INTRODUCTION

Pursuant to the provisions of the Budget and Accounting Act (31 U.S.C. 1–24) and other applicable laws, the budget for the fiscal year 1961 contains the President's recommendations for the work program and financial program of the Government for the 12 months beginning July 1, 1960, and ending June 30, 1961. It also presents comparable information for the fiscal years 1959 (actual) and 1960 (partly actual and partly estimated).

The material in the budget covers both groups of funds administered by agencies of the Government—Federal funds (owned by the Government), and trust and deposit funds (held in trust or in suspense by the Government), although only the Federal funds are included in the computation of the budget surplus or deficit.

ARRANGEMENT OF THE BUDGET

The budget document consists of the President's budget message and four parts which contain summary tables, detailed data, and special analyses.

In the budget message (pp. M4 through M78), appear the general statement of the President's financial program and an outline of his major recommendations.

Part I of the document (pp. 1 through 8) contains five summary tables. Each of these tables is designed to bring together in one or two pages some overall aspect of the Federal budget.

Part II (pp. 9 through 840) contains the detail of the budget for Federal funds, including various types of tables and schedules, explanatory statements of the work to be performed and the money needed, and the text of the language proposed for enactment by Congress on each item of authorization. Also included is material on a few trust funds which require congressional action. This part of the budget begins with four statements (tables 6 through 9) which supplement the tables of part I. The remainder of part II is arranged in chapters reflecting the organization of the Government.

Part III (pp. 841 through 893) contains a summary table on trust and deposit funds, and detailed schedules and explanatory statements on the various trust funds.

Part IV (pp. 895 through 940) contains a limited number of special analyses of budget data supplementing material appearing in other parts of the budget. Some of these give details for certain summary figures appearing in part I—for example, a classification of budget receipts by source, and a classification of budget expenditures according to functions and subfunctions. Other special analyses in part IV contain additional data or classifications not summarized elsewhere.

An appendix, printed separately, contains more detailed information on personal services by grade and title.

The budget for the municipal government of the District of Columbia is also printed separately. This main volume of the budget contains detail with respect to the District government only for the Federal payments and loans to the District.

EXPLANATORY STATEMENTS

Introductory statements at the beginning of each part give further explanations as follows:

Pages 2–3—Types of funds; basis of stating receipts and expenditures; concept of budget surplus or deficit; types of new obligational authority; certain budget classifications.

Pages 10–12—Operation of Federal funds and format of material printed for most accounts and funds in part II.

Page 842—Operation of trust and deposit funds covered by part III.

Page 896—Coverage of the special analyses printed in part IV.

Note.—Detail in the tables of this document may not add to the totals because of rounding.

BUDGET MESSAGE OF THE PRESIDENT

To the Congress of the United States:

With this message, transmitting the Budget of the United States for the fiscal year 1961, I invite the Congress to join with me in a determined effort to achieve a substantial surplus. This will make possible a reduction in the national debt. The proposals in this budget demonstrate that this objective can be attained while at the same time maintaining required military strength and enhancing the national welfare.

This budget attests to the strength of America's economy. At the same time, the budget is a test of our resolve, as a nation, to allocate our resources prudently, to maintain the Nation's security, and to extend economic growth into the future without inflation.

In highlight, this budget proposes:

1. Revenues of $84 billion and expenditures of $79.8 billion, leaving a surplus of $4.2 billion. This surplus should be applied to debt reduction, which I believe to be a prime element in sound fiscal policy for the Nation at this time.

2. New appropriations for the military functions of the Department of Defense amounting to $40.6 billion, and expenditures of $41 billion. These expenditures, which will be slightly higher than the 1960 level, will provide the strong and versatile defense which we require under prevailing world conditions.

3. Increased appropriations (including substantial restoration of congressional reductions in the 1960 budget), and a virtual doubling of expenditures, for nonmilitary space projects under the National Aeronautics and Space Administration. This furthers our plans to keep moving ahead vigorously and systematically with our intensive program of scientific explora-

BUDGET TOTALS

[Fiscal years. In billions]

	1959 actual	*1960 estimate*	*1961 estimate*
Budget receipts	$68.3	$78.6	$84.0
Budget expenditures	80.7	78.4	79.8
Budget deficit	12.4	.....	.....
Budget surplus (applied to debt retirement)	.....	.2	4.2
New obligational authority	81.4	79.7	79.4

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

tion and with the development of the large boosters essential to the conquest of outer space.

4. Nearly $4.2 billion in new appropriations for mutual security programs, an increase of about $950 million above appropriations for the current year, with an increase of $100 million in expenditures. This increase in program is needed to accelerate economic and technical assistance, chiefly through the Development Loan Fund, and to strengthen free world forces, in particular the forces of the North Atlantic Treaty Organization, with advanced weapons and equipment.

5. A record total of expenditures, $1.2 billion, for water resources projects under the Corps of Engineers and the Bureau of Reclamation. In addition to funds for going work, this amount provides for the initiation of 42 new high-priority projects, which will require $38 million in new appropriations for 1961, and will cost a total of $496 million over a period of years.

6. Substantially higher expenditures in a number of categories which under present laws are relatively uncontrollable, particularly $9.6 billion for interest; $3.9 billion to help support farm prices and income; $3.8 billion for veterans compensation and pensions; and $2.4 billion in aid to State and local governments for public assistance and employment security activities. The aggregate increase in these relatively uncontrollable expenditures is more than $1 billion over 1960.

7. Research and development expenditures of $8.4 billion—well over one-half of the entire Nation's expenditures, public and private, for these purposes—in order to assure a continuing strong and modern defense and to stimulate basic research and technological progress.

8. Recommendations for prompt legislative action to increase taxes on highway and aviation fuels, and to raise postal rates. These measures are needed to place on the users a proper share of the rising costs of the Federal airways and postal service, and to support the highway program at an increased level.

9. Recommendations to extend for another year present corporation income and excise tax rates.

10. A constructive legislative program to achieve improvements in existing laws relating to governmental activities and to initiate needed actions to improve and safeguard the interests of our people.

In short, this budget and the proposals it makes for legislative action provide for significant advances in many aspects of national security and welfare. The budget presents a balanced program which recognizes the priorities appropriate within an aggregate of Federal expenditures that we can soundly support.

I believe that the American people have made their wishes clear: The Federal Government should conduct its financial affairs with a

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

high sense of responsibility, vigorously meeting the Nation's needs and opportunities within its proper sphere while at the same time exercising a prudent discipline in matters of borrowing and spending, and in incurring liabilities for the future.

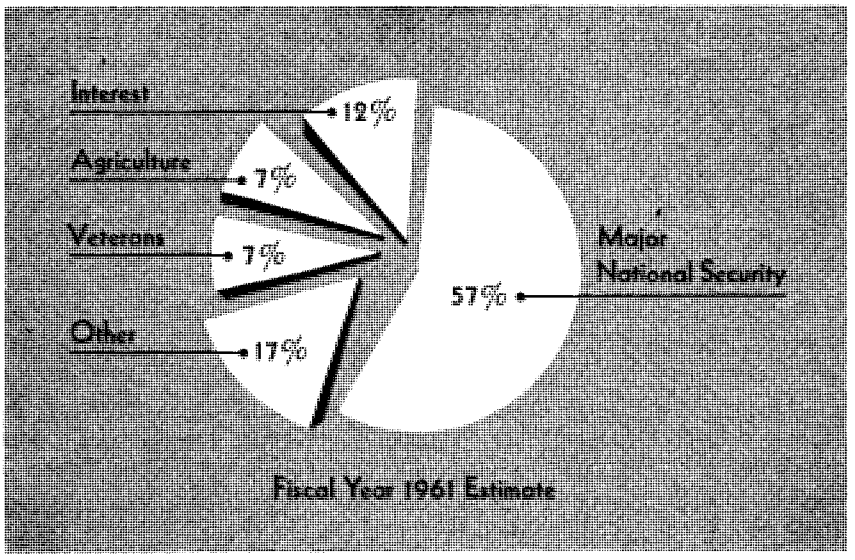
BUDGET TOTALS

During the present fiscal year we have made encouraging progress in achieving sound fiscal policy objectives. The deficit of $12.4 billion in fiscal 1959, which was largely caused by the recession, is expected to be followed by a surplus of $217 million in the current year. To safeguard this small surplus, I am directing all Government departments and agencies to exercise strict controls over the expenditure of Federal funds. Even so, the slender margin of surplus can be attained only if economic growth is not interrupted.

For the fiscal year 1961, I am proposing a budget surplus of $4.2 billion to be applied to debt retirement. In my judgment this is the only sound course. Unless some amounts are applied to the reduction of debt in prosperous periods, we can expect an ever larger public debt if future emergencies or recessions again produce deficits.

In times of prosperity, such as we anticipate in the coming year, sound fiscal and economic policy requires a budget surplus to help counteract inflationary pressures, to ease conditions in capital and credit markets, and to increase the supply of savings available for the productive investment so essential to continued economic growth.

PURPOSES OF BUDGET EXPENDITURES



Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

The budget recommendations for 1961 lay the groundwork for a sound and flexible fiscal policy in the years ahead. A continuance of economic prosperity in 1962 and later years can be expected to bring with it further increases in Federal revenues. If expenditures are held to the levels I am proposing for 1961 and reasonable restraint is exercised in the future, higher revenues in later years will give the next administration and the next Congress the choice they should rightly have in deciding between reductions in the public debt and lightening of the tax burden, or both. Soundly conceived tax revision can then be approached on a comprehensive and orderly basis, rather than by haphazard piecemeal changes, and can be accomplished within a setting of economic and fiscal stability.

Budget expenditures in 1961 are estimated at $79.8 billion, which is $1.4 billion more than the 1960 level. The total increase is attributable to (1) an increase of more than $1 billion in relatively uncontrollable expenditures for farm price supports fixed by law, interest on the public debt, veterans compensation and pensions, and public assistance grants, and (2) an increase of about $500 million in expenditures because of commitments made in prior years for Federal housing programs, for civil public works projects and other construction, for loans under the mutual security program, and for other programs.

New activities and expansion of certain other programs have been included on a selective basis of need. These increases are offset by reductions in other existing programs, including the proposed elimination of the postal deficit.

New obligational authority recommended for the fiscal year 1961 totals $79.4 billion. This is $306 million less than the amounts already enacted and recommended for 1960, and $401 million less than estimated expenditures in 1961.

Budget receipts under existing and proposed legislation are expected to rise substantially to $84 billion in 1961. This compares with the revised estimate of $78.6 billion for 1960 and actual receipts of $68.3 billion in 1959.

MANAGEMENT OF THE PUBLIC DEBT

Achievement of the proposed budget surplus will provide an opportunity to offset part of the deficits incurred in the fiscal years 1958 and 1959 largely because of the recession. The corresponding reduction of the public debt will reduce Government competition with private industry, individuals, and State and local governments for investment funds and will help ease the pressure on interest rates. Along with the recommended removal of the interest rate ceiling on long-term Federal debt, this will help hold down budget expenditures for interest, which

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

now amount to almost one-eighth of the whole budget.

Statutory debt limit.—It is estimated that the public debt, which stood at $284.7 billion on June 30, 1959, will be $284.5 billion on June 30, 1960, and will decline to $280 billion at the end of fiscal 1961. Thus, the budget surplus estimated for fiscal 1961 will permit the Government to end the year with desirable operating leeway within the permanent debt limit of $285 billion. However, the fluctuating seasonal pattern in receipts will again require a temporary increase in the debt limit during the fiscal year 1961, since the present temporary limit of $295 billion expires on June 30, 1960. It is expected that the request for a new temporary limit will be for less than the present $295 billion if the Congress accepts my budgetary proposals.

Management of the Public Debt:

LEGISLATIVE PROPOSALS

1. Remove interest ceiling on Treasury bonds.
2. Provide temporary increase in debt limit.

Interest ceiling.—Effective management of a debt of this size requires a reasonable distribution among securities maturing at different times. Three-fourths of all marketable Treasury securities outstanding today come due in less than five years, of which $80 billion will mature in less than a year. As long as the rate that would have to be paid on newly issued bonds exceeds the present statutory ceiling of 4¼%, it is impossible to issue and sell any marketable securities of over five years' maturity.

Exclusive reliance on borrowing in a limited sector of the market is an expensive and inefficient way to manage the debt. Inflationary pressures increase as the volume of short-term and hence highly liquid securities mounts, especially if these securities are acquired by commercial banks. Further, effective monetary policy becomes more difficult when the Treasury has to refinance often. To make possible prudent and flexible management of the public debt, to permit sale of a modest amount of intermediate and longer term bonds when market conditions warrant such action, and to keep the average maturity of the debt from constantly shortening, it is imperative that the Congress immediately act to remove the 42-year-old 4¼% limitation on interest rates on Government securities maturing after five years.

BUDGET RECEIPTS

Estimated budget receipts of $84 billion in the fiscal year 1961 assume a high and rising level of economic activity in calendar year

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

Budget Receipts:

LEGISLATIVE PROPOSALS

1. Extend corporate and excise tax rates scheduled for expiration or reduction June 30, 1960.
2. Provide equitable taxation of cooperatives.
3. Prevent excessive depletion allowances on mineral products (issue now before Supreme Court).
4. Revise tax on gains from sales of depreciable personal property.
5. Adopt clarifying technical amendments to income tax laws.
6. Increase aviation fuel taxes and credit them to general fund.
7. Establish adequate fees and charges for special services or benefits.

1960. Specifically, this revenue estimate is consistent with an increase in the gross national product from about $480 billion for calendar 1959 to about $510 billion for calendar 1960. Personal incomes and corporate profits are expected to rise considerably beyond last year's levels, which were depressed somewhat by the long duration of the steel strike. The accompanying table shows the sources of Government receipts for the fiscal years 1959, 1960, and 1961.

BUDGET RECEIPTS

(See special analysis B in part IV of this document)

[Fiscal years. In billions]

Source	1959 actual	1960 estimate	1961 estimate
Individual income taxes	$36.7	$40.3	$43.7
Corporation income taxes	17.3	22.2	23.5
Excise taxes	8.5	9.1	9.5
All other receipts	5.8	7.0	7.3
Total	68.3	78.6	84.0

The estimates for 1961 assume (1) extension of present tax rates and (2) the adoption of modifications recommended last year for certain tax laws. These are summarized in the following paragraphs.

Extension of present tax rates.—In order to maintain Federal revenues, it is necessary that the present tax rates on corporation profits and certain excises be extended for another year beyond their scheduled expiration date of June 30,1960. The scheduled reductions in the excise tax rates on transportation of persons and the scheduled repeal of the tax on local telephone service, which were enacted in the last session of the Congress, should be similarly postponed.

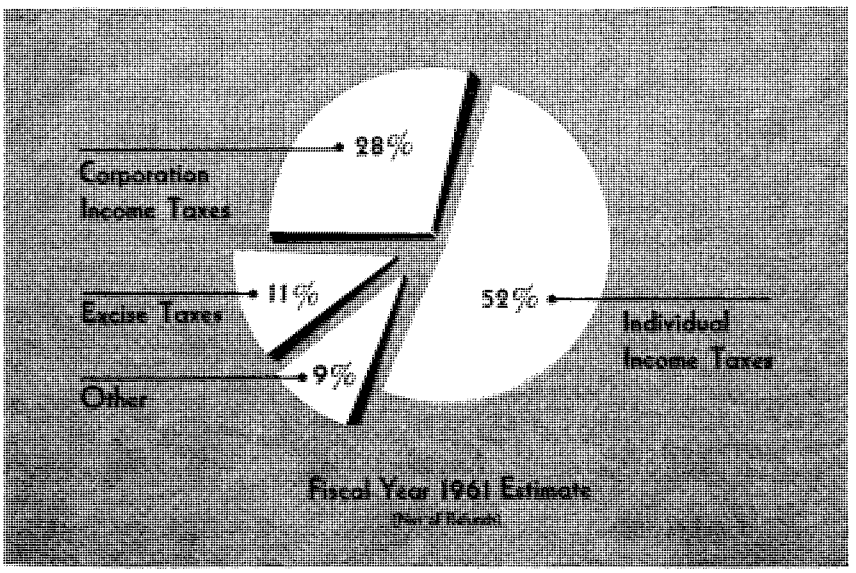
Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

Improvement of the tax system.—The recent tax revision hearings of the Ways and Means Committee have provided valuable information bearing on changes in the tax laws. The Treasury will continue to work in cooperation with the committees of the Congress in developing sound and attainable proposals for long-range improvement of the tax laws.

As the development of a comprehensive tax revision program will take time, the Congress should consider this year certain changes in the tax laws to correct inequities. These include amendments of the laws on taxation of cooperatives, now before the Congress, and a number of technical changes on which the Treasury Department has been working with committees of Congress. There is also before the Congress an amendment to prevent unintended and excessive depletion deductions resulting from the computation of percentage depletion allowances on the selling price of finished clay, cement products, and mineral products generally; unless the problem is satisfactorily resolved in a case now pending before the Supreme Court, the need for corrective legislation in this area will continue.

Under existing law, administration of the depreciation provisions is being hampered by the attempts of some taxpayers to claim excessive depreciation before disposing of their property. If gain from the sale of depreciable personal property were treated as ordinary income, the advantage gained in claiming excessive depreciation deductions would be materially reduced and the taxpayer's judgment as to the useful life of his property could more readily be accepted. Accordingly, I

SOURCES OF BUDGET RECEIPTS



Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

recommend that consideration be given to a change in the law which would treat such gain as ordinary income to the extent of the depreciation deduction previously taken on the property.

Aviation fuel taxes.—To help defray the cost of the Federal airways system, the effective excise tax rate on aviation gasoline should be promptly increased from 2 to 4½ cents per gallon and an equivalent excise tax should be imposed on jet fuels, which now are untaxed. The conversion from piston engines to jets is resulting in serious revenue losses to the Government. These losses will increase unless the tax on jet fuels is promptly enacted. The revenues from all taxes on aviation fuels should be credited to general budget receipts, as a partial offset to the budgetary costs of the airways system, and clearly should not be deposited in the highway trust fund.

Changes in fees and charges.—The cost of other Federal programs which provide measurable special benefits to identifiable groups or individuals should be recovered through charges paid by beneficiaries rather than by taxes on the general public. Whenever feasible, fees or charges should be established so that the beneficiaries will pay the full cost of the special services they receive. To help accomplish this purpose, I have directed that further work be done by

ESTIMATED SAVINGS TO THE GENERAL TAXPAYERS FROM MORE ADEQUATE FEES AND CHARGES

[In millions]

Proposal	Fiscal year 1961	Full annual effect
Increase postal rates	$554.0	$554.0
Support highway expenditures by highway-user taxes:		
Replace future diversion of general excise taxes to trust fund with increased motor fuel tax or other user charges	----	850.0
Transfer financing of forest and public land highways to trust fund	39.0	36.0
Charge users for share of cost of Federal airways:		
Increase taxes on aviation fuels	72.0	88.0
Transfer aviation fuel taxes from highway trust fund to general fund	17.0	20.0
Revise fees for noncompetitive oil and gas leases	----	14.0
Recover administrative costs of Federal crop insurance	----	6.4
Increase patent fees	3.7	3.7
Increase miscellaneous fees now below costs	8.0	8.9
Total savings	693.7	1,581.0

the departments and agencies on a carefully defined inventory of Federal services which convey such special benefits. In the meantime, the Congress is requested to act favorably on the postal rate proposals described in this message and on a number of other specific proposals now pending before it or planned to be submitted this year for increased fees or charges for special services.

RECEIPTS FROM AND PAYMENTS TO THE PUBLIC

The program of responsible fiscal policy represented by a balanced budget with a substantial surplus is reinforced by an even greater surplus of total cash receipts from the public over cash payments to the public. In this more comprehensive measure of Federal financial activity, obtained by consolidating budget, trust fund, and certain other Federal transactions, receipts from the public are estimated at $102.2 billion in 1961 and payments to the public at $96.3 billion, resulting in an excess of $5.9 billion of receipts.

This excess of receipts will be used to repay cash the Government has previously borrowed from the public. Repayment of such debt owed to the public will be greater than the amount of public debt retired, because the Government trust funds are expected to add to their holdings of public debt securities to the extent that trust fund receipts exceed trust fund expenditures. This will reduce the debt held by the public in like amount by shifting ownership to the trust funds.

For the fiscal year 1960, on the other hand, an excess of payments to the public of $542 million is estimated, despite the anticipated budget surplus of $217 million. This situation reflects the fact that total disbursements of trust funds will exceed their receipts in 1960, notably in the old-age and survivors insurance, unemployment, and highway trust funds.

REVIEW OF MAJOR FUNCTIONS

The following sections of this message discuss the legislative and budget recommendations for 1961 in terms of the major purposes which they fulfill. The following table compares the estimated expenditures for each of the nine major functional categories with the actual figures for 1959 and the latest estimate for 1960.

The expenditure totals for 1960 and 1961 include expenditures under both existing and proposed legislation. The allowance for contingencies is intended to provide for unforeseen increases in existing programs, and for proposed new programs not separately itemized.

BUDGET EXPENDITURES

[Fiscal years. In millions]

Function	1959 actual	1960 estimate	1961	
			Estimate	Percent of total
Major national security	$46, 426	$45, 650	$45, 568	57. 1
International affairs and finance	3, 780	2, 066	2, 242	2. 8
Commerce and housing	3, 421	3, 002	2, 709	3. 4
Agriculture and agricultural resources	6, 529	5, 113	5, 623	7. 0
Natural resources	1, 669	1, 785	1, 938	2. 4
Labor and welfare	4, 421	4, 441	4, 569	5. 7
Veterans services and benefits	5, 174	5, 157	5, 471	6. 9
Interest	7, 671	9, 385	9, 585	12. 0
General government	1, 606	1, 711	1, 911	2. 4
Allowance for contingencies	--------	75	200	. 3
Total	80, 697	78, 383	79, 816	100. 0

The figures for 1961 allocate to the separate programs for the first time the dollar equivalent of expenditures for U.S. Government programs of foreign currencies received from the sale abroad of surplus U.S. agricultural commodities under Public Law 480.

MAJOR NATIONAL SECURITY

Our national objective remains as before—peace with justice for all peoples. Our hope is that the heavy burden of armaments on the world may be lightened.

But we should not delude ourselves. In this era of nuclear weapons and intercontinental missiles, disarmament must be safeguarded and verifiable. The problems involved in achieving reductions of arma-

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

ments with safety and justice to all nations are tremendous. Yet we must face up to these problems, for the only alternative is a world living on the edge of disaster.

While seeking the true road to peace and disarmament we must remain strong. Our aim at this time is a level of military strength which, together with that of our allies, is sufficient to deter wars, large or small, while we strive to find a way to reduce the threat of war. This budget, in my judgment, does that.

Major National Security:

BUDGET TOTALS

[In billions]

	1959 actual	*1960 estimate*	*1961 estimate*
Expenditures.....	$46.4	$45.6	$45.6
New obligational authority..	45.5	44.7	45.3

LEGISLATIVE PROPOSALS

(In addition to program extensions)

1. Discontinue statutory minimum strength for Army National Guard.
2. Equalize military retirement pay.
3. Facilitate sale of surplus military real property.
4. Authorize sale of Alaska Communication System.
5. Eliminate certain restrictions on foreign bidding on military supply items.

Expenditures of the Department of Defense in 1961 will continue to emphasize the modernization of our Armed Forces. Military assistance for our allies under the mutual security program will also reflect the growing importance of modern weapons and missiles in the continued strengthening of the free world defense forces. The Atomic Energy Commission is continuing its weapons programs on a high level and will move forward with research and development on the peaceful applications of atomic energy. Expenditures for stockpiling and for expansion of defense production will decline further, since most of the stockpile objectives have been met.

Department of Defense—Military.—New appropriations of $40,577 million are recommended for the military functions of the Department of Defense for 1961. Expenditures in 1961 are estimated at $40,995 million. These amounts exclude funds for the development of the Saturn space project which I have proposed be transferred to the National Aeronautics and Space Administration.

Strategy and tactics of the U.S. military forces are now undergoing one of the greatest transitions in history. The change of emphasis from conventional-type to missile-type warfare must be made with care, mindful that the one type of warfare cannot be safely neglected in favor of the other. Our military forces must be capable of con-

[1] Additional obligational authority available by transfer: $350 million.

[2] Compares with new obligational authority of $45,517 million enacted for 1959 and $44,749 million (including $25 million in anticipated supplemental appropriations) estimated for 1960.

tending successfully with any contingency which may be forced upon us, from limited emergencies to all-out nuclear general war.

Forces and military personnel strength.—This budget will provide in the fiscal year 1961 for the continued support of our forces at approximately the present level—a year-end strength of 2,489,000 men and women in the active forces. The forces to be supported include an Army of 14 divisions and 870,000 men; a Navy of 817 active ships and 619,000 men; a Marine Corps of 3 divisions and 3 air wings with 175,000 men; and an Air Force of 91 combat wings and 825,000 men.

If the reserve components are to serve effectively in time of war, their basic organization and objectives must conform to the changing character and missions of the active forces. Quality and combat

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

readiness must take precedence over mere numbers. Under modern conditions, this is especially true of the ready reserve. I have requested the Secretary of Defense to reexamine the roles and missions of the reserve components in relation to those of the active forces and in the light of the changing requirements of modern warfare.

Last year the Congress discontinued its previously imposed minimum personnel strength limitations on the Army Reserve. Similar restrictions on the strength of the Army National Guard contained in the 1960 Department of Defense Appropriation Act should likewise be dropped. I strongly recommend to the Congress the avoidance of mandatory floors on the size of the reserve components so that we may have the flexibility to make adjustments in keeping with military necessity.

I again propose a reduction in the Army National Guard and Army Reserve—from their present strengths of 400,000 and 300,000, respectively, to 360,000 and 270,000 by the end of the fiscal year 1961. These strengths are considered adequate to meet the essential roles and missions of the reserves in support of our national security objectives.

Military personnel costs.—About 30% of the expenditures for the Department of Defense in 1961 are for military personnel costs, including pay for active, reserve, and retired military personnel. These expenditures are estimated to be $12.1 billion, an increase of $187 million over 1960, reflecting additional longevity pay of career personnel, more dependents, an increased number of men drawing proficiency pay, and social security tax increases (effective for the full year in 1961 compared with only 6 months in 1960). Retired pay costs are increased by $94 million in 1961 over 1960, partly because of a substantial increase in the number of retired personnel. These increased costs are partially offset by a decrease of $56 million in expenditures for the reserve forces, largely because of the planned reduction in strength of the Army Reserve components during 1961.

Traditionally, rates of pay for retired military personnel have been proportionate to current rates of pay for active personnel. The 1958 military pay act departed from this established formula by providing for a 6% increase rather than a proportionate increase for everyone retired prior to its effective date of June 1, 1958. I endorse pending legislation that will restore the traditional relationship between retired and active duty pay rates.

Operation and maintenance.—Expenditures for operating and maintaining the stations and equipment of the Armed Forces are estimated to be $10.3 billion in 1961, which is $184 million more than in 1960. The increase stems largely from the growing complexity

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

of and higher degree of maintenance required for newer weapons and equipment.

A substantial increase is estimated in the cost of operating additional communications systems in the air defense program, as well as in all programs where speed and security of communications are essential. Also, the program for fleet modernization will be stepped up in 1961 causing an increase in expenditures. Further increases arise from the civilian employee health program enacted by the Congress last year.

Other factors increasing operating costs include the higher unit cost of each flying hour, up 11% in two years, and of each steaming hour, up 15%. In total, these increases in operating costs outweigh the savings that result from declining programs and from economy measures, such as reduced numbers of units and installations, smaller inventories of major equipment, and improvements in the supply and distribution systems of the Armed Forces.

In the budget message for 1959, and again for 1960, I recommended immediate repeal of section 601 of the Act of September 28, 1951 (65 Stat. 365). This section prevents the military departments and the Office of Civil and Defense Mobilization from carrying out certain transactions involving real property unless they come into agreement with the Committees on Armed Services of the Senate and the House of Representatives. As I have stated previously, the Attorney General has advised me that this section violates fundamental constitutional principles. Accordingly, if it is not repealed by the Congress at its present session, I shall have no alternative thereafter but to direct the Secretary of Defense to disregard the section unless a court of competent jurisdiction determines otherwise.

Basic long-line communications in Alaska are now provided through Federal facilities operated by the Army, Air Force, and Federal Aviation Agency. The growing communications needs of this new State can best be met, as they have in other States, through the operation and development of such facilities by private enterprise. Legislation has already been proposed to authorize the sale of these Government-owned systems in Alaska, and its early enactment is desirable.

Procurement, research, and construction.—Approximately 45% of the expenditures for the Department of Defense are for procurement, research, development, and construction programs. In 1961, these expenditures are estimated at $18.9 billion, compared to $19.3 billion in 1960. The decreases, which are largely in construction and in aircraft procurement, are offset in part by increases for research and development and for procurement of other military equipment

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

such as tanks, vehicles, guns, and electronic devices. Expenditures for shipbuilding are estimated at about the same level as in 1960.

New obligational authority for 1961 recommended in this budget for aircraft procurement (excluding amounts for related research and construction) totals $4,753 million, which is $1,390 million below that enacted for 1960. On the other hand, the new authority of $3,825 million proposed for missile procurement (excluding research and construction) in 1961 is $581 million higher than for 1960. These contrasting trends in procurement reflect the anticipated changes in the composition and missions of our Armed Forces in the years ahead.

The Department of Defense appropriation acts for the past several years have contained a rider which limits competitive bidding by firms in other countries on certain military supply items. As I have repeatedly stated, this provision is much more restrictive than the general law, popularly known as the Buy American Act. I urge once again that the Congress not reenact this rider.

The task of providing a reasonable level of military strength, without endangering other vital aspects of our security, is greatly complicated by the swift pace of scientific progress. The last few years have witnessed what have been perhaps the most rapid advances in military technology in history. Some weapons systems have become obsolescent while still in production, and some while still under development.

Furthermore, unexpectedly rapid progress or a technological breakthrough on any one weapon system, in itself, often diminishes the relative importance of other competitive systems. This has necessitated a continuous review and reevaluation of the defense program in order to redirect resources to the newer and more important weapons systems and to eliminate or reduce effort on weapons systems which have been overtaken by events. Thus, in the last few years, a number of programs which looked very promising at the time their development was commenced have since been completely eliminated. For example, the importance of the Regulus II, a very promising aerodynamic ship-to-surface missile designed to be launched by surfaced submarines, was greatly diminished by the successful acceleration of the much more advanced Polaris ballistic missile launched by submerged submarines.

Another example is the recent cancellation of the F–108, a long-range interceptor with a speed three times as great as the speed of sound, which was designed for use against manned bombers in the period of the mid-1960's. The substantial progress being made in ballistic missile technology is rapidly shifting the main threat from manned bombers to missiles. Considering the high cost of the F–108 system—over $4 billion for the force that had been planned—and the

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

time period in which it would become operational, it was decided to stop further work on the project. Meanwhile, other air defense forces are being made effective, as described later in this message.

The size and scope of other important programs have been reduced from earlier plans. Notable in this category are the Jupiter and Thor intermediate range ballistic missiles, which have been successfully developed, produced, and deployed, but the relative importance of which has diminished with the increasing availability of the Atlas intercontinental ballistic missile.

The impact of technological factors is also illustrated by the history of the high-energy fuel program. This project was started at a time when there was a critical need for a high-energy fuel to provide an extra margin of range for high performance aircraft, particularly our heavy bombers. Continuing technical problems involved in the use of this fuel, coupled with significant improvements in aircraft range through other means, have now raised serious questions about the value of the high-energy fuel program. As a result, the scope of this project has been sharply curtailed.

These examples underscore the importance of even more searching evaluations of new major development programs and even more penetrating and far-ranging analyses of the potentialities of future technology. The cost of developing a major weapon system is now so enormous that the greatest care must be exercised in selecting new systems for development, in determining the most satisfactory rate of development, and in deciding the proper time at which either to place a system into production or to abandon it.

Strategic forces.—The deterrent power of our Armed Forces comes from both their nuclear retaliatory capability and their capability to conduct other essential operations in any form of war. The first capability is represented by a combination of manned bombers, carrier-based aircraft, and intercontinental and intermediate range missiles. The second capability is represented by our deployed ground, naval, and air forces in essential forward areas, together with ready reserves capable of effecting early emergency reinforcement.

The Strategic Air Command is the principal element of our long-range nuclear capability. One of the important and difficult decisions which had to be made in this budget concerned the role of the B–70, a long-range supersonic bomber. This aircraft, which was planned for initial operational use about 1965, would be complementary to but likewise competitive with the four strategic ballistic missile systems, all of which are scheduled to become available earlier. The first Atlas ICBM's are now operational, the first two Polaris submarines are expected to be operational this calendar year, and the first Titan ICBM's next year. The Minuteman solid-fueled ICBM is

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

planned to be operational about mid-1963. By 1965, several or all of these systems will have been fully tested and their reliability established.

Thus, the need for the B–70 as a strategic weapon system is doubtful. However, I am recommending that development work on the B–70 airframe and engines be continued. It is expected that in 1963 two prototype aircraft will be available for flight testing. By that time we should be in a much better position to determine the value of that aircraft as a weapon system.

I am recommending additional acquisitions of the improved version of the B–52 (the B–52H with the new turbofan engine) and procurement of the B–58 supersonic medium bomber, together with the supporting refueling tankers in each case. These additional modern bombers will replace some of the older B–47 medium bombers; one B–52 can do the work of several B–47's which it will replace. Funds are also included in this budget to continue the equipping of the B–52 wings with the Hound Dog air-to-surface missile.

In the coming fiscal year additional quantities of Atlas, Titan, and Polaris missiles also will be procured. I am recommending funds for 3 additional Polaris submarines to be started in the coming fiscal year and for the advance procurement of long leadtime components on 3 more—making a total of 15 Polaris submarines and the appropriate number of missiles. Funds to continue the development and to initiate production of the first operational quantities of the Minuteman are also included in this budget.

Thus, four strategic ballistic missile systems will be in development and production during the coming fiscal year. These, together with the manned bomber force, the carrier-based aircraft, the intermediate range ballistic missiles, and the tactical aircraft deployed abroad, ensure our continued capability to retaliate effectively in the event of an attack upon ourselves or our allies.

In order to ensure, insofar as practicable, the safety and readiness of these forces, we have substantially completed the dispersal of Strategic Air Command aircraft and the construction of alert facilities. These measures will permit a large portion of all our manned bombers and supporting tankers to get off the ground within 15 minutes after receiving warning of an attack.

I have also authorized the Department of Defense to begin to acquire a standby airborne alert capability for the heavy bombers. This will entail the procurement of extra engines and spare parts, and the training of the heavy bomber wings with the ability to conduct an airborne alert. It is neither necessary nor practical to fly a continuous airborne alert at this time. Such a procedure would, over a relatively short period of time, seriously degrade our overall capability to respond to attack. What I am recommending is a capability to fly such an alert

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

if the need should arise and to maintain that alert for a reasonable period of time until the situation which necessitated it becomes clarified.

Attention is also being given to the safety and readiness of our land-based strategic missile forces. Except for the first several squadrons, strategic missiles will be dispersed in hardened underground sites. Measures are also being taken to shorten the reaction time of liquid-fueled missiles. The Minuteman, because it will be solid fueled, will have a quick reaction time and will lend itself to mobile use. The solid-fueled Polaris to be carried in submarines at sea is by its very nature highly invulnerable.

Air defense forces.—Much progress has been made in increasing the effectiveness of the North American Air Defense Command organized in 1957 as an integrated command of the United States and Canadian forces. The U.S. military elements—consisting of parts of all of our armed services—are integrated with Canada's Air Defence Command for maintaining an air defense capability for the entire North American Continent.

While we pay increasing attention to the growing threat of a potential enemy's ballistic missiles we should not lose sight of the fact that for the time being the manned bomber is the major threat. Although some $17 billion has already been invested in defense systems against manned bombers, excluding the cost of personnel and operation and maintenance, certain segments have yet to be completed. These were described in the Department of Defense air defense plan presented to the Congress last year. The funds recommended in this budget will substantially complete the programs outlined in that plan. Specifically, the last major elements of the Nike-Hercules surface-to-air missile program will be financed in 1961 and the Bomarc interceptor missile program will approach completion. The related radar warning, electronic control, and communication systems will also be further equipped and modernized.

In response to the increasing missile threat, we are pressing to completion a new system for the detection of ballistic missile attack—the ballistic missile early warning system. Construction has been under way for the last two years and the first segment is expected to be in operation in about a year.

To provide for an active defense against ballistic missile attack, I am recommending the continued development of the Nike-Zeus system, but it will not be placed in production during the coming fiscal year during which further testing will be carried out.

The Nike-Zeus system is one of the most difficult undertakings ever attempted by this country. The technical problems involved in detecting, tracking, and computing the course of the incoming ballistic

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

missile and in guiding the intercepting Zeus missile to its target—all within a few minutes—are indeed enormous.

Much thought and study have been given to all of these factors and it is the consensus of my technical and military advisers that the system should be carefully tested before production is begun and facilities are constructed for its deployment. Accordingly, I am recommending sufficient funds in this budget to provide for the essential phases of such testing. Pending the results of such testing, the $137 million appropriated last year by the Congress for initial production steps for the Nike-Zeus system will not be used.

Sea control forces.—Control of sea and ocean areas and sea lanes of communication is an integral element in the maintenance of our national security. The naval forces which carry the primary responsibility for this mission will consist of 817 combatant and support ships, 16 attack carrier air groups, 11 antisubmarine air groups, and 41 patrol and warning air squadrons.

From new construction and conversion programs started in prior years, the Navy will receive during fiscal year 1961 an unusually large number of modern ships. These will include the fifth and sixth *Forrestal*-class attack carriers, the first nuclear-powered cruiser, nine guided missile destroyers, seven guided missile frigates, and six nuclear-powered submarines. Three more Polaris ballistic missile submarines and a converted guided missile cruiser will also be commissioned.

For the coming fiscal year I am recommending the construction of 20 new ships and conversions or modernizations of 15 others. Included among the new ships is an attack carrier. It is planned to construct this carrier with a conventional rather than a nuclear powerplant.

While it is generally agreed that a nuclear-powered attack carrier has certain military advantages, such as extended range and endurance at high sustained speeds, these advantages are not overriding as in the case of a submarine. In a submarine, nuclear power provides the critical advantage of almost unlimited operation, submerged at high speeds. This enables nuclear-powered submarines to carry out missions which no conventionally powered submarine, no matter how modern, could accomplish.

The advantages of nuclear power with respect to the carrier, however, are not comparable. The primary requirement in a carrier is up-to-date facilities to operate, safely and effectively, the most modern naval aircraft. Use of a conventional powerplant will in no way prevent a carrier from functioning as a completely modern and mobile base for fleet aircraft for its foreseeable life. The additional $130 million which a nuclear-powered carrier would cost can be used to

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

much greater advantage for other purposes. I therefore strongly urge the Congress to support this request for a conventionally powered aircraft carrier.

Tactical forces.—Elements of the ground, naval, and air forces comprise the tactical forces which are available to deal with cold war emergencies and limited war situations, in addition to performing essential tasks in the event of general war. Recommendations made in this budget provide funds for modernization and improvement in the effectiveness of our tactical forces.

Increased emphasis has been given in this budget to improving the mobility and firepower of the 14 Army divisions and other active combat elements of the Army and the 3 Marine Corps divisions. Additional quantities of new rifles and machineguns employing the standard NATO ammunition will be procured, as will combat and tactical vehicles of all kinds, including the new M60 tank, the M113 armored personnel carrier, self-propelled howitzers, trucks and jeeps. In recognition of the value of artillery in both nuclear and nonnuclear warfare, an entire new family of self-propelled artillery is introduced with this budget. This new artillery is lighter, more mobile, and, utilizing new ammunition, will have greater range than that of types currently available.

The Army and Marine Corps will also buy a wide variety of guided missiles and rockets such as: Sergeant, Honest John, Little John, and Lacrosse for medium and close range ground fire support; Davy Crockett for an integral infantry-unit close-range atomic support weapon; and Hawk and Redeye for defense of field forces against air attack. Army aircraft procurement proposed for 1961 is more than 35% higher than for the current year, and includes funds for surveillance aircraft and for utility and medium cargo helicopters.

The tactical forces of the Army are supported by the tactical air wings of the Air Force which will also be provided with an increased capability under these budget recommendations. Funds are provided for increased procurement of F–105 supersonic all-weather fighter bombers. These aircraft, with their low-altitude handling characteristics and large carrying capacities for both nuclear and nonnuclear weapons, will strengthen significantly the air support available to the Army ground units.

The three Marine divisions are tactically supported by three Marine aircraft wings, which will also receive quantities of new aircraft.

Military assistance.—The ability of the free world to deter aggression depends on the combined strength and determination of many countries. The total forces of the countries receiving aid under the military assistance program include about 5 million Army troops,

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

2,200 combatant ships, and over 25,000 aircraft, about half of which are jet. These forces make a vital contribution to the security of the free world, including the United States.

A committee of distinguished private citizens, the President's Committee to Study the United States Military Assistance Program, conducted an extensive and comprehensive analysis of the mutual security program during the last year. I have previously transmitted the reports of the Committee to the Congress. Many of the significant findings and recommendations of this group have been put into effect by the executive agencies; others are in the process of implementation. The military assistance program has been budgeted in 1961 with other activities and programs of the Department of Defense, and major changes are being made in the management, organization, and programing of military assistance.

Last spring I mentioned the possibility of requesting a supplemental appropriation as suggested by the Committee largely to expedite modernization of NATO forces. However, in view of the time factor involved in securing a separate authorization and appropriation for 1960, a supplemental request this year is not practical.

The new obligational authority of $2 billion recommended for fiscal year 1961 for the military assistance program will provide the training and quantities of materiel required to support the forces in the countries receiving aid. Because of the long leadtime required for many items, procurement must be started in 1961 in order to provide the necessary deliveries in future years. During recent years, deliveries have been maintained only by drawing down the backlog of undelivered items by an amount ranging from $500 to $800 million per year. The backlog has now been reduced to the point where adequate deliveries in the future must depend on new appropriations.

The defense of Western Europe in this era of modern weapons is costly and must be accomplished through the combined efforts of all NATO countries. Many of these countries have now assumed the financial responsibility for producing or purchasing conventional arms and equipment which the United States previously supplied. At the same time, the 1961 military assistance program squarely faces the pressing need for new and costly weapons for which the free world still looks for help from the United States. In addition, it provides for an intensified training effort to assure effective use and maintenance of the new equipment by allied forces.

This budget also provides for military assistance to countries which are building defenses against aggression and subversion in other parts of the world. These countries border on aggressive regimes, or are confronted with strong internal subversive elements. Many of them have joined in mutual defense organizations such as the Southeast Asia Treaty Organization (SEATO) and the Central Treaty Organization (CENTO), or with the United States in bilateral defense

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

agreements. Assistance to these countries, most of which are in the Near East and the Far East, emphasizes primarily the strengthening of conventional forces in keeping with the nature of the threat in each area.

Atomic energy activities.—In 1961 the expenditures for the Atomic Energy Commission are expected to remain at the 1960 level of about $2.7 billion. Substantial increases for research and development activities will be offset by reductions in procurement of uranium ore concentrates from United States and Canadian producers. These reductions will bring ore supplies into better balance with production requirements.

Development and production of nuclear weapons in 1961 will remain at the high levels of previous years. The vigorous development of military reactors for a variety of propulsion and power uses will continue. When the land-based prototype reactor for a destroyer is placed into operation in 1961 along with four other naval prototype reactors now operating, nuclear powerplants will be available for major types of naval combatant ships. Emphasis in naval reactor development in 1961 will be placed primarily on development of improved and longer lived reactor fuel. The development of nuclear ramjet engines for missiles, of nuclear aircraft engines, and of nuclear electric powerplants for use at remote military bases will be carried forward.

Peaceful uses of atomic energy.—Expenditures in 1961 for development of civilian electric power from atomic energy are estimated at $250 million. Of this amount, $185 million is for research and development and $65 million is for construction of civilian power reactors and related development facilities. The estimated expenditures include amounts from proposed new appropriations of $40 million for assistance to private and public power groups in developing and building demonstration nuclear powerplants, and alternatively for such direct Government construction as may be considered necessary. The number, type, and size of reactors built and the nature of the assistance provided will be determined by the Commission after considering the state of technology and the cooperation proposed by industry.

Expenditures by the Commission for research in the physical and life sciences in 1961 will again increase substantially to over $210 million. This level of research will help the United States to continue its leadership in the study of the behavior of the basic matter of the universe and the effects of radiation on man and his environment. The largest part of the increase will be used to place in operation in the next 18 months three new particle accelerators in the multibillion

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

electron-volt energy range, including the alternating gradient synchrotron at Brookhaven National Laboratory.

In support of the civilian space program, the Atomic Energy Commission will continue development of nuclear-powered rockets and small, long-lived nuclear power sources for space vehicles. Development work on thermonuclear power and on applications of nuclear explosives to a variety of civilian uses will continue in 1961.

Stockpiling and defense production expansion.—Most of the objectives for the stockpile of strategic and critical materials have been met. Receipts of materials under contracts to promote expansion of defense production are continuing at a reduced rate, as the number of such contracts still in effect declines. Hence, expenditures for stockpiling and expansion of defense production are estimated to decline from $230 million in 1960 to $134 million in 1961.

Amendments to outstanding contracts are now being negotiated where practicable, so as to minimize the delivery of materials no longer required for stockpiling. Arrangements are also under way to dispose of materials excess to stockpile objectives whenever disposal will not seriously disrupt markets or adversely affect our international relations.

INTERNATIONAL AFFAIRS AND FINANCE

The United States is continuing to support programs to maintain world peace and to improve economic conditions throughout the free world. In helping to improve economic conditions, we are being joined in larger measure by our friends in the free world who have now reached a high level of prosperity after recovering from the ravages of war. Accordingly, multilateral programs are being expanded. At the same time, the pressing need for economic development requires the continuation of substantial economic assistance under the mutual security program.

Expenditures for international affairs and finance are estimated to be $2.2 billion in the fiscal year 1961. This amount is $177 million higher than estimated expenditures for 1960, mainly because of larger disbursements by the Development Loan Fund under prior commitments.

Mutual security program.—Through the mutual security program as a whole the United States helps promote stability and economic growth in less-developed countries and helps strengthen the defenses of the free world. For these purposes new obligational authority of $4,175 million is recommended in fiscal year 1961, an increase of $949 million over the amount enacted for 1960 (of which $700

International Affairs and Finance:

BUDGET TOTALS

[In billions]

	1959 actual	*1960 estimate*	*1961 estimate*
Expenditures	$3.8	$2.1	$2.2
New obligational authority	7.0	2.7	2.7

LEGISLATIVE PROPOSALS

(In addition to program extensions)

1. Defer taxation of income derived from less-developed areas abroad.
2. Revise eligibility requirements for countries to receive economic assistance.
3. Repeal reservation with respect to jurisdiction of World Court.
4. Authorize payment of certain Philippine war damage claims.
5. Authorize compensation to displaced residents of the Bonin Islands.

million is for military assistance). Expenditures are estimated to be $3,450 million, an increase of $100 million over 1960.

The military assistance portion of this program is carried in the Department of Defense chapter and has been discussed in the major national security section of this message. Economic assistance is discussed in the following paragraphs in this section.

Development Loan Fund.—The Development Loan Fund was established in 1957 in order to provide capital to less-developed countries, when capital is not available from other sources. The capital is provided on favorable terms, often including the option to repay in the borrower's own currency. By the end of the fiscal year 1960, the Fund will have made commitments for an estimated 148 loans totaling some $1,400 million. More than three-fourths of the projects it is financing are for roads, railroads, electric power generation, and industry, including industrial development banks. Because many of these projects require several years for construction, expenditures have thus far been relatively small. However, in the fiscal year 1961 they are estimated to be $300 million, an increase of $125 million over 1960. New obligational authority of $700 million is requested for 1961, an increase of $150 million over the amount enacted for 1960. This will provide the loan funds essential to our foreign policy objective of assisting in the economic growth of the less-developed countries of the free world.

Technical cooperation.—Technical and administrative skills are no less important for the newly developing countries than capital. Through the technical cooperation program, American experts are sent abroad to transmit the skills required in a modern economy and foreign technicians are brought to the United States for training.

Total	3,780	2,066	2,242	[1] 2,715

[1] Compares with new obligational authority of $6,982 million enacted for 1959 and $2,697 million (including $49 million of anticipated supplemental appropriations) estimated for 1960. The 1959 authorization included $3,175 million for the International Bank for Reconstruction and Development and $1,375 million for the International Monetary Fund.

For the fiscal year 1961, new obligational authority of $206 million is requested, which is $25 million over the amount enacted for 1960, in order to permit an increase in the bilateral programs. It will also permit a higher contribution to the United Nations technical assistance program and the related special fund; as other governments in-

MUTUAL SECURITY PROGRAM

[Fiscal years. In millions]

Program	Budget expenditures			Recommended new obligational authority for 1961
	1959 actual	1960 estimate	1961 estimate	
Military assistance	$2,340	$1,800	$1,750	$2,000
Economic (including technical) assistance	1,524	1,550	1,700	2,175
Total, mutual security	3,864	3,350	3,450	[1] 4,175

[1] Compares with new obligational authority of $3,448 million enacted for 1959 ($1,515 million military, $1,933 million economic) and $3,226 million enacted for 1960 ($1,300 million military, $1,926 million economic).

crease their contributions for the United Nations programs, the United States contribution, which is two-fifths of the total, also increases.

Defense support.—Many of the less-developed countries participating in the common defense maintain large military forces whose cost imposes a severe strain upon their limited economic resources. In order to help maintain political and economic stability and to prevent the cost of necessary defensive forces from unduly hindering economic development, the United States provides economic aid principally by supplying commodities for consumption and raw materials and machinery for industrial production. For the fiscal year 1961, new obligational authority of $724 million is requested, an increase of $29 million over the amount enacted for 1960.

Special assistance.—New obligational authority of $268 million is requested for economic assistance to promote economic and political stability in various countries of the free world where the United States is not supporting military forces, and for certain other special programs. In several instances, this assistance indirectly relates to military bases maintained by the United States.

The appropriation recommended for special assistance in 1961 is $23 million above the amount enacted for 1960. Additional programs are proposed to help improve conditions in Africa, largely for education, public health, and administration.

Increased funds will also be devoted to certain worldwide health programs in conjunction with the World Health Organization of the United Nations. The largest of these is the malaria eradication pro-

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

gram, now in its fourth year. In addition numerous public health projects are supported through technical cooperation.

Other mutual security programs.—Other programs include assistance to refugees and escapees; grants of atomic research equipment, including reactors, to the less-developed countries for training and research in nuclear physics; support of the NATO science program; and the United States contribution to the United Nations Children's Fund. For the fiscal year 1961, new obligational authority of $101 million is requested, an increase of $1 million above the amounts enacted for 1960.

Contingencies.—Experience has shown that economic and military assistance is also required in some international situations which cannot be foreseen or for which it is not possible to estimate in advance the specific amount needed. To cover situations of this type, new obligational authority of $175 million is requested.

Other economic and technical development.—More resources from countries of the free world are being channeled into economic development by increasing the capital funds of international organizations. In the past year the capital of the International Bank for Reconstruction and Development was doubled and that of the International Monetary Fund increased by half.

The Inter-American Development Bank, with planned total resources of $1 billion, including $450 million from the United States, is expected to begin operations before the close of this fiscal year. Expenditures of $80 million are estimated in the fiscal year 1960 as the first installment of the U.S. cash investment in the Bank. In addition, guarantee authority of $200 million will be made available, on the basis of which the Bank can sell its bonds to private investors.

Last October the Governors of the International Bank for Reconstruction and Development unanimously approved in principle a U.S. proposal for an International Development Association, which will be closely affiliated with the Bank. Under this proposal, the Association will make loans on more flexible terms than the Bank is able to offer under its charter, such as loans repayable in the currency of the borrowing country. In addition, it is expected that the charter of the Association will contain provisions under which a member could provide to the Association, for use in lending operations, other member country currencies which it holds. The draft charter of the Association is being prepared and will probably be submitted to the member governments early this year. Legislation authorizing U.S. participation and making financial provision for membership will be transmitted to the Congress at the appropriate time.

Federal Reserve Bank of St. Louis

Private investment.—The United States is trying to encourage more reliance on private enterprise in foreign economic development. During the past year, the Department of State and the Business Advisory Council of the Department of Commerce have both completed special studies on ways to increase the role of private investment and management abroad. Tax treaties, with investment incentive clauses, are now being negotiated with many countries. More trade missions are being sent abroad. Several of the less-developed countries are opening business information offices in this country. As a result of these various activities, more private investment in the less-developed areas should be forthcoming. To provide an additional incentive, U.S. taxation of income earned in the less-developed areas only should be deferred until repatriated.

Export-Import Bank.—The oldest Federal agency specializing in foreign lending and the largest in terms of foreign loan volume is the Export-Import Bank. In the fiscal year 1961 the Bank plans to devote an increasing share of its program to transactions which support economic development abroad. At the same time the Bank plans to finance its operations without requiring net budgetary expenditures by encouraging more participation by private lenders in its loan program and by using funds obtained from repayments on its large outstanding portfolio.

Eligibility for assistance.—Amendments to the Battle Act to revise the eligibility requirements for assistance to certain countries are pending before the Congress. It is highly desirable that they be enacted.

Conduct of foreign affairs.—The Department of State is making plans to strengthen further the administration of foreign affairs in the fiscal year 1961. The disarmament staff is being expanded in preparation for discussions on disarmament soon to begin in Geneva and for the continuation of the negotiations on the suspension of nuclear tests. Language training programs will also be expanded. New diplomatic and consular posts will be opened in Africa, Latin America, South Asia, and Eastern Europe. For these and other activities, new obligational authority of $205 million is requested for the fiscal year 1961.

Legislation is recommended to remove certain reservations on acceptance by the United States of jurisdiction of the International Court of Justice (the World Court).

Legislation will be requested for payment in the fiscal year 1961 of certain war damage claims of the Philippine Government against the United States in the amount of $73 million. These claims will be partially offset by an amount, now estimated at approximately $24

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

million, owed to the United States by the Philippine Government. Pending legislation should be enacted in fiscal year 1960 to authorize compensation of $6 million to displaced residents of the Bonin Islands.

Foreign information and exchange activities.—New obligational authority totaling $168 million is requested for foreign information and exchange activities in the fiscal year 1961. The United States Information Agency plans to expand its programs in Africa and Latin America, including construction of a new Voice of America transmitter in Africa. The Agency will make greater use of the growing number of television facilities overseas. The expansion of domestic radio transmitting facilities, begun last year in order to improve oversea reception, will continue. Exchanges of key persons with about 80 other countries will be increased, with special emphasis on leaders and teachers.

COMMERCE AND HOUSING

The improvements made in recent years in Federal programs for outer space exploration, aviation, highways, the postal service, housing, urban renewal, and small business will be further extended by this budget.

Expenditures for all commerce and housing programs in the fiscal year 1961 are estimated at $2.7 billion, which is $293 million less than the estimated expenditures for 1960. Proposed legislation to provide adequate postal rates will reduce sharply the net budget expenditures of the Post Office Department. Expenditures for other programs, however, especially space exploration and the promotion of aviation, will increase substantially.

Space exploration and flight technology.—The National Aeronautics and Space Administration is carrying forward the nonmilitary space projects started by the Department of Defense and has initiated additional programs that will lay the foundations for future exploration and use of outer space. Estimated expenditures of $600 million during the fiscal year 1961, nearly double the expenditures in 1960, will carry forward the programs now under way and those becoming the agency's responsibility in 1961. Appropriations of $802 million for 1961, together with anticipated supplemental appropriations for 1960 of $23 million to restore substantially the Congressional reduction in the space program last year, are recommended to finance these programs. Legislation is being submitted to authorize the appropriations required for 1961 and to provide permanent authorization for later years.

LEGISLATIVE PROPOSALS

(In addition to program extensions)

1. Strengthen organization and management of outer space programs.
2. Increase aviation fuel taxes and credit them to general fund.
3. Remove interest ceiling on Government ship mortgage loans.
4. Provide additional highway trust fund revenues.
5. Finance forest and public land highways from highway trust fund.
6. Increase postal rates.
7. Increase savings and loan insurance premiums.
8. Provide flexible interest rates on veterans and military housing loans.
9. Liberalize authority of small business investment companies.
10. Broaden exemption of small security issues from registration.
11. Authorize loans and grants to assist areas with chronic unemployment.
12. Improve antitrust legislation.

I am assigning to this new agency sole responsibility for the development of space booster vehicles of very high thrust, including Project Saturn. This assignment includes the transfer of certain facilities and personnel of the Army Ballistic Missiles Agency. With the imminent completion of the Jupiter missile project this outstanding group can concentrate on developing the large space vehicle systems essential to the exploration of space. Certain amendments to the National Aeronautics and Space Act of 1958 will be proposed to clarify the organization and streamline the management of the space programs.

At the present time Soviet scientists have the advantage in the weight of the payloads that they can hurl into space. This weight advantage stems from the earlier start of the Soviet development of very large rocket boosters that they considered necessary for their intercontinental ballistic missile program. Because of the relatively advanced state of our nuclear warheads, however, we were able, after a much later start, to develop an effective ICBM using a smaller rocket booster.

Our space programs are based on a systematic and technically sound approach to the complicated scientific and engineering problems involved. This approach will assure continued demonstrable achievements. Project Mercury has a high priority and we should be

Federal Reserve Bank of St. Louis

ready to attempt actual manned space flights within the next two years. Progress on the development of very high thrust engines and the vehicles to use them will make it possible, in the not too distant future, to launch much larger space vehicles and thus extend the conquest of space.

For the near future satellites and space probes will continue to depend primarily on Thor and Atlas missiles as boosters, with the Delta and Agena upper stages providing improved performance and reliability. These vehicles will make possible a wide variety of highly useful scientific experiments which will provide essential information for future exploration of outer space by manned and unmanned vehicles. Somewhat later the Centaur project will provide an Atlas-boosted space vehicle with further improved capabilities and establish the technology of very high energy propulsion for space vehicles. In all of these projects, the success of the space vehicle launchings depends on a strong continuing program of supporting research and ground testing.

Transportation and communication.—The detailed review of transportation problems and policies which I requested last year is now nearing completion in the Department of Commerce. This study should provide a sound basis for administrative actions and for legislation that may be needed to assure adequate and balanced growth of all branches of the Nation's transportation system.

Aviation.—Primarily because of the airways modernization program now under way, expenditures of the Federal Aviation Agency will increase by $114 million to an estimated $681 million in fiscal year 1961. New obligational authority of $717 million is requested mainly for procurement and operation of radar equipment, airport landing aids, communications, and other facilities needed to handle the rapidly growing volume of air traffic safely and efficiently and for establishment and enforcement of air safety standards. Research and development activities are being accelerated to insure the further improvements in equipment and techniques required to meet future aviation needs.

The Federal Aviation Agency is already making increasing use of military facilities, and steps are under way to achieve a closer integration of air defense and civil air traffic control networks. Over the next few years the Agency will also assume traffic control functions now performed by military personnel at airbases throughout the world, with significant savings in cost.

Expenditures for subsidy payments to the airlines by the Civil Aeronautics Board are estimated at $69 million in 1961, an increase of $31 million, or 80%, over the $38 million actually spent in 1958. Almost all of the subsidy will go to local service airlines, including

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

helicopter operations in three major metropolitan areas and intra-Alaska service. This rise and the prospect of even higher subsidies in the future make necessary the consideration of proposals to reduce the dependence of these airlines on the Government.

Airway user charges.—Consistent with the principle that special beneficiaries of Government programs should pay the cost of those benefits, the users of the Federal airways should ultimately be expected to pay their full share of rising capital and operating costs. Accordingly, the effective tax on aviation gasoline should be raised from 2 to 4½ cents per gallon and the same tax should also be levied on jet fuels, which are now tax-free. Receipts from all aviation fuel taxes should be retained in the general fund rather than transferred to the highway trust fund as at present. These actions will increase revenues to the general fund by an estimated $89 million in fiscal year 1961.

Promotion of water transportation.—Expenditures of the Department of Commerce to aid water transportation will be sharply higher in both 1960 and 1961 than in 1959, primarily because of higher levels of payments required under past commitments for ship operating and construction subsidies. A supplemental appropriation of $32 million will be requested for the current year to meet increased operating subsidy obligations caused by lower earnings of the shipping industry and to permit prompt payment of subsidies accrued.

Efforts to maintain a U.S. merchant fleet adequate, along with the ships of our allies, to meet national defense requirements are seriously hampered by high operating costs. To preserve the capability of our merchant fleet without placing an undue burden on the taxpayer will require willingness by ship operators, maritime labor, and the Government to explore and adopt new solutions.

This budget provides for expanded work on advanced ship designs that could bring sharply reduced operating costs. By extending the operation of war-built vessels, which comprise more than 70% of the subsidized fleet, over a somewhat longer period, the results of this research can be more fully exploited in replacement plans. The Secretary of Commerce is also undertaking a special study of sailing requirements and competitive conditions of maritime trade routes and services, in the hope of discovering opportunities to increase the benefits flowing from the public investment in this area.

I repeat the request made last year that the 3½% interest rate ceiling on ship mortgage loans made by the Maritime Administration be replaced by authority to charge the Government's full cost for such loans.

Work will continue on widening sections of the Panama Canal from 300 to 500 feet to facilitate the movement of increased ship traffic. Largely as a result of this program and the increased disbursements

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

for the $20 million Balboa Bridge, which is being built to fulfill a treaty commitment with the Republic of Panama, expenditures of the Panama Canal Company in 1961 will be $10 million higher than in 1960.

Highways.—Federal payments of $2,728 million from the highway trust fund in 1961 will enable the States to proceed with construction of the Interstate System at a level consistent with the pay-as-you-build principle established by the Highway Revenue Act of 1956 and reaffirmed by the Congress in 1959. Last year I recommended that highway fuel taxes be increased by 1½ cents per gallon for a period of five years to meet estimated expenditure requirements. The Congress after months of delay enacted an increase of only 1 cent for less than two years.

As a result of both the delay and the failure to provide the full amount of revenue requested, the roadbuilding program has been slowed below a desirable rate of progress. The apportionments to the States for future construction had to be reduced and a plan had to be established to time reimbursements to the States so that the trust fund could be kept in balance. By timely action and planning, however, potential failures to reimburse States promptly for want of funds in the trust fund have been avoided, and equitable and proportionate programs in every State have been established.

I urge the Congress again to increase the highway fuel tax by another one-half cent per gallon and to continue the tax at 4½ cents until June 30, 1964. This will permit the construction program for the Interstate System to proceed at a higher and more desirable level. I request repeal of the diversion of excise taxes enacted last year for the period July 1, 1961, to June 30, 1964. New reports giving estimates of the cost of completing the Interstate System and recommendations on the allocation of costs among future highway beneficiaries will become available in 1961. At the appropriate time, further recommendations will be made to the Congress for the ensuing conduct and financing of the program.

A temporary advance of $359 million from the Treasury to the trust fund was necessary in fiscal 1960 to balance out the monthly flow of revenues and expenditures within the fiscal year, but this will be repaid by June 30, 1960. A similar temporary advance of $200 million will be required in the fiscal year 1961, repayable before the end of that year.

During this session of the Congress, funds should be authorized for 1962 and 1963 for regular Federal-aid highway programs and for forest and public lands highways. In view of the limited resources available to the trust fund and the priority requirements of the Interstate System, it is recommended that authorizations for the regular programs for each of these years be reduced to $900 million

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

from $925 million provided for 1961. Annual authorizations of $33 million for forest highways and $3 million for public lands highways are also recommended.

Finally, I again request that the financing of forest and public lands highways be transferred from the general fund to the highway trust fund. Most of these highways are integral parts of the Federal-aid systems, and they should be financed in the same way.

Postal service.—The Post Office Department is intensifying its efforts to improve service and to hold down the persistent postal deficit while handling a growing volume of mail. Initial steps have been taken to mechanize mail processing and to reduce serious congestion at major distribution centers. Ultimately, modern mail processing plants will be established in all principal urban areas to assure prompt and efficient deliveries.

The Postal Policy Act of 1958 established the policy that postal rates should be adjusted whenever necessary to recover postal expenses, excluding the costs of certain public services as fixed by appropriation acts. Over the past 13 fiscal years, 1947–59, the Federal budget has had to finance postal deficits totaling $6.8 billion, which is almost half of the increase in the national debt during that time. At the average rate of interest on the outstanding debt the taxpayers are paying well over $200 million annually in interest for the unwillingness of the Congress to take timely action to increase postal rates.

For fiscal 1961, a postal service deficit of $554 million is estimated with postage rates now in effect or scheduled, after designating $49 million as attributable to public services. Rate increases enacted in 1958 were substantially less than needed to meet the deficit at that time and made no allowance for the pay increase for postal employees then enacted. Since then, increased railroad rates (up $55 million), costs of modernization (up $80 million), and the new employee health insurance program ($39 million) have widened the gap between revenues and expenditures.

Accordingly, legislation is again proposed to increase first-class and airmail rates by 1 cent and to raise other rates and fees by enough to cover the postal deficit. I urge the Congress to act promptly on these proposals, which will be submitted in the near future.

Housing and community development.—I have presented to each of the past two sessions of the Congress a comprehensive program of legislation for the Government's housing and community development programs. Some of these recommendations were enacted in the Housing Act of 1959. This year, legislation will be requested only for the authority necessary to continue important existing pro-

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

grams and provide necessary flexibility in interest rates. The authorization of additional funds for these programs should be subject to appropriation action.

Urban renewal.—In the decade since Federal grants were first authorized, urban redevelopment has become recognized as essential to the future vitality of our cities, and planning has been initiated on 647 projects in 385 communities. However, only 26 projects have been completed. An additional 355 projects for which Federal funds have been obligated are now under way, but progress on many of these has been slow.

The budget, accordingly, places major emphasis on accelerating program progress. Sixty-five projects are scheduled for completion in 1960 and 1961. At the same time, the number of projects under way is expected to increase from 355 at the end of 1959 to 510 at the end of 1961. The acquisition of land for these projects in 1961 is estimated at more than double, and the sale of land to redevelopers at nearly triple, the 1959 amounts. As a result of the increased rate of activity, a supplemental appropriation of $50 million will be necessary in the current year to pay capital grants for projects nearing completion under prior contracts. Since the Housing Act of 1959 provided new contract authority for capital grants of $350 million for 1960 and $300 million for 1961, no additional obligational authority will be necessary for this program for 1961.

Public facility loans.—The authority of the Housing and Home Finance Agency to borrow $100 million from the Treasury for loans to small communities for needed public facilities will be exhausted early in 1961. An additional $20 million will be required to meet loan applications through the end of the fiscal year 1961. Legislation is recommended to authorize the provision in annual appropriation acts of this amount and such future increases as may be necessary.

Public housing programs.—By the end of fiscal year 1961, about 500,000 federally-aided public housing units will be occupied and an additional 125,000 units will be under contract for Federal contributions. In the allocation of new contracts authorized in the Housing Act of 1959 emphasis is being given to projects which will be constructed in the near future. The 1959 act authorized 37,000 added units of public housing, to be available until allocated. Accordingly, no additional authorization is requested. Increases of $18 million in 1961 expenditures result primarily from rising Federal contributions to local authorities under past contracts.

Federal Savings and Loan Insurance Corporation.—The share accounts of savings and loan associations insured by the Federal

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

Savings and Loan Insurance Corporation have increased fivefold over the past 10 years. With a continuation of this rate of growth, the insurance reserve of the Corporation cannot reach levels commensurate with the mounting insurance liability without an increase in the present premium rate. I am, accordingly, recommending legislation to restore the higher premium rate in effect prior to 1949, to remain in force until the reserve exceeds 1% of the share accounts and borrowings of insured institutions. At the same time, the statutory goal of a reserve equal to 5% of such accounts and borrowings exceeds potential needs and should be reduced to 2%. In addition, the Corporation should be given authority to borrow from private sources, both to increase the available sources of funds to levels adequate to meet any temporary borrowing needs and to reduce its potential dependence upon the Federal Government.

Insurance of private mortgages.—The mortgage insurance programs of the Federal Housing Administration will continue in 1961 to underwrite a substantial share of the mortgages on residential housing. While it is difficult to forecast mortgage insurance requirements, the general mortgage insurance authorization of the Federal Housing Administration now appears to be adequate to meet demands for mortgage insurance until the next Congress is in session.

Sharp fluctuations in the demand for mortgage insurance during recent years have caused the funds available for personnel under appropriation act limitations to be inadequate in periods of heavy demand to provide the staff required by the Federal Housing Administration for prompt service on applications. Supplemental funds are usually not made available in time to meet this problem. To correct this situation, appropriation language is being requested to permit use of additional income for such expenses when actual demand exceeds the budget estimate.

Legislation should also be enacted to extend the authority for insurance of loans on home improvements. This program, which makes a major contribution to modernization of existing homes, would otherwise expire on October 1, 1960.

Last year legislation was recommended to provide some flexibility in maximum interest rates on mortgages originated under the housing loan and guarantee programs of the Veterans Administration and under certain mortgage insurance programs of the Federal Housing Administration. The action taken by the Congress was inadequate, and some of these programs are now seriously hampered by their inability at present maximum interest rates to attract adequate private capital. The Veterans Administration should be given the same flexibility to adjust its interest rates to market conditions which is now possessed by the Federal Housing Administration in its basic

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

mortgage insurance programs. In addition, the maximum interest rate of 4½% on insured mortgages on armed services family housing should be removed.

Veterans housing loans.—The direct housing loan program of the Veterans Administration, which has been extended several times, terminates July 25, 1960, and I am asking for no further authorization. At that time, over $1 billion of loans will be outstanding, and the program will have provided over 150,000 loans to veterans. There is no longer justification for continuing this readjustment program.

Mortgage purchases.—The authority of the Federal National Mortgage Association to borrow from the Treasury to purchase mortgages under its special assistance program will be exhausted during 1961. I am recommending legislation which would permit future increases in authorizations to be subject to appropriation review. An additional $150 million is requested for 1961 for this program. The additional funds will be used chiefly to buy mortgages on housing in urban renewal areas, on housing for the relocation of displaced families, and on housing for the elderly.

Special assistance for these mortgages is intended to be transitional, and an increasing proportion of total financing should in the future be obtained from private sources. With annual financing requirements in excess of $1 billion already in sight for these programs, the need can be met only with the full and active support of local communities and private financial institutions.

At the same time, mortgage purchases by the Association's secondary market operations trust fund will continue at high levels. Expenditures for such purchases are estimated at $1,047 million in 1960 and $975 million in 1961. These purchases will be almost wholly financed through the sale of debentures to the public and the purchase of common stock by mortgage sellers. Budget expenditures of $50 million, however, will be necessary for the additional Treasury purchases of the preferred stock of the Association required to support the mortgage purchase program.

College housing.—No additional authorizations are proposed for the existing college housing direct loan program. The housing needs of our colleges and universities represent only a part of the need for new university facilities of all types. These needs should be considered as a whole and within the framework of the general problems of education. I have, accordingly, recommended the termination of the college housing program and the enactment of legislation authorizing a new program of grants and loan guarantees for college facilities, to

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

be administered by the Department of Health, Education, and Welfare (discussed under labor and welfare programs).

Small business.—The increase in financial assistance to small businesses under the Small Business Investment Act of 1958 will continue in 1961. I recommend the enactment of legislation previously proposed to the Congress to encourage the formation of additional investment companies by liberalizing the authority of these companies, thus expanding the supply of private capital available to small businesses. Other loans by the Small Business Administration will continue at a high level, but less new obligational authority is recommended because repayments on outstanding loans will increase. Efforts to assist small businesses in obtaining a fair share of Federal Government procurement and surplus property will also continue. In order to facilitate small business financing, the Securities Act of 1933 should be amended to extend the privilege of simplified filings to a wider range of security issues.

Area assistance.—Despite the rapid economic recovery in the Nation as a whole, unemployment remains high in a relatively small number of local areas. The chronic problems in these communities reflect primarily basic changes in consumer buying habits, production methods, and industry location patterns. Some localities and States have properly taken the initiative in measures designed to meet these problems. In addition, the Department of Commerce, with the cooperation of 13 other Federal agencies, is intensifying existing Federal programs to encourage and support this local initiative. More help is required. Therefore, for the past four years, I have requested expanded legislative authority, primarily for loans and grants, to supplement existing Federal, State, and local programs. Prompt enactment of this legislation is important. The budget includes an estimated $57 million in appropriations as the initial amount necessary to provide the proposed additional Federal aid.

Regulation of commerce and finance.—The general growth of the economy, newly legislated responsibilities, and the increased complexity of the problems which confront the regulatory agencies require increases in funds for most of them. The largest single increase in this category will permit the Federal Communications Commission to make a thorough study of ultrahigh frequency television to determine whether channels in this range can be used to meet the needs of the expanding television industry.

I again recommend legislation to strengthen the antitrust laws, including extending Federal regulation to bank mergers accomplished

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

through the acquisition of assets, requiring businesses of significant size to notify the antitrust agencies of proposed mergers, empowering the Attorney General to issue civil investigative demands in antitrust cases when civil procedures are contemplated, and authorizing the Federal Trade Commission to seek preliminary injunctions in merger cases where a violation of law is likely.

Civil and defense mobilization.—Preparations for nonmilitary defense have been seriously hindered by the unwillingness of Congress to provide appropriations to carry out programs authorized by the 1958 amendments to the Federal Civil Defense Act. Funds are again being requested for 1961, as well as in a supplemental appropriation for 1960, to help States and localities strengthen their full-time civil defense organizations. Increased funds are also required to finance greater purchases of radiological instruments for donation to the States; for expansion of the emergency preparedness activities of other Federal agencies; and to carry on the national fallout shelter policy.

In accordance with the national fallout shelter policy, the Federal departments and agencies have been directed to include fallout shelters when appropriate in the design of new buildings for civilian use, and funds for such shelters are included in the budget requests of the various agencies. In addition, the budget of the General Services Administration includes $6 million for a new fallout shelter program at certain Federal relocation sites and in some existing Federal buildings.

AGRICULTURE AND AGRICULTURAL RESOURCES

In the fiscal year 1961, Federal programs for agriculture will again have a heavy impact on the budget, primarily because of continued high agricultural production and the past unwillingness of the Congress to make appropriate modifications in the long-established price support laws. The longer unrealistic price supports are retained, the more difficult it will be to make the adjustments in production needed to permit relaxation of Government controls over farm operations.

Last year I proposed to the Congress urgently needed legislation relating to price supports. Very little of that program was enacted. I recommend that the Congress give this important matter early consideration.

Particularly urgent now is legislation to put wheat price supports on a more realistic basis. Stocks of wheat are continuing to rise in spite of our efforts to move wheat abroad through the International Wheat Agreement, sales for foreign currencies, and grants to disaster victims and needy people. The carryover of wheat stocks is expected to rise to almost 1.4 billion bushels by July 1, 1960, an amount that

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

would provide for more than two years of domestic consumption without any additional production.

The wheat surplus problem has been a long time in the making and cannot be solved overnight. In fact, wheat legislation enacted in this session cannot be made applicable before the 1961 crop. The fact that any significant effect on the budget would be delayed until the fiscal year 1962 underlines the need for prompt action at this session of the Congress.

Authority to bring additional land into the conservation reserve expires after the 1960 crop year. Legislation is proposed to extend this authority through the 1963 crop year and to expand the program by increasing the basic limitation on the amount of payments that may be made in any calendar year from $450 million to $600 million. Specific authority will be requested for the Secretary of Agriculture to give special consideration, in allocating conservation reserve funds, to those States and regions where curtailment of production of wheat or other surplus commodities is consistent with long-range conservation and production-adjustment goals. The rental rates needed to induce farmers to withdraw cropland from production under the conservation reserve depend on the income prospects from farming, which in turn are a reflection of the levels of price supports. Therefore, the future authorization for the conservation reserve program should not be increased above the 1960 level unless needed price support legislation is enacted for wheat.

Estimated expenditures for agricultural programs in fiscal 1961 are $5.6 billion, which is $510 million more than the estimate for the current year but $907 million less than was spent in 1959. Total new authority to incur obligations requested for agriculture and agri-

Agriculture and Agricultural Resources:

[In billions]

	1959 actual	*1960 estimate*	*1961 estimate*
Expenditures	$6.5	$5.1	$5.6
New obligational authority	5.4	5.1	4.6

LEGISLATIVE PROPOSALS

(In addition to program extensions)

1. Further revise agricultural price support programs, and extend with revisions the conservation reserve program.
2. Strengthen "food for peace" program.
3. Revise interest rates for rural electric and telephone loans.
4. Simplify and consolidate loan authority of Secretary of Agriculture for farm ownership and operation.
5. Require greater sharing by States in costs of farm disaster relief.
6. Reduce advance authorization for agricultural conservation program.

Federal Reserve Bank of St. Louis

cultural resources in 1961 is $4.6 billion. This amount includes $1.3 billion to restore, to the extent necessary, the capital impairment of the Commodity Credit Corporation resulting from previous price support losses and $1.4 billion to reimburse the Corporation for estimated costs and losses through the fiscal year 1960 of other programs financed through that agency.

Stabilization of farm prices and farm income.—Most of the recent year-to-year variations in expenditures for agriculture and agricultural resources reflect changes in expenditures for price supports and other programs to stabilize farm prices and farm income. During the five fiscal years, 1955–59, Federal spending for these programs has accounted for 70% to 80% of the total for all agricultural programs. In the fiscal year 1961, these programs are estimated to cost $3.9 billion, an increase of $450 million over 1960, but a decrease of $1.2 billion from 1959.

Under present laws, price support expenditures for agricultural commodities cannot be controlled through regular budgetary processes. They are the result, mainly, of the loans and commodity purchases that the Commodity Credit Corporation is required to make, and the other price- and income-supporting programs that the Corporation is required to finance, under existing laws. These expenditures reflect the volume of production, consumption, and exports of price-supported commodities, which, in turn, are influenced by such uncertain factors as the weather and domestic and foreign economic conditions.

The budget estimate for 1961 reflects the residual effect of the large 1958 and 1959 crops and assumes that yields on price-supported crops for the 1960 crop year will be in line with recent averages; also exports of farm commodities in the fiscal year 1961 may be down somewhat from the high level expected in 1960.

The Sugar Act expires on December 31, 1960. To give sugar producers maximum time for production planning, action should be taken early in the present session of the Congress to continue this program.

We are continuing to use our surplus agricultural production in many ways for constructive purposes overseas through the "food for peace" program. Under the Agricultural Trade Development and Assistance Act of 1954 (Public Law 480), surplus wheat, cotton, corn, rice, and other commodities are being sold abroad for foreign currencies. These currencies are used principally as loans or grants for the economic development and common defense in foreign countries, and to a lesser extent to finance various U.S. programs abroad. Surplus commodities are also being given to foreign governments for emergency relief needs and to private relief organizations in support of their programs abroad; over 60 million needy people benefited this past year from these donation programs. Last year the executive branch proposed certain amendments which, if enacted, would have made

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

this surplus disposal program more effective. It is recommended that the Congress again consider these amendments.

Rural electrification and telephones.—About 96% of our farms now have central station electric service, as compared with 11% in 1935. The expanding use of power in the areas served by electric cooperatives financed by the Rural Electrification Administration continues to require substantial amounts of new capital every year to provide additional generating capacity and heavier transmission and distribution facilities. More than one-half of the total power sales by the REA system are made to rural industrial, recreational, and other nonfarm customers. These nonfarm users now comprise over 80% of the new customers being added.

The Rural Electrification Administration currently finances the capital needs of the cooperatives by borrowing from the Treasury at the statutory interest rate of 2% and relending at the same rate. Legislation is proposed under which REA would (*a*) borrow from the Treasury at not to exceed the average rate of interest payable by the Treasury on recently issued long-term marketable obligations, and (*b*) make future electric and telephone loans at the same rate plus one-fifth of 1% to cover administrative expenses and estimated losses. Legislation now before the Congress to place the operations of this agency on a revolving fund basis should also be enacted.

It is vital, looking ahead, that legislation be developed to enable telephone as well as electric borrowers to obtain funds from a mutually owned financing institution to meet the needs for the future growth of these borrowers. Under this longer range plan, loans would also be available from the Rural Electrification Administration to meet special circumstances. The Secretary of Agriculture will work with REA cooperatives and other interested parties in developing such a proposal.

Farm ownership and operation.—In 1961, new direct loans and administrative expenses of the Farmers Home Administration are proposed in an amount equal to estimated collections on outstanding loans. Loans are made to borrowers who are unable to obtain credit from other sources at interest rates currently prevailing in their communities in order to finance farm ownership and enlargement, farm operations, and soil and water conservation. Direct loans for farm ownership and soil and water conservation are supplemented with private loans insured by the Federal Government.

The present authority of the Secretary of Agriculture to make loans to farmers and ranchers is the cumulative result of the enactment of many separate laws over a long period of years. The legislation now before the Congress to simplify, consolidate, and improve the

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

authority of the Secretary of Agriculture to make these types of loans should be enacted. Also, the pending legislation to require the States to share a greater part of the costs of farm disaster relief assistance should be enacted.

Conservation of agricultural resources.—Expenditures under the conservation reserve program are expected to be $394 million in the fiscal year 1961. Of this amount $362 million will be needed to fulfill commitments incurred in the crop years 1956 through 1960 under existing authority, and $32 million will be used for conservation practice payments and additional operating expenses under proposed legislation to extend this program for three years. Under the proposed legislation it is planned to add about 9 million additional acres to the program during the 1961 crop year, bringing the total at the end of that crop year to about 37 million acres. Increases in expenditures required for the 1961 crop year program will occur mainly in 1962 and later fiscal years.

In both the 1959 and 1960 appropriation acts, the Congress maintained the agricultural conservation program at levels which far exceeded my recommendations. As a result, expenditures of the Agricultural Conservation Program Service are estimated to be $244 million in 1960 and $233 million in 1961. The advance authorization for the 1961 agricultural conservation program, which will affect primarily fiscal year 1962 expenditures, should be limited to $100 million. The lower program recommended, together with other public aids for soil and water conservation, will meet the Nation's high-priority conservation needs.

Federal policy on cost-sharing assistance in the future should be concentrated on conservation measures which will foster needed shifts to less intensive uses of cropland, and assistance should be eliminated for practices which increase capacity to produce agricultural commodities already in surplus supply. Continuation of cost sharing for output-increasing practices would directly conflict with the recommended expansion of the conservation reserve program under which cropland is removed from production.

New obligational authority of $43 million is recommended for the upstream watershed programs, including $28 million for projects under the Watershed Protection and Flood Prevention Act. Of this amount, $5 million is provided to initiate construction on projects involving an estimated total Federal cost of $29 million.

New obligational authority of $10 million is requested for the Great Plains conservation program, the same as for 1960. Under this program conducted in designated counties of the 10 Great Plains States, the Federal Government provides cost-sharing and technical assistance to farmers who enter into long-term contracts to make needed adjustments of land use on their farms.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

Research and other agricultural services.—Expenditures for research, education, and other agricultural services, exclusive of programs financed with foreign currencies, will be about $8 million higher in the fiscal year 1961 than in 1960. This amount will provide increased support for the research programs on pesticide residues and on industrial uses of farm commodities. It will also provide increased support for the rural development program which is making an important contribution to the solution of the economic problems of rural areas arising out of technological changes in agriculture and inadequate employment opportunities.

In addition, it is estimated that $19 million will be spent in 1961 for the purchase of foreign currencies, obtained from the sale of surplus farm commodities, to be used for research and market development work abroad. This compares with approximately $12 million in foreign currencies to be used for this purpose in 1960.

NATURAL RESOURCES

The recommendations in this budget for Federal natural resource programs take into account their great importance to the Nation's economic growth and security.

The estimated total of $1.9 billion to be spent in the fiscal year 1961 for natural resources is more than has been spent for this purpose in any previous year. The increase of $152 million over 1960 is predominantly for water resources programs.

Water resources.—The Corps of Engineers and the Bureau of Reclamation will spend an estimated $1.2 billion in the fiscal year 1961 to construct, maintain, and operate flood control, navigation, irrigation, power, and related projects. This record total includes, in addition to operating costs, $965 million to continue construction on projects started in 1960 or prior years, $12 million for advance planning, and $18 million for the first-year expenditures on 42 proposed new starts. These new projects, as well as three new construction starts by the Tennessee Valley Authority and one by the International Boundary and Water Commission, are recommended in this budget in the interest of balanced development of water resources.

For the Corps of Engineers, appropriations (as distinct from the expenditures previously discussed) of $21 million are required for starting 31 new projects and for an additional number of smaller projects costing less than $400,000 each. The estimated commitments for these new projects total $301 million. Appropriations of $6 million for 1961 are recommended for the Bureau of Reclamation to begin construction on six projects with total estimated commit-

Digitized for FRASER

Federal Reserve Bank of St. Louis

ments of $184 million, and $11 million for loans which will be used by local groups to start work on five small reclamation projects.

I again recommend that the Congress authorize the Fryingpan-Arkansas project in Colorado.

To carry forward the joint development of the waters of the Rio Grande, construction should be started on the Amistad (Diablo) Dam, in accordance with the treaty of February 3, 1944, between the United States and Mexico. I urge the Congress to enact promptly the legislation now needed to authorize negotiation of an agreement for this construction. Funds will be requested for the U.S. share of the first-year cost of this project following enactment of the legislation. Provision is made in this budget to begin modification of the lower Rio Grande levee system.

	1959 actual	*1960 estimate*	*1961 estimate*
Expenditures	$1.7	$1.8	$1.9
New obligational authority	1.7	2.5	1.8

LEGISLATIVE PROPOSALS

1. Authorize Fryingpan-Arkansas project.
2. Authorize negotiation with Mexico for joint construction of Amistad (Diablo) Dam.
3. Require non-Federal interests to bear at least 30% of the cost of flood protection projects.
4. Promote greater conservation of helium.
5. Authorize coal research on a contract basis.
6. Increase fees for noncompetitive oil and gas leases on the public domain.
7. Transfer from the Secretary of the Interior to the Secretary of Agriculture certain authority with respect to land and timber exchanges.
8. Preserve three undeveloped shore areas for public use.

Under legislation enacted during the past session, the Tennessee Valley Authority plans to issue an estimated $115 million of revenue bonds in 1961. These funds will be used to help finance construction of a second unit in the Paradise steam powerplant and of other units under way, including new generating capacity in the eastern part of the TVA area. The Authority will start construction of the Melton Hill project for navigation and power. In accordance with this administration's policy, and as authorized under the Tennessee Valley Authority Act as amended by the recently enacted revenue bond legislation, the power facilities portion of this project will be financed from net power proceeds and revenue bonds, and the remaining portion will be financed from appropriations. With the completion of the Wilson lock, the present lock at Wheeler Dam will be a bottleneck for shipping

[1] Compares with new obligational authority of $1,742 million enacted for 1959 and $2,538 million (including $32 million of anticipated supplemental appropriations) estimated for 1960.

on the Tennessee River. Appropriations are therefore recommended for 1961 to begin construction of a new lock at Wheeler Dam.

Research for converting sea water and brackish water into fresh water, carried on cooperatively by the Department of the Interior and non-Federal groups, has progressed to the point where some processes are in the development stage. Construction will begin in 1960 at Freeport, Tex., on a demonstration plant for conversion of sea water, and $1.5 million is recommended in the 1961 budget for the Federal cost of building the first brackish water plant as well as a second sea water plant. Advance planning will be completed in 1961 on two additional demonstration plants.

Cost-sharing on flood protection projects.—It is essential that legislation be promptly enacted to establish a consistent basis for cost-sharing on projects which provide flood protection benefits. At the

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

present time, the various Federal agencies responsible for flood protection operate under different and confusing cost-sharing standards. The non-Federal contributions vary from zero to over 60%. This intolerable situation should be corrected. Legislation now before the Congress would require generally that identifiable non-Federal interests receiving flood protection benefits bear at least 30% of the costs of flood protection. The value of lands, easements, and rights-of-way contributed locally would be included as part of this non-Federal share. The cost of operation and maintenance would also be a State or local responsibility.

Mineral resources.—Amendments to the Helium Act were recommended last year to carry out a long-range plan for conserving helium. This lightweight nonflammable gas is important to the Nation's atomic energy and missile programs, and known deposits of it are extremely limited. Under the legislation proposed, private industry would be encouraged to finance, build, and operate plants which would make helium available for conservation by the Department of the Interior. Prompt enactment is needed to check the waste of this essential gas.

The Bureau of Mines will continue its research on improved methods of production and utilization of coal and other minerals. Legislation is again recommended to grant authority to the Secretary of the Interior to contract for coal research, thus allowing the Secretary to use outside scientific resources to assist the coal industry.

Other resource programs.—In the fiscal year 1961, programs for conserving and developing the resources of the public domain and Indian lands will be carried on at about the 1960 levels. Although total expenditures for forest resources are estimated at about the same level in 1961 as in 1960, some increases are provided in 1961 to carry forward the long-range program of the Forest Service for conservation and development, including added facilities and services to accommodate campers and picnickers. It is expected that these increased expenditures will be offset by a decrease in the unusually large 1960 outlays for fighting forest fires.

Receipts from the timber, grazing, and mineral resources on these public lands are estimated to increase to a total of over $400 million in 1961, including revenues from mineral leases on the Outer Continental Shelf. To obtain a more adequate return for use of federally-owned resources, legislation is again recommended to revise the fee schedule for noncompetitive oil and gas leases on public domain lands.

In the interest of improving efficiency and providing convenience for the non-Federal parties concerned, certain functions with respect to land and timber exchanges should be transferred from the Secretary of the Interior to the Secretary of Agriculture by legislation embodying

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

the basic provisions of Reorganization Plan No. 1 of 1959, which was disapproved by the Congress. In these exchanges, the Government obtains non-Federal lands in exchange for national forest lands administered by the Secretary of Agriculture or for timber on such lands. This legislation is needed to simplify the work relating to these land exchanges.

Each year more of our citizens use and enjoy the national parks. Expenditures of $86 million estimated for the National Park Service in 1961 for recreational resources will provide for additional urgently needed facilities and services for visitors, for maintenance and operation of the present facilities, and for selective acquisition of lands to add to existing park areas.

Before it is too late we should take steps to preserve, for public benefit, part of the remaining undeveloped shore areas. I hope, therefore, that the Congress will enact during this session the legislation proposed in the last session to permit the Secretary of the Interior to select and acquire for the national park system three areas which would be of national significance because of their outstanding natural and scenic features, recreational advantages, and other public values.

Contract authority is available to finance planned construction of parkways, roads, and trails in the national parks and forests and on Indian lands during 1961. Beginning in 1962, this construction should be financed by direct appropriations, and the budget so contemplates.

Recent legislation increased the fee charged to hunters of migratory birds and earmarked these revenues for acquisition of lands for refuges and nesting areas. In 1961 land acquisitions from these revenues will be four times those of the current year. Other proposed increases in expenditures for fish and wildlife resources are mainly for fishery research.

LABOR AND WELFARE

Budget expenditures for labor and welfare programs in the fiscal year 1961 are estimated to reach an all-time high of $4.6 billion, of which three-fourths will take the form of grants to States and localities. The total expenditures are estimated to be $128 million more than for the current year. The largest increase is for promotion of public health, mainly for research and hospital construction, as a result of much larger appropriations by the Congress in previous years. Significant increases are also estimated for the support of basic research provided by the National Science Foundation and for the defense education and public assistance programs of the Department of Health, Education, and Welfare.

Budget expenditures for labor and welfare programs will be more than double the amount a decade ago. During the same period,

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

trust fund expenditures for these programs, including social security and unemployment compensation, will have quintupled to an estimated $16.2 billion in 1961.

New obligational authority recommended for 1961 totals $4.5 billion, about the same as for 1960 but $356 million more than for 1959. Reductions from 1960 are recommended in the grant-in-aid programs for assistance to schools in federally-affected areas, for hospital construction, and for waste treatment works construction. Larger appropriations are proposed for other presently authorized activities in the fields of science, vocational rehabilitation, education, welfare, and health. In addition, a number of new programs are recommended to meet important national needs, particularly in the education and labor fields.

In the last several years great strides forward have been made in the social security, welfare, and health fields. The Secretary of Health, Education, and Welfare is continually reviewing the various programs in these fields for the purpose of determining where improvement should be made. As needs for improvement are found, appropriate recommendations will be made.

mental science can flourish. The Federal Government helps in the attainment of these objectives through programs for support of basic research, aid to educational institutions, and training assistance to individuals in various fields important to the national interest. In this budget I recommend increased appropriations for high-priority education and research programs and enactment of new legislation to authorize additional aids to education.

I am recommending repeal of the provision of the National Defense Education Act that prohibits payments or loans from being made to any individual unless he executes an affidavit that he does not believe in or belong to any organization that teaches the illegal overthrow of the Government. This affidavit requirement is unwarranted and justifiably resented by a large part of our educational community which feels that it is being singled out for this requirement.

Education.—Expenditures for the education-aid programs authorized by the National Defense Education Act of 1958 will increase sharply in 1961. During the current school year more than 100,000 students from 1,368 colleges, about four times the number of students last year, are expected to borrow from college loan funds to which the Government makes repayable advances. A supplemental appropriation of nearly $10 million is proposed to enlarge this loan program for 1960. A small increase in appropriations is recommended for 1961 pending further experience on the rate at which loans will be made to students. Increases are also proposed for fellowships for prospective college teachers; for grants to States for science, mathematics, and foreign language teaching equipment; for research in the educational use of television and other media; for contracts with universities for training of counselors and for foreign language training; and for grants to States for vocational training in occupations requiring scientific skills.

Appropriations of $70 million are requested for aids to science education programs administered by the National Science Foundation, an increase of $3 million over the amount provided in 1960.

The budget includes the same aggregate amount for vocational education programs as was appropriated this year, but with shift in emphasis. The need for Federal assistance in the vocational education programs begun in 1917 for the purpose of stimulating training in agriculture, home economics, industrial trades, and distributive occupations is not as great as for promotion of training in new science-age skills. Thus as increased funds for training needs in new skills are provided under the National Defense Education Act, Federal assistance for the older programs is being reduced by a corresponding amount.

Appropriations recommended for 1961 to assist school districts whose enrollment comes partially from children whose parents work

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

or reside on Federal property are $54 million below those enacted for 1960 and are in line with requirements under legislation proposed by the administration last year. The appropriation recommended for these programs is the maximum which I believe should be provided. The substantial increase in Federal employment during World War II, which led to the enactment of this legislation in 1950, has been superseded by a relatively stable Federal establishment. In many cases, the presence of Federal installations in the communities adds to rather than detracts from the revenue base for the support of schools. This is particularly true where parents employed by the Government live on private property which is subject to State and local taxation even though they earn their income on nontaxable Federal property. The proposed legislation would discharge more equitably the Federal responsibility in these districts, and its prompt enactment by the Congress is recommended.

The pressing need now is not for aid to federally-affected districts on the basis initiated in 1950 but for general aid to help localities with limited resources to build public schools. Despite encouraging progress in the rate of school construction, many school districts are still finding it difficult to avoid overcrowding and double sessions as enrollments continue to mount. Moreover, increasing secondary school enrollments require facilities which are much more costly than elementary school classrooms. Last year the administration recommended legislation authorizing annual Federal advances to local school districts to pay up to half the debt service (principal and interest) on $3 billion of bonds to be issued in the next five years for school construction. This legislation is designed to stimulate, not supplant, additional State and local effort. Affirmative action should be taken this year on that proposal.

Congressional approval of the administration's proposals for aid to higher educational institutions is also essential. The enrollment growth facing colleges and universities from 1960 to 1975 brings a need for additional academic, housing, and related educational facilities. To help colleges finance the construction required, the administration's proposal would authorize Federal guarantees of $1 billion in bonds with interest subject to Federal taxation, and would provide Federal grants, payable over 20 years, equal to 25% of the principal of $2 billion of bonds. This program would provide aid on a much broader basis, and result in the construction of much larger total amounts of college facilities per dollar of Federal expenditures, than the present more limited college housing loan program which should be allowed to expire.

Basic research.—To provide a strong foundation of fundamental scientific knowledge for the Nation's future advancement, this budget

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

provides, in various functional categories including major national security, expenditures totaling more than $600 million for support of basic research in 1961.

Appropriations of $122 million are recommended for support of basic research by the National Science Foundation, an increase of $34 million over 1960. The total includes $79 million for basic research projects and $15 million for grants to universities for modernization of graduate level laboratories under a program initiated in 1960. Increased support is also provided for scientific work of the Bureau of Standards, including funds for two new laboratories, as a first step in the construction of completely new facilities for the agency.

Oceanography.—Federal support of oceanography and related marine sciences is being substantially augmented by several agencies under a long-range program developed by the Federal Council on Science and Technology to strengthen the Nation's effort in this field. This program stems from a study undertaken by the National Academy of Sciences at the request of several agencies. The expansion of oceanographic research will be undertaken by the Navy, the Departments of Commerce and the Interior, and the National Science Foundation. Funds are provided for the construction of new vessels and the replacement of obsolete vessels, and for increased support for research by private institutions.

Government statistical services.—Adequate and timely national statistical information is essential for recording and appraising the performance of the Nation's economy, and for formulating public and private policies. Activities planned in various agencies for the fiscal year 1961 will help close significant gaps in our statistical information and make improvements in current data. Obligations for these purposes in the various functional categories of the budget are estimated at $62 million, including $20 million for the decennial census and other periodic statistical programs.

This budget includes funds for tabulating and processing basic economic and demographic data collected through the Eighteenth Decennial Census, and for the final publication of the results of the 1958 censuses of business, manufactures, and mineral industries. Other recommendations include the initiation of a new series on the service trades and the improvement of data on retail trade, on consumer prices, on health, on crop and livestock production, and on State and local government finances.

Labor and manpower.—Last year the administration recommended and the Congress enacted much-needed legislation designed to protect workers and the public from racketeering, corruption, and

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

abuse of democratic processes which had been disclosed in the affairs of a few labor unions. To assure effective and efficient administration of this new law, the budget recommends supplemental appropriations in 1960 for the National Labor Relations Board and the newly established Bureau of Labor-Management Reports in the Department of Labor. Increased appropriations are proposed for both agencies for 1961. Additional funds needed by the Department of Justice will be requested later when requirements can be better determined.

Appropriations of $326 million are requested in the fiscal year 1961 for grants to the States to administer the Federal-State employment security system with its network of 1,800 offices throughout the country. These grants are now financed from an earmarked Federal tax and the transactions involved increase both budget receipts and expenditures, even though these funds cannot be used for general Government purposes. Legislation proposed by the administration last year for financing this program through the unemployment trust fund should be enacted. Amounts equal to the proceeds from this tax could then be placed directly in the trust fund from which the necessary grants could be appropriated and an adequate balance could be maintained as a reserve for employment security purposes. The administration of the program would then be financed in essentially the same way as other major social insurance programs.

The job placement services and unemployment compensation payments provided through the State employment security offices are important for a smoothly operating free labor market in a growing economy. These services and payments provide also for security against economic hardship for the work force covered by the system. I again urge the enactment of legislation to extend unemployment compensation to some 3 million workers, primarily those employed in small enterprises. Some States have recently made encouraging progress in increasing the duration and level of benefits, but more needs to be done and additional States should take these steps.

Action is needed to strengthen the financial position of the unemployment compensation system. Although the reserves of most States proved adequate in the past recession, a few were and still are in a precarious condition. Moreover, reserve funds in most States have fallen behind the growth in payrolls during the last decade, and in certain States could be inadequate in the event of future economic distress. I have asked the Secretary of Labor to make a study of this problem and to report to me his conclusions.

Previously proposed amendments to strengthen the basic authority in the Welfare and Pension Plan Disclosure Act should be enacted, and the protection of the Fair Labor Standards Act should be extended to several million additional workers in accordance with previous recommendations. Legislation is likewise again proposed to assure

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

equal pay for equal work, and to strengthen and improve laws governing hours of work and overtime pay on direct Federal and certain federally-aided construction projects.

Public health.—Advances in medical technology and the spread of private health insurance have played important roles in raising the level of health services for our rapidly growing population. At the same time, the growing demand for better health care has contributed to shortages of facilities, medical and scientific manpower, and supporting health workers, as well as to the rising cost of medical and hospital services.

In order to deal effectively with these developments, the Federal Government has expanded its public health programs and is actively seeking solutions to the Nation's health problems. Expenditures in the fiscal year 1961 are estimated to total $904 million, which is $53 million more than in 1960 and nearly three times the level five years earlier. The largest part of the increase is for medical research and training of research workers through programs of the National Institutes of Health, for which the estimated expenditures of $390 million in 1961 will be four times as great as five years ago. Expenditures for hospital construction grants are estimated at $161 million in 1961, a threefold increase during the same period.

The Department of Health, Education, and Welfare will insist on maintaining high standards in determining the acceptability of medical research projects for Federal support. As I indicated last August in approving the 1960 appropriations for the Department, it is essential that Federal grants for these projects be so administered that medical manpower is not unduly diverted from other pressing needs and that Federal funds are not substituted for funds from private sources. The 1960 appropriation of $400 million for the National Institutes of Health will not be entirely committed this year even with advanced funding of certain training programs. I am recommending that 1961 appropriations to the National Institutes of Health continue at the high level of 1960.

The recommended appropriation for the Hill-Burton hospital construction program for 1961 is consistent with the levels achieved by this program before the 1958 recession. It will assure that sufficient new general hospitals can be financed to keep pace with population growth, cover current obsolescence rates, and provide for 6,000 new beds to reduce the backlog of needs. The remainder of this program, covering diagnostic and other special facilities, would approximate the 1959 and 1960 levels.

The 1961 appropriation proposed for construction of waste treatment facilities is the same as that requested for 1960. It represents the maximum amount which I believe is warranted for a construction

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

program which is and should remain primarily a State and local responsibility.

Larger appropriations are proposed for other health programs where present or impending needs create urgent priorities. Emerging health problems of increasing seriousness to our population arise from the complexities of the environment in which we live. To cope with the far-reaching problems of environmental health on a more systematic and intensive basis, this budget provides substantial increases to the Public Health Service for air pollution, water pollution, and radiological health control activities. These increases for radiological health, together with the stepped-up activity by the Atomic Energy Commission and other agencies, will permit a greatly intensified effort by the Federal Government in this field. In order to provide for more effective Federal air and water pollution control activities, the Secretary of Health, Education, and Welfare will make legislative recommendations to strengthen the enforcement provisions of the Water Pollution Control Act and to authorize greater Federal leadership in combating air pollution.

Rapid technological developments in the production, processing, and marketing of foods, drugs, and other products likewise underline the necessity for more research and action for the protection of the consumer. To meet this need, the budget continues to emphasize an orderly expansion of the Food and Drug Administration, expenditures for which will be more than double those five years ago.

Social insurance and other welfare.—The social security insurance system now provides basic protection against loss of income from death, disability, and retirement to about 85% of our labor force. Another 8% are covered under the railroad retirement system and other public retirement systems.

Social security and public assistance.—At the present time 10 million of the 16 million people aged 65 and over are receiving monthly old-age or survivors insurance benefits. This vast insurance system, which will pay $11.7 billion in old-age, survivors, and disability benefits to 14.6 million people of all ages in 1961, is administered at a cost of about 2% of the social security taxes.

Our social insurance and public retirement systems provide basic protection to the worker and his family. For those who have no such protection and whose incomes are insufficient to meet basic needs, the Federal Government shares, through grants to the States, in providing four categories of public assistance payments. These are (1) old-age assistance, (2) aid to the blind, (3) aid to dependent children, and (4) aid to the permanently and totally disabled. In 1961, the Federal share for payments, made to an estimated monthly average of 5.9 million beneficiaries, will total an estimated $2.1 billion, or about 58%

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

of the total Federal-State-local public assistance expenditures. This contrasts with Federal expenditures of $1.1 billion, representing a Federal share of 52%, for payments to 4.9 million individuals in 1950.

Public assistance has long been recognized as primarily a responsibility of the State and local governments, because need for these payments in individual cases can best be determined at the local level. I am particularly concerned about the growing Federal share, especially because it tends to weaken this sense of State and local responsibility.

While we are spending hundreds of millions for aid to the needy, there are large gaps in our knowledge of the causes of dependency and of the best ways to alleviate or prevent it. I believe that appropriations to initiate a program of research and demonstration projects designed to identify and alleviate these causes are highly necessary and I have so recommended in this budget.

Military service credits.—It has long been recognized that military service should be counted towards the rights of employees under the various public retirement programs. Likewise, where employees are not required to make payroll contributions during military service, the trust funds from which benefits based on such service are paid should be reimbursed by the Government. However, the Federal Government should not, as required under the Railroad Retirement Act, pay more than the true cost of such benefits or pay to both the railroad retirement account and to the old-age, survivors, and disability insurance trust funds for the same military service benefits.

Accordingly, I repeat my earlier recommendation that the Federal Government should reimburse the railroad retirement account only for the actual added cost of benefits resulting from military service. Pending action on legislation dealing with substantial overpayments found by the Comptroller General, no provision is made in this budget for further Federal military service payments to either the railroad retirement account or the old-age, survivors, and disability insurance trust funds.

Other welfare services.—This budget includes recommended appropriations for vocational rehabilitation totaling $72 million for the fiscal year 1961, primarily for grants to help the State agencies rehabilitate an estimated 93,000 individuals, about 6% more than in 1960.

Grants to all school systems in the States through the school lunch and special milk programs of the Department of Agriculture are estimated at $234 million in 1961, approximately the same as in 1960. These programs will provide improved diets for 11.8 million children, on the average, in 1961. The 1961 amount is in addition to the commodities which are distributed to the schools through the disposal

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

programs classified in this budget under agriculture and agricultural resources.

The health, employment, income, and other needs of the increasing number of elderly people in our population can be met only through the combined efforts and cooperation of private, local, State, and Federal organizations and agencies. The White House Conference on Aging, to be held in January 1961, and the State conferences which precede it should help point the way toward more productive and satisfying living for our aged citizens.

The realization of our aspirations for a better society in the years to come will in large measure depend upon the way in which our children and youth are prepared to realize their maximum potential. This will be the vital concern of the White House Conference on Children and Youth, which will be held in March 1960 and through which private and public organizations will endeavor to bring their wisest and most expert counsel together on this vitally important matter.

VETERANS SERVICES AND BENEFITS

Expenditures for veterans programs are estimated to rise by $314 million to $5.5 billion in 1961, chiefly because of additional pension cases and higher pension rates, both authorized by the Veterans' Pension Act of 1959. The increase for pensions, amounting to $438 million, will be partly offset by a decrease of $128 million in readjustment benefit expenditures.

Programs of the Veterans Administration, providing compensation and pension, medical, and readjustment benefits for the Nation's veterans, rank fourth in size among all Government functions in this budget. Total expenditures for these programs, as presently authorized, will continue to increase in future years as our veterans advance in age. The 23 million living veterans, together with the dependents and survivors of veterans, comprise a total of 81 million people, a considerable proportion of whom are potential recipients of one or more types of benefits.

This country has provided a wide range of benefits and services for war veterans and their families to meet needs resulting from military service. Disability and death compensation benefits have been provided for veterans who were injured in the service or for their survivors. The Servicemen's and Veterans' Survivor Benefits Act of 1956 improved the death benefit structure both for wartime and peacetime servicemen. In 1957, general disability compensation rates were increased by 10%, and a still larger increase was enacted in the basic rate for the totally disabled.

A first-rate hospital and medical care program is also being provided. During the past year a long-range policy for stabilizing the Veterans Administration's hospital program at 125,000 beds has been

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

established, and beginning with the 1961 budget a 12-year hospital modernization program is being initiated that will ultimately cost $900 million.

Veterans Services and Benefits:

BUDGET TOTALS

[In billions]

	1959 actual	1960 estimate	1961 estimate
Expenditures	$5.2	$5.2	$5.5
New obligational authority	5.1	5.2	5.5

LEGISLATIVE PROPOSAL

Provide vocational rehabilitation for peacetime ex-servicemen with service-connected disabilities.

The 21 million veterans who served during World War II or the Korean conflict were eligible for benefits from the highly successful readjustment programs. For the 16 million World War II veterans the GI bill provided unemployment and self-employment compensation payments to 9.7 million veterans; education and training benefits to 8.4 million veterans; and loan assistance to 5 million veterans for the acquisition or improvement of homes, farms, and businesses. Except for the loan guarantee and direct loan programs, which will terminate on July 25, 1960, the World War II readjustment benefits have essentially expired. Similar readjustment programs, which will continue into 1965 for veterans of the Korean conflict, have already provided 2.3 million veterans with education and training benefits and 700,000 with loans. The special unemployment compensation program for Korean conflict veterans which ends in 1961 has aided 1.3 million veterans. No further extension or liberalization of these benefits is needed.

The long-standing veterans pension program also provides special assistance to war veterans for needs not arising from military service. The Veterans' Pension Act of 1959 was an important step in the modernization of the program. It eliminated the disparity in eligibility for pensions between the widows of World War I veterans and those of later wars, and provided higher benefits for all persons who could demonstrate need under a new sliding scale income test. No further liberalization of the laws concerning pensions for non-service-connected disability is proposed.

In addition to the special veterans programs, a great majority of veterans participate in the general social security, health, and welfare programs which are financed wholly or in part by the Federal Government. In the future these general programs will provide with increasing adequacy for the economic security needs of our elderly population, of which veterans and their widows will constitute a large and increasing proportion for several decades.

VETERANS SERVICES AND BENEFITS

[Fiscal years. In millions]

Program or agency	Budget expenditures			Recommended new obligational authority for 1961
	1959 actual	1960 estimate	1961 estimate	
Readjustment benefits:				
Education and training	$574	$445	$316	$286
Loan guarantee and other benefits	133	115	124	124
Unemployment compensation	44	8	--------	--------
Compensation and pensions:				
Service-connected compensation	2,070	2,071	2,066	2,066
Non-service-connected pensions	1,153	1,278	1,716	1,716
Burial and other allowances	52	58	58	58
Hospitals and medical care	875	906	928	933
Hospital construction	45	60	63	75
Insurance and servicemen's indemnities	35	36	31	49
Other services and administration	193	180	169	168
Total	5,174	5,157	5,471	[1] 5,476

[1] Compares with new obligational authority of $5,125 million enacted for 1959 and $5,176 million (including $114 million in anticipated supplemental appropriations) estimated for 1960.

Readjustment benefits.—Readjustment assistance is expected to decline significantly from 1960 to 1961, primarily because of the reduction in the number of veterans of the Korean conflict participating in educational or vocational training programs. An average of 225,000 veterans will receive training in 1961, compared to 325,000 in 1960 and 425,000 in 1959. Educational benefits for war orphans, which were enacted in 1956, are expected to total over $17 million in 1961.

Peacetime ex-servicemen are recognized as being in a different category from wartime veterans because of the different conditions under which they serve. Those who serve in peacetime undergo fewer rigors and hazards than their combat comrades. The disruption of their educational plans and careers is minimized under peacetime selective service procedures. While on active service they now receive substantial pay and benefits, and they return to civilian life under more favorable conditions after receiving valuable training while in service.

To discharge its responsibility to peacetime ex-servicemen, the Federal Government has provided unemployment compensation, employment service and reemployment rights, and service-connected disability or death compensation. One additional benefit should be added to these in accord with my earlier recommendations: a program of vocational rehabilitation for those with substantial service-con-

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

nected disabilities. On the other hand, I oppose the establishment of special educational and loan guarantee programs for peacetime ex-servicemen. Such benefits are not justified because they are not supported by the conditions of military service. Moreover, they would be directly contrary to the incentives which have been provided to encourage capable individuals to make military service a career.

Compensation and pensions.—Expenditures for compensation for service-connected disabilities and deaths will show only a minor change in 1961. A reduction in the number of World War I and II veterans on the rolls will be offset somewhat by the addition of veterans of the Korean conflict and peacetime ex-servicemen. Compensation will be paid for an estimated 2.4 million cases during 1961.

The net impact of the 1959 law governing non-service-connected pensions is to add several hundred thousand new cases to the rolls at an estimated additional cost of $284 million in 1961 and an estimated cumulative cost of $9 billion during the next 40 years. Expenditures are also increasing because of the growing number of World War I veterans reaching age 65. Approximately 40% of all World War I veterans over 65 are now receiving pensions. An average of 1.9 million veterans and families of deceased veterans are expected to receive pensions in 1961; this is 26% more than in 1960 and 38% more than in 1959.

Hospital and medical services.—The budget includes $928 million of expenditures in 1961 for hospital and medical care for veterans. The increase of $22 million from 1960 is to continue improvements in the staffing and quality of service in the hospitals and to meet the higher costs of hospital and medical care generally. Hospital and domiciliary care will be provided during the year for an average of 141,250 beneficiaries per day, and a total of 2,300,000 veterans will receive medical or dental care for service-connected disabilities in outpatient clinics.

Hospital construction.—As a first step toward an orderly 12-year program for modernization of existing veterans' hospital facilities, an appropriation of $75 million is proposed for 1961. Of this total, $53 million is for construction of replacement hospitals at Cleveland, Ohio (800 beds); Washington, D.C. (700 beds); and Martinez, Calif. (500 beds). The remainder is for a large number of modernization projects.

Administration.—The general operating expenses of the Veterans Administration are expected to decline approximately 7% in 1961, reflecting decreased workloads in loan and educational programs, improved administrative procedures particularly in insurance operations, and the application of modern electronic equipment to recording and paying veterans benefits.

Federal Reserve Bank of St. Louis

INTEREST

Interest payments are estimated to rise $200 million to $9.6 billion in the fiscal year 1961. These payments, almost entirely for interest on the public debt, represent 12% of budget expenditures.

INTEREST

[Fiscal years. In millions]

Item	Budget expenditures			Recommended new obligational authority for 1961
	1959 actual	1960 estimate	1961 estimate	
Interest on public debt	$7, 593	$9, 300	$9, 500	$9, 500
Interest on refunds of receipts	70	75	75	75
Interest on uninvested funds	9	9	10	10
Total	7, 671	9, 385	9, 585	9, 585

For a year and a half now, market rates of interest have been increasing, reflecting inflationary pressures, the high level of investment demands in our economy and heavy Federal borrowing required by the 1958 and 1959 budget deficits. The rise in market rates requires the Treasury to pay higher interest on securities issued to refinance the heavy volume of maturing obligations, which were issued when interest rates were lower.

It is imperative that the Congress lift the present legal ceiling of 4¼% on interest rates on all Government obligations having maturities of more than five years. Otherwise, interest payments could rise even more sharply. The current interest rate on shorter term securities is now higher than on long-term bonds, and the continued need to limit financing to the short-term market tends to raise interest rates more than if the financing could be spread over both the short- and long-term markets.

GENERAL GOVERNMENT

Expenditures for general government activities are estimated to rise by $200 million to $1.9 billion in the fiscal year 1961, primarily because of increased construction of Government buildings and a new appropriation to the civil service retirement fund required by law.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

Federal financial management.—There is growing evidence that a considerable amount of revenue is lost annually to the Government because of the failure of some individuals and businesses to report fully the income which they have received. The existence of such a condition seriously weakens the integrity of our tax system, and places an unfair share of the total tax burden upon the vast majority of citizens who conscientiously report all of their taxable income. This budget includes an increase of $29 million for the Internal Revenue Service, primarily to strengthen its enforcement programs, including initiation of an electronic computer system. I urge its approval as the first step in a long-range plan to prevent this revenue loss. The additional costs should be recovered many times through increased tax collections in later years.

General Government:

BUDGET TOTALS

[In billions]

	1959 actual	*1960 estimate*	*1961 estimate*
Expenditures	$1.6	$1.7	$1.9
New obligational authority	1.8	1.6	1.9

LEGISLATIVE PROPOSALS

1. Establish policy for financing civil service retirement.
2. Charge civil service benefits for certain widows and retired employees to trust fund after 1961.
3. Make 1958 salary increase for Post Office field personnel permanent.
4. Revise laws to reflect admission of State of Hawaii.
5. Provide home rule for District of Columbia.
6. Create transportation corporation for National Capital area.
7. Authorize nonvoting resident commissioners for Guam and Virgin Islands.
8. Amend immigration and nationality laws.
9. Include goal of price stability in Employment Act.
10. Enact civil rights legislation.
11. Create additional Federal judgeships.
12. Strengthen laws against organized crime.
13. Increase authorization for Commission on International Rules of Judicial Procedure.
14. Reimburse citizens for certain World War II property damage.
15. Authorize civilian achievement awards.

General property and records management.—The efficient and economical operation of many Federal agencies is hindered by inadequate office space, much of which is rented. Accordingly, new obligational authority of $185 million is recommended for fiscal year 1961 for the planning and construction of additional general office space. Although no funds for such construction were appropriated for 1960, expenditures will rise in 1961 as outlays for new construction are added to those for construction initiated in prior years.

Territories and possessions, and the District of Columbia	89	96	126	124
Other general government	30	20	12	15
Total	1,606	1,711	1,911	[1] 1,910

[1] Compares with new obligational authority of $1,795 million enacted for 1959 and $1,645 million (including $7 million in anticipated supplemental appropriations) estimated for 1960.

In addition, the estimate for the legislative functions includes increased expenditures for a new office building for the House of Representatives.

The General Services Administration, in collaboration with other agencies, has developed a new program for improved use of excess personal property by Federal agencies, and faster, more efficient disposal of surplus property. This involves more effective screening of such property and simplifying the procedures under which agencies are advised of its availability for other uses.

Central personnel management.—The Civil Service Commission and the Bureau of the Budget have recently recommended a long-range policy on financing the civil service retirement system. I hope the Congress will speedily enact these recommendations, which would assure continued availability in the fund of the full amount of the net accumulations from employee contributions and establish a definite basis for meeting the Government's share of the costs consistent with the principle that its full faith and credit support the authorized benefits.

A new appropriation of $46 million for payments to the civil service retirement fund is requested for 1961 to finance the costs of new or

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

increased benefits enacted in 1958 for certain widows or widowers of former Federal employees and for certain retired employees. The law provides that these particular benefits cannot be continued after July 1, 1960, unless such an appropriation is made. Recipients of these benefits should enjoy the same assurance of uninterrupted payment as do other annuitants of the civil service retirement system, and the Federal liability in their case is not different from that for other benefits under this program. Accordingly, I recommend that the Congress consider, in connection with the legislation referred to in the preceding paragraph, authorizing the civil service retirement and disability fund to bear the future cost of these particular benefits without a specific appropriation.

The budget provides approximately $120 million to pay the Government's share of the Federal Employees Health Benefits Act of 1959, which becomes effective in the fiscal year 1961, and which will provide opportunity for approximately 2 million employees and 2.4 million dependents to have reasonable protection against the cost of both basic and major health care. This program will add substantially to employee fringe benefits, which in the aggregate now compare very favorably with those provided to employees in private industry.

In 1958 immediately following enactment of a 10% general salary increase for Federal civilian employees, I proposed to the Congress a review of all compensation systems in the three branches of the Federal Government, directed toward adoption of an equitable employee compensation policy. This recommendation was renewed in my budget message for the 1960 fiscal year.

It has been more than 30 years since a thorough-going review has been made of the manner in which the Federal Government compensates its employees. There are now dozens of pay plans in the executive branch alone. Review and coordination of the excessive number of pay plans now in existence are the most effective means of removing inequities which adversely affect the Government's ability to recruit and retain qualified personnel in some fields. Continued patching of individual Federal salary systems is not satisfactory as a substitute for a comprehensive Federal pay policy, which should be developed either by authorizing a Joint Commission such as I proposed or by some other equally effective means. Pending development and adoption of such a comprehensive policy, a general pay raise would be unwarranted, unfair to the taxpayers of the United States, and inequitable as among employees compensated under different and unrelated pay systems.

The budget estimates for the Post Office Department assume legislative action to continue that part of the 1958 salary increase for postal field service employees which expires on January 20, 1961.

Civilian weather services.—Appropriations totaling $63 million are recommended for the fiscal year 1961 for the Weather Bureau. The $12 million increase over the amounts enacted for 1960 will permit expanded research, weather observation, and forecasting services. These improvements are necessary primarily to keep pace with advances in air traffic controls. Research projects include intensive investigation of hurricanes and tornadoes, and the development of a semiautomatic system for the collection and analysis of weather data.

Hawaii.—Our Union was greatly strengthened in 1959 by the admission of the States of Alaska and Hawaii. As in the case of Alaska, comprehensive legislation will be necessary to enable Hawaii to take its place as the equal of the other 49 States. Recommendations will be transmitted to the Congress concerning those changes needed in Federal laws in order to bring Hawaii under the same general laws, rules, and policies as are applicable to the other States.

Territories, Possessions, and District of Columbia.—Completion of action on statehood for Alaska and Hawaii makes it all the more urgent that legislation to provide home rule for the District of Columbia be enacted without delay. Both equity and efficiency require that the people of the Nation's Capital be given a voice in their own local government and that the role of the Federal Government be limited to matters of Federal concern.

Legislation will shortly be proposed to the Congress to establish a Government corporation to develop an improved mass transportation system in the National Capital metropolitan area, pending creation of an interstate agency to assume this responsibility.

To foster further development of democratic institutions and in keeping with the growth of local self-government, action should be taken to authorize the Virgin Islands and Guam to be represented in the Congress through nonvoting resident commissioners.

Intergovernmental relations.—There are many problems requiring attention of the recently established Advisory Commission on Intergovernmental Relations. Foremost among these are the problems of allocation of tax sources among various levels of government and rapid growth of metropolitan areas.

An aspect of intergovernmental relations requiring attention in both the legislative and executive branches involves a series of court decisions permitting local taxation of federally-owned property in the hands of contractors and leaseholders. This matter should be resolved in the context of the broader subject of Federal payments in lieu of taxes.

Federal Reserve Bank of St. Louis

Other recommendations.—Legislation enacted in the last session of Congress to amend the immigration and nationality laws failed to cover several significant proposals, including modification of the quota system. Prompt action is needed on these remaining items.

To strengthen the Government's hand in restraining inflationary forces, I urge that the Employment Act of 1946 be amended to make reasonable price stability an explicit goal of Federal economic policy, coordinate with the goals of maximum production, employment, and purchasing power now specified in that Act.

I urge the Congress to enact the remaining six points of the civil rights program that I recommended last year. The Civil Rights Commission, extended for an additional two years by the last session of Congress, continues its important work and has developed additional constructive recommendations, particularly for protecting the right of every citizen to vote. I hope these recommendations will also be earnestly considered by the Congress.

I also recommend that the Congress create additional Federal judgeships, as proposed by the Judicial Conference, and strengthen Federal laws against organized crime.

Legislation will be submitted to increase the authorization for appropriations for the Commission on International Rules of Judicial Procedure in order that it may complete its work successfully.

It is important that legislation now before the Congress be enacted to provide reimbursement to Americans for certain property damage in Europe and the Far East during World War II for which compensation has not previously been authorized.

I again recommend that a system be devised for suitable recognition in the United States for distinguished achievement in various fields of endeavor.

IMPROVEMENTS IN BUDGETING, ORGANIZATION, AND MANAGEMENT

The decisions made by Government are vital to so many aspects of our national life that improvement of the procedures through which these decisions are made should be a continuing major goal. A substantial number of important specific steps can and should be taken to improve these practices.

Revisions in authorization and appropriation procedure.—Contract authority and authorizations to spend from debt receipts in basic legislation outside the appropriation process are generally inconsistent with sound standards of budget practice. The recommendations being placed before the Congress in this budget are based upon the principle

Digitized for FRASER

Federal Reserve Bank of St. Louis

Budget and Organization Improvement:

LEGISLATIVE PROPOSALS

1. Simplify congressional appropriation authorization procedures for continuing programs.
2. Authorize the item veto for appropriation bills.
3. Extend appropriation control over use of foreign currencies by Government agencies.
4. Establish revolving funds for certain business-type activities.
5. Revise and extend coverage of Government Corporation Control Act.
6. Remove time limitation from Reorganization Act.

that authority to make budget obligations and expenditures, whether financed from receipts or borrowing, should be granted by the Congress only in appropriation acts.

The Congress has shown a growing tendency to require the annual enactment of authorizing legislation before appropriations may be made. Space programs, some mutual security programs, military and atomic energy construction in this budget, and much of defense procurement beginning in fiscal 1962, will require separate authorizations before appropriations can be considered. Under this procedure these programs receive a duplicating review each year. At the same time the value of legislative consideration and expression of long-range program objectives and amounts is largely lost, and agency personnel devote an inordinate amount of time to the congressional process at the expense of effective administration of the continuing program. I hope the Congress will find it possible generally to make authorizing legislation cover program requirements for longer periods of time.

In the interest of good government, methods to expedite the authorization and appropriation processes should be found. In order to facilitate early consideration, and also to show the Government program more fully, this budget includes specific proposed appropriations for a number of programs for which authorizing legislation must also be renewed. In most of these cases, proposals for such legislation will be submitted in a very short time. This procedure should be an improvement over the past practice of delaying submission of detailed estimates until the renewing legislation has been enacted.

Before the executive budget is presented to Congress annually, the most careful consideration is given to the relationships of spending to receipts and borrowing, and to relative priorities of various programs. When the budget reaches the Congress, however, its consideration is usually fragmented because of the distribution of responsibilities among the various committees and subcommittees. I believe that the Congress should find means by which it can more effectively examine the budget as a whole and base its actions on the overall fiscal situation.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

Provision for item veto.—In passing the Alaska and Hawaii statehood acts, the Congress again recognized the value of an item veto by a chief executive by approving provision for its use in their State constitutions. Forty-one State Governors now have item veto authority. Many Presidents have recommended it, but the Congress has not yet granted the President of the United States that power. I again recommend it.

Control of foreign currencies.—The Government receives from its operations considerable quantities of foreign currencies each year. Much of this currency is earmarked for grants to and loans in the country concerned, and some is available for programs of the U.S. Government. In many countries the currencies available to us are needed for conducting normal U.S. operations, yet such use is prevented in some cases by statutes or by the international agreements under which the currencies are received.

As a result of a detailed study, this budget includes provisions to bring under budget and appropriation controls all foreign currencies available for U.S. agency operations which are received from the sale of surplus agricultural commodities. This change will not alter total appropriations or expenditures, but will increase those of the agencies using the currencies and decrease those of the Commodity Credit Corporation. Accordingly, I intend that no more allocations be made for uncontrolled use after the current fiscal year except for country grants and loans committed in international agreements, and I recommend that at an appropriate time the Congress remove from the laws the provisions which permit uncontrolled use for other purposes. I am also instructing that in future negotiations of international agreements we endeavor to avoid restrictions which would limit our ability to apply normal budget and appropriation controls to the use of those currencies which are earmarked for U.S. agency operations.

Improved funding for public enterprises.—Major business-type activities of the Government should, with few exceptions, operate on a self-sustaining basis. Their budgets and accounts should permit ready comparison of their expenses and revenues. They should have simplicity in their financing structure and the flexibility in expenditures necessary to meet unforeseen business conditions, but should be expected to keep their obligations and expenditures within the resources provided by Congress for that purpose, and should be subject to annual review and control by the Congress. Accordingly, I recommend that the Rural Electrification Administration, the Farmers Home Administration, the Bureau of Reclamation, the power-marketing agencies of the Department of the Interior, and the loan

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

guarantee programs of the Veterans Administration be financed through revolving funds. Similar recommendations may be made in due time for other business-type activities.

Legislation is again being recommended to bring under budget review the activities of those few Government corporations which are now exempt from such review, but possess authority to draw money from the Treasury or to commit the Treasury for future expenditures. This can best be done by including them under the budget provisions of the Government Corporation Control Act.

Revision of budget presentation.—In this budget more than half of the 626 appropriation accounts of the executive branch have been presented on a cost basis. The remaining appropriations, including those for the Department of Defense, will be converted to this basis as soon as possible. This budget also provides for accrued expenditure limitations for 12 appropriations, in accordance with legislation enacted in 1958. Such limitations are recommended to permit closer congressional control over annual expenditures.

The customary totals of budget receipts and budget expenditures are distorted by the inclusion in both of interest and other payments by public enterprise funds to the general fund of the Treasury. Such interfund payments amounted to $355 million in the fiscal year 1959, and are estimated at $737 million for 1960 and $779 million for 1961. While this duplication does not affect the amount of the budget surplus or deficit, it does overstate the size of the budget receipts and expenditures. To correct this it is planned that such amounts, while still shown within the figures for the affected agencies, will be eliminated from budget totals in financial statements on Government operations beginning with the fiscal year 1961. I also plan to present the 1962 budget so as to remove this duplication. However, in order to preserve full comparability with previous budgets, no such adjustments are shown in the amounts in this document. If adjustments had been made, the net totals would appear as follows:

ADJUSTED BUDGET TOTALS, EXCLUDING INTERFUND PAYMENTS

[Fiscal years. In billions]

	1959 actual	1960 estimate	1961 estimate
Budget receipts	$67.9	$77.9	$83.2
Budget expenditures	80.3	77.7	79.0
Budget deficit	12.4	----	----
Budget surplus	----	.2	4.2

Strengthening of organization and management.—From the beginning of this administration I have placed emphasis on obtaining the best possible executive ability in the administration of the widespread and diverse activities of the Federal Government and on providing the best organizational structure in which officials can carry out their responsibilities. This continued emphasis is essential not only to operate the complex machinery of government effectively, but also to meet the constant flow of new problems of organization and management.

In recent years several major organizational improvements have been made, including the establishment of the Department of Health, Education, and Welfare, the Federal Aviation Agency, and the National Aeronautics and Space Administration, as well as new organizational structures for defense programs and for civilian and defense mobilization activities. The many actions taken on recommendations of the two Hoover Commissions have also resulted in more efficient administration.

The Reorganization Act of 1949, as amended, under which numerous executive agencies and functions have been reorganized, contains a limitation of June 1, 1959, for the transmittal of reorganization plans by the President to the Congress. Accordingly, this authority is not now available. I urgently recommend that this cutoff date be removed in order to permit continued use of that act by me and by my successor in improving the management and organization of the executive branch.

The search for better management and operations is a never-ending process. Like all large organizations, the Federal Government continues to have management problems. For example, property management offers an enormous challenge, and in the past year greater attention has been focused on it. Application of new data-processing techniques to Government operations is under constant study. The Post Office Department is improving its operations by installing modern methods of mail handling and transportation. The Treasury Department is using up-to-date data-processing equipment to achieve more effective administration of disbursements and revenue collection. These are but a few of many examples, and this budget provides for further improvements.

At my request, the heads of all Government agencies will give renewed emphasis to the review of management procedures and operating activities to make sure that the most modern methods, techniques, and equipment are in use. All agency heads have been encouraged to continue to search for the best practices in other

Federal Reserve Bank of St. Louis

Government agencies, in business, or in industry, to apply them in their own agencies to the extent possible during the term of this administration, and to leave to their successors a legacy of plans for further improvement.

The plans presented in this budget meet the Nation's immediate needs and will support continuing sound economic growth in the future. The achievement of these plans, however, will in the last analysis depend on the people themselves.

I believe our people have the determination to hold expenditures in check, to pay their own way without borrowing from their children, to choose wisely among priorities, and to match sound public policy with private initiative. It is that determination which is the key to continued progress and sound growth with security. It is that determination which reinforces the recommendations I have made.

DWIGHT D. EISENHOWER.

INTRODUCTION TO PART I

Part I of the budget contains five summary tables. Each of these tables is designed to bring together in one or two pages some overall aspect of the Federal budget.

TYPES OF FUNDS

A basic distinction is made between Federal funds on the one hand, and trust and deposit funds on the other.

The *Federal* (Government-owned) funds are of four types as follows:

The *general* fund is credited with receipts which are not earmarked by law for a specific purpose, and is charged with expenditures that are payable from appropriations (except appropriations of earmarked receipts) and those payable from borrowing. Both in number of items and in amounts, most of the Government's business is transacted through the general fund.

Special funds are those which are established to account for receipts that are earmarked by law for a specific purpose. They exclude the funds which carry on a cycle of operations for which there is continuing authority to use the receipts (as described in the next paragraph). Some special funds are subject to annual appropriation by Congress. Others are automatically available under the laws which created the funds.

Public enterprise (*revolving*) funds are those which finance a cycle of operations, in which the expenditures generate receipts coming primarily from the public and available for continuing use. They include nearly all of the Government corporations, the postal fund, and various unincorporated enterprises.

Intragovernmental revolving and management funds (including *consolidated working* funds) are those which are created to facilitate financing operations within and between Government agencies. They consist of two types—*intragovernmental revolving* funds which finance a cycle of operations, like public enterprise funds but with receipts primarily from within the Government; and *management* funds which permit the pooling of advance payments from two or more appropriations to carry out certain activities.

The other funds, for which the Government serves in a fiduciary capacity, are of two types—*trust* funds and *deposit* funds. They are explained in the introduction to part III.

BUDGET RECEIPTS, EXPENDITURES, AND SURPLUS OR DEFICIT

The budget totals and the budget surplus or deficit relate only to the Federal funds, and exclude trust and deposit funds. Tables 1, 2, and 3 are therefore limited to transactions of the Federal funds.

Basis of stating budget receipts.—Table 1 includes a summary of budget receipts. Budget receipts represent the total received for the general fund and the special funds, less (*a*) refunds of receipts and (*b*) transfers to trust fund receipts in the four cases where the law provides an indefinite appropriation to a trust fund in an amount equal to certain tax receipts. Gross receipts and the deductions are itemized in special analysis B of part IV.

Internal revenue and customs receipts are stated on the basis of collections reported by collecting officers. Other receipts are reported on the basis of confirmed deposits.

Basis of stating budget expenditures.—Tables 1 and 2 include information on budget expenditures. Such expenditures cover the general fund, the special funds, the public enterprise funds, and the intragovernmental revolving and management funds. Expenditures for the public enterprise funds and for the intragovernmental funds are included in the totals on a *net* basis—that is, their collections are deducted from gross expenditures and the results are the net expenditures. Interagency payments and reimbursements to appropriations are also netted; that is, to avoid double counting they are treated only as expenditures of the agency whose appropriation or fund is ultimately bearing the charge. Some incidental reimbursements from outside the Government to appropriations are similarly netted out of expenditure figures.

Under the *checks-issued* basis which is used, expenditures are reported for the fiscal year in which the checks are issued, regardless of when the obligation was incurred or when the goods and services were received. Modifications in this basis are made as follows: (*a*) Where payment is made in cash instead of by check, the cash payment is an expenditure; (*b*) where payment is made by the issuance of bonds or by an increase in their redemption value, instead of by the issuance of checks, such an issuance or increase is an expenditure; and (*c*) interest on the public debt, other than increases in the redemption values of savings bonds, is reported on an accrual basis.

Debt and investment transactions.—Receipts never include money obtained from borrowing by any type of Federal fund. Nor are borrowings considered as a deduction in arriving at budget expenditures. Similarly, retirement of debt is always excluded from budget expenditure figures of all types of Federal funds. The purchase of U.S. Government securities, and redemptions or sales thereof, are also excluded from expenditure and receipt figures.

Eliminations from both receipts and expenditures.—Certain transfers from one fund to another are eliminated from budget receipts and expenditures. This is done to avoid inflating both sides of the budget. Payments to the general fund of earnings and dividends on capital of revolving funds, and the return of such capital to the general fund are the items so excluded, and reported in special analysis F of part IV. However, interest paid to Treasury by such funds is considered a cost of the fund and has not been eliminated.

Budget surplus or deficit.—The budget surplus or deficit shown in table 1 represents the difference between the *budget receipts* and *budget expenditures* of a given year. Cash balances, appropriation balances, and surpluses and deficits of previous years are not a part of the calculation.

NEW OBLIGATIONAL AUTHORITY

Table 3 summarizes the new obligational authority—the total of authority becoming available in a given fiscal year for entering into new obligations.

The obligation basis.—Expenditures can be made only pursuant to appropriations or other specific authority

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

granted by Congress. Government agencies are generally permitted by law to incur obligations requiring the future payment of money only when they have an appropriation or other specific authority to do so. Congressional action on the budget must therefore include authority to cover *obligations* expected to be incurred within the fiscal year, rather than to cover only the *expenditures* which are expected to be made during that year in payment of obligations.

Types of new obligational authority.—There are three basic types of new obligational authority: Appropriations, contract authorizations, and authorizations to expend from debt receipts. In addition, there are sometimes reappropriations and reauthorizations.

Appropriations are authorizations to make expenditures from the general fund of the Treasury or from the various special funds. In some cases the authority to incur obligations has previously been granted in the form of contract authorizations; in such cases, the appropriation to permit the payment of such obligations is said to be to *liquidate contract authorizations* and it is not a part of new obligational authority. In all other cases appropriations confer authority both to incur new obligations and to pay for them.

Contract authorizations are authorizations to incur obligations prior to the enactment of an appropriation. A contract authorization does not in itself permit the spending of money; hence it must be followed by an appropriation to permit payment of the contracts and other obligations thus incurred.

Authorizations to expend from debt receipts are authorizations to incur obligations and make expenditures from borrowed money. Such authorizations may take these forms: (*a*) Authorizations for the Treasury to make public debt receipts available to a given agency or enterprise, often in exchange for notes of the enterprise; (*b*) authorizations for a Government-owned corporation to borrow directly from the public; and (*c*) cancellation of notes which have been issued by a Government enterprise and are held by the Treasury, where the cancellation has the effect of permitting further expenditures to be made (through restoring previously used authority to borrow from the Treasury).

Reappropriations and *reauthorizations* are actions to continue available part or all of the unused balances of prior appropriations or authorizations which would otherwise expire. When the authorizations thus continued had been previously granted for current operations of the year, the continuation of their availability into a new year constitutes new obligational authority.

Distinction between permanent and current authorizations.—Some new obligational authority is *permanent*, but most is *current*. The permanent items are those under which additional sums become available from time to time under action previously taken by the Congress; no further action is required each year. Most permanent authorizations are in force until repealed; a few are in effect for only a few years as specified in the law. The current authorizations are those enacted by Congress in or immediately preceding each fiscal year.

PROPOSED FOR LATER TRANSMISSION

Tables 1, 2, and 3 identify in separate columns the portion of receipts, new obligational authority, and expenditures which are anticipated under supplemental budget items, not provided for in the appropriation text in this budget, but planned for formal transmittal to the Congress later. Such estimates include, in addition to the various items which are identified in part II, an "allowance for contingencies" to cover items which cannot be foreseen now but which may be transmitted later if the need arises. Congressional action upon this allowance may be requested later, not at a single time nor as a single lump-sum item, but in the form of a number of specific appropriations for individual items.

As a general rule, where legislation is proposed to extend or renew the authorization for current programs, this budget includes, in part II, recommendations for the necessary new obligational authority in the form of detailed estimates ready for congressional consideration when action on the authorizing legislation will allow. This is a change from previous budgets where forecasts of the amounts needed for such legislation were identified in lump sum as "Proposed for later transmission, under proposed legislation" (followed by transmittal later of the detailed estimates).

EFFECT ON THE DEBT

Table 4 gives details regarding the effect of each year's operations upon the public debt. The budget surplus or deficit is not the only factor which causes a change in the public debt. The amount necessary to borrow or available to repay is also influenced by: Changes in cash balances; the result of trust fund transactions; the use of borrowing directly from the public (not Treasury borrowing) as a means of financing budget expenditures of certain enterprises (and the repayments of such borrowing as an application of public enterprise fund receipts); and the change in the amount of checks outstanding and other items in process of clearance through the accounts.

CONSOLIDATED STATEMENT

Table 5 brings together the total financial plan for the Government—the budget figures for Federal funds and the estimates for trust and deposit funds—for 1961; and it presents a consolidated statement of receipts from and payments to the public. The statement not only eliminates interfund payments, but also brings in transactions of certain Government-sponsored enterprises which are not otherwise reflected in the budget, converts to a cash basis those expenditures which are made in the form of debt issuances (or increases in the redemption value of debt), and eliminates noncash receipts resulting from seigniorage. Details and further explanations are given in special analysis A of part IV.

CLASSIFICATIONS

Receipts are classified in tables 1 and 5 by *source*, a classification which is set forth in detail in special analysis B of part IV.

Expenditures and new obligational authority are classified in two ways in the part I tables. A classification by *function*, used in tables 1 and 5 and the first part of table 3, groups transactions according to broad governmental purposes; subcategories of this classification as applied to Federal funds are set forth in special analysis C. A classification by *agency*, used in table 2 and the second part of table 3, shows transactions by major organizational units of the Government, with most agencies that are independent of the ten executive departments being grouped together. The main entries in this classification correspond to "chapters" in part II of the budget and to the way in which part III is organized.

INTRODUCTION TO PART II

Part II contains the details of the budget for Federal funds, including various types of tables and schedules, explanatory statements of the work to be performed and the money needed, and the text of the language proposed for enactment by Congress on each item of authorization. Included herein is also material on a few trust funds which require congressional action.

This part of the budget begins with 4 statements (tables 6 through 9) which supplement the tables of part I. The remainder of part II is arranged in chapters reflecting the organization of the Government.

Each chapter begins with a summary narrative statement and certain summary tables. These are followed by detailed material for each appropriation or fund.

SUMMARY TABLES AND THEIR CONTENTS

SUMMARIES OF AUTHORIZATIONS AND EXPENDITURES

Listing of accounts.—A principal table for each chapter shows the new obligational authority and budget expenditures by appropriation or fund account. The listing is arranged by bureau or comparable organization unit and, for each such unit, is divided into several sections: Current authorizations (other than for public enterprise and intragovernmental funds), permanent authorizations, public enterprise and intragovernmental funds, and supplemental items proposed for later transmission.

Authorizations by type.—Forms of new obligational authority other than appropriations are set forth under the applicable account titles, indentified by separate line entries. A recapitulation at the end of the account listing shows the authorizations divided between current and permanent and classified by type. In this recapitulation new obligational authority for public enterprise and intragovernmental funds is classified with other authority of the same type. The figures are carried forward into a governmentwide summary in table 7.

Classification by function.—Functional code numbers appear in a separate column of the chapter listings, indicating the category in the functional table (special analysis C of part IV) where each item has been included.

Transactions of public enterprise funds.—An appended table in each chapter is used for public enterprise funds. It shows the gross expenditures, the receipts from operations, and the budget expenditures (the difference between the two other figures). The figures for gross expenditures and for receipts are derived from the detailed business-type budget statements, which show expenditures and receipts on an accrual basis with a single adjustment (on either the expenditure or receipt side but not both) for the conversion from an accrual to a checks-issued basis (net). The figures from the chapters are totaled in table 9.

SUMMARIES OF BALANCES CARRIED FORWARD

An analysis of unexpended balances for each chapter shows the balances of budget authorizations carried forward at start and end of the past, current, and budget years. These balances are summarized in table 8.

Many budget authorizations are available for obligation for only 1 year, but some are available for longer periods of time or without time limit. In the case of those which are for a specific period of time, unobligated balances are written off at the end of that time, but obligated balances remain available indefinitely to pay outstanding obligations lawfully incurred.

In the case of salaries and wages, travel, and like items, the lag between obligations and expenditures is usually no more than a few weeks or a few months. In the case of construction, major procurement, certain research contracts and similar items, the lag between obligations and expenditures may be 1 or 2 years or even longer.

Balances are not in the form of cash, but are bookkeeping authority for the incurring of obligations or for the making of expenditures. Cash must be provided at the time the expenditures occur.

The unobligated balance for each account or fund represents the difference between the unexpended balance and the net obligations outstanding. Net obligations outstanding represent the unpaid obligations (both those which have accrued into liabilities and those which are undelivered or unperformed) less the accounts receivable and intragovernmental orders for services or material which have been accepted but have not yet become receivables.

RELATIONSHIP OF TRANSACTIONS AND BALANCES

The total amount available—new obligational authority plus balances brought forward and adjustments—is shown on the last of the chapter summary tables, together with the expenditures and other disposition made of the amounts available. The body of the table is arranged to "flow" from start to end of the year; obligations incurred, net, are shown for reference at the end.

Similar information, but arranged to place obligations incurred within the sequence of the table's flow, is summarized for the Government as a whole in table 6.

Writeoffs, restorations, and other adjustments in availability.—Writeoffs of unused balances of authorizations occur in four ways: (*a*) rescissions by act of Congress; (*b*) the automatic lapsing of unobligated balances when an appropriation expires for purposes of obligation; (*c*) the return of capital and transfer of dividends from revolving funds to the general fund; and (*d*) adjustments in the obligated balances of expired accounts due to the payment of obligations in smaller amounts than anticipated or to the amendment or canceling of obligations.

Restorations of balances previously written off occur in the case of expired accounts when the balances left for payment of old obligations are insufficient to cover them, due to payments in larger amounts than anticipated, the amendment of obligations, or the discovery of previously unrecorded items.

Obligations incurred, net.—The obligations incurred are stated on a gross basis in the detailed schedules, but are summarized on a net basis, consistent with the method of stating budget expenditures and new obligational authority. Thus, the summary figures are based on total obligations incurred less reimbursements to appropriation accounts, revenues and other receipts of revolving funds, and recoveries of prior obligations.

Authority for expenditures.—Expenditures for the budget year are broken down on two tables in each chapter summary into those coming out of new obligational authority of the same year and those coming out of balances, etc. It is generally assumed that prior year balances available in commingled accounts will be obligated before the new authorizations are obligated, and that expenditures will reflect the liquidation of those obligations on the basis of previous experience.

FORM OF DETAILED MATERIAL

For each appropriation, the budget includes certain detailed material, as follows: (1) appropriation language, if applicable; (2) a schedule of program and financing; (3) a narrative statement on program and performance; (4) a schedule of object classification. An exception occurs in the case of certain permanent appropriations and other older appropriation accounts on which only a residual balance remains; such accounts of a bureau or independent agency are often combined into a single presentation instead of having detailed schedules. In cases where the total obligations fall in a single object class, the object classification is identified in the program and financing schedule, rather than in a separate schedule.

In the case of revolving funds, there is usually the material listed above, together with three additional schedules, covering (5) the sources and application of funds; (6) revenue, expense, and retained earnings; and (7) financial condition. For some intragovernmental revolving funds the program and financing schedule is omitted.

APPROPRIATION LANGUAGE

The language proposed for inclusion in the 1961 appropriation acts is printed at the head of each item requiring action by Congress, except for those items which are not formally recommended at this time but will be proposed for later transmission. The language of the 1960 appropriation acts is used as a base. Following the language are citations to relevant laws and the appropriation act from which the text is taken, as in this example:

ESTABLISHMENT OF METEOROLOGICAL FACILITIES

For an additional amount for the acquisition, establishment, and relocation of [meteorological] *operational* facilities and related equipment, including the alteration and modernization of existing facilities: [$2,500,000] *$7,000,000*, to remain available until June 30, [1962] *1963*: *Provided*, That the appropriations heretofore granted under this head shall be merged with this appropriation. (*15 U.S.C. 311, 313, 313a, 317, 325, 328; 72 Stat. 783; Department of Commerce and Related Agencies Appropriation Act, 1960.*)

Roman type shows the text used in the 1960 appropriation acts. Italic type indicates proposed new language. Brackets enclose material which it is proposed to omit.

SCHEDULE OF PROGRAM AND FINANCING

This schedule consists of two parts. In the section for program by activities, obligations are classified by purpose, program, or project. This classification, especially tailored for each agency and account, reflects the particular duties and responsibilities for which the money is used. The financing section shows the appropriation provided and other means of financing the program, and the disposition of amounts not used during the year. Only three of the possible entries are illustrated here:

Program and Financing

	1959 actual	1960 estimate	1961 estimate
Program by activities:			
1. Upper air observational facilities	$55,726	$1,470,500	$933,100
2. Weather surveillance radar	188,785	910,100	638,400
3. Surface observational facilities	67,783	204,100	3,137,700
4. Construction, remote localities	265,653	170,000	245,000
5. Engineering and technical support	146,793	157,300	352,100
Total obligations	724,740	2,912,000	5,306,300
Financing:			
Comparative transfers to other accounts	1,300,000		
Unobligated balance brought forward	−1,369,360	−919,620	−507,620
Unobligated balance carried forward	919,620	507,620	2,201,320
Appropriation (new obligational authority)	1,575,000	2,500,000	7,000,000

Obligations refer to orders placed, contracts awarded, loan agreements made, and services received during the year, regardless of the time of payment. Appropriations or other obligational authority must be provided by the Congress before obligations can be incurred.

Where the data are available in the accounting system, cost-type budgets are presented. In such cases, figures opposite the activity entries are the value of goods and services consumed in carrying out the program, in the case of operating costs; and they are the value of capital assets received, in the case of capital outlay programs. The program portion of a cost-type budget looks like this:

Program by activities:			
1. Commodity program payments:			
(*a*) Direct purchases	$125,568,387	$105,503,400	$105,503,400
(*b*) Diversion payments	7,860,384		
2. Surplus removal operating expenses	2,372,871	2,646,600	2,646,600
3. Marketing agreements and orders	1,762,470	1,850,000	1,850,000
Total program costs [1]	137,564,112	110,000,000	110,000,000
4. Relation of costs to obligations: Costs financed from obligations of other years, net (−)	−16,139,858		
Total program (obligations)	121,424,254	110,000,000	110,000,000

[1] Includes capital outlay as follows: June 30, 1959, $38,073; 1960, $30,000; 1961, $50,000.

In those cases where the program is principally for procurement or public works, additional columns are often shown to make a more complete presentation. Where there is an accrued expenditure limitation there are additional entries to show the relation of costs to accrued expenditures and the relation of accrued expenditures to obligations. The financing section of a cost-type budget schedule is the same as for any other schedule.

The relation of costs to obligations is summarized in one or two lines on this schedule, but is amplified further in an additional table inserted in the narrative statement which follows. A typical table is as follows:

	1958 actual	*1959 actual*	*1960 estimate*	*1961 estimate*
Selected resources at end of year:				
Inventories and items on order:				
Stores (goods unconsumed by projects)		$1,535,699		
Unpaid undelivered orders (appropriation balances obligated for goods and services on order not yet received)	$23,738,918	5,550,525	$7,086,224	$7,086,224
Total selected resources at end of year	23,738,918	7,086,224	7,086,224	7,086,224
Selected resources at start of year (−)		−23,738,918	−7,086,224	−7,086,224
Adjustment of prior year costs and selected resources reported at start of year		512,836		
Costs financed from obligations of other years, net (−)		−16,139,858		

NARRATIVE STATEMENT OF PROGRAM AND PERFORMANCE

The work planned and services proposed to be carried out are described briefly in a narrative statement for each appropriation or fund. Where practicable the narrative statement indicates the expected accomplishment in relation to the financial estimates, and it gives some measures of program and performance. Numbers and program headings in the statements agree with the categories in the statement of program by activities.

SCHEDULE OF OBJECT CLASSIFICATION

There is shown for each account a summary of personal services and a classification of obligations, costs, or accrued expenditures according to a uniform list of objects.

The object classes, 01 to 16, reflect the nature of the things or services purchased, regardless of the purpose or the nature of the program for which they are used.

Permanent positions are those of a full-time nature which are of indefinite duration. Some are filled by persons with temporary appointments. The "number of employees at end of year" represents the number of (*a*) full-time and regularly scheduled part-time employees in

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

pay status on the last work day in June, and (*b*) intermittent employees who work at any time during June. This is the basis for reports of the Civil Service Commission.

Object Classification

	1959 actual	1960 estimate	1961 estimate
Total number of permanent positions	23	15	35
Full-time equivalent of all other positions			
Average number of all employees	15	15	30
Number of employees at end of year	15	15	35
Average GS grade and salary	8.0 $6,172	8.1 $6,278	8.1 $6,321
01 Personal services:			
Permanent positions	$102,801	$112,900	$211,800
Positions other than permanent			
Other personal services	4,083	4,400	6,700
Total personal services	106,884	117,300	218,500
02 Travel	35,211	32,000	42,200
03 Transportation of things	59,666	108,600	114,500
04 Communication services	6		
05 Rents and utility services	6,149		4,200
06 Printing and reproduction			
07 Other contractual services	88,821	481,900	263,000
Services performed by other agencies			
08 Supplies and materials	43,816	109,200	104,600
09 Equipment	231,456	1,696,300	4,173,300
10 Lands and structures	146,307	358,900	371,900
11 Grants, subsidies, and contributions	6,403	7,800	14,100
12 Pensions, annuities, and insurance claims			
13 Refunds, awards, and indemnities			
14 Interest			
15 Taxes and assessments	11		
16 Investments and loans			
Total obligations	724,740	2,912,000	5,306,300

Average grades and salaries are computed arithmetically. Thus the average salary sometimes falls outside the salary range of the average grade.

STATEMENT OF SOURCES AND APPLICATION OF FUNDS

For all revolving funds, there is shown a presentation of funds applied and provided, other than the investment of Government capital in the fund, net borrowings, and the repayment of capital and dividends.

The statement generally reflects receipts and expenditures on an accrual basis; an adjustment is made for changes in selected working capital (current assets, other than cash and inventories for sale or manufacture, less current liabilities) in either section of the statement as appropriate. Because of such an adjustment, the gross expenditures shown on the statement, less the receipts from operations, equal budget expenditures on a checks-issued basis, as in the following example:

Sources and Application of Funds (Operations)

	1959 actual	1960 estimate	1961 estimate
Gross expenditures (funds applied):			
Acquisition of equipment	$44,082	$42,500	$22,000
Expense, excluding depreciation	506,601	521,500	543,000
Increase in selected working capital	3,054		
Total gross expenditures	553,737	564,000	565,000
Receipts from operations (funds provided):			
Revenue	517,021	550,000	555,000
Budget expenditures	36,716	14,000	10,000

Because the statement is built on the basis of transactions which affect working capital, it excludes depreciation, losses on loans, and other "nonfund" transactions.

STATEMENT OF REVENUE, EXPENSE, AND RETAINED EARNINGS

For revolving funds there is also presented a statement of revenue and expense, computed on an accrual basis, and the resulting net income or loss for the year. This statement is usually on a full accrual basis, including sums for depreciation, provisions for losses on receivables, etc. Where a fund consists of several programs, revenue and expense may be identified for each; otherwise they are shown only for the fund as a whole, as here illustrated:

Revenue, Expense, and Retained Earnings

Revenue	$517,021	$550,000	$555,000
Expense	518,396	535,000	559,000
Net income or loss (−) for the year	−1,375	15,000	−4,000
Retained earnings, beginning of year	177,190	175,815	190,815
Retained earnings, end of year	175,815	190,815	186,815

The statement includes an analysis of the retained earnings or the cumulative deficit. This analysis shows any additions to earnings, other than net income for the year, any charges made against retained earnings, and the balance of profits kept in the enterprise as of the end of the year (whether in the form of cash, inventories, other current assets, or fixed assets).

STATEMENT OF FINANCIAL CONDITION

For each revolving fund there is presented a balance sheet of assets, liabilities, and investment of the Government at the close of the year, as in this example:

Financial Condition

Assets:			
Cash with Treasury	$71,587	$57,587	$47,587
Accounts receivable, net	7,981	7,981	7,981
Supplies	11,362	11,362	11,362
Equipment, net	121,001	150,001	156,001
Total assets	211,931	226,931	222,931
Liabilities:			
Current	33,331	33,331	33,331
Government investment:			
Non-interest-bearing capital: Start and end of year	2,785	2,785	2,785
Retained earnings	175,815	190,815	186,815
Total Government investment	178,600	193,600	189,600

The balance sheet excludes balances of appropriations or borrowing authorizations which have not yet been paid into the revolving fund. The section on investment of the Government is divided into three subsections as appropriate: (*a*) interest-bearing capital, (*b*) non-interest-bearing capital, and (*c*) retained earnings.

Because the balance sheet is on an accrual basis, it does not reflect the obligations incurred which have not yet matured into liabilities, nor does it reflect unfilled customer orders received and available as a basis for obligation in the case of intragovernmental revolving funds. Therefore, there is appended to the balance sheet a schedule which shows the unobligated balances, relating them to the unexpended balances and showing the computation of the net obligated balance as in the following example:

Status of Certain Fund Balances

	1958 actual	1959 actual	1960 estimate	1961 estimate
Unexpended balance: Cash with Treasury	$108,304	$71,587	$57,587	$47,587
Obligated balance, net:				
Current liabilities	36,230	33,331	33,331	33,331
Unpaid undelivered orders	14,808	5,550	5,550	5,550
Accounts receivable, net (−)	−9,620	−7,981	−7,981	−7,981
Total obligated balance	41,418	30,900	30,900	30,900
Unobligated balance	66,886	40,687	26,687	16,687

[ADMINISTRATIVE PROVISIONS]

[Effective July 1, 1959, the table contained in section 4(f) of the Federal Employees' Salary Increase Act of 1955 (Public Law 94, Eighty-fourth Congress, approved June 28, 1955) is amended by striking out the last line therein and inserting in lieu thereof the following:

13,000,000 but less than 15,000,000 ..... 28, 740
15,000,000 but less than 17,000,000 ..... 31, 740
17,000,000 or more ..... 34, 740]

[The third paragraph under the heading "Administrative Provisions" in the appropriations for the Senate in the Legislative Branch Appropriation Act, 1959 (2 U.S.C. 43b), is amended by striking out "from Washington, District of Columbia, to their resident cities in their home States, and return, for not to exceed two such round trips" and inserting in lieu thereof the following: "between Washington, District of Columbia, and any point in their home States, for not to exceed two round trips".] (*Legislative Branch Appropriation Act, 1960.*)

[The Secretary of the Senate may hereafter fix the compensation of the assistant parliamentarian, the legislative clerk, and the journal clerk at not to exceed $7,620 basic per annum each.]

[(a) The second proviso in the paragraph relating to the authority of Senators to rearrange the basic salaries of employees in their respective offices which appears in the Legislative Branch Appropriation Act, 1947, as amended (2 U.S.C. 60f), is amended to read as follows: "*Provided further*, That no salary shall be fixed under this section at a basic rate of more than $5,100 per annum, except that (1) the salary of one employee may be fixed at a basic rate of not more than $8,040 per annum, (2) the salary of one employee may be fixed at a basic rate of not more than $8,460 per annum, and (3) the salary of one employee may be fixed at a basic rate of not more than $8,880 per annum".]

[(b) Such paragraph is further amended by adding at the end thereof a new sentence as follows: "A Senator may establish such titles for positions in his office as he may desire to designate, by written notification to the disbursing office of the Senate."]

[(c) The first paragraph under the heading "Administrative Provisions" in the appropriations for the Senate in the Legislative Branch Appropriation Act, 1957 (2 U.S.C. 60f–1) is repealed.] (*Supplemental Appropriation Act, 1960.*)

[NEW EDITION OF THE UNITED STATES CODE]

[For preparation of a new edition of the United States Code, $150,000, to remain available until expended.] (*Legislative Branch Appropriation Act, 1960.*)

Appropriated 1960, **$150,000**

[NORTH ATLANTIC TREATY PARLIAMENTARY CONFERENCE FOR 1959]

[For salaries and expenses necessary for the annual meeting of the North Atlantic Treaty Parliamentary Conference for 1959 to be held in Washington, District of Columbia, as authorized by section 702 of the Mutual Security Act of 1959, $80,000, to be disbursed by the Clerk of the House.] (*Supplemental Appropriation Act, 1960.*)

Appropriated 1960, **$80,000**

ADMINISTRATIVE PROVISIONS

Salaries or wages paid out of the items herein for the House of Representatives shall hereafter be computed at basic rates, plus increased and additional compensation, as authorized and provided by law.

[Effective July 1, 1959, the position of "Administrative assistant to Clerk (retirement)" under the office of the Clerk of the House shall be transferred to the Office of the Sergeant at Arms and shall be redesignated as "Special assistant (retirement)".] (*Legislative Branch Appropriation Act, 1960.*)

CAPITOL POLICE

GENERAL EXPENSES

For purchasing and supplying uniforms; the purchase, maintenance, and repair of police motor vehicles, including two-way police radio equipment; contingent expenses, including $25 per month for extra services performed for the Capitol Police Board by such member of the staff of the Sergeant at Arms of the Senate or the House, as may be designated by the Chairman of the Board; $36,700. (*Legislative Branch Appropriation Act, 1960.*)

Appropriated 1960, **$36,700** Estimate 1961, **$36,700**

CAPITOL POLICE BOARD

To enable the Capitol Police Board to provide additional protection for the Capitol Buildings and Grounds, including the Senate and House Office Buildings and the Capitol Power Plant, [$106,435] *$106,075*. Such sum shall be expended only for payment of salaries and other expenses of personnel detailed from the Metropolitan Police of the District of Columbia, and the Commissioners of the District of Columbia are authorized and directed to make such details upon the request of the Board. Personnel so detailed shall, during the period of such detail, serve under the direction and instructions of the Board and are authorized to exercise the same authority as members of such Metropolitan Police and members of the Capitol Police and to perform such other duties as may be assigned by the Board. Reimbursement for salaries and other expenses of such detail personnel shall be made to the government of the District of Columbia, and any sums so reimbursed shall be credited to the appropriation or appropriations from which such salaries and expenses are payable and shall be available for all the purposes thereof: *Provided*, That any person detailed under the authority of this paragraph or under similar authority in the Legislative Branch Appropriation Act, 1942, and the Second Deficiency Appropriation Act, 1940, from the Metropolitan Police of the District of Columbia shall be deemed a member of such Metropolitan Police during the period or periods of any such detail for all purposes of rank, pay, allowances, privileges, and benefits to the same extent as though such detail had not been made, and at the termination thereof any such person who was a member of such police on July 1, 1940, shall have a status with respect to rank, pay, allowances, privileges, and benefits which is not less than the status of such person in such police at the end of such detail: *Provided further*, That the Commissioners of the District of Columbia are directed to pay the lieutenant detailed under the authority of this paragraph the same salary as that paid in fiscal year 1955 plus $625 and such increase in basic compensation as may be subsequently provided by law so long as this position is held by the present incumbent and that the Commissioners of the District of Columbia are directed to pay the deputy chief detailed under the authority of this paragraph the same salary as that paid in fiscal year 1959 plus $600 and such increases in basic compensation as may be subsequently provided by law so long as this position is held by the present incumbent. (*Legislative Branch Appropriation Act, 1960.*)

Appropriated 1960, **$106,435** Estimate 1961, **$106,075**

The foregoing amounts under "Capitol Police" shall be disbursed by the Clerk of the House. (*Legislative Branch Appropriation Act, 1960.*)

[JOINT COMMITTEE ON REDUCTION OF NONESSENTIAL FEDERAL EXPENDITURES]

[For an amount to enable the Joint Committee on Reduction of Nonessential Federal Expenditures to carry out the duties imposed upon it by section 601 of the Revenue Act of 1941 (55 Stat. 726), to remain available during the existence of the committee, $24,795, to be disbursed by the Secretary of the Senate.] (*Legislative Branch Appropriation Act, 1960.*)

Appropriated 1960, **$24,795**

EDUCATION OF SENATE AND HOUSE PAGES

For education of congressional pages and pages of the Supreme Court, pursuant to section 243 of the Legislative Reorganization Act, 1946, [$62,500] *$64,100*, which amount shall be advanced and credited to the applicable appropriation of the District of Columbia, and the Board of Education of the District of Columbia is hereby authorized to employ such personnel for the education of pages as may be required and to pay compensation for such services in accordance with such rates of compensation as the Board of Education may prescribe. (*Legislative Branch Appropriation Act, 1960.*)

Appropriated 1960, **$62,500** Estimate 1961, **$64,100**

PENALTY MAIL COSTS

For expenses necessary under section 2 of Public Law 286, Eighty-third Congress, [$2,691,000] *$3,690,000*, to be available immediately. (*Legislative Branch Appropriation Act, 1960.*)

Appropriated 1960, **$2,691,000** Estimate 1961, **$3,690,000**

LIBRARY OF CONGRESS

The Library of Congress, established in 1800, is not only the library of the Congress itself, but is also the principal general library of the Government of the United States. Its collections are comprehensive and varied, and include outstanding collections of books, periodicals, newspapers, documents of the national governments of the world, literature in the oriental languages, etc., and manuscripts, maps, music, motion picture films, sound recordings, prints, and photographs. In addition to maintenance of the collections and the rendering of the general and basic services connected therewith, including the Legislative Reference Service, certain specialized functions are performed; registration of copyrights, catalog card distribution, and the service of books in raised characters and talking books to the blind. In terms of these broad fields of activity comparative obligations (including only those chargeable to annual appropriations) for 1959 and estimated 1960 and 1961 are:

	1959 actual	*1960 estimate*	*1961 estimate*
General and basic services:			
Acquisition of library materials	$1,188,489	$1,238,785	$1,364,780
Organization of the collections	2,615,106	2,789,781	2,822,225
Reader and reference services	1,709,199	1,930,604	2,053,402
Maintenance and protective services	958,240	991,145	1,010,027
Executive direction and general administrative services	858,972	890,248	909,066
Total general and basic services	7,330,006	7,840,563	8,159,500
Special service to the Congress: Legislative Reference Service	1,386,255	1,455,400	1,660,200
Specialized services:			
Copyright	1,396,881	1,450,000	1,486,800
Catalog card distribution service	1,878,526	1,981,300	2,012,700
Books for the blind	1,364,757	1,619,400	1,718,200
Total specialized services	4,640,164	5,050,700	5,217,700
Total obligations	13,356,425	14,346,663	15,037,400

The Library's first obligation is to the Congress; the second, to other agencies of the Government; and the third, to other libraries, scholars, investigators, and the general public.

In addition to funds appropriated annually by Congress, there are also available a number of gift and trust funds, working funds, and allocations.

Estimates for the physical equipment, maintenance, and operation of the Library buildings are carried under the request of the Architect of the Capitol.

Current authorizations:

SALARIES AND EXPENSES

For necessary expenses of the Library of Congress, not otherwise provided for, including development and maintenance of the Union Catalogs; custody, care, and maintenance of the Library Buildings; special clothing; and expenses of the Library of Congress Trust Fund Board not properly chargeable to the income of any trust fund held by the Board; [$7,159,890] *$7,417,700. (2 U.S.C. 131–166; 5 U.S.C. 150; 17 U.S.C. 1–215; 20 U.S.C. 91; Legislative Branch Appropriation Act, 1960.)*

Appropriated 1960, **$7,159,890** Estimate 1961, **$7,417,700**

Program and Financing

Financing:			
Unobligated balance no longer available	$1,323		
Appropriation (new obligational authority)	6,748,300	$7,159,890	$7,417,700

Personal services and incidental expenses for basic operations are financed from this appropriation.

1. *Acquisition of library materials.*—The development of the Library's collections is planned; materials are procured by purchase, gift, exchange, copyright deposit, transfer and official deposit; and materials are selected for addition to the permanent collections. The objective for 1961 is: continued improvement in acquisitions procedures and in exchange relations with institutions in the more important areas of the world. The collections totaled 38,123,182 items as of June 30, 1959, and consisted of 11,779,894 books and pamphlets, 16,185,209 manuscript pieces, and 10,158,079 maps, pieces of music, reels of microfilm, photographs, and other miscellaneous items. Of the items received, about 1 million are added to the permanent collections annually. Those received from various sources in 1959 and estimated for 1960 and 1961 are as follows:

Description	*1959 actual*	*1960 estimate*	*1961 estimate*
Purchase	526,713	550,000	650,000
Deposit by virtue of law:			
Copyright	378,140	380,000	385,000
Other	794,802	800,000	800,000
Transfer from Federal agencies	1,727,320	2,000,000	2,250,000
Official donation from State and local agencies	121,040	125,000	130,000
Exchange	509,460	550,000	600,000
Gift from individual and unofficial sources	1,221,861	1,300,000	1,300,000
Total	5,279,336	5,705,000	6,115,000

2. *Organization of the collections.*—Library materials are cataloged, classified, marked and arranged; Library of Congress catalogs and the main National Union Catalog (card catalog) are maintained; special collections are organized for use; and binding operations are controlled. The objectives for this activity in 1961 are the cataloging of a larger number of the materials received during the year particularly those in oriental languages; handling receipts of special materials and organizing them for use on a current basis; and improved cataloging methods and procedures to assure the usefulness of the collections.

Selected performance data for 1959 and estimated for 1960 and 1961 (not including processing activities performed by the Reference Department and the Law Library) are as follows:

Description	*1959 actual*	*1960 estimate*	*1961 estimate*
Volumes fully cataloged and added to the classified collections	151,467	155,000	160,000
Items otherwise organized for use (without full cataloging)	26,866	30,000	35,000
Cards filed in catalogs	1,502,890	1,550,000	1,600,000
Volumes bound	92,912	97,000	97,000
Items repaired, cleaned, mounted, etc	233,021	250,000	250,000
Cards received by the National Union Catalog	1,236,988	1,250,000	1,300,000
Serial parts processed	1,654,786	1,700,000	1,800,000

3. *Reader and reference services.*—Books and other library materials are provided inside and outside of the Library, reference and bibliographic assistance is rendered, and custody of the collections is maintained. The objectives of this activity for 1961 are to provide reference and bibliographic services on scientific and technological reports; to provide more adequate access to special collections; to improve the loan service to Congress; and to maintain adequate reference service in the reading rooms.

LIBRARY OF CONGRESS—Continued

Current authorizations—Continued

SALARIES AND EXPENSES—Continued

The workload in all major activities is expected to increase in 1960 and 1961 as follows:

Description	*1959 actual*	*1960 estimate*	*1961 estimate*
Reader and reference services:			
Materials served	1,757,236	1,820,000	1,820,000
Units issued on loan	217,931	225,000	230,000
Reference inquiries answered in person	306,464	325,000	325,000
Reference requests by telephone	189,758	210,000	210,000
Reference letters	83,614	90,000	90,000
Law Library reader and reference services:			
Books and pamphlets served	312,728	350,000	360,000
Reference inquiries answered	81,699	80,000	84,000

4. *Maintenance and protective services.*—A staff of 195, including 82 part-time charwomen, preserves, cleans, and maintains the two Library buildings, collections, and grounds; operates telephone switchboards, elevators, check stands, and motor vehicles; procures and maintains furniture, office supplies, housekeeping materials, and miscellaneous equipment; assigns space; and operates the receiving and stockrooms. The guard force staff of 76 is necessary to prevent fire and theft, to maintain order, and to provide regular inspections of all areas in both buildings in which is assembled one of the greatest accumulations of national treasures in the world.

Financing:			
Unobligated balance no longer available	$375		
Appropriation (new obligational authority)	1,397,256	$1,450,000	$1,486,800

The Copyright Office is responsible for recording copyright claims, assignments, and renewals, for supplying copyright information to the public, for collecting and accounting for copyright fees, and for printing complete and indexed catalogs for each class of copyright entries. The office is conducted as a business operation. The amount requested for personal services is substantially counterbalanced by fees received and deposited in miscellaneous receipts of the Treasury. In addition, the value of books and other library materials deposited in accordance with the Copyright Act and transferred to the Library of Congress is credited to the copyright operation. The income and costs for 1959 and estimates for 1960 and 1961 are as follows:

	1959 actual	*1960 estimate*	*1961 estimate*
Income:			
Fees applied	$979,941	$1,004,439	$1,028,937
Estimated value of materials deposited	548,169	561,873	575,577
Total income	1,528,110	1,566,312	1,604,514
Costs:			
Salaries	1,226,871	1,283,293	1,296,893
Other costs	170,010	166,707	189,907
Total costs	1,396,881	1,450,000	1,486,800

The program and performance under each of the activities described are predicated on an estimated 253,821 copyright registrations during 1961, an estimated 247,778 during 1960, and an actual 241,735 during 1959.

1. *Receiving and accounting for applications, etc.*—Materials received by the Copyright Office are assembled and routed; accounts are maintained for all moneys received; records relating to the registration of copyrights are filed; and materials are deposited in accordance with the Copyright Act. Performance data for 1959 and estimates for 1960 and 1961 are as follows:

	1959 actual	*1960 estimate*	*1961 estimate*
Registrations	241,735	247,778	253,821
Mail received and dispatched	563,577	577,666	591,755

2. *Examining copyright applications.*—All applications and deposits are examined before issuance of registration certificates or recording of documents to determine whether the provisions of the Copyright Act have been satisfied. Performance data are as follows:

	1959 actual	*1960 estimate*	*1961 estimate*
Cases and documents examined	311,135	318,913	326,691
Registrations and recordation of documents	250,769	257,038	263,307

3. *Indexing and cataloging materials received.*—The Register of Copyrights is required to print complete and indexed catalogs of all items registered. The catalog entries prepared by the Copyright Office are made available in part to the Library for its general operations. There were 241,735 registrations cataloged in 1959 and estimates for 1960 and 1961 are 247,778 and 253,821, respectively.

4. *Reference services.*—The Copyright Office makes available to the public, information concerning the provisions of the Copyright Act, including procedures, policies, and rulings; information concerning registrations is furnished on a fee basis. Obtaining compliance with registration requirements is also part of this activity. Performance data are as follows:

	1959 actual	*1960 estimate*	*1961 estimate*
Titles searched	55,443	56,829	58,215
Letters and search reports written	25,004	25,629	26,254

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

5. *Printing the catalog of copyright entries and bulletins of decisions.*—Catalogs for each class of copyright entries and bulletins of copyright decisions are printed and made available to the public.

6. *General supervision and legal services.*—The work of the Copyright Office includes legal services relating to the status and improvement of copyright law in its foreign as well as domestic aspects.

The Legislative Reference Service prepares research reports, digests, etc., and supplies information in answer to inquiries from Members and committees of Congress.

1. *Research and analysis.*—The Legislative Reorganization Act of 1946 lists 19 specific fields of congressional concern in which top-level research by senior specialists is authorized. These fields correspond in general to the areas of committee responsibility. The following 14 fields are now covered by one or more senior specialists: International trade, international affairs, taxation and fiscal policy, American government and public administration, conservation, American public law, labor, engineering and public works, agriculture, price economics, national defense, social welfare, science and technology, and transportation and communications. The senior specialists provide authoritative research and consultative services. In addition, the services of six subject matter divisions, upon request, furnish to Members and committees information on or analysis of public affairs problems in report form or otherwise, charts, translations, and bibliographies, and answers to spot reference questions. In 1959, 76,857 congressional inquiries were answered, an increase of 13.3% over the number answered in 1958. Since 1950, the average annual increase in the number of inquiries has been 7.2%. The number of inquiries in 1960 is estimated at 82,500, and in 1961, 88,500.

2. *Preparation of indexes and digests.*—The Digest of Public General Bills covers all public bills and resolutions. It is expected that there will be about the same number of bills to be digested during the 1st session of the 87th Congress as were digested for the 1st session of the 86th Congress. The preparation of indexes for an increasing number of committee hearings is anticipated.

3. *Reference files, bibliographic and congressional reader services.*—Reference files, containing clippings, pamphlets and documents, are maintained as the basis for reply to the majority of inquiries; researchers are supplied with bibliographic and reference tools; selective and comprehensive bibliographies are prepared for Members and committees of Congress; and reader services are provided by the congressional reading room. During 1959, 92,589 reference file items were processed, 14,671 bibliographic citations prepared, 72,716 published items acquired and processed, and 3,178 readers served.

The card division sells copies of the Library's printed catalog cards and publications. It maintains a stock of over 140,000,000 catalog cards representing some 3,300,000 titles, and fills orders from approximately 10,000 regular subscribers—mostly libraries—in the United States and abroad. In 1959, 103% of this appropriation was recovered in the form of receipts from card and publication sales. Receipts of $1,936,010 were deposited in miscellaneous receipts of the Treasury in 1959. The objectives for 1961 are: Meeting the increased demand for catalog cards and maintaining a reasonable level of service and economy; the continued expansion of the National Union Catalog and the printing of cards for books in Chinese, Japanese, and Korean.

1. *Supplying cards for the Library of Congress.*—The number of cards supplied to the Library of Congress in 1959 was 4,682,699; estimated for 1960, 4,777,000; and for 1961, 4,872,000.

2. *Supplying cards for other libraries.*—The number of cards sold in 1959 was 30,093,915; estimated for 1960, 31,000,000; and for 1961, 31,000,000.

3. *Preparation, printing, and distribution of publications related to cataloging.*—These publications are an integral part of the cataloging activities of the Library of Congress and include the Classification Schedules, lists of Subject Headings, Rules for Descriptive Cataloging, Cataloging Service Bulletins, and similar publications.

4. *Preparation, printing, and distribution of the National Union Catalog.*—This catalog (a cumulative author list) is issued monthly and cumulated quarterly and annually. Subscribers also receive issues of Motion Pictures and Filmstrips (quarterlies with annual cumulation), and Music and Phonorecords (issued on a 6-month basis and annual cumulation). There were 1,017 paid subscriptions for all issues in calendar year 1958, and it is estimated that there will be 1,035 subscriptions for 1959 and 1,050 for 1960. Included under this activity is the National Library of Medicine Catalog.

5. *Preparation, printing, and distribution of the Subject Catalog.*—This catalog is issued in three quarterly volumes with an annual cumulation. There were 409 paid subscriptions for calendar year 1958. It is estimated that there will be 403 paid subscriptions in 1959 and about 415 in 1960.

INCREASE OF THE LIBRARY OF CONGRESS

GENERAL INCREASE OF THE LIBRARY

For necessary expenses (except personal services) for acquisition of books, periodicals, and newspapers, and all other material for the increase of the Library, [$350,000] *$450,000*, to continue available during the next succeeding fiscal year. (*2 U.S.C. 131, 132, 132a; Legislative Branch Appropriation Act, 1960.*)

Appropriated 1960, **$350,000** Estimate 1961, **$450,000**

Program and Financing

	1959 actual	1960 estimate	1961 estimate
Program by activities:			
Purchase of books and other library materials (total obligations)	$320,048	$354,004	$450,000
Financing:			
Unobligated balance brought forward	−4,052	−4,004	
Unobligated balance carried forward	4,004		
Appropriation (new obligational authority)	320,000	350,000	450,000

This appropriation constitutes the only means of acquiring regular domestic trade publications (except for copyright deposits) and many foreign trade publications, both current and noncurrent, from approximately 100 countries or areas. The publications acquired by purchase constitute a most important part of the Library's acquisitions although they represent only a small portion of the material received annually. The objectives for 1961 are: to continue the acquisition of selected important foreign newspapers and periodicals; to increase the acquisition of important materials from critical areas, particularly from Eastern Europe, Africa, and the Orient, and the procurement of other important research materials to strengthen the Library's collections; to increase the acquisition of materials in the fields of science and technology; to continue the purchase of selected current titles on microfilm as an economy measure in lieu of binding; and to continue the microfilming of deteriorating materials as a necessary preservative measure.

Appropriation (new obligational authority)	1,367,900	1,619,400	1,718,200

The division for the blind is responsible for administering a national program to provide reading material for the blind of the United States and its possessions. It has two closely related operations.

1. *Procurement and distribution.*—It provides books in embossed characters, and talking books with their associated reproducers. The books are distributed through 30 regional libraries which assume responsibility for their custody and circulation. The reproducers are distributed through 55 State agencies. The maintenance and procurement of these books are shown in the following table:

Description	*1959 actual*	*1960 estimate*	*1961 estimate*
Talking books purchased:			
(*a*) New titles	259	301	313
(*b*) Old titles re-recorded	29	32	30
Embossed books and magazines:			
(*a*) Press braille, made to order, titles	99	236	246
(*b*) Purchased from catalog, ready-made titles	106	------	------
Talking book machines:			
Purchased	8,900	10,175	11,250
Repaired	9,976	9,405	9,000
Salvaged—scrapped	1,707	4,500	6,000
Records replaced	24,363	20,000	15,000

Objectives for 1961 include the procurement of more titles of books, of more copies of the popular titles, of a sufficient number of machines to equip newly registered blind readers and to replace scrapped machines, and continuation of the quality inspection program on machines and of research in sound reproduction.

2. *Cataloging, reference, circulation, and training services.*—Catalogs of talking and braille books are prepared and maintained, including a Union Catalog of Hand Copied Books in Braille which brings together a record of holdings of all libraries. The division also maintains a unique collection (about 26,000 volumes) of books in braille not available elsewhere for loan in the United States. During the period 1946 to 1958 the number of readers throughout the country requiring catalogs from which to select reading matter has grown from 30,088 to 58,931 and circulation from 801,797 units (volumes or containers) to 1,650,767. The number of readers and circulation are expected to continue to increase in 1960 and 1961. Inquiries are received concerning library and related services available to the blind. Individuals throughout the Nation who are interested in transcribing or proofreading braille are trained and those qualified are certified. During 1959, 573 individuals were certified as compared to 477 in 1958, and it is anticipated that this increase will continue during 1960 and 1961.

Appropriation (new obligational authority)	106,800	106,800	106,800

Under this appropriation, the papers of the Presidents of the United States in the collections of the Library of Congress are arranged, indexed, and microfilmed. The purpose is to preserve their contents and to make them more readily available for research. The program was started in 1959 with an appropriation of $106,800 out of the total authorization of $720,000. Completion of the entire program is contemplated in another 5 years. The objectives for the third year will be to provide negative and positive service copy on microfilm of material arranged and indexed, and to commence publishing indexes by photo-offset in editions of 1,000 copies each.

Appropriation (new obligational authority)	60,000	60,000	60,000

For 1959, the amount of $60,000 was appropriated to enable the Librarian of Congress to provide for the conversion to safety base film of the George Kleine collection of nitrate film, and the paper prints of early American motion pictures now in the custody of the Library.

During 1959, approximately 120,600 feet of paper prints were converted and 239,000 feet of nitrate film in the George Kleine collection were converted to safety base film.

It is anticipated that with the $60,000 appropriated for 1960, an additional 120,400 feet of paper prints will be converted, as well as the remainder of the Kleine collection.

The $60,000 requested for 1961 will allow for the conversion of an additional 135,700 feet of paper prints.

Program and Financing

	1959 actual	1960 estimate	1961 estimate
Program by activities:			
1. Acquisition of books and other library materials			$1,780,000
2. Cataloging of materials			273,200
3. Operation of centers			613,000
4. Program support (U.S. dollars)			145,200
Total obligations			2,811,400
Financing:			
Appropriation (new obligational authority)			2,811,400

Section 104(n) of the Agricultural Trade Development and Assistance Act of 1954 (established by Public Law 85–931, approved Sept. 6, 1958) authorizes the Librarian of Congress to use foreign currencies accruing under this act to provide information of technical, scientific, cultural, or educational significance to the United States through the collection of foreign library materials and the distribution of copies thereof to libraries and research centers in the United States. In 1961 this program will be initiated in eight countries: China (Taiwan), Egypt, India, Israel, Pakistan, Poland, Spain, and Yugoslavia. Of the total amount requested, $2,666,200 will be used to purchase foreign currencies, while $145,200 will provide U.S. dollar support.

1. *Acquisition of books and other library materials.*—Exploration and survey teams, comprised of specialists in the various subject and geographic areas concerned, will be sent to each of the countries to lay the groundwork for the program. Based upon the information received concerning materials available in these countries and the requirements of other Federal agencies and certain research libraries in the United States, publications and other library materials will be purchased in multiple copies. It is anticipated that in Spain and China (Taiwan) the acquisition program will be accomplished through contracts with local institutions.

2. *Cataloging of materials.*—The materials acquired will be cataloged in Egypt, India, Israel, Poland, and Yugoslavia. Work in Poland and Yugoslavia will be accomplished under contract with local institutions.

3. *Operation of centers.*—In six of the eight countries, centers staffed with foreign nationals will be set up to handle the acquisition, cataloging, microfilming, etc. It will also be necessary to establish microfilm processing laboratories in India and Israel.

4. *Program support (U.S. dollars).*—U.S. dollars are required to pay certain expenses which cannot be paid by foreign currencies, such as salaries of U.S. personnel abroad, salaries of the coordinating staff at the Library of Congress, travel in some instances, and certain equipment which must necessarily be purchased in this country for shipment overseas.

Administrative Provisions

Appropriations in this Act available to the Library of Congress for salaries shall be available for expenses of investigating the loyalty of Library employees; special and temporary services (including employees engaged by the day or hour or in piecework); and services as authorized by section 15 of the Act of August 2, 1946 (5 U.S.C. 55a).

Not to exceed ten positions in the Library of Congress may be exempt from the provisions of appropriation Acts concerning the employment of aliens during the current fiscal year, but the Librarian shall not make any appointment to any such position until he has ascertained that he cannot secure for such appointments a person in any of the categories specified in such provisions who possesses the special qualifications for the particular position and also otherwise meets the general requirements for employment in the Library of Congress. (*Legislative Branch Appropriation Act, 1960.*)

Allocations Received From Other Accounts

Note.—Obligations incurred under allocations from other accounts are included in the schedule of the parent appropriation as follows:
"Research, development, test, and evaluation, Air Force."
"Research, development, test, and evaluation, Navy."
"International educational exchange activities," Department of State.
"Operations, National Library of Medicine," Public Health Service, Department of Health, Education, and Welfare.

The work programs of the Office of the Superintendent of Documents are of a service nature, and hence there is no control over the volume of work which is required by law.

1. *Sales distribution.*—Government publications are purchased from the Public Printer to be placed on sale. Acquisition costs are paid from sales receipts; hence no appropriation is required for printing sales copies. By law, the sale price is set at the cost of manufacture plus 50%. At the end of each year, excess receipts from sales not required for purchasing additional publications are turned in to the Treasury Department as miscellaneous receipts. For 1959, earnings from the sale of publications amounted to $3,351,243. It is estimated that earnings for 1960 will be $3,575,000 and $3,800,000 for 1961. These earnings more than cover the appropriation required to finance the sales program.

The sale of Government publications has been steadily increasing, and in the last 10 years the sales volume has more than doubled. The current public interest in the Government's publishing program points to a continuing increase in the volume of sales.

2. *Distribution for other agencies and Members of Congress.*—The Superintendent of Documents maintains mailing lists, including the list for the Congressional Record, and performs mailing operations upon request of any Government agency. Mailing services for farmers' bulletins, soil surveys, and other publications which are allocated to Members of Congress on a quota basis are also provided.

3. *Depository library distribution.*—Upon request, 1 copy of every Government publication is supplied to each of more than 588 libraries which are designated depositories for Government publications.

4. *Cataloging and indexing.*—This activity covers the preparation and distribution of catalogs and indexes of all publications issued by the Federal Government, the principal series being the Monthly Catalog of the U.S. Government Publications and the Numerical List and Schedule of Volumes.

5. *Relation of costs to obligations.*—The year-end balances of unpaid undelivered orders are as follows: 1958, $8,532; 1959, $15,353; 1960, $15,353; 1961, $15,353.

Intragovernmental funds:

GOVERNMENT PRINTING OFFICE REVOLVING FUND

The Government Printing Office executes orders for printing, binding, and blankbook work placed by Congress and the various departments and independent establishments of the Federal Government, and furnishes blank paper, inks, and similar supplies. Operations are subject to the authority of the Joint Committee on Printing (44 U.S.C.).

A separate appropriation has been established for authorized printing and binding for the Congress; for printing, binding, and distribution of the Federal Register; and for printing and binding of Government publications authorized by law to be distributed without charge to the recipients (67 Stat. 330).

All work for Government agencies is done on a reimbursable basis and financed through the Government Printing Office revolving fund.

Receipts from sales of publications by the Superintendent of Documents are deposited to the revolving fund and costs of publications paid therefrom. All profits accruing from these transactions are deposited in the Treasury of the United States and credited to miscellaneous receipts (44 U.S.C. 63).

GENERAL PROVISIONS

SEC. 102. No part of the funds appropriated in this Act shall be used for the maintenance or care of private vehicles.

SEC. 103. Whenever any office or position not specifically established by the Legislative Pay Act of 1929 is appropriated for herein or whenever the rate of compensation or designation of any position appropriated for herein is different from that specifically established for such position by such Act, the rate of compensation and the designation of the position, or either, appropriated for or provided herein, shall be the permanent law with respect thereto: *Provided*, That the provisions herein for the various items of official expenses of Members, officers, and committees of the Senate and House, and clerk hire for Senators and Members shall be the permanent law with respect thereto: *Provided further*, That the provisions relating to positions and salaries thereof carried in H. Res. 428, 567, and 623 of the Eighty-fifth Congress and H. Res. 88, 89, 158, 197, 270, and 271 of the Eighty-sixth Congress shall be the permanent law with respect thereto.

SEC. 104. No part of any appropriation contained in this Act shall be paid as compensation to any person appointed after June 30, 1935, as an officer or member of the Capitol Police who does not meet the standards to be prescribed for such appointees by the Capitol Police Board: *Provided*, That the Capitol Police Board is hereby authorized to detail police from the House Office, Senate Office, and Capitol Buildings for police duty on the Capitol Grounds. (*Legislative Branch Appropriation Act, 1960.*)

This item is not subject to the approval of the Judicial Conference.

The U.S. Court of Customs and Patent Appeals has exclusive jurisdiction in appeals from judgments of the U.S. Customs Court in all cases involving the construction of the law and facts respecting the classification of merchandise and the rate of duty imposed thereunder and all appealable questions as to the laws and regulations governing the collection of customs revenues. Its decisions are final unless taken to the Supreme Court on writs of certiorari.

The Court also has exclusive jurisdiction of appeals from the Tariff Commission on questions of law only and in the matter of unfair practices in import trade, and appellate jurisdiction from decisions of the Patent Office in patent and trademark cases, except those involving equity.

CUSTOMS COURT—Continued

Current authorizations—Continued

SALARIES AND EXPENSES—Continued

The U.S. Customs Court has exclusive jurisdiction over civil actions arising under the tariff laws, the internal revenue laws relating to imported merchandise, the several customs simplification acts, the proclamations of the President issued under reciprocal trade agreements, and other proclamations imposing taxes or quotas on imported goods. The court also has appellate jurisdiction of cases litigating the value of imported merchandise. It tries cases without a jury, making findings of fact and applying the law.

The Court of Claims has jurisdiction of all cases involving claims against the United States (except in pension suits) instituted upon constitutional grounds or under Federal law or regulations, all claims arising out of any contract with the Federal Government and its agencies, and claims for the refund of taxes. It also has general jurisdiction to hear and determine claims for damages other than tort actions, provided the claimants would have the right to sue in law or equity if the United States were not immune to such suits. It has jurisdiction in suits against the United States by contractors dissatisfied with the findings and decisions of contracting agencies under terminated war contracts, and jurisdiction concurrent with that of the Courts of Appeals to review district court decisions in cases involving tort actions. It has exclusive jurisdiction to review the decisions of the Indian Claims Commission on appeal from the Commission. It also has jurisdiction in special act cases referred to the court by either or both Houses of Congress.

The court continues to carry a heavy load of cases and has been able to dispose of the cases which are ready to be heard as expeditiously as the Department of Justice can process them.

Salaries and related costs (total obligations)	$9,063,867	$9,128,000	$9,397,000
Financing:			
Unobligated balance no longer available	144,633		
New obligational authority	9,208,500	9,128,000	9,397,000
New obligational authority:			
Appropriation	$9,358,500	$9,128,000	$9,397,000
Transferred to—			
"Salaries of supporting personnel" (73 Stat. 46)	−67,900		
"Administrative Office of the United States Courts" (73 Stat. 58)	−82,100		
Appropriation (adjusted)	9,208,500	9,128,000	9,397,000

The statutory salaries and related costs of all active U.S. circuit and district judges, and all justices and judges who have retired or resigned in pursuance of law are payable from this appropriation. This item also includes the payment of annuities to surviving widows of Supreme Court justices. It is anticipated that the average number of judges on the rolls will continue to increase due primarily to the growing numbers of senior judges. Also the number of judgeship vacancies carried throughout 1959 has been reduced sharply because of recent confirmations of new appointees. A supplemental appropriation for 1960 is anticipated under Proposed for later transmission.

The primary and appellate jurisdiction of the courts of the United States are vested in the 94 district courts and 11 courts of appeals. Provision for the salaries of the administrative and legal aides required to assist the judges in the conduct of hearings, trials, and other judicial functions and to man the component offices of the courts including the Federal Probation System is made under this heading. The estimate for 1961 includes increases which will permit the addition of deputy clerks for the purposes of improving the processing of juries and expediting the calendaring of cases. Funds also are included for additional probation officers in an effort to further reduce the caseload per officer. Because of the amendment to section 752 of title 28, U.S. Code, by Public Law 86–221, approved September 1, 1959, providing that district judges may appoint necessary law clerks and secretaries subject to the limitation on their aggregate salaries stated in the language of this appropriation, the estimate for salaries of law clerks and secretaries to judges is prepared on the basis of an allotment per judge, within which judges may appoint such employees.

A supplemental appropriation for 1960 is anticipated under Proposed for later transmission.

Financing:			
Appropriation available in prior year	55,000		
Unobligated balance no longer available	103,531		
Appropriation (new obligational authority)	5,175,000	4,620,000	4,660,000

This appropriation provides for the statutory fees and allowances of jurors, fees of jury commissioners, and fees and related costs of U.S. commissioners, who serve primarily as committing magistrates.

The amount of service and the compensation of jurors depends largely on the number of jury trials requested by the parties to civil and criminal cases in the U.S. courts and to the administration of the jury system and the utilization of jurors. The earnings of commissioners are directly related to the volume of cases presented by Federal law-enforcement officials.

A supplemental appropriation for 1960 is anticipated, under Proposed for later transmission, to cover an increase in fees paid U.S. commissioners.

Object Classification

	1959 actual	1960 estimate	1961 estimate
01 Personal services: Fees, U.S. commissioners	$780,000	$780,000	$819,000

TRAVEL AND MISCELLANEOUS EXPENSES

For necessary travel and miscellaneous expenses, not otherwise provided for, incurred by the Judiciary, including the purchase of firearms and ammunition, *and* the cost of contract statistical services for the office of Register of Wills of the District of Columbia, [and not to exceed $1,000 for the payment of fees to attorneys appointed in accordance with the Act of June 8, 1938 (52 Stat. 625), not exceeding $25 in any one case, $3,250,000] *$4,215,000: Provided,* That this sum shall be available in an amount not to exceed $14,000 for expenses of attendance at meetings concerned with the work of Federal Probation when incurred on the written authorization of the Director of the Administrative Office of the United States Courts. *(5 U.S.C. 55a, 73b(2–3), 835–842; 18 U.S.C. 3656; 28 U.S.C. 456, 604, 639, 961, 962, 1915b; 48 U.S.C. 102, 114, 863, 1405y; 7 C.Z. Code 30; Judiciary Appropriation Act, 1960.)*

Appropriated 1960, **$3,250,000** Estimate 1961, **$4,215,000**

Program and Financing

	1959 actual	1960 estimate	1961 estimate
Program by activities:			
Travel and miscellaneous expenses:			
Direct obligations	$3,067,008	$3,250,000	$4,215,000
Reimbursable obligations	6,779	5,000	5,000
Total obligations	3,073,787	3,255,000	4,220,000
Financing:			
Advances and reimbursements from other accounts	−6,779	−5,000	−5,000
Unobligated balance no longer available	7,992		
Appropriation (new obligational authority)	3,075,000	3,250,000	4,215,000

Travel and subsistence expenses incurred by the judges, officials, and supporting personnel of the courts in attending sessions of court or transacting other official business are payable by the Government. Provision also is made for supplying, equipping, and maintaining their offices and libraries, and for the incidental expenses of operating the 11 courts of appeals and 94 district courts of the United States.

It is anticipated that there will be an increasing number of judges and staffs traveling to hold court at those places where the dockets are most congested. Also, there will be conducted additional seminars of judges concerning the improvement in judicial administration, uniformity in sentencing procedures, and other judicial matters. The estimate for 1961 includes funds for the purpose of introducing, with the approval of the courts, electronic recording of court proceedings and transcription therefrom. A supplemental appropriation for 1960 is anticipated under Proposed for later transmission.

This office is responsible, under the supervision and direction of the Judicial Conference of the United States, for providing for the administration of the U.S. courts. The principal functions consist of providing administrative staff and services for the courts; conducting a continuous study of rules of practice and procedure in the Federal courts and compiling data for committees of the Judicial Conference; examining the state of the dockets of the various courts and securing information as to the courts' need of assistance; compiling and publishing statistical information concerning the business transacted by the courts, administering the probation and bankruptcy systems as well as the judicial survivors annuity system under title 28, U.S. Code, section 376; and conducting the general business affairs of the courts.

The office in 1961 will continue its efforts to assist the courts with the enormous task of coping with the backlog of civil cases which has developed in many areas. Further studies of administrative procedures will be conducted and reports of findings and recommendations for improvement will be made to the Judicial Conference.

Salaries and Expenses of Referees

(Indefinite special fund)

For salaries and expenses of referees as authorized by the Act of June 28, 1946, as amended (11 U.S.C. 68, 102), not to exceed $5,630,000, to be derived from the Referees' salary and expense fund established in pursuance of said Act.

Estimate 1961, [a] **$5,630,000**

[a] Estimate is for activities previously carried under "Salaries of referees" and "Expenses of referees." The amounts obligated in 1959 and 1960 are shown in the schedule as comparative transfers.

Amounts Available for Appropriation

	1959 actual	1960 estimate	1961 estimate
Unappropriated balance at beginning of year:			
Salaries of referees	$4,159,608	$4,786,275	
Expenses of referees	1,882,972	1,813,917	
Salaries and expenses of referees			$7,093,692

COURTS OF APPEALS, DISTRICT COURTS, AND OTHER JUDICIAL SERVICES—Continued

Current authorizations—Continued

Salaries and Expenses of Referees—Continued

Public Law 86–110, approved July 28, 1959, consolidates, effective July 1, 1960, the Referees' salary fund and the Referees' expense fund into one fund to be known as the Referees' salary and expense fund. The appropriation also has been consolidated for 1961 to be consistent with the provisions of Public Law 86–110.

The district courts of the United States are constituted courts of bankruptcy, vested with original jurisdiction at law and in equity in proceedings brought under the bankruptcy statutes. This jurisdiction primarily is exercised through referees appointed by the several district courts. The salaries of referees, their clerical employees, and all miscellaneous expenses are paid from special funds created by payments of fees and charges by parties to the proceedings. The system is self-sustaining, and no appropriation from the general fund of the Treasury is required.

Increases in the number of referees, their clerical employees and expenses are requested for 1961 to cope with rising caseloads forecast for the current and ensuing years. Supplemental appropriations for Salaries of referees and Expenses of referees for 1960 are anticipated under Proposed for later transmission.

[Salaries of Referees]

(Indefinite special fund)

[For salaries of referees as authorized by the Act of June 28, 1946, as amended (11 U.S.C. 68), not to exceed $2,006,500, to be derived from the referees' salary fund established in pursuance of said Act.] (*Judiciary Appropriation Act, 1960.*)

Appropriated 1960, **$2,006,500**

Note.—Estimate for 1961 for activities previously carried under this title has been transferred in the estimates to "Salaries and expenses of referees." The amounts obligated in 1959 and 1960 are shown in the schedule as comparative transfers.

Program and Financing

	1959 actual	1960 estimate	1961 estimate
Financing:			
Comparative transfers to other accounts	$1,902,630	$2,006,500	
Appropriation (new obligational authority)	1,902,630	2,006,500	

[Expenses of Referees]

(Indefinite special fund)

[For miscellaneous expenses of referees, United States courts, including the salaries of their clerical assistants, travel, purchase of envelopes without regard to the Act of June 26, 1906 (34 Stat. 476), not to exceed $3,000,000, to be derived from the referees' expense fund established in pursuance of the Act of June 28, 1946, as amended (11 U.S.C. 68(c)(4)).] (*11 U.S.C. 102(a)(2); Judiciary Appropriation Act, 1960.*)

Appropriated 1960, **$3,000,000**

Note.—Estimate for 1961 for activities previously carried under this title has been transferred in the estimates to "Salaries and expenses of referees." The amounts obligated in 1959 and 1960 are shown in the schedule as comparative transfers.

Program and Financing

	1959 actual	1960 estimate	1961 estimate
Financing:			
Comparative transfers to other accounts	$2,829,830	$3,000,000	
Appropriation (new obligational authority)	2,829,830	3,000,000	

Proposed for later transmission:

Salaries of Judges

Program and Financing

	1959 actual	1960 estimate	1961 estimate
Program by activities:			
Salaries and related costs (total obligations)		$100,000	
Financing:			
Proposed supplemental appropriation		100,000	

Under existing legislation, 1960.—The amount appropriated for 1960 is sufficient to pay on the average the salaries and related costs of 383 circuit, district, senior, and resigned judges. Recent confirmations by the Congress of a number of judgeship appointments and a steady increase in the number of senior judges indicates that present funds are inadequate and it is estimated that an additional sum of $100,000 will be required to pay salaries.

Salaries of Supporting Personnel

Program and Financing

	1959 actual	1960 estimate	1961 estimate
Program by activities:			
Salaries and related costs (total obligations)		$320,000	
Financing:			
Proposed supplemental appropriation		320,000	

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

Under existing legislation, 1960.—The amendment to section 752 of title 28, U.S. Code, by Public Law 86–221, approved September 1, 1959, provides that district judges may appoint necessary law clerks and secretaries subject to the limitation on their aggregate salaries stated in the language of this appropriation. The estimate for salaries of law clerks and secretaries to judges for 1961 was prepared on the basis of an allotment per judge, within which judges may appoint such employees and includes a request for an additional sum of $961,400 for their salaries and related costs. It is anticipated that approximately $320,000 will be required in 1960 to provide judges with additional law clerks and secretaries for the last 4 months of the year.

Fees of Jurors and Commissioners

Program and Financing

	1959 actual	1960 estimate	1961 estimate
Program by activities:			
Fees, expenses, and costs (total obligations)		$20,000	
Financing:			
Proposed supplemental appropriation		20,000	

Under existing legislation, 1960.—A supplemental appropriation is anticipated to cover an increase in payments of fees and related costs of U.S. commissioners.

Travel and Miscellaneous Expenses

Program and Financing

	1959 actual	1960 estimate	1961 estimate
Program by activities:			
Travel and miscellaneous expenses (total obligations)		$447,000	
Financing:			
Proposed supplemental appropriation		447,000	

Under existing legislation, 1960.—A supplemental appropriation is anticipated to cover: (*a*) the increase in subsistence allowance for judges under Public Law 86–138 ($70,000); (*b*) the cost of transcripts for an increasing number of defendants allowed to proceed in forma pauperis ($12,000); (*c*) the purchase of furniture for court personnel in GSA buildings which prior to 1960 was provided by the General Services Administration ($255,000); and (*d*) travel and miscellaneous expenses, including equipment and furniture, for additional law clerks and secretaries of judges under the amendment to title 28, U.S. Code, section 752, by Public Law 86–221, approved September 1, 1959 ($110,000).

Salaries of Referees

(Indefinite special fund)

Program and Financing

	1959 actual	1960 estimate	1961 estimate
Program by activities:			
Salaries and related costs (total obligations)		$25,000	
Financing:			
Proposed supplemental appropriation		25,000	

Under existing legislation, 1960.—A supplemental appropriation of $25,000 is anticipated to cover the cost of additional referee positions and salary increases to be effective April 1, 1960.

Expenses of Referees

(Indefinite special fund)

Program and Financing

	1959 actual	1960 estimate	1961 estimate
Program by activities:			
Clerk hire and miscellaneous expenses (total obligations)		$75,000	
Financing:			
Proposed supplemental appropriation		75,000	

Under existing legislation, 1960.—A supplemental appropriation of $75,000 is anticipated to cover (*a*) the salaries and related expenses (including equipment and furniture) of 30 additional clerks for the last 3 months of the year, (*b*) the purchase of furniture for personnel in General Services Administration operated buildings which was previously provided by that agency, and (*c*) additional telephone and rent expenses of referees.

GENERAL PROVISIONS—THE JUDICIARY

Sec. 302. Sixty per centum of the expenditures for the District Court of the United States for the District of Columbia from all appropriations under this title and 30 per centum of the expenditures for the United States Court of Appeals for the District of Columbia from all appropriations under this title shall be reimbursed to the United States from any funds in the Treasury to the credit of the District of Columbia.

Sec. 303. The reports of the United States Court of Appeals for the District of Columbia shall not be sold for a price exceeding that approved by the court and for not more than $6.50 per volume. (*Judiciary Appropriation Act, 1960.*)

EXECUTIVE OFFICE OF THE PRESIDENT

New obligational authority of $87 million is recommended for the Executive Office of the President for 1961. Of this amount, 87% is for the Office of Civil and Defense Mobilization, which coordinates all mobilization and civil defense functions of the executive branch and carries out nonmilitary defense programs in cooperation with States and localities. About 6% is for the Bureau of the Budget, which is the staff arm of the President in preparing and reviewing the Federal budget and in working on Government-wide problems such as organization, accounting, statistics, and legislative coordination. The remainder is for compensation of the President, staff assistance and special projects in the White House offices, and for other smaller agencies in the executive office.

The new obligational authority requested for 1961 is $21 million more than estimated for 1960. The increase is almost entirely for the Office of Civil and Defense Mobilization, largely to finance the first full-year cost of a new program, authorized in 1958, for Federal sharing in the cost of State and local civil defense personnel and administration. The 1960 recommended new obligational authority includes a request for a supplemental appropriation to start this program in the latter part of 1960.

Civil defense activities also account for almost all of the increase in estimated expenditures of the executive offices from $67 million in 1960 to $79 million in 1961.

New obligational authority and expenditures for the Executive Office of the President are shown in the following table:

SPECIAL PROJECTS

Current authorizations:

SPECIAL PROJECTS

For expenses necessary to provide staff assistance for the President in connection with special projects, to be expended in his discretion and without regard to such provisions of law regarding the expenditure of Government funds or the compensation and employment of persons in the Government service as he may specify, $1,500,000: *Provided,* That not to exceed 10 per centum of this appropriation may be used to reimburse the appropriation for "Salaries and expenses, The White House Office", for administrative services. *(General Government Matters Appropriation Act, 1960.)*

Appropriated 1960, **$1,500,000** Estimate 1961, **$1,500,000**

Program and Financing

The Bureau assists the President in the discharge of his budgetary, management, and other executive responsibilities.

1. *Office of accounting.*—Direction is given to programs for improving accounting and financial management in the executive agencies, in collaboration with the General Accounting Office and the Treasury Department.

2. *Office of budget review.*—Budget instructions and procedures are developed, review of agency estimates is coordinated, and the budget document is prepared.

3. *Office of legislative reference.*—Proposed legislation and agency reports on pending legislation and enrolled bills are reviewed for the President.

4. *Office of management and organization.*—Programs and plans are developed for improved Government organization and procedures, and guidance is provided

BUREAU OF THE BUDGET—Continued

Current authorizations—Continued

SALARIES AND EXPENSES—Continued

in the work of the Bureau to improve agency management and operations.

5. *Office of statistical standards.*—Proposed agency reporting plans and forms are reviewed, and the Government's statistical activities, coverage, and methods are coordinated and improved.

6. *Program divisions.*—Agency programs, budget requests, and management activities are examined, appropriations are apportioned, proposed changes in agency functions are studied, and agencies are assisted in the improvement of their administration. Responsibility for this work with respect to particular agencies is divided among five divisions: (*a*) commerce and finance, (*b*) international, (*c*) labor and welfare, (*d*) military, and (*e*) resources and civil works.

8. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources and applicable adjustment as reflected in the following table:

	1958 actual	*1959 actual*	*1960 estimate*	*1961 estimate*
Selected resources at end of year:				
Unpaid undelivered orders (appropriation balances obligated for goods and services on order but not yet received)	$32,666	$22,140	$22,188	$25,188
Advances (payments for goods and services on order not yet received)	5,797	7,248	5,800	5,800
Total selected resources at end of year	38,463	29,388	27,988	30,988
Selected resources at start of year (−)	−38,463	−29,388	−27,988	
Adjustment of selected resources reported at start of year		5,939		
Costs financed from obligations of other years, net (−)		−3,136	−1,400	
Obligations incurred for costs of other years, net				3,000

1. *Policy coordination.*—The National Security Council advises the President regarding national security policies. Also, the Central Intelligence Agency is under the direction of the Council. Members of the Council are the President, Vice President, Secretary of State, Secretary of Defense, Director of the Office of Civil and Defense Mobilization, and, as directed by the President, other high officials. This appropriation provides staff services for the Council's policy coordination activities.

2. *Operations coordination.*—The Operations Coordinating Board, within the structure of the Council, advises with the responsible executive agencies to assist in coordinating implementation of national security policies assigned by the President to the Operations Coordinating Board for coordination. The Board is composed of the Under Secretary of State for Political Affairs, Deputy Secretary of Defense, Director of Central Intelligence, Director of the United States Information Agency, Director of the International Cooperation Administration, and one or more representatives of the President, and as necessary, officials of other agencies. This appropriation provides staff services for the Board.

3. *Relation of costs to obligations.*—Year-end balances of unpaid undelivered orders are as follows: 1958, $72, and 1959, $1,319.

OFFICE OF CIVIL AND DEFENSE MOBILIZATION

This Office was created by Reorganization Plan No. 1 of 1958 through the merger of the Federal Civil Defense Administration and the Office of Defense Mobilization. It coordinates all civil defense and mobilization activities of the Federal Government and provides guidance and assistance to the States and their political subdivisions in the planning of preparedness measures as an integral part of the national plan for civil defense and defense mobilization. Operational capability for attack warning and emergency communications is provided, stockpiles of medical and engineering equipment are maintained for emergency use, financial contributions are made to States and political subdivisions for civil defense personnel and administrative costs and the provision of facilities and equipment, and radiological defense equipment is furnished to the States and localities for training and operational use. Policies are developed for the administration of the Defense Production Act and the strategic and critical materials stockpile.

In 1961, major emphasis will continue to be devoted to programs for strengthening the capability of all governments to act effectively in emergencies, for developing an effective radiological defense, and for increasing the availability of appropriate fallout shelter.

1. *Executive direction and policy planning.*—This activity provides the top level direction of nonmilitary programs for the defense of the United States. It also includes the development, coordination, and evaluation of civil and defense mobilization assumptions, policies, and programs for Federal, State, local, and individual implementation and participation.

2. *Research and development.*—Programs designed to meet current and projected research needs are coordinated and administered. In addition, damage assessment systems required for emergency operations and control of critical resources are provided. The administration of the research program is under this appropriation; actual research projects are financed under the Research and development appropriation.

3. *Emergency planning.*—This activity provides for the development of Federal mobilization plans and coordination of Federal, State, and local emergency operations plans. This includes supervision of Federal grant-in-aid programs for civil defense purposes; the overall coordination of civil defense and mobilization functions assigned to other Federal agencies; measures to minimize the effects of enemy attack by chemical, biological, or radiological means upon the people and national resources; and the development of shelter and other programs to reduce the vulnerability of the Nation to weapons of mass destruction. Tests are conducted to determine the adequacy of various types of emergency plans.

4. *Warning and communications.*—The Office of Civil and Defense Mobilization national warning system is being revised to make it compatible with the Air Force SAGE network. The warning system is being expanded in 1961 to 446 key warning points. In 1962 it is proposed to add 54 warning points making a total of 500. The system will then provide direct attack warning to all cities of 20,000 or more population and those cities of 10,000 to 20,000 population which are adjacent to important civil and military targets. This activity also includes the national communications system for post-attack emergency coordination of emergency government down to State level. Strengthening of the communications network will be continued in 1961 through installation of radio backup facilities in State control sites, providing a minimum emergency communications radio link to and between the eight Office of Civil and Defense Mobilization regional offices, the national and operational headquarters, and the States.

5. *Training, education, and public affairs.*—This activity provides for training methods and materials to State and local organizations and dissemination of promotional matter furthering civil defense preparedness. The 1961 request provides for an expanded program of adult education to teach the principles of individual, family, and community protection, utilizing the existing adult education network in the States. By the end of 1960, the first year for this new program, it is estimated that 100,000 adults will have received training through the resources of this adult education program.

6. *Resources and production planning.*—This office develops operating plans to stabilize the economy and manage the national resources under various emergency conditions. Plans are also developed for the restoration and rehabilitation of essential physical facilities after attack. During 1961, work will continue in exploring survival requirements, post-attack, and various methods which can be used to fill these requirements.

7. *Field operations.*—Civil and defense mobilization programs are made available to States and localities through the eight regional offices; courses in civil defense subjects including instructor training are given at four training installations; and specialized activities in connection with attack warning, damage assessment, and emergency operations are conducted at various headquarters throughout the country.

8. *Management services and stockpile operations.*—In addition to centralized administrative services, this activity also finances the management of the civil defense stock-

Federal Reserve Bank of St. Louis

pile. The stockpile is located in warehouses operated by other Federal agencies.

9. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources and applicable adjustment as reflected in the following table:

	1958 actual	*1959 actual*	*1960 estimate*	*1961 estimate*
Selected resources at end of year: Inventories and items on order:				
Unpaid undelivered orders (appropriation balances obligated for goods and services on order not yet received)	$3,290,876	$3,790,253	$2,981,740	$2,644,740
Advances (payment for goods and services on order not yet received)	57,228	88,076	61,260	48,760

Recovery of prior year obligations	−2,107,250		
Unobligated balance no longer available	58,869		
Appropriation (new obligational authority)		10,000,000	22,000,000

1–9. *Equipment and facilities.*—The Federal contributions program was limited to matching funds for facilities and equipment only through 1959. All States have participated in this program and a total of $91 million has been contributed by the Federal Government, of which about 50% has been used for warning and communications equipment and 16% for medical supplies and equipment.

10. *Personnel and administrative costs.*—This new program for matching the personnel and administrative expenses of State and local civil defense organizations results from legislation enacted by the 85th Congress making civil defense the joint responsibility of the States and Federal Government. This new requirement accounts for more than half of the 1961 appropriation request and also accounts for a supplemental appropriation for the last quarter of 1960, which is anticipated under Proposed for later transmission.

11. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources and applicable adjustment as reflected in the following table:

	1958 actual	*1959 actual*	*1960 estimate*	*1961 estimate*

Appropriation (new obligational authority)	20,000,000	6,950,000	11,400,000			

2. *Chemical, biological, and radiological defense equipment*—(*a*) *Chemical and biological.*—A civilian protective mask has been developed for the chemical and biological protection of the citizens of the Nation. As a prerequisite to large scale production of these masks certain production tests are required. Funds requested herein for chemical and biological equipment will therefore be used for the preparation of detailed production techniques, including molds, for the civilian protective mask. (*b*) *Radiological.*—Equipment is procured and granted to the States and localities for training and operational purposes. The main objective of this program is to provide a national radiological monitoring system consisting of 150,000 fixed monitoring stations. Instruments to be procured in 1961 will provide training equipment for the remaining counties throughout the Nation and will equip approximately 36,500 monitoring stations with one monitoring set each.

3. *Stockpile management.*—Materials and equipment not normally available or not present in the quantities needed to cope with the conditions which would be caused by enemy attack are stockpiled at strategic locations. The Office of Civil and Defense Mobilization stockpile procured to date including medical supplies, emergency engineering equipment, and radiological instruments is stored and maintained in a nationwide warehouse system consisting of 34 medical and general storage facilities. These medical and general storage facilities are divided into three categories. (*a*) *Minor storage locations.*—Ranging between 10,000 and 20,000 square feet. These are generally located fairly close to target areas on a calculated risk basis in federally owned depots and used principally for the storage of functional assemblies. (*b*) *Major storage locations.*—Ranging between 30,000 and 100,000 square feet. These generally are located for direct support of specific target areas and are used for the storage of bulk backup medical supplies as well as functional assemblies including civil defense emergency hospitals. (*c*) *Reserve storage locations.*—Ranging between 100,000 and 500,000 square feet. These are located a greater distance from target areas, preferably in more isolated sections, and are designed to give reserve support to regional groupings of target areas. Factors considered in selecting these are available transportation facilities, security, strategic coverage, and geographical distribution. In general, bulk backup reserve supplies are stored at these locations.

4. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources and applicable adjustment as reflected in the following table:

Selected resources at end of year:	*1958 actual*	*1959 actual*	*1960 estimate*	*1961 estimate*
Inventories and items on order:

1. *Fallout shelter prototypes and surveys.*—Under the national shelter policy, Federal example and leadership is recognized as an indispensable element in stimulating State and local governments, private industry, and the people to build shelters for their protection. To set the example, Federal prototype shelters of various kinds are to be constructed in different climatic areas. Also, sampling surveys will be conducted in many areas to determine the potential of existing buildings, caves, etc., for sheltering the population during an emergency.

2. *Contract research.*—This activity finances the development and application of scientific knowledge to the strategic requirements of the nonmilitary defense of the Nation through research contracts with Federal agencies, universities, industry and private institutions. The 1961 program will emphasize research in the social sciences and will cover such subjects as control and allocation of consumer requirements, alternatives to survival stockpiling, and human behavior in stress situations.

3. *Survival planning.*—In 1959, the survival studies undertaken by the States were terminated in all but two States, New Mexico and South Carolina. Studies in these States will be completed in 1960.

4. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources and applicable adjustment as reflected in the following table:

	1958 actual	*1959 actual*	*1960 estimate*	*1961 estimate*
Selected resources at end of year:

CIVIL DEFENSE AND DEFENSE MOBILIZATION FUNCTIONS OF FEDERAL AGENCIES

For expenses necessary to enable other Federal agencies to perform such civil defense and defense mobilization functions as may be designated by the Office of Civil and Defense Mobilization, including payments by the Department of Labor to State employment security agencies for the full cost of administration of defense manpower mobilization activities, $10,000,000.

Estimate 1961, [a] **$10,000,000**

[a] Includes $10,000,000 for activities previously carried under "Salaries and expenses," Office of Civil and Defense Mobilization. The amounts obligated in 1959 and 1960 are shown in the schedule as comparative transfers.

Financing:			
Comparative transfers from (−) other accounts	−3,347,291	−6,250,000	
Appropriation (new obligational authority)			10,000,000

This appropriation finances, on a consolidated basis, the civil defense and defense mobilization functions of other Federal agencies under presidential assignments called for in Reorganization Plan No. 1 of 1958. These assignments are based on the principle that existing government must provide the standby nonmilitary defense organization for leadership in the event of an emergency.

During 1960 and 1961, major emphasis is being placed on extending Federal planning effort from the Washington level to the Federal establishment in the field. This involves the acceleration of radiological defense training to assure a monitoring capability in the event of nuclear attack and the provision of liaison representatives at various regional offices of the Federal Government, who have the specialized knowledge needed to strengthen the capability of government at local levels to survive and function in a post-attack situation.

To the maximum extent possible, each agency will conduct emergency preparedness activities as an integral part of the planning and execution of its regular program without extra cost. Certain specialized emergency missions of these agencies designated by Office of Civil and Defense Mobilization which cannot be absorbed are being financed by this separate account.

1. *Department of Agriculture.*—Agriculture's nationwide network of local county agents has been assigned responsibility for radiological monitoring on a widely dispersed basis. The 1961 program will be devoted to radiological defense training for this purpose and to food management planning.

2. *Civil Aeronautics Board.*—The Board is responsible for developing a plan for the mobilization of civil air transport capability in an emergency.

3. *Department of Commerce.*—This Department will continue to plan for the mobilization of industrial production and decentralization of controls; provide specialized weather data including radiological fallout forecasts; develop the defense air transport program; and compile statistical resources data needed to assess damage from attack under various conditions.

5. *Federal Aviation Agency.*—This Agency will continue the planning and preparedness measures initiated in 1960 for development of operational plans, technical standards, and procedures for improving the emergency readiness of the Nation's airlift capability and its supporting elements.

7. *General Services Administration.*—Provision is made for continuing the emergency communications system to connect the Federal Government relocation sites in the field.

8. *Department of Health, Education, and Welfare.*—Responsibilities have been assigned to this Department to improve the Nation's civil defense capability in the areas of health and welfare. This involves the training of medical personnel at the local level on a pilot basis in a selected area of the country, and the preparation and dissemination of welfare guidance material to the States to stimulate welfare planning.

9. *Housing and Home Finance Agency.*—This Agency is charged with the responsibility of providing housing for the population under emergency conditions. The increase in 1961 results from the addition of a civil defense liaison specialist in each of the Agency's eight regional offices as a source of guidance to State and local housing authorities.

10. *Department of the Interior.*—The Department's responsibilities include the mobilization planning required for strategic minerals and to marshal the fuel and power resources of the Nation to cope with an emergency. The Department will also provide radiological monitoring stations at dispersed locations throughout the United States.

11. *Interstate Commerce Commission.*—The Commission is assigned the responsibility for guidance to the domestic surface transportation industry on disaster preparedness. This covers the Nation's railroads, motor carriers, and inland waterway transportation systems.

12. *Department of Labor.*—Funds made available in 1960 permitted this Department to initiate programs to meet manpower problems at all levels of government in a post-attack period. The 1961 budget will permit continuation and expansion of programs involving emergency management of the labor force, including manpower planning in various State employment security agencies.

13. *Post Office Department.*—The 1961 program covers development of procedures and field training necessary to establish a system of registration for locating displaced persons and reuniting separated families in a post-attack period.

14. *Small Business Administration.*—The 1961 budget permits starting development of emergency plans for financial assistance to small business and for developing an emergency capability for the production of survival items while heavy industry is recovering from the effects of attack.

Unobligated balance carried forward		135,000	
Appropriation (new obligational authority)		2,400,000	

The 1960 appropriation provides for the construction of a regional underground control center for the Office of Civil and Defense Mobilization. This is the first protected facility of this nature and it will serve as a prototype for similar centers to be requested for the other regional offices. It is planned to construct this first center at Denton, Tex. The proposed facility is designed for day-to-day operations as well as attack emergency conditions.

3. *Relation of costs to obligations.*—Year-end balance of unpaid undelivered orders, 1960, $1,800,000.

Financing applied to program	36,182	250,000	650,000

This fund finances the procurement of civil defense materials toward which contributions to the States are authorized on a matching fund basis. The fund is reimbursed for purchases from the Federal contributions appropriation and from funds provided by the States (65 Stat. 61). Increased procurement of radiological instruments for the State and local governments is anticipated during 1960 and 1961, thus accounting for the increased obligations projected for these years.

Relation of costs to obligations.—The relationship is derived by year-end balances of selected resources and applicable adjustment as reflected in the following table:

	1958 actual	*1959 actual*	*1960 estimate*	*1961 estimate*
Selected resources at end of year: Unpaid undelivered orders	$579,343	$218,759	$348,759	$650,759
Selected sources at start of year (−)		−579,343	−218,759	−348,759
Adjustment due to recovery of prior year obligations		269,800		
Costs financed from obligations of other years, net (−)		−90,724		
Obligations incurred for costs of other years, net			130,000	302,000

GENERAL PROVISIONS

Departments, Agencies, and Corporations

Sec. 201. Unless otherwise specifically provided, the maximum amount allowable during the current fiscal year, in accordance with section 16 of the Act of August 2, 1946 (5 U.S.C. 78), for the purchase of any passenger motor vehicle (exclusive of buses and ambulances), is hereby fixed at $1,500 except station wagons for which the maximum shall be $1,950.

Sec. 202. Unless otherwise specified and during the current fiscal year, no part of any appropriation contained in this or any other Act shall be used to pay the compensation of any officer or employee of the Government of the United States (including any agency the majority of the stock of which is owned by the Government of the United States) whose post of duty is in continental United States unless such person (1) is a citizen of the United States, (2) is a person in the service of the United States on the date of enactment of this Act who, being eligible for citizenship, had filed a declaration of intention to become a citizen of the United States prior to such date, (3) is a person who owes allegiance to the United States, or (4) is an alien from the Baltic countries lawfully admitted to the United States for permanent residence: *Provided,* That for the purpose of this section, an affidavit signed by any such person shall be considered prima facie evidence that the requirements of this section with respect to his status have been complied with: *Provided further,* That any person making a false affidavit shall be guilty of a felony and, upon conviction, shall be fined not more than $4,000 or imprisoned for not more than one year, or both: *Provided further,* That the above penal clause shall be in addition to, and not in substitution for, any other provisions of existing law: *Provided further,* That any payment made to any officer or employee contrary to the provisions of this section shall be recoverable in action by the Federal Government. This section shall not apply to citizens of the Republic of the Philippines or to nationals of those countries allied with the United States in the current defense effort, or to temporary employment of translators, or to temporary employment in the field service (not to exceed sixty days) as a result of emergencies.

Sec. 203. Appropriations of the executive departments and independent establishments for the current fiscal year, available for expenses of travel or for the expenses of the activity concerned, are hereby made available for living quarters allowances in accordance with the Act of June 26, 1930 (5 U.S.C. 118a), and regulations prescribed thereunder, and cost-of-living allowances similar to those allowed under section 901(2) of the Foreign Service Act of 1946, in accordance with and to the extent prescribed by regulations of the President, for all civilian officers and employees of the Government permanently stationed in foreign countries: *Provided,* That the availability of appropriations made to the Department of State for carrying out the provisions of the Foreign Service Act of 1946 shall not be affected hereby.

Sec. 204. No part of any appropriation for the current fiscal year contained in this or any other Act shall be paid to any person for the filling of any position for which he or she has been nominated after the Senate has voted not to approve the nomination of said person.

Sec. 205. No part of any appropriation contained in this or any other Act for the current fiscal year shall be used to pay in excess of $4 per volume for the current and future volumes of the United States Code Annotated, and such volumes shall be purchased on condition and with the understanding that latest published cumulative annual pocket parts issued prior to the date of purchase shall

GENERAL PROVISIONS—Continued

DEPARTMENTS, AGENCIES, AND CORPORATIONS—Continued

be furnished free of charge, or in excess of $4.25 per volume for the current or future volumes of the Lifetime Federal Digest.

SEC. 206. Funds made available by this or any other Act for administrative expenses in the current fiscal year of the corporations and agencies subject to the Government Corporation Control Act, as amended (31 U.S.C. 841), shall be available, in addition to objects for which such funds are otherwise available, for rent in the District of Columbia; services in accordance with section 15 of the Act of August 2, 1946 (5 U.S.C. 55a); and the objects specified under this head, all the provisions of which shall be applicable to the expenditure of such funds unless otherwise specified in the Act by which they are made available: *Provided*, That in the event any functions budgeted as administrative expenses are subsequently transferred to or paid from other funds, the limitations on administrative expenses shall be correspondingly reduced.

SEC. 207. No part of any funds of or available to any wholly owned Government corporation shall be used for the purchase or construction, or in making loans for the purchase or construction of any office building, without specific authority in law therefor, primarily for occupancy by any department or agency of the United States Government or by any corporation owned by the United States Government.

SEC. 208. Pursuant to section 1415 of the Act of July 15, 1952 (66 Stat. 662), foreign credits (including currencies) owed to or owned by the United States may be used by Federal agencies for any purpose for which appropriations are made for the current fiscal year (including the carrying out of Acts requiring or authorizing the use of such credits), only when reimbursement therefor is made to the Treasury from applicable appropriations of the agency concerned: *Provided*, That such credits received as exchange allowances or proceeds of sales of personal property may be used in whole or part payment for acquisition of similar items, to the extent and in the manner authorized by law, without reimbursement to the Treasury: *Provided further*, That nothing in section 1415 of the Act of July 15, 1952, or in this section shall be construed to prevent the making of new or the carrying out of existing contracts, agreements, or executive agreements for periods in excess of one year, in any case where such contracts, agreements, or executive agreements for periods in excess of one year were permitted prior to the enactment of this Act under section 32(b)(2) of the Surplus Property Act of 1944, as amended (50 U.S.C. App. 1641(b)(2)), and the performance of all such contracts, agreements, or executive agreements shall be subject to the availability of appropriations for the purchase of credits as provided by law.

SEC. 209. No part of any appropriation contained in this Act, or of the funds available for expenditure by any individual, corporation, or agency included in this Act, shall be used for publicity or propaganda purposes designed to support or defeat legislation pending before Congress.

[SEC. 210. (a) Section 1311(b) of the Supplemental Appropriation Act, 1955 (68 Stat. 830; 31 U.S.C. 200(b)), is amended to read as follows: "Hereafter, in connection with the submission of all requests for proposed appropriations to the Bureau of the Budget, the head of each Federal agency shall report that any statement of obligations furnished therewith consists of valid obligations as defined in subsection (a) hereof."]

[(b) Section 1(c) of the Act of July 25, 1956 (70 Stat. 648; 31 U.S.C. 701(c)), is amended by striking the words "reported pursuant to section 1311(b) of the Supplemental Appropriation Act, 1955 (68 Stat. 830; 31 U.S.C. 200(b))."] (*General Government Matters Appropriation Act, 1960.*)

FUNDS APPROPRIATED TO THE PRESIDENT

Funds for several Government programs are appropriated directly to the President, who may designate officials or agencies to act for him in carrying out the activities involved.

The most notable example is the mutual security program, under which the United States helps strengthen free world defenses and promotes stability and economic growth in less-developed countries. This program, consisting of military and economic assistance, is conducted under the Mutual Security Act of 1954, as amended. Responsibility for its execution has been delegated by the President to the Secretaries of State and Defense. The Secretary of State has been delegated responsibility for coordination. Funds for military assistance appear in this document in the chapter on Department of Defense—Military and are therefore not included in the amounts discussed here.

Also financed through funds appropriated to the President are activities authorized by the Defense Production Act to encourage the expansion of productive capacity for materials needed for defense, mainly by means of loans, purchase contracts, and commitments to purchase output not sold by the producer on the open market. These activities are carried out by a number of agencies designated by the President and are financed by borrowings from the Treasury up to a limit of $2.1 billion outstanding at any one time.

Other smaller programs included in this chapter of the budget are the President's special international program for trade fairs and cultural exchanges, disaster relief assistance to State and local governments, the President's national defense emergency fund, expenses of management improvement, transitional grants to Alaska, and a special program for using foreign currencies for translation of publications and scientific cooperation.

The economic assistance portion of the mutual security program accounts for $2,175 million out of the $2,191 million recommended new obligational authority for 1961 for programs included in the Funds Appropriated to the President chapter. Increased appropriations requested for economic assistance for 1961 are the primary reason for the estimated $247 million increase in the total of new obligational authority as compared with 1960. No new commitments are anticipated for defense production expansion for 1960 or 1961.

Expenditures are estimated at $1,814 million in 1961. Of this amount, $1,700 million or 94% is for economic assistance. Expenditures for expansion of defense production, arising under commitments made in prior years, are expected to amount to $89 million or 5% of the total for 1961.

New obligational authority and expenditures by function are shown below:

SUMMARY OF BUDGET AUTHORIZATIONS, EXPENDITURES, AND BALANCES

[In thousands]

Description	1959 actual	1960 estimate	1961 estimate
Balances brought forward at start of year from authorizations enacted or recommended in this document:			
Appropriations	$1,622,268	$1,545,494	$1,534,369
Authorizations to expend from debt receipts	576,551	349,696	289,915
Revolving and management funds	324,086	904,356	1,171,294
Total balances brought forward	2,522,905	2,799,546	2,995,578
New obligational authority:			
Enacted or recommended in this document: Current authorizations:			
Appropriations	2,053,603	1,943,584	2,190,950
Other amounts available:			
Appropriations available in prior year			−135
Appropriations available from subsequent year		135	
Adjustment of balances upward in expired accounts, net	95		
Total budget authorizations available	4,576,603	4,743,265	5,186,393
Expenditures:			
From obligational authority enacted or recommended:			
Out of new obligational authority	1,776,687	1,747,677	562,555
Out of balances of prior obligational authority			1,251,222
Total budget expenditures	1,776,687	1,747,677	1,813,777
Amounts no longer available: Unobligated balances expiring and lapsing	370	11	
Balances carried forward at close of year from authorizations enacted or recommended in this document:			
Appropriations	1,545,494	1,534,369	1,597,797
Authorizations to expend from debt receipts	349,696	289,915	201,020
Revolving and management funds	904,356	1,171,294	1,573,799
Total balances carried forward at close of year	2,799,546	2,995,578	3,372,616
Obligations incurred, net	$2,129,068	$2,096,813	$2,293,994

Recovery of prior year obligations	−14,343		
Unobligated balance carried forward	16,515,419	8,215,419	
Appropriation (new obligational authority)			

This program provides for a coordinated effort by the Federal Government to assist States and their political subdivisions affected by major disaster when they are unable to cope with the situation physically or financially.

Responsibility for administration of this program is delegated to the Office of Civil and Defense Mobilization. Disaster relief operations of the entire Federal Government are coordinated and funds are made available to affected areas and to reimburse Federal agencies for disaster operations.

State and local civil defense organizations are active in disaster operations and receive valuable operational training as a result. Unused prior year appropriations of $16.5 million carried into the current year should be adequate to meet needs in both 1960 and 1961.

Major disasters proclaimed by the President and allocation of funds made to States in 1959 are:

State	*Type*	*Date declared*	*Allocation*
Louisiana	Flood	July 28, 1958	$300,000
Iowa	——do	Sept. 5, 1958	600,000
Texas	——do	Sept. 15, 1958	200,000
North Carolina	Hurricane	Dec. 15, 1958	750,000
Kansas	Flood	——do	185,000
Louisiana	——do	——do	105,000
Iowa	——do	——do	175,000
Indiana	Severe weather conditions	Feb. 13, 1959	250,000
Ohio	——do	——do	2,000,000
North Carolina	Hurricane	Mar. 5, 1959	200,000
Pennsylvania	Severe weather conditions	Mar. 12, 1959	3,000,000
Indiana	——do	Apr. 21, 1959	250,000
Total 1959 declarations			8,015,000
Administrative allocations			240,450
Returns to the President's fund (—)			−3,704,295
Obligations from prior year declarations			3,800,057
Total obligations (1959)			8,351,212

3. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources as reflected in the following table:

NOTE.—Accrued interest to Treasury for General Services Administration, Department of Agriculture, and Department of the Interior totaling $64,820,577 in 1960 and $76,492,966 in 1961 is excluded from operating costs. Legislation is being proposed to eliminate the requirement for payment of interest to Treasury for activities carried on by these agencies.

Under section 304(b) of the Defense Production Act of 1950, as amended, designated agencies are authorized with Presidential approval to incur obligations and make expenditures to secure expanded production of critical materials in furtherance of the defense effort. The program is conducted primarily through a revolving fund, with financing by borrowings from the Treasury. The amount borrowed must not exceed $2.1 billion outstanding at any one time, but the act permits contingent liabilities to be considered as obligations only to the extent of the probable ultimate net costs to the United States, rather than in the full amount of the gross commitments outstanding. To the extent that money must be expended to fulfill commitments, even though the expenditures are considered to be ultimately recoverable (through repayments of loans and sale of inventories, for example), portions of the borrowing authority are used for working

Digitized for FRASER

Federal Reserve Bank of St. Louis

capital on a current basis. Due to the imminent exhaustion of this borrowing authority, a direct appropriation of $108 million was enacted for 1959, thus providing cumulative financing authority of $2,208 million.

Programs must be certified as essential to the national defense by the Office of Civil and Defense Mobilization. The gross transactions (gross commitments) and financing authorized as of September 30, 1959, are as follows:

[In thousands]

		Financing authority		
	Gross transactions	*Total*	*Working capital*	*Probable ultimate net cost*
General Services Administration	$7,643,898	$1,912,000	$888,701	$1,023,299
Treasury Department	430,389	166,600	165,000	1,600
Department of Agriculture	109,939	67,784	---	67,784
Department of the Interior	35,800	35,800	---	35,800
Export-Import Bank of Washington	45,170	25,500	25,500	---
Total authorized	8,265,196	2,207,684	1,079,201	1,128,483
Unused balance		316		
Total financing authority		2,208,000		

As one of the inducements for expanding production most of the contracts provided a guaranteed market for the production from the expanded facilities. Significant amounts of materials are being delivered to the Defense Production Act inventory under these contracts. Investment in inventory of $1,145 million on June 30, 1958, and $1,372 million on June 30, 1959, is expected to increase to $1,620 million by June 30, 1961.

Sales to the national stockpile were discontinued in November 1957 and no stockpiling funds have been budgeted for this purpose since that time. Defense Production Act materials are not disposed of where sales would disrupt markets. Therefore, there is little likelihood in the near future of substantial disposal of the large inventories being accumulated.

Interest continues to accrue, payable by the fund to the Treasury, not only on the borrowings invested in loans and inventories, but also on the borrowings which have been used to cover losses. Since there is no way for the fund to recover its realized losses, the perpetuation of the interest-bearing arrangement on such expended capital merely makes the cumulative deficit even greater as the interest accrues.

Legislation is being requested which would direct the Secretary of the Treasury to honor non-interest-bearing notes and cancel accrued interest on existing notes for borrowings to carry out activities under section 303 of the act. If such legislation is enacted, existing financing authority of $2,208 million may be sufficient to cover cumulative net disbursements through 1961. Future cash requirements are subject to the many variables involved in unexpired options of expansion contracts and sales potential of Defense Production Act raw material and real property inventories.

General Services Administration.—Financing of $1,912,000,000 has been authorized as of September 30, 1959, to cover the expansion of productive capacity for strategic metals, minerals, and machine tools. This amount includes $1,023,299,000 for probable ultimate net cost of specific programs of which $792,474,000 is for metals and minerals programs, $18,294,000 for machine tool and marine turbine and gear capacity programs, and $212,531,000 for Treasury interest, custodial, and administrative expenses. The financing also includes $888,701,000 of working capital required for carrying inventories for which no sale is now foreseen.

The bulk of the Defense Production Act expansion programs have been contracted for and physical expansion completed. The plants are in production and the contracts are now in the administration phase with the major problems being receipt, custody, and eventual disposition of the materials and facilities. Future deliveries of materials under the contracts are expected to be substantial but will depend upon economic and business conditions. The exercise of option rights by contractors has been carefully examined with a view to reducing deliveries to the Government as far as possible within the terms of the contracts whenever basic stockpiling objectives have been attained. Between July 1, 1957, and November 30, 1959, a reduction of $339,748,000 in gross commitments had been attained through renegotiation of contracts.

A summary of transactions involving strategic minerals and metals (including work-in-process inventory) under this fund follows:

[In millions]

	1959 actual	*1960 estimate*	*1961 estimate*
Opening inventory	$1,144.6	$1,371.6	$1,511.4
Deliveries during year	246.6	163.4	120.4
Total available for sale	1,391.2	1,535.0	1,631.8
Less cost of goods sold:			
Sales receipts	24.9	29.8	14.0
Profit on sales	5.3	6.2	2.2
Cost of goods sold	19.6	23.6	11.8
Closing inventory	1,371.6	1,511.4	1,620.0

Major Defense Production Act programs administered by General Services Administration are as follows:

1. Basic expansion programs to increase mining or refining capacity of such materials as aluminum, copper, and nickel by offering guaranteed markets under specific contracts and for specific projects.

2. Domestic purchase programs designed to increase domestic production by fixed incentive prices available to all domestic producers of materials such as beryl and mica.

3. Research and pilot plant programs to develop new processes for economic recovery of low-grade domestic ores and for developing new processes for producing new materials, such as titanium and synthetic mica.

4. A program for the production of nickel from the Government-owned Nicaro nickel plant in Cuba.

5. A program of sales, leases, and machine tools storage and standby machine tool production contracts.

As of June 30, 1959, a total of $7,489.9 million in gross value of contracts has been entered into by the General Services Administration under Defense Production Act authority. Of this amount a total of $6,387.7 million has been completed as measured by procurement, expiration of contractor options on guaranteed production, completion of facilities, completed research, etc. The balance of $1,102.2 million includes a total of $942.5 million of commodity contracts, some of which will not mature until 1965.

Cumulative losses from resale of commodities, interest, and operating expenses through June 30, 1959, amount to $262 million.

Department of Agriculture.—The purchase, management, and resale of agricultural commodities, except forest products, are carried out by the Commodity Credit Corporation, which is reimbursed from this fund for the net costs involved.

In addition to purchase and resale operations, the Secretary of Agriculture may recommend to the Office of Civil and Defense Mobilization the certification of certain loans for increasing plant capacity to process or store agricultural commodities. No loans were certified during 1959 and none are expected to be certified during 1960 and 1961.

EXPANSION OF DEFENSE PRODUCTION—Con.

Public enterprise funds—Continued

REVOLVING FUND, DEFENSE PRODUCTION ACT—Continued

During 1959, the Corporation continued the management of inventories of castor beans and the remaining American-Egyptian cotton acquired under programs initiated in prior years. Nearly all of the American-Egyptian cotton inventories had been disposed of by June 30, 1959. The remainder of the cotton and castor beans will be sold during 1960. Net realized loss on purchase and resale operations amounted to $12,876 during 1959 and is estimated at $411,122 during 1960, completing the programs.

Export-Import Bank of Washington.—Pursuant to section 311 of Executive Order No. 10480 of August 15, 1953, which superseded order No. 10161, the Export-Import Bank, with funds provided under section 304 of the Defense Production Act of 1950, as amended, is responsible for making and administering all loans under section 302 of the act, upon receipt of certificates of essentiality issued by the Director of Defense Mobilization or the General Services Administrator, where the expansion, development, or production so financed is carried on in foreign countries.

No certifications were received and no new loans were authorized by the Bank during 1959. It is contemplated that there will be no additional certifications to the Export-Import Bank in connection with these operations. No additional obligational authority will be required. It is estimated that net budget receipts for 1961 will be $4,983,000.

During 1959 borrowing authority allocated to Export-Import Bank under the Defense Production Act of 1950 was reduced from $35 million to $25.5 million. As of June 30, 1959, the outstanding balance of notes due the Treasury was $24,767,162.

Treasury Department.—The function of making and administering loans to private business enterprises under the authority of section 302 of the Defense Production Act of 1950, as amended, was assigned to the Secretary of the Treasury by Executive Order No. 10489, dated September 26, 1953. Applications for loans are considered only upon certification of essentiality by Office of Civil and Defense Mobilization.

During 1959 a certificate of essentiality was issued for an additional loan to one of the present borrowers. This loan was disbursed by a bank in the amount of $850,000 with the Government executing a deferred participation agreement with the bank covering 90% of the loan. No disbursement of Treasury funds is expected on account of such $765,000 commitment. It is contemplated that there will be no additional certifications to Treasury in 1960 and 1961.

Loans outstanding on June 30, 1959, totaled $169,418,212, and there were $15,818,618 in commitments to participate in loans made by banks wherein disbursement of Treasury funds is deferred. By the close of 1961 it is estimated that the loans will be reduced to $150,025,000 and the deferred participation commitments to $13,120,000.

Department of the Interior.—Operations within the Department of the Interior with regard to the expansion of defense production have been limited to the encouragement of exploration for strategic and critical minerals and metals. As of June 30, 1959, the Office of Civil and Defense Mobilization had certified to the Defense Minerals Exploration Administration borrowing authority in the amount of $35,800,000. From the beginning of the program through June 30, 1958, the terminal date for executing new contracts, Defense Minerals Exploration Administration had entered into 1,159 contracts. On June 30, 1959, the Government's share of estimated costs was $34,823,125 and the total estimated contract costs were $56,802,182.

On June 30, 1959, Defense Minerals Exploration Administration had certified discoveries on 374 projects involving total estimated contract amounts of $25,443,931. The Government's share on these contracts was $16,023,763, of which $12,969,781 had been spent. If production takes place on these projects within a 10-year period, some part, at least, of the Government funds advanced will be repaid according to a royalty arrangement. Royalties on production to date from Defense Minerals Exploration Administration projects total $3,127,070.

Under Public Law 85–701, enacted August 21, 1958, the Office of Minerals Exploration in the Department of the Interior is continuing a program of financial assistance for minerals exploration using appropriated funds. Administrative expenses in connection with contracts entered into under the Defense Production Act are paid from these funds.

9. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources and applicable adjustment as reflected in the following table:

	1958 actual	*1959 actual*	*1960 estimate*	*1961 estimate*

MUTUAL SECURITY—*ECONOMIC*

Economic assistance is provided to help maintain political and economic stability, to assist in meeting the costs of relatively large military forces maintained by some of the less-developed countries as part of the common defense, and to help improve economic conditions in the less-developed areas of the world. Mutual security economic programs consist of defense support, technical cooperation, special assistance, Development Loan Fund, investment guarantee program, a contingency appropriation, and a number of other programs, such as contributions to certain special activities of the United Nations and other international agencies. Authorization for the economic programs for 1961 is required, with the primary exceptions of the Development Loan Fund and the investment guarantee program. Information on the military assistance program appears in the chapter on Department of Defense—Military.

Current authorizations:

For expenses necessary to enable the President to carry out the provisions of the Mutual Security Act of 1954, as amended, to remain available until June 30, [1960] *1961*, unless otherwise specified herein, as follows:

ECONOMIC ASSISTANCE

Defense support: For assistance authorized by section 131(b), [$650,000,000, and in addition for Defense support for Spain, authorized by section 131(b), $45,000,000, exclusive of technical cooperation] *$724,000,000*;

Technical cooperation, general authorization: For assistance authorized by section 304, [$150,000,000] *$172,000,000*;

United Nations expanded program of technical assistance and related fund: For contributions authorized by section 306(a), [$30,000,000] *$33,000,000*;

Technical cooperation programs of the Organization of American States: For contributions authorized by section 306(b), [$1,200,000] *$1,500,000*;

Special assistance, general authorization: For assistance authorized by section 400(a), [$245,000,000] *$268,500,000*;

[Special assistance, special authorization: For assistance authorized by section 400(c) in the planning for construction of the American Research Hospital for Children in Poland at the University of Krakow, the equivalent of $50,000 in local currencies;]

Intergovernmental Committee for European Migration: For contributions authorized by section 405(a), [$7,371,000] *$10,000,000*: *Provided*, That no funds appropriated in this [title] *Act* shall be used to assist directly in the migration to any nation in the Western Hemisphere of any person not having a security clearance based on reasonable standards to insure against Communist infiltration in the Western Hemisphere;

Program of United Nations High Commissioner for Refugees: For contributions authorized by section 405(c), [$1,100,000] *$1,500,000*;

1. *Defense support.*—Defense support is economic aid provided to 12 of the lesser developed countries in order to assist them to make a specific contribution to the common defense effort. The existence of defense support is rooted in a specific military requirement, continued contribution of forces of over 3 million men and military facilities vital to the United States. The dimensions of support are determined by analysis of the capability of a country to make its defense contribution without incurring political or economic instability. Funds are primarily used to finance imports of food, raw materials, and machinery, which are sold in commercial markets for local currency which in turn is used for support of military budgets and essential civilian economic activities.

(*a*) *Europe and Africa.*—Spain, where the United States has bases of strategic importance, is the only country in this region which receives defense support aid.

(*b*) *Near East and South Asia.*—Greece, Turkey, Iran, and Pakistan are the countries in this area which receive defense support. All of them are members of regional defense pacts which are part of the common defense.

(*c*) *Far East.*—The major portion of defense support is allocated to the Far East countries of Korea, Taiwan, Vietnam, Cambodia, Laos, the Philippines, and Thailand.

2. *Technical cooperation.*—This is a program for the international exchange of technical knowledge and skills through training, demonstration programs and surveys designed to introduce innovations and to increase the skills of peoples in less developed countries to enable them to achieve an improved standard of living. Programs in health, education, agriculture, industry, and other fields are designed to lead to an early impact as well as to bring about long-term material benefits. The major share of the U.S. contribution to the widespread effort to improve knowledge and skills in the underdeveloped countries is provided through bilateral programs; the United States also contributes to two international organizations operating in the field of technical assistance.

(*a*) *General.*—The bilateral program is being increased in accordance with our ability to recruit American technicians to carry out the program overseas and with the increasing ability of the cooperating countries to make good use of their services. Currently there are 3,300 U.S. direct hire technicians overseas, plus 2,000 U.S. nationals employed by contractors receiving program funds.

(*b*) *United Nations.*—The United Nations expanded program of technical assistance is aiding over 90 countries and territories through the provision of experts and the financing of fellowships for training abroad. The special

MUTUAL SECURITY—*ECONOMIC*—Continued

Current authorizations—Continued

ECONOMIC ASSISTANCE—Continued

fund emphasizes interregional surveys and training institutes. The program is financed by voluntary contributions from some 80 governments, of which the United States contribution is about 40% of the total. The program has been expanding the last several years as a result of higher contributions from European and Commonwealth countries.

(*c*) *Organization of American States.*—This appropriation provides for the annual U.S. contribution, which is 70% of the total, to the technical assistance programs of the Organization of American States.

3. *Special assistance.*—This is economic aid which is necessary to achieve political, economic, or other objectives of the United States in countries where the United States is not providing military assistance in support of significant military forces and where the needs for economic assistance cannot be provided under other programs, such as technical cooperation or the Development Loan Fund. Special assistance is also the source of funding for certain worldwide programs in the field of health and education. The country programs being implemented during the present year serve the following broad objectives: (1) To maintain or develop economic stability in countries in which U.S. support is essential to continued independence or identification with the free world; (2) to secure or maintain U.S. military facilities or other rights in a country or to deal with economic and other problems arising out of the existence of such facilities. Special assistance programs are also being implemented in health and education, the largest being the worldwide malaria eradication program. Others are support of international medical research activities and American schools abroad.

(*a*) *Europe and Africa.*—Nearly all of the special assistance for this area is furnished to countries in Africa. Certain of the programs in Africa are to be increased in 1961. In some of these countries, many of which are just now becoming independent, considerable improvements in education, administration, public health, and other fundamental skills must be made as a foundation for economic development.

(*b*) *Near East and South Asia.*—Countries in this area receive special assistance in order to help meet budgetary requirements, to overcome balance-of-payments difficulties, and to help resist Communist pressure.

(*c*) *Far East.*—Because most of the countries in the Far East have military agreements with the United States, they are eligible for defense support aid. There are only two, Burma and Indonesia, which are supported by special assistance and the programs in these countries are relatively small.

(*d*) *Latin America.*—Two of the countries in Latin America which have especially critical balance-of-payments problems receive the bulk of special assistance in that area.

(*e*) *Nonregional.*—This category includes the various worldwide programs in health and education mentioned above.

Loans.—Although the bulk of loans made from mutual security program funds are now made from the Development loan fund, a portion of the special assistance funds are loaned each year rather than granted. These loans are almost all for economic development projects, and may be repayable in either dollars or foreign currency. The tables below show the current status of these loans. Information on loans extended by the Development loan fund and under the authority of the Agricultural Trade Development and Assistance Act are shown in separate schedules.

The following table gives data on loans made from current mutual security obligational authority for both dollars and related foreign currencies in millions of dollars and dollar equivalents:

	1959 actual	*1960 estimate*	*1961 estimate*
Loan obligations incurred:			
U.S. currency	$63	$42	$40
Foreign currency	24	5	---
Loan disbursements made:			
U.S. currency	61	50	40
Foreign currency	152	90	60
Loan principal repayments:			
U.S. currency	23	26	28
Foreign currency	1	1	2
Interest collections:			
U.S. currency	38	38	41
Foreign currency	6	12	16

The table below shows the status of loans in millions of dollars at the end of the respective years. The bulk of the loans outstanding were made to European countries in the early years of the European recovery program and are repayable in dollars:

End-of-year	*1958 actual*	*1959 actual*	*1960 estimate*	*1961 estimate*
Loans outstanding	$2,198	$2,387	$2,500	$2,570
Undisbursed loan obligations	358	232	139	79
Interest past due	4	------	------	------

4. *Other programs.*—Other programs include U.S. contributions to various international agencies, minor bilateral programs, and the costs of administering activities under the Mutual Security Act and related acts.

The United States assists in moving surplus populations and refugees from Europe and helps recent escapees from the Soviet bloc through contributions to the Intergovernmental Committee for European Migration and the United Nations High Commissioner for Refugees, as well as the U.S. escapee program.

Through its contribution to the United Nations children's fund, the United States joins with other contributors in improving the health and welfare of children and mothers primarily in underdeveloped areas. The U.S. contribution to the United Nations Relief and Works Agency (UNRWA) assists in providing essential care and maintenance for the Arab refugees displaced in Palestine. Through the atoms for peace program the United States makes available to other countries the benefits derived from peaceful use of atomic science.

Administrative expense funds are used by the International Cooperation Administration in Washington and in 65 oversea locations for administering economic assistance programs and by the Department of State for personnel involved in coordinating and conducting policy review of the entire mutual security program in Washington and abroad and for other functions.

The United States contributes along with other NATO countries to support the NATO science program, which includes exchanges of scientists among the NATO countries and an advanced institutes program. The NATO science program, for which funds have previously been provided under special assistance, is included in the other programs category together with the other appropriations involving contributions to international organizations.

The proposed level of all other programs represents a slight reduction from the present year's level. Reductions proposed in the fields of assistance to migrants, refugees, and escapees, atoms for peace, and ocean freight are partially offset by increases in the United Nations Relief

Financing:			
Unobligated balance brought forward (annual appropriation act)		−182,971	
Unobligated balance transferred from "Economic assistance" (68 Stat. 849) (annual appropriation act)		−337,121	
Unobligated balance carried forward (annual appropriation act)	182,971		
Appropriation (new obligational authority)	155,000,000	155,000,000	175,000,000

This is a special fund, rather than a separate category of aid, which is used to meet requirements for which no specific provision can be made in the regular categories of assistance because requirements are uncertain or unknown at the time the budget is prepared. These funds can be used for both economic and military assistance. While in earlier years, they were used to meet unforeseen economic requirements, recently a portion has been required to meet military assistance needs.

A part of the mutual security dollar appropriations is to be used to purchase agricultural surplus commodities which are then to be sold to friendly countries for their currencies. Local currencies accruing from these sales are deposited in a special account and are used for economic and military activities in furtherance of mutual security objectives. These activities include the local costs of projects, budget support of the lesser developed countries, and procurement of supplies and materials for third countries.

The Development Loan Fund finances loans, credits, or guarantees to governments or to private or other entities in underdeveloped countries in order to encourage the economic development of friendly nations. The Fund is a source of financing for economic development which does not compete with either private investment capital or the activities of the Export-Import Bank of Washington and the International Bank for Reconstruction and Development.

Budget program.—As of June 30, 1959, the Fund has signed 68 loans and 1 guarantee agreement for development assistance in 33 countries. These loans cover power, irrigation, transportation, industry, and other projects contributing to economic development. About three-fourths of the projects have been in the categories of roads and railroads, electric power generation, manufacturing industry, and industrial development banks. Because the usual rate of completion of major developmental projects extends over a period of years, only initial expenditures for these projects have been made in 1959, the first full year of the Fund's operation. However, sizable increases are estimated in 1960 and 1961 as these projects develop and new ones are added. It is estimated that about 80 loan agreements will be signed in 1960 and

about 100 in 1961. It is also anticipated that additional guarantees will be issued during both fiscal years.

DATA ON DEVELOPMENT LOAN FUND LENDING ACTIVITY

[In millions of dollars]

	1959 actual	*1960 estimate*	*1961 estimate*
Loans and guarantees approved	$568.2	$565.0	$725.0
Loan and guarantee agreements signed	521.2	575.5	705.0
Loan disbursements	65.6	177.6	312.1
Loan principal repayments (dollars and local currencies in dollar equivalent)	.1	8.7	17.2
Loans outstanding, June 30	67.0	235.9	530.8
Undisbursed loan and guarantee commitments, June 30	556.2	954.1	1,347.0

Financing.—The program is financed from appropriations. Appropriations totaling $1.4 billion have been provided through 1960. In addition, financing is provided by receipts from operations.

Repayment of loan principal and payment of interest may be made either in local currency or in dollars or other currencies as specified in the loan agreement and these amounts will be available to the Fund for further lending activity. As these amounts are directly related to loans outstanding, they will not reach appreciable proportions until 1961. Other available revenue is anticipated from fees received for issuance of loan guarantees.

Operating results.—Revenue of the Fund from interest and fees will be both in dollars and local currencies. Such revenue in 1959 included $225,411 in dollars and $590,106 in dollar equivalents of local currencies. In 1960 and 1961 such revenue is expected to increase substantially, to about $1,700,000 in dollars and $5,300,000 in local currencies for 1960, and to about $7,100,000 and $13,700,000, respectively, for 1961. Such earnings will be retained for future relending. Local currency receipts will also be made available for sale by the U.S. Treasury and the dollar proceeds will become available to the Development Loan Fund.

The investment guarantee program encourages and facilitates private American investment in economically underdeveloped areas of the world. It provides guarantee protection against loss from the following noncommercial risks: (*a*) inconvertibility of local currency receipts from the investment; (*b*) expropriation or confiscation of all or part of the investment; and (*c*) war damage. Guarantee authority was increased by Congress during the current year from $500 million to $1 billion. The guarantees, which have a maximum term of 20 years, are now available in any economically underdeveloped country whose government has agreed with the U.S. Government to institute the program. A total of 43 countries and their overseas dependent territories have participated through December 1959. However, as a result of an amendment in the 1959 legislation approximately 8 of these countries which are now regarded as economically developed were eliminated from the program. Negotiations for agreements with other countries are continuing.

Budget program.—Obligations of the program after June 30, 1956, are based on a fractional reserve, which is 25% of total guarantees issued since that date. Guarantees issued prior to June 30, 1956, were issued with 100% backing. Guarantees to be issued during 1961 are estimated at $175 million. Under the fractional reserve basis, this would require obligations of $44 million in 1961 to support the guarantees issued in that year.

Financing.—The reserve funds for the program against which obligations are made come from the following three sources, and these sources would be used for payment of claims in the order given:

(*a*) Revenue from a fee of approximately 0.5% charged the investor for guarantee protection provided.

(*b*) Money recovered from the sale of assets or local currency acquired by the U.S. Government as a result of a loss due to payment of a claim.

(*c*) Borrowing authority given the program by the Congress.

Operating results and administration.—The fund has sustained no loss and no claims are pending. Fees collected through June 30, 1959, are $4 million and are carried forward as retained earnings as a reserve against possible future loss. The fund bears no expense. Administrative expenses are paid from funds appropriated for general administrative expenses of the economic assistance programs and allocated to the International Cooperation Administration.

The office of Inspector General and Comptroller, Mutual Security, was established in the Department of State in accordance with section 533(a) of the Mutual Security Act of 1954, as amended. It has broad responsibility for (*a*) systems of financial controls and reports, and audit programs relating to all mutual security programs, (*b*) evaluation of the effectiveness of mutual security programs in achieving their objectives (other than strictly military objectives under the military assistance program), and procedures designed to ensure that recommendations to correct mutual security program deficiencies are considered and acted upon, and (*c*) investigations to seek out improper activities in connection with mutual security programs.

The expenses of this office are to be incurred in this account, being funded through expenditure transfers from various mutual security appropriations. Estimated requirements from the various appropriations are as follows:

	1960 estimate	*1961 estimate*
Defense support	$75,000	$400,000
Technical cooperation, general authorization	20,000	100,000

General Provisions

[Sec. 102. No part of any appropriation contained in this title shall be used for publicity or propaganda purposes within the United States not heretofore authorized by the Congress.]

Sec. [103] *102.* None of the funds herein appropriated for Defense Support, the Development Loan Fund, Special Assistance, or the President's Special Authority and Contingency Fund shall be used to finance the construction of any new flood control, reclamation, or other water or related land resource project or program which has not met the standards and criteria used in determining the feasibility of flood control, reclamation and other water and related land resource programs and projects proposed for construction within the [continental limits of the] United States of America as per circular A–47 of the Bureau of the Budget, dated December 31, 1952.

Sec. [104] *103.* Payments made from funds appropriated herein *and from funds appropriated pursuant to chapter I of the Mutual Security Act of 1954, as amended,* for engineering and architectural fees and services to any individual or group of engineering and architectural firms on any one project in excess of $25,000 shall be reported to the Committee on Appropriations of the Senate and House of Representatives at least twice annually.

[Sec. 105. Except for the appropriations entitled "President's special authority and contingency fund" and "Development Loan Fund", not more than 20 per centum of any appropriation item made available by this title shall be obligated and/or reserved during the last month of availability.]

[Sec. 106. The appropriations and authority with respect thereto in this Act shall be available from July 1, 1959, for the purposes provided in such appropriations and authority. All obligations incurred during the period between June 30, 1959, and the date of enactment of this Act in anticipation of such appropriations and authority are hereby ratified and confirmed if in accordance with the terms hereof.]

Sec. [107] *104.* None of the funds provided by this [title] *Act* nor any of the counterpart funds generated as a result of assistance under this [title] *Act* or any prior Act shall be used to pay pensions, annuities, retirement pay or adjusted service compensation for any persons heretofore or hereafter serving in the armed forces of any recipient country.

[Sec. 108. None of the funds herein appropriated shall be used to carry out the provisions of Section 205(1) of the Mutual Security Act of 1959.]

[Sec. 109. None of the funds herein appropriated shall be used to carry out the provisions of Section 401(b) of the Mutual Security Act of 1959.]

[Sec. 110. None of the funds herein appropriated shall be used to carry out the provisions of Section 501 of the Mutual Security Act of 1959.]

Sec. [111] *105.* (a) Within sixty days following the date of enactment of this Act, the President shall transmit to the Committee on Appropriations of the Senate and the Committee on Appropriations of the House of Representatives a report containing a full and complete revision of the data presented to such committees in justification of appropriations requested for the Mutual Security program for the fiscal year [1960] *1961,* showing any changes in such program approved subsequent to such presentation, including changes necessary to reflect actual appropriations for the program.

(b) Within thirty days following the approval of any change in the Mutual Security program for the fiscal year [1960] *1961,* which will result in furnishing assistance of a kind, for a purpose, in an area, or in an amount, different from that described in the report transmitted under subsection (a), and which involves $1,000,000 or more, or 5 per centum of the amount [appropriated under any paragraph of this title] *of any appropriation made herein or pursuant to chapter I of the Mutual Security Act of 1954, as amended,* whichever is the lesser, the President shall transmit to the Committee on Appropriations of the Senate and the Committee on Appropriations of the House of Representatives a full and complete report of such change and the reasons therefor.

(c) This section shall not apply to programs authorized by section 451 of the Mutual Security Act of 1954, as amended.

(d) None of the funds herein appropriated shall be used to carry out any provision of chapter II, III, or IV of the Mutual Security Act of 1954, as amended, in any country, or with respect to any project or activity, after the expiration of the thirty-five day period which begins on the date the General Accounting Office or any committee of the Congress, or any duly authorized subcommittee thereof, charged with considering legislation or appropriations for, or expenditures of, the International Cooperation Administration, has delivered to the office of the Director of the International Cooperation Administration a written request that it be furnished any document, paper, communication, audit, review, finding, recommendation, report, or other material relating to the administration of such provision by the International Cooperation Administration in such country or with respect to such project or activity, unless and until there has been furnished to the General Accounting Office, or to such committee or subcommittee, as the case may be, (1) the document, paper, communication, audit, review, finding, recommendation, report, or other material so requested, or (2) a certification by the President that he has forbidden its being furnished pursuant to such request, and his reason for so doing.

Sec. [112] *106.* The Congress hereby reiterates its opposition to the seating in the United Nations of the Communist China regime as the representative of China, and it is hereby declared to be the continuing sense of the Congress that the Communist regime in China has not demonstrated its willingness to fulfill the obligations contained in the Charter of the United Nations and should not be recognized to represent China in the United Nations. In the event of the seating of representatives of the Chinese Communist regime in the Security Council or General Assembly of the United Nations, the President is requested to inform the Congress insofar as is compatible with the requirements of national security, of the implications of this action upon the foreign policy of the United States and our foreign relationships, including that created by membership in the United Nations, together with any recommendations which he may have with respect to the matter.

Sec. [113] *107.* It is the sense of Congress that any attempt by foreign nations to create distinctions because of their race or religion among American citizens in the granting of personal or commercial access or any other rights otherwise available to United States citizens generally is repugnant to our principles; and in all negotiations between the United States and any foreign state arising as a result of funds appropriated [under this Act] *herein and funds appropriated pursuant to chapter I of the Mutual Security Act of 1954, as amended,* these principles shall be applied as the President may determine. (*Mutual Security Appropriation Act, 1960; authorizing legislation to be proposed for 1961.*)

The purpose of this fund is to strengthen the ties which unite us with other nations by demonstrating the cultural interests, developments, and achievements of the people of the United States, and the contributions being made by the U.S. economic and social system toward a peaceful and more fruitful life for its own people and other people throughout the world.

The Director of the United States Information Agency serves as coordinator of the following activities. The Agency also publicizes the projects abroad and absorbs the cost of such publicity and coordination.

1. *Trade fairs and exhibitions.*—The Department of Commerce administers this program, which provides United States exhibits, trade missions, and labor missions (conducted by the Department of Labor) at important international trade fairs and other strategic locations overseas. Authorizations for 1959 provided for 14 trade fair and solo exhibits, 12 trade missions, and 3 labor missions. This compares with 15 exhibits, 12 trade missions, and 3 labor missions in 1960, and 18 exhibits, 13 trade missions, and 6 labor missions in 1961.

2. *Artistic and athletic presentations.*—The Department of State administers this program, which supports outstanding American cultural attractions appearing abroad. This support is necessary primarily because of high international transportation costs and itineraries to places where commercial revenues are inadequate to cover operating expenses. Approved projects, with itineraries reaching all areas of the world, numbered 15 for 1959, and are estimated at 26 during 1960, and 32 during 1961.

3. *Universal and international exhibition of Brussels.*—No estimate is included for this activity inasmuch as the fair ended in October 1958.

Financing:			
Appropriation (new obligational authority)		10,500,000	6,000,000

Section 44 of the Alaska Omnibus Act (73 Stat. 151) authorizes grants to the State of Alaska for a 5-year period ending June 30, 1964, to facilitiate assumption by the State of responsibilities hitherto performed in Alaska by the Federal Government.

These funds are to enable the President (*a*) to make grants to the State to assist in financing functions transferred from the Federal Government, and (*b*) to finance continued Federal operations for an interim period when the State requests a delay in transfer of functions. In June 1959, the State requested that the Federal Government continue operation of 17 primary and intermediate airports, and allocations were made to the Federal Aviation Agency for this purpose.

The $6 million requested for 1961 is the maximum authorized by law.

MISCELLANEOUS—Continued

INFORMATIONAL FOREIGN CURRENCY SCHEDULE—Continued

Title I of the Agricultural Trade Development and Assistance Act of 1954 authorizes the sale of surplus agricultural commodities to friendly nations for their currencies, with reasonable precautions neither to displace U.S. sales for dollars nor to disrupt unduly world commodity prices. Such sales may include up to $1.5 billion of commodities a year, plus unused prior authority. The Commodity Credit Corporation finances the costs. The foreign currencies generated by these sales may be used (*a*) to help develop new markets for U.S. agricultural commodities, (*b*) to purchase strategic and critical materials, (*c*) to procure military materiel and services for the common defense, (*d*) to purchase goods and services for other friendly nations, (*e*) to promote balanced economic development and trade among nations including loans to American and foreign business firms abroad, (*f*) to pay U.S. obligations abroad, (*g*) to make loans to promote multilateral trade and economic development abroad, (*h*) to finance international education exchange activities, (*i*) to translate and publish books and other publications abroad, (*j*) to aid American-sponsored schools, libraries, and binational centers overseas, (*k*) to finance the translation of scientific and technical publications and support scientific activities overseas, (*l*) to acquire buildings and grounds abroad, (*m*) to finance participation in trade fairs and related activities, (*n*) to acquire books from abroad, (*o*) to aid American educational institutions abroad, (*p*) to support workshops and chairs in American studies, (*q*) to provide emergency relief, and (*r*) to finance audiovisual materials and programs.

Most of the currencies are used for grants to and loans in the foreign country without charge to appropriations. Some are sold to appropriations, and the proceeds of such sales go to the Commodity Credit Corporation. Beginning in 1961, recommendations in this document provide appropriations to purchase all currencies used for U.S. programs. A lump-sum appropriation is recommended to reimburse the Commodity Credit Corporation for its losses which are not made up through such sales.

As of June 30, 1960, it is estimated agreements will have been signed calling for deposits of sales proceeds totaling $4.7 billion. This will represent the market value of commodities and ocean transportation in which the Commodity Credit Corporation investment will be approximately $6.4 billion.

Schedules covering special currency uses are included in the budgets for the Library of Congress, mutual security program, Export-Import Bank, United States Information Agency, and the Departments of Agriculture, Commerce, Defense, Health, Education, and Welfare, and State. These schedules do not cover use of currencies for sale to regular appropriations.

INDEPENDENT OFFICES

The total recommended new obligational authority for the independent offices for 1961 is $10,400 million. Over three-quarters of this total is for two agencies: $5,465 million (or 52%) for the Veterans Administration and $2,666 million (or 26%) for the Atomic Energy Commission. Two other agencies—the National Aeronautics and Space Administration and the Federal Aviation Agency—account for another 15% of the total. The remainder is scattered among the 42 other independent agencies and 9 historical and memorial commissions.

The 1961 total of new obligational authority is $366 million less than the estimate for 1960. The major factor in this decline is a decrease of $744 million for the Tennessee Valley Authority, reflecting the nonrecurring revenue bond authority of $750 million enacted in 1960. Other decreases, mainly for the Atomic Energy Commission and the Small Business Administration, are more than offset by increases recommended for the National Aeronautics and Space Administration, the Federal Aviation Agency, the Veterans Administration, and the Civil Service Commission.

Expenditures of the independent offices in 1961 are estimated at $10,181 million, of which 53% is accounted for by the Veterans Administration, 26% by the Atomic Energy Commission, 7% by the Federal Aviation Agency, and 6% by the National Aeronautics and Space Administration. Most of the increase of $688 million over the 1960 estimate is for these agencies, mainly NASA and FAA.

New obligational authority and expenditures for the independent offices are shown in the following table:

[ADVISORY COMMISSION ON INTERGOVERNMENTAL RELATIONS]

Current authorizations:

[ADVISORY COMMISSION ON INTERGOVERNMENTAL RELATIONS]

[For expenses necessary for the Advisory Commission on Intergovernmental Relations, $50,000: *Provided*, That this appropriation shall be effective only upon the enactment into law of H.R. 6904.] (*Mutual Security Appropriation Act, 1960.*)

Appropriated 1960, **$50,000**

Program and Financing

	1959 actual	1960 estimate	1961 estimate
Program by activities:			
Continuing attention to intergovernmental relations (object class undistributed)		$50,000	
Financing:			
Appropriation (new obligational authority)		50,000	

This Commission, authorized by Public Law 86–380, approved September 24, 1959, will give continuing attention to interrelations of Federal, State, and local governments. A supplemental appropriation for 1961 is anticipated under Proposed for later transmission.

Proposed for later transmission:

ADVISORY COMMISSION ON INTERGOVERNMENTAL RELATIONS

Program and Financing

	1959 actual	1960 estimate	1961 estimate
Program by activities:			
Continuing attention to intergovernmental relations (total obligations)			$175,000
Financing:			
Proposed supplemental appropriation			175,000

Under existing legislation, 1961.—When the Commission has had an opportunity to review its financial requirements, a supplemental appropriation presently estimated at $175,000 is anticipated to finance its requirements in 1961.

[ALASKA INTERNATIONAL RAIL AND HIGHWAY COMMISSION]

Current authorizations:

[SALARIES AND EXPENSES]

[Funds available under this heading shall remain available until June 30, 1961.] (*Supplemental Appropriation Act, 1960.*)

Program and Financing

	1959 actual	1960 estimate	1961 estimate
Program by activities:			
Study of rail and highway routes (total obligations)	$28,268	$173,000	$49,683
Financing:			
Unobligated balance brought forward	−18,605	−222,683	−49,683
Unobligated balance carried forward	222,683	49,683	
Unobligated balance no longer available	7,654		
Appropriation (new obligational authority)	240,000		

The Commission was established to study the economic and military feasibility of additional rail and highway connections between the United States and Alaska. The final report will be submitted to Congress no later than June 1, 1961.

SALARIES AND EXPENSES—Continued

tional 91,614 dead whose remains were not recovered are commemorated by memorial structures inscribed with their names. There are 8 cemeteries, each with a memorial chapel, and 11 memorials outside the cemeteries at World War I sites, and 14 cemeteries and memorials at World War II sites. In addition, the Commission maintains the U.S. National Cemetery, Mexico City, Mexico, and the Santiago, Cuba, Surrender Tree Site.

Large numbers of American and local citizens visit the cemeteries and memorials annually to pay homage and to see these points of historic and artistic interest.

Appropriation (new obligational authority)			

This is the 12th year of a $36-million program of construction of 14 cemeteries and memorials in foreign countries to commemorate the services of the American Armed Forces in World War II. Nearly all the facilities will be built by the end of 1960. In the summer of 1960, eight cemeteries and memorials will be dedicated; the other six cemeteries were dedicated in 1956.

The 1961 construction program will finance the completion of memorials in the Hawaii National Cemetery and in New York City. The Hawaii memorial commemorates American dead of the Pacific theater of World War II and the Korean conflict whose remains were not recovered or identified. The east coast memorial in New York City will honor the World War II servicemen who lost their lives in the western Atlantic.

[1] Includes capital outlay for equipment: 1959, $87,478,311; 1960, $93,358,000; 1961, $99,180,000. See table below.

The Commission procures raw materials; manufactures special nuclear materials and atomic weapons; develops improved weapons; conducts research and development aimed at generation of atomic power and protection of health against possible hazards arising from atomic energy operations; conducts investigations in the physical and life sciences related to atomic energy, including investigation of controlled thermonuclear reactions; establishes and enforces regulations for civilian uses of atomic energy; promotes industrial participation in atomic energy development for peaceful purposes; encourages scientific and industrial progress through the dissemination of atomic energy information; and participates in programs of international cooperation in peaceful applications of atomic energy.

The program is administered in the field through 12 major offices. Most of the Commission's activities are carried on in Government-owned facilities by industrial concerns and educational institutions operating under contracts. Coordination with the armed services is achieved through the Military Liaison Committee of the Department of Defense.

Total program costs in 1961 are estimated at $2,446.2 million, or $45.6 million less than the estimated 1960 costs of $2,491.8 million, and $117 million greater than actual costs of $2,329.2 million for 1959. In 1961, principal increases occur in civilian and military power and propulsion reactor development, and in research in the physical and biomedical sciences. These increases are offset by a major reduction in raw materials procurement.

In 1961, as in 1959 and 1960, total program obligations exceed program costs, the difference being obligations incurred for costs which will not materialize until future years. Total program obligations for operating expenses in 1961 are estimated to be $2,472.9 million compared to $2,543 million in 1960 and $2,347.5 million in 1959.

1. *Raw materials.*—Uranium ores and concentrates are procured for processing in the production facilities of the Commission. An estimated 31,566 tons of concentrates, of which more than half will come from domestic sources, will be obtained in 1961. This is a decrease of 3,768 tons under the 35,334 tons estimated to be procured in 1960. Procurement in 1959 was 33,326 tons. Resource evaluation will continue in the development of data on uranium reserves.

2. *Special nuclear materials.*—Uranium concentrates are processed into feed materials from which (*a*) plutonium is produced in the reactors at Hanford, Wash., and Savannah River, S.C., or (*b*) the isotope uranium 235 is extracted in plants at Oak Ridge, Tenn., Paducah, Ky., and Portsmouth, Ohio. Production of special nuclear materials will be at rates required to meet weapons production schedules and non-weapons requirements. Work will continue on process improvement to assure continuity and safety of operation and more economic methods of production.

ATOMIC ENERGY COMMISSION—Continued

Current authorizations—Continued

OPERATING EXPENSES—Continued

3. *Weapons.*—This program encompasses the production of weapons; the maintenance of stockpiled weapons in a state of constant readiness; the development and design of new weapons types; and the maintenance of test areas on a standby basis. The production and development effort in 1961 will remain at essentially the 1959 and 1960 level.

4. *Reactor development.*—This program includes primarily the development of (*a*) reliable and economic civilian power reactors, including associated work on fuel element development and related technology, (*b*) commercial ship reactors, (*c*) power and propulsion reactors for a variety of military and space applications, and (*d*) nuclear technology for other civilian applications, such as the process heat reactors.

The costs by major category are:

Civilian power reactors:			
Government program	$84,628,520	$99,994,000	$97,900,000
Cooperative arrangements program	15,540,185	19,595,000	25,400,000
Euratom program	2,099	2,100,000	5,000,000
General supporting reactor research and development program	28,735,758	43,934,000	49,500,000
Subtotal, civilian power reactors	128,906,562	165,623,000	177,800,000
Merchant ship propulsion reactors	4,695,851	7,474,000	8,300,000
Army power reactors	9,009,951	11,958,000	15,000,000
Naval propulsion reactors	83,401,324	86,800,000	85,000,000
Aircraft propulsion reactors	66,850,575	62,832,000	73,000,000
Missile propulsion reactors	22,072,515	34,750,000	40,300,000
Satellite power sources	7,654,347	12,400,000	14,000,000
Operational services and equipment	24,466,148	20,563,000	22,800,000
Total, reactor development	347,057,273	402,400,000	436,200,000

The Commission's civilian power reactor program provides a foundation of technical knowledge through a program of research and development on promising reactor concepts; design, fabrication, and operation of power reactor experiments; the development of experimental reactors; and development of prototype powerplants usually on a cooperative basis with industry. Through the cooperative arrangements program, the Commission provides financial aid in development of full-scale power reactors built by private industry and public power bodies. This aid provides a basis for a privately financed nuclear power industry.

Costs of $5 million shown for Euratom are for research and development under a joint program with the European Atomic Energy Community for which $10 million has been authorized and appropriated in prior years.

To provide broad support primarily for civilian power reactor projects, the Commission's programs include general research and development on materials, components, moderators, control techniques, fuel elements, spent fuels reprocessing, and radioactive residues. Some of this work is also applicable to military reactor development programs. Increases are provided for developing improved fuel elements, reactor systems, and reactor components to accelerate development of economic power.

The Commission's program for 1961 includes the continuation of work to develop atomic powerplants for use in commercial vessels. The nuclear-powered merchant ship, the NS *Savannah*, is scheduled for completion in 1960, and will undergo test operations in 1961. Research and development work will continue.

Efforts will be continued to develop reactors to meet requirements of the Department of Defense and the National Aeronautics and Space Administration. These include propulsion reactors for submarines, surface combatant ships, military aircraft and missiles, space rockets, and transportable powerplants for the generation of electric power and heat in satellites and at remote military installations. Development of a new improved reactor concept for naval ship propulsion will be continued. Many of the advances in military reactor development contribute significantly to the civilian power program. Increased cost levels for these programs in 1961 are principally related to the missile and satellite programs, increased effort on nuclear aircraft applications, and development of advanced compact reactors under the Army reactor program.

The Commission also operates the National Reactor Testing Station in Idaho, including two test reactors which provide irradiation services for the Commission's programs, and for private industry on a reimbursable basis.

5. *Physical research.*—Basic and long-range investigations in the fields of physics, mathematics, chemistry, and metallurgy are undertaken to provide an ever-expanding fund of theoretical and practical knowledge in fields related to nuclear energy. Approximately 90 particle accelerators ranging in energy from several thousand electron volts to several billion electron-volts, are utilized in the program. Research and development directed toward the production of power from the controlled fusion of heavy hydrogen nuclei (controlled thermonuclear program) will continue. Approximately 72% of the research is conducted at 13 laboratories owned by or operated for the Commission, and the remainder, comprising approximately 500 projects, is supported in more than 140 universities, colleges, institutes, and independent laboratories. The budget provides increases in 1961 for research in nuclear physics, primarily for the operating and equipping of new particle accelerators in the multibillion electron volt range, and in chemistry and metallurgy.

6. *Biology and medicine.*—Research is conducted on the effect of radiation on living things. It includes investigations of the biological effects of radioactivity in the body and the development of methods for minimizing exposure to radioactive materials of all kinds and for minimizing and protecting against the injurious effects of radiation. Support is given to the development of methods of utilizing radioactive materials for human welfare, and to the diagnosis, treatment, and understanding of human diseases, such as cancer. Evaluation of the significance of human exposure to radioactivity from all sources is given special emphasis. Research provides the basis for establishment of standards to insure that the Commission's activities are conducted with safety.

The major portion of the research is carried on at 15 laboratories which are owned by or operated for the Commission, and the remainder, approximately 550 projects, is supported in more than 220 universities, colleges, hospitals, and independent laboratories. The program includes the operation of several facilities in the United States devoted to cancer research and two laboratories in Japan for the determination of long-term effects of atomic bombs on the population.

7. *Training, education, and information.*—This activity includes operation of special schools; conduct of specialized courses; granting of fellowships for graduate students; assistance to high schools, colleges, and universities; and dissemination of technical information, including participation in international conferences and exhibits on nuclear science and technology.

Two schools will be operated in 1961: The International Institute of Nuclear Science and Engineering at the

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

Argonne National Laboratory and the Puerto Rico Training Center. Specialized courses are conducted at the Oak Ridge Institute of Nuclear Studies. In addition, at the New York Health and Safety Laboratory, at the Oak Ridge National Laboratory, and at the Shippingport reactor site, specialized courses including radiochemical and counting procedures and reactor hazards and supervisory instruction will be offered.

Under the fellowship program in 1961, approximately 150 college graduates, compared to 134 in 1960 and 117 in 1959, will receive assistance for graduate studies in reactor technology. Other fellowships are offered in the fields of radiological physics, industrial hygiene, and industrial medicine.

Assistance to schools to provide for educational programs in atomic energy will be continued. Grants are made to universities to help them acquire reactor training equipment, teaching aids, demonstration apparatus, and special laboratory equipment. University summer courses in general radiobiology are made available to high school science teachers, and special faculty training in reactor technology and radiobiology for university faculty members is provided.

To broaden the dissemination of information on matters relating to atomic energy, the Commission operates the technical information service, maintains libraries, performs translation services, and conducts tours with traveling atomic energy exhibits. The Commission arranges for nuclear exhibits at selected foreign conferences and exhibitions in order to demonstrate U.S. technology.

8. *Civilian applications of isotopes development and nuclear explosives.*—This program provides for Commission participation in development of isotopes and the peaceful uses of nuclear explosives (Project Plowshare).

The costs for these programs are:

	1959 actual	*1960 estimate*	*1961 estimate*
Isotope development	$3,131,576	$4,000,000	$4,500,000
Peaceful uses of nuclear explosives	2,630,821	8,000,000	8,000,000
Total	5,762,397	12,000,000	12,500,000

The first of these is directed at the development of principles of new and expanded applications for the use of radioisotopes and radiation in industry, agriculture, and medical products. It provides for participation in research and development projects with educational, industrial, and research organizations in developing this technology. Training in radiation technology is supported through special courses and equipment grants to universities.

The project Plowshare provides for the investigation and development of the peaceful uses of nuclear explosives, including research, development, and experimentation on specific applications. Applications include those for civil engineering, oil recovery, power and isotope production, mining, and development of unique scientific data.

9. *Communities.*—Under the provisions of the Atomic Energy Community Act of 1955 (Public Law 84–221), the communities of Oak Ridge, Tenn., and Richland, Wash., incorporated as cities as of June 1959 and December 1958, respectively. It is anticipated that all facilities will have been transferred to the newly incorporated cities or other local entities by the end of 1960, thereby ending Government ownership and operation of these communities. The 1961 estimates provide for the first full year of assistance payments to these communities under the provisions of Public Law 84–221.

The Commission will continue to operate the town of Los Alamos, N. Mex., with an estimated population in 1961 of 14,000 and provide limited community services at other locations.

The relationship between costs and revenue included under Advances and reimbursements from non-Federal sources (revenue applied) is indicated in the following table:

	1959 actual	*1960 estimate*	*1961 estimate*
Revenue	$13,188,623	$10,501,000	$5,697,000
Operating costs, including Atomic Energy Commission costs related to disposal	16,509,601	14,632,000	10,204,000
Excess of costs over revenue	3,320,978	4,131,000	4,507,000

10. *Program direction and administration.*—In addition to general management, this activity includes the negotiation and administration of contracts, and the establishment and enforcement of regulations for civilian uses of atomic energy, including the issuance of licenses. The costs under this activity represent 2.2% of total program costs in 1961 compared to 2.1% in 1960 and 1959. The increase of $2.9 million provides for higher average employment and, for the first time, funds to cover the costs of the Federal Employee Health Benefits Act of 1959 (Public Law 86–382).

11. *Security investigations.*—The Atomic Energy Act of 1954 requires background investigations of those persons proposed for access to restricted data of the atomic energy program. The number of full background investigations to be completed in 1961 is estimated at 16,225 compared with 17,258 for 1960 and 21,139 for 1959.

12. *Other costs.*—In furthering the objectives of the Atomic Energy Act of 1954 concerning the utilization of atomic energy for peaceful purposes, the Commission furnishes materials and services, apart from those which it provides normally for its own basic programs, to industrial organizations and other private parties. Costs for these are incurred only upon the request of others. Charges made for such products and services are reflected in the budget under Advances and reimbursements from non-Federal sources (revenue applied) and are applied as a source of funds, thereby reducing the amount of appropriations required. The items included are:

	1959 actual	*1960 estimate*	*1961 estimate*
Costs of products sold	$4,271,026	$4,515,000	$5,162,000
Costs of services performed	1,288,646	1,285,000	1,338,000
Total other funded costs (excluding depreciation)	5,559,672	5,800,000	6,500,000
Related revenue	7,750,870	8,160,000	8,600,000
Excess of revenue over funded costs	2,191,198	2,360,000	2,100,000

14. *Relation of costs to accrued expenditures.*—The relationship is derived from year-end balances of accrued resources as reflected in the following table:

	1958 actual	*1959 actual*	*1960 estimate*	*1961 estimate*
Accrued resources at end of year: Inventories and items on order:				
Inventories of Atomic Energy Commission and integrated contractors (goods unconsumed by activities)	$186,634,182	$191,790,775	$185,798,000	$182,307,000
Advances (payments for goods and services on order not yet received):				
To other Federal agencies	4,556,161	3,451,772	3,451,772	3,451,772
To nonintegrated contractors	2,678,615	2,327,846	2,327,846	2,327,846
Prepaid expenses of Atomic Energy Commission and integrated contractors: Payments for:				
Collateral funds and other deposits	21,006,725	20,693,649	20,684,000	20,684,000
Goods and services on order not yet received	40,622,945	22,592,611	19,728,275	43,248,275
Total accrued resources at end of year	255,498,628	240,856,653	231,989,893	252,018,893
Accrued resources at start of year (−)		−255,498,628	−240,856,653	−231,989,893
Costs financed from accrued expenditures of other years, net (−)		−14,641,975	−8,866,760	
Expenditures accrued for costs of other years, net				20,029,000

ATOMIC ENERGY COMMISSION—Continued

Current authorizations—Continued

OPERATING EXPENSES—Continued

The increase in 1961 over the 1960 estimate is related principally to increases in working capital balances related to procurement of uranium concentrates deferred until future years.

Unpaid undelivered orders.—The increase in unpaid undelivered orders balances in 1961 over 1960 is attributable primarily to higher operating levels for the reactor development and research programs.

Advances and reimbursements from non-Federal sources (revenue applied).—This item shown as a source of financing on the Program and financing schedule, reduces appropriation requirements and is obtained from services performed; the sale and lease of products, including sale and lease of nuclear materials produced as a part of the Commission's own basic program; the operation of the Atomic Energy Commission-owned communities and housing; the sale of special reactor materials; and products and services for which costs are incurred only upon the request of others and are included under Other costs. The items included are:

	1959 actual	*1960 estimate*	*1961 estimate*
Income from products sold and services performed the costs of which are included in program costs of current or prior years:			
Sale of source and special nuclear materials and related products	$1,351,404	$1,600,000	$1,032,000
Income from lease of materials and consumption charges for special nuclear materials	1,058,374	2,302,000	2,448,000
Income from sale of steam	2,222,888	1,560,000	2,060,000
Income from research hospitals	374,274	375,000	375,000
Income from training, education, and information	286,484	334,000	370,000
Income from communities	13,188,623	10,501,000	5,697,000
Miscellaneous income	1,846,406	2,018,000	2,018,000
Subtotal	20,328,453	18,690,000	14,000,000
Income from other products sold and services performed costs of which are incurred at request of others and included under Other costs:			
Products sold	6,719,118	6,568,000	6,920,000
Services performed	1,031,752	1,592,000	1,680,000
Subtotal	7,750,870	8,160,000	8,600,000
Total, Advances and reimbursements from non-Federal sources (revenue applied)	28,079,323	26,850,000	22,600,000

Equipment not included in construction projects.—Equipment not included in construction projects is budgeted under the individual operating programs, and such costs are included in the amounts shown for each program on the program and financing schedule.

A tabulation of capital outlays for equipment included in the operating programs is as follows:

	1959 actual	*1960 estimate*	*1961 estimate*
Equipment costs incurred:			
Raw materials	−$22,575	$50,000	$50,000
Special nuclear materials	20,519,997	22,342,000	22,323,000

7. Training, education, and information	896,209	1,043,000	150,000
8. Civilian applications of isotopes development and nuclear explosives		3,400,000	
9. Communities	2,282,149	3,227,000	1,240,000
10. Administration	656,968	691,000	600,000
Total obligations	291,126,982	472,565,500	215,500,000
Financing:			
Unobligated balance brought forward	−222,864,482	−209,915,500	
Recovery of prior year obligations	−28,249,000	−150,000	
Unobligated balance carried forward	209,915,500		
Appropriation (new obligational authority)	249,929,000	262,500,000	215,500,000

From this appropriation the Atomic Energy Commission constructs the plants and facilities necessary for its production, research and development, and supporting operations. Appropriations for plant acquisition and construction and for financial assistance in the development of reactors require specific authorization by the Congress. Of the new obligational authority being requested for 1961, $47.2 million applies to construction projects previously authorized, with the balance of $168.3 million being applicable to projects for which authorization is being requested in 1961.

The details of the 1961 estimates by activity are as follows:

1. *Raw materials.*—This activity provides for minor construction to support the Government-owned procurement installations.

2. *Special nuclear materials.*—This activity provides for additions, modifications, and improvements to feed materials plants, the gaseous diffusion plants, and the production reactor installations. Obligational requirements in 1961 include $25 million to complete the funding for the new production reactor at Hanford, Wash., already authorized.

3. *Weapons.*—This activity provides for the construction and modification of facilities for the production of weapons and for the development and engineering of new weapon types.

4. *Reactor development.*—This activity provides for the construction of laboratory buildings for fundamental engineering work on reactor concepts and materials, facilities for the housing of reactor experiments, civilian power experimental reactors generating electrical energy or producing over 10,000 kilowatts of heat, prototype power reactors as part of the cooperative arrangements program between the Commission and industry, prototype reactors for military purposes, and construction of testing and development installations. Funds provided in 1961 for new projects requiring authorization relate principally to construction of an additional civilian power prototype reactor under the cooperative power reactor demonstration program, an advanced test reactor, and test facilities for development of nuclear rocket and ramjet engines and long-lived power sources for space vehicles. Obligational requirements in 1961 include $22.2 million to complete the funding for projects already authorized, principally a power reactor to demonstrate nuclear superheat and a ground prototype for a naval natural circulation reactor.

The budget provides that funds available for the cooperative power reactor demonstration program may be transferred to Operating expenses, if the Commission determines that such transfer is necessary to carry out the purposes of that program as authorized in the Commission's authorization act for 1961. The funds transferred would be used to provide research and development assistance toward the construction of one or more power reactor prototypes by public or private utility groups.

5. *Physical research.*—This activity provides for construction of large research machines and laboratory buildings to further research in physics, chemistry, and metallurgy. It includes construction and modification of ultra-high energy particle accelerators in the multibillion electron-volt range, which will assist in obtaining new knowledge about the atomic nucleus and the elementary particles, and in 1961 construction of a high-flux isotope reactor for the production of transuranium elements.

6. *Biology and medicine.*—This activity provides for construction supporting biomedical research in atomic energy.

7. *Training, education, and information.*—This activity provides for construction in connection with the Commission's training program.

8. *Civilian applications of isotopes development and nuclear explosives.*—This activity provides for the construction of facilities required for the research and development directed toward the civilian applications of isotopes and the peaceful uses of nuclear explosives. No new obligational authority is being requested in 1961.

9. *Communities.*—This activity provides for improvements to facilities in the communities of Los Alamos and Sandia, N. Mex.

10. *Administration.*—This activity provides for improvements and modifications of administrative facilities at the Commission headquarters in Germantown, Md.

The costs to this appropriation and the financing of these projects are analyzed in the following table:

ALLOCATIONS RECEIVED FROM OTHER ACCOUNTS

NOTE.—Obligations incurred under allocations from other accounts are included in the schedules of the parent appropriations as follows:
"Research and development," Office of Civil and Defense Mobilization.
"Ship construction," maritime activities, Department of Commerce.
"Operation and maintenance, Navy."
"Shipbuilding and conversion, Navy."
"Navy management fund."
"Military construction, Army."
"Research, development, test, and evaluation, Army."
"Procurement of equipment and missiles, Army."
"Operation and maintenance, Army."
"Research and development," National Aeronautics and Space Administration.
"Research, development, test, and evaluation, Air Force."
"Procurement other than aircraft and missiles (Air Force)."
"Mutual security," funds appropriated to the President.

GENERAL PROVISIONS

Any appropriation available under this or any other Act to the Atomic Energy Commission may initially be used subject to limitations in this Act during the fiscal year [1960] *1961* to finance the procurement of materials, services, or other costs which are a part of work or activities for which funds have been provided in any other appropriation available to the Commission: *Provided,* That appropriate transfers or adjustments between such appropriations shall subsequently be made for such costs on the basis of actual application determined in accordance with generally accepted accounting principles.

Not to exceed 5 per centum of any appropriation herein may be transferred to any other such appropriation, but no such appropriation, except as otherwise provided herein, shall be increased by more than 5 per centum by any such transfers, and any such transfers shall be reported promptly to the Appropriations Committees of the House and Senate.

No part of any appropriation herein shall be used to confer a fellowship on any person who advocates or who is a member of an organization or party that advocates the overthrow of the Government of the United States by force or violence or with respect to whom the Commission finds, upon investigation and report by the Civil Service Commission on the character, associations, and loyalty of whom, that reasonable grounds exist for belief that such person is disloyal to the Government of the United States: *Provided,* That any person who advocates or who is a member of an organization or party that advocates the overthrow of the Government of the United States by force or violence and accepts employment or a fellowship the salary, wages, stipend, grant, or expenses for which are paid from any appropriation contained herein shall be guilty of a felony and, upon conviction, shall be fined not more than $1,000 or imprisoned for not more than one year, or both: *Provided further,* That the above penal clause shall be in addition to, and not in substitution for, any other provisions of existing law. (*42 U.S.C. 2011; Atomic Energy Commission Appropriation Act, 1960.*)

Public enterprise funds:

DEFENSE PRODUCTION GUARANTEES

Program and Financing

	1959 actual	1960 estimate	1961 estimate
Program by activities:			
Operating costs: Administrative expenses (total costs—obligations) (object class 07)	$672	$1,000	$1,000
Financing:			
Amounts becoming available: Revenue and receipts: Guarantee and commitment fees	61,180	24,370	2,826
Unobligated balance brought forward	436,049	496,557	519,927
Total amounts available	497,229	520,927	522,753
Unobligated balance carried forward	496,557	519,927	521,753
Financing applied to program	672	1,000	1,000

Guarantees are given on loans made by private sources to provide construction funds and working capital for defense production plants. At the beginning of 1959 guaranteed credit amounting to $5.6 million was available to 3 borrowers; at year end $3.0 million was available to 2 borrowers. Guarantees of 75% to 95% were in force on these loans. It is estimated that in 1960 and 1961 guarantees will be in force on 2 loans for which the total amount of guaranteed credit available at the end of each year will be $1 million and $100,000, respectively.

Net earnings are retained to meet possible future losses (50 U.S.C. App. 2091 and 2092).

Unobligated balance carried forward	6,941,389	5,354,872	3,661,072
Appropriation (new obligational authority)			

1. *Design, specifications, and supervision.*—Plans for the new headquarters installation were completed in calendar year 1958.

2. *Construction of building.*—From the $54,500,000 appropriated in prior years a contract for excavation and foundations was awarded in 1958 and work is now virtually complete. A contract for the superstructure was awarded in March 1959 and is scheduled for completion in August 1961.

3. *Construction of roads.*—Up to $8,500,000 was available for the extension of the George Washington Memorial Parkway to the headquarters site. Construction was begun in 1956 and is now complete.

The Board regulates the economic aspects of air carrier operations, both domestic and international; investigates aircraft accidents; participates in the development of international air transportation; and participates in the development of safety rules and standards. The increase proposed for 1961 is for expansion in certain critical program areas, primarily in the routes, commercial rates, international civil aviation, enforcement, and safety areas.

1. *Economic regulation.*—This includes granting certificates of public convenience and necessity; prescribing or approving rates and rate practices of air carriers; fixing mail rate compensation; prevention of unfair competition; approval of business relationships between air carriers; and adjudication of complaints alleging violations of civil air regulations.

2. *Safety activities.*—These consist of the investigation of civil aircraft accidents involving aircraft over 12,500 pounds or causing fatalities; the determination of probable cause in all civil aircraft accidents; and the investigation of potential hazards and recommendation of preventive measures to avoid accidents in the future.

3. *Board adjudication, executive, and legal staff activities.*—In addition to adjudication of cases and top policy and decision making functions of the Board, legal advice and assistance is provided on all aspects of economic, regulatory, and safety activities; opinions of the Board are prepared; and litigation matters are handled.

Federal Reserve Bank of St. Louis

The Civil Aeronautics Board fixes rates for transportation of airmail to promote the development of air transportation required for the commerce of the United States, the postal service, and the national defense. Many of these rates include an element of subsidy to be paid by the Board in addition to the rate for service performed which is paid by the Post Office Department.

At present, subsidy obligations incurred by the Board in carrying out its ratemaking functions under section 406 of the Federal Aviation Act of 1958 are not subject to prior budgetary and appropriation control. Congressional appropriations provide only for making subsequent payments to air carriers and have no effect on the Board's authority to obligate the Federal Government for subsidies. These appropriations to liquidate contract authorizations are available until expended but are requested only in the amounts required for payments estimated to become due in the budget year.

The obligations shown above, less the obligated balances recovered, reflect the amounts recorded each year as due the air carriers. These sums cover services performed during the year, computed at rates then in effect, plus or minus such adjustments as are needed to reflect the issuance, during the year, of rate orders affecting prior years. Approximately 1 to 2 months of obligations are due but unpaid at the end of any year.

For the local service carrier group, the 1961 estimates reflect an increase resulting from certification of additional routes, temporary costs associated with the acquisition of new equipment, and increased operating costs. The estimated 1961 obligations for Alaskan carriers reflect an increase due to retroactive adjustments for prior year operations.

The following table reflects the estimated amounts becoming due finally for each year, together with the adjustments between years:

ESTIMATED SUBSIDY EARNINGS RELATED TO OBLIGATIONS

	1959 actual	*1960 estimate*	*1961 estimate*
Estimated subsidy earnings under final Board action:			
Domestic trunklines	$1,200,888	----------	----------
Local service operations	37,504,832	$49,771,000	$55,434,000
Helicopter operations	4,857,685	4,859,000	4,760,000
Alaskan operations	7,832,704	8,722,000	7,957,000
Hawaiian operations	387,000	----------	----------
International operations	----------	----------	----------
Total earnings	51,783,109	63,352,000	68,151,000
Earnings in prior years recorded within the year	7,107,552	7,707,307	6,101,720
Earnings of the year recorded in later years (−)	−6,492,255	−4,650,989	−2,612,720
Total obligations	52,398,406	66,408,318	71,640,000

The following analysis shows the subsidy outlook for 1961 under final Board actions:

CARRIER UNITS

	Non-subsidized	*Subsidized*	
Domestic:			
Domestic trunklines	12	--	All domestic trunklines are in nonsubsidized status. Subsidy need for local service operations has increased as a result of certification of additional routes, acquisition of new equipment, and increasing costs. Subsidy will continue to support helicopter operations.
Local service operations	--	13	
Helicopter operations	--	3	
Alaskan operations	1	7	Subsidy will continue to support routes between continental United States and Alaska and to remote localities. Hawaiian and international operations are in nonsubsidized status.
Hawaiian operations	2	--	
International operations	11	--

Financing:			
1959 appropriation available in 1958	118,306		
Unobligated balance no longer available	19,347		
Appropriation (new obligational authority)	19,787,200	19,120,000	20,030,000

1. *Recruiting and examining.*—Most appointments in the competitive civil service are made under the open competivive merit system through examinations held by the offices of the Commission and its boards of examiners, made up of agency personnel operating under the supervision and direction of the Commission. Appointments through such competitive examinations will accord career or career-conditional status. The number of such appointments made by boards of examiners will continue to increase in 1960 and 1961, due primarily to expansion of the board program in the Post Office Department. Physically handicapped persons are given special placement attention. Veterans are aided in securing the benefits to which they are entitled.

PRODUCTION COUNT

	1959 actual	*1960 estimate*	*1961 estimate*
Examinations announced by—			
The Commission	4,048	3,260	3,270
Boards of examiners	4,388	5,060	5,350
Total	8,436	8,320	8,620
Applications processed by—			
The Commission	604,404	487,700	467,900
Boards of examiners	1,358,873	1,446,800	1,532,100
Total	1,963,277	1,934,500	2,000,000

2. *Investigation of character and fitness for employment.*—The Commission conducts most of the investigations required for security determinations of persons being employed in sensitive positions and fitness investigations of all persons entering nonsensitive positions. The Commission also conducts other investigations connected with appeals and the merit system.

PRODUCTION COUNT

	1959 actual	*1960 estimate*	*1961 estimate*
National agency check and inquiry cases	248,349	242,000	242,000
Suitability cases resulting from national agency check and inquiry	6,558	5,900	6,900
Other personal investigations	6,269	6,520	7,420

3. *Inspections and classification audits.*—The Commission inspects agency personnel operations to insure compliance with civil service laws and regulations and to stimulate improvement in personnel practices. It also conducts classification reviews to insure compliance with classification standards. In addition, the Commission administers the incentive awards program and promotes interagency training programs for Federal employees.

4. *Administration of the retirement systems.*—Administering the Civil Service Retirement Act and other benefit acts involves adjudicating annuity, death, benefit, refund, and deposit claims as well as maintaining the control accounts for the funds and making payments to annuitants and other claimants.

PRODUCTION COUNT

	1959 actual	*1960 estimate*	*1961 estimate*
Annuity and death claims	106,858	93,300	109,700
Refund claims	156,570	163,200	172,900
Claims for deposit	33,626	25,500	40,700
Inquiries answered	237,946	214,500	224,800

5. *Developing programs and standards.*—The Commission develops programs, devises tests, issues standards and regulations, and proposed legislation to improve the Federal personnel system for both competitive and noncompetitive positions.

6. *Appellate functions.*—These consist of hearing and taking action on appeals; administering the political activities statutes; and providing advice to agencies and individuals regarding rights of appeal.

8. *Relation of costs to obligations.*—The year-end balances of unpaid undelivered orders are as follows: 1958, $287,804; 1959, $137,853; 1960, $142,500; 1961, $142,500.

Government Payment for Annuitants, Employees Health Benefits Fund

For payment to the "Employees health benefits fund" of Government contributions with respect to annuitants, as authorized by section 7 of the Federal Employees Health Benefits Act (73 Stat. 713), $2,500,000, to remain available until expended.

Estimate 1961, **$2,500,000**

Program and Financing

	1959 actual	1960 estimate	1961 estimate
Program by activities:			
Government contributions for annuitant's benefits (total costs—obligations) (object class 11)			$2,500,000
Financing:			
Appropriation (new obligational authority)			2,500,000

This appropriation is used to cover the Government's share of the cost of health insurance for certain annuitants as defined in the Federal Employees Health Benefits Act of 1959 (Public Law 86–382, 73 Stat. 713). The annuitants will contribute an estimated $2,750,000.

It is estimated that in 1961 approximately 20,000 annuitants will obtain coverage for themselves only and approximately 50,000 annuitants will obtain family-type coverage. Annuitants' participation is expected to be at a greater rate than active employees.

The use of these funds is reflected in the schedules for the Employees health benefits fund.

Program by activities:			
Payment of Government share of retirement (total costs—obligations) (object class 11)			$46,329,000
Financing:			
Appropriation (new obligational authority)			46,329,000

Legislation enacted by the 85th Congress increased annuities of certain retired employees and survivors effective August 1, 1958, and provided annuities for certain widows and widowers. This legislation also requires the termination of such annuities and increases in annuities for each fiscal year after 1960, for which an appropriation has not been made to cover their cost. Annual appropriations are contemplated. The appropriation required in 1961 is $46,329,000.

LIMITATION ON ADMINISTRATIVE EXPENSES, EMPLOYEES LIFE INSURANCE FUND

(Trust fund)

Not to exceed [$249,000] *$250,000* of the funds in the "Employees Life Insurance Fund" shall be available for reimbursement to the Civil Service Commission for administrative expenses incurred by the Commission during the current fiscal year in the administration of the Federal Employees' Group Life Insurance Act of 1954, as amended (5 U.S.C. 2091–2103): *Provided*, That this limitation shall include expenses incurred under section 10 of the Act, notwithstanding the provisions of section 1 of Public Law 85–377 (5 U.S.C. 2094(c)). (*Independent Offices Appropriation Act, 1960.*)

Program and Financing

	1959 actual	1960 estimate	1961 estimate
Program by activities:			
1. Administration of the basic insurance program	$64,193	$70,900	$76,600
2. Beneficial association work		178,100	173,400
Total program (costs—obligations) (object class 07)	64,193	249,000	250,000
Financing:			
Unobligated balance no longer available	59,607		
Limitation	123,800	249,000	250,000

The Federal Employees' Group Life Insurance Act (5 U.S.C. 2091–2103), provides that the Employees life insurance fund is available for any expenses incurred by the Civil Service Commission in the administration of the act within such limitation as may be specified annually in appropriation acts. The use of these funds is reflected in the schedule for Advances and reimbursements.

1. *Administration of the basic insurance program.*—Expenses are incurred for functions pertaining to employees and annuitants covered under the basic provisions of the act.

2. *Beneficial association work.*—Expenses are incurred for functions pertaining to maintenance by the fund of life insurance agreements of employee beneficial associations.

Intragovernmental funds:

INVESTIGATIONS (REVOLVING FUND)

This fund finances on a reimbursable basis, full field security investigations performed at the request of other departments and agencies of the Government (66 Stat. 107).

Budget program.—Because work on some investigations will be started in 1 year and completed in another, work-in-process is recognized as an asset of the fund. Agency estimates of investigations to be requested in 1960 and 1961 as compared to 1959 experience, are presented below. In addition, the table relates estimated workload receipts to estimates of production, average positions, and unit costs.

CASELOAD, AVERAGE POSITIONS, AND UNIT COSTS

	1959 actual	*1960 estimate*	*1961 estimate*
On hand, beginning of year	4,195	3,669	3,169
Received	27,197	20,750	20,750
Total workload	31,392	24,419	23,919
Processed	27,723	21,250	21,000
On hand, end of year	3,669	3,169	2,919
Average positions	1,080	941	960
Unit cost	$348	$370	$380

The estimated increase in costs for 1960 and 1961 results, primarily from the increased number of points of investigation per case.

Operating results and financial conditions.—The capital of the fund consists of $4 million appropriated in 1952. Excess earnings are paid into miscellaneous receipts of the Treasury.

Sources and Application of Funds (Operations)

	1959 actual	1960 estimate	1961 estimate
Gross expenditures (funds applied):			
Acquisition of equipment	$1,984	$75,000	$5,000

Unobligated balance carried forward	$25,000		
Appropriation (new obligational authority)	25,000		

The Commission was established to investigate and study existing practices of judicial assistance and cooperation between the United States and foreign countries, to draft agreements to be negotiated by the Secretary of State, and to recommend legislation or other action to the President with a view to achieving improvements. An advisory committee has been established, composed of persons active in public life, particularly in the legal profession.

The Commission's 1959 activity was financed by allocation from the Emergency fund for the President, national defense.

Public Law 86–287, approved September 16, 1959, extended the term of the Commission for 2 years to December 31, 1961. Appropriated funds for the current year are available only until December 31, 1959. Legislation will be submitted to increase the Commission's authorization to enable it to complete its work.

The Export-Import Bank of Washington facilitates and assists in financing U.S. foreign trade. To do this it participates in or guarantees credits extended by U.S. exporters, commercial banks, and other financial institutions to foreign purchasers of exports from the United States, and also makes direct loans to finance U.S. exports. In addition, the Bank insures against risks of war and expropriation certain exports held abroad on consignment awaiting sale. The total amount of dollar loans, guarantees, and insurance which the Bank may have outstanding at one time is $7 billion (12 U.S.C. 635).

The Bank's policy is to extend credit only when private capital is unavailable, and to encourage private participation in the credits extended. Loans generally are made only for specific purposes or projects. No loan is made

Federal Reserve Bank of St. Louis

unless the directors believe it has reasonable assurance of repayment.

Development project loans.—A major portion of the Bank's assistance for the exportation of U.S. materials, equipment, and services is in the form of medium and longer term credits for development projects abroad. These loans not only finance export sales, but help lay the foundation for expanded future trade through strengthening foreign economies.

It is estimated that 48 loans will be authorized by the Bank during 1961 to finance exports of equipment and related services for such projects abroad involving power, agriculture, transportation, and industrial development.

DATA ON DEVELOPMENT PROJECT LOANS

[In millions]

	1959 actual	*1960 estimate*	*1961 estimate*
Export-Import Bank funds:			
Credit authorizations	$515.3	$477.0	$625.0
Loan disbursements	439.5	399.8	283.6
Loan principal repayments	117.8	180.6	210.0
Loans outstanding June 30	1,590.9	1,810.2	1,883.8

Exporter loans.—Medium-term credit assistance requested by individual exporters is authorized on a case-by-case basis to assist them to sell abroad on deferred payments. Under each of these credits the Bank participates with an exporter or a U.S. bank in jointly financing an export sale. Such loans authorized in 1959 included credits to finance a wide range of capital goods shipped to countries throughout the world.

Some exporter credits are arranged on an individual basis, whereas others are provided under exporter credit lines. The Bank has continued to establish and renew exporter credit lines for individual exporters of capital equipment. The recipient of such a line knows in advance of new foreign sales the approximate terms he will be able to offer on such sales as are made on credit, provided that criteria on the type of export and the credit standing of the importer are met.

	1959 actual	*1960 estimate*	*1961 estimate*
Export-Import Bank funds:			
Credit authorizations	$18.9	$17.0	$20.0
Loan disbursements	16.2	48.2	13.4
Loan principal repayments	19.1	19.7	25.0
Loans outstanding June 30	57.0	85.5	73.9

Commodity loans.—Credits are authorized by the Bank to finance the sale abroad of U.S. commodities such as cotton, wheat, barley, soybeans, and tobacco, involving medium-term financing for periods of from 9 months to several years when credit is not available from private sources. Credits for the sale of U.S. beef and dairy cattle also have been authorized to Mexico and Latin America.

[In millions]

	1959 actual	*1960 estimate*	*1961 estimate*
Export-Import Bank funds:			
Credit authorizations	$66.4	$36.0	$65.0
Loan disbursements	40.7	17.1	28.0
Loan principal repayments	65.0	23.7	36.0
Loans outstanding June 30	42.6	36.0	28.0

Emergency foreign trade loans.—From time to time the Bank is called upon to provide financial assistance to meet emergency situations adversely affecting normal trade between the United States and another country. Such loans may take the form of lines of credit to a foreign central bank or other bank or financial institution to provide dollar exchange for a wide range of U.S. exports; credits to fund commercial arrearages resulting from dollar exchange difficulties so that normal trade may be resumed; or credits to assist in financing purchases in the United States required for reconstruction abroad following a national disaster.

In October 1959, full prepayment was received from the United Kingdom of the $250 million emergency loan balance outstanding. Simultaneously, a line of credit was reestablished for the same amount. Including this reinstatement, the estimate of emergency credits for 1960 is $540 million. The 1961 estimate is for $373 million.

DATA ON EMERGENCY FOREIGN TRADE LOANS

[In millions]

	1959 actual	*1960 estimate*	*1961 estimate*
Export-Import Bank funds:			
Credit authorizations	$289.7	$540.0	$373.0
Loan disbursements	211.6	200.0	200.0
Loan principal repayments	83.8	404.1	164.0
Loans outstanding June 30	1,769.9	1,565.8	1,601.8

Insurance.—The Bank insures against the risks of war and expropriation certain property of U.S. exporters which is held abroad on consignment awaiting sale. A total of 852 policies were issued by the Bank in 1959 covering cotton and tobacco valued at $29.1 million. It is estimated that policies covering cotton and tobacco to a value of $30 million will be issued in 1961.

Administrative expenses.—The limitation proposed by the Bank to cover adequately its needs for administrative expenses in 1961 is $2,675,000, an increase of $175,000 over 1960. The estimated additional costs are primarily for personal services and travel attributable to the current level of operations.

Other operations.—The Bank serves as administering agent for mutual security loans and guarantees against currency transfer risk and expropriation authorized by the International Cooperation Administration, and for defense production loans made by the Office of Civil and Defense Mobilization. The Bank also makes loans in foreign currency under the Cooley amendment to Public Law 480. It also acts as collecting agent for the Treasury on the debt settlement agreement with the Federal Republic of Germany, and in liquidation of certain foreign loans of the Reconstruction Finance Corporation.

Financing.—The Bank is a Government-owned corporation in which the Treasury has invested $1 billion in capital stock. It can borrow up to $6 billion from the Treasury on a revolving basis. On June 30, 1959, outstanding borrowings from the Treasury were $1,922.6 million. Notes outstanding on June 30, 1961, are expected to be $1,917.8 million.

On June 30, 1961, the total amount committed is estimated to be $5,561.0 million, leaving a margin of $1,439.0 million for additional commitments. Because disbursements occur over a period following commitment, it is estimated that the unobligated balance at June 30, 1961, of the Bank's authorization to borrow from the Treasury will be $2,436.3 million.

POSITION WITH RESPECT TO LENDING, GUARANTEE, AND INSURANCE AUTHORITY

	1959 actual	*1960 estimate*	*1961 estimate*
Statutory authority	$7,000,000,000	$7,000,000,000	$7,000,000,000
Charges against authority:			
Direct loans outstanding	3,460,442,901	3,497,512,901	3,587,512,901
Guaranteed loans outstanding	2,120,062	(1)	(1)

EXPORT-IMPORT BANK OF WASHINGTON FUND—Continued

Operating results and financial condition.—During the coming year the net income of the Bank is expected to amount to $90 million. The budget provides for continuation of dividends to the Treasury of $22.5 million annually through 1961 in lieu of interest on the Treasury investment in the Bank's capital stock. The remaining earnings are retained to meet future contingencies. Net investment of the Government in the corporation is expected to be $3,624.5 million at the end of 1961, consisting of $1 billion in capital stock, $1,917.8 million of borrowings from Treasury, and $706.7 million of retained earnings available for future contingencies.

In 1960, it is estimated that collections and receipts from loans financed by private capital will exceed disbursements by $50 million as compared with a net budget expenditure of $397 million in 1959. It is anticipated that total receipts will equal disbursements in 1961, resulting in no net budget expenditure.

Financing applied to program	23,402,972	80,200,000	135,200,000

The Export-Import Bank administers foreign currency loans to American firms for business development, and to domestic or foreign firms for facilities aiding in the utilization of U.S. agricultural products abroad. These loans are made from a share of the proceeds of the sale abroad of surplus agricultural commodities as authorized by the Agricultural Trade Development and Assistance Act of 1954, as amended (7 U.S.C. 1691–1724). This program was initiated in 1958. A heavy volume of such loans is anticipated for 1961.

Federal Reserve Bank of St. Louis

The Administration supervises a coordinated agricultural credit system of farm credit banks and associations which make credit available to farmers and their cooperatives.

1. *Supervision and examination of farm credit banks and associations.*—Provision is made for supervision and examination of: 12 Federal land banks (wholly farmer-owned); 13 banks for cooperatives (mixed ownership); 12 Federal intermediate credit banks (mixed ownership); the Federal Farm Mortgage Corporation (wholly Government-owned); 854 Federal land bank associations; and 495 production credit associations. Also, these credit agencies are furnished such services as assistance in financing and investments, custody of collateral for bonds and debentures, credit analysis, development of appraisal standards and policies, preparation of reports and budgets, and development and distribution of information on farm credit.

2. *Relation of costs to obligations.*—The year-end balances of unpaid undelivered orders are as follows: 1958, $30,745; 1959, $12,718; 1960, $6,000; 1961, $6,000.

The Corporation is in liquidation, its only remaining activity being the collection of non-interest-bearing notes sold to Federal land banks on June 30, 1955, and paying the proceeds as dividends to the Treasury. Its mineral interests with the exception of two in the St. Paul district, which are in litigation, were transferred to the Department of the Interior during 1958.

Operating results.—The retained earnings at the end of 1961, after making dividend payments to the Treasury of $1.7 million, are expected to be $2.4 million. Payments will continue to be made to the Treasury until final liquidation.

Financing applied to program	11,300,000	10,500,000	11,000,000

This fund is available to the Governor of the Farm Credit Administration as a revolving fund for investment in capital stock of the Federal intermediate credit banks (12 U.S.C. 1061(a)(1), 1131i(e).

Budget program.—Funds will be required in 1960 and 1961 for investment in class A stock of the banks. An estimate of $10,500,000 net investment is made for 1960 and $11,000,000 for 1961, leaving an unobligated balance of $6,600,000 available for future purchases of stock. The estimate of requirements is based on recent projections made by the 12 intermediate credit banks which indicate that several of the banks will need additional capital in order to keep their debt-to-capital ratios within the 10 to 1 maximum permitted by law.

Financing.—Under section 105(d)(3) of the Farm Credit Act of 1956, the revolving fund authorization was increased from $40,000,000 to $70,000,000 by making this fund in effect the owner of $30,000,000 of class A stock. Of the $87,405,000 of such stock outstanding as of January 1, 1957, $57,405,000 must be retired by payments into the Treasury as miscellaneous receipts. When the balance is reduced to $30,000,000 the remaining proceeds from retirement of such stock will be credited to the revolving fund.

Financing applied to program	835,000	4,900,000	5,000,000

This fund is available to the Governor of Farm Credit Administration for investment in class A and class C stock of production credit associations and is designed to enable the Farm Credit Administration to supply capital needs which cannot be met by an association from local sources (12 U.S.C. 1131i(a)).

Budget program.—An estimate for purchase of stock in production credit associations of $4.9 million is made for 1960 and $5 million for 1961. The need arises primarily because the volume of business of associations is increasing more rapidly than net worth can be accumulated from local sources.

Financing.—Of the $60,000,000 in the fund authorized for financing the capital needs of the production credit associations, it is estimated that $6,765,000 will have been invested by the end of 1960. An additional $3,400,000 net investment in the associations is expected in 1961, leaving an unobligated balance of $49,835,000 available for future purchases of stock.

Financing applied to program			

This fund is available to the Governor of the Farm Credit Administration for investments in class A capital stock of the banks for cooperatives (12 U.S.C. 1134).

Budget program.—No new subscriptions of capital stock are anticipated and stock will be retired by the banks for cooperatives in accordance with section 42(a)(1) of the Farm Credit Act of 1933, as amended.

Operating results and financial condition.—Investment in capital stock will continue to be reduced through 1961, thereby increasing the cash of the fund. Earnings are retained to provide for the future purchase of stock.

Mixed-Ownership Corporations

BANKS FOR COOPERATIVES

The banks for cooperatives make loans to finance the operations of farmers' cooperatives. The banks' capital funds are from the Agricultural Marketing revolving fund and from borrowing farmers' cooperative associations (12 U.S.C. 1134). The Farm Credit Act of 1955 provides for eventual ownership of the banks by farmers' cooperatives and the retirement of the U.S. Government investment.

No new subscriptions of capital stock are anticipated and stock will be retired by the banks for cooperatives in accordance with the act. Repayments of $8,459,400 have been made for 1960, and it is estimated that $7,500,000 will be retired in 1961. As of June 30, 1959, the U.S. Government owned capital stock in the banks in the amount of $134,798,700.

Program and Financing

	1959 actual	1960 estimate	1961 estimate
Program by activities:			
Administrative expenses (total obligations)		$210,000	
Financing:			
Proposed supplemental appropriation		210,000	

Under existing legislation, 1960.—Assessments against agencies in the farm credit system will be increased by $210,000 to provide for the increase in the limitation to cover the costs of reviewing the work of appraisers which function was substantially enlarged by Public Law 86–168, approved August 18, 1959. The increase in assessments, which are appropriated through an indefinite special fund, will result in a like increase in new obligational authority.

FEDERAL AVIATION AGENCY

The Federal Aviation Agency encourages and fosters the development of civil aeronautics and air commerce by (*a*) managing the use of the navigable airspace and regulating both civil and military air operations; (*b*) installing and operating aids to air navigation and traffic control for civil and military aviation; (*c*) conducting research to develop facilities and techniques required to modernize the air traffic control and navigation system; (*d*) certificating the competency of airmen and the airworthiness of aircraft; (*e*) establishing standards and rules designed to promote air safety; and by (*f*) administering a program of grants-in-aid for construction and improvement of civil airports.

In accordance with the objectives of the Federal Aviation Act of 1958, the Agency is planning to assume air traffic control functions now performed by military personnel at airbases throughout the world.

Legislation will again be proposed to establish a system of airways user charges by increasing the effective tax on aviation gasoline from 2 cents to 4½ cents per gallon and by applying this rate to jet fuels which are now tax free.

1. *Traffic management and facilities maintenance.*—This is a program of maintaining and operating, 24 hours daily, the national network of aids to air navigation and traffic management in the United States and its possessions. Major increases in 1961 are for (*a*) operating newly commissioned air traffic management facilities, navigation aids and other facilities procured and installed with funds appropriated under Establishment of air navigation facilities; (*b*) training of traffic management and maintenance personnel; (*c*) handling workload generated by increased air traffic; and (*d*) full-year costs of facilities and services

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

operated on a part-year basis in 1960. These increases carry forward the Agency's program to expand and improve the airways system in order that the increasing volume of air traffic will be accommodated safely with a minimum of restrictions.

2. *Research direction.*—This covers direction and administration of the research and development program for improving the national system of aviation facilities. Increases in 1961 are for strengthening technical supervision of the research and development effort authorized in 1960 and to support an expanded program in 1961.

3. *Flight standards.*—Inspections and certifications are made of aircraft, airmen, and operators of aircraft and air agencies, including the establishment of civil air regulations, which are designed to provide safe and competent operation of aircraft. Increases in 1961 are for handling workload incident to the increased volume of flying and new types of complex aircraft being placed in service; improving the system of airborne inspections for determining the accuracy and safe use of aids to air navigation; and providing additional technical training for Agency personnel.

4. *Administration of airport program.*—This activity includes costs of administering grants for airports construction; inspection of airport facilities to determine their utility and to assure compliance with law and regulations; and the provision of advisory services on airport design and engineering.

ESTABLISHMENT OF AIR NAVIGATION FACILITIES

For an additional amount for the acquisition, establishment, and improvement by contract or purchase and hire of air navigation facilities, including the initial acquisition of necessary sites by lease or grant; the construction and furnishing of quarters and related accommodations for officers and employees of the Federal Aviation Agency stationed at remote localities [not on foreign soil] where such accommodations are not available [(at a total cost of construction of not to exceed $50,000 per housing unit in Alaska)]; purchase of [one] *nine* aircraft; and the initial flight checking of air navigation facilities and the transportation by air to and from and within Alaska and the Territories of the United States of materials and equipment secured under this appropriation; [$135,200,000] *$195,000,000*, to remain available until expended: *Provided*, That there may be credited to this appropriation, funds received from States, counties, municipalities, other public authorities, and private sources, for expenses incurred in the establishment of air navigation facilities.

[Not to exceed $4,000,000 of the appropriation made available under this head in the Independent Offices Appropriation Act, 1960, shall be available for expenses of travel.] *(72 Stat. 731 et seq.; 49 U.S.C. 175, 1156–1159; Independent Offices Appropriation Act, 1960; Mutual Security Appropriation Act, 1960.)*

The Federal system of air navigation and traffic control facilities and services is being improved by the procurement and installation of new equipment and the modernization of existing facilities. The 1961 estimate is to carry forward a program begun in 1957 which is designed to expand the capacity of the airways system to handle growing air traffic efficiently and safely.

The cost of operating and maintaining equipment installed under this appropriation is covered by the appropriation Expenses.

1. *Air navigation facilities.*—(*a*) *VORTAC* covers the ground installation portion of the standard short-range navigation system which defines the location of the principal airways and gives pilots of equipped aircraft their distance and direction from ground stations; (*b*) *Low/*

FEDERAL AVIATION AGENCY—Continued

Current authorizations—Continued

ESTABLISHMENT OF AIR NAVIGATION FACILITIES—Continued

medium frequency radio ranges and markers include radiobeacons, ranges and associated equipment which provide pilots of equipped aircraft with direction information and define the location of certain airways; (*c*) *Instrument landing systems* cover the ground installations of this standard system which provide pilots with direction, distance, and glide slope information necessary for making approaches to runways under conditions of poor visibility; (*d*) *Approach lighting* consists of a row of lights extending outward from runways to aid pilots during landings; and (*e*) *Intermediate fields* are chiefly emergency landing areas provided on certain air routes at locations where provision of such facilities by local governing bodies cannot be obtained.

2. *En route traffic control aids.*—(*a*) *Long-range radar* aids en route air traffic control by displaying positions of aircraft at distances up to 230 miles; (*b*) *Air traffic control centers* are facilities, including structures and equipment such as air/ground radio, which are used in controlling air traffic over extensive geographical areas; (*c*) *Air traffic communications stations* include structures, communications and other equipment used to relay traffic control information and to provide other flight assistance to pilots; and (*d*) *International air traffic communications stations* include structures and long-range communications equipment for providing flight assistance and controlling traffic on transoceanic international routes.

3. *Terminal area traffic control aids.*—(*a*) *Airport traffic control towers* include air-ground communications and other gear required to equip towers for controlling traffic on and around airports; and (*b*) *Terminal area radar* aids traffic control in the vicinity of airports by displaying aircraft positions at distances up to 70 miles.

4. *Supporting facilities.*—(*a*) *Aircraft* are used to flight check accuracy and other characteristics of navigation and traffic control aids, to provide logistic support for remote facilities and to train personnel responsible for flight testing and inspecting aircraft and certificating airmen; and (*b*) *Housing, utilities, and miscellaneous facilities* are necessary at remote locations. Included are other items not covered elsewhere.

The following table lists the major facilities already funded and those budgeted in 1961:

NUMBER OF FACILITIES

	Authorized through 1960	*Proposed in 1961*
1. Air navigation facilities:		
(*a*) VORTAC:		
Radio omniranges	661	20
Complete VORTAC installations	108	42
Equipment to convert VOR's to VORTAC	450	0
(*c*) Instrument landing systems	230	20
(*d*) Approach lighting:		
Runway approach lighting systems	157	17
Sequence flashing lights	102	72
2. En route traffic control aids:		
(*a*) Long-range radars	67	12
Air traffic control radar beacons	72	15
3. Terminal area traffic control aids:		
(*a*) Airport traffic control tower service	266	13
(*b*) Terminal area radars	82	0
Air traffic control radar beacons	6	27
Airport surface detection radars	10	0

Federal Reserve Bank of St. Louis

Grants are made to State and local public agencies for development or improvement of civil airports. Public Law 86–72 extended this program by providing $63 million in contract authorizations for each of the years 1960 and 1961. Grants are limited to projects which are deemed essential for the safety, convenience, or comfort of the traveling public. The grants generally cover 50% of project costs. The following tabulation summarizes the activity under the Federal Airport Act, as amended:

[Dollars in millions]

	1947 through 1959 actual	*1960 estimate*	*1961 estimate*
Airports having projects in program	1,501	375	325
Projects physically completed	3,350	390	382
Grant funds	$465.8	$63.0	$63.0
Prior year balance available	-------	$47.9	$35.9
Grant obligations	$417.2	$75.0	$75.0
Federal expenditures	$321.4	$72.4	$81.4

It is estimated that an appropriation of $80 million will be required for 1961 to pay obligations incurred under available contract authorizations and that a supplemental appropriation of $11 million will be required for this purpose in 1960. The latter estimate is shown under Proposed for later transmission.

Research and Development

For expenses, not otherwise provided for, necessary for research, development, and service testing, including construction of experimental facilities and acquisition of necessary sites by lease or grant[; and purchase of not to exceed two passenger motor vehicles; $48,725,000], *$65,000,000,* to remain available until expended. (*72 Stat. 731 et seq.; Independent Offices Appropriation Act, 1960.*)

The Bureau of Research and Development of the Federal Aviation Agency carries out a program to improve and modernize the national system of aviation facilities through the development of systems, procedures, and devices which will best serve aviation needs.

Contracts are made with qualified firms, universities, and individuals to perform specific research and development work. The product secured from these contracts is tested and determinations are made as to how the data, procedures, or equipments procured can best be adapted for use in the airways system. The cost of direction and administration of the research carried out under this appropriation is included in the appropriation Expenses.

1. *Research and development to improve air safety.*—This provides for improvement in the Nation's airways system by adapting existing technology to air traffic control and navigation problems and by long-range research and development to meet future traffic control and navigation requirements. The 1961 estimate provides for an expanded program, including continued study of the present airways system and projections of future requirements, theoretical analysis of proposed facilities, development and testing of an automatic data processing and display system, and participation in the development of an aviation weather system program.

2. *Experimentation and evaluation.*—This covers experimentation, modification, testing, and evaluation of systems, procedures, and components for use in the national system of aviation facilities. It includes funds for operation and maintenance of experimental test facilities, aircraft, and laboratories at the National Aviation Facilities Experimental Center, as well as procurement of technical equipment and construction of support facilities.

3. Relation of costs to obligations:			
Costs financed from obligations of other years, net (−)		−220,200	
Obligations incurred for costs of other years, net	385,380		147,700
Total program (obligations)	2,464,201	2,400,000	6,000,000
Financing:			
1959 appropriation available in 1958	19,427		
Unobligated balance no longer available	6,372		
Appropriation (new obligational authority)	2,490,000	2,400,000	6,000,000

This appropriation finances management, operation, protection, and capital costs for equipment and maintenance projects at the federally owned Washington National and Dulles International Airports which serve the Washington, D.C., Metropolitan Area. Major construction projects at these airports are financed under the appropriation Construction, National Capital airports. The 1961 estimate provides for expanding operations at Washington National Airport to handle traffic growth and for the employment and training of personnel, procurement of equipment, and other costs associated with the opening of the Dulles International Airport which is expected in July 1961.

Direct operating costs and capital outlays for the airports are currently financed by direct appropriations with revenues for services to tenants and other users being deposited in the Treasury. Legislation has been proposed to establish a Federal corporation to operate these airports which would authorize the application of airport revenues to operating costs. Enactment of this legislation would reduce the appropriation required for operating and maintaining the airports by an estimated $4 million in 1961.

Relation of costs to obligations.—This relationship is derived from year-end balances of selected resources as reflected in the following table:

	1958 actual	*1959 actual*	*1960 estimate*	*1961 estimate*
Selected resources at end of year: Inventories and items on order:				
Stores (goods unconsumed by projects)	$77,462	$92,081	$92,000	$157,000
Unpaid undelivered orders (appropriation balances obligated for goods and services on order not yet received)	93,208	463,969	243,850	326,550
Total selected resources at end of year	170,670	556,050	335,850	483,550
Selected resources at start of year (−)	−170,670	−556,050	−335,850	
Costs financed from obligations of other years, net (−)		−220,200		
Obligations incurred for costs of other years, net	385,380			147,700

The following statements reflect financial results of the total operations including unfunded depreciation on all depreciable assets, interest on the Government's investment on a basis comparable to that of other major commercial airports, and total actual revenue together with amounts representing the value of services furnished other Government agencies for which no collections are made. This unrealized revenue includes landing fees for Government aircraft and rental charges for office and hangar space used by Government agencies.

Operations at Washington National Airport continue to show improved financial results. In 1961, income is expected to exceed operating costs by $572,000, as compared with $568,000 in 1960 and $496,521 in 1959. However, a deficit of $962,500 is anticipated for 1961 at Dulles International Airport reflecting personnel, protection, equipment, and other costs which will be incurred prior to full-scale operation of the airport.

Appropriation (new obligational authority)					5,000,000				

This appropriation finances major modernization and expansion projects at Washington National Airport, the major air terminal serving the Washington, D.C., Metropolitan Area. It will also provide for any such projects required in the future at the new Dulles International Airport which is now under construction and being financed by the appropriation, Construction and development, additional Washington airport. The 1961 estimate provides for the initial phase of an improvement program at Washington National Airport designed to enable the airport to accommodate the growing volume of aircraft operations and passengers safely and efficiently. Major projects covered in the estimate include improvements in the terminal building and concourses, expansion of aircraft operating areas, provision of improved vehicle access and parking facilities, and major improvements to utility systems. All outlays for physical improvements are added to the airports' capital investment and will be recovered through revised fees and charges to airport users.

5. *Relation of costs to obligations.*—The year-end balances of unpaid undelivered orders are as follows: 1958, $489,744; 1959, $237,924; 1960, $100,000; 1961, $2,830,100.

Appropriation (new obligational authority)			

GENERAL PROVISIONS

During the current fiscal year applicable appropriations to the Federal Aviation Agency shall be available for the *Federal Aviation Agency to conduct the* activities specified in the Act of October 26, 1949, as amended (5 U.S.C. 596a), [to the extent and in the manner prescribed by said Act;] *under determinations and regulations by the Administrator of the Federal Aviation Agency;* maintenance and operation of aircraft; hire of passenger motor vehicles and aircraft; and uniforms, or allowances therefor, as authorized by the Act of September 1, 1954, as amended (5 U.S.C. 2131). (*Independent Offices Appropriation Act, 1960.*)

ALLOCATIONS RECEIVED FROM OTHER ACCOUNTS

NOTE.—Obligations incurred under allocations from other accounts are included in the schedules of the parent appropriations as follows:

"Salaries and expenses," Office of Civil and Defense Mobilization.
"Mutual security," funds appropriated to the President.
"Transitional grants to Alaska," funds appropriated to the President.
"Other procurement, Air Force."
"Research, development, test, and evaluation, Air Force."
"Military construction, Navy."
"Research, development, test, and evaluation, Navy."
"Procurement of aircraft and missiles, Navy."
"Procurement of equipment and missiles, Army."
"Research, development, test, and evaluation, Army."
"Payments to school districts," Office of Education, Department of Health, Education, and Welfare.

Coal-mine operators, affected by orders issued by Federal coal-mine inspectors, may appeal to the Board for annulment or revision of, and temporary relief from, such orders. During 1959, a total of 108 orders were issued. When operators appeal, hearings are held and the Board rules upon the application. It is estimated that there will be 100 to 125 orders subject to appeal to the Board in 1960 and 1961.

The Federal Communications Commission regulates interstate and foreign commerce in communications by wire and radio. The Communications Act requires the Commission to (1) attain and maintain maximum benefits for the people of the United States in the use of the radio spectrum and (2) regulate the rates and services of communications common carriers.

1. *Applied technical research and frequency allocation.*—The Commission undertakes broad research programs, including propagation studies and cooperative work in the development of new monitoring equipment, designed to improve the utilization of the radio spectrum. It also tests and approves for public use various types of equipment, licenses experimental radio stations, and participates in international negotiations concerning the spectrum.

2. *Broadcast.*—Standard broadcast (AM), frequency modulation (FM), television (TV), and other related services are licensed and regulated by the Commission. Workload in this area continues to increase. Pertinent data are shown in the following table:

	1958 actual	*1959 actual*	*1960 estimate*	*1961 estimate*
Stations regulated [1]	4,862	5,160	5,558	5,800
Applications disposed of for new stations or major change of facilities:				
AM	423	550	768	846
FM	257	395	425	425
TV	237	230	242	242

[1] As of June 30 of each year.

3. *Safety and special radio services.*—Aviation, police, marine, amateur, and other nonbroadcast uses of radio are licensed and regulated. Pertinent data follow:

	1958 actual	*1959 actual*	*1960 estimate*	*1961 estimate*
Stations regulated [1] (excluding amateur)	258,537	301,583	343,120	378,135
License applications received	212,581	250,120	320,502	351,772

[1] As of June 30 of each year.

4. *Field engineering and monitoring.*—Field employees inspect radio stations, administer operator examinations, collect engineering data, monitor the spectrum, and determine the location of lost ships and aircraft and of illegal sources of radio emission.

5. *Common carrier.*—The Commission regulates the rates and practices of communications common carriers—telephone, telegraph, and cable companies—and considers proposed mergers and acquisitions of property, extensions and reductions in service, construction of facilities, and applications to use radio in communication services.

7. *Ultra-high frequency television.*—The Commission proposes to undertake a comprehensive study of ultra-high frequency television transmission and reception. The study is intended to develop technical information essential to the resolution of the television channel allocation problem. It will involve the use of improved transmission techniques, the development of optimum performance receivers, and extensive field observations and measurements. Because of the nature of this inquiry, the $2,250,000 estimate provides funds for the entire study, which will be of 2 years' duration.

Appropriation (new obligational authority)			

The Corporation insures accounts of depositors in insured banks up to $10,000. As of June 30, 1959, the deposit insurance fund for the protection of depositors amounted to $2 billion or 1.48% of all insured deposits on that date. Total insured deposits at the end of 1958 and 1959, estimated on the basis of information furnished as of June 23, 1958, and June 10, 1959, amounted to $128.7 billion and $137 billion, respectively. It is estimated that total insured deposits as of June 30, 1960 and 1961 will amount to $142.5 billion and $148.2 billion, respectively. No tax funds are used in its operations. Its expenses are paid and the fund is accumulated from assessments paid by insured banks and from income on investments in obligations of the U.S. Treasury. However, the Corporation is authorized to borrow from the Treasury, not to exceed $3 billion outstanding at any one time, as required for insurance purposes. No borrowings under this authorization have been made to date and none are anticipated in 1960 or 1961.

CORPORATIONS

The following corporations and agencies, respectively, are hereby authorized to make such expenditures, within the limits of funds and borrowing authority available to each such corporation or agency and in accord with law, and to make such contracts and commitments without regard to fiscal year limitations as provided by section 104 of the Government Corporation Control Act, as amended, as may be necessary in carrying out the programs set forth in the budget for the fiscal year [1960] *1961* for each such corporation or agency, except as hereinafter provided: (*Independent Offices Appropriation Act, 1960.*)

FEDERAL HOME LOAN BANK BOARD

The Federal Home Loan Bank Board formulates policies and supervises the operations of the 11 Federal home loan banks, the system of Federal savings and loan associations, and the Federal Savings and Loan Insurance Corporation.

The expenditure programs of the Federal Home Loan Bank Board and the Federal Savings and Loan Insurance Corporation are presented as business-type budgets. Section 2 of Public Law 895, approved July 3, 1948, provides that all expenses of the division of examinations, Federal Home Loan Bank Board shall be considered nonadministrative. All expenses of the division of examinations are defrayed from fees charged against and collected from the institutions examined.

The administrative expenses of the Federal Home Loan Bank Board are paid from assessments against the 11 Federal home loan banks, the division of examinations, and the Federal Savings and Loan Insurance Corporation.

The three-member Board supervises the Federal home loan bank system, the system of Federal savings and loan associations and the Federal Savings and Loan Insurance Corporation (12 U.S.C. 1421 et seq., 1461 et seq., 1464 et seq.). Net administrative expenses of the Federal Home Loan Bank Board are paid from assessments against the 11 Federal home loan banks, the division of examinations, and the Federal Savings and Loan Insurance Corporation.

[Dollars in thousands]

	1959 actual	*1960 estimate*	*1961 estimate*
Number of members	4,593	4,643	4,689
Total assets of members	$58,325,000	$67,500,000	$76,600,000

Federal home loan bank advances outstanding	$1,537,000	$1,800,000	$1,500,000

Budget program.—The Board's budget is based on six activities.

1. *Examination and supervision of Federal home loan banks.*—The Board supervises and examines the operations of the Federal home loan banks.

2. *Supervision of Federal and State-chartered institutions.*—The financial condition and operations of each insured institution is analyzed and corrective action is instituted when warranted. Supervision of insured institutions operating under State charter is carried on cooperatively under arrangements made with the respective State authorities.

3. *Chartering savings and loan associations.*—Federal savings and loan associations are chartered and regulated.

In addition, applications of State-chartered associations for conversion into Federal savings and loan associations are examined.

FEDERAL HOME LOAN BANK BOARD—Continued

Public enterprise funds—Continued

FEDERAL HOME LOAN BANK BOARD REVOLVING FUND—Con.

4. *Examining savings and loan associations.*—Supervisory examinations are made of Federal savings and loan associations, State-chartered associations insured by the Federal Savings and Loan Insurance Corporation, and such uninsured member institutions of the Federal home loan bank system as are not examined by State examiners. Audits are also made of approximately 68% of all insured institutions in conjunction with supervisory examinations. Examinations are also made of institutions applying for insurance of accounts and for conversion from a State to a Federal charter when required by the Board. The costs of examinations and audits are assessed against the institutions examined.

5. *Executive direction and staff services.*—This includes formulation of basic policy and the furnishing of staff services that are common to the Board and the insurance corporation.

6. *Administrative services.*—These consist of auditing; accounting; budgetary and financial reporting; internal budget control; fiscal organization and management; and general housekeeping and common operating services, including printing and reproduction work.

The amounts shown in the schedules for the above activities include administrative expenses under annual limitation; nonadministrative expenses under a separate limitation; and certain additional expenses not under limitation. Administrative expenses are estimated to increase from $1,800,000 to $2,075,000 reflecting staff increases and related costs to meet increasing workload. Nonadministrative expenses covering the expenses of examining savings and loan associations are discussed separately below.

Relation of costs to obligations.—The relationship is derived by year-end balances of selected resources as reflected in the following table:

Selected resources at end of year:	*1958 actual*	*1959 actual*	*1960 estimate*	*1961 estimate*

The division conducts regular periodic and special supervisory examinations of all Federal savings and loan associations, of State-chartered savings and loan associations, other institutions of the savings and loan type which are insured by the Federal Savings and Loan Insurance Corporation, and of noninsured member institutions of the Federal Home Loan Bank System that are not subject to State supervision. The division also examines and analyzes the financial condition of institutions which apply for membership in the system, for insurance of accounts, or for conversion from a State to a Federal charter. The institutions examined bear the costs of examination, and the fees charged therefor are calculated to defray all of the operating expenses of the division.

The following table reflects the work of the division:

The Federal Savings and Loan Insurance Corporation is authorized under title IV of the National Housing Act (12 U.S.C. 1724 et seq.) to insure savings in all Federal savings and loan associations and in State-chartered institutions of the savings and loan type which apply and are approved for insurance. The protection thus afforded, which insures savers in member associations against financial loss up to a statutory limit of $10,000, may be provided through the prevention of default or the payment of insurance to savings account holders in the event of liquidation. The former course of action, which results in complete protection to each investor regardless of the amount in his account, is accomplished by making cash grants or by purchasing all or a part of the association's assets. Also, the Corporation is authorized to make loans to institutions in financial difficulty. Wherever possible, preventive measures are taken to eliminate the necessity of liquidation. However, in the event liquidation is necessary, the Corporation acts as receiver for all federally chartered associations and may act as receiver or coreceiver upon request of State authority in cases involving State-chartered institutions.

The Corporation functions under direction of the Federal Home Loan Bank Board, which provides certain administrative services and conducts the examination and supervision of insured institutions. The expenses of the Board and its staff offices are paid from assessments made on the Corporation, the Federal home loan banks, and the division of examinations.

[Dollars in thousands]

Corporation's reserve for insurance losses	$305,410	$354,001	$410,264
Percent of authorization to total income	1.8	1.5	1.4

Budget program.—The budget program comprises the following activities:

1. *Administrative expenses*—(*a*) *Underwriting.*—This activity constitutes an analysis and evaluation of the insurance risk in connection with applications for insurance of accounts and other applications submitted pursuant to regulatory requirements. The assets of insured institutions have increased $13.7 billion or 32.7% in the last 2 years. The continuing interest in insurance of accounts on the part of uninsured institutions, plus the anticipated rate of normal growth, will increase the insured liability of the Corporation to an estimated $63.7 billion by June 30, 1961, as compared to $48.3 billion on June 30, 1959.

(*b*) *Prevention of default and payment of insurance.*—In carrying out its role of protecting savings in insured savings and loan associations, the Corporation has settled 38 cases since its creation 25 years ago. Total losses to June 30, 1959, have amounted to $5,224,869, or less than 2% of cumulative gross income. An overall summary of these activities is reflected in the following table:

	Number of cases	*Funds provided*	*Recoveries*	*Estimated or final loss*
Contributions to prevent default	29	$5,374,125	$496,064	$4,878,061
Purchase of assets	2	5,058,273	[1] 5,021,607	36,666
Receiverships	7	6,699,801	6,390,254	[2] 310,142
Net insurance losses	38	17,132,199	11,907,925	5,224,869

[1] Includes anticipated recoveries of $54,222.
[2] Includes $595 for unsettled accounts.

(*c*) *Analysis of operation.*—The Corporation maintains a current analysis of the financial condition of member institutions, the flow of savings, and the character and volume of mortgage lending, including selective review of geographical or community areas and phases of operations and certain analyses of trends in the field of thrift and home mortgage finance.

2. *Payment to the Federal Home Loan Bank Board for*—(*a*) *Services and facilities.*—The Corporation will subscribe 42% of the administrative expenses of the Federal Home Loan Bank Board in 1961 in return for services and facilities by the Board and staff offices.

(*b*) *Conservatorship, supervisory representative in charge, and other.*—Represents the Corporation's share of expenses incurred by the Board in 1959 in connection with the conservatorship of institutions insured by the Federal Savings and Loan Insurance Corporation and preparation for or conduct of proceedings under section 407 of the National Housing Act, as amended.

4. *Charges applicable to prior years.*—This provides for the establishment of the Corporation's liability for accrued annual leave of employees.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

5. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources as reflected in the following table:

	1958 actual	1959 actual	1960 estimate	1961 estimate
Selected resources at end of year:				
Deferred charges	$401,432	$2,012	$164	$164
Pending and unclaimed insured accounts in liquidated institutions, gross	7,040	7,040	----	----
Unpaid undelivered orders	4,963	2,012	----	----
Total selected resources at end of year	413,435	11,064	164	164
Selected resources at start of year (−)	−413,435	−11,064	−164	----
Costs financed from obligations of other years, net (−)	−402,371	−10,900	----	----

Financing.—Since 1951 the Corporation has been retiring its capital stock held by the Secretary of the Treasury in annual payments equivalent to 50% of its net income. Of the initial Government investment of $100 million, $75.2 million had been retired prior to June 30, 1958. The balance of $24.8 million was retired in 1959.

Through June 30, 1958, the Corporation had paid to the Treasury $42.1 million as a return on capital stock in lieu of dividends. Final payment of $0.8 million was made in 1959.

The Corporation has continuing authority to borrow from the Treasury for insurance purposes, with a limitation of $750 million outstanding at any one time. No borrowings under this authorization have ever been made.

The Corporation is further authorized to assess against each insured institution additional premiums for insurance until the amount of such premiums equals the amount of all losses and expenses of the Corporation; except that the total amount so assessed in any 1 year against any such institution shall not exceed one-eighth of 1% of the total amount of the accounts of its insured members and its creditor obligations.

Operating results and financial condition.—The Corporation is entirely self-supporting and in no year has its operating expense amounted to more than 5.3% of total income; in 1959 it amounted to 3.4%. Revenue from insurance premiums, interest on investments in obligations of the United States, and revenue from other sources has been sufficient to meet all insurance losses, operating expense, return on capital stock, and to establish a reserve for contingencies of $305.4 million. Total revenue since 1934, of $367.6 million, has been applied as follows:

	Amount	Percent
Expense	$13,855,777	3.8
Net insurance losses	5,224,869	1.4
Provision for accrued annual leave of employees	83,049	----
Return on capital stock to U.S. Treasury	42,975,507	11.7
Reserve for contingencies	305,410,474	83.1
Total	367,549,676	100.0

Operating expense for 1961 is estimated at $1.7 million, consisting primarily of administrative expenses of the Corporation of $0.8 million and $0.9 million for services rendered by the Federal Home Loan Bank Board.

Since the time and size of expenditures for the prevention of default and payment of insurance are unpredictable, estimates of these expenditures are omitted from the financial statements.

Net income for 1961, which is expected to be increased by $15.2 million or 37% above the net income for 1959, will be retained by the Corporation and credited to its reserve for insurance losses.

The Corporation is required by law to accumulate a reserve equal to 5% of all insured accounts and creditor obligations of all insured institutions before collection of premiums may be discontinued. It is estimated that this statutory requirement will amount to $3.2 billion by June 30, 1961. The insurance reserve as of that date is expected to reach $410.3 million or 0.64% of an estimated potential liability of $63.7 billion.

HOME OWNERS' LOAN CORPORATION FUND

The Corporation was created to provide credit facilities to refinance the mortgages of destitute urban home owners. Its lending authority expired on June 12, 1936, and since that time the Corporation has been dissolved. Liabilities, representing matured bonds held by the public together with accrued interest thereon, totaled $491,811 at the end of 1959 and are estimated to be reduced to $405,811 by the end of 1961.

Proposed for later transmission:

FEDERAL SAVINGS AND LOAN INSURANCE CORPORATION FUND

Under proposed legislation, 1961.—Legislation will be proposed to increase the insurance premium rate from the present one-twelfth of 1% per annum on all share accounts and creditor obligations of insured associations to one-eighth of 1%. The proposed rate increase will be effective until the Corporation's reserve for losses is equal to 1% of the insured liability, at which time the premium rate will revert to the present one-twelfth of 1%. The legislation will permit an increase in reserves commensurate with the growth of the insured associations. It is anticipated that revenue will increase by $27,633,000 in 1961 as a result of the proposed legislation.

FEDERAL MEDIATION AND CONCILIATION SERVICE

Current authorizations:

SALARIES AND EXPENSES

For expenses necessary for the Service to carry out the functions vested in it by the Labor-Management Relations Act, 1947 (29 U.S.C. 171–180, 182), including expenses of the Labor-Management Panel as provided in section 205 of said Act; expenses of boards of inquiry appointed by the President pursuant to section 206 of said Act; temporary employment of arbitrators, conciliators, and mediators on labor relations at rates not in excess of $75 per diem; and Government-listed telephones in private residences and private apartments for official use in cities where mediators are officially stationed, but no Federal Mediation and Conciliation Service office is maintained; [$3,905,400] *$4,093,000.* (*Departments of Labor, and Health, Education, and Welfare Appropriation Act, 1960.*)

Appropriated 1960, **$3,905,400** Estimate 1961, **$4,093,000**

Program and Financing

	1959 actual	1960 estimate	1961 estimate
Program by activities:			
1. Mediation and conciliation of labor disputes	$3,523,208	$3,541,100	$3,704,775
2. Presidential boards of inquiry		5,000	6,500
3. Administration	354,631	359,300	381,725
4. 1959 program obligated in 1958	−23,150		
Total obligations	3,854,689	3,905,400	4,093,000
Financing:

Unobligated balance no longer available	761		
Appropriation (new obligational authority)	3,878,600	3,905,400	4,093,000

The Service assists labor and management in mediation and prevention of disputes affecting industries engaged in interstate commerce and defense production other than rail and air transportation.

1. *Mediation and conciliation of labor disputes.*—During the last year dispute notices affecting approximately 103,000 employers were received by the Service. About 22,100 cases were assigned to mediators for initial inquiry to determine the status of contract negotiations and the possible need for Federal mediation assistance. About 20,100 cases were assigned for mediation after initial inquiry and 19,900 mediation assignments were closed during the year.

WORKLOAD

	1955	*1956*	*1957*	*1958*	*1959*
Cases pending, beginning of year	2,578	2,540	2,254	2,422	4,221

FEDERAL POWER COMMISSION—Continued

Current authorizations—Continued

SALARIES AND EXPENSES—Continued

streams subject to Federal jurisdiction; construction and operation of projects are inspected; and construction costs are determined for projects under license to private interests. Pertinent data are:

Description	*1959 actual*	*1960 estimate*	*1961 estimate*
Licensed projects (2,000 horsepower and over)	205	219	235
Claimed cost of licensed projects—millions	$4,944	$5,193	$5,593
Applications completed during year	110	116	115
Applications pending end of year	130	124	119
Annual receipts from licenses	$1,759,000	$2,048,000	$2,883,000

2. *Electric power industry.*—Regulation covers the transmission and sale for resale of electric energy in interstate commerce and the rates, accounts, depreciation practices, certain security issues, disposition of properties, mergers, and the interconnection and coordination of facilities of those public utilities subject to the Commission's jurisdiction. Statistics about the electric utility industry are gathered and published. Pertinent data are:

[By calendar year]

Description	*1958 actual*	*1959 estimate*	*1960 estimate*
Number of public utilities regulated	190	185	185
Operating revenue of regulated utilities—millions	$7,650	$8,200	$8,600
Number of utilities reporting for statistical purposes	800	800	800
Operating revenue of reporting utilities—millions	$10,300	$10,800	$11,600

3. *Natural gas industry.*—Regulation covers the transportation and sale for resale of natural gas in interstate commerce, and the rates, accounts, and depreciation and depletion practices. Certificates of public convenience and necessity are issued to those natural-gas companies subject to the jurisdiction of the Commission. Statistics about the natural-gas industry are gathered and published. In calendar year 1958, there were approximately 17,000 independent producers, who were making jurisdictional sales under 2,934 rate schedules. There were also 91 regulated natural-gas pipeline companies, with operating revenue of $3.6 billion. It is estimated that the number of independent producers and pipeline companies will remain substantially unchanged in 1959 and 1960. However, the operating revenue of the pipeline companies is expected to increase to $3.9 billion and $4.3 billion, respectively. Other pertinent data are:

Description	*1959 actual*	*1960 estimate*	*1961 estimate*
Certificate applications filed:			
(a) Pipeline companies	329	330	330
(b) Independent producers	1,803	1,800	1,800
Pipeline gas rate cases handled	116	153	146
Independent producer rate cases handled	1,833	2,485	2,405
Rate cases on hand, end of year	1,833	1,821	1,821
Total rate filings received	9,798	10,300	10,300

4. *Federal river development projects.*—Of a potential 122.1 million kilowatts of hydroelectric power in the United States, 30.2 million kilowatts had been developed by Federal agencies and non-Federal interests as of December 31, 1958.

Studies are made of proposed Federal river development projects to determine possibilities for conservation, development, and utilization of potential power resources. Review and approval are required of certain proposed rates for sale of power from Federal projects. Information on the power features of river development projects is furnished to Congress and to Federal and State agencies. In 1959, a total of 101 studies were carried on and it is estimated that there will be 103 in 1960 and 104 in 1961.

5. *International Joint Commission.*—A Commission staff member serves on the International Joint Commission, which adjudicates controversies between the Governments or nationals of the United States and Canada over boundary waters and waters that cross the boundary.

Appeals before Federal court completed	27	23	25	35

1. *Antimonopoly.*—All types of monopolistic restrictions, including price-fixing conspiracies, boycotting, price discriminations, and illegal mergers and acquisitions are corrected. Economic data and criteria are brought to bear on monopoly and related problems. Supervision is provided over the registration and operations of associations of American exporters engaged solely in export trade. In 1961 field investigation and trial of merger and other antimonopoly cases will be further expedited.

2. *Deceptive practices.*—False and misleading advertising and other unfair or deceptive practices are prevented by corrective action, including the affirmative aid of trade-practice rules and advertising guides. Business and the public are protected from the evils of misbranding and nondisclosure of fiber content of manufactured wool products and household textile articles; consumers and merchants are protected from unfair practices with respect to furs and fur products; and the public is protected from dangers inherent in flammable fabrics. In 1961 field investigation and trial of deceptive practice cases will be expedited, and the Commission will continue with the program of enforcement of the Textile Fiber Products Identification Act.

The Commission has already increased its efforts in the field of radio and television advertising as a result of disclosures during recent investigations by the Congress. Funds are specifically provided in 1961 to support more effectively the Commission's efforts in this field.

6. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources as reflected in the following table:

	1958 actual	*1959 actual*	*1960 estimate*	*1961 estimate*

FOREIGN CLAIMS SETTLEMENT COMMISSION

Current authorizations:

SALARIES AND EXPENSES

For expenses necessary to carry on the activities of the Foreign Claims Settlement Commission, including services as authorized by section 15 of the Act of August 2, 1946 (5 U.S.C. 55a), at rates not to exceed $50 per diem for individuals; not to exceed [$12,000] *$10,000* for expenses of travel; advances or reimbursements to other Government agencies for use of their facilities and services in carrying out the functions of the Commission; hire of motor vehicles for field use only; and employment of aliens; [$458,000] *$300,000*, of which [$50,000] *$40,000* shall be derived only from the war claims fund created by section 13(a) of the War Claims Act of 1948 (Public Law 896, approved July 3, 1948) and not to be available for obligation after June 30, [1960] *1961*. (*General Government Matters Appropriation Act, 1960*).

Appropriated 1960, **$408,000** Estimate 1961, **$260,000**

Program and Financing

	1959 actual	1960 estimate	1961 estimate
Program by activities:			
Direct obligations:			
1. Administration and settlement of international claims	$503,653	$358,000	$200,000
2. Review of claims programs	100,000	50,000	60,000
Total direct obligations	603,653	408,000	260,000
Reimbursable obligations:			
3. Administration and settlement of World War II claims	91,800	50,000	40,000
Total obligations	695,453	458,000	300,000
Financing:			
Advances and reimbursements from War claims fund	−91,800	−50,000	−40,000
Unobligated balance no longer available	6,847		
Appropriation (new obligational authority)	610,500	408,000	260,000

The Foreign Claims Settlement Commission is responsible for the settlement of claims authorized by the War Claims Act and the International Claims Settlement Act.

1. *Administration and settlement of international claims.*—Processing of claims of U.S. nationals for the nationalization or other taking of property by Czechoslovakia has been authorized. Funds totaling about $9 million derived from the vesting and sale of Czechoslovakian assets in this country are available as trust funds from which the Treasury will make payments against the awards. A 5% deduction will be made as an offset against appropriations for administrative expenses for the 3 years of the program by Foreign Claims Settlement Commission and Treasury Department. A total of 3,977 claims asking recoveries of about $364 million has been received.

Claims of U.S. nationals against Bulgaria, Hungary, Rumania, Italy, and the Soviet Union have been completed by the statutory deadline of August 9, 1959.

2. *Review of claims programs.*—Operations included in the President's Reorganization Plan No. 1 of 1954, but not immediately embraced within active claims programs, are set out as a separate activity not charged to specific programs. These involve research, reports, documentation, and similar functions responsive to the requirements of the Congress and of other agencies of the Government concerning past, present, and proposed claims programs and problems.

3. *Administration and settlement of World War II claims.*—Liquidation of previous programs under the War Claims Act will continue during 1961 financed by reimbursement from the War claims fund.

The General Accounting Office is directly responsible to the Congress for conducting independent reviews, audits, and investigations of the management and control of the financial transactions of the Government; for the rendition of legal decisions relating to Government fiscal matters; for developing, prescribing, and evaluating accounting systems on a governmentwide basis; for the settlement of certain claims for and against the Government; and, for advising and assisting the Congress and Government agencies on matters relating to public funds. During 1959, refunds and collections in the amount of $60,541,080 were made through these activities.

1–3. *Office of the Comptroller General, etc.*—Executive management of the General Accounting Office is carried out by the Comptroller General who is assisted by the Assistant Comptroller General and staff assistants.

5. *Claims division.*—All claims by or against the United States are settled in this division except those for transportation items and claims wherein exclusive jurisdiction is conferred by law upon another agency or the courts.

6. *Transportation division.*—This division audits freight and passenger transportation payments for account of the United States and settles claims involving transportation charges. The transportation audit recovered $29,535,058 during 1959.

8. *Office of the general counsel.*—In addition to preparing decisions and reports on the legality or propriety of proposed obligations and expenditures of the Government the general counsel and his staff assist the Comptroller General in coordinating the various activities of the General Accounting Office with the Congress, its committees, and individual members, participate in conferences with legislative and administrative officials of the Government on legal matters of a fiscal nature, the sufficiency of proposed legislation, the desirability of new legislation for particular purposes, and render all other required legal services.

9. *Accounting and auditing policy staff.*—This staff develops accounting policy and related requirements for observance by each agency and for the guidance of audit work performed by General Accounting Office auditors, and develops internal auditing objectives, principles, and standards for guidance of the executive agencies; reviews and develops, in cooperation with the Treasury Department and the Bureau of the Budget, central accounting processes and financial reporting; reviews agency accounting systems in whole or in part; develops and directs a coordinated program to assure effective application of modern electronic systems and other advanced methods to accounting and related financial operations of the Government; and assists and advises Congress on accounting and auditing policy matters.

10. *Office of staff management.*—This staff performs the staff management function for the accounting, auditing, and investigative activities.

11 and 12. *Defense accounting and auditing division, and civil accounting and auditing division.*—These divisions perform the accounting, auditing, and investigative functions of the General Accounting Office in all departments and agencies of the Federal Government. These functions involve the development, review, and evaluation of accounting systems; the evaluation of the performance of the Military Establishment and civil departments and agencies in discharging their financial obligations, including the audit and settlement of accounts; and the conduct of investigations of matters relating to the receipt, disbursement, and application of public funds.

13. *Field operations division.*—This division, which is composed of a central office and regional offices under the direction of regional managers, performs, outside the metropolitan area of Washington, D.C., all assigned accounting, auditing, and investigative functions.

14 and 15. *European branch and Far East branch.*—These branches perform General Accounting Office functions as they relate to U.S. Government questions in the European area, North Africa, the Near East, and the Far East. Offices are located in Paris and Tokyo, with a suboffice in Frankfurt, Germany.

16. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources and applicable adjustment as reflected in the following table:

	1958 actual	*1959 actual*	*1960 estimate*	*1961 estimate*
Selected resources at end of year: Inventories and items on order:				
Stores (goods unconsumed by projects)	$85,256	$78,860	$78,860	$78,860

HISTORICAL AND MEMORIAL COMMISSIONS

Current authorizations:

[BOSTON NATIONAL HISTORIC SITES COMMISSION]

[For expenses necessary to carry out the provisions of the Act of June 16, 1955 (60 Stat. 136), as amended, $20,000.] (*Supplemental Appropriation Act, 1960.*)

Appropriated 1960, **$20,000**

Program and Financing

	1959 actual	1960 estimate	1961 estimate
Program by activities:			
Planning the preservation of historic properties (total obligations)	$19,970	$20,000	
Financing:			
Unobligated balance no longer available	30		
Appropriation (new obligational authority)	20,000	20,000	

The Commission is preparing an inventory of historic sites and buildings in Boston and vicinity, together with an analysis of their condition. A report will be submitted to Congress recommending programs for their preservation by local, State, and Federal agencies for public use. It is contemplated that the study will be completed and the report submitted to the Congress during 1960.

Federal Reserve Bank of St. Louis

The Corregidor Bataan Memorial Commission was established to erect on Corregidor Island a memorial to all those who served under the American flag in the Pacific area during World War II.

The overall program involves three broad tasks: (*a*) the selection of an appropriate design for the memorial; (*b*) the obtainment of funds for the construction of the memorial; and (*c*) the actual construction of the memorial.

The requested appropriation of $39,600 will provide for a small staff to carry out necessary planning tasks and for office expense and travel during 1961.

Appropriation (new obligational authority)	18,747,800	19,650,000	20,500,000

The Commission regulates common and, in the case of motor and water carriers, contract carriers engaged in interstate commerce and foreign commerce, to the extent that it takes place within the United States. The types of carriers covered include railroads, express companies, sleeping car companies, motor carriers, water carriers, pipelines (other than those for water and gas), and freight forwarders.

The increase of $850,000 is requested in order to handle the continually increasing number of applications for motor carrier permanent and temporary operating authority; to improve the economic and cost data necessary to regulatory activities; and to provide a more adequate level of compliance with the provisions of the Interstate Commerce Act and related acts pertaining to the regulation of railroads and motor carriers.

1. *Regulation of carrier rates, practices, operating authorities, and finance.*—This activity of the Commission consists of regulating rates; granting operating authorities; approving applications for abandonments of and extensions of railroad lines, financial reorganizations, and rate agreements between carriers; reviewing proposed discontinuances of or changes in the operation or service of trains and ferries; and guaranteeing loans to railroads.

2. *Compliance.*—The Commission enforces statutes and regulations affecting transportation and carriers. Examinations are made to ascertain that motor carriers and freight forwarders are adequately insured, and surveys of motor carrier operating practices are conducted to reduce accidents and to promote safety on the public highways.

3. *Supervision and analysis of carrier accounting and statistics.*—The Commission is responsible for the formulation and policing of uniform systems of accounts; the preparation of studies of operating costs for use in rate proceedings; the maintenance of current inventory and cost records; the development of elements of value used in regulating carriers; the compiling of statistics from carrier reports; and the preparation of studies of operating, financial, and other problems of transportation agencies.

4. *Supervision and interpretation of tariffs.*—Carrier tariffs, or rate schedules, are examined for compliance with the Commission's tariff rules; authority to publish rates on less-than-statutory notice is, under certain conditions, granted; and informal complaints and carrier requests to pay reparations are processed.

5. *Railroad safety and car service.*—Commission field personnel work with carriers and shippers in handling problems of safety and efficient use of equipment in the transportation of passengers and property by railroad. This work includes inspection of safety appliances and signal installations, inspection of locomotives, and enforcement of compliance with car-service regulations designed to increase the utilization of railroad rolling stock.

6. *Defense mobilization.*—This program has been liquidated.

7. *Executive and advisory functions.*—This activity includes the work of the Commissioners and their staffs; the defense of Commission orders in court; the rendering of legal advice to the Commission; and the formal issuance of orders, rules, and regulations.

INTERSTATE COMMISSION ON THE POTOMAC RIVER BASIN

Current authorizations:

CONTRIBUTION TO INTERSTATE COMMISSION ON THE POTOMAC RIVER BASIN

To enable the Secretary of the Treasury to pay in advance to the Interstate Commission on the Potomac River Basin the Federal contribution toward the expenses of the Commission during the current fiscal year in the administration of its business in the conservancy district established pursuant to the Act of July 11, 1940 (54 Stat. 748), $5,000. (*Departments of Labor, and Health, Education, and Welfare Appropriation Act, 1960.*)

Appropriated 1960, **$5,000** Estimate 1961, **$5,000**

Program and Financing

	1959 actual	1960 estimate	1961 estimate
Program by activities:			
Contribution to the Commission (object class 11)	$5,000	$5,000	$5,000
Financing:			
Appropriation (new obligational authority)	5,000	5,000	5,000

The Interstate Commission on the Potomac River Basin was created by compact among the four States in the basin, the District of Columbia, and the Federal Government to abate water pollution.

This appropriation represents the Federal Government's pro rata share of the general expenses of the Commission. The Commission also receives financial assistance from the Public Health Service under the program of grants for water pollution control activities.

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

The activities of the National Aeronautics and Space Administration (NASA), established in 1958, consist of research on the problems of aeronautical and space vehicles, development and test of space vehicles and their components, and operation of space vehicles for the exploration of space and other nonmilitary applications. The 1961 budget contemplates total program costs under the several appropriation accounts of the agency as summarized by activity below, based on the new obligational authority recommended for 1961 and anticipated 1960 supplemental estimates totaling $23 million. In accordance with existing law, authorizing legislation will be proposed for the 1961 appropriations.

[In millions]

	Costs			*1961 new obligational authority*
	1959 actual	*1960 estimate*	*1961 estimate*	
Aeronautical and space research	$105.6	$110.5	$120.4	$129.3
Space flight development and operations	65.4	307.0	498.2	660.2
Program direction	5.1	9.5	12.4	12.5
Total, National Aeronautics and Space Administration	176.1	427.0	631.0	802.0

The new obligational authority for 1961 includes a total of $140 million for the Saturn project for development of a very high thrust space vehicle booster system, responsibility for which is being transferred to NASA from the Advanced Research Projects Agency of the Department of Defense. For comparative purposes, the amounts applied to the Saturn project by the Department of Defense in 1959 and 1960, totaling $27 million and $77 million, respectively, are included in the costs shown for NASA. The 1961 estimates also reflect the anticipated transfer to NASA of the development operations division of the Army Ballistic Missiles Agency at Huntsville, Ala. About $57 million of the total for the Saturn project is for work to be performed at the Huntsville facility in addition to about $35 million for work at Huntsville on other space development projects.

Aeronautical and space research.—The funds under this heading provide for basic and applied research on problems related to design, development, construction, and operation of aeronautical and space vehicles, including the laboratory facilities and equipment required. In

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

1961, emphasis will continue to be primarily on problems of manned and unmanned space vehicles, with only a relatively small effort devoted to problems peculiar to aircraft and missiles. In the fields of structures and materials, research will be directed at problems of heating, vibration, and structural integrity of space vehicles and at materials which show promise of being able to withstand the extreme conditions to which space vehicles and their components are subjected. In the propulsion field, research will be continued on improvements to chemical rocket systems, and further studies and experiments will be undertaken to explore the possibilities of nuclear and electrical rocket propulsion systems for space vehicles. Increased emphasis will be placed in 1961 on problems of control and guidance of space vehicles, and on the special problems that arise when vehicles, equipment, and instruments must operate in a space environment with its novel conditions of weightlessness, vacuum, and radiation. Much work in aerodynamics and related fields is required to provide the information necessary for the design and operation of manned and unmanned space vehicles which can reenter the earth's atmosphere at high speeds and be recovered with crew or instruments intact. Applied research in aeronautical fields will be limited chiefly to work in connection with very high speed aircraft under development by the military services, to research on short or vertical takeoff aircraft which are of both military and civil interest, and to continued investigations of certain problems of nuclear propulsion for aircraft.

Space flight development and operations.—Under this heading come the funds for the development and procurement of space vehicles, components, and associated equipment; the development and fabrication of payloads of scientific instruments and other equipment for launching into space; the actual conduct of space vehicle launching, tracking, and recovery operations; and the construction of the necessary test, launching and tracking facilities. The areas receiving primary emphasis in 1961 are the manned space flight program—project Mercury—and the development of very high thrust boosters and the other necessary components of space vehicle systems to use them, under the Saturn and related projects. In project Mercury, if the preliminary tests and experiments continue to be successful, actual manned space flights may be attempted in 1961. Completion of the development of a space vehicle system using very high thrust boosters is still several years in the future, but substantial progress will be made in testing the Saturn clustered booster, and work will continue on the development of the very high thrust single chambered engine and of engines for upper stages of a complete space vehicle system. A space vehicle with an upper stage using high-energy fuels is being developed under project Centaur and should be ready for testing in 1961. On a longer time scale, development work is continuing on various electrical propulsion systems and, jointly with the Atomic Energy Commission, on components of possible future nuclear rocket systems for space vehicles. The program also provides for additional launchings of scientific satellites and space probes with improved versions of existing space vehicles to continue the exploration of space and provide needed information for the design and operation of future space vehicles. Some of these launchings will be used for experiments in the application of space vehicles in the fields of communications and meteorology.

Current authorizations:

SALARIES AND EXPENSES

For necessary expenses, not otherwise provided for, of the National Aeronautics and Space Administration, including [rental of office space within the District of Columbia;] hire of passenger motor vehicles; not to exceed [$2,885,000] *$5,849,000* for expenses of travel; and uniforms or allowances therefor, as authorized by the Act of September 1, 1954, as amended (5 U.S.C. 2131); [$91,400,000] *$167,560,000.* (*42 U.S.C. 2451 et seq.; 50 U.S.C. 151–160, 511–515; Supplemental Appropriation Act, 1960; authorizing legislation to be proposed for 1961.*)

Appropriated 1960, **$91,400,000** Estimate 1961, [a] **$167,560,000**

[a] Includes $34,316,000 transferred in the estimates from "Salaries and expenses, Advanced Research Projects Agency, Department of Defense." The amounts obligated in 1959 and 1960 are shown in the schedule as comparative transfers.

4. Relation of costs to obligations: Costs financed from obligations of other years, net (−)	−1, 055, 326	−5, 600, 000	
Total program (obligations)	89, 976, 515	106, 400, 000	167, 560, 000
Financing:			
Comparative transfers from (−) Department of Defense	−5, 000, 000	−15, 000, 000	
1959 appropriation available in 1958	1, 011, 781		
Unobligated balance no longer available	298, 004		
Appropriation (new obligational authority)	86, 286, 300	91, 400, 000	167, 560, 000

This appropriation provides for the salaries and operating expenses (other than supplies, equipment, and construction) of the research and development centers and other activities operated by the National Aeronautics and Space Administration with Government personnel.

1. *Aeronautical and space research.*—Research is conducted at the Langley, Ames, Lewis, and Flight Research Centers, located at Langley Air Force Base, Va.; Sunnyvale, Calif.; Cleveland, Ohio; and Edwards Air Force Base, Calif., respectively. The level of operations at these centers will be substantially the same in 1961 as in 1960.

2. *Space flight development and operations.*—The Goddard Space Flight Center at Beltsville, Md., will be the data center for NASA space operations; it will also be responsible for payloads, primarily for earth satellites, and for directing the manned space flight program. The Wallops Station in Virginia will be utilized for launching sounding rockets, test vehicles, and small satellites. The NASA facility at Huntsville, Ala., will engage in space vehicle development including the Saturn very high thrust booster project. NASA personnel are also located at the Atlantic and Pacific missile ranges and worldwide tracking stations. The large increase in 1961 results primarily from the inclusion for the first time in this appropriation of the full amount of salaries and expenses for the Huntsville facility which is being transferred to NASA from the Army. This facility was supported previously by funds for specific missile and space projects, chiefly of the Department of Defense, through the mechanism of work orders placed with the Army industrial fund at the Army Ballistic Missiles Agency. Other increases are required

Appropriation (adjusted)	171,078,250	320,350,000	545,153,000

This appropriation provides for the contractual costs of research, development, procurement, and operations.

1. *Aeronautical and space research—(a) Support of NASA plant.*—The increase in 1961 in the requirements for contractual services, supplies, and equipment required in the operation of the NASA research centers results chiefly from the need for providing the laboratories with new specialized types of equipment required for research on problems of space which were not required in prior years when the principal emphasis was on aeronautics.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

(*b*) *Research grants and contracts.*—The 1961 program contemplates additional support of research on materials and in certain fields, such as the space aspects of medical and biological research, for which the NASA does not have a capability at its own research centers.

2. *Space flight development and operations*—(*a*) *Support of NASA plant.*—Funds are provided in this subactivity for contractual services, supplies, and equipment required in the operation of the NASA space flight development centers, stations, and offices. The increase in 1961 is required to support the increased personnel and workload of these organizations.

(*b*) *Scientific investigations in space.*—This provides for an increased scientific program in space in 1961, utilizing sounding rockets, earth satellites, and lunar and planetary probes.

(*c*) *Satellite applications.*—Development of meteorological and passive communications satellites will be continued in 1961.

(*d*) *Manned space flight.*—The funding included for 1961 is expected to carry the Mercury program into the operational phase. In addition, a supplemental appropriation is anticipated for 1960 and is shown below under Proposed for later transmission.

(*e*) *Vehicle development.*—This subactivity provides for the development, fabrication, and launching of advanced space vehicles. Principal emphasis in 1961 will be on the Saturn very high thrust booster vehicle and on the Centaur vehicle with a high-energy upper stage.

(*f*) *Space propulsion technology.*—This subactivity funds the development of advanced propulsion techniques and systems for application to future space vehicles. Work will be continued in 1961 on the single chambered 1.5-million pound thrust engine; advanced liquid and solid fuel rocket engines; nuclear rocket and electrical propulsion systems; and nuclear, solar, and electrical auxiliary power supplies for payload applications.

(*g*) *Vehicle systems technology.*—Increased funding is provided in 1961 for developing systems and components for midcourse and terminal guidance, and attitude control systems for payload packages.

(*h*) *Tracking and data acquisition.*—This subactivity provides for the operation by contract of the Minitrack satellite tracking network, the deep space network, and the special tracking facilities for the Mercury manned space flight program. It also covers costs of data transmission and reduction, and research and development in the fields of tracking, data acquisition, and data handling.

3. *Program direction.*—This activity provides for the contractual services, supplies, and equipment for the Administration's headquarters and western operations offices.

4. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources and applicable adjustment as reflected in the following table:

Construction and Equipment

[For an additional amount for "Construction and equipment", as authorized by Public Law 86-12, $21,825,000, to remain available until expended.]

For construction and equipment for the National Aeronautics and Space Administration and for the acquisition or condemnation of real property [at Cleveland, Ohio,] as authorized by law, [$52,000,000] *$89,287,000,* to remain available until expended[: *Provided,* That no part of the foregoing appropriation shall be available for purposes authorized by section 3 of Public Law 86-45 until fourteen days have elapsed after notification as required by law to the Committee on Science and Astronautics of the House of Representatives and the Committee on Aeronautical and Space Sciences of the Senate]. (*42 U.S.C. 2451 et seq.; 50 U.S.C. 151-160, 511-515; Supplemental Appropriation Act, 1960; authorizing legislation to be proposed for 1961.*)

Appropriated 1960, **$73,825,000** Estimate 1961, [a] **$89,287,000**
Appropriated (adjusted) 1960, **$88,825,000**

[a] Includes $13,000,000 transferred in the estimates from "Salaries and expenses, Advanced Research Projects Agency, Department of Defense." The amounts obligated in 1959 and 1960 are shown in the schedule as comparative transfers.

Appropriation (adjusted)			48,000,000	88,825,000	89,287,000				

This appropriation provides for the modernization of existing facilities, the construction of new facilities including design by contract, and the purchase of major items of equipment. The costs shown in 1961 include those related to projects authorized in prior years. The principal projects proposed for construction in 1961 are as follows:

1. *Aeronautical and space research facilities*—(*a*) *Langley Research Center.*—Proposed projects include an aerothermal dynamics facility to simulate the environment of vehicles in the hypersonic speed ranges and a laboratory to study the dynamics of objects in various density, temperature, acceleration, and vibration environments.

(*b*) *Ames Research Center.*—Additional equipment for a centrifuge to test the effects of high acceleration in space vehicle equipment will be procured in 1961.

(*c*) *Lewis Research Center.*—It is proposed to construct a basic materials research laboratory and a laboratory for research on energy conversion and power generation processes and equipment.

(*d*) *Flight Research Center.*—Projects funded under the 1960 appropriation will be completed in 1961, and no new projects are proposed.

2. *Space flight development and operations facilities*—(*a*) *Goddard Space Flight Center.*—The proposed construction in 1961 consists of a payload test facility, a satellite systems laboratory, and utility installations.

(*b*) *Wallops Station.*—Improvements to be added in 1961 include a system to determine the precise trajectory of launched vehicles, an operations computing center, and the modernization of certain existing support equipment.

(*c*) *Jet Propulsion Laboratory.*—The 1961 program includes the modernization of laboratory facilities, a solid propellant facility, a liquid propellant test cell, an antenna range, and the acquisition of approximately 3 acres of land.

(*d*) *NASA Huntsville facility.*—It is proposed to construct in 1961 a Saturn static test facility, a central laboratory and office facility, a dynamic test facility, an addition to a fabrication laboratory, an extension to an assembly building, a pressure test cell, and additions to the engineering and guidance and control buildings, all to enable the Huntsville facility to carry forward the Saturn project and its work on other space flight development projects.

(*e*) *Atlantic Missile Range.*—Completion of the Saturn launching complex and an addition to the engineering

Federal Reserve Bank of St. Louis

and laboratory building are proposed in 1961. In addition, a supplemental appropriation is anticipated for 1960 and is shown under Proposed for later transmission.

(*f*) *Pacific Missile Range.*—Launching facilities funded under the 1960 appropriation will be completed in 1961. No new projects are proposed in 1961.

(*g*) *Various locations—Tracking facilities.*—The 1961 program includes additional electronic and optical equipment; control and data processing equipment; and accessory equipment, shelters, and utilities. These items are required to improve the capabilities of the Minitrack satellite tracking network and the net for tracking deep space probes and to complete the special tracking stations for the Mercury manned space flights. In addition, a supplemental appropriation is anticipated for 1960 for the Mercury net, and is shown under Proposed for later transmission.

Propulsion development facilities.—Projects initiated in 1959 and 1960 will be completed in 1961. No new projects are proposed for 1961.

4. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources as reflected in the following table:

Selected resources at end of year:	*1958 actual*	*1959 actual*	*1960 estimate*	*1961 estimate*
Inventories and items on order:				
Unpaid undelivered orders (appropriation balances obligated for goods and services on order not yet received)	$22,163,679	$33,475,086	$76,911,000	$97,698,000
Advances (payments for goods and services on order not yet received)	615,223	23,116	100,000	100,000
Total selected resources at end of year	22,778,902	33,498,202	77,011,000	97,798,000
Selected resources at start of year (−)	−22,778,902	−33,498,202	−77,011,000	
Obligations incurred for costs of other years, net		10,719,300	43,512,798	20,787,000

Unobligated balance carried forward	106,082		
Unobligated balance no longer available		105,842	
Appropriation (new obligational authority)			

1. *Aeronautical and space research facilities.*—Final costs were incurred in 1959 and 1960 under a $75 million appropriation made in 1950 for the construction of 3 large supersonic wind tunnels which were placed in operation in 1956.

2. *Relation of costs to obligations.*—Year-end balances of unpaid undelivered orders were as follows: 1958, $42,726; 1959, $15,971.

General Provisions

Not to exceed 5 per centum of any appropriation made available to the National Aeronautics and Space Administration by this Act may be transferred to any other such appropriation, but the "Salaries and expenses" appropriation shall not be thereby increased.

[The general provisions applicable to appropriations contained in title I of the "Independent Offices Appropriation Act, 1960", shall apply to appropriations contained in this Act for the National Aeronautics and Space Administration.] (*Supplemental Appropriation Act, 1960.*)

Program by activities:			
2. Space flight development and operations:			
(*d*) Manned space flight		$2,300,000	$9,700,000
Total program costs		2,300,000	9,700,000
5. Relation of costs to obligations:			
Costs financed from obligations of other years (unpaid undelivered orders), net (−)			−9,700,000
Obligations incurred for costs of other years (unpaid undelivered orders), net		9,700,000	
Total program (obligations)		12,000,000	
Financing:			
Proposed supplemental appropriation		12,000,000	

Under existing legislation, 1960.—The supplemental appropriation anticipated for 1960 is for contracts related to the Mercury manned space flight program. These funds will be used to finance cost increases incurred because of the compressed time schedule of the project and to incorporate certain changes to insure the safety of the astronauts.

5. *Relation of costs to obligations.*—Year-end balances of unpaid undelivered orders for 1960 are $9,700,000.

Total program (obligations)		11,000,000	
Financing:			
Proposed supplemental appropriation		11,000,000	

Under existing legislation, 1960.—Supplemental funds anticipated for 1960 will provide improved communications with and data acquisition from the astronaut in the Mercury capsule as recommended by the Nation's top aeromedical experts. In addition, these funds will pay for modifications to existing launching pads for Atlas-type space booster vehicles to assure that advanced vehicle programs such as the Atlas Agena and Atlas Centaur are not delayed.

4. *Relation of costs to obligations.*—Year-end balances of unpaid undelivered orders are as follows: 1960, $10,000,000; 1961, $3,200,000.

NATIONAL CAPITAL HOUSING AUTHORITY

Current authorizations:

[OPERATION AND MAINTENANCE OF PROPERTIES]

[For the operation and maintenance of properties under title I of the District of Columbia Alley Dwelling Act, $40,000: *Provided*, That all receipts derived from sales, leases, or other sources shall be covered into the Treasury of the United States monthly: *Provided further*, That so long as funds are available from appropriations for the foregoing purposes, the provisions of section 507 of the Housing Act of 1950 (Public Law 475, Eighty-first Congress), shall not be effective.] (*48 Stat. 930, amended by Public Law 75-733; Independent Offices Appropriation Act, 1960.*)

Appropriated 1960, **$40,000**

Public enterprise funds:

OPERATION AND MAINTENANCE OF PROPERTIES REVOLVING FUND

Program and Financing

	1959 actual	1960 estimate	1961 estimate
Program by activities:			
Operation and maintenance of title I properties (total obligations)	$37,920	$40,000	$41,000
Financing:			
Appropriation	38,000	40,000	
Receipts from rental of properties			47,000
Unobligated balance carried forward			−4,000
Capital transfer (payment of prior year rental receipts to Treasury) (−)			−2,000
Unobligated balance no longer available	−80		
Financing applied to program	37,920	40,000	41,000

The Authority operates 96 low-rent housing units under title I of the District of Columbia Alley Dwelling Act. The budget proposes the establishment of a revolving fund as provided in the Housing Act of 1950 which authorizes the Authority to utilize its rental receipts to finance its operations, subject to the approval of budgets by the Public Housing Administration. Heretofore, this provision of the Housing Act of 1950 has been made inoperative by appropriation acts which required the Authority to cover its rental receipts into the Treasury. This proposal will give the Authority greater flexibility in administering the title I program subject to the same degree of supervision which the Public Housing Administration exercises over comparable local housing authorities in the operation of the low-rent housing program.

Sources and Application of Funds (Operations)

[1] Includes capital outlay as follows: June 30, 1959, $2,659; 1960, $7,400; 1961, $7,400.

1. *Planning development of the National Capital.*—The Commission is charged with planning the orderly development and redevelopment of the National Capital and the conservation of the important natural and historical features thereof. Its membership consists of five private citizens chosen for their experience in city and regional planning and seven ex officio members who are officials having responsibility for development of the Nation's Capital.

2. *Coordinating metropolitan area planning.*—The National Capital Regional Planning Council coordinates planning in the counties and cities of the metropolitan area. Its membership is composed of the Chairman of the Planning Commission, the Engineer Commissioner of the District of Columbia, and four representatives each from Maryland and Virginia, who are nominated from the State planning agencies.

3. *Relation of costs to obligations.*—Year-end balances of unpaid undelivered orders are as follows: 1958, $6,940; 1959, $14,664; 1960, $14,664; 1961, $14,664.

[1] Capper-Cramton Act, May 29, 1930, as amended (46 Stat. 482).
[2] Includes $3,000,000 for loan (advances) to Maryland.

The National Capital Planning Commission acquires land for the comprehensive development of the park, parkway, and playground system in the District of Columbia and its environs.

1. *George Washington Memorial Parkway.*—Land is acquired in Maryland and Virginia along the shores of the Potomac River, above and below Washington from Great Falls to Mount Vernon. One-half of the cost is borne by local jurisdictions. Funds requested herein are for the acquisition costs of land in the vicinity of the Woodrow Wilson Bridge in Prince Georges County, Md.

2. *Stream valley parks.*—Land is acquired by public bodies in Maryland and Virginia with the aid of a one-third contribution from the National Capital Planning Commission.

3. *Park, parkway, and playground system in the District of Columbia.*—Land is also acquired in the District of Columbia, with all expenditures being repaid over a period of years to the United States by the District of Columbia. Funds appropriated during 1960 completed the amount authorized by law.

Appropriation (new obligational authority)	13,256,600	14,730,000	17,300,000

The Board resolves representation disputes in industry and remedies and prevents specified unfair labor practices by employers or labor organizations. Additional funds are requested to enable the agency to handle the heavier workload expected due to enactment of the Labor-Management Reporting and Disclosure Act of 1959. Also, the act makes priority handling mandatory for about 85% of the unfair labor practice cases and in order to achieve the speed specified in law, the Board plans substantial reductions in backlogs at all processing stages.

1. *Field investigation.*—Charges of unfair labor practices and petitions for elections to resolve representation disputes are investigated by regional office personnel. Failing settlement, dismissal or withdrawal, these cases are prepared for public hearing. About 85% of the unfair labor practice cases and about 75% of the representation cases are closed without the need for public hearing or further formal action.

2. *Trial examiner hearing.*—Trial examiners conduct public hearings in unfair labor practice cases. Their findings and recommendations are set forth in intermediate reports. In 1959, 520 hearings were held and 388 reports were issued; the estimate for 1960 is 680 hearings and 550 reports, the estimate for 1961 is 815 hearings and 705 reports.

3. *Board adjudication.*—In unfair labor practice cases a trial examiner's intermediate report becomes a Board order if no exceptions are filed. Exceptions are filed to approximately 80% of the intermediate reports and are referred to the Board for decision. In contested representation cases the Board may either order an election in an appropriate unit to determine the choice of bargaining representative or dismiss the case. The Labor-Management Reporting and Disclosure Act of 1959 authorizes the Board to delegate to regional directors authority over representation cases and the appropriate scope of such a delegation is presently being studied.

DECISIONS ISSUED BY THE BOARD

	1959 actual	*1960 estimate*	*1961 estimate*
Unfair labor practice	286	450	665
Representation	1,784	2,155	2,415

4. *Securing of compliance with Board orders.*—If the parties do not voluntarily comply with the Board's order, the Board must request the courts to enforce its decisions. Most contested decisions involve unfair labor practices. In 1959 a total of 97 Board decisions of all kinds required court litigation; the estimate for 1960 is 190; the estimate for 1961 is 230.

A supplemental appropriation for 1960 is anticipated for handling increased workloads resulting from the Labor-Management Reporting and Disclosure Act of 1959 and is shown under Proposed for later transmission.

Unobligated balance carried forward	4,389,001		
New obligational authority	136,000,000	154,773,000	190,000,000

Program and Financing—Continued

	1959 actual	1960 estimate	1961 estimate
New obligational authority:			
Appropriation	$134,000,000	$152,773,000	$190,000,000
Transferred from "Operating expenses," Atomic Energy Commission (72 Stat. 881: 73 Stat. 363)	2,000,000	2,000,000	
Appropriation (adjusted)	136,000,000	154,773,000	190,000,000

The Foundation supports basic research, pre- and postdoctoral fellowships, education in the sciences, and the interchange of foreign and domestic scientific information. Under its support of basic research the Foundation administers the U.S. program for research in the Antarctic. It is also responsible for developing and encouraging the pursuit of a national policy for the promotion of basic research and education in the sciences, and for recommending to the President policies for strengthening the Nation's scientific effort. The increased appropriation will provide additional funds for basic scientific research; for additional scientific research facilities; for making the results of research conducted in the United States and abroad more readily available within the scientific community; and for increased costs in programs to improve science teaching and the development of research scientists in this country.

1. *Support of science.*—The Foundation supports basic research projects, principally in institutions of higher learning.

GRANTS FOR SUPPORT OF RESEARCH PROJECTS

	1959 actual	1960 estimate	1961 estimate
Number of grants awarded	1,742	1,900	2,075

It also supports (1) basic research facilities at educational and other nonprofit institutions in such fields as astronomy, oceanography, electronic computation, and the biological sciences; (2) collecting, translating, and disseminating information on the results of scientific research, and developing improved methods for the exchange of scientific data; and (3) studies of the status of research in the United States and foreign countries.

2. *Support of scientific manpower.*—The Foundation awards fellowships to graduate science students, college science faculty fellowships, summer fellowships for high school science, and mathematics teachers, and supports summer study programs for graduate teaching assistants.

FELLOWSHIPS FOR ADVANCED STUDY IN SCIENCE AND MATHEMATICS

	1959 actual	1960 estimate	1961 estimate
Number of fellowships awarded	3,671	3,761	3,763

It supports summer, in-service, and academic-year institutes for the training of elementary, secondary school, and college teachers of science and mathematics.

INSTITUTES FOR SCIENCE AND MATHEMATICS TEACHERS

	1959 actual	1960 estimate	1961 estimate
Number of participants supported at institutes	30,905	31,235	31,525

It also supports (*a*) projects directed toward the improvement of elementary, secondary school, and college science and mathematics course content; (*b*) supplementary programs to stimulate interest in and secure improvement of teaching and training in the sciences at secondary school and college levels; (*c*) cooperative science education activities with scientists and educators of other nations; (*d*) maintenance of a national register of scientific and technical personnel; and (*e*) studies relating to supply, demand, and utilization of scientific manpower.

SALARIES AND EXPENSES (SPECIAL FOREIGN CURRENCY PROGRAM)

For purchase of foreign currencies which accrue under Title I of the Agricultural Trade Development and Assistance Act of 1954, as amended (7 U.S.C. 1704), for the purposes authorized by section 104(k) of that Act, to remain available until expended, $1,600,000, which shall be available only to purchase currencies which the Treasury Department shall determine to be excess to normal requirements of the United States.

Estimate 1961, [a] **$1,600,000**

[a] Estimate is for activities previously carried under "Translation of publications and scientific cooperation," special foreign currency programs, funds appropriated to the President. The amounts obligated in 1959 and 1960 are shown in the schedule as comparative transfers.

Program and Financing

	1959 actual	1960 estimate	1961 estimate
Program by activities:			
Scientific information activities overseas (total obligations)	$288,889	$911,111	$1,600,000
Financing:			
Comparative transfers from "Translation of publications and scientific cooperation," special foreign currency programs, funds appropriated to the President	−$288,889	−$911,111	
Appropriation (new obligational authority)			$1,600,000

The National Science Foundation administers, on behalf of the Federal Government, a program of collecting, translating, abstracting, and disseminating scientific and technological information in certain foreign countries, using excess foreign currencies accruing from the sale of surplus agricultural commodities, as authorized by the provisions of section 104(k) of the Agricultural Trade Development and Assistance Act of 1954.

A major portion of the program, for the translation of Russian scientific literature, is in Israel. In Poland and Yugoslavia, translation of literature, both in native and related languages, will be included. New programs will be undertaken in India and Egypt in 1961.

In 1961, it is estimated that the Foundation will spend $8,000 out of its regular Salaries and expenses appropriation for miscellaneous costs to administer this program.

Unobligated balance carried forward	370,185	311,385	247,185
Appropriation (new obligational authority)	13,090	26,200	23,800

The Oliver Wendell Holmes devise fund was established by 69 Stat. 533 to (*a*) prepare a history of the Supreme Court of the United States, and, if deemed advisable, (*b*) finance an annual lecture or series of lectures, and (*c*) publish a memorial volume of Justice Holmes' writings. The principal and interest on the fund are available for these purposes. The current program is devoted primarily to the preparation of the history of the Supreme Court. A grant of $37,500 from the Rockefeller Foundation has been made available for the period 1960–62 to pay salaries of authors preparing the history during leaves of absence from their universities for one or more academic semesters.

Limitation	9,374,300	9,460,000	9,485,000

The Board administers the railroad retirement system, financed by employer and employee taxes. The administrative expenses of the Board in the operation of this program are derived from the railroad retirement account. This system provides annuities for age and disability and benefits for survivors.

The 1959 amendments to the Railroad Retirement Act and the Railroad Retirement Tax Act (Public Law 86–28, approved May 19, 1959) increased benefits by about 10% to present and future beneficiaries of the program; increased the employee-employer tax rate and raised the taxable compensation base to $4,800; and made various other changes in the law. Nonrecurring work created by these amendments in 1959 and 1960 included approximately 740,000 adjustments of benefits to reflect the higher rate; 20,000 claims from wives aged 62–64 newly eligible for benefits; and various miscellaneous claims reopenings.

1. *Maintenance of earnings accounts.*—Eligibility for and the amount of benefits are based on individual accounts of compensation. This workload fluctuates with the level of employment in the railroad industry, rates of turnover, and similar factors. The number of compensation items was 1,893,000 in 1959 and are estimated at 1,893,000 and 1,929,000 in 1960 and 1961. The costs are shared on a measured basis with the railroad unemployment insurance program.

2. *Processing claims.*—Applications for annuities and benefits are adjudicated and certified for initial payment. The claims intake has followed an upward trend over the years as more railroad workers, their spouses or survivors become entitled. Regular claims processed were 181,783 in 1959 and are estimated at 183,240 and 189,421 in 1960 and 1961.

3. *Maintenance of beneficiary rolls.*—Benefit payments must be authorized each month for those persons on the rolls who continue to remain eligible. The number of monthly benefit payments were 8,589,187 in 1959 and are estimated at 9,200,000 and 9,600,000 in 1960 and 1961 and will continue to increase annually. The number of persons on the rolls receiving monthly benefit payments was 746,251 in 1959 and is estimated at 798,000 and 826,500 in 1960 and 1961.

4. *Hearings and appeals.*—Individuals whose claims for annuities or benefits are disallowed or who dispute the award have the right of appeal. Appeals dispositions were 275 in 1959 and are estimated to be at about the same level in 1960 and 1961.

5. *Actuarial services.*—Actuarial studies and estimates are required by the Railroad Retirement Act to determine the adequacy of the tax rate to establish and maintain a sufficient reserve to meet all future payments.

6. *Administration.*—This activity includes executive direction, general administration, and housekeeping services. The cost of administration is shared between the retirement and the railroad unemployment insurance programs on a measured basis.

The Board conducts renegotiation with contractors to eliminate excessive profits in connection with procurement under the national defense program. All contractors and subcontractors who have any business subject to the act, which has been extended through June 30, 1962, are required to file with the Board. The Board has determined or recovered $783,812,931 in excessive profits from the date of its establishment through June 30, 1959. Of this total, $60,757,877 was determined during 1959.

Digitized for FRASER

Federal Reserve Bank of St. Louis

1. *Executive direction.*—The Board is responsible for final action in all cases. This includes screening all filings involving renegotiable business over $1 million and requests for exemption.

2. *Staff operations.*—The headquarters staff furnishes technical advice and assistance to the Board and its regional organization.

3. *Renegotiation operations.*—The three regional boards conduct renegotiation proceedings and make initial determinations. The field boards make the excessive profit determination in all cases involving $800,000 or less of renegotiable profits; however, this determination may be appealed to the statutory Board. All determinations in cases involving more than $800,000 renegotiable profits are reviewed and approved by the statutory Board.

Financing applied to program	6,775,789	12,271,269	8,446,200

The Saint Lawrence Seaway Development Corporation, a wholly Government-owned enterprise, is responsible for the construction, operation, and maintenance of that part of the Saint Lawrence Seaway within the territorial limits of the United States (33 U.S.C. 981). A 27-foot navigational channel from Lake Erie to Montreal was officially opened for the 1959 navigational season. The Seaway has been constructed and is being operated and maintained jointly by the Saint Lawrence Seaway Development Corporation and the St. Lawrence Seaway Authority of Canada, in conjunction with the related power development works provided by the Power Authority of the State of New York and the Hydro-Electric Power Commission of Ontario.

Budget program—Capital outlay.—The Corporation's construction program consists of a 10-mile canal, two locks, and navigation channels in the 46-mile International Rapids section of the St. Lawrence River between Ogdensburg and Massena, and certain channel and related navigation works in the 68-mile Thousand Islands section between Lake Ontario and Ogdensburg.

The revised total construction cost of the U.S. share of the Seaway, excluding interest during construction, is estimated at $123.4 million. Work in place at the end of the current year 1960 is estimated at $120.8 million, and the budget year 1961 program to complete the project is estimated at $2.6 million, consisting principally of channel enlargements.

Operating costs.—The deep draft Seaway was opened on a toll basis in April 1959 and the project is considered to be in a regular operation and maintenance status since that date. All costs of operating the shallow-draft Seaway during the 1958 shipping season have been capitalized.

18. *Relationship of costs to obligations.*—The relationship is derived from year-end balances of selected resources as follows:

	1958 actual	*1959 actual*	*1960 estimate*	*1961 estimate*
Selected resources at end of year:				
Prepayments and advances	$349			
Supplies, deferred charges, etc		$175		
Unpaid undelivered orders	8,701,302	705,956	$300,000	$150,000
Total selected resources at end of year	8,701,651	706,131	300,000	150,000
Selected resources at start of year (−)		−8,701,651	−706,131	−300,000
Cost financed from obligations of other years, net (−)		−7,995,520	−406,131	−150,000

Financing.—The Corporation is authorized to borrow $140 million from the Treasury to finance the costs of the Seaway and to provide for working capital and claims. Borrowings through 1960 are estimated at $119.7 million, and an additional $3.8 million is required for the budget year 1961.

Operating results.—The expense of operation, including depreciation and interest for 1961, is estimated at $7.1 million. Shipping toll revenue for 1961 is expected to be $4.7 million.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

During the developmental period it is expected that operating deficits will result until such time as the ship traffic increases. The anticipated deficit at the end of the budget year of $5 million includes $2.4 million of depreciation charges.

The toll rates have been established at a level which will repay all the costs of investment in the Seaway, including interest and operating expenses, all within the 50-year statutory payout period, including any deficit incurred during the developmental period. No additional borrowing authority will be required to finance this deficit.

The primary purpose of the Commission is to protect the interests of the investing public.

1. *Full disclosure provisions.*—Issuers of securities for public sale are required to file a registration statement and related prospectus containing significant information about the issuer and the offering with the Commission. This is to insure that investors will be provided with the material facts concerning security offerings.

SELECTED WORKLOAD DATA

	1958 actual	1959 actual	1960 estimate	1961 estimate
Registration statements examined	873	1,119	1,277	1,525
Preliminary proxy statements examined	1,944	1,937	2,072	2,300
Administrative proceedings closed	118	114	133	168
Periodic reports examined	47,074	52,743	51,241	63,100
Regulation A filings examined	742	827	917	945

2. *Prevention and suppression of fraud.*—Suspected fraud, deceit, and manipulation in the sale and trading of securities is prevented or minimized by prompt investigation. The 2.8-year cycle for the broker-dealer inspection program will continue in 1961.

SELECTED WORKLOAD DATA

	1958 actual	1959 actual	1960 estimate	1961 estimate
Investigations closed	488	483	512	580
Cases referred to the Department of Justice for criminal prosecution	17	48	50	50

Applications for broker-dealer registration processed	713	917	1,000	1,287

3. *Supervision and regulation of securities markets.*—National securities exchanges and over-the-counter markets are regulated in the interest of maintaining just and equitable principles of trade for the protection of the public investors.

SELECTED WORKLOAD DATA

	1958 actual	1959 actual	1960 estimate	1961 estimate
Amendments, notifications, and circulars of exchanges examined	1,718	1,806	1,850	1,850
Trading reports and field investigations reviewed	88	57	80	100

4. *Regulation of investment and public utility holding companies.*—Financing and other corporate matters of interstate public utility holding companies engaged in the electric utility business or in the retail distribution of gas are regulated. A total of 18 holding company systems, comprising 176 separate companies with assets of $10.8 billion, are registered under the Public Utility Holding Company Act of 1935. Foreign and domestic investment companies are registered also and their activities supervised. The assets of these companies have increased from $2.5 billion in 1941 to $20 billion in 1959. In 1961, the investment company inspection program will be placed on an 8½-year cycle.

SELECTED WORKLOAD DATA

Appropriation (new obligational authority)	29,556,800	29,278,400	32,950,000

The primary purpose of the Selective Service System is effective manpower utilization through classification under the Universal Military Training and Service Act. The System is responsible for supplying men to keep the Armed Forces at their authorized strength to the extent that their needs are not met by voluntary enlistment. It will supply an estimated 100,000 men for this purpose in 1961 as compared to approximately 100,000 in 1960 and 112,000 in 1959.

1. *National administration.*—The overall administration of the act including planning, training, and records management is accomplished by the national headquarters and six regional field offices.

2. *State administration.*—Administration of the act within the several States is the responsibility of the 56 State headquarters operating under the policies determined by national headquarters.

3. *Registration, classification, and induction.*—These functions affecting approximately 22 million registrants are accomplished by the over 42,000 uncompensated citizens assisted by about 6,000 clerks at over 4,000 boards. These citizens determine who shall be deferred and for how long in the national interest in agriculture, industry or other pursuits. They also determine the availability for military service of members of the Standby Reserve.

4. *Special boards—National Advisory Committee on the Selection of Physicians, Dentists, and Allied Specialists.*—This Committee acts in an advisory capacity to the Selective Service System. It is separately administered, but funds are furnished by the Selective Service System from its appropriation.

National Selective Service Appeal Board.—This Board acts on the classification of registrants which have been appealed to the President. It is under separate administration but the Selective Service System provides funds for its operation.

The Small Business Administration counsels, assists, and protects the interest of small business. In addition it provides aid to business firms and homeowners who have suffered losses through disasters.

1. *Procurement and technical assistance.*—The objectives of this activity are (*a*) to insure that a fair proportion of Government contracts for purchases of supplies and services and the sale and disposal of property be placed with small business enterprises, (*b*) to insure that a fair proportion of Government contracts for research and development be placed with small business concerns and assist small firms to obtain the benefits of research and development performed at Government expense, and (*c*) to provide technical and managerial aid to small business concerns by advising and counseling on matters in connection with Government procurement, research and development, property disposal, methods engineering, and new and improved products and processes.

2. *Management and research assistance.*—Assistance is provided to small business through (*a*) management counseling, (*b*) developing and distributing management aids and bulletins, and (*c*) establishing administrative management courses. This activity also includes the program of grants to States, State development corporations, colleges, and universities, for studies and research concerning the managing, financing, and operation of small business concerns.

3. *Investment and development company assistance and supervision.*—In order to stimulate and supplement the flow of private capital to small business concerns this agency is authorized to (*a*) charter, regulate, and examine small business investment companies, (*b*) provide capital and lend funds to these companies, and (*c*) lend funds to State and local development companies.

4. *Financial assistance.*—Small business concerns and victims of disasters are aided through loans which are administered so as to assure return of the Government investment. In addition, financial counseling is provided to small firms requesting assistance. Funds for administrative expenses of this activity are transferred from the Revolving fund. Financial statements covering these programs may be found under the Revolving fund.

5. *Liquidation of Reconstruction Finance Corporation loans.*—As of June 30, 1959, there were 1,374 disaster loans outstanding amounting to $3,638,025. These figures represent a reduction of 1,856 loans and $11,108,582 from those taken over on July 1, 1954. In addition, pursuant to Reorganization Plan No. 1 of 1957, Reconstruction Finance Corporation business loans amounting to more than $14,000,000 were transferred to the Small Business Administration on June 30, 1957, for liquidation. As of June 30, 1959, there were 265 loans outstanding amounting to $4,435,513. Administrative expenses for this activity are transferred from the liquidation fund made up of receipts from these loans.

Federal Reserve Bank of St. Louis

This indefinite special fund account was established to finance grants to any State government, or agency thereof, State-chartered development credit or finance corporation, land-grant colleges and universities, and other schools for research and counseling concerning the managing and financing of small business enterprises. The amount appropriated was derived from repayments by each Federal Reserve bank of the aggregate amount which the Secretary of the Treasury had heretofore paid to such banks under the provisions of the Federal Reserve Act.

Only one grant could be made within any one State in any year, and no grant could exceed an aggregate amount of $40,000. During 1959, there were 52 grants awarded ranging from $7,465 to $40,000, and totaling $1,902,748. No grants will be made in 1961 since the unobligated balance has been rescinded.

Public enterprise funds:

This fund finances business and disaster loans and investment and development company assistance activities authorized by the Small Business Act (72 Stat. 384) and the Small Business Investment Act (72 Stat. 689).

The Congress has authorized loan and investment commitments of $950 million. A maximum of $575 million may be outstanding for business loans, $125 million for disaster loans, and $250 million for investment and development company assistance. It is estimated that the business loan limitation will be reached early in 1961, thus legislation will be proposed to increase this limitation. The position with respect to lending authority is as follows:

Financial assistance program:	*1959 actual*	*1960 estimate*	*1961 estimate*
Business loans:			
Statutory limitation	$500,000,000	$575,000,000	$575,000,000
Anticipated increase in limitation			150,000,000
Total	500,000,000	575,000,000	725,000,000
Less—

SMALL BUSINESS ADMINISTRATION—Continued

Public enterprise funds—Continued

REVOLVING FUND—Continued

Budget program—Financial assistance—Business loans.—Business loans may be made directly or in participation with banks or other lending institutions, and shall be of such sound value or so secured as reasonably to assure repayment. No loan may be made unless the financial assistance is not otherwise available on reasonable terms. No direct loan may be made unless it is shown that participation with a bank is not available and no immediate participation loan may be made unless it is shown that a deferred participation loan is not available. The Administration's participation in a loan is limited to 90%, and the agency's maximum commitment of its fund to any one borrower is limited to $350,000, except for a loan to a corporation formed and capitalized by a group of small business concerns for purposes authorized in the Small Business Act. With respect to such pool loans, the limitation is $250,000 multiplied by the number of separate small businesses participating in the corporation. Business loans, except for the purpose of constructing facilities, are limited to a maturity of 10 years and except for pool loans bear interest at a maximum rate of 5½% per annum on the agency's share thereof. For pool loans, the rate of interest on the Small Business Administration's share shall be no less than 3% nor more than 5% per annum.

It is the policy to assist businessmen operating small firms to secure credit for constructive purposes on terms that will meet the borrower's individual requirements. Assistance includes counseling as well as the lending of funds. From the beginning of the lending program on September 29, 1953, through June 30, 1959, a total of 16,692 loans have been approved in a total amount of $786.8 million (including participating banks' share of $122.3 million). About 64% of these loans have been on a participation basis. The average size of loans approved to date is $47,138. In 1961 it is estimated that 6,770 loans will be approved compared to an estimate of 5,540 in 1960 and 5,582 in 1959.

The following tabulation reflects certain data on business loans and includes funds disbursed or collected by banks on participation loans. Accordingly, the Small Business Administration share of disbursements and repayments will not agree with related data in the financial statements, which reflect transactions on the basis of only the Small Business Administration cash funds involved.

DATA ON BUSINESS LOANS

[In millions]

	1959 actual	*1960 estimate*	*1961 estimate*
Loan commitments during the year:			
Total amount	$267.0	$269.1	$337.0
Small Business Administration share	228.5	227.1	284.4
Loans outstanding on June 30 held by banks and Small Business Administration:			
Total amount (estimate)	394.0	513.7	632.2
Small Business Administration share	332.5	433.6	533.6
Loan disbursements by banks and Small Business Administration:			
Total amount	217.4	232.5	274.3
Small Business Administration share	187.0	196.2	231.5
Loan repayments to banks and Small Business Administration:			
Total amount (estimate)	81.6	112.8	155.8
Small Business Administration share (estimate)	70.4	95.1	131.5

Disaster loans.—No restrictions exist on the amount which may be loaned to an individual or business firm suffering loss from a disaster. The maximum term for disaster loans is 20 years and the interest rate may not exceed 3% on the Small Business Administration share of the loan. Through June 30, 1959, a total of 8,616 loans for $92.5 million has been approved. In view of the unpredictable nature of the program, it is impractical to estimate the volume of new loans which may be committed in 1960 and 1961. For program purposes, a nominal amount of $14 million in new commitments has been assumed, which would represent 1,300 loans based on the average size of loans approved through 1959; 908 loans were approved in 1959.

DATA ON DISASTER LOANS

[In millions]

	1959 actual	*1960 estimate*	*1961 estimate*
Loan commitments during the year:			
Total amount	$9.2	$14.0	$14.0

Small Business Administration share	49.7	47.6	45.5
Loan disbursements by banks and Small Business Administration:			
Total amount	11.1	11.2	12.6
Small Business Administration share	10.8	10.7	12.6
Loan repayments to banks and Small Business Administration:			
Total amount (estimate)	9.8	13.5	14.7
Small Business Administration share (estimate)	9.4	12.8	14.6

Deferred participation business loans not expected to be purchased.—This reduction in loan commitments reflects the current policy of committing funds for only 20% of the agency's share of deferred participation loans, since experience shows that only a small portion of its share of such loans will be purchased.

Administrative expenses.—Administrative expenses are financed by transfer of funds from the Revolving fund to the appropriation for Salaries and expenses.

Investment and development company assistance program—Purchase of debentures of small business investment companies.—A primary function of these companies is to provide a source of needed equity capital for small business concerns. To facilitate the formation of such companies with capital adequate to meet the demands from small business firms, the Small Business Investment Act of 1958 authorizes the Small Business Administration to purchase debentures of any such company in an amount equal to not more than $150,000.

Loans to small business investment companies.—To further encourage the formation and growth of such companies, the Small Business Administration is also authorized to lend funds to them in amounts which may not exceed 50% of the paid-in capital and surplus of a company.

Loans to State and local development companies.—The Small Business Administration is authorized to lend funds to State development companies for general use purposes; and to State and local development companies for plant construction, conversion, or expansion, including the acquisition of land. Latter type loans shall be so secured as reasonably to assure repayment, may be made directly or in participation with banks or other lending institutions, may be made only when the proceeds are for use solely to assist an identifiable small business concern and for a sound business purpose approved by the agency, and are limited to a maximum of $250,000 for each such identifiable small business concern.

Financing.—The capital of the Revolving fund is provided by direct appropriation. Although Congress has authorized appropriations of $950 million for loans and investments, $690 million has been appropriated based on actual and estimated needs through June 30, 1960.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

After taking into consideration repayments, revenue, and cancellations of prior year loan commitments, and after making provision for a reserve for contingencies of $25 million to provide for possible increases in the level of program operations, appropriations of $60 million will be required as additional capital for the fund to finance the estimated program volume.

Operating results.—The deficit is expected to continue to increase because revenue from low interest rate disaster loans and from a large number of relatively small business loans is not sufficient to cover administrative and other expenses, including interest payable to Treasury on net expenditures from the fund. Administrative expenses for the investment and development company assistance program are not reflected in the schedules since funds for such expenses are provided by direct appropriation.

Financing applied to program	1,034,377	856,513	750,000

This fund finances the liquidation of business and disaster loans of the former Reconstruction Finance Corporation which have been transferred to the Small Business Administration for administration and liquidation. Under Reorganization Plan No. 2 of 1954, disaster loans in an amount of $14.7 million were transferred to the Small Business Administration. Also, pursuant to Reorganization Plan No. 1 of 1957 business loans and other assets of the Reconstruction Finance Corporation liquidation fund, Treasury Department, in excess of $14 million were transferred.

Budget program.—The program reflects the costs of the administration and liquidation activities relative to the loans and other assets transferred. Since the number of individual loans are gradually being reduced through liquidation, the costs are decreasing each year.

Financing.—Administrative expense and other program costs are financed from receipts from the liquidation of loans and other assets.

Operating results and financial condition.—In 1959, net budget receipts of $5.2 million together with cash funds carried over from 1958 provided funds sufficient to permit a payment of $6 million to the Treasury as a return on Government investment. Estimated net budget receipts of $2.8 million in 1960 and $1.3 million in 1961 will enable similar payments of $4.5 million and $1.3 million in these respective years. As of June 30, 1961, it is estimated that Government investment will have been reduced to $2.3 million, comprised of capital of $5.2 million and an accumulated deficit of $2.9 million.

[1] Includes capital outlay as follows: June 30, 1959, $913,564; 1960, $743,523; 1961, $614,303.

The Smithsonian Institution maintains public exhibits representative of the arts, American history, aeronautics, anthropology, geology, technology, and zoology; preserves for reference and study purposes millions of valuable items of scientific, cultural, and historical interest; conducts research in the natural sciences and in the history of cultures, technology, and the arts; and participates in the international exchange of scientific literature. The Institution operates two museums, two scientific bureaus, two art galleries, the Canal Zone Biological Area, and the International Exchange Service. It is responsible also for the operation and maintenance of five main exhibition buildings, a temporary storage facility (Suitland, Md.), and an exhibits laboratory.

During the budget year, exhibit preparation for the new Museum of History and Technology will be accelerated, three exhibits renovation projects, and three building rehabilitation projects will be completed. Visitors: 1957, 4,841,818; 1958, 5,423,771; 1959, 6,351,402.

4. *Relation of costs to obligations.*—Year-end balances of unpaid undelivered orders are as follows: 1958, $1,663,180; 1959, $1,608,312; 1960, $1,886,183; 1961, $1,466,420.

SUBVERSIVE ACTIVITIES CONTROL BOARD

Current authorizations:

SALARIES AND EXPENSES

For necessary expenses of the Subversive Activities Control Board, including services as authorized by section 15 of the Act of August 2, 1946 (5 U.S.C. 55a), not to exceed $30,000 for expenses of travel, and not to exceed $500 for the purchase of newspapers and periodicals, [$380,000] *$395,000. (Sec. 12, title I, of the Internal Security Act of 1950, 50 U.S.C. 791, as amended; General Government Matters Appropriation Act, 1960.)*

Appropriated 1960, **$380,000** Estimate 1961, **$395,000**

Appropriation (new obligational authority)	375,000	380,000	395,000

Upon petitions being filed, the Board holds formal hearings and determines whether: (*a*) organizations are Communist-action organizations, Communist-front organizations, or Communist-infiltrated organizations; (*b*) individuals are officers or members of a Communist-action organization or officers of a Communist-front organization and required to register as such; (*c*) the registration of particular Communist-action organizations or Communist-front organizations or of particular individuals should be canceled; and (*d*) a particular Communist-infiltrated organization has ceased to be a Communist-infiltrated organization. The Board's determinations involve the consideration of petitions, motions, answers, and evidence adduced at the hearings. In each case the Board issues a report in writing setting forth its rulings and findings as to the facts, and issues an appropriate order.

To date, the Board has heard and is hearing, only cases in which petitions against alleged Communist organizations have been filed by the Attorney General, who is the only person authorized by law to bring such actions. Under the act, proceedings concerning individuals in such organizations must await final determinations by the Board, and also by the appellate courts where an appeal has been taken, that the organizations to which they belong are Communist-action or Communist-front.

The Commission is charged with determining the impact of U.S. tariff and trade policies on domestic industries and providing information reports and recommendations to the President, Congress, or public on these matters. During the coming year, the Commission plans to resume the conduct of specific studies in the fields of commercial and trade policies with which they are charged under their statutes. A moderate increase in personnel will be required to carry on these activities and related functions.

The Tax Court hears and decides cases involving income tax deficiencies and claims for refunds of excess profits taxes under the special relief sections of the Internal Revenue Code, and cases involving determinations of excessive profits on contracts renegotiated by the Federal Government.

For 1961, the court proposes a trial program of 160 weeks to be held in approximately 50 cities. This program should result in closing approximately 6,000 cases.

The Congress created the Tennessee Valley Authority in 1933 for the unified development of a river basin comprising parts of seven States. Engineering works improve and regulate the Tennessee River for navigation, flood control, and the generation of electric power. Fertilizer research and agricultural activities promote conservation and improved use of land and water resources. Forestry activities stress maximum use of forest resources consistent with watershed protection. Watershed development work seeks integrated solution of problems in small tributary areas. All these activities are interrelated. Their common purpose is to help develop the valley's agricultural and industrial potential for the benefit of both the region and the Nation.

Other national interests are directly served. The Tennessee Waterway, a part of the inland waterway system, is an interregional artery for commerce moving to and from ports in 20 States. National defense requirements use over half of TVA's electric power generation. In national emergencies, defense needs have first call on the Muscle Shoals chemical facilities for munitions research and production; in peacetime they serve as the country's only public research center equipped for complete development of fertilizers from laboratory to demonstration scale production.

TVA is a corporation wholly owned by the Federal Government. On August 6, 1959, Public Law 86–137 was approved wherein the Tennessee Valley Authority was authorized to issue and have outstanding at any one time bonds in an amount not exceeding $750 million to assist in financing its power program and to refund such bonds. Its 1961 activities will be financed from three sources: (1) Appropriations by the Congress, (2) proceeds available from current power operations and from borrowings against future power revenue, and (3) proceeds available from nonpower activities.

Budget program—1. *Navigation, flood control, and power program.*—A major objective of the Tennessee Valley Authority Act is development and use of the Tennessee River for the threefold purpose of navigation, flood control, and power. System facilities consist of 26 major dams with hydroelectric generating stations, 10 navigation locks, 12 major fuel-electric generating stations, and a power transmission network of about 11,728 circuit miles.

TENNESSEE VALLEY AUTHORITY—Continued

Public enterprise funds—Continued

TENNESSEE VALLEY AUTHORITY FUND—Continued

NAVIGATION—SUMMARY OF ESTIMATED OPERATING COSTS

	1959 actual	*1960 estimate*	*1961 estimate*
Receipts	$16,412	$15,000	$15,000
Operating costs:			
Operating expense	241,388	294,000	300,000
Distribution of administrative and general expense	15,452	16,000	16,000
Allocation of multipurpose reservoir operations expense	1,342,093	1,434,000	1,432,000
Provision for depreciation	1,586,159	1,655,000	1,800,000
Total operating costs	3,185,092	3,399,000	3,548,000
Net expense	3,168,680	3,384,000	3,533,000

(*a*) *Navigation operations* of the multipurpose reservoir system maintain the all-year 9-foot channel from the mouth of the river to Knoxville, Tenn., a distance of 650 miles. Traffic on the Tennessee Waterway in calendar year 1958 was 12 million tons and 2.1 billion ton-miles. Transportation savings to shippers on this volume of traffic is estimated at $24 million, the difference between freight charges actually paid and those which would have obtained if the river had not been improved for navigation. About $23 million of these savings applied on freight originating outside the valley or moving from the valley to outside destinations. Engineering work assures that physical facilities are operated, maintained, and modified or improved to meet the needs of modern waterborne commerce. Technical studies appraise the opportunities for use of the waterway and the barriers inhibiting its use. Data supplied to shippers and carriers help solve transportation problems, looking to full utilization of the Federal investment in the navigation channel.

Capital outlay costs for navigation facilities in 1961 are estimated at $5,880,000 and include provision for beginning construction of a new lock at Wheeler Dam, Ala. Scheduled for service in January 1963, it will be a single-lift lock with 110- by 600-foot chamber. Total estimated cost is $16,000,000. The 1961 estimate also provides for completing construction of the lock at Wilson Dam started in 1957 and placed in service in November 1959. An estimate of $20,000 is included in 1961 for preliminary planning and design studies for a new lock at Guntersville Dam, Ala.

FLOOD CONTROL—SUMMARY OF ESTIMATED OPERATING COSTS

	1959 actual	*1960 estimate*	*1961 estimate*
Operating expense	$312,109	$331,000	$347,000
Distribution of administrative and general expense	18,563	20,000	20,000
Allocation of multipurpose reservoir operations expense	1,349,550	1,443,000	1,442,000
Provision for depreciation	1,230,705	1,230,000	1,230,000
Total operating costs	2,910,927	3,024,000	3,039,000

(*b*) *Flood control operations* of the Tennessee River system maintain and use storage space in upstream reservoirs for seasonal retention of excessive runoff and regulate discharges to rates of flow which can be handled safely by downstream channels and reservoirs. Dams on the Tennessee River and its tributaries provide 11,803,000 acre-feet of storage for flood control at the beginning of the flood season. Cities and agricultural lands in the Tennessee Valley are protected and flood crests can be reduced on the lower Ohio and Mississippi Rivers. Since 1936, regulation of the reservoirs for flood control has averted damages of about $120.2 million at Chattanooga, Tenn., and about $20.2 million on the lower Ohio and Mississippi Rivers. As a supplement to operating its reservoir system for flood control, TVA collects and analyzes flood data; studies potential flood control projects and ways to improve operations of the existing system. Technical advice and assistance to State and local agencies encourage them to assume responsibility for solving local urban and rural flood control problems. Of about 100 communities in the valley needing to deal with such conditions, 52 had received technical data as of June 30, 1959. Nine have officially adopted flood-plain regulations and others are planning definite followup action. It is planned to develop and present technical data to 14 additional communities in 1960 and to 12 or more communities in 1961.

POWER—SUMMARY OF ESTIMATED REVENUE AND RECEIPTS AND OPERATING COSTS

	1959 actual	*1960 estimate*	*1961 estimate*
Revenue and receipts:			
Sales of electric energy (outside):			
Federal agencies	$108,159,455	$109,740,000	$111,770,000
Others	125,994,624	131,900,000	151,120,000
Other income	2,009,779	3,276,000	3,453,000
Total revenue and receipts	236,163,858	244,916,000	266,343,000
Operating costs:			
Production and transmission (including allocation from multipurpose reservoir operations)	125,622,114	127,250,000	138,448,000
Payments in lieu of taxes	5,900,391	6,341,000	6,637,000
Other operating expense	11,227,529	11,793,000	12,186,000
Provision for depreciation	44,671,273	48,285,000	50,865,000
Total costs	187,421,307	193,669,000	208,136,000
Less interdivisional sales and rents	2,087,387	2,350,000	2,380,000
Total operating costs	185,333,920	191,319,000	205,756,000
Net income	50,829,938	53,597,000	60,587,000

(*c*) *Power operations* are confined to generation and transmission of power and sale of energy at wholesale to local distribution systems and to a small number of industries and Government agencies requiring large amounts of power. Power is distributed by 150 local public agencies and 2 small privately owned utility companies. Total energy to be supplied to the power system from generating facilities of TVA, the Army on the Cumberland River, and the Aluminum Co. of America on the Little Tennessee River is estimated to be 68.7 billion kilowatt-hours in 1961. This is about 6.1 billion kilowatt-hours greater than the energy supplied to the system in 1959 and about 5.1 billion kilowatt-hours above that estimated to be supplied in 1960. Net income from power operations, after depreciation, for 1961 is estimated to be $60.6 million. This estimated rate of return on the average investment in the power program during the fiscal year is about 3.6%. The estimates assume average streamflow conditions. Better than average streamflows could produce some increase in net income over the estimates; with subnormal streamflows, the net income would be significantly reduced by increases in production expense.

POWER SYSTEM FACILITIES—SUMMARY OF ESTIMATED CAPITAL OUTLAY FROM POWER PROCEEDS AND BONDS

	1961 estimate
Power supply facilities:	
Continuing construction:	
Kingston steam units 1–9	$9,000
Gallatin steam units 3–4	194,000
Johnsonville steam units 7–10	43,000
Widows Creek steam unit 7	5,922,000
Colbert steam unit 5	35,530,000
Paradise steam unit 1	45,390,000
Eastern area steam unit	14,080,000
Wilson hydro units 19–21	8,664,000
Wheeler hydro units 9–11	11,938,000
Beginning construction: Paradise steam unit 2	20,000,000
Total power supply facilities	141,770,000
Multipurpose dam: Melton Hill Dam and Reservoir	3,050,000
Transmission system facilities	31,770,000
Additions and improvements at existing facilities	1,577,000
Investigations for future facilities	229,000
Undistributed reductions based on possible delays and savings	−12,000,000
Total power system facilities	166,396,000

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

The 1961 estimates for power supply facilities to be financed from power proceeds and bonds is $141,770,000. Of this estimate, $121,524,000 is for continuing construction of steam generating units at the Widows Creek, Colbert, and Paradise projects and at a plant in the eastern area of the system, together with hydroelectric generating units at Wilson and Wheeler Dams; $178,278,350 from future power revenue and bond proceeds will be required to complete the units started prior to 1961. Provision of $20,000,000 is made for starting construction of a second steam generating unit of 600,000 kilowatt capacity at Paradise. The total cost of this new generating unit is estimated at $82,000,000 of which $62,000,000 will be financed from future power revenue and bond proceeds.

As of December 31, 1959, the installed nameplate capacity of the system was 11,386,710 kilowatts, including Army plants on the Cumberland River and Aluminum Co. of America plants on the Little Tennessee River operated as a part of the TVA system. Completion on schedule of units started prior to 1960 (including those being installed at the Cheatham project by the Army) will bring the system nameplate capacity to 12,072,710 kilowatts by the winter of 1961–62. The estimated dependable capacity of the system at that time of 12,375,000 kilowatts provides a reserve of 10.5% over estimated system demands of 11,200,000 kilowatts to allow for loss of capacity because of breakdown of generating equipment and needs for its maintenance, failure of substation equipment and transmission lines, and drawdown of reservoirs during extremely dry periods. The presently budgeted capacity additions will increase the system dependable capacity to 13,575,000 kilowatts by the end of calendar year 1962 and to about 14,750,000 kilowatts by the end of calendar year 1963. The presently estimated demands are 12,150,000 kilowatts and 13,200,000 kilowatts, leaving reserves of 11.7% in each of the winters of 1962–63 and 1963–64. These reserves are lower than those which are generally considered desirable by the electric utility industry.

Estimated capital outlay costs in 1961 include $3,050,000 from power proceeds and bonds for beginning construction of the Melton Hill Dam and Reservoir on the Clinch River, about 23 miles upstream from its confluence with the Tennessee. The project, having a total estimated cost of $34,000,000, will extend the navigation channel to Clinton, Tenn., and provide rated power generating capacity of 72,000 kilowatts. The cost of the lock, other navigation facilities, and approximately 58% of the multiple-purpose facilities in this project will be financed with appropriated funds. The cost of power facilities and approximately 42% of the multiple-purpose facilities will be financed with TVA power proceeds and bonds. Planning and design work begun in 1959 will be continued in 1960.

(*e*) *Topographic mapping* of the valley serves TVA's planning, construction, and operating needs and meets the standards of the Geological Survey for nationwide map coverage. The scheduled mapping carried on cooperatively with the Survey covers 763 quadrangles (about 46,100 square miles). As of June 30, 1959, a total of 691 quadrangles (about 41,900 square miles) were completed and printed. To continue work on the remaining 72 quadrangles (about 4,200 square miles) and complete them by the end of 1962, operating costs in 1961 are estimated at $190,000.

2. *Fertilizer, agricultural, and munitions program.*—Chemical facilities at Wilson Dam, Ala., are maintained and operated as a national fertilizer development center, but by statute, they must likewise be available for munitions purposes as a part of the national defense program.

(*a*) *Research on fertilizer products and processes* has three phases—fundamental research, applied research, and process engineering in the laboratory and through pilot-plant operation. TVA works cooperatively with the Department of Agriculture and with industry to avoid duplicating efforts. Research results on technological developments and new and improved processes are made available to industry. Knowledge gained in fertilizer research is valuable also in the related field of munitions. A significant project in 1961 will be research on high-temperature techniques for fixation of nitrogen; studies and development work will continue on utilization of superphosphoric acid and better byproduct recovery. Other continuing work relates to liquid fertilizers, new nitrogen compounds, and ammonium polyphosphate.

RESEARCH ON FERTILIZER PRODUCTS AND PROCESSES—SUMMARY OF ESTIMATED OPERATING COSTS

	1959 actual	*1960 estimate*	*1961 estimate*
Receipts	$2,008	$3,000	$5,000
Operating costs:			
Operating expense	1,693,170	1,724,000	1,823,000
Distribution of administrative and general expense	63,809	68,000	68,000
Depreciation on chemical facilities	49,609	50,000	50,000
Total operating costs	1,806,588	1,842,000	1,941,000
Net expense	1,804,580	1,839,000	1,936,000

(*b*) *Fertilizer production and distribution* has these objectives: To demonstrate the technical and commercial feasibility of new or improved processes, thereby encouraging their adoption by industry; to supply materials for test demonstration on practical farms and for widespread educational introduction among farmers; and to supply munitions materials or render other services for national defense. New or improved fertilizers are sold to farmers for educational purposes through cooperative and industry distributors who in turn furnish data to TVA concerning distribution costs and farmer acceptance. Significant aspects of 1961 production plans are increased tonnage of 54% concentrated superphosphate; reduced distribution of calcium metaphosphate and ammonium nitrate; and increased amounts of new materials—ammonium phosphate nitrate, ammonium nitrate sulfate, and liquid fertilizer. Estimated cost of fertilizer production and distribution in 1961 is $19,843,000; income from the sale of fertilizer products and byproducts is estimated at $19,939,000.

FERTILIZER PRODUCTION AND DISTRIBUTION—SUMMARY OF ESTIMATED OPERATINC COSTS

	1959 actual	*1960 estimate*	*1961 estimate*
Receipts	$14,855,083	$20,134,000	$19,939,000
Operating costs:			
Operating expense	16,252,552	19,012,000	18,594,000
Distribution of administrative and general expense	337,784	360,000	360,000
Depreciation on chemical facilities	915,014	889,000	889,000
Total operating costs	17,505,350	20,261,000	19,843,000
Net expense or income (−)	2,650,267	127,000	−96,000

(*c*) *Fertilizer tests and demonstrations* are of three principal types: (1) Laboratory and field plot tests to determine under controlled conditions the relative efficiency of materials; (2) studies and demonstrations aimed at developing more efficient and economical ways of distributing and applying fertilizer; and (3) farm test demonstrations of fertilizer use. Major objectives of the latter are to introduce experimental fertilizers and demonstrate their uses to farmers throughout the Nation and to improve the valley's agriculture, forestry, and watershed-streamflow relationships. In 1961 about 3,662 farms in 32

520000—60——13

Federal Reserve Bank of St. Louis

TENNESSEE VALLEY AUTHORITY—Continued

Public enterprise funds—Continued

TENNESSEE VALLEY AUTHORITY FUND—Continued

States will participate in the program. Farmer payments for TVA fertilizer used in test demonstrations will total $736,000, averaging about 63% of the plant cost of the material. Agricultural extension services of the land-grant colleges supervise and technically guide farm test demonstration activities with TVA bearing part of the cost. During 1961 cooperating institutions will pay an estimated $1,061,000 of the cost of field planning and supervision; TVA's payment is estimated at $346,000.

FERTILIZER TESTS AND DEMONSTRATIONS—SUMMARY OF ESTIMATED OPERATING COSTS

	1959 actual	*1960 estimate*	*1961 estimate*
Receipts	$522,042	$532,000	$736,000
Operating costs:			
Operating expense	1,877,453	1,904,000	2,296,000
Distribution of administrative and general expense	55,761	61,000	61,000
Depreciation on chemical facilities	5,971	6,000	6,000
Total operating costs	1,939,185	1,971,000	2,363,000
Appropriated funds	1,317,399	1,323,000	1,514,000
Nonpower proceeds	621,786	648,000	849,000
Net expense	1,417,143	1,439,000	1,627,000

Capital outlay costs for chemical facilities are estimated to be $1,907,000 in 1961, providing primarily for beginning construction of a new electric phosphorus furnace to replace two small furnaces that are fully depreciated. Because of age and condition, these two furnaces are inadequate for the needs of fertilizer development and undependable as national defense capacity.

3. *Watershed protection and improvement program.*—TVA is responsible for the protection and improvement of the Tennessee River watershed in relation to proper use, conservation, and development of the region's natural resources. Moreover, this work helps to protect the Federal investment in dam and reservoir projects from sedimentation. Investigations identify problems of watershed protection and improvement under conditions of optimum use. Research helps develop and test corrective measures. Cooperative projects with State and local groups apply these measures to regional and special problems.

WATERSHED PROTECTION AND IMPROVEMENT—SUMMARY OF ESTIMATED OPERATING COSTS

	1959 actual	*1960 estimate*	*1961 estimate*
Receipts	$72,981	$82,000	$86,000
Operating costs:			
Operating expenses	966,402	1,043,000	1,175,000
Distribution of administrative and general expenses	63,970	70,000	70,000
Depreciation on general facilities	7,822	9,000	9,000
Total operating costs	1,038,194	1,122,000	1,254,000
Net expense	965,213	1,040,000	1,168,000

Watershed protection and improvement activities are of two types: tributary watershed projects and forestry projects. Through tributary watershed development projects, TVA assists in finding and demonstrating ways whereby State and local agencies and private groups can assume leadership and responsibility for joint solutions to problems of watershed protection and resource development in small tributary areas. Work planned for 1961 consists of research on the effects of changes in land use on the quality and behavior of water in the streams; continuation of demonstrations in the Chestuee and Beech River watersheds in Tennessee and the Yellow Creek watershed in Mississippi. Another watershed project will be initiated in a valley State to be selected.

Forestry projects aid the States, counties, landowners, and the timber industry in developing full production and use of the valley's forest resource consistent with the needs of watershed protection. Forestry projects include research and demonstrations in forest management and protection, reforestation, and wood utilization. In 1961 TVA will produce 13.8 million seedlings for valleywide reforestation which will be distributed through State agencies to private landowners who pay a part of the production cost.

4. *General service activities.*—Operating costs for this program cover primarily reimbursable services furnished at the request and expense of other agencies.

SUMMARY OF ESTIMATED OPERATING COSTS

	1959 actual	*1960 estimate*	*1961 estimate*
Receipts (reimbursements)	$2,956,840	$3,522,000	$4,247,000
Operating costs:			
Bridge maintenance (23 U.S.C. 320(a)-(f))	4,849	8,000	8,000
Reimbursable services	2,956,840	3,522,000	4,247,000
Total operating costs	2,961,689	3,530,000	4,255,000
Net expense	4,849	8,000	8,000

The 1961 estimate of $1,073,000 for mapping services consists of work performed for the Army, $995,000, the Geological Survey, $65,000, and others $13,000. The major portion of the $3,174,000 estimate for other reimbursable services is for continuing construction of a bridge over Fort Loudoun Dam, for which reimbursement is received from the Bureau of Public Roads and the State of Tennessee. Also included is work for the Department of Defense in connection with keeping the Muscle Shoals phosphate development works in standby status.

Estimated capital outlay of $197,000 for general facilities in 1961 is made up of a budget outlay of $1,642,000, offset by depreciation credits of $1,445,000. It is primarily for replacement of trucks and other heavy mobile equipment used in all program activities.

6. *Relation of costs to obligations.*—The relationships for operating costs and for capital outlay costs are derived by year-end balances of selected resources as reflected in the following tables:

RELATION OF OPERATING COSTS TO OBLIGATIONS

Selected resources at end of year:	*1958 actual*	*1959 actual*	*1960 estimate*	*1961 estimate*
Inventories, financed from power proceeds	$42,915,938	$33,912,898	$34,271,898	$33,996,898
Inventories, financed from appropriations and nonpower proceeds	6,159,598	5,113,613	5,711,613	5,663,613
Unpaid undelivered orders, financed from power proceeds and bonds	1,090,308	1,112,793	962,793	988,793
Unpaid undelivered orders, financed from appropriations and nonpower proceeds	829,121	261,100	2,713,100	1,568,100
Total selected resources at end of year	50,994,965	40,400,404	43,659,404	42,217,404
Selected resources at start of year (−)	−50,994,965	−40,400,404	−43,659,404	
Costs financed from obligations of other years, net (−)		−10,594,561		−1,442,000
Obligations incurred for costs of other years, net			3,259,000	

RELATION OF CAPITAL OUTLAY COSTS TO OBLIGATIONS

Unpaid undelivered orders:	*1958 actual*	*1959 actual*	*1960 estimate*	*1961 estimate*
Financed from power proceeds and bonds	$58,510,718	$62,305,603	$109,490,603	$144,165,603
Financed from appropriations and nonpower proceeds	3,644,034	2,038,123	1,969,123	2,324,123
Total unpaid undelivered orders at end of year	62,154,752	64,343,726	111,459,726	146,489,726
Unpaid undelivered orders at start of year (−)	−62,154,752	−64,343,726	−111,459,726	
Obligations incurred for costs of other years, net		2,188,974	47,116,000	35,030,000

Total program obligations in 1961 are estimated at $401,784,000.

3. General service activities: General facilities			692	1,676	197	----	--------	947	1,849	197
Total financed from appropriations and nonpower proceeds			12,806	9,708	14,426	----	--------	14,412	9,777	14,071

Financing.—Amounts estimated to become available in 1961 would be derived from: (1) The requested appropriation of $20,520,000; (2) nonpower revenue and receipts of $26,033,000; and (3) power revenue and receipts of $266,705,000. In addition, the budget program anticipates financing from borrowings (not guaranteed by the Government) of $115,000,000 backed by future power revenue. A summary of the application of appropriations follows:

APPLICATION OF APPROPRIATIONS

[In thousands]

	1959 actual	1960 estimate	1961 estimate
Operations:			
1. Navigation, flood control, and power program:			
Navigation operations	$257	$310	$316
Flood control operations	331	351	367
Topographic mapping	212	212	189
Multipurpose reservoir operations	2,692	2,877	2,874
2. Fertilizer, agricultural, and munitions program:			
Research on fertilizer products and processes	1,757	1,792	1,891
Fertilizer tests and demonstrations	1,311	1,317	1,508
Agricultural development projects	82	97	107
3. Watershed protection and improvements program	1,030	1,113	1,245
4. General service activities: Bridge maintenance (23 U.S.C. 320(a)–(f))	5	8	8
Total for operations	7,677	8,077	8,505
Capital outlay:			
1. Navigation, flood control, and power program:			
Multipurpose dam: Melton Hill Dam and Reservoir	55	210	4,050
Navigation facilities:			
New lock at Wheeler Dam	-------	210	4,075
New lock at Guntersville Dam (planning)	-------	-------	20
Wilson lock	6,374	2,581	136
Flood control facilities	365	197	-------
Additions and improvements at existing facilities	601	724	1,194
Investigations for future projects	53	139	136
2. Fertilizer, agricultural, and munitions program: Chemical facilities	1,033	1,090	2,207
4. General service activities: General facilities	692	1,676	197
Total capital outlay	9,173	6,827	12,015
Total appropriation	16,850	14,904	20,520
Unobligated balance brought forward	8,905	5,292	2,411
Unobligated balance carried forward	−5,292	−2,411	-------
Obligations against appropriated funds	20,463	17,785	22,931

A summary of the power proceeds estimated for 1961, follows:

Power proceeds for year:	
From revenue and receipts	$266,705,000
From borrowings	115,000,000
Total proceeds	381,705,000
Add decrease in power inventories	275,000
Less program requirements for operations and capital outlay	321,287,000
Excess of proceeds over program requirements	60,693,000
Less requirement for payments to Treasury	49,000,000
Excess of proceeds over all requirements	11,693,000

Operating results and financial condition.—Accumulated net income from power operations at the end of 1961 is estimated at $633,426,243, of which $60,587,000 is derived from 1961 operations. The accumulated net expense of nonpower programs at the end of 1961 is estimated at $222,662,382, of which $11,497,000 is from 1961 operations. Only the power program is intended to be self-supporting; the net expense of nonpower programs is covered largely by appropriations from the Treasury. Payments to the Treasury in 1961 are estimated at $51,000,000—$39,000,000 as a dividend (return on the appropriation investment in the power program); $10,000,000 as a reduction in the appropriation investment in the power program; and $2,000,000 of nonpower proceeds.

Total equity of the Government at the end of 1961 is expected to be $2,175,307,393—$1,787,747,145 being invested in power program assets and $387,560,248 in assets of other programs:

	Total	Power program	Other programs
Appropriations by the Congress	$1,996,715,431	$1,368,992,672	$627,722,759
Transfers of property	45,414,540	19,387,249	26,027,291
Subtotal	2,042,129,971	1,388,379,921	653,750,050
Less payments to the Treasury	238,586,439	195,059,019	43,527,420
Net Treasury investment	1,803,543,532	1,193,320,902	610,222,630
Accumulated net income from power operations	594,426,243	594,426,243	-------
Accumulated net expense of other programs	222,662,382	-------	222,662,382
Total equity of the Government	2,175,307,393	1,787,747,145	387,560,248

UNITED STATES INFORMATION AGENCY

Current authorizations:

SALARIES AND EXPENSES

For expenses necessary to enable the United States Information Agency, as authorized by Reorganization Plan [Numbered] *No.* 8 of 1953, and the United States Information and Educational Exchange Act, as amended (22 U.S.C. 1431 et seq.), to carry out international information activities, including employment, without regard to the civil service and classification laws, of (1) persons on a temporary basis (not to exceed $120,000), (2) aliens within the United States, and (3) aliens abroad for service in the United States relating to the translation or narration of colloquial speech in foreign languages (such aliens to be investigated for such employment in accordance with procedures established by the Secretary of State and the Attorney General); travel expenses of aliens employed abroad for service in the United States and their dependents to and from the United States; salaries, expenses, and allowances of personnel and dependents as authorized by the Foreign Service Act of 1946, as amended (22 U.S.C. 801–1158); entertainment within the United States not to exceed $500; hire of passenger motor vehicles; insurance on official motor vehicles in foreign countries; [purchase of space in publications abroad, without regard to the provisions of law set forth in 44 U.S.C. 322;] services as authorized by section 15 of the Act of August 2, 1946 (5 U.S.C. 55a); payment of tort claims, in the manner authorized in the first paragraph of section 2672, as amended, of title 28 of the United States Code when such claims arise in foreign countries; advance of funds notwithstanding section 3648 of the Revised Statutes, as amended; dues for library membership in organizations which issue publications to members only, or to members at a price lower than to others; employment of aliens, by contract, for service abroad; purchase of ice and drinking water abroad; payment of excise taxes on negotiable instruments abroad; cost of transporting to and from a place of storage and the cost of storing the furniture and household and personal effects of an employee of the Foreign Service who is assigned to a post at which he is unable to use his furniture and effects, under such regulations as the Director may prescribe; actual expenses of preparing and transporting to their former homes the remains of persons, not United States Government employees, who may die away from their homes while participating in activities authorized under this appropriation; radio activities and acquisition and production of motion pictures and visual materials and purchase or rental of technical equipment and facilities therefor, narration, script-writing, translation, and engineering services, by contract or otherwise; maintenance, improvement, and repair of properties used for information activities in foreign countries; fuel and utilities for Government-owned or leased property abroad; rental or lease for periods not exceeding five years of offices, buildings, grounds, and living quarters for officers and employees engaged in informational activities abroad; travel expenses for employees attending official international conferences, without regard to the Standardized Government Travel Regulations and to the rates of per diem allowances in lieu of subsistence expenses under the Travel Expense Act of 1949, but at rates not in excess of comparable allowances approved for such conferences by the Secretary of State; and purchase of objects for presentation to foreign governments, schools, or organizations; [$101,557,300] *$105,800,000,* of which not less than [$14,000,000] *$9,000,000* shall be used to purchase foreign currencies or credits owed to or owned by the Treasury of the United States [and of which sum not less than $200,000 shall be available by contracts with one or more private international broadcasting licensees for the purpose of developing and broadcasting under private auspices, but under the general supervision of the United States Information Agency, radio programs to Latin America, Western Europe, Africa, as well as other areas of the free world, which programs shall be designed to cultivate friendship with the peoples of the countries in those areas, and to build improved international understanding to provide for private international broadcasting]: *Provided,* That not to exceed [$90,000] *$135,000* may be used for representation abroad: *Provided further,* That this appropriation shall be available for expenses in connection with travel of personnel outside the continental United States, including travel of dependents and transportation of personal effects, household goods, or automobiles of such personnel, when any part of such travel or transportation begins in the current fiscal year pursuant to travel orders issued in that year, notwithstanding the fact that such travel or transportation may not be completed during the current year: *Provided further,* That funds may be exchanged for payment of expenses in connection with the operation of information establishments abroad without regard to the provisions of section 3651 of the Revised Statutes (31 U.S.C. 543): *Provided further,* That passenger motor vehicles used abroad exclusively for the purposes of this appropriation may be exchanged or sold, pursuant to section 201(c) of the Act of June 30, 1949 (40 U.S.C. 481(c)), and the exchange allowances or proceeds of such sales shall be available for replacement of an equal number of such vehicles and the cost, including the exchange allowance of each such replacement, except buses and station wagons, shall not exceed $1,500: *Provided further,* That, notwithstanding the provisions of section 3679 of the Revised Statutes, as amended (31 U.S.C. 665), the United States Information Agency is authorized in making contracts for the use of international shortwave radio stations and facilities, to agree on behalf of the United States to indemnify the owners and operators of said radio stations and facilities from such funds as may be hereafter appropriated for the purpose against loss or damage on account of injury to persons or property arising from such use of said radio stations and facilities: *Provided further,* That existing appointments and assignments to the Foreign Service Reserve for the purposes of foreign information and educational activities which expire during the current fiscal year may be extended for a period of one year in addition to the period of appointment or assignment otherwise authorized. (*Departments of State and Justice, the Judiciary, and Related Agencies Appropriation Act, 1960.*)

Program and Financing—Continued

	1959 actual	1960 estimate	1961 estimate
Financing:			
1959 appropriation available in 1958	$887,754		
Advances and reimbursements from non-Federal sources (68 Stat. 566)	−1,582		
Unobligated balance no longer available	91,373		
Appropriation (new obligational authority)	101,673,800	$101,557,300	$105,800,000

The United States Information Agency submits evidence to peoples of other nations by means of communication techniques that the objectives and policies of the United States are in harmony with and will advance their legitimate aspirations for freedom, progress, and peace. The intention is to encourage foreign peoples to take action consistent with U.S. national objectives.

The increase of approximately $4.2 million in operating funds will provide for (*a*) approximately $2.7 million for overseas program expenses plus related media and other support services to meet increased costs in foreign countries and to allow some expansion in programs in foreign countries; (*b*) about $813,000 for expansion of worldwide television, motion pictures, and information center activities; (*c*) $302,000 for costs in connection with new radio facilities and costs of increased program originations by the Voice of America; and (*d*) a net increase of $357,000 for domestic support activities related to the overall program.

1. *Overseas missions.*—The program is conducted through 208 posts in 86 countries and is known abroad as the United States Information Service (USIS). The overseas missions carry out country programs designed to present to local audiences the enduring features of America's traditions, arts, and culture; and to influence local attitudes and actions in support of U.S. foreign policy. These programs are being expanded and strengthened in critical areas, especially in Africa and Latin America. Overseas missions prepare materials using local facilities whenever possible, but also utilize materials provided by the media services in Washington.

2. *Media services.*—These services provide support for overseas country programs. (*a*) *Press and publications service* maintains communications facilities for the transmission of editorial and feature materials for adaptation by overseas missions. It produces two monthly magazines titled "America Illustrated," one for distribution in the Soviet Union and one for distribution in Poland. The service also operates two regional printing centers.

(*b*) *Motion picture service* supplies the missions with films translated into 40 foreign languages. It adapts films for specific country or area use, and provides guidance in the foreign production, use, and distribution of films. The service also supplies the missions with mobile units and equipment for showing motion pictures.

(*c*) *Information center service* supports U.S. operated libraries and reading rooms and binational centers. The service provides all of these with collections of American books and other publications, both in English and in translations, and with English teaching materials. It assists American publishers in distributing selected products overseas and supports the publication of low-priced books for sale abroad. The service also provides exhibits and visual materials to overseas missions for local display and provides books and periodicals for presentation to selected individuals and groups.

(*d*) *Broadcasting service* produces radio broadcasts in 36 foreign languages and in English. Programs originate from the United States and from one overseas location. It operates a total of 78 transmitters at 7 locations in the United States and at 9 overseas locations, with a combined radio frequency power output of over 8 million watts. The service also supplies the overseas missions with recorded radio programs and scripts, and with radio supplies and equipment.

(*e*) *Television service* acquires and produces television programs for placement in outlets overseas. It also provides guidance to the overseas missions in the production and use of television programs.

3. *Cooperative programs with private organizations.*—The United States Information Agency encourages, guides, and coordinates the efforts of private organizations to utilize their resources and initiative in building an information exchange program between the people of the United States and the people of foreign countries.

4. *Program direction and appraisal.*—Agency program planning, direction, and appraisal are accomplished through the Director's office, area assistant directors, planning staff, and research and analysis activities.

5. *Administration and staff support.*—This includes physical and personnel security functions, legal counsel, central administrative services, and emergency planning.

6. *Administrative support.*—Administrative services for the Agency's overseas operations, and certain special support services at headquarters, are obtained through reimbursable arrangements with the Department of State.

SALARIES AND EXPENSES (SPECIAL FOREIGN CURRENCY PROGRAM)—Continued

this appropriation shall not be used for the purchase of currencies available in the Treasury for the purposes of section 104(f) unless such currencies are excess to the normal requirements of the United States: Provided further, That the dollar value of the unexpended balances, as of June 30, 1960, of allocations of foreign currencies heretofore made for the purposes of such sections 104(i) and 104(j) is appropriated as of that date and shall be merged with this appropriation.

Appropriated (est.) 1960, **$4,927,446** Estimate 1961, **$3,493,180**

Current definite			$3,493,180
Appropriation		4,927,446	3,493,180

NOTE.—The gross foreign currency authorization in 1960 is $4,944,440. The schedule above covers foreign currency authorizations for 1959 and 1960. The appropriation recommended for 1960 is equal to the unexpended balance of previous foreign currency authorizations as of June 30, 1960. All transactions in 1961 relate to appropriations.

Foreign currencies derived from sales of agricultural commodities under title I of the Agricultural Trade Development and Assistance Act of 1954 (68 Stat. 454) are available to the U.S. Government for certain informational and cultural activities. Programs totaling $10,431,405 are planned for 1960, 1961, and subsequent years for programs under sections 104(i) and 104(j) of the act.

Beginning with 1961, these currencies will be subject to the regular appropriation process when used for programs authorized under these sections. A dollar appropriation of $3,493,180, to remain available until expended, is therefore requested for 1961 for the purchase of such currencies. In addition, it is requested that a dollar appropriation for 1960 be made in an amount sufficient to provide for the purchase of the unexpended balance of currencies as of June 30, 1960, which had previously been made available to the United States Information Agency without appropriation, such appropriation to be merged with the appropriation for 1961 previously mentioned.

Programs to be financed from these appropriations will provide for: (*a*) translating American text books into foreign languages and arranging for their publication and distribution in educational systems abroad; (*b*) a special project in one country which includes a number of publication projects, as well as a text book program; and (*c*) assistance to binational organizations in carrying out programs which serve U.S. interests. Such latter assistance is limited to that necessary to enable these organizations to acquire adequate operational quarters.

The Agency's regular annual appropriation for Salaries and expenses contains approximately $300,000 in dollar support of this program, primarily for purchases of paper, not available from local sources, for a special publication program.

Financing applied to program	10,568,112	9,763,784	11,641,680

This program enables American exporters of books, periodicals, films, and other informational media to sell their materials, through regular commercial channels, in foreign countries having a shortage of U.S. dollar exchange (22 U.S.C. 1442). Under the program, foreign importers make payments to American exporters in foreign currency. The exporters then exchange their foreign currency for U.S. dollars through application to the United States Information Agency, in accordance with the terms of each exporter's informational media guarantee contract.

Program.—An increase in the issuance of guarantees is proposed for 1961 in areas where opportunities now exist for increasing the commercial distribution of American materials and in countries where such opportunities are expected to open up in 1961. The program provides for current financing of accrued interest on outstanding Treasury notes for 3 years (1959, 1960, and 1961) as compared with the 1960 program which provided for financing interest for 1958 only.

Financing.—Since its inception in 1948, the program has been financed primarily from funds received on notes issued to the Treasury Department under a borrowing authorization of $28,000,000. Public Law 85-477, approved June 30, 1958, authorized appropriations to restore realized impairment of this fund. Such restoration is accomplished by applying the appropriation, less the amount required for interest, to the amount outstanding on Treasury notes, which then becomes reissuable to the extent of the amount repaid. In 1960 an appropriation of $2,750,000 was made to pay interest for 1 year and to effect partial restoration of impairment to the fund. In 1961 an appropriation of $5,300,000 is requested, of which $1,300,000 is for additional interest in order that the fund can finance interest on a current basis. The appropriation will cover only in part the total impairment of the fund which results from (*a*) losses due to fluctuations in the exchange rate on currencies owned by the fund and sold by Treasury, (*b*) foreign currencies that cannot be sold to other Government agencies and which are transferred to and held by the Treasury Department. In addition to the appropriation, substantial financing will continue to be provided from proceeds of sales of foreign currency to Government agencies and from fees from exporters operating under the program.

Operating results.—In 1961 contract coverage will continue to be provided for the commercial distribution of informational materials in countries in Eastern Europe, the Near East, and the Far East which limit the free conversion of their currencies into dollars and employ a multiple exchange rate system. Impairment to the fund

INFORMATIONAL MEDIA GUARANTEE FUND—Continued

will continue to result from the inability of Treasury to sell some of the currencies purchased and from losses on currencies actually sold.

4. Relation of costs to obligations: Costs financed from obligations of other years, net (−)	−1,388,645	−105,000	
Total program (obligations)	163,085,678	163,373,000	154,054,000
Financing:			
1959 appropriation available in 1958	1,104,000		
Unobligated balance no longer available	490,322		
Appropriation (new obligational authority)	164,680,000	163,373,000	154,054,000

This appropriation provides for all administrative expenses of the agency with the exception of those applicable to the Department of Medicine and Surgery.

A decrease of $9,319,000 in appropriation requirements is forecast for 1961. This decrease is attributed primarily to savings expected from planned expansion of automatic data processing systems and to declining workloads in the vocational rehabilitation and education program and the loan guarantee program.

Supplemental appropriation requirements of $2,817,000 resulting from recent pension legislation (72 Stat. 1134) are anticipated under Proposed for later transmission. Additional requirements of $3,052,000 are expected to result from this legislation, but it is planned to absorb $235,000 of this amount from the available appropriation.

1. *General administration.*—The Administrator and his top staff assistants provide the executive direction of the agency, establish basic policies, interpret laws pertaining to veterans' affairs and promulgate supplementary regulations, and direct and coordinate the activities of the operating departments. The Board of Veterans Appeals, established by statutory enactment, renders appellate decisions final in all cases other than insurance cases, in appeals to the Administrator on claims involving benefits under laws administered by the Veterans Administration.

2. *Insurance.*—Approximately 6 million veterans are insured under the U.S. Government or national service life insurance programs. Obligational requirements for the administration of these programs have been reduced from approximately $41.5 million in 1953 to an estimated $24.5 million in 1961. These reductions, accompanied by only slight decreases in the number of policies maintained, have been made possible through consolidation of activities and improved operating methods and procedures.

AVERAGE NUMBER OF POLICIES IN FORCE

	1959 actual	*1960 estimate*	*1961 estimate*
U.S. Government life insurance	346,000	328,000	311,000
National service life insurance	6,093,000	6,020,000	5,905,000

3. *Veterans benefits.*—Veterans and dependents claims for compensation, pensions, or other benefits are adjudicated, and guardianship and fiduciary service is furnished helpless or incompetent veterans and minor dependents, as indicated by the following workloads:

	1959 actual	*1960 estimate*	*1961 estimate*
Rating actions (disability)	1,051,460	1,145,000	1,141,000
Authorization actions (disability)	776,607	1,205,000	1,026,000
Rating actions (death)	112,420	117,000	122,000
Authorization actions (death)	638,034	1,095,000	896,000
Cases involving guardianship or fiduciary relationship	380,843	390,000	532,000
Field examinations	163,127	200,000	225,000

VETERANS ADMINISTRATION—Continued

Current authorizations—Continued

GENERAL OPERATING EXPENSES—Continued

Eligibility of trainees for vocational rehabilitation and education or educational assistance is determined, guidance is furnished to trainees, and contracts are made with training institutions for tuition and other charges. Trainees (average number) are expected as follows:

	1959 actual	*1960 estimate*	*1961 estimate*
World War II veterans	105	------	------
Korean conflict veterans	424,890	325,000	225,000
War orphans	4,486	8,000	10,500
Vocational rehabilitation trainees	11,439	10,000	7,400

Loan guarantee operations include issuance of certificates of loan guarantee or insurance, servicing of loans reported in default, payment of claims of lenders on defaulted loans, acquisition, management, and disposal of property when necessary to protect the Government's interest, making of direct loans to veterans in certain areas, and, providing assistance to specified paraplegic veterans in acquiring specially adapted housing. Key workload forecasts are as follows:

	1959 actual	*1960 estimate*	*1961 estimate*
Guaranteed or insured loans closed	206,810	203,600	165,000
Direct loans closed and fully disbursed	18,996	31,900	9,400
Defaults processed	91,578	82,491	82,520
Claims paid	10,881	8,800	9,000
Loan and property acquisitions	10,619	8,650	8,900
Housing grants	346	430	430

4. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources and applicable adjustment as reflected in the following table:

	1958 actual	*1959 actual*	*1960 estimate*	*1961 estimate*

1. *Medical, hospital, and domiciliary administration.*—This covers the development, implementation, and administration of policies, plans, and broad program objectives.

2. *Administration of the construction program.*—This includes the general supervision over the design, construction, and operation of buildings, real property management, and accident and fire protection.

3. *Medical research.*—Medical research projects are conducted in Veterans Administration laboratories or in universities or other institutions on a contract basis, whichever is more advantageous or economical.

4. *Prosthetic testing and development.*—This is a testing and development program for prosthetic, orthopedic, and sensory aids for the purpose of improving the care and rehabilitation of disabled eligible veterans, including amputees, paraplegics, and the blind.

5. *Medical education and training.*—This covers (*a*) residency and internship training, (*b*) postgraduate and inservice training, and (*c*) medical illustration.

3. Maintenance and operation of Veterans Administration domiciliary homes	456,759	428,000	428,000
Total capital outlay	8,256,246	8,700,000	8,757,500
Reimbursable costs:			
1. Maintenance and operation of hospitals: (*c*) General medical hospitals	4,156,804	4,000,000	4,000,000
Total program costs	771,424,561	796,079,000	821,021,000
4. Relation of costs to obligations: Costs financed from obligations of other years, net (−)	−10,623,799		
Total program (obligations)	760,800,762	796,079,000	821,021,000
Financing:			
1959 appropriation available in 1958	11,500,000		
Advances and reimbursements from—			
Other accounts	−2,956,111	−3,000,000	−3,000,000
Non-Federal sources (73 Stat. 513)	−1,200,693	−1,000,000	−1,000,000
Unobligated balance no longer available	1,174,042		
Appropriation (new obligational authority)	769,318,000	792,079,000	817,021,000

This appropriation provides for the cost of care and treatment of beneficiaries at Veterans Administration hospitals and domiciliaries, contract hospitals, and State homes. To be eligible for such care and treatment a beneficiary must be a veteran of any war with a service-connected disability incurred or aggravated during a period of war, or within the limits of Veterans Administration facilities, for any other disability if the veteran is unable to defray the expenses of necessary hospital or domiciliary care.

Increases in 1961 are the result of: (*a*) an increase of 404 patients in hospitals and 150 members in domiciliary homes, (*b*) activation of the new 1,000-bed neuropsychiatric hospital at Palo Alto, Calif., (*c*) wage increases for employees whose salaries are determined in accordance with prevailing rates, (*d*) transfer of charges for supply services from the General operating expenses appropriation, (*e*) an increase in staffing levels for improved physical facilities, to sustain quality medical care and to provide motivation toward resocialization and return of domiciliary members to their communities, (*f*) annual average salary increases resulting from periodic pay increases and reclassification actions, and (*g*) the costs of employee health benefits provided by Public Law 86–382. The average employment listed below excludes the employment equivalents for terminal leave payments.

VETERANS ADMINISTRATION—Continued

Current authorizations—Continued

INPATIENT CARE—Continued

1. *Maintenance and operation of hospitals.*—This covers the operation of 171 Veterans Administration hospitals. The estimated costs for 1961 exceed 1960 by $23,692,000.

VETERANS ADMINISTRATION HOSPITALS

	1959 actual	*1960 estimate*	*1961 estimate*
Neuropsychiatric hospitals:			
Average number of operating beds	55,364	55,205	55,932
Average daily patient load	52,424	52,318	52,625
Average employment, net (including consultants)	37,445	37,938	38,931
Employment per 100 patients	71.4	72.5	74.0
Tuberculosis hospitals:			
Average number of operating beds	7,213	5,574	5,554
Average daily patient load	6,406	4,955	4,826
Average employment, net (including consultants)	7,963	6,184	6,191
Employment per 100 patients	124.3	124.8	128.3
General medical and surgical hospitals:			
Average number of operating beds	57,912	59,844	59,970
Average daily patient load	52,220	54,073	54,149
Average employment, net (including consultants)	69,218	72,408	72,910
Employment per 100 patients	132.6	133.9	134.6
Total, Veterans Administration hospitals:			
Average number of operating beds	120,489	120,623	121,456
Average daily patient load	111,050	111,346	111,600
Average employment, net (including consultants)	114,626	116,530	118,032
Employment per 100 patients	103.2	104.7	105.8

2. *Contract hospitalization.*—This covers the hospitalization in other Federal hospitals for service- and non-service-connected disabilities where Veterans Administration facilities are not available. It also covers the use of non-Federal hospitals which are limited to treatment of service-connected disabilities, except that female veterans, veterans in training under the provisions of 38 U.S.C. 1506, and veterans in U.S. possessions and the Republic of the Philippines may also receive treatment of non-service-connected disabilities. The net decrease in the estimated costs over 1960 of approximately $42,000 is due to the 1 less calendar day in 1961.

AVERAGE DAILY PATIENT LOAD

	1959 actual	*1960 estimate*	*1961 estimate*
Civil hospitals	1,045	989	989
Municipal and State hospitals	757	654	654
Other Federal hospitals	1,251	1,407	1,407
Total	3,053	3,050	3,050

3. *Maintenance and operation of domiciliary facilities.*—This covers the cost of domiciliary care of veterans in 18 Veterans Administration facilities and in 33 State institutions. The increase in the estimated costs over 1960 is $1,292,000.

DOMICILIARIES

	1959 actual	*1960 estimate*	*1961 estimate*
Average number of operating beds	17,454	17,448	17,387
Average daily member load:			
Veterans Administration domiciliaries	16,387	16,430	16,430
Veterans Administration hospitals	455	320	420
State homes	9,678	9,700	9,750
Average employment (net, including consultants)	3,866	3,940	4,120
Employment per 100 members in Veterans Administration domiciliaries	23.6	24.0	25.1

4. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources and applicable adjustment as reflected in the following table:

	1958 actual	*1959 actual*	*1960 estimate*	*1961 estimate*
Selected resources at end of year:				
Inventories and items on order:				
Unpaid undelivered orders (appropriation balances obligated for goods and services on order not yet received)	$869,366	$1,642,093	$1,642,093	$1,642,093
Advances (payments for goods and services on order not yet received)	11,500,000			
Total selected resources at end of year	12,369,366	1,642,093	1,642,093	1,642,093
Selected resources at start of year (−)		−12,369,366	−1,642,093	−1,642,093
Adjustment of selected resources reported at start of year		103,474		
Costs financed from obligations of other years, net (−)		−10,623,799		

A supplemental appropriation for 1960 is anticipated under Proposed for later transmission.

Financing:			
1959 appropriation available in 1958	1,525,000		
Unobligated balance no longer available	234,609		
Appropriation (new obligational authority)	82,333,000	83,866,000	86,481,000

[1] Includes capital outlay as follows: June 30, 1959, $569,334; 1960, $412,000; 1961, $472,000.

This appropriation provides for veterans with service-connected disabilities both medical and dental care by the staffs of Veterans Administration outpatient clinics and by physicians and dentists participating in the home-town medical care program. Outpatient care also is provided to veterans receiving vocational rehabilitation who require treatment to avoid interruption of training, pensioners of nations allied with the United States in World War I and World War II, and veterans of the Spanish-American War, Boxer Rebellion, and Philippine Insurrection. Veterans are also provided examinations in outpatient clinics for purposes of rating for compensation or pension, insurance, and determining their need for hospitalization or domiciliary care.

The increase of $2,615,000 in estimated costs for 1961 is due to an increased medical workload, a transfer from Inpatient care for certain outpatient work performed at hospitals, increases in average salary resulting from periodic pay increases and reclassification actions, a transfer of supply service costs from General operating expenses and employee health benefit costs.

NUMBER OF INDIVIDUALS

	1959 actual	*1960 estimate*	*1961 estimate*

Financing:			
1959 appropriation available in 1958	5,000		
Unobligated balance no longer available	796		
Appropriation (new obligational authority)	2,201,700	2,218,000	2,520,000

[1] Includes capital outlay as follows: June 30, 1959, $36,438; 1960, $3,080; 1961, $43,800.

This appropriation finances the cost of operating a system of three supply depots through which approximately one-fifth of the supplies and equipment used in Veterans Administration facilities are centrally procured and distributed. In addition, the depots provide certain services for other Federal agencies on a reimbursable basis. The depots are located in Hines, Ill., Somerville, N.J., and Wilmington, Calif.

The increase of $302,000 in estimated requirements for 1961 is primarily for accomplishment of deferred maintenance and repair items, equipment replacement, and payment of employee health benefit costs.

Transferred from "Readjustment benefits" (72 Stat. 1075)	20,800,000		
Appropriation (adjusted)	3,273,300,000	3,300,000,000	3,840,000,000

This appropriation provides for all compensation, pensions, and allowances, including officers' retirement pay and annuities, and initial burial allowances. On June 20, 1959, there were an estimated 22,666,000 living veterans of all wars and peacetime service and, as of that date 12.9% of these veterans, or 2,934,249 were receiving benefits under this appropriation. In addition, 1,210,446 dependents of 915,822 deceased veterans were receiving benefits. The increased cost is primarily attributable to the pension program and is caused largely by increases in caseloads of World War I veterans and their survivors; and by the impact of the Veterans' Pension Act of 1959. This law, effective July 1, 1960, modifies the pension program for veterans of World War I, World War II, and Korean conflict and their widows and children, in the following major respects:

(1) A sliding scale of pension is provided based on specified income limitation and family status.

(2) Pension is provided for widows and children of World War II and Korean conflict veterans on the same

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

basis as widows and children of World War I veterans by removing the requirement that the veteran must have had a service-connected disability at death.

(3) Pension for any war veteran receiving hospital or domiciliary care by the Veterans Administration will be reduced to $30 after 2 months. The remainder of the pension may be apportioned for his wife and children. The act also provides that an invalid lift may be furnished, if medically indicated, for any veteran who receives pension based on a need for regular aid and attendance.

No pensioner on the rolls on June 30, 1960, will have his pension reduced by reason of this law. Pensioners may elect higher benefits under the law. It is estimated that the total additional cost of this legislation will approximate $284,076,000 in 1961.

Current year requirements in the compensation and pension program will exceed earlier estimates, necessitating a supplemental appropriation in the anticipated amount of $105 million. This supplemental is shown under Proposed for later transmission.

Forecasts of average caseloads and average annual payments per case have been based on analyses of trends in each category, with consideration given to specific conditions likely to affect the separate classes of beneficiaries.

1. *Compensation.*—Compensation is payable to living veterans for a disability connected with military service and compensation or dependency and indemnity compensation is payable to eligible dependents of deceased veterans for death connected with military service.

(*a*) *Living veterans.*—The basic rates of disability compensation provided in wartime cases range from $19 for 10% disability to $225 per month for total disability. Certain cases are compensated for specific disabilities as prescribed by law, to a maximum of $600 a month per case. Payable in both types of cases is an additional allowance for dependents of veterans rated 50% or more disabled to a maximum of $100 a month per case. All rates of peacetime disability compensation are 80% of wartime rates.

The caseload of living veterans reflects a decreasing trend through 1961, attributable primarily to termination of payments to World War II veterans with minimum ratings, or losses among the lower ratings in the World War I and World War II categories by election to receive higher pension benefits. This increases the average payment to those remaining on the rolls.

AVERAGE NUMBER OF VETERANS AND COSTS

	1959 actual	*1960 estimate*	*1961 estimate*
Spanish-American War	254	222	200
World War I	195,858	181,200	167,700
World War II	1,570,596	1,559,000	1,547,800
Korean conflict	203,013	206,200	208,400
Peacetime service	89,536	100,900	112,000
Total	2,059,257	2,047,522	2,036,100
Average payment per case per year	$775.65	$777.07	$776.68
Total costs	$1,597,254,430	$1,591,061,000	$1,581,394,000

(*b*) *Deceased veterans.*—The caseload continues to increase. The largest group in this category (World War II) appears to have reached a plateau which is maintained through 1961. The steady increase in the average annual payment per case is attributable to the continuing effects of recent legislation providing increased death benefits to a majority of eligible dependents.

AVERAGE NUMBER OF CASES AND COSTS

	1959 actual	*1960 estimate*	*1961 estimate*
Spanish-American War	999	940	850
World War I	46,763	45,300	43,900
World War II	275,765	275,100	275,000
Korean conflict	36,385	37,300	38,000
Peacetime service	27,352	30,200	33,100
Total	387,264	388,840	390,850
Average payment per case per year	$1,222.20	$1,233.56	$1,240.61
Total costs	$473,313,761	$479,659,000	$484,894,000

2. *Pensions.*—Benefits are payable to wartime veterans and dependents of deceased veterans for non-service-connected disability and death. The Veterans' Pension Act of 1959 modifies the pension program as previously indicated and establishes the rates and conditions of entitlement outlined below for World War I and subsequent periods of wartime service; rates and conditions of entitlement applicable to prior periods vary somewhat and are on a more liberal basis.

(*a*) *Living veterans.*—In general, pensions are payable to wartime veterans who are unable to secure substantially gainful employment as a result of a permanent and totally disabling non-service-connected disability. The legally prescribed standards for determining eligibility are especially liberal for veterans who have reached 65 years of age. Effective July 1, 1960, a sliding scale of pensions is introduced based on income and family status, ranging from a minimum of $40 monthly to a single veteran, with $1,200–$1,800 annual income, to a maximum of $100 monthly to a veteran with three or more dependents whose income is $1,000 or less annually. These are increased by $70 monthly when veteran needs regular aid and attendance.

The caseload continues to increase steadily with sizable gains projected in the World War I category in 1960. The rate of increase is somewhat greater in 1961 as a result of the estimated effect of the new pension program. The average annual payment per veteran continues to increase in 1960 largely because of the increasing number of World War I pensioners, where greater numbers are attaining age 65, and because of the new pension program.

AVERAGE NUMBER OF VETERANS AND COST [1]

	1959 actual	*1960 estimate*	*1961 estimate*
Yellow-fever experiments	2	2	2
Indian wars	73	55	45
Civil War	2	1	1
Spanish-American War	41,124	36,400	32,600

World War II	76,680	86,100	97,800
Korean conflict	4,827	6,300	8,400
Peacetime service	262	240	225
Total	834,689	932,398	1,063,873
Average payment per case per year	$975.84	$984.94	$1,076.06
Total costs	$814,521,848	$918,353,246	$1,144,796,000

[1] 1960 estimate includes supplemental estimate of $105,000,000.

(*b*) *Deceased veterans.*—Under the Veterans' Pension Act of 1959, pensions will be payable to widows and children of World War II and Korean conflict veterans as indicated above. A sliding scale of pension based on income and family status is payable ranging from $25 monthly to a widow alone with $1,200–$1,800 annual income to a maximum of $105 to a widow with 3 children (plus $15 for each additional child) whose income is $1,000 or less.

The estimated caseload reflects a normal steady increase in 1960 including consideration for the current impact of the new pension program, and a significant increase in 1961, primarily in the World War II and Korean conflict categories, where the effect of equalization with World

VETERANS ADMINISTRATION—Continued

Current authorizations—Continued

COMPENSATION AND PENSIONS—Continued

War I is indicated. The average payment reflects a normal estimated decrease in 1960, but increases sharply in 1961 because of the new pension program.

AVERAGE NUMBER OF CASES AND COSTS

	1959 actual	*1960 estimate*	*1961 estimate*
Mexican War	5	4	3
Indian wars	808	740	670
Civil War	4,129	4,200	3,800
Spanish-American War	79,606	75,300	72,600
World War I	380,089	411,600	475,300
World War II	46,187	52,700	237,100
Korean conflict	1,601	2,300	10,400
Peacetime service	82	75	70
Total	512,507	546,919	799,943
Average payment per case per year	$660.15	$657.67	$713.81
Total costs	$338,331,785	$359,691,000	$571,011,000

3. *Other—(a) Emergency officers.*—Emergency officers of World War I retired for service-connected disability are entitled to special retirement benefits at rates substantially higher than the normal compensation payments.

(*b*) *Adjusted-service and dependents pay.*—Adjusted-service credits earned by veterans of World War I are payable from this appropriation. Veterans claims of $50 or less and dependents claims of less than $50 are paid in cash. Dependents claims of $50 or more are paid in 10 equal quarterly installments. A bonus payment of $60 is paid to the dependents of a World War I veteran who died while in service and before July 1, 1919, if an adjusted-service credit is certified to the Administrator.

(*c*) *Subsistence allowance.*—Subsistence allowance payments to disabled veterans enrolled in vocational rehabilitation and education programs are made from this appropriation.

(*d*) *Initial burial allowance.*—The Administrator is authorized to provide an allowance of $250 (plus transportation charges where death occurs under Veterans Administration care) for the funeral expenses of a deceased veteran. The estimated increases in obligations are directly related to the estimated increase in number of deaths of veterans in civil life.

(*e*) *Special allowance, dependents.*—Under certain conditions a special allowance is payable to certain dependents of a veteran who dies after December 31, 1956, but who was not a fully and currently insured individual under the Social Security Act. The award is based upon a certification to Veterans Administration by the Social Security Administration.

	1959 actual	*1960 estimate*	*1961 estimate*
Emergency officers	1,489	1,470	1,430

Transferred to "Compensation and pensions" (72 Stat. 1075)	−20,800,000		
Appropriation (adjusted)	679,200,000	585,000,000	410,000,000

This appropriation provides education and training allowances for veterans of the Korean conflict; educational assistance allowances for eligibles under the War Orphans' Educational Assistance Act of 1956; for claim payments as well as loan and property acquisition costs on veterans loans; and special assistance to disabled veterans in the form of tuition and supplies and equipment for those requiring vocational rehabilitation, housing grants, and automobiles or other conveyances. Not reflected in the above schedule, but provided for in allowances for contingencies are funds for the recommended program of vocational rehabilitation for peacetime ex-servicemen.

1. *Education and training.*—It is estimated that the number of Korean conflict veterans receiving benefits will continue to decline during the next few years. Indications point to a moderate increase in trainees benefiting from the War Orphans' Educational Assistance Act. Forecasts of trainee loads based upon an analysis of trends in each of the major categories of training and average costs per trainee follows:

	1959 actual	*1960 estimate*	*1961 estimate*
Korean conflict veterans:			
Higher learning	237,160	182,000	123,800
Below college	122,541	99,000	73,500
Correspondence	23,679	21,000	18,300
Institutional on-farm	22,592	14,000	6,000
Job training	18,918	9,000	3,400
Total	424,890	325,000	225,000
Average cost per trainee	$1,332.96	$1,330.09	$1,330.01
War orphans:			
Average number of trainees	4,486	8,000	10,500
Average cost per trainee	$1,708.28	$1,650.00	$1,650.00

2. *Loan guarantee.*—Home, farm, and business loans are guaranteed or insured by the Veterans Administration. The payment of claims and the acquisition of loans and properties result from failure of veteran borrowers to keep

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

up their mortgage payments, thus requiring the Government to assume the responsibility. Budget forecasts are based on the relatively low default ratio experienced during the program. The number and cost of loan guarantee direct benefit payments follows:

	1959 actual	*1960 estimate*	*1961 estimate*
Interest gratuities, total cost	−$2,601		
Claims paid:			
Number of claims paid	10,881	8,800	9,000
Average cost per payment	$1,364.67	$1,400.00	$1,450.00
Total cost	$14,848,999	$12,320,000	$13,050,000
Loans acquired:			
Number of loans acquired	153	400	400
Average cost per acquisition	$6,226.76	$6,250.00	$6,300.00
Total cost	$952,694	$2,500,000	$2,520,000
Properties acquired:			
Number of properties acquired	10,466	8,250	8,500
Average cost per acquisition	$10,045.29	$10,750.00	$11,680.00
Total cost	$105,133,969	$88,687,500	$99,280,000

The increase in average cost for claims, as well as loan and property acquisitions, bears a direct relationship to the steady price index rise in the housing market.

Though these expenditures are paid from appropriated funds, they do not represent full loss to the Government, since the proceeds from liquidation of assets are deposited into the general fund receipts of the Treasury as shown below:

	1959 actual	*1960 estimate*	*1961 estimate*
Expenditures from appropriated funds	$120,935,662	$103,507,500	$114,850,000
Less returns to general fund receipts	29,127,559	42,799,633	52,850,000
Net appropriation expenditures	91,808,103	60,707,867	62,000,000

As of June 30, 1959, cumulative expenditures for claims and acquisitions totaled $448,423,087. However, total cash receipts of $134,298,836 had been returned to the Treasury. Against the resulting cash deficit of $314,124,251, Veterans Administration held assets worth $305,132,663, consisting of real property, cash, and loans and accounts receivable. Actual 1959 and estimated 1960 and 1961 operations are compared in the following statement:

CONDENSED STATEMENT OF INCOME AND EXPENSE AND FINANCIAL CONDITION

3. *Special assistance to disabled veterans.*—Disabled veterans requiring vocational rehabilitation are provided educational assistance for tuition, supplies, and equipment. Assistance also is available to provide grants for specially adapted housing to veterans having suffered the loss of both feet, and to paraplegic veterans. In addition, up to $1,600 is allowed certain disabled veterans toward the purchase of automobiles or other conveyances. Based on an analysis of trends, load forecasts, and average costs, total requirements are projected as follows:

	1959 actual	*1960 estimate*	*1961 estimate*
Tuition:			
Average number of trainees paid tuition (job training excluded)	9,117	8,120	5,900
Average cost per trainee	$661.04	$660.00	$660.00
Total cost	$6,026,710	$5,359,200	$3,894,000
Supplies and equipment:			
Average number of trainees	11,439	10,000	7,400
Average cost per trainee	$81.83	$82.00	$82.00
Total cost	$936,006	$820,000	$606,800
Housing grants:			
Number of housing grants	346	430	430
Average cost per grant	$9,909.11	$9,900.00	$9,900.00
Total cost	$3,428,553	$4,257,000	$4,257,000
Automobiles or other conveyances:			
Number of conveyances	439	360	300
Average cost per conveyance	$1,597.62	$1,600.00	$1,600.00
Total cost	$701,355	$576,000	$480,000

4. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources as reflected in the following table:

	1958 actual	*1959 actual*	*1960 estimate*	*1961 estimate*
Selected resources at end of year:				
Accounts receivable (benefit overpayments collectible)	$1,768,557	$1,452,271	$1,452,271	$1,452,271
Unpaid authorizations (approved authorizations for paraplegic housing and automobiles or other conveyances	644,251	537,239	537,239	537,239
Total selected resources at end of year	2,412,808	1,989,510	1,989,510	1,989,510
Selected resources at start of year (−)	−2,412,808	−1,989,510	−1,989,510	−1,989,510
Costs financed from obligations of other years, net (−)		−423,298

Appropriation	51,786,922	53,690,000	49,485,000

1. *Military and naval insurance.*—Payments are made for claims on war-risk insurance issued to servicemen and veterans of World War I. Although no policies of this insurance remain in force, payments for death and disability claims continue.

(a) *Payment to United States Government life insurance fund.*—Transfers are made to reimburse the fund for claims (1) traceable to the extra hazards of military service and (2) arising on certain policies held by personnel in active military service. The cash amount of payment made during the year is an obligation of this account. The corresponding trust fund receipt is presented on an accrual basis and is therefore not identical.

Description	*1959 actual*	*1960 estimate*	*1961 estimate*
Death and disability awards	263	359	359
Average payment per award	$886	$1,504	$1,504

(b) *Direct payments to policyholders and beneficiaries*—(1) *Disability awards.*—Payments of $5.75 per month per $1,000 of war-risk insurance held are made to veterans becoming permanently and totally disabled for as long as the disability shall continue. (2) *Death awards.*—Upon the death of a veteran receiving payments for disability, the remaining value of the policy is paid to the beneficiary as a death award.

Description	*1959 actual*	*1960 estimate*	*1961 estimate*
Average number of disability awards	6,700	6,600	6,500
Average number of death awards	55	55	55
Annual average payment per disability award	$485	$489	$492
Annual average payment per death award	1,312	1,273	1,182

2. *National service life insurance.*—This appropriation pays certain expenses of the National service life insurance fund and receives premiums and pays claims on nonparticipating insurance policies issued to certain disabled veterans of World War II. The permanent indefinite appropriation of premium receipts is authorized (38 U.S.C. 802(c)(2)). The cash amount of payment made during the year is an obligation of this account. The corresponding trust fund receipt is presented on an accrual basis and is therefore not identical.

(a) *Payment to National service life insurance fund.*—(1) For death claims traceable to extra hazards of service an amount is transferred from this appropriation, which, when added to the reserve of the policy, is equal to the actuarial value of the claim. In the event of total disability traceable to the extra hazards of service, an amount is transferred from this appropriation sufficient to meet the current payments from the fund. (2) Gratuitous insurance was issued to aviation cadets and to certain persons who were unable to make application for national service life insurance, (3) the fund is reimbursed when recovery of erroneous payments or overpayments is waived, and (4) the fund is reimbursed for death claims on policies under waiver of premiums while the insured is on active military duty.

Description	*Average payment per case, 1959*	*Caseload*		
		1959 actual	*1960 estimate*	*1961 estimate*
1. Claims for extra hazards of service:				
a. Death awards	$6,644	660	710	755
b. Disability awards	142	22,920	21,900	20,900
2. Gratuitous insurance	3,123	299	234	197
3. Waiver of overpayments	2,859	15	40	40
4. Death while under waiver of premiums	8,290	431	410	385

(b) *Direct payments to policyholders and beneficiaries.*—(1) Claims are paid on nonparticipating national service life insurance policies issued to World War II veterans with service-connected disabilities, (2) claims may be paid in certain instances in which applicants for insurance were rejected for medical reasons and subsequently died in line of duty, (3) claims are paid on death which occurred after application but before effective date of a national service life insurance policy, and (4) claims may be paid in certain cases in which insurance was discontinued because the insured was discharged to accept a commission, was absent without leave, or was court-martialed.

Description	*Average payment per case, 1959*	*Caseload*		
		1959 actual	*1960 estimate*	*1961 estimate*
1. Claims on nonparticipating national service life insurance:				
a. Death awards	$2,217	100	95	90

ance and/or U.S. Government life insurance carried by the deceased. Payments are made to beneficiaries in 120 equal installments, plus interest at the rate of 2.25% per year. The payments on awards made prior to January 1, 1957, are expected to remain at the level of about $36 million annually through 1960. Payments will decrease annually, as installments are completed, beginning in 1961.

Grants-in-aid are made to the Republic of the Philippines for the medical care and treatment of eligible Philippine Commonwealth Army veterans. Section 631 of title 38, U.S. Code, provides for reimbursement at agreed upon patient per diem rates up to a maximum annual amount of $2,000,000. Medical care and treatment is provided by the Philippine Veterans Memorial Hospital in Manila, which was constructed from U.S. grants-in-aid totaling approximately $9,400,000.

Construction of Hospital and Domiciliary Facilities

For hospital and domiciliary facilities, for planning and for major alterations, improvements, and repairs and extending any of the facilities under the jurisdiction of the Veterans Administration or for any of the purposes set forth in sections [5001 and 5002] *5001, 5002, and 5004,* title 38, United States Code, [$31,659,000] *$75,000,000,* to remain available until expended: *Provided, That annual accrued expenditures under this appropriation account, covering amounts becoming payable as a result of obligations incurred both in the current fiscal year and in prior fiscal years, shall not exceed $66,100,000.* (*72 Stat. 852; 73 Stat. 708–717; Independent Offices Appropriation Act, 1960.*)

VETERANS ADMINISTRATION—Continued

Current authorizations—Continued

CONSTRUCTION OF HOSPITAL AND DOMICILIARY FACILITIES—Con.

These funds provide for the construction of new hospital and domiciliary facilities and replacement of existing hospitals, including acquisition of sites, conversion of existing facilities, modernization, improvements, and major repairs of existing facilities (including regional offices and supply depots), and for fixed and initial portable equipmen at such facilities.

For 1961, a construction program is recommended with new obligational authority of $75,000,000. This will include $52,724,000 for the construction of three new hospitals, at Cleveland, Ohio, 800 beds; Washington, D.C., 700 beds; and Martinez, Calif., 500 beds; and $23,113,500 for modernization projects offset by savings of $837,500 from prior year programs. The amount for modernization consists of $4,856,200 for the full cost of a large number of minor projects (costing less than $300,000 each), $3,787,000 for planning the construction of $40,832,100 in larger modernization projects and $14,470,300 for construction of major projects planned in 1960.

1. *Construction of new hospitals.*—This activity includes post World War II new beds and conversion programs which consists of 77 projects that provide approximately 38,240 new beds and 12 projects for conversion of beds at existing hospitals.

BREAKDOWN OF NEW BEDS BY TYPE

	New hospitals	*Additions*	*Total*
Neuropsychiatric	9,465	1,370	10,835
Tuberculosis	1,200	1,180	2,380
General medical and surgical	23,775	950	24,725
Domiciliary facilities	300	------	300
Total	34,740	3,500	38,240

The status of the construction program for new hospital beds is as follows:

STATUS OF NEW BEDS PROVIDED

	1959 actual	*1960 estimate*	*1961 estimate*
Under construction at beginning of year	1,000	2,000	1,500
Put under construction during year	1,000	------	1,500
Completed during year	------	1,000	1,000
Total completed at end of year	34,740	35,740	36,740
Under construction at end of year	2,000	1,000	1,500
Not under construction at end of year	1,500	1,500	------

2. *Replacement of existing hospitals.*—This activity includes 10 projects that provide for replacement of approximately 7,896 beds (815 neuropsychiatric, 7,081 general medical and surgical) housed in temporary, obsolete, or hazardous structures. The following table shows the status of the construction program for replacement beds:

STATUS OF REPLACEMENT BEDS PROVIDED

	1959 actual	*1960 estimate*	*1961 estimate*
Under construction at beginning of year	815	1,315	1,815
Put under construction during year	500	500	500
Completed during year	------	------	815
Total completed at end of year	561	561	1,376
Under construction at end of year	1,315	1,815	1,500
Not under construction at end of year	6,020	5,520	5,020

3. *Modernization, improvement, and repairs.*—This activity provides for modernization, improvement, and major repair of structures and other construction at Veterans Administration facilities and is principally required to bring selected old hospitals, insofar as possible, up to the standards of the new hospitals. This program was undertaken in 1953 and has 851 projects including the proposed 1961 modernization, improvement, and repair program. The status of the program is as follows:

STATUS OF MODERNIZATION, IMPROVEMENT, AND REPAIR PROGRAM

	Number of projects	*Amount*
Physically and financially completed, June 30, 1959	406	$41,865,500
Physically completed, June 30, 1959	38	9,292,200
Under construction, June 30, 1959	111	67,387,800
Scheduled to be placed under construction, 1960	185	29,185,800
Scheduled to be placed under construction, 1961	75	37,848,800
To be placed under construction, future years	36	53,240,800

4. *Initial portable equipment.*—This activity provides initial portable equipment for all projects approved under the appropriation for Construction of hospital and domiciliary facilities prior to 1957, except for the new general medical and surgical hospitals proposed for Washington, D.C., Cleveland, Ohio, and the first phase replacement project for Downey, Ill.

5. *Relation of costs to accrued expenditures.*—Year-end balances of advances are as follows: 1958, $2,003,399; 1959, $2,003,399; 1960, $2,000,000; 1961, $2,000,000.

Allocations Received From Other Accounts

Note.—Obligations incurred under allocations from other accounts are included in the schedules of the parent appropriations as follows:
"Emergency supplies and equipment," Office of Civil and Defense Mobilization.
"National Cancer Institute," Public Health Service.
"Payments to school districts," Office of Education, Department of Health, Education, and Welfare.
"Research, development, test, and evaluation, Army."

Administrative Provisions

Not to exceed 5 per centum of any appropriation for the current fiscal year for "Compensation and pensions", "Readjustment benefits", and "Veterans insurance and indemnities" may be transferred to any other of the mentioned appropriations, but not to exceed 10 per centum of the appropriations so augmented[, and not to exceed $500,000 of the appropriation "Veterans insurance and indemnities" for the current year may be transferred to "Service-disabled veterans insurance fund"].

Appropriations available to the Veterans Administration for the current fiscal year for salaries and expenses shall be available for services as authorized by section 15 of the Act of August 2, 1946 (5 U.S.C. 55a).

Appropriations available to the Veterans Administration for the current fiscal year for "Inpatient care" and "Outpatient care" shall be available for funeral, burial, and other expenses incidental thereto (except burial awards authorized by section 902 of title 38, United States Code), for beneficiaries of the Veterans Administration receiving care under such appropriations.

No part of the appropriations in this Act for the Veterans Administration (except the appropriation for "Construction of hospital and domiciliary facilities") shall be available for the purchase of any site for or toward the construction of any new hospital or home.

No part of the foregoing appropriations shall be available for hospitalization or examination of any persons except beneficiaries entitled under the laws bestowing such benefits to veterans, unless reimbursement of cost is made to the appropriation at such rates as may be fixed by the Administrator of Veterans Affairs. (*Independent Offices Appropriation Act, 1960.*)

Financing applied to program	34,488,865	37,105,543	37,388,303

[1] Excludes equipment transferred in without charge of $416 in 1959.

The Veterans Canteen Service was established by Congress in 1946 to furnish at reasonable prices merchandise and services necessary to the comfort and well-being of veterans in hospitals and domiciliaries operated by the Veterans Administration (38 U.S.C. 4201–08).

Budget program.—Sales are expected to increase slightly through 1961. Increase in total operating costs is due primarily to higher salary expense as a result of converting canteen employees to a 40 hour, 5-day workweek, payment for rental charges to the Veterans Administration effective with 1960, and the cost of employee health benefits.

Relation of costs to obligations.—The relationship is derived from year-end balances of selected resources as reflected in the following table:

	1958 actual	*1959 actual*	*1960 estimate*	*1961 estimate*
Selected resources at end of year:				
Commodities for sale	$3,984,216	$3,812,517	$3,882,397	$3,882,397
Unpaid undelivered orders	696,037	808,257	850,000	850,000
Prepaid expense and other assets	35,241	13,369	13,369	13,369
Total selected resources at end of year	4,715,494	4,634,143	4,745,766	4,745,766
Selected resources at start of year (−)		−4,715,494	−4,634,143	−4,745,766
Costs financed from obligations of other years, net (−)		−81,351		
Obligations incurred for costs of other years, net			111,623	

Financing.—Operations are financed from current revenue. The Congress originally appropriated a total of $4,965,000 to establish and operate the Service which has been repaid to the Treasury.

Operating results and financial condition.—Operating revenue is expected to be sufficient to cover operating expense. The decline in operating margin is due principally to higher costs and a reduction in retail prices for clothing items required by patients and members. Funds at the close of the fiscal year in excess of the needs of the Service for the ensuing fiscal year will be paid to the Treasury as miscellaneous receipts.

Sources and Application of Funds (Operations)

Loans are made to veterans for the purchase, construction, or improvement of homes, including farm residences, in specified areas where mortgage loans made by private lenders and guaranteed by the Veterans Administration cannot be secured (38 U.S.C. 1811).

Budget program—1. *Direct loans to veterans.*—Under existing legislation, authority to make or to enter into commitments to make loans expires July 25, 1960. However, disbursements against loan commitments made prior to that date will continue. Commitments are expected to increase in the current year but to fall off sharply in 1961 with the expiration of loan making authority. The amount of loans outstanding will reach a peak of over $1 billion in 1961. A summary of loan activity follows:

	1959 actual	*1960 estimate*	*1961 estimate*
Number of loan commitments	21,662	35,697	635
Number of loans closed and fully disbursed	18,996	31,900	9,400
Amount of loan commitments (obligated)	$204,727,993	$357,329,999	$6,480,000
Total loans closed and fully disbursed	$179,531,163	$319,330,000	$94,880,000
Average per loan closed and fully disbursed	$9,451	$10,010	$10,093
Repayment of loans	$46,836,059	$62,836,423	$78,820,000
Sale of loans	$3,547,667	$3,000,000	$3,000,000
Losses on loans	$61,952	$65,000	$65,000
Net loan disbursements	$129,085,485	$253,428,577	$12,995,000
Loans outstanding end of year:			
Number	119,650	148,000	154,000
Amount	$821,331,159	$1,074,759,736	$1,087,754,736

2. *Vendee loans made.*—Resale of real property acquired through foreclosure or voluntary conveyance normally involves a cash down payment by the purchaser and the creation of a new mortgage loan to be held by the Veterans Administration. The noncash portions of these transactions are excluded from the program and financing schedule above and from the statement of sources and application of funds; but they are included in the following activity summary:

	1959 actual	*1960 estimate*	*1961 estimate*
Amount of properties sold	$1,819,991	$2,000,000	$2,000,000
Amount of vendee loans acquired	1,653,722	1,802,000	1,802,000
Amount of vendee loans repaid	194,690	205,000	210,000

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

3. *Real property acquired.*—Properties are acquired through foreclosures and voluntary conveyances in defaulted loans. This involves primarily an exchange of noncash assets, with relatively small cash outlay. The noncash portion of these transactions is excluded from the program and financing schedule above and the statement of sources and application of funds; but it is included in the following activity summary:

	1959 actual	*1960 estimate*	*1961 estimate*
Amount of properties acquired	$2,183,371	$1,826,423	$1,800,000

4. *Interest on borrowings.*—These payments to the Treasury increase as the principal amount of notes held by the Treasury increases with additional borrowings.

5. *Operating expense, general.*—These include a variety of miscellaneous expenses incident to closing and servicing loans. Costs will decline due to the effects of recent legislation requiring the veteran borrower to pay loan closer's fees previously paid by the Veterans Administration.

6. *Property management and selling expense.*—These costs of maintaining and selling properties acquired through foreclosure are expected to increase slightly with the increase in the number of loans outstanding.

Financing.—Loans are made primarily with funds borrowed from the Treasury. Borrowing authority in the amount of $933 million was authorized through June 30, 1959. An additional $250 million has been authorized for 1960. In addition, the proceeds of loan repayments and loan sales are available for making loans. It is expected that a favorable cash position will permit the repayment of $83 million to the Treasury during 1961. Expenses incident to closing loans are paid by the veteran, foreclosure expenses are met from interest revenue, and administrative expenses are borne by the appropriation for General operating expenses.

Operating results and financial condition.—Interest revenue from loans outstanding exceeds interest expense on borrowings from the Treasury, providing a growing annual net income, and increasing the retained earnings of the fund by $17 million in 1960 and $24 million in 1961.

Financing applied to program	3,700,578	5,632,032	6,724,664

This fund finances the payment of claims on nonparticipating insurance policies issued to veterans with service-connected disabilities which make them ineligible for commercial insurance (38 U.S.C. 722). Administrative expenses are paid from the appropriation General operating expenses.

Budget program—1. *Death claims paid.*—Payments to surviving beneficiaries continue to increase as new deaths occur among the increasing number of policyholders.

2. *Premiums waived and lien writeoffs.*—Premium payments are waived for policyholders who are totally disabled for 6 months or more. This is a cost to the fund which increases with the increased number of policies in force.

3. *Cash surrenders paid.*—A policyholder may terminate his insurance by cashing in his policy for its cash value. This activity continues to increase as the number of policies increases.

4. *Receivables written off.*—Overpayments may be written off as uncollectible if determined the repayment would create hardships to beneficiaries. Very few overpayments are expected.

7. *Policy loans and liens made.*—A policyholder may borrow up to 94% of the cash value of his policy. This activity increases with the increased number of policyholders.

The general increase in the activity of this fund is indicated in the following table:

	1958 actual	*1959 actual*	*1960 estimate*	*1961 estimate*
Number of policies	33,791	38,702	44,000	50,500
Insurance in force	$296,977,000	$339,870,570	$386,496,000	$443,592,000

Financing.—Operations are financed from premiums and other receipts. Additional funds are derived from the appropriation Veterans insurance and indemnities, instead of direct appropriations to this fund. It is estimated that the payment will be $1,400,000 in 1961.

Operating results and financial condition.—Because premium and other receipts continue to be insufficient to cover operations, the deficit is expected to continue to increase with capital impairment reaching an estimated $18,078,888 by June 30, 1961.

The fund finances claims arising from the guarantee of premiums due on commercial life insurance policies held by servicemen while they are in service and for 2 years after discharge (72 Stat. 487). The Government guarantees the repayment of any indebtedness not liquidated by the insured himself. Any payment by the Government on cases approved subsequent to October 6, 1942, creates a debt owed the Government by the insured. The Supreme Court has ruled that, in cases approved prior to October 6, 1942, the insured individuals may make claims for refunds of any payments made to the Government because of alleged indebtedness.

Budget program—Insurance program.—(*a*) Claims paid on guaranteed premiums are made to commercial insurance companies in cases where the servicemen failed to make premium payments which were guaranteed by the Government and (*b*) refund claims paid to former servicemen for payments made to the Government are one-time payments to a limited group of claimants which are expected to be completed in 1960.

Federal Reserve Bank of St. Louis

VETERANS ADMINISTRATION—Continued

Public enterprise funds—Continued

SOLDIERS' AND SAILORS' CIVIL RELIEF FUND—Continued

The activity of the fund is indicated in the following table:

	1959 actual	*1960 estimate*	*1961 estimate*
Number of settlements	75	75	75
Number of refunds	7,065	943	----
Average cost per settlement	$280	$250	$250
Average cost per refund	$204	$203	----

Financing.—Payment of claims against this fund are financed from collection of claims receivable, revenue, and appropriations as needed.

Operating results and financial condition.—The payment of refund claims in 1959 and 1960 has created expense substantially in excess of the small revenue of the fund, thereby increasing the deficit by $1.5 million in 1959 and $0.2 million in 1960.

Financing applied to program	5,833,565	8,651,200	9,392,500

The fund finances the payment of claims on nonparticipating insurance policies issued before January 1, 1957, to veterans who served in the Armed Forces subsequent to April 1951 (38 U.S.C. 723). Under 72 Stat. 1716, policyholders have the right to convert to a permanent plan of insurance or to a new form of term insurance which may not be renewed beyond age 50 but which costs less than the present term insurance. Those who convert to a permanent plan will also acquire the right to purchase total disability income coverage with an additional premium.

Budget program—1. *Death claims paid.*—Payments to surviving beneficiaries continue to increase as new deaths occur among policyholders.

2. *Disability claims paid.*—Payments to individuals who have purchased total disability coverage and who subsequently become totaly disabled are expected to begin in 1960.

3. *Cash surrenders paid.*—Under the new law mentioned above authorizing conversion to permanent types of insurance, policyholders may terminate their insurance by

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

cashing their policies. This activity will increase as more policyholders convert to a permanent plan.

4. *Premiums waived and lien writeoff.*—Premium payments are waived for policyholders who are totally disabled for 6 months or more. This is a cost to the fund which increases with the number of policies under premium waiver.

7 and 8. *Policy loans and liens made.*—The policyholders who convert their insurance from term to permanent plan will subsequently be entitled to borrow up to 94% of the cash value of the new policy. Disbursement of such loans from this fund is expected to begin in 1960.

The general decrease in the activity of this fund is indicated in the following table:

[Dollars in millions]

	June 30, 1958	*June 30, 1959*	*June 30, 1960*	*June 30, 1961*
Number of policies	686,628	671,751	655,000	617,000
Insurance in force	$6,267	$6,040	$5,888	$5,648

Financing.—Payments from this fund are financed primarily from premium receipts and interest on investments, which are decreasing as the number of policyholders declines.

Operating results and financial condition.—Favorable mortality experience on insurance written against this fund has kept death claims payments well below the amount of premium and interest receipts, thereby producing an annual increase in the retained earnings of the fund.

Intragovernmental funds:

SUPPLY FUND

The Supply fund finances the procurement of supplies and equipment throughout the Veterans Administration (38 U.S.C. 5011).

Budget program—Procurement and services program.—The procurement and services program includes the procurement of supplies and equipment, the operation of service and reclamation shops at each of the three supply depots which are located at Somerville, N.J., Hines, Ill., and Wilmington, Calif., a centralized book and periodical procurement activity at Somerville, N.J., and a motion picture inspection and shipping activity which distributes films to Veterans Administration hospitals and homes. Expenditures and revenue in 1961 for the procurement and services program are estimated to be $136,057,960.

Publication and reproduction program.—This program provides printing service to Veterans Administration installations on a centralized basis. Printed matter is acquired in accordance with the rules of the Joint Committee on Printing and Binding from the Government Printing Office, the General Services Administration, two Veterans Administration-operated plants in Washington, D.C., and St. Louis, Mo., and from commercial sources. Expenditures and revenue in 1961 are estimated to be $3,143,101.

Financing.—Consuming appropriations reimburse the fund for the cost of goods and services provided, including related expense such as transportation, inspection, and testing but excluding personal services and other costs incidental to the operation and administration of supply activities, which are charged directly to applicable appropriations and are not operating expense of the supply fund.

Operating results.—The fund operated at a net loss of $236,573 in 1959 on a total sales volume of $138,866,253. It is expected to break even in 1961 on a slightly higher sales volume after recovering the 1959 loss in 1960.

General Operating Expenses

Program and Financing

	1959 actual	1960 estimate	1961 estimate
Program by activities:			
Compensation and pensions (total costs—obligations)		$2,817,000	
Financing:			
Proposed supplemental appropriation		2,817,000	

Under existing legislation, 1960.—A supplemental appropriation for 1960 is anticipated to cover the cost of increased compensation and pensions operations resulting from the enactment of Public Law 86–211 subsequent to submission of the 1960 budget.

Inpatient Care

Program and Financing

	1959 actual	1960 estimate	1961 estimate
Program by activities:			
1. Maintenance and operation of hospitals:			
(a) Neuropsychiatric hospitals		$1,947,000	
(b) Tuberculosis hospitals		418,000	
(c) General medical hospitals		3,882,000	
2. Maintenance and operation of Veterans Administration domiciliary homes		79,000	
Total program (costs—obligations)		6,326,000	
Financing:			
Proposed supplemental appropriation		6,326,000	

Under existing legislation, 1960.—A supplemental appropriation of $6,326,000 is anticipated to cover the cost of wage-rate increases approved for wage-board employees between November 1, 1958, and July 31, 1959, and not included in the 1960 Inpatient care appropriation.

Maintenance and Operation of Supply Depots

Program and Financing

	1959 actual	1960 estimate	1961 estimate
Program by activities:			
1. Stock control operations		$20,000	
2. Utility operations		14,000	
Total program (costs—obligations)		34,000	
Financing:			
Proposed supplemental appropriation		34,000	

Under existing legislation, 1960.—A supplemental appropriation of $34,000 is anticipated to cover the cost of wage-rate increases approved for wage-board employees between November 1, 1958, and July 31, 1959, and not included in the 1960 Maintenance and operation of supply depots appropriation.

COMPENSATION AND PENSIONS

Program and Financing

	1959 actual	1960 estimate	1961 estimate
Program by activities:			
Pensions, living veterans, World War I (total costs—obligations)		$105,000,000	
Financing:			
Proposed supplemental appropriation		105,000,000	

Under existing legislation, 1960.—A supplemental appropriation of $105 million is anticipated to cover uncontrollable statutory benefit costs of the compensation and pensions program primarily in the World War I pension category.

INDEPENDENT OFFICES—GENERAL PROVISIONS

SEC. 102. Where appropriations in this title are expendable for travel expenses of employees and no specific limitation has been placed thereon, the expenditures for such travel expenses may not exceed the amounts set forth therefor in the budget estimates submitted for the appropriations: *Provided*, That this section shall not apply to travel performed by uncompensated officials of local boards and appeal boards of the Selective Service System, or to travel performed in connection with the investigation of aircraft accidents by the Civil Aeronautics Board.

SEC. 103. Where appropriations in this title are expendable for the purchase of newspapers and periodicals and no specific limitation has been placed thereon, the expenditures therefor under each such appropriation may not exceed the amount of $50: *Provided*, That this limitation shall not apply to the purchase of scientific, technical, trade, or traffic periodicals necessary in connection with the performance of the authorized functions of the agencies for which funds are herein provided, nor to the purchase of newspapers and periodicals necessary for the care and welfare of patients and members in Veterans Administration hospitals and domiciliary facilities.

SEC. 104. No part of any appropriation contained in this title shall be available to pay the salary of any person filling a position, other than a temporary position, formerly held by an employee who has left to enter the Armed Forces of the United States and has satisfactorily completed his period of active military or naval service and has within ninety days after his release from such service or from hospitalization continuing after discharge for a period of not more than one year made application for restoration to his former position and has been certified by the Civil Service Commission as still qualified to perform the duties of his former position and has not been restored thereto.

SEC. 105. No part of any appropriation made available by the provisions of this title shall be used for the purchase or sale of real estate or for the purpose of establishing new offices outside the District of Columbia: *Provided*, That this limitation shall not apply to programs which have been approved by the Congress and appropriations made therefor.

SEC. 106. No part of any appropriation contained in this title shall be used to pay the compensation of any employee engaged in personnel work in excess of the number that would be provided by a ratio of one such employee to one hundred and thirty-five, or a part thereof, full-time, part-time, and intermittent employees of the agency concerned: *Provided*, That for purposes of this section employees shall be considered as engaged in personnel work if they spend half time or more in personnel administration consisting of direction and administration of the personnel program; employment, placement, and separation; job evaluation and classification; employee relations and services; wage administration; and processing, recording, and reporting. (*Independent Offices Appropriations Act, 1960.*)

CORPORATIONS—GENERAL PROVISION

SEC. 202. No part of the funds of, or available for expenditure by, any corporation or agency included in this title shall be used to pay the compensation of any employee engaged in personnel work in excess of the number that would be provided by a ratio of one such employee to one hundred and thirty-five, or a part thereof, full-time, part-time, and intermittent employees of the agency concerned: *Provided*, That for purposes of this section employees shall be considered as engaged in personnel work if they spend half-time or more in personnel administration consisting of direction and administration of the personnel program; employment, placement, and separation; job evaluation and classification; employee relations and services; committees of expert examiners and boards of civil-service examiners; wage administration; and processing, recording, and reporting. (*Independent Offices Appropriation Act, 1960.*)

GENERAL PROVISIONS

SEC. 301. No part of any appropriation contained in this Act, or of the funds available for expenditure by any corporation or agency included in this Act, shall be used for publicity or propaganda purposes designed to support or defeat legislation pending before the Congress. (*Independent Offices Appropriation Act, 1960.*)

GENERAL SERVICES ADMINISTRATION

The new obligational authority of $508 million recommended for the General Services Administration for 1961 is $224 million above the 1960 amount. This increase is primarily for the construction of new Federal buildings and for the strategic stockpile program. Expenditures are estimated to increase $28 million over 1960, mainly for new building construction.

Management of the Government's general property and records accounts for 92% of the new obligational authority recommended for 1961. New obligational authority for real property activities will increase by $181 million to $426 million; of this increase, $160 million is for construction of new buildings, for which no funds were provided in 1960; and $21 million is for other expenses, primarily office space for tenant agencies and construction of emergency relocation sites protected against fallout. Increases in new obligational authority totaling $5 million are requested for supply, records, and transportation and utility services to meet increased workload.

Stockpile inventories, together with strategic materials held in other Government inventories, are sufficient to meet all but a few stockpile objectives. Most of the expenditures in 1961 will be in connection with storing an estimated $7 billion worth of materials in the strategic and supplemental stockpiles, rotating materials subject to deterioration, and upgrading certain materials to a form more readily usable in an emergency. In 1960, this program is being financed from balances of appropriations made in prior years. Since only about $4 million of such balances are estimated to be available in 1961, new obligational authority of $39 million will be required.

New obligational authority and expenditures for the General Services Administration are shown by function in the following table:

RECAPITULATION OF BUDGET AUTHORIZATIONS AND EXPENDITURES

[In thousands]

Function and subfunction	New obligational authority			Expenditures		
	1959 enacted	1960 estimate	1961 estimate	1959 actual	1960 estimate	1961 estimate

REAL PROPERTY ACTIVITIES

Current authorizations:

OPERATING EXPENSES, PUBLIC BUILDINGS SERVICE

For necessary expenses of real property management and related activities as provided by law; rental of buildings in the District of Columbia; restoration of leased premises; moving Government agencies (including space adjustments) in connection with the assignment, allocation, and transfer of building space; acquisition by purchase or otherwise and disposal by sale or otherwise of real estate and interests therein; and payments in lieu of taxes pursuant to the Act of August 12, 1955 (40 U.S.C. 521); [$151,000,000] *$170,500,000: Provided,* That this appropriation shall be available, without regard to section 322 of the Act of June 30, 1932, as amended (40 U.S.C. 278a), with respect to buildings, or parts thereof, heretofore leased under the appropriation for "Emergency operating expenses". (*Independent Offices Appropriation Act, 1960.*)

Appropriated 1960, **$151,000,000** Estimate 1961, **$170,500,000**
Appropriated (adjusted) 1960, **$151,065,000**

Program and Financing

	1959 actual	1960 estimate	1961 estimate
Program by activities:			
1. Buildings management	$135,186,563	$143,477,025	$162,057,052
2. Acquisition and disposal	2,823,231	3,064,193	2,907,000
3. Design and construction	255,272	244,498	246,700
4. Program planning	520,794	588,229	588,200
5. Service direction	607,482	668,953	668,100
6. Administrative operations	3,588,200	3,900,000	4,250,000
7. Adjustment of prior year costs	105,619		
Total program costs [1]	143,087,161	151,942,898	170,717,052
8. Relation of costs to obligations: Costs financed from obligations of other years (unpaid undelivered orders), net (−)	−288,704	−877,898	−217,052
Total program (obligations)	142,798,457	151,065,000	170,500,000
Financing:			
Comparative transfers to other accounts	1,896,291		
1959 appropriation available in 1958	291,607		
Unobligated balance no longer available	808,605		
New obligational authority	145,794,960	151,065,000	170,500,000
New obligational authority:			
Appropriation	$145,818,960	$151,000,000	$170,500,000
Transferred to "Operating expenses, National Archives and Records Service" (72 Stat. 243)	−24,000		
Transferred from "Salaries and expenses," Immigration and Naturalization Service, Department of Justice (5 U.S.C. 630e)		65,000	
Appropriation adjusted	145,794,960	151,065,000	170,500,000

[1] Includes capital outlay as follows: June 30, 1959, $1,600,668; 1960, $1,690,000; 1961, $600,000.

This appropriation provides for basic real property operations of the General Services Administration including planning and direction of all real property programs; acquisition, operation, maintenance, protection, and utilization of general-purpose buildings and space; management and operation of communication facilities; management of excess real property and disposal of surpluses; and central direction of all buildings design, construction, repair, and improvement.

The appropriation request for 1961 is a net increase of $15,535,000 above a comparable amount for 1960. The net increase is composed of $15,050,000 for management and operation of buildings, and $485,000 for other program activities and administrative operations to support the expanded program. A 1960 supplemental is anticipated for wage board rate increases, composed of $3,900,000 to annualize increases granted in 1959 and $2,000,000 for estimated 1960 increases. The 1961 request includes the 1961 cost of 1959 increases, but does not include the cost of increases which may be granted in 1960 or 1961.

1. *Buildings management.*—This activity provides for (*a*) rental, operation, protection, and utilization of Government-owned, leased, and purchase contract space, as indicated in the following table:

AVERAGE NET SQUARE FEET

	1959 actual	*1960 estimate*	*1961 estimate*
Government-owned space	55,086,000	55,563,000	57,606,000
Leased space	21,961,000	22,684,000	24,687,000
Purchase contract space	69,000	683,000	1,406,000

(*b*) maintenance and operation of joint-use communication facilities; (*c*) protection and maintenance of surplus and national industrial reserve properties; and (*d*) payments in lieu of taxes on certain properties transferred from the Reconstruction Finance Corporation.

The net increase for 1961 of $15,050,000 over the comparable amount for 1960 is composed generally of increased workload with fixed costs as follows:

Operation and protection of Government-owned space	$3,948,200
Rental, operation, and protection of leased space	4,989,000
Cost of space supplied to other agencies, reimbursable in 1960	4,000,000
Operation and protection of purchase contract space	1,102,800
Planning for Federal civil agency communications system	210,000
Employee health benefits	800,000
Total	15,050,000

2. *Acquisition and disposal.*—This activity provides for (*a*) acquisition of real property by lease, purchase, exchange, or donation, and management of available building sites pending construction; (*b*) utilization of excess and disposal of surplus and national industrial reserve property; and (*c*) appraisal services, including the procurement of appraisals under contract.

3. *Design and construction.*—This activity provides for a small staff responsible for direction of all programs involving design, construction, and remodeling of Federal buildings.

4. *Program planning.*—This activity provides centralized planning of real property programs including immediate and long-range building needs for housing Federal activities throughout the country.

8. *Relation of costs to obligations.*—Year-end balances of unpaid undelivered orders are as follows: 1958, $2,168,559; 1959, $1,879,855; 1960, $1,001,957; 1961, $784,905.

Unobligated balance carried forward	555,140		
Appropriation (new obligational authority)	75,000,000	60,000,000	60,000,000

This appropriation provides for maintaining, repairing, remodeling, improving, and other changes, except extensions and conversions costing over $200,000, in over 4,800 public buildings under the jurisdiction of General Services Administration. The buildings were constructed or purchased at a cost exceeding $1.6 billion and contain more than 123 million net square feet of floor space, of which 29.8 million square feet is in the Washington, D.C., metropolitan area. The budget for 1961 provides for continuation of the long-range program initiated in 1957, to alleviate deterioration and obsolescence of buildings which adversely affect efficient operations of tenant agencies. Included in this account is a limitation on accrued expenditures in accordance with Public Law 85–759.

1. *Maintenance.*—Normal recurring needs for repairs to buildings and equipment develop at the average rate of $0.15 per net square foot each year. Less than 2% of the activity provides for minor capitalized items too small to be considered as renovation projects.

2. *Repairing, remodeling, and improving.*—Elimination of major obsolescence and deterioration of buildings is provided by bringing the properties up to modern standards of usefulness to improve working conditions and efficiency of occupying agencies. It is estimated that about 49% of this work will be for capital improvements.

3. *Air conditioning.*—Improvements in working conditions are provided for occupants of buildings located in areas of high temperature and humidity. Except for a nominal sum each year for program development and supervision, all costs under this activity are considered to be capital improvements. Except for work related to Post Office Department modernization, the program through 1961 will provide about 40% of the air conditioning required in existing buildings located in zones where the combination of effective temperature and humidity exceeds 80°.

4. *Fallout shelters.*—Fallout shelters are being included in existing Federal buildings to stimulate and encourage State and local governments and private enterprise to provide such facilities in their buildings. Except for a nominal sum for program development and supervision, all costs are considered to be capital improvements.

Financing:			
Unobligated balance no longer available	$204,689		
Appropriation (new obligational authority)	310,900	$1,675,000	$4,630,000

[1] Includes capital outlay as follows: June 30, 1959, $41,104; 1960, $888,200; 1961, $1,821,200.

Purchase contracts have been executed to construct and acquire 29 specific buildings costing $52.6 million through lease-purchase arrangements, under the Public Buildings Purchase Contract Act of 1954. By the end of 1960 27 buildings will have been completed. Of the two remaining buildings one will be completed in 1961 and one in 1962. The Government's obligation for one of the completed buildings will be liquidated during 1960 through prepayment of the contract. The estimate for 1961 provides for payments to contractors on 27 projects and taxes becoming payable on 26 projects.

Financing:									
Unobligated balance carried forward					2,162,000				
Appropriation (new obligational authority)					185,000,000				

This new appropriation will provide, pursuant to the Public Buildings Act of 1959, for financing (*a*) site acquisition, design, and construction of new public buildings, and (*b*) extension and conversion of existing structures where individual project expenditures exceed $200,000.

1. *Construction.*—The estimate for 1961 provides for construction starts on buildings costing $167.7 million, including 8 previously authorized projects costing $149.2 million, which have been resubmitted to the Public Works Committees. Provision is made for fallout shelters in accordance with the national shelter policy.

2. *Extension and conversion of buildings.*—Through major extension and conversion projects existing buildings are brought up to standards and expanded to make them suitable for the current and future needs of the tenant agencies. Individual projects involving expenditures of more than $200,000 requiring approval of the Public Works Committees are financed under this appropriation, while those costing less are financed under Repair and improvement of public buildings. The estimate includes $13.7 million for such projects the total cost of which is $18.1 million.

3. *Sites and expenses.*—A total of $17.3 million has been included for acquisition of sites and design for new projects for which construction funds are provided in 1961 or will be required in subsequent years.

Appropriation (new obligational authority)			152,810,000						

This appropriation provided for financing the construction of 47 authorized public buildings, and the acquisition of buildings and sites thereof by purchase, condemnation, or otherwise, including prepayment of purchase contracts. Except for site and design costs for the building at Milledgeville, Ga., and sites obtained as incidental to buildings purchased or otherwise acquired for continued use, costs for site acquisition, design and construction supervision have been provided for under Sites and expenses, public buildings projects.

During 1959 contracts were awarded for construction of 20 projects estimated to cost $33.6 million. The program for 1960 contemplates construction starts on 26 projects costing $83.4 million; the acquisition of several needed buildings, where economically justified, at a cost of $28.1 million; and prepayment of the purchase contract on the project at Rock Island, Ill., at a cost of $1.577 million. The program for 1961 contemplates start of construction on the remaining authorized project at an estimated cost of $8 million.

Future construction programs, including costs of site acquisition, design, and supervision, will be financed, beginning in 1961, under a new appropriation Construction and acquisition of public buildings.

6. *Relation of costs to obligations.*—Year-end balances of unpaid, undelivered orders are as follows: 1959, $30,004,471; 1960, $66,063,278; 1961, $10,388,278.

Improvements of private hospital facilities in the District of Columbia are made under legislation authorizing appropriations of $40,730,000.

1. *Construction.*—Under appropriations of $23,410,000 a new hospital center was physically completed and occupied during 1958. Cleanup will be completed and remaining equipment installed during 1960.

2. *Grants.*—Under appropriations of $14,320,000 grants totaling $13,994,578 have been approved for private agencies in the District of Columbia for improving existing hospital facilities on which building costs are estimated at $34.8 million.

Approximately $7.1 million, representing 50% of the grants, is to be reimbursed by the District of Columbia over a period of years.

3. *Relation of costs to obligations.*—The year-end balances of unpaid undelivered orders are as follows: 1958, $2,439,465; 1959, $4,222,677; 1960, $1,797,677; 1961, $329,677.

Appraisers, auctioneers, and brokers familiar with local markets are used to accelerate the disposal of surplus real and related personal property. Fees of appraisers, auctioneers, and brokers and costs of advertising and surveying are paid out of receipts, subject to a limit of 12% of the proceeds of all dispositions within each year (40 U.S.C.A. 485(b)). Also paid from such proceeds is the direct expense in connection with utilization of excess real and related personal property (68 Stat. 1051). Sales by auctioneers amounted to $10.6 million in 1959 and sales by both auctioneers and brokers are estimated at $20 million in 1960 and $25 million in 1961.

Gross receipts from all sources were $38,924,996 in 1959 and are estimated to be $45,000,000 in 1960 and $50,000,000 in 1961.

5. *Relation of costs to obligations.*—Year-end balances of unpaid undelivered orders are as follows: 1958, $215,801; 1959, $345,822; 1960, $200,822; 1961, $150,822.

[1] Excludes equipment transferred in without charge in 1959, $340,367.

This fund finances, on a reimbursable basis, buildings management activities consisting of: Management, rental, operation, and protection of Government-owned and leased space in and outside the District of Columbia for housing Federal agencies; recurring repairs to Government-owned space under jurisdiction of General Services Administration; operation of joint-use communication facilities; protection and maintenance of excess and surplus properties; and maintenance and repair of sites or improvements thereon reserved for future construction of Federal buildings, including operation of space occupied by commercial tenants; and other related building services (66 Stat. 594). Retained earnings resulting from operations, after making provision for prior year losses, if any, are paid into the Treasury as miscellaneous receipts.

Operating costs for 1961 are estimated at $316.2 million, a net increase of $54 million over 1960, due mainly to work in space occupied by the Post Office Department.

1. *Buildings management*—(*a*) *Operation and protection of Government-owned space.*—Provides for operation and protection of 80,906,000 average square feet of space in 1961 compared to 78,363,000 square feet in 1960 and 77,917,526 square feet in 1959. The change from 1960 reflects additional space to be serviced due to construction of new buildings and certain space presently housing postal activities which is being vacated by the Post Office Department.

(*b*) *Rental, operation, and protection of leased space.*—Provides for 38,487,000 average square feet in 1961 compared to 36,984,000 in 1960 and 36,483,969 in 1959, based on currently projected programs of Federal agencies.

(*c*) *Operation and protection of purchase contract space.*—Provides for 1,406,000 average square feet in 1961 compared to 683,000 in 1960 and 128,403 in 1959. The increase over 1960 provides for operation and protection of the post office and courthouse building at Omaha, Nebr., to be completed early in 1961, and full year costs of 20 buildings scheduled for completion during 1960.

2. *Moving and space alterations.*—Provides for minimum of moving and related alterations based on experience factors derived from buildings management operations.

3. *Temporary space and moving costs incident to new buildings.*—Provides rents, alterations, etc., incident to setting up temporary quarters for agencies that must be moved to make way for demolition due to construction and moving agencies into temporary space or completed buildings. No provision is made for furniture requirements incident to occupancy of new buildings. Effective July 1, 1960, the furnishing of such buildings becomes the responsibility of occupant agencies.

4. *Operation of communication facilities.*—Provides for management and operation of telecommunication services and facilities for use of Federal agencies.

5. *Protection and maintenance.*—Provides for protection and maintenance of excess and surplus properties.

6. *Maintenance repairs.*—Provides for day-to-day maintenance to General Services Administration operated buildings, Public Health Service hospitals, and other Government buildings under jurisdiction of General Services Administration.

7. *Security guarding.*—Provides extra guarding service for other agencies where specifically authorized by law.

8. *Operation and maintenance of sites held for future construction.*—Provides for maintenance and repairs of sites or improvements thereon reserved for future construction of Federal buildings, and operation of space occupied by commercial tenants.

9. *Job order work.*—Provides for special services and improvements to buildings for General Services Administration and other agencies. Increases in 1960 and 1961 are principally for work which will be performed for the Post Office Department in connection with its modernization program.

10. *Other.*—Provides for program supervision of repair and improvement operations as distinguished from architectural and design activities initially financed from the Construction services fund, and utility services furnished in the District of Columbia to buildings operated by other agencies.

CONSTRUCTION SERVICES, PUBLIC BUILDINGS

Construction service activities consisting of surveys and test borings performed in connection with the acquisition of Federal building sites; preparation of drawings and specifications for the construction or alteration of public buildings; supervision of construction and alteration activities; and other related services are financed by this fund on a reimbursable basis from funds appropriated, transferred, or advanced to General Services Administration (40 U.S.C. 296).

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

Operations.—Prior to 1960 the fund was used solely for financing direct engineering and architectural services at the departmental level. Beginning with 1960, use of the fund was extended to cover the initial financing of salaries and related expenses of all personnel engaged in buildings design and construction activities, both departmental and field. The increase in 1961 is mainly to provide for work performed in connection with the Post Office modernization program and an expanded General Services Administration construction program.

Operating results.—Retained earnings will be reduced in 1960 to approximately $100,000 and maintained at that level in subsequent years to provide a token amount of working capital.

[1] Includes capital outlay as follows: June 30, 1959, $49,990; 1960, $17,419; 1961, $35,900.

This appropriation provides for establishment of efficient personal property management practices throughout the Federal Government.

1. *Utilization and sales.*—Excess usable personal property is reported to General Services Administration for screening against needs of Federal agencies to accomplish maximum Government utilization and obviate new purchases by transfers of property. The residue, together with surpluses not screened by General Services Administration, is either donated for educational, public health, or civil defense purposes or released for public sale. Utilization transfers amounted to $138 million in 1958, $141 million in 1959, and are expected to be $215 million in 1960 and $305 million in 1961. Total excesses generated are now exceeding World War II peaks: $7.1 billion in 1958, $6.9 billion in 1959, and are estimated at $9 billion in 1960 and $10 billion in 1961. Expense of these operations is provided from proceeds of sales of surplus personal property.

2. *Supply standards.*—Standards of quality and other characteristics of common-use commodities are established by specifications and qualified products lists for mandatory use by Government agencies. The amount requested for 1961 will provide for the production of 400 new specifications and 427 major revisions, amendments, and purchase descriptions as compared to 350 and 380, respectively, in 1960, and will increase Federal standards production from 32 in 1960 to 37 in 1961.

3. *Federal catalog participation.*—Uniform catalog identification for each item in the civilian agencies supply operations is provided and coordination maintained with Department of Defense in development of a single Federal catalog system. The military departments have now converted to the exclusive use of this system. General Services Administration will have completed 246,200 items used by General Services Administration and other civil agencies by the end of 1960. This request provides for completing 57,500 additional items in 1961, leaving approximately 396,300 items to be identified.

4. *Motor vehicle management.*—Governmentwide policies and procedures are developed for improving the economy and efficiency of operating motor equipment. Interagency motor pools are established at locations where studies indicate savings and improved efficiency will result. It is expected that the number of pools in operation will increase from 44 at the end of 1959 to 58 for 1960 and 70 for 1961.

5. *Supply contracting.*—Term contracts for common-use commodities and services are established for large aggregate volume requirements against which agencies place individual orders at uniform price advantages.

6. *Supply management.*—Policies and procedures for improving supply operations in Government agencies are developed and their installation coordinated through the conduct of training programs and supply conferences, continuous onsite technical assistance, and by special surveys as required.

7. *Procurement policy.*—Policies and procedures are developed for achieving the maximum of uniformity and simplification of procurement regulations relating to purchasing and contracting throughout the Government.

11. *Relation of costs to obligations.*—Year-end balances of unpaid undelivered orders are as follows: 1958, $74,467; 1959, $68,461; 1960, $55,000; and 1961, $70,000.

Unobligated balance no longer available	384,581		
Appropriation (new obligational authority)	20,507,000	21,450,000	23,300,000

[1] Includes capital outlay as follows: June 30, 1959, $134,612; 1960, $228,621; 1961, $25,000.

This appropriation provides for expenses of operating the nationwide supply system whereby common-use commodities are sold to Government agencies from stocks in supply depots or by direct delivery from suppliers, whichever is more economical. Most of the costs of commodities sold are initially financed from the General supply fund, subject to reimbursement by ordering agencies. Wherever economical and feasible, costs of commodities furnished directly from the supplier are financed by payment directly from the requisitioning agency appropriation without involving the General supply fund. Total sales for 1961 are programed at $357.3 million as compared with $341.6 million programed for 1960, and actual sales of $322.2 million for 1959.

1. *Stores activities—Stores operations.*—Stocks of common-use commodities are received, warehoused and sold at cost to Federal agencies through a nationwide system of supply depots. Continuous increase in stores sales is shown in the following figures: 1955, $75.9 million; 1956, $96.4 million; 1957, $116.4 million; 1958, $120.7 million; 1959, $145.5 million; 1960 and 1961 estimated at $156 million and $171.7 million, respectively.

2. *Buying operations.*—Commodities are procured (a) to maintain inventories at stores depots to insure availability in advance of sales orders, and (*b*) for direct delivery to agencies. Total procurement for both purposes in 1961 is estimated at $364.8 million compared to $345 million in 1960 and actual purchases of $322.6 million in 1959.

3. *Inspection operations.*—Delivery of commodities of specified standards is assured by inspection at contractors' plants or supply depots, and by laboratory tests and analyses of samples prior to acceptance.

6. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources and applicable adjustments as reflected in the following table:

	1958 actual	*1959 actual*	*1960 estimate*	*1961 estimat*
Selected resources at end of year: Unpaid undelivered orders (appropriation balances obligated for goods and services on order not yet received)	$455,533	$658,918	$265,000	$230,000
Selected resources at start of year (−)		−455,533	−658,918	−265,000
Adjustment of selected resources reported at start of year		38,501		
Costs financed from obligations of other years, net (−)			393,918	35,000
Obligations incurred for costs of other years, net		241,886

Intragovernmental funds:

GENERAL SUPPLY FUND

This fund finances, on a reimbursable basis, a national supply depot system and a system of ordering supplies for direct delivery to agencies. Supplies or services are sold from the fund at cost to other agencies and the District of Columbia. Expenses for operating the fund for these purposes are provided for under the appropriation Expenses, supply distribution (5 U.S.C. 630g).

Also financed by the fund and reimbursed by the using agencies are operations of interagency motor equipment pools established in areas of high vehicle density.

Budget program.—The estimate for 1961 provides for continued expansion in sales of stores items to the military establishments under the program for progressively expanding use of these supply facilities by Department of Defense, and a slight increase in civilian agency sales. Activation of additional interagency motor equipment pools programed for 1961 is expected to produce substantial increase in sales of services.

Supply distribution—(a) Stores items.—Stocks of common-use commodities are purchased in volume and stored in supply depots for issue to Government agencies. Sales reached an all-time high of $167.6 million in 1959 and are estimated to increase to $180.5 million in 1960 and $202.7 million in 1961. An increasing amount of larger volume orders are being shipped direct from suppliers to customer agencies to reduce handling costs.

(*b*) *Nonstores items.*—Definite quantity requirements of commodities which are not susceptible to economical stocking in supply depots are purchased for direct shipment to customer agencies. Sales through the fund are expected to increase from $102.3 million in 1959 to $139.1 million in 1960 with a slight reduction to $132.6 million in 1961 due to an anticipated decrease in household and quarters furniture sales.

Motor pools.—Motor vehicle services are supplied to Government agencies through a system of interagency motor pools, still under development, to serve areas of high vehicle density. Sales are expected to increase from $11 million in 1959 to $14 million in 1960 and $16.7 million

PERSONAL PROPERTY ACTIVITIES—Continued

Intragovernmental funds—Continued

GENERAL SUPPLY FUND—Continued

in 1961 due to an increase in the number of motor pools in operation from 44 in 1959 to 58 in 1960 and 70 in 1961.

Rehabilitation and repair of furniture and equipment.—Furniture and equipment repair services, provided through commercial sources wherever feasible and economical, are expected to increase from $1.1 million in 1959 to $1.6 million in 1960 and $2 million in 1961.

Equipment rental.—Operating equipment, necessary to carry out the supply distribution activity, is acquired and charged on an accrual basis to the using activities. Collections from using activities are expected to remain at the 1959 level of $0.3 million in 1960 and 1961.

Undistributed.—Gain or losses on equipment disposals, adjustments between fiscal years, inventory writeoffs, and discounts are applied against operating costs. In 1959, the net operating income was $1.6 million.

Operating results and financial condition.—Current investment of the U.S. Government in the fund is $104.6 million of which $95.8 million represents direct appropriations, $5.7 million donated assets, $0.6 million capitalized surplus, and retained earnings of $2.5 million.

Additional donated assets arising from transfers of motor vehicles from other agencies upon establishment of interagency motor equipment pools will be capitalized in the fund.

Any operating surplus, as determined by General Accounting Office audit, must be returned to Treasury as miscellaneous receipts. Payments made in 1960 amount to $2,531,996.

Administrative Expenses, Foreign Aid Procurements

This fund was established to account for expenses incurred rendering foreign aid procurement to the International Cooperation Administration (22 U.S.C. 1782). Earnings credited to the fund are derived from mutually agreed upon advances based on program workload received. Beginning with 1961 provision is made to finance these expenses from appropriated funds.

Operations.—Program workload arises from purchase authorizations received from the International Cooperation Administration. Services are programed in 1961 at the 1960 level under the appropriations Expenses, supply distribution and Operating expenses, Transportation and Public Utilities Service.

Operating results.—Net earnings have been retained to insure financing of operating costs notwithstanding fluctuations in operating revenue. The unobligated balance will be returned to International Cooperation Administration in 1961 after obligations are liquidated.

"Operation and maintenance, Navy" (5 U.S.C. 630c)	467,000		
Appropriation (adjusted)	9,154,500	9,176,800	9,600,000

[1] Includes capital outlay as follows: June 30, 1959, $140,373; 1960, $123,300; 1961, $94,000.

This appropriation provides for basic operations of the General Services Administration which deal with management of the Government's archives and records, including custody and administration of permanent records in the National Archives and other noncurrent records in Federal records centers, assistance to records management programs of Government agencies, operation of presidential libraries, and filing and publication of Federal laws and regulations.

1. *Records management and centers.*—Records of Federal agencies which must be retained for a period of time, but are not needed for frequent reference, are brought into and administered in Federal records centers serving specified geographical areas. A national center at St. Louis administers records of former civilian employees of the Government and a locator file for individuals currently employed. In addition to civilian agencies already served, the centers now furnish records center facilities to the entire Naval Establishment, the Army and Air Force at the seat of government, and for selected Army and Air Force records throughout the world.

The increase in 1961 is to provide for additional workload in regional records centers to meet requirements of other agencies, as shown in the following table:

	1959 actual	*1960 estimate*	*1961 estimate*
Records administered (millions of cubic feet)	5.56	5.75	6.20
Unit cost per cubic foot of records administered	$0.598	$0.575	$0.573
Reference services, number (millions)	2.6	2.6	2.7

2. *Archives and related services.*—The permanently valuable records of the Government are selected, arranged, cataloged, preserved, and serviced in the Archives of the United States. Related services consist of (*a*) publication of the Federal Register and related compilations and the United States Statutes at Large, (*b*) preservation and servicing of historical materials in presidential libraries, and (*c*) servicing the National Historical Publications Commission.

The increase in 1961 is to provide for additional workload in the National Archives and the Office of the Federal Register, and to begin operating the Eisenhower Library early in calendar year 1961.

[1] Includes capital outlay as follows: June 30, 1959, $11,810; 1960, $32,062; 1961, $6,200.

This appropriation provides for improving management of transportation and public utility services in civilian agencies, protecting the Government's interests in cases before regulatory bodies, and furnishing services to civilian agencies in these specialized fields.

1. *Transportation services.*—Plans and procedures for improving transportation practices of civilian agencies are developed; reasonable rates are negotiated with carriers; interests of the Government in cases before regulatory bodies are protected; and rates, routing, and related services are supplied to civilian agencies.

2. *Public utilities management.*—As a central management function for all agencies, rate and economic studies are made, contracts negotiated, and the Government's interests as a user or consumer of utility services protected by participation in rate negotiations and litigations. Representation is also provided in rate proceedings involving communications common carriers relating to the semiautomatic ground environment system (SAGE) for early defense warning (50 U.S.C.A. 491).

6. *Relation of costs to obligations.*—Year-end balances of unpaid undelivered orders are as follows: 1958, $22,602; 1959, $52,216; 1960, $27,200; 1961, $28,000.

Appropriation (new obligational authority)	3,000,000		39,132,000

[1] Includes capital outlay as follows: June 30, 1959, $250,373; 1960, $62,000; 1961, $58,000.

The Defense Materials Service acquires and administers national stockpile inventories pursuant to the Strategic and Critical Materials Stock Piling Act, and has custody of the supplemental stockpile established by the Agricultural Trade Development and Assistance Act of 1954. Programs are administered in accordance with guidelines established by the Office of Civil and Defense Mobilization. This Service also administers the inventory of machine tools and industrial manufacturing equipment established under the National Industrial Reserve Act of 1948. The Department of Defense makes selections for the reserve and provides program guidance.

National stockpile objectives were reduced substantially in 1958 in line with the changed concept as to the probable duration of a national emergency from 5 years to 3 years. In arriving at remaining requirements to meet objectives, all U.S. Government inventories of strategic materials are applied. No reimbursable transfers from other programs are provided for.

The 1961 obligational program is $43,100,000, of which $39,132,000 will be new obligational authority. The balance is proposed to be financed by $300,000 reimbursement for Economy Act transactions relating to storage and handling activities, and $3,668,000 of unobligated balance forwarded from 1960. Total 1961 funds have been distributed to provide $7,221,000 for new material acquisition and required upgrading of existing material, $30,139,000 for inventory management and rotation, $2,792,000 for

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

national industrial equipment reserve operations and $2,948,000 for operating expenses.

The data below reflects in composite the extent to which national stockpile objectives as of June 30, 1959, are provided for: (*a*) from financing under the Strategic and Critical Materials Stock Piling Act, and (*b*) under all U.S. Government programs involving strategic materials.

The current basic objectives are valued at $2,330 million and maximum objectives at $4,454.6 million. June 30, 1959 prices have been used.

STATUS OF ACQUISITION

[In millions]

	1959 actual		*1960 estimate*		*1961 estimate*	
	National stockpile	*All Government programs*	*National stockpile*	*All Government programs*	*National stockpile*	*All Government programs*
Material in inventory and on order:						
In inventory:						
Basic objectives	$2,276.6	$2,311.4	$2,278.4	$2,315.3	$2,279.5	$2,317.0
Maximum objectives	4,118.3	4,394.4	4,125.4	4,414.9	4,127.1	4,420.1
On order:

Total:						
Basic objectives	2,277.2	2,317.0	2,278.4	2,318.2	2,279.5	2,319.2
Maximum objectives	4,124.8	4,419.9	4,126.0	4,421.1	4,127.1	4,422.3
Balance to be acquired:						
Basic objectives	52.8	13.0	51.6	11.8	50.5	10.8
Maximum objectives	329.8	34.7	328.6	33.5	327.5	32.3

1. *Acquisition of materials*—(*a*) *New materials.*—Direct acquisitions for the national stockpile are as follows:

	1959 actual	*1960 estimate*	*1961 estimate*
New materials	$4,335,293	$1,760,000	$1,325,000

Based on national stockpile objectives, and the proposed budget, status of acquisition of the 74 materials now on the national stockpile list is as follows:

NUMBER OF MATERIALS, 1959 ACTUAL

	National stockpile		*All Government programs*	
	Basic objectives	*Maximum objectives*	*Basic objectives*	*Maximum objectives*
Percent completed:				
100	64	50	69	62
90 to 99	1	6	1	3
75 to 89	1	7	3	6
50 to 74	3	6	1	3
25 to 49	4	3	--	--
Under 25	1	2	--	--
Total	74	74	74	74

NUMBER OF MATERIALS, 1961 ESTIMATE

Percent completed:				
100	65	51	71	63
90 to 99	--	6	2	4
75 to 89	1	6	1	4
50 to 74	3	6	--	3
25 to 49	4	3	--	--
Under 25	1	2	--	--
Total	74	74	74	74

(*b*) *Upgrading materials.*—Stockpiled material is being upgraded to a more usable form where current inventories in such form are not adequate to meet the initial surge of demand under abnormal conditions of intensive mobilization.

2. *Inventory management.*—This covers cost of maintaining the national stockpile and the U.S. supplemental stockpile of strategic materials in prime condition for use in case of emergency, including storage, special preservation, inventorying, rotation, and surplus disposal.

Acquisition cost of these inventories is as follows:

[In millions]

	1959 actual	*1961 estimate*
National stockpile	$6,216.2	$6,149.1
U.S. supplemental stockpile	604.1	863.9
Total national and supplemental	6,820.3	7,013.0

(*a*) *Rotation of materials.*—Inventories of perishable materials are rotated periodically to prevent deterioration. Materials required for stockpile objectives are replaced with fresh materials to maintain the quality of such inventories. Materials which will be so rotated in 1961 are cordage fibers and shellac. Comparative costs to the Government are as follows:

	1959 actual	*1960 estimate*	*1961 estimate*
Selling expense and replacement cost	$48,148,348	$14,065,340	$15,212,000
Receipts from sales	38,303,961	[1] 11,477,000	[1] 12,550,000
Net cost to Government	9,844,387	2,588,340	2,662,000

[1] Since under existing (1960) and proposed (1961) appropriation language these amounts must be placed in miscellaneous receipts, the full replacement cost must be included in the appropriation request.

Estimates for 1961 are submitted on the basis that materials excess to stockpile needs will be rotated without replacement. Such authority was provided in the Independent Offices Appropriation Act, 1960, and similar authority is being requested for 1961. Materials planned for rotation without replacement in 1961 are castor oil, feathers and down, rubber, silk waste and noils, and sperm oil. Gross receipts from sales are deposited into the Treasury as miscellaneous receipts. Comparative estimates are as follows:

	1960	*1961*
Gross receipts from sales	$37,517,000	$36,946,000
Selling expense financed from appropriated funds	1,286,660	1,242,000
Net income to Government	36,230,340	35,704,000

(*b*) *Storage of materials.*—Strategic materials were stored at 217 locations as of June 30, 1959, utilizing approximately 25 million square feet of closed storage, 55 million square feet of open storage, and 2 million barrels of tank storage. Total weight of the materials in national and supplemental stockpiles approximated 30.9 million short tons on June 30, 1959.

	1959 actual	*1960 estimate*	*1961 estimate*
Recurring storage costs	$9,889,755	$10,216,385	$10,072,827
Nonrecurring storage costs	3,771,110	2,759,087	2,405,150
Relocation transportation and handling	230,383	667,500	618,300
Disposal handling	2,858	49,028	288,723
Net cost	13,894,106	13,692,000	13,385,000
Reimbursable operations	598,610	310,000	300,000
Total cost or estimate	14,492,716	14,002,000	13,685,000

(*c*) *Physical inventorying.*—This program was initiated in 1957, and the first cycle is scheduled for completion by June 30, 1960. It is not planned to undertake a repeat cycle in 1961.

3. *National industrial equipment reserve.*—The reserve authorized by the National Industrial Reserve Act of 1948 consists entirely of machine tools and industrial manufacturing equipment selected by the Secretary of Defense from lists of such property declared excess to the needs of the three military departments and other executive agencies. Based on estimates of the Department of Defense, it is anticipated that for the next 2 years approximately 3,000 items will be selected annually for the reserve from excess declarations of production equipment compared to 1,678 for 1959.

Machine tools and other production equipment in the national industrial equipment reserve are intended primarily for the expansion in an emergency of defense supporting industries such as manufacturers of ball bearings, gears, tools and dies, and machine tools. Each of the military departments also maintains a reserve of production equipment for the current and mobilization requirements of direct military contractors and producers specifically designated as mobilization suppliers.

Estimates for the national industrial equipment reserve for 1961 are based on the selection of 3,000 items, the same

Federal Reserve Bank of St. Louis

DEFENSE MATERIALS ACTIVITIES—Continued

STRATEGIC AND CRITICAL MATERIALS—Continued

rate of selection estimated for 1960. A total of 1,678 items were selected for the reserve in 1959.

No expansion of facilities is planned for 1960 and 1961, since sufficient dehumidified space will be available to cover requirements for these years as well as the first 6 months of 1962.

4. *Operating expenses.*—Covers all expenses at the central and regional office levels for administering programs financed under this appropriation head including the Defense Materials Service and the integrated staff offices of General Services Administration. Decrease in workload in 1961 from 1960 will be limited. However, better supervision and increased economies due to mechanization and improved operation methods will permit an overall reduction of $250,000 in 1961.

6. *Relation of costs to obligations.*—Year-end balances of unpaid undelivered orders are as follows: 1958, $67-619,832; 1959, $43,918,197; 1960, $18,418,197; and 1961, $8,078,197.

Capital outlay:			
1. Operating program: Replacement of fixed assets	4,667	2,000	
Total program costs, funded	2,438,241	1,314,932	
4. Relation of costs to obligations: Costs financed from obligations of other years, net (−)	−374,816	−482,432	
Total program (obligations)	2,063,425	832,500	
Financing:			
Amounts becoming available: Revenue and receipts:			
Sales of fiber	2,597,227	1,228,000	
Proceeds from disposal of fixed assets	516,518	600,000	
Total amounts becoming available	3,113,745	1,828,000	
Unobligated balance brought forward	4,708,816	2,259,136	
Total amounts available	7,822,561	4,087,136	
Capital transfer (repayment of investment to Treasury) (−)	−3,500,000	−3,254,636	
Unobligated balance carried forward	−2,259,136		
Financing applied to program	2,063,425	832,500	

Production and sale of abaca fiber is authorized by the Abaca Production Act of 1950 (50 U.S.C. 541).

The revised stockpile planning policy, based on an emergency period of 3 years instead of 5 years, greatly reduced mobilization requirements for this item. On July 21, 1958, the Director of the Office of Civil and Defense Mobilization, requested that the General Services Administration terminate the program.

All efforts to sell the plantations on a going-concern basis were unsuccessful. Therefore, cultivations on 8,500 acres remaining at that time were butcher-harvested. Sale of remaining assets and termination of the program is contemplated by the end of 1960.

Net assets of $17,365,563 were transferred to the General Services Administration on July 1, 1954. Losses from operation and liquidation of the program are estimated at $10,610,927. The balance of $6,754,636 will be returned to the Treasury.

Relation of costs to obligations.—The relation of costs to obligations is derived from year-end balances of selected resources as reflected in the following table:

Selected resources at end of year:	*1958 actual*	*1959 actual*	*1960 estimate*	*1961 estimate*
Advances	$100

Guarantees are given on loans made by public or private financing institutions, including Federal Reserve banks, to facilitate performance of defense production contracts. Upon demand of lending institutions the Government is required to purchase the guaranteed percentage of the loan or the Government may elect to make a voluntary purchase of the guaranteed percentage. Advances from appropriations available for procurement may be made to this fund for its temporary use, although such action has

not been necessary to date. Net earnings are retained to meet possible future losses (50 U.S.C. App. 2091).

Guarantees totaling $26.7 million on two loans, representing the Government's maximum contingent liability as guarantor, are estimated to be in effect at the end of 1961, compared to $41.3 million and five loans on June 30, 1959. Retained earnings are anticipated to be $6.5 million at the end of 1961.

Federal Facilities Corporation was created June 30, 1954, under the provisions of the Rubber Act of 1948 and Executive Order 10539, primarily to administer the operations of the Government-owned synthetic rubber facilities until disposal of the properties to private interests was completed. In addition, the Corporation was designated to conduct the operations of the Government-owned tin smelter at Texas City, Tex.

Administration and jurisdiction of the Federal Facilities Corporation was transferred to the Administrator of General Services from the Secretary of the Treasury pursuant to Executive Order 10720, dated July 11, 1957. Assets transferred to General Services Administration represented a net investment of the Government of $29,443,475.

Synthetic rubber program.—In Executive Order 10678, dated September 20, 1956, the President named the Corporation as successor to the Rubber Producing Facilities Disposal Commission for the purpose of administering the contracts entered into in disposing of the synthetic rubber plants.

With the transfer of the remaining alcohol butadiene plant, Louisville, Ky., to the Public Buildings Service for disposal, and the contemplated disposal of the catalyst manufacturing equipment in Baltimore, Md., all in 1960, the Corporation's sole remaining function with respect to synthetic rubber is to administer the sale contracts. The loss to this fund indicated in the budget schedule is expected to be recovered to the Government, in part, on the disposal of the Louisville facility.

Tin program.—Public Law 608, approved June 22, 1956, provided for operation of the tin smelter until January 31, 1957. It also authorized and directed the Corporation to take steps immediately to sell or lease the tin-producing facilities. Sale of the facilities was completed February 15, 1957, and the Corporation's sole remaining function with respect to tin is to administer the sale contract.

Administrative expenses.—Administrative expenses consist of salary and related costs of an engineer engaged in the administration of sales contracts, together with rental costs of office space and payment to the Administrative operations fund for administrative support.

Relation of costs to obligations.—The relationship is derived from year-end balances of selected resources as reflected in the following table:

	1958 actual	*1959 actual*	*1960 estimate*	*1961 estimate*
Selected resources at end of year:				
Inventories for sale	$468,257	$467,620		
Supplies and deferred charges	804,301	803,765		
Unpaid undelivered orders	2,135			
Total selected resources at end of year	1,274,693	1,271,385		
Selected resources at start of year (−)		−1,274,693	−$1,271,385	
Costs financed from obligations of other years, net (−)		−3,308	−1,271,385	

Operating results.—During 1959, the Corporation paid into the Treasury $5 million from liquidation proceeds. This and other actions reduced the equity of the Treasury to $17.5 million.

Financing applied to program	63,073	68,050	55,000

Under the provisions of Reorganization Plan No. 1 of 1957, the Reconstruction Finance Corporation was abolished as a corporate entity and the remaining functions of the Smaller War Plants Corporation and the World War II assets program were transferred to the General Services Administration for final liquidation.

Operations.—It is anticipated that there will continue during 1961 the servicing of leases and conditional sales agreements covering 12 facilities, plus servicing of 47 other miscellaneous assets and 1 loan of the Smaller War Plants Corporation. Financial and legal servicing will also be required on 13 liabilities, plus approximately 80 cases in the hands of the Department of Justice under the complex food subsidy program.

Administrative expense requirements are estimated to continue at the 1960 level.

Operating results.—Proceeds from liquidation will be paid into miscellaneous receipts of the Treasury.

Financial, administrative, legal, legislative, and informational services and management supervision required to support all General Services Administration programs are provided by the integrated staff organization of General Services Administration. They are initially financed from an administrative operations fund into which the various benefiting appropriations and funds make deposits for their share of the obligations incurred. Of the amount deposited in the fund during a fiscal year, the total amount from appropriations made available to General Services

Working Capital Fund

A central blueprinting, photostating, duplicating, and distribution service is financed by the Working capital fund pending reimbursements (40 U.S.C. 293). The Chairman, Joint Committee on Printing, U.S. Congress, in letters dated August 21, 1959, and October 28, 1959, authorized the establishment of field printing plants at Boston, Mass., and at Atlanta, Ga., Kansas City, Mo., and Dallas, Tex., respectively. Due to delay in delivery of reproduction equipment, the printing plants authorized October 28, 1959, will not be in operation until after January 1, 1960.

Operating results.—Surplus earnings are deposited into miscellaneous receipts of the Treasury. Through June 30, 1959, a total of $52,267 has been deposited, and it is estimated that $10,472 and $5,000 will be deposited in 1960 and 1961, respectively.

Sources and Application of Funds (Operations)

	1959 actual	1960 estimate	1961 estimate

GENERAL PROVISIONS

The appropriate appropriation or fund available to the General Services Administration shall be credited with (1) cost of operation, protection, maintenance, upkeep, repair, and improvement, included as part of rentals received from Government corporations pursuant to law (40 U.S.C. 129); (2) reimbursements for services performed in respect to bonds and other obligations under the jurisdiction of the General Services Administration, issued by public authorities, States, or other public bodies, and such services in respect to such bonds or obligations as the Administrator deems necessary and in the public interest may, upon the request and at the expense of the issuing agencies, be provided from the appropriate foregoing appropriation; and (3) appropriations or funds available to other agencies, and transferred to the General Services Administration, in connection with property transferred to the General Services Administration pursuant to the Act of July 2, 1948 (50 U.S.C. 451ff), and such appropriations or funds may, with the approval of the Bureau of the Budget, be so transferred.

[Not to exceed $2,000,000 granted in the Independent Offices Appropriation Act, 1959, under the appropriation for "Construction, Federal Office Building Numbered Six, Washington, District of Columbia", may be transferred to "Construction, Public Buildings projects": *Provided,* That the latter appropriation] *Appropriations under the head "Construction, Public Buildings Projects"* shall be available for acquisition of buildings and sites thereof by purchase, condemnation or otherwise, including prepayment of purchase contracts: *Provided* [*further*], That the limits of cost applicable to projects authorized under said appropriation may be exceeded to the extent that savings are effected on other projects.

Not to exceed 10 per centum of any limitation on accrued expenditures herein made for the General Services Administration may be transferred to any other such limitation, but no such limitation shall be increased or decreased by more than 10 per centum as a result of such transfers.

Funds available to the General Services Administration shall be available for the hire of passenger motor vehicles.

No part of any money appropriated by this or any other Act for any agency of the executive branch of the Government shall be used during the current fiscal year for the purchase within the continental limits of the United States of any typewriting machines except in accordance with regulations issued pursuant to the provisions of the Federal Property and Administrative Services Act of 1949, as amended.

Not to exceed 2 per centum of any appropriation made available to the General Services Administration for the current fiscal year by this Act may be transferred to any other such appropriation, but no such appropriation shall be thereby increased more than 2 per centum: *Provided,* That such transfers shall apply only to operating expenses, and shall not exceed in the aggregate the amount of $2,000,000. (*Independent Offices Appropriation Act, 1960.*)

Appropriations available to any department or agency during the current fiscal year for necessary expenses, including maintenance or operating expenses, shall be available for reimbursement to the General Services Administration for those expenses of renovation and alteration of buildings and facilities which constitute public improvements, performed in accordance with the Public Buildings Act of 1959 (73 Stat. 479) or other applicable law.

HOUSING AND HOME FINANCE AGENCY

The Housing and Home Finance Agency is responsible for the administration of the Federal Government's housing and community development programs, including grants for urban renewal and public housing, home mortgage insurance, mortgage purchases, and loans for public facilities. A considerable share of the financial requirements each year is met by repayments of loans or other receipts from assets acquired in earlier years. Several of the most important programs have long lead-times between initial obligation or other reservation of funds and the eventual disbursements.

New obligational authority of $652 million is recommended for the Housing and Home Finance Agency for 1961, compared with an estimated $793 million for 1960. The primary reason for the decline is a $250 million decrease in college housing loans. This program is being terminated in favor of a proposed new program for college facilities to be administered by the Department of Health, Education, and Welfare. The reduction in new authority for college housing loans is partially offset by recommended increases of $150 million for special assistance functions of the Federal National Mortgage Association and $20 million for public facility loans to small communities. A reduction of $50 million in the urban renewal program reflects the provision in the Housing Act of 1959 for $350 million in capital grant authority for 1960 and $300 million for 1961.

Net expenditures are estimated to rise from $361 million in 1960 to $500 million in 1961. This increase results mainly because net expenditures in 1960 are being substantially reduced by the receipt of $385 million from the exchange of Federal National Mortgage Association mortgages and college housing loans for Treasury bonds. Aside from this transaction, expenditures for most Housing and Home Finance Agency programs will be lower in 1961 than in 1960.

New obligational authority and expenditures by function are shown in the table below:

OFFICE OF THE ADMINISTRATOR

Current authorizations:

SALARIES AND EXPENSES

For necessary expenses of the Office of the Administrator, including rent in the District of Columbia; services as authorized by section 15 of the Act of August 2, 1946 (5 U.S.C. 55a); purchase of newspapers and periodicals (not to exceed $3,000); and purchase of two passenger motor vehicles [(including one in the District of Columbia, to remain under the control of the Agency, at a purchase price of not to exceed $3,500) of which one shall be] for replacement only; [$9,052,000] *$10,637,000*: *Provided*, That necessary expenses of inspections and of providing representatives at the site of projects being planned or undertaken by local public agencies pursuant to title I of the Housing Act of 1949, as amended, projects financed through loans to educational institutions authorized by title IV of the Housing Act of 1950, as amended, and projects and facilities financed by loans to public agencies pursuant to title II of the Housing Amendments of 1955, as amended, shall be compensated by such agencies or institutions by the payment of fixed fees which in the aggregate will cover the costs of rendering such services, and expenses for such purpose shall be considered nonadministrative; and for the purpose of providing such inspections, the Administrator may utilize any agency and such agency may accept reimbursement or payment for such services from such institutions, or the Administrator, and shall credit such amounts to the appropriations or funds against which such charges have been made, but such nonadministrative expenses shall not exceed [$2,900,000] *$3,000,000*.

[For an additional amount for "Salaries and expenses", $290,000, of which $220,000 shall be available only upon the enactment into law of legislation continuing beyond September 30, 1959, the program authorized by title VI of the Housing Act of 1954, as amended (68 Stat. 590, 637).] *(5 U.S.C. 133y–16; 42 U.S.C. 1451; 12 U.S.C. 1749; Independent Offices Appropriation Act, 1960; Mutual Security Appropriation Act, 1960.)*

Appropriated 1960, [a] **$9,342,000** Estimate 1961, **$10,637,000**

[a] Includes $290,000 appropriated in Mutual Security Appropriation Act, 1960.

Program and Financing

Unobligated balance no longer available	148,409		
Appropriation (new obligational authority)	8,684,000	9,342,000	10,637,000

In addition to general supervision, the Administrator of the Agency is responsible for several activities administered by constituents of the Agency under delegation of authority. These include: Slum clearance and urban renewal and urban planning assistance which have been delegated to the Urban Renewal Commissioner; and the programs of public works planning, college housing loans, public facility loans, and certain liquidating activities which have been delegated to the Community Facilities Commissioner. The Administrator serves as Chairman of the Board of Directors of the Federal National Mortgage Association. He also serves as Chairman of the National Voluntary Mortgage Credit Extension Committee and provides staff assistance to the national committee and regional committees through which the voluntary home mortgage credit program operates.

The appropriation requested for 1961, $10,637,000, is an increase of $1,295,000 over 1960, reflecting primarily the need for increased field staff carrying out the urban renewal program.

2. *Consolidated compliance activities.*—A consolidated investigation and compliance staff serves the entire Agency.

3. *Voluntary home mortgage credit.*—Staff assistance is provided to the national and regional committees engaged in a program to facilitate the flow of funds for Federal Housing Administration insured and Veterans Administration guaranteed home mortgage loans into areas of shortage and for minority housing financing.

4. *Community disposition activities.*—For detail of this activity, see community disposal operations fund under Public enterprise funds.

5. *Community facilities programs.*—(*a*), (*b*), (*c*), and (*d*). For detail of these activities, see Public enterprise funds.

(*e*) *School construction.*—The Administrator, under a working agreement with the Commissioner of Education, performs certain technical services in connection with the program of school construction. Funds appropriated to the Office of Education are transferred to the Administrator for this purpose.

(*f*) *Project inspection and audit.*—Provision is made for construction progress inspections and financial audits of college housing and public facility projects. The costs of these activities are recovered by the Government through lees.

6. (*a*) *Urban renewal activities.*—For detail of activities for this program see Urban renewal fund under public enterprise funds.

(*b*) *Project inspection and audit.*—The cost of site representation and inspection and financial audit of slum clearance and urban renewal projects being planned or undertaken by local public agencies is recovered by the Government through fees.

8. *Relation of costs to obligations.*—Year-end balances of unpaid undelivered orders are as follows: 1958, $63,442; 1959, $14,955; 1960, $14,955; 1961, $14,955.

OFFICE OF THE ADMINISTRATOR—Continued

Current authorizations—Continued

LIMITATION ON USE OF NONADMINISTRATIVE FUNDS FROM COLLEGE HOUSING, PUBLIC FACILITY LOANS, AND URBAN RENEWAL

Program and Financing

	1959 actual	1960 estimate	1961 estimate
Program by activities:			
Payment to "Salaries and expenses" (total costs—obligations) (object class 07)	$2,021,414	$2,600,000	$3,000,000
Financing:			
Unobligated balance no longer available	478,586	300,000	
Limitation	2,500,000	2,900,000	3,000,000

These funds are used for activities described under Salaries and expenses, in paragraphs 5(*f*) and 6(*b*).

URBAN PLANNING GRANTS

For grants in accordance with the provisions of section 701 of the Housing Act of 1954, as amended, [$975,000] *$4,750,000.*

[For an additional amount for "Urban planning grants", $750,000: *Provided,* That this paragraph shall be effective only upon the enactment into law of legislation amending section 701 of the Housing Act of 1954, as amended, so as to authorize appropriation of the foregoing amount.] (*Independent Offices Appropriation Act, 1960; Mutual Security Appropriation Act, 1960.*)

Appropriated 1960, [a] **$1,725,000** Estimate 1961, **$4,750,000**

[a] Includes $750,000 appropriated in the Mutual Security Appropriation Act, 1960.

Program and Financing

	1959 actual	1960 estimate	1961 estimate
Program by activities:			
Grants to planning agencies (total costs—obligations) (object class 11)	$2,919,083	$2,100,000	$4,750,000
Financing:			
Unobligated balance brought forward:			
Reserved	−709,420	−750,825	−650,825
Unreserved	−3,662	−293,174	−18,174
Unobligated balance carried forward:			
Reserved	750,825	650,825	650,825
Unreserved	293,174	18,174	18,174
Appropriation (new obligational authority)	3,250,000	1,725,000	4,750,000

Section 701 of the Housing Act of 1954, as amended by the Housing Act of 1959, authorizes $20 million in matching grants to State, metropolitan, or regional planning areas to help finance surveys, land-use studies, and urban renewal plans in small cities and metropolitan or regional areas. An aggregate of $10,750,000 has been appropriated to date. The budget program calls for an appropriation of $4,750,000 in 1961 in furtherance of the program as expanded under the 1960 amendments, and anticipates a supplemental appropriation of $2 million for 1960 under Proposed for later transmission.

Permanent authorizations:

HOUSING STUDIES (LIQUIDATION OF CONTRACT AUTHORIZATION)

For payment of obligations incurred pursuant to the provisions of section 602 of the Housing Act of 1956 (12 U.S.C. 1701d–3) for housing investigations, research, and analysis, $600,000, to remain available until expended.

Estimate 1961, **$600,000**

Program and Financing

	1959 actual	1960 estimate	1961 estimate
Program by activities:			
Housing studies (total costs—obligations) (object class 07)			$600,000
Financing:			
Unobligated balance brought forward (contract autborization)	−$1,500,000	−$2,500,000	−2,500,000
Unobligated balance carried forward (contract authorization)	2,500,000	2,500,000	1,900,000
Contract authorization (new obligational authority)	1,000,000		

Status of Unfunded Contract Authorization

Unfunded balance at beginning of year	$1,500,000	$2,500,000	$2,500,000
Contract authorization (new)	1,000,000		
Unfunded balance at end of year	−2,500,000	−2,500,000	−1,900,000
Appropriation to liquidate contract authorization			600,000

The Housing Act of 1956 provided $2,500,000 in contract authorization for a program of housing studies with emphasis on problems of housing need, demand, and supply. The budget program calls for entering into contracts aggregating $600,000 in 1961 with an equivalent amount proposed for contract liquidation.

NOTE.—Expenditures from the following funds for 1960 are subject to the first paragraph of title II of the Independent Offices Appropriation Act, 1960. For 1961 this paragraph is shown in the independent offiees chapter, p. 147, preceding Federal Home Loan Bank Board.

Federal Reserve Bank of St. Louis

Under the Housing Act of 1950 as amended (12 U.S.C. 1749), the program provides long-term loans at low interest rates to finance three types of facilities: (*a*) housing accommodations for students and faculty at institutions of higher education; (*b*) related facilities, such as student unions and dining facilities at such institutions up to a maximum of $125 million; and (*c*) housing at nursing schools above the high school level and hospital-connected housing for interns up to a maximum of $50 million. The program is funded by a Treasury borrowing authorization of $1,175 million. Under the statutory interest formula—the higher of 2.75% or 0.25% above the average rate on the outstanding public debt—the loan rate for the current year is 3.125%.

Budget program.—The budget program contemplates reservation of $262.5 million for new loans during the current year. These reservations will be funded chiefly by the $250 million authorization to expend from public debt receipts provided by the Housing Act of 1959. No new fund reservations are contemplated during 1961. Some $129 million of reservations will remain for conversion to loan commitments in 1961, and construction and loan disbursement operations will not be concluded until subsequent fiscal years.

Because of the considerable time and expense involved in the planning of projects and completion of full loan applications, it has been the practice to reserve funds on approval of preliminary applications filed to determine eligibility and feasibility of the project. The net amount of program reservations issued has been used to control the volume of applications processed within the limitations. Reservations are converted into loan contracts after detailed planning, filing of a full loan application, and agency review. Program policies are designed to assure the soundness of loans without interfering with the applicant's operations as an educational institution. The following table shows the number of cases involved in principal workload stages:

	1959 actual	*1960 estimate*	*1961 estimate*
Preliminary applications:			
Received	252	168	---
Withdrawn or rejected	26	33	---
Reservations issued [1]	235	164	---
Full applications:			
Withdrawn or rejected	12	15	---
Loans approved	198	180	138
Reservations outstanding, and full applications on hand, close of year	179	138	---

[1] Includes 161 reservations contingent on the enactment of $200 million increase in the authorization recommended for 1959 in the 1960 budget.

After execution of the contracts, the institutions proceed with final plans and specifications, award of construction contracts, and preparation of bond indentures.

Financing.—Borrowers generally are able to finance much of the construction period with bank loans or other available funds, and the purchase of bonds is typically delayed until construction is well advanced. The projected purchases of $160 million, down from the current year estimate of $240 million due to program delays in 1959, are based on the following activity in terms of projects:

	1959 actual	*1960 estimate*	*1961 estimate*
Construction starts	232	167	198
Substantial completions	188	231	180

The $160 million in bond purchases, less $12 million in repayments and net operating receipts, account for the $148 million of budget expenditures. Receipts in 1960 include $50 million estimated to be obtained from the exchange of college housing loans for privately held Government bonds as well as $7.4 million in loan repayments.

Operating results and financial condition.—In 1961, for the first time, with decreasing administrative costs attributable to the cessation of new program activity, the program will show net earnings of some $140,000. The projected cumulative deficit of $3.5 million, including the effect of a $2.4 million allowance for losses on loans, should be eliminated in a few years, and accordingly no action is required to deal with it.

Financing applied to program	32,166,289	24,667,000	28,497,000

Loans to local governmental units for essential public works or facilities are made under the $100 million authorization provided by the Housing Amendments of 1955 (65 Stat. 635, 642). The budget assumes augmentation of this authority by $20 million in 1961. Loans are restricted to a maximum 40-year term and to qualified applicants unable to obtain funds from other sources at reasonable rates. The statute extends priority to (*a*) communities of less than 10,000 population and to (*b*) water, sewage, and gas-distribution systems.

Budget program.—Over 90% of the loans approved to date have been to finance water and sewer facilities. In 95% of the cases, the loans are to governmental units of less than 5,000 population. In general, these communities have little or no technical staff or experience in planning, construction, and operating public facilities, and many have never before sold a bond issue or acquired a performance rating for such undertakings. Loans made under the program average around $350,000. Subsequent to the Federal loan application or approval, some of the applicants have been able to obtain private financing, thus extending the usefulness of the program beyond the amounts of funds and number of cases disbursed by the Government.

The number of cases involved or anticipated in the 3-year period is as follows:

	1959 actual	*1960 estimate*	*1961 estimate*
Applications received	118	125	150
Processing:			
Cases disapproved or withdrawn	62	39	45
Gross approvals	87	90	95
Attrition after approval	15	15	10
Net approvals	72	75	85

Interest rates have been adjusted from time to time to meet the changes in the general trend of market interest rates. Initially established at 3.75% for general obligation bonds and 4.25% for revenue issues, the most recent level for 30-year maturities is 4.5% and 4.875% for the respective types of securities.

Financing.—The program has been financed with a Treasury borrowing authorization of $100 million. This authorization will be exhausted early in the budget year, and an increase of $20 million is requested for 1961. Legislation is being proposed authorizing increases as may be approved in subsequent appropriation acts. Recommended appropriation language is included above. The loan portfolio will be adequate as a basis for net interest earnings covering all administrative and other expenses in 1961.

Operating results.—Expenses include a $125,000 increase in the allowance for losses at the rate of 0.5% on loans disbursed, in addition to administrative expenses, loan servicing, and other costs. Net interest earnings of $789,000, from the approximate 1% margin between the average loan rates and the rates paid on Treasury borrowings, exceed all expenses; a net income of $122,000 is estimated for 1961. Thus the cumulative deficit accrued in the initial years of program activity can be reduced to $1,206,380 by the end of 1961 and will be further reduced in 1962 and subsequent years; accordingly, no action is necessary to make provision for this deficit.

Budget expenditures, principally determined by loan disbursements, are estimated at $24,299,000.

Financing applied to program	11,255,812	10,500,000	10,500,000

A program of interest-free advances to State and local public agencies for the planning of local public works was authorized by the Housing Act of 1954 (12 U.S.C. 1703, 40 U.S.C. 462) and revisions were made by the Housing Act of 1955 (12 U.S.C. 1426 note, 1464).

Budget program.—The program is intended to further a constant high level of essential public works construction by financing a reserve of well-planned projects. A construction potential of $1.6 billion has been created by the $26.2 million in advances approved up to the beginning of the current fiscal year, and the advances contemplated for the 1960 and 1961 years would raise the cumulative total of planned projects to approximately $3 billion. Actual and estimated program activity is shown in the following tabulation:

	1959 actual	*1960 estimate*	*1961 estimate*
Applications received	703	650	650
Processing:			
Cases disapproved or withdrawn	160	140	140
Gross approvals	515	515	515
Plans completed and approved	338	375	375
Projects started and advances repaid	105	150	150

In accordance with the statutory requirement that the proposed projects be ones scheduled for construction within a reasonable period, assurance is required that the construction start is intended within 5 years. Over 70% of the applications have come from local governmental units of less than 50,000 population, and over 75% of the projects are for water, sewer, and school construction.

Financing.— The program is financed by a revolving fund to which appropriations of $48 million are author-

PUBLIC WORKS PLANNING FUND—continued

ized, the fund to be subsequently maintained at this level in outstanding undisbursed balances and active advances. A total of $30 million has been appropriated through the beginning of the current fiscal year, and the fund had revolved to the extent of a cumulative $3.3 million in repayments as required when projects were placed under construction. Repayments are expected to reach $3.5 million per year in 1960 and 1961. An appropriation of $7 million accordingly will permit $10.5 million of approvals during the budget year.

Operating results.—Since the advances are interest-free, the program has no revenue except for minor interest charges on repayments which become delinquent. To provide for those few projects which will not be started due to changes in local conditions after the completion of planning, a reserve for losses has been built up equal to one-half of 1% of advances disbursed, and accretions to the reserve constitute the net operating loss on the statement of revenue, expense, and retained earnings.

Budget expenditures approximately equal the difference between the estimated $9.9 million in disbursements and $3.5 million in repayments.

Financing applied to program	1,633,672	1,104,340	553,000

The revolving fund for liquidating programs was established by provisions of the Independent Offices Appropriation Act, 1955, to provide for the orderly liquidation of a number of Housing and Home Finance Agency programs as well as any other programs that may be transferred by legislation.

Budget program.—The assets remaining for disposition at the end of 1959 consisted chiefly of mortgages accepted in financing real property sales. During 1960, in accordance with provisions of the Housing Act of 1959 (73 Stat. 670), $160 million of these mortgages are to be sold to Federal National Mortgage Association. The budget program centers on the accounting, servicing, collection, and related activities for the portfolio of loans and advances to local governments totaling $31.6 million of the $39 million of net assets remaining to be liquidated.

Financing.—Receipts, largely from principal repayments and interest on loans and advances, total $2.1 million in the budget year against expenses of $1.7 million.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

The sharp decline from the current year reflects the 1960 sale of mortgages to the Federal National Mortgage Association.

Financial condition.—The Government's original investment in the consolidated liquidating program totaled almost $2.5 billion. By the close of 1961 there will remain on hand about $37.9 million in assets to be liquidated. Repayments to Treasury of $180 million and $2 million estimated for 1960 and 1961 will bring the cumulative total repaid to $892 million.

The following schedule shows the Government's investment at the close of each year:

[In thousands]

	1959 actual	*1960 estimate*	*1961 estimate*

URBAN RENEWAL

The Housing Act of 1949, as amended by the Housing Act of 1954, authorizes Federal assistance to local governments for acquisition, clearance, and redevelopment of slums and blighted areas, and for conservation and rehabilitation of larger areas not requiring clearance action. Federal grants defray two-thirds of net project costs. Contract authority totaling $1.7 billion has been authorized and an additional $300 million becomes available under existing law on July 1, 1960. In addition, temporary project financing and long-term financing of land disposed of under lease agreements through direct or guaranteed loans is provided under Treasury borrowing authorization of $1 billion.

As a condition precedent to Federal assistance, a community is required to develop a workable program to eliminate blight and achieve a stable well-planned community with well-organized neighborhoods. The Administrator's certification of the workable program is made for 1 year, and annual recertification based on demonstrated satisfactory progress is required for continued eligibility for Federal assistance. The budget program projects the following activity:

	1959 actual	*1960 estimate*	*1961 estimate*
Workable program certifications	405	220	190
Recertifications	377	570	700

Since grants are nearly a complete measure of Government program costs, the program and financing schedule for grants and an outline of associated activities is presented first. This is followed by a similar schedule and discussion of the loan assistance portion of the program and the combined financial statements for the entire program.

[CAPITAL] GRANTS FOR SLUM CLEARANCE AND URBAN RENEWAL

For an additional amount for payment of [capital] grants as authorized by title I of the Housing Act of 1949, as amended (42 U.S.C. 1453, 1456), [$90,000,000] *$150,000,000.* (*Independent Offices Appropriation Act, 1960.*)

Status of Unfunded Contract Authorization

Unfunded balance at beginning of year	$1,093,000,000	$1,143,000,000	$1,353,000,000
Contract authorization (new)	100,000,000	350,000,000	300,000,000
Transferred to Proposed for later transmission		−50,000,000	
Unfunded balance at end of year	−1,143,000,000	−1,353,000,000	−1,503,000,000
Appropriation to liquidate contract authorization	50,000,000	90,000,000	150,000,000

Budget program.—Administrative action is taken to reserve or earmark contract authority for grants at the time approval is given for planning a project, or for a more general neighborhood planning program presaging a specific project application. This is done to assure availability of grant assistance after a considerable period of time and substantial community investment required for the urban renewal undertaking. Planning is, in the typical case, limited to 18 months. The following table reflects the number of projects in the planning stages:

	1959 actual	*1960 estimate*	*1961 estimate*
Planning approved	97	155	135
Planning terminated	23	25	20
Planning completed	94	110	110
Planning in process at year end	240	260	265

The execution phase occurs usually over a period of several years, during which Federal progress payments are made as substantial action is completed both with respect to the project itself and the provision of the local share of project cost. These progress payments permit the retirement of temporary project financing, thus achieving savings in project costs. It is estimated that during the budget year payment of Federal grants will total $150 million, as compared with $140 million (including a proposed $50 million supplemental appropriation) in the current year.

	1959 actual	*1960 estimate*	*1961 estimate*
Projects entering execution	96	110	110
Projects completed	16	25	40
Projects in execution at year end	355	440	510

In most instances, Federal grants are limited to two-thirds of net project costs. This is true of the usual renewal project, of special demonstration projects reporting on improved methods for dealing with the problems of urban blight, and also of the community renewal programs authorized by the Housing Act of 1959 for the identification of eligible areas, the extent of need and resources available for appropriate action, and the scheduling of local renewal activities. Federal grants defray full costs of relocating displaced families and businesses from urban renewal areas up to a maximum of $200 per family, or $3,000 per business establishment, and for restoration of loan fund losses from advances and accrued interest on terminated projects. The distribution of actual and estimated grant payments is shown in the schedule of Sources and application of funds.

Financing applied to program	426,276,717	119,354,239	129,044,000

Budget program.—The Treasury borrowing authority provides loan assistance in financing the planning and execution of urban renewal projects by the following types of commitments:

1. *Planning advances.*—The financing of planning costs directly associated with the project and repayable with interest from project funds.

2. *Temporary loans.*—Initial financing needs under the contract are generally met through direct short-term Federal loans. Thereafter the redevelopment agency generally relies upon private borrowings secured by pledge of the Federal loan commitment. Temporary loans are repaid from the proceeds of land sales and from local and Federal cash grants.

3. *Definitive loans.*—Commitments issued to secure private financing for the net value of redeveloped land which is leased rather than sold.

The loan commitments cover total expenditures by the local public agency in carrying out the project. However, experience demonstrates that only a minor portion of the Federal loan commitment is outstanding at any one time as a direct Federal loan, since project expenditures take place over several years and early borrowings are retired progressively from local and Federal grants and from the sale of land in portions of the project prepared for reuse. In addition, private financing obtained with a pledge of the Federal loan commitment as security is relied upon as the source of funds for approximately 75% of temporary loans and for all definitive loans. The following table shows the status of total Federal loan commitments at the end of each of the years covered by this budget.

[In thousands]

	1959 actual	*1960 estimate*	*1961 estimate*
Total Federal loans and loan commitments at end of year	$794,975	$1,100,948	$1,390,343
Federal loans and advances outstanding	70,593	126,394	144,944
Guaranteed non-Federal loans outstanding	273,449	425,721	645,566
Unutilized	450,933	548,833	599,833

Technical amendments to section 102(e) of the Housing Act of 1949 were enacted in 1959, redefining obligations against the Treasury borrowing authorization as the estimated amount of direct Federal loans to be made. Such obligations are estimated at (*a*) the face amount of planning advance commitments and (*b*) 25% of temporary loan commitments. Loan commitments and obligations in the 1960 and 1961 columns of the program and financing schedule show the adjustments occasioned by these amendments. Total Federal loan commitments of $463 million in 1961 are reflected in the schedule at the maximum probable Federal exposure of $123 million.

Financing.—Borrowing authority previously committed is restored through transactions of the following four types: (*a*) Repayment of planning advances; (*b*) repayment of temporary loans from project settlement funds which include proceeds from the sale of land, Federal grants, and local grants; (*c*) cancellation of temporary loan commitments by waivers permitting the use of project settlement funds as a substitute for additional loans; and (*d*) retirement of commitments as a result of the repayment of guaranteed non-Federal loans from project settlement funds.

The full amount of repayments of planning advances is included in the program and financing schedule for all 3 years. The repayment, cancellation, and retirement of temporary loans represents, however, under Public Law 86-372, restoration of amounts available for obligation equal to only 25% of gross recoveries change in commitments in 1960 and 1961 and is so shown on the program and financing statement. Repayments of Federal temporary loans from the proceeds of non-Federal guaranteed loans are not reflected on the program and financing statement since the reduction in Federal loan balances is offset by an increase in undisbursed commitments; such repayments, amounting to $44.2 million in 1959, $94.3 million in 1960, and $35 million in 1961, are shown in the statement of Sources and application of funds. An adjustment in the amount of $574.6 million is included for 1960 to reduce outstanding charges against the authority at the beginning of the year to accord with the provisions of Public Law 86-372. The amount of the adjustment represents 75% of outstanding temporary loans and undisbursed commitments and 100% of outstanding definitive loans and undisbursed commitments.

Operating results.—The small margin of interest earnings has been inadequate to balance actual losses on the unsecured planning advances for terminated projects and the continually accruing interest on Treasury borrowings used to finance the advances. This impairment of capital is being corrected, as authorized by the Housing Act of 1959, by use of the grant appropriation to repay the Treasury borrowing associated with these terminated projects, and the results are directly reflected in the 1960 surplus adjustment of $362,844 and the elimination of $2.5 million in unfunded reserves for losses, thus placing the loan fund temporarily in a surplus position.

Financing applied to program	15,726,933	5,232,775	941,245

The Atomic Energy Community Act of 1955 (69 Stat. 471) provides for the disposition of the Government-owned properties at Oak Ridge, Tenn., and Richland, Wash. The sales and financing functions under the act were transferred to the Housing and Home Finance Administrator by Executive Order 10657.

Budget program.—The initial inventory of property to be sold consisted of 11,866 parcels with a total appraised

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

value of $82.5 million. By the end of 1959, sales totaled 10,411 parcels having an appraised value of $67.2 million or 88% of the disposal inventory. Parcels remaining for disposal are apartments and vacant land requiring the preparation of extensive factual material for open offerings. It is estimated that all of the remaining inventory will be disposed of by the end of the budget year.

The following schedule shows disposition by general property type and community:

[Dollars in millions]

	Total		Actual through June 30, 1959		1960 estimate		1961 estimate	
	Number	Amount	Number	Amount	Number	Amount	Number	Amount
Oak Ridge, Tenn.:								
Residential	6,240	$28.8	5,390	$24.4	550	$4.2	300	$0.2
Nonresidential	280	2.8	215	2.5	65	.3	---	---
Subtotal	6,520	31.6	5,605	26.9	615	4.5	300	.2
Richland, Wash.:								
Residential	5,031	40.4	4,784	37.8	247	2.6	---	---
Nonresidential	335	10.5	22	2.5	226	5.1	87	2.9
Subtotal	5,366	50.9	4,806	40.3	473	7.7	87	2.9
Total	11,886	82.5	10,411	67.2	1,088	12.2	387	3.1

Sales proceeds in 1961 are estimated at $2.3 million in cash and $0.8 million in purchase money mortgages. An analysis of actual and estimated sales for the disposal program from inception is shown in the following schedule:

[In thousands]

	Total	Oak Ridge	Richland
Appraised value of properties sold	$82,520	$31,644	$50,876
Less: Statutory allowances:			
Priority—15%	9,233	3,365	5,868
Indemnity—10%	6,154	2,243	3,911
Tenant improvements	2,082	537	1,545
Total	17,469	6,145	11,324
Net value of properties sold	65,051	25,499	39,552
Improvement loans made	1,468	623	845
Sales proceeds	66,519	26,122	40,397
Represented by:			
Cash	33,494	14,793	18,701
Purchase money mortgages	32,363	10,674	21,689
3-year purchase contracts	662	655	7
Total	66,519	26,122	40,397

Operating results.—An estimated loss of $51,310 on realty sales in 1961 compares with profits of $592,925 during the 2 preceding years. The loss in 1961 reflects the lower marketability of the residual inventory. Sale of $3.2 million in mortgages is also projected, leaving a portfolio of $3.1 million conventional mortgages on uninsurable residences and commercial properties. Interest and other income exceeded administrative and other expenses for the first time in 1959, and more substantial earnings are estimated as expenses decline in the current and budget years. Cumulative net earnings are estimated at $0.8 million by the close of 1961.

Total repayment of Government investment will amount to $61 million with a payment of $7 million in 1961. The following table shows the cumulative results of the program at the close of the 3 years covered by the budget.

[In thousands]

	1959 actual	1960 estimate	1961 estimate

Financing applied to program			

The Administrator is authorized to borrow up to $500 million, plus such additional amounts as the President shall approve, from the Secretary of the Treasury in the furtherance of the programs enacted in the Federal Flood Insurance Act of 1956. No borrowings have been made or are proposed.

FEDERAL NATIONAL MORTGAGE ASSOCIATION

The Association, operating under the Federal National Mortgage Association Charter Act (12 U.S.C. 1716, et seq.), purchases, services, and sells residential mortgages that are insured by the Federal Housing Administration or guaranteed by the Veterans Administration. The Association's functions are carried out through three programs for which separate accountability is required by statute. These programs—secondary market operations, special assistance functions, and management and liquidating functions—are described in the following sections.

NOTE.—Expenditures from the following funds for 1960 are subject to the first paragraph of title II of the Independent Offices Appropriation Act, 1960. For 1961 this paragraph is shown in the independent offices chapter, p. 147, preceding Federal Home Loan Bank Board.

The secondary market operations of the Federal National Mortgage Association were authorized by the Housing Act of 1954 to provide limited liquidity for Government insured and guaranteed mortgages and to improve the distribution of investment capital available for home mortgage financing. This assistance to the secondary market for home mortgages is provided by the purchase and sale of mortgages insured by the Federal Housing Administration or guaranteed by the Veterans Administration on or after August 2, 1954, that are of such quality, type, and class as meet generally the purchase standards imposed by private institutional mortgage investors. Purchases and sales may be made only at such prices and on such terms as will reasonably prevent excessive use of the Association's facilities and permit the Association to operate on a fully self-supporting basis.

The authorizing statute contemplates that the secondary market operations will ultimately be completely owned and financed by private participants. Accordingly, these operations are treated in the budget as a trust enterprise and the financial statements relating thereto appear in part III of this document.

The secondary market operations were initially capitalized by the issuance of $92.8 million of Federal National

Federal Reserve Bank of St. Louis

Mortgage Association preferred stock to the Secretary of the Treasury. Subsequently, increased preferred stock subscriptions by the Secretary of the Treasury, amounting to $50 million (Public Law 85–10, approved March 27, 1957) and $65 million (Public Law 85–104, approved July 12, 1957) were authorized, of which $50 million was subscribed in 1957. The preferred stock will be retired as rapidly as feasible and, in the meantime, the Association will pay dividends on the utilized portion thereof to the Treasury at rates determined by the Secretary of the Treasury. Private capitalization for these operations is accumulated pursuant to a statutory requirement which provides that sellers of mortgages to the Association must subscribe to common stock in an amount not less than 1% and not more than 2% of the unpaid principal amounts of the mortgages involved as determined by the Association from time to time, taking into consideration conditions in the mortgage market and the general economy.

Recommendations for legislation to transfer ownership of the Association to private owners of capital stock must be submitted to the Congress as promptly as practicable after all the Treasury-held preferred stock has been retired.

The Association is authorized to finance its secondary market operations through borrowing from the public on the security of nonguaranteed debentures. Such obligations may not exceed the lesser of: (*a*) ten times the sum of the capital and surplus applicable to these operations or (*b*) the sum of assets free of liens or incumbrances, representing cash, mortgages, obligations of the United States or guaranteed thereby, or obligations which are lawful investments for fiduciary, trust, or public funds. The Secretary of the Treasury, so long as any of the preferred stock is outstanding, is authorized to purchase such debentures in an amount not exceeding $2.25 billion outstanding at any one time.

Budget program.—Mortgage purchases are estimated in considerably larger volume in 1960 and 1961 than in 1959. During the same period, only a limited volume of mortgages is estimated to be sold. This reflects the limited supply of funds which are estimated to be available for long-term investment and anticipated continuation of relatively high interest rates. Actual and estimated program levels are shown in the following table:

[In millions]

	1959 actual	*1960 estimate*	*1961 estimate*
Mortgage purchases (net of discount)	$302.1	$1,047.0	$975.0
Mortgage sales (net of discount)	72.3	4.8	4.8
Repayments and other credits	52.7	67.0	86.2
Balance in portfolio at end of year	1,511.3	2,486.5	3,370.6

The prices at which mortgages are purchased under these operations are established by the Association within the range of market prices for the particular class of mortgages involved. In establishing its purchase prices, the Association follows the practices of private institutions and varies such prices by geographic factors, interest rate of the loan, and the ratio of equity to value of the subject property. The budget assumes that mortgages will be purchased during 1960 and 1961 at average discounts of 4.8 and 2.5 points, respectively, below their face value, and that sales will be made at an average price of 0.5 points above the purchase price.

Financing.—The projected mortgage purchase program will require substantial additional borrowing by the Association in 1960 and 1961. Outstanding borrowings, which totaled $1,331.6 million at the end of 1959, are estimated to increase by $938.4 million in 1960 and by an additional $800 million in 1961. The additional loan funds, as well as the funds necessary to repay Treasury in 1960 the $41.5 million in loans outstanding at the end of 1959, are estimated to be provided through the sale of the Association's debentures to the public. Substantial interim Treasury borrowing will be required, but will be repaid within the same fiscal year from the proceeds from the sale of debentures. The increase in outstanding borrowing will make necessary the further purchase by Treasury of $50 million of the Association's preferred stock (authorized by Public Law 85–104) in order to maintain the ratio of borrowing to equity within the limits specified by the statute. Other financing will be obtained from the sale and repayment of mortgages, earnings, and mandatory subscriptions of common stock by sellers of mortgages to the Association.

The amounts of the principal financing balances outstanding at year end are summarized in the following table:

[In millions]

	1959 actual	*1960 estimate*	*1961 estimate*
Private financing:			
Nonguaranteed debentures	$1,290.1	$2,270.0	$3,070.0
Common stock subscribed	42.9	65.8	86.7
Treasury financing:			
Borrowing from Treasury	41.5	−41.5	----
Preferred stock	142.8	142.8	192.8

Operating results.—Operations are reflected in budget expenditures only to the extent of Treasury financing.

Financing applied to program	898,261,573	424,159,468	537,570,000

Federal National Mortgage Association is authorized to provide special assistance to the extent that the President has determined that it is in the public interest for the financing of (*a*) selected types of home mortgages (pending establishment of their marketability) originated under special housing programs designed to provide housing of acceptable standards at full economic costs for segments of the national population which are unable to obtain adequate housing under established home financing programs, and (*b*) home mortgages generally as a means of retarding or stopping a decline in mortgage lending and home building which threatens materially the stability of a high-level national economy. The Association is authorized, for these purposes, to make commitments to purchase and to purchase mortgages up to $950 million outstanding at any one time. An additional authorization in the amount of $150 million is needed for these programs during 1961.

In addition to the special programs the Association may undertake pursuant to specific direction of the President, the Association, by express legislation, is also authorized to enter into commitments to purchase and to purchase mortgages on cooperative housing insured under section 213 of the National Housing Act, as amended, up to a limit of $225 million outstanding at any one time; to make commitments to purchase and to purchase mortgages on armed services family housing insured under title VIII of that act, up to a limit of $500 million outstanding at any one time; and, within a limitation of $1 billion outstanding at any one time, to make commitments to purchase and to purchase Federal Housing Administration insured and Veterans Administration guaranteed mortgages of $13,500 or less covering low and moderate priced housing on which construction had not commenced at the time application was made for Federal National Mortgage Association's commitment.

The Association is required by Public Law 85–104, to pay not less than 100% of the unpaid balance for special assistance mortgages purchased under contracts entered into during the period between July 12, 1957, and August 7, 1958. This legislation was not reenacted in 1958 and subsequently was rescinded (Public Law 86–372). Commitments to purchase mortgages and immediate purchases are currently made at less than par.

Federal National Mortgage Association special assistance functions are financed principally by Treasury borrowings, and all benefits and burdens of the program inure solely to the Secretary of the Treasury.

Budget program.—During 1960 and 1961, Federal National Mortgage Association will provide special assistance, under Presidential determination, for (*a*) housing in or supporting urban renewal areas; (*b*) housing for the elderly; (*c*) housing in Alaska and Guam; and (*d*) disaster housing. In addition, cooperative and armed services family housing will receive limited assistance under the special authority cited above.

Mortgage purchase commitments under the special assistance functions are estimated to decline from $877.1 million in 1959 to $359.4 million in 1960, and increase to $456.4 million in 1961. The reduction in commitments is due primarily to the completion in 1959 of commitment activity under the $1 billion special authorization for the purchase of low-cost housing mortgages enacted in April 1958 as an antirecession measure.

However, commitments for mortgages on housing in urban renewal areas and for the relocation of displaced families are estimated to increase from $209.1 million in 1959 to $257.4 million in 1960 and to $327.4 million in 1961. This reflects (*a*) the rapid growth in the amount of land becoming available for redevelopment under the urban renewal program and (*b*) the increasing displacement of families by urban renewal, highway, and other public improvement projects. The estimates assume, however, that, during this period, an increasing proportion of the financing requirements for these mortgages will be obtained from private investors.

Commitments for mortgages originated under the relatively new program for housing for the elderly will materially increase in 1960 and 1961 over 1959.

The purchase of mortgages, which lags well behind commitments, is shown in the following table:

[In millions]

	1959 actual	*1960 estimate*	*1961 estimate*
Purchases:			
1. Urban renewal and relocation housing	$81.8	$145.0	$225.0
2. Housing for the elderly	7.3	20.0	30.0
3. Alaska, Guam, and disaster areas	10.8	7.0	8.0
4. Armed services housing	265.7	120.0	25.0
5. Cooperative housing	43.8	50.0	30.0
6. Low-cost housing	656.7	200.0	------
Total purchases	1,066.1	542.0	318.0
Less purchase discount	1.2	6.0	4.8
Total purchases (net)	1,064.9	536.0	313.2

Mortgage sales which amounted to $8.9 million in 1959 are now estimated at $5 million for each of the years 1960 and 1961.

Financing.—The budget estimates for the mortgage purchase programs, under Presidential determination, require an increase in authorization to expend from public debt receipts of $150 million in 1961. Appropriation

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

language, as recommended above, is dependent upon the enactment of proposed legislation providing for increases in the authorization by annual appropriation acts.

Net borrowings from the Treasury were $1,015.8 million in 1959 and are estimated at $462 million in 1960 and $230 million in 1961, thereby increasing the interest-bearing investment of the Government to $1,861.6 million at the end of 1961.

Operating results.—Previously, earnings were retained and paid into miscellaneous receipts of the Treasury following the year earned. A payment of $188,822 was made in 1957; another payment of $2,444,739 was made in 1958. In order to protect the Association against losses inherent in a portfolio of its present size, earnings will be retained and accumulated. The following table shows the cumulative amounts at the end of each fiscal year covered by these estimates:

RETAINED EARNINGS (CUMULATIVE)

1958 actual	$7,237,937
1959 actual	24,033,600
1960 estimate	34,375,600

Unobligated balance no longer available (authorization to expend from public debt receipts)	−215,169,173	−366,481,000	−175,000,000
Financing applied to program	68,404,222	222,068,737	64,253,000

The Association, in its management and liquidating functions, is required by law to manage and liquidate its portfolio of mortgages acquired under contracts made before November 1, 1954, or subsequently, from the Housing and Home Finance Agency or its constituent agencies (Public Law 86-372). Such liquidation is to be in an orderly manner, with a minimum of adverse effect upon the home mortgage market and minimum loss to the Federal Government. Liquidation of the portfolio is accomplished through regular repayments of mortgages according to their amortization schedules, sales of mortgages as rapidly as they can be absorbed by private investors without serious disruption of normal market conditions, and as the result of other principal credits arising from prepayments and foreclosures.

The initial mortgage purchasing phase of this activity has been completed and normally only the management and ultimate liquidation of the portfolio would need to be completed. However, additional mortgages may be acquired for this portfolio from time to time pursuant to the provisions of Public Law 86-372.

Budget program.—There will be no mortgages purchased under commitments made prior to November 1, 1954, for this portfolio during the period covered by these estimates. That purchasing program was completed during 1958. However, it is estimated that $160 million in mortgages will be acquired for liquidation from the Public Housing Administration during 1960. No such acquisition is estimated for 1961.

During 1960, receipts of $335 million are estimated to materialize from an exchange of mortgages for privately held U.S. Government bonds. No sales or exchanges are presently contemplated for 1961.

Liquidation of mortgage principal resulting from repayments, prepayments, foreclosures, and transfers in lieu of foreclosures is estimated to amount to $170 million in 1960 and $165 million in 1961, and will reduce the portfolio by those amounts.

Financing.—As of June 30, 1959, outstanding notes of the management and liquidating functions held by private investors amounted to $797.4 million. These nonguaranteed notes were issued to the public in January 1958 and will mature in August 1960. These estimates contemplate the renewal of the full amount of notes now held by private investors.

Net repayments of Treasury borrowings during the period covered by this budget were $209 million in 1959 and are estimated at $366 and $175 million in 1960 and 1961, respectively.

Operating results.—Estimated net income of $5.1 million in 1961 will be substantially below the estimate of $22 million for 1960. This results from the nonrecurring premium in 1960 on the exchange of bonds for mortgages, the reduction in portfolio and the higher interest rates estimated to be paid by the Association in 1961.

All benefits and burdens of the management and liquidating functions inure solely to the Secretary of the Treasury. Retained earnings reserved for losses and contingencies at the end of 1959 amounted to $131.3 million and are estimated at $153.3 and $158.4 million, respectively, for 1960 and 1961.

POSITION WITH RESPECT TO MORTGAGE PURCHASE AUTHORITY

	1959 actual	*1960 estimate*	*1961 estimate*
Mortgage purchase authority [1]	$2,044,784,735	$1,699,784,735	$1,534,784,735
Charges against authority: Mortgages outstanding at end of year	2,044,784,735	1,699,784,735	1,534,784,735
Unused authority			

[1] On and after Nov. 1, 1954, pursuant to Public Law 560, the Federal National Mortgage Association's mortgage purchase authority is the total of its mortgage portfolio and its outstanding commitment contracts in the management and liquidating functions.

The Federal Housing Administration, created by the National Housing Act of 1934, is a noncorporate business-type agency made subject to the Government Corporation Control Act by the Housing Act of 1948. The principal purposes of the Administration are to stabilize the mortgage market and to improve home financing practices, housing standards and conditions through the insurance of loans and investments to finance the production, purchase, repair, and improvement of residential structures. As of June 30, 1959, a total of $57 billion of insurance had been written, of which $28 billion was outstanding.

The Administration conducts a wide variety of programs through 11 separate insurance funds, the most important of which is the mutual mortgage insurance fund for the insurance of mortgages on 1- to 4-family dwellings under section 203 of the National Housing Act. Other funds cover the insurance of home repair and improvement loans, insurance of mortgages on multifamily housing including cooperative housing, insurance of mortgages on housing for urban renewal, armed services, and other special purposes, and insurance of equity investments in rental housing.

The mutual mortgage insurance fund differs from other insurance funds in that mortgagors receive participation payments from any excess of fees and premiums paid over losses and expenses allocable to the fund. Through June 30, 1959, these participation payments to homeowners have amounted to $94.1 million.

Federal Reserve Bank of St. Louis

All of the Administration's insurance programs are revenue-producing. Revenue is derived from insurance premiums, appraisal and miscellaneous fees, and interest on investments in Government securities.

Mortgages and properties	8,452	8,164	7,496
Number of units	39,786	40,005	39,712
Amount	$279.5	$279.8	$275.2
Costs and income:			
Costs:			
Operating costs	$64.5	$66.6	$70.1
Capital outlay	$69.4	$75.8	$67.3
Total program costs	$133.9	$142.4	$137.4
Income:			
Fees and premiums	$165.6	$189.2	$214.1
Other	$25.1	$27.3	$31.4
Total income	$190.7	$216.5	$245.5
Excess income over program costs	$56.8	$74.1	$108.1

Budget program.—The Federal Housing Administration budget for 1961 is designed to carry out the Administration's part of the President's housing program and, in doing so, to function at a level adequate to meet its legally stated purposes of exerting a stabilizing influence in home financing and of fostering quality and cost improvement in home building.

Summary of individual insurance programs.—A summary statement, with estimated workload, is provided below for each of the major insurance programs.

1. *Home modernization and repair insurance program (title I, sec. 2).*—Financial institutions insured against losses are required to provide 10% coinsurance on loans for the alteration, repair, and improvement of residential properties. Loans insured are characteristically short-term, unsecured notes currently averaging around $900. Estimates are set forth below:

	1959 actual	*1960 estimate*	*1961 estimate*
Initiation: Loans insured	1,100,658	1,250,000	1,250,000
Servicing: Insurance in force (number of notes), end of year	2,521,436	3,072,100	3,267,541
Liquidation—acquired security or collateral on hand:			
Defaulted loans	102,404	101,513	106,379
Amount (in millions)	$44.6	$44.3	$46.4

2. *Basic 1–4 family mortgage insurance program (secs. 203 and 222).*—Mortgages are insured on 1- to 4-family structures up to present regulatory limits of 97% of the first $13,500 of appraised value, 85% of the next $2,500 of value, and 70% of value in excess of $16,000, with a maximum mortgage amount of $22,500.

A special and simplified variation of this major program, launched in 1958, to bring the advantages of FHA mortgage insurance to communities remote from FHA insuring offices, is still being operated on an experimental basis, with some expansion anticipated in the budget year. Under this variation, local lenders approved by the Federal Housing Commissioner are authorized to process applications for section 203 mortgage insurance, securing necessary appraisals and inspections through FHA-approved fee appraisers and inspectors.

Servicemen's housing mortgage insurance is another variation of the program under section 222 of the act, which authorizes the insurance of mortgages to finance the purchase of single-family homes by servicemen who have been in the Armed Forces for a minimum of 2 years.

Estimates in the basic 1- to 4-family mortgage insurance programs are as follows:

	1959 actual	*1960 estimate*	*1961 estimate*
Initiation:			
Unit applications examined:			
Section 203	914,277	754,200	788,400
Section 222	23,146	29,900	29,900
Units insured:			
Section 203	456,903	432,300	437,800
Section 222	20,602	11,300	29,900
Inspections:			
Section 203	1,456,929	1,314,000	1,339,200
Section 222	14,379	59,100	65,100
Servicing:			
Insurance contracts in force, end of year:			
Section 203	2,342,370	2,607,492	2,875,192
Section 222	54,311	64,100	92,300
Section 8	33,027	31,200	29,100
Real estate acquisition, maintenance, and sales:			
Properties acquired (units):			
Section 203	1,582	1,600	1,600
Section 222	23	100	75
Section 8	171	150	125
Properties sold (units):			
Section 203	941	1,500	1,500
Section 222	14	20	25
Section 8	160	180	180
Properties on hand, end of year (units):			
Section 203	2,392	2,492	2,592
Section 222	16	96	146
Section 8	144	114	59

3. *Basic multifamily mortgage insurance program (secs. 207, 213, 231, and 232).*—Mortgages are insured on new or existing multifamily housing projects (under sec. 207), with special provisions for mortgage insurance on certain projects undertaken by qualified cooperative groups (under sec. 213), on housing for occupancy by elderly persons (under sec. 231) and on nursing homes (under sec. 232). Estimates are as follows:

	1959 actual	*1960 estimate*	*1961 estimate*
Initiation:			
Unit applications examined:			
Sections 207, 231, and 232	20,956	43,000	40,900
Section 213	8,556	13,700	13,400
Units insured:			
Sections 207, 231, and 232	17,833	27,700	36,400
Section 213	8,651	10,300	12,200
Inspections:			
Sections 207, 231, and 232	13,098	21,950	30,300
Section 213:			
Home mortgages (dwelling units)	1,011	1,400	1,700
Project mortgages (average under construction)	3,712	5,000	6,000
Servicing:			
Insurance contracts in force, end of year:			
Sections 207, 231, and 232	577	823	1,183
Section 213	22,932	24,427	28,125
Real estate acquisitions, maintenance, and sales:			
Properties and mortgages acquired (units):			
Section 207	810	360	480
Section 213	80	100	150
Properties and mortgages sold (units):			
Section 207	82	284	112
Section 213	32	137	60
Properties and mortgages on hand, end of year (units):			
Section 207	2,096	2,172	2,540
Section 213	242	205	295

4. *Urban renewal, rehabilitation and relocation mortgage insurance program (secs. 220 and 221).*—Section 220 provides insurance of mortgage financing for the construction or rehabilitation of housing in designated urban renewal areas. Section 221 provides mortgage insurance for housing built or rehabilitated for persons displaced by governmental action in communities having approved urban renewal plans.

5. *Armed services mortgage insurance program (title VIII).*—Housing is provided under title VIII, through the use of private capital under insured mortgages, for civilian and military personnel of the armed services. Government-owned public quarters for military personnel and their families are financed under section 803; sales housing for personnel at research and development installations under section 809; and rental housing for military and civilian personnel under section 810. Data on section 803 also reflect settlement activity under an expired program of rental housing for military families.

6. *Emergency and other special incentive programs.*—The special war housing mortgage insurance provisions of title VI (secs. 603 and 608–611), were continued until April 1948 for home mortgages and until March 1950 for rental-project mortgages to provide veterans' emergency housing. Other special incentive programs were added later. These included insurance of (*a*) loans for the manufacture of housing by industrial processes and short-term notes incident to the sale of such housing; (*b*) mortgages executed in connection with the sale by the Government of certain federally owned housing; and (*c*) short-term loans to finance the construction, by modern site-fabrication methods, of groups of 25 or more single-family dwellings, as well as for insured long-term financing of properties so constructed. Insurance authority under title VI has terminated. The Housing Act of 1954 transferred to title II the authority to insure mortgages to finance the sale of Government-owned housing.

Title VII offers yield insurance for rental housing equity investments (insurance of an annual return of 2.75% and a minimum annual amortization of 2%) in rental housing for families of moderate income. No investments have, as yet, been insured under this title.

Title IX provided mortgage insurance for programed defense housing, covering both 1- to 4-family and multifamily housing within the limits of programed housing needs in defense areas designated by the President. The authorization to insure under this title has terminated. Only servicing and settlement work remains with respect to insurance under this title.

Estimates are as follows:

Title VI	24,182	24,253	24,036
Title IX	7,503	6,823	5,973

Summary of operating expense estimates.—FHA operating expenses (administrative and nonadministrative) are paid out of operating income, subject to limitation.

It is expected that a total operating expense authorization of $58,800,000 will be necessary for 1961, of which $8,800,000 will be administrative and $50,000,000 nonadministrative. The 1960 estimate is $56,100,000, of which $8,100,000 is administrative and $48,000,000 nonadministrative.

Relation of costs to obligations.—The relationship of costs to obligations is derived by year-end balances of unpaid undelivered orders as follows: 1958, $617,580; 1959, $237,071; 1960, $237,071; and 1961, $237,071.

Financing.—All FHA operations are financed out of revenue. Mortgage insurance claims are met by the issuance of debentures that are subsequently redeemed out of insurance revenue and the proceeds of the sale of acquired properties and mortgages. In 1959, a total of $71,958,750 in debentures were issued. Debentures to be issued are estimated at $71,084,250 in 1960 and $54,415,350 in 1961. Debentures were retired in 1959 in the amount of $62,094,900. Retirement of debentures in 1960 and 1961, respectively, are estimated at $65,644,400 and $63,794,200.

Operating results and retained earnings.—Operations in 1959 resulted in a net income of $125,978,190. This income was distributed as follows: $50,060,568 to the general surplus account and $31,500,000 to the participating-reserve account of the mutual mortgage insurance fund, which were established pursuant to Public Law 83–560, and $44,417,622 to the general insurance reserves under the nonmutual insurance programs.

Net income is expected to be $140,353,052 in 1960 and $165,825,300 in 1961. In the 2-year period it is estimated that income totaling $154,486,304 will be added to the general surplus account and $67,000,000 to the participating reserve account of the mutual mortgage insurance fund, while an estimated $84,692,048 of income will be placed in the insurance reserves under nonmutual funds.

Insurance reserves totaling $643,335,694 on June 30, 1958, increased to $757,912,171 during 1959 and are expected to reach $886,851,142 by June 30, 1960, and $1,040,676,442 by June 30, 1961. These reserves are required to meet future insurance losses and expenses.

Insurance authority.—Public Law 84–1020, approved August 7, 1956, amended the general mortgage insurance authorization under section 217. This amendment provides that the aggregate amount of principal obligations of all mortgages that may be insured and outstanding at any one time under insurance contracts or commitments to insure pursuant to any section or title (except sec. 2 and sec. 803) shall not exceed the sum of (*a*) the out-

Federal Reserve Bank of St. Louis

standing principal balances, as of July 1, 1956, of all insured mortgages (without taking account of prepayments or delinquencies), (*b*) the principal amount of all outstanding commitments to insure as of July 1, 1956, and (*c*) $15 billion. (The sec. 217 insurance authorization was increased $8 billion on Sept. 23, 1959, Public Law 86–372.) This general insurance authorization applies to all mortgage insurance programs except new insurance written under title VIII pursuant to commitments issued on or after August 11, 1955.

The present authorization under section 217 will be sufficient to carry the programs through the fiscal year 1960 and part of 1961. While the rate of usage of the mortgage insurance authorization is exceedingly difficult to forecast, the present authorization now appears adequate to meet demands for mortgage insurance until the next Congress is in session.

Section 803(a) of the act as amended by Public Law 84–345 and Public Law 84–1020 created a separate mortgage insurance authorization with regard to all new insurance written under title VIII pursuant to commitments issued on or after August 11, 1955, including both the new armed services housing program and the extended military housing program. This insurance authorization provides that the aggregate amount of principal obligations of all mortgages insured under this program shall not exceed $2.3 billion and that the limitation in section 217 shall not apply to this program. This amount will be adequate to carry the program through both 1960 and 1961 as shown in the tabulation below.

The title I (sec. 2) authorization of $1,750 million for repair and improvement insurance will be sufficient to carry this program through September 1960, the expiration date under present legislation. If the program is extended, as is expected, increased authorization will be required.

POSITION WITH RESPECT TO INSURANCE AUTHORITY

	1959 actual	*1960 estimate*	*1961 estimate*
Repair and improvement loan insurance:			
Insurance authority	$1,750,000,000	$1,750,000,000	$1,750,000,000
Charges against insurance authority:			
Insurance in force	1,322,947,117	1,653,146,760	1,761,553,997
Loan reports in process	71,280,852	72,000,000	72,000,000
Total charges against authority	[1] 1,394,227,969	[1] 1,725,146,760	[1] 1,833,553,997
Unused authority	355,772,031	24,853,240	----------
Additional authority required—proposed legislation	----------	----------	83,553,997
Mortgage insurance—general authorization:

Charges against insurance authority:			
Insurance in force	25,850,384,631	29,600,796,832	33,782,373,076
Commitments outstanding	2,565,442,852	6,252,701,500	7,110,433,000
Total charges against authority	[2] 28,415,827,483	35,853,498,332	40,892,806,076
Unused authority	1,368,166,117	1,930,495,268	----------
Additional authority required—proposed legislation	----------	----------	3,108,812,476
Mortgage insurance—armed services housing authorization:			
Insurance authority	2,300,000,000	2,300,000,000	2,300,000,000
Charges against insurance authority:			
Aggregate amount of mortgages insured	1,241,418,272	1,618,499,572	1,787,199,572
Commitments outstanding	271,741,018	65,759,366	63,800,000
Total charges against authority	1,513,159,290	1,684,258,938	1,850,999,572
Unused authority	786,840,710	615,741,062	449,000,428

[1] Maximum contingent liability, reflecting outstanding balances in insurance reserve accounts, is $320,146,076 in 1958, $360,388,680 in 1959, $414,957,810 in 1960, and $466,935,658 in 1961.

[2] Includes charge of $150,315 at the end of 1959, which is chargeable against the limitation of $100 million contained in section 203(i) of the National Housing Act relating to farm mortgages. This limitation was eliminated by Public Law 86–372, approved Sept. 23, 1959.

[3] Increased $8 billion by Public Law 86–372, approved Sept. 23, 1959.

NOTE.—Insurance in force under the General Authorization at June 30, 1959, June 30, 1960, and June 30, 1961, does not include $85,085, $81,813 and $78,387 respectively of outstanding balances on open-end advances which are not chargeable against the authorization.

Sources and Application of Funds (Operations)

	1959 actual	1960 estimate	1961 estimate
Gross expenditures (funds applied):			
Home modernization and repair insurance program (title I, sec. 2):

PUBLIC HOUSING ADMINISTRATION

The United States Housing Act of 1937 (42 U.S.C. 1401 et seq.), as amended, provides for a low rent public housing program comprising decent, safe, and sanitary dwellings within the financial reach of families of low income. The Public Housing Administration has the responsibility for administering this low rent public housing program. As provided for under the act, the Administration makes loans and annual contributions to local housing authorities to assist in financing the construction and to maintain the low rent character of the housing projects after completion and occupancy. In addition, the Public Housing Commissioner has directed, on behalf of the Housing and Home Finance Administrator, the liquidation of the public war, the defense, and the veterans reuse housing programs which are included in the revolving fund for liquidating programs (see Office of the Administrator).

Public enterprise funds:

LOW RENT PUBLIC HOUSING PROGRAM

ANNUAL CONTRIBUTIONS

For the payment of annual contributions to public housing agencies in accordance with section 10 of the United States Housing Act of 1937, as amended (42 U.S.C. 1410), [$120,000,000] *$146,000,000. (Independent Offices Appropriation Act, 1960).*

Appropriated 1960, **$120,000,000** Estimate 1961, **$146,000,000**

ADMINISTRATIVE EXPENSES

For administrative expenses of the Public Housing Administration, [$12,830,000] *$13,200,000,* to be expended under the authorization for such expenses contained in title II of this Act. *(Independent Offices Appropriation Act, 1960.)*

Appropriated 1960, **$12,830,000** Estimate 1961, **$13,200,000**

NOTE.—Expenditures from the following fund for 1960 are subject to the first paragraph of title II of the Independent Offices Appropriation Act, 1960. For 1961 this paragraph is shown in the independent offices chapter, p. 147, preceding Federal Home Loan Bank Board.

The principal modifications of the United States Housing Act were made by Public Law 671, approved June 28, 1940 (42 U.S.C. 1501), which authorized the construction of permanent housing for war workers to be converted to low rent use after the emergency; the Housing Act of 1949, Public Law 171, approved July 15, 1949 (42 U.S.C. 1401 et seq.), which increased the borrowing power of the Public Housing Administration to $1.5 billion and increased the annual contributions authorization to $336 million; the Housing Act of 1956, Public Law 1020, approved August 7, 1956, which authorized admission of single elderly persons, a first preference in admission for the elderly and the construction of dwellings designed specifically for the elderly; the Housing Act of 1957, Public Law 85–104, approved July 12, 1957, which authorized higher exemptions from income in determining rents and eligibility for admission and occupancy, and higher construction costs; and the Housing Act of 1959, Public Law 86–372, approved September 23, 1959, which removed the specific limitations on income, exemptions, and rents and substituted the general standard that there be taken into consideration the size of the family, composition, age, physical handicap and other factors which might affect the rent paying ability of the family and the economic factors which affect the financial stability and solvency of the project. The 1959 act also revises the age requirements for admission to and occupancy of low rent public housing for elderly single persons and families, and provides that the age requirements conform to those applicable for benefits under title II of the Social Security Act, namely, 65 for men, 62 for women, and 50 for disabled persons.

Budget program.—The local housing authority applies for Federal financial assistance for a low rent public housing project, demonstrating the need for low rent housing in the community, the availability of an appropriate site, and that statutory requirements of a workable program and a cooperation agreement with the local governing body have been met. The Administration enters into an annual contributions contract with the local housing authority, which is consequently treated as the point of program initiation and control. The contract provides for (*a*) the payment of annual contributions to the local housing authority over a fixed period of years, not to exceed 40, in an amount not to exceed the interest and amortization on the bonds required to finance the construction of the projects, and (*b*) temporary financing of development costs pending substantial construction completion and permanent financing of the project.

The Housing Act of 1956 authorized the execution of new contracts for loans and annual contributions for 70,000 additional low rent public housing units. This act also continued the uncompleted authorization to execute contracts for loans and annual contributions contracts contained in the Housing Amendments of 1955. The authorization for the first increment of 35,000 units extended from August 1, 1956, through July 31, 1958. Under this authorization, 24,963 units were placed under loan and annual contributions contracts; authorization for 10,037 units expired. The second increment of 35,000 units became effective July 1, 1957, and expired on June 30, 1959. All units in the second increment were placed under annual contributions contracts.

The Housing Act of 1959 authorizes the placing of an additional 37,000 housing units under loan and annual contributions contracts. The authorization became available, without a time limitation, upon enactment of the act.

The budget program plans for the execution of annual contributions contracts for 15,000 units during 1960 and 22,000 units in 1961. The budget estimates for 1961 are based upon the execution of additional annual contributions contracts and an increased number of units in the construction stage, with correspondingly more units reaching the management stage, where the workload is cumulative.

Development progress.—The development of the low rent public housing program can be measured at any one time by the number of housing units in the principal

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

stages of development. The status-by-stage analysis at respective fiscal year ends is presented in the following tabulation:

NUMBER OF DWELLING UNITS

	1959 actual	*1960 estimate*	*1961 estimate*
Development stages:			
1. Preliminary loan contract executed, site not selected	25,067	17,067	5,067
2. Site selected, annual contribution contract not executed	3,355	3,355	------
3. Annual contributions contracts executed, construction not started	101,600	91,600	83,600
4. Construction started, not available for occupancy	28,969	33,969	40,969

This analysis indicates that the development activity over the 3-year period will increase in the construction stage. It is estimated that new construction will reach 33,969 units by June 30, 1960 and 40,969 units by the end of 1961. The increased activity, during 1959, on the part of the Administration to place as many units as possible under annual contributions contracts before the effective authorization terminated on June 30, 1959, created a backlog in the third stage. The units in the third stage will decrease as units move into the construction stage more rapidly than the execution of annual contributions contracts for the 37,000 units as authorized by the Housing Act of 1959.

A further analysis is provided by the passing of dwelling units through various development stages. The number of units passing each of the 5 stages in the development process during a given fiscal year is the means of measuring program accomplishments. A 3-year comparison is presented in the following tabulation:

NUMBER OF DWELLING UNITS

	1959 actual	*1960 estimate*	*1961 estimate*
Development action:			
1. Preliminary loan contracts executed	9,846	7,000	10,000
2. Site selected	40,680	15,000	18,645
3. Annual contributions contracts executed	40,629	15,000	22,000
4. Construction started	18,646	25,000	30,000
5. Completed for occupancy	20,181	20,000	23,000

The activity shown for 1959 reflects a large number of annual contributions contracts executed. The time lag between the third and fourth stages of the development process, caused by the time required for preparation of architectural and engineering plans, and advertising for construction contracts, etc., leaves a substantial number of units under annual contributions contracts awaiting start of construction. An increased number of units will be placed under construction during 1960 and 1961. As housing units leave the construction stage, the workload in the management stage will increase correspondingly.

Loans.—The Housing Act of 1949 authorizes the Public Housing Administration to have outstanding at any one time borrowings from the Treasury of $1.5 billion. These borrowings and certain available working capital funds are used to make loans to local housing authorities. In accordance with the provisions of the annual contributions contract, the Administration makes a loan commitment to finance the initial development costs of the project. The commitment is gradually increased during the development period as progress warrants. The maximum loan commitment by the Administration cannot exceed 90% of the development costs.

During 1960 and 1961, new loan commitments will reflect additional annual contributions contracts and an increase in the number of dwelling units under construction. The dollar volume of new loan commitments is estimated to decrease from $296 million in 1959 to $268 million in 1960, and will increase to $342 million in 1961.

The Public Housing Administration makes direct short-term development loans to assist local housing authorities in financing the initial planning and the early stages of construction of a low rent housing project. When loans to local housing authorities are of sufficient amount to be attractive to private investors, the local housing authority sells short-term temporary notes and utilizes the proceeds to repay the advance and interim notes held by the Administration and for immediate construction requirements. These notes are secured by the Administration through a pledge by the local housing authority of the Administration's loan commitment. This arrangement has established an excellent security rating for these notes which sold at an average interest rate of 1.778% in 1959. Direct loans were refunded through loans by private investors, secured by the Public Housing Administration, during 1959 in the amount of $110 million. Refunding of the Public Housing Administration loans with private loans is estimated at $126 million in 1960 and $157 million in 1961. These temporary notes, financed by private investors, are issued for short periods, usually 5 months, and may be reissued several times, and in increasing amounts, before the project is completed and ready for occupancy. As a result, a considerable turnover of short-term notes takes place during each fiscal period. The volume of loan activity managed by the Administration during a fiscal year greatly exceeds the amount of loans outstanding at the fiscal year end.

The following table reviews the actual financing and refinancing of development loans by the Administration and private investors during 1959 and estimated transactions during 1960 and 1961.

[In millions]

	1959 actual	*1960 estimate*	*1961 estimate*
Loans and investments made by Public Housing Administration to local housing authorities:			
Balance at beginning of year	$91	$89	$93
Acquisitions during the year	157	223	260
Repayments during the year	159	219	259
Balance at end of year	89	93	94
Loans by private investors to local housing authorities—secured by Public Housing Administration:			
Balance at beginning of year	792	830	790
Acquisitions during the year	1,749	1,623	1,668
Repayments during the year	1,711	1,663	1,685
Balance at end of year	830	790	773

All short-term financing, both direct and federally secured, is retired when the local housing authority permanently finances the project. Refunding operations affect only the distribution between direct and secured loans and not the total outstanding.

The local housing authority obtains permanent financing principally through the sale of long-term bonds to the public. These are usually 40-year serial bonds and are secured by the Federal Government's pledge to pay annual contributions. During 1959, long-term bonds in the aggregate amount of $253.5 million were sold at interest rates ranging from 3.3509% to 3.7760%. During 1959, permanent financing totaled $288.8 million. This included the sale of local housing authority bonds and Series A notes, and also permanent notes taken by the Administration. New permanent financing is estimated at $320.9 million during 1960 and $382.2 million during 1961.

Management.—The fixed annual contribution, which is equal to the interest and amortization on the bonds and other obligations issued to permanently finance the low rent public housing project, is reduced to the extent that project operations provide net receipts which can be used for this purpose. A limited review of project management by the Administration is deemed necessary to assure that the objectives of housing legislation are being achieved

and that the provisions of the annual contributions contract are being fulfilled. The review of project management operations is to assure that objectives of the housing legislation are met and is directed toward reduction in the cost of the program to the Federal Government.

The management workload will increase during 1960 and 1961 as projects under construction are completed. The management workload at each fiscal year end, classified according to major category and program, is shown in the table that follows:

NUMBER OF DWELLING UNITS

	1959 actual	*1960 estimate*	*1961 estimate*
Locally owned projects eligible for annual contributions	420,699	440,699	463,699
Locally owned projects paying residual receipts to the Federal Government	32,268	32,268	32,268
Federally owned directly operated projects	1,186	1,182	1,182
Federally owned projects leased to local housing authorities	992	269	269
Total all projects	455,145	474,418	497,418

Projects not eligible for annual contributions.—Federal funds are not required for the support of projects not eligible to receive annual contributions payments. These projects originated in programs where construction costs were financed out of appropriated funds. Therefore, in the absence of interest and amortization charges no need exists for the payment of annual contributions which otherwise would be required to pay such charges.

One category is the group of locally owned projects paying residual receipts to the Federal Government. Residual receipts from these projects are paid for a period of 40 years; however, the Federal Government has no liability to pay operating deficits.

Another category consists of federally owned projects leased to local housing authorities. Leasing arrangements are merely temporary expedients until such time as projects are either sold to local housing authorities and financed by sale of local housing authority bonds under annual contributions contracts or transferred to local housing authorities under conditional conveyance contracts providing for payment of residual receipts to the Federal Government. These leased projects are scheduled for disposition by conveyance or sale as rapidly as possible.

Nonadministrative expenses.—The Public Housing Administration utilizes program receipts to meet certain expenses of the low rent public housing program, and the use of these funds correspondingly reduces the requirements for appropriated funds. The Congress, in order to maintain control over the use of these receipts, established a nonadministrative expense limitation. The limitation applies to two activities: (*a*) expenses incurred in the operation and maintenance of federally owned directly operated projects, and (*b*) expenses incurred for Public Housing Administration representation during construction.

As of June 30, 1959, only 3 federally owned directly operated projects, containing 1,182 units and 4 rural units, remained. These projects have not been sold or leased to local housing authorities for various reasons, such as absence of state-enabling legislation, local conditions, and the lack of congressional authority to dispose of the projects for other than low rent use. Estimated program receipts and expenses for 1960 and 1961 are based upon the continued operation of these projects by the Administration.

The representatives of the Administration visit sites of low rent public housing projects under construction to ensure that projects will be built in accordance with specified and acceptable standards. During 1959, the Administration discontinued its policy of assigning full-time project engineers to projects while under construction. Instead, it established within the jurisdiction of each regional office a staff of traveling construction representatives who visit each project at periodic intervals. In the course of visits to projects under construction, these representatives determine the effectiveness of project inspection by local housing authorities, review the status of contract administration and adherence to requirements, expedite where a need is indicated, discuss current problems relating to the construction work, examine certain selected files, and report to the regional offices on conditions found. The local housing authorities pay a fixed fee for this service, based upon a percentage of the total development cost, and the receipts are used to pay the cost of services. The estimated cost for 1961 is based upon the revised service and an increased number of units in the construction stage.

Annual contributions.—The following table summarizes the annual contributions required to assure the low rent character of all locally owned projects on which annual contributions accrue.

	1959 actual	*1960 estimate*	*1961 estimate*
Number of units	401,467	429,221	455,717
Fixed annual contributions	$133,106,635	$149,200,000	$166,400,000
Deduct amounts available to reduce fixed annual contributions:			
Accrued interest	1,090,614	4,742,624	7,325,566
Capitalized interest	584,001	1,275,512	1,451,091
Residual receipts, end of initial operating period	216,734	176,430	287,355
Residual receipts, current period	15,575,418	11,722,617	11,054,530
Fixed annual contributions in excess of debt service requirements for Public Law 671 projects in temporary financing	273,204	282,817	281,458
Total amount available to reduce annual contributions	17,739,971	18,200,000	20,400,000
Annual contributions requirements	[1] 115,366,664	[2] 131,000,000	146,000,000

[1] $115.5 million was appropriated.
[2] Includes a supplemental appropriation of $11 million proposed for later transmission.

Increased annual contributions requirements in 1960 and 1961 are largely the result of an increased number of units eligible for annual contributions resulting from the completion and permanent financing or new projects. Another factor is the increased operating cost, particularly for extraordinary maintenance, replacement of equipment, and operating improvements.

Under the present statutory authorization, the Public Housing Administration may pay annual contributions up to $336 million per annum. The maximum amount of annual contributions which the Administration is committed to pay, on the basis of annual contributions contracts executed through June 30, 1959, is estimated at $249 million, leaving $87 million of uncommitted authority to pay annual contributions.

Administrative expenses.—Administrative expenses for the low rent public housing program amounted to $12,305,064 in 1959; for 1960 the amount of $12,830,000 was appropriated, but it is estimated that budgetary savings of $200,000 may be effected; the estimate for 1961 is $13,200,000.

The increasing number of units entering the management stage during 1960 and 1961 is the principal reason for the rise in administrative expenses. The number of

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

dwelling units completed and reaching the management stage at year end will increase from 455,145 units in 1959 to 474,418 units in 1960, and 497,418 units in 1961 and will expand the management workload. This will require an increase in the number of operating engineers attached to management staffs located in the various regional offices. Additional staff is required for the increasing audit workload and to improve the quality of audits of local housing authorities as recommended by the General Accounting Office.

Operating results and financial condition.—Operating income is not intended to be sufficient to cover all program expense. Net losses, in the budget year, are approximately equal to the appropriations for administrative expenses and annual contributions payments.

Net obligations outstanding, as shown in the schedule of certain fund balances, will continue to increase during 1960 and 1961. The Administration's accelerated construction program has created new loan commitments which exceed retirements through permanent financing during these years. Commitments include the Administration's agreement to advance construction funds to local housing authorities and the securing of outstanding advance and permanent loan notes held by private investors. These commitments can be met from the authority to borrow up to $1.5 billion from the Treasury.

The Public Housing Administration is responsible for administering the low rent public housing program. Administrative expenses are incurred in the performance of development, management, audit, and administration activities of the program.

1. *Development.*—Development expenses in 1961 will be incurred assisting local housing authorities in project planning, solving architectural, engineering, and construction problems, reviewing proposed sites, assisting in land acquisition, preparing cost estimates, and rendering general advisory services.

2. *Management.*—The Administration's management functions include management reviews of projects, reviews of budget estimates, leasing and occupancy audits, consulting engineering service, and surveys of a general nature to ensure proper maintenance of properties. The management workload for the low rent public housing program is reflected in the number of dwelling units in management at year end as follows: 1959, 455,145; 1960, 474,418; 1961, 497,418.

3. *Audit.*—The Public Housing Administration conducts annual audits of all federally assisted low rent public housing projects. The audit workload at the end of 1961 will comprise 2,840 projects located in the continental United States, Alaska, Hawaii, Puerto Rico, and the Virgin Islands compared with 2,430 in 1959 and 2,574 in 1960. An internal audit program of the operations of the Public Housing Administration is also conducted.

DEPARTMENT OF AGRICULTURE

The Department of Agriculture is charged with a wide range of governmental responsibilities relating to agriculture and rural people. Of long standing are the research, educational, and regulatory activities pertaining to agricultural matters. Of more recent origin are such programs as those providing special credit facilities, price supports, and conservation assistance—programs that account for the major part of the Department's budget. While most of the Department's activities are of special benefit to farmers and rural people, many of them are of substantial benefit also to a much wider group, including consumers of agricultural commodities generally.

New obligational authority requested for the Department of Agriculture for the fiscal year 1961 totals $5,081 million, compared with $5,633 million for 1960. The reduction reflects mainly a smaller request for the Commodity Credit Corporation, for which the 1960 estimate includes an anticipated supplemental appropriation of $675 million to restore part of the Corporation's capital impairment. The 1961 request for activities other than those financed through the Corporation totals approximately the same as for 1960; the principal increases are for the conservation reserve program and the permanent appropriation for the removal of surplus agricultural commodities, and the principal decreases are for the Rural Electrification Administration and the Farmers Home Administration.

Expenditures for the fiscal year 1961 are estimated at $6,201 million, compared with $5,706 million for 1960. Commodity Credit Corporation expenditures are estimated at $3,906 million in 1961 compared with $3,500 million in 1960. Of the total for 1961, almost 64% is for stabilization of farm prices and farm income, over 12% is for conservation and development of agricultural land and water resources, 9% is for credit programs, and 5% is for research and other agricultural services. The remaining 10% is for activities that are classified in functions other than agriculture and agricultural resources, such as emergency famine relief abroad and the school lunch program. Expenditures and new obligational authority for the Department are shown by function in the following table:

AGRICULTURAL RESEARCH SERVICE

Current authorizations:

SALARIES AND EXPENSES

For expenses necessary to perform agricultural research relating to production, utilization, and home economics, to control and eradicate pests and plant and animal diseases, and to perform related inspection, quarantine and regulatory work, and meat inspection: *Provided*, That not to exceed $75,000 of the appropriations hereunder shall be available for employment pursuant to the second sentence of section 706(a) of the Organic Act of 1944 (5 U.S.C. 574), as amended by section 15 of the Act of August 2, 1946 (5 U.S.C. 55a): *Provided further*, That appropriations hereunder shall be available for the operation and maintenance of aircraft and the purchase of not to exceed two, *of which one shall be* for replacement only: *Provided further*, That appropriations hereunder shall be available pursuant to title 5, United States Code, section 565a, for the construction, alteration, and repair of buildings and improvements, but unless otherwise provided, the cost of constructing any one building (except headhouses connecting greenhouses) shall not exceed [$10,000] *$17,500*, except for five buildings to be constructed or improved at a cost not to exceed [$20,000] *$35,000* each, and the cost of altering any one building during the fiscal year shall not exceed [$3,750] *$7,500* or [4] *6* per centum of the cost of the building, whichever is greater:

Research: For research and demonstrations on the production and utilization of agricultural products, home economics, and related research and services, including administration of payments to State agricultural experiment stations; [$67,722,490] *$68,981,700*: *Provided*, That the [Secretary is authorized to acquire from the Department of the Army without reimbursement land and improvements at Orlando, Florida, to be transferred pursuant to the Federal Property and Administrative Services Act of 1949, as amended: *Provided further*, That the] limitations contained herein shall not apply to [(a)] replacement of buildings needed to carry out the Act of April 24, 1948 (21 U.S.C. 113a)[, or (b) not to exceed $2,939,000 for the construction and alteration of buildings: *Provided further*, That the Secretary is authorized to acquire by donation lands necessary for the construction thereof];

Plant and animal disease and pest control: For operations and measures, not otherwise provided for, to control and eradicate pests and plant and animal diseases and for carrying out assigned inspection, quarantine, and regulatory activities, as authorized by law, including expenses pursuant to the Act of February 28, 1947 (21 U.S.C. 114b–d), [$49,800,600] *$48,775,600*, of which $1,500,000 shall be apportioned for use pursuant to section 3679 of the Revised Statutes, as amended, for the control of outbreaks of insects and plant diseases to the extent necessary to meet emergency conditions;

Meat inspection: For carrying out the provisions of laws relating to Federal inspection of meat, and meat-food products, and the applicable provisions of the laws relating to process or renovated butter, [$21,324,900;] *$21,562,700*.

[Special fund: To provide for additional labor to be employed under contracts and cooperative agreements to strengthen the work at research installations in the field, not more than $1,000,000 of the amount appropriated under this head for the fiscal year 1959 may be used by the Administrator of the Agricultural Research Service in departmental research programs in the fiscal year 1960, the amount so used to be transferred to and merged with the appropriation otherwise available under "Salaries and expenses, Research".] *(5 U.S.C. 511–512, 524, 541c–541e, 563–564, 565a, 576, 2131; 7 U.S.C. 135–135k, 145–164a, 166–167, 281–283, 361a–361i, 391, 394–396, 401–404, 421–422a, 424–425, 427, 427i, 428a, 429–431, 433–434, 436–437, 851–855, 1292, 1651–1656, 1901–1906; 15 U.S.C. 69e; 16 U.S.C. 581–581a, 581f, 590a–590b, 590f, 590k; 18 U.S.C. 287; 19 U.S.C. 1201, 1306; 20 U.S.C. 191–194; 21 U.S.C. 71–91, 94–96, 98, 101–105, 111–128, 130–131, 151–158, 342a, 346; 26 U.S.C. 4817, 7235c; 31 U.S.C. 725a; 42 U.S.C. 1891–1893; 45 U.S.C. 71–74; 46 U.S.C. 466a–466b; 48 U.S.C. 198, 1409m–1409o; 49 U.S.C. 177e, 181b; 46 Stat. 67; 73 Stat. 286; Department of Agriculture and Farm Credit Administration Appropriation Act, 1960.)*

Appropriated 1960, **$138,847,990** Estimate 1961, [a] **$139,320,000**

[a] Includes $49,100 for activities previously carried under "Salaries and expenses," Library, and excludes $50,000 for activities transferred in the estimates to "Marketing research and service," Agricultural Marketing Service. The amounts obligated in 1959 and 1960 are shown in the schedule as comparative transfers.

Program and Financing

	1959 actual	1960 estimate	1961 estimate
Program by activities:			
1. Research:			
(a) Farm research	$45,123,417	$47,109,990	$49,677,700
(b) Utilization research and development	16,413,495	16,121,000	18,442,600
(c) Home economics research	2,013,154	2,155,800	2,189,200

2. Plant and animal disease and pest control:			
(a) Plant disease and pest control	21,586,514	24,199,700	24,916,800
(b) Animal disease and pest control	29,188,711	25,600,900	23,818,800
Total, plant and animal disease and pest control	50,775,225	49,800,600	48,735,600
3. Meat inspection	20,657,577	21,324,900	21,562,700
Total program costs [1]	136,064,692	137,611,590	141,710,000
4. Relation of costs to obligations:			
Costs financed from obligations of other years, net (−)	−2,783,857		−2,390,000
Obligations incurred for costs of other years, net		2,235,500	
Total program (obligations)	133,280,835	139,847,090	139,320,000
Financing:			
Comparative transfers from (−) or to other accounts	−48,225	900	
1959 appropriation available in 1958	527,557		
Unobligated balance no longer available	3,220,223		
New obligational authority	136,980,390	139,847,990	139,320,000
New obligational authority:			
Appropriation	$128,752,890	$138,847,990	$139,320,000
Transferred from "Conservation reserve program," Commodity Stabilization Service (73 Stat. 34)	7,881,500		
Appropriation (adjusted)	136,634,390	138,847,990	139,320,000
Reappropriation	346,000	1,000,000	

[1] Includes capital outlay as follows: June 30, 1959, $8,068,509; 1960, $5,200,000; 1961, $7,600,000.

The Service conducts fundamental and applied research relating to the production and utilization of agricultural products, and to home economics, and carries out those control and regulatory programs of the Department which involve enforcement of plant and animal quarantines, meat inspection, the control of diseases and insect pests of animals and plants, and related work.

1. *Research—(a) Farm research.*—Improved breeding, feeding, and management practices are developed for farm livestock, poultry, and domestic fur animals. Practical methods are sought for control of diseases and parasites affecting them.

Investigations are conducted to improve varieties of food, feed, fiber and other plants and to develop new crops; to improve crop-production practices, including methods to control plant diseases; to improve methods for control of harmful and utilization of beneficial insects affecting farm production; and to develop and test new chemical formulations and nonchemical methods for the control of crop pests.

Research is conducted to improve fertilizers, soil management, irrigation, and conservation practices; to study hydrologic problems of agricultural watersheds; to determine the relation of soils to plant, animal, and human nutrition; and to apply engineering principles to improve efficiency and reduce costs of agricultural production.

AGRICULTURAL RESEARCH SERVICE—Continued

Current authorizations—Continued

SALARIES AND EXPENSES—Continued

Farm economics research is conducted on profitable adjustments in farming by type and size of farm; on efficiency in use of labor, equipment, land, and water; and on related economic problems.

Continuous review is maintained to emphasize work which will meet the problems of agricultural surpluses. The research is aimed at the profitable production of an adequate supply of food, feed, fiber, and other agricultural products of desired quality at minimum costs. Increased attention has been given to the production of agricultural products having industrial uses. Development of improved ginning processes and equipment is currently emphasized in order to enable ginners to avoid heat and other damage to cotton fiber during ginning. More than $1.5 million of farm research funds are now used for the introduction and development of new crops. Research in farm economics is concentrated on the problem of adjustments in farming which may increase farmers' income without increase in output of farm products currently surplus to need.

The proportion of farm research funds going into basic research has steadily increased, and is currently estimated at 31% of the total funds for farm research. This basic research undergirds the other research efforts.

The estimates for 1961 propose increases for research on safer chemicals for insect control, staffing, and operating the National Animal Disease Laboratory, Ames, Iowa, and economic research to determine alternate systems of farming to enable feed-grain and livestock farmers to adjust more readily to market demands. These increases are more than offset by decreases from the elimination of funds previously appropriated for nonrecurring construction and improvement items, and by redirection of some funds previously used for farm research to utilization and development research.

(*b*) *Utilization research and development.*—Chemical, physical, and biological studies are conducted to develop new and improved foods, feeds, drugs, fabrics, industrial chemicals, and other products from agricultural commodities; to improve commodity processing methods; and to increase the use of byproducts. The estimates for 1961 propose increases for new and improved uses for grains, cotton, wool, castor oil, and animal fats.

(*c*) *Home economics research.*—Studies are made of human nutrition, household economics, and clothing and housing.

(*d*) *Administration of payments to States, and research in Alaska, Puerto Rico, and Virgin Islands.*—Research under Federal grant funds at each State agricultural experiment station is coordinated with research conducted by other States and by agencies of the Department. The Secretary's responsibilities for the proper administration of these funds are financed by a direct appropriation ($342,500 estimated for 1960) and 3% of the grant funds. Research stations are operated in Alaska, Puerto Rico, and the Virgin Islands.

2. *Plant and animal disease and pest control*—(*a*) *Plant disease and pest control.*—Provision is made (1) through port-of-entry inspection to exclude from this country destructive insects, plant diseases, and nematodes that cause great damage to agricultural crops in other parts of the world; (2) to cooperate with States in eradicating or preventing spread of crop pests that become established in this country; and (3) to assist States in suppressing incipient and emergency outbreaks of crop pests when and where they occur. The Federal Insecticide, Fungicide, and Rodenticide Act, as amended, and related provisions of the Federal Food, Drug, and Cosmetic Act are administered. Increases are proposed for 1961 for plant quarantine protection due to increased travel and shipping, and for regulatory activities arising from the amendment to the Federal Insecticide, Fungicide, and Rodenticide Act, approved August 7, 1959 (Public Law 86-139). The volume of workload is indicated in the following table:

[In thousands]

	1957 actual	*1958 actual*	*1959 actual*
Inspections at ports of entry:			
Airplanes	111	121	134
Vessels	55	55	59
Interceptions of unauthorized plant material	291	311	320

(*b*) *Animal disease and pest control.*—Programs are devised to exclude communicable diseases of foreign origin from this country; to prevent the spread of diseases through interstate shipments of livestock or distribution of impure or impotent veterinary biologics; to control and eradicate livestock diseases; and to maintain, through a marketing agreement with manufacturers and handlers, adequate supplies of hog cholera virus and serum for protection of swine. The estimates for 1961 include a proposed decrease of $2.1 million primarily due to progress and accomplishments in the brucellosis and screwworm eradication programs.

The volume of protective activities is indicated by selected examples in the following table:

[In thousands]

	1957 actual	*1958 actual*	*1959 actual*
Animal import inspection:			
All animals	346	1,127	1,150
Import animal byproducts:			
Wool, bone, glands, etc.....pounds	672,000	590,600	664,611
Hides and skins.....do	(1)	303,000	364,489
Sheep inspected for scabies	11,944	9,501	10,849
Scabies-infected sheep found	57	57	69
Cattle inspected for scabies	2,090	2,139	5,855
Scabies-infected cattle found	5	1	9
Inspections and dippings for cattle fever ticks	1,932	2,832	2,097
Cattle tested for tuberculosis	8,976	8,884	8,187
Tuberculosis reactors found	14	15	19
Cattle tested for brucellosis:			
Blood tests	15,913	16,251	14,169
Ring tests	31,481	30,927	30,693
Brucellosis reactors found	280	260	214
Animals inspected at public stockyards	68,039	62,918	62,813
Diseased animals received or found	347	352	435
Supervision of production of veterinary biologics:			
Hog-cholera virus and anti-hog-cholera serum doses	46,164	40,669	44,232
Hog-cholera vaccine.....do	34,563	36,800	44,068
Other vaccines.....do	2,644,260	2,369,890	3,676,452
Total bacterins.....do	91,223	108,803	130,021
Diagnostic agents.....do	66,694	66,791	75,281
Other serums.....do	9,281	10,773	11,799

[1] Comparable data not available.

3. *Meat inspection.*—Federal meat inspection is required for all meat in interstate commerce and is conducted to assure a clean and wholesome meat supply for human consumption, free from adulteration, and truthfully labeled. The work includes inspection of animals, carcasses and meat, and meat-food products at various stages of handling and processing. Measures are enforced to insure informative labeling, and meats imported or exported are inspected.

The volume of inspections and examinations is indicated by examples given in the following table:

	1957 actual	*1958 actual*	*1959 actual*
Number of establishments covered	1,244	1,300	1,334
Cities in which plants are located	502	518	546
Inspections of live animals	104,352,000	97,604,000	99,419,000
Post mortem inspections	104,345,000	97,599,000	99,415,000
Animals and carcasses condemned	301,000	264,000	242,000
Inspection of processed meat and meat-food products (million pounds)	17,804	16,792	17,618

SALARIES AND EXPENSES (SPECIAL FOREIGN CURRENCY PROGRAM)

For purchase of foreign currencies which accrue under title I of the Agricultural Trade Development and Assistance Act of 1954, as amended (7 U.S.C. 1704), for market development research authorized by section 104(a), and for agricultural and forestry research authorized by section 104(k) of that Act, to remain available until expended, $15,131,500, of which not less than $7,662,500 shall be available to purchase currencies which the Treasury Department shall determine to be excess to normal requirements of the United States: Provided, That this appropriation shall not be used for the purchase of currencies available in the Treasury for the purposes of section 104(f) of such Act unless such currencies are excess to the normal requirements of the United States: Provided further, That the dollar value of the unexpended balances, as of June 30, 1960, of allocations of foreign currencies heretofore made available to the Agricultural Research Service for the foregoing purposes of section 104(a) is appropriated as of that date and shall be merged with this appropriation.

Appropriated (est.) 1960, **$17,637,743** Estimate 1961, **$15,131,500**

Program and Financing

	1959 actual	1960 estimate	1961 estimate
Program by activities:			
1. Market development research (sec. 104(a))	$218,195	$2,800,000	$4,600,000
2. Agricultural and forest research (sec. 104(k))	1,700	780,000	3,800,000
Total program costs	219,895	3,580,000	8,400,000
3. Relation of costs to obligations: Obligations incurred for costs of other years (unpaid undelivered orders), net	1,433,633	18,337,831	6,731,500
Total program (obligations)	1,653,528	21,917,831	15,131,500
Financing:			
Unobligated balance brought forward	−28,516	−5,973,031	
Comparative transfer from (−) other accounts	−1,700	−3,888,300	
Adjustment due to changes in exchange rates to permit conversion to dollar equivalent	141		
Unobligated balance carried forward	5,973,031		
Authorization to expend foreign currency receipts (net of proposed appropriation to cover balances as of June 30, 1960)	−7,596,484	5,581,243	
New obligational authority		17,637,743	15,131,500
New obligational authority:			
Indefinite (proposed in appropriation language above)		$17,637,743	
Definite			$15,131,500
Appropriation		17,637,743	15,131,500

NOTE.—The gross foreign currency authorization in 1960 is $12,056,500. The schedule above covers foreign currency authorizations for 1959 and 1960. The appropriation recommended for 1960 is equal to the unexpended balance of previous foreign currency authorizations as of June 30, 1960. All transactions in 1961 relate to appropriations.

Foreign currencies, generated by the sale of surplus agricultural commodities under title I of the Agricultural Trade Development and Assistance Act of 1954, are used by the Department for market development research under section 104(a) and for agricultural and forest research under section 104(k). Work is carried on through contracts or grants, in both basic and applied fields, by research institutions and organizations in foreign countries. This research serves to develop new foreign markets and to expand existing markets for agricultural commodities, including cotton, dairy products, fats and oils, grain, feed, livestock and meat, poultry, fruits and vegetables, and tobacco. It also provides for supplementary research on farm, forest, marketing, utilization, and human nutrition problems. It is estimated that $15.1 million will be available in 1961 for such research. Total estimated cost in U.S. dollars (charged to regular appropriations) of the initiation and supervision of projects in 1961 is $250,000.

3. *Relation of costs to obligations.*—Year-end balances of unpaid undelivered orders (representing primarily work under contract not performed) are as follows: 1958, $371,484; 1959, $1,805,117; 1960, $20,142,948; 1961, $26,874,448.

CONSTRUCTION OF FACILITIES

For construction of facilities and acquisition of the necessary land therefor by donation, $900,000, to remain available until expended. (5 U.S.C. 565a.)

Estimate 1961, **$900,000**

Program and Financing

	1959 actual	1960 estimate	1961 estimate
Program by activities:			
1. Construction of facilities for entomology research (total program costs)			$60,000
2. Relation of costs to obligations: Obligations incurred for costs of other years (unpaid undelivered orders), net			840,000
Total obligations			900,000
Financing:			
Appropriation (new obligational authority)			900,000

The proposed appropriation would provide facilities for entomology research to replace those currently in use at Orlando, Fla. When the replacement is completed, sale of the present property is anticipated, thus offsetting a part of the cost of the new facilities.

2. *Relation of costs to obligations.*—The year-end balance of unpaid undelivered orders for 1961 is estimated to be $840,000.

Financing:			
Unobligated balance no longer available	59,213		
Appropriation (new obligational authority)	31,803,708	31,803,708	32,803,708

[1] Includes capital outlay as follows: June 30, 1959, $3,984; 1960, $9,000; 1961, $4,900.

Funds are allocated to agricultural experiment stations of the land-grant colleges in the States and Puerto Rico for agricultural research, including investigations and experiments to promote a permanent and efficient agricultural industry and improvements in the rural home and rural life. The States are contributing about $3 for every $1 paid by the Federal Government.

The proposed increase is to strengthen the cooperative research program at the agricultural experiment stations in the States and Puerto Rico.

The planned distribution of the grants for 1961 is:

Distributed according to statutory formula	$25,165,708
Regional research funds	6,150,000
Payments authorized for marketing projects	500,000
Total	31,815,708

Financing:			
Unobligated balance no longer available	464,352		
New obligational authority	63,719,077	64,123,222	67,424,967
New obligational authority:			
Appropriation	$63,159,395	$64,123,222	$67,424,967
Transferred from "Conservation reserve program," Commodity Stabilization Service (73 Stat. 34)	559,682		
Appropriation (adjusted)	63,719,077	64,123,222	67,424,967

[1] Includes capital outlay as follows: June 30, 1959, $26,822; 1960, $16,000; 1961, $14,000.

The primary function of the nationwide system of cooperative extension work is out-of-school applied education in agriculture, home economics, and related subjects. This educational activity takes research results, technological advancements, and situation and program facts of the Department of Agriculture, the State agricultural colleges, and experiment stations, and incorporates them into a national educational program. Its objective is to help people develop their abilities to attain greater efficiency in farming, marketing, and homemaking.

1. *Payments to States and Puerto Rico.*—Funds appropriated under the Smith-Lever Act for payments to States and Puerto Rico are distributed primarily on the basis of farm and rural population and to a limited degree on the basis of special problems and needs. Funds appropriated under the Agricultural Marketing Act for educational work in marketing are distributed to the States and Puerto Rico on a matching basis under approved projects and on the basis of contracts. Funds are used primarily for the employment of county extension workers who work with rural families, marketing concerns, and others by providing counsel and assistance in the application of improved methods of production, marketing, and family living. They assist local leadership to determine extension programs of work. Work with youth is largely through 4–H Clubs.

The proposed increase is for payments for cooperative agricultural extension work under the Smith-Lever Act to strengthen and expand extension work with disadvantaged agricultural families in connection with the Administration's rural development program.

The scope of extension activities is reflected in the following selected statistics:

[In thousands]

	1956	*1957*	*1958*
Number of families assisted in adopting improved agricultural practices	6,406	6,819	7,947
Number of families assisted in adopting improved homemaking practices	6,539	6,873	7,475
Number of 4-H Club members	2,164	2,201	2,254
Number of voluntary local leaders	1,267	1,262	1,281
Number of bulletins distributed	29,200	30,894	32,873

2. *Retirement costs for extension agents.*—The amount proposed is required to meet retirement costs of cooperative extension agents as authorized under Public Law 854, approved July 31, 1956. Cooperative extension agents are joint employees of the U.S. Department of Agriculture and the cooperating land-grant institutions. The employer's contribution to the Federal retirement fund, to match contributions of these agents, is provided by Federal appropriation.

3. *Penalty mail.*—Funds to cover the cost of penalty mailings for State extension directors and cooperative extension agents in the States are provided under this appropriation.

4. *Federal Extension Service.*—The Federal Extension Service provides leadership, counsel, and assistance to the States and Puerto Rico in developing extension programs, improved teaching methods, efficient use of available resources, evaluation of programs, in-service training for extension personnel, and providing administrative services. The proposed increase will strengthen the Federal staff of the Extension Service to meet increased responsibilities resulting from requests from the States for increased program leadership and assistance.

5. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources and applicable adjustment as reflected in the following table:

	1958 actual	*1959 actual*	*1960 estimate*	*1961 estimate*
Selected resources at end of year: Inventories and items on order:				
Unpaid undelivered orders (appropriation balances obligated for goods and services on order not yet received)	$212,894	$185,203	$89,679	$89,679
Advances (payments for goods and services on order not yet received)	41,494	46,572	31,000	31,000
Total selected resources at end of year	254,388	231,775	120,679	120,679
Selected resources at start of year (−)	−254,388	−231,775	−120,679

SOIL CONSERVATION SERVICE

The Service is responsible for various soil and water conservation activities to aid farmers and ranchers in making physical adjustments in land use to conserve soil, water, and plant resources, establish a permanent and balanced agriculture, and reduce the hazards of floods and sedimentation. These activities are carried out in cooperation with Federal and State agencies and local organizations. The Service also has responsibility for administering the Great Plains conservation program and provides technical services in connection with the agricultural conservation program, the conservation reserve program, and soil and water conservation loans made by the Farmers Home Administration.

Current authorizations:

CONSERVATION OPERATIONS

For necessary expenses for carrying out the provisions of the Act of April 27, 1935 (16 U.S.C. 590a–590f), including preparation of conservation plans and establishment of measures to conserve soil and water (including farm irrigation and land drainage and such special measures as may be necessary to prevent floods and the siltation of reservoirs); operation of conservation nurseries; classification and mapping of soils; dissemination of information; purchase and erection or alteration of permanent buildings; and operation and maintenance of aircraft, [$82,322,000] *$82,882,000*: *Provided*, That the cost of any permanent building purchased, erected, or as improved, exclusive of the cost of constructing a water supply or sanitary system and connecting the same to any such building and with the exception of buildings acquired in conjunction with land being purchased for other purposes, shall not exceed $2,500, except for eight buildings to be constructed or improved at a cost not to exceed $15,000 per building and except that alterations or improvements to other existing permanent buildings costing $2,500 or more may be made in any fiscal year in an amount not to exceed $500 per building: *Provided further*, That no part of this appropriation shall be available for the construction of any such building on land not owned by the Government: *Provided further*, That in the State of Missouri, where the State has established a central State agency authorized to enter into agreements with the United States or any of its agencies on policies and general programs for the saving of its soil by the extension of Federal aid to any soil conservation district in such State, the agreements made by or on behalf of the United States with any such soil conservation district shall have the prior approval of such central State agency before they shall become effective as to such district: *Provided further*, That no part of this appropriation may be expended for soil and water conservation operations under the Act of April 27, 1935 (16 U.S.C. 590a–590f), in demonstration projects: *Provided further*, That not to exceed $5,000 may be used for employment pursuant to the second sentence of section 706(a) of the Organic Act of 1944 (5 U.S.C. 574), as amended by section 15 of the Act of August 2, 1946 (5 U.S.C. 55a): *Provided further*, That qualified local engineers may be temporarily employed at per diem rates to perform the technical planning work of the service. *(5 U.S.C. 133t, 511–512, 565a; 7 U.S.C. 1387, 1807; 16 U.S.C. 590q–1; Department of Agriculture and Farm Credit Administration Appropriation Act, 1960.)*

[1] Includes capital outlay as follows: June 30, 1959, $752,933; 1960, $229,500; 1961, $230,000.

The Department cooperates with the States and other agencies in planning and installing works of improvement in small watersheds to reduce damage from floodwater, sediment, and erosion and for the conservation, development, utilization, and disposal of water. It provides loans to local organizations to help them finance their share of the cost of certain works of improvement. The Department also cooperates with other agencies in making surveys and investigations of watersheds of rivers and other waterways as the basis for the development of coordinated programs.

In process at end of year	---	98	175	250	285

1. *Investigations and planning.*—Surveys are made by the Department of proposed small watershed projects, and work plans are prepared in cooperation with the local sponsors. These plans outline the proposed works of improvement and include the estimated costs, a cost-benefit analysis, cost-sharing and maintenance arrangements, a proposed schedule of operations, and other facts necessary to determine whether Federal participation in project development should be approved.

2. *Installation of works of improvement.*—Assistance is provided to local organizations to install improvement measures for flood prevention and water management in accordance with approved watershed work plans.

Public Law 566 watersheds.—After local sponsoring organizations have developed watershed work plans with the Department's assistance and the projects have been approved as suitable for Federal participation (projects involving an estimated Federal contribution in excess of $250,000, or any single structure having a capacity in excess of 2,500 acre-feet require congressional approval), technical services and cost-sharing assistance are provided for specified works of improvement. Detailed construction plans and specifications are prepared. On non-Federal lands the local sponsoring organizations contract for the construction work; provide land easements and rights-of-way; operate and maintain the projects; and in the case of multiple-purpose structures, bear a share of the construction costs. The initiation of installation of works of improvement in new projects requires administrative approval in two stages: (*a*) approval for advance engineering and other technical assistance only, and (*b*) approval for construction of structural measures.

The advance engineering and technical assistance stage includes surveys, investigations, and preparation of detailed designs, specifications, and engineering cost estimates for construction of structural works. It also includes precise delineation of required easement areas. Technical and other assistance for planning and applying land treatment measures for watershed protection and flood prevention is provided in some cases.

The project-construction stage begins with execution of the first project agreement for construction of works of improvement, after required easements are obtained or are assured and the local organization has met all other requirements. Under a project agreement the local sponsoring organization agrees to construct a segment of the project which may consist of an individual or an interrelated group of structures. The agreement obligates the Government to furnish its share of the construction cost. Funds are advanced to the local organization as segments of work are completed. Engineering and other services are provided for the preparation of contracts and specifications, awarding of contracts, and supervision and inspection of construction. Technical assistance with land treatment measures is continued.

The following table shows the status of Public Law 83–566 projects with respect to approvals for advance engineering and technical assistance and for construction:

[Dollars in thousands]

Explanation	1959 actual Number	1959 actual Amount	1960 estimate Number	1960 estimate Amount	1961 estimate Number	1961 estimate Amount
Projects approved for advance engineering and technical assistance (number and estimated cost of completion, unless otherwise indicated):						
Projects underway at beginning of year	53	$29,925	73	$50,840	118	$92,940
Projects initiated during the year	80	71,572	80	78,000	50	50,000
Subtotal	133	101,497	153	128,840	168	142,940
Deduct projects approved for construction during the year	60	47,977	35	30,900	32	28,900
Net projects approved	73	53,520	118	97,940	136	114,040
Deduct amounts obligated during the year for advance engineering and technical assistance	---	2,680	---	5,000	---	5,635
Total, projects receiving only advance engineering and technical assistance at end of year	73	50,840	118	92,940	136	108,405
Projects approved for construction (number and estimated cost of completion, unless otherwise indicated):						
Projects underway at beginning of year	45	12,906	102	42,349	132	60,472
Projects initiated during the year	60	47,977	35	30,900	32	28,900
Total, projects under construction during the year	105	60.883	137	73,249	164	89,372
Deduct amounts obligated during the year for works of improvement on—						
(*a*) Projects approved for construction during the year	---	12,429	----	5,300	---	5,000
(*b*) Projects completed during the year	3	73	5	62	15	450
(*c*) Continuing prior year projects	---	6,032	---	7,415	---	10,815
Total, projects under construction at end of year	102	42,349	132	60,472	149	73,107
Grand total, projects in progress at end of year	175	93,189	250	153,412	285	181,512

The 1960 program contemplates starting 35 new watershed projects. The increase of $5,000,000 in the 1961 estimates will be used to initiate construction work on an estimated 32 additional watershed projects involving total Federal costs of approximately $28,900,000.

Uniform cost-sharing legislation is recommended which would provide that non-Federal interests receiving identifiable flood protection benefits from flood control or flood prevention projects should bear at least 30% of the costs. The value of lands, easements, and rights-of-way contributed locally would be included as part of the non-Federal share. Operation and maintenance would be a State or local responsibility. The legislation would apply to Public Law 566 projects and, if enacted prior to construction, would decrease by an estimated $4.6 million the total Federal costs of projects expected to be put under construction in 1961.

Pilot demonstration watersheds.—The following table shows the status of the pilot watershed projects which were initiated in 1954 to demonstrate and evaluate the effects of works of improvement installed in small watersheds for watershed protection and flood prevention. The budget estimate reflects reductions due to completion of some pilot projects.

Federal Reserve Bank of St. Louis

[Dollars in thousands]

Explanation	1959 actual Number	1959 actual Amount	1960 estimate Number	1960 estimate Amount	1961 estimate Number	1961 estimate Amount
Active projects at beginning of year and estimated completion cost	39	$15,224	30	$9,646	15	$4,396
Deduct amounts obligated during the year for—						
(a) Projects completed during the year	9	96	15	1,665	11	1,387
(b) Other projects	--	5,482	--	3,585	--	1,113
Total, projects in progress at end of year and estimated completion cost	30	9,646	15	4,396	4	1,896

3. *Loans and related expenses.*—Loans are made to local organizations to finance the local share of the cost of works of improvement installed in the small watersheds. Repayment with interest is required within 50 years after the principal benefits of improvements first become available.

4. *Surveys and investigations of water resources programs.*—Current work includes participation with the Corps of Engineers in the Potomac River Basin, the upper Mississippi River area, the Delaware River area, and the Cape Fear watershed in North Carolina, and with the Department of the Interior in reappraising the agricultural benefits anticipated from the upper Colorado River storage project. Surveys are also being made of part of the Kansas River area in cooperation with the Kansas State water board, the Yazoo-Mississippi flood plain area with the Mississippi State board of water commissioners, and the Huron River Basin in Michigan with the Huron River watershed intergovernmental committee. Some cooperative assistance is being provided to the river basin study commissions for the Southeast and the Texas river areas.

Accrued expenditure limitation.—This appropriation contains, for the first time, a limitation on accrued expenditures in accordance with Public Law 85–759, approved August 25, 1958.

For construction activities financed from this appropriation, costs and accrued expenditures occur when work is in place. Since this estimate is being prepared so far in advance of the putting into place of works of improvement by contractors of the local sponsoring organizations, the amount of the limitation is 10% above the amount of accrued expenditures shown in the schedules. This will provide flexibility needed because of possible difficulties in scheduling the rate of contractors' work.

SOIL CONSERVATION SERVICE—Continued

Current authorizations—Continued

FLOOD PREVENTION—Continued

1. The Department cooperates with soil conservation districts and other local organizations in planning and installing works of improvement in the various subwatersheds of the 11 watersheds authorized by the Flood Control Act of 1944. Measures primarily for flood prevention such as floodwater retarding and sediment control structures, debris barriers and basins, deflectors, diversion ditches and dikes, streambank protection, and other improvements are being installed on a cost-sharing basis. On non-Federal lands, local organizations provide lands, easements, and rights-of-way; operate and maintain the completed projects; and, in some cases, bear a share of construction costs. Work is generally done by local contractors. Land treatment measures which contribute to flood prevention are installed by landowners with technical and other assistance furnished by the Department.

2. *Relation of costs to obligations.*—The year-end balances of unpaid undelivered orders (representing primarily the uncompleted portion of contracts for the installation of flood prevention measures) are as follows: 1958, $4,715,010; 1959, $5,829,995; 1960, $5,700,000; 1961, $4,900,000.

GREAT PLAINS CONSERVATION PROGRAM

For necessary expenses to carry into effect a program of conservation in the Great Plains area, pursuant to section 16(b) of the Soil Conservation and Domestic Allotment Act, as added by the Act of August 7, 1956 (16 U.S.C. 590p), $10,000,000, to remain available until expended. (*5 U.S.C. 511–512; Department of Agriculture and Farm Credit Administration Appropriation Act, 1960.*)

Appropriated 1960, **$10,000,000** Estimate 1961, **$10,000,000**

Program and Financing

	1959 actual	1960 estimate	1961 estimate
Program by activities:			
1. Great Plains conservation program (total program costs [1])	$5,862,955	$6,847,774	$8,000,000
2. Relation of costs to obligations: Obligations incurred for costs of other years (unpaid undelivered orders), net	7,871,777	3,781,346	2,000,000

Financing:			
Unobligated balance brought forward	−4,363,852	−629,120	
Unobligated balance carried forward	629,120		
Appropriation (new obligational authority)	10,000,000	10,000,000	10,000,000

[1] Includes capital outlay as follows: June 30, 1959, $18,850; 1960, $10,275; 1961, $10,000.

1. Cost-sharing contracts and technical assistance are offered by the Department to aid farmers and ranchers to develop and carry out long-range conservation plans designed to minimize climatic hazards and protect their lands from erosion and deterioration by natural causes. This is a voluntary program which supplements other conservation programs and activities in designated counties of the 10 Great Plains States. Cost-sharing contracts extend from 3 to 10 years and include a plan of operations for the farm or ranch and a time schedule for installing eligible conservation practices. All contracts must terminate by December 31, 1971. The maximum cost-share rate offered in any contract does not exceed 80% of the average cost of installing each eligible practice. A limitation of $2,500 for cost shares for improving dams or ponds or for other irrigation practices is imposed. Producers are also limited to a maximum cost share of $2,500 for each year the contract is in force, or $25,000 for the maximum 10-year contract. The law limits the total cost shares that may be paid to producers to $25 million for any one program year and $150 million for the total program.

The producer who signs a Great Plains program contract is responsible for accomplishing his plan of operations as scheduled, and is encouraged to use all available sources of assistance under other local, State, or Federal programs that contribute to achieving conservation land treatment and economic stability of the farm or ranch unit.

2. *Relation of costs to obligations.*—The year-end balances of unpaid undelivered orders (representing primarily the uncompleted portion of contracts with farmers and ranchers for the installation of conservation practices) are as follows: 1958, $3,346,877; 1959, $11,218,654; 1960, $15,000,000; 1961, $17,000,000.
