production count	*1954 actual*	*1955 estimate*	*1956 estimate*
National agency check and inquiry cases	283,476	265,076	317,225
Limited security investigations	7,753	6,680	8,165
Other personal investigations	7,213	5,501	6,729

3. *Inspections and classification surveys.*—The Commission inspects agency personnel operations to insure compliance with civil-service laws and regulations, and recommends improvement in personnel practices; conducts classification surveys to insure compliance with existing classification standards; and reviews requests for reconsideration of the classification of positions.

Production count	*1954 actual*	*1955 estimate*	*1956 estimate*
Inspection surveys	2,192	1,879	1,910
Classification surveys	293	579	803

4. *Administration of the retirement system.*—Administering the Civil Service Retirement Act, the Panama Canal Construction Annuity Act, and the Lighthouse Service Widow's Benefit Act involves adjudicating annuity, death and benefit claims, claims for refund of contributions to the retirement fund, and service credit claims as well as maintaining the control accounts for the fund and making payments to annuitants and other claimants.

Pro duction count	*1954 actual*	*1955 estimate*	*1956 estimate*
Annuity and death claims	56,465	57,184	56,550
Refund claims	137,218	133,868	130,030
Service credit claims	20,001	23,008	21,225
Inquiries answered	191,141	189,652	189,600

5. *Developing programs and standards.*—The Commission develops programs and proposes legislation designed to improve the Federal personnel system; develops and interprets regulations and instructions for agency guidance in recruitment, examining, placement, separations, position changes, and in pay and leave administration; issues occupational standards for positions in the Federal service; and devises tests and other methods for measuring qualifications of applicants and employees for both competitive and noncompetitive action.

6. *Regulatory, appellate, and advisory functions.*—These consist of the formulation of rules and regulations; hearing and taking action on appeals; the administration of the political activities statutes; and the recommendation of measures to the President to promote the accomplishment of the objectives of the rules and regulations.

7. *Executive and administrative services.*

OBLIGATIONS BY ACTIVITIES

Investigations—1954, $707,653; 1955, $670,173; 1956, $500,000.

PROGRAM AND PERFORMANCE

The Civil Service Commission and the Federal Bureau of Investigation conduct investigations of United States citizens employed or being considered for employment in international organizations of which the United States is a member. There is also established in the Civil Service Commission an International Organizations Employees Loyalty Board which makes advisory determinations under the loyalty standard. The advisory determinations are transmitted, through the Secretary of State, to the Secretary General of the United Nations or the executive head of other international organizations.

PROGRAM AND PERFORMANCE

The Commission on Organization of the Executive Branch of the Government was created to develop recommendations to improve methods and procedures; eliminate duplication and overlapping of services, activities, and functions; consolidate services, activities, and functions of a similar nature; abolish services, activities, and functions not necessary to the efficient conduct of government; eliminate nonessential services, functions, and activities which are competitive with private enterprise; define responsibilities of officials; and relocate agencies now responsible directly to the President in departments or other agencies. Its work will be completed and reports will be sent to the Congress early in the calendar year 1955.

FEDERAL CIVIL DEFENSE ADMINISTRATION

INTRODUCTORY STATEMENT

This Administration is responsible for preparing national plans and programs, disseminating civil defense information, providing guidance and coordination to the States and their political subdivisions in the development of local defense plans, and making financial contributions toward certain of their programs.

In the past year the civil defense program was tested and strengthened by the first continental civil defense exercise in history, release of the facts on radioactive fallout, and delegation of certain civil defense responsibilities to other Federal agencies. Other important actions were an internal reorganization designed to fit the new concepts of civil defense operation, and move of the national headquarters away from critical target areas to Battle Creek, Mich. In 1956 the Administration will concentrate on intensified public civil defense education and training, assistance in the development of evacuation plans, installation of more adequate warning devices and procedures, and accelerated distribution of technical guidance material, especially in radiological defense.

OPERATIONS

Operations, Federal Civil Defense Administration

For necessary expenses, not otherwise provided for, in carrying out the provisions of the Federal Civil Defense Act of 1950, as amended (50 U. S. C., App 2251–2297), including services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a); reimbursement of the Civil Service Commission for full field investigations of employees occupying positions of critical importance from the standpoint of national security; expenses of attendance at meetings concerned with civil defense functions; reimbursement of the General Services Administration for security guard services; not to exceed $9,000 for the purchase of newspapers, periodicals, and teletype news services; and not to exceed $6,000 for emergency and extraordinary expenses to be expended under the direction of the Administrator for such purposes as he deems proper, and his determination thereon shall be final and conclusive; [$10,025,000] *$11,600,000. (Supplemental Appropriation Act, 1955.)*

Appropriated 1955, **$10,025,000** Estimate 1956, **$11,600,000**

7. General administration	1,312,510	1,385,342	1,224,000
Obligations incurred	8,084,547	10,030,000	11,600,000

PROGRAM AND PERFORMANCE

1. *Civil defense planning.*—Intelligence on modern weapons of mass destruction is obtained, and civil defense implications are determined. From this information national civil defense planning is developed. Appropriate research programs are devised and administered, and liaison with other Federal agencies is maintained to provide a coordinated Federal program and to avoid duplication of effort.

2. *Civil defense education services.*—Information on weapons effects and preventive measures that may be taken for survival is provided to the general public in order that a better understanding of civil defense needs is gained and psychological warfare may be combated. Technical data on all aspects of civil defense are provided to State and local civil defense organizations. Civil defense training methods and devices are developed and are made available to State and local organizations.

3. *Operations control services.*—A nationwide attack warning system extending from air defense control centers to State and local control points is provided, as is a secure communications network among Federal installations. In 1956 civil defense attack warning officers will be on duty at air force centers on a 24-hour basis. Federally owned civil defense stockpiles are maintained at strategic sites. Tactical and logistic civil defense techniques are developed and disseminated. Natural disaster assistance under Public Law 875 (approved Sept. 30, 1950), is coordinated.

4. *Technical advisory services.*—Solutions to technical problems of physical damage and casualty care are devised and made available to State and local officials.

5. *Field representation.*—The guidance developed at the national headquarters is made available to the States and municipalities through the regional offices. Close working relationships are developed with State civil defense directors to promote coordination of activity among the States. The regional offices also serve as clearing points for Federal assistance to areas affected by natural disasters.

6. *Executive direction.*

7. *General administration.*

Unobligated balance carried forward		−2,000,000	−2,400,000
Balance reappropriated for subsequent year	−1,300,000		
Unobligated balance, estimated savings	−39,410		
Obligations incurred	9,160,590	11,300,000	12,000,000

OBLIGATIONS BY ACTIVITIES

Description	1954 actual	1955 estimate	1956 estimate
1. Attack warning	$2,160,031	$2,400,000	$1,000,000
2. Communications	4,556,829	2,000,000	3,500,000
3. Public safety services	647,451	850,000	1,000,000
4. Medical supplies and equipment	1,015,462	2,350,000	2,000,000
5. Education services	665,394	1,300,000	2,500,000
6. Mass care equipment	115,423	400,000	1,000,000
7. Engineering supplies and equipment		2,000,000	1,000,000
Obligations incurred	9,160,590	11,300,000	12,000,000

PROGRAM AND PERFORMANCE

Civil defense funds of States and localities are equally matched for selected types of civil defense organizational equipment and supplies. Federal contributions are made for attack warning, communications, public safety services, medical supplies and equipment, educational services, mass care equipment, and engineering supplies and equipment. No funds are being requested in 1956 for fire equipment under the public safety services program. Installation of attack warning devices was completed in 1955. Attack warning contributions in 1956 are for recurring costs and improvements in the system.

OBLIGATIONS BY OBJECTS

11 Grants, subsidies, and contributions—1954, $9,160,590; 1955, $11,300,000; 1956, $12,000,000.

OBLIGATIONS BY ACTIVITIES

Hearing of appeals from orders of Federal coal-mine inspectors—1954, $49,897; 1955, $75,000; 1956, $70,000.

PROGRAM AND PERFORMANCE

Coal-mine operators, affected by orders issued by Federal coal-mine inspectors, may appeal to the Board for annulment or revision of, and temporary relief from such orders. Hearings are held, applications determined, and findings and orders of the Board are issued and made public. This estimate provides for a small permanent staff and for the part-time services of the three members of the Board.

OBLIGATIONS BY ACTIVITIES

Description	1954 actual	1955 estimate	1956 estimate
Direct Obligations			
1. Applied technical research and frequency allocation	$447,576	$437,090	$431,174
2. Broadcast	1,383,989	1,243,992	1,205,764
3. Safety and special radio services	743,534	705,735	724,375
4. Field engineering and monitoring	2,339,100	2,259,908	2,269,709
5. Common carrier	712,655	726,958	732,022
6. Executive, staff, and service	1,327,639	1,325,617	1,341,456
Total direct obligations	6,954,493	6,699,300	6,704,500
Obligations Payable Out of Reimbursements From Other Accounts			
1. Applied technical research and frequency allocation	134,840	142,000	137,720
2. Broadcast	5,000	5,000	5,000
4. Field engineering and monitoring	115,421	182,600	
6. Executive, staff, and service	32,989	46,875	41,115
Total, obligations payable out of reimbursements from other accounts	288,250	376,475	183,835
Obligations incurred	7,242,743	7,075,775	6,888,335

PROGRAM AND PERFORMANCE

The Federal Communications Commission regulates wire and radio communications in interstate and foreign commerce so as to (1) assure adequate common carrier services at reasonable rates and (2) promote the most efficient and beneficial use of the radio spectrum. The budget proposes to accomplish workloads which are growing in many areas with substantially the same staff and funds available in fiscal year 1955.

1. *Applied technical research and frequency allocation.*—This activity provides the Commission with the basic information for determining the best utilization of the radio spectrum.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

2. *Broadcast.*—Standard broadcast (AM), frequency modulation (FM), television (TV), and other related services are licensed and regulated by the Commission. The slight decrease in requirements for this activity in 1956 is due to progress in reducing backlogs of applications for new television stations. Pertinent data are shown in the following table:

	1953 actual	*1954 actual*	*1955 estimate*	*1956 estimate*
Stations regulated [1]	3,802	3,992	4,473	4,648
Applications for new stations or major change in facilities disposed of:				
AM	441	428	590	464
FM	160	174	116	135
TV	936	700	288	262

[1] As of June 30 of each year.

3. *Safety and special radio services.*—Aviation, police, marine, amateur, and other nonbroadcast use of radio are licensed and regulated. Pertinent data are summarized below:

	1953 actual	*1954 actual*	*1955 estimate*	*1956 estimate*
Stations regulated (excluding amateur) [1]	120,623	138,730	160,419	180,000
License applications received	143,949	140,743	150,915	146,357

[1] As of June 30 of each year.

4. *Field engineering and monitoring.*—Field employees inspect radio stations, give operator examinations, collect engineering data, monitor the spectrum, and determine the location of lost ships, aircraft, and illegal sources of radio emission.

5. *Common carrier.*—The Commission approves existing and proposed rates and practices of common carriers, proposed mergers and acquisitions of properties, extensions and reductions in service, construction of facilities, and applications for use of radio in communication services.

6. *Executive, staff, and service.*—This activity includes adjudicatory functions of the Commission.

Administration	228,594	223,000	219,000
Obligations incurred	3,140,012	3,124,000	3,210,000

PROGRAM AND PERFORMANCE

The Service provides assistance to representatives of labor and management in the mediation or prevention of disputes affecting industries engaged in interstate commerce other than air and rail transportation.

1. *Mediation and conciliation of labor disputes.*—During the past year, the Service assigned mediators to make initial inquiry into more than 21,000 labor-management dispute situations to determine the jurisdiction of the Service and the need for mediation assistance. Of these, mediation assistance by mediators was authorized in approximately 14,000 situations involving 13,500,000 employees.

Supplementing the mediation of existing disputes, mediators were engaged in promoting harmonious relationships between labor and management by preventive mediation work, including audio-visual presentations, designed to improve understanding and peaceful labor relations during contract periods.

The increase of $86,000 will finance a moderate increase in the number of mediators to prepare for a peak of staff retirements in 1957 and to intensify the preventive mediation activity.

2. *Administration.*

Obligations incurred	4,300,336	4,162,000	4,650,000

NOTE.—Reimbursements from non-Federal sources above consist of $6,752 returned from previously paid lump-sum payments for annual leave (67 Stat. 138) and $140 earned under authority of sec. 17 (c) of the Natural Gas Act (52 Stat. 830).

OBLIGATIONS BY ACTIVITIES

Description	1954 actual	1955 estimate	1956 estimate
1. Licensing of non-Federal hydroelectric projects	$661,313	$620,960	$764,370
2. Regulation and surveys, electric power industry	1,022,951	1,000,900	1,001,570
3. Regulation and surveys, natural gas industry	1,788,090	1,761,000	2,099,050
4. Investigations relating to Federal river development projects	377,383	361,280	351,130
5. International Joint Commission	9,407	9,280	5,000
6. Administration	441,192	408,580	428,880
Obligations incurred	4,300,336	4,162,000	4,650,000

PROGRAM AND PERFORMANCE

The Federal Power Commission administers the Federal Power Act and Natural Gas Act and has additional duties under other acts relating to Federal power development.

1. *Licensing of non-Federal hydroelectric projects.*—Licenses are issued to private, State, and municipal interests for proposed and existing hydroelectric projects affecting public lands and streams subject to Federal jurisdiction; construction and operation of projects are inspected; and cost of construction is determined for projects under license to private interests. Pertinent data are:

Description	*1954 actual*	*1955 estimate*	*1956 estimate*
Number of licensed projects	657	676	690
Number of applications pending (end of year)	136	126	92
Total claimed cost (in millions) of major projects	$2,123	$2,280	$2,396
Annual income to Government from licenses	$1,322,697	$2,140,626	$1,497,264

It is the policy of the Administration to encourage and support local enterprise in the development of the water resources of the United States alone or in partnership with the Federal Government. Provision is made in a proposed supplemental appropriation and in this estimate for more expeditious processing of license applications for new hydroelectric generating capacity in furtherance of this policy.

2. *Regulation and surveys, electric power industry.*—Regulation covers the transmission and sale for resale of electric energy in interstate commerce and the rates, accounts, depreciation practices, certain security issues, disposition of properties, mergers, and the interconnection and coordination of facilities of public utilities subject to the Commission's jurisdiction. Statistics and other information about the electric utility industry are gathered and published. Pertinent data are:

	By calendar year		
Description	*1953 actual*	*1954 estimate*	*1955 estimate*
Number of public utilities regulated	190	190	190
Operating revenues (in millions)	$5,200	$5,500	$6,000
Number of utilities reporting for statistical purposes	1,350	1,350	1,350
Operating revenues (in millions)	$7,900	$8,300	$9,000

3. *Regulation and surveys, natural gas industry.*—Regulation covers the transportation and sale for resale of natural gas in interstate commerce, and the rates, accounts, and depreciation and depletion practices. Certificates of public convenience and necessity are issued to natural gas companies subject to the jurisdiction of the Commission. Statistics and other information about the natural gas industry are gathered and published. There were 160 natural gas companies regulated in calendar year

Federal Reserve Bank of St. Louis

FEDERAL POWER COMMISSION—Continued

Salaries and Expenses, Federal Power Commission—Continued

1953. This number increased to 5,100 in 1954 and will be the same in 1955.

The decision of the Supreme Court of the United States in the Phillips case added about 5,000 independent producers of natural gas to the Commission's area of jurisdiction. It is estimated that workload during the current year with respect to rate filings will increase from 850 anticipated before the decision to more than 20,000. Similarly, it is expected that the number of certificate applications to be disposed of will increase from about 200 to 500. Provision is made in a proposed supplemental appropriation and in this estimate for meeting the added responsibility resulting from this decision.

4. *Investigations relating to Federal river development projects.*—Of a potential 109 million kilowatts of hydroelectric power in the United States, 23.1 million kilowatts were developed by Federal agencies and by non-Federal interests as of December 31, 1953.

Studies are made of river basins and individual projects proposed by the Departments of the Army and Interior to determine possibilities for conservation, development, and utilization of potential power resources. Review and approval are required of certain proposed rates for sale of power from Federal projects. Information on the power features of river development projects is furnished to Congress and Federal and State agencies. In fiscal year 1954, 111 studies were carried on and it is estimated that action will be required on 105 cases in 1955, and on 110 in 1956.

5. *International Joint Commission.*—This covers participation of the Federal Power Commission in the International Joint Commission, which adjudicates controversies between the Governments of the United States and Canada or nationals of the 2 countries, principally over boundary waters and waters that cross the boundary, and conducts investigations as directed by the 2 Governments.

6. *Administration.*

Obligations incurred	4,045,966	4,045,000	4,300,000

PROGRAM AND PERFORMANCE

The Commission has the duty of preserving free competitive enterprise through prevention of monopolistic and unfair trade.

1. *Antimonopoly.*—All types of monopolistic restrictions, including price-fixing conspiracies, boycotting, price discriminations, and illegal mergers and acquisitions are corrected; economic data and criteria are brought to bear on monopoly and related problems; and supervision is provided over the registration and operations of associations of American exporters engaged solely in export trade. Increased funds are requested for essential activities relating to mergers and acquisitions, for the compliance program, for acceleration of investigations and trials of antimonopoly matters, and for improving the financial reports program.

2. *Deceptive practices.*—False and misleading advertising and other unfair or deceptive practices are prevented by corrective action, including the affirmative aid of voluntary trade practice conferences; business and the public are protected from the evils of misbranding and nondisclosure of fiber content of manufactured wool products; consumers and merchants are protected from unfair practices with respect to furs and fur products and flammable fabrics.

3. *Executive direction and management.*—These also include the adjudicatory functions of the Commission.

4. *Administration.*

FOREIGN CLAIMS SETTLEMENT COMMISSION [OF THE UNITED STATES]

INTRODUCTORY STATEMENT

The functions of the Department of State's International Claims Commission and the independent War Claims Commission were merged on July 1, 1954, into the Foreign Claims Settlement Commission created by Reorganization Plan No. 1 of 1954. The new Commission provides a single agency for the orderly completion of those claims programs presently authorized by the War Claims Act of 1948, as amended, including claims arising from the recent Korean hostilities, the International Claims Settlement Act of 1949, as amended, and such other foreign claims as may be assigned.

PAYMENT OF KOREAN CLAIMS

Payment of Korean Claims, Foreign Claims Settlement Commission

For payment of Korean claims, as authorized by the War Claims Act of 1948, as amended by Public Law 615, approved August 21, 1954, $12,200,000.

[ADMINISTRATIVE EXPENSES (KOREAN CLAIMS)]

[For expenses necessary to enable the Foreign Claims Settlement Commission to carry out the provisions of the amendments of 1954 to the War Claims Act of 1948, as amended (50 U. S. C. App. 2004), including services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a), and expenses of attendance at meetings concerned with the purposes of this appropriation, the Commission is authorized to use not to exceed $100,000 of funds made available for administrative expenses of the War Claims Commission: *Provided*, That this paragraph shall be effective only upon the enactment into law of H. R. 9390, Eighty-third Congress.] (*Supplemental Appropriation Act, 1955.*)

Estimate 1956, **$12,200,000**

AMOUNTS AVAILABLE FOR OBLIGATION

Appropriation or estimate (obligations incurred)—1956, $12,200,000.

OBLIGATIONS BY ACTIVITIES

Description	1954 actual	1955 estimate	1956 estimate
1. Payment of claims (Korean hostilities)			$12,000,000
2. Administrative expenses			200,000
Obligations incurred			12,200,000

PROGRAM AND PERFORMANCE

Public Law 615 (approved August 21, 1954), authorized appropriation of funds to settle new prisoner of war and civilian internee claims arising out of Korean hostilities. It is estimated that 18,210 claims will be filed with awards amounting to $12,000,000.

The $200,000 estimated cost of administration incident to claims payments will be reimbursed to the "Administrative expenses, Foreign Claims Settlement Commission" account for that portion of the Commission's expenses attributable to Korean claims.

OBLIGATIONS BY OBJECTS

Object classification	1954 actual	1955 estimate	1956 estimate
07 Other contractual services: Services performed by other agencies			$200,000
13 Refunds, awards, and indemnities			12,000,000
Obligations incurred			12,200,000

ANALYSIS OF EXPENDITURES

	1954 actual	1955 estimate	1956 estimate
Obligations incurred during the year			$12,200,000
Obligated balance carried forward			−2,200,000
Total expenditures (out of current authorizations)			10,000,000

[INTERNATIONAL CLAIMS COMMISSION]

International Claims, Foreign Claims Settlement Commission

[For expenses necessary to enable the Commission to settle certain claims of the Government of the United States on its own behalf and on behalf of American nationals against foreign governments as authorized by the Act of March 10, 1950, as amended (22 U. S. C. 1621–1627), including expenses of attendance at meetings of organizations concerned with the purpose of this appropriation; hire of passenger motor vehicles for field use only; services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a); and employment of aliens; $130,000.]

[The appropriation granted under this head in the Supplemental Appropriation Act, 1954, shall remain available until June 30, 1955.] (*Department of State Appropriation Act, 1955; Supplemental Appropriation Act, 1955.*)

Appropriated 1955, **$0**
Appropriated (adjusted) 1955, **$130,000**

[WAR CLAIMS COMMISSION]

PAYMENT OF *WORLD WAR II* CLAIMS

Payment of World War II Claims, Foreign Claims Settlement Commission

(Trust account)

For payment of claims, as authorized by the War Claims Act of 1948, as amended, from funds deposited in the Treasury to the credit of the war claims fund created by section 13 (a) of said Act, such sums as may be necessary, to be available to the Secretary of the Treasury for payment of claims under sections 4 (a), 4 (b) (2), 5 (a) through [(e), 6, and 7] *(d), 6 (a) through (d), 7, 15, 16, and 17* of said Act to the payees named and in the amounts stated in certifications by the [War Claims Commission] *Foreign Claims Settlement Commission* and the Secretary of Labor or their duly authorized representatives, which certifications shall be in lieu of any vouchers which might otherwise be required: *Provided,* That this appropriation shall not be available for administrative expenses: *Provided further,* That *unless otherwise authorized by law* no claims shall be allowed or paid under the provisions of said War Claims Act of 1948 from any funds other than those covered into the Treasury pursuant to the provisions of section 39 of the Trading With the Enemy Act of October 6, 1917, as amended, as provided by section 13 (a) of said War Claims Act of 1948. *(Independent Offices Appropriation Act, 1955.)*

AMOUNTS AVAILABLE FOR OBLIGATION

	1954 actual	1955 estimate	1956 estimate
Allocation or estimate (derived from "War claims fund")	$60,000,000		
Unobligated balance brought forward	17,176,234	$37,447,034	$16,952,187
Total available for obligation	77,176,234	37,447,034	16,952,187
Unobligated balance carried forward	−37,447,034	−16,952,187	−237,387
Obligations incurred	39,729,200	20,494,847	16,714,800

OBLIGATIONS BY ACTIVITIES

Payment of claims—1954, $39,729,200; 1955, $20,494,847; 1956, $16,714,800.

PROGRAM AND PERFORMANCE

Public Law 744 (approved August 31, 1954), authorized the settlement of additional World War II internee and prisoner of war claims and certain new sequestration claims. Payments will be made from balances available in the Treasury to the credit of the war claims fund. It is estimated that 18,470 claims will be filed with awards amounting to $16,714,800.

Payments in 1954 and 1955 represent settlements of World War II claims, which must by law be completed by March 31, 1955. It is estimated that by that time $166,000,000 in awards will have been paid since 1950 to former prisoners of war, civilian internees, and religious organizations under this authorization.

OBLIGATIONS BY OBJECTS

13 Refunds, awards, and indemnities—1954, $39,729,200; 1955, $20,494,847; 1956, $16,714,800.

ADMINISTRATIVE EXPENSES

Administrative Expenses, Foreign Claims Settlement Commission

For expenses necessary to [complete] *carry on* the activities of the [War Claims] *Foreign Claims Settlement* Commission, including services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a) *at rates not to exceed $50 per diem for individuals;* expenses of attendance at meetings concerned with the purposes of this appropriation; not to exceed [$4,000] *$10,000* for expenses of travel; and advances or reimbursements to other Government agencies for use of their facilities and services in carrying out the functions of the Commission; [$515,000, to] *$550,000, of which $350,000 shall* be derived only from the war claims fund created by section 13 (a) of the War Claims Act of 1948 (Public Law 896, approved July 3, 1948) and not to be available for obligation after [March 31, 1955] *June 30, 1956, and $200,000 shall be derived from the appropriation for the current fiscal year for "Payment of Korean claims".*

[For an additional amount for "Administrative expenses", $400,000, to be derived from the war claims fund created by section 13 (a) of the War Claims Act of 1948 (Public Law 896, approved July 3, 1948): *Provided,* That the limitation under this head in the Independent Offices Appropriation Act, 1955, on the amount available for expenses of travel is increased to "$8,000".] *(Independent Offices Appropriation Act, 1955; Supplemental Appropriation Act, 1955.)*

AMOUNTS AVAILABLE FOR OBLIGATION

(Balances for June 30, 1954, are as certified under sec. 1311, Public Law 663)

	1954 actual	1955 estimate	1956 estimate
Limitation or estimate (transferred from "War claims fund")	$850,000	$915,000	$350,000
Reimbursements from other accounts			200,000
Total available for obligation	850,000	915,000	550,000

Administration and settlement of war claims:			
World War II	$838,715	$770,000	$350,000
Korean			200,000
Obligations incurred	838,715	770,000	550,000

PROGRAM AND PERFORMANCE

The administrative expense estimate of the Commission is based upon the receipt and settlement of 36,680 claims, including appeals.

SCHEDULE OF CLAIMS LOAD

	Korean claims (Public Law 615)	*New World War II claims (Public Law 744)*	*Total*
Estimated claims received	18,210	18,470	36,680
Estimated awards	15,798	14,170	29,968
Estimated disallowances	2,412	4,300	6,712

The Commission will have completed work by its statutory deadline of March 31, 1955, on the previously authorized World War II claims of prisoners of war, internees, and religious organizations. It received and will have settled 622,406 claims under that legislation.

A 1955 supplemental authorization to use anticipated balances not available beyond March 31, 1955, to begin the Public Law 744 claims program, is proposed for later transmission.

PROGRAM AND PERFORMANCE

The General Accounting Office settles claims by or against the Government; audits the financial transactions of Government agencies, including corporations and fiscal officers' accounts; renders legal decisions relating to Government fiscal matters; conducts investigations relating to the receipt, disbursement, and application of public funds; develops, prescribes, and evaluates accounting systems on a governmentwide basis; and performs other related and necessary functions. During the fiscal year 1954, refunds and collections in the amount of $61,259,955 were made through the audit, investigative, and claims activities of the General Accounting Office.

1. *Office of the Comptroller General.*—The Comptroller General serves Congress by presenting to it reports on matters relating to public funds, with recommendations and advice. The scope and variety of legislative reports and services to congressional committees continues to broaden, and the number to expand.

2. *Office of the general counsel.*—In addition to preparing decisions and reports the General Counsel and his staff participate in conferences with legislative and administrative officials of the Government on the legality or propriety of proposed obligations and expenditures, the sufficiency of proposed legislation, the desirability of new legislation for particular purposes, and like matters.

3. *Office of investigations.*—This activity comprises (*a*) inspections at irregular intervals of most of the larger Federal installations and activities throughout the country; (*b*) investigations of fraudulent transactions, suspected fraud, or other serious irregularity; and (*c*) surveys of particular subjects of Federal expenditures on a broad and sometimes nationwide basis. The work is carried on in the field and at the spot where it can be best applied in the interest of the Government.

4. *Office of administrative services.*

5. *Accounting systems division.*—The major work efforts of the accounting systems division will continue to be the cooperative work in the development of accounting systems and improvements in the agencies of the Government. This work is carried out on a day-to-day consultative basis with accounting and management representatives of the individual agencies, and is in furtherance of the objectives of the joint accounting improvement program launched by the Comptroller General with the Secretary of the Treasury and the Director of the Bureau of the Budget.

6. *Claims division.*—All claims by or against the United States are settled in this Division with the exception of claims by and against common carriers for transportation items and claims wherein exclusive jurisdiction is conferred upon another agency by law.

7. *Transportation division.*—This activity audits freight and passenger transportation payments for the account of the United States and the settlement of claims involving transportation charges. The transportation audit recovered over $40 million during 1954 for the Government.

8. *Division of personnel.*—The personnel management program of the Office, which is administered by this Division, includes recruitment and placement, employee relations, position classification, work performance standards and performance ratings, training, and personnel security. While most of the Division's resources must be devoted to operational activities, all possible attention is now being given to such developmental work as the improvement of selection methods, the improvement of communications between management and employees, and the training and development of supervisors and executives.

9. *Division of audits.*—This division performs all of the audit functions, except those involving transportation matters, for which the General Accounting Office is responsible. The audit function is performed primarily for the purpose of (1) furnishing the basis for settling accounts of fiscal officers, and (2) evaluating the performance of each Government agency in discharging its financial obligations. It is the policy to convert the audit to a comprehensive basis wherein the effectiveness of internal agency control is evaluated in lieu of an examination of each individual transaction. The comprehensive audit program covers selected activities of particular Government agencies and in some cases the program has been extended to cover entire agencies.

10. *European branch.*—The European branch, with headquarters in Paris, France, performs the audit, investigative, legal, and other functions of the General Accounting Office in the European area, including North Africa and the Near East. Small suboffices have been established in London, England; Frankfurt, Germany; Rome, Italy; and Madrid, Spain.

OBLIGATIONS BY ACTIVITIES

Hearing and adjudication of Indian claims—1954, $112,157; 1955, $117,000; 1956, $119,500.

PROGRAM AND PERFORMANCE

This independent Commission of three members, which is required to complete its work by April 10, 1957, was created to hear and adjudicate claims, existing before August 13, 1946, of American Indian tribes, bands, or other identifiable groups of Indians residing within the territorial limits of the United States or Alaska. Claimants were allowed a period of 5 years from August 13, 1946, within which to submit their claims. There were 852 claims filed by the end of that filing period. Payments of awards are dependent upon subsequent appropriations by Congress. Through August 1954 appropriations totaling $5,017,512 had been made to pay awards.

INTERSTATE COMMERCE COMMISSION

Salaries and Expenses, Interstate Commerce Commission

Salaries and expenses: For necessary expenses of the Interstate Commerce Commission, including not to exceed $5,000 for the employment of special counsel; services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a), at rates not to exceed $50 per diem for individuals; newspapers (not to exceed $200); purchase of not to exceed twenty passenger motor vehicles for replacement only; and not to exceed $573,000 for expenses of travel; $11,975,000, of which $125,000 shall be available for expenses necessary to carry out such defense mobilization functions as may be delegated pursuant to law: Provided, That Joint Board members and cooperating State commissioners may use Government transportation requests when traveling in connection with their duties as such.

Estimate 1956, [a] **$11,975,000**

[a] Estimate is for activities previously carried under "General expenses, Interstate Commerce Commission," "Railroad safety, Interstate Commerce Commission," "Locomotive inspection, Interstate Commerce Commission," and "Defense transport activities, Interstate Commerce Commission." The amounts obligated in 1954 and 1955 are shown in the schedule as comparative transfers.

8. General management and administration	704,262	720,516	714,032
Total obligations	11,646,456	11,682,590	11,979,000

PROGRAM AND PERFORMANCE

The Commission regulates common carriers engaged in interstate and foreign commerce, including railroads, motor carriers, water carriers, pipelines, and contract carriers by motor vehicle and water.

The estimate for 1956 provides for all of the Commission's activities in one appropriation in lieu of four existing appropriations, chiefly to permit better utilization of the field staff. An increase of $305,000 over the 1955 appropriations is proposed primarily to improve carriers' compliance with operating rights, safety regulations, and accounting requirements.

1. *Regulation of carriers' rates, practices, operating authorities and finance.*—This work consists of regulating rates, granting operating authorities, approving abandonments of and extensions of railroad lines, financial reorganizations, and rate agreements between carriers.

2. *Compliance.*—The Commission renders assistance in the enforcement of statutes and regulations affecting transportation and carriers; examinations are made to ascertain that motor carriers and freight forwarders are adequately insured; and surveys are conducted of motor carrier operating practices to reduce accidents and to promote safety on the public highways.

3. *Supervision and analysis of carrier accounting and statistics.*—Uniform systems of accounts are formulated and policed for all types of carriers; studies are made of operating costs and analyses prepared in relation to rate structures; current inventory and cost records are maintained and elements of value are developed to be used in setting up depreciation reserves, determining costs of service, and approving financial reorganizations; statistics are compiled from carriers' reports and studies made of operating, financial, and other problems of transportation agencies.

4. *Supervision and interpretation of tariffs.*—Common and contract carriers' tariffs are examined for compliance with Commission's tariff circular rules, under certain conditions authority to publish rates on less-than-statutory notice is granted, and informal complaints and carriers' requests to pay reparation are handled.

5. *Railroad safety and car service.*—Field staff promotes safety of employees and passengers by enforcing compliance with the Locomotive Inspection Act and inspecting appliances and signal installations and devices. Car service agents work directly with carriers and shippers in handling problems related to the transportation of property by railroads.

6. *Defense mobilization.*—Under authority delegated by the Director of Defense Mobilization, emergency mobilization plans and programs for domestic surface transportation, storage, and port facilities are formulated and carried out.

7. *Executive and advisory functions.*—These also include the quasi-judicial and quasi-legislative functions of the Commission.

8. *General management and administration.*

Statement of proposed obligations for purchase and hire of passenger motor vehicles for the fiscal year 1956

INTERSTATE COMMERCE COMMISSION

Appropriation	Motor vehicles to be purchased		Old vehicles to be exchanged		Net cost of vehicles to be purchased	Old vehicles still to be used	Cost of hire of motor vehicles	Users and public purpose
	Number	Gross cost	Number	Allowance (estimated)				
Salaries and expenses, Interstate Commerce Commission.	20	$28,000	20	$4,000	$24,000	106		Commissioners and heads of bureaus and offices: One vehicle for transportation to and from official meetings and conferences in Washington, D. C. All other vehicles to be used by employees in the field in connection with the duties of the Commission.

INTERSTATE COMMISSION ON THE POTOMAC RIVER BASIN

Contribution to Interstate Commission on the Potomac River Basin

Contribution to Interstate Commission on the Potomac River Basin: To enable the Secretary of the Treasury to pay in advance to the Interstate Commission on the Potomac River Basin the Federal contribution toward the expenses of the Commission during the current fiscal year in the administration of its business in the conservancy district established pursuant to the Act of July 11, 1940 (54 Stat 748), [$5,000] *$10,000.* (*Independent Offices Appropriation Act, 1955.*)

Appropriated 1955, **$5,000** Estimate 1956, **$10,000**

AMOUNTS AVAILABLE FOR OBLIGATION

(Balances for June 30, 1954, are as certified under sec. 1311, Public Law 663)

Appropriation and estimate (obligations incurred)—1954, $5,000; 1955, $5,000; 1956, $10,000.

OBLIGATIONS BY ACTIVITIES

Contribution to the Interstate Commission on the Potomac River Basin—1954, $5,000; 1955, $5,000; 1956, $10,000.

PROGRAM AND PERFORMANCE

The Interstate Commission on the Potomac River Basin was created by compact among the four States in the basin, the District of Columbia, and the Federal Government to abate water pollution.

This appropriation represents the Federal Government's pro rata contribution to the general expenses of the Commission.

OBLIGATIONS BY OBJECTS

11 Grants, subsidies, and contributions—1954, $5,000; 1955, $5,000; 1956, $10,000.

ANALYSIS OF EXPENDITURES

(Balances for June 30, 1954, are as certified under sec. 1311, Public Law 663)

Obligations incurred during the year (total expenditures out of current authorizations)—1954, $5,000; 1955, $5,000; 1956, $10,000.

JAMESTOWN-WILLIAMSBURG-YORKTOWN CELEBRATION COMMISSION

Jamestown-Williamsburg-Yorktown Celebration Commission

For expenses necessary to carry out the provisions of the Act of August 13, 1953 (67 Stat. 576), including services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a), at rates not to exceed $50 per diem for individuals; transportation and not to exceed $20 per diem in lieu of subsistence for members of the Commission serving without compensation[; purchase of not to exceed two passenger motor vehicles]; and entertainment; $100,000. (*Supplemental Appropriation Act, 1955.*)

Appropriated 1955, **$100,000** Estimate 1956, **$100,000**

AMOUNTS AVAILABLE FOR OBLIGATION

Appropriation or estimate (obligations incurred)—1955, $100,000; 1956, $100,000.

OBLIGATIONS BY ACTIVITIES

Planning the celebration—1955, $100,000; 1956, $100,000.

PROGRAM AND PERFORMANCE

The Jamestown-Williamsburg-Yorktown Celebration to be held in 1957 will commemorate the 350th anniversary of the founding of Jamestown, the subsequent development of colonial Virginia culture at Williamsburg, and the winning of American independence at Yorktown in 1781. The Jamestown-Williamsburg-Yorktown Celebration Commission will develop and execute plans for the celebration in cooperation with the State of Virginia and interested historical societies.

5. Headquarters management and coordination	1,370,422	1,386,000	1,405,000
Obligations incurred	49,588,422	52,000,000	63,500,000

PROGRAM AND PERFORMANCE

The Committee (NACA) conducts scientific research directed to problems of military aviation but having applications to commercial aviation as well. Its research program, which is carried on mainly at its three major laboratories and two flight stations, is closely coordinated with the aeronautical programs of the Department of Defense.

The Committee's research is directed primarily at developing basic scientific and engineering data necessary for continued improvement in the design and performance of military aircraft, missiles, and their powerplants. In addition, part of the Committee's current effort is devoted to resolving specific problems in connection with particular aircraft, missiles, and engines.

Additional funds are requested for 1956 to increase research in certain fields of military importance and to provide for the full year's operation of the unitary plan wind tunnels being placed in initial operation during the current fiscal year at the Committee's Langley, Ames, and Lewis laboratories.

In order to initiate increased research, a supplemental appropriation, shown at the end of this chapter, will be requested during 1955.

1. *Aerodynamic research.*—This research seeks to develop the design of aircraft and missiles which can perform effectively in the critical transonic and supersonic speed ranges and at the low speeds of take-off and landing. Data are obtained from actual flight tests of high-speed piloted and pilotless aircraft, wind-tunnel experimentation, and theoretical studies.

2. *Powerplants research.*—This research centers on the newer forms of aircraft and missile powerplants, such as turbojet, ram-jet, nuclear and rocket engines, and on the use of new types of fuels.

3. *Aircraft structural research.*—In 1956 emphasis will continue to be placed on structural problems resulting from aerodynamic heating, increased aerodynamic and ground handling loads, thinner wings, and the novel configurations of modern high-speed aircraft.

4. *Operating problems research.*—Studies now under way on aircraft icing, flight through turbulent weather, and the causes and prevention of fires in aircraft are of importance to civil as well as military aviation.

5. *Headquarters management and coordination.*

Obligations incurred	5,086,187	11,000,000	8,500,000

PROGRAM AND PERFORMANCE

This appropriation provides for modernization of the NACA research facilities and the construction of certain additional facilities for conducting research beyond the capabilities of existing equipment.

1. *Aerodynamic research.*—The 1956 program provides for alterations to an existing wind tunnel at Langley Laboratory for high-speed aerodynamic research; for the construction of two facilities at Ames Laboratory to conduct research on aerodynamic heating; and for utility and other improvements at Langley and Ames laboratories and at Wallops Island Station.

2. *Powerplants research.*—The 1956 program includes construction of a research facility for nuclear propulsion; alteration of an existing wind tunnel to increase its speed range; additions to an existing fuels laboratory; and utility and other improvements; all of the foregoing at Lewis Laboratory.

3. *Aircraft structural and operating problems research.*—The 1955 and 1956 amounts cover obligations authorized in prior year programs for alteration of the 19-foot pressure tunnel and construction of a high-temperature structural research laboratory at Langley laboratory.

PROGRAM AND PERFORMANCE

An appropriation of $75,000,000 was made in 1950 for the construction of three large supersonic wind tunnels at laboratories of the NACA for the development of military aircraft and missiles and their powerplants, as authorized by the Unitary Wind Tunnel Plan Act of 1949. These tunnels are being placed in operation during fiscal year 1955.

OBLIGATIONS BY ACTIVITIES

Maintenance and operation of title I properties—1954, $37,000; 1955, $43,000; 1956, $37,000.

PROGRAM AND PERFORMANCE

The National Capital Housing Authority operates 112 low-rent housing units and 30 nonresidential units developed or acquired under title I of the District of Columbia Alley Dwelling Act (48 Stat. 930). All operations except those under title I are subject to supervision of the Public Housing Administration and are included in the consolidated estimates of that agency.

Operations under title I of the Alley Dwelling Act are financed by this appropriation. Under provision of the annual appropriation language rental receipts from the activity are paid into miscellaneous receipts of the Treasury.

OBLIGATIONS BY ACTIVITIES

Planning—1954, $121,572; 1955, $143,000; 1956, $200,000.

PROGRAM AND PERFORMANCE

The National Capital Planning Commission is the central planning agency for the Federal and District Governments to plan the appropriate and orderly development and redevelopment of the National Capital and the conservation of the important natural and historical features thereof. The National Capital Regional Planning Council coordinates planning in the counties and cities of the metropolitan area. A common staff serves both agencies.

Major projects of the Commission will include (*a*) a plan for the location of Federal buildings to accommodate personnel now housed in temporary buildings; (*b*) participation in complete revision of the District of Columbia zoning regulations and maps; (*c*) completion of more detailed plan for the "inner ring" and its connections with major radials; (*d*) comprehensive study of bridge and highway problems in the western portion of the District of Columbia with special reference to the location of Potomac River crossings above Memorial Bridge; (*e*) neighborhood planning for urban renewal areas; (*f*) review of the District of Columbia's $300 million public works program as to conformity with the comprehensive plan and coordination with Federal projects.

Regional Council projects will include (*a*) completion of basic land-use studies, (*b*) application of findings of economic base surveys to be made for the region during 1955, (*c*) a regional highway and transportation plan, and (*d*) analysis of regional water-supply survey conclusions as to effect on land-use plan and future population distribution.

These projects are in addition to the routine planning duties which occupy more than half of the time of the two agencies and their joint staff.

Obligations incurred	60,698	774,751	900,000

PROGRAM AND PERFORMANCE

The National Capital Planning Commission acquires land on behalf of the United States for the comprehensive development of the park, parkway, and playground system in the District of Columbia and its environs.

1. *George Washington Memorial Parkway.*—Land is acquired along the shores of the Potomac River, above and below Washington from Great Falls to Mount Vernon, one-half the cost of which is borne by the local jurisdictions. Funds made available through 1955 will complete acquisition of the Virginia project from Mount Vernon to a point beyond the Leesburg-Chain Bridge Highway. The 1956 program will make possible the extension of the parkway to lands acquired without cost adjacent to the United States Bureau of Public Roads Research Center, Fairfax County, Va. Also, the 1956 program will complete the parkway in Montgomery County, Md., north of Washington. No start has been made in the Prince George's County, Md., section south of Washington.

2. *Extension of National Capital Park System into Maryland.*—Land is acquired by the Maryland-National Capital Park and Planning Commission with the aid of a one-third contribution by the National Capital Planning Commission for extension of the District of Columbia park system into the Maryland environs. The system now includes units of varying lengths in the stream valleys of Cabin John Branch, Little Falls Branch, Rock Creek, Sligo Creek, Northwest Branch, Paint Branch and Anacostia River. Fiscal year 1955 funds in the amount of $126,000 were appropriated for one unit each in Paint Branch and Little Falls Branch Park. The 1956 program includes one unit each in Oxon Run and Indian Creek Parks. The Oxon Run unit is needed to fill in gaps between the existing Oxon Run Parkway in the District of Columbia and the Suitland Parkway in Maryland. The Indian Creek unit extends from Paint Branch Parkway to Greenbelt Road and is a continuation of the basic plan to conserve the stream valleys tributary to the Anacostia River.

3. *Park, parkway, and playground system in the District of Columbia.*—Land is also acquired in the District of Columbia, with all expenditures being repaid to the United States by the District of Columbia. Acquisitions are part of the Commission's comprehensive plan for the park, parkway and playground system of the National Capital. The 1956 program includes projects to eliminate a difficult maintenance and administrative problem along the edge of Rock Creek Park, to provide for a connection between the Baltimore-Washington Parkway and the Anacostia Parkway, and to acquire urgently needed playgrounds, recreation centers, neighborhood parks and the remaining land necessary to complete and protect important sections of the Fort Drive.

NATIONAL LABOR RELATIONS BOARD—Continued

Salaries and Expenses, National Labor Relations Board—Con.

OBLIGATIONS BY ACTIVITIES

Description	1954 actual	1955 estimate	1956 estimate
1. Field investigation of cases and informal disposition or preparation for formal processing	$4,912,257	$4,481,916	$4,321,975
2. Trial examiner hearing of unfair labor practice cases	698,268	710,431	654,759
3. Board adjudication of cases	1,191,307	1,156,791	1,127,963
4. Securing of compliance with Board orders, including enforcement through court orders	1,984,394	2,051,062	2,045,503
Obligations incurred	8,786,226	8,400,200	8,150,200

PROGRAM AND PERFORMANCE

The Board resolves representation disputes in industry and remedies and prevents unfair labor practices by employers and unions.

1. *Field investigation of cases and informal disposition or preparation for formal processing.*—Charges of unfair labor practices and petitions for elections to resolve representation disputes are investigated in the regional office in which they are filed. Failing settlement, dismissal, or withdrawal of these cases, they are prepared for public hearing. About 87 percent of the unfair labor practice cases and 73 percent of the election cases are closed without the need for public hearing or further formal action.

CASES PROCESSED IN FIELD [1]

	1954 actual	*1955 estimate*	*1956 estimate*
Charges of unfair labor practices	5,961	5,880	5,730
Petitions for representation elections	8,059	7,300	7,100

[1] As distinguished from the number of cases filed.

2. *Trial examiner hearing of unfair labor practice cases.*—Trial examiners conduct public hearings which are the basis of the findings and recommendations set forth in intermediate reports. In fiscal year 1954, 437 reports were issued; for 1955, the estimate is 367; for 1956, 323.

3. *Board adjudication of cases.*—In unfair labor practice cases, the trial examiner's intermediate report becomes the Board order unless exceptions are filed within 20 days. Exceptions are filed to approximately 75 percent of the intermediate reports and are referred to the Board for decision. In contested representation cases the Board may either order an election to determine the choice of bargaining representative or dismiss the case.

DECISIONS ISSUED BY THE BOARD

	1954 actual	*1955 estimate*	*1956 estimate*
Unfair labor practice	229	330	340
Representation	1,559	1,725	1,741

4. *Securing of compliance with Board orders, including enforcement through court orders.*—If the parties do not voluntarily comply with the Board's order, the Board must request the courts to enforce its decision. Most of these contested decisions involve unfair labor practices. In 1954, 175 Board decisions of all kinds required court litigation; for 1955, the estimate is 107; and for 1956, 98.

3. Scientific information exchange	270,653	366,201	350,000
4. Executive direction and management	423,343	382,131	392,000
Obligations incurred	7,953,529	12,657,722	20,000,000

PROGRAM AND PERFORMANCE

The Foundation is responsible for developing a national science policy for the promotion of basic research and education in the sciences and for recommending to the President policies for strengthening the national scientific effort; for supporting basic research; and for improving our scientific manpower through the award of fellowships and through programs in support of education in the sciences. The increased appropriation recommended allows for improvement of the Foundation's basic research and training of scientific manpower programs which are vital to the advancement of the national economy and defense.

1. *National science policy studies.*—As a basis for developing national science policy the Foundation is studying all phases of the Nation's scientific effort including research programs of the Federal and State Govern-

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

ments, universities, other nonprofit institutions, and industry. Studies relating to the supply, demand, and utilization of scientific manpower are also supported.

2. *Support of science—(a) Grants for support of research.*—The Foundation makes grants for basic research principally to educational institutions.

(b) Grants for training of scientific manpower.—The Foundation awards fellowships to science students and supports a program of education in the sciences directed toward stimulating interest in and improving the teaching of science at the high school and college levels.

(c) Review of research and training programs.—Costs for the administration, development, and evaluation of programs for the support of science are included in this activity.

3. *Scientific information exchange.*—Support is provided by the Foundation for the development of improved methods of collecting, translating, cataloging, and disseminating information for the advancement of science.

4. *Executive direction and management.*

[INTERNATIONAL GEOPHYSICAL YEAR]

International Geophysical Year, National Science Foundation

International Geophysical Year: For necessary expenses to carry out the purposes of the National Science Foundation Act of 1950, as amended (42 U. S. C. 1861–1875), as they pertain to the United States program for the International Geophysical Year, [$2,000,000] *including expenses of travel notwithstanding any limitation contained in this Act, $11,000,000,* to remain available until expended. (*Supplemental Appropriation Act, 1955.*)

Appropriated 1955, **$2,000,000** Estimate 1956, **$11,000,000**

AMOUNTS AVAILABLE FOR OBLIGATION

Appropriation or estimate (obligations incurred)—1955, $2,000,000; 1956, $11,000,000.

OBLIGATIONS BY ACTIVITIES

Support of United States program for the International Geophysical Year—1955, $2,000,000; 1956, $11,000,000.

PROGRAM AND PERFORMANCE

This appropriation provides support for the United States program for the International Geophysical Year, a worldwide scientific undertaking involving concurrent research by more than 30 nations, beginning in 1957. The results of this research should benefit our international relations, national defense, agriculture, commerce, and industry. This undertaking involves securing and sharing on a multilateral basis scientific data which will assist our own technological advancements in such fields as weather forecasting and control, radio communications, navigation, and upper atmosphere flight. The United States program will be generally confined to the Western Hemisphere, including an anticipated expedition to the Antarctic.

PROGRAM AND PERFORMANCE

The Railroad Retirement Board administers the railroad retirement system, financed by employer and employee taxes. This appropriation is for that portion of the administrative expenses of the Board required in the operation of this program, and is derived from the railroad retirement account, a trust fund. The retirement system provides employees' annuities for age and disability, spouses' annuities, survivor benefits, and lump-sum death benefits.

Public Law 398, approved June 16, 1954, and Public Law 746, approved August 31, 1954 and amendments to the Social Security Act by Public Law 761, approved September 1, 1954, created a large nonrecurring work load which will make it necessary to request a supplemental appropriation for 1955.

1. *Maintenance of accounts of employee earnings.*—Eligibility for benefits and the amount of benefits are based on individual accounts of compensation. This workload fluctuates with the level of employment in the railroad industry, rates of turnover, and similar factors. This activity is operated jointly with a similar requirement under the railroad unemployment insurance program and the costs are shared on a measured basis.

2. *Processing and certification for payment of initial claims.*—Claims for age and disability annuities, spouses' annuities, survivor benefits, and lump-sum payments are adjudicated and certified for initial payment. The claims load tends to increase each year as more railroad workers seek retirement because of age or disability and as the spouses of retired employees and the survivors of deceased employees become eligible for benefits. Regular claims dispositions were 133,582 in 1954 and are estimated at 133,992 and 135,400 in 1955 and 1956, respectively.

Additional nonrecurring work in 1955 caused by amendments to the Railroad Retirement Act and the Social Security Act will require a supplemental appropriation. This work includes processing approximately 25,000 claims resulting from the reduction from 65 to 60 in the age at which widows may draw annuities; 10,000 claims for recomputation of benefits resulting from the provision that earnings after age 65 may now be disregarded if this will result in a higher annuity; the adjustment of approximately 115,000 cases as a result of increases in social security benefits and the application of minimum benefit guarantees of the Railroad Retirement Act; and approximately 36,000 other adjustments.

3. *Monthly recertification and payment of awarded claims.*—Benefit payments must be authorized each month for those persons on the rolls who continue to remain eligible. The number of monthly benefit payments were 6,525,817 in 1954 and are estimated at 7,000,000 and 7,440,000 in 1955 and 1956, respectively, and will continue to increase annually.

4. *Hearings and appeals.*—Individuals whose claims for annuities or benefits are disallowed or who dispute the award have the right of appeal. There were 188 in 1954 and are estimated at 190 and 200 in 1955 and 1956.

5. *Actuarial services.*—Actuarial studies and estimates are required by the Railroad Retirement Act to determine the adequacy of the tax rate to establish and maintain a sufficient reserve to meet all future payments. Also required are studies to determine the adjustments required between the Federal Old-Age and Survivors Insurance Trust Fund and the Railroad Retirement Account to place the former in the same position in which it would have been if service as an employee under the Railroad Retirement Act after December 31, 1936, had been "employment" under the Social Security Act from that date (45 U. S. C. 228).

6. *General administration.*—Except for administrative activities supported by and concerned with the retirement program exclusively, the cost of general administration is shared between the retirement and the railroad unemployment insurance programs on a measured basis.

OBLIGATIONS BY ACTIVITIES

Description	1954 actual	1955 estimate	1956 estimate
1. Executive direction	$433,572	$468,000	$498,000
2. Staff operations	812,510	602,000	532,000
3. Renegotiation operations (field)	3,897,062	3,430,000	3,220,000
Obligations incurred	5,143,144	4,500,000	4,250,000

PROGRAM AND PERFORMANCE

Under authority of the Renegotiation Act of 1951 (Public Law 9, Mar. 23, 1951, and as amended Sept. 1, 1954, Public Law 764), the Renegotiation Board conducts renegotiation with contractors to eliminate excessive profits in connection with procurement under the national defense program. All contractors and subcontractors who have any business subject to the act are required to file with the Board. There were 32,416 filings in fiscal year 1954 and filings in 1955 and 1956 are estimated at 55,000 and 22,500, respectively. The Board has determined or recovered $189,000,000 in excessive profits from the date of its establishment through August 31, 1954.

1. *Executive direction.*—The Board is responsible for executive direction, review, and final action in all cases. This includes screening all filings involving renegotiable business over $500,000 and requests for exemption under the standard commercial articles and new durable productive equipment clauses.

2. *Staff operations.*—The headquarters staff furnishes technical advice and assistance to the Board and regional organization.

3. *Renegotiation operations.*—The four regional boards conduct renegotiation proceedings and make initial determinations. The field boards make the excessive profit determination in all cases involving less than $800,000 of renegotiable profits; however, this determination may be appealed to the statutory board. All cases involving more than $800,000 are reviewed and approved by the statutory board. The regional boards completed 5,904 renegotiations in fiscal year 1954, and it is estimated that 6,000 will be completed in 1955 and 5,250 in 1956.

PROGRAM AND PERFORMANCE

The Commission maintains facilities for the disclosure of information with respect to securities offered for public sale, seeks to protect the interests of the public against fraud in buying and selling securities, regulates public utility holding companies and investment companies, supervises and regulates securities markets, and renders assistance to courts in reorganization of bankrupt corporations.

1. *Administration of full disclosure provisions of the securities laws.*—Provision is made for securing compliance with the statutory standards of disclosure in offerings of securities registered with the Commission for public sale and in related periodic reports.

2. *The prevention and suppression of fraud in securities transactions.*—Investor losses due to fraud are prevented or minimized by prompt investigation where frauds are

SECURITIES AND EXCHANGE COMMISSION—Continued

Salaries and Expenses, Securities and Exchange Commission—Continued

suspected, through periodic inspection of the accounts of broker-dealer firms, and by surveillance of trading on stock exchanges and in the over-the-counter markets. Provisions are made for a moderate expansion of investigative facilities.

3. *Supervision and regulation of securities markets (stock exchanges and over-the-counter markets).*—National securities exchanges including over-the-counter markets are regulated.

4. *Regulation of public utility holding companies and investment companies.*—This regulation extends to such matters as the financing of holding companies and their subsidiaries, and other matters relating to servicing arrangements and accounting practices. The regulation of investment companies comprises the registration of foreign and domestic investment companies and supervision over various activities.

5. *Assistance to courts in corporate reorganizations under chapter X of the Bankruptcy Act.*—Independent expert assistance is provided in proceedings under chapter X of the Bankruptcy Act. On June 30, 1954, there were 55 cases pending.

6. *Preparation of operational and business statistics.*—Statistical and other data are prepared to provide the Commission and the staff with information needed to administer the securities laws and to produce certain financial data from information filed with the Commission as a part of the overall Government statistical and economic program. It is proposed to expand the latter series of reports.

7. *Executive and staff functions.*

8. *Administrative services.*

SELECTIVE SERVICE SYSTEM

Salaries and Expenses, Selective Service System

Salaries and expenses: For expenses necessary for the operation and maintenance of the Selective Service System, as authorized by title I of the Universal Military Training and Service Act (62 Stat. 604), as amended, including services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a); *purchase of thirty-nine motor vehicles for replacement only;* not to exceed $250 for the purchase of newspapers and periodicals; not to exceed $75,000 for expenses of travel, National Administration, Planning, Training, and Records Management; not to exceed [$190,000] *$150,000* for expenses of travel, State Administration, Planning, Training, and Records Servicing; [$92,500] *and $76,700* for the National Selective Service Appeal Board, of which not to exceed $3,875 shall be available for expenses of travel; [and $205,000 for the National Advisory Committee on the Selection of Doctors, Dentists, and Allied Specialists, of which not to exceed $30,000 shall be available for expenses of travel; $29,003,063] *$28,700,000*: *Provided*, That during the current fiscal year, the President may exempt this appropriation from the provisions of subsection (c) of section 3679 of the Revised Statutes, as amended, whenever he deems such action to be necessary in the interest of national defense.

Appropriations for the Selective Service System may be used for the destruction of records accumulated under the Selective Training and Service Act of 1940, as amended, which are hereby authorized to be destroyed by the Director of Selective Service after compliance with the procedures for the destruction of records prescribed pursuant to the Records Disposal Act of 1943, as amended (44 U. S. C. 366–380): *Provided*, That no records may be transferred to any other agency without the approval of the Director of Selective Service. (*Independent Offices Appropriation Act, 1955.*)

Obligations incurred	27,657,190	28,738,763	28,700,000

PROGRAM AND PERFORMANCE

The primary purpose of the Selective Service System is effective manpower utilization by means of classification of those required to register under the Universal Military Training and Service Act of 1951.

1. *National administration, planning, training and records management.*—The overall administration of the act is the responsibility of national headquarters where policy is determined. This is accomplished by the central office of national headquarters and six regional field offices.

2. *State administration, planning, training, and records servicing.*—Administration of the act within the several States is the responsibility of 56 State headquarters, operating under the policies determined by national headquarters.

3. *Registration, classification, and induction.*—The work in carrying out the functions as they apply to over 15,800,000 registrants is accomplished by more than 42,000 uncompensated citizens assisted by approximately 6,000 clerks at over 4,000 boards. It is the responsibility of these citizens to determine who shall be deferred and for how long in the national interest in agriculture, industry, or other pursuits.

4. *Special boards.*—(*a*) *National Advisory Board.*—Sections 4 (i) and 4 (j) of the act which authorized this Board, will expire July 1, 1955. No funds are included for the Board.

(*b*) *National Selective Service Appeal Board.*—This Board was established pursuant to Executive Order 9988 to act on the classifications of registrants which have been appealed to the President. It is under separate administration but funds are furnished by the Selective Service appropriation.

PROGRAM AND PERFORMANCE

The Smithsonian Institution maintains public exhibits representative of the arts, American history, aeronautics, anthropology, geology, technology, and zoology; preserves for reference and study purposes millions of valuable items of scientific, cultural, and historical interest; conducts research in the natural sciences and in the history of cultures, technology, and the arts; and participates in the international exchange of scientific literature. The 1956 budget provides for continuing an orderly planned program for rehabilitating exhibits and exhibition buildings. During the year 5 exhibition projects and 11 building rehabilitation projects will be completed. The 1956 budget also provides for the procurement of additional storage cases, additional funds for operation and maintenance of the Canal Zone Biological Area, bringing the guard force up to minimum staffing standards, and additional funds for printing and binding.

1. *Management.*—The management staff plans, directs, and controls the Institution's operations and services.

2. *Operations.*—The Institution will continue to operate 2 museums, 2 scientific bureaus, 2 art galleries, the Canal Zone Biological Area, and the International Exchange Service.

3. *General services.*—Five main exhibition buildings are operated and maintained.

3. Administrative services	31,540	38,309	43,647
Obligations incurred	236,484	282,000	300,000

PROGRAM AND PERFORMANCE

Upon petitions being filed, the Board holds formal hearings and determines whether: (1) organizations are "Communist-action organizations," "Communist-front organizations," or "Communist-infiltrated organizations"; (2) whether individuals are officers or members of a "Communist-action organization" or officers of a "Communist-front organization" and required to register as such; (3) whether the registration of particular "Communist-action organizations" or "Communist-front organizations" or of particular individuals should be canceled; and, (4) whether a particular "Communist-infiltrated organization" has ceased to be a "Communist-infiltrated organization." In each case the Board issues a report in writing setting forth its rulings and findings as to the facts, and issues an appropriate order. The appeal by the Communist Party of the United States from the Board's order that the party register as a Communist-action organization was argued in the United States Court of Appeals for the District of Columbia in April 1954. Hearings in at least 9 front cases will be completed by the end of fiscal year 1955, and an additional 10 or more will be completed by the end of fiscal year 1956.

TARIFF COMMISSION—Continued

Salaries and Expenses, Tariff Commission—Continued

PROGRAM AND PERFORMANCE

1. *Research, investigations, and reports on international trade, tariffs, and commercial policies.*—An increase is recommended for this activity to permit the Commission to meet the rising demands for its services, especially in relation to: (*a*) increased public investigations under the "escape clause" and other previously existing statutory provisions; and, (*b*) new duties required by the Customs Simplification Act of 1954, including a major study designed to simplify the existing tariff schedules and the conduct of "antidumping" investigations.

2. *Executive direction and administration.*

Obligations incurred	994,787	1,000,000	1,035,000

OBLIGATIONS BY ACTIVITIES

Adjudication and administration—1954, $994,787; 1955, $1,000,000; 1956, $1,035,000.

PROGRAM AND PERFORMANCE

The Tax Court reviews determinations of tax deficiencies made by the Commissioner of Internal Revenue and decides whether there is deficiency or overpayment in Federal income, estate, gift, and excess profits taxes, and reviews determinations denying claims for refund of excess profits taxes under the special relief sections of the Code. The Court also reviews determinations of excessive profits on contracts renegotiated by the Federal Government.

A trial program of 175 weeks is proposed in these estimates which is the equivalent to that authorized for the Court in the current year. The additional funds requested are for the pay of a judge to be retired in the budget year, the provision for offices and two assistants for a retired judge being recalled, an increase in the cost of stenographic reporting, and certain increases for operating expenses.

The tabulation below shows the estimated work volume of the Court for the fiscal year 1956 and comparative data for the current and prior years:

	Actual 1953	*Actual 1954*	*Percent* [1]	*Estimated 1955*	*Percent* [1]	*Estimated 1956*	*Percent* [1]

UNITED STATES INFORMATION AGENCY

Salaries and Expenses, United States Information Agency

Salaries and expenses: For expenses necessary to enable the United States Information Agency, as authorized by Reorganization Plan Numbered 8 of 1953, *and the United States Information and Educational Exchange Act, as amended (22 U. S. C. 1431 et seq.)*, to carry out international information activities, [and to administer the informational media guarantee program authorized by section 111 (b) (3) of the Economic Cooperation Act of 1948, as amended and continued by section 7 of the Mutual Security Act of 1952 (22 U. S. C. 1509),] including [rents in the District of Columbia;] employment, without regard to the civil-service and classification laws, of (1) persons on a temporary basis (not to exceed $120,000), (2) aliens within the United States, and (3) aliens abroad for service in the United States relating to the translation or narration of colloquial speech in foreign languages (such aliens to be investigated for such employment in accordance with procedures established by the Secretary of State and the Attorney General); travel expenses of aliens employed abroad for service in the United States (*and their dependents*) to and from the United States; salaries, expenses, and allowances of personnel and dependents as authorized by the Foreign Service Act of 1946, as amended (22 U. S. C. 801–1158); expenses of attendance at meetings concerned with activities provided for under this appropriation (not to exceed $6,000); entertainment within the United States (not to exceed $1,000); hire of passenger motor vehicles; insurance of official motor vehicles in foreign countries when required by the law of such countries; purchase of space in publications abroad, without regard to the provisions of law set forth in 44 U. S. C. 322; services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a); payment of tort claims, in the manner authorized in the first paragraph of section 2672, as amended, of title 28 of the United States Code when such claims arise in foreign countries; advance of funds notwithstanding section 3648 of the Revised Statutes as amended; purchase of [caps] *uniforms* for personnel employed abroad; dues for library membership in organizations which issue publications to members only, or to members at a price lower than to others; employment of aliens, by contract, for service abroad; purchase of ice and drinking water abroad; payment of excise taxes on negotiable instruments abroad; loss by exchange; cost of transporting to and from a place of storage and the cost of storing the furniture and household and personal effects of an employee of the Foreign Service who is assigned to a post at which he is unable to use his furniture and effects, under such regulations as the Director may prescribe; actual expenses of preparing and transporting to their former homes the remains of persons, not United States Government employees, who may die away from their homes while participating in activities authorized under this appropriation; radio activities and acquisition and production of motion pictures and visual materials and purchase or rental of technical equipment and facilities therefor, narration, script-writing, translation, and engineering services, by contract or otherwise; maintenance, improvement, and repair of properties used for information activities in foreign countries; fuel and utilities for Government-owned or leased property abroad; rental or lease for periods not exceeding five years of offices, buildings, grounds, and living quarters for officers and employees engaged in informational activities abroad; [reorientation, and rehabilitation materials and equipment for Germany and Austria;] *travel expenses for employees attending official international conferences, without regard to the Standardized Government Travel Regulations and to the rates of per diem allowances in lieu of subsistence expenses under the Travel Expense Act of 1949, but at rates not in excess of comparable allowances approved for such conferences by the Secretary of State;* and purchase of objects for presentation to foreign governments, schools, or organizations; [$77,114,000, of which $3,200,000 shall be derived by transfer from the unobligated balance in the account "International Information Activities, United States Information Agency", and] *$88,500,000*, of which not less than $8,000,000 shall, *if possible*, be used to purchase foreign currencies or credits owned to or owned by the Treasury of the United States [and of which not less than $200,000 shall be available for contracts with one or more private international broadcasting licensees for the purpose of developing and broadcasting under private auspices, but under the general supervision of the United States Information Agency, radio programs to Latin America, Western Europe, as well as other areas of the free world, which programs shall be designed to cultivate friendships with the peoples of the countries of those areas, and to build improved international understanding]: *Provided*, That not to exceed [$35,000] *$150,000* may be used for [representation] *allowances* abroad *as authorized by section 901 (3) of the Foreign Service Act of 1946, as amended (22 U. S. C. 1131)*: *Provided further*, That this appropriation shall be available for expenses in connection with travel of personnel outside the continental United States, including travel of dependents and transportation of personal effects, household goods, or automobiles of such personnel, when any part of such travel or transportation begins in the current fiscal year pursuant to travel orders issued in that year, notwithstanding the fact that such travel or transportation may not be completed during the current year: *Provided further*, That funds may be exchanged for payment of expenses in connection with the operation of information establishments abroad without regard to the provisions of section 3651 of the Revised Statutes (31 U. S. C. 543): *Provided further*, That passenger motor vehicles used abroad exclusively for the purposes of this appropriation may be exchanged or sold, pursuant to section 201 (c) of the Act of June 30, 1949 (40 U. S. C. 481 (c)), and the exchange allowances or proceeds of such sales shall be available for replacement of an equal number of such vehicles and the cost, including the exchange allowance of each such replacement, except buses and station wagons, shall not exceed $1,400: *Provided further*, That, notwithstanding the provisions of section 3679 of the Revised Statutes, as amended (31 U. S. C. 665), the United States Information Agency is authorized in making contracts for the use of international short-wave radio stations and facilities, to agree on behalf of the United States to indemnify the owners and operators of said radio stations and facilities from such funds as may be hereafter appropriated for the purpose against loss or damage on account of injury to persons or property arising from such use of said radio stations and facilities: *Provided further*, That existing appointments and assignments to the Foreign Service Reserve for the purposes of foreign information and educational activities which expire during the current fiscal year may be extended for a period of one year in addition to the period of appointment or assignment otherwise authorized: *Provided further*, That funds appropriated herein shall be available for payment to private organizations abroad in pursuance of contracts entered into for the processing and distribution of motion-picture films.

[No appropriation in this Act shall be available for more than twenty employees and two studios for the operation of the International Broadcasting Service in New York City after December 31, 1954.] (*Departments of State, Justice, and Commerce and the United States Information Agency Appropriation Act, 1955.*)

PROGRAM AND PERFORMANCE

The purpose of the United States Information Agency is to submit, by means of communication techniques, persuasive evidence to peoples of other nations which will demonstrate that their own legitimate aspirations for freedom, progress, and peace are supported and advanced by the objectives and policies of the United States. The intention is to encourage foreign peoples to take action consistent with United States national objectives.

The increase of approximately $11.4 million in available operating funds will provide for: (1) approximately $9.7 million directly related to intensified programs carried out by the Agency in foreign countries; (2) some $1.6 million for an expansion of direct radio broadcasting programs, increased television materials, and for restoration to a 12-month basis of the program; and (3) a net increase of $106,000 in staff activities, primarily for encouragement of private enterprise cooperation in the programs of the Agency.

1. *Overseas missions.*—The program is conducted through 210 posts in 79 countries and is known abroad as the United States Information Service (USIS). The overseas missions carry out country programs designed to meet international and local political situations. These programs are being intensified and strengthened in critical areas. USIS missions prepare materials locally, to the extent possible, utilizing all local communication techniques available.

2. *Radio broadcasting and television service.*—This service will produce radio programs in 35 foreign languages and English, an increase of 1 language over the current year schedule. Programs originate from the United States and from two points overseas. They are beamed directly into the target areas by overseas transmitter facilities. The service operates a total of 76 transmitters at 7 locations in the United States and at 9 overseas locations with a combined radio frequency power output of over 8 million watts. It will originate a total of 38 hours of programing daily in 1956, an increase of 1¾ hours over the current daily schedule. About 60 percent of this programing is targeted to countries within the Communist area. The service supplies the USIS missions with recorded radio programs and scripts and with radio supplies and equipment needed for USIS mission radio program activities.

Moreover, to exploit the opportunity provided by the rapidly developing television industry abroad, this service supplies newsreels and other series of television programs to the USIS missions for placement on local outlets.

3. *Media services.*—These services provide support for overseas country programs.

(*a*) *Press service.*—This service maintains communications facilities for the transmission of daily news, editorial and feature materials used in 79 countries. Press materials are developed for adaptation by overseas missions for special local programs. Photographic and printing supply support is provided for the production of pamphlets and magazines.

(*b*) *Motion picture service.*—This service supplies the missions with films produced or acquired in the United States, which are translated into as many as 40 foreign languages. It adapts films for specific country or area use, and provides guidance in the local production, use, and distribution of films. The service also supplies the missions with motion picture equipment such as mobile units and projectors.

(*c*) *Information center service.*—This service supplies 164 information centers (United States operated) in 67 countries and 42 binational centers (operated jointly by the United States and the host country) in 24 countries with collections of American books and other publications, both in English and in translations; with English-teaching materials; and with exhibits. It assists American publishers in distributing selected products overseas. The service also provides books and periodicals for presentation to selected individuals and groups.

4. *Program direction and appraisal.*—This activity covers the direction and appraisal functions of the United States Information Agency program in accordance with its assigned mission. It includes the collection of research and intelligence data, coordination and utilization of American private enterprise, and program and policy planning.

5. *Administration and staff support.*—Provision is made in this activity for the administrative and staff support necessary for the conduct of the information program. Included are physical and personnel security functions, administrative servicing, and legal counsel.

6. *Administrative support (reimbursable).*—Administrative support services for the Agency's overseas operations and certain special services required in support of headquarters operations are obtained through reimbursable arrangements with the Department of State.

7. *Acquisition and construction of radio facilities.*—Available balances in this account are being used for com-

PROGRAM AND PERFORMANCE

This appropriation provides for all administrative expenses of the agency with the exception of those applicable to the Department of Medicine and Surgery.

The appropriation of $160,300,000 proposed for 1956 is $7,372,300 less than the amount appropriated for 1955. Workloads of the various programs as estimated for 1956 are not expected to change significantly from those estimated for 1955.

1. *General administration.*

2. *Insurance.*—Provision is made for Government insurance to eligible servicemen and veterans.

AVERAGE NUMBER OF ACTIVE POLICIES IN FORCE

	1954 actual	*1955 estimate*	*1956 estimate*
United States Government life insurance	423,494	407,000	392,000
National service life insurance	6,249,735	6,030,000	6,130,000

3. *Veterans' benefits.*—Veterans' and dependents' claims for compensation, pensions, or other benefits are adjudicated; and guardianship and fiduciary service is furnished helpless or incompetent veterans and minor dependents.

WORKLOAD

	1954 actual	*1955 estimate*	*1956 estimate*
Rating actions (disability)	1,537,465	1,308,700	1,196,700
Authorization actions (disability)	740,989	771,500	766,000
Rating actions (death)	83,254	84,700	86,000
Authorization actions (death)	534,612	536,996	555,481
Cases involving guardianship or fiduciary relationship	326,984	337,194	345,420
Field examinations	135,509	136,000	137,000

Eligibility of veterans for vocational rehabilitation and education is determined; guidance is furnished to trainees; and contracts are made with training institutions for tuition and other charges.

AVERAGE NUMBER OF VETERANS IN TRAINING

	1954 actual	*1955 estimate*	*1956 estimate*
Servicemen's Readjustment Act	288,415	132,000	60,000
Vocational rehabilitation trainees	23,867	23,900	21,000
Veterans Readjustment Assistance Act	217,494	385,000	435,000

Loan guaranty operations include (1) issuance of certificates of loan guaranty or insurance; (2) servicing of loans in reported default; (3) payment of claims of lenders on defaulted loans; (4) acquisition, management, and disposal of property when necessary to protect the Government's interest; (5) the making of direct loans to veterans in certain areas; and (6) providing assistance to specified paraplegic veterans in acquiring specially adapted housing.

WORKLOAD

	1954 actual	*1955 estimate*	*1956 estimate*
Loans guaranteed or insured	332,684	475,000	432,000
Direct loans approved	14,597	23,000	
Defaults processed	55,050	65,000	70,000
Claims paid	4,051	4,250	4,420

Total expenditures	175,147,332	165,829,158	159,200,000
Expenditures are distributed as follows:			
Out of current authorizations	175,147,332	157,672,300	150,300,000
Out of prior authorizations		8,156,858	8,900,000

Medical Administration and Miscellaneous Operating Expenses, Veterans Administration

Medical administration and miscellaneous operating expenses: For expenses necessary for administration of the medical, hospital, domiciliary, special service, construction and supply, research, and employee education and training activities; expenses necessary for carrying out programs of medical research and of education and training of employees, as authorized by law; [and] not to exceed [$834,388] *$751,800* for expenses of travel of employees paid from this appropriation, *and those engaged in training programs*; [$14,654,000] *not to exceed $2,700 for newspapers and periodicals; and not to exceed $43,700 for preparation, shipment, installation, and display of exhibits, photographic displays, moving pictures, and other visual educational information and descriptive material, including purchase or rental of equipment; $15,294,000.* (*5 U. S. C. 29–97, 835–842; 38 U. S. C. 11–11a, 15–15N, 253–254, 430, 434, 693–693b, 697, 706, 706a, 706b, 745; ch. 12A (V. R. 1 (a), part VII, V. R. 6 (a), V. R. 7 (a), V. R. 10); Independent Offices Appropriation Act, 1955.*)

Appropriation 1955, **$14,654,000** Estimate 1956, [a] **$15,294,000**

[a] Includes $431,000 for activities previously carried under "General operating expenses, Veterans Administration." The amounts obligated in 1954 and 1955 are shown in the schedule as comparative transfers.

AMOUNTS AVAILABLE FOR OBLIGATION

(Balances for June 30, 1954, are as certified under sec. 1311, Public Law 663)

	1954 actual	1955 estimate	1956 estimate
Appropriation or estimate	$14,870,400	$14,654,000	$15,294,000
Recovery of prior year obligations	34		
Reimbursements from non-Federal sources	1,477		
Reimbursements from other accounts	1,316		
Total available for obligation	14,873,227	14,654,000	15,294,000
Unobligated balance, estimated savings	−395,502		
Obligations incurred	14,477,725	14,654,000	15,294,000
Comparative transfer from "General operating expenses, Veterans Administration"	1,259,607	422,216	
Comparative transfer to "Major alterations, improvements, and repairs, Veterans Administration"	−510,570		
Total obligations	15,226,762	15,076,216	15,294,000

NOTE.—Reimbursements from non-Federal sources above are obtained from sale of personal property (Public Law 152, 81st Cong.).

OBLIGATIONS BY ACTIVITIES

Description	1954 actual	1955 estimate	1956 estimate
1. Medical, hospital, and domiciliary administration	$7,560,644	$7,219,467	$6,962,300
2. Administration of the construction program	1,210,903	1,056,749	1,041,700
3. Prosthetic testing and development	799,719	800,000	980,000
4. Medical research	4,542,916	4,700,000	5,110,000
5. Medical education and training	1,112,580	1,300,000	1,200,000
Total obligations	15,226,762	15,076,216	15,294,000

PROGRAM AND PERFORMANCE

1. *Medical, hospital, and domiciliary administration.*—This covers the development, implementation, and administration of policies, plans, and broad program objectives.

2. *Administration of the construction program.*—This includes the general supervision over the design, construction, and operation of buildings, real property management, and accident and fire protection.

3. *Prosthetic testing and development.*—This includes the testing and development of prosthetic appliances.

4. *Medical research.*—Medical research projects are conducted in Veterans Administration laboratories or in universities or other institutions, whichever is more advantageous or economical.

5. *Medical education and training.*—This covers (*a*) residency and internship training, (*b*) postgraduate and inservice training, and (*c*) medical illustration.

Inpatient Care, Veterans Administration

Inpatient care: For expenses necessary for the maintenance and operation of hospitals and domiciliary facilities and for the care and treatment of beneficiaries of the Veterans Administration in facilities not under the jurisdiction of the Veterans Administration as authorized by law, including the furnishing of recreational articles and facilities; maintenance and operation of farms; repairing, altering, improving or providing facilities in the several hospitals and homes under the jurisdiction of the Veterans Administration, not otherwise provided for, either by contract, or by the hire of temporary employees and purchase of materials; purchase of [sixty] *ninety-six* passenger motor vehicles for replacement only; not to exceed [$315,000] *$246,000* for expenses of travel of employees; *uniforms or allowances therefor as authorized by the act of September 1, 1954 (68 Stat. 1114);* and aid to State or Territorial homes in conformity with the Act approved August 27, 1888, as amended (24 U. S. C. 134) for the support of veterans eligible for admission to Veterans Administration facilities for hospital or domiciliary care; [$598,127,000] *$626,229,600*, including the sum of [$7,134,500] *$7,229,600* for reimbursable services performed for other Government agencies and individuals: *Provided*, That allotments and transfers may be made from this appropriation to the Department of Health, Education, and Welfare (Public Health Service), the Army, Navy, Air Force, and Interior Departments, for disbursement by them under the various headings of their applicable appropriations, of such amounts as are necessary for the care and treatment of beneficiaries of the Veterans Administration: *Provided further*, That the foregoing appropriation is predicated on furnishing inpatient care and treatment to an average of [127,000] *131,484* beneficiaries during the fiscal year [1955] *1956* excluding members in State or Territorial homes, and if a lesser number is experienced such appropriation shall be expended only in proportion to the average number of beneficiaries furnished such care and treatment.

[For an additional amount for "Inpatient care", $3,000,000: *Provided*, That this amount is predicated on furnishing inpatient care and treatment to an average of 570 beneficiaries during the fiscal year 1955 in addition to those heretofore provided for.] *(5 U. S. C. 29–97, 835–842; 38 U. S. C. 11–11a-c, 15–15N, 434, 488a, 693a, 697, 706, 706a, 706b, 745; 24 U. S. C. 71–154; ch. 12A (V. R. 6 (a) and V. R. 10); Independent Offices Appropriation Act, 1955; Supplemental Appropriation Act, 1955.)*

Appropriated 1955, **$593,992,500** Estimate 1956,[a] **$619,000,000**

[a] Includes $1,100,000 for activities previously carried under "General operating expenses," Veterans Administration and excludes $747,578 for activities now carried under "Outpatient care, Veterans Administration." The amounts obligated for 1954 and 1955 are shown in the schedule as comparative transfers.

AMOUNTS AVAILABLE FOR OBLIGATION

(Balances for June 30, 1954, are as certified under sec. 1311, Public Law 663, except allocation to Department of the Army)

	1954 actual	1955 estimate	1956 estimate
Appropriation or estimate		$593,992,500	$619,000,000
Reimbursements from non-Federal sources		2,905,000	2,904,400

Obligations Payable Out of Reimbursements From Other Accounts			
1. Maintenance and operation of hospitals: (c) General medical hostals	3,952,293	4,229,500	4,325,200
2. Contract hospitalization: (c) Federal hospitals	3,491		
3. Maintenance and operation of domiciliary facilities: (a) Operation of Veterans Administration homes	11,854		
Total obligations payable out of reimbursements from other accounts	3,967,638	4,229,500	4,325,200
Total obligations	593,387,316	601,526,422	626,229,600

PROGRAM AND PERFORMANCE

1. *Maintenance and operation of hospitals.*—This covers the operation of all Veterans Administration hospitals. The estimated obligations for 1956 exceed 1955 by approximately $24,664,000 due to the greater number of beds to be operated to accommodate an average daily patient load increase of 4,239. The average employment listed below excludes the equivalent employment of consultants and terminal leave payments.

Veterans Administration hospitals:	*1954 actual*	*1955 estimate*	*1956 estimate*
Neuropsychiatric hospitals:			
Number of hospitals	38	40	40
Average number of operating beds	52,280	54,514	55,832
Average daily patient load	49,528	51,049	52,824
Average employment	35,568	36,726	38,543
Tuberculosis hospitals:			
Number of hospitals	21	21	21
Average number of operating beds	9,041	9,188	9,188
Average daily patient load	8,202	8,228	8,228
Average employment	9,939	9,803	9,763
General, medical, and surgical hospitals:			
Number of hospitals	111	111	111
Average number of operating beds	52,923	54,649	56,467
Average daily patient load	45,761	46,393	48,857
Average employment	66,332	67,151	69,935
Total Veterans Administration hospitals:			
Number of hospitals	170	172	172
Average number of operating beds	114,244	118,351	121,487
Average daily patient load	103,491	105,670	109,909
Average employment	111,839	113,680	118,241

2. *Contract hospitalization.*—This covers the hospitalization m other Federal hospitals for service and non-service-connected disabilities where Veterans Administration facilities are not available. It also covers the use of non-Federal hospitals which are limited to treatment of service-connected disabilities, except that female veterans, veterans in training under Public Law 16, 78th Congress, and veterans in United States Territories and possessions may also receive treatment of non-service-connected disabilities. The reduction in estimated obligations of $1,244,267 below 1955 is due to an estimated reduction in average daily patient load.

Average daily patient load:	*1954 actual*	*1955 estimate*	*1956 estimate*
Civil hospitals	1,690	1,602	1,552
Municipal and State hospitals	2,039	1,620	1,588
Other Federal hospitals	1,724	1,609	1,435
Total	5,453	4,831	4,575

3. *Maintenance and operation of domiciliary facilities.*—This covers the cost of domiciliary care of veterans in Veterans Administration facilities and in State institutions. The net increase in the estimated obligations over 1954 of approximately $2,307,000 results principally from an increased member load in State institutions and legislation raising the maximum payments per member from $500 to $700 per year. The average employment listed below excludes the equivalent employment of consultants and terminal leave payments.

Domiciliaries:	*1954 actual*	*1955 estimate*	*1956 estimate*
Number of domiciliaries	17	17	17
Average number of operating beds	17,635	17,751	17,751
Average daily member load:			
Veterans Administration domiciliaries	16,851	17,000	17,000
State homes	8,346	8,469	8,700
Average employment	3,859	3,942	3,942

Outpatient Care, Veterans Administration

Outpatient care: For expenses necessary for furnishing outpatient care to beneficiaries of the Veterans Administration, as authorized by law, including *purchase of ten passenger motor vehicles for replacement only; uniforms or allowances therefor as authorized by the Act of September 1, 1954 (68 Stat. 1114); and* not to exceed [$178,000] *$170,000* for expenses of travel of employees; [$82,134,000] *$82,089,000*, of which not exceeding [$11,200,000] *$11,500,000* shall be available for outpatient fee basis dental care: *Provided*, That no part of this appropriation shall be available for outpatient dental services and treatment, or related dental appliances with respect to a service-connected dental disability which is not compensable in degree unless such condition or disability is shown to have been in existence at time of discharge and application for treatment is made within one year after discharge [or by December 31, 1954, whichever is later]: *Provided further*, That this limitation shall not apply to adjunct outpatient dental services or appliances for any dental condition associated with and held to be aggravating disability from such other service-incurred or service-aggravated injury or disease. (*38 U. S. C. 488a, 693d, 706, 706a, 706b, 745, ch. 12A, (V. R. 1 (a), pt. VII note, V. R. 7 (a)); 68 Stat. 477; Independent Offices Appropriation Act, 1955.*)

Appropriated 1955, **$82,134,000** Estimate 1956, [a] **$82,089,000**

[a] Includes $290,000 for activities previously carried under "General operating expenses, Veterans Administration" and $747,578 for activities previously carried under "Inpatient care, Veterans Administration." The amounts obligated in 1954 and 1955 are shown in the schedule as comparative transfers.

AMOUNTS AVAILABLE FOR OBLIGATION

(Balances for June 30, 1954, are as certified under sec. 1311, Public Law 663)

	1954 actual	1955 estimate	1956 estimate

Total obligations	2,497,495,394	2,439,388,916	2,800,000,000

PROGRAM AND PERFORMANCE

This appropriation provides for all compensation, pensions, and allowances, including emergency officers' retirement pay and annuities, and initial burial allowances of deceased veterans. The increased cost of Public Laws 695 and 698 raising the payments approximately 5 percent on compensation and pension cases are estimated for 1956 as $113 million and $39 million respectively. Savings of $7 million are estimated to result from a review of the status of dependent parents during the past year. The total appropriation requested amounts to $2.8 billion, which represents an increase of $120,611,084 over the estimated requirements for the current fiscal year and an increase of $302,504,606 compared with the preceding fiscal year.

Experience indicates that requirements for payments on all major non-service-connected rolls will continue to increase at a rate which exceeds the decrease in requirements for World War I and II veterans' compensation. Payments to all Korean conflict categories will also increase. It is anticipated that a supplemental appropriation of approximately $240 million will be required for fiscal year 1955. The supplemental is not shown in the obligation and expenditure schedules.

4. Housing grants for disabled veterans	5,250,735	5,509,600	5,626,000
Total obligations	604,330,433	533,280,017	628,097,000

PROGRAM AND PERFORMANCE

These benefits apply to the cost of subsistence, tuition, supplies, and equipment for the training of World War II veterans, and to education and training allowances for Korean veterans; tuition, supplies, and equipment for disabled veterans requiring rehabilitation; gratuities, claims, and property acquisition costs on veterans' loans; and housing grants for disabled veterans.

1. *Education and training.*—Load forecasts of trainees are based upon an analysis of trends in each of the four major categories of training as follows:

	1954 actual	*1955 estimate*	*1956 estimate*
Public Law 346:			
Institutions of higher learning	83,701	44,000	22,000
Institutions below the college level	137,308	70,000	35,000
Institutional on-farm	53,241	15,000	2,000
Job training	14,165	3,000	1,000
Total, Public Law 346	288,415	132,000	60,000
Public Law 550:			
Institutions of higher learning	100,464	166,000	184,000
Institutions below the college level	67,658	136,000	157,000
Institutional on-farm	11,374	27,000	32,000
Job training	37,998	56,000	62,000
Total, Public Law 550	217,494	385,000	435,000
Total, Public Laws 346 and 550	505,909	517,000	495,000

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

2. *Vocational rehabilitation for disabled veterans.*—Average monthly training load was 23,867 during fiscal year 1954. It is estimated on the basis of current trends that the monthly average will be 23,900 in fiscal year 1955 and 21,000 in 1956.

3. *Loan guaranty.*—Loan forecasts are based on current monthly trends and the assumption that construction of housing units will continue at a relatively high level.

4. *Housing grants for disabled veterans.*—This assistance in acquiring suitable housing is provided to veterans with specified total and permanent service-connected disabilities. Of the estimated 7,000 eligible, 5,304 have established their basic eligibility as of June 30, 1954. Of these, 3,898 had made formal applications for a grant, and 3,622 applications have been approved.

5. *Supplemental requirement.*—In this program and performance statement, effect has been given to an anticipated 1955 supplemental appropriation of approximately $108,000,000. The supplemental is not shown in the obligation and expenditure schedules. Additional funds will be required during fiscal year 1955 as a result of two factors: (*a*) Balance available from fiscal year 1954 is $50,832,049 less than had been anticipated; (*b*) experience indicates that the number of veterans who will be in training under Public Law 346 and the average cost per veteran in training under Public Law 550 will be greater than previously expected.

WORKLOAD BY ACTIVITIES

Obligations incurred	5,046,463	5,258,000	5,026,000

PROGRAM AND PERFORMANCE

Payments are made to veterans who suffered permanent and total disability as a result of war service or during the postwar period in which they carried World War I war-risk insurance. Payments are being made to beneficiaries of members of the Armed Forces who died in service or who died in the postwar period during which this type of insurance was in force. Also, payments are made to the United States Government life insurance fund on account of certain total disability claims and death claims under United States Government life insurance. In addition to the annual appropriation there is authorized a permanent indefinite appropriation, representing war-risk insurance premiums transferred from the United States Government life insurance fund (38 U. S. C. 442, 517).

Comparative summaries by fiscal years are as follows:

WORKLOAD BY ACTIVITY

OBLIGATIONS BY ACTIVITIES

Description	1954 actual	1955 estimate	1956 estimate
1. Hospital bed-producing projects	$8,909,702	$38,382,755	$54,073,447
2. Conversions at existing hospitals	115,888	124,805	
3. Major rehabilitation and modernization at existing hospitals	8,374,823	20,400,629	15,551,553
4. Non-bed-producing projects	467,468	679,683	
5. Construction of administrative facilities at hospital sites	45,761	35,929	
6. Initial portable equipment	2,957,212	4,776,199	3,000,000
Total obligations	20,870,854	64,400,000	72,625,000

PROGRAM AND PERFORMANCE

This is for the construction of new hospitals and domiciliary facilities and additions to and conversions of existing hospitals, domiciliary facilities and administrative facilities at hospital sites. Provision also is made for major rehabilitation and modernization of existing hospitals and homes and for the purchase of initial portable equipment.

1. *Hospital bed-producing projects.*—These construction programs include 78 projects that provide 38,420 new beds.

NEW BEDS

	New hospitals	*Additions to existing hospitals*	*Total*
Neuropsychiatric	9,465	1,370	10,835
Tuberculosis	1,200	1,180	2,380
General medical and surgical	23,275	1,630	24,905
Domiciliary facilities	300		300
Total	34,240	4,180	38,420

Of the total, Army Corps of Engineers was responsible for the construction of 44 projects, providing 21,918 beds. The VA is responsible for the remaining 34 projects, providing 16,502 beds. The status of the construction program for new hospital beds is as follows:

NUMBER OF BEDS

	1954 actual	*1955 estimate*	*1956 estimate*
Under construction beginning of year	8,700	1,500	1,250
Put under construction during year		1,250	2,680
Completed during year	7,200	1,500	
Total completed at end of year	31,990	33,490	33,490
Under construction at end of year	1,500	1,250	3,930
Not under construction at end of year	4,930	3,680	1,000

The following table shows status of work on bed programs in terms of dollar value of construction:

DOLLAR VALUE OF CONSTRUCTION PROGRAMS

[Millions]

	1954 actual	*1955 estimate*	*1956 estimate*
Total completed at end of year	$672.8	$688.8	$717.8
Not completed end of year	105.0	89.0	60.0

2. *Conversions at existing hospitals.*—Under this program five existing facilities are being adapted to meet current needs due to the changing character of the patient-load.

3. *Major rehabilitation and modernization at existing hospitals.*—This program includes projects which provide for replacement of structures and other construction required to bring selected portions of certain old hospitals,

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

insofar as possible, up to the standards of the new hospitals. Also included are major alteration and repair projects with an estimated cost of more than $250,000.

4. *Non-bed-producing projects.*—These programs include construction of alterations, modernization and major repairs at hospitals and domiciliary facilities. Projects with an estimated cost of more than $250,000 are carried under the Major Rehabilitation and Modernization Program; while projects with an estimated cost of $250,000 or less are carried under the "Major Alterations, Improvements and Repair" appropriation.

5. *Construction of administrative facilities at hospital sites.*—There is one project in this program, the regional office building in Chicago, Ill., which was substantially complete in 1953 at a cost of approximately $5.4 million.

6. *Initial portable equipment.*—This program provides initial portable equipment for new hospitals and for major alterations and improvements to existing hospitals.

Unfinanced contract authorization.—The contract authorization was fully financed as follows:

	1954 actual
Unfinanced balance at beginning of year	$21,185,664
Appropriation applied to contract authorizations	−21,185,664
Unfinanced balance at end of the year

Obligations incurred	73,656,719	31,998,155	81,972,480

PROGRAM AND PERFORMANCE

Payments are made to the national service life insurance fund to meet (*a*) death claims and waivers of premium where such claims are determined to be due to the extra hazards of military or naval service; (*b*) claims for gratuitous insurance; (*c*) waivers of recovery of erroneous payments or overpayments from the fund; (*d*) certain other payments. In addition to the annual appropriation, there is authorized a permanent indefinite appropriation, representing premium payments which in certain cases are made directly to this account (38 U. S. C. 802 (c) (2), 802 (v) (1)).

WORKLOAD BY ACTIVITY

Description	*1954 actual*	*1955 estimate*	*1956 estimate*
1. Payments to "National service life insurance fund, Veterans Administration":			
(a) For death and disability claims traceable to extra hazard of military service:			
(1) Death claims (policies, not lives)	3,306	6,142	852
(2) Disability claims	28,778	27,790	26,640

WORKLOAD BY ACTIVITY—continued

Description	*1954 actual*	*1955 estimate*	*1956 estimate*
1. Payments to "National service life insurance fund, Veterans Administration":			
(b) For gratuitous insurance (claims processed)	1,241	430	430
(c) For waiver of recovery of erroneous payments (number of erroneous cases)	37	40	40
(d) For deaths while under waiver provisions of Public Law 23, 82d Cong	5,852	3,449	2,832

2. Medical care and treatment of veterans	1,498,589	1,564,000	2,629,000
Obligations incurred	4,494,788	7,064,000	3,332,801

PROGRAM AND PERFORMANCE

The Philippine Government is authorized to receive grants for (1) the construction and equipping of veterans hospitals, in the total amount of $22,500,000, and (2) the medical care and treatment of certain veterans in the Philippines, at not to exceed $3,285,000 per annum. The authority to reimburse the Philippine Government for the medical care and treatment of certain veterans was extended for 5 years by Public Law 421, approved June 18, 1954, with gradually decreasing limitation on the amount authorized each year.

It is estimated that a supplemental appropriation of $720,000 will be required in fiscal year 1955 for medical care and treatment of veterans as the appropriation was predicated on the expiration of the medical care and treatment grants as of December 31, 1954.

OBLIGATIONS BY OBJECTS

11 Grants, subsidies, and contributions—1954, $4,494,788; 1955, $7,064,000; 1956, $3,332,801.

Not to exceed 5 per centum of any appropriation for the current fiscal year for "Compensation and pensions", "Readjustment benefits", "Military and naval insurance", "National service life insurance", and "Servicemen's indemnities", may be transferred, to any other of the mentioned appropriations, but not to exceed 10 per centum of the appropriation so augmented.

Appropriations available to the Veterans Administration for the current fiscal year for salaries and expenses shall be available for services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a).

Appropriations available to the Veterans Administration for the current fiscal year for "Inpatient care" and "Outpatient care" shall be available for funeral, burial, and other expenses incidental thereto (except burial awards authorized by Veterans [Administration] Regulation Numbered 9 (a), as amended), for beneficiaries of the Veterans Administration receiving care under such appropriations.

No part of the appropriations in this Act for the Veterans Administration (except the appropriation for "Hospital and domiciliary facilities") shall be available for the purchase of any site for or toward the construction of any new hospital or home.

No part of the foregoing appropriations shall be available for hospitalization or examination of any persons except beneficiaries entitled under the laws bestowing such benefits to veterans, unless reimbursement of cost is made to the appropriation at such rates as may be fixed by the Administrator of Veterans Affairs. (*Independent Offices Appropriation Act, 1955.*)

OBLIGATIONS BY ACTIVITIES

Purchase of automobiles and other vehicles—1954, $4,393,735; 1955, $3,840,000; 1956 $1,354,909.

PROGRAM AND PERFORMANCE

Up to $1,600 is paid toward the purchase of an automobile or other conveyance for certain disabled veterans. Through June 30, 1954, 41,091 automobiles and other conveyances were provided for disabled veterans. It is estimated that 2,400 will be provided in fiscal year 1955 and 846 in 1956. In 1953, $5 million was appropriated to be available until expended and it is estimated this will be exhausted by the end of 1956.

OBLIGATIONS BY OBJECTS

ADMINISTRATIVE EXPENSES BY ACTIVITIES—continued

Description	1954 actual	1955 estimate	1956 estimate
Obligations Payable Out of Reimbursements From Other Accounts			
1. Supervision and examination of and facilities and services to farm credit banks and corporations	$11,712		
Obligations incurred	2,148,798	$2,320,000	$2,320,000

PROGRAM AND PERFORMANCE

The Administration provides supervision, examination, facilities, and services to a coordinated agricultural credit system of Farm Credit banks and corporations which make credit available to farmers and their cooperatives. Administrative expenses are paid from assessments collected from Farm Credit banks and corporations. The assessments are determined by cost analysis and are in proportion to services rendered.

1. *Supervision and examination of and facilities and services to farm credit banks and corporations.*—Provision is made for supervision and annual examination of 12 Federal land banks (wholly farmer-owned); 12 production credit corporations (wholly Government-owned); 13 banks for cooperatives (mixed ownership); 12 Federal intermediate credit banks (wholly Government-owned); the Federal Farm Mortgage Corporation (wholly Government-owned); 1,123 national farm loan associations; and 498 production credit associations. These credit institutions are furnished such services as assistance in financing and investments, custody of collateral for bonds and debentures, credit analysis, development of appraisal standards and policies, preparation of reports and budgets, and development and distribution of information on farm credit.

REVOLVING AND MANAGEMENT FUNDS

PUBLIC ENTERPRISE FUNDS

ATOMIC ENERGY COMMISSION

Revolving Fund, Defense Production Guaranties, Atomic Energy Commission

BUSINESS-TYPE STATEMENTS

PROGRAM AND PERFORMANCE

Guaranties are given on loans made by private sources to finance construction or operation of defense production facilities. In 1954 guaranties were in force on six loans, for which the total amount of credit available to the borrowers was $3,090,000. The ratio of guaranties ranged from 70 percent to 95 percent. It is estimated that in 1955 and 1956 guaranties will be in force on seven loans for which the total amount of credit available to the borrowers will be $10,000,000 in each year. Loans may be purchased by the Government if necessary to keep financing in effect. The Atomic Energy Commission has not yet been required to purchase any loans. Revenues from guaranty fees and interest on purchased loans are used to pay administrative expenses. Advances from appropriations available for procurement may be made to this fund for its temporary use. Net earnings are retained to meet possible future losses (Defense Production Act of 1950, sec. 301).

PURPOSE AND FINANCIAL ORGANIZATION

The Bank is authorized by the Export-Import Bank Act of 1945 (12 U. S. C. 635) "to aid in financing and to facilitate exports and imports and the exchange of commodities between the United States or any of its Territories or insular possessions and any foreign country or the agencies or nationals thereof." In carrying out its objectives, it is the policy of the Bank to supplement and encourage rather than compete with private capital, and to make foreign trade loans that are generally for specific purposes and that offer reasonable assurance of repayment. The Bank guarantees participations by commercial banks in these loans. It also underwrites war risk and expropriation insurance on commodities stored abroad.

Public Law 570, approved August 9, 1954, establishes a bipartisan board of directors for the Bank, increases its lending authority by $500 million, makes the president of the Bank a member of the National Advisory Council on International Monetary and Financial Problems, and creates an advisory committee of nine members broadly representative of production, commerce, finance, agriculture, and labor to advise with the Bank on its programs.

Other operations.—As agent for the Foreign Operations Administration, the Bank administers (1) the credits authorized under the Mutual Security Act of 1954 and prior legislation, (2) currency transfer guaranties and guaranties against loss from expropriation and confiscation, (3) two emergency wheat loans, and (4) the $100 million credit for the European Steel and Coal Community.

The Bank makes payments for the United States Information Agency relating to currency transfer guaranties on foreign sales of American publications and movies.

Defense production loans are made and administered by the Bank for the Office of Defense Mobilization.

Program and financial statements for these operations are in the Funds Appropriated to the President section of the Budget.

The Bank also acts as collecting agent for the Treasury on the $1 billion settlement agreement for claims of the United States for postwar economic assistance to the Federal Republic of Germany. Receipts are included in the miscellaneous receipts table of the Budget.

Funds from United States Treasury.—Funds of the Bank derive from a Treasury subscription to capital stock of $1 billion and authority to borrow from the Treasury up to $4 billion.

Utilization of private capital.—The Bank has continued its efforts to obtain funds for new credits in suitable cases from commercial banks and other private sources with repayment guaranteed by Export-Import Bank. Exporters who receive assistance in extending credit to their foreign purchasers are expected to carry a portion of the credit for their own account. Also, in February 1954 the Bank sold to private interests, without recourse, $5.7 million first mortgage bonds, at par and accrued interest, constituting the balance of a 1948 loan for an iron-ore development in Canada.

ANALYSIS OF BUDGET PROGRAMS

The basic purpose of the Bank is to facilitate and assist both the export and import trade of the United States. As requirements of the national defense and of American foreign traders change, so does the relative importance of various types of credits authorized. At present, United States exporters find themselves for the first time in some 15 years in a "buyer's market" instead of a "seller's market." Moreover, extended credit terms are being offered by foreign competitors, as a result of export credit insurance programs sponsored by the governments of at least 14 of the leading industrial nations. Consequently, American exporters now must offer credit instead of selling largely for cash. They are calling on the Bank for greatly expanded assistance on an expedited basis.

Total credits and guaranties extended by the Bank are estimated to amount to $460 million in fiscal 1955 and $665 million in 1956. These may be grouped in the categories below although credits often serve more than the purpose under which they are listed.

1. *Deferred payment financing for exporters and importers.*—As heretofore, credit facilities will be afforded small United States exporters and importers who are unable to secure assistance from commercial banks. Authorizations for this purpose amounted to approximately $100,000 during fiscal 1954 and are not expected to decrease during the next 2 years.

Examples of exporter credits to assist United States manufacturers to sell abroad on deferred payments which were authorized in fiscal 1954 include 2 credits to finance the sale of aircraft to Brazilian airlines and 1 sale to a Portuguese airline for a total of about $7 million, and smaller credits to assist in financing the export of textile machinery from the United States.

The number of applications for assistance of this type is rapidly growing. These applications have previously been considered by the Bank on a case-by-case basis, but this procedure is not prompt enough to meet the new conditions abroad. The Bank therefore has recently started a plan under which lines of credit are extended to individual exporters of capital equipment beneficial to the

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

economy of the importing country. Its use should materially improve the ability of the United States exporter to meet foreign credit competition. A very marked increase in authorizations of credits of this type, therefore, is expected in the ensuing 2 years.

Loan principal repayments in the year	16.0	10.2	19.5
Guaranteed loans:			
Credit authorizations in the year	7.7	50.0	75.0
Loans outstanding June 30	.6	5.0	29.6
Loan disbursements in the year	.6	5.0	24.7

2. *Development project loans.*—A significant portion of the Bank's assistance has been for development projects abroad which further the long run as well as the immediate foreign trade of the United States by increasing the economic stability and production-consumption levels of the other nations of the free world.

Examples of such credits authorized during fiscal 1954 include loans of $16 million to the Government of New Zealand for equipment for a lumber, pulp, and newsprint project, $18.5 million to the Government of Afghanistan for completion of an irrigation and hydroelectric project, and $12 million to the Cuban Electric Co. for expansion of its facilities in Cuba.

Loans oustanding June 30	29.1	49.5	72.1
Loan disbursements in the year	-----	23.2	25.3

3. *Commodity credits.*—Credits for the purchase by other countries of staple commodities in surplus supply in the United States, such as cotton, wheat, and tobacco, are estimated in the total amount of $125 million in fiscal 1956. In fiscal 1954 loans of this type were made to the Bank of Japan for $60 million of raw cotton and the Bank of Brazil for $15 million of wheat.

Loans outstanding June 30	59.8	115.5	126.0
Loan disbursements in the year	60.1	91.0	125.0

4. *Essential material loans.*—During each of the last 4 fiscal years the Bank has authorized a number of credits for the development and expansion of foreign sources of strategic and critical materials for the defense stockpile and of essential materials for use by United States industry. The major credit of this type in fiscal 1954 was $2.5 million to an American mining company for the purchase of United States equipment to expand the production in Peru of iron ore to supply steel mills in the United States. Additional authorizations already have been made in the opening months of fiscal year 1955, and continued activity in this area is anticipated.

Guaranteed loans:			
Credit authorizations in the year	-----	2.0	2.0
Loans outstanding June 30	-----	2.0	4.0
Loan disbursements in the year	-----	2.0	2.0

5. *Emergency loans.*—From time to time the Bank is called upon to provide financial assistance to friendly countries to meet emergencies. For example a credit may be authorized to assist a foreign country to liquidate its past-due dollar accounts and place its commercial transactions with the United States on a current basis. Unlike the fiscal years 1952 and 1953, no loans for this purpose were authorized during fiscal year 1954.

Another type of emergency loan has been to enable a friendly country to receive immediately the dollar proceeds of contracts placed in that country by the United States Government under the Mutual Security Program for military supplies and materials to be delivered and paid for at a later date. Such a credit in the amount of $100 million was authorized in favor of France during fiscal year 1954.

Loan principal repayments in the year	156.1	93.3	176.4

Postwar emergency reconstruction and lend-lease termination credits.—Payments of principal and interest have continued to be received on schedule on credits to European countries disbursed immediately following World War II.

DATA ON RECONSTRUCTION AND LEND-LEASE CREDITS

[In millions]

Export-Import Bank funds:	*1954 actual*	*1955 estimate*	*1956 estimate*
Loans outstanding, June 30	$1,333.5	$1,270.9	$1,205.7
Loan principal repayments in the year	63.2	62.7	65.1
Loan interest payments in the year	38.3	35.2	34.4

Insurance underwriting.—The first policies of the Bank covering war-risk and expropriation insurance on cotton were issued in March 1954. Total policies and extensions validated during the period ended June 30, 1954, numbered 55, covering 6,935 bales of cotton valued at $1,489,290. There were 25 policies in force as of June 30, 1954, totaling $579,941.

Lending authority.—Against the $5 billion of lending authority of the Bank, the loans outstanding at the end of the 1956 fiscal year, as described above, are estimated at $2,902 million, undisbursed commitments at $538 million, and insurance policies in force at $2 million. A margin of $1,558 million of uncommitted lending authority will remain.

Administrative expense limitation.—The limitation proposed by the Bank for fiscal year 1956 is $1,200,000. A supplemental limitation of $70,000 is anticipated for fiscal year 1955, because of amendments to the Export-Import Bank Act of 1945, approved August 9, 1954. The supplemental is not shown in the obligation and expenditure schedules.

EXPORT-IMPORT BANK OF WASHINGTON—Continued

Loans From Treasury, Export-Import Bank of Washington—Con.

FINANCING OPERATIONS

Under Export-Import Bank Act.—Outstanding notes as of June 30, 1954, issued by the Bank to the Treasury against the borrowing authority at that date of $3,500 million, totaled $1,347 million.

Payments into general fund of Treasury.—Payments made by Export-Import Bank into the Treasury as miscellaneous receipts, consisting of profits from the Bank's regular lending activities and other funds received by the Bank and not shown elsewhere in the Budget, are shown in the following schedule:

Activity:	*1954 actual*	*1955 estimate*	*1956 estimate*
Export-Import Bank, regular:			
Interest on obligations	$28,144,444	$28,583,100	$27,717,900
Dividends on capital stock	22,500,000	22,500,000	22,500,000
Federal Republic of Germany: Interest	25,000,000	25,000,000	25,000,000
Total	75,644,444	76,083,100	75,217,900

OPERATING RESULTS AND RETAINED EARNINGS

Out of the net profit of $57.4 million for the fiscal year 1954, the Bank declared a dividend of $22.5 million on the capital stock of $1 billion, which is held by the Treasury. Profits in excess of the dividend each year are added to the accumulated retained earnings of the Bank, estimated to amount to $403.5 million at the end of fiscal year 1956, which will be available for future contingencies.

FINANCIAL CONDITION

Total assets of the Bank, which were $2,564 million at the beginning of fiscal year 1954, are estimated at $2,703 million at the end of fiscal year 1956. This is largely represented by an increase in the loans carried in the Bank's portfolio. The total investment of the U. S. Government in the Bank is estimated as of June 30, 1956, at $2,699 million, consisting of $1,273 million of interest-bearing notes, $1 billion of non-interest-bearing capital stock, and $426 million of retained earnings before dividends.

Retained earnings	$16,506,208	$12,693,308	$12,702,508

PURPOSE AND FINANCIAL ORGANIZATION

The Corporation was established with authorized capital of $200,000,000 ($10,000 of stock now outstanding) to finance Land Bank Commissioner loans, to purchase Federal land bank bonds, to make secured loans to Federal land banks, to exchange its bonds for Federal land bank bonds, and to obtain necessary funds through sale of its own bonds.

ANALYSIS OF BUDGET PROGRAM

The Land Bank Commissioner's authority to make loans on behalf of the Corporation having expired July 1, 1947 (12 U. S. C. 1016), the Corporation's principal activity is the liquidation of its assets. Budgetary requirements for fiscal year 1956 depend upon the rate of liquidation.

Federal Reserve Bank of St. Louis

Administrative expenses.—These are payments to the Federal land banks for services performed as agents of the Corporation, reimbursements to the Treasury and Federal Reserve banks for expenses of bond transactions and checking accounts, and cost of audit by the General Accounting Office. Total administrative expenses for 1954 were $691,945 and are estimated at $650,000 for 1955 and $550,000 for 1956.

FINANCING OPERATIONS

During 1954 the Corporation paid a dividend of $7,000,000 to the Treasury, and it is estimated that a $4,000,000 dividend will be paid in 1955.

OPERATING RESULTS

Operations in 1954 resulted in a net budgetary receipt of $6,417,632, net budgetary receipts of $4,455,900 are estimated for 1955 and $3,121,600 for 1956.

Income and expense.—Net operating income for 1954 was $185,470; it is estimated that operating expenses will exceed operating income by $25,700 in 1955 and $103,800 in 1956. The 1954 net income was $620,541; the estimate for 1955 is $187,100 and $9,200 for 1956. Expenses (exclusive of chargeoffs) for 1954 were $749,787; comparable expenses for 1955 and 1956 are estimated at $713,700 and $611,800.

LIMITATION ON EXPENSES

Administrative Expenses, Federal Farm Mortgage Corporation

Federal Farm Mortgage Corporation: Not to exceed [$650,000] *$550,000* (to be computed on an accrual basis) of the funds of the Corporation shall be available for administrative expenses, including employment on a contract or fee basis of persons, firms, and corporations for the performance of special services, including legal services, and the use of the services and facilities of Federal land banks, [National] *national* farm loan associations, Federal Reserve banks, and agencies of the Government as authorized by the Act of January 31, 1934 (12 U. S. C. 1020–1020h); and said total sum shall be exclusive of services and facilities furnished and examinations made by the Farm Credit Administration [central office], interest expense, and expenses in connection with the acquisition, operation, maintenance, improvement, protection, or disposition of real or personal property belonging to the Corporation or in which it has an interest: *Provided,* That promptly after June 30 of each fiscal year all cash funds in excess of the estimated operating requirements for the current fiscal year shall be declared as dividends and paid into the general fund of the Treasury: *Provided further,* That the aggregate amount of bonds the Corporation may issue and have outstanding at any one time shall not exceed $500,000,000. (*12 U. S. C. 1020; Department of Agriculture and Farm Credit Administration Appropriation Act, 1955.*)

Net worth at June 30	109,835,409	111,583,609	114,194,809

PURPOSE AND FINANCIAL ORGANIZATION

The 12 Federal intermediate credit banks are banks of discount for agriculture. They make no loans directly to individuals and accept deposits only as collateral security. Each bank operates under a board of directors identical with the district farm credit board and is supervised by the Farm Credit Administration (12 U. S. C. 1021–1129). The Government's capital investment in the banks on June 30, 1954, was $62,800,000.

PUBLIC ENTERPRISE FUNDS—Continued

FARM CREDIT ADMINISTRATION—Continued

Federal Intermediate Credit Banks Revolving Fund, Farm Credit Administration—Continued

ANALYSIS OF BUDGET PROGRAM

Credit demands upon the banks during 1955 and 1956 are expected to rise above the 1954 level. Although acreage controls and curtailed production of some commodities for other reasons are expected to reduce total expenditures for the production of some crops, it is expected that other factors will increase the demand for credit upon the banks. These include continued high farm operating costs, retarded liquidation due to reduced yields in some areas, and the lower level of prices of livestock, dairy products, and some of the major cash crops. The inability of many producers to finance as great a proportion of their operating costs as in recent years probably will create larger demands for credit by both present borrowers and by producers not now financed through the banks.

Lending activities.—$1,790,272,806 of credit was extended in 1954, a decline of 6.08 percent from the 1953 total of $1,906,139,248. The average amount of credit outstanding during the year was 10.2 percent lower in 1954 than in 1953. A loan and discount volume of $1,863,761,000 is estimated for 1955 with an upward trend to $1,966,615,000 forecast for 1956, an increase of 9.85 percent over 1954.

Administrative expenses.—These are paid out of income. Actual 1954 expenses were $1,659,207; they are estimated at $1,740,000 for 1955 and $1,825,000 for 1956.

FINANCING OPERATIONS

To finance their lending operations, the banks expect to issue consolidated collateral trust debentures amounting to $1,075,498,000 in 1955 and $1,117,920,000 in 1956, and to borrow $89,600,000 in 1955 and $87,800,000 in 1956 from commercial banks for short periods. The United States assumes no liability for the debentures or other obligations of the Federal intermediate credit banks. The aggregate amount of debentures and other similar obligations which any Federal intermediate credit bank may have outstanding may not exceed 10 times its paid-in capital and retained earnings (12 U. S. C. 1041).

OPERATING RESULTS AND RETAINED EARNINGS

Income.—Interest income from loans and discounts, United States securities, and other sources was $21,112,829 in 1954 and is estimated at $16,703,700 for 1955 and $16,656,700 for 1956. The estimated decrease in gross interest income is due to the anticipated lower average interest and discount rate, which will be only partly offset by the expected greater loan volume.

Interest costs.—Interest and other costs on borrowed money were $17,284,958 in 1954 and are estimated at $11,263,000 in 1955 and $11,448,000 in 1956. The average cost of outstanding debentures was 2.48 percent per annum in 1954, and is estimated by the banks at 1.55 percent for 1955 and 1.50 percent for 1956. Interest costs are affected by general money market conditions and rates are subject to considerable fluctuation.

Retained earnings (earned surplus).—Net income $1,977,491 in 1954 and is expected to be $3,347,600 in 1955 and $3,031,600 in 1956. The distribution of net income of the banks is prescribed by law (12 U. S. C. 1072). Out of such income $1,050,000 was transferred to reserve for contingencies in 1954 and it is expected that $1,550,000 will be transferred to reserves in 1955 and $1,350,000 in 1956. A 25-percent franchise tax of $231,873 was paid in 1954 and payments of $449,400 and $420,400 are anticipated in 1955 and 1956. Total franchise taxes paid by the banks from organization to June 30, 1954, aggregate $9,216,586. The balance of net income each year is carried to unreserved surplus. Retained earnings totaling $47,035,409 on June 30, 1954, are retained by the banks as contemplated by law, and together with paid-in capital and paid-in surplus amounting to $62,800,000 on that date, form the capital structure on which the issuance of securities is based.

FINANCIAL CONDITION

Loans and discounts.—Loans and discounts outstanding on June 30, 1954, amounted to $791,581,278. It is estimated that loans and discounts outstanding will amount to $817,112,278 on June 30, 1955, and $857,254,278 on June 30, 1956.

Investments.—The banks held $49,933,000 par value of United States securities at June 30, 1954, and it is estimated that such holdings will be $56,933,000 on June 30, 1955, and June 30, 1956. These investments are an important factor in enabling the banks to obtain funds in the investment markets at reasonable rates. They are used from time to time as collateral for debentures and to secure short-term bank borrowings.

Liabilities.—Unmatured consolidated debentures and notes payable outstanding, which account for all except about 1 percent of the banks' liabilities, totaled $744,145,000 on June 30, 1954, and are expected to increase to $779,550,000 on June 30, 1955, and $816,990,000 on June 30, 1956.

Government capital.—The Government's capital investment at June 30, 1954, consisted of $5,000,000 of paid-in capital for each of the 12 banks, and of $2,800,000 of paid-in surplus out of the United States Treasury revolving fund of $40,000,000 (12 U. S. C. 1131i (e)). Repayments of paid-in surplus to the revolving fund are estimated at $1,150,000, during 1955.

Amount of loans made	$1,225,753,193	$1,250,000,000	$1,275,000,000
Capital stock owned by farmers and stockmen	$93,685,373	$95,300,000	$97,000,000
Accumulated reserves of associations	$90,829,980	$94,300,000	$97,800,000
Capital stock of associations owned by production credit corporations	$3,623,000	$3,623,000	$3,623,000

PURPOSE AND FINANCIAL ORGANIZATION

The production credit system is designed to make permanent short-term-credit facilities available to farmers and stockmen on a cooperative basis (12 U. S. C. 1131 et seq.). There is a production credit corporation in each of the 12 farm credit districts supervised by the Farm Credit Administration. These corporations, under a district board of directors, organize, supervise, and provide supplemental capital for the local production credit associations, which are the lending cooperatives. The capital stock of the production credit corporations comes from a revolving fund of $90,000,000 in the Treasury.

ANALYSIS OF BUDGET PROGRAM

The principal factor governing administrative expenses is the degree of supervision of these associations, including the prescribing of loan policies, interest rates, and reserves; approval of certain classes of loans and dividend payments; and approval of officers, directors, and their compensation. The corporations make an annual credit examination of each association and make periodic operating reviews and audits. The objective is to have all associations wholly member owned, and the corporations have reduced their investment in class A stock of associations from $90,000,000 in 1934 to $3,623,000 on June 30, 1954. At that date 354 associations were completely owned by farmers and stockmen. Administrative expenses of the 12 corporations were $1,447,406 in 1954 and are estimated at $1,540,000 for 1955 and $1,595,000 for 1956.

FINANCING OPERATIONS

The Government's capital stock investment was reduced $4,225,000 during 1954 to $31,735,000 and further repayments to the revolving fund are estimated at $1,500,000 in 1955 and $1,000,000 in 1956.

OPERATING RESULTS AND RETAINED EARNINGS

Income of the corporations is primarily from interest on United States securities purchased with Government capital. Expense is solely administrative. The 1954 net loss was $563,834 and losses are estimated at $688,700 for 1955 and $809,500 for 1956, reducing the earned surplus to $12,773,139 on June 30, 1956.

NOTE.—Selected working capital (other than cash with Treasury) included above is as follows: June 30, 1953, −$2,562.
Cash balance with Treasury on June 30, 1953, was $5,695,541.

SCHEDULE A–1. *Accrued expenditures by objects*

07 Other contractual services (maintenance of foreclosed property) (total accrued expenditures)—1954, $2,670.

FARM CREDIT ADMINISTRATION MIXED-OWNERSHIP CORPORATIONS

BANKS FOR COOPERATIVES

The banks for cooperatives make loans to finance the production, marketing and service operations of farmers' cooperatives. The banks' capital funds are from the Agricultural Marketing Revolving Fund (12 U. S. C. 1134b; 1134i), and from borrowing farmers' cooperative associations (12 U. S. C. 1134k). Government capital has been reduced from $178,500,000 to $150,000,000 this past year. The amount of capital provided by the associations varies with their borrowings. This is because the stock they acquire in conjunction with loans must be retired at their request when the loan is repaid. Stock owned by associations, and their deposits in the guaranty fund for the past 3 years are as follows:

	Privatedly owned capital	
	Amount	*Percent*
June 30, 1952	$18,100,100	9.2
June 30, 1953	17,988,900	9.2
June 30, 1954	17,949,900	10.7

The objective of eventual ownership of the banks by farmers' cooperatives is recognized in the Farm Credit Act of 1953 which directs the Federal Farm Credit Board to recommend means of retiring United States Government investment in the capital stock of the banks.

Combined statement of condition, June 30, 1954

Assets:		
Cash		$23,306,764
U. S. Government securities (par $52,078,000)		52,369,454

RECONSTRUCTION FINANCE CORPORATION

[Submitted under the Government Corporation Control Act]

INTRODUCTORY STATEMENT

The Reconstruction Finance Corporation Liquidation Act (Public Law 163) provided for termination of the Corporation's lending authority as of September 28, 1953. The Corporation continued as an independent agency until the close of business June 30, 1954.

The civil defense lending program was transferred to the Treasury as a separate continuing program September 28, 1953, and is shown in the Treasury chapter of the budget for 1954, 1955, and 1956.

The production programs and the function of liquidating certain assets were transferred to several other agencies immediately after the close of the fiscal year 1954. The remainder of the assets and liabilities were transferred to the Treasury for liquidation. Therefore program analyses and financial statements for RFC for 1955 and 1956 will be found in the Treasury chapter of the budget.

The net effect on budgetary expenditures for the three programs shown below for fiscal year 1954 is as follows:

Lending programs	−$196,926,011
Production and liquidation programs	−180,000,000
Smaller War Plants Corporation	−1,200,000
Total	−378,126,011

BUDGETARY AUTHORIZATION SCHEDULES

AMOUNTS AVAILABLE FOR OBLIGATION

	1954 actual	1955 estimate	1956 estimate
Unobligated balance brought forward (authorization to expend from public debt receipts)	$623,651,351		
Unobligated authorizations to expend from public debt receipts expiring during the year	−623,651,351		
Obligations incurred			

ANALYSIS OF EXPENDITURES

	1954 actual	1955 estimate	1956 estimate
Obligated balance brought forward (authorization to expend from public debt receipts)	$127,354,204	$501,831	
Repayments, cancellations, and recoveries of prior year obligations (authorization to expend from public debt receipts)	−$130,693,873		
Obligated balance carried forward (authorization to expend from public debt receipts)	−501,831		
Obligations transferred to "Liquidation of RFC disaster loans, Small Business Administration" (authorization to expend from public debt receipts)		−$501,831	
Total expenditures (out of prior authorizations)	−3,841,500		

BUSINESS-TYPE STATEMENTS

LENDING PROGRAM

Until September 28, 1953, when authority to make new loan commitments expired, the Corporation was engaged in lending for the purposes set forth in section 4 of the RFC Act. These lending activities were financed from (*a*) $100 million of Government-owned capital stock, (*b*) retained earnings of $250 million (after reasonable reserves for losses), and (*c*) borrowings from Treasury as needed.

Liquidation in 1954.—With termination of authority to make new loans on September 28, 1953, an aggressive program was inaugurated to liquidate assets. Results of this program during the remainder of fiscal year 1954 are summarized below, showing loans, securities, and commitments related to the RFC's lending program, exclusive of commitments for deferred participation in bank loans:

[In millions]

	Outstanding Sept. 28, 1953		*Outstanding June 30, 1954*		*Net reduction in portfolio*	
	Number	*Amount*	*Number*	*Amount*	*Number*	*Amount*
Business enterprises: RFC portfolio	4,628	$395.5	768	$183.8	3,860	$211.7
RFC equity—pool loans				26.2		(26.2)
Railroads (including securities accepted in reorganizations)	14	83.8	11	10.5	3	73.3
Financial institutions	35	45.5	12	30.3	23	15.2
Public agencies (including securities accepted in payment of indebtedness)	297	66.6	170	33.0	127	33.6
Disaster loans	3,605	18.3	3,239	15.2	366	3.1
Direct, insured, and partially guaranteed mortgages	15,594	69.5	15,038	64.3	556	5.2
Purchase money mortgages	4	42.3	4	41.5		0.8
Republic of the Philippines	1	48.0	1	42.0		6.0
Total	24,178	769.5	19,243	446.8	4,935	322.7

Transfers.—Assets and liabilities at the close of business June 30, 1954, were disposed of by transfer as follows:

	Cash with Treasury	*Selected working capital*	*Other assets (net)*	*Net investment of U. S. Government*
To Small Business Administration		−$43,154	$13,593,314	$13,550,160
To Federal National Mortgage Association		27,596,194	64,171,979	91,768,173
To Export-Import Bank of Washington			42,000,000	42,000,000
To General Services Administration	$8,100,000	−8,130,694	2,943	−27,751
To Federal Facilities Corporation:				
Synthetic rubber program	10,000,000	−10,262,994	66,834	−196,160

Production and Liquidation Programs

During fiscal year 1954, the Corporation had responsibility for the operation and liquidation of certain assets acquired as a result of its activities during World War II. This responsibility consisted of two broad functions: (*a*) production activities, consisting of the operation of the synthetic rubber, tin, and abaca programs; and (*b*) purely liquidation activities, encompassing orderly disposition of holdings acquired in connection with wartime programs.

The production and liquidation programs are financed with funds arising from the operation and liquidation of these programs. To the extent that funds realized from these programs exceed requirements, they are deposited in the Treasury as miscellaneous receipts.

Transfers.—Under the provisions of the RFC Liquidation Act, Executive Order 10539, and Reorganization Plan No. 2 of 1954, assets and liabilities were transferred from RFC's production and liquidation programs to other Government agencies immediately after the close of business, June 30, 1954, as follows:

	Selected working capital	*Other assets (net)*	*Net investment of U. S. Government*
To Export-Import Bank of Washington:			
Foreign loans and securities	—$100,000	$1,736,435	$1,636,435
To Federal Facilities Corporation:			
Synthetic rubber program	88,903,998	144,566,600	233,470,598
Tin program	28,200,121	7,486,148	35,686,269
Total, Federal Facilities Corporation	117,104,119	152,052,748	269,156,867
To General Services Administration:			
Fiber program	10,289,742	7,103,572	17,393,314
Subtotal	127,293,861	160,892,755	288,186,616
To liquidation of RFC (Treasury Department)	37,540,285	—1,611,189	35,929,096
Total	164,834,146	159,281,566	324,115,712

The World War II assets remaining with RFC for liquidation under direction of the Secretary of the Treasury amounted to $22,875,680, as follows:

[In millions]

Note receivable	$12.3
Property, plant, and equipment:	
Under lease	1.9
Held for disposal by GSA	0.1
Conditional sales contracts	4.3
Land grant freight claims	2.2
Other receivables	2.1

SMALLER WAR PLANTS CORPORATION

Under Executive Order 9665, the assets of the Smaller War Plants Corporation were transferred to the RFC for collection or disposal. Liquidation of these assets after June 30, 1954, is being continued under the direction of the Secretary of the Treasury. The value of the unliquidated assets remaining on June 30, 1954, was $950,821.

BUSINESS-TYPE STATEMENTS

PURPOSE AND FINANCIAL ORGANIZATION

The Saint Lawrence Seaway Development Corporation is a wholly owned Government corporation authorized to construct, operate, and maintain that part of the Saint Lawrence Seaway which is in United States territory. The construction program, scheduled to open the Seaway for traffic by 1959, consists of two lateral canals and a navigation channel in the 46-mile International Rapids section lying between Ogdensburg and Massena, N. Y., and certain channel work in the 68-mile Thousand Islands section lying between Lake Ontario and Ogdensburg. These works, in conjunction with related navigation improvements to be provided by Canada and power development works being provided by the power authority of the State of New York in cooperation with the Hydro-Electric Power Commission of Ontario, will afford a 27-foot channel from Lake Erie to Montreal, the present limit of deep-draft ocean shipping on the Saint Lawrence River.

In order to finance its activities, the Corporation is authorized to issue to the Secretary of the Treasury revenue bonds payable from corporate revenues, limited to $105 million outstanding at any one time. It is further provided that not to exceed 10 percent of the authorized bonds would be issued during the first year (fiscal 1955) and not to exceed 40 percent during any subsequent year. The obligations of the Corporation shall have maturities not in excess of 50 years and shall bear interest at a rate determined by the Secretary of the Treasury who is directed to purchase obligations of the Corporation using public debt funds for this purpose.

ANALYSIS OF BUDGET PROGRAM

The activities of the Corporation for the current and budget years relate to construction operations, and administrative expenses.

Construction operations.—This covers land acquisition, engineering design and supervision, the relocation of prop-

erties, including a highway, a railroad, and a power line, the excavation for locks and canals, dredging, and starting construction of dikes, locks, and related facilities.

Funds applied to construction operations, exclusive of the administrative expenses, are estimated at $6,331,000 in 1955 and $22,832,000 in 1956 and are mainly to be expended for the following:

	1955 estimate	*1956 estimate*
Land acquisitions	$908,000	$216,000
Relocation of property	129,000	2,459,000
Locks	1,652,000	11,850,000
Channels and canals	1,630,000	5,636,000
Engineering and design	1,520,000	1,050,000
Supervision and inspection	362,000	1,205,000
Construction facilities	130,000	416,000
Total construction operations	6,331,000	22,832,000
Administrative expenses	215,000	280,000
Grand total	6,546,000	23,112,000

Administrative expenses.—Provision is made for the establishment and operation of an organization for the executive direction of the Corporation consisting of offices of the administrator, deputy administrator, comptroller-treasurer, general counsel, technical engineering, administrative officer and an advisory board. Funds applied to administrative expenses are estimated at $215,000 in fiscal year 1955 and $280,000 in 1956.

FINANCING OPERATIONS

The budget program for the current and budget years is to be financed by the issuance of bonds to the Treasury in amounts of $8,000,000 in fiscal year 1955, and $22,000,000 in 1956. Interest accruing on these bonds is estimated to be $50,000 and $430,000 for the respective fiscal years. Payments to the Treasury for interest accruing during the construction period are to be deferred until after operation starts in 1959, and will be payable from corporate revenues. Interest and administrative expenses during the construction period will be capitalized.

BUSINESS-TYPE STATEMENTS

LENDING PROGRAM

PURPOSE AND FINANCIAL ORGANIZATION

This fund finances the lending activities of the Small Business Administration under which loans are made to small business and to victims of floods or other catastrophes. Appropriations up to $175,000,000 are authorized to provide working capital, and loans outstanding may not exceed $150,000,000 for small business loans and $25,000,000 for disaster loans. The Congress appropriated $55,000,000 in the fiscal year 1954 and an additional amount of $25,000,000 in the fiscal year 1955, for these purposes.

ANALYSIS OF BUDGET PROGRAMS

The responsibility of the Small Business Administration with respect to lending began September 29, 1953, when the lending authority of the Reconstruction Finance Corporation expired.

It is estimated that out of funds presently available approximately 1,080 small business loans amounting to $54,000,000 will be authorized in fiscal year 1955 as compared to 450 and $22,682,990 in 1954. If the present level of lending activity continues, existing appropriations will be exhausted before the end of the current fiscal year. A supplemental estimate to augment existing capital for lending is proposed for later transmission.

Amounts shown in the fiscal year 1956 reflect only the liquidation of activity attributable to the operating program through June 30, 1955. Existing statutory authority expires June 30, 1955, thus a detailed estimate for the fiscal year 1956 has not been included herein.

It is anticipated that a request for funds for the fiscal year 1956 will be included in a supplemental estimate to be submitted at a later date.

OPERATING RESULTS

The net loss for 1954 was $1,547,589 and is estimated at $1,959,781 for 1955. If the agency is continued, losses will decline in future years as income increases.

FINANCIAL CONDITION

At the end of fiscal year 1956, it is estimated loans receivable will be $33,463,074, as compared with $39,479,806 at the end of fiscal year 1955 and $2,236,533 at the end of fiscal year 1954.

Undisbursed commitments on loans are estimated to amount to $33,450,000 on June 30, 1956, as compared to $36,650,000 on June 30, 1955, and $21,114,096 on June 30, 1954.

PUBLIC ENTERPRISE FUNDS—Continued

SMALL BUSINESS ADMINISTRATION—Continued

[REVOLVING FUND, SMALL DEFENSE PLANTS ADMINISTRATION]—continued

Revolving Fund, Small Defense Plants Activities, Small Business Administration—Continued

BUSINESS-TYPE STATEMENTS

This fund was created to finance the taking of prime contracts by the Small Defense Plants Administration from other Government agencies and subcontracting the work to small manufacturers. Reimbursement to the fund is made upon delivery of the completed work to the contracting agency (50 U. S. C. 2163a, as amended). The Small Defense Plants Administration's statutory authorities expired on July 31, 1953, (pursuant to Public Law 95, 83d Cong.), but the authority to use the fund was continued during fiscal year 1955 to permit the orderly liquidation by the Small Business Administration of contracts entered into during fiscal year 1953. Seven prime contracts totaling $2,315,170 were taken and subcontracted for during fiscal year 1953.

BUSINESS-TYPE STATEMENTS

Reorganization Plan No. 2 of 1954 transferred from the Reconstruction Finance Corporation to the Small Business Administration functions relating to loans made by the Reconstruction Finance Corporation to victims of floods or other catastrophes.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

The Small Business Administration, on July 1, 1954, acquired loans and other assets from the Reconstruction Finance Corporation representing a net investment of the United States Government of $13,550,160.

ANALYSIS OF BUDGET PROGRAM

The liquidation of approximately 3,300 disaster loans is estimated to require 5 years to complete.

ADMINISTRATIVE EXPENSES

Administrative expenses are estimated at $614,000 for 1955. No estimate for administrative expenses is included at this time for fiscal year 1956 because legislation for the Small Business Administration expires June 30, 1955.

FINANCING OPERATIONS

Of the $13,550,160 borrowed from the Treasury, it is estimated that repayments in 1955 will be $2,137,812 and $3,326,630 in 1956. Further use of these funds is not anticipated at this time.

FINANCIAL CONDITION

At the end of fiscal year 1956, it is estimated loans receivable will be $9,236,631, as compared with $12,284,473 at the end of fiscal year 1955.

Tennessee Valley Authority Fund

BUSINESS-TYPE STATEMENTS

PURPOSE AND FINANCIAL ORGANIZATION

The Tennessee Valley Authority is a wholly owned Government corporation whose primary purposes are to develop the Tennessee River system for navigation, flood control, and power; to provide munitions for national defense; to develop new and improved fertilizers; and to further the development of the Tennessee Valley's agricultural, forestry, industrial, and other resources.

TVA's programs are financed by appropriations and by proceeds from its operations, principally the sale of power and fertilizer materials. Appropriations cover expenses of navigation and flood control operations, research on fertilizer and munitions, part of resource development activities, and the major portion of capital plant additions. Proceeds (referred to in the financial statements as corporate funds) are used in conducting the business of generating, transmitting, and distributing electric energy, including related reservoir operating expenses; and in manufacturing and distributing fertilizer and fertilizer ingredients. Such proceeds, as in the opinion of the TVA Board are not required for these purposes, are paid into the Treasury.

ANALYSIS OF BUDGET PROGRAMS

TVA activities are grouped into four major programs: (1) navigation, flood control, and power program; (2) fertilizer and munitions program; (3) resource development program; and (4) general service activities. These activities are interrelated. Each contributes to enabling the people of the Tennessee Valley to make effective use of the area's resources by methods which encourage the enterprise of individual farmers and businessmen, and which strengthen the State and local institutions and agencies.

As shown in statement A, the 1956 program would be financed by $27,550,000 of appropriated funds; $248,276,000 provided by operations, principally from the sale of power and fertilizer products; and a $40,411,000 decrease in cash. The total of $316,237,000 to be applied under the 1956 program consists of $79,862,000 for acquisition of assets, $148,568,000 for operating expenses, $21,825,000 for increases in inventories and other working capital items, and $65,982,000 for retirement of borrowings and other payments to the Treasury.

NAVIGATION, FLOOD CONTROL, AND POWER PROGRAM

A major objective of the TVA Act is the unified development and use of the Tennessee River system for navigation, flood control, and power. As of June 30, 1954, the total investment in facilities serving these purposes was $1,278,302,590, and was allocated as follows: Navigation, $140,577,055; flood control, $169,360,354; and power, $968,365,181. Principal components are a system of 26 major dams, 24 major hydroelectric generating stations, 10 navigation locks, 9 major fuel-electric generating stations, and a power transmission network of more than 9,600 circuit-miles.

Acquisition of assets.—Expenditures in 1956 for assets serving navigation, flood control, and power are estimated at $78,878,000, of which $64,973,000 represents new obligations ($35,753,000 from appropriated funds and $29,220,000 from corporate funds) and $13,905,000 is for liquidation of prior year obligations:

SUMMARY OF ESTIMATED OBLIGATIONS

Projects contributing to power supply:	
Continued construction of projects underway:	
Hydrogenerating units in 2 existing dams	$525,000
5 steam plants and cleanup work on 2 steam plants in operation	25,575,000
Total	26,100,000
Transmission system facilities	35,694,000
Additions and improvements at completed projects	614,000
Navigation facilities	406,000
Investigations for future projects	392,000
Distribution of administrative and general expenses	1,767,000
Total	64,973,000

The 1956 budget provides for the continuation of work on the installation of steam electric and hydroelectric generating units started in prior years. The amount of $6,500,000 is included in the estimate for construction of the transmission lines required to connect the TVA system with the facilities of the Mississippi Valley Generating Company.

The assured capacity of the TVA system in 1953 including purchases from other sources was 5,162,000 kilowatts. When the presently scheduled power installations are completed, including the plants of the Corps of Engineers on the Cumberland River and of the Aluminum Company

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

of America on the Little Tennessee River, the load carrying capacity of the TVA system will be 9,543,000 kilowatts. The Atomic Energy Commission load on the TVA system was 1,270,000 kilowatts in 1953 and it is estimated at 2,510,000 kilowatts in 1958 after the 600,000 kilowatts become available to the AEC under its contract with the Mississippi Valley Generating Company. The TVA will, therefore, have available assured capacity of 7,033,000 kilowatts to meet loads other than AEC. This will provide for an increase of more than 80 percent in capacity in the 5-year period for loads other than those of the AEC. It seems probable that such an increase in capacity will provide adequately for these loads in 1958, although it is recognized that this does not meet the present higher TVA load estimate of 7,490,000 kilowatts. However, this increase in capacity could be further augmented by whatever power TVA continues to purchase from outside sources. Moreover, if further developments definitely indicate that the TVA load for 1958 will exceed the assured capacity, provision can be made later for increasing the power supply since some additional generating units at existing plants could be installed in a period of less than 3 years.

The Tennessee Valley Authority Board recognizes the need for developing some method of financing further expansion of the TVA power system by means other than appropriations from the Federal Treasury and is giving immediate and serious attention to the problem. The Authority has been requested to complete its studies in time to permit presentation to the Congress for its consideration at this session of a satisfactory plan for future financing of additional powerplants.

In the light of these factors no provision is made in this budget for starting additional power generating units. It is expected that the power needs for the TVA system will be re-examined after Congress has had an opportunity to consider legislation to provide for future financing.

The estimate of $35,694,000 for transmission facilities consists of $7,710,000 to be financed from appropriated funds and $27,984,000 from corporate funds.

A number of minor items are included in the estimate of $614,000 for additions and improvements at completed dams and steam plants.

The $406,000 estimate for navigation facilities includes funds for continued design work on a new navigation lock at Wilson Dam to replace the existing outmoded Wilson locks which constitute the worst bottleneck on the Tennessee River.

Navigation operations.—Improvements on the Tennessee River system provide a modern 9-foot channel from the mouth of the river to Knoxville, Tenn., a distance of 650 miles. The Tennessee Valley is thereby linked with the 7,000-mile deep-draft inland waterways system extending from the Great Lakes to the Gulf of Mexico. Direct savings in transportation costs to shippers in 1953 are estimated at $12,000,000.

TVA's job in navigation consists of (1) providing physical facilities for commerce; (2) encouraging private interests in development of terminal facilities and barge line services; and (3) working with shippers, carriers and others to supply data on the availability and economy of Tennessee River transportation and to coordinate water transportation with other means of transport.

As shown in statement B, the net expense of navigation operations was $2,725,990 in 1954 and is estimated at $2,827,000 in 1955 and $2,548,000 in 1956. Most of this expense represents depreciation and the allocation to navigation of a portion of the operating expenses common to navigation, flood control, and power. Direct expense in 1954 was $277,450. In 1955 it is estimated at $272,000 and in 1956 at $100,000.

Flood control operations.—The dams on the Tennessee River and its tributaries provide 11,803,000 acre-feet of storage for flood control at the beginning of the flood season. The system of dams has on 16 occasions reduced flood crests at the city of Chattanooga, which presents one of the valley's major flood problems, saving about $53,000,000 in flood damage at this city alone. Communities and agricultural land below the mouth of the Tennessee on the lower Ohio and Mississippi Rivers are also benefited. The TVA system, when high flows occur in the Tennessee River, is able to reduce flood heights at Cairo, Ill., from 2 to 4 feet.

As a supplement to the operation of its system of reservoirs for flood control, TVA's work includes collection and analysis of flood data; studies to improve operations of the existing system; studies of potential flood control projects; and technical advice and assistance to State and local agencies to encourage their assumption of responsibility for solution of local urban and rural flood control problems.

As shown in statement B, the net expense of flood control operations was $2,435,465 in fiscal year 1954 and is estimated at $2,556,000 in 1955 and $2,484,000 in 1956.

Power operations.—TVA power operations are confined to generation and transmission of power and sales at wholesale to local distribution systems and to certain industries and Government agencies requiring large amounts of power. Power is distributed by 148 local public agencies and 2 small privately owned utility companies to about 1,352,000 ultimate consumers. As of June 30, 1954, the installed capacity of the system was 6,075,685 kilowatts including plants of the Army and the Aluminum Company of America operated as a part of the TVA system. Total system input in fiscal year 1954 was nearly 33,700,000,000 kilowatt-hours and is estimated at about 46,500,000,000 kilowatt-hours for 1955 and about 59,000,000,000 kilowatt-hours for 1956.

Net income from power operations (before interest charges) was $28,834,333 in 1954 and is estimated at $49,455,000 for 1955 and $58,426,000 for 1956. The return on power investment in 1954 of 3¼ percent was below normal because of low streamflows during the year. A return of about 4¼ percent is expected in 1955. In 1956, assuming average streamflow conditions, the return on the investment is expected to be approximately 4 percent, about the average experienced over the 21 years of TVA's power operations. Dry-year conditions substantially reduce the amount of realized net income.

FERTILIZER AND MUNITIONS PROGRAM

TVA chemical facilities at Wilson Dam, Ala., and Columbia, Tenn., form a center of research for the development of new or improved fertilizers and processes for their manufacture. Use of the facilities for national defense takes precedence over other uses.

Acquisition of assets.—The estimate of $877,000 provides for prospecting and acquisition of phosphate lands, and for construction work necessary to complete process developments underway and permit continued operation of present facilities. No additions to productive capacity of the chemical plant are proposed.

Fertilizer and munitions development.—Appropriated fund expense in 1956 is estimated at $2,150,000 and covers the cost of research on products and processes, basic

agronomic research, and farm test-demonstrations. The 1955 estimate for this work is $2,366,000 and actual expenditures in 1954 were $2,143,809. Corporate fund expense (the cost of manufacturing and distributing fertilizer and munitions) is estimated at $15,268,000 for 1956 and $17,431,000 for 1955. Corporate fund expenditures in 1954 were $16,250,909. Income from the sale of fertilizer and munitions is estimated at $21,102,000 compared with $22,648,000 in 1955 and $20,464,445 for 1954. After provision for depreciation and overhead, total expense is estimated at $18,829,000. Net income is estimated at $2,273,000 in 1956 compared with $816,000 in 1955 and $492,140 for 1954.

Research on products and processes consists of (1) exploratory tests, background research, and applied research at the laboratory level; and (2) process development. The latter includes technical and economic evaluation of research results; development of unit operations; design, construction, and operation of pilot plants; improvement of design features and operating procedures of demonstration or large-scale plants; and preparation of engineering and economic studies to facilitate application of the findings by other agencies and industries. Knowledge gained in fertilizer research is applied also to the related field of munitions. Expenditures for these activities in 1956 are estimated at $1,238,000.

The 1956 estimate of $299,000 for basic agronomic research covers laboratory, greenhouse, and field plot tests to determine under controlled conditions the relative efficiency of TVA fertilizers. This work is carried out in cooperation with State experiment stations in the 7 valley States and 4 other States.

Estimated direct cost of fertilizer production and distribution is $15,052,000 for 1956, compared to the 1955 estimate of $17,234,000; actual cost, 1954, was $16,104,366. Income is estimated at $20,876,000 in 1956 and $22,441,000 in 1955 compared with $20,312,037 in 1954.

TVA builds and operates large-scale manufacturing units to serve one or more of the following purposes: (1) To demonstrate the technical and commercial feasibility of a new or improved fertilizer process and to encourage its adoption by industry; (2) to supply fertilizers for test-demonstration use on practical farms; (3) to produce new fertilizers in quantities sufficient for widespread introduction to farmers; (4) to produce fertilizers needed to aid the achievement of improved systems of fertilization; and (5) to supply munitions materials for national defense. Fertilizers produced in excess of amounts required for farm test-demonstrations and other TVA programs are sold to farmers through cooperative and industry distributors for uses designed to improve systems of fertilization.

Farm test-demonstrations will be conducted in 21 States in 1956 with an estimated 1,745 farms participating. Expense is estimated at $829,000 ($613,000 from appropriated funds and $216,000 from corporate funds) in 1956. Income from farmer payments for fertilizer is estimated at $216,000. Major objectives of the program are introduction to farmers of TVA's experimental fertilizers and demonstration of their effective use. Another objective relating specifically to the Tennessee Valley is the improvement of agriculture, forestry, and watershed-streamflow relationships.

RESOURCE DEVELOPMENT PROGRAM

The 1956 estimate for resource development is $1,000,000 ($400,000 from appropriated funds and $600,000 from corporate funds).

The estimate of $93,000 for agricultural resource development provides for securing background information about the agriculture of the region so that the less obvious problems can be identified and appropriate solutions developed. Research and demonstrations are carried out on a few of the more urgent agricultural problems peculiar to the region in cooperation with the agencies of the region working in the field of agriculture improvement.

The forest resource development program aids the States, counties, landowners, and the timber industry in developing full production and use of the valley's forest resource consistent with the needs of watershed protection. The 1956 estimate of $471,000 provides for research and demonstrations in forest management, reforestation, forest protection, and wood utilization compared with $431,000 in 1955 and $481,481 in 1954. The increase in 1956 over 1955 will permit an intensification of research and demonstration activities in fields where information and education are urgently needed.

The major purpose of TVA's participation in a program of tributary watershed development is to assist in finding and demonstrating ways in which State and local agencies and private groups can work together to solve the problems of resource development in small tributary watersheds. The 1956 estimate of $336,000 provides for research on the effects of changes in land use on the quality and behavior of water in the streams; continuation of demonstrations in the Chestuee and Beech River watersheds; and exploratory work in another watershed.

Topographic mapping expenditures are estimated at $100,000 for 1956 compared with $33,000 in 1955 and $69,547 for 1954. This increase relates to an effort on the part of TVA and the Geological Survey to complete valley mapping as soon as possible.

GENERAL SERVICE ACTIVITIES

Acquisition of assets.—An estimate of $38,000 for general facilities covers replacement of transportation, office, and other equipment used generally throughout TVA activities.

Reimbursable services.—The 1956 estimate of $3,828,000 covers services furnished at the request and expense of other agencies. Major items included are continued construction of a bridge across Watts Bar Dam for the Public Roads Administration and the State of Tennessee, and mapping services for the Army and the Geological Survey.

ADMINISTRATIVE AND GENERAL EXPENSES

Administrative and general expenses are those which are common to all of TVA's organizations and functions. They consist primarily of costs of general administration and of personnel, fiscal, medical, safety, and other management services which have been centralized in the interest of economy and convenience. These expenses are distributed to the various programs and projects and are included in the program estimates shown on statement A. A summary of these expenses and the distribution are shown in schedule B–5. The 1956 estimate is $4,242,000, compared to the 1955 estimate of $4,397,000.

FINANCING OPERATIONS

Funds applied to financing.—Payments to the Treasury of the United States scheduled for 1956 include $14,000,000 for completion of retirement of bonds held by the Treasury, the proceeds of which were invested in the power program, an additional payment of $45,000,000 against the investment in the power program, and $6,982,000 from miscellaneous receipts originating in programs other than power.

Repayment of investment in power program.—Schedule C–1 summarizes the status of repayments of the Treasury's investment in power program assets under the provisions of title II of the Government Corporations Appropriation Act, 1948. Repayments of power investment through June 30, 1956, will total $210,131,519, of which $186,500,000 has been made since passage of the 1948 law. Such payments are about 57 percent ahead of an average schedule under the 40-year plan then established.

Funds provided by financing.—The 1956 estimate of $67,961,000 consists of the requested appropriation of $27,550,000 and a decrease in Treasury cash of $40,411,000 which results primarily from a reduction in liabilities.

Payment of interest on power investment.—A proposal is being developed for submission to the Congress to provide that payments of interest be made to the Treasury on money invested by the Treasury in TVA power facilities.

OPERATING RESULTS AND RETAINED EARNINGS

Statement B summarizes the income and expenses of the various TVA programs. Power operations provide the major source of revenue for which income in 1956 is estimated at $221,920,000 as compared with the estimate of $186,986,000 for 1955 and the actual income of $131,992,034 realized in 1954. Expenses of the power operations for 1956 are estimated at $163,829,000 as compared with the estimate of $137,991,000 for 1955 and the actual expenses of $103,851,077 incurred in 1954. Net income from power operations excluding interest on investment by Treasury in TVA power facilities is estimated at $58,091,000 in 1956 as compared with the estimate of $48,995,000 in 1955 and the actual net income of $28,140,957 realized in 1954.

The net expense of other programs is estimated at $3,857,000 for 1956 as compared with the estimate of $5,534,000 for 1955, and actual net expenses of $6,054,044 in 1954. The excess of net income from power operations over net expenses of other programs results in estimated net earnings of $54,234,000 in 1956 and $43,461,000 in 1955, as compared with actual net earnings of $22,086,913 in 1954.

The 1955 and 1956 estimates for net earnings total $97,695,000 which when added to retained earnings of $100,971,605 at the beginning of 1955 results in estimated retained earnings totaling $198,666,605 at the end of 1956.

Statement of proposed obligations for purchase and hire of passenger motor vehicles for the fiscal year 1956

TENNESSEE VALLEY AUTHORITY

Appropriation	Motor vehicles to be purchased		Old vehicles to be exchanged		Net cost of vehicles to be purchased	Old vehicles still to be used	Cost of hire of motor vehicles	Users and public purpose
	Number	Gross cost	Number	Allowance (estimated)				
Tennessee Valley Authority fund	211	$295,000	211	$86,000	$209,000	634	$25,000	The TVA program is conducted in an area of more than 80,000 square miles, with many installations at isolated points. Travel by automobile is very frequently more economical than common carrier and sometimes the only available method of transportation. TVA's 845 units are pooled in 1 fleet and are issued to employees as requested. About 365 units will be used in power operations, maintenance, and transmission construction activities; 180 units in dam and steam plant construction at isolated sites not served by common carrier; 100 units in reservoir operations and 200 units in forestry, fertilizer, agricultural, administrative, and miscellaneous activities. Motor vehicles will be hired on special occasions to meet peak demands and at remote locations where the Authority does not maintain a pool of motor vehicles and personal cars are not available.

Statement of proposed obligations for purchase, maintenance, and operation of aircraft for the fiscal year 1956

TENNESSEE VALLEY AUTHORITY

Appropriation	Aircraft to be purchased		Aircraft to be exchanged		Net cost of aircraft to be purchased	Old aircraft still to be used	Cost of maintenance and operation of aircraft	Users and public purpose
	Number	Gross cost	Number	Allowance (estimated)				
Tennessee Valley Authority fund	----------	----------	----------	----------	----------	9	$78,380	5 helicopters will be used for transmission line patrol, malaria control spraying, reconnaissance, aerial inventories, and air sampling in the vicinity of TVA steam plants for air pollution tests; 2 fixed-wing planes will be used for malaria control spraying, emergency transmission line troubleshooting and reservoir aerial inspection; 1 plane will be used principally for aerial mapping and reconnaissance with some use for emergency passenger service; 1 plane will be used principally for the transportation of engineers to widely scattered projects and for the transportation of administrative officers on official business.

VETERANS ADMINISTRATION

[Submitted under the Government Corporations Control Act]

Canteen Service Revolving Fund, Veterans Administration

BUSINESS-TYPE STATEMENTS

PROGRAM AND PERFORMANCE

The Veterans' Canteen Service sells merchandise and services for the comfort and well-being of veterans in hospitals and homes of the Administration. The 1956 estimate anticipates a further repayment to the Treasury of $519,000, leaving a balance of $1,085,000 out of the amount originally advanced.

Total accrued expenditures	27,717,276	27,737,970	27,522,269

Direct Loans to Veterans and Reserves, Veterans Administration

BUDGETARY AUTHORIZATION SCHEDULES

AMOUNTS AVAILABLE FOR OBLIGATION

Authorization to expend from public debt receipts: New authorizations (Obligations incurred)—1954, $96,651,249; 1955, $133,961,603.

ANALYSIS OF EXPENDITURES

Obligations incurred during the year (total expenditures out of current authorizations, paid into revolving fund)—1954, $96,651,249; 1955, $133,961,603.

BUSINESS-TYPE STATEMENTS

PROGRAM AND PERFORMANCE

Loans are made to veterans, under certain conditions, to finance the purchase or construction of homes or to finance the construction or improvement of farmhouses (38 U. S. C. 694 l, m; 12 U. S. C. 1747 L(o)). Proceeds of the sale of loans and repayments of loans are available for making additional loans. Expenses of appraisals and foreclosures are met from interest income.

After June 30, 1955, all sums in the fund and all moneys received thereafter in repayment of loans will be deposited into the Treasury except the amount determined to be necessary for purposes of liquidation.

Administrative expenses are borne by the appropriation, General operating expense, Veterans Administration.

Borrowing authority in the amount of $366,718,875 had been authorized through June 30, 1954. An additional $150,000,000 has been authorized for the current fiscal year in quarterly installments of $37,500,000 less proceeds from sale of loans in each preceding quarter. Loans have been repaid in an amount of $47,350,473 through June 30, 1954. Principal repayments of $19,703,769 and $16,350,000 are estimated in fiscal years 1955 and 1956 respectively, representing a reserve for losses, totaled $8,335,137 as of June 20, 1954; increases of $5,703,825 in 1955 and $7,929,000 in 1956 will bring the total retained earning to $21,967,962 as of June 30, 1956. The net principal of the fund as of June 30, 1954 was $363,741,272.

WORKLOAD, AVERAGE LOAN, AND TOTAL COST

BUSINESS-TYPE STATEMENTS

PROGRAM AND PERFORMANCE

Veterans with disabilities that make them ineligible for commercial insurance, may obtain Government insurance under this fund if application is made within 1 year after the service connection of the disability is determined (38 U. S. C. 821). No dividends are paid on this insurance. The fund receives premiums and pays death claims on such insurance. Administrative expenses are borne by the appropriation "General operating expenses, Veterans Administration." The principal of the fund consists of an appropriation of $1,250,000. The accumulated deficit will increase from $417,312 as of June 30, 1954, to an estimated $1,044,312 as of June 30, 1956.

Soldiers' and Sailors' Civil Relief, Veterans Administration

PROGRAM AND PERFORMANCE

This fund is used to guarantee premiums due on commercial private life-insurance policies held by servicemen while they are in service and for 2 years after discharge. The Government guarantees the repayment of any indebtedness not liquidated by the insured himself, but any payments by the Government becomes a debt owed the Government by the insured (50 U. S. C. 510–590; App. 464).

Expenses of this activity are borne by the appropriation "General operating expenses, Veterans Administration." The capital of the fund was reduced by $500,000 during fiscal year 1955.

Veterans Special Term Insurance Fund

BUSINESS-TYPE STATEMENTS

PROGRAM AND PERFORMANCE

Veterans not covered by national service life insurance may obtain 5-year-level premium term insurance under this fund if application is made within 120 days after separation from active service (38 U. S. C. 822). No dividends are paid on this insurance. The fund receives premiums and pays death claims. Administrative expenses are borne by the appropriation "General operating expenses, Veterans Administration." Net premium receipts are retained to pay future claims. Since it is estimated that retained earnings will increase from $3,343,342 as of June 30, 1954, to $19,035,503 as of June 30, 1956, it is planned during fiscal year 1955 to return the initial capital, $250,000, advanced by the Treasury. Amounts not needed in current operations are invested in U. S. Government securities. Interest income from the investments is available for purposes of the fund.

Vocational Rehabilitation, Veterans Administration, Revolving Fund

PROGRAM AND PERFORMANCE

This fund is used to make loans up to $100 to disabled veterans eligible for vocational rehabilitation who are without sufficient funds to meet their expenses (57 Stat. 43; 38 U. S. C., ch. 12 note). Repayments are used for new loans. The capital of $1,500,000 represents net appropriations made from fiscal year 1944 through fiscal year 1950. A rescission of $400,000 of the $1,500,000 capital of the fund has been made during fiscal year 1955.

Expense for operating the fund are borne by the appropriation "General operating expenses, Veterans Administration."

INTRAGOVERNMENTAL FUNDS

CIVIL SERVICE COMMISSION

Administrative Expenses, Employees' Life Insurance Fund

Not to exceed $140,000 of the funds in the "Employees' Life Insurance Fund" shall be available for reimbursement to the Civil Service Commission for administrative expenses incurred by the Commission during the current fiscal year in the administration of the Federal Employees' Group Life Insurance Act. (Public Law 598, 68 Stat. 736.)

AMOUNTS AVAILABLE FOR ADMINISTRATIVE EXPENSES

Limitation or estimate (administrative expenses)—1955, $150,000; 1956, $140,000.

ADMINISTRATIVE EXPENSES BY ACTIVITIES

Administration of the Federal Employees Group Life Insurance Act of 1954—1955, $150,000; 1956. $140,000.

PROGRAM AND PERFORMANCE

The Federal Employees' Group Life Insurance Act (68 Stat. 736) provides that the employees' life insurance fund is available for any expenses incurred by the Civil Service Commission in the administration of the act within such limitations as may be specified annually in appropriation acts. The expense limitation requested for

Investigations, Civil Service Commission

BUSINESS-TYPE STATEMENTS

PROGRAM AND PERFORMANCE

This fund finances, on a reimbursable basis, full field security investigations performed at the request of other departments and agencies of the Government (66 Stat. 107). The capital of the fund consists of $4,000,000 made available in 1952.

Because work on some investigations will be started in one fiscal year and completed in another, work in process is recognized as an asset of the fund.

VETERANS ADMINISTRATION

Supply Fund, Veterans Administration

BUSINESS-TYPE STATEMENTS

PROGRAM AND PERFORMANCE

The supply fund was established July 1, 1953, to capitalize all supplies and materials and depot stocks of equipment on hand and on order. The fund is available for all expenses necessary for the operation and maintenance of a supply system for the Veterans Administration, including procurement of supplies, equipment, and personal services. The fund is used for essentially all procurement of supplies and equipment for the Veterans Administration and for the operation of the service and reclamation shops, and the book and periodical activity at the supply depots and the motion-picture inspection and shipping activity (67 Stat. 193).

In 1954 $8,000,000 was returned to the Treasury as being excess to the needs of the fund.

Administrative expenses of the supply depot operation are paid from the appropriation for maintenance and operation of supply depots.

A. *Statement of sources and application of funds*

	1954 actual	1955 estimate	1956 estimate
FUNDS APPLIED			
To operations:			
Acquisition of assets: Operating equipment			$6,470
Expenses:			
Purchases	$123,002,079	$128,626,073	133,574,250
Direct labor	236,712	336,155	336,155
Other direct operating expenses	3,091,743	3,037,430	3,035,570
Administrative expenses	90,263	92,485	92,525
Increase in selected working capital		1,252,424	5,030
Total applied to operations	126,420,797	133,344,567	137,050,000
To financing:			
Repayment of principal to Treasury	8,000,000		
Increase in Treasury cash	9,678,497		
Total applied to financing	17,678,497		
Total funds applied	144,099,294	133,344,567	137,050,000
FUNDS PROVIDED			
By operations:			
Income:			
Sales of goods and services	131,003,210	130,800,000	134,800,000
Other income	2,362,817	2,366,070	2,250,000
Selected working capital absorbed	10,733,267		
Total provided by operations	144,099,294	133,166,070	137,050,000
By financing: Decrease in Treasury cash		178,497	
Total funds provided	144,099,294	133,344,567	137,050,000

[REDUCTIONS IN APPROPRIATIONS]

[The appropriation heretofore granted for "Soldiers' and sailors' civil relief" is hereby reduced by the sum of $500,000, and said amount shall be carried to the surplus of the Treasury.]

[The appropriations heretofore granted for "Vocational rehabilitation revolving fund (Act of Mar. 24, 1943)", are hereby reduced by the sum of $400,000, and said amount shall be carried to the surplus of the Treasury.] (*Independent Offices Appropriation Act, 1955.*)

GENERAL PROVISIONS

INDEPENDENT OFFICES—GENERAL PROVISIONS

SEC. 102. Where appropriations in this title are expendable for travel expenses of employees and no specific limitation has been placed thereon, the expenditures for such travel expenses may not exceed the amount set forth therefor in the budget estimates submitted for the appropriations: *Provided*, That this section shall not apply to travel performed by uncompensated officials of local boards and appeal boards of the Selective Service System.

SEC. 103. Where appropriations in this title are expendable for the purchase of newspapers and periodicals and no specific limitation has been placed thereon, the expenditures therefor under each such appropriation may not exceed the amount of $50: *Provided*, That this limitation shall not apply to the purchase of scientific, technical, trade, or traffic periodicals necessary in connection with the performance of the authorized functions of the agencies for which funds are herein provided.

SEC. 104. No part of any appropriation contained in this title shall be available to pay the salary of any person filling a position, other than a temporary position, formerly held by an employee who has left to enter the Armed Forces of the United States and has satisfactorily completed his period of active military or naval service and has within ninety days after his release from such service or from hospitalization continuing after discharge for a period of not more than one year made application for restoration to his former position and has been certified by the Civil Service Commission as still qualified to perform the duties of his former position and has not been restored thereto.

SEC. 105. Appropriations contained in this title, available for expenses of travel shall be available, when specifically authorized by

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

the head of the activity or establishment concerned, for expenses of attendance at meetings of organizations concerned with the function or activity for which the appropriation concerned is made.

SEC. 106. No part of any appropriations made available by the provisions of this title shall be used for the purchase or sale of real estate or for the purpose of establishing new offices outside the District of Columbia: *Provided*, That this limitation shall not apply to programs which have been approved by the Congress and appropriations made therefor.

SEC. 107. No part of any appropriation contained in this title shall be used to pay the compensation of any employee engaged in personnel work in excess of the number that would be provided by a ratio of one such employee to one hundred and thirty-five, or a part thereof, full-time, part-time, and intermittent employees of the agency concerned: *Provided*, That for purposes of this section employees shall be considered as engaged in personnel work if they spend half time or more in personnel administration consisting of direction and administration of the personnel program; employment, placement, and separation; job evaluation and classification; employee relations and services; training; wage administration; and processing, recording, and reporting.

SEC. 108. None of the sections under the head "Independent Offices, General Provisions" in this title shall apply to the Housing and Home Finance Agency or the Tennessee Valley Authority.

CORPORATIONS—GENERAL PROVISIONS

SEC. 202. No part of the funds of, or available for expenditure by, any corporation or agency included in this title shall be used to pay the compensation of any employee engaged in personnel work in excess of the number that would be provided by a ratio of one such employee to one hundred and thirty-five, or a part thereof, full-time, part-time, and intermittent employees of the agency concerned: *Provided*, That for purposes of this section employees shall be considered as engaged in personnel work if they spend half-time or more in personnel administration consisting of direction and administration of the personnel program; employment, placement, and separation; job evaluation and classification; employee relations and services; training; committees of expert examiners and boards of civil-service examiners; wage administration; and processing, recording, and reporting.

GENERAL PROVISIONS

SEC. 301. No part of any appropriation contained in this Act, or of the funds available for expenditure by any corporation included in this Act, shall be used to pay the salary or wages of any person who engages in a strike against the Government of the United States or who is a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or who advocates, or is a member of an organization that advocates, the overthrow of the Government of the United States by force or violence: *Provided*, That for the purposes hereof an affidavit shall be considered prima facie evidence that the person making the affidavit has not contrary to the provisions of this section engaged in a strike against the Government of the United States, is not a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or that such person does not advocate, and is not a member of an organization that advocates, the overthrow of the Government of the United States by force or violence: *Provided further*, That any person who engages in a strike against the Government of the United States or who is a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or who advocates, or who is a member of an organization that advocates, the overthrow of the Government of the United States by force or violence and accepts employment the salary or wages for which are paid from any appropriation or fund contained in this Act shall be guilty of a felony and, upon conviction, shall be fined not more than $1,000 or imprisoned for not more than one year, or both: *Provided further*, That the above penalty clause shall be in addition to, and not in substitution for, any other provisions of existing law.

SEC. 302 No part of any appropriation contained in this Act, or of the funds available for expenditure by any corporation or agency included in this Act, shall be used for publicity or propaganda purposes designed to support or defeat legislation pending before the Congress. (*Independent Offices Appropriation Act, 1955.*)

DEPARTMENTS, AGENCIES, AND CORPORATIONS

SEC. 1301. Unless otherwise specifically provided, the maximum amount allowable during the current fiscal year, in accordance with section 16 of the Act of August 2, 1946 (5 U. S. C. 78), for the purchase of any passenger motor vehicle (exclusive of buses, ambulances, and station wagons), is hereby fixed at $1,400. Notwithstanding any limitation on cost of passenger motor vehicles carried in the 1955 Appropriation Acts, not more than $3,000 may be expended during the current fiscal year for any such vehicle.

SEC. 1302. Unless otherwise specified and during the current fiscal year, no part of any appropriation contained in this or any other Act shall be used to pay the compensation of any officer or employee of the Government of the United States (including any agency the majority of the stock of which is owned by the Government of the United States) whose post of duty is in continental United States unless such person (1) is a citizen of the United States, (2) is a person in the service of the United States on the date of enactment of this Act who, being eligible for citizenship, had filed a declaration of intention to become a citizen of the United States prior to such date, (3) is a person who owes allegiance to the United States or (4) is an alien from the Baltic countries lawfully admitted to the United States for permanent residence: *Provided*, That for the purpose of this section, an affidavit signed by any such person shall be considered prima facie evidence that the requirements of this section with respect to his status have been complied with: *Provided further*, That any person making a false affidavit shall be guilty of a felony and, upon conviction, shall be fined not more than $4,000 or imprisoned for not more than one year, or both: *Provided further*, That the above penal clause shall be in addition to, and not in substitution for, any other provisions of existing law: *Provided further*, That any payment made to any officer or employee contrary to the provisions of this section shall be recoverable in action by the Federal Government. This section shall not apply to citizens of the Republic of the Philippines or to nationals of those countries allied with the United States in the current defense effort.

SEC. 1303. Appropriations of the executive departments and independent establishments for the current fiscal year, available for expenses of travel or for the expenses of the activity concerned, are hereby made available for living quarters allowances in accordance with the Act of June 26, 1930 (5 U. S. C. 118a), and regulations prescribed thereunder, and cost-of-living allowances similar to those allowed under section 901 (2) of the Foreign Service Act of 1946, in accordance with and to the extent prescribed by regulations of the President, for all civilian officers and employees of the Government permanently stationed in foreign countries: *Provided*, That the availability of appropriations made to the Department of State for carrying out the provisions of the Foreign Service Act of 1946 shall not be affected hereby.

SEC. 1304. No part of any appropriation for the current fiscal year contained in this or any other Act shall be paid to any person for the filling of any position for which he or she has been nominated after the Senate has voted not to approve the nomination of said person.

SEC. 1305. No part of any appropriation contained in this or any other Act for the current fiscal year shall be used to pay in excess of $4 per volume for the current and future volumes of the United States Code Annotated, and such volumes shall be purchased on condition and with the understanding that latest published cumulative annual pocket parts issued prior to the date of purchase shall be furnished free of charge, or in excess of $4.25 per volume for the current or future volumes of the Lifetime Federal Digest.

SEC. 1306. Funds made available by this or any other Act for administrative expenses in the current fiscal year of the corporations and agencies subject to the Government Corporation Control Act, as amended (31 U. S. C. 841), shall be available, in addition to objects for which such funds are otherwise available, for rent in the District of Columbia; services in accordance with section 15 of the Act of August 2, 1946 (5 U. S. C. 55a); and the objects specified under this head, all the provisions of which shall be applicable to the expenditure of such funds unless otherwise specified in the Act by which they are made available: *Provided*, That in the event any functions budgeted as administrative expenses are subsequently transferred to or paid from other funds, the limitations on administrative expenses shall be correspondingly reduced.

SEC. 1307. No part of any funds of or available to any wholly-owned Government corporation shall be used for the purchase or construction, or in making loans for the purchase or construction of any office building, without specific authority in law therefor, primarily for occupancy by any department or agency of the United States Government or by any corporation owned by the United States Government.

SEC. 1308. During the current fiscal year, personnel and appropriations or funds available for salaries and expenses to any department, agency, or corporation in the executive branch of the Government, shall be transferred to any defense activity under the jurisdiction of such department or agency in such numbers or amounts as may be necessary for the discharge of responsibilities relating to the national defense assigned to such departments, agency, or corporation by or pursuant to law.

SEC. 1309. During the current fiscal year, the provisions of Bureau of the Budget Circular A–45, dated June 3, 1952, shall be

Federal Reserve Bank of St. Louis

GENERAL PROVISIONS—Continued

DEPARTMENTS, AGENCIES, AND CORPORATIONS—Con.

controlling over the activities of all departments, agencies, and corporations of the Government: *Provided*, That said circular may be amended or changed during such year by the Director of the Budget with the approval of the Chairman of the Committee on Appropriations of the House of Representatives: *Provided further*, That the Bureau of the Budget shall make a report to Congress not later than January 31, [1955] *1956*, of the operations of this order upon all departments, agencies, and corporations of the Government: *Provided further*, That, notwithstanding the provisions of any other law, no officer or employee shall be required to occupy any Government-owned quarters unless the head of the agency concerned shall determine that necessary service cannot be rendered or property of the United States cannot be adequately protected otherwise.

SEC. 1310. Pursuant to section 1415 of the Act of July 15, 1952 (66 Stat. 662), foreign credits (including currencies) owed to or owned by the United States may be used by Federal agencies for any purpose for which appropriations are made for the current fiscal year (including the carrying out of Acts requiring or authorizing the use of such credits) and for liquidation of obligations legally incurred against such credits prior to July 1, 1953, only when reimbursement therefor is made to the Treasury from applicable appropriations of the agency concerned: *Provided*, That such credits received as exchange allowances or proceeds of sales of personal property may be used in whole or part payment for acquisition of similar items, to the extent and in the manner authorized by law, without reimbursement to the Treasury: *Provided further*, That nothing in section 1415 of the Act of July 15, 1952, or in this section shall be construed to prevent the making of new or the carrying out of existing contracts, agreements, or executive agreements for periods in excess of one year, in any case where such contracts, agreements, or executive agreements for periods in excess of one year were permitted prior to the enactment of this Act under section 32 (b) (2) of the Surplus Property Act of 1944, as amended (50 U. S. C. App. 1641 (b) (2)), and the performance of all such contracts, agreements, or executive agreements shall be subject to the availability of appropriations for the purchase of credits as provided by law.

[SEC. 1311. (a) After the date of enactment hereof no amount shall be recorded as an obligation of the Government of the United States unless it is supported by documentary evidence of—]

[(1) a binding agreement in writing between the parties thereto, including Government agencies, in a manner and form and for a purpose authorized by law, executed before the expiration of the period of availability for obligation of the appropriation or fund concerned for specific goods to be delivered, real property to be purchased or leased, or work or services to be performed; or]

[(2) a valid loan agreement, showing the amount of the loan to be made and the terms of repayment thereof; or]

[(3) an order required by law to be placed with a Government agency; or]

[(4) an order issued pursuant to a law authorizing purchases without advertising when necessitated by public exigency or for perishable subsistence supplies or within specific monetary limitations; or]

[(5) a grant or subsidy payable (i) from appropriations made for payment of or contributions toward, sums required to be paid in specific amounts fixed by law or in accord with formulae prescribed by law, or (ii) pursuant to agreement authorized by, or plans approved in accord with and authorized by, law; or]

[(6) a liability which may result from pending litigation brought under authority of law; or]

[(7) employment or services of persons or expenses of travel in accord with law, and services performed by public utilities; or]

[(8) any other legal liability of the United States against an appropriation or fund legally available therefor.]

[(b) Not later than September 30 of each year, the head of each Federal agency shall report, as to each appropriation or fund under the control of such agency, the amount thereof remaining obligated but unexpended and the amount thereof remaining unobligated on June 30 of such year and copies of such report shall be forwarded by him to the chairman of the Committees on Appropriations of the Senate and the House of Representatives, to the Comptroller General of the United States, and to the Director of the Bureau of the Budget: *Provided*, That such report for the fiscal year ending June 30, 1954, shall be made not later than December 31, 1954, and shall include only such obligations as could have been recorded under the provisions of subsection (a) hereof.]

[(c) Each report made pursuant to subsection (b) shall be supported by certifications of the officials designated by the head of the agency, and such certifications shall be supported by records evidencing the amounts which are reported therein as having been obligated. Such certifications and records shall be retained in the agency in such form as to facilitate audit and reconciliation for such period as may be necessary for such purposes. The officials designated by the head of the agency to make certifications may not redelegate the responsibility.]

[(d) No appropriation or fund which is limited for obligation purposes to a definite period of time shall be available for expenditure after the expiration of such period except for liquidation of amounts obligated in accord with subsection (a) hereof; but no such appropriation or fund shall remain available for expenditure for any period beyond that otherwise authorized by law.]

[(e) Any statement of obligation of funds furnished by any agency of the Government to the Congress or any committee thereof shall include only such amounts as may be valid obligations as defined in subsection (a) hereof.]

SEC. [1312] *1311*. No part of any appropriation contained in this Act, or of the funds available for expenditure by any corporation included in this Act, shall be used to pay the salary or wages of any person who engages in a strike against the Government of the United States or who is a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or who advocates, or is a member of an organization that advocates, the overthrow of the Government of the United States by force or violence: *Provided*, That for the purposes hereof an affidavit shall be considered prima facie evidence that the person making the affidavit has not contrary to the provisions of this section engaged in a strike against the Government of the United States, is not a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or that such person does not advocate, and is not a member of an organization that advocates, the overthrow of the Government of the United States by force or violence: *Provided further*, That any person who engages in a strike against the Government of the United States or who is a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or who advocates, or who is a member of an organization that advocates, the overthrow of the Government of the United States by force or violence and accepts employment the salary or wages for which are paid from any appropriation or fund contained in this or any other Act shall be guilty of a felony and, upon conviction, shall be fined not more than $1,000 or imprisoned for not more than one year, or both: *Provided further*, That the above penalty clause shall be in addition to, and not in substitution for, any other provisions of existing law.

[SEC. 1313. The appropriations, authorizations, and authority with respect thereto in this Act shall be available from July 1, 1954, for the purposes provided in such appropriations, authorizations, and authority. All obligations incurred during the period between June 30, 1954, and the date of enactment of this Act in anticipation of such appropriations, authorizations, and authority are hereby ratified and confirmed if in accordance with the terms hereof and the terms of Public Law 475, Eighty-third Congress.] (*Supplemental Appropriation Act, 1955.*)

PROPOSED FOR LATER TRANSMISSION

Salaries and expenses, Federal Power Commission (under existing legislation, 1955).—A supplemental appropriation is required for 1955 estimated at $100,000 to (*a*) accelerate the processing of license applications for non-Federal construction of new hydroelectric generating plants and (*b*) comply with decision of the Supreme Court of the United States, dated June 7, 1954, which added a large number of independent producers of natural gas to the Commission's area of jurisdiction under the Natural Gas Act (15 U. S. C. 717–717w).

AMOUNTS AVAILABLE FOR OBLIGATION AND ANALYSIS OF EXPENDITURES

	1954 actual	1955 estimate	1956 estimate
Proposed supplemental appropriation		$100,000	
Obligated balance brought forward			$20,000
Obligated balance carried forward		−20,000	
Total expenditures		80,000	20,000
Expenditures are distributed as follows:			
Out of current authorizations		80,000	
Out of prior authorizations			20,000

Payment of Korean claims, Foreign Claims Settlement Commission (under existing legislation, 1955).—A supplemental appropriation of $100,000 is forecast for administrative expenses incident to settlement of Korean claims pursuant to Public Law 615 (approved August 21, 1954), since no provision was made beyond March 31, 1955, for payment of required administrative expenses.

AMOUNTS AVAILABLE FOR OBLIGATIONS AND ANALYSIS OF EXPENDITURES

	1954 actual	1955 estimate	1956 estimate
Proposed supplemental appropriation		$100,000	
Obligated balance brought forward			$10,000
Obligated balance carried forward		−10,000	
Total expenditures		90,000	10,000
Expenditures are distributed as follows:			
Out of current authorizations		90,000	
Out of previous authorizations			10,000

Administrative expenses, Foreign Claims Settlement Commission (under existing legislation, 1955).—A supplemental authorization is forecast to use estimated balances of $145,000 from the previous administrative expenses limitation of the war claims fund, and an additional $30,000 limitation, for payment of required administrative expenses to begin settlement of new war claims authorized by Public Law 744 (approved August 31, 1954).

Salaries and expenses, National Advisory Committee for Aeronautics (under existing legislation, 1955).—A supplemental appropriation of $300,000 for 1955 is forecast to permit initiation of increased research in fields of military importance.

AMOUNTS AVAILABLE FOR OBLIGATION AND ANALYSIS OF EXPENDITURES

	1954 actual	1955 estimate	1956 estimate
Proposed supplemental appropriation		$300,000	
Obligated balance brought forward			$50,000

	1954 actual	1955 estimate	1956 estimate
Proposed supplemental appropriation		$108,000,000	
Total expenditures (out of current authorizations)		108,000,000	

Grants to the Republic of the Philippines, Veterans Administration (under existing legislation, 1955).—It is estimated that a supplemental appropriation of $720,000 will be required in fiscal year 1955 for medical care and treatment of veterans. The original appropriation was predicated upon the expiration of the program on December 31, 1954. Public Law 421, approved June 18, 1954, extended the grant authorization for 5 more years.

Energy Act of 1954 requires statutory authorization of appropriations for real property acquisition and plant acquisition or construction, and there are also limitations upon the use of available funds. Accordingly, appropriation language will be requested in a supplemental transmission after congressional consideration of the Commission's request for authorization action. No new obligational authority will be requested in the supplemental transmission, because the unobligated balance of obligational authority brought forward from prior years is sufficient to cover 1956 requirements.

AMOUNTS AVAILABLE FOR OBLIGATION AND ANALYSIS OF EXPENDITURES

	1954 actual	1955 estimate	1956 estimate
Unobligated balance under "Plant and equipment, Atomic Energy Commission," transferred from the schedule shown on p. 105			$214,000,000
Obligated balance carried forward			−124,000,000
Total expenditures (out of prior authorizations)			90,000,000

Payment to civil service retirement and disability fund, Civil Service Commission (under proposed legislation, 1956).—A legislative proposal will be made to finance the Government's share of current benefit disbursements on a modified pay-as-you-go basis by appropriating the difference between its share of current benefit disbursements and the interest earned on its part of the fund. The appropriation proposed for later transmission amounts to $216,000,000 and is computed as follows:

Total benefit disbursements	$487,359,000
Less portion paid from accumulated employee contributions	−194,359,000
Gross Government's share	293,000,000
Less interest on Government's equity in fund	−77,000,000
Appropriation required	216,000,000

AMOUNTS AVAILABLE FOR OBLIGATION AND ANALYSIS OF EXPENDITURES

	1954 actual	1955 estimate	1956 estimate
Proposed supplemental appropriation			$216,000,000
Total expenditures (out of current authorizations)			216,000,000

International claims, Foreign Claims Settlement Commission (under proposed legislation, 1956).—Amendments to the International Claims Settlement Act of 1949 will be proposed to authorize compensation of United States nationals for claims against the Soviet Union, Italy, Bulgaria, Hungary, and Rumania for property and other losses suffered as a result of confiscation and war damages in these countries. Lump-sum settlement funds from these countries totaling about $40,000,000 are available to the United States from which to pay such claims. A percentage deduction will be made from each award and deposited in the Treasury to cover the administrative expenses. A supplemental 1956 appropriation of $500,000 is proposed to be transmitted, upon enactment of such legislation, to provide administrative expenses to enable the Commission to begin a 4-year program of settling these new international claims.

AMOUNTS AVAILABLE FOR OBLIGATION AND ANALYSIS OF EXPENDITURES

	1954 actual	1955 estimate	1956 estimate
Proposed supplemental appropriation			$500,000
Obligated balance carried forward			−50,000
Total expenditures (out of current authorizations)			450,000

Small business activities, Small Business Administration (under proposed legislation, 1956).—Appropriations totaling $67,000,000 are proposed for later transmission for fiscal year 1956 for continuation of the small business assistance programs, including an additional amount for the lending program.

AMOUNTS AVAILABLE FOR OBLIGATION AND ANALYSIS OF EXPENDITURES

Proposed supplemental appropriation			$67,000,000
Obligated balance carried forward			−39,000,000
Total expenditures (out of current authorizations)			28,000,000

Direct loans to veterans and reserves, Veterans Administration (under proposed legislation, 1956).—Legislation will be proposed to extend the direct home and farmhouse loan authority of the Administrator of Veterans Affairs until July 25, 1957, the expiration date for the World War II veterans' loan guaranty program. An additional public debt authorization of $100 million per year is forecast. In addition, the utilization of principal repayments and the proceeds from loan sales to make additional loans will be recommended.

CURRENT AUTHORIZATIONS

INTRODUCTORY STATEMENT

The Administration serves as the Federal Government's central agency for providing and controlling general property and records management services including provision of office and general-purpose space and related services, supplying common-use commodities and equipment, custody of archival and semipermanent records, and promotion of effective management of real property, personal property, and records. Program operations in these 3 fields of management are grouped under 3 services, Public Buildings Service, Federal Supply Service, and the National Archives and Records Service. A fourth, the Emergency Procurement Service, provides procurement and custody of a stockpile of critical materials and foreign-aid procurement. Program operations are performed mainly through 10 field offices.

Basic operations of the Administration are provided for in three "Operating expenses" appropriations, administrative support for which is provided for in an "Administrative operations" appropriation. Special and emergency programs such as construction of buildings, operation of supply warehouses, stockpiling of critical materials, and other operations are provided for in separate appropriations.

The Administration also serves by delegation from the Office of Defense Mobilization as executor of defense production expansion programs financed by allocations of borrowing authority made available to the President. Details of the programs are shown in the funds appropriated to the President chapter of the budget.

Operating Expenses, Public Buildings Service, General Services Administration

Operating expenses, Public Buildings Service: For necessary expenses of real property management and related activities as provided by law; repair and improvement of public buildings and grounds (including furnishings and equipment) under the control of the General Services Administration; rental of buildings in the District of Columbia; restoration of leased premises; moving Government agencies in connection with the assignment, allocation, and transfer of building space; demolition of buildings; acquisition by purchase or otherwise and disposal by sale or otherwise of real estate and interests therein; and not to exceed [$182,000] *$163,500* for expenses of travel; [$95,960,000] *$99,400,000*: *Provided*, That the foregoing appropriation shall not be available to effect the moving of Government agencies from the District of Columbia into buildings acquired to accomplish the dispersal of departmental functions of the executive establishment into areas outside of but accessible to the District of Columbia. (*Independent Offices Appropriation Act, 1955.*)

Appropriated 1955, **$95,960,000** Estimate 1956, [a] **$99,400,000**
Appropriated (adjusted) 1955, **$95,922,000**

[a] Excludes $204,000 for activities transferred in the estimates to—
"Expenses, general supply fund, General Services Administration" $91,000
"Operating expenses, National Archives and Records Service, General Services Administration" 113,000
The amounts obligated in 1954 and 1955 are shown in the schedule as comparative transfers.

Total obligations	98,610,652	95,803,000	99,505,000

PROGRAM AND PERFORMANCE

This appropriation provides for basic operations of the Administration which deal with acquisition, operation, and utilization of general-purpose space and the maintenance, custody, management, and disposal of real property.

The appropriation request for 1956 is a net increase of $3,440,000 above the amount appropriated for 1955. The net increase results from (1) increases of $4,130,000 for additional salaries required by Public Law 763, approved September 1, 1954, and $1,227,200 primarily for additional operations in the national industrial reserve, renovation and improvement of buildings in the District of Columbia, disposal of surplus real property and for buildings management services previously performed for another agency on a reimbursable basis, and (2) reductions of $1,917,200 largely due to further releases of 758,000 square feet of space, financing of 516,000 square feet by other appropriations and transfer of financing of certain minor buildings management services to other appropriations or funds.

1. *Buildings management.*—Provisions made for management, operation, maintenance and protection of 95,667,000 square feet of Government-owned and leased space compared to 96,342,000 square feet in 1955; repairs of 41,894,000 square feet of Government-owned space in the District of Columbia and adjacent area; operation of joint-use communications facilities and other related services. The estimate for 1956 is a net increase of $3,039,800 over the comparable amount for 1955 resulting from (*a*) increases of $4,108,000 for conversion required by Public Law 763, approved September 1, 1954, of positions formerly in CPC grades to GS grades or to wage rates prevailing

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

in the respective employment areas, $200,000 for buildings management services previously performed for other agencies on a reimbursable basis and $407,000 for renovations and improvements to buildings in the District of Columbia and adjacent area, and (*b*) decreases of $870,000 for further release of building space, $497,200 for reimbursement from other agencies for services previously supplied to them under this appropriation and $308,000 for further curtailment of services.

2. *Real estate utilization.*—General-purpose space is assigned and controlled and, where necessary, space is acquired by lease. Increased space utilization analyses and surveys proposed in 1956 will cover 100 million square feet. Future Federal building projects are investigated. Sites acquired for future construction of Federal buildings are utilized and leased pending construction, real property is appraised, and real property management practices of Federal agencies are examined and improvements prescribed. Real property reported excess to the needs of Federal agencies is screened for further economical Federal use.

3. *National industrial reserve.*—In cooperation with the defense agencies, a reserve of Government-owned industrial plants, machine tools and equipment is maintained. The estimate for 1956 provides for protection and maintenance on 7 plants and 8,309 tons of machine tools. The increase of $485,900 for 1956 is due largely to special maintenance requirements at a magnesium plant added in that year.

4. *Surplus property disposal.*—Real property declared surplus to the needs of Federal agencies is sold, leased, exchanged or otherwise disposed of. It is estimated that $49.2 million will be paid into the Treasury from this activity in 1956.

5. *Public utilities management.*—As a centralized function for all executive agencies, public utility equipment utilization and rate studies are made, contracts are negotiated, reviewed, and renewed and the Government represented as a user of public utilities before Federal and State regulatory bodies to obtain utilities service at minimum cost.

6. *Buildings design and supervision.*—All programs involving design, construction, and remodeling of buildings are centrally directed by a staff of technical personnel.

7. *Service administration.*—General supervision over all programs assigned to the Public Buildings Service is provided.

Emergency Operating Expenses, General Services Administration

Emergency operating expenses: For necessary emergency expenses of the General Services Administration not otherwise provided for, for operation, maintenance, protection, repair, alterations, and improvements of public buildings and grounds (including furnishings and equipment) to the extent that such buildings and grounds are under the control of the General Services Administration for such purposes as are provided for in Public Law 152, Eighty-first Congress, as amended; rental of buildings or parts thereof in the District of Columbia and elsewhere, including repairs, alterations, and improvements necessary for proper use by the Government, without regard to section 322 of the Act of June 30, 1932, as amended (40 U. S. C. 278a); restoration of leased premises; moving Government agencies in connection with the assignment, allocation, and transfer of building space; and not to exceed [$24,300] *$13,400* for expenses of travel; [$15,647,000] *$13,400,000: Provided,* That of this amount, such sums as may be determined by the General Services Administrator to be necessary may be paid into other appropriations of the General Services Administration only for purposes of accounting: *Provided further,* That no part of this appropriation shall be available to effect the moving of Government agencies from the District of Columbia to accomplish the dispersal of departmental functions. (*Independent Offices Appropriation Act, 1955.*)

Appropriated 1955, **$15,647,000** Estimate 1956, [a] **$13,400,000**

[a] Excludes $428,000 for activities transferred in the estimates to "Operating expenses, National Archives and Records Service, General Services Administration." The amounts obligated in 1954 and 1955 are shown in the schedule as comparative transfers.

AMOUNTS AVAILABLE FOR OBLIGATION

(Balances for June 30, 1954, are as certified under sec. 1311, Public Law 663)

	1954 actual	1955 estimate	1956 estimate
Appropriation or estimate	$20,200,000	$15,647,000	$13,400,000
Reimbursements from non-Federal sources	58		
Total available for obligation	20,200,058	15,647,000	13,400,000
Unobligated balance, estimated savings	−159,798

Comparative transfer to "Operating expenses, National Archives and Records Service"	−428,000	−428,000	
Total obligations	19,612,260	15,219,000	13,400,000

NOTE.—Reimbursements from non-Federal sources above are refunds of employee terminal leave payments (5 U. S. C. 61b).

OBLIGATIONS BY ACTIVITIES

Description	1954 actual	1955 estimate	1956 estimate
1. Buildings management	$19,112,913	$14,804,000	$13,140,000
2. Real estate services	125,662	108,000	60,000
3. Administrative operations	373,685	307,000	200,000
Total obligations	19,612,260	15,219,000	13,400,000

PROGRAM AND PERFORMANCE

Increases in general purpose space operations above those covered by the "Operating expenses, PBS" appropriation due to emergency defense programs are provided, largely for the Department of Defense. The appropriation request for 1956 is a net decrease of $2,247,000 below the amount appropriated for 1955.

1. *Buildings management.*—Management, operation, maintenance, protection, and related services for 8,616,000 square feet of Government-owned and leased space will be provided in 1956 as compared to 10,041,000 square feet in 1955. The estimate for 1956 is a net decrease of $1,664,000 below the comparable amount for 1955, resulting from (*a*) decrease of $2,048,000 for reductions in space and related services, and (*b*) an increase of $384,000 for conversion required by Public Law 763 (approved September 1, 1954), of positions formerly in CPC grades to GS grades or to wage rates prevailing in the respective employment areas.

2. *Real estate services.*—Space leasing and utilization services are provided.

3. *Administrative operations.*—Financial, administrative, and legal services required to support this program are provided by the integrated staff organization of General Services Administration. Reduction for 1956 reflects (*a*) transfer of $93,000 from this estimate to that for Administrative Operations to balance financing with workload, and (*b*) reduction of $14,000 for the decreased program.

1. Normal repairs	117,603		
Obligations incurred	13,582,518	12,535,457	20,000,000

PROGRAM AND PERFORMANCE

Repairs, renovations and improvements are made to more than 4,400 federally owned buildings outside the District of Columbia which were acquired at a cost of approximately $1 billion and contain 112 million gross square feet of floor space. The increased request for 1956 will allow a level of repairs equal to the new work generated during 1956 and will provide for some liquidation of the extensive backlog of work estimated to total $80 million.

1. *Normal repairs.*—Normal recurring repairs to buildings and equipment are made, including replacements or improvements costing less than $10,000. For 1956 it is proposed to undertake projects to offset the $11 million in work newly generated during each year, together with projects from the extensive backlog which will contribute to safe operations and prevent excessive deterioration.

2. *Major replacements.*—Facilities and equipment which have become obsolete or worn beyond economical repair are replaced. The 1956 program provides for 114 projects selected from the backlog to bring about operating economies.

3. *Major improvements.*—Improvements to facilities and equipment to meet changing or expanding needs of occupying agencies are made. The 1956 program provides for selection of 139 projects which will contribute substantially to efficient and economical operations.

4. *Post Office work-space improvements.*—New financing for 1955 and 1956 is provided by Post Office Department.

5. *Administrative operations.*—Financial, administrative, and legal services required to support this program are provided by the integrated staff organization of General Services Administration. Increase for 1956 reflects (*a*) transfer of $175,000 from the estimate for Administrative Operations to balance financing with workload, and (*b*) $85,000 for the expanded program.

PROGRAM AND PERFORMANCE

This appropriation provides for basic operations of the Administration for the establishment on a government-wide basis of efficient personal property management practices by prescribing procedures for improving management and utilization of motor vehicles, establishment of interagency motor pools, prescribing inventory levels, standardization of quality, sizes and types of commodities purchased, and effective use of Government-owned property, and by providing contracts for volume purchases, freight traffic rates and routing services, and related operations.

Increases are proposed in 1956 to progressively expand supply schedule contracting, transportation and utilization of Government property, and to implement Public Law 766 (approved Sept. 1, 1954), which authorized establishment of interagency motor equipment pools.

1. *Motor vehicle management.*—Interagency motor equipment pools are established after surveys demonstrate economies or improved efficiency will result; government-wide policies, regulations and procedures are developed for improving management and utilization of motor vehicles. Some 3,000 vehicles are expected to be removed from the Government's fleet by activating pools at 15 locations by June 30, 1956.

2. *Supply schedule contracting.*—Term contracts are established for volume purchasing against which agencies can place individual orders, at uniform price advantages, for commodities and services of common use, wherever this method is advantageous to the Government.

3. *Traffic management.*—To achieve economies in transportation of property, data on rates, classifications, packaging, and consolidations are furnished to civil agencies. Coverage of civilian traffic will be increased from 44 percent in 1955 to 50 percent in 1956.

4. *Personal property utilization and disposal.*—Personal property declared excess to the needs of Federal agencies is screened to achieve maximum utilization within the Government and obviate new purchases. The residue is either assigned for donation to State institutions or sold as surplus. Utilization transfers which obviate new purchases are expected to increase from $52 million in 1955 to $83 million in 1956.

5. *Supply standards.*—Satisfactory standards of quality and other characteristics of common-use commodities are established by developing specifications which establish standards of quality, types, sizes, and varieties of items, and by qualified products lists, for mandatory use by Federal agencies. Emphasis will be placed on conversion of industry specifications, thus increasing production from 587 specifications in 1955 to 616 in 1956, while reducing costs by 5 percent. Provision is also made for 37 standardization projects and for development and testing of security filing cabinets.

6. *Inspection.*—Delivery of commodities of specified standards is ensured by lot and plant inspections, laboratory tests, and analysis of samples prior to acceptance. Technical inspections of certain equipment declared excess by other agencies are made to determine the exact nature and condition in order to foster effective utilization. Greater utilization will be made of suppliers' laboratory facilities under the quality assurance inspection procedure.

7. *Supply management.*—Policies, regulations, procedures, and instructions for improving the management of supplies and equipment by civilian agencies are developed and their application and installation coordinated through onsite surveys. Performance for 1956 contemplates reducing the survey cycle from 8 to approximately 6½ years for agencies warranting comprehensive examination.

8. *Service administration.*—General supervision over all programs assigned to the Federal Supply Service is provided.

Expenses, General Supply Fund, General Services Administration

Expenses, general supply fund: For expenses necessary for operation of the general supply fund (except those authorized by law to be charged to said fund), including contractual services incident to receiving, handling, and shipping warehouse items; not to exceed $250 for purchase of newspapers and periodicals; and not to exceed [$93,100] *$85,400* for expenses of travel; [$12,066,800] *$12,000,000*: *Provided*, That [during the current fiscal year the general supply fund shall be available for the purchase of not to exceed twelve passenger motor vehicles for replacement only and for the acquisition of thirteen such vehicles from excesses reported by other agencies, or from forfeitures: *Provided further*, That] funds available to the General Services Administration for the current fiscal year shall be available for the hire of passenger motor vehicles.

Leased warehouse space temporarily in excess of operating requirements may be subleased to commercial organizations and the proceeds credited to the fund from which rental payments are made during fiscal year [1955] *1956*. (*Independent Offices Appropriation Act, 1955; Supplemental Appropriation Act, 1955.*)

Appropriated 1955, **$12,066,800** Estimate 1956, [a] **$12,000,000**

[a] Includes $91,000 for activities previously carried under "Operating expenses, Public Buildings Service, General Services Administration." The amounts obligated in 1954 and 1955 are shown in the schedule as comparative transfers.

Total obligations payable out of reimbursements from other accounts	188,805	297,200	270,000
Total obligations	13,516,853	12,455,000	12,270,000

PROGRAM AND PERFORMANCE

This appropriation provides for the expenses of operating the nationwide supply system whereby common-use commodities and services are sold to agencies (1) from store depots stocks, and (2) by direct delivery, whichever is more economical. It also provides for supervisory and clerical costs of repair shops and intra-agency motor equipment pools and related facilities. Cost of commodities and services are initially financed from the general supply fund, subject to reimbursement by ordering agencies. Total sales for 1956 are programed at $139.2 million as compared to $130.3 million for 1955. This increase of $9 million is largely in stores sales as a result of further implementation of the military supply support program and expansion of interagency motor pool operations. No increase is provided for in direct delivery sales nor in stores sales to civilian agencies, the latter on presumption that agencies will continue to consume their diminishing inventory excesses of certain commodities. No increase in appropriation for 1956 is requested. However, depletion of inventory excesses at a date earlier than contemplated or increased workload under additional purchase assignments from the military may necessitate provision of increased operating funds.

1. *Stores operations.*—Stocks of common-use commodities are received, warehoused, and sold at cost to agencies through a nationwide decentralized system of stores depots. Net increase in stores sales programed for 1956 is $6 million, or 10 percent, as compared to 8.7 percent increase in cost of stores operations.

2. *Direct order purchasing.*—Commodities are procured to maintain sufficient inventories in stores depots and for direct delivery to agencies. Purchases for inventory replenishment in 1956 increase $6 million for increased store sales, but direct delivery purchases are programed at the 1955 level.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

Expenses, General Supply Fund, General Services Administration—Continued

3. *Space and related costs.*—Space for occupancy of stores depots is provided. Reduction in costs for 1956 reflects objective to adjust space to new inventory levels prior to start of the year.

4. *Direct order inspection.*—Delivery of commodities of specified standards is insured by inspections at contractors' plants or General Services Administration stores depots, laboratory tests and analyses of samples prior to acceptance.

5. *Equipment maintenance.*—Supervision is provided over intra-agency motor pools and maintenance facilities operated under the general supply fund. Direct operating expenses of such pools and facilities are financed from that fund and are recovered from agencies or activities utilizing the services. Reduction in costs in 1956 reflects transfer of supervisory and clerical personnel incident to interagency motor pools to the general supply fund in accordance with Public Law 766, approved September 1, 1954.

6. *Administrative operations.*—Financial, administrative, legal, compliance and information service required to support this program are provided by the integrated staff organization of General Services Administration. Reduction for 1956 reflects (*a*) transfer of $231,000 from this estimate to that for Administrative Operations to balance financing with workload, and (*b*) an increase of $77,000 to service the sales program expansion.

PROGRAM AND PERFORMANCE

This appropriation provides for basic operations of the Administration which deal with management of the Government's archives and records, including custody and administration of permanent records in the National

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

Archives and of other noncurrent records in Federal records centers, surveillance of records management programs of Government agencies, and filing and publication of Federal laws and regulations. The 1956 budget estimate is an increase of $650,000 above the appropriation for 1955, $541,000 of which is for space costs in records centers previously financed by other appropriations, estimates for which have been reduced accordingly. Most of the remaining $109,000 is for increased records centers operations.

1. *Records services.*—Supervision of records management in all Federal agencies is provided by promulgation of governmentwide policies, regulations, procedures and instructions, and by furnishing technical advice. Records of Federal agencies which must be retained for a period of time, but are not needed for frequent reference, are brought into and administered in 10 regional records centers and 5 annexes until disposition can be effected. A national center at St. Louis administers records of former civilian employees of the Federal Government. The 1956 budget estimate provides for bringing into the regional centers an additional 325,000 cubic feet of records, the scheduled disposal of 325,000 cubic feet of records now in the centers, and for rendering some 750,000 reference services.

2. *Archives and related services.*—The permanently valuable records of the Government are selected, arranged, cataloged, preserved, and serviced in the Archives of the United States. Related services consist of (*a*) publication of the Federal Register, Code of Federal Regulations, United States Government Organization Manual, the slip laws, and the United States Statutes at Large; (*b*) preservation and servicing of historical records at the Franklin D. Roosevelt Library; and (*c*) National Historical Publications Commission.

3. *Nitrate film conversion.*—Financing of a temporary program to convert historically valuable motion picture holdings of the National Archives from an unstable nitrate base to a permanent safety acetate base was completed in 1955.

4. *Service administration.*—General supervision over all programs assigned to the National Archives and Records Service is provided.

Administrative Operations, General Services Administration—Con.

PROGRAM AND PERFORMANCE

Administrative operations in General Services Administration include (1) policy direction and coordination of programs, and (2) financial, administrative, legal, compliance and information services necessary to support operating programs. These functions and services are performed by integrated staff organizations in the central and regional offices which are financed from various appropriations and funds made available for that purpose. Total funds for agencywide administrative operations were $11.3 million in 1954, $10.2 million in 1955, and are estimated at $10.7 million for 1956. Comparison of amounts by fund for 1955 and 1956 follows, with the 1955 amounts adjusted for changes in financing which would be warranted as a result of reappraisal of workload.

	1955		1956
	Availability	*Adjusted*	*estimate*
Direct appropriations:			
Administrative operations	$3,789,500	$4,172,500	$4,450,000
Emergency operating expenses	307,000	214,000	200,000
Repair, improvement, and equipment	30,000	205,000	290,000
Expenses, general supply fund	2,538,000	2,307,000	2,384,000
Strategic and critical materials	1,163,600	1,132,600	1,182,600
Sites and planning	71,200	71,200	134,000
Operating expenses, public buildings service	38,000		
Revolving, management, and working funds:			
Defense Production Act program	1,315,000	1,315,000	1,290,000
Abaca fiber program	72,100	72,100	72,100
Construction services	146,400	146,400	[1] 146,400
Federal Civil Defense Administration program	9,900	9,900	[1] 9,900
Reimbursements:			
Administrative operations	579,500	414,500	410,000
Expenses, general supply fund	12,400	12,400	11,100
Strategic and critical materials	1,400	1,400	
Allocation: Mutual security program	94,000	94,000	[1] 94,000
Total	10,168,000	10,168,000	10,674,100

[1] Based on continuation of 1955 program levels.

The "Administrative operations" appropriation item provides for (1) policy direction and coordination of all programs of the Administration, and (2) complete financial, administrative, legal, compliance and information services for programs under the three regular "Operating expenses" appropriations and minor funds where services are not otherwise provided.

The net increase of $660,500 requested for 1956 results from (1) an increase of $345,000 by offsetting adjustments between several funds to balance financing with workload, (2) transfer to this appropriation of a function previously performed under "Operating expenses, PBS" at a cost of $38,000, (3) an additional $224,500 for partial restoration of essential functions which have had to be curtailed or eliminated, and (4) $53,000 for expanding the contract audit program.

Obligations incurred	10,009,700	2,700,000	2,000,000

PROGRAM AND PERFORMANCE

Refund and rebate payments due World War II contractors are made upon approval of claims presented under the Revenue Act of 1943 and Renegotiation Act of 1951, as amended. Of total program estimated at some 4,000 claims with estimated payments of over $46 million, 3,624 payments of $41.4 million had been made through October 1954. Current rate and amounts of certifications by Internal Revenue Service and determinations of the Tax Court of the United States indicate that funds presently available are adequate to meet payments through June 30, 1956.

Strategic and Critical Materials, General Services Administration

Strategic and critical materials: [Funds available for this purpose during the current fiscal year shall be available for personal services (not to exceed $7,000,000),] *For necessary expenses in carrying out the provisions of the Strategic and Critical Materials Stock Piling Act of July 23, 1946, including* services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a), and not to exceed [$139,000] *$137,000* of such funds shall be available for expenses of travel, *$521,500,000, to remain available until expended*: *Provided*, That any funds received as proceeds from sale or other disposition of materials on account of the rotation of stocks under said Act shall be deposited to the credit, and be available for expenditure for the purposes, of this appropriation: *Provided further*, That during the current fiscal year, there shall be no limitation on the value of surplus strategic and critical materials which, in accordance with subsection 6 (a) of the Act of July 23, 1946 (50 U. S. C. 98e (a)), may be transferred to stockpiles established in accordance with said Act: *Provided further*, That no part of funds available shall be used for construction of warehouses or tank storage facilities.

[For an additional amount for "Strategic and critical materials", $380,000,000, to remain available until expended: *Provided*, That no part of the foregoing amount shall be used for construction of warehouses or tank storage facilities.] (*Independent Offices Appropriation Act, 1955; Supplemental Appropriation Act, 1955.*)

2. Custody of materials:			
(a) Handling and storage of materials	22,817,480	21,500,000	16,734,000
(b) Cost of rotating materials	54,476,319	75,210,000	82,985,000
(c) Operating expense	2,626,828	2,616,600	2,718,500
Subtotal	79,920,627	99,326,600	102,437,500
Obligations incurred	292,865,333	719,212,252	640,513,000

PROGRAM AND PERFORMANCE

In carrying out the Strategic and Critical Materials Stock Piling Act of 1946 (50 U. S. C. 98 et seq.), the Emergency Procurement Service of the General Services Administration acquires, transports, stores, and otherwise administers materials inventories in accordance with general guidelines established by the Office of Defense Mobilization. Based on existing objectives, the status of the stockpile at November 1954 prices is expected to be as follows:

	June 30, 1954 (in millions)	*June 30, 1955 (in millions)*	*June 30, 1956 (in millions)*
Value of stockpile objectives:			
Minimum objectives	$6,447.5	$6,447.5	$6,447.5
Long-term objectives (increment)	3,316.5	3,316.5	3,316.5
Total objectives	9,764.0	9,764.0	9,764.0
Procurements for total objectives:			
Materials in inventory	4,570.2	5,601.4	6,300.5
Materials on order	757.1	332.7	159.8
Total procured	5,327.3	5,934.1	6,460.3
Balance to be procured:			
For minimum objectives	2,042.0	1,571.0	1,176.3
For long-term objectives (increment)	2,394.7	2,258.9	2,127.4
Total to be procured	4,436.7	3,829.9	3,303.7

1. *Acquisition of materials.*—For fiscal years 1955 and 1956 the Office of Defense Mobilization has authorized procurement of 34 materials involving obligations of $1,333 million. Of this amount, approximately two-thirds will be for purchases from the inventory acquired under the Defense Production Act Materials Expansion Program and the balance for open market purchases. Based on existing stockpile objectives the status of procurement on June 30, 1954, of the 75 materials on the stockpile list was as follows:

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

Strategic and Critical Materials, General Services Administration—Continued

Percent procurement completed:	Number of materials: Minimum objective	Number of materials: Long-term objective
100	37	11
90 to 99	7	4
75 to 89	5	3
50 to 74	10	13
25 to 49	9	11
Under 25	5	8
Total	73	50

In addition to direct procurement, materials are acquired by free transfer from programs of other agencies such as the basic materials program of the Foreign Operations Administration. During 1955 and 1956 the value of these transfers will amount to approximately $43.6 million, and will require expenditure of about $2.5 million from this appropriation for transportation, handling and other accessorial costs.

2. *Custody of materials.*—This activity covers the handling and storage of materials delivered to the stockpile inventory and the cost of rotating those materials subject to deterioration. Value of deliveries during 1955 and 1956 is expected to amount to $1,031.2 million and $699.1 million, respectively. Currently, materials are stored at 69 military depots, 19 General Services Administration and other United States Government warehouse and storage locations, and 213 commercial warehouses and storage locations. The rotation program for 1956 will involve sale and replenishment of about $83 million of inventory of abaca, sisal, rubber, fats and oils, pyrethrum, shellac, and tin. Net cost of rotation is estimated at $10 million.

1. Construction	$1,329,720	$250,000	$215,000
2. Grants	1,745,460	4,750,000	1,800,000
Obligations incurred	3,075,180	5,000,000	2,015,000

PROGRAM AND PERFORMANCE

1. *Construction.*—Under appropriations of $6,700,000 and contract authorization of $15 million a site has been acquired for a hospital center and principal contracts awarded with completion scheduled for May 1957. It is estimated that payments to contractors by June 30, 1956, will require additional appropriation of $9,700,000 for 1956, leaving $5,300,000 of unliquidated contract authorization.

2. *Grants.*—Grants being made to 6 private agencies for improving their hospital facilities have exhausted the $11,400,000 appropriated for this purpose. Public Law 663, approved August 26, 1954, authorized participation by Georgetown University Hospital which requires an additional appropriation of $1,610,000 for 1956.

OBLIGATIONS BY ACTIVITIES

Construction—1955, $18,500,000; 1956, $500,000.

PROGRAM AND PERFORMANCE

Of the total contract authorization of $19,500,000, provided under the head "Hospital facilities in the District of Columbia," it is proposed to liquidate $9,700,000, in addition to $4,500,000 provided for that purpose in 1955, leaving unfinanced contract authorization of $5,300,000.

Unfinanced contract authorization.—Status of the unfinanced balance is:

	1954 actual	*1955 estimate*	*1956 estimate*
Unfinanced balance at beginning of year	$19,500,000	$19,500,000	$15,000,000

PROGRAM AND PERFORMANCE

Construction of a new Post Office and Courthouse at Nome, Alaska, is necessitated by deterioration of the present building due to subsoil conditions to the point where it should be abandoned. The new building is estimated to cost $1,335,000. Site acquisition and preparation of plans are in process financed by funds previously provided for that purpose. Contract award is scheduled for January 1956 with completion in 1958. An appropriation of $1,200,000 in 1956 is required for construction cost.

OBLIGATIONS BY ACTIVITIES

Description	1954 actual	1955 estimate	1956 estimate
1. Lease-purchase projects:			
(a) Cost of sites			$1,720,000
(b) Design, engineering, etc.		$238,000	1,080,000
2. Federal construction projects:			
(a) Site acquisition	$81,925	643,667	25,000
(b) Design, engineering, etc.		121,000	
Obligations incurred	81,925	1,002,667	2,825,000

PROGRAM AND PERFORMANCE

Where not otherwise provided sites are acquired for buildings purchased under the Public Buildings Purchase Contract Act of 1954, Public Law 519, approved July 22, 1954, and for future Federal public buildings (44 Stat. 630, as amended, and 63 Stat. 176, as amended). Drawings and specifications are prepared for both types of buildings.

1. *Lease-purchase projects.*—Public buildings purchase contract program for 1955 contemplates drawings, specifications and related costs on lease-purchase projects having maximum cost over a 25-year period of $20.3 million. Design costs in 1955 were borne in part by this appropriation and in part by the "Construction, purchase, remodeling, and designing, buildings outside the District of Columbia" appropriation. Program projected for 1956 proposes design and limited site acquisition, entirely out of this appropriation, for projects having maximum cost over a 25-year period of $66.3 million. No funds are required through 1956 for amortization and interest payments to contractors, but some additional funds may be necessary for sites and design for the 1956 program.

2. *Federal construction projects.*—In the past several years this program has been limited to site acquisition and design of a few high-priority defense-connected or critical civilian requirements. Aside from the acquisition of site and design for a post office and courthouse at Nome, Alaska, in 1955, activity under this program is limited to completion of acquisitions started in prior years.

OBLIGATIONS BY ACTIVITIES

Description	1954 actual	1955 estimate	1956 estimate
1. Appraisers' fees and surveying		$1,030,000	$1,700,000
2. Auctioneers' and brokers' fees		1,920,000	3,200,000
3. Advertising		680,000	1,100,000
Obligations incurred		3,630,000	6,000,000

PROGRAM AND PERFORMANCE

Appraisers, auctioneers, and brokers familiar with local markets are used to accelerate the disposal of surplus real and related personal property. Fees and costs of advertising and surveying are paid out of receipts, subject to a limit of 12 percent of the proceeds of all dispositions within each fiscal year (68 Stat. 1051). Sales by brokers are expected to increase from $48 million in 1955, the first year of operation, to $80 million in 1956. Disposals are estimated to produce net revenues of $27.9 million in 1955 and $49.2 million in 1956.

OBLIGATIONS BY OBJECTS

ABACA FIBER PROGRAM

Abaca Fiber Program, General Services Administration

Abaca fiber program: For working capital for the abaca fiber program, authorized by the Act of August 10, 1950 (50 U. S. C. 541), $3,500,000, to remain available until expended.

Estimate 1956, **$3,500,000**

BUDGETARY AUTHORIZATION SCHEDULES

AMOUNTS AVAILABLE FOR OBLIGATION

Appropriation or estimate (obligations incurred)—1956, $3,500,000.

ANALYSIS OF EXPENDITURES

Obligations incurred during the year (total expenditures out of current authorizations paid into revolving fund)—1956, $3,500,000.

BUSINESS-TYPE STATEMENTS

PROGRAM AND PERFORMANCE

Purpose and financial organization.—Under Executive Order 10539 functions related to the production and sale of abaca fiber were transferred from the Reconstruction Finance Corporation to the General Services Administration July 1, 1954. The program is authorized by the Abaca Production Act of 1950 (50 U. S. C. 541), and is operated to provide a Western Hemisphere source for the material, which is essential for making rope, in case normal supplies are unavailable during an international emergency. The net Government investment in the enterprise on July 1, 1954, was $17,365,563. The activities of the program are financed through a revolving fund. The operating deficits of the program have been met by the Reconstruction Finance Corporation from proceeds of another production program not transferred to General Services Administration. For fiscal year 1956 it will be necessary to appropriate $3,500,000 for the program, of which $135,000 is for administrative expenses.

Analysis of budget program.—Production of abaca fiber is estimated at 23.5 million pounds in fiscal year 1955 and 28 million pounds in fiscal year 1956. This increase is the result of planned limitation on the amount of fiber to be harvested during fiscal 1955, and additional acreage coming into bearing during fiscal 1956. On the basis of present conditions, it is estimated that the inventory will increase from 14.3 million pounds on June 30, 1954, to 42.9 million pounds on June 30, 1956. Capital

Defense Production Guaranties, General Services Administration

BUSINESS-TYPE STATEMENTS

PROGRAM AND PERFORMANCE

Guaranties are given on loans made by lending institutions to finance construction or operation of defense production facilities, primarily for expanding the production of machine tools and strategic metals and minerals. Upon demand of lending institutions the Government is required to purchase the guaranteed percentage of the loan, or the Government may elect to make a voluntary purchase of the guaranteed percentage. Advances from appropriations available for procurement may be made to this fund for its temporary use. Net earnings are retained to meet possible future losses (50 U. S. C., app. 2091).

Guaranties totaling $63 million on 7 loans are estimated to be in effect by the end of 1956, compared to $92 million and 10 loans on June 30, 1954.

ANALYSIS OF EXPENDITURES

Obligations incurred during the year (total expenditures out of current authorizations paid into revolving fund)—1954, $3,000,000; 1955, $500,000.

BUSINESS-TYPE STATEMENTS

PROGRAM AND PERFORMANCE

Management, rental, operation, maintenance and protection of Government-owned and leased building space in and outside the District of Columbia for housing Federal agencies; repair and improvement of Government-owned space in the District of Columbia and adjacent area; operation of joint-use communication facilities and other related building services are initially financed through the buildings management fund which is reimbursed from funds appropriated, transferred, or advanced for that purpose to the General Services Administration (66 Stat. 594).

Program for 1956 reflects continued reductions in space. Net increase of $2,634,000 in operations in 1956 over 1955 represents (1) increased wages due to conversion of craft and custodial employees to wage board rates effective July 1, 1955, and other benefits under Public Law 763 (approved Sept. 1, 1954), totaling $5,530,000, (2) additional repairs and improvements to buildings in the District of Columbia of $700,000, and (3) reductions in rents and other costs of $3,596,000.

Any surplus resulting from operations, after making provisions for prior year losses if any, is paid into the Treasury as miscellaneous receipts.

Construction Services, Public Buildings, General Services Administration

BUSINESS-TYPE STATEMENTS

PROGRAM AND PERFORMANCE

Work performed in acquisition of Federal building sites, preparation of drawings and specifications for the construction, remodeling, renovation, repair, and improvement of buildings, and supervision of construction activities are financed through reimbursement from funds appropriated, transferred, or advanced to the General Services Administration (40 U. S. C. 296).

During 1954 the surplus increased by $35,674 to $176,217 due to a reduction in the employees' accrued leave liability. This surplus will be written off by reducing charges to individual projects and programs during 1955 and 1956. Thereafter, subsequent adjustments will hold reimbursements as close as possible to actual expenses.

General Supply Fund, General Services Administration

BUSINESS-TYPE STATEMENTS

PROGRAM AND PERFORMANCE

Purchase of materials and services required by the various Federal agencies and the District of Columbia for distribution through a nationwide system of supply depots or by direct delivery to ordering agencies, whichever is more economical, is initially financed by the general supply fund which is reimbursed on a sales-at-cost basis by the agencies to which the services and materials are sold (41 U. S. C. 7a–c). Expenses for operating the fund for these purposes are provided for under the appropriation "Expenses, general supply fund."

For the first time this estimate reflects operation of interagency motor equipment pools authorized under Public Law 766 (approved Sept. 1, 1954). Pools will be established at areas of high vehicle density. All costs of such operation are reimbursed to the fund by using agencies.

The estimate for 1956 provides for a nominal increase in stores sales to military establishments to partially implement the program for greater use of these supply facilities by the military establishments. No increases are programed for stores sales to civilian agencies or for direct delivery sales. Sales of services by interagency motor equipment pools in 1956 reflect full year operations at locations activated in 1955 and part year services at locations to be established during 1956. Actual goods and services sold for 1954, and estimated for 1955 and 1956 follows:

[In thousands]

	1954 actual	*1955 estimate*	*1956 estimate*
Stores issues (including special and miscellaneous operations)	$54,813	$62,100	$68,300
Direct delivery	49,781	65,800	66,100
Repair shops and intra-agency motor pools	1,737	2,240	1,200
Interagency motor equipment pools		200	3,600
Total	106,331	130,340	139,200

The investment of the United States Government in the fund is $45,057,615 of which $44 million represents direct appropriations and $1,057,615 donated assets. Donated assets are expected to increase to $6,781,515 by 1956 through transfer of motor vehicles from other agencies upon establishment of interagency motor equipment pools. Capital is utilized to provide adequate stocks of common-use items required by the agencies and to purchase automotive and other operating equipment necessary in carrying out the fund's objectives.

Any surplus arising out of the fund's operation, as determined by General Accounting Office audit, must be returned to the Treasury as miscellaneous receipts. Earnings from prior years' operations amounting to $821,750 will be returned to the Treasury during 1955.

BUSINESS-TYPE STATEMENTS

PROGRAM AND PERFORMANCE

A central blueprinting, photostating, duplicating, and distribution service is financed by a working capital fund pending reimbursements (40 U. S. C. 293). Surplus earnings are deposited into miscellaneous receipts of the Treasury. Through June 30, 1954, a total of $30,581 had been deposited, and it is estimated that $4,943 and $4,927 will be deposited in 1955 and 1956, respectively.

Net effect on budget expenditures	200,761	−972,000	−1,986,000
The above are charged or credited (−) to net receipts of the fund	200,761	−972,000	−1,986,000

NOTE.—The supporting schedules for this consolidation will be found in detail in part III of this document.

GENERAL SERVICES ADMINISTRATION—GENERAL PROVISIONS

The appropriate foregoing appropriation to the General Services Administration shall be credited with (1) advances or reimbursements for salaries and administrative expenses chargeable against other appropriations of the General Services Administration, and such salaries and expenses may be paid from such foregoing appropriation; (2) cost of maintenance, upkeep, and repair included as part of rentals received from Government corporations pursuant to law (40 U. S. C. 129); (3) reimbursements for services performed in respect to bonds and other obligations under the jurisdiction of the General Services Administration, issued by public authorities, States, or other public bodies, and such services in respect to such bonds or obligations as the Administrator deems necessary and in the public interest may, upon the request and at the expense of the issuing agencies, be provided from the appropriate foregoing appropriation; and (4) appropriations or funds available to other agencies, and transferred to the General Services Administration, in connection with property transferred to the General Services Administration pursuant to the Act of July 2, 1948 (50 U. S. C. 451ff), and such appropriations or funds may, with the approval of the Bureau of the Budget, be so transferred.

During the current fiscal year, no part of any money appropriated in this or any other Act shall be used during any quarter of such fiscal year to purchase within the continental limits of the United States typewriting machines (except bookkeeping and billing machines) at a price which exceeds 90 per centum of the lowest net cash price, plus applicable Federal excise taxes, accorded the most-favored customer (other than the Government, the American National Red Cross, and the purchasers of typewriting machines for educational purposes only) of the manufacturer of such machines during the six-month period immediately preceding such quarter: *Provided*, That the purchase, utilization, and disposal of typewriting machines shall be performed in accordance with the provisions of the Federal Property and Administrative Services Act of 1949, as amended.

The aggregate of annual payments for amortization of principal and interest thereon required by all purchase contracts entered into during the fiscal year 1956 pursuant to the Public Buildings Act of 1949 (63 Stat. 176), as amended by the Public Buildings Purchase Contract Act of 1954 (68 Stat. 518), shall not exceed the unused portion of the $5,000,000 limitation applicable prior to July 1, 1955, under section 411 (a) of the said Public Buildings Act of 1949, as amended.

The unobligated balances of the funds made available by section 1 (a) of the Act of June 14, 1946 (60 Stat. 257), the Second Supplemental Appropriation Act, 1950, and the General Appropriation Act, 1951, for the acquisition of sites and the preparation of drawings and specifications for Federal public building projects outside the District of Columbia, as authorized by title I of the Act of June 16, 1949 (63 Stat. 176), as amended, and by the Act of May 25, 1926 (44 Stat. 630), as amended, shall be available also for expenses of preparation of drawings and specifications, by contract or otherwise, *acquisition of sites where not otherwise provided for, including soil investigations and tests*, and administrative expenses, for carrying out the purposes of the Public Buildings Purchase Contract Act of 1954 (Public Law 519, Eighty-third Congress), approved July 22, 1954. (*Independent Offices Appropriation Act, 1955; Supplemental Appropriation Act, 1955.*)

CURRENT AUTHORIZATIONS

INTRODUCTORY STATEMENT

The Housing and Home Finance Agency administers the major housing activities of the Federal Government through (1) the Office of the Administrator; (2) the Federal National Mortgage Association; (3) the Home Loan Bank Board, including the Federal Savings and Loan Insurance Corporation; (4) the Federal Housing Administration; and (5) the Public Housing Administration.

The Administrator, serving as principal housing officer of the Federal Government, is responsible for the supervision and coordination of the programs and functions of these constituents. In addition to the housing and community development functions and programs assigned to the Agency, the Administrator has been responsible for certain related activities in these fields.

Most of the activities and programs of the Agency are financed from corporate funds. However, certain activities are financed from appropriations such as: Salaries and expenses, Office of the Administrator; capital grants for slum clearance and urban renewal; salaries and expenses for the United States Housing Act program; and annual contributions to local housing authorities for maintenance of the low-rent character of public housing projects.

OFFICE OF THE ADMINISTRATOR

Salaries and Expenses, Office of the Administrator, Housing and Home Finance Agency

Salaries and expenses: For necessary expenses of the Office of the Administrator, including rent in the District of Columbia; *purchase of not to exceed thirty-three passenger motor vehicles, of which twelve shall be for replacement only;* services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a); not to exceed [$169,325] *$291,000* for expenses of travel; *and* expenses of attendance at meetings of organizations concerned with the work of the agency; [the salary of a special counsel, but not in addition to staff otherwise authorized, at the salary rate of grade GS–18 so long as such position is occupied by the initial incumbent thereof; and transportation expenses and not to exceed $25 per diem in lieu of subsistence, as authorized by section 5 of the Act of August 2, 1946 (5 U. S. C. 73b–2), for persons serving without compensation as members of any advisory committee established pursuant to title VI of the Housing Act of 1949; $2,868,500, including additional costs of establishing and operating a central staff for investigation and compliance functions for the Housing and Home Finance Agency, and the Administrator's general supervision and coordination responsibilities under Reorganization Plan Numbered 3 of 1947 shall hereafter carry full authority to assign and reassign functions, to reorganize and to make whatever changes, including the reallocation and transfer of administrative expense funds and authority where applicable, necessary to promote economy, efficiency and fidelity in the operations of the Housing and Home Finance Agency] *$5,700,000*: *Provided,* That necessary expenses of inspections and of providing representatives at the site of projects being *planned or* undertaken by local public agencies pursuant to title I of the Housing Act of 1949 [and of], *as amended,* projects financed through loans to educational institutions authorized by title IV of the Housing Act of 1950, *as amended, and projects and facilities financed by loans to public agencies pursuant to section 108 of the Reconstruction Finance Corporation Liquidation Act as amended (40 U. S. C. 459),* shall be compensated by such agencies or institutions by the payment of fixed fees which in the aggregate will cover the costs of rendering such services, and expenses for such purpose shall be considered nonadministrative; and for the purpose of providing such inspections, the Administrator may utilize any agency and such agency may accept reimbursement or payment for such services from such institutions or the Administrator, and shall credit such amounts to the appropriations or funds against which such charges have been made, but such nonadministrative expenses shall not exceed [$500,000] *$700,000.*

[SALARIES AND EXPENSES]

[For an additional amount for "Salaries and expenses", $1,100,000; and the limitation under this head in the Independent Offices Appropriation Act, 1955, on the amount available for expenses of travel, is increased from "$169,325" to "$260,825": *Provided,* That the authority contained under this head in the Third Supplemental Appropriation Act, 1954 (Public Law 357) for transfer of funds to this appropriation is continued through December 31, 1954, but additional amounts transferred pursuant to this extension shall not exceed $250,000, including not to exceed $25,000 for expenses of travel.] *(5 U. S. C. 133y–16; 42 U. S. C. 1451; 12 U. S. C. 1749; Independent Offices Appropriation Act, 1955; Supplemental Appropriation Act, 1955.)*

Appropriated 1955,[a] **$3,968,500** Estimate 1956, **$5,700,000**

[a] Includes $1,100,000 appropriated in Supplemental Appropriation Act, 1955.

PROGRAM AND PERFORMANCE

The Administrator supervises and coordinates the housing programs and functions of the constituent units of the Agency and exercises direct responsibility for slum clearance and urban renewal; reserve of planned public works; housing loans for educational institutions; liquidating programs; and public facility loans. The Administrator is also responsible for the management and disposition of publicly financed war and veterans housing constructed under the Lanham and related acts, though at the present time direct management and disposition activities have

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

been delegated to the Public Housing Commissioner. The Administrator also serves as Chairman of the National Voluntary Mortgage Credit Extension Committee, established pursuant to title VI of the Housing Act of 1954, and provides staff assistance to the National Committee and to the 16 regional subcommittees participating in the voluntary home mortgage credit program.

The appropriation requested for fiscal 1956 is $5,700,000. This represents an increase of $1,731,500 compared with the total amount appropriated for 1955. The larger appropriation request reflects the first full year of activity under the new and broadened urban renewal program authorized by the amendments in Public Law 560 to title I of the Housing Act of 1949. Two other programs initiated in 1955 under the same authority of Public Law 560 will also be in operation on a full-year basis.

1. *Supervision and coordination.*—Provision is made in this activity for supervision and coordination of Agency housing programs; to provide on a full-year basis for the consolidated investigation and compliance staff for the entire Agency authorized by the Independent Offices Appropriation Act, 1955; and for staff assistance to carry out the functions vested in the Administrator by the Housing Act of 1954 with respect to coordination of the several forms of Federal assistance authorized for urban renewal.

2. *Slum clearance and urban renewal.*—For detail of activities for this program, see Revolving and management funds.

3. *Voluntary home mortgage credit.*—Provision is made for staff assistance to the National Committee and regional subcommittees engaged in a program to facilitate the flow of funds for FHA-insured and VA-guaranteed home mortgage loans into areas of shortage and for minority housing financing, as required by title VI of the Housing Act of 1954.

4. *Reserve of planned public works.*—Provision is made for staff assistance for the second year of a 3-year program of interest-free advances to State and local public agencies for planning needed public works to be constructed without Federal assistance, as authorized by section 702 of the Housing Act of 1954.

5–7. For detail of activities for housing loans for educational institutions, liquidating programs and public facility loans, see Revolving and management funds.

8. *Project inspection and audit.*—Provision is made for construction progress inspections and financial audits of slum clearance, college housing, public facility, and defense community facilities projects.

9. *School construction.*—The Housing and Home Finance Administrator, under a working agreement with the Commissioner of Education, performs certain technical services in connection with the program of school construction authorized by Public Law 815. Funds appropriated to the Office of Education are transferred to the Administrator for this purpose.

Net expenditures	$34,730	$40,541	$27,605

The Administrator is authorized to make long-term low interest loans to institutions of higher learning for construction of student and faculty housing. The $300 million Treasury borrowing authorization has been limited administratively to $150 million at the close of fiscal 1954 and a cumulative $200 million by the end of the current year. Release of an additional $25 million, bringing the cumulative authority to $225 million, is assumed in this budget program.

ANALYSIS OF BUDGET PROGRAM

As of June 30, 1954, a total of 339 institutions had applied for approximately $250 million in loan assistance to provide some 75,000 housing units. Of these applications, 137 had been approved to provide nearly 35,000 housing accommodations for single students and over 700 for student and faculty families.

Approved applicants are required to advertise for public bid the revenue bonds or other security which the Government has agreed to accept in making the loan. By the close of fiscal 1954, issues involving $11 million had been purchased privately, and applications totaling about $41 million had been withdrawn in favor of private financing at some stage of processing prior to approval of full applications. Estimates call for $16 million and $30 million of private financing for approved applicants in the current and budget years, thus increasing the number of institutions which can be assisted within the available authority.

Administrative expenses.—These are estimated at $575,000 in the 1956 fiscal year. The substantial demand for assistance under this program is creating a processing backlog which should be eliminated in the budget year. Administrative expenses cover staff requirements to process not only those cases which result in Federal loans, but also those projects—about 40 percent in dollar vol-

ume—which are ultimately financed in whole or in part by private investors.

FINANCING OPERATIONS

Borrowings from the Treasury approximately equal loan disbursements. The estimated $30 million in private financing in fiscal 1956 will hold loan disbursements and borrowings from the Treasury to a $28 million level.

OPERATING RESULTS

The only source of income is the net margin of about 0.7 percent between the interest rate charged the educational institutions and the rate paid to the Treasury. This margin will produce net income before reserves amounting to $52,300 in the current year and $62,000 in fiscal 1956. Increases in the reserve for losses, maintained at the level of 0.25 percent of the bond portfolio (excluding construction advances), occasion net losses of about $23,000 and $67,600 in the respective years. After the active loan approval and construction period is over, administrative costs will decline and continued earnings from the bond portfolio will produce a more favorable financial position.

Section 108 of the Reconstruction Finance Corporation Liquidation Act provided for a program of loans to local public agencies for the construction of public facility projects. Loans are limited to instances where financing is not otherwise available on reasonable terms. The Housing Act of 1954 increased the basic revolving fund authorization to $50 million, extended the program to June 30, 1956, and designated the Housing and Home Finance Administrator as the officer responsible for carrying out the program. The Supplemental Appropriation Act, 1955, appropriated $2 million to establish the revolving fund.

ANALYSIS OF BUDGET PROGRAM

In view of the limited funds available, a restricted program will be conducted on the following basis:

1. Preference will be given loan applications from communities of less than 25,000 population where funds are urgently needed for the basic public systems of water supply and distribution or sewage collection and disposal.
2. Priorities among otherwise eligible applicants will be assigned in order to communities (1) in declared critical defense housing areas; (2) near defense installations where facilities will assist in furthering the national defense program; and (3) in surplus labor market areas.
3. Loan funds will carry an interest rate of 4.25 percent, and RFC experience, as well as that under other HHFA programs, indicates that private financing may be obtained for some of the projects when plans are complete and contracts awarded, thus permitting some extension of benefits from the program as Federal loan commitments are released.

Administrative expenses.—These expenses are estimated at $75,000 in the budget year. Administrative responsibilities before, during and after the construction period are similar to those under a number of other agency programs, but somewhat more costly in the preconstruction period due to the careful screening required by fund limitations.

OPERATING RESULTS AND RETAINED EARNINGS

The net margin of approximately 1.75 percent between the interest received on loans and that paid on funds advanced to the revolving fund provides an estimated $3,700 income in the current year and $21,375 in fiscal 1956. Administrative expenses exceed these amounts and the cumulative deficit at the close of the budget year is estimated at $129,425. In subsequent years when the fund is fully invested, income will exceed expenses and the deficit will be gradually reduced.

Federal Reserve Bank of St. Louis

The Independent Offices Appropriation Act, 1955, established a single revolving fund to contain the following programs:

1. *War public works.*—Out of 1,572 public works projects originally constructed to serve defense and war needs, responsibility for further action as of June 30, 1954, involved 72 projects (42 U. S. C. 1531–1534).

2. *Defense community facilities.*—Loans and grants were made to communities to assist in providing facilities in critical defense housing areas.

3. *First and second advance planning.*—Advances of over $62 million were made to communities for the planning of non-Federal public works. Advances were to be repaid if and when the projects so planned entered construction.

4. *Loans for prefabricated housing.*—Loans were made to business enterprises for the production and distribution of prefabricated housing components and for large-scale site development.

5. *Alaska housing program.*—Alaska Housing Act authorized a revolving fund to which $19 million was appropriated for loans to assist in developing housing in Alaska. Capital was reduced by the rescission of $5 million in The Independent Offices Appropriation Act, 1954 (48 U. S. C. 484).

6. *Subsistence homesteads and greentowns.*—The only remaining assets of this program originally developed by the Farm Security Administration are mortgage loans acquired in the disposal of real properties (49 Stat. 2035).

7. *Public war and defense housing.*—Over 2,000 units of defense housing under title I of the Lanham Act, and the Defense Housing and Community Facilities and Services Act were under construction at the beginning of the current year. Out of nearly 650,000 dwelling units provided at various times under these programs, some 185,000 remained for management and disposition at June 30, 1954.

8. *Veterans reuse housing.*—This housing was provided under title V of the Lanham Act (42 U. S. C. 1571–1575) by relocation and reuse of surplus Federal structures. Out of the original 267,000 units, some 11,500 remained for disposal of Federal interests.

In summary, the original investment in these programs totaled more than $2.5 billion. Over $500 million has been recovered from operations and disposition and returned to the Treasury; property costing some $283 million has been transferred to other agencies and programs, most importantly the Department of Defense; in addition, property costing $687 million has been donated or relinquished to local governments in accordance with various statutes. There remain on hand assets with a book value of $900 million.

ANALYSIS OF BUDGET PROGRAMS

With the exception of comparatively minor additional commitments under the Defense Community Facilities Program (extended for 1 year within available funds and other limitations by the Housing Act of 1954), all expansion in the programs of the revolving fund had ceased before June 30, 1954. The most important program disbursements in the current and budget year are those for completing the 2,067 units of defense housing under construction at the beginning of the 2-year period, and for remaining commitments on incompleted defense community facilities.

The housing disposition program enters a more difficult phase in the current and budget years. From the standpoint of time required to complete disposition action, as well as administrative cost, difficulty in disposal is greatest in sales of permanent projects, and least in transfers of projects to local governments. Actual and scheduled disposition by types, in terms of dwelling units, is as follows:

	1954 actual	*1955 estimate*	*1956 estimate*
Sales of permanent projects	10,503	25,000	25,000
Demolition, removal, or sales for off-site use, temporary projects	24,455	26,016	23,859
Transfers to local governments	27,423	25,558	10,151
Total	62,381	76,574	59,010

In terms of responsibility for the management of property, the proportion of loans and mortgages increases throughout the 3-year period as shown by the highlight table as against sharp decreases in real property. Purchase money mortgages must be taken in considerable volume to assist in financing the disposition of permanent housing. Reduction in management responsibility for real property in terms of active dwelling units available for occupancy at the close of each fiscal year is as follows:

	1954 actual	*1955 estimate*	*1956 estimate*
Federally operated	74,854	55,521	40,519
Leased	95,668	50,194	13,886
Total	170,522	105,715	54,405

Administrative expenses.—The estimate of $2,800,000 is $1,140,000 below the authorization for the current year. Requirements decline with property disposition, and with the changing character of assets. Mortgages, for example, are much less costly to manage than real property.

FINANCING OPERATIONS

Capital structure will be simplified in the current year by retirement of the remaining $7.8 million in borrowings for the prefabricated housing loan program and elimination of the borrowing authority as shown in the budgetary authorization schedule. Liquidating dividends and repayments of Treasury borrowings are estimated at $75 million in the current year and $59 million in the budget year. Some $4.8 million in cash appropriated for the second advance planning program, and released by cancellation of planning contracts, will be returned to the Treasury. The remaining $70.2 million in the current year, and the $59 million in fiscal 1956, arise from management and disposition of loans and properties.

OPERATING RESULTS AND RETAINED EARNINGS

By the close of the 1956 fiscal year assets with a book value of $485 million will remain out of the original Federal outlay of $2.5 billion. By that date it is estimated that about $634.5 million will have been recovered from management and disposition and returned to the Treasury. In view of the recognized liquidating character of the fund, no action is required with respect to the $292 million deficit.

In addition to grants under the defense community facilities programs amounting to $3.4 million and $2.3 million in the respective years, properties with book (cost) values of $52.1 million and $34.6 million are to be transferred to local governments in accordance with authorizing statutes.

Losses of $75.3 million and $78.9 million are shown respectively in fiscal 1955 and 1956. Losses from sale of property are roughly $28 million and $38 million in the 2 years, and temporary housing with a book (cost) value of $73 million and $58 million is to be demolished. These losses are partially offset by income from loans and mortgages and from housing properties.

Undisbursed loan commitments 1953, $15,393,219; 1954, $2,071,185.

LIMITATION ON EXPENSES

Administrative Expenses Revolving Fund (Liquidating Programs), Office of the Administrator, Housing and Home Finance Agency

Office of the Administrator, revolving fund (liquidating programs): [There is established as of June 30, 1954, a revolving fund, and the Administrator is authorized to credit said fund with all moneys hereafter obtained or now held by him or by any constituent agency of the Housing and Home Finance Agency or any other official thereof, and to account under said fund for all assets and liabilities, in connection with (1) community facilities provided or assisted under title II of the Lanham Act, as amended (42 U. S. C. 1531–1534), or under title III of the Defense Housing and Community Facilities and Services Act of 1951, as amended (42 U. S. C. 1592–1592n); (2) loans or advances made pursuant to title V of the War Mobilization and Reconversion Act of 1944 (58 Stat. 791), or the Act of October 13, 1949 (40 U. S. C. 451–458); (3) functions transferred under Reorganization Plan No. 23 of 1950 (5 U. S. C. 133z–15, note), or authorized under sections 102, 102a, 102b, and 102c of the Housing Act of 1948, as amended (12 U. S. C. 1701g–1701g–3); (4) notes or other obligations purchased pursuant to the Alaska Housing Act, as amended (48 U. S. C. 484 (a)); (5) subsistence homesteads and greentowns (Acts of June 29, 1936, 49 Stat. 2035, and May 19, 1949, 63 Stat. 68); (6) public war housing under title I of the Lanham Act, as amended (42 U. S. C. 1521–1524), and defense housing under title III of the Defense Housing and Community Facilities and Services Act of 1951, as amended (42 U. S. C. 1592–1592n); and (7) veterans' re-use housing under title V of the Lanham Act, as amended (42 U. S. C. 1571–1575): *Provided*, That said fund shall be available for all necessary expenses (including administrative expenses) in connection with the liquidation of the programs carried out pursuant to the foregoing provisions of law, including operation, maintenance, improvement, or disposition of facilities, and for disbursements pursuant to outstanding commitments against moneys herein authorized to be credited to said fund, repayment of obligations to the Treasury, and refinancing and refunding operations on existing loans: *Provided further*, That any amount in said fund which is determined to be in excess of requirements for the purposes hereof shall be declared and paid as liquidating dividends to the Treasury not less often than annually: *Provided further*, That during] *During* the current fiscal year not to exceed [$3,940,000] *$2,800,000* shall be available for administrative expenses (including not to exceed [$265,000] *$183,200* for travel) [for the foregoing purposes], but this amount shall be exclusive of costs of services performed on a contract or fee basis in connection with termination of contracts and legal services on a contract or fee basis and of payment for services and facilities of the Federal Reserve banks or any member thereof, any servicer approved by the Federal National Mortgage Association, the Federal home-loan banks, and any insured bank within the meaning of the Act of August 23, 1935, as amended, creating the Federal Deposit Insurance Corporation (12 U. S. C. 264) which has been designated by the Secretary of the Treasury as a depository of public money of the United States: *Provided* [*further*, That after the effective date of this Act no additional notes or obligations shall be purchased from funds appropriated pursuant to the Alaska Housing Act, as amended (48 U. S. C. 484 (d)), except for the furtherance or refinancing of an existing loan: *Provided further*, That except for extensions, or refinancing, of existing obligations the authority to issue obligations to the Secretary of

Title III of the Housing Act of 1954 made major revisions in the program of slum clearance and urban redevelopment authorized in title I of the Housing Act of 1949. The 1949 act provided for Federal assistance to local governments for acquisition and clearance of land in blighted areas, preparation for re-use and sale or lease for redevelopment. The 1954 act both broadens and redirects the emphasis of the program by introducing the urban renewal concept.

The slum clearance and urban renewal program provides for the use of conservation and rehabilitation techniques to improve the housing and environment of entire city neighborhoods—as well as for the clearance and redevelopment of areas of slum and blight. Under the new legislation, an urban renewal project may include conservation and rehabilitation, or slum clearance and redevelopment, or any combination of these objectives that fit in with the community's urban renewal plans.

Local governments are authorized under the law either to complete the slum clearance projects presently in planning or development, or to broaden their programs to include rehabilitation and conservation projects if they meet the additional requirements for the new forms of Federal assistance.

The 1949 act contained a borrowing authorization of $1 billion to fund loans to local governments for planning, acquiring and clearing projects and for long-term loans to refinance the local investment in portions of projects to be disposed of by lease. Contracts and appropriations totaling $500 million were authorized for capital grants to defray up to two-thirds of net project costs. The 1954 act made no change in financial authorizations, but the budget assumes the augmentation by $500 million of the authority to make capital grant contracts.

ANALYSIS OF BUDGET PROGRAM

The budget program for fiscal 1956 rests primarily on the following assumptions:

1. Virtually all slum clearance projects commenced under the original program will advance from the planning to the execution stage, with 22 projects completed.

2. Some 225 communities will receive approval on workable programs (as required by the Housing Act of 1954) for comprehensive private and public action to stop the spread of urban blight and establish conditions assuring permanency of new urban values created by urban renewal projects. The planning of 135 urban renewal projects with direct Federal financial assistance will be approved, and 50 of these projects will reach the development stage.

3. Net loan disbursements, with a large number of projects entering the costly development stage, will rise from $9 million in the current year to $32.5 million in the budget year. Net disbursements would be much higher but for local borrowing from non-Federal sources secured by the Federal loan contract. During the past year notes were sold to private investors on 9 projects for an aggregate of $16.8 million, and the totals for fiscal 1955 and 1956 are estimated at $44 million and $60 million respectively.

4. Capital grant payments will rise sharply from $11.6 million to $47.6 million and to $60 million in the 3 years. Most of those payments will cover slum clearance projects, but partial payments on urban renewal projects will reach $5 million in fiscal 1956. Included also are $0.5 million in the current year and $2 million in fiscal 1956 for demonstration grants, as authorized by the Housing Act of 1954, for local undertakings which will contribute significantly to improvement of methods and techniques for the elimination and prevention of slums and blight.

5. Federal loan commitments rise with the expansion of the program, but this increase is partially offset by the reductions which occur as Federal loans, and private loans secured by Federal guaranties, are repaid from definitive project funds, i. e., proceeds from land sales and from local and Federal grants. These reductions will aggregate about $10 million in the current year and $20 million in fiscal 1956.

Administrative expenses estimated at $3,235,000 are included in the estimate of expenses for the Office of the Administrator.

FINANCING OPERATIONS

Appropriations for capital grants are estimated at $60 million for 1956. This will complete the grants for 22 slum clearance projects, and provide partial payments as authorized by Public Law 370 on some 66 slum clearance projects and 10 urban renewal projects. Treasury borrowings will rise to $31 million in line with net loan disbursements.

OPERATING RESULTS AND RETAINED EARNINGS

The net margin of about 0.5 percent between the rate at which money is borrowed from the Treasury and that at which it is loaned to local redevelopment agencies produces approximately $353,000 income for the program. After estimated charge-offs of $200,000 on planning advances receivable, and an increase of $16,000 in reserves for losses on loans and accrued interest, the net income for the year is $137,000, decreasing the cumulative deficit to less than $1 million.

FEDERAL NATIONAL MORTGAGE ASSOCIATION

[Submitted under the Government Corporation Control Act]

PURPOSE AND FINANCIAL ORGANIZATION

The Association, pursuant to the Federal National Mortgage Association Charter Act, is authorized to (1) provide supplementary assistance to the secondary market for home mortgages insured by the Federal Housing Administration or guaranteed by the Veterans Administration; (2) upon authorization by the President, provide special assistance for the financing of selected types of home mortgages pending establishment of their marketability or for home mortgages generally when economic conditions warrant; and (3) manage and liquidate the existing portfolio of the Association in an orderly manner, with a minimum of adverse effect upon the home mortgage market. The Association is required by law to maintain separate accountability for each of its three operating functions.

Secondary market operations.—Pursuant to the Housing Act of 1954 (Public Law 560, approved August 2, 1954), the Association on November 1, 1954, delivered to the Treasury its capital stock and paid-in surplus of $21 million, together with the earned surplus and reserves as of that date, in exchange for preferred stock in the new secondary market operations fund amounting to approximately $92 million. Additional funds for this program are derived from common stock subscriptions equal to 3 percent of the unpaid principal amount of mortgages sold to the Association. The Association is authorized to issue nonguaranteed obligations to the public up to ten times the capital and surplus allocated to that program. While the preferred stock is held by the Government, the Association is authorized to borrow up to $500 million from the Treasury, plus the amount of reduction in the similar authorization for the management and liquidating functions, but not to exceed $1 billion.

The preferred stock will be retired as rapidly as feasible, and meantime will pay dividends to the Treasury at rates determined by the Secretary of the Treasury at the beginning of each fiscal year. Recommendations for legislation to transfer ownership of the Association to the private owners of capital stock will be submitted to the Congress as promptly as practicable after all the Treasury preferred stock has been retired.

The mortgage purchase authority of the secondary market program is limited by a ceiling on borrowings of 10 times capital and surplus. Activity under this function will not approach this level during the period covered by the budget.

Special assistance and management and liquidating functions.—The Association is authorized to borrow funds from the Treasury sufficient to finance special assistance purchases of mortgages and participations, pursuant to the lending and commitment authority discussed below. To finance its management and liquidation operations, the Association may borrow from the Treasury. It may also issue nonguaranteed obligations to the public to replace Treasury financing of the liquidating portfolio. The total of such borrowings and obligations cannot exceed the amount of cash, mortgages, and Government bonds held by the Association.

The mortgage purchase authority for the management and liquidation function will not exceed $3,350,000,000 and will be progressively reduced as the portfolio's liquidation proceeds. The authority for the special assistance program is limited to $200 million in mortgage purchases and commitments, and $100 million in immediate participations. Available authority is estimated at $178.9 million at the end of 1955 and $50 million at the end of 1956.

ANALYSIS OF BUDGET PROGRAMS

Secondary market operations.—In its secondary market operations, the Association purchases only mortgages insured or guaranteed on or after August 2, 1954, of such quality, type, and class as to meet, generally, the purchase standards imposed by private investors. Mortgages are purchased at market prices determined by the Association, subject to fees and charges which will prevent excessive use of the Association's facilities and assure that the secondary market operation is fully self-supporting.

Principal amounts of mortgages involved in the secondary market operations of the Association are estimated as follows:

[In millions]

	1954	*1955*	*1956*
Purchases		$150.0	$200.0
Sales		48.0	119.5
Repayments, etc		2.0	5.5
Balance in portfolio at year end		100.0	175.0

Special assistance functions.—It is anticipated that the Association's special assistance will be made available for the support of mortgages and the purchase of immediate participations in mortgages on (1) defense, disaster, and military housing; (2) housing in the Territories and possessions; and (3) housing in or supporting urban renewal areas and to be insured under sections 220 and 221 of the National Housing Act. Mortgages purchased will meet, substantially and generally, the purchase standards imposed by private investors, but will not necessarily be readily acceptable to such investors at the time of purchase, and will involve fees and charges sufficient to assure the self-supporting character of the Association's operations.

The following table shows estimated principal amounts of mortgages for which special assistance is planned.

[In millions]

	1954	*1955*	*1956*
Purchases and participations		$23.0	$167.0
Sales			25.0
Repayments, etc		.5	4.0
Balance in portfolio at end of year		22.5	160.5

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

Management and liquidating functions.—The Association will liquidate the portfolio acquired or committed prior to the Housing Act of 1954 as rapidly as possible in an orderly manner. Sale prices will be fixed so as to assure a minimum of adverse effect on the home mortgage market and a minimum loss to the Government, as provided by section 301 (c) of the Charter Act.

The following table shows estimated principal amounts of mortgage transactions in the liquidation and management portfolio.

[In millions]

	1954	*1955*	*1956*
Purchases	$480.8	[1] $692.2	$102.2
Sales	575.1	350.0	275.0
Repayments, etc	102.3	115.0	117.5
Balance in portfolio at year end	2,301.1	2,528.3	2,238.0

[1] Includes $64.2 million transferred from Reconstruction Finance Corporation pursuant to Reorganization Plan No. 2 of 1954.

Administrative expenses.—Administrative expenses of the Association for purchasing, servicing and sales are estimated to increase by $500,000 to $4,100,000 in 1956 to provide for the additional costs of operation imposed by Public Law 560 and an increase in the number of mortgages to be serviced.

Distribution of these estimated costs for fiscal year 1955 and 1956 are as follows:

	1955 estimate	*1956 estimate*
Secondary market operations	$595,500	$1,072,100
Special assistance functions	66,500	659,300
Management and liquidating functions	2,938,000	2,368,600
Total	3,600,000	4,100,000

FINANCING OPERATIONS

The Association's operations under its three functions will be financed as estimated in the following table:

[In millions]

	1954	*1955*	*1956*
Secondary market operations:			
Preferred stock (Treasury)	--------	$92.0	--------
Common stock (purchased by public)	--------	4.5	$6.0
Non-guaranteed borrowing from the public	--------	--------	59.5
Special assistance and management and liquidating functions:			
Repayments to Treasury	−$212.9	−515.2	−942.9
Nonguaranteed borrowing from the public	--------	750.0	750.0

Liquidation of the Treasury's financing of the management and liquidating portfolio will be accelerated through the issuance of nonguaranteed debentures.

OPERATING RESULTS AND RETAINED EARNINGS

The Association's net income (after provision for payments in lieu of income taxes by the secondary market program) and retained earnings are shown in the following table:

	1955 estimate	*1956 estimate*
Net income:		
Secondary market operations	$1,404,500	$3,108,620
Special assistance and management and liquidating	37,090,740	38,112,350
	38,495,240	41,220,970
Retained earnings:		
Secondary market operations	449,500	1,588,120
Special assistance and management and liquidating	[1] 26,590,740	64,703,090
	27,040,240	66,291,210

[1] $10.5 million earned prior to November 1, 1954, delivered to Treasury in accordance with Public Law 560.

FINANCIAL CONDITION

Pending establishment of adequate reserves for losses, no dividend payments to the Treasury are proposed.

The following table shows the amount of the outstanding portfolio and undisbursed commitments at the end of fiscal years 1955 and 1956:

[In millions]

	1955	*1956*
Mortgages held:		
Secondary market operations	$100.0	$175.0
Special assistance functions	22.5	160.5
Management and liquidating functions	2,528.3	2,238.0
Total	2,650.8	2,573.5
Undisbursed commitments:		
Special assistance functions	98.6	89.5
Management and liquidating functions	105.3	--------
Total	203.9	89.5

Federal home loan bank advances outstanding	$675,084	$700,000	$750,000

PURPOSE AND FINANCIAL ORGANIZATION

The three-member Board supervises the Federal home loan bank system, the system of Federal savings and loan associations and the Federal Savings and Loan Insurance Corporation. Net administrative expenses of the Home Loan Bank Board are paid from assessments against the 11 Federal home loan banks, the Examining Division, and the Federal Savings and Loan Insurance Corporation.

ANALYSIS OF BUDGET PROGRAMS

The Board's budget is based on six activities.

1. *Executive direction and staff services.*—This includes formulation of basic policy and the furnishing of some staff services that are common to the Board and the Insurance Corporation.

2. *Examination and supervision of Federal home loan banks.*—The Board supervises and examines the operations of the Federal home loan banks. Expenses are met from assessments upon the banks.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

3. *Supervision of Federal and State-chartered insured institutions.*—The financial condition and operations of each insured institution is analyzed and corrective action is instituted when warranted. Supervision of insured institutions operating under State charter is carried on, cooperatively, under arrangements made with the respective State authorities.

4. *Chartering of Federal savings and loan associations and branches thereof.*—Federal savings and loan associations are chartered and regulated. In the case of new organizations, the Board satisfies itself that proper standards are met before approving the charter. In addition, applications of State-chartered associations for conversion into Federal savings and loan associations are examined.

5. *Fiscal and housekeeping services.*—These consist of auditing; accounting; budgetary and financial reporting; internal budget control; fiscal organization and management; and general housekeeping and common operating services, including printing and reproduction work.

6. *Examination of savings and loan associations.*—Supervisory examinations are made of Federal savings and loan associations, State-chartered associations insured by the Federal Savings and Loan Insurance Corporation, and such uninsured member institutions of the Federal home loan bank system as are not examined by State examiners. Audits are also made of over 80 percent of all insured associations. Examinations are also made of institutions applying for insurance of accounts and for conversion from a State to a Federal charter when required by the Board. The costs of examinations and audits are assessed against the institutions examined. At the beginning of the fiscal year 1955 there were 3,370 insured institutions with total assets aggregating $25.9 billion.

ADMINISTRATIVE EXPENSES

The Board's estimated administrative expenses for the fiscal year 1956, payable wholly out of income derived from assessments and charges, amount to $920,000. This compares with $775,000 for the fiscal year 1955. These amounts exclude nonadministrative expenses of the Examining Division which are shown separately.

FINANCIAL REVIEW

The Board is not incorporated, and has no capital stock. Its assets consist of cash on deposit with the Treasurer of the United States and accounts receivable for the services which it renders. Its liabilities consist essentially of accounts payable.

HOME LOAN BANK BOARD EXAMINING DIVISION

PROGRAM HIGHLIGHTS

The Division conducts regular periodic and special supervisory examinations of all Federal savings and loan associations, of State-chartered savings and loan associations which are insured by the Federal Savings and Loan Insurance Corporation, and of noninsured member institutions of the Federal Home Loan Bank System that are not subject to State supervision. When required by the Board, the Division also examines and analyzes the financial condition of institutions which apply for membership in the System, for insurance of accounts or for conversion from a State to a Federal charter. In addition, insured institutions are required to have an audit; approximately 76 percent of the number of such institutions exercise their option of having the Division conduct a combined examination and audit. The institutions examined bear the costs of examination, and the fees charged therefor are calculated to defray all of the operating expenses of the Division.

The following table reflects the work of the Division:

[Dollars in millions]

PROGRAM HIGHLIGHTS

The Federal home-loan banks together with the building and loan associations and similar institutions which are members of the banks, constitute the Federal home-loan bank system, designed to stabilize and strengthen institutions promoting private thrift and individual home ownership (47 Stat. 725). Authority to borrow from the Treasury in the amount of $1 billion was provided (64 Stat. 247). No borrowings have been made to date and none is anticipated in 1956.

PURPOSE AND FINANCIAL ORGANIZATION

The Federal Savings and Loan Insurance Corporation insures savings up to $10,000 in all savings and loan associations which apply and are approved for insurance. The Corporation prevents default of insured institutions through loans, purchases of assets, or cash grants, in order to eliminate conditions which might affect adversely the financial soundness of other insured institutions. When an insured institution declared in default is a Federal savings and loan association, the Corporation is appointed as receiver for the purpose of liquidation. The Corporation also may act as receiver for State-chartered institutions declared in default if appointment is tendered by State authority. On June 30, 1954, the 3,370 insured associations had resources of $25.9 billion. The Corporation's liability on the insured institutions aggregated $22.6 billion.

Income from insurance premiums and interest on investments has been sufficient to meet all insurance losses, operating expenses, dividends on capital stock, and to establish a reserve for insurance losses of $147.6 million as of June 30, 1954. The Corporation has authority to borrow up to $750 million from the Treasury, but no loans have ever been required. Since the time and size of expenditures for the prevention of default and payment of insurance are unpredictable, estimates of these expenditures are omitted from the financial statements.

The Corporation operates under the supervision and direction of the Home Loan Bank Board, which provides certain administrative services and conducts the examination and supervision of insured institutions. The costs of examinations are paid by the institutions examined while the cost of all other services rendered by the Board are paid by the Corporation.

HOME LOAN BANK BOARD—Continued

FEDERAL SAVINGS AND LOAN INSURANCE CORPORATION—Continued

ANALYSIS OF BUDGET PROGRAM

The budget program comprises four activities.

1. *Underwriting.*—This activity constitutes an analysis and evaluation of the insurance risk in connection with applications for insurance of accounts and other applications submitted pursuant to regulatory requirements. The assets of insured institutions have increased $8 billion or 45 percent in the last 2 years. The increasing interest in insurance of accounts on the part of uninsured institutions, plus the anticipated rate of growth, will increase the insured liability of the Corporation to an estimated $30.3 billion by June 30, 1956, as compared to $15.6 billion on June 30, 1952.

2. *Prevention of default and payment of insurance.*—The Corporation not only pays insurance in cases of defaulted institutions, but prevents default wherever possible. Through 1954, 37 institutions have needed financial assistance from the Corporation. Cash grants in the net amount of $4.9 million have been made to 28 institutions to prevent default; a grant to 1 institution has been authorized but not disbursed; in 1 case the assets of the institution were purchased and liquidated without loss; and 7 institutions with aggregate assets of $9.2 million have been placed in liquidation and insurance paid. Total losses since organization amount to $5,160,774. As a result of these actions, the savings of 65,427 investors have been protected against loss.

3. *Analysis of operations.*—The Corporation maintains a current analysis of the financial condition of member institutions, the flow of savings, and the character and volume of mortgage lending. Such studies furnish information to the Home Loan Bank Board and the Corporation in connection with their other activities. By selective review of geographical or community areas and phases of operations it is possible to observe factors which may result in an undue concentration of risk. Certain analyses of trends in the fields of thrift and home mortgage finance are made available to member institutions and the public.

4. *Executive direction, fiscal and other administrative services.*—Provision is made for all fiscal and other administrative services as well as management and direction.

Administrative expenses.—The requested authorization to use $500,000 of corporate income in 1956 is based upon the assumption there will be no abnormal demands on the resources of the Corporation.

FINANCING OPERATIONS

The 1956 program provides for net investments of $14.5 million in United States Treasury bonds and notes as compared with an estimated $13.3 million in 1955 and the actual increase of $10.7 million in 1954. Projections of operations and financial condition indicates that investments held as of June 30, 1956, at par value, will aggregate $257 million.

The Corporation is retiring its original capital stock held by the Secretary of the Treasury at par in amounts equivalent to 50 percent of annual net income. Of the $100 million of original capital stock, $33.2 million has been retired, and with an additional payment of approximately $12.1 million in 1956 the outstanding stock will be reduced to $54.7 million.

Through June 30, 1954, the Corporation has paid $37.5 million in lieu of dividends on capital stock. It is estimated that additional payments will be made to the Secretary of the Treasury of $1.5 million in 1955 and $1.3 million in 1956.

OPERATING RESULTS AND RETAINED EARNINGS

Income of the Corporation consists primarily of insurance premiums, admission fees, and interest on investments in Government obligations. Total income, since 1934 of $200,630,558 has been applied as follows:

	Percent	*Amount*
Expenses	4.4	$8,809,606
Insurance losses	2.5	5,160,774
Return on capital stock	19.5	39,039,869
Legal reserve	73.6	147,620,309

Based upon a continuing rapid growth in the aggregate savings and creditor obligations of insured institutions, and an increase in the number of insured associations, the Corporation estimates net income before payment of a return on capital stock for fiscal 1956 of $27.5 million. This amount is $7.1 million or 35 percent above the net income for 1954. After providing for an interest payment in lieu of dividends on the capital stock of $1.1 million for 1956, at a rate determined by the Secretary of the Treasury, the balance of the net income, estimated at $26.4 million will be credited to the insurance reserve of the Corporation.

It is estimated that the aggregate insurance liability will amount to $30.3 billion by June 30, 1956. Because of the statutory provision requiring the Corporation to accumulate a reserve of 5 percent of all insured accounts and creditor obligations, the Corporation will not transfer any earnings to the Treasury except the annual payment in lieu of dividends.

FINANCIAL CONDITION

Total assets of the Corporation amounted to $234.6 million as of June 30, 1954, an increase of $11.4 million or 5.1 percent since the beginning of the year. Investment in Government obligations of $227.9 million represented 97.1 percent of corporate assets. In the absence of insurance losses, it is anticipated that total assets will reach $264.8 million by June 30, 1956.

The Corporation is required by law to accumulate a reserve of 5 percent of all insured accounts and creditor obligations of insured institutions before collection of premiums may be discontinued. As of June 30, 1954, this statutory requirement amounted to approximately $1.1 billion. The insurance reserve as of that date amounted to $147.6 million or 0.65 percent of the insured liability of $22.6 billion.

HOME OWNERS' LOAN CORPORATION

[Submitted under the Government Corporation Control Act]

PROGRAM HIGHLIGHTS

The Corporation was organized under the Home Owners' Loan Act of 1933 for the purpose of providing credit facilities to refinance the mortgages of destitute urban home owners. The Corporation's lending authority expired on June 12, 1936, and since that time it has been in liquidation. The Corporation's dissolution date was February 3, 1954 (67 Stat. 126). All loan accounts have been disposed of, and $14,023,650, representing surplus from its operations, have been turned over to the Treasury. The account will be closed with the final liquidation of interest payable and the payment of matured bonds as presented by the public.

PURPOSE AND FINANCIAL ORGANIZATION

The Administration, created by the National Housing Act of 1934, is a noncorporate business-type agency made subject to the Government Corporation Control Act by the Housing Act of 1948. The principal purposes of the Administration are to stabilize the mortgage market and to improve home financing practices and housing standards and conditions, through insurance of loans and investments to finance the production, purchase, repair and improvement of residential structures. On June 30, 1954, a total of $34.4 billion of insurance had been written, of which $16.4 billion was outstanding.

The Administration maintains 11 insurance funds: (1) A fund for insuring repair and improvement loans under title I; (2) a fund for insuring mortgages on individual dwellings under title I (sec. 8); (3) a mutual mortgage insurance fund for insuring mortgages on 1- to 4-family dwellings under title II; (4) a fund for insuring mortgages on multifamily housing projects, including cooperative housing, under title II; (5) a fund for emergency and special-incentive mortgage and loan insurance under title VI; (6) an investment insurance fund for operations under title VII; (7) a military housing insurance fund for operations under title VIII; (8) a fund for insuring defense housing mortgages under title IX; (9) a section 220 housing fund for insuring mortgages on properties built or rehabilitated in urban renewal areas or in areas which have been approved for slum clearance and urban redevelopment projects; (10) a section 221 housing fund for insuring loans on housing built or rehabilitated for families displaced by governmental action under urban renewal programs or under slum clearance and urban redevelopment programs; and (11) a servicemen's mortgage insurance fund for insuring mortgages covering homes purchased by members of the Armed Forces.

The mutual mortgage insurance fund differs from other insurance funds in that mortgagors may receive participation payments from any excess of fees and premiums paid over losses and expenses allocable to the fund.

Income of the Administration's insurance programs is derived from premiums, appraisal and miscellaneous fees, and interest on investments in Government securities.

ANALYSIS OF BUDGET PROGRAMS

The estimates reflect assumptions designed to carry out the President's expanded housing program with major emphasis placed on the prevention of slums and urban blight. The amended existing laws are also expected to make it easier for families to purchase or build new homes or to repair or buy existing homes.

1. *Repair and improvement loan insurance, title I.*—Financial institutions insured against losses are required to provide 10 percent co-insurance on loans for the alteration, repair and improvement of residential properties. Loans insured are characteristically short-term, unsecured notes currently averaging around $680. Estimates are set forth below:

	1954 actual	*1955 estimate*	*1956 estimate*
Initiation: Loans insured	2,130,378	1,600,000	1,500,000
Maintenance of insurance in force (number of notes) end of year	3,643,300	3,647,300	3,071,300
Settlement:			
Claims	43,012	57,500	52,500
Average defaulted notes in process of collection	146,444	150,750	155,000

2. *Mortgage insurance for homes and multifamily housing, sections 8, 203, 207, and 213.*—Mortgages may be insured on 1- to 4-family structures and on multifamily housing projects up to statutory limits of 80, 90, or 95 percent of appraised value, depending upon the character of the property and the amount and character of the loan involved. Insured mortgages may cover new and existing properties both for rent and for sale, including nonprofit cooperative housing. Insured loans may bear a higher ratio to the value of the mortgaged property in the lower price and rental ranges to aid in construction of homes for families of low and moderate income. Estimates are as follows:

Initiation:	*1954 actual*	*1955 estimate*	*1956 estimate*
Unit applications examined	412,538	658,900	724,000
Inspections made (1- to 4-family units)	855,940	1,160,400	1,330,000
Average multifamily units under inspection	17,600	20,300	18,700
Unit mortgages insured	231,159	367,800	389,100
Maintenance of insurance in force, end of year (dwelling units)	1,661,844	1,929,917	2,217,227
Settlement:			
Mortgages terminated (dwelling units)	97,862	105,727	113,790
Properties and mortgages acquired	421	800	201
Properties and mortgages on hand	363	832	626

3. *Rehabilitation and neighborhood conservation housing insurance, sections 220 and 221.*—Mortgage insurance programs to assist in financing the rehabilitation of existing dwellings as well as the construction of new dwellings in connection with slum clearance and urban renewal undertakings are estimated in the following table.

Initiation:	*1954 actual*	*1955 estimate*	*1956 estimate*
Unit applications examined	----------	16,000	112,300
Inspections made (1- to 4-family units)	----------	19,000	102,600
Average multifamily units under inspection	----------	600	8,000
Unit mortgages insured	----------	4,300	59,700
Maintenance of insurance in force, end of year (dwelling units)	----------	4,300	64,000

4. *Special incentive mortgage and loan insurance and yield insurance on rental housing investments, sections 603, 608, 609, 610, 611, and 701.*—Special war housing mortgage insurance provisions of title VI were continued until April 1948 for home mortgages and until March 1950 for rental project mortgages to provide veterans emergency housing, and other special incentive programs were added. These included (*a*) insurance of loans for the manufacture of housing by industrial processes and short-term notes incident to the sale of such housing; (*b*) insurance of mortgages executed in connection with the sale by the Government of certain federally owned housing; and (*c*) insurance of short-term loans to finance the construction, by modern site-fabrication methods, of groups of 25 or

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

more single family dwellings, as well as for insured long-term financing of properties constructed under this section. Insurance authority under title VI has terminated. Authority to insure mortgages to finance the sale of Government-owned housing has been transferred to title II of the National Housing Act by the terms of the Housing Act of 1954. Title VII provides for insurance of an annual return of 2¾ percent and a minimum annual amortization of 2 percent on equity investments in rental housing. Estimates are as follows:

	1954 actual	*1955 estimate*	*1956 estimate*
Initiation:			
Unit applications examined	7	--------	1,000
Average multifamily units under inspection	400	--------	--------
Unit mortgages, loans and investments insured	68	--------	1,000
Maintenance of insurance in force (unit mortgages, loans and investments, end of year)	745,372	716,445	691,694
Settlement:			
Mortgage loans and investments terminated (dwelling units)	25,741	28,927	25,751
Properties and mortgages acquired	181	624	573
Properties and mortgages on hand	1,350	979	847

5. *Military, defense and mortgage insurance for servicemen, sections 803, 903, 908, and 222.*—Rental housing is provided under title VIII, through use of private capital under insured mortgages, for civilian and military personnel of the armed services and for personnel at atomic energy installations. Military housing insurance authority has been extended for 1 year to June 30, 1955. Mortgage insurance for both 1- to 4-family and multifamily housing is provided for under title IX. The housing must be within the limits of programed housing needs in defense areas designated by the President. This program was scheduled to expire June 30, 1954. However, in the Housing Act of 1954 the President was given standby authority for an additional year. Section 222 was added to the National Housing Act to authorize a new mortgage insurance program for the purchase of homes by servicemen in the Armed Forces of the United States. Estimates are as follows:

	1954 actual	*1955 estimate*	*1956 estimate*
Initiation:			
Unit applications examined	8,609	8,600	8,500
Inspections made (1- to 4-family units)	116,719	9,600	26,700
Average multifamily units under inspection	7,195	5,400	3,300
Unit mortgages insured	39,830	22,000	7,900
Maintenance of insurance in force, end of year (dwelling units)	129,642	149,854	156,550
Settlement:			
Mortgages terminated (dwelling units)	490	1,788	1,204
Properties and mortgages acquired	78	903	602
Properties and mortgages on hand	78	181	66

Administrative expenses.—Headquarters expenses in connection with general administration of the programs; the servicing of insurance in force; and the technical, administrative and fiscal control over insuring operations are estimated at $6,650,000 for 1956. Operating expenses of the 75 field insuring offices are included in a separate nonadministrative budget.

FINANCING OPERATIONS

Mortgage insurance claims are met by the issuance of debentures which are subsequently redeemed out of insurance income and the proceeds of the sale of acquired properties and mortgages. In 1954, $46,352,400 of debentures were issued. Debentures to be issued are estimated at $55,424,550 in 1955 and $48,381,200 in 1956. Debentures were retired in 1954 in the amount of $16,818,700. Retirement of debentures in 1955 and 1956, respectively, are estimated at $86,102,050 and $67,752,700.

OPERATING RESULTS AND RETAINED EARNINGS

Operations in 1954 resulted in a net income of $54,428,285. This income was distributed entirely to insurance reserves. $48,750,402 was placed in the statutory reserves under the group accounts of the mutual mortgage insurance fund, which are available for losses, expenses and other charges, as well as for distribution of participation shares to the participating mortgagors of group accounts having credit balances. A deficit of $1,791,948 was charged against the general reinsurance reserve under the mutual mortgage insurance fund, which is available to cover losses and expenses where group account balances are inadequate. $7,469,831 was placed in the general insurance reserves under the nonmutual insurance programs.

Net income is expected to be $70,559,850 in 1955 and $92,060,100 in 1956. In the 2-year period it is estimated that income totaling $121,276,544 will be added to the general surplus account of the mutual mortgage insurance fund which was established pursuant to Public Law 560 (approved Aug. 2, 1954), while an estimated $41,343,406 of insurance income will be placed in the insurance reserves under nonmutual funds.

Insurance reserves which totaled $294,566,011 on June 30, 1953, increased to $338,826,126 during fiscal 1954 and are expected to reach $399,415,876 by June 30, 1955, and $487,175,976 by June 30, 1956. These reserves are required to meet future insurance losses and expenses and are not available for return to the Treasury.

Under the title I claims program, $116,217 was collected and paid into the Treasury in 1954. In accordance with Public Law 560 (approved Aug. 2, 1954), the title I claims account was merged with the title I insurance fund. Only those collections made by the title I claims program prior to August 1, 1954, amounting to $34,588, were covered into the Treasury in 1955. During 1954, $65,497,433, representing the original capital investment of the Government, was repaid to the Treasury.

FINANCIAL CONDITION

On June 30, 1953, the total of Federal Housing Administration capital and insurance reserves stood at $306,628,111. During 1954 the capital and reserves increased to $354,090,614 and it is estimated that they will reach $417,615,876 by June 30, 1955, and $502,175,976 by June 30, 1956.

INSURANCE AUTHORITY

Public Law 560 (approved Aug. 2, 1954) amended the general mortgage insurance authorization under section 217 to provide that the aggregate amount of principal obligations of all mortgages which may be insured and outstanding at any one time under insurance contracts or commitments to insure pursuant to any section or title (except sec. 2) shall not exceed the sum of (*a*) the outstanding principal balances, as of July 1, 1954, of all insured mortgages (without taking into account prepayments or delinquencies), (*b*) the principal amount of all outstanding commitments to insure as of July 1, 1954, and (*c*) $1,500,000,000, except that with the approval of the President such amount may be increased by not to exceed $500,000,000. Additional authorization will be required during 1955, as shown on schedule C–1, to carry the mortgage insurance programs during the latter part of 1955 and through 1956.

The title I section 2 authorization of $1,750,000,000 for repair and improvement insurance will be sufficient to carry this program through both 1955 and 1956 (see schedule C–1).
