The Service has been developing irrigation farming units for sale on the Eden Valley project in Wyoming, where the Bureau of Reclamation has constructed the water storage facility and the principal canals. All land leveling will have been completed by December 31, 1959, and all irrigation farming units are scheduled for sale by June 30, 1960. Technical assistance and guidance will be furnished to new settlers with respect to proper irrigation farming practices and soil and water conservation until the end of the 1961 crop season, unless the area of the project is earlier included within a soil conservation district. It is planned that the project office will be closed by December 31, 1961.

2. *Relation of costs to obligations.*—The year-end balances of unpaid undelivered orders are as follows: 1958, $38; 1959, $150.

AGRICULTURAL CONSERVATION PROGRAM SERVICE

Current authorizations:

AGRICULTURAL CONSERVATION PROGRAM

For necessary expenses to carry into effect the program authorized in sections 7 to [16] *15*, 16(a), and 17 of the Soil Conservation and Domestic Allotment Act, approved February 29, 1936, as amended (16 U.S.C. 590g–590(o), 590p(a), and 590q), including not to exceed $6,000 for the preparation and display of exhibits, including such displays at State, interstate, and international fairs within the United States, [$241,500,000] *$242,600,000*, to remain available until December 31 of the next succeeding fiscal year for compliance with the program of soil-building and soil- and water-conserving practices authorized under this head in the Department of Agriculture and Farm Credit Administration Appropriation Act, [1959] *1960*, carried out during the period July 1, [1958] *1959*, to December 31, [1959] *1960*, inclusive: *Provided*, That not to exceed $26,832,950 of the total sum provided under this head shall be available during the current fiscal year for administrative expenses for carrying out such program, the cost of aerial photographs, however, not to be charged to such limitation; but not more than [$5,424,200] *$5,458,900* shall be transferred to the appropriation account "Administrative expenses, section 392, Agricultural Adjustment Act of 1938": *Provided further*, That none of the funds herein appropriated shall be used to pay the salaries or expenses of any regional information employees or any State information employees, but this shall not preclude the answering of inquiries or supplying of information at the county level to individual farmers: *Provided further*, That such amounts shall be available for administrative expenses in connection with the formulation and administration of the [1960] *1961* program of soil-building and soil- and water-conserving practices, under the Act of February 29, 1936, as amended (amounting to [$250,000,000] *$100,000,000*, including administration, and no participant shall receive more than $2,500, except where the participants from two or more farms or ranches join to carry out approved practices designed to conserve or improve the agricultural resources of the community): [*Provided further*, That no change shall be made in such 1960 program which will have the effect in any county, of restricting eligibility requirements or cost-sharing on practices included in either the 1957 or the 1958 programs, unless such change shall have been recommended by the county committee and approved by the State committee: *Provided further*, That the proportion of the State fund initially allocated to any county for the 1960 program shall not be reduced from the distribution of such fund for the 1958 program year:] *Provided further*, That not to exceed 5 per centum of the allocation for the [1960] *1961* agricultural conservation program for any county may, on the recommendation of such county committee and approval of the State committee, be withheld and allotted to the Soil Conservation Service for services of its technicians in formulating and carrying out the agricultural conservation program in the participating counties, and shall not be utilized by the Soil Conservation Service for any purpose other than technical and other assistance in such counties, and in addition, on the recommendation of such county committee and approval of the State committee, not to exceed 1 per centum may be made available to any other Federal, State, or local public agency for the same purpose and under the same conditions: *Provided further*, That for the [1960] *1961* program $2,500,000 shall be available for technical assistance in formulating and carrying out agricultural conservation practices and $1,000,000 shall be available for conservation practices related directly to flood prevention work in approved watersheds: *Provided further*, That such amounts shall be available for the purchase of seeds, fertilizers, lime, trees, or any other farming material, or any soil-terracing services, and making grants thereof to agricultural producers to aid them in carrying out farming practices approved by the Secretary under programs provided for herein: *Provided further*, That no part of any funds available to the Department, or any bureau, office, corporation, or other agency constituting a part of such Department, shall be used in the current fiscal year for the payment of salary or travel expenses of any person who has been convicted of violating the Act entitled "An Act to prevent pernicious political activities", approved August 2, 1939, as amended, or who has been found in accordance with the provisions of title 18, United States Code, section 1913, to have violated or attempted to violate such section which prohibits the use of Federal appropriations for the payment of personal services or other expenses designed to influence in any manner a Member of Congress to favor or oppose any legislation or appropriation by Congress except upon request of any Member or through the proper official channels. (*Department of Agriculture and Farm Credit Administration Appropriation Act, 1960.*)

Appropriation (new obligational authority)	235,000,000	241,500,000	242,600,000

[1] Includes capital outlay as follows: June 30, 1959, $11,100; 1960, $10,000; 1961, $10,000.

NOTE.—Reimbursements from non-Federal sources above are from proceeds of sale of aerial photographs (7 U.S.C. 1387).

The program is designed to encourage conservation by sharing with farmers and ranchers the cost of carrying out approved soil-building and soil- and water-conserving practices which farmers generally would not perform to the needed extent with their own resources. The rate of cost-sharing, which may be given in the form of conservation materials and services or a payment after completion of the practice, averages approximately 50% of the cost.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

Conservation measures for which cost-sharing is offered include those which are primarily for (*a*) establishment of permanent protective cover, (*b*) improvement and protection of established vegetative cover, (*c*) conservation and disposal of water, (*d*) establishment of temporary vegetative cover, and (*e*) temporary protection of soil from wind and water erosion.

Under the 1958 program, new or additional practices were established on 1,083,706 farms and ranches, consisting of 33% of the cropland and 33% of all farmland in the United States. The following practices were installed under the 1958 program:

Dams and reservoirs	number	62,469
Drainage	acres	1,644,878
Leveling land to conserve irrigation water and control erosion	acres	345,532
Standard terraces	acres	855,861
Diversion and spreader terraces	miles	4,826
Stripcropping	acres	486,288
Control of competitive shrubs on range or pasture	acres	1,494,044
Tree planting	acres	323,892
Liming materials applied for soil-conserving grass and legume crops	tons	16,844,971
Permanent sod waterways	acres	48,866
Timber-stand improvement	acres	321,253
All vegetative cover	acres	12,661,735

Funds are distributed among the States on the basis of conservation needs. They are, in turn, distributed by the agricultural stabilization and conservation State committees to counties, and the agricultural stabilization and conservation county committees make commitments for conservation practice cost-sharing to eligible farmers and ranchers.

Loans from Commodity Credit Corporation are used to make advance payments to vendors for conservation materials and services furnished to farmers and ranchers prior to the time funds are appropriated each year. Repayment is made from balances of prior appropriations or from new funds appropriated.

The status of the loan account is:

AMOUNTS REPAID OR ESTIMATED TO BE REPAID ON COMMODITY CREDIT CORPORATION LOANS

	1959 actual	*1960 estimate*	*1961 estimate*	*Total*
Balance of 1958 loan	$22,500,000	----------	----------	$22,500,000
1959 loan	10,500,000	$29,500,000	----------	40,000,000
1960 loan	----------	7,400,000	$30,800,000	38,200,000
Total	33,000,000	36,900,000	30,800,000	100,700,000
Interest	86,073	236,824	200,000	522,897

A program level of $100 million for the 1961 crop year is proposed, a reduction of $150 million below the 1960 program. It is anticipated that Federal cost-sharing assistance under the 1961 program will be directed toward conservation measures in each county which will contribute to less intensive use of cropland, and that assistance will be curtailed or eliminated for those conservation measures which will contribute to an early increase in production. Payments for the 1961 program will be made from the 1962 appropriation.

4. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources and applicable adjustment as reflected in the following table:

	1958 actual	*1959 actual*	*1960 estimate*	*1961 estimate*

AGRICULTURAL CONSERVATION PROGRAM SERVICE—Continued

Current authorizations—Continued

EMERGENCY CONSERVATION MEASURES—Continued

Cost-sharing assistance (up to 80% of the cost of carrying out approved practices) is offered to assist and encourage farmers to rehabilitate farmlands damaged by natural disasters. Assistance is available only when, as a result of wind erosion, floods, hurricanes, or other natural disasters, new conservation problems have been created which (*a*) if not treated, will impair or endanger the land; (*b*) materially affect the productive capacity of the land; (*c*) represent damage which is unusual in character and, except for wind erosion, is not the type which would recur frequently in the same area; and (*d*) will be so costly to rehabilitate that Federal assistance is or will be required to return the land to productive agricultural use.

Funds for emergency cost-sharing assistance are distributed among States on the basis of needs for restoration of damaged lands.

ALLOTMENTS RECEIVED FROM OTHER ACCOUNTS

NOTE.—Obligations incurred under allotments from other accounts are included in the schedules of the parent appropriations as follows:
"Conservation reserve program," Commodity Stabilization Service.
"Great Plains conservation program," Soil Conservation Service.

AGRICULTURAL MARKETING SERVICE

Current authorizations:

MARKETING RESEARCH AND SERVICE

For expenses necessary to carry on research and service to improve and develop marketing and distribution relating to agriculture as authorized by the Agricultural Marketing Act of 1946 (7 U.S.C. 1621–1627) and other laws, including the administration of marketing regulatory acts connected therewith: *Provided,* That appropriations hereunder shall be available pursuant to 5 U.S.C. 565a for the construction, alteration, and repair of buildings and improvements, but unless otherwise provided, the cost of erecting any one building shall not exceed [$10,000] *$17,500,* except for two buildings to be constructed or improved at a cost not to exceed [$20,000] *$35,000* each, and the cost of altering any one building during the fiscal year shall not exceed [$3,750] *$7,500* or [3] *6* per centum of the cost of the building, whichever is greater:

Marketing research and agricultural estimates: For research and development relating to agricultural marketing and distribution, for analyses relating to farm prices, income and population, and demand for farm products, and for crop and livestock estimates, [$15,344,500] *$16,571,500*: *Provided,* That not less than $350,000 of the funds contained in this appropriation shall be available to continue to gather statistics and conduct a special study on the price spread between the farmer and the consumer: *Provided further,* That no part of the funds herein appropriated shall be available for any expense incident to publishing estimates of apple production for other than the commercial crop;

Marketing services: For services relating to agricultural marketing and distribution, for carrying out regulatory acts connected therewith, [including the Packers and Stockyards Act, as amended September 2, 1958,] and for administration and coordination of payments to States, [$26,072,600, of which $15,000 shall be available for range and feedlot market reporting in Colorado and adjacent areas and] *$26,570,400,* including not to exceed $25,000 for employment at rates not to exceed $50 per diem, except for employment in rate cases at not to exceed $100 per diem pursuant to the second sentence of section 706(a) of the Organic Act of 1944 (5 U.S.C. 574), as amended by section 15 of the Act of August 2, 1946 (5 U.S.C. 55a), in carrying out section 201(a) to 201(d), inclusive, of title II of the Agricultural Adjustment Act of 1938 (7 U.S.C. 1291) and section 203(j) of the Agricultural Marketing Act of 1946. (*5 U.S.C. 511–512, 541a, 556b, 563–564, 575; 7 U.S.C. 51–65, 71–87, 91–99, 181–229, 241–273, 411, 411a, 411b, 414a, 415b–415e, 423, 440, 471–476, 491–497, 499a–499s, 501–508, 511–511q, 516, 581–589, 951–957, 1551–1610; 15 U.S.C. 251–257i; 21 U.S.C. 94a, 451–469; 26 U.S.C. 4851–4854, 4861–4865, 4871–4877, 6001, 6804, 7233, 7263, 7492, 7493, 7701; 31 U.S.C. 725d; Department of Agriculture and Farm Credit Administration Appropriation Act, 1960.*)

Appropriated 1960, **$41,417,100** Estimate 1961, [a] **$43,141,900**

[a] Includes $50,000 for activities previously carried under "Salaries and expenses," Agricultural Research Service. The amount obligated in 1960 is shown in the schedule as a comparative transfer.

Program and Financing

New obligational authority:			
Appropriation	$34,854,000	$41,417,100	$43,141,900
Transferred from "Conservation reserve program," Commodity Stabilization Service (73 Stat. 34)	3,112,700		
Appropriation (adjusted)	37,966,700	41,417,100	43,141,900

[1] Includes capital outlay as follows: June 30, 1959, $596,919; 1960, $334,000; 1961, $379,700.
[2] Includes capital outlay as follows: June 30, 1959, $35,859; 1960, $26,400; 1961, $26,400.

The domestic agricultural marketing and distribution functions of the Department are concentrated primarily in the Agricultural Marketing Service. The marketing job has become more complex with growth and shift in population, technological developments in production and marketing, and as more functions have been transferred from the farm and home to various segments of the marketing system. The work under this appropriation is aimed at aiding in the orderly and efficient marketing and effective distribution of agricultural products from the Nation's farms to the consumers.

1. *Marketing research and agricultural estimates—(a) Marketing research.*—This work is aimed at developing practical answers to problems encountered in moving products from the farm to the consumer. In cooperation with public and private agencies and trade groups, efforts are made to expand markets, reduce losses from waste and spoilage, and reduce marketing costs through improved marketing efficiency and organization. The work includes research at each stage of marketing, such as at assembly points, terminal or central markets, and retail markets.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

In 1959, research was conducted on more than 500 projects each aimed at a specific marketing research problem. Work was completed or discontinued on 109 projects and started on 77 new projects in 1959. The findings of this research were made public primarily through about 115 marketing research reports and other printed documents in addition to about 350 periodic reports, addresses, and extracted reprints in farm and trade journals. Additional dissemination of these results was obtained through articles reviewing research findings in various general and trade journals and approximately 100 press releases. During the year 40 new contracts providing for marketing research work by private firms and other non-Federal agencies were negotiated. In total, 59 contracts were active at the close of 1959. The proposed increase for 1961 would be used to find solutions to urgent problems dealing with the marketing and distribution system for agricultural products.

(*b*) *Economic and statistical analysis.*—This work involves the collection, analysis and interpretation of data affecting agricultural prices, farm income, supply and consumption of farm products, trends in farm population, and changes in the level of living of farm people. The results of these studies are made available through situation, outlook and research reports which serve as the basis for much of the economic work done by the Extension Service, farm organizations, businessmen, and organizations handling farm products. Farmers and others rely on information from these reports in planning the most profitable adjustments in their operations and marketing programs. Approximately 80 of the 90 outlook and situation reports published by the Department were issued under this activity. Further technical reporting of economic and statistical analysis activities was contained in about 34 reports published during 1959.

(*c*) *Crop and livestock estimates.*—This service provides the official estimates on agriculture, including acreage, yield, and production of crops, stocks and value of farm commodities, numbers and inventory value of livestock items, and prices paid and received by farmers. These data also are basic to computation of parity prices. Data on approximately 150 crop and livestock products are covered in more than 500 reports issued each year. The activity is conducted through 42 State offices serving 49 States, most of which are operated as joint State and Federal services. Cooperative arrangements permit the States to obtain a great deal of data which would not be collected or made available from Federal funds. During 1959, cooperating States expended an estimated $1.34 million of their own funds on these associated State programs. A comparison of activity data for 1958 and 1959, including work performed under cooperative arrangements, is as follows:

	1958 actual	*1959 actual*
Separate mailings of inquiry forms, average per field office	340	344
Total questionnaires handled, all field and D.C. offices:		
Number distributed	9,300,000	9,500,000
Number of returns tabulated	2,850,000	2,900,000
Number of official reports issued, all offices	8,600	8,600
Copies of reports distributed	13,100,000	13,200,000
Publications distributed:		
Federal (mainly Agricultural Situation)	3,100,000	3,100,000
State: Statistical and other	360,000	360,000
Special requests for information answered	73,000	75,000

The increase for 1961 would be used to put into effect some initial steps in the long-range program to improve crop and livestock estimating service, to expand the agricultural reporting service in Hawaii, and to initiate full-time service in Alaska.

2. *Marketing services*—(*a*) *Market news service.*—This service provides current information on supply, movement, and prices at specific markets for practically all agricultural commodities. This day-to-day market information enables American farmers to determine where and when to sell and at what price. The information is collected and disseminated at year-round and seasonal offices maintained in more than 100 cities and towns, often with financial support and cooperation of the States. Every available means of dissemination is used—mail, press, radio, television, telephone, telegraph, bulletin boards, and trade and farm publications.

MARKET NEWS SERVICE

	1957 actual	*1958 actual*	*1959 actual*
States covered by cooperative agreement	38	39	40
Field offices:			
Year-round	173	176	181
Seasonal	39	51	52
Buyers and sellers interviewed	19,608	21,734	21,742
Daily newspapers carrying reports (approximate)	1,200	1,200	1,200
Stations broadcasting reports:			
Radio	1,461	1,460	1,470
Television	149	150	165
Mimeographed releases to growers, shippers, and others	32,244,428	28,844,077	25,733,345
Names on mailing list	303,651	302,646	295,139

(*b*) *Inspection, grading, classing, and standardization.*—Uniform standards of quality for agricultural products are established and applied to specific lots of produce to promote confidence between buyers and sellers; reduce hazards in marketing due to misunderstandings and disputes arising from the use of nonstandard descriptions; encourage better preparation of products for market; and furnish consumers with more definite information on the quality of products they buy. The standards are applied directly by or under the supervision of Federal employees at the request of any interested party, and generally for a fee. Approximately 70% of the total cost of this work was offset by fees and other revenue in 1959, which are shown principally under "Agricultural Marketing Service trust funds" in part III of the budget.

The proposed increase for 1961 would be used to provide more effective supervision of the greatly expanded volume of inspections by licensees under the U.S. Grain Standards Act, as amended.

STANDARDIZATION ACTIVITIES

	1957 actual	*1958 actual*	*1959 actual*
Grade standards in effect	3,151	[1] 1,379	1,385
Number of commodities covered	268	276	277

[1] Reduction due to revised method of tabulating tobacco grades and types.

INSPECTION, GRADING, AND CLASSING ACTIVITIES UNDER APPROPRIATED FUNDS

	1959 actual	*1960 estimate*	*1961 estimate*
Cotton classings by Federal employees—number	16,520,319	17,500,000	17,500,000
Poultry products inspection:			
Volume inspected—1,000 lbs	3,298,271	7,496,874	7,991,643
Grain inspections by licensees—number	3,511,548	3,600,000	3,700,000
Volume inspected—1,000 bu	6,419,624	6,600,000	6,700,000
Tobacco auction markets—number	177	177	177
Volume inspected at markets—million lbs	1,765	1,850	1,850
Sets of buyers—number	240	240	240

(*c*) *Freight rate services.*—Assistance is provided to farmers and others in obtaining and maintaining equitable and reasonable transportation rates and services on farm products and supplies. The Department in 1959 participated in 79 formal litigation actions before the Interstate Commerce Commission and other regulatory bodies and carried on 60 informal negotiations with carriers and groups of carriers.

AGRICULTURAL MARKETING SERVICE—Continued

Current authorizations—Continued

MARKETING RESEARCH AND SERVICE—Continued

(*d*) *Regulatory activities.*—These include the administration of regulatory laws such as packers and stockyards, standard container, U.S. warehouse, and Federal seed, to assure fair play in the market place and protect producers and handlers of agricultural commodities from financial loss due to deceptive, careless, or fraudulent marketing practices. The continued growth of facilities and means for storing, buying, and selling results in more demand and need for protection and benefits of regulatory laws. The increase for 1961 would be used to provide for more adequate enforcement of the Packers and Stockyards Act, as amended; to initiate work on one aspect of the amendment to the Federal Seed Act approved August 1, 1958, relating primarily to labeling requirements; and to relieve the increasingly heavy workload on mandatory testing of seed offered for importation through north central U.S. ports of entry.

	1959 actual	*1960 estimate*	*1961 estimate*
Packers and Stockyards Act:			
Yards eligible for posting and supervision (estimated)	2,300	2,300	2,300
Yards posted and supervised	1,528	2,200	2,300
Warehouse Act:			
Number of licensed warehouses	1,716	1,750	1,775
Capacity of licensed warehouses:			
Grain (million bushels)	1,030.3	1,175.0	1,200.0
Cotton (million bales)	13.3	13.6	13.6
Average number of supervisory inspections per warehouse	1.74	1.70	1.65
Seed Act:			
Import actions	16,472	17,000	18,500
Interstate investigations:			
Completed	769	850	850
Pending	736	900	1,050
Seed samples tested	20,018	20,800	23,800

(*e*) *Administration and coordination of State payments.*—This covers the activity required in administering and coordinating the marketing service work performed by the States and financed jointly by State funds and Federal funds provided by the appropriation "Payments to States and possessions." In 1959, this work was carried on in 42 States.

3. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources and applicable adjustment as reflected in the following table:

	1958 actual	*1959 actual*	*1960 estimate*	*1961 estimate*
Selected resources at end of year:				
Unpaid undelivered orders (appropriation balances obligated for goods and services on order not yet received)	$1,277,691	$1,251,123	$1,251,123	$1,251,123
Advances (payment for goods and services on order not yet received)	7,500	5,000	5,000	5,000
Total selected resources at end of year	1,285,191	1,256,123	1,256,123	1,256,123
Selected resources at start of year (−)		−1,285,191	−1,256,123	−1,256,123
Adjustment of prior year costs and selected resources reported at start of year		119,220		
Obligations incurred for costs of other years, net		90,152		

Object Classification

	1959 actual	1960 estimate	1961 estimate

PAYMENTS TO STATES[, TERRITORIES,] AND POSSESSIONS

For payments to departments of agriculture, bureaus and departments of markets, and similar agencies for marketing activities under section 204(b) of the Agricultural Marketing Act of 1946 (7 U.S.C. 1623(b)), $1,195,000. (*Department of Agriculture and Farm Credit Administration Appropriation Act, 1960.*)

Appropriated 1960, **$1,195,000** Estimate 1961, **$1,195,000**

Program and Financing

	1959 actual	1960 estimate	1961 estimate
Program by activities:			
Payments for marketing service work (sec. 204(b) of the Agricultural Marketing Act of 1946) (total costs—obligations) (object class 11)	$1,160,000	$1,195,000	$1,195,000
Financing:			
Appropriation (new obligational authority)	1,160,000	1,195,000	1,195,000

Payments are made on a matching fund basis to State marketing agencies for carrying out specifically approved programs designed to bring about improved marketing. Under this activity, marketing specialists work with farmers, marketing firms, and agencies in solving marketing problems and in putting to use marketing research results.

This program covers such projects as methods of maintaining and improving the quality of products; ways of reducing marketing costs; expanding outlets for surplus products; and the collection and dissemination of special State and local market information and statistics. Through this cooperative approach, the Federal Government's leadership and funds are coupled with State resources and experience to aid in the solution of the most urgent local and area marketing problems.

In 1960, with 42 States conducting about 115 projects, the program is being carried on generally at the same level as in 1959, except for an appropriation increase provided for potato marketing. For 1961, the program level will be the same as in 1960.

Current	110,000,000	110,000,000	110,000,000
Permanent	35,000,000	43,657,248	40,000,000

[1] Includes capital outlay as follows: June 30, 1959, $16,724; 1960, $10,650; 1961, $10,600.

1. *Food assistance*, in the form of both funds and food, is provided to States and possessions in serving lunches to schoolchildren. Each State's portion of the funds available is determined by a statutory formula which takes into account the number of school-age children in the State and the relationship between the per capita income of the State and the average U.S. per capita income.

The program is operated under an agreement entered into by the State educational agency (which administers the program within the State) and the Department of Agriculture. Schools make application to the State agency and if accepted are reimbursed for a part of the food cost of each meal served.

In 1959 the States contributed to this program $690 million, most of which came from payments by children. This was far in excess of the $237 million necessary to meet the statutory matching requirement of $3 for each Federal dollar of cash payment.

In addition to providing cash assistance, this appropriation is used to purchase food for distribution to the schools according to their need under section 6 of the School Lunch Act. Transfers are made to this appropriation from the fund authorized under section 32 of the act of August 24, 1935, as amended, for the purchase and distribution of agricultural commodities and other foods pursuant to section 6 of the National School Lunch Act. Further, commodities acquired under price support programs and assistance through the special milk program are available to the schools. The volume of surplus commodities distributed to schools, however, is dependent upon market conditions and the need for the Federal Government to remove surpluses.

The program in 1959 during the peak month provided lunches to over 30% of the approximately 39.5 million schoolchildren in the country. The number of types A and B lunches served, which must meet established nutritional requirements, increased approximately 7% over 1958. Participation in the program in December 1958 reached 12.1 million children in 61,033 schools and an appreciable increase in number of participating children is expected in 1960 and 1961.

During 1959 about $620 million worth of agricultural commodities were used in the program. About 18% of this amount represented commodities contributed under section 6 of the School Lunch Act and the Federal surplus removal and price support programs.

Participation in the program from 1958 through 1961 is as follows:

	1958 actual	*1959 preliminary*	*1960 estimate*	*1961 estimate*
Number of schools (month of peak participation)	59,929	61,033	62,000	63,000
Number of schoolchildren (peak-thousands)	11,493	12,124	12,800	13,500
Number of meals served (millions)	1,883	2,008	2,130	2,260

Financing of the program in the last 3 years was as follows:

[In millions]

	1957	*1958*	*1959*
State and local contributions (total, including payments by children)	$573.5	$634.9	[1] $709.4
Federal appropriation:			
(a) Cash payments	83.8	83.7	93.9
(b) Commodity distribution (sec. 6)	14.7	14.8	42.7
Surplus commodity distribution	132.0	76.0	66.8
Special milk program	60.0	65.2	72.6
Federal contributions	290.5	239.7	276.0
Total, all contributions	864.0	874.6	985.4

[1] Preliminary.

2. *Operating expenses* consist of furnishing administrative and technical assistance to State agencies and participating schools; apportioning cash to States, Guam, Puerto Rico, and the Virgin Islands; administering directly the program for over 2,500 private schools where the State educational agency is prohibited by law from disbursing funds to such schools; procuring and distributing section 6 commodities; and formulating and administering overall policies and procedures, including audits and administrative reviews.

3. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources and applicable adjustments as reflected in the following table:

	1958 actual	*1959 actual*	*1960 estimate*	*1961 estimate*
Selected resources at end of year: Unpaid undelivered orders (appropriation balances obligated for goods and services on order not yet received)	$31,929	$28,377	$12,519	$12,519
Selected resources at start of year		−31,929	−28,377	−12,519
Adjustment of prior year costs and selected resources reported at start of year		82,788	15,858	
Obligations incurred for cost of other years, net		79,236

PERISHABLE AGRICULTURAL COMMODITIES ACT FUND

(Indefinite special fund)

Appropriated (est.) 1960, **$670,000** Estimate 1961, **$670,000**

Program and Financing

	1959 actual	1960 estimate	1961 estimate
Program by activities:			
1. Licensing dealers and handling complaints:			
Direct costs	$679,340	$749,300	$775,300
Reimbursable costs	25,400	25,400	25,400
Total program costs [1]	704,740	774,700	800,700
2. Relation of costs to obligations: Obligations incurred for costs of other years (unpaid undelivered orders), net	532		
Total program (obligations)	705,272	774,700	800,700
Financing:			
Unobligated balance brought forward	−$394,627	−$388,033	−$308,733
Advanced from "Marketing research and service" (7 U.S.C. 499s)	−25,400	−25,400	−25,400
Unobligated balance carried forward	388,033	308,733	203,433
Appropriation (new obligational authority)	673,278	670,000	670,000

[1] Includes capital outlay as follows: June 30, 1959, $1,594; 1960, $1,900; 1961, $2,200.

1. License fees are deposited in this special fund and are used to meet costs of administering the Perishable Agricultural Commodities, Produce Agency, and Export Apple and Pear Acts (7 U.S.C. 491–497, 499a–499s, 581–589).

These acts are aimed at assuring equitable treatment to farmers and others in the marketing of fresh and frozen fruits and vegetables. Commission merchants, dealers, and brokers handling these products in interstate and foreign commerce are licensed. Complaints of violations are investigated and violations dealt with by (*a*) informal settlements agreeable to both parties, (*b*) formal decisions involving payments of reparation awards between parties, and (*c*) suspension or revocation of license and/or publication of the facts. Approximately 25,000 licenses were in effect on June 30, 1959, and it is expected that licenses will remain at that level through 1961. Formal complaints have continued to increase and more than 2,500 are expected during the next fiscal year. Emphasis being directed to assist growers and shippers to correct or prevent misbranding of produce will tend to hold down the number of potential complaints. The increase in level of work in 1961 is primarily to strengthen the enforcement program including training of technical employees to replace employees now eligible for retirement.

2. *Relation of costs to obligations.*—The year-end balances of unpaid, undelivered orders are as follows: 1958, $550; 1959, $1,082; 1960, $1,082; 1961, $1,082.

Transferred to—			
"Promote and develop fishery products and research pertaining to American fisheries," Bureau of Commercial Fisheries, Department of the Interior (15 U.S.C. 713–c, as amended by act of Aug. 8, 1956)	−4,786,415	−4,993,642	−4,800,000
"School lunch program," Agricultural Marketing Service (72 Stat. 194; 73 Stat. 173)	−35,000,000	−43,657,248	−40,000,000
"Salaries and expenses," Foreign Agricultural Service (73 Stat. 173)		−2,493,000	−2,539,000
Appropriation (adjusted)	196,150,248	200,302,475	270,661,000

[1] Includes capital outlay as follows: June 30, 1959, $38,073; 1960, $30,000; 1961, $50,000.

Under section 32 of the act of August 24, 1935, as amended (7 U.S.C. 612c), an amount equal to 30% of customs receipts during each calendar year (except for an amount equal to 30% of such receipts collected on fishery products transferred to the Department of the Interior to encourage the distribution of fishery products), and unused balances up to $300 million are available for expanding domestic and foreign market outlets for farm commodities. Transfers are made from this fund to the school lunch program for the purchase and distribution of agricultural commodities and other foods pursuant to section 6 of the National School Lunch Act. These funds are also authorized for the administration of marketing agreements and orders, and the section 22 import-control programs. The basic legislation provides that funds devoted to any one commodity or product thereof must not exceed 25% of funds available. It also provides that the funds must be devoted principally to perishable agricultural commodities other than those receiving price support under title II of the Agricultural Act of 1949, as amended. It has been determined that this provision can be legally satisfied by setting aside or reserving the principal portion of section 32 funds for the use of perishable nonbasic agricultural commodities when the occasion arises warranting their use for such purpose.

1. *Commodity program payments* include direct purchases which are donated to the school lunch program, charitable institutions serving needy persons, and persons certified by welfare agencies as eligible for relief; diversion payments which enable processors to purchase surplus commodities on the domestic market, divert them to by-products and new uses, and sell them at prices comparable to competing products, thus creating new markets for surplus commodities; and export payments which enable exporters to purchase surplus commodities on the domestic market and sell them on the world market at competitive world prices (no funds were obligated for export programs in 1959). During the past 2 years assistance under these programs was given to the following commodity groups:

[In millions]

	1958	*1959*
Dairy products	$121.7	$101.2
Eggs and poultry	.1	6.4
Fruits	1.1	.1
Peanut butter	.9	1.1
Vegetables	2.4	7.6
Miscellaneous	−.1	.9
Total	126.1	117.3

The use of section 32 program funds is contingent upon economic conditions. The estimates for both 1960 and 1961 reflect in total the requirements based on the situation as now foreseen. Distribution of this total in advance would be highly tentative since the type of program to be used is dependent upon a determination at the time of the kind of action which will best meet the particular need which had developed. If troublesome surpluses not now foreseen should develop, steps would be taken to use additional available funds for their removal or diversion as conditions might warrant.

2. *Surplus removal operating expenses.*—These expenses are mainly in connection with purchasing, exporting, and diverting surplus commodities and in distributing section 32 and Commodity Credit Corporation commodities to eligible outlets. Distribution in 1959, including that under section 6 of the National School Lunch Act, is summarized below:

Distribution	*Number of recipients (peak month) (millions)*	*Value of commodities distributed (millions)*	*Pounds of commodities distributed (millions)*
By recipients:			
School children	14.1	$109.5	453.5
Needy persons	5.7	107.0	706.8
Persons in charitable institutions	1.4	29.8	156.0
Foreign countries: 91		209.8	1,867.2
Total		456.1	3,183.5
By program:			
Sec. 32		118.1	317.1
Donation by Commodity Credit Corporation under sec. 416		295.3	2,662.6
Sec. 6, National School Lunch Act		42.7	203.8
Total		456.1	3,183.5

Supervisory assistance is furnished local and State groups to encourage the preservation of surpluses for year-round use. In cooperation with the food trade, press and radio, greater consumption of abundant foods is encouraged. In 1959, the monthly plentiful foods list contained an average of 10 foods, and 10 national and 18 area, State, and local drives were conducted.

3. *Marketing agreements and orders.*—These are put into effect upon request of producers or handlers after hearings and investigations, and approval by producers (and handlers in case of marketing agreements). They help to stabilize prices and benefit producers and consumers by establishing and maintaining orderly marketing conditions. Administration at the local level is financed by assessments upon handlers. On June 30, 1959, there were 78 orders in effect for milk and 37 covering tree fruits, tree nuts, and vegetables.

[1] Includes capital outlay as follows: June 30, 1959, $102,689; 1960, $91,000; 1961, $85,000.

The Foreign Agricultural Service administers programs and policies relating to foreign agriculture. It provides information and assistance as guides in the planning of production and marketing of U. S. agricultural commodities and helps smooth the channels through which exports move.

Direct appropriation—1. *Analysis of foreign agriculture and trade.*—Analyses are made of world trends in foreign agricultural production, trade, price, finance, marketing, consumption, competition, commercial, and trade policies, and economic policies of foreign governments, as such trends affect U.S. foreign agricultural trade and the domestic economy. The Service directs and coordinates Department participation in the formulation of trade programs and agreements to stabilize and expand world trade in American agricultural products, and to reduce restrictive tariff and trade practices against import of American agricultural commodities. Recommendations for the departmental positions on trade agreements and international commodity agreements are formulated. Continuous review is made of the trade regulations and financial conditions of signatories to the General Agreement on Tariffs and Trade in American farm products. Policies, programs, positions, and standards of participation in public and private international organizations are developed.

2. *Agricultural attachés.*—A worldwide agricultural attaché program is conducted by the Department. Assistance is provided in development of markets abroad for U.S. agricultural commodities. A comprehensive schedule of foreign agricultural market and trade reporting to meet the needs of the American agricultural industry is maintained.

Transfer from Removal of surplus agricultural commodities—3. *Foreign market promotion.*—Maintenance and expansion of foreign markets for surplus agricultural products are promoted by (*a*) obtaining and analyzing information on foreign-market requirements and making such information available to farm and trade groups; (*b*) developing market programs for use by producers, exporters, and Government officials to maintain and expand the market abroad of U.S. farm products; (*c*) assisting domestic trade representatives in negotiations with foreign government officials, importers, and consumers, and bringing together American exporters and foreign importers under conditions favorable to trade; (*d*) developing agreements with foreign countries for sales of U.S. agricultural commodities under title I of Public Law 480, and followup on the shipments of those commodities; and (*e*) directing the operation of market development projects to further expand foreign markets for agricultural products with foreign currencies generated under title I of Public Law 480.

4. *Import controls.*—Importation of articles which interfere with programs carried out by the Department of Agriculture is investigated and the information is developed in accordance with section 22 of the Agricultural Adjustment Act, as amended. During 1959, investigations were conducted on 14 commodities and 3 recommendations were submitted to the President or the Tariff Commission. Under import controls for dairy products, a total of 1,792 licenses for imports of cheese were issued and 188 for manufactured dairy products other than cheese.

5. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources and applicable adjustment as reflected in the following table:

	1958 actual	*1959 actual*	*1960 estimate*	*1961 estimate*
Selected resources at end of year: Unpaid undelivered orders (appropriation balances obligated for goods and services on order not yet received)	$50,338	$69,289	$69,289	$69,289

SALARIES AND EXPENSES (SPECIAL FOREIGN CURRENCY PROGRAM)

For purchase of foreign currencies which accrue under title I of the Agricultural Trade Development and Assistance Act of 1954, as amended (7 U.S.C. 1704), for the purposes of market development activities under section 104(a) of that Act, $13,621,800, and for the purposes of section 104(m) of that Act, relating to agricultural and horticultural fair participation and related activities, $1,000,000, to remain available until expended, of which amounts not less than $4,400,000 shall be available to purchase currencies which the Treasury Department shall determine to be excess to normal requirements of the United States: Provided, That this appropriation shall not be used for the purchase of currencies available in the Treasury for the purposes of section 104(f) of such Act unless such currencies are excess to the normal requirements of the United States: Provided further, That the dollar value of the unexpended balances, as of June 30, 1960, of allocations of foreign currencies heretofore made available to the Foreign Agricultural Service for the foregoing purposes of such sections 104 (a) and (m) is appropriated as of that date and shall be merged with this appropriation.

New obligational authority:			
Indefinite (proposed in appropriation language above)		$9,309,093	
Definite			$14,621,800
Appropriation		9,309,093	14,621,800

NOTE.—The gross foreign currency authorization in 1960 is $5,843,378. The schedule above covers foreign currency authorizations for 1959 and 1960. The appropriation recommended for 1960 is equal to the unexpended balance of previous foreign currency authorizations as of June 30, 1960. All transactions in 1961 relate to appropriations.

1. *Market development projects.*—Foreign currencies, generated by the sale of surplus agricultural commodities under title I of the Agricultural Trade Development and Assistance Act of 1954, as amended, are used by the Department under the provisions of section 104(a) by the Foreign Agricultural Service to develop new foreign markets and expand existing markets for U.S. agricultural commodities, including cotton, dairy products, fats and oils, grain, feed, livestock and meat, poultry, fruits and vegetables, and tobacco. The type of market development projects being carried out include sales promotion campaigns, trade fairs and exhibits, nutrition demonstrations, and market analyses. At June 30, 1959, there were 336 market development projects operating in 37 countries with the assistance of both United States and foreign cooperators. Total estimated cost in U.S. dollars (charged to regular appropriation) of the initiation and supervision of market development projects in 1961, $254,000.

2. *Agricultural attachés.*—Foreign currencies were used in 1959 and are being used in 1960 where practicable to pay certain costs of the agricultural attachés.

3. *Agricultural and horticultural exhibitions.*—Foreign currencies are used to finance U.S. participation in foreign agricultural and horticultural fairs and related activities pursuant to section 104(m) of the Agricultural Trade Development and Assistance Act of 1954, as amended.

4. *Travel of U.S. agricultural specialists abroad.*—Foreign currencies are being used in 1959 and 1960, pursuant to section 104(f) of the Agricultural Trade Development and Assistance Act of 1954, as amended, to finance the travel of U.S. agricultural specialists to the U.S.S.R. under the cultural, technical, and educational exchange agreement between the two countries.

5. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources and applicable adjustment as reflected in the following table:

[1] Includes capital outlay as follows: June 30, 1959, $2,418; 1960, $2,500; 1961, $2,500.

The major objectives of the Commodity Exchange Authority are to maintain fair and competitive pricing in the commodity futures markets by preventing manipulation and other abusive trading practices. Enforcement of the Commodity Exchange Act requires supervision over futures trading in 21 commodities on 16 exchanges currently designated as contract markets. Transactions on contract markets were estimated at 7,100,000 in 1959, and the value of trading approximately $27 billion.

1. *Licensing.*—Commission merchants and floor brokers are registered annually. In 1959 there were 503 commission merchants and 778 floor brokers so registered, and it

COMMODITY EXCHANGE AUTHORITY—Continued

Current authorizations—Continued

SALARIES AND EXPENSES—Continued

is estimated that the same number will be registered in 1961. Exchange rules and regulations are reviewed to insure that legal requirements are met.

2. *Supervision of futures trading.*—This embraces (*a*) examination and analysis of reports and other market data, the making of market position surveys, and publication of summary data; (*b*) establishment, review, and enforcement of speculative limits; and (*c*) cooperative activities with control committees of contract markets. In 1959, position surveys covered 4,303 traders.

REPORTS TABULATED AND ANALYZED

	1959 actual	*1960 estimate*	*1961 estimate*
Daily trading volume and open contracts	221,793	225,000	225,000
Daily and weekly reports on large traders	268,520	275,000	275,000
Delivery notices	37,703	40,000	40,000

3. *Audits.*—Misuse of customers' funds is prevented by (*a*) audit and examination of books of futures commission merchants and (*b*) analysis of brokers' and traders' books and financial statements. The 1959 audits revealed that customers had to their credit $95,884,543 required to be segregated from the funds of the carrying brokers, compared with $81,672,368 in 1958.

Acreage allotment and marketing quota programs are designed to keep the production and marketing of cotton, wheat, rice, tobacco, and peanuts, in line with demand in order to give each farmer a fair share of the available market and the total production required.

Acreage allotments, when necessary, are established at national, State, and county levels (only at State level in the case of tobacco). In general, the acreage allotted to any county is apportioned by farmer-elected county committeemen. National marketing quotas must be proclaimed whenever the total supply for the above basic

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

commodities reaches a level specified in the Agricultural Adjustment Act of 1938, as amended. However, quotas do not become effective unless approved by two-thirds of those voting in a farmer referendum.

Acreage allotments and marketing quotas have been proclaimed for the 1960 crops of wheat, peanuts, flue-cured tobacco, rice, and upland and extra long staple cotton and are indicated for the other kinds of quota tobaccos. For the 1961 crops the estimates provide for continuation of acreage allotments and marketing quotas on all these basic commodities. The choice B plan authorized by the Agricultural Act of 1958 under which cotton producers may elect to take an increase of not to exceed 40% (as determined by the Secretary) in their acreage allotments, coupled with a 15% parity reduction in price support, will not apply to the 1961 or subsequent crops of upland cotton and farmers will receive only their regular cotton acreage allotments.

Work in the fiscal years 1960 and 1961 will consist primarily of the following:

Job	*Tobacco*	*Peanuts*	*Wheat*	*Cotton*	*Rice*
Collecting, reviewing, and compiling basic data, and reconstituting farms; reviewing, processing, and recording basic farm data; determining, computing, compiling, and reviewing farm allotments, preparing and issuing allotment notices and marketing cards (estimated number of allotment farms)	579,964	118,053	1,824,075	960,250	16,689
Handling appeals	15,000	1,200	45,000	19,500	450
Performance checking (percent of crop farms measured):					
Fiscal year 1960:

Total program (obligations)	76,000,000	71,500,000	74,500,000
Financing:			
Appropriation (new obligational authority)	76,000,000	71,500,000	74,500,000

The Service determines total U.S. requirements and quotas to provide consumers with adequate supplies of sugar at reasonable prices, to protect the domestic sugar industry and to promote export trade for the five domestic sugar producing areas, the Philippines, Cuba, and other foreign countries. The quota for each domestic area is allotted to individual sellers when necessary to achieve orderly marketing, and restrictive farm acreage allotments are established for producers when necessary to avoid surpluses.

1. *Payments to sugar producers.*—Payments are made (*a*) to domestic producers of cane and beets who meet specified conditions of employment, production, and price; and (*b*) for abandonment of planted acreage and crop deficiencies on harvested acreage due to natural calamities.

An increase of $3 million is proposed for 1961 due to increased conditional payments to sugar producers.

Estimated production by areas is shown in the following table.

SHORT TONS, RAW VALUE

Area	*1958 crop year*	*1959 crop year*	*1960 crop year*
Continental beet area	2,212,000	2,350,000	2,400,000
Continental cane area	579,000	700,000	750,000
Hawaii	765,000	975,000	1,065,000
Puerto Rico	1,087,000	1,250,000	1,350,000
Virgin Islands	6,200	12,500	10,000
Total	4,649,200	5,287,500	5,575,000

2. *Operating expense.*—This consists of the expense of (*a*) the agricultural stabilization and conservation State and county offices in establishing farm production controls, determining compliance, and making payments to producers, and (*b*) the Service's departmental work in determining sugar consumption requirements, establishing quotas and allotments, making fair wage and price determinations, establishing area production controls, and formulating overall policies and procedures.

4. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources and applicable adjustment as reflected in the following table:

The objective of this program is to help adjust total crop acreage more nearly in line with demand by withdrawing cropland from production and to establish and maintain sound conservation practices on the land withdrawn. The Secretary is authorized, through calendar year 1960, to enter into 3- to 15-year contracts with producers. In return for removing designated cropland from production and for establishing necessary conservation practices, the producer receives an annual rental payment each year of the contract period, and cost-sharing assistance for the establishment of the required practices. The Secretary may not enter into contracts with producers which would require payments to producers in excess of $375 million for the 1960 calendar year. Total annual rental payments to a producer are limited to $5,000.

Participation in the program is summarized below:

Number of agreements 1956–59 programs	246,220
Number of acres	22,422,159
Payments made in calendar year 1958, estimated	$116,961,757
Estimated payments made in calendar year 1959	$332,105,000

Under the 1960 program it is contemplated that at least an additional 5.1 million acres on 55,000 farms will be placed in the conservation reserve. This will make a total of about 28 million acres on 301,200 farms in the program.

2. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources and applicable adjustment as reflected in the following table:

Selected resources at end of year: Inventories and items on order:	*1958 actual*	*1959 actual*	*1960 estimate*	*1961 estimate*
Unpaid undelivered orders (appropriation balances obligated for goods and services on order not yet received)	$11,832	$348,059	$185,000	$60,000
Advances (payments for goods and services on order not yet received)	1,593,601	807,922	428,000	150,000
Total selected resources at end of year	1,605,433	1,155,981	613,000	210,000
Selected resources at start of year (−)		−1,605,433	−1,155,981	−613,000
Adjustment of prior year costs and selected resources reported at start of year		775,506		
Costs financed from obligations of other years, net (−)			−542,981	−403,000
Obligations incurred for costs of other years, net	326,054

Acreage Reserve

Program and Financing

	1959 actual	1960 estimate	1961 estimate
Program by activities:			
1. Acreage reserve program (total program costs)	$609,003,002		
2. Relation of costs to obligations: Obligations incurred for costs of other years, net	7,641		
Total program (obligations)	609,010,643		
Financing:			
Unobligated balance no longer available	439,357		
Appropriation (new obligational authority)	609,450,000		

1. The acreage reserve program was in effect for 3 crop years from 1956 through 1958. Producers were compensated for reducing their acreages for the six basic commodities: wheat, cotton, corn produced in the commercial corn-producing area, peanuts, rice, and most types of tobacco.

The appropriation act for 1959 provided for the termination of the program after the 1958 crop year. No funds are available in 1960 and none are requested for 1961. Liquidation costs are charged to the appropriation for the conservation reserve program.

2. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources and applicable adjustment as reflected in the following table:

	1959 actual	1960 estimate	1961 estimate
Program by activities:			
Conservation reserve program (total costs—obligations)			$32,000,000
Financing:			
Proposed supplemental appropriation			32,000,000

Under proposed legislation, 1961.—Legislation is being proposed to extend through the 1963 crop-year the Secretary's authority to enter into contracts for removing additional cropland from production, and to increase the statutory ceiling on amounts that may be paid to farmers in a calendar year from $450 to $600 million. The proposed legislation would provide specific authority for the Secretary of Agriculture to give special consideration, in formulating the 1961–63 programs, to areas where it is desirable to discourage the production of wheat and other surplus crops.

A program of $500 million is contemplated for the 1961 crop-year, consisting of $330 million for annual rental payments on 1960 and prior contracts and $170 million for new 1961 contracts. This would provide for removing about 9 million additional acres from production, making a total of about 37 million acres in the program through the crop-year 1961. A supplemental appropriation of $32 million will be required in the fiscal year 1961 for practice payments to farmers and ranchers and for operating expenses.

COMMODITY CREDIT CORPORATION

Financing applied to program	7,156,035,274	7,703,191,332	7,547,119,322

The Commodity Credit Corporation engages in buying, selling, lending, and other activities with respect to agricultural commodities, their products, food, feeds, and fibers, for the purpose of stabilizing, supporting, and protecting farm income and prices; assisting in the maintenance of balanced and adequate supplies of such commodities; and facilitating their orderly distribution. The Corporation also makes available materials and facilities required in connection with the production and marketing of such commodities.

The Corporation has an authorized capital stock of $100 million held by the United States, and authority to borrow up to $14.5 billion.

Programs.—The budget is based on the following types of programs: (*a*) price support, (*b*) commodity export, (*c*) storage facilities, (*d*) supply and foreign purchase (*e*) special milk program, and (*f*) special activities.

Obligations and expenditures for these programs include primarily loans, purchases, purchase agreements, carrying charges, incentive and other payments, operating and interest expenses, and advances and current obligations incident to special activities as authorized by specific legislation.

Budget assumptions.—The Corporation's budget estimates for 1960 and 1961 are based on the general assumptions (*a*) that employment, production, and national income will rise moderately both in 1960 and 1961 from the present level; (*b*) that prices will change little, on the average, from the present level; (*c*) that developments in international relations will not be such as to affect Government civilian programs generally; (*d*) that exports of agricultural products generally will be slightly higher than the 1959 level; (*e*) that acreage allotments and marketing quotas will be in effect for the 1960 crops of peanuts, rice, wheat, cotton and certain kinds of tobacco; (*f*) that acreage under the 1960 crop choice B cotton program will be about the same as that for the 1959 crop; and (*g*) that yields will be in line with recent averages.

In considering these estimates, it should be recognized that it is difficult to estimate requirements for the year ending June 30, 1961. They are dependent upon weather conditions and all other factors affecting volume of production of crops not yet planted in this country and abroad, economic conditions generally, food needs in occupied areas and other foreign countries, availability of dollar exchange, and other complex and unpredictable factors.

PRICE SUPPORT, SUPPLY, AND RELATED PROGRAMS AND SPECIAL MILK

1. *Price-support program.*—Price-support operations are carried out under the Corporation's charter powers (15 U.S.C. 714), in conformity with the Agricultural Act of 1949 (7 U.S.C. 1421), the Agricultural Act of 1954 (7 U.S.C. 1741), which includes the National Wool Act of 1954, the Agricultural Act of 1956 (7 U.S.C. 1442), the Agricultural Act of 1958 and with respect to certain types of tobacco, in conformity with the act of July 28, 1945, as amended (7 U.S.C. 1312). Under the Agricultural Act of 1949, price support is mandatory for the basic commodities—corn, cotton, wheat, rice, peanuts, and tobacco—and specific nonbasic commodities, namely, tung nuts, honey, milk, butterfat, and the products of milk and butterfat. Under the Agricultural Act of 1958, as producers of corn voted in favor of the new price-support program for corn authorized by that act, price support is mandatory for barley, oats, rye, and grain sorghums. Price support for wool and mohair is mandatory under the National Wool Act of 1954, through the marketing year ending March 31, 1962. Price support for other nonbasic agricultural commodities is discretionary except that whenever the price of either cottonseed or soybeans is supported, the price of the other must be supported at such level as the Secretary determines will cause them to compete on equal terms on the market. This program may also include operations to remove and dispose of or aid in the removal or disposition of surplus agricultural commodities for the purpose of stabilizing prices at levels not in excess of permissible price-support levels. Legislation will be proposed to the Congress to make the necessary changes in the price-support program, especially for wheat, to reduce the heavy demands of the program on the Federal Treasury.

Price support is made available through loans, purchase agreements, purchases, and other operations, and, in the case of wool and mohair, through incentive payments based on marketings. The producers' commodities serve as collateral for price-support loans. With limited exceptions, price-support loans are nonrecourse and the Corporation looks only to the pledged or mortgaged collateral for satisfaction of the loan. Under a provision of the 1960 Appropriation Act (Public Law 86–80) nonrecourse price support to any person on the 1960 production of any agricultural commodity declared by the Secretary of Agriculture to be in surplus supply is limited to $50,000. Exceptions are made if (*a*) such person reduces his production from the preceding year by a maximum of 20% or (*b*) if the borrower agrees to repay all amounts advanced in excess of $50,000 within a specified period. This limitation will expire June 30, 1960, unless continued by other legislation. Purchase agreements generally are available during the same period that loans are available. By sign-

Federal Reserve Bank of St. Louis

COMMODITY CREDIT CORPORATION—Continued

Public enterprise funds—Continued

COMMODITY CREDIT CORPORATION FUND—Continued

ing a purchase agreement, a producer receives an option to sell to the Corporation any quantity of the commodity which he may elect within the maximum specified in the agreement.

In all its price-support operations the Corporation utilizes normal trade facilities to the maximum extent practicable. In its lending activities the Corporation uses local banks, cooperatives, and other financial institutions. Commercial storage facilities are used to a great extent in the storage of loan collateral and in the storage of stocks acquired by the Corporation.

Disposition of commodities acquired by the Corporation in its price-support operations is made in compliance with sections 202, 407, and 416 of the Agricultural Act of 1949, and other applicable legislation, particularly the Agricultural Trade Development and Assistance Act of 1954 (7 U.S.C. 1691) as amended (Public Law 480), title I of the Agricultural Act of 1954 as amended, title II of the Agricultural Act of 1956 as amended, the Agricultural Act of 1958, the act of August 19, 1958, in the case of cornmeal and wheat flour and the act of September 21, 1959 (73 Stat. 574), with respect to sale of livestock feed in emergency areas. Public Law 480, as amended, authorizes the establishment by the Secretary, beginning February 1, 1960, and ending January 31, 1962, of a food stamp system of surplus food distribution to the needy to assist in disposing of food commodities acquired by the Corporation. The cost of such program may not exceed $250 million for any 12-month period.

To the extent that price-support commodities are disposed of through the commodity export program and special activities, such as sales for foreign currencies, the furnishing of commodities for various purposes, and similar operations, these disposals are for accounting purposes treated as price-support program disposals.

Investment in price support as of June 30	8,648	8,948	9,490
Net expenditures	2,608	1,080	1,569
Realized losses	805	980	899

2. *Commodity export program.*—The Corporation promotes the export of agricultural commodities and products through sales, barters, payments, and other operations. Such commodities and products may be those held in private trade channels as well as those in Commodity Credit Corporation's inventory. This program is carried out under the authority contained in the Corporation's charter, particularly sections 5(d) and 5(f), and in accordance with specific statutes where applicable, such as sections 407 and 416 of the Agricultural Act of 1949, the International Wheat Agreement Act of 1949 (7 U.S.C. 1641), the Agricultural Trade Development and Assistance Act of 1954, title I of the Agricultural Act of 1954 and title II of the Agricultural Act of 1956. In general, transactions involving foreign currencies are conducted pursuant to the Agricultural Trade Development and Assistance Act of 1954, as amended. However, other such transactions may be conducted under the charter authority.

Obligations under the International Wheat Agreement and titles I, II, and IV of the Agricultural Trade Development and Assistance Act of 1954, as amended, are paid by the Corporation subject to reimbursement from appropriations authorized for such purpose.

Currently, in addition to the exports under the International Wheat Agreement, Commodity Credit Corporation wheat is available for export trade under barter programs of Commodity Credit Corporation at competitive world prices and is also made available to exporters in payment of the price differential between the prevailing world export sales price and the domestic market price which is earned on exports of free-market wheat outside the International Wheat Agreement and under this agreement. Cash payments are made on all exports of wheat flour either under the International Wheat Agreement or outside the agreement. Wheat and flour payments outside the Agreement are made on exports to countries not participating in the Agreement.

In order to encourage movement of cotton, corn, barley, grain sorghums, oats, rye, and rice from free-market supplies into export channels, export payments are made in the form of these commodities from the Corporation's stocks.

Cotton held in the Corporation's inventory is also sold for unrestricted use on a competitive price basis. The Corporation also conducts a cotton products export program designed to protect the competitive position of the domestic cotton industry in relation to sales of cotton products manufactured abroad from American cotton purchased at export prices. Equalization payments, based on the raw cotton content in the products exported, are made to exporters on cotton products of upland cotton grown and wholly processed in the United States.

The Corporation also furnishes agricultural commodities and products for distribution or exhibition at international trade fairs to aid in the development of foreign markets for such commodities.

3. *Storage facilities program.*—This program is carried out under the authority contained in the Corporation's charter, particularly sections 4(h), 4(m), and 5 (a) and (b). The Corporation (*a*) purchases and maintains (in storage deficient areas) granaries and equipment for care and storage of grain owned or controlled by the Corporation; (*b*) makes loans for the construction or expansion of farm-storage facilities; (*c*) provides storage-use guarantees to encourage the construction of commercial storage facilities; and (*d*) undertakes other operations necessary to provide storage adequate to carry out the Corporation's programs.

4. *Supply and foreign purchase program.*—This program is carried out under the authority contained in the Corporation's charter, particularly sections 5 (b) and (c) thereof. The Corporation procures foods, agricultural commodities, their products, and related materials to supply the requirements of Government agencies, foreign governments, and relief and rehabilitation agencies, and to meet domestic requirements. Foods, agricultural commodities and their products are procured or aid is given in their procurement to facilitate distribution or to meet anticipated requirements during periods of short supply. The Corporation may also, through purchases, loans, sales or other means, make available materials and facilities required in connection with the production and marketing of agricultural commodities.

Digitized for FRASER

Federal Reserve Bank of St. Louis

Operations involving procurement for other Government agencies are conducted in accordance with section 4 of the act of July 16, 1943 (15 U.S.C. 713a–9), which requires that the Corporation be fully reimbursed for services performed, losses sustained, operating costs incurred, or commodities purchased or delivered to or on behalf of any other Government agency from the appropriate funds of such agency. Operations not subject to section 4 of the act may involve losses if such are necessary to the accomplishment of the objectives of the particular operation.

The main activities now carried on are procurement of commodities for the International Cooperation Administration, and initial financing of certain programs authorized under the Defense Production Act to assure adequate supplies of strategic and critical materials. The latter programs are currently in liquidation.

Loan operations.—The following table reflects the loan operations of the Corporation applicable to the preceding programs.

	1959 actual	*1960 estimate*	*1961 estimate*

5. *Special milk program.*—Public Law 85–478 (7 U.S.C. 1446 note), as amended, authorized the use of not to exceed $81 million for 1960 and $84 million for 1961, of Commodity Credit Corporation funds to increase the consumption of fluid milk by children in nonprofit schools of high-school grade and under and in nonprofit nursery schools, child-care centers, settlement houses, summer camps, and similar nonprofit institutions devoted to the care and training of children. The act further provides that amounts spent shall not be considered expended for the purpose of carrying out the price-support program.

6. *Undistributed expenses.*—There are a number of expenses which are not allocated to a specific program. These include interest on the capital stock of the Corporation, on borrowings from Treasury, and on other obligations evidencing loans made by lending agencies, administrative expenses, and other miscellaneous costs, including expenses of the agricultural stabilization and conservation county committees, and Federal Reserve banks in connection with the Corporation's programs.

Administrative expenses are for the operating staff, including the services of employees of the Commodity Stabilization Service engaged in Commodity Credit Corporation activities, services performed by other agencies of the Department, costs of audit, and payments to the General Services Administration for space in the District of Columbia and rent of field office space. Also included, for the first time, are funds for the International Cooperation Administration for services including program screening and end-use audit of the foreign donation program under section 416 of the Agricultural Act of 1949. Estimates for 1961 include a limitation of $48,428,000 for costs of administration including a reserve of not less than 7% for contingencies. The requested authorization excludes administrative expenses in connection with the supply and foreign purchase program, the wool and mohair program under the National Wool Act of 1954, the International Wheat Agreement, and the sale of long staple cotton transferred from the national stockpile, since it is contemplated that full reimbursement will be received for these expenses. Such reimbursement will be obtained and used in 1961 in the same manner as in previous years.

Expenses in connection with the acquisition, operation, maintenance, improvement, or disposition (including inspection, classing, and grading work performed on a fee basis by Federal employees or Federal- or State-licensed inspectors and work performed on a contract basis by agricultural stabilization and conservation county committees) of property which the Corporation owns or in

COMMODITY CREDIT CORPORATION—Continued

Public enterprise funds—Continued

COMMODITY CREDIT CORPORATION FUND—Continued

which it has an interest have been treated as program rather than administrative expenses. Similarly, expenses of other Federal agencies whose services are utilized in the handling of Commodity Credit Corporation property are treated as program expenses. Such expenses would include the fleet storage operation of the Maritime Administration conducted intermittently since 1949 and the services rendered by the General Services Administration in connection with the strategic, critical, and other materials acquired by the Corporation.

SPECIAL ACTIVITIES FINANCED BY COMMODITY CREDIT CORPORATION

7. *Special activities.*—These activities are carried out under authority of section 5(g) of the Corporation's charter and specific statutory authorizations or directives with respect thereto which are currently in effect or which may subsequently be enacted.

Except with respect to the activities set forth in items (11) and (12) where losses, if any, would be recovered through the general restoration of capital impairment, the Corporation receives reimbursement for costs of these activities through regular appropriations. Appropriations to reimburse the Corporation for 1956 and prior years' costs of such activities have been included in the regular appropriations to the Department for the second year following the year in which the costs were incurred. The 1957 and 1958 costs were recovered through supplemental appropriations in 1958 and 1959, respectively. The 1961 estimate for 1960 costs continues the acceleration of the time of recovery by the Commodity Credit Corporation to minimize the possibility that the Corporation will not have sufficient borrowing authority to conduct its mandatory price-support operations. Reimbursement for 1961 costs will be requested in a later budget.

Activities currently being carried out are as follows:

(1) *International Wheat Agreement—(7 U.S.C. 1641–1642).*—This agreement, which was renewed for a period of 3 years effective August 1, 1959, operates to provide an assured market for wheat to exporting countries and assured supplies of wheat to importing countries at stable and equitable prices. The maximum and minimum prices in the 1959 agreement are $1.90 and $1.50 per bushel, respectively, for the basic grade of wheat, No. 1 Manitoba Northern, at Fort William/Port Arthur, Canada, in terms of Canadian currency at the parity for the Canadian dollar determined for the purposes of the International Monetary Fund as at March 1949. The agreement total quantity represents about 36% of world trade in wheat, yet the nine exporting member countries export inside and outside the agreement about 90% of all wheat moving in world trade.

Funds of Commodity Credit Corporation and its stocks of wheat are used to pay (*a*) the difference between the selling prices prevailing under the agreement and the domestic market price of wheat, and (*b*) administrative and interest costs. The payment of the differential between the prevailing sales price of wheat under the agreement and the market price is paid to the exporter in Commodity Credit Corporation stocks of wheat rather than in cash. A cash payment for this differential is made for flour. The estimate for 1961 of $49,042,000 provides for reimbursing the Corporation for costs incurred in 1960 when an estimated 82.5 million bushels of wheat and wheat flour will be exported under the agreement.

(2) *Emergency famine relief to friendly peoples.*—The Commodity Credit Corporation, through December 31, 1961, is directed, under title II of Public Law 480 (7 U.S.C. 1703, 1721–1724), to make its stocks of agricultural commodities available for emergency assistance to friendly peoples in meeting famine or other urgent relief requirements and to pay ocean freight charges for the shipment of donated commodities. Through June 30, 1959, commitments undertaken under this authority totaled $546 million. Of this amount the value of commodities authorized for shipment totaled $449 million of which more than three quarters, or $340 million, was for grain, including rice. Actual commodity and freight costs incurred through June 30, 1959, were $510 million. During 1960 and 1961, additional commodity and freight costs of $113 million and $117 million, respectively, are expected to be incurred under the program.

Appropriations are authorized to reimburse the Corporation for its costs in carrying out the program. Through December 31, 1959, a total of $800 million was authorized. From January 1, 1960, $300 million per calendar year is authorized through December 31, 1961, plus unused balances of the previous authorization. The estimate for 1961 of $115 million provides such reimbursement for estimated operations during 1960.

It is estimated that total costs under this program will approximate $760 million by June 30, 1961, and the following reflects the costs incurred in carrying out this program:

Fiscal year	*Program expenditures*	*Interest*	*Total*
1955	$86,623,135	$273,329	$86,896,464
1956	91,277,033	2,307,966	93,584,999
1957	120,429,754	4,460,886	124,890,640
1958	116,001,011	5,444,617	121,445,628
1959	95,510,719	2,417,061	97,927,780
1960 (estimate)	112,745,000	2,255,000	115,000,000
1961 (estimate)	117,360,000	2,640,000	120,000,000
Cumulative totals	739,946,652	19,798,859	759,745,511

(3) *Sales of surplus agricultural commodities for foreign currencies.*—Under the Agricultural Trade Development and Assistance Act (7 U.S.C. 1701–1709), surplus agricultural commodities are sold for foreign currencies. These currencies may then be used within certain limitations by the United States Government for agricultural market development, purchase of strategic materials, military equipment facilities and services for the common defense, payment of U.S. obligations, military family housing, international education exchange, acquisition of quarters abroad, participation in fairs and related activities, medical and scientific activities, American-sponsored schools abroad, translation, publication and distribution of books and audio-visual educational materials abroad, analysis and estimation of foreign books, supporting workshops in American studies and educational techniques, emergency relief requirements other than surplus food commodities, acquisition of buildings and grounds abroad for U.S. Government use, and loans for multilateral trade and economic development. If appropriations are available for a purpose for which foreign currencies are used, the agency must buy the currency for dollars which are used to reimburse the Commodity Credit Corporation. Through June 30, 1959, 158 agreements had been signed with 38 countries for commodities representing an export market value of $3,701.2 million, including ocean transportation of $393.7 million. The major commodities

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

included were wheat, cotton, and fats and oils which together amounted to 77% of the total value of the agreements. Through that date commodities with an export market value of about $2,810.1 million had been shipped. The total dollar equivalent of foreign currencies deposited in the Treasury through June 30, 1959, amounted to $2,934,526,588.

Appropriations are authorized to reimburse the Corporation for its net costs in carrying out this program. Through December 31, 1959, a total of $6.25 billion was so authorized. From January 1, 1960, $1.5 billion per calendar year is authorized through December 31, 1961, plus unused balances of the previous authorization. The estimate in 1961 of $881,000,000 covers estimated unreimbursed costs of operations through 1960 amounting to $1,235,620,260 less $354,620,260 representing the dollar equivalent of various foreign currencies received for agricultural commodities exported as of June 30, 1960, for which the Corporation may eventually be reimbursed in dollars or which may be used for military housing with subsequent reimbursement from net rental receipts.

The following table reflects the net costs incurred by Commodity Credit Corporation by years:

Fiscal year	*Program expenditures*	*Interest*	*Total*
1955	$129,164,632	$355,528	$129,520,160
1956	616,963,458	7,263,254	624,226,712
1957	1,361,973,711	34,399,783	1,396,373,494
1958	1,089,007,675	55,710,312	1,144,717,987
1959	1,089,071,676	24,182,660	1,113,254,336
1960 (estimate)	1,100,000,000	29,296,541	1,129,296,541
1961 (estimate)	1,250,000,000	40,860,000	1,290,860,000
Cumulative totals	6,636,181,152	192,068,078	6,828,249,230
Deduct sales of currencies and rental collections	423,537,385	----------	423,537,385
Net Commodity Credit Corporation costs	6,212,643,767	192,068,078	6,404,711,845
Appropriations through June 30, 1961			4,877,849,228
Unreimbursed costs, June 30, 1961			1,526,862,617

The following reflects the computation of the appropriations:

	Program year		
	1959	*1960*	*1961*
Due at end of program year	$1,148,505,355	$1,235,620,260	$1,526,862,617
Less—			
Due from Department of Defense	44,757,462	67,914,854	86,397,211
Estimated to be recovered through sale of foreign currencies and net rental income from military housing	135,731,893	286,705,406	351,465,406
Subtotal	180,489,355	354,620,260	437,862,617
Appropriation: 1960, 1961, and 1962	968,016,000	881,000,000	1,089,000,000

The following reflects the utilization of the foreign currencies acquired under this program:

	[*In millions*]		
	1959	*1960*	*1961*

Expended by Defense for military family housing	14.8	28.5	23.0
Expended by other agencies without reimbursement to Commodity Credit Corporation	450.6	625.7	751.9
Adjustment due to difference in exchange rates	39.2	40.0	40.0
Total, dispositions	594.3	763.4	929.0
Foreign currency, end of year:			
Balance with Treasury	1,661.4	1,738.5	1,722.0
Receivable from foreign governments	70.1	70.1	70.1
Total	1,731.5	1,808.6	1,792.1
Less allowance for loss and future expenditures with reimbursement by special appropriations to Commodity Credit Corporation	1,551.0	1,454.0	1,354.2
Recoverable from future sales of currencies and net receipts from military family housing	180.5	354.6	437.9

(4) *Long-term supply contracts.*—Under title IV of the Agricultural Trade Development and Assistance Act (73 Stat. 610), the President is authorized to make agreements with friendly nations under which the United States would deliver surplus commodities over periods of up to 10 years and accept payment in dollars with interest over periods of up to 20 years. The funds and assets of the Corporation are authorized to be used to carry out the provisions of title IV and appropriations are authorized to reimburse the Corporation therefor. Operating policies and plans have not yet been developed on which to base an estimate of possible activity under this title.

(5) *Transfer of Commodity Credit Corporation grain to Interior for migratory waterfowl feed.*—The Commodity Credit Corporation is directed to make available to the Secretary of the Interior (7 U.S.C. 442–446), such grain acquired through price-support operations and certified by the Commodity Credit Corporation to be available for such purposes or in such condition as to be undesirable for human consumption, as the Secretary of the Interior shall requisition.

During 1959, a total of 275 tons of Commodity Credit Corporation grain, with an investment value of $17,363, were transferred under this program. It is estimated that 400 tons of grain will be transferred in each of 1960 and 1961 at a cost to Commodity Credit Corporation of $35,000. The estimate for 1961 provides for reimbursement for operations during 1960.

(6) *Transfer of bartered materials to supplemental stockpile.*—The Commodity Credit Corporation is directed under title II of the Agricultural Act of 1956 (7 U.S.C. 1856) to transfer strategic and other materials acquired as a result of barter and exchange of agricultural commodities, other than those acquired for the national stockpile or for other purposes, to the supplemental stockpile. The act authorizes appropriations to reimburse the Corporation for amounts equal to the market value of materials transferred.

During 1959, materials valued at $314,727,557 were transferred under this program. An estimated $237,222,443 worth of materials will be transferred in 1960 and $126,700,000 in 1961. The estimate for 1961 provides for reimbursement of $422,950,000. Of this amount $185,727,557 represents unrecovered 1959 transfers and $237,222,443 are the estimated transfers to be made in 1960.

(7) *Grading and classing activities.*—The Commodity Credit Corporation makes advances to the Agricultural Marketing Service for classing and grading of agricultural commodities without charge to producers (7 U.S.C. 414a). Such advances used for classing cotton and grading tobacco not placed under price-support loan must be repaid from subsequent appropriations. An appropriation for 1961

Federal Reserve Bank of St. Louis

COMMODITY CREDIT CORPORATION—Continued

Public enterprise funds—Continued

COMMODITY CREDIT CORPORATION FUND—Continued

of $715,000 is proposed for repaying advances to be received in 1960.

(8) *Soil bank program.*—Pursuant to section 120 of the Agricultural Act of 1956 (7 U.S.C. 1808) the Secretary of Agriculture utilizes the facilities of the Corporation for making payments to farmers under this program.

(9) *National Wool Act.*—Under the provisions of the National Wool Act of 1954, as amended, incentive payments are being used to encourage the annual domestic production of approximately 300 million pounds of shorn wool. Support of prices of wool and mohair is mandatory. Incentive payments are made to eligible producers on a percentage basis, reflecting the amount required to bring the national average received by all producers up to the announced incentive level. The incentive level shall not exceed 110% of parity. In a referendum conducted in September 1959, wool and lamb producers voted to continue the deduction from their incentive payment of an amount not to exceed 1 cent per pound of wool and 5 cents per hundredweight of unshorn lambs marketed. These funds financed promotional, advertising, and related market-development activities by the American Sheep Producers' Council, Inc., under an agreement with the Secretary of Agriculture.

COSTS OF THE NATIONAL WOOL ACT

	Fiscal year 1959 1957 marketing year (actual)	*Fiscal year 1960 1958 marketing year (estimate)*	*Fiscal year 1961 1959 marketing year (estimate)*
Volume of marketings:			
Shorn wool, pounds	152,213,400	295,000,000	251,900,000
Unshorn lambs, cwt	10,515,600	10,500,000	11,000,000
Incentive payments:			
Per pound, shorn wool, cents	8.3	25.6	21.0
Per hundredweight, unshorn lambs, cents	33.0	102.0	84.0
Incentive payments:			
Shorn wool	$12,633,712	$75,520,000	$52,899,000
Unshorn lambs	3,470,164	10,710,000	9,240,000
Promotional and advertising programs [1]	(2,028,301)	(3,400,000)	(3,000,000)
Total payments	16,103,876	86,230,000	62,139,000
Administrative expenses	2,749,559	2,950,000	2,950,000
Interest expense	1,220,941	4,331,000	5,259,000
	20,074,376	93,511,000	70,348,000
Prior year adjustments (recoveries)	−48,549		
Total	20,025,827	93,511,000	70,348,000

[1] Deductions from producer payments.

Total payments made under the National Wool Act cannot at any time exceed an amount equal to 70% of the accumulated totals, as of the same date, of the gross receipts from import duties collected on and after January 1, 1953, on wool and wool manufactures. Actual and estimated payments compared with this limitation are as follows:

	1959 actual	*1960 estimate*	*1961 estimate*
70% of customs receipts on wool and wool manufactures cumulative from Jan. 1, 1953 (calendar years) (estimate)	$291,034,432	$342,034,000	$393,034,000
Cumulative incentive payments (fiscal years)	125,640,083	211,870,083	274,009,083
Balance of limitation available	165,394,349	130,163,917	119,024,917

Funds of the Commodity Credit Corporation are used to carry on the wool incentive program. A permanent appropriation is provided to reimburse the Corporation, but the yearly amount is limited to 70% of all duties collected on wool and wool manufactures during the preceding calendar year. Estimated costs and reimbursements to Commodity Credit Corporation during 1959, 1960, and 1961 are indicated in the following table:

	1959 actual	*1960 estimate*	*1961 estimate*
Due at beginning of year	$88,803,121	$84,375,849	$127,836,536
Costs for year:			
Program	18,804,886	89,180,000	65,089,000
Interest	1,220,941	4,331,000	5,259,000

(10) *Loans to Secretary of Agriculture for conservation program.*—Under section 391(c) of the Agricultural Act of 1938, as amended (7 U.S.C. 1391), the Corporation advances funds to the Secretary in amounts not to exceed $50 million annually to purchase conservation materials and services. Repayments of the loans plus interest are made as soon as practicable in the succeeding fiscal year from appropriated funds.

(11) *Military housing (Public Law 84–161 (5 U.S.C. 171z–1)).*—During 1957 a contract was completed for the disposition of Commodity Credit Corporation-owned commodities valued at $50 million for the construction of military housing in France with foreign currencies obtained from this transaction. Proceeds from rental and quarters allowances will be paid by the Department of Defense over a long period of years to reimburse the Corporation pursuant to Public Law 84–161.

(12) *Transfer of long-staple cotton from national stockpile for sale by Commodity Credit Corporation.*—Public Law 85–96, approved July 10, 1957 (71 Stat. 290), authorizes the transfer of 50,000 bales of domestically grown extra long-staple cotton from the national stockpile to the Corporation for sale. Proceeds less costs incurred, including administrative expenses, are covered into the Treasury as miscellaneous receipts.

FINANCING THE PROGRAMS

Financing.—The programs of the Commodity Credit Corporation are financed by capital stock, borrowings, guarantees to purchase notes or other obligations evidencing loans made by leading agencies, issuance of certificates of interest in loans held by the Corporation, restoration of capital impairment, appropriations to reimburse the Corporation for costs of special activities, and receipts from operations.

Borrowing authority.—The Corporation has an authorized capital stock of $100,000,000 held by the United States, and authority to borrow up to $14,500,000,000.

Funds are borrowed from Treasury and may also be borrowed from private lending agencies. During the fiscal year 1960, the Corporation extended its certificate of interest method of financing cotton and grain loans to all commodity loans held by the Corporation. It is contemplated that this plan will continue in effect in the fiscal year 1961. All bonds, notes, debentures, and similar obligations issued by the Corporation are subject to approval by the Secretary of the Treasury as required by the act of March 8, 1938 (15 U.S.C. 713a–4). Interest

Digitized for FRASER

Federal Reserve Bank of St. Louis

on borrowings from the Treasury (and on capital stock) is paid in accordance with a policy of the Treasury that the rate shall be based upon the average interest rate on all outstanding marketable obligations (of comparable maturity date) of the United States as of the preceding month. In connection with loan guarantees and certificates of interest, the Corporation reserves a sufficient amount of its borrowing authority to purchase at any time all notes and other obligations evidencing loans made or certificates held by lending agencies. Interest is also paid on these obligations for the period the agencies have their funds invested. Currently, the interest rate paid is below that paid on Treasury borrowings. An appropriation in 1961 to reimburse the Corporation for funds used for 1960 costs of special programs and certain advances to other agencies is included in the estimates.

On the basis of the budgetary assumptions heretofore described, the consequent estimated program requirements currently indicate a need for additional borrowing authority late in 1960 to provide a desirable margin of safety for operations of the Corporation. By May and June 1961, however, the available balance of borrowing authority will be at a low level. There are so many uncontrollable factors affecting the programs of the Corporation involving crops which have not even been planted, that estimates of the use of borrowing authority are highly tentative.

POSITION WITH RESPECT TO BORROWING AUTHORITY AS OF JUNE 30

[In millions]

	1959 actual	*1960 estimate*	*1961 estimate*
Statutory borrowing authority	$14,500	$14,500	$14,500
Deduct borrowings from Treasury	12,874	12,970	14,032
Obligations to purchase loans or certificates held by lending agencies (guaranteed by Commodity Credit Corporation)	230	414	271
Total statutory borrowing authority outstanding	13,104	13,384	14,303
Net statutory borrowing authority available	1,396	1,116	197

NOTE.—This table does not reflect the following charges: Accounts payable, accrued liabilities, and obligations outstanding other than obligations to purchase loans and certificates held by banks. These do not become charges against the statutory borrowing authority until they result in borrowings from Treasury or loans or certificates held by banks.

Restoration of capital impairment.—Pursuant to the act of March 8, 1938, as amended (15 U.S.C. 713a–1), an appraisal of the assets and liabilities of the Corporation is made each year by the Secretary of the Treasury to determine the net worth. If the net worth is less than $100 million, the Secretary of the Treasury restores the amount of capital impairment; if net worth is more than $100 million the Corporation pays the surplus to the Treasury (15 U.S.C. 713a–2). The appraisal of assets is on the basis of cost to the Corporation. The capital impairment, therefore, represents realized losses. The unrestored realized losses reflected on the books of the Corporation for 1959 were $1,307,000,994, including $100 million of 1958 losses. A supplemental appropriation of $675 million is proposed for later transmission in 1960 to restore $575 million of the Corporation's capital impairment as of June 30, 1959, and $100 million to restore the unrecovered balance of the 1958 realized losses. In addition, included in the estimates for 1961 is an appropriation of $1,325,000,000 to restore the 1959 unrecovered realized losses of $632,000,994 and an advance restoration of $692,999,006 of the estimated 1960 realized losses of $1,867,750,000. Ordinarily, this would be included in the 1962 budget. However, it is anticipated that the Corporation's borrowing authority will be exhausted by January 1961, and an earlier restoration of capital would minimize the possibility for the need for an increase in borrowing authority.

Receipts from operations.—These include proceeds from sales of commodities, loan repayments, interest income, advances, reimbursements for special activities financed by the Corporation other than from special appropriations, and miscellaneous income, refunds, and collections.

[1] Statutory obligations against borrowing authority include only borrowings from Treasury and obligations to purchase notes or other obligations evidencing loans made by lending agencies. Other obligations, contingent liabilities, and commitments do not become charges against the statutory borrowing authority until they result in borrowings from Treasury or in notes or other obligations evidencing loans made by lending agencies.

NOTE.—In addition to obligations other than liabilities reflected in the status of certain fund balances the Corporation does not reflect in its accounts claims by the Corporation on which adequate proof has not been established and the outstanding guarantee and occupancy agreements for storage space.

SCHEDULE OF SPECIAL ACTIVITIES FINANCED BY COMMODITY CREDIT CORPORATION

RECOVERABLE COSTS	*Balance recoverable, and liabilities (—) as of July 1*	*Special appropriations to reimburse Commodity Credit Corporation (net)*	*Program expenditures: Commodity costs transferred from price-support program*	*Program expenditures: Other costs and capital outlay*	*Recovered or recoverable from other than special appropriations*	*Net operating loss*	*Changes in selected working capital*	*Net budget expenditures*	*Balance as of June 30: Recoverable from special appropriations (deficit)*	*Balance as of June 30: Recoverable from other appropriations and current liabilities (—)* [1]
"Reimbursement to Commodity Credit Corporation for costs of special activities":										
International Wheat Agreement:

1960								1,592,570,492		
1961								1,543,555,357		

[1] Consists of the following items: Sales of surplus agricultural commodities for foreign currencies—amounts to be recovered from other agencies for future sales of foreign currencies for dollars and from Department of Defense for use of foreign currencies for construction of military housing abroad. Reimbursement to Commodity Credit Corporation, National Wool Act—amounts of liability for accrued payments due producers which will be paid in the succeeding fiscal year. Military housing (Public Law 84-161, barter and exchange)—amount to be recovered from Department of Defense for value of agricultural commodities exchanged for construction of military housing abroad. Transfer of long-staple cotton from national stockpile for sale by Commodity Credit Corporation—amount available for payment of additional costs or for deposit in the Treasury as miscellaneous receipts. Soil bank—Unused advance received from funds appropriated for soil bank programs and small residual balance of unpaid acreage reserve certificates. Loans for agricultural conservation purposes—amount due from Secretary of Agriculture for advance purchase of conservation materials.

[2] During fiscal year 1960 $9,666, representing refund of prior year advances, was returned to the Treasury.

LIMITATION ON ADMINISTRATIVE EXPENSES

Nothing in this Act shall be so construed as to prevent the Commodity Credit Corporation from carrying out any activity or any program authorized by law: *Provided*, That not to exceed [$42,000,000] *$48,428,000* shall be available for administrative expenses of the Corporation: *Provided further*, That $1,000,000 of this authorization shall be available only to expand and strengthen the sales program of the Corporation pursuant to authority contained in the Corporation's charter: *Provided further*, That not less than 7 per centum of this authorization shall be placed in reserve to be apportioned pursuant to section 3679 of the Revised Statutes, as amended, for use only in such amounts and at such time as may become necessary to carry out program operations: *Provided further*, That all necessary expenses (including legal and special services performed on a contract or fee basis, but not including other personal services) in connection with the acquisition, operation, maintenance, improvement, or disposition of any real or personal property belonging to the Corporation or in which it has an interest, including expenses of collections of pledged collateral, shall be considered as nonadministrative expenses for the purposes hereof: *Provided further*, (1) That no part of this authorization shall be used to formulate or carry out a price support program for 1960 under which a total amount of price support in excess of $50,000 would be extended through loans, purchases, or purchase agreements made or made available by Commodity Credit Corporation to any person on the 1960 production of any agricultural commodity declared by the Secretary to be in surplus supply, unless (a) such person shall reduce his production of such commodity from that which such person produced the preceding year, in such percentage, not to exceed 20 per centum, as the Secretary may determine to be essential to bring production in line within a reasonable period of time with that necessary to provide an adequate supply to meet domestic and foreign demands, plus adequate reserves, or (b) such person shall agree to repay all amounts advanced in excess of $50,000 for any agricultural commodity within twelve months from the date of the advance of such funds or at such later date as the Secretary may determine, (2) that the term "person" shall mean an individual, partnership, firm, joint-stock company, corporation, association, trust, estate, or other legal entity, or a State, political subdivision of a State, or any agency thereof, (3) that in the case of any loan to, or purchase from, a cooperative marketing organization, or with regard to price support on an agricultural commodity extended by purchases of a product of such commodity from, or by loans on such product to, persons other than the producers of such commodity, such limitation shall not apply to the amount of price support received by the cooperative marketing organization, or other persons, but the amount of price support made available to any person through such cooperative marketing organization or other persons shall be included in determining the amount of price support received by such person for purposes of such limitation, and (4) that the Secretary of Agriculture shall issue regulations prescribing such rules as he determines necessary to carry out this provision. (*7 U.S.C. 442–446, 624, 1282, 1301, 1385, 1391c, 1421–1432, 1441–1449, 1691–1694, 1701–1709, 1721–1724, 1741–1747, 1808, 1813, 1851–1854, 1856–1857, 1859–1860; 12 U.S.C. 1148a–2; 15 U.S.C. 712a, 713a–10, 714–714p; 31 U.S.C. 841, 846–852, 866–868c, 869; 50 U.S.C. Obligated balance end of year		−5,000	
Expenditures		95,000	5,000

Status of Unfunded Allocations

Allocations		$100,000	
Transfer into agency account		100,000	

Proposed for later transmission:

Under existing legislation, 1960.—On the basis of the budgetary assumptions heretofore described, the consequent estimated program requirements currently indicate a need for additional borrowing authority late in 1960. In the event the program and financing develop as estimated, a supplemental appropriation is anticipated in the amount of $675 million, of which $575 million is to partially restore the Corporation's capital impairment as of June 30, 1959, and $100 million is to restore the unrecovered realized losses of June 30, 1958. These amounts are reflected in the Commodity Credit Corporation fund schedules.

CORPORATIONS

The following corporations and agencies are hereby authorized to make such expenditures, within the limits of funds and borrowing authority available to each such corporation or agency and in accord with law, and to make such contracts and commitments without regard to fiscal year limitations as provided by section 104 of the Government Corporation Control Act, as amended, as may be necessary in carrying out the programs set forth in the budget for the fiscal year [1960] *1961* for such corporation or agency, except as hereinafter provided: (*Department of Agriculture and Farm Credit Administration Appropriation Act, 1960.*)

Purpose and financial organization.—The Federal Crop Insurance Corporation, a wholly owned Government corporation, was created on February 16, 1938 (7 U.S.C. 1501–1519), to carry out the provisions of the Federal Crop Insurance Act. The purpose of this act is to promote the national welfare by improving the economic stability of agriculture through a sound system of crop insurance and providing the means for the research and experience helpful in devising and establishing such insurance. The Corporation provides all-risk insurance protection to farmers against loss from unavoidable causes. Insurance programs, since 1948, have been conducted on a limited basis in selected counties and on selected crops to obtain adequate actuarial data for the gradual expansion of the program to a national basis.

Capital stock of $100 million is authorized to be subscribed by the United States. As of June 30, 1959, the Secretary of the Treasury held receipts for $40 million of the authorized stock, leaving $60 million unissued.

Funds from the issuance of capital stock provide working capital for the Corporation. Receipts which are for deposit to this fund come mainly from premiums for insurance protection afforded farmers on their investment in the production of insured crops. The principal payments from this fund are for indemnities to insured farmers who suffer crop losses arising from causes against which crop insurance provides protection, the direct cost of adjusting losses, and part of the administrative and operating expenses. The annual appropriation for the major portion of the administrative and operating expenses of the Corporation is presented earlier in the budget.

Budget program.—The Corporation plans to continue its policy of gradually expanding the program to additional crops and counties. For the 1960 crop year (fiscal year 1961) insurance will be added in 18 new counties and on

54 insurable crops. The following table indicates the scope of the insurance program planned for 1959, 1960, and 1961. Amounts in the 1959 column are actual and pertain to the 1958 crop year. The 1960 column pertains to the 1959 crop year and reflects the current favorable condition of the 1959 insured crops. Indemnities shown in the 1961 column, covering the 1960 crop year, are estimated at 90% of the premium.

	1959 fiscal year (1958 crop year) actual	*1960 fiscal year (1959 crop year) estimate*	*1961 fiscal year (1960 crop year) estimate*
Number of States	38	38	38
Number of counties	830	847	865
Estimated insurance outstanding, beginning of fiscal year—thousands	$241,617	$278,000	$350,000
Number of crops insured	324,435	339,403	390,000
Premiums—thousands	$17,627	$19,195	$25,000
Indemnities—do	$4,505	$13,017	$22,499
Loss ratio	.26	.68	.90

Financing.—The deficit at June 30, 1959, will be more than offset by the income from operations estimated for 1960 (1959 crop year). Income from operations for the past several years will provide adequate operating funds for 1961, and therefore, no additional capital funds are requested. The increase in the authority to pay operating and administrative expenses from premium income, proposed for 1961, will cover the increased cost of servicing the additional crops insured, new counties, and insurable crops budgeted for the 1961 crop year. Legislation was proposed to the 1st session of the 86th Congress to permit the inclusion of administrative expenses in the determination of appropriate premium rates for crop insurance.

Operating results and financial condition.—Preliminary estimates for the 1959 crop year (1960 fiscal year) show premiums of $19.2 million exceeding indemnities of $13 million by $6.2 million. The favorable experience anticipated for crop year 1959 will make the third successive year in which premiums have exceeded indemnities, and the sixth such year during the 12-year period from 1948 to 1959. For this 12-year period premiums of $227.3 million exceed indemnities of $219.1 million by $8.2 million.

The following table summarizes the insurance operations by commodities for 1959, 1960, and 1961.

RURAL ELECTRIFICATION ADMINISTRATION

Current authorizations:

To carry into effect the provisions of the Rural Electrification Act of 1936, as amended (7 U.S.C. 901–924), as follows:

LOAN AUTHORIZATIONS

For loans in accordance with said Act, and for carrying out the provisions of section 7 thereof, to be borrowed from the Secretary of the Treasury in accordance with the provisions of section 3(a) of said Act, as follows: Rural electrification program, [$136,000,000] *$110,000,000*; and rural telephone program, [$79,000,000; and additional amounts, not to exceed $25,000,000 for each program, may be borrowed under the same terms and conditions to the extent that such amount is required during the fiscal year 1960 under the then existing conditions for the expeditious and orderly development of the rural electrification program and rural telephone program] *$80,000,000*. (*Department of Agriculture and Farm Credit Administration Appropriation Act, 1960.*)

The Administration conducts two major programs: (*a*) the rural electrification program to provide electric service to farms and other rural establishments; and (*b*) the rural telephone program to furnish and improve telephone service in rural areas. Funds for making loans are borrowed from the Secretary of the Treasury.

1. *Rural electrification.*—This program is financed through loans which bear 2% interest and must be repaid within a period not to exceed 35 years. Loans are also made for shorter periods at 2% interest to electrification borrowers to be reloaned to their consumers for wiring and for the installation of electrical and plumbing appliances and equipment.

When the rural electrification program was initiated in 1935, less than 11% of all farms had electric service. On June 30, 1959, about 96% of the farms were electrified. The major need for loan funds continues to be for system improvements and the generation of power to satisfy the steadily increasing requirements of consumers.

2. *Rural telephone.*—Loans are made for the purpose of financing the improvement, expansion, construction, acquisition, and operation of the telephone lines and facilities or systems to furnish and improve telephone service in rural areas. The loans bear 2% interest and must be repaid within a period not to exceed 35 years.

In 1950, when the telephone program started, the Census of Agriculture showed 38.2% of all farms with telephone service, fewer in both number and percentage than in 1920. Approximately 65% of the farms now have telephone service. Cumulative Rural Electrification Administration loans through June 30, 1959, will eventually provide initial or improved service to an estimated 1,191,324 rural subscribers.

STATUS OF THE TELEPHONE PROGRAM

Program Financing

[1] Includes capital outlay as follows: June 30, 1959, $62,516; 1960, $86,675; 1961, $86,700.

The Administration makes loans for the extension and improvement of electric and telephone services in rural areas. Business management and technical help is furnished borrowers where needed to protect the Government's loan security and to assure that construction and operation of their systems conform to approved standards and are adequate to provide continuous and reliable service.

Authorization to expend from public debt receipts (new obligational authority)	221,500,000	206,000,000	177,000,000

The Administration makes and insures loans to farmers unable to obtain credit from other sources at reasonable rates.

The total borrowing authorization requested for loans amounts to $177 million, a reduction of $29 million below the regular authorization for 1960. It is proposed to borrow $25 million in 1961 under existing authority for farm housing loans.

In addition to the direct loans, farm ownership and soil and water conservation loans advanced by private lenders will be insured within the annual statutory insurance authority of $125 million for farm ownership and $25 million for soil and water conservation loans. Contingent liabilities for these insured loans are reflected in the farm tenant-mortgage insurance fund schedules.

Repayments of loans and interest are now paid into miscellaneous receipts of the Treasury. Legislation has been introduced in the Congress to authorize the use of loan repayments for new loans.

1. *Farm ownership loans.*—Direct farm ownership loans are made to tenants, sharecroppers, farm laborers, owners of inadequate farms, and eligible veterans for the purchase or improvement of family-type or less than family-type farms. Loans may be made to farmowners for the refinancing of secured or unsecured indebtedness. These loans may be made up to the fair value of the farm (normal market value on less than family-type farms to owner-operators with off-farm income) at not to exceed 5% interest up to 40 years. Farm ownership loans made with funds advanced by private lenders are insured by the Government up to 90% of the value of the farm for 40 years at not more than 4% interest, plus 0.5% as an insurance premium, and 0.5% as an administrative expense charge. The Administration services these insured loans, makes collections, and pays the lender.

FARM OWNERSHIP LOANS

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

2. *Farm operating loans.*—Direct loans are made for periods up to 7 years at 5% interest in amounts up to $10,000, with a limitation of $20,000 on the total principal indebtedness, to provide reasonable farm and home credit for the purchase of livestock, feed, seed, farm equipment and other farm necessities, including the refinancing of indebtedness to operators of not larger than family-type farms. In justifiable cases, loans may be made beyond 7 years but not beyond 10 years.

FARM OPERATING LOANS

	1959 actual	*1960 estimate*	*1961 estimate*
Number of applications	115,621	108,400	97,340
Number of loans	73,575	69,475	60,860
Amount	$186,999,940	$180,000,000	$154,000,000

3. *Soil and water conservation loans.*—Direct and insured loans are made to farmers and associations for the effective development and utilization of water supplies and for the improvement of farm land by soil and water conserving facilities and practices. Interest rates on these loans usually are set administratively at the same rates as farm ownership loans (5%) except that currently direct loans to associations are carrying a rate of one-half of 1% below loans to individuals. On each insured loan, at least 0.5% as an insurance premium and 0.5% as an administrative expense charge is retained by the Government. Loans are made for periods up to 20 years for individuals and 40 years for associations.

SOIL AND WATER CONSERVATION LOANS

	1959 actual		*1960 estimate*		*1961 estimate*

To groups	17	1,399,660	8	480,000	8	480,000

4. *Farm housing loans.*—Direct farm housing loans are made to farm owners for periods up to 33 years at 4% interest to construct, improve, alter, repair, or replace dwellings and other farm buildings. It is proposed to borrow $25 million under continuing authority of $450 million of which a balance of $297,462,128 is estimated to be available at June 30, 1960.

FARM HOUSING LOANS

Unobligated balance carried forward	−67,957,146	−75,075,168	−70,678,655
Financing applied to program	44,000,693	35,689,620	33,423,513

Purpose and financial organization.—This fund finances loans to farmers and stockmen in the event of disasters and other emergencies, in areas where agricultural credit is not readily available. The fund is also available within statutory limits for emergency assistance in furnishing feed and seed in areas suffering major disasters. The fund was created by the transfer of the assets of the Regional Agricultural Credit Corporation of Washington which was abolished.

Budget program—1. *Loan commitments*—(*a*) *Production emergency loans.*—Loans are made at 3% interest to farmers and stockmen suffering production disasters.

(*b*) *Economic emergency loans.*—Loans may be made at 3% interest in any economic disaster area declared by the President.

(*c*) *Special livestock loans.*—For 4 years after July 14, 1953, loans were authorized to be made at 5% interest to established livestock producers who had a reasonable chance of working out their difficulties with supplementary financing. Supplemental loans may be made for an additional 4 years after July 14, 1957, to individuals already indebted.

(*d*) *Special emergency loans.*—The authority to make special emergency loans up to a total of $65 million expired on June 30, 1959.

(*e*) *Other loans.*—Where necessary to protect the Government's investment, obligations are incurred in connection with outstanding loans to provide for payment of such costs as taxes and insurance. When this is done, such advances are charged to the borrowers' accounts.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

3. *Administrative expenses.*—The principal administrative expenses in each of the 3 years are related to the loan programs of the Farmers Home Administration. These expenses are estimated at $3,200,000 in 1960 and $2,800,000 in 1961. Administrative expenses of the Commodity Stabilization Service are estimated at $165,000 in 1960 and $110,000 in 1961, in connection with the final audit of the emergency feed program. Administrative expenses for the Office of the General Counsel for 1960 are estimated at $29,200 in each of the years 1960 and 1961.

Financing the budget program.—No new budgetary authorization is required for 1961. A net loss of $3 million is estimated on an accrual basis. Net expenditures of $4.6 million are anticipated on a cash basis due primarily to estimated excess loan advances over loan repayments during the year.

During 1961, the program will be wholly financed by receipts from operations.

Operating results and financial condition.—Revenue for 1961, consisting principally of interest on loans, is estimated at $1.5 million, compared to expense of $4.5 million, resulting in an estimated loss of $3 million. A net loss of $3.1 million is estimated for 1960, and a net loss of $1.4 million resulted in 1959. A change in the formula for determining valuation reserves on loans effective during 1959 reduced the loss for the year.

Loans receivable, after allowance for losses, are expected to amount to $45.7 million on June 30, 1961, as compared with $44.3 million at June 30, 1960, and $53.8 million on June 30, 1959.

The Government investment at June 30, 1961, is expected to be $117.1 million, consisting of $205.9 million appropriated and donated, less a deficit of $88.8 million.

Purpose and financial organization.—This fund, authorized in the Bankhead-Jones Farm Tenant Act (7 U.S.C. 1005(a)), relates to insured farm ownership loans and soil and water conservation loans. The insurance endorsement on each loan includes an agreement by the Government to purchase the loan after a specified period at the holder's option. The initial fund of $1 million is supplemented by charges collected from insured farm ownership and soil and water conservation loan borrowers, inspection and appraisal fees, and other charges. Receipts are available for administrative expenses and to cover losses. Public Law 85-748, approved August 25, 1958 (72 Stat. 840), authorized for the first time the making of loans from the fund to be sold individually or in blocks and insured. Not in excess of $5 million may be borrowed from the Secretary of the Treasury to facilitate the blocking of such loans. Public Law 85-748 also changed the method of determining the interest paid the Secretary of the Treasury on borrowings to relate the charges to the current average market yields of outstanding marketable obligations of the United States.

Budget program.—Advances and purchases of loans are estimated at $15.7 million in 1961, an increase of $5.8 over 1960 and a decrease of $17.3 below 1959. Included is $1 million in 1960 and $1 million in 1961 for making loans under the new statutory authority which will later be sold on an insured basis.

Financing.—In order to finance the various operations, it is estimated that it will be necessary to utilize the statutory authorization (7 U.S.C. 1005c) to borrow from the Treasury in the net amount of $2,700,000 in 1960. Net borrowings from the Treasury of $7,630,000 are anticipated in 1961.

Operating results and retained earnings.—Total income, consisting principally of insurance premiums, is estimated at $3.5 million in 1961, an increase of about $0.3 million from 1960.

The necessity to purchase loans is expected to result in outstanding loans receivable of $45.4 million at June 30, 1961. Retained earnings, which are for absorption of any future losses, are estimated to be $9.3 million at the end of 1961. These earnings, when added to the $1 million appropriation and estimated borrowings of $39.5 million from the Treasury, represent a $49.8 million Government investment.

POSITION WITH RESPECT TO INSURANCE AUTHORITY

[1] Includes capital outlay as follows: June 30, 1959, $23,468; 1960, $21,000; 1961, $24,000.

The Office serves as legal counsel for the Secretary of Agriculture and performs all legal work for the Department. It represents the Department in administrative proceedings for the promulgation of rules and regulations having the force and effect of law and in quasi-judicial hearings held in connection with the administration of Department programs. The Office also represents the Secretary in proceedings before the Interstate Commerce Commission dealing with rates and practices relating to the transportation of agricultural commodities and in appeals to the courts from the decisions of the Commission. It examines titles to lands to be acquired by the Department or accepted as security for loans, and disposes of claims arising out of the Department's activities.

Increases in 1961 are to meet increased legal workload connected with the administration of the Packers and Stockyards Act, marketing agreement and order programs, and other marketing and regulatory activities.

[1] Includes capital outlay as follows: June 30, 1959, $14,408; 1960, $7,300; 1961, $7,300.

The Office provides overall planning, coordination, and administration of the Department's programs, and supplies certain services on a departmentwide basis.

2. *Personnel administration and service.*—Departmental policies and procedures are promulgated for the personnel management program. The operational phases of this program have been substantially delegated to the agencies. A systematic review is conducted to insure unification thereof and to measure its effectiveness in serving the agencies' personnel management requirements.

3. *Budgetary and financial administration and service.*—This covers the fields of departmental budgetary and financial management, internal audit and related activities; policies and procedures are promulgated, and programs and legislative proposals are evaluated for budgetary, financial, and related implications.

4. *General operations.*—These embrace departmental policies and procedures for real and personal property, and supply management. Administrative services are provided for the Office of the Secretary, and departmental service operations are furnished, including the Department's post office, telephone switchboard, telegraph office, and reproduction and supply services.

5. *Administrative management.*—This covers the areas of organization, paperwork activities (forms, reports, correspondence, and records maintenance and disposition), administrative issuances, and management improvement. Departmental policies and procedures are promulgated, improvement studies are undertaken, and agency ad-

ministrative management programs are evaluated to insure economical and effective administration.

6. *Regulatory hearings and decisions.*—The hearing examiners hold hearings in connection with the prescribing of new regulations and orders and on disciplinary complaints filed by the Department or on petitions filed by private parties asking relief from some action of the Department. Final administrative decisions in regulatory proceedings are rendered by the judicial officer. Agriculture Decisions is published monthly.

7. *National Agricultural Advisory Commission.*—Provision is made for the payment of necessary expenses incident to periodic meetings of the National Agricultural Advisory Commission.

8. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources and applicable adjustment as reflected in the following table:

Intragovernmental funds:

WORKING CAPITAL FUND, DEPARTMENT OF AGRICULTURE

This fund finances on a reimbursable basis certain central services in the Department of Agriculture, including duplicating, photographic, art and graphics, motion picture, tabulating, supply, and library photocopying services. The capital consists of $400,000 appropriated (5 U.S.C. 542–1) and $522,958 donated assets, as of June 30, 1959. Earnings are retained to furnish adequate working capital.

[1] Includes capital outlay as follows: June 30, 1959, $7,132; 1960, $6,500; 1961, $6,500.

The Office has responsibility for the information work of the entire Department. Its major objective is to report to farmers, specially affected groups, and to the public the Department's research, action, regulatory, and

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

other programs, using any or all information media. This work is carried on in close cooperation with the land-grant colleges and with private industries which serve agriculture. Workload depends upon Department program demands, direct requests, and legislative requirements.

1. *Publications review and distribution.*—The Department publications, both printed and processed, are reviewed for policy clearance and control. Publications include farmers' bulletins, leaflets, periodicals, scientific, research, and marketing publications, and agricultural statistics.

2. *Review and distribution of current agricultural information.*—The Department's activities require the issuance of about 3,600 periodic crop, price, and market reports and press releases annually. Special information is furnished to national magazines, encyclopedic annuals, and trade publications. Digests, newsletters, and other services are made available to press associations, daily newspapers, and farm publications. Part 2 of the Secretary's annual report, known as the Yearbook of Agriculture, is published by the Office and distributed by Members of Congress. Radio is used to reach farmers locally and to broadcast regular weekly programs on major networks. Television package programs are prepared for use of land-grant colleges and television farm broadcasters. Essential information on Department policies and programs is provided to Washington and field employees by the biweekly issuance of USDA, an employee news bulletin.

3. *Review, preparation, and distribution of visual agricultural information.*—Motion pictures for the Department and private industries which serve agriculture are produced on a reimbursable basis and distributed through nearly 75 cooperating State film libraries. Still photographs, illustrations, and graphics are similarly produced. News and general-type photographs of Department programs and activities are available from a centralized library. Exhibits are produced and supplied to State extension workers for their use in State exhibit showings.

4. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources and applicable adjustment as reflected in the following table:

	1958 actual	*1959 actual*	*1960 estimate*	*1961 estimate*
Selected resources at end of year: Inventories and items on order:				
Publications consigned to Government Printing Office	$157,000	$177,700	$180,000	$180,000

Appropriation (adjusted)	831,500	900,000	895,660

[1] Includes capital outlay as follows: June 30, 1959, $7,198; 1960, $2,000; 1961, $2,000.

1. *Agricultural library services.*—The library, a basic unit serving the research, extension, regulatory, and other programs of the Department and the State agricultural agencies, acquires records, and makes available through its catalogs, indexes and bibliographies, books, periodicals, and other publications containing information on agricultural and allied fields. It contains approximately 1,165,000 volumes, probably one of the most extensive agricultural collections existing in any country. Its services are used by agricultural colleges and universities, other research and educational institutions throughout the world, Government departments, agricultural associations, industry, individual farmers, and the general public. It serves as the national agricultural library, one of the three national libraries.

The responsibility for administering field branch library services needed by and available to the Agricultural Research Service and the Forest Service was transferred to these Services in 1960 in order to strengthen field library services and more effectively support research undertakings which have been augmented substantially in recent years.

During 1959, a total of 17,563 volumes and 214,641 separate issues of periodicals were added to the collection by purchase, gift, and exchange. During the same period 425,925 loans of books and periodicals were made and 85,408 reference questions were answered by the Department library.

2. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources and applicable adjustment as reflected in the following table:

	1958 actual	*1959 actual*	*1960 estimate*	*1961 estimate*
Selected resources at end of year:				
Equipment not placed in use	$211			
Unpaid undelivered orders (appropriation balances obligated for goods and services on order not yet received)	32,547	$17,498	$17,498	$17,498
Total selected resources at end of year	32,758	17,498	17,498	17,498
Selected resources at start of year (−)		−32,758	−17,498	−17,498
Adjustment of prior year costs and selected resources reported at start of year		3,005		
Costs financed from obligations of other years, net (−)		−12,255

FOREST SERVICE

The Service carries on three primary functions: (*a*) Protection, development, and use of about 185 million acres of land in national forests and land utilization projects in the United States and Puerto Rico; (*b*) cooperation with States and private forest landowners to obtain better fire protection on approximately 435 million acres of forest lands and better forest practices on about 345 million acres of privately owned commercial timberlands, to encourage reforestation and stimulate development and management of State, county, and community forests; and (*c*) research for all public and private forest lands and related ranges to improve protection from fire, insects, and diseases; to increase production of timber, forage, water, and other products; to develop better utilization and marketing of forest products; and to maintain a current inventory of forest resources through a nationwide forest survey. These primary functions include construction and maintenance of roads and trails, control of forest pests, protection against floods, land acquisition and exchange, and a number of cooperative projects.

Current authorizations:

FOREST PROTECTION AND UTILIZATION

For expenses necessary for forest protection and utilization, as follows:

Forest land management: For necessary expenses of the Forest Service, not otherwise provided for, including the administration, improvement, development, and management of lands under Forest Service administration, fighting and preventing forest fires on or threatening such lands and for liquidation of obligations incurred in the preceding fiscal year for such purposes, control of white pine blister rust and other forest diseases and insects on Federal and non-Federal lands; [$77,815,800] *$88,159,700*, of which $5,000,000 for fighting and preventing forest fires and $1,910,000 for insect and disease control shall be apportioned for use, pursuant to section 3679 of the Revised Statutes, as amended, to the extent necessary under the then existing conditions: *Provided*, That not more than $100,000 may be used for acquisition of land under the Act of March 1, 1911, as amended (16 U.S.C. 513–519): *Provided further*, That funds appropriated for "Cooperative range improvements", pursuant to section 12 of the Act of April 24, 1950 (16 U.S.C. 580h), may be advanced to this appropriation.

Forest research: For forest research at forest and range experiment stations, the Forest Products Laboratory, or elsewhere, as authorized by law; [$14,026,400] *$16,332,000*.

State and private forestry cooperation: For cooperation with States in forest-fire prevention and suppression, in forest tree planting on non-Federal public and private lands, and in forest management and processing, and for advising timberland owners, associations, wood-using industries, and others in the application of forest management principles and processing of forest products, as authorized by law; [$12,327,800] *$12,334,800*.

During the current fiscal year not to exceed $100,000 of the funds appropriated under this heading shall be available for the acquisition of sites authorized by the Act of March 3, 1925, as amended (16 U.S.C. 555), without regard to any other limitation on the amount available for this purpose. (*5 U.S.C. 511–512, 524, 565a; 7 U.S.C. 428a, 1010–1012, 1621–1627; 16 U.S.C. 471–583i, 594–1—594–5, 594a; 30 U.S.C. 601–604, 611–615; 31 U.S.C. 534; 43 U.S.C. 1181h–1181j; 36 Stat. 557; Department of the Interior and Related Agencies Appropriation Act, 1960.*)

Appropriated 1960, [a] **$108,670,000** Estimate 1961, [b] **$116,826,500**

[a] Includes $4,500,000 appropriated in Supplemental Appropriation Act, 1960.

[b] Includes $19,000 for activities transferred in the estimates from "Salaries and expenses", Library. The amounts obligated in 1959 and 1960 are shown in the schedule as comparative transfers.

Program and Financing

Total program (obligations)	117,003,494	109,389,000	117,526,500
Financing:			
Comparative transfers from (−) other accounts	−18,753	−19,000	
1959 appropriation available in 1958	625,348		
Advances and reimbursements from other accounts	−700,000	−700,000	−700,000
Unobligated balance no longer available	255,511		
New obligational authority	117,165,600	108,670,000	116,826,500
New obligational authority:			
Appropriation	$111,733,400	$108,670,000	$116,826,500
Transferred from "Conservation reserve program," Commodity Stabilization Service (73 Stat. 36)	5,432,200		
Appropriation (adjusted)	117,165,600	108,670,000	116,826,500

[1] Includes capital outlay as follows: June 30, 1959, $15,883,837; 1960, $13,000,000; 1961, $14,500,000.

1. *Forest land management—(a) National forest protection and management.*—The 151 national forests are protected from fire and their resources are managed in such ways as to bring about full utilization and maximum sustained production. This item also provides for management of land utilization projects, including revegetation and other development work. Funds appropriated under Cooperative range improvements are merged with this appropriation for obligational purposes.

Increases are provided in the budget to carry out portions of the recommendations in the program for the national forests.

FOREST SERVICE—Continued

Current authorizations—Continued

FOREST PROTECTION AND UTILIZATION—Continued

MAIN WORKLOAD FACTORS

Description	1959 actual	1960 estimate	1961 estimate
Area administered and protected:			
(a) National forest land (acres)	181,166,838	181,400,000	181,400,000
(b) Land utilization projects (acres)	4,638,540	4,400,000	4,400,000
Timber managed and protected (billion board-feet)	765	765	765
Timber sales (number)	38,925	41,000	42,000
Timber harvested (billion board-feet)	8.34	9.65	10.07
Forest fires controlled (number)	11,577	10,000	10,000
Area burned (acres)	139,326	300,000	200,000
Grazing use permits (calendar year)	30,411	30,400	30,400
Estimated number of livestock on national forest ranges (including calves and lambs)	6,000,000	6,000,000	6,000,000
Special use permits, excluding recreation (number)	36,724	36,900	37,000
Recreation special use permits (number)	21,709	22,300	23,000
Estimated number of visitors to national forests (calendar year)	75,000,000	80,000,000	86,000,000
Tree planting and seeding (annual) (acres)	37,824	40,000	40,000
Range reseeding and removal of competing vegetation (annual) (acres)	149,115	150,000	150,000
Receipts:			
Timber sales	$115,807,988	$134,000,000	$137,750,000
Grazing	3,750,916	3,750,000	3,750,000
Land uses	2,588,652	2,800,000	3,000,000
Land utilization projects	1,919,236	2,000,000	2,000,000
Total receipts	124,066,792	142,550,000	146,500,000

(*b*) *Fighting forest fires.*—This provides for employment of additional manpower and other facilities for forest fire emergencies which cannot be met by the fire control organization provided under national forest protection and management. A supplemental appropriation for this purpose is anticipated for 1960 under Proposed for later transmission.

(*c*) *Insect and disease control.*—Activities to suppress and control destructive insects and diseases that threaten timber areas include two types of work carried on jointly by Federal, State, and private agencies: (1) Surveys on forest lands to detect and appraise infestations of forest insects and infections of tree diseases and determination of protective measures to be taken, and (2) control operations to suppress or eradicate forest insects and diseases, including white pine blister rust.

(*d*) *Acquisition of lands.*—Lands are acquired to protect the watersheds of navigable streams and to increase the production of timber with the approval of the National Forest Reservation Commission. The present acquisition program is only for purchase of small tracts within the 55 approved purchase areas.

2. *Forest research.*—Research is conducted at nine regional forest experiment stations, the Forest Products Laboratory, and elsewhere.

(*a*) *Forest and range management.*—This research provides private and public land managers and owners with a sound basis for management of timber, forage, and watershed lands. Studies are conducted to maintain a sustained yield of products at the lowest possible costs; increase forage for domestic livestock and improve habitat for wildlife without damage to soil, watershed, or other values; assure maximum regular flow of usable water, and reduce floods and sedimentation.

(*b*) *Forest protection.*—Research is conducted to develop sound measures for the protection of forests from damage by fire, insects, and diseases. Forest fire research provides improved methods of predicting fire danger, preparing for, and combating fire by combinations of ground and aerial methods. Insect and disease research develops direct controls, silvicultural measures, and biological agents to combat forest pests.

(*c*) *Forest products utilization.*—Studies are conducted to develop new and improved forest products, reduction and utilization of waste, and use of low-quality wood and unpopular species. They include studies to reduce costs of logging and wood utilization, and to develop basic knowledge of wood and disseminate this to forest owners, manufacturers, fabricators, and consumers.

(*d*) *Forest resources.*—These investigations are conducted to inventory and appraise the condition of forest lands, volume and quality of standing timber, ownership of timber resources, annual growth and depletion, and the potential need for timber products. Studies of the economics of forest crop production and of marketing of forest products are also included.

MAIN WORKLOAD FACTORS

[Acres in millions]

	1959 actual	1960 estimate	1961 estimate
Initial surveys (annual)	21	30	30
Initial surveys (cumulative)	549	579	609
To be surveyed (total)[1]	231	201	171
Resurveys (annual)	32	30	30
Resurveys (cumulative)	350	380	410

[1] Includes all of Alaska and Hawaii.

3. *State and private forestry cooperation.*—This program, carried on in cooperation with the States, encourages private timber management. Privately owned forest lands comprise three-fourths of the Nation's commercial forest area and produce about 85% of all timber cut. The fire control program applies to all State and private forest lands within the boundaries of organized protection units. The remainder of the program is concentrated on small forest properties in private ownership because they are in greater need of management.

(*a*) *Forest fire control.*—Assistance is furnished 46 States in preventing and suppressing forest fires on private and State owned lands by financial aid, training, procurement of equipment, and a nationwide fire prevention campaign. About 92% of the 435 million acres of non-Federal ownership are now partially covered. During 1958 the acreage burned on protected areas was 0.29% as against an estimated 4.99% on unprotected lands. Of the total expenditures under this program, 78% is contributed by States and counties, 4% by private owners, and 18% by the Federal Government.

(*b*) *Forest tree planting.*—To encourage woodland owners to reforest unproductive portions of their holdings, and farmers to plant wind barriers around their fields and farmsteads—a total of more than 48 million acres altogether—the States provide planting stock at less than cost. The Federal Government shares the cost of producing the stock with the State and private landowners.

(*c*) *Forest management and processing.*—In cooperation with State foresters, 376 projects in 1,761 counties are operated to aid small woodland owners in applying good management to their timber holdings. In 1958 these projects covered some 58,700 owners and almost 3.5 million acres.

(*d*) *General forestry assistance.*—Technical forest management assistance is provided to State, community, private, and other Federal agencies, forest industries, colleges, and landowners.

Forest Roads and Trails

For expenses necessary for carrying out the provisions of title 23, United States Code, sections 203 and 205, relating to the construction and maintenance of forest development roads and trails, [$26,000,000] *$30,000,000,* to remain available until expended, for liquidation of obligations incurred pursuant to authority contained in title 23, United States Code, section 203: *Provided,* That funds available under the Act of March 4, 1913 (16 U.S.C. 501), shall be merged with and made a part of this appropriation: *Provided further,* That not less than the amount made available under the provisions of the Act of March 4, 1913, shall be expended under the provisions of such Act. *(5 U.S.C. 565a; 73 Stat. 613; Department of the Interior and Related Agencies Appropriation Act, 1960.)*

Appropriated 1960, [a] **$28,000,000** Estimate 1961, **$30,000,000**

[a] Includes $2,000,000 appropriated in Supplemental Appropriation Act, 1960.

Program and Financing

	1959 actual	1960 estimate	1961 estimate
Program by activities:			
1. Construction of roads and trails	$33,546,761	$29,959,194	$32,140,000
2. Maintenance of roads and trails	10,605,871	10,400,000	10,500,000
Total program costs [1]	44,152,632	40,359,194	42,640,000
3. Relation of costs to obligations:			
Costs financed from obligations of other years, net (−)	−8,851,238		
Obligations incurred for costs of other years, net		2,000,000	1,000,000
Total program (obligations)	35,301,394	42,359,194	43,640,000
Financing:			
Unobligated balance brought forward (contract authorization)	−26,915,895	−30,499,194	−30,000,000
Unobligated balance carried forward (contract authorization)	30,499,194	30,000,000	
New obligational authority	38,884,693	41,860,000	13,640,000
New obligational authority:			
Permanent contract authorization (new) (23 U.S.C. 203)	$30,000,000	$30,000,000	
Permanent indefinite appropriation (16 U.S.C. 501)	8,884,693	11,860,000	$13,640,000

[1] Includes capital outlay as follows: June 30, 1959, $31,457,440; 1960, $27,800,000; 1961, $30,000,000.

1–2. *Construction and maintenance of roads and trails.*—Roads and trails are essential to protection and management of national forests and utilization of their resources. The system consists of approximately 152,800 miles of roads and 112,200 miles of supplemental trails.

The 1961 program will permit the construction of about 376 miles of general purpose roads and about 460 miles of timber access roads to harvest national forest timber, a total of 836 miles. This compares with 1,221 miles constructed in 1959 and 870 being constructed in 1960.

Contract authority for 1961, which, in accordance with the Federal-Aid Highway Act, became available in 1960, will finance forest roads and trails construction in 1961. It is anticipated that this program will be financed by direct appropriation in future years.

Of the amounts received annually from national forest activities 10% is available under the permanent appropriation, Roads and trails for States, for construction and maintenance within the State from which such proceeds are derived (16 U.S.C. 501). Such amounts are merged with this appropriation for obligational purposes.

NOTE.—This program is described under "Forest roads and trails."

ACCESS ROADS

For acquiring by condemnation or otherwise additional roads needed for access to national-forest lands in carrying out the Act of June 4, 1897, as amended (16 U.S.C. 471, 472, 475, 476, 551), $1,000,000, to remain available until expended. (*Supplemental Appropriation Act, 1960.*)

Appropriated 1960, **$1,000,000** Estimate 1961, **$1,000,000**

Program and Financing

	1959 actual	1960 estimate	1961 estimate
Program by activities:			
Access roads (total costs [1]—obligations) (object class 10)	----------	$1,000,000	$1,000,000
Financing:			
Appropriation (new obligational authority)	----------	1,000,000	1,000,000

[1] Includes capital outlay as follows: June 30, 1960, $1,000,000; 1961, $1,000,000.

Full or partial interest in existing roads or rights-of-way is purchased (or obtained by condemnation if purchase negotiations fail) to provide access to national-forest areas where road access is a serious problem.

ACQUISITION OF LANDS FOR NATIONAL FORESTS

SUPERIOR NATIONAL FOREST

For the acquisition of forest land within the Superior National Forest, Minnesota, under the provisions of the Act of June 22, 1948 (62 Stat. 570; 16 U.S.C. 577c–h), as amended, $1,000,000, to remain available until expended: Provided, That no part of this appropriation shall be used for the acquisition of any land without the approval of the local government concerned.

Estimate 1961, **$1,000,000**

Program and Financing

	1959 actual	1960 estimate	1961 estimate
Program by activities:			
1. Acquisition of lands for Superior National Forest (total program costs [1])	$601,860	$93,470	$170,000
2. Relation of costs to obligations:			
Costs financed from obligations of other years (unpaid undelivered orders), net (−)	−84,808	−78,627	----------
Obligations incurred for costs of other years (unpaid undelivered orders), net	----------	----------	830,000

GENERAL PROVISIONS, FOREST SERVICE

SEC. 201. Appropriations available to the Forest Service for the current fiscal year shall be available for: (a) purchase of not to exceed [seventy-five] *ninety-eight* passenger motor vehicles for replacement only, and hire of such vehicles; operation and maintenance of aircraft and the purchase of not to exceed [three] *four of which two shall be* for replacement only; (b) employment pursuant to the second sentence of section 706(a) of the Organic Act of 1944 (5 U.S.C. 574), as amended by section 15 of the Act of August 2, 1946 (5 U.S.C. 55a), in an amount not to exceed $25,000; (c) uniforms, or allowances therefor, as authorized by the Act of September 1, 1954, as amended (5 U.S.C. 2131); (d) purchase, erection, and alteration of buildings and other public improvements (5 U.S.C. 565a); and (e) expenses of the National Forest Reservation Commission as authorized by section 14 of the Act of March 1, 1911 (16 U.S.C. 514).

SEC. 202. Except to provide materials required in or incident to research or experimental work where no suitable domestic product is available, no part of the funds appropriated to the Forest Service shall be expended in the purchase of twine manufactured from commodities or materials produced outside of the United States.

SEC. 203. No part of any appropriation to the Forest Service in this Act shall be used for publicity or propaganda purposes to support or defeat legislation pending before the Congress.

[SEC. 204. The Secretary may sell at market value any property located in Yalobusha, Chickasaw, and Pontotoc Counties, Mississippi, administered under title III of the Act of July 22, 1937, and suitable for return to private ownership under such terms and conditions as would not conflict with the purposes of said Act.]

SEC. [205] *204.* Funds appropriated under this Act shall not be used for acquisition of forest lands under the provisions of the Act approved March 1, 1911, as amended (16 U.S.C. 513–519, 521), where such land is not within the boundaries of a national forest nor shall these lands or lands authorized for purchase in Sanders County, Montana, be acquired without the approval of the local government concerned.

SEC. 205. The Secretary may acquire lands within the exterior boundaries of national forests in the States of Missouri, Illinois, Wisconsin, or Minnesota, suitable for administration in connection with the national forests, by exchanging therefor not to exceed an equal value of national-forest land in the State of Iowa pursuant to the provisions of subsection (a) of section 11 of the Act of August 3, 1956 (7 U.S.C. 428a). Such exchanges may be subject to such outstanding rights, reservations, and conditions as the Secretary may deem appropriate. (Department of the Interior and Related Agencies Appropriation Act, 1960.)

ALLOCATIONS AND ALLOTMENTS RECEIVED FROM OTHER ACCOUNTS

NOTE.—Obligations incurred under allocations or allotments from other accounts are included in the schedule of the parent appropriations as follows:
"Watershed protection," Soil Conservation Service.
"Flood prevention," Soil Conservation Service.
"Agricultural conservation program," Agricultural Conservation Program Service.
"Great Plains conservation program," Soil Conservation Service.
"Conservation reserve program," Commodity Stabilization Service.
"Construction, general," rivers and harbors and flood control, Army—Civil.
"Mutual security—economic," funds appropriated to the President.
"Salaries and expenses," Office of Civil and Defense Mobilization.
"Civil defense and defense mobilization functions of Federal agencies," Office of Civil and Defense Mobilization.

Appropriation	22,858,392	30,548,758	34,960,170

1. *Forest fire prevention.*—Fees for the use of the character "Smokey Bear" by private enterprises are collected under regulations promulgated by the Secretary and are available for furthering the nationwide forest fire prevention campaign (18 U.S.C. 711).

2. *Restoration of forest lands and improvements.*—Funds received from settlement of claims involving damage to lands or improvements and from forfeiture of deposits and bonds by permittees and timber purchasers are used for the restoration made necessary by the action which led to the settlement or forfeiture (72 Stat. 217).

3. *Payment to Minnesota.*—At the close of each fiscal year the State of Minnesota is paid 0.75% of the appraised value of certain Superior National Forest lands in the counties of Cook, Lake, and St. Louis for distribution to these counties (16 U.S.C. 577g).

4. *Payments due counties, submarginal land program.*—Of the revenues received from the use of submarginal lands, 25% is paid to the counties in which such land is situated for school and road purposes (7 U.S.C. 1012).

5. *Payments to school funds, Arizona and New Mexico.*—The States of Arizona and New Mexico are paid a share of the national-forest receipts for school purposes (36 Stat. 562, 573).

6. *Payments to States and territories.*—With minor exceptions, 25% of the money received from the national forests is paid to the States and territories for public schools and roads of the county in which such forests are situated (16 U.S.C. 500).

7. *Construction of improvements, Salt Lake City, Utah.*—Funds from sale of Forest Service property to Salt Lake City will be used for construction of a fire warehouse and related facilities (72 Stat. 589).

8. *Relation of costs to obligations.*—The year-end balances of unpaid undelivered orders are as follows: 1959, $1,833; 1960, $1,833; 1961, $1,833.

Intragovernmental funds:

Working Capital Fund, Forest Service

This fund finances on a reimbursable basis various services such as repairing and replacing equipment, stocking and issuing supplies, and operation of photographic and reproduction facilities in support of programs of the Forest Service (16 U.S.C. 579b). These service operations serve programs of fire protection, timber

WORKING CAPITAL FUND, FOREST SERVICE—Continued

utilization, construction and maintenance of roads and other improvements, reforestation, grazing, watershed, forest and forest products research, and kindred conservation activities of the Forest Service, including cooperative assistance with other Federal agencies, States, counties, and individuals engaged in the same objectives. Government investment in the fund as of June 30, 1959, including donated assets at its inception and retained earnings for 1959, is $17,133,901. By the end of 1961 the investment is anticipated to be $20,164,858, an increase of $3,030,957, which represents estimated earnings and donations during 1960 and 1961. Earnings are retained to furnish adequate working capital.

FOREST PROTECTION AND UTILIZATION

Program and Financing

	1959 actual	1960 estimate	1961 estimate
Program by activities:			
Forest land management: Fighting forest fires (total costs—obligations)		$21,500,000	
Financing:			
Proposed supplemental appropriation		21,500,000	

Under existing legislation, 1960.—A supplemental appropriation for 1960 in the amount of $21.5 million is anticipated for fighting forest fires.

GENERAL PROVISIONS

SEC. 401. Within the unit limit of cost fixed by law, appropriations and authorizations made for the Department under this Act shall be available for the purchase, in addition to those specifically provided for, of not to exceed [four hundred and twenty-five] *three hundred and thirty-seven* passenger motor vehicles, of which [four hundred and twenty-three] *three hundred and thirty-two* shall be for replacement only, and for the hire of such vehicles.

SEC. 402. Provisions of law prohibiting or restricting the employment of aliens shall not apply to employment under the appropriation for the Foreign Agricultural Service.

SEC. 403. Funds available to the Department of Agriculture shall be available for uniforms or allowances therefor as authorized by the Act of September 1, 1954, as amended (5 U.S.C. 2131).

SEC. 404. No part of the funds appropriated by this Act shall be used for the payment of any officer or employee of the Department who, as such officer or employee, or on behalf of the Department or any division, commission, or bureau thereof, issues, or causes to be issued, any prediction, oral or written, or forecast, except as to damage threatened or caused by insects and pests, with respect to future prices of cotton or the trend of same.

SEC. 405. Except to provide materials required in or incident to research or experimental work where no suitable domestic product is available, no part of the funds appropriated by this Act shall be expended in the purchase of twine manufactured from commodities or materials produced outside of the United States.

SEC. 406. Not less than $1,500,000 of the appropriations of the Department for research and service work authorized by the Acts of August 14, 1946, July 28, 1954, and September 6, 1958 (7 U.S.C. 427, 1621–1629; 72 Stat. 1793), shall be available for contracting in accordance with said Acts.

SEC. 407. No part of any appropriation contained in this Act or of the funds available for expenditure by any corporation or agency included in this Act shall be used for publicity or propaganda purposes to support or defeat legislation pending before the Congress. (*Department of Agriculture and Farm Credit Administration Appropriation Act, 1960.*)

Statement of proposed obligations for purchase and hire of passenger motor vehicles for the fiscal year 1961

Appropriation	Motor vehicles to be purchased		Old vehicles to be exchanged		Net cost of vehicles to be purchased	Old vehicles still to be used	Cost of hire of motor vehicles	Users and public purpose
	Number	Gross cost	Number	Allowance (estimate)				
AGRICULTURAL RESEARCH SERVICE								
Salaries and expenses:								
Research	49	$73,500	44	$19,800	$53,700	320	$33,000	Scientific and technical personnel: For necessary field travel in carrying out research programs on agricultural problems relating to production and utilization of agricultural products, including use of one automobile at National Arboretum in Washington, D.C.
Station wagon	6	11,700	6	2,700	9,000	31	500	Do.
Ambulance						1		Officials and employees at Plum Island, N.Y., foot-and-mouth research laboratory: For use of employees who may require ambulance service. No private vehicles allowed on island.
Bus						6		Officials and employees at Plum Island, N.Y., foot-and-mouth research laboratory: For use in transporting employees from ferry to laboratory and return. No private vehicles allowed on island.
Plant and animal disease and pest control.	115	172,500	115	51,750	120,750	573	247,500	Inspection personnel and control supervisors: Transportation to farms, ranches, and other premises in field and urban locations in carrying out plant and animal disease and pest control, including inspection and quarantine work.
Station wagon						3	500	Do.
Meat inspection						5	27,500	Inspection personnel: Transportation to slaughterhouses and meat packing plants in urban centers, including field station in District of Columbia, in carrying out provisions of laws relating to Federal inspection of meat and meat food products.
Working capital fund						5	1,000	Superintendent, engineers, and other officials: Transportation in supervising and inspecting maintenance and operation of agricultural research center and for transporting officials and visiting agricultural leaders to and from various sections of the center.
Total, Agricultural Research Service.	170	257,700	165	74,250	183,450	944	310,000	
SOIL CONSERVATION SERVICE								
Conservation operations	113	169,500	113	33,900	135,600	616	123,000	State and area conservationists, technical specialists, and survey supervisors: Transportation in connection with supervision and inspection of service activities in conservation districts.
Station wagon						3	600	Do.
Watershed protection	8	12,000	8	2,300	9,700	22	4,300	Project personnel: Transportation for investigation and planning of proposed small watershed projects; surveying and supervising the installation of work of improvement in authorized projects, and for negotiating with local sponsors of the projects; for investigating the agricultural phases of proposed river basin projects.
Station wagon	4	7,300	4	1,600	5,700	34	6,600	Do.

SOIL CONSERVATION SERVICE—con.								
Flood prevention	5	$7,500	5	$1,500	$6,000	50	$9,500	Project personnel: Transportation in connection with surveying and supervising the installation of works of improvement in authorized flood prevention projects.
Station wagon	1	1,800	1	400	1,400	5	1,000	Do.
Water conservation and utilization projects.						1		Project personnel: Transportation in connection with the development, operation, and management of the Eden Valley project.
Great Plains conservation program	1	1,500	1	300	1,200	9	2,000	Assistant State conservationists: Transportation in connection with supervision and inspection of Service activities in the Great Plains conservation program in the field offices of the 10 Great Plains States.
Total, Soil Conservation Service.	132	199,600	132	40,000	159,600	740	147,000	
AGRICULTURAL MARKETING SERVICE								
Marketing research and service: Marketing research and agricultural estimates.	11	16,500	11	3,300	13,200	42	19,000	Research and technical specialists: For use in supervising, directing and carrying out marketing research programs. Field statisticians: Transportation to and from important agricultural areas in the preparation of crop and livestock estimates.
Station wagon						3		Research and technical specialists: For transportation of personnel, material, and commodity samples in carrying out marketing research programs.
Marketing services	14	21,000	14	4,200	16,800	62	95,000	Market news reporters: For use in gathering and disseminating news of market conditions for various farm crops and livestock. Inspectors and graders: For inspection, classing, and grading of farm products, including work required under the Cotton, Tobacco, Naval Stores, and Grain Standards Acts. Marketing specialists, inspectors, and graders: Transportation to and from warehouses, stockyards, markets, railroad yards, piers, and other places for licensing or registration, supervision of operations of licensees to assure compliance, collection of samples for testing, handling of violations with respect to the administration of the U.S. Warehouse, Federal Seed, Packers, and Stockyards and Naval Stores Acts.
Station wagon	3	5,850	3	900	4,950	6		Market news reporters and clerks: For transportation of personnel and material in conducting tobacco market news program. Cotton field representatives: For transportation of personnel and material in carrying out classing and market information programs.
Expenses and refunds, inspection and grading of farm products.	5	7,500	5	1,500	6,000	69	55,000	Inspectors and graders: For use in inspecting and grading farm and food products—paid from funds advanced by producers for which services are performed.
Perishable Agricultural Commodities Act fund.							5,000	Marketing specialists: Transportation to and from offices of produce dealers and truckers in investigating complaints and violations and checking establishments for compliance with license provisions under Perishable Agricultural Commodities and Produce Agency Act—paid from license fees collected.
School lunch program							600	Area supervisors and other officials: For use in supervision and review of school lunch program.
Removal of surplus agricultural commodities.							2,000	Area supervisors and other officials: For transportation in connection with supervision and review of agricultural distribution program.
Special milk program							700	Area supervisors and other officials: For use in supervision and review of special milk program.
Total, Agricultural Marketing Service.	33	50,850	33	9,900	40,950	182	[1] 177,300	
FOREIGN AGRICULTURAL SERVICE								
Salaries and expenses							950	Administrator and other officials, for Foreign Agricultural Service: Transportation to and from official conferences and meetings in Washington, D.C., with Members of Congress, U.S. Government officials, and officials of international organizations and of foreign governments; trips to and from embassies of foreign governments for visaing of passports; transportation of foreign trainees. Messengers: Delivery of special or classified mail in the Washington area.
Station wagon							575	Do.
Technical cooperation, general, executive (transfer to Agriculture): Station wagon.							575	Do.
Total, Foreign Agricultural Service.							2,100	
COMMODITY STABILIZATION SERVICE								
Administrative expenses, sec. 392, Agricultural Adjustment Act of 1938.						2	675	Insular office director and field representatives for travel within Puerto Rico and United States in connection with agricultural conservation, sugar, and other assigned duties.
COMMODITY CREDIT CORPORATION								
Limitation on administrative expenses.							3,825	Travel of field inspectors and commodity office employees in connection with Commodity Credit Corporation and various Commodity Stabilization Service programs.
FARMERS HOME ADMINISTRATION								
Salaries and expenses	6	9,000	6	1,500	7,500	20	[2] 9,500	State directors and other field officials: Transportation in assisting and advising county supervisors in the investigation of applications, making of loans, rendering farm management assistance to borrowers, and collecting and servicing loans under the various loan programs.

See footnotes at end of table, p. 383.

DEPARTMENT OF COMMERCE

New obligational authority recommended for 1961 for the Department of Commerce totals $563 million. Of this amount 53% is for maritime activities. Another 21% is for various aids to business, including a proposed new program of aid to areas of persistent unemployment. The remainder is largely for science and research activities by the Bureau of the Census and the National Bureau of Standards, and for the services of the Weather Bureau. Highway activities are financed predominantly through the Highway trust fund and have relatively minor impact on departmental budget totals.

The recommended new obligational authority for 1961 is $16 million lower than estimated for 1960. Substantial decreases will occur as a result of the completion of the enumeration phase of the Eighteenth Decennial Census and the proposed transfer to the Highway trust fund of funding for forest and public lands highways. However, these decreases are largely offset by increases for the National Bureau of Standards, the Weather Bureau, and the proposed area assistance program.

Expenditures by the Department of Commerce are estimated to decrease from $544 million in 1960 to $473 million in 1961. Expenditures and new obligational authority for the Department are shown by function in the following table:

RECAPITULATION OF BUDGET AUTHORIZATIONS AND EXPENDITURES

[In thousands]

Function and subfunction	New obligational authority			Expenditures		
	1959 enacted	1960 estimate	1961 estimate	1959 actual	1960 estimate	1961 estimate

New obligational authority:			
Appropriation	$2,933,400	$2,660,000	$3,030,000
Transferred (64 Stat. 1263) to—			
"Salaries and expenses," Bureau of Foreign Commerce	−18,590		
"Salaries and expenses," Business and Defense Services Administration	−37,000		
Appropriation (adjusted)	2,877,810	2,660,000	3,030,000

1. *Executive direction of the Department.*—Provides for the formulation of Government policy on matters affecting programs and functions assigned to the Department.

2. *Departmental staff services.*—Staff assistance and supervision in the general management and administration of the Department are provided in personnel, budget, management, information, publications, security, legal, and internal inspection.

3. *Administrative services.*—Departmentwide direction is provided in property, space, records, general administrative services, safety, motor vehicles, and library activities. Centralized general administrative services, including accounting, are furnished to the smaller bureaus of the Department.

4. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources and applicable adjustment as reflected in the following table:

	1958 actual	*1959 actual*	*1960 estimate*	*1961 estimate*
Selected resources at end of year: Unpaid undelivered orders	$24,814	$38,179	$35,969	$43,514
Selected resources at start of year (−)		−24,814	−38,179	−35,969
Adjustment of selected resources at start of year		−710		
Costs financed from obligations of other years, net (−)			−2,210	
Obligations incurred for costs of other years, net		12,655		7,545

OFFICE OF FIELD SERVICES

SALARIES AND EXPENSES

For expenses necessary to operate and maintain field offices for the collection and dissemination of information useful in the development and improvement of commerce throughout the United States and its possessions, $2,584,000.

Estimate 1961, [a] **$2,584,000**

[a] Estimate is for activities previously carried under "Salaries and expenses," Business and Defense Services Administration.

Program and Financing

	1959 actual	1960 estimate	1961 estimate
Program by activities:			
Dissemination and collection of business information (total obligations)	$2,254,916	$2,334,000	$2,584,000
Financing:			
Comparative transfers from (−) other accounts	−2,254,916	−2,334,000	
Appropriation (new obligational authority)			2,584,000

This Office is responsible for the execution of the field programs of the Business and Defense Services Administration, the Bureau of Foreign Commerce, and the Office of Business Economics, and provides outlets for the statistical data published by the Department. These programs provide the means for enabling the Department of Commerce to deal with the business public on a local basis covering all phases of the Department's trade promotion and development program, foreign and domestic.

In addition, the Office also gathers information required by the constituent units it represents.

GENERAL ADMINISTRATION—Continued

Current authorizations—Continued

[PARTICIPATION IN CENTURY 21 EXPOSITION]

[For expenses necessary to carry out the provisions of the Act of September 2, 1958 (72 Stat. 1703), as amended, including not to exceed $5,000 for official entertainment expenses, $9,000,000, to remain available until expended.] *(73 Stat. 486; Mutual Security Appropriation Act, 1960.)*

Appropriated 1960, **$9,000,000**

Program and Financing

	1959 actual	1960 estimate	1961 estimate
Program by activities:			
1. Exhibit hall:			
(a) Site development and construction			$3,450,000
(b) Design and supervision		$164,600	112,000
2. Exhibit program		311,400	3,385,840
3. Program direction and administration		136,445	225,186
Total obligations		611,845	7,173,026
Financing:			
Unobligated balance brought forward			−8,388,155
Unobligated balance carried forward		8,388,155	1,215,129
Appropriation (new obligational authority)		9,000,000	

Funds are provided for Federal Government participation in the Seattle, Wash., international exposition, known as Century 21, to take place from April 21 to October 21, 1962.

1. *Exhibit hall.*—Federal participation will include the construction of an appropriate exhibition hall. Design, construction, and supervision of the exhibition hall is the responsibility of the Federal Government. Initial architectural plans will be completed in 1960. Construction will go forward in 1961.

2. *Exhibit program.*—Exhibits to be developed by various Federal agencies, private industry, educational institutions, and scientific organizations, will depict the role of science in modern civilization. Exhibits will be constructed in 1961. Exhibit theme covers four areas, the life sciences, energy, man, and space.

Object Classification

Public enterprise funds:

AVIATION WAR RISK INSURANCE REVOLVING FUND

The Secretary of Commerce is hereby authorized to make such expenditures, within the limits of funds available pursuant to section 1306 of the Act of August 23, 1958 (72 Stat. 803), and in accordance with section 104 of the Government Corporation Control Act, as amended (31 U.S.C. 849), as may be necessary in carrying out the programs set forth in the budget for the fiscal year [1960] *1961* for aviation war risk insurance activities under said Act (72 Stat. 800). *(72 Stat. 800–806; Department of Commerce and Related Agencies Appropriation Act 1960.)*

Program and Financing

	1959 actual	1960 estimate	1961 estimate
Program by activities:			
Administrative expense (total costs—obligations)	$277	$6,400	$200
Financing:			
Amounts becoming available: Revenue and receipts: Fees for issuance of binders	600	26,600	1,000
Unobligated balance brought forward		323	20,523
Total amounts available	600	26,923	21,523
Capital transfer (payment of profits to Treasury)(−)			−21,323
Unobligated balance carried forward	−323	−20,523	
Financing applied to program	277	6,400	200

This fund provides aviation war risk insurance in the event of an outbreak of war. Binders are issued to cover aircraft and cargo, and will become war risk insurance automatically on the outbreak of war. Administrative costs are paid out of fee receipts (72 Stat. 731).

Intragovernmental funds:

Working Capital Fund

This fund finances duplicating, central stocks of office supplies, health services, relocation expenses, and other common departmental services which can be operated better on a centralized basis (5 U.S.C. 607). Duplicating facilities are being temporarily expanded during 1961 to care for increased workload following the 1960 decennial census. Sales are priced essentially at cost. Earnings are paid to the Treasury. Capital includes an appropriation of $100,000.

1. *Air Coordinating Committee.*—In accordance with Executive Order 10655, as amended by Executive Order 10796, the Air Coordinating Committee is composed of representatives from agencies having aviation responsibilities. The Committee examines aviation problems and developments affecting more than one agency and recommends joint policies. Recommendations are submitted to the President on aviation policies requiring his attention. Liaison is provided between Government and industry in aviation matters and with the International Civil Aviation Organization.

2. *Government Patents Board.*—The Board is responsible, under Executive Order 10096, for the administration and interpretation of the policy set forth therein governing the respective property rights of the Government and its employees in inventions made by its employees.

6. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources and applicable adjustment as reflected in the following table:

	1958 actual	*1959 actual*	*1960 estimate*	*1961 estimate*
Selected resources at end of year: Unpaid undelivered orders	$7,447	$48,570	$5,015	$5,015

Federal Reserve Bank of St. Louis

The Bureau is the principal fact-finding and statistical agency of the Federal Government.

1. *Retail, wholesale, and service trade statistics.*—Estimates of sales and inventory trends are computed monthly for the retail and wholesale trades, and of consumer credit outstanding in retail trade. An advance report of retail sales is issued within 10 days after the close of the month. Once a year, the data are reported in more detail, including estimates of total sales for the year by regions. In 1961, department store series of the Federal Reserve System will be integrated with census retail trade statistics, the combination resulting in monthly retail sales data by region; nationwide weekly retail sales data; monthly department store inventory and consumer credit data; and monthly sales and stocks for broad department store-type merchandise line categories. Monthly estimates of service trade receipts will be initiated.

2. *Manufacturing and industrial statistics.*—Periodic surveys are made of production, shipments, orders, and materials consumed for important commodities. An annual survey of manufactures produces data on number, size, industrial classification, and location of manufacturing establishments and key measures of factory operations such as employment, shipments, inventories, etc.

3. *Agriculture statistics.*—Information is compiled on cotton ginned at 11 dates during the ginning season.

4. *Foreign trade and shipping statistics.*—Monthly, quarterly, and annual reports are published on the kind, quantity, shipping weight and dollar value of imports and exports.

5. *Population statistics.*—This activity includes current estimates of the number of households, the farm population, school enrollment, personal income, population mobility and other characteristics of the population. These current estimates are based on continuing monthly survey of 35,000 interviewed households. Annual estimates of the population of the United States and of each of the States, and projections of future population are prepared. The monthly household survey is also used to obtain monthly estimates of national employment and unemployment for the Department of Labor on a reimbursable basis.

6. *Construction and housing statistics.*—Monthly reports are published for housing starts, dwelling units authorized by building permits, and private nonresidential construction, as well as quarterly data on housing vacancies and construction costs.

7. *State and local government statistics.*—Reports are published providing national estimates of total governmental finances, employment, and payrolls, and comparative statistics for State governments and larger cities. In 1961, national totals of finances will be published quarterly, and totals of anticipated capital expenditures will be published annually.

8. *Statistical abstract and special reports.*—The Statistical Abstract, issued annually, summarizes government and private statistics on the industrial, social, political, and economic activities of the United States. Historical and other general reports are also published periodically. A report showing for each county in the United States the number and kind of all business establishments, and their employment and payrolls is published on a biennial basis. In 1961 preparation will be made for future publications of selected data, such as commercial sales, mergers, dissolutions, etc., in which the unit of tabulation is the company rather than the individual establishment.

12. *Relation of costs to obligations.*—The relationship is derived from year-end balances and selected resources and applicable adjustment as reflected in the following table:

	1958 actual	*1959 actual*	*1960 estimate*	*1961 estimate*
Selected resources at end of year:

The 1958 censuses of business, manufactures, and mineral industries will provide data on the volume of production and trade, the number, size, geographical distribution, and other characteristics of the Nation's 3.3 million business and industrial enterprises. The preparation for printing and the publication of the final volumes and analytical tabulations will be accomplished in 1961.

The enumeration of the population, required by the Constitution at 10-year intervals, will be completed during 1960. Preliminary population totals will be announced locally for most places in late April or May of 1960, subject to later adjustment. Official State figures, as required by law, will be furnished the President by December 1, 1960, and shortly thereafter certified figures will be available for all counties, cities, towns, and villages. Many publications providing social and economic characteristics of the population, as well as housing data, will

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

be released in 1961. The data processing for the census of agriculture will be completed, preliminary State and county data will be published, and data processing for the censuses of population and housing will be continued during 1961.

Obligations incurred for costs of other years, net	60,571		
Total reimbursable program obligations	5,226,874	4,257,200	2,756,300
Total program (obligations)	17,660,990	18,307,200	20,756,300
Financing:			
1959 appropriation available in 1958	286,228		
Unobligated balance transferred from "Ship construction (liquidation of contract authorization)," maritime activities (73 Stat. 52)	−36,950		
Advances and reimbursements from—			
Air Force	−1,022,526	−957,200	−868,300
Army	−253,539	−243,300	−37,600
Navy	−1,134,535	−602,200	−187,000
Department of Commerce	−252,738	−135,700	−48,400
Miscellaneous Federal agencies	−1,167,236	−1,216,600	−818,900
Miscellaneous non-Federal sources	−1,378,143	−1,102,200	−796,100
Proceeds from sale of personal property applied (40 U.S.C. 481(c))	−18,157		
Unobligated balance no longer available	10,206		
Appropriation (new obligational authority)	12,693,600	14,050,000	18,000,000

NOTE.—Reimbursements from non-Federal sources were derived from the sale of special maps and charts and for providing special surveys and related data (33 U.S.C. 883(e)).

The survey publishes aeronautical and nautical navigation charts of the United States, its possessions, and surrounding waters, using data obtained through field surveys. In addition, seismological and geodetic control data are obtained and disseminated, and worldwide tide and current information is compiled and published. Increases for 1961 are primarily to support an expanded agency role in oceanography, increased requirements for aeronautical charts, improvement of ship base facilities, and initiation of a research and development program. The increased importance of oceanography was recognized in the recent report of the National Academy of Sciences' Committee on Oceanography and amounts provided in 1961 will permit the survey to augment its present operations in the marine sciences in those areas in which it is especially suited to make important contributions in support of the national effort in oceanography. Increased research effort will be undertaken in 1961 to support the agency's activities in the fields of hydrography, geomagnetism, geodesy, photogrammetry, and seismology.

Direct program—1. *Surveys and charts for marine and air navigation.*—Hydrographic, topographic, tide and current, magnetic, and aeronautical surveys are made to secure information for nautical and aeronautical charts and tables required for safe sea and air navigation. A supplemental appropriation for 1960 is anticipated under Proposed for later transmission.

Miscellaneous receipts returned to the Treasury from the sale of charts and related publications were $735,272 in 1959 and are estimated to be $820,000 during 1960, and $960,000 in 1961.

CHARTS AND TABLES PRINTED AND DISTRIBUTED

	1959 actual	*1960 estimate*	*1961 estimate*
Nautical charts:			
Military	356,111	400,000	450,000
Other	677,084	735,000	800,000
Total	1,033,195	1,135,000	1,250,000
Standard aeronautical charts:			
Military	3,683,493	3,200,000	3,300,000
Other	1,885,169	2,100,000	2,200,000
Total	5,568,662	5,300,000	5,500,000
Airport, radio facility, etc.:			
Military	21,686,450	25,000,000	30,000,000
Other	9,472,829	12,240,000	15,000,000
Total	31,159,279	37,240,000	45,000,000
Coast pilots, tide and current tables	77,266	78,000	78,000

2. *Geodetic control.*—Surveys are made in the United States and its possessions to determine the horizontal position (latitude and longitude) and the vertical positions (elevation above mean sea level) of a network of control points which are permanently marked on the ground. These points are spaced so that adequate survey control is available for topographic, geologic, and other types of mapping; nautical charting; and for planning large-scale engineering projects. The positions and descriptions of these points are published and distributed to Federal, State, and local agencies and the general public.

AREA SURVEYED AND MARKED POINTS ESTABLISHED

	1959 actual	*1960 estimate*	*1961 estimate*
Triangulation:			
Area (square miles)	46,650	40,000	41,370
Marked stations established	908	890	800
Leveling: Linear miles	6,326	6,000	6,000

3. *Earthquake investigation.*—Earthquakes are located and investigated to determine severity and to obtain engineering data for the design of earthquake-resistant structures and information concerning ground movements. The Bureau operates 11 seismograph and 71 strong motion

Federal Reserve Bank of St. Louis

COAST AND GEODETIC SURVEY—Continued

Current authorizations—Continued

SALARIES AND EXPENSES—Continued

stations, investigates about 15 severe earthquakes annually, and collaborates with 14 universities and 250 domestic and foreign seismograph stations. The seismic sea wave warning program furnished data for 4 alerts for earthquakes in southeast Alaska, on the Kamchatka Peninsula off the Siberian coast, and in the Kurile Islands.

4. *Instrument services.*—These include the design and construction, maintenance, storage, and issuance of intricate instruments used in surveying and processing operations.

7. *Relation of costs to obligations.*—The relationship between direct cost and direct obligations is derived from year-end balances of selected resources and applicable adjustment as reflected in the following table:

	1958 actual	*1959 actual*	*1960 estimate*	*1961 estimate*
Selected resources at end of year: Inventories and items on order:				
Stores (goods unconsumed by projects)	$503,474	$497,811	$615,411	$568,411
Unpaid undelivered orders (appropriation balances obligated for goods and services on order not yet received)	682,896	607,990	376,390	309,390
Inventory of charts for sale	399,679	463,835	463,835	463,835
Inventory of publications for sale		80,028	80,028	80,028
Work in process	26,206	20,317	20,317	20,317
Total selected resources at end of year	1,612,255	1,669,981	1,555,981	1,441,981
Selected resources at start of year (−)		−1,612,255	−1,669,981	−1,555,981
Adjustment of selected resources reported at start of year		−164,746		
Costs financed from obligation of other years, net (−)		−107,020	−114,000	−114,000

Reimbursable program.—Reimbursable work for other Federal agencies is primarily for aeronautical and nautical charts of the United States and its possessions and the performance of geodetic control surveys.

Reimbursements from non-Federal sources are primarily from States to carry out geodetic surveys required as part of the interstate highway program.

7. *Relation of costs to obligations.*—The relationship between reimbursable costs and reimbursable obligations is derived from year-end balances of selected resources and applicable adjustment as reflected in the following table:

	1958 actual	*1959 actual*	*1960 estimate*	*1961 estimate*
Selected resources at end of year: Inventories and items on order: Unpaid undelivered orders (appropriation balances obligated for goods and services on order not yet received)	$151,199	$207,899	$167,399	$167,399
Selected resources at start of year (−)		−151,199	−207,899	−167,399
Adjustment of selected resources reported at start of year		3,871		
Costs financed from obligations of other years, net (−)			−40,500	
Obligations incurred for cost of other years, net		60,571

The Administration provides statistical and informational services to the business community and carries out industrial mobilization readiness programs.

1. *Industries and commodities.*—A focal point for the cooperation of Government and industry is provided in promoting economic stability and growth of industry; industrial and commercial information is analyzed, and basic, special, and periodic studies and reports for use by both industry and Government are published; industrial capabilities to meet the requirements for industrial production in a national emergency are measured; and assistance is provided to industry in the current military procurement programs. Mobilization planning activities are financed by allocation from the Office of Civil and Defense Mobilization.

2. *Marketing and distribution.*—The Office of Distribution promotes the more effective distribution of goods and services by disseminating market facts and distribution information to Government, industry, and business.

3. *Technical information.*—Domestic and foreign scientific and technical data are compiled primarily from Government research or translation and made available upon request to business, industry, the general public, and Government agencies. In addition, direct assistance is furnished to industry in development of voluntary programs for standardization of commodities.

4. *Area development.*—This office assists State and local communities in economic development matters. It serves as a clearinghouse for area groups seeking to diversify and strengthen their economies.

6. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources and applicable adjustment as reflected in the following table:

	1958 actual	*1959 actual*	*1960 estimate*	*1961 estimate*
Selected resources at end of year: Unpaid undelivered orders (appropriation balances obligated for goods and services on order and not yet received)	$368,821	$377,098	$383,255	$383,255
Selected resources at start of year (−)		−368,821	−377,098	−383,255
Adjustment of selected resources reported at start of year		1,743		
Obligations incurred for costs of other years, net		10,020	6,157

1. *Export control* protects the domestic economy from drain on scarce commodities, safeguards the national security by regulating exports of strategic commodities, and implements U.S. foreign policy. In the absence of improvement in relations with certain countries, these controls must be continued and, as necessary, extended to other areas to guard against transshipment. The Bureau of Customs is responsible for the policing of shipments at points of export. The Export Control Act of 1949, as amended, expires June 30, 1960. This estimate for 1961 is being submitted subject to the extension of said act.

2. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources and applicable adjustment as reflected in the following table:

MARITIME ACTIVITIES

The maritime activities of the U.S. Government are directed toward the promotion of U.S. foreign commerce and to aiding in the national defense. The budget program includes funds for construction and operating subsidies to compensate for differences between foreign and domestic costs, research and development with respect to ship designs and operations, maintenance of a reserve fleet and shipyard capacity, training of cadets to become licensed merchant marine officers, and regulation of the shipping industry. Through public enterprise funds a capability to provide emergency shipping capacity is maintained, vessel mortgages and construction loans are guaranteed, and binders for war-risk insurance are provided.

Total expenditures to carry out this program in 1961, excluding expenditures contingent upon defaults of guaranteed mortgages, are estimated at $264 million, of which $248 million is required to meet obligations arising under subsidy contracts. These contracts, now covering operations conducted by 15 companies, represent a long term obligation of the Government. Subsidy funds for operation and replacement of the 312 ships required to perform the 2,015 maximum voyages per year now under contract until expiration of the agreements would approximate $4 billion. Authorization has been enacted to permit the Board to contract for a maximum of an additional 385 voyages. It is estimated that subsidization of the 60 ships required for these additional voyages would entail the expenditure of $1 billion over a 20-year contract term. A reduction of the current voyage authorization by 210 to 2,190 voyages is recommended under the appropriation for Operating-differential subsidies.

Each subsidized voyage, including a pro-rata construction subsidy, is estimated at $2.8 million over the typical 20-year contract. The foregoing projections are based on existing legislation, current operating and construction costs, and current conditions in the shipping industry.

Current authorizations:

Ship Construction

For construction-differential subsidy and cost of national-defense features incident to construction of ships for operation in foreign commerce (46 U.S.C. 1152, 1154); for construction-differential subsidy and cost of national-defense features incident to the reconstruction and reconditioning of ships under title V of the Merchant Marine Act, 1936, as amended (46 U.S.C. 1154); for acquisition of used ships pursuant to section 510 of the Merchant Marine Act, 1936, as amended (46 U.S.C. 1160); and (not to exceed [$3,900,000] *$6,000,000*) for research, development, and design expenses incident to new and advanced ship design, machinery, and equipment; [$130,250,000] *$129,000,000*, to remain available until expended: *Provided*, That transfers may be made to the appropriation for the current fiscal year for "Salaries and expenses" for administrative and warehouse expenses (not to exceed [$2,500,000] *$3,000,000*) and for reserve fleet expenses (not to exceed $500,000), and any such transfers shall be without regard to the limitations under that appropriation on the amounts available for such expenses[: *Provided further*, That of the amount herein appropriated not to exceed $1,250,000 shall be used for the payment of costs already incurred in the design of the superliner passenger vessels authorized by Public Law 85-521]. (*73 Stat. 203; Department of Commerce and Related Agencies Appropriation Act, 1960.*)

Appropriated 1960, **$130,250,000** Estimate 1961, **$129,000,000**

Program and Financing

	1959 actual	1960 estimate	1961 estimate
Program by activities:			
1. Construction-differential subsidy	$79,842,184	$162,766,653	$111,000,000
2. Construction of prototype ships	167,881	911,445	----------
3. Acquisition of replaced ships	11,299,266	20,016,046	14,000,000
4. Research and development	$4,024,940	$6,877,874	$7,100,000
5. Nuclear ship construction and design	1,810,445	1,060,715	100,000
6. Administrative and warehouse expenses	1,998,339	2,500,000	3,000,000
Total obligations	99,143,055	194,132,733	135,200,000

Unobligated balance brought forward	−52,850,788	−95,182,733	−31,300,000
Unobligated balance carried forward	95,182,733	31,300,000	25,100,000
Appropriation (new obligational authority)	141,475,000	130,250,000	129,000,000

The 1961 estimate provides for—

1. *Construction-differential subsidy* and national defense allowances for construction of 14 vessels under the ship replacement program.

3. *Acquisition of replaced ships.*—Acquisition costs for an estimated 14 vessels being replaced.

4. *Research and development.*—Funds are provided for an expansion of the research and development program. Fund requirements for acquisition of facilities in support of the NS *Savannah* will be reduced in 1961 and emphasis shifted to engineering and operations research of advanced ship design concepts, automation, and maritime nuclear development studies.

6. *Administrative and warehouse expenses* required to carry out the program.

Since 1955, funds for new construction have been appropriated under Ship construction. In order to differentiate between current programs available for obligation and those for expenditure only, all programs prior to 1955 are reflected under Ship construction (liquidation of contract authorization).

The following table reflects the annual obligation requirements for the projects financed from current funds, together with those requested for 1961:

[In thousands]

A total of $512,433,950 was appropriated for this program, which covers all postwar construction activity up to 1955. During 1959, a total of $416,500 was transferred to other appropriations as authorized by the Second Supplemental Appropriation Act, 1959. As of June 30, 1959, the unexpended balance amounted to $6,945,690. Subsequent to that date, $6,361,541 has been returned to the Treasury in accordance with the Department of Commerce and Related Agencies Appropriation Act, 1960; final costs have been determined; and outstanding obligations completely liquidated by disbursement of $463,569. The remaining unobligated balance of $120,580 will be administratively rescinded and covered into the Treasury.

OPERATING-DIFFERENTIAL SUBSIDIES

For the payment of obligations incurred for operating-differential subsidies granted on or after January 1, 1947, as authorized by the Merchant Marine Act, 1936, as amended, and in appropriations heretofore made to the United States Maritime Commission, [$128,750,000] *$150,000,000,* to remain available until expended: *Provided,* That no contracts shall be executed during the current fiscal year by the Federal Maritime Board which will obligate the Government to pay operating-differential subsidy on more than two thousand [four] *one* hundred *and ninety* voyages in any one calendar year, including voyages covered by contracts in effect at the beginning of the current fiscal year, of which one hundred and fifty shall be for companies which have not held contracts prior to July 1, 1959, and seventy-five shall be for companies operating into or out of the Great Lakes. *(73 Stat. 203; Department of Commerce and Related Agencies Appropriation Act, 1960.)*

Appropriated 1960, **$128,750,000** Estimate 1961, **$150,000,000**

Program and Financing

	1959 actual	1960 estimate	1961 estimate
Program by activities:			
Payment of subsidies (object class 11)	$127,693,052	$128,917,835	$150,000,000
Financing:			
Unobligated balance brought forward	−360,887	−167,835	----------
Unobligated balance carried forward	167,835	----------	----------
Appropriation (new obligational authority)	127,500,000	128,750,000	150,000,000

At present 15 privately owned U.S. flag companies are under contract to operate 312 ships under subsidy agreements on 31 of the 36 designated essential foreign trade routes. The contracts provide for the payment of the differential between their operating costs and those of foreign competitors (subsidy accrual). The Government recaptures from the operator one-half of net profits in excess of 10% of capital necessarily employed up to the subsidy accrual. The subsidy recapture (amount withheld) is finally determined on a cumulative basis only at the end of a 10-year contract period. In estimating the subsidy payable, subsidy recapture is subtracted from subsidy accrual, but pending the close of the 10-year period the full amount of the accrual is a contingent liability of the United States.

SUMMARY OF PROGRAM JAN. 1, 1947, THROUGH JUNE 30, 1961

[Dollars in thousands]

	Maximum voyages under contract	*Voyages undertaken*	*Estimated subsidy accrual*
Calendar year:			
1947–56	(1)	12,843	$761,260
1957	1,855	1,736	145,399
1958	1,983	1,744	145,091
1959 estimated	2,015	1,750	145,591
1960 estimated	2,127	1,825	151,336
1961 (first 6 months) estimated	2,190	910	75,510

Federal Reserve Bank of St. Louis

SUMMARY OF PROGRAM JAN. 1, 1947, THROUGH JUNE 30, 1961—continued

[Dollars in thousands]

	Cumulative total
Subsidy accrual	$1,424,187
Subsidy recapture	194,472
Subsidy payable	1,229,715
Subsidy paid through June 30, 1959	815,868
Estimated subsidy payable	413,847
Subsidy to be paid in 1960 (includes proposed supplemental appropriation)	160,918
Subsidy to be paid in 1961	150,000
Subsidy to be paid in subsequent years	102,929

The computation and approval of final subsidy rates and the audit of annual accountings of the subsidized operators will make it possible to make payments of 100% of estimated subsidy payable due each operator through calendar year 1956 prior to June 30, 1961. The $102,928,991 estimated unpaid subsidy as of June 30, 1961, will approach a normal backlog, consisting largely of amounts withheld pending final rates and audit determinations for calendar years 1957–61 plus subsidy bills for operators in the last quarter of 1961 which would not be presented and paid until 1962. This estimated unpaid balance is, however, subject to adjustment for changes in the cumulative recapture position of each of the operators. This estimated balance reflects the effect of an anticipated 1960 supplemental appropriation which is shown under Proposed for later transmission.

Salaries and Expenses

For expenses necessary for carrying into effect the Merchant Marine Act, 1936, and other laws administered by the Federal Maritime Board and the Maritime Administration, [$14,014,400] *$14,925,000,* within limitations as follows:

Administrative expenses, including not to exceed $1,125 for entertainment of officials of other countries when specifically authorized by the Maritime Administrator, and not to exceed $1,250 for representation allowances, [$7,714,400] *$8,086,000;*

Maintenance of shipyard [and reserve training] facilities and operation of warehouses, [$1,400,000] *$1,325,000;*

Reserve fleet expenses, [$4,900,000] *$5,514,000. (73 Stat. 203; Department of Commerce and Related Agencies Appropriation Act, 1960.)*

Appropriated 1960, **$14,014,400** Estimate 1961, **$14,925,000**

Program and Financing

	1959 actual	1960 estimate	1961 estimate
Program by activities:			
1. Administrative expenses	$7,587,536	$7,714,400	$8,086,000
2. Maintenance of shipyard facilities	733,633	688,400	371,700
3. Operation of warehouses	706,365	711,600	953,300
4. Maintenance of reserve training station	35,654		
5. Reserve fleet expenses	6,161,117	4,900,000	5,514,000
6. 1959 program obligated in 1958	−218,282		
Total obligations	15,006,023	14,014,400	14,925,000
Financing:			
1959 appropriation available in 1958	218,282		
Unobligated balance transferred from "Ship construction (liquidation of contract authorization)" (73 Stat. 52)	−43,000		
Unobligated balance no longer available	67,145		
Appropriation (new obligational authority)	15,248,450	14,014,400	14,925,000

1. *Administrative expenses.*—Shown herein are the expenses of administering most of the functions of the Federal Maritime Board and Maritime Administration, including operating-differential subsidy contracts, continuing ship construction activities, ship operations, auditing, and property management. Administrative expenses in connection with maritime training, general agency ship operations, new ship construction, and chartering activities are provided in other funds.

2. *Maintenance of shipyard facilities.*—Two Government-owned reserve shipyards are maintained in a partial state of readiness for defense purposes. Two other shipyards formerly maintained have been declared surplus and are being disposed of during the current year.

3. *Operation of warehouses.*—Five warehouses store materials and equipment for vessel operations, repair and outfitting of reserve fleet ships, and reserve shipyards.

4. *Maintenance of reserve training station.*—One reserve training station previously maintained in a custodial status was declared surplus and transferred to the General Services Administration in 1959.

5. *Reserve fleet expenses.*—Provision is made for the preservation and security of merchant vessels maintained for national defense purposes. An accelerated scrapping program will be continued and preservation work, except for cathodic bottom preservation, has been discontinued on approximately 1,000 ships which are considered obsolete for mobilization purposes and are scheduled for scrapping.

MARITIME ACTIVITIES—Continued

Current authorizations—Continued

MARITIME TRAINING—Continued

This program provides for the training of officers for service in the maritime industry.

1. *Merchant marine cadet training.*—By enactment of Public Law 84–415, the Merchant Marine Academy at Kings Point, N.Y., was established as a permanent academy. A 4-year course of training is provided, including 1 year of sea duty, designed to qualify graduates for licenses as merchant marine officers. The Academy provides subsistence, quarters, tuition, uniform and textbook allowances, and medical care for cadets.

2. *Cadet training office.*—This office provides staff assistance to the Maritime Administrator on training matters, assists in the selection and appointment of cadets, and maintains liaison with State marine schools.

New obligational authority:			
Appropriation	$695,000	$150,000	$250,000
Contract authorization (new) (permanent) (72 Stat. 622)		2,865,600	1,230,000

Status of Unfunded Contract Authorization

	1959 actual	1960 estimate	1961 estimate
Unfunded balance at beginning of year			$1,905,600
Contract authorization (new) (permanent)		$2,865,600	1,230,000
Unfunded balance at end of year		−1,905,600	−2,115,600
Appropriation to liquidate contract authorization		960,000	1,020,000

The States of Maine, Massachusetts, New York, and California maintain schools for the training of merchant marine officers, with Federal assistance given in the form of (*a*) direct grants of $75,000, if matched by State appropriations and if out-of-State students are enrolled; (*b*) allowance to cadets for uniforms, textbooks, and subsistence; and (*c*) repairs to Federal training vessels loaned to the schools.

The Maritime Academy Act of 1958 (72 Stat. 622) provides contract authorization for the Secretary of Commerce to enter into agreements with States to provide these grants and allowances over a 4-year period without limit as to amount or year. This accounts for the large increase of new obligational authority in 1960, which will level off at approximately the 1961 rate in future years. Maintenance and repair of training vessels will continue to be accomplished through annual appropriations.

GENERAL PROVISIONS—MARITIME ACTIVITIES

No additional vessel shall be allocated under charter, nor shall any vessel be continued under charter by reason of any extension of chartering authority beyond June 30, 1949, unless the charterer shall agree that the Maritime Administration shall have no obligation upon redelivery to accept or pay for consumable stores, bunkers and slopchest items, except with respect to such minimum amounts of bunkers as the Maritime Administration considers advisable to be retained on the vessel and that prior to such redelivery all consumable stores, slopchest items, and bunkers over and above such minimums shall be removed from the vessel by the charterer at his own expense.

Notwithstanding any other provision of this Act, the Maritime Administration is authorized to furnish utilities and services and make necessary repairs in connection with any lease, contract, or occupancy involving Government property under control of the Maritime Administration, and payments received by the Maritime Administration for utilities, services, and repairs so furnished or made shall be credited to the appropriation charged with the cost thereof: *Provided,* That rental payments under any such lease, contract, or occupancy on account of items other than such utilities, services, or repairs shall be covered into the Treasury as miscellaneous receipts.

No obligations shall be incurred during the current fiscal year from the construction fund established by the Merchant Marine Act, 1936, or otherwise, in excess of the appropriations and limitations contained in this Act, or in any prior appropriation Act, and all receipts which otherwise would be deposited to the credit of said fund shall be covered into the Treasury as miscellaneous receipts. *(73 Stat. 204; Department of Commerce and Related Agencies Appropriation Act, 1960.)*

ALLOCATIONS RECEIVED FROM OTHER ACCOUNTS

NOTE.—Obligations incurred under allocations from other accounts are included in the schedule of the parent appropriations as follows:
"Commodity Credit Corporation fund," Department of Agriculture.
"Construction of surveying ships," Coast and Geodetic Survey.
"Plant acquisition and construction," Atomic Energy Commission.
"Mutual security," funds appropriated to the President.
"Salaries and expenses," Office of Civil and Defense Mobilization.

Financing applied to program	2,430,053	445,453	54,400

The Maritime Administration is authorized to insure construction loans and mortgages, with aggregate outstanding balances of up to $990 million, on certain types of cargo and passenger-carrying vessels and other watercraft (title XI, Merchant Marine Act, 1936, as amended). Pursuant to Public Law 84–1024 (70 Stat. 1119) authority to insure mortgages on fishing vessels has been transferred to the Department of the Interior.

Budget program.—In 1959, custody of the S.S. *Leilani* was taken pursuant to foreclosure proceedings and two defaulted mortgages with a combined balance of $5.1 million including accrued interest were assumed. A liability of $2.7 million to the general fund was established to reflect the amount still due the U.S. Government under the first mortgage, which was acquired by this fund upon default without cash outlay. A payment of $2.4 million was also made for acquisition of the second mortgage, guaranteed by the Maritime Administration. A loss of $0.7 million was incurred, representing the difference between mortgage acquisition costs and the $4.4 million book value of the vessel.

No new mortgage defaults are reflected in these estimates for 1960 and 1961. The 1960 estimate includes a payment of $65,135 advanced to a mortgagor with depleted working capital to meet a mortgage installment. This advance is secured by a second mortgage on the vessel.

Relation of costs to obligations.—The relationship is derived from year-end balances of selected resources in the following table:

	1958 actual	*1959 actual*	*1960 estimate*	*1961 estimate*
Selected resources at end of year:				
Materials and supplies	$24,804	$1,507	$1,507	$1,507
Unpaid undelivered goods		6,603		
Total selected resources	24,804	8,110	1,507	1,507
Selected resources at start of year		−24,804	−8,110	−1,507
Costs financed from obligations of other years, net (−)		−16,694	−6,603	

Financing.—The redemption of defaulted loans or mortgages is financed from insurance premiums and fees, together with such amounts as may be made available by borrowing from the Treasury Department, pursuant to Public Law 85–520 (72 Stat. 358). During 1959, by loan from the Treasury Department, $1.4 million was made available to the revolving fund to allow the purchase of the defaulted mortgage on the S.S. *Leilani*, which was guaranteed by the Maritime Administration.

Operating results and financial condition.—As of November 1959, outstanding balances for loans and mortgages plus commitments for additional guarantees totaled $370 million, and the balances outstanding at the end of 1960 should reach $503 million. Based on current trends, insured ship loans under this title will be $683 million by the end of 1961.

Cumulative losses on defaulted mortgages totaled $1,409,548 at June 30, 1959. Earnings, resulting from premium receipts, totaled $994,058 after allowance for losses and are retained to meet possible future requirements for new mortgage defaults or advances to mortgagors. To the extent the financial situation permits, the two loans outstanding and the liability to the U.S. Government may be repaid.

Financing applied to program	7,974,359	8,802,879	7,265,420

This fund, created in 1951, finances direct operation and charter of cargo vessels for transport of military and national interest cargo. It is also used for the operation of Government-owned experimental vessels (70 Stat. 531). The initial appropriation to the fund of $20 million has been repaid to the Treasury.

Budget program—1. *Vessel operation.*—Cargo vessels are operated by private operators acting as agents of the Maritime Administration to carry shipments for the Military Sea Transportation Service. Government ships operated under this arrangement have declined from a peak of 538 to 4 on June 30, 1959, and will further decrease to 3 during 1961.

2. *Charter operations.*—As of June 30, 1959, there were seven Government-owned vessels under charter to private operators. It is expected that two vessels will return from charter during 1960 and one during 1961. At the end of 1959, a total of 34 vessels were also on loan without reimbursement to other Government and public agencies. In addition, 26 vessels, acquired by the Government in connection with the ship replacement program, were operated by private companies under use agreements. Proceeds from the operation of these vessels are credited against the amount paid for their acquisition from the appropriation for Ship construction.

3. *Experimental ship operations.*—The world's first nuclear-powered cargo-passenger ship, the NS *Savannah*, will go into service in 1960 under general agency agreement. During an experimental period of approximately 2 years the vessel will carry no revenue-producing cargo. Nonoperating expense in 1960 includes $1.9 million for procurement of spares as well as the expense of training the ship's crew in nuclear operations. The estimate for operating expense includes the deck, engineers, and stewards departments, but does not include expense associated with operation of the ship's reactor which will be financed in 1961 directly from AEC appropriations.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

4. *Relation of costs to obligations.*—The relationship is derived from year-end balances and selected resources as reflected in the following table:

	1958 actual	*1959 actual*	*1960 estimate*	*1961 estimate*
Selected resources at end of year:				
Advances	$66,357	$25,730	$50,000	$50,000
Supplies	5,942,047	6,022,519	6,050,000	6,075,000
Prepaid insurance and other deferred charges	96,034	59,242	75,000	75,000
Unpaid undelivered orders	314,980	541,579	48,250	91,500
Total selected resources at end of year	6,419,418	6,649,070	6,223,250	6,291,500
Selected resources at start of year (−)		−6,419,418	−6,649,070	−6,223,250
Cost financed from obligations of other years, net (−)			−425,820	
Obligations incurred for costs of other years, net		229,652		68,250

Financing.—Operations are financed from revenue.

Operating results and financial condition—1. *Vessel operation.*—Rates charged the Military Sea Transportation Service cover full costs arising under general agency agreements for ship operations. Over the 3-year period the fund will be charged with a loss of $856,093 as a result of the need to maintain a nucleus administrative staff of trained employees to be immediately available in future emergencies. An additional loss of $661,864 over the period is also anticipated to result from payment of various claims, expense of maintaining inactive vessels, special mobilization training of merchant marine officers, and other activities.

2. *Charter operations.*—A net income of $672,644 was received from charter operations in 1959, and income of $15,770 is anticipated from this source in 1961 after meeting the administrative expenses directly associated with this program. The net loss of $175,588 estimated in 1960 will be occasioned by payments of $350,000 authorized by Public Law 85–721 (72 Stat. 710) to reimburse former charterers for certain break-out costs.

3. *Experimental ship operations.*—The full costs of the NS *Savannah* program charged to the fund are reflected as loss to the fund inasmuch as no revenue is anticipated during the first 2 years of the operation of this ship. The revenue of $1.9 million in 1960 will be received from AEC for procurement of spare components by the general agent.

Retained earnings.—Earnings are retained to provide (*a*) working capital for current ship operations and chartering, (*b*) rapid expansion of shipping services in the event of emergency, and (*c*) possible transfer of up to $10 million to the war risk insurance fund to meet claims against that fund (65 Stat. 747). The program contemplates eventual full recovery of the $3.5 million advanced to the Federal ship mortgage insurance fund in 1958.

This fund was established to provide war risk insurance in the event that commercial insurance is not available at reasonable terms and conditions during time of war (46 U.S.C. 1281, 1283). Commercial war risk insurance policies are at present subject to an automatic termination clause upon the outbreak of war, the inception of a hostile act, or occurrence which results in a state of war between any member of the North Atlantic Treaty Organization and any of the contracting parties to the Treaty of Friendship Cooperation and Mutual Assistance signed at Warsaw, May 14, 1955, or the Central People's Government of the People's Republic of China.

As of June 30, 1959, interim binders for war risk hull, protection, and indemnity, and second seamen's insurance, which become effective upon the outbreak of war, had been issued covering approximately $6 billion of insurance. War risk insurance was also in effect on 29 American vessels under construction in shipyards in the United States, covering the prelaunching period, totaling approximately $70 million of insurance.

Budget program.—At the request of the Secretary of the Navy, second seaman's war risk insurance is provided without premium, as authorized under sections 1205–6 of title XII of the Merchant Marine Act of 1936, on tankers operated for the account of the Military Sea Transportation Service. On June 30, 1959, a total of 27 tankers were covered under this program. All losses on such insurance, paid through this fund, are reimbursed to the fund by the Secretary of the Navy. Expense of the fund therefore consists only of fees paid to underwriting agents, travel expense for marine insurance experts, and for contract appraisal costs.

During the past year accidents were sustained by two Military Sea Transportation Service vessels, resulting in insurance claims against the fund. The estimate for 1960 provides for payment of the full amount of the remaining pending claims.

Relation of costs to obligations.—Year-end balance of unpaid undelivered orders for June 30, 1959, is $4,050.

Financing.—Transfer of $10 million is authorized from the Vessel operations revolving fund if necessary as an emergency measure (65 Stat. 747). To date no transfers have been made and none are anticipated in 1960 or 1961. In addition, revenue is provided by insurance premiums and fees paid for the issuance of interim binders and builder's risk insurance.

Operating results.—The Government's investment consists entirely of retained earnings totaling $1,062,531 on June 30, 1959. Retention of these earnings is necessary for this program to get underway immediately upon the outbreak of a national emergency.

The Maritime Administration will receive in 1961 reimbursements from the Department of Agriculture for storage of grain in reserve fleet vessels and for participation in the surplus dairy products program; Department of State for maintenance of a record of ship characteristics of vessels belonging to NATO nations; Department of Defense for preservation and maintenance in the reserve fleet of surplus merchant-type Navy vessels; and the Atomic Energy Commission for its share of the administrative cost of constructing the NS *Savannah*.

Within the agency, the appropriation Salaries and expenses will receive reimbursement for administrative and other expenses incurred as a result of activities financed from the Vessel operations revolving fund and the appropriation for Ship construction.

Reimbursements from non-Federal sources include payments for repairs, services, and utilities furnished lessees of maritime-controlled property (66 Stat. 393), donations to the Merchant Marine Academy at King's Point, N.Y. (50 U.S.C. 1154), proceeds from turn-in of small equipment (40 U.S.C. 481(c)), provision of statistical services (15 U.S.C. 189(a)), and refund of terminal leave payments (5 U.S.C. 2061).

The Inland Waterways Corporation, in liquidation, is engaged in the collection of debt and the policing of operations of the successor carrier, Federal Barge Lines, Inc.

Under the repayment schedule, the debt owed by the above carrier will be fully collected by June 30, 1969, and the United States is earning interest at the rate of 4% until June 30, 1964, with the remaining years at 5%.

Budget program.—Administrative costs cover policing and incidental expenses. Reserves are established at the estimated liability for suits against the Corporation.

Operating results.—Net income of $242,919 is expected in 1960, as the excess of interest over expenses.

Unobligated balance no longer available	2,114		
Appropriation (new obligational authority)	20,667,300	22,000,000	22,600,000

The Office administers laws governing the granting of patents for invention and the registration of trademarks.

The 1961 estimate provides for continuation of the effort to reduce the backlog of pending patent applications. It also provides for continuance of a program to modernize the patent classification system, and for research and development of electronic devices applicable to the patent search process.

Receipts from fees were $7,347,194 in 1959, and are estimated under existing legislation to be $7.6 million in 1960 and $7.8 million in 1961.

PATENT AND TRADEMARK ISSUANCES

	1958 actual	*1959 actual*	*1960 estimate*	*1961 estimate*
Patents granted (excluding designs)	43,676	52,482	54,000	57,000
Design patents granted	2,572	2,508	3,000	3,000
Trademarks registered	15,979	17,685	18,000	18,000

WORKLOAD SUMMARY

Patents (excluding designs):				
New applications received	76,956	78,363	79,000	80,000
Applications disposed of	85,457	86,436	88,000	92,000
Applications pending, end of year	207,166	198,248	189,000	177,000
Design patents:				
New applications received	4,838	4,994	5,000	5,000
Applications disposed of	4,767	4,849	6,000	6,000
Applications pending, end of year	6,832	7,004	6,000	5,000
Trademark registrations:

Applications disposed of	20,034	22,028	23,000	23,000
Applications pending, end of year	27,323	28,146	27,000	26,000

1. *Administration of patent and trademark system.*—Applications are examined to determine the patentability of claimed inventions and the registrability of trademarks; quasi-judicial functions are performed in appeal or interference proceedings within the Office; patents and trademarks are issued; copies of records are furnished; and other services relating to the prosecution of applications are provided.

2. *Printing and publication of patent and trademark material.*—This activity provides for printing of specifications and drawings of patents and trademark registrations; publication of their issuance and of official notices, rules of practice, and laws; and binding of patents, trademarks, and other reference material for official and public search. The need for funds is governed largely by the volume of issuances, and related public demand for printed copies.

4. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources and applicable adjustment as reflected in the following table:

	1958 actual	*1959 actual*	*1960 estimate*	*1961 estimate*
Selected resources at end of year: Unpaid undelivered orders (appropriation balances obligated for goods and services on order not yet received)	$511,336	$563,968	$563,968	$563,968
Selected resources at start of year (−)		−511,336	−563,968	−563,968
Adjustment of selected resources reported at start of year		24,744		
Obligations incurred for costs of other years, net		77,376

BUREAU OF PUBLIC ROADS

Current authorizations:

LIMITATION ON GENERAL ADMINISTRATIVE EXPENSES

Necessary expenses of administration and research (not to exceed [$29,500,000] *$29,900,000*), including purchase of thirty passenger motor vehicles for replacement only, shall be paid, in accordance with law, from appropriations made available by this Act to the Bureau of Public Roads and from advances and reimbursements received by the Bureau of Public Roads.

Of the total amount available from appropriations of the Bureau of Public Roads for general administrative and research expenses pursuant to the provisions of title 23, United States Code, section 104(a), $100,000 shall be available for carrying out the provisions of title 23, United States Code, section 309. (*23 U.S.C. 303, 307, 313; Department of Commerce and Related Agencies Appropriation Act, 1960.*)

Program and Financing

REPAYABLE ADVANCES TO THE HIGHWAY TRUST FUND

For repayable advances to the "Highway trust fund" during the current fiscal year, as authorized by section 209(d) of the Highway Revenue Act of 1956 (70 Stat. 399), [$359,000,000] *$200,000,000.* (*Mutual Security Appropriation Act, 1960.*)

This provision will allow temporary advances to the Highway trust fund during 1961. The rate of expenditures during the first half of the year exceeds revenue available in the Highway trust fund. At the start of the fiscal year funds will be insufficient to permit timely reimbursements to the States for expenses incurred under the Federal-aid highway program. The deficiency is expected to reach a maximum of $200 million by December 31, 1960, thereafter receipts will begin to exceed expenditures and will be adequate to repay the advances with interest prior to June 30, 1961, leaving a balance in the Highway trust fund of $105 million.

FEDERAL-AID HIGHWAYS (TRUST FUND)

For carrying out the provisions of title 23, United States Code, which are attributable to Federal-aid highways, to remain available until expended, [$2,840,000,000] *$2,689,000,000,* or so much thereof as may be available in and derived from the "Highway trust fund"; which sum is composed of [$535,500,000] *$1,099,308,235.53,* the balance of the amount authorized for the fiscal year [1958, and $2,295,500,000] *1959, and $1,579,691,764.47* (or so much thereof as may be available in and derived from the "Highway trust fund"), a part of the amount authorized to be appropriated for the fiscal year [1959] *1960,* and [$9,000,000] *$10,000,000* for reimbursement of the sums expended for the repair or reconstruction of highways and bridges which have been damaged or destroyed by floods, hurricanes, or landslides, as provided by title 23, United States Code, section 125. (*Department of Commerce and Related Agencies Appropriation Act, 1960.*)

NOTE.—In addition $188,000,000 provided in the Mutual Security Act of 1960.

Transfer from "Highway trust fund" to liquidate contract authorization	2,350,000,000	3,028,000,000	2,689,000,000

1. *Grants for construction.*—Grants are made to States for construction and improvement of Federal-aid highways. Authorizations are provided to cover 90 percent of the costs of completing the 41,000-mile National System of Interstate and Defense Highways, and to match State funds on a 50–50 basis for the primary, secondary and urban programs. Payments to the States are made out of transfers from the highway trust fund into which are deposited certain percentages of tax receipts on motor

fuel, tires and tubes, tread rubber, trucks, buses, trailers, and truck use.

This program was greatly expanded by the Federal-Aid Highway Act of 1956 and further extended with the passage of the Federal-Aid Highway Act of 1958. As a result of additional authorizations provided by the 1958 act and the suspension for 2 years of section 209(g) of the Highway Revenue Act of 1956, estimated revenue available to the Highway trust fund was inadequate to meet demands on the fund beginning in 1960.

The Federal-Aid Highway Act of 1959 partially remedied this imbalance in the Highway trust fund by the provision of additional revenue beginning in 1960 and the reduction of interstate authorizations for 1961 from $2.5 to $2 billion. The 1959 act increased the tax on motor fuel from 3 to 4 cents per gallon effective October 1, 1959, and continuing through June 30, 1961. In addition the act authorizes the diversion from the general fund to the Highway trust fund of one-half of the present excise tax on automobiles and five-eighths of the present tax on accessories and parts beginning July 1, 1961, and extending through June 30, 1964. This additional revenue, however, will not be sufficient to provide for a continuance of the program authorized for 1961 and 1962; therefore, the program is being estimated at a level which can be financed from available revenue.

As of November 30, 1959, approximately 7,500 miles on the 41,000-mile Interstate System were open to traffic. Of this total approximately 2,700 miles were completed to acceptable 1975 standards, approximately 2,600 miles were improved to standards adequate for present day traffic, and the balance represents toll road facilities included on the system. Actual and estimated progress of the Federal-aid highway programs are summarized in the following tables:

THE NATIONAL SYSTEM OF INTERSTATE AND DEFENSE HIGHWAYS—STATUS OF THE PROGRAM AS OF DEC. 1, 1959

[1] Mileage of designated Interstate System as of Oct. 31, 1959.

[2] Project miles may be defined to include projects for only part of the total improvement to the particular system mileage. In those instances in which separate projects for such items as grading, surfacing, or 2-lane construction of a 4-lane highway are under contract simultaneously on the same system mile, the total project miles reported will exceed the actual system mileage.

[3] Includes completed projects authorized prior to July 1, 1956.

FOREST HIGHWAYS (*TRUST FUND*) (LIQUIDATION OF CONTRACT AUTHORIZATION)

For payment of obligations incurred in carrying out the provisions of title 23, United States Code, section 204, pursuant to contract authorization granted by title 23, United States Code, section 203, to remain available until expended, [$30,000,000] *$36,000,000, to be derived from the "Highway trust fund"*, which sum is composed of [$26,250,000] *$2,250,000*, the remainder of the amount authorized to be appropriated for the fiscal year 1959, [and $3,750,000, a part of] *$33,000,000*, the amount authorized to be appropriated for the fiscal year 1960, *and $750,000, a part of the amount authorized to be appropriated for the fiscal year 1961: Provided, That the unexpended balance as of June 30, 1960, of appropriations heretofore granted under the head "Forest highways (liquidation of contract authorization)" is hereby rescinded: Provided further,* That this appropriation shall be available for the rental, purchase, construction, or alterations of buildings and sites necessary for the storage and repair of equipment and supplies used for road construction and maintenance but the total cost of any such item under this authorization shall not exceed $15,000. *(Department of Commerce and Related Agencies Appropriation Act, 1960.)*

NOTE.—This proposal is for activities previously carried under "Forest highways (liquidation of contract authorization)." The amounts obligated in 1959 and 1960 are shown in the schedule as comparative transfers.

Program and Financing

	1959 actual	1960 estimate	1961 estimate
Program by activities:			
Direct obligations:			
1. Construction	$32,249,524	$33,986,538	$34,000,000
2. Administration	794,032	992,000	1,311,000
3. Forest Service administration	98,750	100,000	100,000
Total direct obligations	33,142,306	35,078,538	35,411,000
Reimbursable obligations:			
1. Construction	1,080,662	1,600,000	1,600,000
Total obligations	34,222,968	36,678,538	37,011,000
Financing:			
Comparative transfers from (−) other accounts	−34,222,968	−36,678,538	
Unobligated balance of prior contract authorization transferred from "Forest highways (liquidation of contract authorization)"			−36,411,000
Advances and reimbursements from—			
Other accounts			−1,520,000
Non-Federal sources			−80,000
Unobligated balance carried forward (contract authorization)			34,000,000
Contract authorization (new) (proposed legislation)			33,000,000

Status of Unfunded Contract Authorization

Unfunded balance transferred from "Forest highways (liquidation of contract authorization)"			$68,250,000
Contract authorization (new) (proposed legislation)			33,000,000
Unfunded balance at end of year			−65,250,000
Transfer from "Highway trust fund" to liquidate contract authorization			36,000,000

1. *Construction.*—Main highways within or adjacent to the national forests are constructed and improved. Projects are jointly selected by the States, the Forest Service, and the Bureau of Public Roads on the basis of their contribution to meeting traffic and national defense requirements within the national forests. Authorizations are apportioned to States on the basis of a formula which uses as factors the national forest area and value in each State. Contract authorizations of $33 million are available for 1960 and 1961.

It is proposed that, beginning in 1961, the financing of this program be transferred to the highway trust fund. Since forest highways are similar in character and use to Federal-aid highways and in most cases are on the Federal-aid highway systems, they should logically be financed from the highway trust fund in the same manner as the regular Federal-aid programs.

Actual and estimated progress of the program are summarized in the following table:

Fiscal year	Annual authorization [1]	Miles completed	Unobligated balance, end of year	Obligations for projects	Expenditures
1955	$22,500,000	400	$20,139,465	$23,168,840	$21,367,836
1956	22,500,000	701	22,079,498	19,762,068	23,647,714
1957	30,000,000	497	27,996,634	23,424,112	21,502,050
1958	35,000,000	352	38,631,844	23,620,849	22,675,846
1959	33,000,000	429	38,489,538	32,249,524	27,798,205
1960	33,000,000	600	36,411,000	33,986,538	31,305,353
1961	----------	675	34,000,000	34,000,000	36,000,000

[1] Each fiscal year authorization becomes available for obligations not later than Jan. 1 in the preceding fiscal year.

Public Lands Highways (*Trust Fund*) (Liquidation of Contract Authorization)

For payment of obligations incurred in carrying out the provisions of title 23, United States Code, section 209, pursuant to the contract authorization granted by title 23, United States Code, section 203, to remain available until expended, [$4,000,000] *$3,000,000, to be derived from the "Highway trust fund"*, which sum is [composed of $1,000,000, the balance of the amount authorized to be appropriated for the fiscal year 1959, and $3,000,000,] the amount authorized for the fiscal year [1960] *1961: Provided, That the unexpended balance as of June 30, 1960, of appropriations heretofore granted under the head "Public lands highways (liquidation of contract authorization)" is hereby rescinded. (Department of Commerce and Related Agencies Appropriation Act, 1960.)*

Note.—This proposal is for activities previously carried under "Public lands highways (liquidation of contract authorization)." The amounts obligated in 1959 and 1960 are shown in the schedule as comparative transfers.

Program and Financing

	1959 actual	1960 estimate	1961 estimate
Program by activities:			
1. Construction	$2,127,447	$6,163,877	$2,957,000
2. Administration	37,329	58,000	43,000
Total obligations	2,164,776	6,221,877	3,000,000
Financing:			
Comparative transfers from (−) other accounts	−$2,164,776	−$6,221,877	
Unobligated balance of prior contract authorization transferred from "Public lands highways (liquidation of contract authorization)"			−$43,000
Unobligated balance carried forward (contract authorization)			43,000
Contract authorization (new) (proposed legislation)			3,000,000

Status of Unfunded Contract Authorization

Unfunded balance transferred from "Public lands highways (liquidation of contract authorization)"	$3,000,000
Contract authorization (new) (proposed legislation)	3,000,000
Unfunded balance at end of year	−3,000,000
Transfer from "Highway trust fund" to liquidate contract authorization	3,000,000

1. *Construction.*—Highways are constructed and improved through public lands in those States with large areas of such lands. The 1961 estimate finances the balance of existing authorizations which were provided by section 5 of the Federal-Aid Highway Act of 1958 (72 Stat. 93).

It is proposed that, beginning in 1961, the financing of this program be transferred to the Highway trust fund. These highways are similar in character and use to Federal-aid highways and are all on either the Federal-aid primary or secondary systems. Therefore, they should logically be financed from the trust fund in the same manner as the regular Federal-aid programs.

2. *Administration.*—This activity represents the estimated cost of administration and engineering supervision of the program.

Unobligated balance rescinded (73 Stat. 145)		364,391	
Appropriation (new obligational authority): "Inter-American Highway"	10,000,000		

1. *Access roads (act of Sept. 7, 1950).*—These funds are currently being utilized for the maintenance of the Pentagon network and Shirley Highway in Arlington County, Va.

2. *Construction, operation, and maintenance of roads, Alaska.*—Construction, operation, and maintenance of highways in Alaska are now financed from the trust fund Advances from Alaska, public roads.

3. *Inter-American Highway.*—The Central American section of the Inter-American Highway is being constructed in cooperation with the Republics of Guatemala, El Salvador, Honduras, Nicaragua, Costa Rica, and Panama. These republics pay one-third of the cost of the highway through their countries. The section will be approximately 1,547 miles of all-weather road and will connect with the completed Mexican section to permit uninterrupted motor travel from the United States to Panama. It is anticipated that by June 30, 1962, it will be possible to drive from the Mexican border to the Panama Canal, although some sections of the highway will only be all-weather surface roads.

"Federal-aid highways (trust fund)"	2,612,576,423	3,028,000,000	2,689,000,000
"Forest highways (trust fund)"			36,000,000
"Public lands highways (trust fund)"			3,000,000
Balance carried forward:			
Cash	94,443,274	8,657,274	104,657,274
U.S. securities (par)	429,214,000		
Total transfers and balances	3,233,133,440	3,151,657,274	2,958,657,274

The Highway Revenue Act of 1956 (70 Stat. 374) provides for the transfer from the general fund of sums equal to certain percentages of taxes received on gasoline, diesel fuel, trucks, buses, tires, etc. The Secretary of the Treasury estimates the amounts to be so transferred.

In turn, annual appropriations are authorized from this trust fund to Federal-aid highways (trust fund). Amounts in the fund not currently required are invested in U.S. securities, and interest thereon is added to the fund.

The Highway Act of 1959 increased motor fuel taxes by 1 cent per gallon beginning on October 1, 1959, and extending through 1961. Effective July 1, 1961, and extending through June 30, 1964, half of the present excise tax on automobiles and five-eighths of the present excise tax on parts and accessories will be deposited in the Highway trust fund.

These increased taxes will provide an estimated additional $910 million in the trust fund during 1960 and 1961 and will provide for continuation of the interstate program although at a reduced level.

The budget again proposes to transfer the financing of the Department of Commerce forest and public lands highways programs from the general fund to the Highway trust fund and, accordingly, the above schedules in 1961 have been adjusted to reflect this proposal.

It is proposed also that the revenues from aviation gasoline tax that presently go into the Highway trust fund be retained in the general fund as part of the user charge program for aviation.

The status of the fund is as follows:

	1959 actual	*1960 estimate*	*1961 estimate*
Investment in U.S. securities at beginning of year (par)	$822,226,000	$429,214,000	
Cash:			
Highway trust fund	[1] —36,790,690	93,921,082	$8,135,082

NATIONAL BUREAU OF STANDARDS

The National Bureau of Standards is the agency of the Federal Government responsible for the national standards of physical measurement. Against these standards, all the working standards of the Nation—those used by scientists and engineers in research and development, those used by industry in the measurement and production of interchangeable parts, and those used by other Government and State agencies to ascertain conformity—are calibrated. Closely associated with the standards activity, the Bureau serves science, industry, and Government as a national laboratory conducting research and development on methods of measurement and instrumentation; determining fundamental physical constants and basic properties of materials; developing improved methods for testing materials and equipment; developing codes and specifications; and assisting other Government agencies through advisory services on technical problems and by invention and development of devices to meet special needs.

Current authorizations:

RESEARCH AND TECHNICAL SERVICES

For expenses necessary in performing the functions authorized by the Act of March 3, 1901, as amended (15 U.S.C. 271–278[b]*e*), including general administration; operation, maintenance, alteration, and protection of grounds and facilities; and improvement and construction of facilities as authorized by the Act of September 2, 1958 [(72 Stat. 1711); $17,250,000] (*15 U.S.C. 278d*); *$19,600,000*, of which not to exceed $1,275,000 shall be available for payments to the "Working capital fund", National Bureau of Standards, for additional capital: *Provided*, That during the current fiscal year the maximum base rate of compensation for employees appointed pursuant to the Act of September 2, 1958 [(72 Stat. 1711)], (*15 U.S.C. 278e*), shall be equivalent to the entrance rate of GS–12. Appropriation (new obligational authority)	12,454,900	17,250,000	19,600,000

The proposed increase of $2,350,000 for the research programs of the Bureau will provide for continuation of the expanded programs authorized for 1960. The Bureau's programs of basic and applied research, development of instruments and methods of measurement, and general technical services are classified under six major activities:

1. *Physics and electronics.*—This activity includes the work of the optics and metrology, heat, atomic and radiation physics, electricity and electronics, radio standards, and data processing systems divisions. These divisions are primarily responsible for the Bureau's research underlying the national standards of physical measurement needed for our advancing technology and broadening range of scientific exploration. Particular emphasis will be given to measurement and problems in plasma physics and astrophysics and to high-temperature standards and measurement methods.

2. *Chemistry and metallurgy.*—This activity includes the work of the chemistry, organic and fibrous materials, metallurgy, and mineral products divisions. These divisions will continue their emphasis on research on the fundamental properties of materials under varying environmental conditions and on the preparation and analysis of high-purity substances.

3. *Mechanics and engineering.*—This activity includes the work of the mechanics, building technology, and cryogenics engineering divisions. These divisions will contribute to the Bureau's high-temperature and high-pressure programs and will conduct studies of the engineering properties of materials at extremely high and low temperatures. A comprehensive program of basic and applied research on flames and fires will be funded under this activity in 1961.

4. *Radio propagation.*—This activity includes the work conducted by the divisions comprising the Central Radio Propagation Laboratory at Boulder, Colo., and supplementary field stations. The program planned for 1961 includes basic research on upper atmosphere physics and theoretical and experimental research in plasma physics and astrophysics.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

5. *General services.*—This activity includes those technical programs of the Bureau that are primarily directed toward supporting other activities of the Bureau as well as the calibration and standard samples services provided to the States. Included are the applied mathematics division, the office of weights and measures, the office of basic instrumentation, and the reactor design group.

6. *Payment to working capital fund.*—Additional equipment required in support of the research programs will be procured by the Bureau's Working capital fund and added to the depreciable equipment inventory of that fund. Payments from the Research and technical services appropriation in amounts not to exceed $1,275,000 will be made to the Working capital fund to finance these capital outlays.

7. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources and applicable adjustment as reflected in the following table:

	1958 actual	*1959 actual*	*1960 estimate*	*1961 estimate*
Selected resources at end of year: Unpaid undelivered orders (appropriation balances obligated for goods and services on order not yet received)	$148,318	$402,498	$483,498	$533,498
Selected resources at start of year (−)		−148,318	−402,498	−483,498

Total obligations	12,378,908	17,250,000	19,600,000

Research and Technical Services (Special Foreign Currency Program)

For purchase of foreign currencies which accrue under title I of the Agricultural Trade Development and Assistance Act of 1954, as amended (7 U.S.C. 1704), for the purposes authorized by section 104(k) of that Act, to remain available until expended, $5,000,000, of which not less than $4,517,000 shall be available to purchase currencies which the Treasury Department shall determine to be excess to normal requirements of the United States: Provided, That this appropriation shall not be used for the purchase of currencies available in the Treasury for the purposes of section 104(f) of that Act, unless such currencies are excess to the normal requirements of the United States. (7 U.S.C. 1704; 15 U.S.C. 271–278d; 40 U.S.C. 14a; 5 U.S.C. 596a.)

Estimate 1961, **$5,000,000**

Program and Financing

	1959 actual	1960 estimate	1961 estimate
Program by activities:			
1. Physics and electronics			$584,000
2. Chemistry and metallurgy			167,000
3. Mechanics and engineering			77,000
4. Radio propagation			243,000
5. General services			106,000
Total program costs			1,177,000
6. Relation of costs to obligations: Obligations incurred for costs of other years, net			3,765,000
Total program (obligations)			4,942,000
Financing:			
Unobligated balance carried forward			$58,000
Appropriation (new obligational authority)			5,000,000

National Bureau of Standards responsibilities for basic and applied research, improvement of standards, and dissemination of information on properties of materials, measurement techniques, and radio propagation are of sufficient breadth to permit ready utilization of research capabilities in other countries. The proposed foreign currency program will supplement the Bureau's existing program, allow an acceleration of research effort in selected areas, and permit economies to the Bureau's regular appropriations over the long term.

The 1961 program, authorized by section 104(k) of the Agricultural Trade Development and Assistance Act of 1954, is made up of almost 100 separate projects to be conducted over a 3-year period in 10 countries. A cost of $16,000 in U.S. dollars, charged to the appropriation for Research and technical services, will be required for the initiation and supervision of the program.

6. *Relation of costs to obligations.*—Year-end balance of unpaid undelivered orders for 1961 is $3,765,000.

Financing:						
Unobligated balance brought forward	−255,156	−507,219	−126,500			
Unobligated balance transferred from "Ship construction (liquidation of contract authorization)," maritime activities (73 Stat. 52)	−3,550					
Unobligated balance carried forward	507,219	126,500	17,000			
Appropriation (new obligational authority)	817,950	2,140,000	2,000,000			

This appropriation provides for construction and improvements to the plant facilities of the National Bureau of Standards and procurement of major special facilities. The Bureau's laboratories and administrative offices occupy 86 buildings on a 68-acre tract in Washington, D.C. The Bureau also has a large laboratory on a 217-acre site at Boulder, Colo., and several small radio field stations, some of which are outside the continental limits.

Operating costs.—Noncapitalized maintenance and repair projects are charged to operating costs. The budget includes $170,000 for emergency repairs to the heating plant at the Washington site and $50,000 for miscellaneous modifications to existing facilities.

Capital outlay—1. *Facilities.*—This activity includes funds for minor capital improvements of a general nature required for the Bureau's plant facilities. Other minor improvements, when of a special, project-related character, are charged to the appropriation for Research and technical services. Noncapital alterations are charged to the operating costs of this appropriation.

2. *Construction.*—Costs of $1.3 million for construction of an addition to the Boulder laboratories and relocation of the Sterling, Va., radio field site, financed in prior years, will be incurred in 1961. A new appropriation requirement of $700,000 for design and engineering of a nuclear research reactor and associated laboratories is included in this budget.

3. *Special equipment.*—This activity includes the procurement of large and unusual items of equipment for which the investment of working capital is not appropriate. Budgeted costs in 1961 include $30,000 for an atomic frequency standard and $370,000 for a scatter radar transmitter and antenna designed to measure ionic constituents of the upper atmosphere. Total appropriation requirements for these equipments are $380,000 and $550,000, respectively.

4. *Acquisition of field sites.*—Land for five field stations used in radio propagation activities is being acquired in the current year.

5. *Relation of cost to obligations.*—Year-end balances of unpaid undelivered orders are as follows: 1958, $174,155; 1959, $133,003; 1960, $1,046,203; 1961, $758,003.

Appropriation (new obligational authority)			3,000,000		23,500,000				

This appropriation finances the construction, equipping, and occupancy of new laboratory, administrative, and service buildings to be constructed on a site near Gaithersburg, Md., to house the activities of the National Bureau of Standards now conducted in Washington, D.C. The new facilities are being designed to accommodate about a 20% increase in the Bureau's staff and will include equipment for radiation and large force measurements not heretofore available.

The first increment of the construction program, to include the erection and equipping of the radiation physics and engineering mechanics laboratories, is provided in this budget. In addition, construction of the boiler plant and a substantial portion of the utilities and site development costs are included in the 1961 appropriation.

1. *Design and engineering.*—Detailed planning and preparation of architectural designs and engineering drawings are now underway and will be completed during 1961. An appropriation is required in 1961 for obligation of that portion of the architect's contract relating to design of mechanical equipment and fallout shelter and for supervision of the first construction increment by the Public Buildings Service. Additional appropriations under this activity in subsequent years will be required for supervision of the later construction stages.

2. *Site acquisition.*—It is anticipated that condemnation proceedings for the Gaithersburg site will be completed during the current year. No further costs are estimated under this activity.

3. *Construction.*—This activity includes the construction of laboratories and other buildings, installation of mechanical and electrical equipment, site development, and utilities. The budget includes provision for fallout shelter in the radiation physics laboratory.

4. *Equipment.*—The major scientific facilities to be financed through the 1961 appropriation are a linear electron accelerator, a 10-million pound universal test machine, and two large force measurement equipments. These facilities will be donated to the Bureau's Working capital fund and no depreciation charged against their use. Other equipment, the replacement or acquisition of which is necessitated by the relocation program, will be purchased through investment of working capital and will be depreciated in subsequent years. The budget provides for a payment of not exceeding $2.5 million from the Construction of facilities appropriation to the fund to provide the necessary capital.

5. *Moving and occupancy.*—This activity includes the costs of moving and installing scientific apparatus as well as certain semifixed furnishings for laboratory, library, cafeteria, and other areas. The appropriation estimate for 1961 provides for future costs to this activity arising under the current construction program.

6. *Relation of costs to obligations.*—The year-end balances of unpaid undelivered orders are as follows: 1959, $2,048,847; 1960, $1,318,672; 1961, $15,216,891.

Capital transfer (payment of earnings to Treasury) (−)	−19,792	−247,908	−35,000
Unobligated balance carried forward	−8,237,301	−6,266,000	−6,316,000
Financing applied to program	33,599,807	38,476,705	46,865,500

[1] Excludes net assets donated to Working capital fund as follows: June 30, 1959, $466,389; 1960, $4,107,779; 1961, $9,297,194.

This fund finances from advances and reimbursements all operations of the National Bureau of Standards except major construction projects accomplished under allocations to other agencies. The principal of the fund, as of June 30, 1959, consisted of $5 million in appropriations and $37 million in net donated assets. The Government investment is estimated to grow through donation of cash and other assets financed by National Bureau of Standards appropriations to $59 million by June 30, 1961.

Operating costs—1. *Technical program.*—Research and technical services are conducted by the National Bureau of Standards on the request of other Government agencies and the public, as well as in support of the Bureau's own research program.

The percentage of the Bureau's research and development program financed by other agencies is expected to decline from 58% in 1959 to 48% in 1961. Although in certain of the Bureau's divisions the demands of the missile and space programs are expected to result in increases in other agency programs, the total amount of support received from other agencies will also decline.

2. *Plant improvement and special equipment.*—This activity includes the cost to the Working capital fund which is reimbursed from the Bureau's capital outlay appropriations. The plant improvements and special equipment procured are donated to the fund upon completion and carried as assets of the fund at cost and no depreciation will be charged on their subsequent use.

3. *Other operating costs.*—The donation or sale of excess material and the donation of excess equipment to other agencies are recorded as operating costs of the fund.

Capital outlay.—Working capital of the fund is invested in facilities and equipment which are subject to depreciation charges. In 1961 the equipment requirements of the expanded Bureau research program will require an augmentation of working capital, which will be accomplished through payments to the fund for additional capital from the appropriation for Research and technical services. The cost of upgrading equipment, which may be required in relocation to the new laboratories, will also be treated as investments of the fund, the additional capital being provided by payments from the appropriation for Construction of facilities.

9. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources as reflected in the following table:

	1958 actual	*1959 actual*	*1960 estimate*	*1961 estimate*
Selected resources at end of year:				
Inventories	$2,101,960	$2,806,513	$3,241,513	$3,481,513
Advances	58,701	59,127	60,000	60,000
Unpaid undelivered orders	2,717,958	2,981,892	3,304,701	9,819,501
Total selected resources at end of year	4,878,619	5,847,532	6,606,214	13,361,014
Selected resources at start of year (−)		−4,878,619	−5,847,532	−6,606,214
Obligations incurred for costs of other years, net	968,913	758,682	6,754,800	

An increase in unpaid undelivered orders is anticipated during 1961 because orders will be placed through the fund for capital equipment, including several major items, to be installed in the Bureau's new facilities.

Operating results.—Retained earnings for 1958, totaling $19,792, were transferred to the Treasury. Retained earnings for 1959, totaling $247,908, will be transferred to the Treasury in 1960.

WEATHER BUREAU

Current authorizations:

SALARIES AND EXPENSES

For expenses, *not otherwise provided for*, necessary for the Weather Bureau, including maintenance and operation of aircraft; not to exceed $25,000 for services as authorized by section 15 of the Act of August 2, 1946 (5 U.S.C. 55a); and not to exceed $10,000 for maintenance of a printing office in the city of Washington, as authorized by law; [$48,855,000, of which $2,476,000 shall be available only for hurricane research costs] *$48,100,000: Provided*, That during the current fiscal year, the maximum amount authorized under section 3(a) of the Act of June 2, 1948 (15 U.S.C. 327), for extra compensation to employees of other Government agencies for taking and transmitting meteorological observations, shall be $5 per day; and the maximum base rate of pay authorized under section 3(b) of said Act, for employees conducting meteorological investigations in the Arctic region, shall be $6,500 per annum, except that not more than five of such employees at any one time may receive a base rate of $9,000 per annum, [and such employees may be appointed] without regard to the Classification Act of 1949, as amended. *(15 U.S.C. 311–313, 325–328; 72 Stat. 783; Department of Commerce and Related Agencies Appropriation Act, 1960.)*

Appropriated 1960, **$48,855,000** Estimate 1961, [a] **$48,100,000**

[a] Excludes $7,520,000 for activities transferred in the estimates to "Research and development." The amounts obligated in 1959 and 1960 are shown in the schedule as comparative transfers.

Appropriation (new obligational authority)	43,672,600	48,855,000	48,100,000

The Weather Bureau measures, records, reports, forecasts, and distributes information on weather conditions and river stages for the benefit of U.S. commerce, industry, agriculture, and the general public.

1. *Weather measurements and forecasts.*—Regularly scheduled forecasts are issued for U.S. territory and waters with special emphasis on severe storms. Special forecast and advisory services are provided for international and domestic aviation; fire-weather forecasts are furnished to assist in conservation of timber resources; and fruit-frost forecasts and warnings are prepared for areas where such crops form a major economic interest. Surface and upper-air weather measurements are taken at several hundred locations to serve forecasting requirements. Current weather information is disseminated widely for the benefit of aviation and other interests.

Expansion of the Bureau's observation and service facilities is designed to keep pace with more exacting air-traffic control requirements as well as to advance general weather services. The increase for 1961 provides for (*a*) expansion of the upper-air observing program, (*b*) inauguration of a cooperative Weather Bureau-Air Defense Command radar weather warning network, and (*c*) augmentation of briefing staffs.

2. *River and flood forecasts and warnings.*—The hydrologic service furnishes flood warnings and public forecasts of river height and flow on the country's principal rivers and their tributaries. The estimate provides for a modernized river forecast center for the west gulf and Rio Grande River basins.

3. *Climatology.*—The climatological service seeks to determine and record the various types of climate to explain the causes of these climates, their variation, trends, geographical locations, and the effect climate has on the economy of the Nation, and to communicate this intelligence in such a manner as to insure the fullest realization of its potential benefits. The increase for 1961 provides for the decennial climatological census.

4. *Administration.*—This activity provides executive direction and administrative support to the three appropriations: Salaries and expenses, Research and development, and Establishment of meteorological facilities.

RESEARCH AND DEVELOPMENT

For expenses necessary for the conduct of research by the Weather Bureau, including development and service testing of equipment; operation and maintenance of aircraft; not to exceed $25,000 for services as authorized by section 15 of the Act of August 2, 1946 (5 U.S.C. 55a); and for acquisition, establishment, and relocation of research facilities and related equipment; $8,000,000, to remain available until expended. (15 U.S.C. 313a; 72 Stat. 783.)

Estimate 1961, [a] **$8,000,000**

[a] Estimate is for activities previously carried under appropriations as follows:
"Salaries and expenses" $7,520,000
"Establishment of meteorological facilities" 480,000
The amounts obligated in 1959 and 1960 are shown in the schedule as comparative transfers.

Federal Reserve Bank of St. Louis

Research is conducted to increase fundamental knowledge of the science of meteorology and in order to improve the accuracy and timeliness of weather forecasts; the development program is concerned with new instrumentation and procedures, including related activities of test and evaluation.

1. *Meteorological*—Covers: (*a*) *Hurricane and severe storm.*—To discover why and where these storms form, when they will intensify, and how they will move so as to provide improved warnings to the public. (*b*) *Fundamental.*—Research studies of basic meteorology, worldwide weather circulations, long-range forecasting, and cloud physics. (*c*) *Instrumental.*—The development and testing of improved instrumentation and automation methods. (*d*) *Aviation weather systems development.*—A cooperative program to develop an aviation weather system better equipped to serve military and civil requirements.

The increase in 1961 provides for operation of hurricane research aircraft and inauguration of an intensive investigation of severe local storms; new atmospheric and oceanographic studies; and participation in the cooperative program to improve the aviation weather services.

2. *Hydrologic.*—Efforts are concerned with improving techniques for forecasting river heights and with the utilization of weather radar to permit issuance of flash flood warnings.

3. *Climatic.*—Methods of analysis and presentation of climatic information are developed for application to operational and planning aspects of business, industry, commerce, and agriculture.

The accuracy of weather measurements and forecasts is being improved by the procurement and modernization of the following types of instrumental equipment and facilities:

1. *Upper air observational facilities.*—Electronic equipment, including protective shelters, to measure meteorological conditions aloft over land and ocean areas.

2. *Weather surveillance radar.*—To provide a continuous picture of changing weather conditions facilitating the preparation of forecasts and increasing advance warning time.

3. *Surface observational facilities.*—Electronic instruments to provide continuous, automatic measurements of cloud height, visibility, temperature, humidity, and winds, including computers to convert these data for use in controlling air traffic.

4. *Construction, remote localities.*—Construction of office and housing units in Alaska.

5. *Engineering and technical support.*—Staff for planning, site surveys, installation, and initial calibration of equipment.

The following table lists the major facilities already funded and those budgeted in 1961:

	Funded through 1960	*Proposed 1961*
1. Upper-air equipment:		
(*a*) Land stations	74	---
(*b*) Ocean stations	--	16
2. Radar equipment:		
(*a*) Radars	31	---
(*b*) Repeater scopes for Air Defense Command sites	--	17
3. Surface equipment:

Other agencies	161,252	88,924	90,000
Total miscellaneous services	273,728	695,725	700,000
Total obligations	7,081,896	9,052,000	9,103,000
Financing:			
Unobligated balance brought forward	16,575	33,455	
Advances and reimbursements from—			
Other accounts	7,069,341	8,952,945	9,037,000
Non-Federal sources	29,435	65,600	66,000
Unobligated balance carried forward	−33,455		
Total financing	7,081,896	9,052,000	9,103,000

NOTE.—Reimbursements from non-Federal sources are derived from the following: proceeds from the sale of commissary supplies (5 U.S.C. 596(a)) and from the Governments of Cuba and New Zealand, and the International Civil Aviation Organization (49 U.S.C. 1154).

The Weather Bureau gathers river and rainfall observations, conducts climatological studies and studies of atmospheric pollution, and procures technical equipment for other agencies. Contributions are also made by the military services toward the cost of the joint numerical weather prediction program and for other computer services.

Program by activities:			
Area assistance (total obligations)			$18,000,000
Financing:			
Unobligated balance carried forward			39,000,000
Proposed supplemental appropriation			57,000,000

Under proposed legislation, 1961.—Legislation will be proposed to authorize broader assistance to areas of substantial and persistent unemployment, including loans and grants for the purpose of promoting economic redevelopment in such areas. An appropriation of $57 million is anticipated for the program of which $50 million is to provide capital for a revolving fund.

GENERAL PROVISIONS—DEPARTMENT OF COMMERCE

SEC. 102. During the current fiscal year applicable appropriations and funds available to the Department of Commerce shall be available for the activities specified in the Act of October 26, 1949 (5 U.S.C. 596a), to the extent and in the manner prescribed by said Act.

SEC. 103. Appropriations in this title available for salaries and expenses shall be available for hire of passenger motor vehicles; services as authorized by section 15 of the Act of August 2, 1946 (5 U.S.C. 55a), but, unless otherwise specified, at rates for individuals not to exceed $50 per diem; and uniforms, or allowances therefor, as authorized by the Act of September 1, 1954, as amended (5 U.S.C. 2131). (*Department of Commerce and Related Agencies Appropriation Act, 1960.*)

GENERAL PROVISIONS

SEC. 401. No part of any appropriation contained in this Act, or of the funds available for expenditure by any individual, corporation, or agency included in this Act, shall be used for publicity or propaganda purposes designed to support or defeat legislation proposed or pending before Congress.

SEC. 402. No part of any appropriation contained in this Act shall be used to pay any expenses incident to or in connection with participation in the International Materials Conference. (*Department of Commerce and Related Agencies Appropriation Act, 1960.*)

Statement of proposed obligations for purchase and hire of passenger motor vehicles for the fiscal year 1961

Appropriation	Motor vehicles to be purchased		Old vehicles to be exchanged		Net cost of vehicles to be purchased	Old vehicles still to be used	Cost of hire of motor vehicles	Users and public purpose
	Number	Gross cost	Number	Allowance (estimate)				
GENERAL ADMINISTRATION								
Salaries and expenses							[1] $5,000	Departmental officials and their staff members for transportation to official meetings.
Participation in Century 21 Exposition.							840	Commissioner and staff members for transportation to official meetings in Washington, D.C., with U.S. Government officials and private groups.
Total, general administration							5,840	
BUREAU OF THE CENSUS								
Salaries and expenses							900	Vehicles used by the Director and staff for official transportation in the Washington area. Automobiles at the census operation field offices are for official purposes in connection with the decennial census. Buses are operated on scheduled service between the central office in Suitland and other agencies in the District of Columbia.
Station wagon							1,750	
Bus							2,950	
Eighteenth Decennial Census							2,400	
Total, Bureau of the Census							8,000	
COAST AND GEODETIC SURVEY								
Salaries and expenses							6,000	For use of district offices in inspecting field facilities and chart distributors, etc.
MARITIME ACTIVITIES								
Salaries and expenses						5	12,500	Field personnel working at ship piers in coastal areas at national defense reserve fleet sites and at reserve shipyards and warehouses; for transportation to official meetings, inspections, and surveys.
Station wagon						3	1,000	Field personnel at 2 warehouses and 1 reserve shipyard; for transportation to inspections and surveys.
Maritime training	1	$1,500	[2]		$1,500			Superintendent and other maritime personnel at the Merchant Marine Academy, Kings Point, N.Y., for transportation to port areas in connection with cadet training program.
Ambulance						1		For emergency transportation of cadets and staff personnel in case of accident or sickness.
Station wagon	3	5,850	[2]		5,850		500	For transportation of cadets and staff personnel.
Bus						2		Do.
Total, maritime activities	4	7,350			7,350	11	14,000	
BUREAU OF PUBLIC ROADS								
Highway programs	30	45,000	30	$7,200	37,800	139	[3] 174,800	Field engineers for transportation to inspect Federal-aid and other highway projects. An automobile is used for official business in the Washington area.
Station wagon							21,000	
Total, Bureau of Public Roads	30	45,000	30	7,200	37,800	139	195,800	
NATIONAL BUREAU OF STANDARDS								
Working capital fund							200	Station wagons are used at Boulder, Colo., to carry out the technical program and to conduct experiments at field sites. These vehicles are used for transportation of personnel, mail, and material to the field sites, and in conducting experiments with mobile units. The station wagon assigned to Long Branch, Ill., is used to carry out the radio propagation programs.
Station wagon						7	3,000	
Total, National Bureau of Standards						7	3,200	
WEATHER BUREAU								
Salaries and expenses							11,700	Chief and staff members for transportation to official meetings in Washington with members of other Federal agencies. Regional administrative officers and field aides for transportation to field stations for inspections and surveys.
Station wagon						2	7,000	Regional administrative officer and staff for transportation to field stations for inspections and surveys. Bureau staff for transportation to official meetings in Washington, D.C., with members of other Federal agencies. Director and staff of hurricane research project, Miami, Fla., for transportation between office, airport, and military bases.
Total, Weather Bureau						2	18,700	
Total, Department of Commerce	34	52,350	30	7,200	45,150	159	251,540	

[1] Includes $1,000 for payments other than to motor pools.
[2] 1 sedan and 3 station wagons to be replaced will be declared surplus to General Services Administration.
[3] Includes $500 for payments other than to motor pools.

The 1961 budget for this chapter includes funds both for the military functions of the Department of Defense, as heretofore, and for the military assistance program, formerly carried under the Funds Appropriated to the President chapter. Although the appropriation for military assistance will continue to be made to the President, it is now shown with the appropriations for the military functions of the Department of Defense.

SUMMARY OF BUDGET AUTHORIZATIONS AND EXPENDITURES

[In millions]

Title of appropriation groups	New obligational authority			Expenditures		
	1959 enacted	1960 estimate	1961 estimate	1959 actual	1960 estimate	1961 estimate

Grand total, Department of Defense—Military	42,683	41,947	42,577	43,573	42,745	42,745

[1] Additional obligational authority available by transfer: $535 million in 1959; $430 million in 1960; $350 million in 1961.

Military personnel.—Total military personnel expenditures (for Active and Reserve Forces and for retired pay) in 1961 are estimated at $12,146 million, $187 million higher than 1960 and $345 million higher than 1959.

Active Forces personnel.—Expenditures for Active Forces military personnel in 1961 are estimated at $10,741 million, $149 million more than 1960 and $197 million more than 1959. The 1961 program provides for a total strength of 2,489,000 on June 30, 1961, the same as on June 30, 1960, but 14,000 below the June 30, 1959, actual strength.

ACTIVE FORCES MILITARY PERSONNEL

[In thousands]

	June 30, 1959	*June 30, 1960*	*June 30, 1961*
Total, Department of Defense	2,503	2,489	2,489
Army	861	870	870
Navy	626	619	619
Marine Corps	176	175	175
Air Force	840	825	825

Average man-years in 1961 are estimated at 2,488,000, compared with an average of 2,495,000 in 1960 and 2,564,000 in 1959. Despite the decline in man-years over the period, expenditures rise as the estimated average cost per military man increases from $4,160 in 1959 to $4,255 in 1960 and $4,330 in 1961. The increase of $170 per man over the period is caused chiefly by (1) required increases in the Government's social security contributions as an employer; (2) the phased increase in the numbers of enlisted men receiving proficiency pay; (3) increased numbers of men in enlisted pay grades E–8 and E–9; (4) a further rise in the number of dependents; and (5) additional longevity pay reflecting the rising experience level of the forces.

Most of these factors of increasing cost per man are associated with the Defense Department's efforts to develop a truly career force. These efforts have been successful: recruitment and reenlistment rates have improved; the experience level of the forces has increased; the average intelligence level of enlisted personnel has risen; and the rate of disciplinary cases has been sharply reduced. However, the very success of this program has produced some increases in personnel costs, which are compensated for by increased overall effectiveness.

Reserve Forces.—Reserve personnel expenditures in 1961 are estimated at $611 million, which is $56 million less than 1960 and $5 million less than 1959. The 1961 budget will provide for about 1,002,000 reservists on paid status at year end compared with 1,083,000 at the end of 1960 and 1,062,000 at the end of 1959. The adjusted reserve strengths, as shown in the accompanying table, will continue to provide an effectively trained military reserve adequate to meet the requirements of the Armed Forces.

RESERVE FORCES MILITARY PERSONNEL IN PAID STATUS

[In thousands]

	June 30, 1959	*June 30, 1960*	*June 30, 1961*
Army Reserve	350	358	321
Drill pay status [1]	314	300	270
Other paid status	36	58	51
Army National Guard	399	400	360
Navy Reserve	130	137	130
Drill pay status [1]	120	129	129
Other paid status	10	8	1
Marine Corps Reserve	46	47	47
Drill pay status [1]	45	45	45
Other paid status	2	2	2
Air Force Reserve	65	69	71
Drill pay status [1]	57	62	63
Other paid status	8	7	8
Air National Guard	71	72	72
Total	1,062	1,083	1,002

[1] Includes 3- to 6-month trainees.

NOTE.—Detail may not add to totals due to rounding.

Wherever appropriate, the unit organization of the Reserve components is being changed to conform with that of the Active Forces in order to facilitate their integration in time of emergency. In the Reserve components of the Army, the changeover to the Pentomic concept has been virtually completed and, coupled with other actions, has resulted in considerably higher mobilization readiness. By the end of 1961, ground elements of the Marine Corps Reserve will be reorganized to conform

520000—60——28

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

with the combat elements of the Regular Fleet Marine Forces. Coupled with the transition to multiple paid drills, this reorganization will effect a marked improvement in the mobilization readiness of the Marine Reserve units.

All of the Reserve components participating have benefited from the 6-month training program. This program, which provides basically trained personnel to the Ready Reserve, allows the Reserve components to concentrate on advanced unit or individual training and thus maintain a high state of mobilization readiness. During 1961, the 6-month training program will continue to provide the majority of the necessary input of trained recruits to maintain the Reserve components at the planned levels.

Many elements of the Reserve components conduct some of their training with the Active Forces. Other Reserve elements are actually participating in, or taking over, missions assigned to the Active Forces.

In addition to supporting 27 divisions and numerous other combat units, the Army National Guard in 1961 will man an increased number of on-site Nike battalions for the air defense of the United States, thus relieving Active Army units for other duty.

Also contributing to the mission of the Air Defense Command, the Air National Guard will continue to maintain a certain portion of its fighter-interceptor force on "runway alert" and man, on an "around-the-clock" basis, certain aircraft control and warning radar sites.

Antisubmarine warfare aircraft, destroyers, destroyer escorts, and mine warfare ships manned by Selected Reserve crews of the Navy Reserve will continue to participate in regular fleet exercises. These crews carry standby active duty orders at all times which, in the event of mobilization, make them and their ships available for immediate deployment. It is expected that by the end of 1961 there will be Selected Reserve crews on 58 destroyers, destroyer escorts, and minesweepers, thus making an important contribution to our antisubmarine and mine warfare potential.

The Air Force Reserve, in addition to providing a pool of skilled individuals ready to augment the Active Air Force in time of emergency, also maintains a significant airlift capability in being.

Retired pay.—Expenditures for retired pay in 1961 are estimated at $794 million, a total that is $94 million more than 1960 and $153 million more than 1959. Of the $794 million in 1961, $22 million is associated with proposed legislation which would authorize military personnel retired prior to June 1, 1958, to receive benefits consistent with the higher rates of pay provided by the Military Pay Act of 1958. At the end of 1961, about 289,000 persons will be receiving retired pay, compared to 254,000 at the end of 1960 and 230,000 at the end of 1959. With increasing numbers of military personnel who entered service during World War II becoming eligible for retirement, the numbers and cost of retired persons can be expected to continue an accelerating upward trend in future years.

Operation and maintenance.—Expenditures for operation and maintenance activities of the Active and Reserve forces in 1961 are estimated at $10,321 million, which is $184 million more than 1960, but $63 million less than 1959.

Average man-years for both military and civilian personnel, numbers of military units and installations, inventories of major weapons such as ships and aircraft, and the associated steaming- and flying-hour programs, all continue to decline gradually from 1959 to 1961. Nevertheless, overall operation and maintenance costs continue to increase. Among the factors tending to offset the planned reductions in activity levels are higher unit costs per flying hour, up 11% in two years; per steaming hour, up 15% since 1959; and the higher unit costs of maintaining and overhauling ships, missiles, aircraft, engines, etc. These rising costs are caused chiefly by the introduction of more complex and advanced weapons into the active military forces. For example, the cost of overhauling a jet engine in the new B–58 is about six times as much as that for a jet engine in the older B–47. The annual operating costs for a nuclear-powered submarine are over three times as high as for a conventionally powered submarine of a similar type.

In addition to these higher unit costs, the expansion of certain going programs will require increased funds in 1961. The cost of operating and maintaining the expanding major electronics and communications systems (SAGE, BMEWS, Missile Master, etc.) will increase by over 70% from 1959 to 1961. Similarly, funds for that portion of the fleet rehabilitation and modernization program financed under Operation and maintenance will increase by about 25% in 1961 over 1960, reflecting continuation of the effort to improve the condition and readiness of the fleet. The cost of maintaining and furnishing the rapidly increasing number of family housing units is expected to rise by about 23% from 1959 to 1961. A modest liberalization of the dependent medicare program—through relaxation of restrictions on certain specified medical contingencies—will result in an increased cost per patient.

New activities, such as the civilian employee health benefits program enacted last year, are a third factor accounting for increased operation and maintenance costs.

Funds are included to enable the Strategic Air Command to acquire an "on the shelf" airborne alert capability which, if the need should arise, would permit a portion of the heavy bomber force to be on continuous airborne alert during periods of international tension. This program will require indoctrination training, larger inventories of spare parts (provided for under the Procurement title), and increased maintenance activities.

Procurement.—Because procurement of a major weapons system is so closely related to the research, development, test, and evaluation of that system a more accurate picture of the trends from 1959 through 1961 may be obtained by combining these two appropriation groupings. Expenditures for this combination are estimated at $17,519 million in 1961, which is $104 million less than in 1960, but $250 million more than 1959.

The 1961 budget provides for the procurement of 1,510 aircraft—633 for the Air Force, 658 for the Navy, and 219 for the Army. The total is 99 greater than in 1960, although 224 less than in 1959. The reduction from 1959 is, however, concentrated primarily in trainers and helicopters.

Procurement of both the greatly improved B–52H heavy jet bomber and the supersonic B–58 medium jet bomber will be continued during the year, as well as KC–135 supporting jet tankers. The 1961 procurement

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

will complete the equipping of 14 B–52 wings. Development work will continue on the B–70 Mach 3 long-range bomber airframe and engines to provide two prototype aircraft for flight testing in 1963.

An increased number of F–105 supersonic fighter-bombers are planned for procurement in 1961 over 1960. Because of their all-weather capability, special low-altitude handling characteristics, and ability to carry a wide variety of conventional as well as nuclear munitions, these aircraft will strengthen significantly the close ground support capability of the tactical air forces. Procurement of the C–130 turboprop transport for tactical airlift will also be continued.

The number of Navy attack aircraft to be purchased, including the supersonic A3J, will be increased to augment carrier attack and close-support capabilities. Procurement of the Navy's supersonic F8U–2N and F4H all-weather interceptors will remain at about the same level as in 1960, but substantially above 1959. An increased number of the GV–1 tanker-assault transport aircraft and S2F antisubmarine aircraft will also be procured.

Total Army aircraft procurement in 1961 will increase more than 35% over 1960, including the Mohawk turboprop observation aircraft, the Caribou twin engine transport aircraft, and the Iroquois utility helicopter used for combat area movement, medical evacuation, and light cargo. The first production quantities of the Chinook helicopter will also be bought in 1961.

The 1961 budget reflects the continually increasing emphasis on missiles of all kinds in national defense. Funds for the procurement and production of the four main strategic deterrent missiles—Atlas, Titan, Minuteman, and Polaris—will be further increased. No new funding will be required in 1961 for the Jupiter and Thor intermediate range ballistic missiles, but procurement of the Hound Dog and Quail for use by the B–52 strategic retaliatory force will be continued at a high level.

Funding for the Bomarc and Nike-Hercules air defense missiles will largely complete the procurement program for these missiles. Procurement of the Talos, Terrier, and Tartar fleet air defense missiles will continue as additional guided-missile ships join the fleet.

Funds will also be devoted to continuing the procurement of large numbers of air-to-air missiles such as Sparrow for the Navy and Marine Corps, Falcon for the Air Force, and the combat-tested Sidewinder for both the Air Force and Navy.

A wide variety of other missiles for support of the ground forces is planned for procurement in 1961. The number of Bullpup air-to-surface missiles to be purchased in 1961 will be increased considerably over 1960. In the category of surface-to-surface weapons, the effort on the longer range tactical missile Pershing, offering much greater flexibility, accuracy, mobility, and a considerably shorter reaction time than its predecessor Redstone, will continue on a high priority basis. Additional funds will be provided for the tactical close-support rockets, Little John and an improved version of Honest John. These, together with Lacrosse and Sergeant missiles, will provide medium and short range ground support firepower. A substantial procurement of Hawk missiles, together with the first production quantity of Redeye—a man-carried air defense missile—will be made in 1961, to improve the defenses of our ground forces in the field against low level air attack. For close support of front line troops, a sizable quantity of Davy Crockett—a man-carried nuclear rocket—will be procured, and in 1961 the first production buy of an improved guided antitank missile will be made.

Close ground support firepower will be augmented by the procurement in 1961 of a family of lighter, more mobile, self-propelled howitzers. An increased quantity of new 7.62-mm. rifles, machineguns, and ammunition will be purchased.

Included in the 1961 procurement program are about 18,000 tactical vehicles; a third increment of the new 105-mm. armed, diesel powered, medium tanks; tank recovery vehicles; and lightweight, air droppable, armored personnel carriers.

The 1961 shipbuilding program includes the aircraft carrier for which advance procurement funds were appropriated by the Congress last year. However, it is proposed to construct this carrier with a conventional rather than a nuclear powerplant. In addition, funds are provided for construction of 3 guided-missile frigates, 2 guided-missile destroyers, 3 nuclear-powered submarines, 3 Polaris fleet ballistic missile submarines, and 8 other ships, for a total of 20 ships.

The buildup of the Polaris fleet ballistic missile submarine force will continue at the rate of three submarines per year. The first three were built with funds made available in 1958. Funds appropriated in 1959 were used to build six more—three in 1959 and three in 1960. In addition to the 3 Polaris submarines scheduled for 1961, which will bring the total to 12, funding is provided for the purchase of long leadtime components for 3 more submarines to be started after 1961.

An additional 14 destroyers will undergo major modernization in 1961, the second annual increment of the fleet rehabilitation and modernization program designed to improve the antisubmarine warfare capability of the Navy and to extend the useful life of World War II destroyers.

In the electronics category, additional funds are provided for procurement of large radars for two ballistic missile early warning system (BMEWS) stations. Funds are provided for additional semiautomatic ground environment (SAGE) computers, for the radar improvement program and to extend the air weapons control system in overseas areas. The 1961 budget also provides for the development of extensive command and control communications for air defense, Strategic Air Command, ground forces, and other needs of the military services.

Research, development, test, and evaluation.—Expenditures for basic and applied research, and for the development, test, and evaluation of new and improved weapons and equipment under this title are estimated at $3,917 million in 1961.

Under the rearrangement of the Defense budget adopted last year, funds for the development, test, and evaluation of major weapons systems and components which were previously carried in Procurement accounts, have now been largely transferred to this title. Those remaining in the Procurement title are separately identified.

In the aircraft category, the 1961 program emphasizes the development of a variety of tactical aircraft, continues the aircraft nuclear propulsion program conducted jointly by the Air Force and the Atomic Energy Commission, provides for continuation of the X–15 hypersonic and very high altitude research aircraft, and increases the development support for the ground launched and manned Dynasoar vehicle which will have near orbital capabilities.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

As in 1960, the category receiving the largest amount of funds will be missiles and related equipment. Large sums are provided for the improvement of the range, accuracy, and reliability of the Polaris missile.

Intensive research and development work will be continued on the Army's Nike-Zeus antimissile missile. Adequate funds are provided for the full scale testing of this system, under realistic field conditions, in order to ascertain its practicability as a weapon system.

Funding is also provided to continue necessary further developmental work on a wide variety of other tactical missiles just entering the inventory, such as Pershing and Sergeant; as well as on such more advanced projects as an air-launched ballistic missile, the Mauler for air defense of the forward area of the field army, and a new, highly mobile, solid-fuel missile for direct support of Army battle groups.

Antisubmarine warfare research and development will be continued at a high level, including development of both fixed and mobile submarine detection devices, improved tracking equipment, nuclear depth charges, and new antisubmarine weapons such as surface and submarine launched antisubmarine missiles.

Funds are also provided to keep abreast of new developments in chemical and biological warfare.

For the military space effort funds are provided for satellite systems for early warning (Midas), reconnaissance (Samos), communications (Notus), and navigation (Transit). The Department of Defense contribution to the national space program will also include the development of improved solid and liquid missile propellants and of advanced guidance and communications techniques, and research in high-altitude phenomena and space medicine. Funds for the Saturn, a very high thrust booster project, in 1961 are shown in this budget as a part of the funds requested under the National Aeronautics and Space Administration.

Provision is also made for continuation of the present high levels of effort in basic research in order to add importantly to the share of fundamental knowledge and in advanced research in such areas as materials, seismology, oceanography, electronic components, and low temperature physics.

In addition, $150 million is included for the Department of Defense Emergency Fund—the same amount as in 1959 and 1960. This fund permits rapid exploitation of scientific breakthroughs and unanticipated technological developments which may occur during the coming year.

Military construction.—Expenditures for military construction in 1961 are estimated at $1,359 million, $311 million less than in 1960, and $589 million less than in 1959. Expenditures are continuing to decline as construction of air defense installations and Strategic Air Command bases move toward completion, but are expected to level off as missile base construction activity accelerates.

The 1961 program for active forces continues to place increasing emphasis on missile installations and on electronic facilities for air defense. Funds are provided for the construction of additional Atlas and Titan operational sites, for installations to support the initial deployment of operational Minuteman missile squadrons, and for Polaris weapon system base facilities.

The budget also provides for the improvement of facilities for existing radar warning and control systems, such as the Pinetree Line, Dewline, and SAGE; for improved Nike-Hercules radar facilities; and for further extension the Loran system.

The program also includes the construction of new research, development, test, and evaluation facilities. Additional funds are included for the Pacific Missile Range, and for the construction of development and test facilities for the Nike-Zeus system.

The existing physical plant of the defense establishment, including waterfront, airfield, maintenance, medical, and housing facilities will be improved and modernized.

Construction expenditures for Reserve Forces facilities are estimated at $57 million, compared with $62 million in 1960 and $86 million in 1959. The decline reflects the stabilization of these forces and the tapering off of new facility requirements. The emphasis is now on urgently needed replacement construction.

Revolving and management funds.—The $30 million of reappropriation shown under this title for 1961 is the amount to be added to the revolving fund for Wherry housing. These additional funds will permit the Department of Defense to continue in 1961 its program of acquiring and rehabilitating Wherry housing units.

Again in 1961 there will be an excess, estimated at $350 million, of receipts over expenditures in the revolving and management funds of the Department of Defense. This excess of receipts will reduce to $40,995 million the Department's net expenditures for Military functions estimated under the first six budget appropriation groups.

Composition of the Armed Forces.—The 1961 budget for the Military functions of the Department of Defense provides for major forces as follows:

DEPARTMENT OF DEFENSE—SUMMARY OF MAJOR FORCES

[Fiscal years 1959–61]

	Actual	*Planned*	
	June 30, 1959	*June 30, 1960*	*June 30, 1961*
Army:			
Divisions	15	14	14
Armored cavalry regiments	5	5	5
Armored combat commands	1	1	1
Brigades (infantry)	2	2	2
Battle groups (infantry)	8	8	9
Field artillery missile groups (heavy) (Redstone)	3	3	3
Army missile commands	4	4	5
Army air defense antiaircraft battalions	(85)	(81¼)	(87¼)
Guided missile battalions (equivalents)	74	73¼	82¼
Other battalions (gun, skysweeper, automatic weapons)	11	8	5
Separate surface-to-surface missile battalions	18	24	26
Active aircraft inventory	(5,199)	(5,663)	(5,791)
Helicopters	2,357	2,714	2,840
Fixed-wing	2,842	2,949	2,951
Navy:			
Commissioned ships in fleet	(860)	(817)	(817)
Warships	386	383	382
Other	474	434	435
Attack carrier air groups	16	16	16
Carrier antisubmarine air groups [1]	--	11	11
Patrol and warning squadrons	42	42	41
Marine divisions	3	3	3
Marine air wings	3	3	3
Active aircraft inventory	9,649	8,657	8,348
Air Force:			
USAF combat wings	(105)	(96)	(91)
Strategic wings	43	40	38
Air defense wings	27	23	20
Tactical wings	35	33	33
USAF combat support flying forces	(145)	(118)	(115)
Air refueling squadrons	60	62	66
MATS air transport squadrons	27	22	21
Other specialized squadrons	58	34	28
Active aircraft inventory	20,890	19,513	18,885

[1] Prior to 1960 the carrier antisubmarine capability was represented by 22 carrier antisubmarine squadrons which have been reorganized into 11 carrier antisubmarine air groups.

Army.—Army forces will total 14 divisions and 25 other major combat units at end 1961—an increase of 1 battle group and 1 missile command over the force planned for the end of the current year.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

There will also be some increase in the number of separately organized tactical surface-to-surface missile units.

Of the 14 divisions, 7 will be deployed in critical oversea areas and 4 others (1 in Hawaii and 3 STRAC divisions in the continental United States) will be ready for immediate deployment to any trouble spot in the world. Other necessary combat and combat-support units will be similarly deployed and ready.

In the air defense guided missile battalions—which increase by nine as antiaircraft gun battalions continue to be phased out—the conversion from Nike–Ajax to the nuclear-capable Nike–Hercules missile will continue at a rapid pace. The number of Hawk missile battalions for low altitude defense of Army units overseas will also increase considerably.

The active aircraft inventory will rise during 1961 as modern planes such as the Mohawk observation aircraft and the Iroquois helicopter are delivered.

During 1961, the Army will also receive significant quantities of new equipment to modernize its ground forces. The new M60 tank, the NATO standard 7.62 family of small arms, the improved jeep, and the M113 armored personnel carrier will all enter the inventory in quantity for the first time. Also being received in production quantities for the first time will be the Little John and Sergeant surface-to-surface tactical missiles, and Davy Crockett, the individual man-carried nuclear-capable rocket for close support of troops on the battlefield.

Navy and Marine Corps.—During 1961, the Navy will have 817 ships in the active fleet, the same number planned for the end of the current fiscal year but a decrease from 1959. There will also be a small decrease in the number of warships, compared with end 1959.

However, during 1961, the fleet will receive from new construction more new ships than in any year since World War II, except for 1955. Many of these ships will be either nuclear powered, have a guided missile capability, or both.

During 1961, the fifth and sixth *Forrestal*-class attack carriers, *Constellation* and *Kitty Hawk*, will be commissioned, replacing older *Essex*-class carriers. The first nuclear-powered cruiser, *Long Beach*, armed with Talos and Terrier fleet air defense guided missiles, together with 16 guided missile destroyers and frigates, will also be commissioned during the year.

The Polaris ballistic missile-firing submarine force will be augmented by three more submarines during 1961, bringing the total in commission to six by the end of the year. In addition, six other nuclear-powered submarines will be commissioned during 1961.

The antisubmarine warfare forces of the Navy will be significantly improved during the year. In addition to the previously mentioned new ships, many of which have improved ASW capabilities, several new items of ASW equipment will be introduced in 1961. Asroc, a rocket-assisted torpedo and depth bomb; several new types of sonar equipment; and Dash, a drone ASW helicopter, will all become operational for the first time. In addition, a new all-weather search helicopter, the HSS–2, and a new improved carrier-based ASW aircraft, the S2F–3, will be introduced into the fleet during 1961.

While the active aircraft inventory of the Navy will decline, new and improved aircraft, such as the supersonic F4H fighter and the mach 2 all-weather A3J attack plane, will be introduced into the forces, replacing older models.

The Marine Corps, with three divisions and three air wings, in 1961 will continue to maintain combat-ready forces organized, equipped and prepared to deploy immediately anywhere in the world. During 1961, with improved personnel management and a lower-than-normal loss of personnel, the Marine Corps will be able to allocate a larger percentage of its strength to the combat forces. This will permit the reactivation by the end of 1961 of a number of battalion landing teams without any increase in overall strength. In addition, Hawk guided missile units will be activated for the protection of combat units against low level aircraft attack.

Combat effectiveness and modernization will be improved during this period by the delivery of the first increment of the 7.62 mm. (NATO) weapons family and the introduction of the Davy Crockett weapons system into the Fleet Marine Forces. Aviation effectiveness will be improved by increased air-to-air guided missile capabilities; by the introduction of the Bullpup air-to-surface tactical missile; and by the activation of the first in-flight air refueling squadron, which will appreciably improve the capability of Air Fleet Marine Forces units to deploy rapidly to forward areas.

Air Force.—The reduction of two strategic wings reflects a phaseout of older B–47 medium bombers, and is partially offset by the delivery of the first wing of the new supersonic B–58 medium bombers and additional quantities of an improved version of the B–52. Because of their much greater range, larger bomb load, greater speed, and more advanced electronics systems, a smaller number of the new B–52's will provide the same or greater combat capability than was provided by the B–47's phased out. By the end of 1961, 13 heavy bomber wings will be equipped with B–52's, an increasing number of which will carry the Hound Dog stand-off missile and the Quail decoy missile. These wings form the hard core of our nuclear strike force.

More importantly, our retaliatory capability will be further enhanced during 1961 by additions to our long-range missile deterrent force. By the end of that year, additional units of the Atlas ICBM and the first few Titan ICBM's will be operational. The number of intermediate range ballistic missile squadrons deployed abroad with our allies will also increase in 1961.

Important to the security of the strategic force will be the first operational BMEWS station capable of providing warning of an ICBM attack. This warning, together with the previously mentioned "on-the-shelf" airborne alert capability, and the base hardening and dispersal program, will help ensure the immediate response of our nuclear deterrent force in the years ahead.

The reduction of three air defense wings will be offset by continuing deliveries of all-weather Century series fighter aircraft and by provision of surface-to-air Bomarc missile units. By the end of 1961, eight Bomarc squadrons are planned to be operational, compared to four at the end of the current fiscal year.

The capability of the tactical wings will be considerably increased by the availability of additional quantities of the all-weather, supersonic, nuclear-capable F–105, and by the growing availability of tactical missiles and improved weapons.

Overall, there will be a decrease in the active aircraft inventory of the Air Force, primarily through elimination of older aircraft. At the same time, however, there will be a significant increase in the guided missile inventory.

Military assistance.—Military assistance expenditures in 1961 are estimated at $1,750 million, which is $50 million less than estimated expenditures in 1960 and almost $600 million less than the amount spent in 1959. Recommended new obligational authority for 1961 is

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

$2,000 million, an increase of $700 million over 1960 and $485 million more than 1959. While it was possible in both 1959 and 1960 to provide deliveries substantially in excess of the new obligational authority through utilization of unexpended balances, these balances will no longer be sufficient to support essential levels of deliveries if they are not replenished in 1961.

The funds requested will meet recurring costs and also permit essential modernization in conventional and advanced weapons. Over half of the 1961 program will cover expenses for the maintenance and training of free world forces which have been equipped under prior year programs, and for the continued support of activities already underway. About 40% of the program will provide additional military equipment for force improvement, primarily for NATO and selected Far East countries. A large portion of these equipment funds will be devoted to advanced aircraft, missiles, and related ground environment for air defense. Other important items are vessels and aircraft for antisubmarine warfare, tactical missiles, and equipment for the modernization of ground forces.

Funds are also included for military construction, notably the U.S. share of the NATO infrastructure program of bases and facilities. In addition, the program will finance contributions to NATO weapons development and production activities.

The type and amount of assistance offered is determined by the nature of the threat in each area and, to a considerable extent, by the resources that each recipient country is able to make available for its own defense. Outright grant aid is concentrated in the less developed areas. There, in conjunction with defense support assistance provided also under the Mutual Security Act, it permits these countries to maintain the military establishments required to resist external aggression and internal subversion. Assistance to our more developed and financially capable allies is being provided increasingly through cost sharing and sales arrangements.

Summary.—In summary, the 1961 budget for military functions and Military assistance provides for the Department of Defense as follows:

New obligational authority.—$42,577 million, and in addition $350 million to be derived by transfers from the revolving funds of the Department of Defense. For the Army there is provided $9,546 million and $260 million to be transferred from the Army stock fund. For the Navy there is provided $12,013 million and $60 million to be transferred from the Navy stock fund. For the Air Force there is provided $17,737 million and $30 million to be transferred from the Air Force stock fund. $1,281 million of new obligational authority is provided for the Office of the Secretary of Defense; and $2,000 million is provided for military assistance.

Direct obligations.—Total direct obligations are estimated on a comparable basis at $44,209 million. These are shown by category in the following table:

[In millions]

	1959 actual	*1960 estimate*	*1961 estimate*
Military personnel	$11,929	$12,008	$12,187
Operation and maintenance	10,132	10,300	10,527
Procurement	14,800	13,605	14,364
Research, development, test, and evaluation	3,544	4,268	3,952
Military construction	1,748	1,497	1,382
Total, military functions	42,151	41,679	42,412
Military assistance	2,012	1,748	1,797
Grand total	44,163	43,427	44,209

By excluding intragovernmental transactions from the amounts in the preceding table, data can be obtained on obligations which result in the purchase of goods and services from private individuals and businesses. This measure, set forth on the following table, more closely portrays the economic impact of Defense's activity:

OBLIGATIONS TO THE PUBLIC

[Excludes intragovernmental transactions]

[In millions]

	1959 actual	*1960 estimate*	*1961 estimate*
Military personnel	$11,928	$12,007	$12,187
Operation and maintenance	10,145	10,297	10,513
Procurement	14,002	13,265	13,799
Research, development, test, and evaluation	3,550	4,339	3,952
Military construction	1,711	1,504	1,382
Revolving and management funds	−292	−216	−315
Total, military functions	41,045	41,196	41,517
Military assistance	1,981	1,710	1,757
Grand total	43,026	42,906	43,273

Net expenditures.—$42,745 million: Army, $9,383 million; Navy, $11,683 million; Air Force, $18,614 million; the Office of the Secretary of Defense, $1,315 million; and military assistance, $1,750 million.

MILITARY PERSONNEL

The following narrative statement covers the active duty appropriations for the Army, Navy, Marine Corps, and Air Force.

1. *Pay and allowances.*—This provides for the pay and allowances of military personnel on active duty, including cadets and midshipmen at the three service academies, aviation cadets, and other officer candidates.

The number of active duty military personnel provided for is shown in the following table. The personnel in the Reserve components of the defense forces are described under the pertinent appropriations below.

	Year-end number			*Average number*		
	1959 actual	*1960 estimate*	*1961 estimate*	*1959 actual*	*1960 estimate*	*1961 estimate*
Defense total	2,503,233	2,489,000	2,489,000	2,564,450	2,494,986	2,488,110
Officers	318,437	314,700	314,700	321,623	316,384	316,369
Enlisted	2,174,385	2,161,830	2,161,705	2,231,721	2,166,015	2,159,181
Officer candidates	10,411	12,470	12,595	11,106	12,587	12,560
Army	861,294	870,000	870,000	887,964	870,300	870,700
Officers	101,239	100,100	100,100	102,252	100,504	100,274
Enlisted	758,239	768,100	768,100	783,343	767,397	768,051
Military Academy cadets	1,816	1,800	1,800	2,369	2,399	2,375
Navy	626,340	619,000	619,000	636,393	619,649	618,959
Officers	69,795	69,700	69,700	70,312	69,319	69,953
Enlisted	552,221	543,300	543,300	560,356	544,409	543,302
Naval Academy midshipmen	2,534	2,629	2,732	3,476	3,521	3,607
Aviation cadets	1,111	425	243	1,249	790	290
Officer candidates	570	2,859	2,899	836	1,460	1,692
Aviation officer candidates	109	87	126	164	150	115
Marine Corps	175,571	175,000	175,000	185,033	175,000	175,000
Officers	16,065	16,200	16,200	16,239	16,344	16,208
Enlisted	159,506	158,530	158,405	168,794	158,508	158,438
Aviation cadets	.....	270	395	.....	148	354
Air Force	840,028	825,000	825,000	855,060	830,037	823,451
Officers	131,338	128,700	128,700	132,820	130,217	129,934
Enlisted	704,419	691,900	691,900	719,228	695,701	689,390
Air Force Academy cadets	1,614	2,000	2,350	1,133	1,534	1,913
Aviation cadets	2,657	2,400	2,050	1,879	2,585	2,214

An additional amount required in 1960 by the Air Force to support the average number in the above table is shown under Proposed for later transmission.

Provision is made for amounts otherwise available as quarters allowances to be paid (*a*) to the revolving fund for acquisition, rehabilitation, and rental of Wherry Act housing, in cases where such housing is assigned as public quarters, (*b*) as mortgage payments on Capehart housing, (*c*) to the Commodity Credit Corporation in payment for foreign currencies used to construct family housing, and (*d*) to the operation and maintenance appropriations to maintain and operate surplus commodity housing.

In addition, provision is made for payment for proficiency advancements to selected enlisted personnel in critical skill areas. Funds are provided for advancement of 163,000 men by June 30, 1960, and 230,600 men by June 30, 1961. It also provides for the Government's contribution to the Federal old-age and survivors insurance trust fund under the Servicemen's and Veterans' Survivor Benefits Act, purchase of individual clothing for initial issue to enlisted personnel, replacement of clothing issues in Korea, and for payment of clothing maintenance allowances.

2. *Subsistence in kind.*—This provides for the purchase of food supplies for issue as rations to enlisted personnel including emergency and operational rations.

3. *Movements, permanent change of station.*—This provides for permanent change of station travel for individuals and groups of military personnel and their dependents, including dislocation and separation travel allowances, storage of household goods in commercial facilities, and transportation of personal property. Payment for services furnished by the Military Sea Transportation Service and Military Air Transport Service for transportation to and from overseas of military personnel, their dependents, household goods, and automobiles is also included.

4. *Other costs.*—This provides for expense of apprehension of deserters and escaped military prisoners, payment of interest on money deposited by enlisted personnel, payment of death gratuities to beneficiaries of military personnel, and payment of premiums on servicemen's mortgage insurance.

Current authorizations:

MILITARY PERSONNEL, ARMY

For pay, allowances, individual clothing, subsistence, interest on deposits, gratuities, permanent change of station travel (including all expenses thereof for organizational movements), expenses of temporary duty travel between permanent duty stations, for members of the Army on active duty (except those undergoing reserve training), expenses of apprehension and delivery of deserters, prisoners, and members absent without leave, including payment of rewards of not to exceed $25 in any one case, [$3,233,063,000] *$3,261,000,000*, and, in addition, [$281,000,000] *$260,000,000*, to be derived by transfer from the Army Stock Fund. (*10 U.S.C. 1035, 1475, 3536, 3687, 4561, 4562, 4741; 37 U.S.C. 31a–36, 231–238, 251, 253, 305; 38 U.S.C. 691a–g; 50 U.S.C. App. 2201–2216; Department of Defense Appropriation Act, 1960.*)

1. *Reserve personnel.*—This program provides funds for training members of units of the Army Ready Reserve which are required by current mobilization plans. The combat and support units are organized in 10 combat infantry divisions, 13 training divisions, and 2 maneuver area commands, as well as a large number of small non-divisional mobilization base, combat and support type units. Personnel are expected, on the average, to perform 44 two-hour drills, and 4 four-hour drills at their home stations. In addition, assigned members of these units are required to participate in 2 weeks of active duty train-

MILITARY PERSONNEL—Continued

Current authorizations—Continued

RESERVE PERSONNEL, ARMY—Continued

ing each year. The reduction in Army Reserve strength in drill pay status to 270,000 for 1961 will be accomplished by a reduction in the number of units, personnel levels, or a combination of these actions, but the program will continue to provide an effective reserve of the size necessary to support our national objectives.

In addition, training is provided for individual reservists who have been assigned to fulfill designated early mobilization requirements. Other reservists scheduled for early mobilization as individual reinforcements also receive necessary training. The paid personnel strength is indicated in the following table:

ARMY RESERVE PERSONNEL STRENGTH

[In paid status]

	1958 actual	*1959 actual*	*1960 planned*	*1961 proposed*
End of year:				
Officers	79,784	77,345	82,400	83,328
Enlisted	242,053	272,828	275,400	237,910
Total	321,837	350,173	357,800	321,238
Average:				
Officers	79,946	79,290	80,178	83,515
Enlisted	215,707	257,925	280,132	253,164
Total	295,653	337,215	360,310	336,679

Army Reserve enlisted personnel are obtained either from personnel with prior military service who have an interest or an obligation to actively train in Army Reserve units, or from newly enlisted men participating in the 6-month active duty training program. Enlisted personnel in drill pay status obtained from these sources are summarized below:

	1958 actual	*1959 actual*	*1960 planned*	*1961 proposed*
6-month training program	28,240	21,054	35,800	20,000
Other prior military service	29,329	96,646	74,800	76,200

It is expected that 35,800 men will begin a 6-month tour of active duty training in 1960 and 20,000 in 1961.

The composition of the Army Reserve for 1961 by training category is indicated below:

Paid drills	*Paid days of active duty for training*		*Beginning strength*	*Average strength*	*Ending strength*
48	15	Officers	49,907	49,996	50,000
		Enlisted	228,810	222,481	208,690
0	90–180	Officers	3,093	2,281	2,090
		Enlisted	18,190	10,683	9,220
Drill pay status subtotal		Officers	53,000	52,277	52,090
		Enlisted	247,000	233,164	217,910
		Total	300,000	285,441	270,000
0	15	Officers	29,400	31,238	31,238
		Enlisted	28,400	20,000	20,000
Total paid status		Officers	82,400	83,515	83,328
		Enlisted	275,400	253,164	237,910
		Total	357,800	336,679	321,238

2. *Reserve Officers' Training Corps.*—This program provides training for Reserve officer candidates who have enrolled in the advanced course while attending a collegiate institution. Reserve Officers' Training Corps units providing such training, have been established at 233 institutions. The curriculum of the advanced course includes instruction in military and academic subjects together with a 6-week summer camp at an Army post. College graduates, who satisfactorily complete the advanced course, are commissioned and are either ordered to active duty for a 2-year period to meet the requirements of the Active Army or to a 6-month tour of active duty training. When these officers complete their tour of active duty or active duty for training they are assigned to the Ready Reserve where they participate with a unit of the Army National Guard or Army Reserve, or in a pool as an individual reinforcement officer.

Utilization of these graduates is summarized below:

	1958 actual	*1959 actual*	*1960 planned*	*1961 proposed*
2-year active duty tours	6,858	5,013	6,950	7,500
6-month active duty training	6,614	7,440	6,040	4,610

In addition, 2 years of basic military training is provided for college students who elect or are required by the institution to enroll in the course. Training is also provided for students who elect to enroll at 289 high schools in a junior program.

Details of the program and the average annual enrollment are summarized below:

Course	*1958 actual*	*1959 actual*	*1960 planned*	*1961 proposed*

1. *Reserve personnel.*—The program provides funds for training members of the Navy Ready Reserve who will be required for immediate service in the event of mobilization. These reservists will augment existing active fleet, and aviation units and fleet support and Shore Establishment activities. Most of these reservists perform 48 3-hour drills and are ordered to 2 weeks of active duty training each year.

Occasional training is also provided for other individual reservists scheduled for early mobilization to enable them to meet requirements of active duty.

In addition, antisubmarine and mine warfare units, composed of selected reservists, will join the Active Forces in the event of mobilization to perform missions required by current war plans. The development of this program is summarized below:

	1958 actual		*1959 actual*		*1960 planned*		*1961 proposed*	
	Units	*Men*	*Units*	*Men*	*Units*	*Men*	*Units*	*Men*
Fleet antisubmarine warfare	8	308	36	3,837	40	6,913	47	8,164
Fleet mine warfare					11	341	11	341
Aviation antisubmarine warfare	111	12,428	152	13,712	105	12,985	84	10,292

These fleet ships or aviation squadrons perform 48 4-hour drills and are assigned to active fleet units for 2 weeks of active duty for training each year.

The total Reserve personnel program is summarized in the following table:

NAVAL RESERVE PERSONNEL STRENGTH

[In paid status]

	1958 actual	*1959 actual*	*1960 planned*	*1961 proposed*
End of year:				
Officers	34,045	34,498	33,056	26,548

2. *Reserve officer candidates.*—This program provides training for officer candidates who are attending 1 of the 53 collegiate institutions where NROTC units have been established.

Students who enroll as candidates for a Reserve commission in the Navy or Marine Corps under the terms of a contract with the Navy attend one summer practice cruise in addition to completing prescribed military training. They are expected to serve for at least 2 years with the Active Forces after graduation.

In addition, other students may enroll as candidates for Reserve officer commissions and attend one practice cruise. Such students attend an officer candidate school after graduation and upon successful completion of the course are commissioned and expected to serve for 2 years with the Active Forces.

Candidates for commissions as Regular officers are selected on a nationwide competitive basis and if successful are appointed as midshipmen. Successful candidates, commissioned in the Regular Navy, are regarded as career officers. They are now expected to serve at least 4 years on active duty.

Type of program	*1958 actual*	*1959 actual*	*1960 planned*	*1961 proposed*
NROTC regular	5,808	5,514	5,215	5,145

MILITARY PERSONNEL—Continued

Current authorizations—Continued

RESERVE PERSONNEL, MARINE CORPS—Continued

1. *Reserve personnel.*—This program provides funds for training members of the Ready Reserve who are immediately required in the event of mobilization for augmentation of existing Active Forces and as a nucleus for new units. Most reservists are organized into various types of ground and aviation units for training purposes, which parallel the new Fleet Marine Force structure. They perform 48 drills of at least 4-hour duration throughout the year, as well as 2 weeks of active field training. In addition, other nondrill reservists scheduled for early mobilization also receive periodic training which will enable them to meet active duty requirements. The paid personnel strength is indicated in the following table:

MARINE CORPS RESERVE PERSONNEL STRENGTH

[In paid status]

	1958 actual	*1959 actual*	*1960 planned*	*1961 proposed*
End of year:				
Officers	5,403	4,721	4,918	5,518
Enlisted	42,755	41,695	41,742	41,882
Total	48,158	46,416	46,660	47,400
Average:				
Officers	5,406	5,015	4,815	5,518
Enlisted	41,992	40,826	41,321	40,572
Total	47,398	45,841	46,136	46,090

Ready Reserve personnel are obtained either from personnel with prior military service with an interest or an obligation to serve further in the Ready Reserve, or from men without prior service participating in a 6-month active duty training program. Enlisted personnel in drill pay status obtained from these sources are summarized below:

	1958 actual	*1959 actual*	*1960 planned*	*1961 proposed*
6-month training program	9,368	6,003	7,760	8,332
Other prior military service	6,678	6,495	5,031	3,270

The composition of the Marine Corps Reserve by training category is shown below:

Paid drills	*Paid days of active duty for training*		*Beginning strength*	*Average strength*	*Ending strength*
48	15	Officers	3,350	3,350	3,350

1. *Reserve personnel.*—This provides funds for training and instruction of Air Force Reserve personnel. The Reserve program is designed to provide trained units to supplement Regular Air Force units and trained individuals to augment Regular Air Force organizations and activities. During 1961 there will be 15 flying training wings plus supporting units, a continuation of the 1960 force.

Federal Reserve Bank of St. Louis

Ready Reserve personnel are obtained either from personnel with prior military service who have an interest or an obligation to serve further in the Ready Reserve or from newly enlisted men participating in a 6-month active duty training program. Enlisted personnel in drill pay status obtained from these sources are summarized below:

	1958 actual	1959 actual	1960 planned	1961 proposed
6-month training program	3,632	2,918	3,015	3,309
Other prior military service	18,649	22,915	16,810	13,416

The program is based on 48 paid drills of 4-hour duration and 2 weeks of active training duty for personnel assigned to Reserve flying training wings, combat support training units and mobilization assignees who occupy positions that require they be proficient in an aeronautical skill. Nonflying mobilization assignees have been provided 24 paid drills of 4-hour duration when training at their place of assignment or 24 2-hour periods of classroom instruction at air reserve centers. Those individuals receiving 15 days' active duty only are mobilization assignees assigned to major commands whose civilian occupations are so closely allied to their military specialties that they do not require frequent inactive duty training. In addition to the normal on-the-job training, selected courses at Air Force schools and special tours of active duty have been provided to increase individual proficiency. Estimated strengths by training categories for 1961 are as follows:

Paid drills	Paid days of active duty for training		Beginning strength	Average strength	Ending strength
48	15	Officers	8,615	8,814	9,025
		Airmen	21,590	23,140	24,600
24	15	Officers	13,835	13,493	13,275
		Airmen	15,980	15,039	14,355
0	90–180	Officers	150	116	75
		Airmen	1,815	1,753	1,670
Drill pay status subtotal		Officers	22,600	22,423	22,375
		Airmen	39,385	39,932	40,625
		Total	61,985	62,355	63,000
0	15	Officers	5,850	6,320	6,320
		Airmen	980	1,270	1,270
0	30	Officers	165	245	245
		Airmen	40	70	70
Other paid status subtotal		Officers	6,015	6,565	6,565
		Airmen	1,020	1,340	1,340
		Total	7,035	7,905	7,905
Total paid status		Officers	28,615	28,988	28,940
		Airmen	40,405	41,272	41,965
		Total	69,020	70,260	70,905

2. *Reserve Officers' Training Corps.*—This program is designed to provide qualified officers to meet the requirements of the Active Air Force and will be conducted at 175 institutions during 1961. Military training is also provided for college students who elect or are required to enroll in the basic course. The prescribed curriculum of the AFROTC course provides the equivalent of about 360 classroom hours as well as a 4-week summer camp at an Air Force base.

Students completing the advanced course receive commissions as Reserve officers and are ordered to active duty with the Air Force for periods ranging from 3 years for nonflying officers to 5 years for officers completing flying training. Officer production is summarized below:

	1958 actual	1959 actual	1960 planned	1961 proposed
Pilots or navigators	3,928	1,743	1,750	1,863
Other (nonflying)	1,435	2,327	2,055	1,893
Total	5,363	4,070	3,805	3,756

Details of the program and the average annual enrollment are summarized below:

	1958 actual	1959 actual	1960 planned	1961 proposed
Air science I (basic)	47,534	51,466	53,900	56,700
Air science II (basic)	30,631	29,564	32,650	34,500

This program provides funds for training members of units of the Army National Guard which are required by current mobilization plans. The reorganized troop structure of the National Guard is expected to consist of approximately 4,500 company size units at the end of 1960. These are organized in 27 combat divisions as well as a number of combat and service support units. Current plans contemplate early utilization of six of these divisions which are specially manned and equipped to permit immediate mobilization and use. Personnel assigned to Guard units are expected, on the average, to perform 39 2-hour drills and 9 4-hour drills as well as 2 weeks of active duty training at a summer camp. Selected personnel receive

NATIONAL GUARD PERSONNEL, ARMY—Continued

additional training at Army service schools, and command post exercises to improve their military proficiency for mobilization duties. The reduction in Army National Guard strength to 360,000 in 1961 will be accomplished by a reduction in the numbers of units, personnel levels, or a combination of these actions, but the National Guard will be trained and manned to the levels required to fulfill the role assigned to it in support of our national objectives. The paid personnel strength is summarized in the following table:

ARMY NATIONAL GUARD PERSONNEL STRENGTH

[In paid status]

	1958 actual	*1959 actual*	*1960 planned*	*1961 proposed*
End of year:				
Officers	37,942	37,884	37,000	37,000
Enlisted	356,387	361,543	363,000	323,000
Total	394,329	399,427	400,000	360,000
Average:				
Officers	37,186	37,881	37,390	37,000
Enlisted	371,197	352,900	362,610	339,900
Total	408,383	390,781	400,000	376,900

National Guard personnel are obtained either from personnel with prior active military service who have an interest or an obligation to serve further in the Ready Reserve, or from newly enlisted men participating in a 6-month active duty training program. Enlisted personnel in drill pay status obtained from these sources are summarized below:

	1958 actual	*1959 actual*	*1960 planned*	*1961 proposed*
6-month training program	51,903	47,798	67,600	29,300
Other prior military service	46,416	53,711	39,100	27,800

It is expected that 63,000 men will begin a 6-month tour of active duty training in 1960 and 28,000 in 1961.

The composition of the guard by training category during 1961 is indicated below:

This program provides funds for training members of units of the Air National Guard required by current mobilization plans. These are organized into 24 wings of tactical type aircraft as well as a number of nontactical flying and ground support organizations. Three aircraft control and warning units have been assigned responsibility for manning stations and with 22 fighter squadrons on a regular alert basis contribute to the Air Defense Command in its mission. Personnel assigned to Guard units are required to perform 48 4-hour drills and to participate in 2 weeks of active duty training. The personnel strength in 1961 will continue the level reached at the end of 1960 and is summarized in the following table:

AIR NATIONAL GUARD STRENGTH

	1958 actual	*1959 actual*	*1960 planned*	*1961 proposed*
End of year:				
Officers	8,354	8,473	9,200	9,200

Appropriation (new obligational authority)	640,000,000	715,000,000	775,000,000

This estimate includes funds for the pay of all military personnel on the retired lists of the Department of Defense. The estimate represents the consolidated requirements of the military departments for (*a*) payments to retired officers and enlisted personnel of the Army, Navy, Marine Corps, and Air Force, (*b*) the retainer pay of regular enlisted personnel of the Fleet Reserve of the Navy and Fleet Marine Corps Reserve, and (*c*) survivors' benefits payable under the Uniformed Services Contingency Option Act of 1953. The amount requested is exclusive of any administrative expense. The substantial gains to the retired rolls can be directly attributed to the greater number of individuals attaining eligibility for retirement after 20 or more years of active military service. A supplemental appropriation is anticipated for 1961 under Proposed for later transmission. The following tabulation shows the average number of personnel on the rolls during 1959 compared with the estimated numbers for 1960 and 1961:

AVERAGE NUMBER

Type of retirement	*1959 actual*	*1960 estimate*	*1961 estimate*
1. Nondisability	113,570	129,179	144,900
2. Temporary disability	12,716	12,728	13,059
3. Permanent disability	68,753	70,961	72,846
4. Fleet reserve	25,841	29,245	38,431
5. Survivors' benefits	1,665	2,038	2,398
Total	222,545	244,151	271,634

Proposed for later transmission:

Military Personnel, Air Force

Program and Financing

	1959 actual	1960 estimate	1961 estimate
Program by activities:			
1. Pay and allowances		$6,000,000	
2. Movements, permanent change of station		19,000,000	
Total obligations		25,000,000	
Financing:			
Proposed supplemental appropriation		25,000,000	

Under existing legislation, 1960.—Additional funds are anticipated for (*a*) increased costs for pay and allowances resulting from higher dependency factors and increased years of service by grade over estimates used in 1960 budget, and (*b*) additional costs for unprogramed permanent change of station movements of military personnel and their dependents resulting from the recent redeployment of Air Force units from bases in France to other locations in England and Germany, and the inactivation of units and base closures which have been programed under the reduced program of 825,000 military personnel.

Retired Pay, Department of Defense

Program and Financing

1. Nondisability		$4,376,000	$13,128,000
2. Temporary disability		328,000	984,000
3. Permanent disability		2,632,000	7,896,000
4. Fleet reserve		664,000	1,992,000
Total obligations		8,000,000	24,000,000
Financing:			
Proposed transfer from "Retired pay, Department of Defense"		−8,000,000	
Proposed supplemental appropriation			24,000,000

Under proposed legislation, 1960 and 1961.—Legislation will be proposed to provide that the retired pay, retirement pay, retainer pay, or equivalent pay of members or former members of the uniformed services entitled to such pay on May 31, 1958, shall be based on the pay scales which became effective on June 1, 1958, under the provisions of Public Law 85–422. The cost of the proposed legislation in 1960 can be financed from the current appropriation but a supplemental appropriation for 1961 is anticipated.

"Operation and maintenance, Air Force"		1,074,000	
"Operation and maintenance, Navy"	59,993	110,000	
"Operation and maintenance, Marine Corps"	128,000		
Appropriation (adjusted)	3,113,218,659	3,075,824,000	3,112,000,000

The general scope of this appropriation is to provide for support of an 870,000-man Active Army for its day-to-day operations and activities. This includes the direct operational support of the Army strategic and tactical forces deployed in oversea commands and within the continental United States; the maintenance and operation of facilities necessary to the recruitment, training, administrative, and logistical support of these forces; and the maintenance of a mobilization base for the expansion of Army forces in the event of emergencies or war. The Active Army Forces include Army units assigned to the unified and specified commands authorized pursuant to the Defense Reorganization Act of 1958. These commands support NATO commitments in Europe; U.S. commitments in the Pacific and in Korea; and air defense in the United States. They also provide for forces deployed in the Canal Zone, Alaska, and other strategic locations. Other Active Army Forces are the strategic Army forces located in the United States for deployment as necessary, support forces, and training forces.

The accomplishment of these missions and activities requires funds for the expenses of the fixed plant required to house and train these forces, for the supply and logistics system which procures, stores, distributes, and maintains materiel; and the expenses of the departmental headquarters and other major command headquarters. This appropriation also provides for expenses of the Army Reserve Forces and for 6-month active duty training of Army Reserve and National Guard personnel at basic training centers, Army schools, and with Army units. Funds for 1961 include $44 million for the support of an average load of 29,352 6-month trainees of the Army

http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

Reserve and National Guard. This training is related to the maintenance of these forces at strengths of 270,000 and 360,000, respectively.

1. *Tactical forces.*—This provides for the training and support of Army combat forces. These costs include the operation and maintenance of the installations where these units are stationed; the operation and maintenance of the missiles, aircraft, vehicles, and other equipment assigned to these units; and special training exercises. The 1961 program continues the increased use of missiles by the combat forces, and an increased number of missile units. Major combat units supported are as follows:

	1959 actual	*1960 estimate*	*1961 estimate*
Air defense forces: Air defense battalions	85	81¼	87¼
Tactical ground forces:			
Divisions	15	14	14
Armored cavalry regiments	5	5	5
Armored combat commands	1	1	1
Brigades (infantry)	2	2	2
Battle groups (infantry)	8	8	9
Missile commands	4	4	5
Field artillery missile groups (heavy)	3	3	3

Basic training of recruits, including 6-month reserve forces trainees, is accomplished at 12 training centers with the following average loads:

	1959 actual	*1960 estimate*	*1961 estimate*
Active Army	53,216	44,400	48,920
Reserve and National Guard	29,174	40,150	26,330
Total trainees	82,390	84,550	75,250

2. *Training activities.*—This provides for the training of individual officers and enlisted men as contrasted to the training of combat units. It includes two general types of training: Training of career personnel with accent on doctrine, strategy, and tactics; and training in specific military skills such as missile maintenance, counter mortar radar operation, aircraft mechanics, electronic repair, financial management, languages, and the operation of complex and intricate weapons and equipment of the modern Army. Most individual training is conducted through the Army service schools and colleges which conduct resident courses of instruction for U.S. Army personnel, reserve forces trainees, personnel from other services, and foreign military personnel; prepare and administer nonresident training such as extension courses or condensed courses conducted at installations other than the schools; develop doctrine and techniques; and prepare Army training texts and publications.

In addition, this activity finances the U.S. Military Academy at West Point which provides instruction for approximately 2,400 cadets annually for careers as Army officers; tuition costs for officers and enlisted men in subjects that are preferably taught in courses at civilian schools and industrial establishments; and the production of training devices, simulators, training films, and visual training aids.

The number of students supported by these funds are as follows:

	1959 actual	*1960 estimate*	*1961 estimate*
Service schools (average load):			
Schools	36,097	33,821	31,269
Colleges	1,023	1,087	1,087
U.S. Military Academy (average load)	2,369	2,375	2,375
Civilian institutions (number attending)	3,887	3,963	4,101

3. *Central supply activities.*—This finances the worldwide supply system required to provide the Army with materiel from the factory to the individual soldier. In substance, this activity provides for the supply functions required to control, standardize, catalog, procure, inspect, store, transport, and issue an item to the user.

The nerve centers of the Army supply system are the commodity managers located at 30 inventory control points. Here up-to-date inventories are kept on quantity, location, and condition of Army stocks; requests for materiel are received; instructions are issued to depots to ship or procurement offices to buy; and information is furnished on which to base the materiel maintenance program. In support of commodity management, current catalogs and data are maintained on about 965,000 items, with about 200,000 being added and removed annually. About 1.2 million individual supply control studies are made each year. Line item requisitions are processed at the rate of 184,000 daily. Oversea supply agencies are operated at three major ports to insure proper support to oversea commands. The decisions of the commodity managers directly affect the workload in other supply functions under this activity.

The largest function is the operation of the supply depots which includes the receipt, storage, care, preservation, and preparation for shipment of supplies and equipment. The Army depot system operates 79 depots, stores and cares for a multibillion dollar inventory, issues an average of $28 million of supplies each day.

This activity provides for the administration of a $4.5 billion central procurement program, including contracting, inspecting, preparation of specifications, standardization and industrial support measures for current procurement and mobilization.

There is also included the expenses of transportation of supplies and equipment from depot to the point of use, and the operation of Army ports and terminals in the United States and overseas. The Army moves approximately 5.6 million short tons by inland line haul and 3.7 million measurement tons by ocean transport annually.

Funds are also provided for the maintenance and protection of production facilities which are retained on standby status in peacetime.

In addition to the above activities, which are performed by the Army primarily for itself, this program also covers the administration of three major interservice supply activities operated by the Army. They are the Military Traffic Management Agency, and two inventory control points: the Military Clothing and Textile Supply Agency and the Military Subsistence Supply Agency.

A summary of workload data specifically related to these programs follows:

	1959 actual	*1960 estimate*	*1961 estimate*
Number of supply depots	80	80	79
Number of inventory control points	31	32	32
Number of line items processed	42,568,000	48,071,000	48,100,000
Number of short tons received	3,285,010	3,051,000	3,068,000
Number of short tons shipped	3,552,371	3,256,000	3,274,000
Average number of short tons in storage	12,170,101	11,749,000	11,574,000

4. *Major overhaul and maintenance of materiel.*—The objectives of this activity are to insure that the Army's equipment is maintained in effective operating condition to enable combat forces to wage limited and/or general war. To meet these objectives, this program provides for the overhaul of unserviceable equipment required to meet the needs of the Army; missile, aircraft, and special weapons parts in support of worldwide maintenance; support of maintenance capability at all levels of operation through maintenance publications; technical assistance in the introduction, installation, operation, and maintenance of complex modern equipment required by the Army; and, through maintenance engineering, improved maintenance techniques. This program also provides for the major overhaul of materiel for the mutual aid program and for other Defense agencies, on a reimbursable basis.

With continuing emphasis on newer, more complex, and costlier equipment, more funds are being allocated to

Federal Reserve Bank of St. Louis

OPERATION AND MAINTENANCE—Continued

Current authorizations—Continued

OPERATION AND MAINTENANCE, ARMY—Continued

missiles and aircraft with their supporting electronic and other equipment. In 1957, 20% of the funds available for this activity were allocated to the missile and aircraft categories, while in 1961, 56% will be spent for these purposes.

Continual emphasis is placed on cost reduction. Techniques and standards of performance are developed through maintenance engineering services and are implemented under the direction and guidance of the national maintenance points. Maintenance practices, such as inspect and repair only as necessary (IROAN), have been instituted for all equipment instead of complete teardown and reassembly. All levels of maintenance are made aware of these techniques and standards through the technical manuals and publications developed under this program.

Of the total funds available for this program, approximately 44% will be used for overhaul, modification, and ammunition renovation; approximately 24% for maintenance engineering and related activities; approximately 21% for procurement of parts; and approximately 11% for overhead costs of maintenance facilities.

5. *Medical activities.*—This covers medical (including dental and veterinary) support of the Army, Army National Guard, Army Reserve and Reserve Officers' Training Corps; operation and maintenance of medical facilities in the United States and overseas; medical care and hospitalization of Army personnel in localities where Army medical facilities are not available; medical care and hospitalization of civilian employees and their dependents in the Canal Zone; medical care of dependents of military personnel; and training of military personnel in medical specialties. It cost the Army $20,892,000 in 1959 for care of dependents of its military personnel in civilian hospitals and these costs are estimated at $16,286,000 in 1960 and $16,290,000 in 1961.

Provision is made for the operation in the continental United States of 47 hospitals and 81 dispensaries. The facilities and average daily number of patients is indicated in the following table:

MEDICAL FACILITIES AND PATIENTS

	1959 actual	*1960 estimate*	*1961 estimate*
Hospitals:			
Continental United States	51	48	47
Extracontinental	28	28	28
Patients in Army facilities:			
Active duty:			
Army	7,492	7,410	7,406
Other uniformed services	1,330	1,279	1,275
Dependents of uniformed personnel:			
Army	2,577	2,857	2,960
Other uniformed services	823	853	916
Retired:			
Army	359	396	416
Other uniformed services	102	114	132
Other categories of patients	598	672	686
Total average daily occupied beds	13,281	13,581	13,791
Total medical and dental outpatient treatments and examinations	25,828,000	26,833,000	26,896,000
Patients in other facilities:			
Active duty	1,279	1,297	1,297
Retired	162	178	183
Dependents of military personnel:			
In other Federal hospitals	503	547	552
In civilian hospitals	1,128	799	862

6. *Armywide activities.*—This includes the management and direction of the Army and finances the headquarters in Washington, D.C., and in the major field commands. These will operate at substantially the same level in 1961 as in 1960. Funds are provided for the worldwide communication network which contributes to operation and security of Army forces and furnishes administrative communications channels among the activities of the Army. The Army Intelligence program operates the attaché system, the Army Intelligence Center, and covers counterintelligence, and technical and field intelligence. Mapping and geodesy are accomplished to fulfill the Army's assigned responsibility for ground mapping throughout the world, with added emphasis being placed on the more precise maps and geodesy required in the missile age. Miscellaneous administrative services are also provided for the entire Army, ranging from records centers and the processing of military personnel to the education of dependents, and financial accounting and auditing. Some of the workload indicators for this activity are:

	1959 actual	*1960 estimate*	*1961 estimate*
Number of records and publications centers	10	10	10
Number of personnel centers	13	12	11
Number of dependents in school	62,481	66,500	75,105
Number of message groups handled (000,000 omitted)	21,955	22,080	22,223

7. *Army Reserve and Reserve Officers' Training Corps.*—This activity provides for training and administering the Army Reserve Forces, and includes the cost of reserve units at their local training centers and at summer camps. Workload is indicated below.

	1959 actual	*1960 estimate*	*1961 estimate*
Reservists in drill pay status (average number)	282,700	281,200	272,400
Number of Reserve Training Centers	1,653	1,723	1,758

The 1961 estimate includes funds for the procurement of equipment. None is planned to be acquired in 1960.

Funds are also included in 1961 for an average of 154,610 Reserve Officers' Training Corps students at civilian colleges and universities.

8. *Joint projects.*—This activity supports a variety of projects which provide services for all the military services, and for which the Army acts as executive agent. Included is the support of: (*a*) The National War College and the Industrial College of the Armed Forces, which prepare senior military officers and selected civilian personnel for high-level assignments within the national and international security structure; (*b*) the Armed Forces information and education program for the dissemination of educational material to troops of each service; (*c*) international activities to enhance national policy principally in the field of inter-American relations; (*d*) unified command headquarters in Europe and the Caribbean; and (*e*) specific classified activities. The increase in 1961 is for support of classified projects.

OPERATION AND MAINTENANCE, NAVY—Continued

Program and Financing—Continued

	1959 actual	1960 estimate	1961 estimate
New obligational authority:			
Appropriation	$2,575,515,900	$2,611,220,000	$2,550,000,000
Transferred to—			
"Operating expenses, National Archives and Records Service," General Services Administration (5 U.S.C. 630E)	−467,000		
"Salaries and expenses, Secretary of Defense" (5 U.S.C. 172f(a))	−525,000		
"Operation and maintenance, Army" (5 U.S.C. 172f(a))	−59,993	−110,000	
Appropriation (adjusted)	2,574,463,907	2,611,110,000	2,550,000,000

NOTE.—The 1959 activities for the following appropriations are reflected in these schedules for comparative purposes:
"Navy personnel, general expenses."
"Aircraft and facilities, Navy."
"Ships and facilities, Navy."
"Ordnance and facilities, Navy."
"Civil engineering, Navy."
"Medical care, Navy."
"Servicewide supply and finance, Navy."
"Servicewide operations, Navy."
"Naval petroleum reserves."

This appropriation finances the day-to-day costs of naval forces in being. It covers organizing, training, and preparing naval forces for the conduct of prompt and sustained combat operations in either general or limited war. The majority of these forces are assigned to unified and specified commands. These forces include carrier striking forces, submarine forces, antisubmarine forces, amphibious forces, and mobile logistic support forces. Included are the operations of ship-based aircraft, patrol land and seaplanes, and Marine Corps aircraft. These ships and aircraft are either deployed or in readiness to deploy to the potential trouble spots of the world.

While this appropriation provides for a smaller active fleet its strength will be augmented by two new *Forrestal* class carriers and several guided missile frigates and destroyers armed with Terrier and Tartar missiles. New supersonic attack bombers and missile equipped fighters will become operational. The program to modernize older ships is continued in 1961, providing an increased antisubmarine capability.

The lower obligations in 1961 in this appropriation are principally the result of the transfer to Navy procurement appropriations of capital equipment formerly financed in the appropriation. Offsetting these transfers in part are increased costs of more complex equipment, expanding programs such as the Polaris weapon system, the increased numbers of nuclear submarines, and the Federal civilian health insurance program.

This appropriation also finances the logistic support of antarctic operations and the seaward extension of the distant early warning line which provides early warning of enemy attack to the North American Continent.

This appropriation finances the day-to-day operation and maintenance costs of the supporting Shore Establishment which provides supply, overhaul, modernization, repair, and other services for the Active Forces.

1. *General expenses, Navy personnel.*—This activity finances the recruiting, training, and administration of military personnel of the Navy both Regular and Reserve. The individual and unit training in 146 naval training centers and schools includes recruit training and basic and advanced technical training in a wide spectrum of skills from boilerman to electronics and nucleonics. Additional training is carried on in over 65 civilian colleges and 458 Reserve training activities. The Naval Academy is financed by this activity to provide instruction for approximately 3,500 midshipmen for careers as naval or Marine Corps officers.

The magnitude of the Navy's training program may be gaged by the fact that approximately 56,000 officers and 270,000 enlisted personnel, Regular and Reserve, are given some form of professional education annually in military and civilian schools and colleges.

	1959 actual	*1960 estimate*	*1961 estimate*
Average naval strength	636,393	619,649	618,959
Average paid Reserve strength	133,590	136,102	128,797
Basic training (average load)	19,222	20,329	17,349
Service schools (average load):			
Officers	3,816	3,935	4,054
Enlisted	21,408	22,450	22,441
Naval Academy (average attending)	3,490	3,590	3,740
Civilian institutions (number attending)	921	992	1,143
Reservists in drill pay status (average number)	123,955	127,902	127,812
Number of Reserve training activities	479	469	458

2. *Weapons and facilities.*—In September of 1959 the Bureau of Naval Weapons was activated to develop and administer the missile and air programs of the Navy on a weapons system basis. The new organization was created from the merging of the Bureau of Ordnance and the Bureau of Aeronautics in accordance with recent legislation.

This activity provides for the operating costs of naval aviation, including naval air combat forces assigned to unified commands. Operations of both Navy and Marine Corps aviation, including Navy and Marine Air Reserve, are covered. Supporting costs include the costs of weapons systems rework and maintenance including aircraft, aircraft engines and components, missile systems such as Terrier, Tartar, Talos, Sidewinder, Bullpup, Sparrow, and Polaris, as well as nuclear warheads and other ordnance and ammunition necessary for the Navy's Active Forces. The Shore Establishment provides logistic support and includes naval air stations, naval ammunition depots and magazines, naval ordnance plants and other activities.

	1959 actual	*1960 estimate*	*1961 estimate*
Average operating aircraft:			
Regular	7,352	6,382	6,075
Reserves	973	814	786
Flying hours:			
Regular	3,054,605	2,880,347	2,812,722
Reserves	436,036	362,219	316,098
Aircraft reworks:			
Inservice facilities	2,873	2,900	3,331
By contract	622	684	674
Engine overhauls:			
Inservice facilities	10,420	9,027	8,413
By contract	12	907	435
Average aviation training load:			
Pilot	3,056	2,990	2,562
Technical	8,801	8,554	8,649
Tons ammunition received, stored, and issued	1,122,411	1,028,000	1,028,000

3. *Ships and facilities.*—This activity finances 817 ships of the active fleet and 95 vessels in the Naval Reserve training program. These ships are multipurpose forces designed to perform a variety of missions such as attack, amphibious, antisubmarine, and air defense operations. They are assigned to unified commands and other missions. Naval Reserve training ships and crews are being prepared to be capable of immediate deployment with the active fleet.

Funds are included to overhaul and modernize the fleet and to support various naval bases and other logistic support activities. Newer ships with complex nuclear, electronic, and missile systems as well as the increased

Federal Reserve Bank of St. Louis

costs of maintaining older ships account for certain increased costs in this activity.

	1959 actual	1960 estimate	1961 estimate
Number of ships (end of year)	860	817	817
Number of steaming hours (based on average number of ships)	2,152,000	2,133,000	2,039,000
Number of regular ship overhauls	360	375	341
Number of ships modernized	2	26	27
Number of major facilities	29	29	29
Number of Naval Reserve training vessels	95	95	95

4. *Medical care.*—This activity provides for medical care and hospitalization of Navy and Marine Corps personnel and their dependents, and care of the dead. It includes operation and maintenance of hospitals, dispensaries, dental clinics, and other medical facilities in the United States and overseas, instruction of medical personnel, and medical care of military personnel and their dependents in localities where Navy facilities are not available. Obligations for care of dependents in civilian hospitals in 1959 were $25,950,000 and obligations are estimated at $24,354,000 in 1960 and $22,576,000 in 1961. These activities are shown in the following table:

MEDICAL FACILITIES AND PATIENTS

	1959 actual	1960 estimate	1961 estimate
Hospitals:			
Continental United States	39	38	38
Extracontinental	17	17	17
Patients in naval facilities:			
Active duty:			
Navy and Marine Corps	8,773	8,728	8,428
Other uniformed services	959	891	888
Dependents of uniformed personnel:			
Navy and Marine Corps	1,467	1,643	1,757
Other uniformed services	319	376	380
Retired:			
Navy and Marine Corps	561	561	574
Other uniformed services	87	93	100
Other categories of patients	643	666	665
Total average daily occupied beds	12,809	12,958	12,792
Total medical and dental outpatient treatments and examinations	19,006,645	19,717,280	19,724,300
Patients in other facilities:			
Active duty	781	786	773
Retired	107	108	115
Dependents of military personnel:			
In other Federal hospitals	469	461	500
In civilian hospitals	1,242	1,088	1,057

MEDICAL PERSONNEL IN TRAINING (MAN-YEARS)

In medical department schools	2,127	1,928	1,967
In naval hospitals and other medical facilities	1,448	1,577	1,569
In civilian institutions	236	249	246
Total	3,811	3,754	3,782

5. *Civil engineering.*—This activity finances civil engineering services for the Naval Establishment. Six public works centers are operated in areas where several naval facilities are located. These provide plant maintenance, utilities, transportation, and other services. Engineering services are provided for the Navy in such matters as long-range construction planning and contract administration of repair and utility contracts.

The Seabee forces are financed by this activity and comprise 15 construction battalion units for support of the operating forces. Four bases from which antarctic operations are conducted are operated by the Seabees.

	1959 actual	1960 estimate	1961 estimate
Number of housing units maintained	20,478	23,527	25,506
Value of nonpassenger vehicles and construction equipment	$57,950,000	$47,812,000	$47,812,000
Number of Seabee battalions	15	15	15
Number of active duty Seabees	7,510	7,513	7,318
Value of contracts administered	$47,100,000	$50,000,000	$50,000,000

6. *Servicewide supply.*—This activity encompasses the major active supply support, both continental and overseas, for naval ships and aircraft. Its workload is directly responsive to fleet, air, and shore station operations and is performed by 37 supply outlets. Planning and programing for this support, including procurement and requirements determinations, is accomplished by 12 supply demand control points. These supply demand control points are responsible for the inventory management and the transportation of materials under their cognizance in the Navy supply system. In addition to the above control points, this activity includes the maintenance and operating costs for the Military Medical Supply Agency and the Military Petroleum Supply Agency. These agencies manage total Department of Defense inventories of their respective commodities.

Special programs such as the purification of inventories will continue in 1961. A summary of workload data specifically related to these programs follows:

	1959 actual	1960 estimate	1961 estimate
Number of supply outlets	37	37	37
Number of inventory control points	14	14	14
Number of supply actions	19,096,400	18,945,500	18,697,300
Number of tons received	3,028,600	3,004,700	2,965,300
Number of tons shipped	2,956,100	2,932,700	2,894,300
Average number of tons in storage	8,976,900	8,906,000	8,789,300

7. *Servicewide operations.*—This activity finances the Office of the Secretary of the Navy and the Office of the Chief of Naval Operations. These offices perform operational planning, coordination of research, and business management. In addition, the Office of Chief of Naval Operations manages naval stations, the naval communications system, the Hydrographic Office, and the Naval Observatory.

	1959 actual	1960 estimate	1961 estimate
Number of naval stations	15	15	15
Number of communication facilities	19	19	21

8. *Naval petroleum reserves.*—This activity provides for Navy's share of operating and production costs in Naval Petroleum Reserve No. 1 (Elk Hills Field) in California under the unit plan contract with the Standard Oil Co. of California; supervision of oil and gas leases on Navy's lands in Naval Petroleum Reserve No. 2 (Buena Vista Hills Field) in California; closeout of the protective drilling and production program on Naval Petroleum Reserve No. 3 (Teapot Dome Field) in Wyoming; investigation of mining claims on Naval Oil Shale Reserves Nos. 1 and 3 in Colorado; and administration of the reserves including the hire of petroleum consultants.

	1959 actual	1960 estimate	1961 estimate
Number of barrels of oil reserves	886,490,000	880,490,000	874,490,000
Income from oil leases (deposited in the general fund of the Treasury)	$10,996,339	$14,000,000	$14,000,000

New obligational authority	172,959,000	175,850,000	176,000,000
New obligational authority:			
Appropriation	$173,117,000	$175,850,000	$176,000,000
Transferred (5 U.S.C. 172f(a)) to—			
"Operation and maintenance, Army"	−128,000		
"Salaries and expenses, Secretary of Defense"	−30,000		
Appropriation (adjusted)	172,959,000	175,850,000	176,000,000

General.—This appropriation supports the training and operational readiness of the ground elements of the Atlantic and Pacific Fleet Marine Forces, including three combat divisions and related support units. The Fleet Marine Forces are components of the Pacific and Atlantic Fleets assigned to unified commands. The operations of three Marine air wings included in the Fleet Marine Forces are financed primarily by the Operation and maintenance, Navy, appropriation. Other operating units supported by this appropriation are security forces guarding naval and Marine Corps bases, U.S. embassies, and certain classified facilities.

1. *Training and operations.*—The training objectives of the Fleet Marine Forces will stress the vertical envelopment doctrine in amphibious operations by two major division-wing exercises, 7 exercises at regimental combat team-air group level and 25 exercises at battalion landing team level. These training objectives are supported through recruitment and training of military personnel and operation of four major combat unit support bases, two recruit depots, and one school. During 1961, two battalions equipped with the Hawk missile will be activated as components of the Fleet Marine Forces for improved protection in the field against low-level air attack.

Significant workload data for this activity are:

	1959 actual	*1960 estimate*	*1961 estimate*
Divisions	3	3	3
Fleet Marine Forces (average military personnel)	97,375	90,021	94,709
Security forces (average military personnel)	12,426	12,945	12,797
Recruit training (average load)	12,533	11,413	8,601
Other training:			
Officer	1,401	1,526	1,059
Enlisted	8,590	6,650	4,390

Digitized for FRASER

Federal Reserve Bank of St. Louis

2. *Depot supply system.*—This activity includes overhaul of major equipment and preservation of materiel and receipt, issue, and storage of materiel to support combat forces. Major equipment repair is programed on the basis of scheduled rotation of end items in the hands of troops to insure materiel readiness and to achieve a workload compatible with manpower and plant capacity. The workload of the supply activity is more directly responsive to the level of operations of the combat forces. Programing and planning for this logistic support is accomplished at the Marine Corps Supply Activity, Philadelphia, and receipt and issue functions are accomplished at two major supply centers.

Workload data specifically related to the supply activity follow:

	1959 actual	*1960 estimate*	*1961 estimate*
Number of tons received	105,273	115,300	130,400
Number of tons shipped	120,861	117,000	129,000

4. *Marine Corps Reserve training.*—This activity finances training of Marine Corps Reserve units including personnel support, maintenance and operation of Reserve armories and other training facilities, and Marine Corps furnished supplies and equipment for ground and aviation units.

Significant workload data for this activity follow:

	1959 actual	*1960 estimate*	*1961 estimate*
Reservists in drill pay status	44,859	45,000	45,000
Number of Reserve training centers	228	225	225

Appropriation (adjusted)	4,119,041,334	4,193,932,000	4,282,000,000

This appropriation finances the day-to-day expense of Air Force operational units and activities. It provides the means whereby the military personnel, capital equipment, and physical plant financed by the other appropriations to the Air Force are brought together to produce a significant portion of the defense of the United States.

The forces and units of the Air Force continue to undergo significant changes during 1961. A great deal of this change is generated by the continued activation of ballistic missile units and further augmentation of aircraft units with air-launched missiles.

The funds estimated for this appropriation will support a combat force structure of 91 wings on June 30, 1961, 5 fewer than at the end of 1960. This force will be manned by an average active duty military personnel strength of 823,451 in the fulfillment of Air Force responsibilities in support of unified and specified combatant commands. Approximately 7,500 fewer civilian personnel are being programed in 1961.

The strategic force will include an additional wing equipped with the B–52 heavy bomber as well as significant increases in the number of B–52 wings augmented with the Hounddog and Quail air-to-ground missiles. There is further introduction of the supersonic B–58 into medium bomber units, which are being reduced by four wings of the older B–47 in 1961. The greater reliance upon missiles is exemplified by an increase in the number of operational Atlas ballistic missile squadrons and the activation of the first squadron equipped with the Titan missile.

Tactical units overseas in support of U.S. commitments will be strengthened by equipping them with the advanced F–105 fighter-bomber during 1961. Total tactical wings will remain the same throughout the year.

In the air defense field, improved models of the Bomarc interceptor missile will be in operational squadrons for the first time in 1961. Additional squadrons of manned interceptors will be equipped with the F–106 in lieu of older model aircraft. Accompanying these improvements will be a net reduction of five air defense squadrons. The electronic air defense network will be enhanced by the addition of six semiautomatic ground environment (SAGE) centers. The first ballistic missile early warning (BMEWS) station and the Greenland extension of the distant early warning (Dewline) will become operational.

1. *Aircraft fuel and oil.*—The lower amount for aircraft fuel and oil in 1961 is a direct reflection of the changes in manned combat wings. These changes are also reflected in the average operating aircraft and flying hours as follows:

	1959 actual	*1960 estimate*	*1961 estimate*
Average operating aircraft:			
Regular Air Force	14,701	14,111	12,839
Air Force Reserve	645	724	776
Aircraft flying hours:			
Regular Air Force	6,657,003	6,334,398	6,053,584
Air Force Reserve	201,135	172,318	164,735

These flying hours provide for the training of strategic, tactical, and defense units as well as of individuals for later assignment to flying units. In 1961, the flying hours financed by this budget activity will enable Strategic Air Command crews to undergo indoctrination training in airborne alert operations.

2. *Logistic support.*—The introduction of new weapons systems into the Air Force inventory, expansion and sophistication of our communication and warning networks and the need for a logistic system capable of immediate response all contribute to the increased fund requirement in 1961.

The installation of communications and electronics equipment financed by this budget activity account for a major portion of the increase. Such equipments include those used for air defense as part of the SAGE, BMEWS and Dewline systems and launch, control, and communications components for operational ballistic missile sites.

Evolutionary changes in major maintenance of equipment also contribute to the increase estimated for 1961. The many additional operating electronic equipments throughout the Air Force throws a greater load of this type upon the depots than had been the case in the past. The increase in operational missile units and missile inventory is accompanied by a growing maintenance capability on the part of Air Force depots. Current concepts call for maintaining missile components in depot facilities, rather than by evacuating the missile itself away from its operational site. If the complete missile requires depot level maintenance, it will be largely done through the assistance of teams dispatched from the depot to the site. While the Air Force capability is increasing in this respect, heavy reliance for missile maintenance will continue to be placed on contractors during 1961. The maintenance of aircraft is also undergoing a trend away from work on the complete article toward overhaul of major components and toward increased work at the bases by depot teams.

While there is little additional cost, the 1961 estimate provides for improved administration of Air Force contracts through greater training and a lower workload on each administrator. The expected benefits of this improvement will be felt in subsequent years.

A program was initiated several years ago to improve the Air Force logistic system by relocating supply activities from several of the depots not having maintenance facilities, to the larger depots which had them. This action will result in the inactivation of four depots in the United States during 1961.

The civilian personnel man-years which operate the logistic system decline from 167,511 in 1959 to 162,074 in 1960 with a further reduction to 157,307 programed for

Federal Reserve Bank of St. Louis

1961. The following reflects a fiscal year comparison of workload in the logistic support program:

	1959 actual	1960 estimate	1961 estimate
Dollar value of depot-level maintenance:			
In depots	$422,173,258	$399,665,000	$401,681,000
By contract	$325,625,460	$296,537,000	$310,065,000
Number of supply depots	17	17	13
Number of inventory control points	14	14	10
Number of supply actions	37,291,650	34,800,000	34,100,000
Number of tons received in U.S. depots	837,140	913,195	845,325
Number of tons shipped by U.S. depots	925,262	1,077,205	1,104,675
Average tons in covered storage	7,564,012	6,776,875	6,641,940

3. *Training support.*—The changes in forces and equipage of the Air Force in 1961 are causing significant changes in training. The following is a comparison of student loads or input at the various types of activities where training is conducted:

	1959 actual	1960 estimate	1961 estimate
Basic military and technical training (average training load)	36,130	44,539	40,457
Service schools:			
Advanced technical training (average training load)	4,658	5,128	5,000
Air University (average training load)	2,815	3,089	2,994
Air Force Academy (beginning year cadet load)	1,173	1,586	1,938
Civilian institutions (input)	3,985	4,469	4,439
Factory training (average training load)	1,649	1,767	1,333
Flying training (average training load):			
Primary pilot training	1,664	1,594	1,674
Basic pilot training	1,446	1,332	1,446
Other flying training	3,808	4,227	3,695
Reserve training:			
Reservists in pay status (average strengths)	59,117	66,260	70,260
Number of training centers	82	82	82

Training workloads reflect reductions in military strength and continuing emphasis on missile training. One example of such a change shown in the table is the further decrease in flying training. This decrease permits a reduction of one primary and one basic pilot training base by June 30, 1961. In addition, two basic pilot training bases will convert to contract operation in 1961. Actual flight instruction at these two bases will continue to be given by military instructors.

The increased number of reservists in 1961 is due to continued Air Force efforts to fill Reserve training units to their authorized strengths. These units are assigned a mobilization mission and train toward accomplishing it. Flying hours which will be allocated to Reserve flying units for their training are indicated above under Aircraft fuel and oil. Individual reservists receive their training through the Reserve training centers or from organizations to which they have a mobilization assignment.

4. *Operational support.*—This program supports the day-to-day operating requirements of (*a*) the combat commands and the several support commands, (*b*) SAGE, (*c*) Dewline, (*d*) BMEWS, (*e*) ballistic missile squadrons and several classified operations overseas. The support provided applies to the units, their equipment (base-level maintenance) and their bases and is the means whereby they become and remain operationally ready. The transition from manned aircraft to missiles and further expansion of the ground air defense systems also has a significant impact on this budget program during 1961. In addition to the increase in the number of SAGE centers becoming operational, four additional Dewline sites and 31 gap filler radar sites will be activated during 1961. Support is also required for the various sites where ballistic missile squadrons are being activated.

Another factor affecting operating cost is the increase in the number of family quarters located on, or adjacent to, the operational bases from 84,538 in 1960 to 100,697 in 1961.

Although the overall civilian man-years in the Operation and maintenance appropriation are being reduced approximately 8,000 below the 1960 level, the personnel in this budget program will be retained at approximately the 1960 level. This is in keeping with the philosophy of providing support to the combat forces on a priority basis.

5. *Medical support.*—This activity covers (*a*) operation of medical treatment facilities in the United States and overseas; (*b*) medical care and hospitalization of Air Force personnel and dependents where Air Force medical facilities are not available; (*c*) medical care and hospitalization for civilian employees and dependents by the Canal Zone Government; and (*d*) training military personnel in medical specialties. It cost the Air Force $31,853,000 in 1959 for care of dependents of its military personnel in civilian hospitals and these costs are estimated at $27,816,000 in 1960 and $31,483,000 in 1961. Selected medical workloads are shown in the following table:

MEDICAL FACILITIES AND PATIENTS

	1959 actual	1960 estimate	1961 estimate
Hospitals:			
Continental United States	93	95	94
Extracontinental	40	38	37
Patients in Air Force facilities:			
Active duty:			
Air Force	4,955	4,773	4,695

6. *Servicewide support.*—The operation of Headquarters, U.S. Air Force, and all major command headquarters; Air Force wide leased communication systems; air attaché and mission offices, and intelligence efforts are financed from this budget program.

The program for the several headquarters contemplates a reduction in civilian personnel from 16,721 in 1959 to 15,329 in 1961. This is a proportionately greater reduction than that for operational units and activities.

The very substantial increase in this program in 1961 is directly attributable to requirements for leased commercial communication circuits to effectively support the more advanced air defense and retaliatory systems. This communications complex meets requirements related to the progress being accomplished in the implementation of the SAGE and ballistic missile early warning programs and command and control of our strategic, defense, tactical and related support forces. It is through this mechanism that these forces are alerted, launched, controled, diverted, refueled, or recalled. Improved systems to be in operation in 1961 will enhance the dissemination of weather and flight formation in support of airborne operations and increase the speed of logistical data flow between the forces and depots.

7. *Contingencies.*—This program provides for extraordinary expenses as approved by the Secretary of the Air Force and accounted for solely on his certificate.

The 1961 program will provide maintenance and operation support for approximately 4,500 units, the same level as in 1960 except for the Army air defense program. The Army National Guard air defense program provides for 20½ battalions onsite at the end of 1961 compared to the 15½ battalions at the end of 1960. The air defense program is increasing as a result of Army National Guard air defense units assuming the operational control of missile sites formerly occupied by the Active Army. Funds provide for the training and operating expenses of Army National Guard missile battalions as part of the air defense of the United States and includes 4,282 State civilian employees (technicians) to maintain and secure missile onsite positions and equipment in a continued state of operational readiness.

The program also provides for employment of 182 civilians in the National Guard Bureau and 16,969 State civilian employees (technicians) for the administration of the 4,500 units and maintenance and repair of equipment and operation of State and Federal field training camps.

NATIONAL BOARD FOR THE PROMOTION OF RIFLE PRACTICE, ARMY—Continued

The National Board for the Promotion of Rifle Practice continues to promote the American tradition of interest in small arms marksmanship. It provides assistance to 4,520 rifle clubs and schools with 249,429 members. This assistance includes the loan and repair of rifles and equipment; free issue of targets and supplies for use in marksmanship practice; and the free issue of trophies, medals, and badges for marksmanship. Funds are provided to partially defray the travel expense of State civilian shooting teams to the national matches.

The program is augmented by ammunition, purchased with funds provided under other appropriations, for free issue to members of rifle clubs and to competitors at national, regional, and State competitions.

Appropriation	6,272,100	6,351,000	7,000,000

The Alaska Communication System provides telegraph and long distance telephone service for Alaska. Although legislation to authorize the sale of the system has been proposed to Congress, its disposition is not anticipated until after 1961. Pending sale of the system, no extensive expansion of its facilities is planned. Limited capital improvements resulting from increased requirements for service are being undertaken in 1960 and 1961.

The amount appropriated provides for all expense incident to the normal maintenance and operation of the system and equipment modernization except for costs of compensation of military personnel assigned.

Revenue from commercial customers was $4.2 million in 1959 and is estimated at $4.5 million for 1960 and $4.6 million for 1961. Except for limited amounts to finance capital improvements, this revenue is deposited to miscellaneous receipts of the Treasury.

NOTE.—The 1959 activity for the appropriation "Salaries and expenses," Office of Public Affairs, is reflected in these schedules for comparative purposes.

The Secretary of Defense serves as the principal assistant to the President on all matters relating to the Department of Defense, which operates under his direction, authority, and control. He is assisted in his immediate office by the Deputy Secretary of Defense, the director of defense research and engineering, seven assistant secretaries of Defense, the general counsel, and such special assistants as are required to advise him in specialized fields. Military advice and assistance is provided by the Joint Chiefs of Staff.

The program provides for the staffs of the Secretary and his principal assistants. These activities will continue at substantially the same level as achieved in 1960 in accordance with the provisions of the Department of Defense Reorganization Act of 1958. The essential implementing actions required by this act have been completed. The newly established organizational relationships and administrative procedures remain under continuous review to assure that the objectives of the reorganization are realized.

Appropriation (new obligational authority)	16,520,000	16,500,000	16,575,000

This appropriation provides for the payment of all noncontractual claims against the Department of Defense. The estimate represents the consolidated requirements of the Office of the Secretary of Defense and the Army, Navy (including the Marine Corps), and Air Force. The funds required for this purpose in 1961 are expected to be approximately the same as appropriated for 1960.

CONTINGENCIES, DEPARTMENT OF DEFENSE

For emergencies and extraordinary expenses arising in the Department of Defense, to be expended on the approval or authority of the Secretary of Defense and such expenses may be accounted for solely on his certificate that the expenditures were necessary for confidential military purposes, [$15,000,000] *$30,000,000: Provided,* That a report of disbursements under this item of appropriation shall be made quarterly to the Appropriations Committees of the Congress. Financing:			
Unobligated balance no longer available	4,303		
Appropriation (new obligational authority)	405,200	425,000	425,000

The U.S. Court of Military Appeals serves as the court of last resort for all of the more serious court-martial convictions of military personnel. The number of cases docketed in 1959 totaled 1,336. Based on the first 5 months of operation, a slight decrease in this latter total is anticipated for this year. The number of opinions released by the court totaled 192 in 1959 and it is estimated that a similar number will be published during 1960.

The court is maintaining a current docket with the review completed, as of November 30, 1959, in 13,687 out of 13,836 cases filed since the court's establishment in 1951 leaving a balance of 149 under review.

Allocations Received by Department of Defense From Other Accounts

Note.—Obligations incurred under allocations from other accounts are shown in the schedules of the parent appropriations, as follows:

"Salaries and expenses," Office of Civil and Defense Mobilization.
"Civil defense procurement fund," Office of Civil and Defense Mobilization.
"Research and development, "Office of Civil and Defense Mobilization.
"Mutual security," funds appropriated to the President.
"Operating expenses," Atomic Energy Commission.
"Plant acquisition and construction," Atomic Energy Commission.
"Research and development," Federal Aviation Agency.
"Salaries and expenses," National Aeronautics and Space Administration.
"Research and development," National Aeronautics and Space Administration.
"International Geophysical Year," National Science Foundation.
"Acquisition and construction of radio facilities," United States Information Agency.
"Plant and equipment," National Bureau of Standards, Department of Commerce.
"Refunds, transfers, and expenses of operation, Puerto Rico," Bureau of Customs, Treasury Department.
"Acquisition, construction, and improvements," Coast Guard, Treasury Department.

PROCUREMENT

The procurement appropriations of the Department of Defense finance the acquisition of capital equipment, such as aircraft, missiles, ships, combat vehicles, weapons, and communications; major items of support for the capital equipment when it is in service; the industrial facilities necessary to produce that equipment; and major modification of older equipment where feasible to provide a means of modernization in lieu of buying new equipment. The capital equipment financed by these appropriations is either procured from private contractors or produced in Government arsenals, shipyards, and plants.

The 1960 budget reflected a change in appropriation coverage whereby a substantial portion of the amounts formerly included in procurement appropriations for development, test, and evaluation support were shifted to the research, development, test, and evaluation appropriations. The estimates for 1961 contemplate a further refinement of the content of these appropriations. The remaining items in procurement appropriations identified as development, test, and evaluation support in the 1961 budget are shown separately from the amounts for procurement of items for service use or inventory.

In addition to these Department of Defense-wide changes, Navy appropriations have been realined to meet recent organizational changes made in establishing the Bureau of Naval Weapons. The former appropriations, Aircraft and related procurement, Navy, and Procurement of ordnance and ammunition, Navy, have been realined into two new appropriations: Procurement of aircraft and missiles, Navy, and Other procurement, Navy. The latter appropriation also includes substantial amounts for procurement of capital equipment previously financed in the Operation and maintenance, Navy, and Shipbuilding and conversion, Navy, appropriations.

The 1961 procurement program of the Department of Defense continues the large scale procurement and production of new weapons in support of the basic military missions of the armed services. Direct obligations, adjusted for comparability with the new obligational authority and expenditures for procurement and production, are estimated as follows:

PROCUREMENT AND PRODUCTION

[In millions]

	For service use or inventory			*For development, test, and evaluation support*			*Total*

New obligational authority	1,711,548,000	1,407,300,000	1,337,000,000
New obligational authority:			
Appropriation	$1,669,338,000	$1,407,300,000	$1,337,000,000
Transferred from "Salaries and expenses, Advanced Research Projects Agency, Department of Defense" (72 Stat. 711)	42,210,000		
Appropriation (adjusted)	1,711,548,000	1,407,300,000	1,337,000,000

This appropriation provides the major items of equipment needed to support approved Army forces in performing their assigned mission to meet successfully both atomic and non-atomic requirements of limited and general war. In addition, this appropriation provides production facilities to accelerate rates of production during periods of mobilization.

In 1961, the Army plans to obligate $1,524 million of appropriated funds as compared to $1,388 million and $1,097 million for 1960 and 1959, respectively. With these funds, the Army plans to continue to modernize its combat equipment inventory. Funds provided to the Army have been allocated as follows:

[In millions]

	1959 actual	*1960 estimate*	*1961 estimate*
Firepower	$703.7	$759.3	$876.7
Mobility	105.4	296.8	331.3
Communications—Electronics	110.6	168.7	168.5
Logistical support	177.2	162.8	147.5
Total direct obligations	1,096.9	1,387.6	1,524.0

In addition to new funds appropriated directly for procurement, sales of equipment from stock which do not require replacement in kind provide a source of financing for procurement to modernize Army inventories. While this turnover does not augment the dollar value of the total inventory, it does result in an improvement in the balance among inventory levels for specific items. In addition, the sale of equipment from stock which provides funds to replenish the item inventory further assists in modernizing the Army's inventories by providing a newer model of equipment to replace an older asset.

Firepower.—The 1961 program will continue to produce: the new medium tank providing greater firepower, range, and crew protection; the new lightweight rifle and the new machinegun using the NATO standard ammunition; and the new Davy Crockett system to be used by combat infantry units. A new family of self-propelled field artillery weapons which will provide combat forces with increased firepower, range, and mobility over current equipment is in the final stages of development and will be procured.

The surface-to-air missile program continues to support the air defense mission assigned to the Army and to increase the capability in the Nike-Hercules missile system. Production of the Hawk missile system will continue, and is intended to provide an effective defense against low altitude aircraft and air-breathing missiles. A shoulder-fired guided missile system (Redeye), designed to arm small combat units against low altitude enemy aircraft will be procured in 1961.

The surface-to-surface missile program provides training equipment and missiles for an early operational capability for Pershing, a modern, solid-fueled successor to Redstone. Production will continue for the solid-fueled Sergeant, the Lacrosse, and the improved Honest John and Little John rockets to provide units from Division to Field Army level with an effective missile delivery capability. The new antitank missile system will be produced to provide a reliable and effective means for ground forces to combat enemy armored vehicles.

Mobility.—Effectiveness, even survival on the modern battlefield is dependent upon the ability of ground forces to remain mobile. To provide combat forces with greater battlefield mobility, production of new armored personnel carriers incorporating increased cruising range will be continued. Approximately 18,000 tactical trucks for use in supply and support functions in combat and other areas will be procured to meet the pentomic field army's need for increased mobility. The new tank recovery vehicle will continue in production to provide a rapid and effective means to return combat-damaged tanks to rear echelons for repair.

Aerial mobility contines to receive emphasis to meet the Army's need for battlefield surveillance, troop movement, and rapid logistical support for combat forces. Aircraft programed for procurement total 219 and include Mohawk, a twin engine observation airplane designed for battlefield surveillance and aerial photography; the Caribou, a twin engined transport aircraft to be used in combat zone resupply, transportation of troops, and emergency aeromedical evacuation; Iroquois, a utility helicopter, for the transportation of personnel, special teams and equipment and supplies, and medical evacuation; and the medium transport helicopter, Chinook, designed to carry 32 passengers or 6,000 pounds of normal cargo.

Communications—electronics.—In the area of communications and electronics the major effort is directed toward providing the Army with swift, accurate, target surveillance equipment and light, rugged and mobile, communications equipment to achieve the high degree of mobility and dispersion dictated by modern weapons. For these purposes the 1961 program provides for the procurement of surveillance and navigational equipment for Army aircraft, the additional procurement of a new surveillance drone system, and the modernization and replacement of

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

combat radio, telephone, teletype communication and control equipment. Provision is also made for the third increment of a continuing program for the improvement of the missile-master air defense system to insure compatibility with the semi-automatic ground environment (SAGE) system of the North American Air Defense Command.

Logistics support.—Included in this category are items to build and maintain the support roads and airfields which are directly related to the mobility of combat forces. To improve the Army's logistical capability in over-the-beach operations, procurement of the new amphibious lighter as well as the rough terrain fork lift truck is planned. Production of the new mobile assault bridge is planned to provide advancing armored and infantry forces with a means for rapidly crossing inland waters. A variety of generators is planned for continued procurement to provide combat forces with electrical power to operate missile sites and radar stations, as well as for lighting and other uses where local power will not be available.

Machine tools necessary to support production programs will continue to be modernized. Arsenals will continue to be modernized to enable these facilities to meet production and development programs which may be placed with them. The 1961 program continues to support projects which will lead to conservation of critical materials, improvements in production techniques, and the development of mass production methods for new items planned for production.

Procurement of Aircraft and Missiles, Navy

For construction, procurement, production, modification, and modernization of aircraft, missiles, equipment, including ordnance, spare parts, and accessories therefor; specialized equipment; expansion of public and private plants, including the land necessary therefor, without regard to section 3734, Revised Statutes, as amended, and such lands, and interest therein, may be acquired, and construction prosecuted thereon prior to approval of title by the Attorney General as required by section 355, Revised Statutes, as amended; and procurement and installation of equipment, appliances, and machine tools in public or private plants; $2,113,000,000, to remain available until expended: Provided, That during the current fiscal year there may be merged with this appropriation such amounts of the unobligated balances of appropriations previously granted for "Aircraft and related procurement" and "Procurement of ordnance and ammunition", as the Secretary of Defense may determine to be necessary for the accomplishment of the programs for which this appropriation is made. (10 U.S.C. 5012, 5031, 7201, 7341; 31 U.S.C. 718.)

Estimate 1961, [a] **$2,113,000,000**

[a] Estimate is for activities previously carried as follows:

"Aircraft and related procurement, Navy"	$1,781,000,000
"Procurement of ordnance and ammunition, Navy"	330,000,000
"Operation and maintenance, Navy"	2,000,000

Program and Financing

Total obligations			1,624,224,000
Financing:			
Unobligated balance transferred from—"Aircraft and related procurement, Navy" (1961 appropriation act)			−195,000,000
"Procurement of ordnance and ammunition, Navy" (1961 appropriation act)			−1,000,000
Advances and reimbursements from other accounts			−24,500,000
Unobligated balance carried forward			709,276,000
Appropriation (new obligational authority)			2,113,000,000

This appropriation finances the procurement of 658 new aircraft, guided missiles, and supporting equipment for the Navy and Marine Corps. It also provides for necessary safety-of-flight and operational modifications to service aircraft as well as the procurement of drones and major flight and maintenance training simulators. Aircraft, missiles, and their support equipment provided for in this appropriation have been consolidated for 1961 from the appropriations Aircraft and related procurement, Navy, and Procurement of ordnance and ammunition, Navy. The funds requested permit carrying out a program costing $2,333.5 million.

1. *Aircraft and related equipment.*—This activity finances procurement of new aircraft to support 16 attack carrier air groups; 11 carrier based antisubmarine warfare groups; 30 antisubmarine warfare land and seaplane squadrons; 11 patrol, reconnaissance, lighter-than-air and warning squadrons; and 3 Marine air wings; together with their supporting components and spare parts; the cost of modifying and modernizing inservice aircraft; and other related items such as aircraft production tools and equipment, and aircraft training equipment for simulating operational, tactical, and maintenance problems. Procurement requirements for new aircraft are based on projected aircraft operating programs and replacement of losses caused by attrition and obsolescence. The 1961 procurement program consists of additional quantities of

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

PROCUREMENT—Continned

Current authorizations—Continued

Procurement of Aircraft and Missiles, Navy—Continued

aircraft currently in production. The strike capability of the fleet will be increased by the quantities of light attack aircraft and low-level attack aircraft programed for procurement in 1961. Expanded production of supersonic heavy attack aircraft will greatly augment this capability. Carrier task force defense is provided by the continued procurement of supersonic fighter models now in production and increased quantity procurement of an improved all-weather fighter. To fill vital antisubmarine, airborne early warning, and other operational requirements, the Navy will continue production of improved models of turboprop patrol aircraft, search aircraft, utility and antisubmarine warfare helicopters, and a Marine tanker-cargo assault aircraft. The 1961 program for modernization of fleet aircraft places primary emphasis on the installation of the most modern and effective antisubmarine search and detection equipment available and the incorporation of mandatory operational and safety-of-flight improvements. In addition, advanced countermeasures equipment will be placed in operational aircraft.

2. *Missiles, drones, and related equipment.*—The procurement of all Navy missiles for fleet outfitting and training is financed under this activity. Related projects such as powered and unpowered target procurement, antisubmarine drone procurement, and missile industrial facilities also financed under this activity are programed at minimum levels. The funds requested for the production of guided missiles will allow a small improvement in the material readiness position of the Navy. The 1961 program provides for continued delivery of air-to-air Sidewinder (an improved model) and Sparrow missiles and air-to-surface Bullpup missiles to fleet squadrons and training commands. It continues the integration of ship-launched Tartar, Talos, and Terrier missiles into the active fleet in consonance with the construction and conversion of vessels with guided missile capability and provides for the procurement of Polaris missiles for the fleet ballistic missile submarines.

3. *Development, test, and evaluation support.*—This activity pays for that portion of the total production of aircraft, missiles and other equipment used during the final stages of test and evaluation.

Unobligated balance carried forward	1,100,633,697	746,292,818	1,014,820,708
Appropriation (new obligational authority)	2,069,400,000	1,330,700,000	2,032,000,000

This appropriation provides for ship construction and conversion programs authorized subsequent to 1951, including machinery, conventional and nuclear propulsion systems, electrical systems, gun, torpedo, and missile armament, communications equipment, and electronic detection, countermeasures, and tactical data systems.

The 1961 shipbuilding program includes 20 new ships and 15 conversions. As in prior years, major emphasis is placed on a versatile fleet composed of ships which are suited to a wide variety of possible missions through the exploitation of proven technological advances in hull design, propulsion, weaponry and electronics. Thus, a conventionally powered attack aircraft carrier, three guided missile frigates, two guided missile destroyers, three nuclear antisubmarine warfare submarines, and two fast underway replenishment ships account for over half the 1961 ship program. Strike forces made up of these ships are adaptable to both limited and all-out nuclear war.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

Three Polaris missile-firing submarines, which serve as deterrents to all-out nuclear war, account for one-fifth of the program. Limited war readiness will be improved by construction of 2 escort vessels and 1 amphibious transport, dock, and 14 antisubmarine warfare conversions of World War II destroyers. Research and experimental ships in the 1961 program include one oceanographic research ship, further conversion of the experimental submarine *Albacore* and new construction of an experimental deep diving submarine and an escort research ship. Approximately half the 1961 shipbuilding program will contribute significantly to antisubmarine warfare capability.

This budget provides for initiation of a new policy in financing shipbuilding programs. Recent practice has been to estimate ship costs initially at current value and to provide for increases over the initial cost estimates by requesting additional funds in subsequent years or by reducing shipbuilding programs. In this budget, construction and conversion costs represent the full amount required to complete all ships in 1961 and prior years' programs, allowing for growth factors such as design and characteristics changes which can reasonably be expected to affect costs during long construction and conversion periods.

In 1961, shipbuilding administrative expenses, formerly included in this appropriation, are provided for in Operation and maintenance, Navy. In addition, major electronics procurement primarily associated with the ship improvement program is transferred to the appropriation Other procurement, Navy.

OTHER PROCUREMENT, NAVY

For procurement, production, and modernization of support equipment, and materials not otherwise provided for; Navy ordnance and ammunition (except ordnance for new aircraft, new ships, and ships authorized for conversion); purchase of not to exceed one thousand and forty-five passenger motor vehicles (including ten at not to exceed $2,900 each) for replacement only; expansion of public and private plants, including the land necessary therefor, without regard to section 3734, Revised Statutes, as amended, and such lands, and interest therein, may be acquired, and construction prosecuted thereon prior to approval of title by the Attorney General as required by section 355, Revised Statutes, as amended; and procurement and installation of equipment, appliances, and machine tools in public or private plants; $434,000,000, to remain available until expended: Provided, That during the current fiscal year there may be merged with this appropriation such amounts of the unobligated balances of appropriations previously granted for "Aircraft and related procurement", "Procurement of ordnance and ammunition", and "Shipbuilding and conversion", as the Secretary of Defense may determine to be necessary for the accomplishment of the programs for which this appropriation is made. (5 U.S.C. 78; 10 U.S.C. 5012, 5031; 31 U.S.C. 718.)

Estimate 1961, [a] **$434,000,000**

[a] Estimate is for activities previously carried under appropriations as follows:

"Operation and maintenance, Navy"	$171,533,000
"Aircraft and related procurement, Navy"	46,000,000
"Shipbuilding and conversion, Navy"	119,467,000
"Procurement of ordnance and ammunition, Navy"	97,000,000

Unobligated balance carried forward			25,793,178
Appropriation (new obligational authority)			434,000,000

This appropriation represents a consolidation of all major procurement other than ships, aircraft, and guided missiles. The programs proposed for funding in this appropriation were formerly funded in four different accounts for procurement and for operations and maintenance. The management of the proposed programs will continue to be vested in the materiel bureaus in the same manner as has been the case hitherto.

1. *Ships support equipment.*—This activity is to be administered by the Bureau of Ships. The major portion of this program comprises electronic equipment for continuing modernization of the fleet with emphasis on ship

communications, detection and countermeasure capability, and data processing; and for completion of procurement of a phase of the Navy's fixed continental and ocean defense program. Provision is also made for miscellaneous support items such as ship components, machine tools and ship equipment including those required for training and for the Military Sea Transportation Service.

2. *Weapons, aircraft and weapons support equipment.*—This activity, to be administered by the Bureau of Naval Weapons, provides for ammunition, weapons, and technical support equipment for ships, aircraft, and the Shore Establishment. Major emphasis in the ammunition program is on the air-launched Zuni rocket, the new high speed and antisubmarine torpedoes, and on missiles for the Asroc antisubmarine weapon. Augmentation of stock positions is generally limited to newly developed items, with particular emphasis on antisubmarine capability, including such items as air dropped submarine detection buoys which are used in antisubmarine operations. Shore station support equipment comprises the ground communication and terminal navigational aids required for naval and Marine Corps air stations.

3. *Command support equipment.*—This activity, to be administered by the Office of the Chief of Naval Operations, provides principally for continued modernization and improvement of the naval communications system; and procurement of cryptographic aids and devices for the Naval Establishment.

4. *Civil engineering support equipment.*—This activity consolidates, under the administration of the Bureau of Yards and Docks, the procurement of passenger-carrying vehicles and both general and special-purpose automotive equipment. The 1961 program provides for the replacement of overage and wornout equipment on a phased basis. Also provided are construction and heavy weight handling equipment, amphibious vehicles, and material for fleet moorings.

5. *Supply support equipment.*—This activity, to be administered by the Bureau of Supplies and Accounts, provides for the procurement of all Navy materials handling equipment common to supply operations such as warehouse tractors, cranes, and fork trucks.

6. *Personnel support equipment.*—This activity to be administered by the Bureau of Naval Personnel provides for training equipment to be used in both Regular Navy and Reserve training programs.

Appropriation (new obligational authority)	25,000,000	133,850,000	94,000,000

This appropriation provides the major items of equipment needed to support approved Marine Corps forces in achieving their assigned mission. The 1961 program will enable the Marine Corps to procure: the second increment of new lightweight 7.62-mm weapons and related ammunition; a variety of ammunition items to augment reserve stocks; the replacement of ammunition consumed during training programs; modifications to landing vehicles to improve over-the-beach capabilities; battery sets for an additional Hawk battalion as well as Hawk missiles to provide an effective defense against low altitude aircraft and air-breathing missiles; a new shoulder-fired

Other accounts		−55,000,000	−50,000,000
Unobligated balance carried forward		1,636,000,000	1,017,600,000
Appropriation (new obligational authority)		4,284,600,000	2,994,000,000

This appropriation provides for development and procurement of aircraft, components, industrial facilities, direct support ground equipment, and modification of inservice aircraft. It facilitates management of the program by bringing together in a single appropriation, funds for the prime aircraft weapon system and related specialized ground handling and test equipment. The funds requested provide for an aircraft procurement and development program for 1961 of $3,910 million compared to $3,960 million for 1960.

1. *Aircraft procurement and production.*—This activity provides for the procurement of 633 new aircraft and associated guided air-to-air rockets, to continue modernization of the forces comprising 91 aircraft and missile wings by the end of 1961. In the strategic forces, funds in this program complete the procurement of heavy bombers for the equipping of 14 wings; also, procurement is continued to complete the equipping of supersonic strategic bomber wings currently planned for further replacement of obsolescent B–47 medium bombers. Increased reliance is placed upon long-range intercontinental missiles as a strategic deterrent in lieu of larger numbers of strategic aircraft.

Procurement of jet tankers is continued for the support of the heavy and supersonic bombers and to start toward the modernization of the tanker support force for the tactical fighters and bombers to improve their mobility and radius of action. The procurement of increased quantities of supersonic fighter-bomber aircraft with all-weather capability is planned in 1961. These improved tactical mission aircraft will be capable of being rapidly deployed to deliver conventional as well as nuclear munitions and will strengthen capabilities for close support of the ground forces. No production interceptor aircraft are included because of the high priority assigned to procurement of missiles toward meeting this need in the short and intermediate range field.

Provision is made for tactical transport aircraft to improve the mobility of the modernized operational forces needed in the event of localized trouble and for additional quantities of jet training aircraft. In addition, provision is made for modernization of inservice aircraft and their components and for production facilities which cannot be provided by private capital.

2. *Ground support equipment.*—Ground support equipment pertaining to specific aircraft weapons systems will be procured under this activity. The items procured will be of a type and quantity to match the procurement of the planes they are to service, phased to provide needed support upon introduction of the new weapon into the inventory. Included are such items as test and checkout equipment for the component systems of the aircraft being procured and flight simulators for the heavy bomber, fighter-bomber, tanker and tactical transport aircraft.

3. *Development, test, and evaluation support.*—This activity provides for development, testing, and evaluation of aircraft and related equipment expected to be placed in production in subsequent program years. In 1961, funds are provided for the B–70 intercontinental strategic bomber project and for a new aircraft for the modernization of the MATS fleet.

Transferred to "Salaries and expenses, Advanced Research Projects Agency, Department of Defense" (73 Stat. 377)		−75,000,000	
Appropriation (adjusted)		2,465,550,000	3,024,000,000

This appropriation provides for development and procurement of missiles and drones, launching and ground support equipment, installation and calibration charges for activation of operational squadrons, and expansion of industrial facilities.

1. *Missile procurement and production.*—This activity provides funds for missiles required for operational squadrons and related training. The 1961 estimates continue accelerated production of the Atlas and Titan intercontinental ballistic missiles to equip the additional operational squadrons as they are activated. Procurement of the Hound Dog air-to-surface missile to increase the effectiveness of the B–52 heavy bombers continues at the same level as in previous years. Procurement of the Quail decoy, used for penetration purposes by the B–52 heavy bomber, will be substantially completed, and the Mace system will be completed, with funds provided in 1961. The Bomarc air defense interceptor missile will be continued at a level slightly higher than in 1960. Provision is also made for procurement of target and drone missiles used in the testing and training of weapon systems.

2. *Ground support equipment.*—The principal amounts required in 1961 are for launching and ground equipment for the Atlas and Titan ballistic missiles, Hound Dog air-to-surface missile, and for the Bomarc interceptor missile. Lesser amounts are also included for launching and ground equipment for other missiles in the program and for training equipment requirements for other Air Force missiles.

3. *Development, test, and evaluation support.*—In addition to amounts for continuing development, test, and evaluation of missiles already under procurement for service use and inventory, this activity provides funds for the continued development of the Minuteman solid propellant intercontinental ballistic missile and a new configuration of the Titan missile.

Advances and reimbursements from—			
Military assistance orders		−58,000,000	
Other accounts		−20,000,000	−20,000,000
Unobligated balance carried forward		323,100,000	335,100,000
Appropriation (new obligational authority)		1,109,650,000	1,057,000,000

1. *Weapons, ammunition, and propellants.*—The 1961 program provides for the production of: 20-mm ammunition and air-to-air rockets to provide for the current training program; atomic ordnance materiel for indoctrination of personnel in the latest warfare and bombing techniques; and a variety of other items to augment war reserve inventories.

2. *Vehicular equipment.*—The 1961 estimate will provide for the following procurement programs: The third increment of a 4-year program to modernize inventories of general purpose vehicles and to replace losses due to age; a new family of fire trucks to replace older models which no longer meet operational requirements; passenger-carrying vehicles in accordance with replacement criteria; commercial model trucks to replace inventories of military design vehicles; and supplies and materials to support inventories of vehicular equipment.

3. *Ground communication-electronic equipment.*—The 1961 program will continue the implementation of the ballistic missile early warning system and those electronic systems associated with air defense including the semiautomatic ground environment system and its extension into Canada, the radar improvement program and the fixed and mobile versions of the automatic weapon control systems for air defense in oversea areas. Procurement for improved ground navigational aids for automatic en route and terminal handling of air traffic and support of the worldwide synoptic weather observation program will continue to be provided in the 1961 program. Provision is also made for telecommunications programs including the continued extension and modernization of the worldwide high-frequency and tropospheric scatter communications networks, and for improved intelligence and cryptologic equipment. Funds are included for the initial spare parts required for the 1961 program.

4. *Other base maintenance and support equipment.*—Funds provided cover the equipment, materials, and supplies required for normal base operations, and logistical support activities of the Air Force. The increased estimates for 1961 will provide for such major categories of procurement as communication cable in support of ballistic missile weapon systems, a facility for the calibration of precision measurement equipment, test equipment for electronic and telecommunication systems, airfield lighting equipment, ground photographic equipment and supplies, and newly developed runway barrier systems.

PROCUREMENT—Continued

Current authorizations—Continued

[AIRCRAFT AND RELATED PROCUREMENT, NAVY]—Continued

This continuing appropriation provided funds in 1960 and prior years for the procurement of aircraft, guided missiles, and supporting equipment for the Navy and Marine Corps. It also financed necessary safety-of-flight and operational modifications to service aircraft as well as the procurement and modernization of ground electronics equipment required for aircraft and missile operations. In 1961 this procurement will be financed in the two new appropriations Procurement of aircraft and missiles, Navy, and Other procurement, Navy. The amounts shown for 1961 represent obligations necessary to continue previously started programs and cover in general costs of short leadtime components, engineering changes, pricing adjustments, and provisioning orders of supporting spare parts. The 1960 and prior year funded programs are fully financed and new appropriations are not required for these purposes.

1. *Aircraft and related equipment.*—The 1960 aircraft procurement program continues the modernization of the attack force with procurement of quantities of light attack planes, initial production of a new high performance low-level attack plane and a new and powerful supersonic heavy attack plane. In addition to continued production of the current models of supersonic fighters, increased quantities of greatly improved all-weather supersonic fighters have been ordered. Further, greatly improved versions of patrol and search aircraft are being provided for increased effectiveness in antisubmarine warfare.

2. *Missiles, drones, and related equipment.*—The 1960 program is providing operational Sparrow III and Bullpup missiles for use against aircraft and surface targets. In addition quantities of drones for use in training exercises and missile testing are on order.

3. *Training equipment.*—Operational flight trainers, specialized maintenance trainers, and other training aids are being procured under this activity in phase with the aircraft and missiles under activities 1 and 2.

4. *Aircraft modernization.*—This activity is funding operational and safety-of-flight modifications to in-service aircraft. Existing programs include incorporating in fleet aircraft the most modern and effective antisubmarine search and detection equipment available, providing safety-of-flight improvements, and installing advanced electronic countermeasures equipment.

5. *Ground electronics and detection equipment.*—Procurement and installation of ground installed communications and terminal navigational aid devices for Naval and Marine Corps air stations are being financed under this activity in phase with Navy and Marine Corps aircraft operational requirements. Also being financed under this activity is the procurement program which provides submarine detecting sonobuoys for operational efficiency training of pilots and crews and for augmentation of mobilization reserves.

6. *Development, test, and evaluation support.*—This activity is continuing the financing of the equipment ordered during 1960 and prior programs for use in test and evaluation prior to quantity procurement for service use.

Federal Reserve Bank of St. Louis

This appropriation provided funds in 1960 and prior years for the production and procurement of Navy ordnance and ammunition (except ordnance for new aircraft, new ships, and ships authorized for conversion). Procurement programs previously funded under this appropriation are funded under the Procurement of aircraft and missiles, Navy; Other procurement, Navy; and Research, development, test, and evaluation, Navy, appropriations in 1961. The amounts shown as obligations in 1961 represent continuation of previously approved programs. No new appropriation is requested under this title in 1961.

1. *Ammunition.*—The 1960 procurement program provided for increased emphasis on underwater ordnance items. These include the MK37 and MK44 torpedoes, and the Asroc missile. Funding of conventional ammunition was programed at a lower level with reliance placed upon attainment of a sound production base for mobilization and minimum production to meet peacetime training requirements.

2. *Ordnance equipment.*—Funds in this activity were programed primarily for the procurement of underwater ordnance equipment to meet the requirements of the fleet rehabilitation and modernization program. This program, initiated in 1959, provides for the modernization of selected World War II destroyers with modern antisubmarine warfare equipment.

3. *Ordnance guided missiles.*—The 1960 program continued the integration of ship launched missiles into vessels of the active fleet configured for their use. More than half of the funds programed for Ordnance guided missile procurement in 1960 was required for the fleet ballistic missile. The balance provided for the procurement of ship and air launched guided missiles. Included were initial production quantities of the newer models of the Talos and Terrier guided missiles, and the placing of the first production contract for the improved Tartar missile to provide greatly improved air defense capability to destroyers. Limited quantities of an improved model of the Sidewinder air-to-air missile also were procured.

4. *Development, test, and evaluation support.*—This program covered procurement of production items required for test and evaluation purposes.

Program by activities—Continued			
Direct obligations—Continued			
5. Training equipment	$109,425,019	$35,124,000	$13,195,000
6. Support equipment and supplies	310,375,426	54,849,087	25,038,000
7. Base maintenance equipment	72,415,926	20,764,156	5,130,042
Total direct obligations	1,897,194,836	372,962,601	221,431,042
Reimbursable obligations:			
1. Weapons, ammunition, and propellants	4,154,639		
2. Vehicular equipment	5,057,822		
3. Ground communication-electronic equipment	17,341,103		
4. Ground handling equipment	144,147,921	30,394,049	
5. Training equipment	2,528,911		
6. Support equipment and supplies	3,251,457		
7. Base maintenance equipment	4,154,639		
Total reimbursable obligations	180,636,492	30,394,049	
Total obligations	2,077,831,328	403,356,650	221,431,042
Financing:			
Comparative transfers to other accounts	72,224,524	25,037,399	
Unobligated balance brought forward	−438,344,049	−707,675,091	−221,431,042
Unobligated balance transferred to "Other procurement, Air Force" (73 Stat. 376)		27,850,000	
Unobligated military assistance orders transferred to other service accounts	51,952,618	30,000,000	
Advances and reimbursements from—			
Military assistance orders	−216,925,463		
Other accounts	−52,894,049		
Unobligated balance carried forward	707,675,091	221,431,042	
New obligational authority	2,201,520,000		
New obligational authority:			
Appropriation	$2,220,020,000		
Transferred to "Emergency fund, Department of Defense" (72 Stat. 713)	−18,500,000		
Appropriation (adjusted)	2 201,520,000		

The amounts shown for 1960 and 1961 obligations in this appropriation represent the continuation of programs approved and funded in 1959 and prior years. Beginning with the 1960 program further procurement of items previously under this appropriation is included under the new appropriations for aircraft procurement, missile procurement, other procurement, and research, development, test, and evaluation. The funds remaining to be obligated in 1961 against the 1959 program are for ground handling and support equipment for aircraft and missile systems, and for various electronic-telecommunication systems.

[CONSTRUCTION OF SHIPS, MILITARY SEA TRANSPORTATION SERVICE]

[The appropriation to the Department of Defense for "Construction of ships, Military Sea Transportation Service", shall not be available for obligation after June 30, 1959.] (*Department of Defense Appropriation Act, 1960.*)

Program and Financing

	1959 actual	1960 estimate	1961 estimate
Program by activities:			
Direct obligations: Construction of ships	$959,604		
Reimbursable obligations: Construction of ships	390,000		
Total obligations (object class 09)	1,349,604		
Financing:			
Unobligated balance brought forward	−5,610,436		
Advances and reimbursements from other accounts	−390,000		
Unobligated balance rescinded (73 Stat. 376)	4,650,832		
Appropriation (new obligational authority)			

This program provided for the construction of commercial-type ships and high-speed tankers to meet requirements of the Military Sea Transportation Service which could not be satisfied from existing sources.

RESEARCH, DEVELOPMENT, TEST, AND EVALUATION

The appropriations in this title provide the principal support for the research, development, test, and evaluation activities of the Department of Defense, including basic and applied research, general technical development, development of new weapons and equipment, fabrication and procurement of items under development for test and evaluation, and operation and maintenance of laboratories and test facilities engaged in the conduct of research, development, test, and evaluation. Certain additional amounts for support of development, test, and evaluation remain in procurement appropriations in 1961, particularly in the fields of ballistic missile development in the Air Force and aircraft development in the Air Force and Navy. The amounts in this title together with those identified as development, test, and evaluation support in the procurement appropriations come to the following

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

combined total estimates for research, development, test, and evaluation activities:

TOTAL DIRECT OBLIGATIONS

[In millions]

	1959 actual	1960 estimate	1961 estimate
Research, development, test, and evaluation appropriations	$3,543.6	$4,268.4	$3,951.5
Development, test, and evaluation support identified in procurement appropriations	1,600.1	1,547.4	1,315.4
Total research, development, test, and evaluation [1]	5,143.7	5,815.8	5,266.9

[1] Exclusive of military personnel and military construction.

The amounts provided in 1961 will generally continue the present high levels of effort in basic research, applied research, and general technical development. No major change in the level of operation of the laboratories and test installations of the Department is planned in 1961.

The decrease in the totals results largely from the fact that in 1961 many costly development programs are progressing into the stage of production for service use and certain others have been curtailed, transferred, or terminated. Examples of projects in transition to service use are the Army Mohawk aircraft and Sergeant guided missile, the Navy Terrier and Tartar guided missiles and the Air Force Atlas intercontinental ballistic missile. The Air Force B–70 aircraft and command control systems have been curtailed, and the F–108 interceptor aircraft and the improved Lacrosse missile programs have been terminated. Major funding of instrumentation requirements for the Pacific Missile Range was provided in 1960, and 1961 requirements are lower. The Saturn large booster project is being transferred to the National Aeronautics and Space Administration in the 1961 budget estimate and the comparable amounts for 1959 and 1960 have been excluded from the Defense obligation totals.

The estimated obligations under the appropriations in this title for the Army, Navy, Air Force, Advanced Research Projects Agency, and the emergency fund are summarized below:

[In millions]

	1959 actual	1960 estimate	1961 estimate
Summary of program by activities:			
1. Military sciences	$410.7	$549.1	$535.2
2. Aircraft and related equipment	419.5	502.0	446.2
3. Missiles and related equipment	1,343.5	1,498.3	1,481.6
4. Military astronautics and related equipment	324.1	408.0	318.0
5. Ships and small craft and related equipment	163.4	164.4	151.5
6. Ordnance, combat vehicles, and related equipment	197.0	198.9	177.5
7. Other equipment	434.4	558.3	460.5
8. Programwide management and support	251.0	248.4	231.0
9. Emergency fund		141.0	150.0
Total direct obligations	3,543.6	4,268.4	3,951.5

1. *Military sciences.*—This activity includes basic research in the life, physical, and social sciences to add to the store of fundamental scientific knowledge; applied scientific research of importance for military purposes; operations research; and the development of new materials, components, and techniques. Among the many and widely varied problems to be investigated under this activity in 1961 are materials with physical properties superior to those presently available, higher performance rocket fuels, thermoelectric materials, nonlethal chemical and biological agents, neurosensory phenomena, radio astronomy, oceanography, high altitude phenomena, cargo packaging, blood substitutes, nuclear phenomena, advanced radar techniques, more reliable electronic components, underwater sound propagation characteristics, and automatic data processing. In addition to the amounts in this activity, basic and applied research performed within overhead arrangements on some procurement contracts is funded in the procurement accounts. Supporting research associated with development projects is funded under the other activities below. The principal support of such organizations as the Naval Research Laboratory, the Air Force's Cambridge Research Center and Rand Corp. and the Army's Operations Research Office and Human Resources Research Office is provided under this activity in addition to work performed by universities, nonprofit organizations, and industry.

2. *Aircraft and related equipment.*—This activity funds research, development, test, and evaluation related to airframes, engines, armament, electronic devices, and other installed equipment, except that procurement of new types of operational aircraft in quantity for test and evaluation and certain major developments like the Air Force B–70 are funded under the procurement accounts. The 1961 program in this activity emphasizes the development of a variety of tactical aircraft including Army mobility and reconnaissance types; Navy long range search, antisubmarine, and fleet air defense types; and Air Force short or vertical takeoff and landing types. Provision is made for the continuation of the joint Air Force, Navy, and National Aeronautics and Space Administration X–15 hypersonic and very high altitude research aircraft, and for research and development toward a successor vehicle, the manned Dynasoar, which will be ground launched and have near orbital capabilities. The continuing aircraft nuclear propulsion program conducted jointly by the Air Force and the Atomic Energy Commission emphasizes fuel element and materials research. Research and test centers primarily funded under this activity include the Air Force's Arnold Engineering Development Center and Flight Test Center and the Naval Air Test Center.

3. *Missiles and related equipment.*—This activity provides for research, development, test, and evaluation of guided missiles of all types except that procurement funds are used for the major portion of the development work on Air Force ballistic missile systems—Atlas, Titan, and Minuteman—and for completion of development, test, and evaluation of certain other missiles which are already being procured in quantity for operational use. A major research and development effort is being continued in 1961 in the field of defense against ballistic missiles under the Army's Nike-Zeus antimissile project; this is in addition to an extensive research effort on new techniques funded by the Advanced Research Projects Agency within the activity "Military sciences," above. Other Army missile developments include the tactical surface-to-air missiles Redeye, Mauler, and Hawk and the surface-to-surface missiles Sergeant and Pershing. In the strategic field, the high level of funding for the development of the Navy's Polaris system is continued, and provision is made for the development by the Air Force of an air-launched ballistic missile. Other significant Navy missile development projects include advanced components and techniques for fleet air defense and the Subroc antisubmarine system. Funds for Marine Corps applications of missile developments are also included in this activity. In addition to funding industrial participation in the missile research and development program, this activity is the principal source of funds for the operation of such development and test centers as the Atlantic, Pacific, and White Sands Missile Ranges; the Air Proving Ground and Missile Development Centers of the Air Force; the Naval Ordnance Test Station and Applied Physics Laboratory of the Navy; and the Diamond Ordnance Fuze Laboratory of the Army.

RESEARCH, DEVELOPMENT, TEST, AND EVALUATION—Continued

4. *Military astronautics and related equipment.*—This activity provides for the conduct of programs directed at the improvement of space technology for military purposes and the investigation of specific military applications of space vehicles. Research and development in such areas as upper stage propulsion, secondary power, guidance, navigation components, and payload equipment for space and satellite systems are included under this activity. The Advanced Research Projects Agency continues to sponsor research and development leading to the demonstration of operational feasibility of communications and navigation satellites for possible military applications. During 1960, responsibility for continuing development effort on the Samos reconnaissance satellite, the Discoverer vehicle development system, and the Midas early warning satellite was transferred from the Advanced Research Projects Agency to the Air Force. The Saturn very high thrust booster program is being transferred to the National Aeronautics and Space Administration, and provision is made in that agency's budget for continuing a high rate of development in 1961.

5. *Ships and small craft and related equipment.*—This activity provides for research, development, test, and evaluation related to ships and small craft, except that funds are included in the regular shipbuilding appropriation for the construction of ships of advanced design and ships employed in the development, test, and evaluation of new components and techniques. Funds in this activity will provide in 1961 for the development of advanced engines and propulsion machinery, communications and other shipboard electronic equipment, catapults and arresting gear, and other installed equipment. A significant part of the research and development effort of the Naval Electronics Laboratory and David Taylor Model Basin is funded under this activity.

6. *Ordnance, combat vehicles, and related equipment.*—The Army's program includes improved artillery, rockets, mortars, antitank weapons, tank armament, and small arms. Vehicle development includes tactical carriers and high mobility logistic transporters. Development will be continued on more effective ammunition, mines, and grenades. Among the developments which will be emphasized in 1961 are new division and direct support weapons to provide an advanced capability, giving both atomic and nonatomic firepower. The 1961 Navy program emphasizes antisubmarine weapons and includes mines, depth charges, torpedoes, bombs, rockets, and other types of ammunition. Weapons and support vehicles, including ground effect "air cushion" machines, for the Marine Corps are also provided for in this activity. Air Force effort included under this activity is concerned with the development, test, and evaluation of ammunition, rockets, and bomb components related to Air Force applications. This activity provides the principal support of the Naval Ordnance Laboratory and of research, development, test, and evaluation activities at several Army arsenals.

7. *Other equipment.*—This activity provides for research, development, test, and evaluation of equipment not separately provided under other activities. Examples of the types of equipment under development in 1961 are communications equipment in all three services; mine warfare, combat surveillance, materials handling, obstacle crossing equipment, and protective clothing and equipment for the Army; navigation, detection, and warning equipment, and shore-based antisubmarine and mine countermeasures systems in the Navy; and photographic and personal equipment, and aircraft control and warning, missile detection, and other electronic systems in the Air Force. Much of the support of the research and development effort of the Lincoln Laboratories and the Signal Research and Development Laboratory is provided under this activity by the Air Force and Army, respectively.

8. *Programwide management and support.*—This activity provides for those costs of operation, management, and maintenance of research, development, and test facilities of the Department of Defense which are not distributed directly to the other budget activities, and for certain costs of central administration such as the headquarters of the Air Research and Development Command.

9. *Emergency fund.*—The Emergency fund appropriation enables the Secretary of Defense to supplement appropriations of the departments available for research, development, test, and evaluation in order to defray the cost of preliminary exploitation of new developments and other such contingencies.

Current authorizations:

RESEARCH, DEVELOPMENT, TEST, AND EVALUATION, ARMY

For expenses necessary for basic and applied scientific research, development, test, and evaluation, including maintenance, rehabilitation, lease, and operation of facilities and equipment, as authorized by law, [$1,035,715,000] *$1,041,700,000*, to remain available until expended: *Provided*, That during the current fiscal year there may be merged with this appropriation such amounts of the unexpended balances of appropriations heretofore made available for research, development, test, and evaluation, as the Secretary of Defense may determine to be necessary for the accomplishment of the programs for which this appropriation is made. (*10 U.S.C. 2353, 4503; Department of Defense Appropriation Act, 1960.*)

Appropriated 1960, **$1,035,715,000** Estimate 1961, ▫ **$1,041,700,000**
Appropriated (adjusted) 1960, $1,036,365,000

▫ Includes $27,495,000 for activities previously carried under appropriations, as follows:
"Procurement of equipment and missiles, Army" $20,000,000
"Operations and maintenance, Army" $7,495,000
The amounts obligated in 1959 and 1960 are shown in the schedule as a part of the comparative transfers.

Research, Development, Test, and Evaluation, Navy

For expenses necessary for basic and applied scientific research, development, test, and evaluation, including maintenance, rehabilitation, lease, and operation of facilities and equipment, as authorized by law, [$1,015,920,000] *$1,169,000,000*, to remain available until expended: *Provided*, That during the current fiscal year there may be merged with this appropriation such amounts of the unexpended balances of appropriations heretofore made available for research, development, test, and evaluation, as the Secretary of Defense may determine to be necessary for the accomplishment of the programs for which this appropriation is made. *(10 U.S.C. 174, 2352–54, 5150–53, 7201, 7203, 7522; 31 U.S.C. 718; Department of Defense Appropriation Act, 1960.)*

Appropriated 1960, **$1,015,920,000** Estimate 1961, [a] **$1,169,000,000**
Appropriated (adjusted) 1960, **$1,010,420,000**

[a] Includes $222,000,000 for activities previously carried under appropriations as follows:
"Aircraft and related procurement, Navy" $112,000,000
"Procurement of ordnance and ammunition, Navy" 104,000,000
"Procurement, Marine Corps" 6,000,000
The amounts obligated in 1959 and 1960 are shown in the schedule as a part of the comparative transfers.

SALARIES AND EXPENSES, ADVANCED RESEARCH PROJECTS AGENCY, DEPARTMENT OF DEFENSE

For expenses necessary for such advanced research projects as may be designated and determined by the Secretary of Defense, pursuant to law, [$455,000,000] *$215,000,000*, to remain available until expended: *Provided*, That such amounts as may be determined by the Secretary of Defense to have been made available for related programs in other appropriations available to the Department of Defense during the current fiscal year may be transferred to and merged with this appropriation to be available for the same purposes and time period: *Provided further*, That such amounts of this appropriation as may be determined by the Secretary of Defense may be transferred to carry out the purposes of advanced research to those appropriations for military functions under the Department of Defense which are being utilized for related programs, to be merged with and to be available for the same time period as the appropriation to which transferred. (*Department of Defense Appropriation Act, 1960.*)

Appropriated 1960, **$455,000,000** Estimate 1961, [a] **$215,000,000**
Appropriated (adjusted) 1960, **$293,150,000**

[a] Excludes $140,000,000 for activities transferred in the estimates to appropriations as follows:

"Salaries and expenses, National Aeronautics and Space Administration"	$34,316,000
"Research and development, National Aeronautics and Space Administration"	92,684,000
"Construction and equipment, National Aeronautics and Space Administration"	13,000,000

The amounts obligated in 1959 and 1960 are shown in the schedule as a part of the comparative transfers.

Appropriation (new obligational authority)			

This appropriation provided the Secretary of Defense with authority to transfer funds from other appropriations to meet expenses of Defense participation in the Vanguard scientific satellite project, a part of the national scientific effort related to the International Geophysical Year. This project, together with the available funds, has been transferred to the National Aeronautics and Space Administration.

MILITARY CONSTRUCTION

The military construction programs for the Armed Forces, both Regular and Reserve, in terms of dollar obligations shown in the individual schedules of this title are summarized in the following table:

MILITARY CONSTRUCTION OBLIGATIONS

[In thousands]

	1959 actual	*1960 estimate*	*1961 estimate*
Current authorizations:			
Regular Forces	$1,664,395	$1,409,045	$1,307,500
Reserve Forces	66,600	73,398	50,000
Interservice activities	29,527	31,900	40,050
Total	1,760,522	1,514,343	1,397,550

Most of the new appropriations for the military construction accounts are dependent on the enactment of new authorizing legislation. The details of this legislation have been completed and are being submitted to the Congress for early consideration.

1. *Public works construction.*—This program provides for acquisition of land for, and construction of, military public works projects in the United States and overseas as authorized in currently effective military construction acts and the new authorization referred to above.

The 1961 program includes construction for additional Atlas and Titan operational sites through the use of existing funds and the new appropriations. It also provides for the initial deployment of operational Minuteman. Additional support is planned for the Polaris system. Facilities will be provided to increase the readiness of the manned bomber forces.

Continued modernization is planned of the existing warning systems through the provision of facilities for the installation of new radar equipment. There will be further improvement of the Nike-Hercules system.

Waterfront facilities and dredging projects are proposed for direct support of fleet operations and nuclear vessels. Aviation facilities are planned for operation of shore-based aircraft employed for intensive training of carrier pilots. Various airfield and heliport facilities in support of the Army's specialized aviation program as well as operational and maintenance facilities for tactical aircraft are proposed.

Projects required for the research and development effort include construction related to improvement of the ballistic missile systems, development of the Nike-Zeus antimissile missile, other ordnance, aircraft, undersea warfare, electronics, and techniques to promote the efficiency of man and the systems involved.

Provision is made for a limited increment of modernization to the existing inventory of military installations, including maintenance facilities, hospitals, troop housing, and some community facilities.

The facilities required for the training of the Reserve Forces include: armories and training centers; nonarmory facilities such as storage warehouses and barracks and messhalls for summer field training; and aviation facilities such as airfield pavements, maintenance shops and training buildings.

2. *Minor construction.*—Provision is made for construction of permanent and temporary public works that are not otherwise authorized by law but which are determined

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

to be urgently required and do not exceed $200,000 per project.

3. *Planning.*—This provides for necessary planning of military construction projects, including design, standards, criteria, studies, appraisals, and other related activities.

4. *Supporting activities.*—Provision is made for activities such as the defense access road program and the architect-engineer services, land and utilities, in support of the privately financed Capehart housing program, and rehabilitation of inadequate public quarters.

Special foreign currency programs.—Foreign currencies accruing from the sale of surplus agricultural commodities are proposed to be purchased with dollar appropriations, restricted for such purchases only, to construct or acquire authorized military family housing and community facilities in foreign countries. Such purchase would effect an earlier reimbursement to the Commodity Credit Corporation as compared to the long-term amortization of such indebtedness by use of quarters allowances of occupants of such housing as presently authorized (68 Stat. 1125, as amended). In addition to the foreign currencies required for such construction, funds are authorized to be provided in the military construction appropriations in an amount not to exceed 25% of the cost of each such project as may be necessary to supplement the foreign currencies to obtain the required facilities.

Current authorizations:

MILITARY CONSTRUCTION, ARMY

For acquisition, construction, installation, and equipment of temporary or permanent public works, military installations, and facilities for the Army as [authorized by section 102 of the Act of September 28, 1951 (Public Law 155), by section 102 of the Act of July 14, 1952 (Public Law 534), sections 101 and 102 of the Act of July 15, 1955 (Public Law 161), sections 101 and 102 of the Act of August 3, 1956 (Public Law 968), the Act of August 30, 1957 (Public Law 85–241), the Act of August 20, 1958 (Public Law 85–685)] *currently authorized in military public works or military construction acts, in sections 2673 and 2675 of title 10 United States Code,* and such additional projects as may be authorized by law during the [first] *second* session of the Eighty-sixth Congress, to remain available until expended, [$263,632,300, including $1,700,000 to be used only for the purchase of foreign currencies to construct military facilities (except housing and community facilities) for the Army Security Agency, location 12] *$209,000,000. (Military Construction Appropriation Act, 1960; authorizing legislation to be proposed for 1961.)*

[1] Includes following amounts derived from barter transactions for facilities in France, for which Army is executive agent: 1958 and prior years, $11,511,418; 1959, $31,498,078; 1960, $6,990,504.

The Department of Defense is authorized (68 Stat. 1125, as amended by 70 Stat. 1017) to construct or otherwise acquire family housing for occupancy as public quarters and community facilities in foreign countries utilizing foreign currencies to a value not to exceed $250 million. The foreign currencies are acquired pursuant to the provisions of the Agricultural Trade Development and Assistance Act of 1954 (68 Stat. 454) or through other commodity transactions of the Commodity Credit Corporation. In addition, the Department is authorized appropriated funds not to exceed 25% of the total cost of each family housing and community facilities project as may be necessary to

MILITARY CONSTRUCTION—Continued

Current authorizations—Continued

INFORMATIONAL FOREIGN CURRENCY SCHEDULE—Continued

supplement the foreign currencies to obtain the required facilities.

The Department is required to reimburse the Commodity Credit Corporation in a dollar amount equivalent to the value of the foreign currencies utilized. For this purpose, the Department is authorized to utilize appropriations otherwise available for the payment of quarters allowances to personnel who occupy such housing. Amounts chargeable for the maintenance and operation of such housing are authorized (69 Stat. 350) to be deducted from the quarters allowances withheld for reimbursing the Commodity Credit Corporation. Beginning in 1961, it is proposed to purchase all currencies required to construct or acquire such facilities with dollar appropriations restricted solely to such purchases.

Operating results.—The accompanying schedules indicate the indebtedness of the Department to the Commodity Credit Corporation and costs realized and anticipated through 1961 for the construction of housing and community facilities projects in foreign countries for use by Defense personnel.

Debt Retirement and Expenses

	1959 actual	*1960 estimate*	*1961 estimate*
Debt retirement: Payments to Commodity Credit Corporation	$2,564,929	$6,506,100	$7,517,500

The Alaska Communication System provides telegraph and long distance telephone communications within Alaska and between Alaska and other States for the Department of Defense, other Government agencies, and the general public. Although legislation to authorize the sale of the system has been proposed to the Congress, its disposition is not anticipated until after 1961. This account provides for the construction of operations buildings to house technical equipment, utilities, and supporting facilities for operating personnel. Obligations in 1960 will provide for expansion of boiler facilities, powerplants, and other existing facilities, and improvement of water systems. Obligations in 1961 will permit completion of projects initiated in 1960.

Capehart Housing

The Secretary of Defense is authorized under title VIII of the National Housing Act (69 Stat. 646) to contract for the construction of family housing on military installations in the United States, its Territories, and possessions, and assume mortgage indebtedness, not to exceed $2.3 billion in principal obligations outstanding at any time, required to fund such construction. The Federal Housing Administration is authorized to insure such mortgages through the Armed Services Housing Mortgage Insurance Fund established for this purpose, for which insurance premiums are charged at the rate of ¼ of 1% per annum on the outstanding principal obligations of the mortgages. The authority to insure such mortgages expires October 1, 1961, except pursuant to a commitment to insure issued before this date (73 Stat. 682).

Mortgage funds are primarily provided through private investment; however, the Federal National Mortgage Association has provided a limited amount of funds under a special assistance fund authorization. The mortgages have a maturity date not to exceed 30 years and bear interest at a rate not to exceed 4½% per annum. No mortgage may involve a principal obligation which exceeds the least of: (*a*) the Federal Housing Administration estimate for replacement cost of the completed housing project; (*b*) an average of $16,500 per family dwelling unit; or (*c*) the lowest acceptable of the bids submitted by eligible bidders seeking award of the construction contract.

Mortgage payments which provide for the reduction of the principal obligation, for interest expense, and for mortgage insurance premiums, are made from the appropriations for military pay and allowances. The amounts required for this purpose are included in the budget schedules for these appropriations. Such payments may not exceed an average of $90 per month per housing unit and total payments for all such housing may not exceed $21 million per month.

Funds are authorized (65 Stat. 365) to be appropriated to acquire land, prepare sites, and install off-site utilities for these housing projects. Expenditures incurred for this purpose may not exceed an average of $1,500 per unit in any housing project nor more than an average of $1,000 per unit in respect of all housing projects for which appropriations are made under this authorization. Costs incurred for architectural and engineering contracts and for inspection of construction are reimbursable from mortgage proceeds.

In accordance with 73 Stat. 323, mortgage proceeds may no longer be used to pay the costs of title search and title insurance. Where a military guarantee of title can be utilized, the cost of obtaining a title search to support such a guarantee is authorized (40 U.S.C. 255) to be paid from funds appropriated for military construction. Where a determination is made that necessary financing cannot be obtained unless commercial title insurance is provided, the cost of such insurance must be paid (73 Stat. 323) from the Wherry Revolving Fund (70 Stat. 1112).

Operating results.—The following schedule indicates the mortgage indebtedness and costs realized and anticipated through 1961 for Capehart housing completed and occupied by defense personnel. The contingent liability of the Department for contracts awarded as of the end of each year is indicated for housing projects under construction. The schedule does not reflect operation and maintenance costs for this housing, which are financed from the military operation and maintenance appropriations, nor depreciation.

MILITARY CONSTRUCTION—Continued

Current authorizations—Continued

OVERSEAS RENTAL GUARANTEE MILITARY FAMILY HOUSING

The Department of Defense is authorized (66 Stat. 622) to guarantee rental payments to private sponsors of family housing projects built in foreign countries for use by Defense personnel. The guarantee may not exceed 95% of the scheduled rentals the sponsors would receive from full occupancy of the housing by Defense personnel over periods ranging from 5 to 10 years depending upon the length of time Defense expects to occupy the housing and the prospect for its eventual use by native populations. The amount of such guarantees outstanding at any time may not exceed $100 million. The housing is wholly owned by the private sponsors who build, operate, and maintain it in accordance with the terms of the rental guarantee agreements. Commanders of the military installations served by the housing projects are responsible for maintaining occupancy by installation personnel at the guaranteed 95% level. Under this program 4,838 housing units have been built at 31 locations in France, and 700 housing units at 3 locations in Morocco.

Operating results.—The following schedule indicates the extent to which the rental guarantee authority has been used and the estimated reduction of the Government's contingent liability under these guarantees through 1961:

SCHEDULE OF RENTALS AND STATEMENT OF CONTINGENT LIABILITY

	1959 actual	*1960 estimate*	*1961 estimate*

This fund (70 Stat. 1112) finances the acquisition of privately owned Wherry Act housing projects (63 Stat. 570) which the Secretary of Defense is authorized to acquire when necessary (69 Stat. 652) and must acquire (70 Stat. 1111) when such projects are located at or near military installations where the Secretary approves the construction of Capehart housing (69 Stat. 646). In addition to financing the purchase of the owners' equity in such acquired projects, the fund is available for amortizing mortgages assumed including interest and Federal Housing Administration mortgage insurance premiums, for alteration, improvement, rehabilitation, and repair of acquired units to make them suitable for assignment as public quarters, and for payment of title insurance premiums on any Capehart housing project if the Secretary of Defense determines that the mortgage financing of such project is impossible unless title insurance is provided (73 Stat. 323).

Budget program.—The budget program contemplates acquisition of approximately 72,400 Wherry housing units by end of 1961 at a total cost of $655.1 million, including 8,000 units at a cost of $75.8 million in 1960, and 5,000 units costing $51.5 million in 1961. Approximately 60,000 of these units are planned to be rehabilitated by end of 1961. Funds provided in the budget program for this purpose include $52 million in 1960 and $55.3 million in 1961. An estimate of $1 million is included for Capehart title insurance costs both for 1960 and 1961.

Financing the budget program.—This program is funded from reappropriations of unexpended balances of appropriations and from rental receipts. Mortgage indebtedness assumed in acquiring the housing is reflected in the schedules. The schedules do not reflect depreciation as a matter of established accounting policy nor operating costs which are included in the military operation and maintenance appropriation and the military pay appropriation budget schedules. Reappropriations of $30 million are anticipated both in 1960 and in 1961. Income from rentals is expected to increase from an estimated $55 million in 1960 to approximately $60 million in 1961.

Operating results and financial condition.—Net budget expenditures of $32 million are expected in 1960 and $42 million in 1961, compared to $15 million in 1959, since outlays for acquisition of owners' equities, mortgage payments, rehabilitation, and other capital costs will substantially exceed the amounts anticipated from rental receipts. These receipts, however, are expected to exceed operating expense paid from the fund by an estimated $31.7 million in 1960 and $35.8 million in 1961 as compared to $31.7 million in 1959. Government investment is estimated at $358 million at June 30, 1961, consisting of $247 million in reappropriations and $111 million in retained earnings.

This fund finances the maintenance, operation, improvement, and liquidation of temporary family housing units (70 Stat. 1105). Funds are provided by rental receipts. During 1959, a total of 325 units at Fort Rucker and 159 units at Yuma test station were replaced by Capehart housing. Of the 1,791 units available in 1959, a total of 1,600 units were rented. In 1959, $750,000 which was surplus to the operational requirements of the fund was returned to the Treasury. It is anticipated that an additional $450,000 in 1960 and $275,000 in 1961 will become surplus to requirements and will be available for transfer to the Treasury. During 1960 provision has been made for repairs and improvements to 1,439 units at an estimated cost of $141,000 to continue these units as income property. Recurring operation and maintenance costs of $459,000 are estimated for 1960 and $450,000 for 1961.

Financing applied to program	1,114,250	1,228,000	1,150,000

This fund finances the maintenance, operation, improvement, and liquidation of temporary family housing units (70 Stat. 1105). During 1959 there were 3,900 family units maintained. This number will decline to 3,801 in 1960 and 1961.

Funds were initially provided for this program by a transfer of $375,000 in 1957 from the Housing and Home Finance Agency. This investment, plus $75,000 which was surplus to operational requirements of the fund, was returned to the Treasury in 1959. It is anticipated that in 1960, $150,000, and in 1961, $125,000, will be surplus to requirements and will be available for transfer to the Treasury. Special projects to accomplish nonrecurring maintenance in order to continue certain units as income property are funded as follows: 1959, $197,119; 1960, $277,000; 1961, $200,000.

Relation of costs to obligations.—The relationship is derived by year-end balances of unpaid undelivered orders as follows: 1958, $220,982; 1959, $178,114; 1960, $178,114; 1961, $178,114.

REVOLVING AND MANAGEMENT FUNDS—Con.

Intragovernmental funds—Continued

ARMY STOCK FUND—Continued

This fund finances the procurement and maintenance of inventories of common-use items for resale and for mobilization reserve (5 U.S.C. 172d). Some 665,000 line items are included, about 90% of the line items in the Army's total inventory. This inventory comprises stocks in all depots in the continental United States and the six major oversea commands and at certain stations in the United States.

Supply and financial operations of the fund are centrally directed and controlled by the Department of the Army. For management purposes the 665,000 line items of inventory are organized into 13 material categories. One or more of the 13 material categories are assigned to and managed through each of the Army's 7 technical services and the defense supply service. Among the 13 material categories are 2 single manager assignments covering continental U.S. depot inventories of clothing and subsistence for all the military services. Sales of inventories held by the two single managers are generally made to retail stock funds which are operated by each of the military services to acquire and hold stock in continental U.S. stations and oversea areas for resale to consuming appropriations. On July 1, 1959, a new Zone of Interior installations division was installed at nine stations in the 3d Army area, three of which had not been operated under the stock fund. This new division is operated as a retail station stock fund and is managed through the U.S. Continental Army Command and 3d U.S. Army in lieu of management through the technical services. In order to simplify funding control, accounting, and reporting, it is organized as a single chartered division to provide one fund for the acquisition and holding of inventories of nine categories of material for resale to consuming appropriations. In the statements and schedules the operation of this division is consolidated with the data by material categories.

No significant changes were made in 1959 in the types of material or geographic areas covered by the fund. During 1960, three additional stations were included in the newly organized Zone of Interior installations division. Pending completion of a test period of operation of this new division, plans to extend stock funding to other major posts, camps, and stations have been deferred. The inclusion of consumable spare parts peculiar to aircraft and guided missiles is under consideration. The inclusion of this material is not reflected in the schedules presented here since neither the effective date nor the specific items to be included have been determined.

The net change in capitalized inventories of $177.6 million during 1959 was due principally to the return of $140.9 million of unneeded material from organizations outside the stock fund system. The remaining amount represents the cancellation of sales returns credits, net transfers between the military services, and changes in individual items determined to be eligible or ineligible for inclusion in the stock fund. Lower estimates for 1960 and 1961 of $119.4 million and $88.1 million, respectively, reflect primarily the reduced amounts of unneeded material in the hands of consumers. Changes by category are as follows:

	1959 actual	*1960 estimate*	*1961 estimate*
Army clothing and equipage	$38,789,114	$3,691,178	$4,800,000

Decrease (−) in undelivered purchases to be paid from other accounts	−2,098,172	−161,413	----------
Sales return credits canceled	7,562,333	839,076	220,000
Net change in capitalized inventories	177,645,502	119,415,884	88,135,000

Budget program.—Obligations are estimated to increase by $95 million from 1959 to 1961. Of the total obligations, $75 million was used for mobilization reserve stocks in 1959 and $30 million and $35 million, respectively, are reflected for 1960 and 1961 to procure the highest priority combat items to support modernized equipment and produce better balance in the mobilization reserve inventory. Obligations for peacetime stock were 84.7% of sales in 1959. The increased forecast rate of 85.1% in 1960 and 87.7% in 1961 reflects the steady decline in long-supply stocks which can be sold without replacement. The budget program provides for year-end inventories as follows:

Total inventories	6,544.3	5,546.2	4,533.0	3,747.1

During the 3 fiscal years shown herein, inventories are forecast to decrease $2,797 million. Of this reduction, $937 million results from sale of peacetime stocks without replacement and $1,921 million results from disposal of surplus and reflects a positive program initiated in 1958 to review more critically the stocks authorized for retention and to eliminate inactive and long-supply stocks from the system. Approximately $221 million of material in long supply will be donated to the military assistance program and $80 million to education, public health, and civil defense activities as authorized by law. Changes in standard prices are expected to reduce the book value of inventory by $97 million. Offsetting these reductions in part are net new capitalization of $378 million and $118 million of receipts for mobilization reserve stocks. Inventory losses and transfers account for the other $37 million.

Federal Reserve Bank of St. Louis

Of the $247.5 million reflected as a donation to the military assistance program in 1959, approximately $147.6 million was merely earmarked for donation to the military assistance program in the Army stock fund accounting records. Physical transfer of these amounts was not accomplished during 1959. During 1960, an accounting adjustment of $147.6 million is reflected to restore these amounts to the Army stock fund inventory, from which donations are reflected as amounts are transferred physically.

Financing the budget program.—Funds for financing the budget program are derived from sales to authorized customers. A sales increase of $78 million or approximately 3% is forecast from 1959 to 1961.

Collections exceeded expenditures by $266 million in 1959 and are expected to exceed expenditures by $365 million in 1960 and $286 million in 1961. Accounts receivable are forecast to decline by $50 million in 1960 contributing to the increased negative expenditure. In addition, the 1960 estimate reflects a program to achieve better balance in inventories to result from maximum utilization of stocks on hand and on order at the end of 1959. The major reasons for the forecast decline in the 1961 negative expenditures are increased expenditures for deliveries of mobilization reserve stocks and the progressively diminishing stocks in long supply which can be sold without replacement.

Transfers of $375 million in 1959 and $281 million in 1960 were effected to Military personnel, Army, and an additional transfer of $260 million is proposed in 1961.

Operating results and financial condition.—The net loss in 1959 was $907 million and net losses are forecast at $764 million in 1960 and $582 million in 1961. These net losses result mainly from disposals of surplus stocks and donations of long-supply material to the military assistance program and to education, public health, and civil defense activities. As the program for purging inactive and long-supply stocks from the system is completed these large net losses will decline.

Stock fund prices have not been high enough in the past to provide for recovery of these abnormal losses incident to disposal of property as surplus because these stocks consisted mainly of items which were surplus when capitalized. Some generation of excess stock is inevitable in supply operations, however. Surcharges are, therefore, included in prices charged to customers to avoid unreasonable losses of capital.

Government investment at June 30, 1961, is estimated at $4,535.7 million, including $11,138.2 million in capitalized assets, less a deficit of $3,916.6 million, and less $2,685.9 million of net transfers and rescissions from the fund.

Financing applied to program	1,162,932,090	1,158,700,000	1,134,970,000

This fund, initially established in 1893, finances the procurement and maintenance of inventories of common-use material and supplies for resale and mobilization reserve (5 U.S.C. 172d). It includes items in all levels of shore-based inventories and in inventories of fleet issue ships afloat.

In 1959 inventories capitalized under the fund increased $60 million, due principally to returns of unneeded material from using activities. This is reflected to a decreasing extent in the 1960 and 1961 estimates, as the quantity of such material in the hands of consumers is expected to decrease. On July 1, 1959, $279 million of ordnance repair parts were capitalized into the fund. Estimates reflect changes in the inventory capitalized under each major supply category of the fund as follows:

	1959 actual	*1960 estimate*	*1961 estimate*
Clothing and textiles	−$9,535,366	$60,000	
General material	2,198,066	−2,100,000	
Repair parts	24,201,145	289,510,000	$23,970,000

Fuels	1,497,535	7,170,000	
Single manager medical and dental material	4,438,961		
Other	18,326,716		
Total inventories capitalized during year (net of decapitalizations)	60,123,445	301,580,000	27,970,000
Withdrawal credits established, net (−)	−215,329		
Charges (−) against capital for loss on disposal of inventory surplus at time of capitalization		−80,000,000	
Net change in capitalized inventories	59,908,116	221,580,000	27,970,000

Budget program.—The net decrease in obligations of $28 million reflected from 1959 to 1961 is expected to result principally from greater sale of stocks without replacement. The budget program provides for year-end inventories as follows:

[In millions]

Material in transit between storage locations	51.3	64.3	64.3	64.3
Total inventories	2,165.7	1,987.1	1,944.4	1,751.4

During 1959, total inventory decreased by $179 million, the net of $65 million in increases and $244 million in decreases. The decreases consisted of $213 million in disposals of excess and surplus property, $19 million in authorized donations, and $12 million in inventory losses. In 1959, $60 million in inventory was capitalized, and standard price markups added $5 million to book value of the inventory. During 1960 and 1961, a further decrease in inventory of $236 million is forecast, the net of $330 million in material capitalized and $566 million in reductions. These reductions reflect an estimated $368 million in losses on disposal of surplus inventory, $149 million in sales of stocks without replacement, $28 million in authorized donations, and $21 million in losses and adjustments.

Financing the budget program.—Funds for financing the budget program are derived from sales of material to authorized customers. Sales in 1961 are estimated at $10 million above the 1959 level, the net of a $22.8 million increase resulting from capitalization of ordnance repair parts and $12.8 million in decreases reflecting a slight decrease in customer requirements. In 1960 and 1961 cash receipts are expected to exceed disbursements by $84 million and $85 million, respectively. In 1959 and 1960, transfers from the fund of $120 million and $75 million, respectively, were effected to Military personnel, Navy. An additional $60 million is recommended for transfer to that appropriation in 1961.

Operating results and financial condition.—The statements show substantial net losses of $174.3 million in 1960 and $148.1 million in 1961 compared with a loss of $223.8 million in 1959. These losses are expected to result largely from disposal of excess and surplus inventories at about 7% of standard price.

Digitized for FRASER

Federal Reserve Bank of St. Louis

Net inventory losses, included in the net operating losses, are forecast at $9.3 million for 1960 and at $12 million for 1961, compared with $12 million in 1959. These losses represent the net from discrepancies in shipments, pilferage, losses in storage, differences disclosed by physical inventories, and accounting adjustments.

The Government investment at June 30, 1961, is estimated at $1,962.4 million, consisting of $351.6 million of appropriations and reappropriations, $2,274.9 million of net capitalized inventory, less $664.1 million deficit.

This fund commenced operations on July 1, 1953, and finances the procurement and maintenance of inventory levels for resale and mobilization reserve (5 U.S.C. 172d). All inventories except for individual clothing and commissary stores are stored in the United States.

The fund was extended in 1959 and 1960 to include additional items of ordnance and general material, including certain locally procured items in 1960. In 1961, additional communication items will be financed through the fund. Otherwise, changes in capitalized inventories

Total inventories capitalized during year (net of decapitalizations)	33,162,383	9,582,000	8,760,000
Decrease (−) in undelivered purchases to be paid from other accounts	−8,099	−1,250,000	−200,000
Net change in capitalized inventories	33,154,284	8,332,000	8,560,000

Budget program.—The increase for ordnance in 1960 and 1961 results from initial parts requirements for new items. The increase in general material relates to supplying additional items through the fund. The other principal increase, in subsistence—commissary, reflects the increasing use of commissary sales stores by authorized personnel. The budget program is based on year-end inventories as follows:

[In millions]

Excess and surplus stocks awaiting disposal	23.0	15.0	21.1	16.8
Total inventories	405.2	393.0	359.2	322.0

The inventory decrease of $83.2 million from the end of 1958 to the end of 1961 is the net of $51.6 million in capitalized inventories and $134.8 million in decreases. These decreases include $19.7 million in sale of stocks without replacement, $55 million in losses on disposal, $26 million in transfers without reimbursement and $34 million in inventory losses and adjustments. The latter were recorded largely in 1959, and resulted from a number of inventory and accounting corrections effected in that year.

Financing the budget program.—Funds for financing the budget program are derived from sales to authorized customers. Sales in 1961 are estimated to increase about $15 million over 1959, largely in general material, related to new items and in subsistence-commissary reflecting greater use of commissary stores. Cash receipts are expected to exceed expenditures by $8 million and $15 million in 1960 and 1961 respectively, primarily due to sale of stocks without replacement.

Operating results and financial condition.—Net losses of $29.6 and $30.9 million are forecast from 1960 and 1961 operations, respectively. These result largely from the disposal or donation of material in long-supply at the time of capitalization.

This fund, established July 1, 1950, finances the procurement of approximately 92,000 items for resale and maintenance of operating and mobilization reserve stocks (5 U.S.C. 172d). These items are stocked and sold at approximately 1,700 locations. No significant changes from the present scope of operations are projected. Changes in capitalized inventory occurred in 1959, primarily attributable to the transfer to the single manager of medical material excess to requirements and by decapitalization of additional general material items directly related to operational capability of weapons systems. These were offset partially by capitalization of returns, mostly in organizational clothing. Additional returns without credit will be capitalized in 1960 and 1961. Changes in capitalized inventory by category are as follows:

	1959 actual	*1960 estimate*	*1961 estimate*
Clothing	$3,888,930	$1,654,000	$3,125,000
Medical-dental	−3,392,420		
Aviation fuels	34,655		
Subsistence—commissary	331,088		
General material	−13,350,840	2,916,000	2,894,000
Total inventories capitalized during year (net of decapitalizations)	−12,488,587	4,570,000	6,019,000
Decrease (−) in undelivered purchases to be paid from other accounts	−5,114,861		
Charges (−) against capital for loss on disposal of inventory surplus at time of capitalization	−21,304,386	−5,694,000	
Net change in capitalized inventories	−38,907,834	−1,124,000	6,019,000

Budget program.—Obligations increase by $24 million in 1960, primarily attributable to increased sales in the commissary stores. The decrease of $33 million in 1961 relates primarily to lower sales of aviation fuel products. The budget program provides for year-end inventories as follows:

[In millions]

	1958 actual	*1959 actual*	*1960 estimate*	*1961 estimate*
Clothing:				
Operating stocks	$39.1	$28.2	$19.9	$18.9
Mobilization reserve stocks	11.6	7.9	7.9	7.9
Excess or surplus stocks awaiting disposal	8.1	9.7	3.6	3.1

Excess or surplus stocks awaiting disposal	1.8	1.9	1.6	.9
Aviation fuels:				
Operating stocks	80.5	86.6	75.9	73.1
Mobilization reserve stocks	174.4	148.6	138.6	142.9
Subsistence—commissary:				
Operating stocks	54.3	49.0	49.8	50.5
Mobilization reserve stocks	5.2	4.7	4.7	4.7
General material:				
Operating stocks	90.6	70.8	64.6	58.7
Mobilization reserve stocks	1.2			
Excess or surplus stocks awaiting disposal	11.0	6.9	3.8	2.2
Summary:				
Operating stocks	271.8	240.4	215.6	206.6
Mobilization reserve stocks	212.3	177.7	173.2	181.2
Excess or surplus stocks awaiting disposal	20.9	18.6	9.0	6.2
Total	505.0	436.6	397.8	394.1

The decrease of $42.5 million from 1959 to 1961 is primarily attributable to reductions in operating stocks of clothing, aviation fuels, and general supplies, partially offset by an increase in mobilization reserve stocks of medical-dental material.

Financing the budget program.—Funds for financing the budget program are derived from sales to authorized customers. A transfer of $50 million will be made during 1960 to military personnel, Air Force, and a transfer of $30 million is proposed for 1961. Collections are estimated to exceed payments by $26.5 million in 1960 and $11 million in 1961, resulting primarily from reduced procurement requirements due to the drawdown of inventory in 1960 and reduction of accounts receivable in 1961.

Operating results and financial condition.—The net loss of $11.4 million in 1959 resulted primarily from downward revision of standard prices. The net losses in 1960 and 1961 result primarily from disposal of inventory at less than standard prices. The deficit of $197.4 million at June 30, 1961, is attributable largely to downward revision of standard prices for items initially capitalized, and losses sustained in the disposal of excess and surplus stocks.

[1] Excludes adjustment of prior year expense.

This revolving fund finances research and limited production of various goods and services needed by the three military services (5 U.S.C. 172d). The things produced are sold to appropriation accounts at cost. The fund is

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

basically an accounting device designed to put the Army's industrial-type operations on a more businesslike basis and to create a degree of cost consciousness on the part of both buyer and seller. Activities financed through the fund generally operate at less than full capacity during peacetime. Current employment is about 60,000 civilian and 7,500 military personnel.

The Army's appropriations for Research, development, test, and evaluation; Procurement; and Operation and maintenance buy more than three-fourths of the industrial fund's output; relatively little is sold to Military personnel. The value of the production is not, therefore, directly related in any given year to the Army's troop strength and organizational structure. The program increase estimated for 1960 is the result of new activities being financed through the fund in 1960 rather than from expansion of the activities that were financed through the fund in 1959. The decrease in 1961 comes from transfer of the Army Missile Command's space work to the new National Aeronautics and Space Administration (NASA).

Budget program—Printing and pictorial.—The Army's pictorial center, located in a former movie studio on Long Island, is the source of most of the Army's training and educational films. It also produces the Army's "The Big Picture" television series.

Depot manufacturing and maintenance divisions.—These activities repair parachutes, clothing, jeeps and trucks, cranes, earthmovers, railroad cars, electric generators, pumps, etc. The Philadelphia clothing factory manufactures special and odd-lot textile products. The amount of work done varies with the Army's total equipment requirement, and with the amount of equipment on hand that can be repaired more cheaply than it can be bought new.

Ordnance arsenals, proving grounds, and research.—These activities, accounting for about half of the industrial fund's total employment, do the planning and testing work for practically all of the weapons associated with Army ground troops, including rifles, machineguns, ammunition, tanks, and vehicles. The increased program expected in 1960 and 1961 is tied directly to new atomic weapons and warheads, new rocket-propelled missiles, and the new NATO standard rifle and machinegun. The arsenals are a well established, unique Army system for coordinating American industry's production of ordnance weapons.

Ordnance missile command.—This is the Huntsville, Ala., team working on research, engineering, and basic planning of the Army's big missile programs, including Redstone, Pershing, Nike, Hawk, Corporal, Lacrosse, and Sergeant. They also work on non-Army projects such as NASA's Saturn space vehicle. A portion of these activities, which are new to industrial fund financing in 1960, will be transferred to NASA in 1961.

Chemical arsenals, proving grounds, and research.—These activities develop, test, and make disabling and deadly chemical, biological, and radiological weapons and defensive equipment. They provide much of the free world's capability in this potentially vital area.

Transportation terminal commands.—This includes the operation of Army ports on the Atlantic, Pacific, and gulf coasts. About 8,000 people are employed in peacetime including 1,000 military. Workload is expected to decrease slightly in 1960 and 1961 in line with less new material being needed overseas and less of the material there being shipped back. Estimated workload is:

	1959 actual	*1960 estimate*	*1961 estimate*
Cargo in measurement tons (40 cubic feet)	8,262,771	7,670,555	7,648,746
Passengers	549,870	590,849	590,820

Relation of costs to obligations.—Industrial fund costs, that is, the value of labor and material actually used, will normally be about the same as obligations. In 1959 and 1960, however, obligations are slightly higher than costs because of the additional material and supplies required by the new activities. These obligations will be costs in future years. The following table presents the relationship of costs to obligations in detail:

Selected resources at end of year: Inventory and items on order:	*1958 actual*	*1959 actual*	*1960 estimate*	*1961 estimate*
Materials and supplies	$25,271,870	$24,748,918	$41,653,818	$32,326,434
Advances	1,832,772	1,302,254	1,259,675	1,234,675
Provision for subsequent maintenance, claims, etc (−)	−1,701,829	−956,712	−782,751	−669,751
Unpaid undelivered orders	73,153,717	80,381,311	93,034,993	103,111,377
Total selected resources at end of year	98,556,530	105,475,771	135,165,735	136,002,735
Selected resources at start of year (−)	−98,556,530	−105,475,771	−135,165,735	−135,165,735
Increase in selected resources		6,919,241	29,689,964	837,000
Materials and supplies capitalized (−) or decapitalized		451,750	−11,076,929	
Inventory adjustment credited (−) to prior year revenue		−2,533		
Liabilities assumed or canceled (−): Accrued leave		339,111	3,535,965	−2,651,000
Adjustment of prior year expense		−312,478		
Costs financed from obligations of other years, net (−)				−1,814,000
Obligations incurred for costs of other years, net		7,395,091	22,149,000	

Operating results and financial condition.—The fund experienced a net loss of $1.1 million, 0.2% of total sales, in 1959 due to the impossibility of fixing selling prices at the exact break-even point. No gain or loss is anticipated in 1960 or 1961. Cash receipts exceeded cash expenditures by $573,000 in 1959 and are expected to be equal in 1960 and 1961. The Government's investment in the fund at the end of 1961 is estimated to be $233.2 million, consisting of $206.9 million of reappropriations, $24.4 million of capitalized assets, and $1.9 million of earnings. Of this total, about $160 million is required for working capital for activities currently under the fund and the balance will provide working capital for either expansion of present activities or initial industrial funding of new activities.

Sources and Application of Funds (Operations)

	1959 actual	1960 estimate	1961 estimate

Financing applied to program	1,657,498,784	1,502,548,443	1,494,148,740

This fund finances 58 industrial and commercial type activities on a reimbursable basis (5 U.S.C. 172d).

Budget program—Navy printing plants.—These estimates cover 28 plants including 5 overseas. One plant was established during 1960. Costs increase in 1960 and 1961 because of the additional plant and a slight increase in workload at the other plants. A stable price level for services is reflected in 1960 and 1961.

Naval ordnance plants.—This program includes 8 plants performing work relating to guns and mounts, torpedoes, explosives, fuses, avionics equipment, missile launchers, and other items of ordnance and ammunition. Costs increase in 1960 and 1961 since one activity was financed under the fund during only part of 1959, and because of increased material costs resulting from subcontracting for major torpedo components. Workload is expected to increase slightly in 1960 followed by a slight reduction in 1961.

Naval shipyards.—These include 11 shipyards and 1 ship repair facility. The cost of goods and services produced decreases by $24 million in 1960 and an additional $10 million in 1961, due primarily to increases in overhaul and repair of ships and decreases in shipbuilding and conversion work for 1960, and decreases in overhaul and repair and shipbuilding and conversion work for 1961.

Military Sea Transportation Service.—This organization provides ocean transportation of dry cargo, passengers, and petroleum. Estimates reflect costs of operating Government-owned ships and procuring commercial transportation. Revenue is received from billings to customers on the basis of published tariff rates for point-to-point lift, on a per diem basis for use of ships, or on the basis of costs applied. The number of Government-owned passenger ships operated is reduced from 23 to 17 during 1960, and costs decrease accordingly during 1960 and 1961, since relatively more Army passengers will move by air. Workload and costs for petroleum ships decline in 1960 in comparison with 1959 which reflects the large demands for petroleum caused by the Lebanon and Taiwan incidents. Cargo ship workload and costs decline in 1961 due to reduced requirements for overseas movement of cargo. Workload and cost trends are as follows:

	1959 actual	*1960 estimate*	*1961 estimate*
Cargo ships:			
Measurement tons (cargo)	11,933,379	11,600,000	10,930,000
Per diem ship-days	9,429	9,800	9,450
Cost	$243,691,375	$240,800,000	$227,800,000
Passenger ships:			
Cabin passengers	177,787	162,000	144,000
Troop passengers	334,156	309,000	268,000
Total passengers	511,943	471,000	412,000
Per diem ship-days	240		
Cost	$72,463,421	$61,800,000	$55,900,000
Petroleum ships:			
Long tons (petroleum)	16,361,999	13,335,000	13,885,000
Per diem ship-days	2,136	2,250	2,250
Cost	$93,423,251	$84,400,000	$86,300,000
Arctic operations and miscellaneous (cost reimbursable)	$4,429,644	$3,000,000	$3,000,000
Total costs	$414,007,691	$390,000,000	$373,000,000

Marine Corps clothing and equipment factory.—This factory serves as a pilot production plant to test design specifications and production methods, and also manufactures clothing and textile items needed on short notice, in small lots, or under other conditions making commercial procurement impracticable. Increases of $1.2 million in 1960 and an additional $300,000 in 1961 reflect additional labor and material requirements for increased workload.

Naval research activities.—These include the Naval Research Laboratory, the David Taylor Model Basin, and the Naval Ordnance Laboratory, Corona, Calif. Cost increases of $14 million in 1960 consist primarily of increased material costs and contractual services relating to work accomplished by the Naval Research Laboratory, and increased wages and contractual services relating to an increased workload for the Naval Ordnance Laboratory.

Naval base service activities.—These include 3 public works centers which provide maintenance and custodial services, utility services, and transportation services, and a transportation center which provides transportation and vehicle repairs for adjacent commands. Costs increase by $10.7 million in 1960 primarily because an additional activity is reflected in that year. Workload and operating levels are estimated to remain stable through 1960 and 1961.

Naval aircraft maintenance facilities.—This covers the overhaul and repair department of the Naval Air Station, Quonset Point, R.I., which performs rework of aircraft and aircraft accessories, and the manufacture of aircraft parts and assemblies. This activity was financed through the fund for only 2 months in 1959. Workload for 1960 and 1961 is expected to be slightly higher than in 1959 due to increased aircraft, engine and aviation spares rework.

Relation of costs to obligations.—The relationship is derived from year-end balances of selected resources and applicable adjustments, as reflected in the following table:

Selected resources at end of year: Inventory and items on order:	*1958 actual*	*1959 actual*	*1960 estimate*	*1961 estimate*
Materials and supplies	$100,233,743	$102,193,134	$101,793,134	$101,593,134
Advances and deferred charges	10,021,946	6,435,566	1,935,566	335,566
Provision for subsequent maintenance, claims, etc. (—)	—21,646,465	—17,580,013	—17,180,013	—17,180,013
Unpaid undelivered orders	162,236,737	288,725,577	251,759,242	232,607,982
Total selected resources at end of year	250,845,961	379,774,264	338,307,929	317,356,669
Selected resources at start of year (—)	—250,845,961	—379,774,264	—338,307,929	—338,307,929

REVOLVING AND MANAGEMENT FUNDS—Con.

Intragovernmental funds—Continued

NAVY INDUSTRIAL FUND—Continued

Obligations exceeded costs by $128 million in 1959, largely because of an increase of $126 million in unpaid undelivered orders. Of this increase, $109 million occurred in the Military Sea Transportation Service, related largely to the execution of long-term charters for commercial petroleum ships in 1959. Costs exceed obligations by $45 million in 1960 and $21 million in 1961, due largely to the trend in unpaid undelivered orders. This also relates primarily to the Military Sea Transportation Service, reflecting reductions in the unperformed balance of the long-term contracts.

Financing the budget program.—This program is financed by orders received from customer appropriations, which authorize industrial fund installations to incur costs in performing the work or services required. Orders received are estimated to decrease by $223 million in 1960 and to increase by $50 million in 1961. Except for shipyards, orders closely follow the cost trends discussed above. The shipyards received, in 1959, a large volume of orders for shipbuilding work, which will finance work undertaken in 1960 and later. New orders received by shipyards are accordingly expected to decline by $247 million in 1960. The increase of $76 million in 1961 also relates to shipbuilding and conversion, and the orders involved will largely finance work after 1961.

Operating results and financial condition.—The following table presents 1959 revenue and expense by activity:

	Revenue	*Expense*	*Gain or loss (−)*
Navy printing plants	$11,373,052	$11,353,307	$19,745
Naval ordnance plants	128,669,036	127,502,975	1,166,061
Naval shipyards	867,361,843	867,912,367	−550,524
Military Sea Transportation Service	411,997,556	414,007,691	−2,010,135
Marine Corps clothing and equipment factory	5,122,427	4,955,802	166,625
Naval research activities	74,746,265	74,503,563	242,702
Naval base service activities	21,793,447	21,990,398	−196,951
Naval aircraft maintenance facilities	1,005,294	937,998	67,296
Total	1,522,068,920	1,523,164,101	−1,095,181

Retained earnings increased by $2.6 million in 1959, the net of $1.1 million net loss for the year, less than 0.1% of sales, plus $3.7 million in adjustments of prior year revenue, expense, and inventory. During 1959, the sum of $15 million was transferred to Military personnel, Navy. The total Government investment at June 30, 1961, is estimated at $293.4 million, which consists of $303.1 million in reappropriations and $25.3 million in retained earnings, less $35 million which represents excess of liabilities assumed over assets capitalized.

[1] Excludes adjustment of prior year expense.

This fund finances industrial and commercial type activities on a reimbursable basis (5 U.S.C. 172d).

Budget program—Printing and duplicating service.—These estimates cover nine printing and duplicating plants. Production in 1959 was approximately 1.9 billion printing units and is estimated to increase to 2.1 billion in 1960 and 2.2 billion in 1961. The increases are due to a further consolidation of duplicating workload into the printing plants, a full year's operation under this fund for one plant which was financed through the fund starting October 1, 1958, and increased productivity because of upgrading of equipment.

Laundry and dry cleaning service.—At June 30, 1959, this included 48 plants. One plant will be activated and two plants deactivated during 1960 and two additional plants will be deactivated during 1961. Total production in 1961 is estimated at approximately 101.8 million pieces of laundry and dry cleaning as compared with 103.8 million for 1959 and 1960.

Military Air Transport Service.—The airlift service portion of the Military Air Transport Service was included under this fund on July 1, 1958. The purpose of the airlift service is to insure that the approved D-day and wartime requirements of the Department of Defense are met. This requires that military air transport forces be available for initial emergency combat deployments and other military requirements which cannot be satisfied by surface movement or by nonmilitary airlift efforts. Commercial airlift is relied on to supplement a minimum military force. As an integral part of the combat forces, military transport aircraft and support forces must train and exercise in peacetime at a rate from which they can expand effectively in an emergency, thus producing an airlift capability. Economy dictates use of this military capability in meeting peacetime airlift requirements.

Aircraft will be utilized for air evacuation of patients, special air missions, training of airborne troops, and, as augmented by commercial aircraft, common-user airlift for passengers, cargo, and mail. Airlift service workload and operating data are as follows:

	1959 actual	*1960 estimate*	*1961 estimate*
Average number of operating aircraft:			
Common-user	450	440	408
Other	96	87	77
Total	546	527	485

Obligations incurred for costs of other years, net	14,192,482			

Fixed annual contracts for commercial airlift were effective on October 1, 1958, so that approximately one-fourth of the amounts of these contracts were outstanding on June 30, 1959. This caused unpaid undelivered orders to increase in 1959—the principal reason for obligations in

REVOLVING AND MANAGEMENT FUNDS—Con.

Intragovernmental funds—Continued

AIR FORCE INDUSTRIAL FUND—Continued

excess of costs for that year. The estimates for 1960 and 1961 reflect continuation of fixed annual contracts for commercial airlift to be effective from October 1 to September 30 of each year.

Financing the budget program.—This program is financed by customer orders for services. These orders constitute valid obligations of the ordering appropriations and authorize activities financed through the fund to provide services requested. Costs are charged initially to the working capital of the fund and are billed to customers on the basis of established tariff rates for services provided.

Operating results and financial condition.—For 1959, revenue exceeded expense by $14.1 million, or 4.9%. Section 634 of the 1959 appropriation act (72 Stat. 729) provided that "of the funds made available by this act for the services of the Military Air Transport Service, $80 million shall be available only for procurement of commercial air transportation service." During 1959, a total of $70.4 million in commercial airlift was purchased. The difference between this amount and the $80 million specified has been deposited in the Treasury as miscellaneous receipts.

Expenditures exceeded collections by $31.4 million in 1959, reflecting the initial impact of the operation of airlift service under the fund. This results from a greater time period to effect collections than to liquidate liabilities. There was an unusually low balance of current liabilities at the end of 1959. It is estimated that collections will exceed expenditures by $13.2 million in 1960, and by $1.4 million in 1961, primarily as a result of establishing a normal level of current liabilities at the end of 1960. Government investment is estimated at $85.3 million at June 30, 1961, consisting of $81 million in reappropriations and transfers and $5.1 million in retained earnings less $0.8 million representing the excess of liabilities assumed over assets capitalized.

This fund was created to simplify operations which are financed by two or more appropriations (5 U.S.C. 172e). The corpus of the fund consists of $1 million. Activities presently financed through the fund are as follows:

1. *Defense telephone service, Washington, D.C.*, finances the operations of the telephone service of the Department of Defense in Washington.

2. *Transportation services* provide for the payment centrally of transportation charges for Government bills of lading, transportation requests, meal tickets, and other charges incident to transportation costs by all agencies in the Army.

3. *Construction activity, Europe*, finances certain administrative and overhead expense of the Department of Defense construction programs in Western Europe.

4. *Interchange fleet*, an account established July 1, 1959, is financed by revenue from railway carriers in the form of mileage payments for the use of Government-owned cars of the fleet, and by receipts from commercial contractors for car rentals. Fleet maintenance costs, including repairs and overhauls, are chargeable against revenue; procurement of capital equipment is not. Excess revenue is transferred annually to the Treasury as miscellaneous receipts.

This fund was created to facilitate the financing of operations supported by two or more appropriations (5 U.S.C. 172e). The principal activity financed through the fund is the Polaris ballistic missile program. Obligational authority for the Polaris program is advanced to the fund from Navy appropriations for procurement, Operation and maintenance, and Research, development, test, and evaluation. Other operations financed are construction of Army, Navy, and Air Force bases and stations in Spain; material inspection services; incentive award payments; departmental telephone and maintenance services; transportation of the supplies, materials, and equipment of the Navy; the Electronics Production Resources Agency which coordinates the production and allocation of electronics equipment for the Department of Defense; and certain interdepartmental activities involving the Navy and either or both of the other military departments.

This fund was created to facilitate the financing of activities supported by two or more appropriations (5 U.S.C. 172e). The corpus of the fund consists of $1 million. Amounts required for activities financed are provided through advances or reimbursements.

The Armed Forces Supply Support Center administers the defense standardization program, the interservice supply support program, the defense materiel utilization and excess screening program, and centralized operations for the Federal Catalog System. The Center also conducts management analyses in promoting more effective administration of common supply functions among the military services. This project is financed jointly by the three military departments, with certain cataloging services performed for the General Services Administration on a reimbursable basis.

This fund was established to account for advances received by the Navy for the cost of work or services to be furnished other Government agencies, foreign governments, and private parties (31 U.S C. 643). Obligations against special deposits relate primarily to: (*a*) utilities, repairs, and maintenance furnished to morale, welfare, and recreation activities; (*b*) utilities furnished to tenants of Navy housing projects; and (*c*) utilities, sale of material, equipment rental, and other services for contractors and other private parties, primarily in oversea locations. The private individuals and organizations involved advance amounts to cover the estimated costs to this fund, which amounts are used to pay the costs involved. Work performed for foreign governments consists primarily of ship repairs. From the advances made, this fund finances the Navy activity performing the work.

MILITARY ASSISTANCE

For expenses as authorized by section 103(a) of the Mutual Security Act of 1954, as amended, necessary to enable the President to carry out the purposes of chapter I of such Act (including administrative expenses as authorized by section 103(b) of such Act, which shall not exceed $25,000,000 for the fiscal year 1961, and purchase for replacement only of passenger motor vehicles for use outside the United States), $2,000,000,000, to remain available until expended: Provided, That unexpended balances of funds heretofore made available for purposes of chapter I of such Act, and available as of June 30, 1960, are hereby merged with this appropriation.

[Military assistance: For assistance authorized by section 103(a) to carry out the purposes of Chapter I (including administrative expenses as authorized by section 103(b), which shall not exceed $25,000,000 for the fiscal year 1960, and purchase for replacement only of passenger motor vehicles for use abroad), $1,300,000,000;] (*Mutual Security Appropriation Act, 1960.*)

The military assistance program is designed to strengthen the mutual security of the free world by contributing to the development, maintenance, and training of modern military forces, to deter or resist external aggression, combat internal subversion, and protect valuable overseas military bases. Appropriations to further these objectives in 1961 were authorized in the Mutual Security Act of 1959. For the first time, the 1961 program estimates show distribution by materiel category and activity. This distribution, however, is only tentative since the institution of new program management procedures has made it impossible to include refined figures at this time. These will be submitted later in the regular presentation of the program to the Congress.

More than 40 free-world countries are receiving grant aid under this program, and others are eligible to buy modern military equipment on cash or credit terms. Their combined military forces are numerically much greater than the U.S. Armed Forces, and provide free-world striking power, depth in reserves, and flexibility. Many of these countries have joined in regional defense pacts, such as NATO, SEATO, and CENTO, or in bilateral defense arrangements with the United States. The military assistance program includes funds to cover the U.S. contribution to these regional organizations.

Most of the military equipment and supplies which the United States provides to its foreign allies are obtained by placing orders with the U.S. military services. Military assistance funds are reserved when the orders are placed, and the military services are paid when the items are delivered. When the materiel ordered is not on hand,

Federal Reserve Bank of St. Louis

MILITARY ASSISTANCE—Continued

the military services take procurement action in anticipation of reimbursement.

The kind of materiel supplied by the United States varies with our mutual security objective in each area and the internal capabilities of the individual countries. In Europe, the emphasis is on newer weapons which are not yet within the production or financial capability of our NATO allies. In less-developed areas, modernization of conventional equipment is emphasized. Whenever possible, materiel already on hand but excess to the needs of U.S. forces is supplied, at only the cost of rehabilitation and transportation.

Grant-aid reservations for orders placed with U.S. military services—

1. *Aircraft.*—Increasing numbers of advanced aircraft are being supplied, primarily to NATO forces. At the same time, the air forces of many less-developed countries are replacing their obsolete planes with later model aircraft, now becoming excess to the United States and NATO.

2. *Ships.*—Most of the major ship requirements of our allies are being met by reactivation and rehabilitation of ships from the U.S. "mothball" fleet under authority of ship loan legislation, i.e., Public Law 86–57 (June 23, 1959), Public Law 85–532 (July 18, 1958), and Public Law 85–220 (Aug. 29, 1957). A few important requirements are being met from new construction.

3. *Tanks, other vehicles, and weapons.*—Included is combat and support equipment ranging from tanks, artillery, and trucks to small arms and jeeps. Many of these items are supplied from existing U.S. stocks, and through a program of rebuilding vehicles which Far Eastern countries have returned to the military assistance program. The 1961 program includes continuing replacement of wornout or obsolete equipment in the forces of less-developed countries.

4. *Ammunition.*—Most of the ammunition to be supplied as grant aid in 1961 will be used for training allied troops.

5. *Missiles.*—An increasing number and variety of guided and ballistic missiles are being supplied, primarily to NATO forces, in keeping with the technological capabilities of our allies. The missiles to be provided in 1961 will add to free-world land, sea, and air defense capabilities.

6. *Electronic equipment.*—The 1961 program continues the modernization of military communications systems in less-developed countries and also provides ground control equipment in conjunction with guided missiles and modern aircraft primarily in Europe.

7. *Military public works.*—Materiel and equipment supplied by the United States for military assistance construction are also procured through the military service supply systems. Other U.S. costs for this construction are met initially by the military assistance program and are cited in paragraph 14 below.

8. *Other.*—A variety of special purpose equipment, petroleum, medical and other supplies, and repair and rehabilitation of used equipment not covered above are also provided through orders placed with the U.S. services.

The following table reflects the unfilled orders placed with the military services in prior years, the new items ordered and the deliveries made (detail table appears on pp. 518–519).

[In millions]

	1959 actual	*1960 estimate*	*1961 estimate*
Unfilled orders at beginning of year	$2,232	$1,735	$1,343
New items ordered	929	865	1,443
Deliveries	1,426	1,258	1,200
Unfilled orders at end of year	1,735	1,343	1,586

Because of the time lag or "pipeline" inherent in a complex, worldwide supply operation, a large proportion of the items delivered by the U.S. services in any year result from orders placed in previous years. The increase in new items ordered in 1961 will replenish the pipeline, which has been reduced in the past few years by deliveries in excess of new orders.

Other grant-aid operations—

9. *Offshore procurement.*—The reduction in the procurement of equipment and supplies abroad for the military assistance program reflects declining U.S. purchases in individual European countries. U.S. overseas procurement in prior years helped these countries establish a defense production base, which they are now capable of maintaining as a source of supply for their own forces. NATO countries have joined in a program of coordinated procurement of certain follow-on spares, and production of advanced weapons, with technical support from the United States.

10. *Supply operations.*—The annual cost of packing, handling, and transporting military assistance materiel varies in proportion to the types, volume, and destination of goods delivered.

11. *Training.*—Increased training programs in free-world countries are required to insure effective use of the new weapons and equipment supplied through the military assistance program.

12. *Administration.*—The administrative expenses of the U.S. military assistance advisory groups overseas and the departmental costs of the program are included.

13. *Contributions to international military headquarters and agencies.*—Included are the assessments levied against the United States in accordance with cost-sharing agreements for administrative support of North Atlantic Treaty Organization, Southeast Asia Treaty Organization, and the Central Treaty Organization.

14. *Contributions to construction of facilities in other countries.*—Included are (*a*) construction of military and logistical facilities under the jointly financed NATO infrastructure program, and (*b*) contract expenses, architect-engineering services and other overhead items for military assistance construction in other areas.

15. *Research and development.*—This program assists in the research and development of weapons by our allies and aids in combining their scientific capability with U.S. weapons technology.

16. *Other activities.*—These include support for some of the UN forces in Korea, the U.S. support for coordinated production of weapons in Europe and nutritional surveys of forces in underdeveloped areas.

Sales of military materiel—

Many countries which do not receive grant aid may purchase military materiel in the United States. Most sales on a credit basis are initially financed by military assistance appropriations. Depending on the circumstances, repayment of credit sales may be in dollars or in local currency.

The following table shows the repayments and their reuse for new credit sales:

[In millions]

	1959 actual	*1960 estimate*	*1961 estimate*
Unused collections, beginning of year	-----	$21.4	$10.0
Collection of credit sales	$27.8	38.0	40.0
Collections reused	6.4	49.4	40.0
Unused collections, end of year	21.4	10.0	10.0

Local currency repayments may be used to finance additional sales or grants of military assistance. It is anticipated that any local currency repayments used will be converted to dollars to finance additional credit sales. Dollar conversions so made are included in the above table.

GENERAL PROVISIONS

SEC. 601. During the current fiscal year, the Secretary of Defense and the Secretaries of the Army, Navy, and Air Force, respectively, if they should deem it advantageous to the national defense, and if in their opinions, the existing facilities of the Department of Defense are inadequate, are authorized to procure services in accordance with section 15 of the Act of August 2, 1946 (5 U.S.C. 55a), under regulations prescribed by the Secretary of Defense, and to pay in connection therewith travel expenses of individuals, including actual transportation and per diem in lieu of subsistence while traveling from their homes or places of business to official duty station and return as may be authorized by law: *Provided*, That such contracts may be renewed annually.

SEC. 602. During the current fiscal year, provisions of law prohibiting the payment of compensation to, or employment of, any person not a citizen of the United States shall not apply to personnel of the Department of Defense.

SEC. 603. Appropriations contained in this Act shall be available for insurance of official motor vehicles in foreign countries, when required by laws of such countries; payments in advance of expenses determined by the investigating officer to be necessary and in accord with local custom for conducting investigations in foreign countries incident to matters relating to the activities of the department concerned; reimbursement of General Services Administration for security guard services for protection of confidential files; reimbursement of the Federal Bureau of Investigation for expenses in connection with investigation of defense contractor personnel; and all necessary expenses, at the seat of Government of the United States of America or elsewhere, in connection with communication and other services and supplies as may be necessary to carry out the purposes of this Act[: *Provided*, That no appropriation contained in this Act, and no funds available from prior appropriations to component departments and agencies of the Department of Defense, shall be used to pay tuition or to make other payments to educational institutions in connection with the instruction or training of file clerks, stenographers, and typists receiving, or prospective file clerks, stenographers, and typists who will receive compensation at a rate below the minimum rate of pay for positions allocated to grade GS–5 under the Classification Act of 1949, as amended].

SEC. 604. Any appropriation available to the Army, Navy, or the Air Force may, under such regulations as the Secretary concerned may prescribe, be used for expenses incident to the maintenance, pay, and allowances of prisoners of war, other persons in Army, Navy, or Air Force custody whose status is determined by the Secretary concerned to be similar to prisoners of war, and persons detained in such custody pursuant to Presidential proclamation.

SEC. 605. Appropriations available to the Department of Defense for the current fiscal year for maintenance or construction shall be available for acquisition of land as authorized by section [406 of the Act of August 3, 1956 (70 Stat. 1015), as amended] *2672 of title 10, United States Code.*

SEC. 606. Appropriations for the Department of Defense for the current fiscal year shall be available, (a) except as authorized by the Act of September 30, 1950 (20 U.S.C. 236–244), for primary and secondary schooling for minor dependents of military and civilian personnel of the Department of Defense residing on military or naval installations or stationed in foreign countries, as authorized for the Navy by section 7204 of title 10, United States Code, in amounts not exceeding an average of [$265] *$280* per student, when the Secretary of the Department concerned finds that schools, if any, available in the locality, are unable to provide adequately for the education of such dependents; (b) for expenses in connection with administration of occupied areas; (c) for payment of rewards as authorized for the Navy by section 7209(a) of title 10, United States Code, for information leading to the discovery of missing naval property or the recovery thereof; (d) for payment of deficiency judgments and interests thereon arising out of condemnation proceedings; (e) for payment of rentals at the seat of government or elsewhere, and, in administering the provisions of 43 U.S.C. 315q, rentals may be paid in advance.

SEC. 607. Appropriations for the Department of Defense for the current fiscal year shall be available for: (a) donations of not to exceed $25 to each prisoner upon each release from confinement in military or contract prison (except disciplinary barracks) and to each person discharged for fraudulent enlistment; (b) authorized issues of articles to prisoners (except those in disciplinary barracks); (c) subsistence of selective service registrants called for induction, applicants for enlistment while held under observation, prisoners (except those in disciplinary barracks), and supernumeraries when necessitated by emergent military circumstances; (d) reimbursement for subsistence of enlisted personnel while sick in hospitals; and (e) expenses of prisoners confined in nonmilitary facilities: *Provided*, That section 212 of the Act of June 30, 1932 (5 U.S.C. 59a), shall not apply to retired military personnel on duty at the United States Soldiers' Home.

SEC. 608. Insofar as practicable, the Secretary of Defense shall assist American small business to participate equitably in the furnishing of commodities and services financed with funds appropriated under this Act by making available or causing to be made available to suppliers in the United States, and particularly to small independent enterprises, information, as far in advance as possible, with respect to purchases proposed to be financed with funds appropriated under this Act, and by making available or causing to be made available to purchasing and contracting agencies of the Department of Defense information as to commodities and services produced and furnished by small independent enterprises in the United States, and by otherwise helping to give small business an opportunity to participate in the furnishing of commodities and services financed with funds appropriated by this Act.

SEC. 609. No appropriation contained in this Act shall be available for expenses of operation of messes (other than organized messes the operating expenses of which are financed principally from nonappropriated funds) at which meals are sold to officers or civilians except under regulations approved by the Secretary of Defense, which shall (except under unusual or extraordinary circumstances) establish rates for such meals sufficient to provide reimbursement of operating expenses and food costs to the appropriations concerned: *Provided*, That officers and civilians in a travel status receiving a per diem allowance in lieu of subsistence shall be charged at the rate of not less than $2.25 per day: *Provided further*, That for the purposes of this section payments for meals at the rates established hereunder may be made in cash or by deductions from the pay of civilian employees.

SEC. 610. No part of any appropriation contained in this Act shall be available until expended unless expressly so provided elsewhere in this or some other appropriation Act.

SEC. 611. Appropriations of the Department of Defense available for operation and maintenance, may be reimbursed during the current fiscal year for all expenses involved in the preparation for disposal and for the disposal of military supplies, equipment, and materiel, from amounts received as proceeds from the sale of any such property: *Provided*, That a report of receipts and disbursements under this limitation shall be made quarterly to the Committees on Appropriations of the Congress: *Provided further*, That no funds available to agencies of the Department of Defense shall be used for the operation, acquisition, or construction of new facilities or equipment for new facilities in the continental limits of the United States for metal scrap baling or shearing or for melting or sweating aluminum scrap unless the Secretary of Defense or an Assistant Secretary of Defense designated by him determines, with respect to each facility involved, that the operation of such facility is in the national interest.

SEC. 612. (a) During the current fiscal year, the President may exempt appropriations, funds, and contract authorizations, available for military functions under the Department of Defense, from the provisions of subsection (c) of section 3679 of the Revised Statutes, as amended, whenever he deems such action to be necessary in the interest of national defense.

(b) Upon determination by the President that such action is necessary, the Secretary of Defense is authorized to provide for the cost of an airborne alert as an excepted expense in accordance with the provisions of R.S. 3732 (41 U.S.C. 11).

SEC. 613. No appropriation contained in this Act shall be available in connection with the operation of commissary stores of the agencies of the Department of Defense for the cost of purchase (including commercial transportation in the United States to the place of sale but excluding all transportation outside the United States *and to Alaska and Hawaii*) and maintenance of operating equipment and supplies, and for the actual or estimated cost of utilities as may be furnished by the Government and of shrinkage, spoilage, and pilferage of merchandise under the control of such commissary stores, except as authorized under regulations promulgated by the Secretaries of the military departments concerned, with the approval of the Secretary of Defense, which regulations shall provide for reimbursement therefor to the appropriations concerned and, notwithstanding any other provision of law, shall provide for the adjustment of the sales prices in such commissary stores to the extent necessary to furnish sufficient gross revenue from sales of commissary stores to make such reimbursement: *Provided*, That under such regulations as may be issued pursuant to this section all utilities may be furnished without cost to the commissary stores outside the continental United States and in Alaska *and Hawaii*: *Provided further*, That no appropriation contained in this Act shall be available in connection with the operation of commissary stores

Digitized for FRASER

Federal Reserve Bank of St. Louis

within the continental United States unless the Secretary of Defense has certified that items normally procured from commissary stores are not otherwise available at a reasonable distance and a reasonable price in satisfactory quality and quantity to the military and civilian employees of the Department of Defense.

SEC. 614. Notwithstanding any other provision of law, Executive order, or regulation, no part of the appropriations in this Act shall be available for any expenses of operating aircraft under the jurisdiction of the Armed Forces for the purpose of proficiency flying except in accordance with the regulations issued by the Secretaries of the Departments concerned and approved by the Secretary of Defense which shall establish proficiency standards and maximum and minimum flying hours for this purpose: *Provided,* That without regard to any provision of law or Executive order prescribing minimum flight requirements, such regulations may provide for the payment of flight pay at the rates prescribed in section 204(b) of the Career Compensation Act of 1949 (63 Stat. 802) as amended, to certain members of the Armed Forces otherwise entitled to receive flight pay during the fiscal year [1960] *1961* (1) who have held aeronautical ratings or designations for not less than twenty years, or (2) whose particular assignment outside the United States or in Alaska makes it impractical to participate in regular aerial flights.

SEC. 615. No part of any appropriation contained in this Act shall be available for expense of transportation, packing, crating, temporary storage, drayage, and unpacking of household goods and personal effects in excess of eleven thousand pounds net in any one shipment: *Provided,* That the limitations imposed herein shall not be applicable in the case of members transferred to or serving in stations outside the continental United States or in Alaska under orders relieving them from a duty station within the United States prior to July 10, 1952, and who are returned to the United States under orders relieving them from a duty station beyond the United States or in Alaska on or after July 1, 1953.

SEC. 616. Vessels under the jurisdiction of the Department of Commerce, the Department of the Army, the Department of the Air Force, or the Department of the Navy may be transferred or otherwise made available without reimbursement to any such agencies upon the request of the head of one agency and the approval of the agency having jurisdiction of the vessels concerned.

SEC. 617. None of the funds provided in this Act shall be available for training in any legal profession nor for the payment of tuition for training in such profession: *Provided,* That this limitation shall not apply to the off-duty training of military personnel as prescribed by section 621 of this Act.

SEC. 618. Not more than 20 per centum of the appropriations in this Act which are limited for obligation during fiscal year [1960] *1961* shall be obligated during the last two months of the fiscal year: *Provided,* That this section shall not apply to obligations for support of active duty training of civilian components or summer camp training of the Reserve Officers' Training Corps.

SEC. 619. During the fiscal year [1960] *1961* the agencies of the Department of Defense may accept the use of real property from foreign countries for the United States in accordance with mutual defense agreements or occupational arrangements and may accept services furnished by foreign countries as reciprocal international courtesies or as services customarily made available without charge; and such agencies may use the same for the support of the United States forces in such areas without specific appropriation therefor.

In addition to the foregoing, agencies of the Department of Defense may accept real property, services, and commodities from foreign countries for the use of the United States in accordance with mutual defense agreements or occupational arrangements and such agencies may use the same for the support of the United States forces in such areas, without specific appropriation therefor: *Provided,* That within thirty days after the end of each quarter the Secretary of Defense shall render to the Committees on Appropriations of the Senate and the House of Representatives and to the Bureau of the Budget a full report of such property, supplies, and commodities received during such quarter.

SEC. 620. During the current fiscal year, appropriations available to the Department of Defense for research and development may be used for the purposes of section 2353 of title 10, United States Code, and for purposes related to research and development for which expenditures are specifically authorized in other appropriations of the service concerned.

SEC. 621. No appropriation contained in this Act shall be available for the payment of more than 75 per centum of charges of educational institutions for tuition or expenses for off-duty training of military personnel, nor for the payment of any part of tuition or expenses for such training for commissioned personnel who do not agree to remain on active duty for two years after completion of such training.

SEC. 622. No part of the funds appropriated herein shall be expended for the support of any formally enrolled student in basic courses of the senior division, Reserve Officers' Training Corps, who has not executed a certificate of loyalty or loyalty oath in such form as shall be prescribed by the Secretary of Defense.

SEC. 623. No [part of any appropriation contained in this Act shall be available for the procurement of any article of food, clothing, cotton, spun silk yarn for cartridge cloth, or wool (whether in the form of fiber or yarn or contained in fabrics, materials, or manufactured articles) not grown, reprocessed, reused, or produced in the United States or its possessions, except to the extent that the Secretary of the department concerned shall determine that a satisfactory quality and sufficient quantity of any articles of food or clothing or any form of cotton, spun silk yarn for cartridge cloth, or wool grown, reprocessed, reused, or produced in the United States or its possessions cannot be procured as and when needed at United States market prices and except procurements outside the United States in support of combat operations, procurements by vessels in foreign waters and emergency procurements or procurements of perishable foods by establishments located outside the United States for the personnel attached thereto: *Provided,* That nothing herein shall preclude the procurement of foods manufactured or processed in the United States or its possessions: *Provided further,* That no] funds herein appropriated shall be used for the payment of a price differential on contracts hereafter made for the purpose of relieving economic dislocations.

[SEC. 624. None of the funds appropriated in this Act shall be used for the construction, replacement, or reactivation of any bakery, laundry, or dry-cleaning facility in the United States, its Territories or possessions, as to which the Secretary of Defense does not certify in writing, giving his reasons therefor, that the services to be furnished by such facilities are not obtainable from commercial sources at reasonable rates.]

SEC. [625] *624.* During the current fiscal year, appropriations of the Department of Defense shall be available for reimbursement to the Post Office Department for payment of costs of commercial air transportation of military mail between the United States and foreign countries.

SEC. [626] *625.* Appropriations of the Department of Defense available for the payment of rental allowances shall be available for the leasing of quarters in foreign countries constructed under the authority of section 302 of Public Law 534, approved July 14, 1952, for assignment as public quarters to military personnel of the Department of Defense.

SEC. [627] *626.* Appropriations contained in this Act shall be available for providing furnishings, without charge, in other than public quarters occupied by military or civilian personnel of the Department of Defense on duty outside the continental United States or in Alaska, upon a determination, under regulations approved by the Secretary of Defense, that such action is advantageous to the Government.

SEC. [628] *627.* During the current fiscal year appropriations available to the Department of Defense for pay of civilian employees shall be available for uniforms, or allowances therefor, as authorized by the Act of September 1, 1954, as amended (5 U.S.C. 2131).

SEC. [629] *628.* During the current fiscal year, the Secretary of Defense shall, upon requisition of the National Board for the Promotion of Rifle Practice, and without reimbursement, transfer from agencies of the Department of Defense to the Board ammunition from stock or which has been procured for the purpose in such amounts as he may determine.

Such appropriations of the Department of Defense available for obligation during the current fiscal year as may be designated by the Secretary of Defense shall be available for the travel expenses of military and naval personnel, including the reserve components, and members of the Reserve Officers' Training Corps attending regional, national or international rifle matches.

[SEC. 630. Funds provided in this Act for legislative liaison activities of the Department of the Army, the Department of the Navy, the Department of the Air Force, and the Office of the Secretary of Defense shall not exceed $2,650,000: *Provided,* That this amount shall be available for apportionment to the Department of the Army, the Department of the Navy, the Department of the Air Force, and the Office of the Secretary of Defense as determined by the Secretary of Defense.]

[SEC. 631. Of the funds made available by this Act for the services of the Military Air Transport Service, $85,000,000 shall be available only for procurement of commercial air transportation service; and the Secretary of Defense shall utilize the services of civil air carriers which qualify as small businesses to the fullest extent found practicable.]

[SEC. 632. Not to exceed $7,000,000 of the funds made available in this Act for the purpose shall be available for the hire of motor vehicles.]

SEC. [633] *629.* During the current fiscal year, the Secretary of Defense should he deem it advantageous to the national defense to

GENERAL PROVISIONS—Continued

accelerate any strategic or tactical missile program, may transfer under the authority and terms of the Emergency Fund, an additional $150,000,000 for the acceleration of such missile program or programs: *Provided,* That the transfer authority made available under the terms of the Emergency Fund appropriation contained in this Act is hereby broadened to meet the requirements of this section: *Provided further,* That the Secretary of Defense shall notify the Appropriations Committees of the Congress promptly of all transfers made pursuant to this authority. (*Department of Defense Appropriation Act, 1960.*)

GENERAL PROVISIONS—MILITARY CONSTRUCTION

SEC. 101. Funds appropriated to the military departments for construction in prior years are hereby made available for construction authorized for each such department by the authorizations enacted into law during the [first] *second* session of the Eighty-sixth Congress.

SEC. 102. None of the funds appropriated in this Act shall be expended for payments under a cost-plus-a-fixed-fee contract for work where cost estimates exceed $25,000 to be performed within the United States, except Alaska, without the specific approval in writing of the Secretary of Defense setting forth the reasons therefor.

SEC. 103. None of the funds appropriated in this Act shall be expended for additional costs involved in expediting construction unless the Secretary of Defense certifies such costs to be necessary to protect the national interest and establishes a reasonable completion date for each project, taking into consideration the urgency of the requirement, the type and location of the project, the climatic and seasonal conditions affecting the construction and the application of economical construction practices.

SEC. 104. None of the funds appropriated [in this Act] *to the Department of Defense* shall be used for the construction, replacement, or reactivation of any bakery, laundry, or drycleaning facility in the United States, its Territories or possessions, as to which the Secretary of Defense does not certify, in writing, giving his reasons therefor, that the services to be furnished by such facilities are not obtainable from commercial sources at reasonable rates.

SEC. 105. Funds appropriated to the military departments for construction are hereby made available for: [(1) advance planning, construction design and architectural services, as authorized by section 504 of the Act of September 28, 1951, as amended (69 Stat. 352), (2) acquisition of land, installation of outside utilities, and site preparation for housing projects to be constructed under title VIII of the National Housing Act, as amended, as authorized by section 505 of the Act of September 28, 1951 (65 Stat. 365), (3)] *(1)* hire of passenger motor vehicles, and [(4)] *(2)* the construction, or acquisition by lease or otherwise, of family housing and community facilities projects in foreign countries as authorized by section 407(b) of the Act of September 1, 1954 (68 Stat. 1119), as amended.

SEC. 106. Appropriations to the military departments for construction may be charged for the cost of administration, supervision and inspection of family housing authorized pursuant to title IV of the Act of August 11, 1955 (Public Law 345), as amended, in an amount not to exceed three and one-half per centum of the cost of each such project: *Provided,* That such appropriations shall be reimbursed from the proceeds of any mortgage executed on each such project.

SEC. 107. Funds appropriated to the military departments for construction may be used for advances to the Bureau of Public Roads, Department of Commerce, for the purposes of section 210 of title 23, United States Code, when projects authorized therein are certified as important to the national defense by the Secretary of Defense.

SEC. 108. None of the funds appropriated in this Act may be used to begin construction on new bases for which specific appropriations have not been made.

SEC. 109. During the current fiscal year, appropriations available for construction of family quarters for personnel shall not be obligated for such construction at a cost per family unit in excess of $22,000 on housing units for generals or equivalent; $19,800 on housing units for colonels or equivalent; $17,600 on housing units for majors and lieutenant colonels, or equivalent; $15,400 on housing units for second lieutenants, lieutenants, captains, and warrant officers, or equivalent; or $13,200 on housing units for enlisted personnel, except that when such units are constructed outside the continental United States or in Alaska, the average cost per unit of all such units shall not exceed $32,000 and in no event shall the individual cost exceed $40,000, and except that the Secretary of the Army may provide 156 units of family housing for company grade officers at the United States Military Academy at a unit cost of not more than $20,300 per family unit[; the family unit costs for family housing including land authorized to be purchased by section 103 of the Act of August 30, 1957 (Public Law 85–241), may exceed by not more than 15 per centum the respective limitations on such costs contained in this Act].

SEC. 110. No part of the funds contained in this Act shall be used to incur obligations for the planning, design, or construction of facilities for an Air Force Academy the total cost of which will be in excess of $139,797,000.

SEC. 111. No part of the funds provided in this Act shall be used for purchase of land or land easements in excess of 100 per centum of the value as determined by the Corps of Engineers or the Bureau of Yards and Docks, except: (a) where there is a determination of value by a Federal court, (b) purchases negotiated by the Attorney General or his designee, and (c) where the estimated value is less than $25,000.

SEC. 112. None of the funds appropriated in this Act may be used to make payments under contracts for any project in a foreign country unless the Secretary of Defense or his designee, after consultation with the Secretary of the Treasury or his designee, certifies to the Congress that the use, by purchase from the Treasury, of currencies of such country acquired pursuant to law is not feasible for the purpose, stating the reason therefor.

[SEC. 113. None of the funds appropriated in this Act shall be used for the construction of a combat operations center for the North American Air Defense Command at a cost in excess of $29,000,000.]

SEC. 113. The unexpended balance of amounts heretofore made available under the heading "Military construction, foreign countries" shall be merged with appropriations available during fiscal year 1961 for military assistance authorized by chapter I of the Mutual Security Act, 1954, as amended. (*Military Construction Appropriation Act, 1960.*)

GENERAL PROVISIONS—MILITARY ASSISTANCE

SEC. —. Funds appropriated in this Act for military assistance shall not be subject to other general provisions of this Act, except that, when pursuant to section 522 of the Mutual Security Act of 1954, as amended, authority granted in such other general provisions is utilized with respect to such funds, they may be utilized only in accordance with the terms and conditions applicable to such authority.

DEPARTMENT OF DEFENSE—CIVIL

New obligational authority of $978 million recommended for civil functions of the Department of Defense for 1961 will finance the rivers and harbors and flood control activities of the Corps of Engineers—Army; transportation and general government activities for the Panama Canal; administration of the Ryukyu Islands; and the national cemetery system administered by the Army Quartermaster Corps. Appropriations of $936 million recommended for the water resources and related programs of the Corps of Engineers make up 96% of the new obligational authority recommended for 1961.

An increase of $63 million over the 1960 appropriations is requested for the Corps of Engineers, including $21 million for starting some new water resources projects. This increase will be partly offset by reductions in appropriations for capital outlays for the Ryukyu Islands. These and smaller changes result in a net increase of $51 million in 1961 over the total new obligational authority for 1960.

Expenditures for the civil programs of the Department of Defense are estimated to increase by $65 million to a total of $972 million in 1961. This total includes $910 million for the Corps of Engineers, an amount higher than that of any previous year. Most of the increase for the Department's civil programs will be for construction activities of the Corps of Engineers, including $10 million for the proposed new water resources projects. Other increases include those for widening sections of the Panama Canal and construction of the Panama Canal (Balboa) Bridge, alteration and additions to the Gorgas Hospital in the Canal Zone, and construction of a powerplant in the Ryukyu Islands.

New obligational authority and expenditures for Department of Defense—Civil are shown by function in the table below:

DEPARTMENT OF THE ARMY

Cemeterial Expenses

Current authorizations:

SALARIES AND EXPENSES

For necessary cemeterial expenses as authorized by law, including maintenance, operation, and improvement of national cemeteries, and purchase of headstones and markers for unmarked graves; purchase of one passenger motor vehicle [for replacement only]; maintenance of that portion of Congressional Cemetery to which the United States has title, Confederate burial places under the jurisdiction of the Department of the Army, and graves used by the Army in commercial cemeteries; [$8,964,150] *$9,400,000*: *Provided,* That this appropriation shall not be used to repair more than a single approach road to any national cemetery: *Provided further,* That this appropriation shall not be obligated for construction of a superintendent's lodge or family quarters at a cost per unit in excess of $17,000, but such limitation may be increased by such additional amounts as may be required to provide office space, public comfort rooms, or space for the storage of Government property within the same structure: *Provided further,* That reimbursement shall be made to the applicable military appropriation for the pay and allowances of any military personnel performing services [exclusively] *primarily* for the purposes of this appropriation. (*24 U.S.C. 271, 273–276, 278–279, 279a–b, 282, 288, 290; Public Works Appropriation Act, 1960.*)

Appropriated 1960, **$8,964,150** Estimate 1961, **$9,400,000**

Program and Financing

	1959 actual	1960 estimate	1961 estimate
Program by activities:			
1. Operation and maintenance	$3,936,703	$4,543,500	$4,960,000
2. Construction	230,137	902,850	400,000
3. Headstone procurement	2,643,584	2,886,000	3,359,000
4. Administration	630,100	631,800	681,000
Total obligations	7,440,524	8,964,150	9,400,000
Financing:			
Advances and reimbursements from non-Federal sources (31 U.S.C. 489a)	−6,249		
Unobligated balance no longer available	15,725		
Appropriation (new obligational authority)	7,450,000	8,964,150	9,400,000

This appropriation pays to operate and maintain the national cemetery system, and provides free headstones and markers for the graves of eligible persons. The workload consists of three main factors: gravesites maintained, interments, and headstone applications. Each of these has increased steadily over the last decade as the death rate of the veteran population has increased. This rate will continue to increase through the year 2000.

1. *Operation and maintenance.*—The national cemetery system consists of 85 national cemeteries and 33 smaller burial plots and monument sites. Major workload factors are:

	1959 actual	*1960 estimate*	*1961 estimate*
Interments	30,446	32,563	34,854
Gravesites maintained	897,850	953,877	983,999

2. *Construction.*—Funds are included for 2 gravesite development projects, 4 landscaping projects, 1 road project, and future planning and engineering investigations.

3. *Headstone procurement.*—Headstones are provided for graves in national cemeteries and for graves of military personnel and veterans buried in private cemeteries. The 1961 program is based on an increase of 7% in new applications, 1,000 replacements, and 1,000 memorial markers for persons whose remains are not recoverable.

HEADSTONE PROCUREMENT REQUIREMENTS

	1959 actual	*1960 estimate*	*1961 estimate*
Applications from previous year	10,555	15,172	20,074
Applications received	115,986	124,174	132,726
Less applications carried forward	15,172	20,074	13,000
Total procurement	111,369	119,272	139,800

4. *Administration.*—This item provides for processing applications for headstones and markers, determination of eligibility for interment, and management of the national cemetery system.

Rivers and Harbors and Flood Control

The Corps of Engineers, Army—Civil, improves and maintains rivers and harbors throughout the United States, Puerto Rico, and the Virgin Islands in the interest of navigation, control of floods, related hydroelectric power development, and allied water uses.

The total appropriation requested amounts to $936.4 million, representing an increase of $66.5 million compared with the amount appropriated for 1960 and an increase of $120.3 million compared with the appropriation for 1959. The increased funds are made necessary by the large number of new projects initiated during the past several years. Funds in the amount of $21 million are requested for new construction starts. Approximately 82% of the requested appropriations will be applied to construction and 15% to operation and maintenance activities.

Current authorizations:

The following appropriations shall be expended under the direction of the Secretary of the Army and the supervision of the Chief of Engineers for authorized civil functions of the Department of the Army pertaining to rivers and harbors, flood control, beach erosion, and related purposes:

GENERAL INVESTIGATIONS

For expenses necessary for the collection and study of basic information pertaining to river and harbor, flood control, shore protection, and related projects, and when authorized by law, [preliminary examinations,] surveys and studies (including cooperative beach erosion studies as authorized in Public Law [Numbered] 520, [Seventy-first Congress,] approved July 3, 1930, as amended and

(*d*) International water studies	42,816	51,700	60,000
3. Research and development:			
(*a*) Beach erosion development studies	189,307	200,000	200,000
(*b*) Hydrologic studies	122,220	150,000	152,000
(*c*) Civil works investigations	1,217,492	1,175,000	1,220,000
(*d*) Mississippi basin model:			
(1) Construction	615,817	682,000	700,000
(2) Mississippi River comprehensive study	72,831	102,000	150,000
4. Tennessee-Tombigbee Waterway restudy	8,510	13	
5. Alaska pierhead line survey	7,463	130,000	2,537
6. Arkansas-Red River pollution		70,000	3,125
Total program costs	10,709,899	11,282,852	10,303,792
7. Relation of costs to obligations:			
Costs financed from obligations of other years, net (−)	−48,478		
Obligations incurred for costs of other years, net		23,729	4,687
Total program (obligations)	10,661,421	11,306,581	10,308,479
Financing:			
Unobligated balance brought forward	−2,106,731	−1,633,810	−808,479
Unobligated balance carried forward	1,633,810	808,479	
Appropriation (new obligational authority)	10,188,500	10,481,250	9,500,000

1. *Surveys and studies.*—Surveys are made to determine the need and economic justification of proposed navigation and flood control improvements. These surveys are made in cooperation with appropriate Federal and State agencies and will be restricted to a limited number of high-priority investigations.

In addition, cooperative beach erosion control studies are conducted at specific localities. These cooperative studies are paid for equally by the Federal Government and by State and local agencies.

Special studies are made in cooperation with State and other Federal agencies in the interest of navigation, flood control, power and related purposes.

NUMBER OF REPORTS

Status	*1959 actual*	*1960 estimate*	*1961 estimate*
Navigation and flood control surveys:			
Completed	104	86	89
Continued	127	106	65
Initiated	67	59	[1] 11
Beach erosion control cooperative studies:			
Completed	4	6	9
Continued	0	3	0
Initiated	8	2	0
Special studies:			
Completed	0	1	1
Continued	6	8	9
Initiated	3	2	0

[1] Excludes 8 surveys initiated and shown as completed and 7 surveys resumed and shown as continued—making a total of 26 surveys initiated or resumed in 1961.

Completed reports are those acted upon by the Board of Engineers for Rivers and Harbors or the Beach Erosion Board.

2. *Collection and study of basic data.*—Funds will be made available in the amounts of $340,000 to the Weather Bureau for hydrometeorological studies and precipitation stations, $235,000 to the Geological Survey for installation, operation, and maintenance of stream gaging stations, and $50,000 to the Fish and Wildlife Service for preauthorization studies of the effect of proposed navigation and flood control projects upon fish and wildlife. Also, members of the Corps of Engineers will participate in a number of engineering and control boards to study and control international streams and watersheds which mutually affect the United States and bordering nations.

3. *Research and development.*—General beach erosion development studies deal with physical phenomena, techniques, basic principles, and remedial or control measures related to shore protection and improvement. The results of these studies are disseminated to interested other Federal, State, and local agencies and individuals.

Hydrologic studies include investigations of such phenomena as storms, rainfall, streamflow, and sedimentation to provide basic data used in the design, construction, and operation of water control structures.

Civil works investigations assist in the solution of engineering problems. The solutions are widely applicable to the design, construction, and operation and maintenance of civil works projects. This item also provides for the operation of the research center at the Waterways Experiment Station, Vicksburg, Miss.

Construction of the Mississippi basin model at the Waterways Experiment Station will be continued. In addition, funds are requested to continue the initial phase of a Mississippi River comprehensive study on the completed portion of the Mississippi basin model. The primary objectives of this initial basin-wide testing program are to improve the operation of the reservoir system in the Mississippi River Basin, to assure optimum operation of the reservoir system, and to study potential flood levels on the lower Mississippi River.

5. *Alaska pierhead line survey.*—This activity will be completed with prior year funds.

6. *Arkansas-Red River pollution.*—Prior year funds will be used to conduct studies to determine the geologic origin of saline contamination of water resources in the Arkansas-Red River Basins and remedial measures to be taken. The study is conducted in cooperation with the Public Health Service and other agencies.

11. Rehabilitation of existing projects:			
(a) Advance engineering and design			500,000
(b) Construction—Small rehabilitation projects under $400,000			2,000,000
12. Undistributed reduction based on anticipated delays and savings			−40,000,000
Total obligations	611,831,974	709,115,751	733,066,839
Financing:			
Unobligated balance brought forward	−61,934,266	−62,402,343	−14,642,839
Recovery of prior year obligations	−4,053,551		
Unobligated balance carried forward	62,402,343	14,642,839	
Appropriation (new obligational authority)	608,246,500	661,356,247	718,424,000

The requested appropriation of $718.4 million represents an increase of $57 million compared with the amount appropriated for 1960 and an increase of $110.2 million compared with 1959. An analysis of the costs to this appropriation and the resources available to complete the projects in the various activities are set forth in the tabulations under the appropriate activity heading. Of the appropriations requested, about 70% will be applied to 36 major projects in amounts of $5 million or more each.

The monetary authorization available for appropriation after 1961 for projects in this program amounts to $3,285.4 million. The status of the overall construction program excluding projects classified as inactive or deferred for restudy but including projects completed in prior years is summarized in the following table.

NUMBER AND ESTIMATED COST OF AUTHORIZED PROJECTS [1]

	Number of authorized projects				*Estimated cost in millions*				
	Total	*Completed* [2]	*Underway* [3]	*Balance authorized* [4]	*Total*	*To June 30, 1959*	*1960*	*1961*	*Balance to complete*
Activity:									
Navigation [5]	2,380	2,094	178	108	$5,190.2	$2,387.0	$197.6	$211.8	$2,393.8
Alteration of bridges	17	8	8	1	36.8	21.4	9.7	2.1	3.6
Beach erosion control	69	13	18	38	33.1	5.9	.7	.9	25.6
Flood control [6]	808	381	185	242	5,899.7	2,188.6	227.5	248.1	3,235.5
Multiple-purpose projects, including power	60	21	26	13	5,800.3	2,952.1	212.3	284.0	2,351.9
Total	3,334	2,517	415	402	16,960.1	7,555.0	647.8	[7] 746.9	8,010.4

[1] Excludes projects classified as inactive or deferred for restudy.
[2] Also includes projects essentially complete.
[3] Uncompleted projects in the active program for which construction funds have been appropriated. Includes 20 projects or project modifications that do not have funds presently available for expenditure.
[4] Includes projects not yet funded and parts of approved comprehensive basin plans for which funds are not yet available.
[5] Includes authorized modifications of original projects.
[6] Excludes snagging and clearing and emergency flood control projects.
[7] Program total: Actual appropriation request is $706.9 million.

Federal Reserve Bank of St. Louis

1. *Advance engineering and design.*—Design studies establish project features and cost estimates required for preparation of contract plans. The funds requested will bring designs and plans for a number of high priority projects to the stage where they will be ready for construction, and will permit continuation or initiation of planning on other needed projects. The program of restudy of projects classified as deferred for restudy will be continued.

2. *Navigation projects.*—This activity includes improvement of channels and harbors for navigation by dredging and by construction of breakwaters, jetties, and dikes and construction of locks, dams, and canals.

With the funds requested, work will be continued on 35 channel and harbor projects, of which 12 will be completed, and on 12 lock, dam, and canal projects, of which 4 will be completed in 1961. Construction will be initiated on eight channel and harbor and two lock and dam projects or project modifications and reimbursement will be made to compensate local interests on one channel and harbor project as follows:

CHANNEL AND HARBOR PROJECTS

1. Homer Harbor, Alaska [1]
2. Seldovia Harbor, Alaska [1]
3. Santa Cruz Harbor, Calif.
4. Bridgeport Harbor, Conn.
5. Port Everglades Harbor, Fla.
6. Baltimore Harbor—42-foot channel, Maryland
7. Minnesota River, Minn.
8. Freeport Harbor, Tex.[1]
9. Milwaukee Harbor—Outer Harbor, Wis. (reimbursement)

LOCK AND DAM PROJECTS

1. New Poe lock, Michigan
2. Maxwell locks and dam, Pennsylvania

[1] To be completed with funds recommended for 1961.

[1] Advance engineering and design only.

3. *Alteration of bridges.*—Obstructive bridges over navigable waterways are altered in accordance with an apportionment of the costs of alteration between the United States and the bridge owners.

The funds requested will finance the Federal share of the cost of altering three bridges, one of which will be completed in 1961.

4. *Beach erosion control projects.*—The Federal Government assists in the construction of works for the restoration and protection against erosion by waves and currents of the shores of the United States and possessions. Federal contributions may not exceed one-third of the construction costs of such projects.

With the funds requested, reimbursements will be made to compensate local interests on 6 projects as follows:

1. Rehoboth Beach to Indian River Inlet, Del.
2. Lake Worth Inlet to South Lake Worth Inlet, Fla.
3. Kenilworth, Ill.
4. Quincy Shore, Mass. [1]
5. Ocean City, N.J.
6. Selkirk Shores State Park, N.Y.

[1] To be completed with funds recommended for 1961.

Federal Reserve Bank of St. Louis

5. *Flood control projects.*—This activity includes local protection projects and flood control reservoirs without power installations. Local protection projects consist of channel improvements, levees, and floodwalls. Provision is made for emergency bank protection; for snagging and clearing work on navigable streams and tributaries when such work is necessary in the interest of flood control; and for the construction of small flood control projects not specifically authorized by Congress.

With the funds requested, work will be continued on 52 local protection projects, 17 of which will be completed, and on 46 reservoir projects, 11 of which will be completed in 1961. Ten new local protection projects and two new reservoir projects will be initiated as shown below.

The administration has recommended legislation to provide for a more equitable sharing of the cost of flood control works between the Federal and local interests. Its adoption and application to new starts proposed herein would reduce the Federal Government's cost for these projects by as much as $5 million.

LOCAL PROTECTION PROJECTS

1. Kawainui Swamp, Hawaii
2. Campbells Island, Ill.
3. Floyd River, Iowa
4. Bayou Chevreuil, La.[1]
5. Pantego and Cucklers Creek, N.C.[1]
6. Lower Columbia River bank protection, Oregon and Washington.
7. Washington, Pa.
8. Fox Point hurricane barrier, Rhode Island.
9. Colfax, Wash.
10. Williamson, W. Va.

RESERVOIR PROJECTS

1. Monroe Reservoir, Ind.
2. Milford Reservoir, Kans.

[1] To be completed with funds recommended for 1961.

[1] Advance engineering and design only.

7. *Recreation on completed projects.*—Public use facilities will be provided at about 69 completed projects to accommodate a rapidly increasing number of visitors.

8. *Small authorized projects.*—The Federal Government assists in the construction of authorized channel and harbor, shore protection, and flood control projects, each of which has a total estimated Federal cost of $400,000 or less.

9. *Lower Columbia River fish sanctuary program.*—A program to counteract damages to fisheries resulting from the construction of major dams and other obstructions in the lower Columbia River has been developed by the Fish and Wildlife Service together with the fisheries departments of the States of Oregon and Washington.

10. *Fish and wildlife studies.*—This program provides for detailed studies and reports by the Fish and Wildlife Service to determine the effects on fish and wildlife resources of water-control projects of the Corps of Engineers. Prior to 1960, this activity was financed by charges against individual projects.

11. *Rehabilitation of existing projects.*—Provision is made for the preparation of cost estimates and plans and specifications for major rehabilitation work on completed projects and for work on small rehabilitation projects each of which has an estimated Federal cost of $400,000 or less.

The various activities in the construction program are summarized in the following cost tabulation:

[In thousands]

PROGRAM BY ACTIVITIES	Costs to this appropriation: Total estimate	To June 30, 1958	1959 actual	1960 estimate	1961 estimate	Analysis of 1961 financing: Deduct selected resources and unobligated balance, start of year	Add selected resources, end of year	Appropriation required for 1961	Appropriation required to complete	Percent cost complete through 1961

OPERATION AND MAINTENANCE, GENERAL

For expenses necessary for the preservation, operation, maintenance, and care of existing river and harbor, flood control, and related works, including such sums as may be necessary for the maintenance of harbor channels provided by a State, municipality, or other public agency, outside of harbor lines, and serving essential needs of general commerce and navigation; financing the United States share of the cost of operation and maintenance of remedial works in the Niagara River; *activities of the California Debris Commission; administration of laws pertaining to preservation of navigable waters;* surveys and charting of northern and northwestern lakes and connecting waters; clearing and straightening channels; removal of obstructions to navigation; rescue work, and repair, or restoration of flood control projects threatened or destroyed by flood; and not to exceed [$1,706,250] *$1,915,000* for transfer to the Secretary of the Interior for conservation of fish and wildlife as authorized by law; *$125,000,000,* to remain available until expended[, $114,934,950]. *(16 U.S.C. 661–666, 756; 33 U.S.C. 1, 414, 415, 441–451, 540, 603a, 661, 678, 683, 701, 701n, 705; 66 Stat. 596; 72 Stat. 301, 302; Public Works Appropriation Act, 1960.)*

Appropriated 1960, **$114,934,950** Estimate 1961, [a] **$125,000,000**

[a] Includes $732,000 for activities previous carried under "General expenses." The amounts obligated in 1959 and 1960 are shown in the schedule as comparative transfers.

Program and Financing

	1959 actual	1960 estimate	1961 estimate
Program by activities:			
1. Navigation:			
(*a*) Channels and harbors	$53,930,570	$56,470,000	$59,400,000
(*b*) Locks, dams, and canals	23,456,184	23,725,000	25,470,000
(*c*) Survey of northern and northwestern lakes	645,883	618,000	650,000
(*d*) Protection of navigation	3,318,448	3,279,000	3,355,000
2. Flood control:			
(*a*) Reservoirs	5,013,090	5,180,000	6,225,000
(*b*) Channel improvements, inspections, and miscellaneous maintenance	897,835	875,000	860,000

Appropriation (new obligational authority)	114,521,100	114,934,950	125,000,000

The appropriation requested is $125 million. This represents an increase of $10.1 million compared with 1960 and an increase of $10.5 million compared with 1959. This appropriation finances the operation of existing facilities and the accomplishment of essential maintenance work

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

designed to hold costly repair and rehabilitation work in the future to a minimum. A supplemental appropriation for wage-board increases for 1960 in amount of $3.3 million is anticipated under Proposed for later transmission.

1. *Navigation.*—This provides for operation and maintenance of 123 channel and harbor projects and 32 canals and canalized waterways. Provision is also made for surveys of the northern and northwestern lakes to obtain data for charts and bulletins for safe navigation; for the prevention of obstructions and injurious deposits in the harbors of New York, Baltimore, and Hampton Roads; for marking and removal of wrecks and obstructions to safe navigation; and for clearing and straightening channels of navigable waters.

Provision is made for the administration of laws for the protection and preservation of the navigable waters of the United States, regulation of hydraulic mining, inspection of bridges and approval of bridge plans, investigation of wrecks and oil pollution, control of dumping, and establishment of fish stake limits and harbor lines. This was formerly financed under General expenses.

2. *Flood control.*—In 1961, 134 flood control reservoirs will be operated and maintained. Provision is also made for the minimum regular maintenance of 18 local flood protection projects, rehabilitation work, and inspection of completed flood control projects to determine adequacy of compliance by local interests with prescribed maintenance requirements.

3. *Multiple-purpose projects including power.*—At the end of 1961, 36 multiple-purpose projects with an installed capacity of 6,924,000 kilowatts will be operated and maintained.

4. *Lower Columbia River fish sanctuary program.*—Funds are allocated to the Fish and Wildlife Service for operation and maintenance of hatcheries and related facilities.

5. *Niagara remedial works.*—The costs of operation and maintenance of works to preserve and enhance the scenic beauty of Niagara Falls are divided equally between the United States and Canada.

6. *Emergency flood control activities.*—The amount requested will replenish the authorized emergency flood control fund for expenses in connection with flood emergency preparation, flood fighting and rescue operations and emergency repair and restoration of flood control works such as the relief of the flood threat by possible breaching of the natural dam created by an earthquake slide on the Madison River, Mont., in August 1959.

Relation of costs to obligations.—The relationship is derived from year-end balances of selected resources and applicable adjustment as reflected in the following table:

GENERAL EXPENSES

For expenses necessary for general administration and related functions in the Office of the Chief of Engineers and offices of the Division Engineers; activities of the Board of Engineers for Rivers and Harbors[,] *and* the Beach Erosion Board[, and the California Debris Commission; administration of laws pertaining to preservation of navigable waters]; commercial statistics; and miscellaneous investigations; [$12,324,000] *$12,120,000. (22 U.S.C. 266; 33 U.S.C. 426–426h, 541, 701, 703, 704; Public Works Appropriation Act, 1960.)*

Appropriated 1960, **$12,324,000** Estimate 1961, [a] **$12,120,000**

[a] Excludes $732,000 for activities transferred in the estimates to "Operation and maintenance, general." The amounts obligated in 1959 and 1960 are shown in the schedule as comparative transfers.

New obligational authority	12,738,700	12,324,000	12,120,000

1. *Executive direction and management.*—In addition to the Office, Chief of Engineers, there are 9 division offices supervising work decentralized in 38 district offices which are financed from other appropriations.

2. *Review boards.*—The River and Harbor Board reviews reports on proposed projects and makes advisory recommendations to the Chief of Engineers. The Beach Erosion Board, in cooperation with the States, studies the prevention of shore erosion, develops standards, and reviews reports.

3. *Commercial statistics.*—Data on waterborne commerce are collected, compiled, and published.

4. *Special investigations.*—Investigations are made and reports prepared pursuant to congressional and other special requests for current information pertaining to the civil works program.

5. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources and applicable adjustment as reflected in the following table:

	1958 actual	*1959 actual*	*1960 estimate*	*1961 estimate*
Selected resources at end of year: Inventories and items on order:				
Unpaid undelivered orders (appropriation balance obligated for goods and services on order not yet received)	$87,888	$73,932	$39,689	$39,689

The Corps of Engineers, Army—Civil, is responsible for the flood control program for the lower Mississippi Valley from Cape Girardeau, Mo., to the Gulf of Mexico, including the main alluvial stream, the basins of the St. Francis and White, Lower Arkansas, Yazoo, Tensas, and Atchafalaya Rivers, and Bayou La Fourche, and the alluvial lands around Lake Pontchartrain. The adopted plan calls for raising and strengthening about 1,600 miles of existing levees along the main river, for enlarging or constructing some 1,700 miles of levees on tributaries and in side basins, for channel improvement and bank stabiliza-

tion on the main river, for dredging of the main river to provide a navigation channel 12 feet deep and 300 feet wide from Baton Rouge, La., to Cairo, Ill., and for five flood-detention reservoirs on minor tributaries.

The following tabulation sets forth the program, in terms of costs, reconciled to fund requirements, for each activity. Percentages of completion at the end of 1961 are shown for construction features.

[In thousands]

[1] Advance engineering and design only.

1. *General investigations.*—Provision is made for three studies, two of which will be completed in 1961, and the collection of basic data which are subsequently used in planning and designing projects.

3. *Construction.*—The estimated total cost of flood control and related improvements in the lower Mississippi River and its alluvial valley is estimated at $1,492 million, of which $1,110 million has been appropriated through 1960. Improvements estimated to cost $144 million have been completed and improvements estimated at $69 million have not been started. The funds requested will be applied to continuation of 14 features of the project which by the end of 1961 will have been brought to respective percents of completion shown in the tabulation above.

4. *Maintenance.*—Provision is made for operation and ordinary maintenance of the major features of the project.

6. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources as reflected in the following table:

Selected resources at end of year: Inventories and items on order:	1958 actual	1959 actual	1960 estimate	1961 estimate
Stores (goods unconsumed by projects)	$33,662	$21,745	----------	----------

UNITED STATES SECTION, SAINT LAWRENCE RIVER JOINT BOARD OF ENGINEERS

For necessary expenses of the United States section of the Saint Lawrence River Joint Board of Engineers, established by Executive Order 10500, dated November 4, 1953, including services as authorized by section 15 of the Act of August 2, 1946 (5 U.S.C. 55a), at rates not to exceed $100 per day for individuals; [$39,000] *$30,000*: *Provided*, That no part of these funds shall be obligated until agreement has been entered into, by the United States Government and the United States entity authorized to construct the power works in the International Rapids section of the Saint Lawrence River, providing for the reimbursement of the expenditures of the United States section of this Board by the construction entity. (*Public Works Appropriation Act, 1960.*)

Appropriated 1960, **$39,000** Estimate 1961, **$30,000**

Program and Financing

	1959 actual	1960 estimate	1961 estimate
Program by activities:			
1. Review of designs, plans and specifications (total program costs)	$27,889	$39,000	$30,000
2. Relation of costs to obligations: Costs financed from obligations of other years, net (−)	−878		
Total program (obligations)	27,011	39,000	30,000
Financing:			
Unobligated balance no longer available	72,989		
Appropriation (new obligational authority)	100,000	39,000	30,000

The U.S. section of the Saint Lawrence River Joint Board of Engineers reviews plans and coordinates construction, in conjunction with the Canadian section of the Joint Board, of power facilities being constructed in the International Rapids section of the Saint Lawrence River by the Power Authority of the State of New York jointly with the Hydro-Electric Power Commission of Ontario. These expenditures will be repaid to the general fund by the Power Authority of the State of New York.

2. *Relation of costs to obligations.*—Recovery of prior year obligations in 1959 was $878.

ADMINISTRATIVE PROVISIONS

Appropriations in this title shall be available for *expenses of attendance by military personnel at meetings in the manner authorized by section 19(b) of the Act of July 7, 1958 (72 Stat. 336)*, uniforms, or allowances therefor, as authorized by the Act of September 1, 1954, as amended (5 U.S.C. 2131), and for printing, either during a recess or session of Congress, of survey reports authorized by law, and such survey reports as may be printed during a recess of Congress shall be printed, with illustrations, as documents of the next succeeding session of Congress; and during the current fiscal year the revolving fund, Corps of Engineers, shall be available for purchase (not to exceed one hundred and [seventy-six] *sixty* for replacement only) and hire of passenger motor vehicles. (*Public Works Appropriation Act, 1960.*)

ALLOCATIONS RECEIVED FROM OTHER ACCOUNTS

NOTE.—Obligations incurred under allocations from other accounts are shown in the schedules of the parent appropriation as follows:
"Construction of hospital and domiciliary facilities," Veterans Administration.
"Capital outlay," United States Soldiers' Home.
"Disaster relief," funds appropriated to the President.
"Salaries and expenses," National Science Foundation.
"Construction," Bureau of Sport Fisheries and Wildlife, Department of the Interior.
"Passamaquoddy tidal power survey," Department of State.
"United States dollars advanced from foreign governments, United States educational exchange program," Department of State.
"Mutual security," funds appropriated to the President.
"Construction," Bureau of Indian Affairs, Department of the Interior.
"Salaries and expenses," Office of Civil and Defense Mobilization.
"Operating expenses, Washington Aqueduct," District of Columbia.

Permanent authorizations:

PAYMENTS TO STATES, FLOOD CONTROL ACT OF 1954

(Indefinite special fund)

Appropriated (est.) 1960, **$1,500,000** Estimate 1961, **$1,500,000**

Program and Financing

	1959 actual	1960 estimate	1961 estimate
Program by activities:			
Payments to States (total costs—obligations) (object class 11)	$1,471,951	$1,435,101	$1,500,000
Financing:

Unobligated balance carried forward	5,735,044	1,930,597	430,597
Financing applied to program	232,896,547	238,309,908	239,840,000

[1] Excludes property transferred in without reimbursement, net, as follows: June 30, 1959, $148,252; 1960, $114,109; 1961, $100,000.

The fund provides for expenses necessary for the acquisition, operation, and maintenance of plant and equipment of the Corps of Engineers used in civil works functions, for temporary financing of services finally chargeable to appropriations for civil works functions, and for furnishing of facilities and services for the military functions of the Department of the Army and other governmental agencies and private persons (67 Stat. 199).

Budget program—Operating costs.—Plant and equipment services include operating costs of such items of plant as dredges, other floating plant, and land-based equipment. Warehousing covers cost of receipt, storage, and issue of inventories. Shop and facility services include operating costs of repair and maintenance shops, boatyards, and printing and reproduction plants. General administrative services include engineering and support functions of Corps of Engineers district and area offices. Operating costs of these activities are expected to increase in 1960 and 1961 principally due to increased plant operation costs.

Capital outlay.—Land and structures includes replacement and improvement costs of buildings, facilities, and related land. Dredges and other floating plant include replacement and improvement costs for dredges and dredging equipment, and such other vessels as tugs, tenders, and towboats. Of the 1959 costs $7.2 million was for acquisition of a replacement hopper dredge for use on the Great Lakes. Remaining acquisition costs for this vessel of $2.8 million are expected to accrue in 1960 bringing total costs to $10.5 million. The increase for other floating plant in 1960 and 1961 includes accrual of $0.75 million in each year for a replacement towboat expected to cost $1.5 million, and the resumption of replacements and improvements which have been deferred because of expenditures for the replacement hopper dredge. Land-based equipment includes replacement and improvement costs of transportation and construction equipment and fixed land equipment such as shop tools and fixed power driven equipment.

Financing.—Operations are financed from reimbursements or advances from the appropriations or individuals who utilize the services or facilities, at rates to cover all operating costs.

Operating results and financial condition.—The decrease in net operating income between 1959 and 1961 is attributable to adjustments in rates charged for cost of services furnished, thereby resulting in a decrease in retained earnings from $3.1 million to $0.7 million. Earnings, if any, are retained and reduced by adjustments to rates charged for services in subsequent years.

The initial capital of the fund was provided by assumption of the assets, liabilities, and obligations of the plant accounts, as carried on the records of the Corps of Engineers as of June 30, 1953, and by an appropriation of $100. Capital of the fund is limited to $140 million (67 Stat. 199). In 1959, capital of the fund was reduced $4.4 million and liabilities were increased to reflect the value of accrued annual leave due additional employees whose labor costs have been authorized to be initially financed through this fund. Capital was increased $0.1 million in 1959 because of a net transfer of assets from other agencies without reimbursement.

Relation of costs to obligations.—The relationship is derived from year-end balances of selected resources as reflected in the following table:

	1958 actual	*1959 actual*	*1960 estimate*	*1961 estimate*
Selected resources at end of year:				
Inventories and items on order:				
Inventories	$8,590,124	$8,282,987	$7,900,000	$7,800,000
Unpaid undelivered orders	14,770,103	6,735,918	4,500,000	3,900,000
Deferred and undistributed items	1,281,653	1,180,001	800,000	400,000
Total selected resources at end of year	24,641,880	16,198,906	13,200,000	12,100,000
Selected resources at start of year (−)		−24,641,880	−16,198,906	−13,200,000
Costs financed from obligations of other years, net (−)		−8,442,974	−2,998,906	−1,100,000

The United States Soldiers' Home provides medical and domiciliary care and other authorized benefits for the relief and support of certain old, invalid, or disabled soldiers of the Regular Army and airmen of the Air Force. Funds for operation and maintenance of the home are appropriated from the Soldiers' Home permanent fund (trust fund) and not from the general funds of the Treasury.

1. *Medical care.*—A hospital operated as a part of the home cares for the daily average patient loads shown below. In addition, certain members receive specialized care at other hospitals.

	1959 actual	*1960 estimate*	*1961 estimate*
Patients in home hospital	358	365	375
Patients in other hospitals	70	75	75

2. *Domiciliary activities.*—The daily average number of members receiving domiciliary care is shown below.

	1959 actual	*1960 estimate*	*1961 estimate*
Members present	1,424	1,465	1,530

3. *Administration and central services.*—Included in this activity are service functions such as administration, supply, utility services, maintenance, transportation, and laundry.

4. *Permanent improvements.*—No new obligational authority is requested for 1960.

A proposed supplemental increase in limitation for wage board salary increases for 1960 is shown under Proposed for later transmission.

RYUKYU ISLANDS, ARMY

Current authorizations:

ADMINISTRATION

For expenses, not otherwise provided for, necessary to meet the responsibilities and obligations of the United States in connection with the government of the Ryukyu Islands, including, subject to such authorizations and limitations as may be prescribed by the Secretary of the Army, tuition, travel expenses, and fees incident to instruction in the United States or elsewhere of such persons as may be required to carry out the provisions of this appropriation; travel expenses and transportation; services as authorized by section 15 of the Act of August 2, 1946 (5 U.S.C. 55a), of individuals not to exceed ten in number; not to exceed [$3,000] *$4,000* for contingencies for the High Commissioner, to be expended in his discretion; translation rights, photographic work, educational exhibits, and dissemination of information, including preview and review expenses incident thereto; hire of passenger motor vehicles and aircraft; purchase of three passenger motor vehicles for replacement only; construction, repair, and maintenance of buildings, utilities, facilities, and appurtenances; and such supplies, commodities, and equipment as may be essential to carry out the purposes of this appropriation; [$5,282,000] *$6,704,000*, of which not to exceed [$1,633,000] *$1,744,000* shall be available for administrative and information expenses: *Provided*, That the general provisions of the Appropriation Act for the current fiscal year for the military functions of the Department of the Army shall apply to expenditures made from this appropriation: *Provided further*, That expenditures from this appropriation may be made outside continental United States when necessary to carry out its purposes, without regard to sections 355, 3648, and 3734, Revised Statutes, as amended, section 4774(d) of title 10, United States Code, civil service or classification laws, or provisions of law prohibiting payment of any person not a citizen of the United States: *Provided further*, That expenditures may be made hereunder for the purposes of economic rehabilitation in the Ryukyu Islands in such manner as to be consistent with the general objectives of titles II and III of the Mutual Security Act of 1954, and in the manner authorized by sections 505(a) and 522(e) thereof: *Provided further*, That funds appropriated hereunder may be used, insofar as practicable, and under such rules and regulations as may be prescribed by the Secretary of the Army to pay ocean transportation charges from United States ports, including Territorial ports, to ports in the Ryukyus for the movement of supplies donated to, or purchased by, United States voluntary nonprofit relief agencies registered with and recommended by the Advisory Committee on Voluntary Foreign Aid or of relief packages consigned to individuals residing in such areas: *Provided further*, That under the rules and regulations to be prescribed, the Secretary of the Army shall fix and pay a uniform rate per pound for the ocean transportation of all relief packages of food or other general classification of commodities shipped to the Ryukyus regardless of methods of shipment and higher rates charged by particular agencies of transportation, but this proviso shall not apply to shipments made by individuals to individuals: *Provided further*, That the President may transfer to any other department or agency any function or functions provided for under this appropriation, and there shall be transferred to any such department or agency without reimbursement and without regard to the appropriation from which procured, such property as the Director of the Bureau of the Budget shall determine to relate primarily to any function or functions so transferred. (*Mutual Security Appropriation Act, 1960.*)

Appropriated 1960, **$5,282,000** Estimate 1961, **$6,704,000**

Program and Financing

	1959 actual	1960 estimate	1961 estimate
Program by activities:			
1. Administration	$1,529,046	$1,633,000	$1,744,000
2. Construction of administrative facilities		300,000	50,000
3. Exchange of persons	202,150	264,000	280,000
4. Aid to Ryukyuan economy	1,087,985	3,085,000	4,630,000
Total obligations	2,819,181	5,282,000	6,704,000
Financing:			
Advances and reimbursements from non-Federal sources	−5,183		
Unobligated balance no longer available	46,402		
Appropriation (new obligational authority)	2,860,400	5,282,000	6,704,000

This appropriation provides for administering the Ryukyu Islands through a civil administration headed by a High Commissioner. The United States is empowered by the treaty of peace with Japan to exercise jurisdiction over the territory and its 850,000 inhabitants. Pursuant to Executive Order 10713 of June 5, 1957, the Army is charged with developing an effective and responsible Ryukyuan Government, based on democratic principles and supported by a sound financial structure and with improving the welfare and well-being of the inhabitants of the Ryukyu Islands. Since a system of military bases and other installations pertinent to the defense of the Pacific areas has been developed in these islands which are of critical strategic importance to the security of the free world, it is expected that the United States will be responsible for their administration for an indefinite period.

2. *Construction of facilities.*—Replacement of one cultural center initiated in 1960 will be completed and reconstruction of another is planned for 1961.

3. *Exchange of persons.*—Provision is made for visits of Ryukyuan leaders and for a program of advanced study by Ryukyuan students in the United States and Hawaii.

4. *Aid to Ryukyuan economy.*—Technical assistance is furnished for the education program in the Ryukyus. Grants are made to supplement revenues of the local government in meeting costs of essential public safety and public health services, and in constructing public facilities. Grants were $1,000,000 in 1959; $3,000,000 in 1960; and $4,500,000 is proposed in 1961.

Additional economic aid is furnished by the United States through the general fund of the civil administration and through other programs. In 1959, the latter included $300,000 made available from the military construction project for resettlement of persons displaced from land taken for military use, approximately 9.0 million pounds of surplus foodstuffs furnished through voluntary relief organizations, and $543,000 derived from foreign currency and surplus rice allocated by the International Cooperation Administration, without reimbursement, to assist in typhoon relief and reconstruction. In 1960, an additional $400,000 of resettlement project funds will be allocated and $880,000 derived from prior years typhoon relief allocations of surplus agricultural products are available for expenditure. In addition, surplus rice and feed corn with an approximate value in the Ryukyus of $1,000,000 has been made available under title II, Public Law 480, to assist in relieving damage from a series of typhoons which swept the islands in the late fall of 1959. Some 13.7 million pounds of additional surplus commodity aid is expected to be furnished through voluntary relief organizations. No further economic aid from these latter two sources is programed for 1961.

In addition to this appropriation the general fund of the civil administration is available for economic assistance and development in the Ryukyus. It receives income from business-type instrumentalities and from investments in financial and public utility organizations. Summary statements of assets and cash receipts and expenditures of the general fund of the U.S. civil administration follow:

RYUKYU ISLANDS, ARMY—Continued

Current authorizations—Continued

ADMINISTRATION—Continued

The investments in business enterprises represent the total net worth of these organizations except the bank and the life insurance company in each of which the U.S. civil administration holds 51% of the outstanding stock. In these two organizations, the investment is stated at cost but has a substantially higher actual value because of accumulated earnings and established earning capacity. The housing corporation operates at a loss. When disposal of this enterprise is feasible on reasonable terms, its liquidation is planned. Disposal of U.S. civil administration investment in the life insurance company will be accomplished in 1960. The investment in a refrigeration plant, presently leased for a nominal rental return, also is planned to be liquidated.

CASH RECEIPTS AND EXPENDITURES

Total expenditures	4,232,360	6,528,300	3,918,700
Net increase or decrease (−) in cash balance	4,175,413	−3,354,300	−576,500

Income from operations is derived primarily from the net earnings of the electric power and water corporations and the reconstruction finance fund, from the purchase and resale of petroleum products and from interest, rent, and dividend receipts.

Receipts from liquidation of investments primarily represent reductions in the working capital used in financing petroleum products and, in 1959 alone, inventories of imported rice. The earnings of the electric power and water corporations and the reconstruction finance fund are being reinvested within the respective corporations each year. In addition, the investment in the water corporation is being increased both by the cost of completed facilities constructed from a 1959 appropriation and by the investment of additional civil administration general fund capital in the corporation each year for the expansion of the water system for central Okinawa. Capital is being invested each year in the reconstruction finance fund, a major source of long-term credit to assist in continued economic development by local enterprise and in financing the construction of typhoon-resistant private housing. Grants are made to the local central government and to municipalities for essential public facilities and programs. The cash balance retained in the fund is available to meet contingent requirements, including relief and reconstruction measures in the event of a serious emergency, such as a typhoon.

The government of the Ryukyu Islands was created by the U.S. civil administration on April 1, 1952. In addition to local revenue derived primarily from income and excise taxes, this government receives grants to cover expenses related to the requirements of the U.S. forces and for assistance in the development of public facilities and services. This government has not been authorized by the United States to incur deficits in its fiscal operations or to borrow for any purpose, and it must, therefore, maintain a minimum working balance in its treasury. A financial statement follows:

[CONSTRUCTION OF POWER SYSTEMS, RYUKYU ISLANDS]

[For loans by the Secretary of the Army to the Ryukyu Electric Power Corporation, an instrumentality of the United States Civil Administration of the Ryukyu Islands, for completion of construction, installation, and equipment of electric power systems in the Ryukyu Islands, $18,000,000, to remain available until expended: *Provided*, That repayment of such loans shall be made to miscellaneous receipts of the Treasury over a period of twenty-five years to commence five years after the date any such loan is made, with interest at such rate as may be fixed by the Secretary of the Treasury, taking into consideration the current average market yields of outstanding marketable obligations of the United States having a comparable maturity.] (*Mutual Security Appropriation Act, 1960.*)

Appropriated 1960, **$18,000,000**

Program and Financing

	1959 actual	1960 estimate	1961 estimate
Program by activities:			
1. Construction of transmission line and substations	$86,145	$179,807	
2. Construction of conventional power plant with four 20,000-kilowatt generator units, installation, equipment of plant and facilities		200,000	$17,800,000
Total obligations	86,145	379,807	17,800,000
Financing:			
Unobligated balance brought forward	−265,952	−179,807	−17,800,000
Unobligated balance carried forward	179,807	17,800,000	
Appropriation (new obligational authority)		18,000,000	

1. *Transmission line and substations.*—Construction of a transmission line, including substations, from Kadena to Camp Schwab at Henoko will be completed and in operation in 1960.

2. *Conventional powerplant.*—A start will be made in 1961 on the construction and equipment of a power generating plant, currently planned to consist ultimately of four 20,000-kilowatt generating units together with the necessary housing and ancillary facilities. The first of these units is expected to come on the line in 1963 and other units will follow as required to meet demand load. When new units are all in place it will permit the retirement from the integrated power system of certain overage, high operating cost units now in service.

Financing for this facility estimated to cost $22,700,000 will be from $18,000,000 appropriated to Army for advance to Ryukyu Electric Power Corp. as a loan, to be repaid over 25 years with interest, and from $4,700,000 available to the Ryukyu Electric Power Corp. from depreciation, earnings, and reserves.

CONSTRUCTION OF WATER SYSTEM, RYUKYU ISLANDS

Program and Financing

	1959 actual	1960 estimate	1961 estimate
Program by activities:			
Construction, installation and equipment of water system (object class 10)	$246,498	$353,502	
Financing:			
Unobligated balance brought forward		−353,502	
Unobligated balance carried forward	353,502		
Appropriation (new obligational authority)	600,000		

A dam and pumping station are in the completion stage. A raw water supply line is under construction to provide an additional source of water to the civil population, and is expected to be in operation by July 1, 1960.

THE PANAMA CANAL

Current authorizations:

CANAL ZONE GOVERNMENT

OPERATING EXPENSES

For operating expenses necessary for the Canal Zone Government, including operation of the Postal Service of the Canal Zone; hire of passenger motor vehicles; uniforms or allowances therefor, as authorized by the Act of September 1, 1954, as amended (5 U.S.C. 2131); expenses incident to conducting hearings on the Isthmus; expenses of special training of employees of the Canal Zone Government as authorized by law (63 Stat. 602; 72 Stat. 327); contingencies of the Governor; residence for the Governor; medical aid and support of the insane and of lepers and aid and support of indigent persons legally within the Canal Zone, including expenses of their deportation when practicable; and payments of not to exceed $50 in any one case to persons within the Government service who shall furnish blood for transfusions; [$18,900,000] *$18,850,000: Provided, That annual accrued expenditures under this appropriation account, covering amounts becoming payable as a result of obligations incurred both in the current fiscal year and in prior fiscal years, shall not exceed $18,850,000. (2 C.Z. Code, sec. 5; 64 Stat. 1038; 72 Stat. 852; Department of Commerce and Related Agencies Appropriation Act, 1960.)*

Total program (obligations)	17,883,932	18,809,900	18,850,000
Financing:			
Unobligated balance no longer available	186,168	90,100	
Appropriation (new obligational authority)	18,070,100	18,900,000	18,850,000

This appropriation provides for those functions in the Canal Zone which, in the United States, would be performed by State and local governments and civilian departments of the Federal Government, and for the operation of hospitals and clinics. All operating expenses, including depreciation, are recovered and paid into the Treasury as miscellaneous receipts. Such recoveries are derived from revenue from individuals and agencies served and the balance from the Panama Canal Company as follows:

Repayments to Treasury (including depreciation):	*1959 actual*	*1960 estimate*	*1961 estimate*
Revenue:			
Hospitals and clinics	$3,212,176	$3,306,800	$3,345,900
Education	2,066,684	2,130,000	2,155,000
Postal service	930,756	940,000	940,000
Fire protection	550,967	509,800	518,600
All others	469,013	458,900	460,400
Total revenue	7,229,596	7,345,500	7,419,900
Net costs reimbursable by Panama Canal Company	11,646,136	12,516,900	12,510,300
Total repayable to Treasury	18,875,732	19,862,400	19,930,200

1. *Civil functions*—(*a*) *Customs and immigration.*—This provides for the activities usually incident to such functions (except that no collection of customs duties is involved) and in addition includes special activities relating to transiting vessels and the execution of certain treaty obligations to the Republic of Panama.

(*b*) *Postal service.*—The postal system serves the entire Canal Zone and operates under policies and regulations generally similar to those of the U.S. Post Office Department, including money order and postal savings services.

WORKLOAD

	1959 actual	*1960 and 1961 estimate*
Airmail dispatched (pounds)	186,055	185,000
Airmail received (pounds)	289,551	289,000
Surface mail dispatched (pounds)	361,410	360,000
Surface mail received (sacks)	73,736	73,000

(*c*) *Police protection.*—This includes the usual police functions of preservation of the peace and enforcement of the law in the Canal Zone (not including military reservations), operation of prisons, and police guards for certain facilities.

(*d*) *Fire protection.*—All firefighting facilities in the Canal Zone except those required for aircraft crash fires and fires aboard naval vessels and ammunition depots are consolidated under the Canal Zone Government.

(*e*) *Judicial system.*—This includes the operation of two magistrate courts and the expenses of the district court (exclusive of salaries) which serves as both a State and Federal court.

(*f*) *Education.*—This provides for the operation of schools, kindergarten through junior college, for the dependents of Canal Zone residents and, on a space available basis, certain residents of Panama. There are two school systems; one for U.S. citizens, the other, which is conducted in the Spanish language, for Panamanians and other noncitizens. There also are specialized facilities for handicapped children.

ENROLLMENT DATA

	1959 actual	*1960 estimate*	*1961 estimate*
U.S. citizen schools	7,090	7,312	7,217
Latin-American schools	3,884	4,020	4,088
Total	10,974	11,332	11,305

(*g*) *Public areas and facilities.*—This includes the cleaning, lighting, and maintenance of streets and highways; maintenance of sewers, and care of public areas within the Canal Zone, not including military reservations.

(*h*) *Library.*—This provides for the operation of public library facilities for residents of the Canal Zone and technical reference services for Government agencies.

(*i*) *Internal security.*—This provides for loyalty investigations and related intelligence services for the Government and the Company.

(*j*) *Other civil affairs.*—This includes licensing civil defense activities and supervision of the civil functions program.

2. *Health and sanitation*—(*a*) *Hospitals and clinics.*—Two complete general medical and surgical hospitals with outpatient clinics, a neuropsychiatric and domiciliary hospital, and a leprosarium are operated and maintained. Medical care of all eligible civilians and military personnel in the Canal Zone is provided in the two general hospitals operated by the Government.

AVERAGE NUMBER OF INPATIENTS PER DAY (EXCLUDING NEWBORNS)

	1959 actual	*1960 estimate*	*1961 estimate*
Gorgas hospital	268.7	280.0	270.0
Coco Solo hospital	84.0	80.0	80.0
Corozal hospital	243.6	240.0	235.0
Palo Seco leprosarium	117.3	117.0	117.0
Total	713.6	717.0	702.0

(*b*) *Other public health services.*—This provides for sanitation and quarantine work in the Canal Zone and for ships calling at its ports and transiting the canal; inspection of food processing establishments; and facilities for animal care and quarantine.

3. *General government expense*—(*a*) *Office of the Governor.*—This provides for the executive direction of all Canal Zone Government activities and includes the expense of the office of the Governor and his residence, the office of the executive secretary, and provision for certain contingencies.

(*b*) *Other general government expense.*—This includes the Canal Zone Government's share of the cost of general and administrative expenses provided by the Panama Canal Company which the Canal Zone Government is without staff or facilities to perform or furnish; expenses of recruitment and repatriation, employees' home leave travel costs, and other general charges.

4. *Unfunded adjustments to total operating costs.*—During 1959 net writeoffs of prior capitalizations amounted to $2,678. Such writeoffs consist of amounts chargeable to operating expenses which were previously accrued as capital outlay expenditures.

5. *Relation of costs to accrued expenditures.*—This account includes a limitation on annual accrued expenditures in accordance with Public Law 85–759, approved August 25, 1958 (31 U.S.C. 11(b)–(f)). The relationship is derived from year-end balances of accrued resources as reflected in the following table:

	1958 actual	*1959 actual*	*1960 estimate*	*1961 estimate*
Accrued resources at end of year:				
Stores (goods unconsumed by projects)	$137,382	$155,322	$155,322	$155,322
Accrued annual leave (leave earned and not yet taken by employees) charged to activity costs (−)	−1,763,899	−1,891,087	−1,891,087	−1,891,087
Total accrued resources at end of year	−1,626,517	−1,735,765	−1,735,765	−1,735,765
Accrued resources at start of year		1,626,517	1,735,765	1,735,765
Costs financed from accrued expenditures of other years, net (−)		−109,248

Appropriation (new obligational authority)			3,100,000	2,870,000	6,800,000				

This provides for the acquisition by purchase, construction, or otherwise, of capital assets required by the Canal Zone Government. In 1961, the principal projects in which the agency will be engaged are: (*a*) Alterations and additions to Gorgas Hospital; (*b*) rehabilitation of Corozal Hospital; (*c*) continuation of the Pacific-side sewage disposal program; (*d*) completion of a junior high school at Diablo Heights; (*e*) construction of a swimming pool at Paraiso; (*f*) continuation of the Pacific-side quarters replacement program; and (*g*) routine continuing projects among which are additions and replacements to municipal systems, road and street replacements, and additions and renewals of equipment.

This account includes a limitation on annual accrued expenditures in accordance with Public Law 85–759, approved August 25, 1958 (31 U.S.C. 11(b)–(f)).

Unobligated balance carried forward			14,133,728	758,500	522,500				
Appropriation (new obligational authority)			19,250,000						

A $750,000 supplemental appropriation was enacted in 1958 and an appropriation of $19,250,000 was enacted in 1959 to provide for the $20,000,000 cost of constructing a high-level bridge across the Panama Canal at Balboa, Canal Zone, as authorized and directed by the act of July 23, 1956 (ch. 665, 70 Stat. 596). Construction of the bridge will fulfill the U.S. commitment to the Republic of Panama under the terms of point 4 of the General Relations Agreement between the United States and Panama of May 18, 1942 (Executive Agreement Series 452), and of item 5 of the Memorandum of Understandings Reached, signed January 25, 1955.

1. The design work on the bridge proper was completed in 1959.

2. Construction work which started in 1959 will be completed in 1963.

4. *Relation of costs to obligations.*—The year-end balances of unpaid undelivered orders are as follows: 1958, $457,437; 1959, $4,172,018; 1960, $13,460,000; 1961, $7,725,000.

[1] Excludes property transferred in without charge, net, as follows: 1959, $2,850,927; 1960, $75,000.

The Panama Canal Company is a wholly owned Government corporation chartered by the act of June 29, 1948 (62 Stat. 1076), as amended by the act of September 26, 1950 (64 Stat. 1041), for the primary purpose of maintaining and operating the interoceanic canal at the Isthmus of Panama. In furtherance of that mission, and in consideration of the international agreements under which the canal enterprise is operated, the Company conducts necessary supporting operations.

Budget program—1. *Transit operations.*—This is the primary program of the Company and comprises the transiting operations and the maintenance of the canal. Estimates for 1960 and 1961 reflect reductions resulting from discontinuance of suction dredging in channel and harbor maintenance, nonrecurrence of 1959 expense incident to a successful experimental removal and overhaul of lock miter gates, and a consequent decrease in the annual accrual for locks overhauls. Costs for these operations are shown in the following table:

	1959 actual	*1960 estimate*	*1961 estimate*
Maintenance of channels and harbors	$4,262,565	$3,091,400	$2,957,300
Navigation service and control	6,576,651	7,036,400	7,398,700
Locks operations	8,212,741	7,867,500	7,977,500
General canal expense	1,796,163	1,814,700	1,630,600
Net operating costs	20,848,120	19,810,000	19,964,100

In the period 1952 through 1959 the average annual net income has amounted to $3.2 million, which is approximately equivalent to the tolls from two average-size ships per day.

Federal Reserve Bank of St. Louis

Actual and estimated traffic volume is shown by the following data:

	1958 actual	1959 actual	1960 estimate	1961 estimate
Selected data on canal operations:				
Commercial vessel transits: Number of ships (over 300 net Panama Canal tons)	9,187	9,718	9,761	9,944
Ships berthed	4,992	4,712	4,650	4,650
Tolls and toll credits at current rates	$42,834,006	$46,546,620	$47,500,000	$48,000,000
Other transit revenue	$3,694,093	$3,747,914	$3,633,000	$3,645,000

Capital outlay costs amount to $17,228,200 in 1961 and include $13,136,000 for continuing the canal capacity program and $2,129,000 for replacement of locks towing locomotives and cranes.

2. *Maritime services.*—These consist of vessel repair facilities, and harbor terminal and marine bunkering operations. Costs, which depend upon customer demand for services, are as follows:

	1959 actual	1960 estimate	1961 estimate
Vessel repair	$2,650,019	$2,867,000	$2,755,100
Harbor terminals	4,362,928	4,375,000	4,475,000
Total operating costs	7,012,947	7,242,000	7,230,100
Less intra-agency recoveries	2,215,483	2,382,700	2,142,100
Net operating costs	4,797,464	4,859,300	5,088,000

Capital outlay costs in 1961 include $380,000 to complete replacement of a dock and $160,500 for routine replacement of equipment.

3. *Employee services.*—As shown below, these costs include housing and marketing operations for eligible employees against whom charges are made to reimburse the Company. Costs estimated for 1961 show a modest decline from those estimated for 1960 and experienced in 1959.

	1959 actual	1960 estimate	1961 estimate
U.S. community housing	$1,718,991	$1,710,600	$1,734,300
Latin-American community housing	665,147	696,600	683,500
Marketing operations	17,740,687	17,551,000	17,331,000
Total operating costs	20,124,825	19,958,200	19,748,800
Less intra-agency recoveries	932,362	921,400	920,800
Net operating costs	19,192,463	19,036,800	18,828,000

Capital outlay costs estimated for 1961 include (*a*) $2,190,000 for continuation of a quarters replacement program; (*b*) $336,000 for replacement and addition of equipment; (*c*) $250,000 for modernizing existing quarters; and (*d*) $268,000 for air conditioning two buildings of the Balboa retail store.

4. *Transportation and utilities services.*—Costs estimated for 1961 provide for rising wages, increasing costs of operating materials and supplies, and increased depreciation expense.

	1959 actual	1960 estimate	1961 estimate
Railroad	$1,533,895	$1,535,000	$1,590,000
Motor transportation	1,752,273	1,760,000	1,834,000

Power system	2,284,274	2,147,900	2,096,200
Communications system	557,759	569,000	594,200
Water system	1,244,911	1,257,100	1,261,400
Total operating costs	13,417,297	13,504,500	13,838,800
Less intra-agency recoveries	5,153,364	4,856,100	4,917,400
Net operating costs	8,263,933	8,648,400	8,921,400

Estimates for capital outlay in 1961 total $1,772,000 and are mainly for (*a*) completing the conversion of the power system to 60 cycles, $504,800; (*b*) replacing railroad rolling stock, $390,000; (*c*) replacing motor vehicles, $284,000; (*d*) replacing a portion of the trans-Isthmian telephone cable, $225,000; and (*e*) routine replacements and additions of equipment, $179,400.

5. *Other supporting services.*—Costs of this group follow:

	1959 actual	1960 estimate	1961 estimate
Tivoli guest house	$490,091	$490,000	$495,000
Printing plant	344,598	353,000	355,400
Grounds maintenance	984,260	995,700	1,035,400
Engineering and maintenance services	5,907,382	5,931,800	5,663,100
Supply operations	5,166,045	4,959,800	5,252,500
Total operating costs	12,892,376	12,730,300	12,801,400
Less intra-agency recoveries	10,163,721	10,362,800	10,492,300
Net operating costs	2,728,655	2,367,500	2,309,100

Capital outlay costs estimated for 1961 total $577,000 and include $471,000 for replacing and adding equipment and $100,000 for rehabilitating the Tivoli Guest House.

6. *General corporate expense.*—This includes payments to the Treasury for the net cost of Canal Zone Government and interest, general and administrative expenses under statutory limitation, and other general charges. The scope of general and administrative expenses under statutory limitation includes virtually all general charges other than interest on the investment of the United States and the net cost of the Canal Zone Government.

	1959 actual	1960 estimate	1961 estimate
Net cost of Canal Zone Government	$11,646,136	$12,516,900	$12,510,300
Interest expense	8,979,415	8,815,500	8,747,800
Other general corporate expense	8,793,484	8,600,600	8,701,500
Total general corporate expense	29,419,035	29,933,000	29,959,600

Capital outlay costs estimated for 1961 amount to $482,000 of which $162,000 is for modernizing and air conditioning office buildings and $320,000 is for minor replacements, additions and improvements, advance planning of future projects, and plant retirement and removal costs.

8. *Relation of costs to obligations.*—The relationships for operating costs and capital outlay are derived by year-end balances of selected resources as reflected in the following tables:

RELATION OF OPERATING COSTS TO OBLIGATIONS

	1958 actual	1959 actual	1960 estimate	1961 estimate
Selected resources at end of year:				
Inventories	$7,904,791	$8,075,408	$7,900,000	$7,900,000
Other current assets	201,339	258,717	250,000	250,000
Unpaid undelivered orders (operations)	2,452,763	2,446,426	2,450,000	2,450,000

Unpaid undelivered orders (capital outlay)	$6,009,244	$7,719,806	$15,390,061	$10,816,954
Selected resources at start of year (−)		−6,009,244	−7,719,806	−15,390,061
Costs financed from obligations of other years, net (−)				−4,573,107
Obligations incurred for costs of other years, net		1,710,562	7,670,255	

Financing.—The Company is authorized to obtain appropriations for its capital needs and to cover losses sustained in the conduct of its activities. It is expected that the foregoing budget programs will continue to be financed entirely from revenue. Under Public Law 86–200 (73 Stat. 428), approved August 25, 1959, the Company may borrow with interest from the Treasury amounts not exceeding a total of $10 million outstanding at any

time. A $10 million emergency fund, previously deposited by the Company with the Treasury is deemed under Public Law 86–200, to be a return of invested funds instead of a payment out of retained earnings and the capital structure of the Company is adjusted accordingly.

Operating results and financial condition.—There will be an increase in retained earnings in 1960 estimated at $24,994,800 of which (*a*) $4,320,000 is from operations; (*b*) $10,674,800 from credits gained through the final transfers of Panama Canal Company and Canal Zone Government properties to the Republic of Panama under terms of the 1955 Treaty (71 Stat. 509); and (*c*) $10 million from reclassification of the emergency fund payment as provided in Public Law 86–200 (73 Stat. 428). The $4,680,000 increase in retained earnings estimated for 1961 wholly represents net operating income for that year.

Sources and Application of Funds (Operations)

	1959 actual	1960 estimate	1961 estimate
Gross expenditures (funds applied):			
Acquisition of assets: Purchase, construction, or improvement of fixed assets	$11,270,621	$14,057,831	$20,100,000
Operations (including locks overhauls)	83,063,782	78,438,800	79,684,624
Increase in selected working capital	708,225		
Total gross expenditures	95,042,628	92,496,631	99,784,624
Receipts from operations (funds provided):

MISCELLANEOUS ACCOUNTS—Continued

Public enterprise funds:

DEFENSE PRODUCTION GUARANTEES

Guarantees are given on loans made by public and private financing institutions by the Army, Navy, and Air Force to facilitate performance of defense production contracts. When necessary, loans may be purchased by the Government. Administrative expenses are paid out of guarantee fees and interest on loans receivable. Funds in excess of guaranteed loan program requirements may be transferred to miscellaneous receipts of the Treasury. Advances from appropriations available for procurement may be made to this fund for its temporary use. Net earnings are retained to purchase loans when required under guarantee commitments and to cover possible future losses (50 U.S.C. App. 2091).

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

The budget recommends $3,431 million in new obligational authority for 1961, a decrease of $56 million from 1960 and an increase of $176 million over 1959. The budget emphasizes the continued expansion of the Food and Drug Administration, defense educational activities, and vocational rehabilitation programs. An increase over 1960 is also requested for environmental health activities of the Public Health Service, which are being consolidated under an appropriation bearing that title; included in this increase is provision for more than doubling radiological health activities. An increase of $40 million is provided for public assistance grants to meet the increased workload in 1961. In addition, an increase of $14 million to a total of $19 million is recommended for urgently needed direct construction at Gallaudet College, Howard University, Saint Elizabeths Hospital, and for the Public Health Service. However, the total increases in new obligational authority for 1961 are more than offset by decreases of $54 million for grants to schools in federally affected areas, $25 million for grants to build waste treatment facilities, and $60 million for hospital construction grants.

Expenditures in 1961 are estimated at $3,517 million, an increase of $100 million over 1960 and $425 million over 1959. Except for an increase of $30 million in public assistance grants, the increase in expenditures in major part reflect prior year appropriation increases and amount to $35 million for defense educational activities, $17 million for grants for hospital construction, and $26 million for the National Institutes of Health. These increases are partially offset by a decrease of $26 million in expenditures for assistance to schools in federally affected areas.

FOOD AND DRUG ADMINISTRATION

Current authorizations:

SALARIES AND EXPENSES

For necessary expenses not otherwise provided for, of the Food and Drug Administration, including [purchase of not to exceed twenty-five passenger motor vehicles for replacement only] *not to exceed $80,000 for construction of a laboratory barn at the Agricultural Research Center, Beltsville, Maryland*; reporting and illustrating the results of investigations; purchase of chemicals, apparatus, and scientific equipment; payment in advance for special tests and analyses by contract; and payment of fees, travel, and per diem in connection with studies of new developments pertinent to food and drug enforcement operations; [$13,800,000] *$16,852,000*. (*Federal Food, Drug, and Cosmetic Act, as amended (21 U.S.C. 301–392); Tea Importation Act, as amended (21 U.S.C. 41–50); Import Milk Act (21 U.S.C. 141–149); Federal Caustic Poison Act (15 U.S.C. 401–411); Filled Milk Act, as amended (21 U.S.C. 61–64); Department of Health, Education, and Welfare Appropriation Act, 1960.*)

Appropriated 1960, **$13,800,000** Estimate 1961, **$16,852,000**

Appropriation (new obligational authority)	10,917,000	13,800,000	16,852,000

The laws enforced hereunder are designed to protect consumers against adulterated and misbranded foods, drugs, cosmetics, therapeutic devices, and caustic poisons.

In 1961 a program of surveillance and inspection of food samples for radiation contamination will be expanded. A supplemental is proposed for 1960 for the purchase of equipment to facilitate an early initiation of the expanded program.

1. *Field inspections, investigations, and laboratory analyses.*—Inspections of domestic plants, examinations of interstate and import shipments, and special investigations are planned according to the relative incidence and seriousness of probable violations. About 100,000 establishments (manufacturing plants, warehouses, shippers) dealing in foods, drugs, devices, or cosmetics are subject to inspection. Retail establishments dealing in products received in interstate commerce are also subject to the prohibition against adulteration or misbranding. Samples are collected during inspections, and investigations and laboratory analyses are conducted to detect and identify adulteration. The budget provides for continuing the program of modernizing certain district offices. Four additional offices are scheduled for modernization in 1961.

2. *Research and methodology.*—Research is conducted to evaluate the components of foods, drugs, devices, and cosmetics and to appraise their efficacy, toxicity, and acute and long-range effects. Research is also performed to develop analytical methods for use in field analysis of inspectional samples and to develop food standards and pesticide and food additive tolerances.

3. *Compliance, consultation, and education.*—Voluntary compliance with the law is promoted wherever possible, but legal action is taken when necessary. Legal proceedings include seizures of illegal products, injunctions, and criminal prosecutions through the courts. Standards for foods, tolerances for poisonous substances in foods, and other regulations are promulgated. A program of consumer education is conducted. Liaison is maintained with, and assistance is given to, State and local food and drug agencies.

4. *Medical evaluation.*—Applications for new drugs to be marketed are evaluated and approved. The medical aspects of research and enforcement activities are coordinated.

Workload is reflected in the following summary data:

	1959 actual	*1960 estimate*	*1961 estimate*
Number of establishments inspected	18,284	21,800	25,100
Establishment inspections	21,840	26,000	30,000

FOOD AND DRUG ADMINISTRATION—Continued

Current authorizations—Continued

SALARIES AND EXPENSES, CERTIFICATION, INSPECTION, AND OTHER SERVICES

(Indefinite special fund)

For expenses necessary for the certification or inspection of certain products, and for the establishment of tolerances for pesticides, in accordance with sections 406, 408, 504, 506, 507, 604, 702A, and 706 of the Federal Food, Drug, and Cosmetic Act, as amended (21 U.S.C. 346, 346a, 354, 356, 357, 364, 372a, and 376), the aggregate of the advance deposits during the current fiscal year to cover payments of fees for services in connection with such certifications, inspections, or establishment of tolerances, to remain available until expended. The total amount herein appropriated shall be available for purchase of chemicals, apparatus, and scientific equipment; expenses of advisory committees; and the refund of advance deposits for which no service has been rendered. (*Department of Health, Education, and Welfare Appropriation Act, 1960.*)

Appropriated (est.) 1960, **$1,377,000** Estimate 1961, **$1,389,000**

Financing:			
Proposed supplemental appropriation		332,000	

Under existing legislation, 1960.—A supplemental appropriation of $332,000 is anticipated for 1960 to finance the purchase of special scientific and monitoring equipment facilitating early initiation of the 1961 program to provide increased attention to radiological contamination of foods, drugs, and cosmetics. This effort will include a special program of field monitoring, as well as analysis and evaluation to determine the effects of such contamination on the Nation's foods, drugs, and cosmetics.

FREEDMEN'S HOSPITAL

Current authorizations:

SALARIES AND EXPENSES

For expenses necessary for operation and maintenance, including repairs; furnishing, repairing, and cleaning of wearing apparel used by employees in the performance of their official duties; transfer of funds to the appropriation "Salaries and expenses, Howard University" for salaries of technical and professional personnel detailed to the hospital; payments to the appropriation of Howard University for actual cost of heat, light, and power furnished by such university; [$3,190,000] *$3,302,000*: *Provided*, That no intern or resident physician receiving compensation from this appropriation on a full-time basis shall receive compensation in the form of wages or salary from any other appropriation in this title: *Provided further*, That the District of Columbia shall pay by check to Freedmen's Hospital, upon the Surgeon General's request, in advance at the beginning of each quarter, such amount as the Surgeon General calculates will be earned on the basis of rates approved by the Bureau of the Budget for the care of patients certified by the District of Columbia. Bills rendered by the Surgeon General on the basis of such calculations shall not be subject to audit or certification in advance of payment; but proper adjustment of amounts which have been paid in advance on the basis of such calculations shall be made at the end of each quarter: *Provided further*, That the Surgeon General may delegate the responsibilities imposed upon him by the foregoing proviso. *(32 D.C. Code 317–320; Department of Health, Education, and Welfare Appropriation Act, 1960.)*

OFFICE OF EDUCATION

Current authorizations:

PROMOTION AND FURTHER DEVELOPMENT OF VOCATIONAL EDUCATION

For carrying out the provisions of section 3 of the Vocational Education Act of 1946, as amended (20 U.S.C. 15j), and section 202 of said Act (20 U.S.C. 15bb), section 4 of the Act of March 10, 1924 (20 U.S.C. 29), section 1 of the Act of March 3, 1931 (20 U.S.C. 30), the Act of March 18, 1950 (20 U.S.C. 31–33), and section 9 of the Act of August 1, 1956 (20 U.S.C. 34), including $4,000,000 for extension and improvement of practical nurse training under title II of the Vocational Education Act of 1946, as amended, which sum shall be available under such title also for the expansion and improvement of programs of practical nurse training in effect prior to August 2, 1956, and $180,000 for vocational education in the fishery trades and industry including distributive occupations therein, [$33,702,081] *$31,702,081*: *Provided*, That the apportionment to the States under section 3(a), (1), (2), (3), and (4) of the Vocational Education Act of 1946 shall be computed on the basis of not to exceed [$29,267,081] *$27,267,081* for the current fiscal year: *Provided further*, That the amount of allotment which States and Territories are not prepared to use may be reapportioned among other States and Territories applying therefor for use in the programs for which the funds were originally apportioned. (*Department of Health, Education, and Welfare Appropriation Act, 1960.*)

Appropriated 1960, **$33,702,081** Estimate 1961, **$31,702,081**

Program and Financing

Federal Reserve Bank of St. Louis

balance being distributed on the basis of rural population. Allotments to the States remain available for 2 years.

A supplemental appropriation is anticipated for these purposes in 1960 under Proposed for later transmission.

Payments to School Districts

For payments to local educational agencies for the maintenance and operation of schools as authorized by the Act of September 30, 1950, as amended (20 U.S.C., ch. 13), [$163,957,000] *$126,695,000: Provided,* That this appropriation shall also be available for carrying out the provisions of section 6 of such Act. *(Department of Health, Education, and Welfare Appropriation Act, 1960.)*

Appropriated 1960, **$163,957,000** Estimate 1961, **$126,695,000**

Program and Financing

	1959 actual	1960 estimate	1961 estimate
Program by activities:			
1. Payments to local educational agencies	$142,583,444	$154,457,000	$116,695,000
2. Payments to other Federal agencies	7,414,387	9,500,000	10,000,000
Total program (costs—obligations)	149,997,831	163,957,000	126,695,000
Financing:			
Unobligated balance no longer available	2,169		
Appropriation (new obligational authority)	150,000,000	163,957,000	126,695,000

Payments are made to assist in the maintenance and operation of schools in districts where enrollments are affected by Federal activities. These payments are made primarily to local school districts. However, where such districts cannot assume responsibility for educating federally connected children, payments are made to other agencies for the direct operation of schools under Federal auspices.

This program was amended by Public Law 85–620 (72 Stat. 548), making permanent provisions pertaining to children residing on Federal property with a parent working on Federal property, and extending all other provisions of the program until 1961.

In 1961, under current law, payments will be made to about 4,275 school districts enrolling approximately 1,478,000 federally connected pupils in all States, Guam, Puerto Rico, Virgin Islands, and Wake Island. This compares to some 4,150 districts and about 1,420,000 pupils in 1960. The 1961 estimate will fully fund all entitlements under legislation proposed by the President and pending before the Congress. This legislation more appropriately defines the limit of Federal responsibility in assisting affected school districts. The estimate would provide approximately 68% of entitlements of eligible school districts if distributed on the basis of existing legislation.

From 1951 through 1960, a total of $962.6 million has been appropriated for this program, aiding in the construction of an estimated 52,890 classrooms housing about 1.5 million pupils in the States, Puerto Rico, Guam, and Wake Island.

The law was amended by Public Law 85–620 (72 Stat. 548), making permanent provisions for assistance on account of children living on Federal property with a parent employed on that property, and extending assistance for all other categories of Federal impact until 1961.

Funds requested for 1961 will assist in providing approximately 2,200 classrooms for about 66,000 children.

1. *Assistance to local educational agencies.*—Grants are made for school construction in local districts where enrollments are affected by Federal activities.

2. *Assistance for school construction on Federal properties.*—Where the local education agency is not able to provide school facilities for children living on Federal prop-

Appropriation (new obligational authority)	115,300,000	150,000,000	171,000,000

Grants and payments are made to States and possessions, educational institutions, and individuals for the following purposes:

1. *Student loans.*—Funds are allotted among the States for payments to institutions of higher education to provide capital contributions to student loan funds, and loans are made to institutions, as neccssary, for non-Federal capital contributions. The institutions must contribute an amount equal to one-ninth of the Federal contribution. In 1959, a total of 27,683 loans and 20,360 loan commitments were made by 1,197 institutions of higher education, and over 100,000 students in 1,368 institutions are expected to borrow in 1960. A supplemental appropriation for contributions to student loan funds for 1960 is anticipated under Proposed for later transmission.

2. *Science, mathematics, and foreign language instruction.*—Grants are made to States on a matching basis, and loans are made to nonprofit private schools for acquisition of equipment and minor remodeling of laboratory or other space. Grants are made to States for supervision and administration of the program. State matching began in 1960.

3. *National defense fellowships.*—Three-year fellowships are awarded to individuals accepted for study in graduate programs, and grants are made to institutions where such individuals are enrolled.

	1959 actual	*1960 estimate*	*1961 estimate*
Number of fellowships awarded	1,000	1,500	1,500
Number of graduate programs	272	403	650

4. *Guidance, counseling, and testing.*—Grants are made to States to assist in establishing and maintaining programs of testing, guidance, and counseling, and contracts are made with institutions of higher education for operation of institutes for improved training of counseling personnel, including provision for stipends to those in attendance. State matching began in 1960.

	1959 actual	*1960 estimate*	*1961 estimate*
Number of participants supported at institutes	2,421	3,545	3,945

Federal Reserve Bank of St. Louis

for one-half the cost of operation by them of language and area study centers and for full cost of institutes for advanced training of teaching personnel in modern foreign languages. Stipends are paid to persons in attendance. Contracts are made for research and studies in the area of foreign language instruction; in 1959, 20 such contracts were made.

	1959 actual	*1960 estimate*	*1961 estimate*
Number of individuals receiving stipends for language and area studies	160	442	843
Number of participants supported at institutes	970	1,905	3,150

6. *Educational media research.*—Research and demonstrations, financed by grants and contracts, are conducted in the use of new media for educational purposes. In 1959 a total of 83 grants and contracts were made.

7. *Grants to States for area vocational programs.*—Grants are made on a matching basis to States to provide for establishing technical and subprofessional training programs.

8. *Grants to States for statistical services.*—Grants are made on a matching basis to assist the States in improving educational statistics. Total payments to any State may not exceed $50,000 annually.

Appropriation (new obligational authority)		1,000,000	1,000,000

1. *Grants to institutions of higher education.*—Grants are made to assist in providing training of professional personnel in fields related to education of mentally retarded children. In 1960, about 76 fellowships are expected to be allocated among 20 institutions, and grants will be made to assist in covering the cost of training each fellow. The 1961 estimate provides for about 68 fellowships with supporting grants and for stimulation grants to 3 institutions for the development of new advanced graduate programs in geographic regions not currently served.

2. *Grants to States.*—Grants are made to State educational agencies to assist in establishing fellowships for personnel engaged or preparing to engage in employment as supervisors of educational programs for mentally retarded children. In both 1960 and 1961, it is estimated that 100 fellowships will be awarded, and grants will be made to assist institutions of higher learning in meeting the cost of training each fellow.

Salaries and Expenses

For expenses necessary for the Office of Education, including surveys, studies, investigations, and reports regarding libraries; coordination of library service on the national level with other forms of adult education; development of library service throughout the country; purchase, distribution, and exchange of educational documents, motion-picture films, and lantern slides; and cooperative research, surveys, and demonstrations in education as authorized by the Act of July 26, 1954 (20 U.S.C. 331–332); [$12,800,000] *$13,427,000*, of which not less than $550,000 shall be available for the Division of Vocational Education as authorized. (*Department of Health, Education, and Welfare Appropriation Act, 1960.*)

1. *Statistics and research—(a) Services.*—Assistance is provided on planning research studies and major responsibility assumed for collection and analysis of basic educational statistics. Basic data and statistics on library resources are made available, and consultative services are rendered. The Office administers grants to States for rural library services and makes studies and reports on this program. Educational media research grants, authorized by the National Defense Education Act, are administered, and advisory services in the area of educational media are provided. Captioned films for the deaf are developed and disseminated.

(*b*) *Cooperative agreements.*—Research and demonstration projects are carried on in cooperation with colleges, universities, and State educational agencies. Projects are supported in such problem areas as education of the mentally retarded, development of students with special abilities, staffing the Nation's schools, and the educational implications of changes in the country's economy. From 1957, when the program began, through 1959, 192 projects were supported, of which 38 have been completed.

2. *Administration of school assistance in federally affected areas.*—Applications for aid for school construction and for school operation expenses in areas where facilities are affected by Federal activities are examined and acted upon.

OFFICE OF EDUCATION—Continued

Current authorizations—Continued

SALARIES AND EXPENSES—Continued

3. *Vocational education.*—Information is developed and publications are issued. Advisory services are provided to Federal, State, and local agencies and to professional groups, and the States are given assistance in the appraisal and development of vocational educational programs. Grants to States for vocational education under the George-Barden and Smith-Hughes Acts are administered. The Office also administers area vocational education grants authorized by the National Defense Education Act.

4. *Higher education.*—Advisory services are provided to Federal and State agencies, to professional groups, and to higher educational institutions; information is developed and publications are issued. The Office administers programs authorized by the National Defense Education Act which relate to higher education institutions, such as the student loan program, foreign language and area centers, institutes for training teachers of modern foreign languages, institutes for training counseling personnel, and the fellowship program.

5. *International education.*—Information is developed and disseminated on education in other countries, and educational exchange programs are administered in cooperation with the Department of State and International Cooperation Administration.

6. *State and local school systems.*—Information is developed and publications are issued concerning elementary and secondary education and State and local school administration; advisory services are provided to Federal, State, and local agencies, and to professional groups. The Office administers aid programs authorized by the National Defense Education Act, such as financial assistance to States for strengthening science, mathematics, and foreign language instruction; for guidance, counseling, and testing; and for improving statistical services. The Office also administers the grant program for expansion of teaching in education of mentally retarded children and the program to encourage and assist in the establishment of science clubs.

7. *Program direction and services.*—Central direction and services to the various programs of the Office are provided, as are informational services. Legislative programs and studies and reports on Federal and State educational legislation are developed; management services to the Office are provided. A program of regional representation is also provided.

8. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources and applicable adjustment as reflected in the following table:

	1958 actual	*1959 actual*	*1960 estimate*	*1961 estimate*
Selected resources at end of year: Inventories and items on order:

Program by activities:			
Studies of vocational rehabilitation overseas (total costs—obligations)			$930,000
Financing:			
Appropriation (new obligational authority)			930,000

The projects to be supported with foreign currencies derived through the sale abroad of surplus agricultural commodities, authorized by the Agricultural Trade Development and Assistance Act, will be directed toward the solution of problems which hold promise of contributing knowledge of value and significance to the advancement of rehabilitation in the United States. It is estimated that $25,000 will be used to develop these projects. However, these costs will be absorbed and, therefore, no additional funds are included in the regular appropriation.

This Office administers grants to States for vocational rehabilitation, vocational rehabilitation research and training, and licensing the blind to operate vending stands on Federal and other properties.

1. *State program operations.*—State plans are approved and allotments and grants are made; administration of regional office activities and field relationships with States are coordinated; overall program plans are developed; old-age and survivors insurance referrals are coordinated; and Federal-State programs for rehabilitating blind persons are developed.

2. *Research and training.*—Research grants for projects to develop and demonstrate new rehabilitation methods and techniques and grants for training and traineeships to provide additional specialized personnel in rehabilitation are administered; standards and services pertaining to technical aspects of rehabilitation, medical services and facilities are developed; technical advisory services are provided.

3. *Executive direction and program coordination.*—Direction and administration are provided for programs under the Vocational Rehabilitation Act, the Randolph-Sheppard Act, and the Medical Facilities Survey and Construction Act as it pertains to rehabilitation facilities; national and international program plans are developed; legislative proposals concerning the program are analyzed; and publications are prepared and distributed to assist the States in interpreting their programs to the public.

4. *Management services.*—General administrative and management services are provided the several program areas; statistical measurement and analysis of programs is undertaken including the development of special studies.

5. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources and applicable adjustment as reflected in the following table:

	1958 actual	*1959 actual*	*1960 estimate*	*1961 estimate*
Selected resources at end of year: Inventories and items on order: Unpaid undelivered orders (appropriation balances obligated for goods and services on order not yet received)	$23,542	$13,656	$19,122	$22,124
Selected resources at start of year (−)		−23,542	−13,656	−19,122
Adjustment of selected resources reported at start of year		4,406		
Costs financed from obligations of other years, net (−)		−5,480

PUBLIC HEALTH SERVICE

The Service assists in safeguarding public health by: Providing grants-in-aid; furnishing consultative assistance to States for such public health services as the prevention and control of disease, hospital planning and construction; conducting research in biology and medicine; enforcing foreign and interstate quarantine regulations; disseminating information on health problems; and conducting medical and hospital care programs. To perform these functions the Service is organized as follows:

(*a*) The Bureau of State Services operates principally in the fields of Federal-State, interstate, and international public health programs, through grants and direct operations involving research, development, demonstrations, consultative services, and training.

(*b*) The Bureau of Medical Services administers the medical care programs for merchant seamen, coastguardsmen, Indians, Alaskan natives, and other beneficiaries designated by the Congress; furnishes assistance in the form of grants and technical services in the planning and construction of public and nonprofit hospitals and other medical care facilities; provides for the construction of medical facilities for Indians both in the form of grants and as direct construction; and through the foreign quarantine program performs examinations of aliens at U.S. ports and of visa applicants in foreign countries.

(*c*) The National Institutes of Health constitute the primary research arm of the Service and are further described in a subsequent statement.

(*d*) The National Library of Medicine collects and disseminates medical literature.

(*e*) The Office of the Surgeon General formulates general policy, furnishes central administrative services, and operates special programs such as the national health survey.

A summary of obligations for grants, direct obligations, and construction for the Public Health Service follows:

[In thousands]

	1959 actual	*1960 estimate*	*1961 estimate*
Grants	$480,068	$586,045	$527,885
Direct operations	212,404	237,896	251,405
Construction	23,180	17,318	12,833
Total, Public Health Service	715,652	841,259	792,123

Current authorizations:

For necessary expenses in carrying out the Public Health Service Act, as amended (42 U.S.C., ch. 6A) (hereinafter referred to as the Act), and other Acts, including expenses for active commissioned officers in the Reserve Corps and for not to exceed [one] *two* thousand [nine] *one* hundred commissioned officers in the Regular Corps; and for expenses of primary and secondary schooling of dependents, in foreign countries, of Public Health Service personnel stationed in foreign countries, in amounts not to exceed an average of $250 per student, when it is determined by the Secretary that the schools, if any, available in the locality are unable to provide adequately for the education of such dependents, and for the transportation of such dependents between such schools and their places of residence when the schools are not accessible to such dependents by regular means of transportation; and for the payment of compensation to consultants or individual scientists appointed for limited periods of time pursuant to section 207(f) or section 207(g) of the Act at rates established by the Surgeon General not to exceed $19,000 per annum; as follows: (*Department of Health, Education, and Welfare Appropriation Act, 1960.*)

ASSISTANCE TO STATES, GENERAL

To carry out the purposes, not otherwise specifically provided for, of section 314(c) of the Act; to provide consultative services to States pursuant to section 311 of the Act; to make field investigations and demonstrations pursuant to section 301 of the Act; to provide for collecting and compiling mortality, morbidity, and vital statistics; and [not to exceed $1,000 for entertainment of officials of other countries when specifically authorized by the Surgeon General; $22,497,000] *to provide traineeships pursuant to section 306 of the Act; $22,620,000.*

[For an additional amount for "Assistance to States, general", $2,000,000; and the purposes for which appropriations under this head are available during the fiscal year 1960 shall include traineeships pursuant to section 306 of the Public Health Service Act, as amended.] (*Department of Health, Education, and Welfare Appropriation Act, 1960; Supplemental Appropriation Act, 1960.*)

Appropriated 1960, **$24,497,000** Estimate 1961, [a] **$22,620,000**

[a] Excludes $1,254,000 for activities transferred in the estimates to "Environmental health activities." The amounts obligated in 1959 and 1960 are shown in the schedule as comparative transfers.

1. *Grants*—(*a*) *To States for general health.*—Grants are made to assist the States in supporting basic State and local health services, such as public health nursing, laboratory services, vital statistics, sanitary engineering, and control of communicable diseases. The 1961 estimate will (1) permit the support of State and local public health units; (2) provide specialized health services; (3) stimulate and develop new health services; (4) stimulate application of new research discoveries; and (5) train public health personnel. The 1960 grant level is proposed to be maintained in 1961.

(*b*) *For public health training.*—Grants and awards are made to professional personnel for training in public health to assist in overcoming the acute shortage of trained public health personnel. Approximately 646 traineeships will be awarded in 1961 compared to 654 in 1959 and 640 in 1960.

(*c*) *To schools of public health.*—Legislation to provide grants to schools of public health to alleviate the financial deficits connected with the attendance of federally sponsored students at these institutions will expire June 30, 1960.

2. *Direct operations*—(*a*) *Technical assistance to States.*—Assistance is rendered to the States through professional consultative services, conduct and dissemination of the results of special studies of public health practices, and the conduct of training programs.

(*b*) *Vital statistics.*—Vital statistics data are collected, analyzed, and disseminated on births, deaths, stillbirths, illnesses, marriages, and divorces. The increase in 1961 is to provide for special studies related to the 1960 decennial census.

(*c*) *International health activities.*—International health responsibilities are to (1) develop the U.S. position on international health matters, and provide representation at international health meetings; (2) serve as a clearinghouse for information on health conditions and needs in other countries; and (3) administer training programs for foreign health personnel in the United States. This work will continue in 1961 at the 1960 level.

(*d*) *Health of the aged and chronic disease.*—Studies to develop and improve methods for the identification and prevention of chronic illness, for the care and restoration of the chronically ill and aged, and for meeting special health problems of the aged population will be continued, and assistance given in the application of proven techniques through technical assistance, demonstrations, and training. In 1961 the increase will be used for demonstrations, and development of guide materials for improving nursing homes.

3. *Relation of costs to obligations.*—Year-end balances of unpaid, undelivered orders are as follows: 1958, $175,688; 1959, $141,353; 1960, $137,453; 1961, $146,553.

1. *Grants to States for tuberculosis control.*—Grants are made to assist States in planning and administering specific control measures, including training of professional workers, casefinding and case followup. The estimate for 1961 assumes that State and local governments will increase their support of tuberculosis control activities.

2. *Direct operations*—(*a*) *Cooperative applied research.*—In cooperation with State and local health departments, medical schools, private investigators, and others, studies are conducted in the epidemiology, prevention, detection, diagnosis, and therapy of tuberculosis.

Appropriation (new obligational authority)	6,890,000	8,015,000	13,116,000

This program provides for the investigation and prevention of communicable diseases, other than tuberculosis, through research, training, and technical assistance to States.

1. *Communicable Disease Center.*—Scientific services in the fields of epidemiology, medicine, and biology, including reference diagnostic laboratory services, are provided to State and local health departments through investigations, consultations, and demonstrations. Important disease-control programs include the staphylococcal infections; aseptic meningitis; poliomyelitis; viral encephalitis; diarrheal diseases; the acute respiratory diseases; and rodent-borne disease. Upon request of State health officers, emergency aid is provided to prevent and control disease outbreaks in disaster areas, or during epidemics. During 1959, aid was provided in 54 emergencies in 43 States, the District of Columbia, and Puerto Rico. Training activities provide for course materials and audiovisual aids on modern public health practices for use by the State and local health departments; evaluation of the effectiveness of training courses; and specialized instruction of Public Health Service personnel in newer methods for disease control. The 1961 estimate provides for continuing the staphylococcal infections and fluorescent antibody diagnostic technique programs at the level developed in 1960. It also provides funds for the costs of maintenance and utilities required for the new Communicable Disease Center buildings.

The following table shows selected measurable workload items:

WORKLOAD

Workload item	*1959 actual*	*1960 estimate*	*1961 estimate*
Laboratory specimens processed	54,382	55,000	57,000
Training program:			
Trainees	2,759	2,700	2,900
Courses	175	165	170
Audiovisual aids:			
Films loaned or sold	13,962	14,350	15,500
New productions completed	41	42	57

2. *Arctic Health Research Center.*—At the Arctic Health Research Center in Alaska, studies are made on problems of low temperature environmental sanitation, endemic and epidemic communicable diseases including diseases transmissible from animals to man, and the nutrition and physiologic problems of arctic life.

3. *Control of venereal diseases.*—In 1959, as compared with 1958, reported cases increased by 22.8% in primary and secondary syphilis, and 7.8% in gonorrhea. These data indicate the continued seriousness of the venereal disease problem despite more effective methods of treatment.

(*a*) *Grants to States.*—Casefinding projects are supported in selected areas where venereal disease incidence

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

and prevalence remain high. It is anticipated that State and local Governments in these areas will increase their support of casefinding projects.

(*b*) *Direct operations.*—Research and evaluation activities are directed toward maintenance of uniformly satisfactory nationwide serologic services; development and introduction of new syphilis diagnostic tests; development of an immunizing agent for syphilis; improvement of diagnostic techniques for gonorrhea; evaluation of more effective methods of therapy; and the improvement of control procedures. Epidemiologic services are directed toward the maintenance of nationwide and international intelligence and control of venereal disease in areas of particular concentrations of agricultural, industrial, and military personnel and in numerous small high-prevalence areas that might become the foci for spread of infection. Consultation is furnished to States through the regional offices in determining problem areas, infection sources, and control techniques required. Scientific information and educational media are disseminated through State agencies.

4. *Relation of costs to obligations.*—Year-end balances of unpaid undelivered orders are as follows: 1958, $242,481; 1959, $248,376; 1960, $189,476; 1961, $189,476.

Object Classification

NOTE.—Obligations for reimbursement to the "Bureau of State Services management fund" for 1959 and 1960 are shown for purposes of comparison.

Appropriation (adjusted)	13,256,000	15,640,000	23,350,000

This program is concerned with the identification of public health problems related to our environment and the development of preventive and control measures in supporting environmental health activities of States and localities.

A supplemental appropriation for 1960 is anticipated under Proposed for later transmission to provide for the purchase of equipment required by the expanded programs in the radiological health field to permit these programs to move forward without delay in 1961.

1. *Air pollution.*—This provides for research and technical assistance to study the effect of air pollution on man's health and welfare, and to develop effective methods of control. Public Health Service facilities and through use of contracts and grants, facilities of other public and private institutions are utilized in carrying out the program. Technical assistance is provided State and local agencies upon request. The increase will be utilized in expanding (*a*) research activities on automotive exhaust, and (*b*) other research projects including the national air sampling network.

2. *Water supply and water pollution.*—Public and private agencies are assisted in protecting the quality of water resources. This is accomplished through grants to States and interstate agencies, collection of basic data, research, demonstrations, and technical assistance in water pollution and water supply problems. In addition, training and consultative services are provided personnel from public agencies, and from industries. This activity also provides for enforcement against pollution of interstate waters, the development of integrated plans for water supply and water pollution control on an interagency river basin basis, and for the administration of grants for the construction of waste treatment facilities. The in-

PUBLIC HEALTH SERVICE—Continued

Current authorizations—Continued

[SANITARY ENGINEERING] *ENVIRONMENTAL HEALTH* ACTIVITIES—Continued

crease will be used to expand and accelerate programs for the control of water pollution through research, technical assistance, basic data collection and analysis, and interstate enforcement activities, the latter including intensive investigations designed to abate water pollution that is caused by processing of radioactive ores.

3. *Radiological health.*—Overall stimulation and direct assistance is provided to States and communities in the development of programs to protect the health of the public against radiation hazards. This includes research on public health techniques for control of such hazards; training of local, State, and Federal personnel; and collection, analysis, and interpretation of technical information. The increase proposed for 1961 will be used to (*a*) expand laboratory, field, and epidemiological research on the long-term effects of radiation on humans and animals and on the public health significance of background radiation levels in the environment; (*b*) increase the number of technically competent public health workers in the field of radiological health through graduate training and short-course training; and (*c*) provide expanded on-the-spot technical consultation to States and communities, including demonstrations, in all phases of radiological health programs.

4. *Milk, food, and general sanitation.*—Research is carried on to insure that new methods of milk processing and distribution and of food preparation and service will not be hazardous to the public health. Technical services are provided State and local agencies and industry through the certification of interstate milk and shellfish shippers, development and demonstration of methods, evaluation of laboratory techniques, and the presentation of research results. This activity also implements the direct Federal responsibility for protecting the health of passengers aboard interstate carriers and provides for technical assistance to States on basic sanitary engineering problems.

5. *Occupational health.*—Research on occupational hazards and diseases such as silicosis and other pneumoconioses is conducted and assistance provided to Federal, State, and local agencies and industry in preventing and controlling occupational hazards and diseases.

6. *Accident prevention.*—Research to determine the extent and cause of accidents, and to develop techniques for their prevention and control will be continued, and through demonstrations and technical assistance, agencies ultimately responsible for accident prevention will be encouraged to adopt proven safety techniques.

7. *Relation of costs to obligations.*—Year-end balances of unpaid undelivered orders are as follows: 1958, $278,311; 1959, $222,450; 1960, $351,850; 1961, $506,450.

Appropriation (new obligational authority)	45,657,000	45,000,000	20,000,000

Grants are made to States, municipalities, and interstate agencies to stimulate and assist in the construction of sewage treatment works. Funds appropriated for such grants are allocated to States and other jurisdictions on the basis of population and economic need. Within these allocations, grants for the specific projects may not exceed 30% of the cost of a project o· $250,000, whichever is smaller, with at least 50% of the funds appropriated reserved for communities of 125,000 population or less.

Appropriation (new obligational authority)	186,200,000	186,200,000	126,200,000

Federal funds are provided on a grant or loan basis to assist States and possessions, other public agencies, and nonprofit organizations in the construction of hospitals, rehabilitation facilities, diagnostic or diagnostic and treatment centers, nursing homes, public health centers, and related health facilities. In addition, these funds permit the Surgeon General to conduct research, experiments, and demonstrations relating to the effective development and utilization of hospital services, facilities, and resources, and to make grants-in-aid to States, political subdivisions, universities, hospitals, and other public and private nonprofit institutions or organizations for such projects.

Funds for construction purposes are allocated to the States and possessions on the basis of a formula which takes into account population and per capita income. Federal participation varies from one-third to two-thirds. Payments are computed and made as construction progresses.

As of October 31, 1959, a total of 4,708 construction projects had been approved, of which 3,342 were completed and in operation, 1,158 under construction, and 208 in preconstruction stages. Upon completion, these projects will provide 201,158 hospital beds and 1,274 public health and other medical facilities. Of the approved projects 64% were for general hospitals, 2% for mental hospitals, 2% for tuberculosis hospitals, 3% for chronic disease hospitals, 4% for nursing homes, 16% for public health centers, 6% for diagnostic centers, 2% for rehabilitation centers, and 1% for State health laboratories.

4. *Relation of costs to obligations.*—Year-end balances of unpaid undelivered orders are as follows: 1959, $5,694; 1960, $6,000; 1961, $6,000.

Appropriation (new obligational authority)	50,624,000	51,600,000	51,594,000

During 1961, a total of 15 hospitals and 130 outpatient facilities will be operated to furnish medical and dental care to legal beneficiaries of the Service. The major beneficiary groups are American seamen, coastguardsmen and their dependents, persons afflicted with leprosy, and narcotic addicts. Among these, the largest single category is the American seamen, for whom the Marine Hospital Service was established in 1798, and who receive free, comprehensive medical care in its facilities in the United States for all conditions. Medical care is also provided to foreign seamen and beneficiaries of other Federal agencies on a reimbursable basis.

1. *Operation of hospitals.*—This activity consists of 12 general hospitals, 2 neuropsychiatric hospitals which specialize in the treatment of narcotic addiction, and the National Leprosarium at Carville, La. Inpatient loads and outpatient visits are expected to be as follows:

AVERAGE DAILY PATIENT LOAD AND ANNUAL TOTAL OUTPATIENT VISITS

	1959 actual	*1960 estimate*	*1961 estimate*
Hospital patients, by type of hospital:			
General hospitals	2,703	2,755	2,833
Tuberculosis hospital	241	232	
Neuropsychiatric hospitals	1,919	1,910	1,900
Leprosarium	277	273	273
Total	5,140	5,170	5,006
Hospital patients, by type of beneficiary:			
American seamen	2,174	2,175	2,022
Narcotic addicts	1,328	1,325	1,315
Patients with leprosy	279	275	275
Coast Guard	279	285	303
Bureau of Employees' Compensation	246	247	237
Veterans	249	245	245
Uniformed service dependents	204	245	231
All other	381	373	378
Total	5,140	5,170	5,006
Hospital outpatient visits	613,371	620,000	625,000

Late in 1960, it is proposed to close the Manhattan Beach tuberculosis hospital. This will require arranging contract care in other hospitals for an average of 130 patients per day and transferring an average of 70 patients per day to other Public Health Service hospitals.

The 1961 estimate also proposes a change in financing medical care for Bureau of Employees' Compensation cases

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

who are treated in Public Health Service facilities. Instead of appropriating to the Public Health Service under this head for such care, arrangements will be made for reimbursement by the Department of Labor.

2. *Operation of outpatient clinics and offices.*—This activity consists of 25 full-time outpatient clinics and 105 outpatient offices, with 551,267 visits in 1959 and 550,000 estimated for 1960 and 1961. It also finances care of patients in contract hospitals.

3. *Operation of health units.*—The Service operates health programs for Federal agencies on a reimbursable basis. Consultative and related services are performed for Federal agencies relative to their employee health programs.

4. *Coast Guard medical services.*—Medical services are provided for Coast Guard personnel at shore stations and on vessels.

5. *Development and coordination of nursing resources.*—Methods are developed and applied to increase and improve nursing services and education throughout the country, and to better utilize nursing personnel skills; research is conducted on the fundamental problems of nursing, and research on nursing problems by independent investigators is stimulated.

6. *Nurse training grants.*—Grants are provided for traineeships to prepare an estimated 1,860 nurses to be teachers, supervisors, and administrators under section 307 of the Public Health Service Act, as amended.

7. *Personnel detailed to other agencies.*—Medical, dental and other professional personnel are detailed to certain other Federal agencies on a reimbursable basis.

8. *Dependents' medical care.*—This activity provides for contract care in facilities other than those operated by the Public Health Service for dependents of Public Health Service beneficiary members of the uniformed services. During 1960, changes are planned for more accurate recording of obligations and this will require an increase in the language limitation on the amount of this activity; a portion of the estimated unobligated balance shown above would also be used for such purpose.

9. *Payments to Hawaii.*—Grants are made to Hawaii to defray the cost of care and treatment of persons afflicted with leprosy. Average daily patient load is expected to be 265 in 1961.

11. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources and applicable adjustment as reflected in the following table:

	1958 actual	*1959 actual*	*1960 estimate*	*1961 estimate*
Selected resources at end of year: Inventories and items on order:				
Stores (goods unconsumed by projects)	$592,980	$518,228	$518,000	$518,000

1. *Hospital health services.*—This activity consists of 51 general hospitals and their outpatient clinics and 3 tuberculosis sanatoria, 47 in the Continental United States and 7 in Alaska. Workloads are expected to be as follows:

AVERAGE DAILY PATIENT LOAD (EXCLUDING NEWBORN), AND TOTAL OUTPATIENT TREATMENTS

	1959 actual	*1960 estimate*	*1961 estimate*
Inpatient load by type of patient:			
Continental United States:			
General patients	1,102	1,255	1,403
Tuberculosis patients	535	355	290
Alaska:			
General patients	378	435	472
Tuberculosis patients	249	215	200
Total inpatient load	2,264	2,260	2,365
Outpatient visits (all hospitals)	605,677	642,200	689,000

2. *Contract patient care.*—Indian and Alaska native patients are hospitalized primarily in non-Federal hospitals and are provided medical care by private physicians where Indian hospital or medical care facilities are not available. Patient loads in hospitals are estimated to be as follows:

AVERAGE DAILY CONTRACT PATIENT CARE LOAD

	1959 actual	*1960 estimate*	*1961 estimate*
By type of patient:			
General patients	414	412	412
Tuberculosis patients	279	343	343
Neuropsychiatric patients	221	216	216
Total	914	971	971

3. *Field health services.*—These include programs in sanitation, health education, nutrition, maternal and child health, school health, tuberculosis and other communicable disease control, medical social service, public health nursing, and oral health. The services are provided through health centers, clinics, and other field units operated directly by the Service, as well as through contractual arrangements with State and local health organizations, and university groups.

1. *Hospitals and clinics.*—Funds are included for the construction of a general medical and surgical hospital at San Carlos, Ariz. Planning funds for this hospital were included in the 1960 appropriation.

Planning funds are also included for a Public Health Service Indian hospital at Barrow, Alaska.

Construction of 8 health stations is planned in 1961.

2. *Personnel quarters.*—Construction of 76 permanent units is planned in 1961.

3. *Alterations.*—Planning funds and construction funds are included for projects at 22 locations; construction projects at 20 locations; planning of 3 projects at Bethel, Alaska; and planning and construction of one project at Kanakanak, Alaska.

4. *Other plant facilities.*—This activity provides for utility projects such as replacement of sewer lines or electrical systems.

5. *Community hospitals serving Indians and non-Indians.*—Grants are made to communities for construction of hospital facilities in proportion to the ratio of Indians served to total beds.

6. *Sanitation facilities.*—Pursuant to Public Law 86-121, funds are included for 29 sanitation construction projects and 6 investigation projects in the United States.

7. *Relation of costs to obligations.*—Year-end balances of unpaid undelivered orders are as follows: 1958, $3,146,478; 1959, $10,846,408; 1960, $5,795,140; 1961, $1,972,385.

The National Institutes of Health constitutes the primary research arm of the Public Health Service. It is made up of the following seven individual institutes each with responsibility for a particular disease category: National Cancer Institute, National Institute of Mental Health, National Heart Institute, National Institute of Dental Research, National Institute of Arthritis and Metabolic Diseases, National Institute of Allergy and Infectious Diseases, and National Institute of Neurological Diseases and Blindness.

Operations of the institutes are divided between grant programs largely for support of research and for training of individuals, and activities performed directly or through contracts by the Service. A portion of the funds from each of the eight appropriations is pooled through a management fund to provide central services for all institutes.

A distribution of obligations for the National Institutes of Health by major activity follows:

[In thousands]

	1959 actual	*1960 estimate*	*1961 estimate*
Grants:			
Research projects	$140,676	$199,174	$210,589
Research fellowships	10,155	14,570	14,570
Training	49,812	75,037	66,894
State control programs	8,233	10,375	10,375
Community demonstration projects		1,500	1,500
Total, grants	208,876	300,656	303,928
Direct operations:			
Research	47,119	52,418	54,636
Review and approval of grants	4,542	6,935	7,269
Professional and technical assistance	7,169	10,039	10,064
Contracts	15,346	21,142	21,145
Other	2,158	2,945	2,958
Total, direct operations	76,334	93,479	96,072
Grand total	285,210	394,135	400,000

The above figures exclude amounts for construction and construction grants. They include grants for State-control programs for cancer, heart, and mental health which are administered by the Bureau of State Services, and funds for the coordination and development of dental resources which are administered by the Bureau of Medical Services.

The major activities shown in the table above are common to all institutes and are described below. The workload, where applicable, is shown under the appropriate institute together with an explanation of any unique activities.

Federal Reserve Bank of St. Louis

Grants for research projects.—Grants are made to institutions and to individuals to undertake research projects in the medical and biological sciences. Grants are awarded by the Surgeon General on the basis of merit after review and recommendation by scientifically competent study groups and the appropriate national advisory council.

Research fellowships.—Grants are made to individuals in order to increase the research manpower in the medical sciences. There are several different types of awards such as predoctoral, postdoctoral, and part-time student research fellowships, each designed to develop research talent. Fellowships are reviewed by specialty boards and advisory councils and are awarded on the basis of merit.

Training grants.—Grants are made to institutions to develop or support training programs in the medical sciences and to individual trainees to enable them to undertake special training at an institution of their choice. Awards are made to both graduates and undergraduates. Both institutional and individual grants are awarded by the Surgeon General on the basis of merit after review by an appropriate advisory council.

Grants for State control programs.—Funds are provided to States on a formula basis for strengthening State and local clinical and educational services in the cancer, mental health, and heart disease areas.

Community demonstration projects.—Grants are awarded on a merit basis to professional and voluntary agencies, as well as State and local health departments and community hospitals, to apply more rapidly proven cancer control measures.

Direct operations—Research.—The National Institutes of Health conduct research activities largely within the framework of the various specific institutes, directed to the disease categories represented thereby.

Review and approval of grants.—Applications for grants for research projects, fellowships, and training are reviewed for merit by panels of private professional and lay persons distinguished in the field of medical science. Staff of the National Institutes of Health provide the administrative support and executive direction for the national advisory councils and study sections.

Professional and technical assistance.—Professional guidance and leadership are provided to States and other interested organizations in the knowledge and application of research findings through the provision of consultative services, demonstrations, training, field studies and investigations of improved methodology.

Contracts.—In addition to research undertaken through grants and by National Institutes of Health staff, contracts are made with public and private organizations for directed research in cancer chemotherapy.

In addition to an appropriation for each program there is an appropriation for general research and services which finances activities not related to particular categories of disease.

The appropriation for general research and services finances the division of general medical sciences which administers research and training activities relating to basic problems in public health, medical, biological, and chemical fields. It also finances the division of biologics standards which is responsible for the regulation of biologic products and the conduct of related research. The activities listed in the program and financing schedule for the general research and services appropriation are described below.

1. *Grants—(a) Research projects.*—Funds for 1961 will support approximately 1,653 grants in 1961, as compared to 1,470 in 1960, and 1,065 in 1959.

(*b*) *Research fellowships.*—Approximately 1,150 fellowships will be supported in 1960 and 1961, as compared to 728 in 1959.

(*c*) *Training.*—Approximately 315 graduate research training grants will be in effect in 1960 and 1961 for the support of about 2,000 trainees in the areas of basic biological, medical, and health related sciences. This compares to 176 grants for the support of 1,170 trainees in 1959. The experimental training grant program initiated in 1957 will continue in 1960 and 1961.

2. *Direct operations—(a) Biologics standards.*—Activities include administration of the Biologics Control Act, establishment of standards for preparation of biologics, testing of vaccines and their preparation, and research related to development, manufacture, testing and use of vaccines and analogous products.

3. *Relation of costs to obligations.*—Year-end balances of unpaid undelivered orders are as follows: 1958, $99,875; 1959, $83,568; 1960, $129,000; 1961, $129,000.

Scientific Activities Overseas (Special Foreign Currency Program)—Continued

Program and Financing

	1959 actual	1960 estimate	1961 estimate
Program by activities:			
Foreign health research (total costs—obligations)			$3,707,000
Financing:			
Appropriation (new obligational authority)			3,707,000

The research efforts to be supported with foreign currencies derived through the sale abroad of surplus agricultural commodities authorized by the Agricultural Trade Development and Assistance Act of 1954, will be directed toward the solution of disease and health problems which hold promise of contributing knowledge of value and significance to the advancement of medical research in the United States. It is estimated that $50,000 will be used to supervise these projects. However, these costs will be absorbed and, therefore, no additional funds are included in the regular appropriation.

Program by activities—Continued			
3. Relation of costs to obligations:			
Costs financed from obligations of other years (unpaid undelivered orders), net (−)	−$423,047		
Obligations incurred for costs of other years (unpaid undelivered orders), net		$229,820	
Total program (obligations)	69,348,033	87,757,000	$88,869,000
Financing:			
Comparative transfers to other accounts	49,993		
Unobligated balance no longer available	5,869,974	3,500,000	
Appropriation (new obligational authority)	75,268,000	91,257,000	88,869,000

1. *Grants*—(*a*) *Research projects.*—Approximately 1,809 grants will be supported in 1960 and 1961, compared to 1,642 in 1959.

(*b*) *Research fellowships.*—Approximately 440 full-time and 272 part-time fellowships will be supported in 1960 and 1961, compared to 301 full time and 272 part time in 1959.

(*c*) *Training.*—Grants are awarded to accredited schools for the improvement of instruction in the curriculum; clinical traineeships are awarded to individuals for postgraduate training in such fields as surgery, pathology, radiobiology, and internal medicine; and grants are awarded to research training centers for individual traineeships. The following table summarizes these grants:

	1959 actual	*1960 estimate*	*1961 estimate*
Improvement of instruction	138	138	138
Clinical traineeships	122	169	240
Technician traineeships	85	85	---
Research training centers	41	48	51

(*d*) *State control programs.*—Funds are provided to States on a formula basis, to support activities such as consultation in the establishment of registries in cancer clinics, evaluation of diagnostic and therapeutic results, support of diagnostic and treatment clinics, and home nursing care for patients.

(*e*) *Community demonstration projects.*—Grants are awarded to professional and voluntary agencies, as well as State and local health departments and community hospitals, to apply more rapidly proven cancer control measures.

2. *Direct operations*—(*a*) *Research.*—Research is conducted in biochemistry, biology, biometry, epidemiology, chemotherapy, endocrinology, environmental cancer, pathology, physiology, radiation, and surgery.

(*c*) *Professional and technical assistance.*—Field studies and investigations are supported for the acquisition, development and application of new knowledge pertinent to the prevention, control and treatment of human cancer. Contracts are made with public and private nonprofit organizations for diagnostic methods development.

(*d*) *Chemotherapy contracts.*—In addition to chemotherapy activities undertaken through direct research and grants, contracts are made with public and private organizations and universities for directed research in cancer chemotherapy.

3. *Relation of costs to obligations.* Year-end balances of unpaid undelivered orders are as follows: 1958, $985,227; 1959, $562,180; 1960, $792,000; 1961, $792,000.

Appropriation (new obligational authority)	52,419,000	68,090,000	67,563,000

1. *Grants—(a) Research projects.*—Funds for 1961 will support approximately 1,096 grants compared to 1,014 in 1960 and 804 in 1959.

(*b*) *Research fellowships.*—In 1959, 289 fellowships were provided and it is estimated that 470 can be provided in 1960 and 470 in 1961.

(*c*) *Training.*—In 1960, 739 training grants can be awarded, and 739 training grants in 1961. These include funds for about 2,632 traineeships. In 1959, 678 grants provided funds for 2,532 traineeships.

(*d*) *State control programs.*—Grants are made to States on a formula basis. These grants help to establish, improve, and administer statewide mental health programs, including development of community services at the local level; and the development of pilot projects and demonstrations in areas such as juvenile delinquency, mental illness, school mental health, alcoholism, aging, and industrial mental health.

2. *Direct operations—(a) Research.*—Laboratory and clinical research is conducted in neurochemistry, neurophysiology, psychology, neuropsychiatric studies, socio-environmental studies, and neuropharmacology (including narcotics and barbiturate addiction).

(*c*) *Training activities.*—Support is given for inservice training of qualified staff members in subjects related to the field of mental health.

(*d*) *Professional and technical assistance.*—These operations consist of assistance to States in developing, and expanding local mental health programs through consultation services, and field studies in developing preventive and outpatient services; survey and development of special areas in mental health; consultation services for mental hospitals and related institutions and the psychopharmacology service center.

3. *Relation of costs to obligations.*—Year-end balances of unpaid undelivered orders are as follows: 1958, $612,798; 1959, $379,551; 1960, $511,000; 1961, $511,000.

1. *Grants*—(*a*) *Research projects.*—These grants are made to medical schools, other institutions, and to individuals for research projects. Approximately 2,279 research projects will be supported in 1961, as compared to 1,614 in 1959, and 2,257 in 1960.

(*b*) *Research fellowships.*—Grants are awarded to individuals to increase the number of research workers in the area of cardiovascular diseases. Approximately 577 awards will be supported in 1960 and 1961, as compared to 475 in 1959.

(*c*) *Training.*—These grants in 1960 and 1961 will provide assistance to 103 schools of medicine, osteopathy, and public health for support of undergraduate training. Funds will also provide for 216 grants for graduate research and clinical training including 648 traineeships. Funds in 1959 provided for support of 103 schools of medicine, and for 172 graduate trainee grants, including 471 traineeships.

(*d*) *State control programs.*—Grants are made to States, distributed on a formula basis, for improving State and local programs in prevention, education, community services, and operational research concerning cardiovascular diseases.

2. *Direct operations*—(*a*) *Research.*—Research emphasizes the acquisition of basic biochemical and physiological knowledge, and includes studies in new and improved therapeutic agents, diagnostic instrumentation, and clinical medicine on coronary artery disease, hypertension, arteriosclerosis, congestive heart failure, and related problems.

(*c*) *Training activities.*—Inservice training is provided for positions requiring unique combinations of cardiovascular training and experience.

(*d*) *Professional and technical assistance.*—Technical guidance and professional leadership are furnished to State and local health departments on heart program management in the fields of medicine, nursing, nutrition, medical social work, records and statistics, and program promotion.

3. *Relation of costs to obligations.*—Year-end balances of unpaid undelivered orders are as follows: 1958, $372,733; 1959, $455,182; 1960, $501,000; 1961, $501,000.

Unobligated balance no longer available	15,066		
Appropriation (new obligational authority)	7,420,000	10,019,000	11,204,000

1. *Grants*—(*a*) *Research projects.*—Approximately 436 grants will be supported in 1961 as compared to 371 grants in 1960 and 338 in 1959.

(*b*) *Research fellowships.*—An estimated 439 fellowships including 386 part-time dental students, will be supported in 1961 as compared to 430 fellowships, including 376 part time, in 1960 and 311 fellowships, including 270 part time, in 1959.

(*c*) *Training.*—Approximately 33 grants will be awarded in 1960 and 1961 to schools to train some 130 individuals for academic teaching and research careers in the various fields of dental science, as compared to 28 grants for 80 individuals in 1959.

2. *Direct operations*—(*a*) *Research.*—Research is conducted in the fields of periodontal diseases, growth and development, oral surgery, microbiology, pathology, histology, biochemistry, epidemiology, and biometry.

(*c*) *Professional and technical assistance.*—Funds are provided for the development of dental public health methods for widespread application in States and communities and assistance is given to States in establishing and carrying out their programs of prevention, education, and care.

(*d*) *Coordination and development of dental resources.*—Funds are provided for investigations into the status of the Nation's dental health, for study and appraisal of dental manpower in all its aspects, and for evaluation and development of methods for extending the availability of dental care to the American people, including investigation of problems associated with payment methods for dental care plans.

3. *Relation of costs to obligations.*—Year-end balances of unpaid undelivered orders are as follows: 1958, $57,980; 1959, $50,362; 1960, $59,162; 1961, $59,162.

Object Classification

NOTE.—Obligations for reimbursement to the "Bureau of State Services management fund" for 1959 and 1960 are shown for purposes of comparison.

Appropriation (new obligational authority)	31,215,000	46,862,000	47,541,000

1. *Grants*—(a) *Research projects.*—Approximately 2,190 grants will be supported in 1961 as compared with an estimated 2,100 grants in 1960, and 1,384 in 1959.

(b) *Research fellowships.*—About 64 fellowships are estimated for 1960 and 1961, as compared to 51 in 1959.

(c) *Training.*—During 1960 and 1961 it is estimated that 225 grants will be awarded to accredited schools, for the improvement of instruction, and 80 traineeships will be awarded to individuals for specialized postgraduate training. The corresponding grants and traineeships in 1959 were 165 and 62 respectively.

2. *Direct operations*—(a) *Research.*—Clinical and laboratory research is conducted in the fields of arthritis, rheumatism, diabetes, and other metabolic disorders, as well as studies in the major disciplines including pharmacology, toxicology, physiology, biochemistry, nutrition, chemistry, pathology, endocrinology, and physical biology.

3. *Relation of costs to obligations.*—Year-end balances of unpaid undelivered orders are as follows: 1958, $162,503; 1959, $142,543; 1960, $147,700; 1961, $147,700.

1. *Grants*—(a) *Research projects.*—Funds available for 1961 will support approximately 1,568 grants, while funds in 1960 will support approximately 1,493 grants, compared to 1,176 in 1959.

(b) *Research fellowships.*—An estimated 223 awards will be made in 1960 and 219 in 1961 for predoctoral, postdoctoral and special fellowships. This compares to 212 awards in 1959.

(c) *Training.*—Funds for 1960 and 1961 will provide approximately 86 grants to train individuals in allergy and immunology, parasitology and tropical medicine, and mycology and rickettsiology, compared to 61 grants in 1959.

2. *Direct operations*—(a) *Research.*—Laboratory, field, and clinical research is conducted in the broad fields of allergic, infectious, and parasitic diseases. The increase in 1961 will provide for studies in cell biology, biology of viruses, clinical investigation, and clinical and basic immunology.

Appropriation (new obligational authority)	29,403,000	41,487,000	39,662,000

1. *Grants—(a) Research projects.*—Funds for 1961 will support approximately 1,349 grants compared to 1,309 in 1960 and 942 in 1959.

(b) Research fellowships.—Approximately 202 fellowships including 102 part-time awards, will be supported in 1960 and 1961, as compared to 193 fellowships in 1959.

(c) Training.—Funds for 1960 and 1961 will support approximately 193 grants to training institutions to establish and improve programs to train teachers and clinical investigators in neurology, ophthalmology, and otology. Approximately 207 traineeships will be awarded to individuals for specialized postgraduate training in 1960 and 1961. The grants and traineeships were 156 and 147 respectively, in 1959.

2. *Direct operations—(a) Research.*—Research is being conducted on disorders of the brain, and spinal cord and peripheral nerves, such as epilepsy, cerebral palsy, multiple sclerosis, apoplexy, and Parkinson's disease; on neuromuscular disorders, such as muscular dystrophy; and on visual and other sensory disorders, such as glaucoma, uveitis, cataract, and hearing impairments.

(b) Training activities.—Support is given for inservice training of qualified staff members in subjects related to neurological and other sensory disorders.

3. *Relation of costs to obligations.*—Year-end balances of unpaid undelivered orders are as follows: 1958, $323,679; 1959, $268,931; 1960, $315,000; 1961, $315,000.

GRANTS FOR CONSTRUCTION OF HEALTH RESEARCH FACILITIES—Continued

Funds are proposed for the fifth year of a 6-year program of grants for the construction of new and improved non-Federal research facilities in the sciences related to health as authorized by the Health Research Facilities Act of 1956, as amended in 1958.

OPERATIONS, NATIONAL LIBRARY OF MEDICINE

For expenses, not otherwise provided for, necessary to carry out the National Library of Medicine Act (42 U.S.C. 275), [$1,566,000] *$1,662,000. (Department of Health, Education, and Welfare Appropriation Act, 1960.)*

Appropriated 1960, **$1,566,000** Estimate 1961, **$1,662,000**

Program and Financing

Transferred from "Promotion and further development of vocational education," Office of Education (73 Stat. 54)	111,000		
Appropriation (adjusted)	1,526,000	1,566,000	1,662,000

The National Library of Medicine assists the advancement of science through the collection and exchange of medical and other scientific information. In addition to cataloging and indexing services, the Library also publishes bibliographical guides and provides reference and research assistance.

The estimate for 1961 contemplates a continuation of the basic programs of the Library with increases for improving its indexing operations, increased publications costs, and publishing the fifth and final series of the Index-Catalogue.

WORKLOAD DATA

	1959 actual	*1960 estimate*	*1961 estimate*
Medical publications acquired	80,222	88,500	88,500
Titles cataloged	20,757	23,500	23,500
Volumes bound and repaired	19,470	22,000	22,000
Inquiries answered	9,390	10,000	10,000

This appropriation consolidates all direct construction items of the Public Health Service except Construction of Indian health facilities. A distribution of appropriations for construction of buildings and procurement of facilities ancillary to various programs of the Public Health Service follows:

	1958 actual	*1959 actual*	*1960 estimate*	*1961 estimate*
Bureau of State Services		$8,200,000		$1,385,000
National Institutes of Health	$258,000	13,722,000	$300,000	1,750,000
National Library of Medicine	18,000	6,975,000		
Total	276,000	28,897,000	300,000	3,135,000

PROPOSED PROJECTS

The following construction projects will necessitate the provision of additional funds in 1961:

1. *Site and planning, Communicable Disease Center.*—The estimate provides $600,000 for facilities in and near Atlanta, Ga., (*a*) for acquisition and surveys of a site for breeding, holding, and grazing experimental animals and (*b*) for plans and specifications for animal quarters and for additional office, laboratory, and service space at the Communicable Disease Center.

2. *Planning, environmental health center.*—Funds estimated at $785,000 are required for plans, specifications, and site surveys for facilities at Cincinnati, Ohio, to be used for sanitary engineering, occupational health, and radiological health programs.

3. *Construction of animal quarters (at the National Institutes of Health, Bethesda, Md.).*—Funds in the amount of $1,150,000 are to be used along with remaining balances from previous appropriations for completion of animal quarters. This facility has been used for offices in order to meet a temporary need. New cage-washing facilities, cages and racks, and other alterations are necessary in order to restore the building to its intended purpose. Completion is anticipated by November 1961.

4. *Construction of research facilities, Lexington, Ky.*—Funds estimated at $350,000 are required for plans, specifications, and construction of a facility to replace present inadequate structures at the Addiction Research Center. It is estimated that 6 months will be required to complete plans and that construction can be finished 9 months thereafter.

PUBLIC HEALTH SERVICE—Continued

Current authorizations—Continued

BUILDINGS AND FACILITIES—Continued

5. *Research facilities construction and site acquisition.*—Arrangements for acquisition of a site for a large animal facility in Montgomery County, Md., to serve the National Institutes of Health, will be concluded in 1960 with available funds. $250,000 is requested in 1961 for design of a records storage building, permanent animal buildings, construction of temporary bleeding stalls and other minor structures, and for the development of a master site plan including permanent utilities.

CONTINUING PROJECTS

The following projects are being constructed under appropriations currently available:

6. *Construction of library facilities.*
7. *Construction of dental research building.*
8. *Construction of surgical facilities.*
9. *General office building.*

The library facilities, scheduled for completion in June 1961, will provide a new location for the National Library of Medicine at Bethesda, Md. The dental research building will be completed in January 1961. The expansion of existing surgical facilities is scheduled for completion in December 1960. A contract has been awarded for the construction of the general office building, scheduled for completion in July 1961, which will house administrative and management personnel of the National Institutes of Health. Associated with the construction of this facility is the expansion of the powerplant for air conditioning purposes. Included are extension of a building, erection of a cooling tower, installation of a compressor, and space for installation of additional compressor equipment at a later date.

COMPLETED PROJECTS

10. *Equipment, Communicable Disease Center.*
11. *Construction of animal quarters, Hamilton, Mont.*
12. *Construction of biologics standards building.*
13. *Construction of research facilities (Clinical Center, NIH).*
14. *Buildings and facilities, Cincinnati, Ohio.*

The purchase and installation of equipment at the Communicable Disease Center building, under construction on a lease purchase arrangement at Atlanta, Ga., should be completed in 1960. The construction of animal quarters at the Rocky Mountain Laboratory, Hamilton, Mont., and the construction of the biologics standards building and research facilities at Bethesda, Md., form a part of the general expansion of the facilities of the National Institutes of Health. The buildings and facilities at Cincinnati, Ohio, constitute the Robert A. Taft Sanitary Engineering Center.

15. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources and applicable adjustment as reflected in the following table:

	1958 actual	*1959 actual*	*1960 estimate*	*1961 estimate*
Selected resources at end of year: Unpaid undelivered orders (appropriation balances obligated for goods and services on order not yet received)	$3,338,689	$10,597,574	$6,718,681	$1,564,224
Selected resources at start of year (−)		−3,338,689	−10,597,574	−6,718,681
Adjustment of selected resources reported at start of year			73,790	
Costs financed from obligations of other years, net (−)			−3,805,103	−5,154,457
Obligations incurred for costs of other years, net		7,258,885

1. *Public health methods and reports.*—This program is primarily concerned with studies of public health practice, economics, and health trends. It includes (*a*) interpretation of data to evaluate health problems, to measure the available facilities, health personnel, supplies, and organizations against those needs, and to provide a factual foundation for public health programs; (*b*) the National Health Survey to obtain information on the amount, distribution, and effects of illness and disability in the United States and the services received for such conditions, and the study of techniques for obtaining such statistical information with a view toward their continuing improvement; (*c*) the provision of advisory services to other government and nongovernment organizations; (*d*) staff services for the Surgeon General; and (*e*) publication of Public Health Reports, the official technical journal of the Public Health Service.

Relation of costs to obligations.—Year-end balances of unpaid undelivered orders are as follows: 1958, $76,650; 1959, $91,107; 1960, $91,107; 1961, $91,107.

[Control of Venereal Diseases]

[To carry out the purposes of sections 314(a) and 363 of the Act with respect to venereal diseases and for grants of money, services, supplies, equipment, and use of facilities to States, as defined in the Act, and with the approval of the respective State health authorities, to counties, health districts, and other political subdivisions of the States, for venereal disease control activities, in such amounts and upon such terms and conditions as the Surgeon General may determine; $5,400,000.] (*Department of Health, Education, and Welfare Appropriation Act, 1960.*)

Appropriated 1960, **$5,400,000**

Note.—Estimate of $4,700,000 for activities previously carried under this title has been transferred in the estimates to "Communicable disease activities." The amounts obligated for this purpose in 1959 and 1960 are shown in the schedule as comparative transfers.

Program and Financing

	1959 actual	1960 estimate	1961 estimate
Financing:			
Comparative transfers to other accounts	$5,386,087	$5,400,000

Unobligated balance carried forward	$6,500,000		
Appropriation (new obligational authority)	6,500,000		

An appropriation of $6,500,000 was made in 1959 for assistance in the construction of hospital facilities for the care and treatment of Alaskan mentally ill. The Public Health Service has approved the plans as submitted by Alaska for the implementation of this program, and the grant will be made to Alaska during 1960. The plans provide for the construction of a central hospital of approximately 225 beds in Anchorage.

PUBLIC HEALTH SERVICE—Continued

Current authorizations—Continued

GRANTS AND SPECIAL STUDIES, TERRITORY OF ALASKA—Con.

This program was initiated to supplement public health services in Alaska to meet the needs of an expanding population and settlement of new areas. The grant programs have been consolidated in a fund appropriated to the President, pending the full assumption of these responsibilities by the State of Alaska.

ALLOCATIONS OR ALLOTMENTS RECEIVED FROM OTHER ACCOUNTS

NOTE.—Obligations incurred under allocations or allotments from other accounts are shown in the schedules of the parent appropriations, as follows:
"American sections, international commissions," Department of State.
"Farm labor supply revolving fund," Bureau of Employment Security, Department of Labor.
"Mutual security—economic," funds appropriated to the President.
"Research and development," Office of Civil and Defense Mobilization.
"Salaries and expenses, Bureau of Prisons," Department of Justice.
"Salaries and expenses," Office of Civil and Defense Mobilization.

Budget program.—This fund is used to provide canteen items for sale to patients at Fort Worth, Tex., and Lexington, Ky., hospitals (57 Stat. 617). Proceeds of sales are available for replenishing stock and operating expense. The capital investment consists of $10,000 appropriated in 1944 and $1,715 of donated assets. Earnings are retained to meet possible future losses.

Relation of costs to obligations.—The relationship is derived from year-end balances of selected resources as reflected in the following table:

	1958 actual	*1959 actual*	*1960 estimate*	*1961 estimate*
Selected resources at end of year:				
Commodities for sale	$17,590	$18,442	$19,658	$19,908

Intragovernmental funds:

BUREAU OF STATE SERVICES MANAGEMENT FUND

For the purpose of facilitating the economical and efficient conduct of operations in the Bureau of State Services which are financed by two or more appropriations where the costs of operation are not readily susceptible of distribution as charges to such appropriations, there is hereby established the Bureau of State Services management fund. Such amounts as the Surgeon General may determine to represent a reasonable distribution of estimated costs among the various appropriations involved may be advanced each year to this fund and shall be available for expenditure for such costs under such regulations as may be prescribed by the Surgeon General: Provided, That funds advanced to this fund shall be available only in the fiscal year in which they are advanced: Provided further, That final adjustments of advances in accordance with actual costs shall be effected wherever practicable with the appropriations from which such funds are advanced.

Program and Financing

	1959 actual	1960 estimate	1961 estimate
Program by activities:			
1. Research services	$899,665	$1,144,800	$1,537,600
2. Business operations	1,881,303	1,945,200	1,983,000
3. Program direction	138,200	152,000	152,400
Total obligations	2,919,168	3,242,000	3,673,000
Financing:			
Advances and reimbursements from—			
"Assistance to States, general"	177,255	152,600	184,600
"Control of tuberculosis"	112,295	94,900	63,900
"Communicable disease activities"	1,483,709	1,669,500	1,966,600

"National Cancer Institute"	2,419	30,600	17,700
"National Heart Institute"	45,176	77,700	44,000
"Dental health aetivities"	37,847	50,700	34,500
Total financing	2,919,168	3,242,000	3,673,000

It is proposed that there be established in the Bureau of State Services a management fund to facilitate the efficient conduct of operations of that Bureau which are financed from two or more appropriations. The fund would be similar in operation to the management fund of the National Institutes of Health and would finance the research services, business operations, and program direction provided by the staff of the chief, Bureau of State Services, and by field installations at the Communicable Disease Center, Atlanta, Ga., and the Sanitary Engineering Center, Cincinnati, Ohio. Activities of the management fund would be financed by advances and reimbursements from those Public Health Service appropriations for which services are to be rendered by the fund. Formulas for determining the contribution from each appropriation are designed to reflect utilization of services performed by the management fund and take into consideration such factors as the numbers of personnel being serviced, and the dollar level for each program.

In 1959 and 1960, activities which will be conducted through the proposed management fund were carried out by allotments of appropriations. The budget schedules for those years reflect the level of activity which might have been conducted under a management fund and permit comparison to 1961 levels. The new procedure will improve administration through simplification of accounting.

The centralized staffs of the Bureau of State Services, the Communicable Disease Center, and the Sanitary Engineering Center provide supporting services to program activities as follows:

1. *Research services* provide the central administration and operations of services required for the conduct of research activities at the Communicable Disease Center and the Sanitary Engineering Center. Included are such services as technical reporting, library and reference services, biometric services, laboratory equipment design and construction, and the operation and maintenance of buildings.

2. *Business operations* provide the centralized business management services for the Bureau of State Services and the business management services furnished by the central staffs of the Communicable Disease Center and the Sanitary Engineering Center. The activity includes such services as financial management, management advisory services, information activities, processing of Public Health Service claims, procurement, supply and property management, printing and reproduction, forms management, messenger, files, and mail services.

3. *Program direction* provides for the executive direction and supervision of the various activities of the Bureau of State Services, including establishment of policies for program planning and development.

PUBLIC HEALTH SERVICE—Continued

Intragovernmental funds—Continued

NATIONAL INSTITUTES OF HEALTH MANAGEMENT FUND—Con.

from the several institutes. Formulas for determining the contribution from each institute are designed to reflect utilization of services performed by the management fund. Taken into consideration are such factors as use of beds in the clinical center, number of laboratory workers, total personnel, and dollar level of grant or direct operations funds obligated by the institute. A small portion of the funds comes from reimbursements from outside sources, principally cafeteria receipts, and some miscellaneous reimbursements from other Government agencies. The 1961 estimate for these activities makes provision for meeting deficiencies in the logistical supporting services and requirements for maintenance of the physical plant.

The centralized organizations of the National Institutes of Health provide supporting services to all programs as follows:

1. *Research supporting services* provide the central administration and operation of services for the conduct of research activities such as the care and breeding of experimental animals, laboratory equipment design and manufacture, and the operation and maintenance of utility services.

2. *Clinical supporting services* consist of the operation of the 516-bed clinical center together with the laboratory space required for the treatment of research patients.

3. *Business operations* provide the business management and plant safety services including financial management, personnel, supply management, transportation, and housekeeping services.

4. *Program direction* provides for the executive direction of research activities and fosters the extramural research and other activities.

5. *Research planning* provides for advice on the development, installation, and maintenance of the intramural research program and the relationship with related research programs and develops analyses related to the Nation's total medical research resources.

6. *Review and approval of grants* performs centralized review and approval services for the eight National Institutes of Health grants and awards programs. Provides overall program coordination, application processing services, program reporting and analytical services, central records, and overall administration of activated grants.

7. *Russian scientific translation* provides for the translation and publication of Russian research literature in the biomedical fields.

8. The *cafeteria* of the clinical center is operated by the nutrition department and furnishes meals for sale to employees and visitors at rates sufficient to cover the cost thereof. Income and expenses for 1959, 1960, and 1961 are as follows:

	1959 actual	*1960 estimate*	*1961 estimate*
Income from cafeteria sales	$378,325	$400,000	$400,000
Expense:			
Foodstuff and supplies	166,257	174,100	174,100
Preparation of meals	210,307	225,900	225,900
Total expense	376,564	400,000	400,000

9. *Relation of costs to obligations.*—Year-end balances of unpaid undelivered orders are as follows: 1958, $578,871; 1959, $579,649; 1960, $619,900; 1961, $619,900.

SERVICE AND SUPPLY FUND

This fund finances the providing of certain supplies, services, and equipment to programs of the Service. It is reimbursed from the appropriations supporting the programs benefited (42 U.S.C. 231).

Budget program.—The principal operations under the fund are carried out at (*a*) the medical supply depot at Perry Point, Md., which maintains stocks of drugs and other medical supplies to meet in part the requirements of the Service and requisitions of other Government organizations; and (*b*) the central supply activities at the National Institutes of Health which maintain stores of scientific and other general-use materials and supplies for the laboratories and offices at Bethesda, Md. In contrast to the operations under this revolving fund, the National Institutes of Health management fund is an annual account to which appropriated funds are advanced to facilitate the financing of clinical research, research services, administration, and other activities where the costs of operation are not readily susceptible of distribution.

Operating results.—Retained earnings amounted to $147,659 as of June 30, 1959, and are being retained in the fund against the possibility of future losses.

WORKING CAPITAL FUND, NARCOTIC HOSPITALS

Budget program.—Farms and other industries operated at the Fort Worth, Tex., and Lexington, Ky., narcotic hospitals provide patients with occupational outlets as a part of their therapeutic rehabilitation. Useful products are made for sale to the hospitals and other Government institutions (42 U.S.C. 258). The investment of the U.S. Government at the end of 1961 is estimated at $554,485, including $134,300 in appropriation and $74,193 in donated assets. Earnings are retained to meet possible future losses.

Appropriation (new obligational authority)	3,442,000	3,715,000	3,947,000

1. *Operation and maintenance of hospital.*—Saint Elizabeths Hospital provides care and treatment for the mentally ill who are either beneficiaries of the Federal Government or residents of the District of Columbia. The District reimburses the hospital for care of its residents.

Actual and estimated average daily patient load is as follows:

	1959 actual	*1960 estimate*	*1961 estimate*
Federal beneficiaries	1,853	1,870	1,842
District of Columbia residents	5,047	5,040	4,900
Total	6,900	6,910	6,742

A proposed supplemental appropriation covering the 1960 costs of wage board pay increases granted in January 1959 is shown under Proposed for later transmission.

2. *Operation of farm.*—The hospital farm provides occupational therapy benefits for patients. The value of produce usually exceeds the cost of operation.

3. *Operation of cafeteria.*—The hospital is authorized to operate a cafeteria for employees and others, and to sell meals at not less than cost. Proceeds are credited to the appropriation.

4. *Training program.*—The training program provides a source for medical and nursing staff recruitment by training interns, residents in psychiatry, student nurses, and other groups concerned with care and treatment of psychiatric patients. The numbers of trainees are as follows:

	1959 actual	*1960 estimate*	*1961 estimate*
Interns and other postgraduates	47	62	62
Student nurses	83	90	90
Total	130	152	152

5. *Research.*—The hospital proposes in 1961 to establish a separate research activity to take advantage of the many advances in psychiatric knowledge. Research projects to obtain a better understanding of the causes of mental disorders, their treatment, and possible means of prevention will be conducted in cooperation with the National Institute of Mental Health.

7. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources and applicable adjustment as reflected in the following table:

	1958 actual	*1959 actual*	*1960 estimate*	*1961 estimate*
Selected resources at end of year: Inventories and items on order:				
Stores (goods unconsumed by projects)	$474,145	$420,329	$358,044	$313,759
Unpaid undelivered orders (appropriation balances obligated for goods and services on order not yet received)	163,598	202,890	141,891	162,891
Total selected resources at end of year	637,743	623,219	499,935	476,650
Selected resources at start of year (−)		−637,743	−623,219	−499,935
Adjustment of selected resources reported at start of year		13,216		
Costs financed from obligations of other years, net (−)		−1,308	−123,284	−23,285

Appropriation (new obligational authority)			87,000	330,000	345,000				

This appropriation finances major repairs, permanent improvements, or additions to buildings, grounds, and utilities of the hospital. Funds for the larger projects are transferred to the General Services Administration.

1. *Building repairs and improvements.*—Funds requested in 1961 will provide for (*a*) renovation of Hitchcock Hall, (*b*) replacement of guttering and repairs to roofing on patient buildings, and (*c*) extension and completion of chapel basement.

2. *Ground maintenance and improvements.*—Funds are requested for the resurfacing of certain roads and parking areas within the hospital grounds.

3. *Utility facilities, repairs, and improvements.*—Funds are requested in 1961 to provide for (*a*) rewiring and extension of electrical facilities in certain patient buildings, and (*b*) replacement of electrical distribution and wiring system at the hospital powerplant.

4. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources and applicable adjustment as reflected in the following table:

	1958 actual	*1959 actual*	*1960 estimate*	*1961 estimate*

Unobligated balance carried forward					525,000				
Unobligated balance no longer available			6						
Appropriation (new obligational authority)					4,493,000				

The proposed appropriation will provide for the construction and equipment of a 250-bed treatment and cafeteria building to replace an antiquated treatment facility constructed in 1871. The proposed building will also provide food service facilities for two adjacent treatment buildings now lacking adequate facilities of this type. Plans and specifications for this facility, completed during 1959 with funds appropriated for the purpose in 1958, have been reviewed and approved by the hospital and General Services Administration.

3. *Relation of costs to obligations.*—Year-end balances of unpaid undelivered orders are as follows: 1958, $121,745; 1959, $58,603; 1961, $2,568,000.

Program by activities:			
Operation and maintenance of hospital (total costs—obligations)		$45,000	
Financing:			
Proposed supplemental appropriation		45,000	

Under existing legislation, 1960.—A supplemental appropriation of $45,000, covering the Federal share of wage-board pay increases granted in January 1959, is anticipated for 1960.

SOCIAL SECURITY ADMINISTRATION

Current authorizations:

LIMITATION ON SALARIES AND EXPENSES, BUREAU OF OLD-AGE AND SURVIVORS INSURANCE

(Trust fund)

For necessary expenses, [including the purchase of two passenger motor vehicles,] not more than [$191,600,000] *$203,200,000* may be expended from the Federal old-age and survivors insurance trust fund: *Provided,* That such amounts as are required shall be available to pay the cost of necessary travel incident to medical examinations for verifying disabilities of individuals who file applications for disability determinations under title II of the Social Security Act, as amended: *Provided further,* That $10,000,000 of the foregoing amount shall be apportioned for use pursuant to section 3679 of the Revised Statutes as amended (31 U.S.C. 665), only to the extent necessary to process claims workloads not anticipated in the budget estimates and after maximum absorption of the costs of such claims workload within the existing limitation has been achieved[: *Provided further,* That persons who have been admitted to practice before a Federal or State court of record who have had a minimum of three years' experience in the adjudication or consideration of claims for retirement, survivors, or disability benefits may be temporarily appointed by the Commissioner of Social Security to hold hearings under title II of the Social Security Act, as amended, but such temporary appointments shall terminate not later than December 31, 1960: *Provided further,* That no person shall hold a hearing in any case with which he has been concerned previously in the administration of such title II].

Advances to States, next succeeding fiscal year: For making, after May 31 of the current fiscal year, advances to States under section 221(e) of the Social Security Act, as amended, for the first quarter of the next succeeding fiscal year, such sums as may be necessary from the above authorization may be expended from the Federal old-age and survivors insurance trust fund. (*42 U.S.C. 401–425; Department of Health, Education, and Welfare Appropriation Act, 1960.*)

Limitation	171,221,000	191,600,000	203,200,000

The old-age, survivors, and disability insurance program provides protection to over 90% of the persons in the labor force and their families against the loss of earnings because of old age, disability, and death. Under the program, people in covered employment and the self-employed make tax contributions during their working years to provide protection for themselves and their families. Employers match the contributions made by their employees. These contributions are deposited in the Federal old-age and survivors insurance and Federal disability insurance trust funds, out of which benefit payments and administrative costs are paid.

The volume and nature of the work received by the Bureau of Old-Age and Survivors Insurance have changed significantly during the past 10 years because of a series of major revisions to the act, beginning with the amendments of 1950 and culminating with the 1958 amendments. These amendments have improved the protection provided by the retirement and survivors insurance phase of the program and added a disability program which provides for monthly insurance benefits for disabled workers age 50 and over and their dependents and for freezing earnings of disabled workers of any age.

1. *Maintenance of earnings accounts.*—Eligibility for insurance benefits and the amount of benefit payments are based on the lifetime earnings records maintained by the Bureau. The volume of earnings record work depends primarily on the level of employment. Employment levels are expected to continue to rise through both 1960 and 1961. This anticipated increase in employment plus a growing population will result in a greater number of earnings items in 1961 than in 1960.

	1959 actual	*1960 estimate*	*1961 estimate*
Earnings items:			
Received	255,337,049	269,438,500	276,765,500
Processed	255,471,899	269,438,500	276,765,500

2. *Processing old-age and survivors insurance claims.*—Prospective beneficiaries file claims in 584 district offices located in cities throughout the country. When a claim is approved, the Treasury Department is authorized to issue benefit checks. The number of claims received in 1959 exceed the estimate for 1960 because of the economic recession in the early part of 1959 and the peak one-time loads received in that year as a result of the 1958 amendments. The increase in the 1961 estimate over 1960 reflects the normal year-to-year growth in the number of claims.

	1959 actual	*1960 estimate*	*1961 estimate*
Old-age and survivors insurance claims applications:			
Received	2,506,514	2,469,000	2,510,000
Processed	2,534,378	2,470,636	2,510,000

3. *Maintenance of old-age and survivors insurance beneficiary rolls.*—The beneficiary rolls require continuing maintenance so that benefit checks may be mailed promptly each month to beneficiaries whose entitlement continues, and so that checks may be discontinued when eligibility for benefits ceases. The number of benefits in current pay status will continue to rise from year to year. Similarly, benefit payments will continue upward with the increasing number of beneficiaries and the higher benefit amounts provided in the 1958 amendments.

	1959 actual	*1960 estimate*	*1961 estimate*
Old-age and survivors insurance benefits in current pay status at end of year	12,820,164	13,660,000	14,439,000
Old-age and survivors insurance benefit payments (in millions)	$9,049	$10,346	$11,086

4. *Processing disability claims and maintaining beneficiary rolls.*—The Bureau's district offices receive all disability claims. In most cases State agencies, under

SOCIAL SECURITY ADMINISTRATION—Continued

Current authorizations—Continued

LIMITATION ON SALARIES AND EXPENSES, BUREAU OF OLD-AGE AND SURVIVORS INSURANCE—Continued

(Trust fund)—Continued

contractual arrangements, determine the existence of a disability. The Bureau reviews these determinations to assure uniformity among States. In addition, the Bureau maintains the beneficiary rolls for disability beneficiaries, as described under activity 3 above, for old-age and survivors insurance beneficiaries. Claims for disabled workers received in 1959 exceed the 1960 estimate because of the immediate effect of the 1958 amendments. The estimates for 1960 and 1961 reflect the normal long-term trend of the program.

	1959 actual	*1960 estimate*	*1961 estimate*
Claims from disabled workers:			
Received	423,814	413,000	460,000
Processed	448,610	422,963	450,000
Disability benefits in current pay status at end of year	361,216	493,000	592,000
Disability benefit payments (in millions)	$339	$520	$576

5. *Hearings and appeals.*—Individuals whose claims are disallowed have the right to appeal. In 1958 the appeals workload increased sharply with the first major impact of disability claims. This resulted in abnormally high pending loads for the office of hearings and appeals. During 1959 the backlog was partially reduced and by the end of 1960 it is expected that the abnormal backlog will be completely eliminated.

	1959 actual	*1960 estimate*	*1961 estimat*
Requests for hearings:			
Received	23,455	22,440	24,080
Processed	25,259	27,683	24,080

6. *Actuarial services.*—Actuarial studies and estimates are prepared for long-range program planning.

7. *Administration.*—This activity includes executive direction, divisional management, program research and planning, and housekeeping services.

8. *Contingency reserve.*—This reserve represents funds to be made available in the event claims workloads exceed those contained in the 1961 appropriation request.

9. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources and applicable adjustment as reflected in the following table.

	1958 actual	*1959 actual*	*1960 estimate*	*1961 estimate*
Selected resources at end of year: Unpaid undelivered orders (appropriation balances obligated for goods and services on order not yet received)	$3,998,735	$5,142,941	$6,033,119	$6,810,689

Ground was broken and construction of the Bureau's headquarters building in Baltimore County, Md., got underway in the fall of 1957. It is estimated that construction will be complete in early 1960 and the Bureau plans to move into the building at that time.

Because of major amendments to the Social Security Act since 1953 when space requirements were formulated, the building will be too small to house all of the Bureau's Baltimore operations. Authorization was granted in 1959 increasing the total limitation on cost to $32,290,000 so as to include construction of an addition. This construction will begin as soon as specifications and drawings are complete and the contract awarded.

Relation of costs to obligations.—Year-end balances of unpaid, undelivered orders are as follows: 1958, $20,605,728; 1959, $8,012,717; 1960, $4,093,000; 1961, $2,020,000.

Grants for old-age assistance, aid to dependent children, aid to the blind, and aid to the permanently and totally disabled are made to States that have plans for these programs approved by the Department of Health, Education, and Welfare. A total of 54 jurisdictions including all the States, the District of Columbia, Guam, Puerto Rico, and the Virgin Islands have approved plans for old-age assistance, aid to dependent children, and aid to the blind; 49 jurisdictions have approved plans for aid to the permanently and totally disabled. During 1960, it is anticipated that a plan for aid to the permanently and totally disabled will be approved for Iowa.

Under the Social Security Act, the amount of assistance payments subject to Federal participation is limited to a monthly average expenditure of $65 per recipient of old-age assistance, aid to the blind and aid to the permanently and totally disabled and $30 per recipient of aid to dependent children. The average monthly amount is based on expenditures for money payments to recipients and payments to vendors for medical or remedial care. Within these maximums, the Federal Government provides ⅘ of the first $30 per recipient of old-age assistance, aid to the blind and aid to the permanently and totally disabled, and $^{14}/_{17}$ of the first $17 per recipient of aid to dependent children, plus a proportion of the balance, which varies among States from 50 to 65% depending on variations in average per capita income of the States. The foregoing provisions apply in all jurisdictions except Guam, Puerto Rico and the Virgin Islands; for these jurisdictions the Federal share is one-half of total expenditures within a maximum monthly average of $35 per recipient in the adult categories and $18 per recipient of aid to dependent children. The Federal share in these jurisdictions is further limited by the ceiling on the total amount of Federal grants for all categories of assistance and State and local administration of $400,000 for Guam, $8,500,000 for Puerto Rico and $300,000 for the Virgin Islands. In all 54 jurisdictions, the Federal share of expenditures for State and local administration of the program is one-half.

For 1961, the total amount of Federal, State, and local expenditures for assistance and administration is estimated at $3,643,400,000, of which $2,100,500,000 represents the Federal share. The appropriation request of $2,083,000,000 is $17,500,000 less than the estimated Federal share, because the States will have available for expenditure $17,500,000 representing the Federal share of collections and adjustments for prior years. Of the total Federal share, $1,169,000,000 is for old-age assistance, $696,300,000 for aid to dependent children, $50,900,000 for aid to the blind, and $184,300,000 for aid to the permanently and totally disabled. It is estimated that a supplemental appropriation of $10,000,000 will be required for 1960 which is proposed for later transmission.

The appropriation request of $2,083,000,000 for 1961 is $39,500,000 more than the appropriation of $2,033,500,000 plus the supplemental request of $10,000,000 for 1960. Of the increase for 1961 over 1960 about $20,000,000 is due to an estimated increase in the average monthly payments per recipient under all programs, about $13,500,000 is attributable to a larger number of recipients in all programs except old-age assistance; and $6,000,000 is accounted for by an estimated increase in the costs of State and local administration.

The figures for 1960 used in the tables appearing under the activities below include the supplemental request of $10,000,000; the figures shown in the Program and financing schedule include only the $2,033,500,000 already appropriated.

1. *Payments to recipients*—(a) *Old-age assistance.*—The average number of recipients per month for 1961 is estimated at 1.7% fewer than was estimated for 1960. The estimated average monthly payment is $1.50 more than the estimate for 1960.

	1959 actual	*1960 estimate*	*1961 estimate*
Average number of recipients per month	2,444,529	2,400,000	2,360,000
Average monthly payment	$63.34	$65.50	$67.00
Total expenditures for assistance (Federal, State, and local)	$1,858,004,176	$1,886,400,000	$1,897,400,000
Federal share	$1,092,784,676	$1,116,300,000	$1,110,100,000

SOCIAL SECURITY ADMINISTRATION—Continued

Current authorizations—Continued

GRANTS TO STATES FOR PUBLIC ASSISTANCE—Continued

(*b*) *Aid to dependent children.*—The average number of persons to receive assistance per month for 1961 is 3.3% higher than is estimated for 1960. The estimated average monthly payment per person is $0.60 more than the estimate for 1960.

	1959 actual	*1960 estimate*	*1961 estimate*
Average number of recipients per month:			
Families	757,506	783,500	809,800
Children	2,185,449	2,264,000	2,340,000
Persons	2,851,728	2,952,000	3,050,000
Average monthly payment per person	$27.98	$28.70	$29.30
Total expenditures for assistance (Federal, State, and local)	$956,379,934	$1,016,300,000	$1,072,400,000
Federal share	$574,665,397	$612,800,000	$638,700,000

(*c*) *Aid to the blind.*—The average number of recipients per month for 1961 is estimated at 1.2% more than was estimated for 1960. The estimated average monthly payment is $1.50 more than the estimate for 1960.

	1959 actual	*1960 estimate*	*1961 estimate*
Average number of recipients per month	109,461	110,100	111,400
Average monthly payment	$67.81	$69.80	$71.30
Total expenditures for assistance (Federal, State, and local)	$89,065,605	$92,200,000	$95,300,000
Federal share	$44,517,108	$46,400,000	$47,400,000

(*d*) *Aid to the permanently and totally disabled.*—The average monthly number of recipients is estimated to be 7.4% more than for 1960. The estimated average payment for 1961 is $1.50 more than for 1960. The estimate covers costs under the presently approved plans for 49 jurisdictions and for one additional plan (Iowa) that is expected to be approved in 1960.

	1959 actual	*1960 estimate*	*1961 estimate*
Average number of recipients per month	327,805	352,000	378,000
Average monthly payment	$62.20	$64.10	$65.60
Total expenditures for assistance (Federal, State, and local)	$244,663,845	$270,800,000	$297,600,000
Federal share	$136,218,364	$152,500,000	$165,300,000

2. *State and local administration.*—The grants to States include half the costs of State and local administration that are found by the Department of Health, Education, and Welfare to be necessary for the proper and efficient administration of the State public assistance programs. The Federal share contributes toward the salaries and expenses of about 61,000 State and local personnel.

Total costs in 1961 are estimated at $12,100,000 more than in 1960; $6,000,000 of this increase will come from Federal funds. The increases in costs are attributable primarily to (*a*) salary raises given to keep pace with rising living costs and to compete successfully with other professions and agencies for staff and (*b*) staff increases, to handle the increased number of recipients and to provide services to recipients directed toward self-care, self-support, and strengthened family life.

	1959 actual	*1960 estimate*	*1961 estimate*
(*a*) Old-age assistance	$113,736,827	$116,700,000	$118,800,000
(*b*) Aid to dependent children	99,981,345	110,100,000	115,900,000
(*c*) Aid to the blind	7,349,125	7,500,000	7,700,000
(*d*) Aid to the permanently and totally disabled	31,021,735	34,300,000	38,300,000
Total expenditures (Federal, State, and local)	252,089,032	268,600,000	280,700,000
Federal share	125,137,724	133,000,000	139,000,000

4. *Relation of costs to obligations.*—The relationship is derived by adjusting for advances during current year from next year's appropriation for obligations chargeable to next fiscal year, as follows:

	1958 actual	*1959 actual*	*1960 estimate*	*1961 estimate*
Selected resources at end of year (amount obligated in current year for grants chargeable to appropriation for subsequent year)	$423,493,296	$445,527,944	$500,000,000	$500,000,000
Selected resources at start of year (amount obligated in prior year for grants chargeable to appropriation for current year) (—)	−423,493,296	−445,527,944	−500,000,000

The Bureau is responsible for the administration of Federal grants to States for four categories of needy people—the aged, dependent children, the blind, and the permanently and totally disabled. These programs involve annual expenditures of over $3.5 billion in Federal, State, and local funds and provide financial assistance and services to more than 5 million people.

1. *Program policies and standards.*—Requirements of the Social Security Act are interpreted and specialized technical assistance is provided. Constructive developmental work with State agencies results in achieving more effective and economical administration.

2. *Staff development for State and local employees.*—Training opportunities, through short-term seminars, are provided for persons employed in social work and other positions in State and local public assistance agencies. Technical assistance is provided to State agencies for improving staff performance at all levels.

3. *Review State plans and grants, evaluate State operations.*—Action is taken on new State plans and on amendments thereto to assure conformity to the act; reviews are made of operations and findings are used to assist States in administering their programs; consultation and advice are provided on problems arising in day-to-day operations; grants are processed; information is provided to the public.

4. *Collect and interpret statistics.*—Information is collected in cooperation with State agencies, to provide national statistics on public assistance which are used by

Salaries and Expenses, Children's Bureau

For necessary expenses in carrying out the Act of April 9, 1912, as amended (42 U.S.C., ch. 6), and title V of the Social Security Act, as amended (42 U.S.C., ch. 7, subch. V), including purchase of reports and material for the publications of the Children's Bureau and of reprints for distribution, [$2,300,000] *$2,374,000*: *Provided*, That no part of any appropriation contained in this title shall be used to promulgate or carry out any instructions, order, or regulation relating to the care of obstetrical cases which discriminate between persons licensed under State law to practice obstetrics: *Provided further*, That the foregoing proviso shall not be so construed as to prevent any patient from having the services of any practitioner of her own choice, paid for out of this fund, so long as State laws are complied with: *Provided further*, That any State plan which provides standards for professional obstetrical services in accordance with the laws of the State shall be approved. (*Department of Health, Education, and Welfare Appropriation Act, 1960.*)

The Bureau investigates and reports on the health and welfare of children and administers grants to the States for extending and improving maternal and child health services, crippled children's services, and child welfare services.

1. *State and local health services for children.*—Policies and requirements for State maternal and child health and crippled children's programs are developed; State plans are reviewed and approved; consultative services are given to State agencies, other public and voluntary agencies and organizations, and educational institutions engaged in training professional personnel; and guides and recommendations are prepared on the provision of child health services.

2. *State and local social services for children.*—The same approach is used for the child welfare services as for the child health services.

3. *Technical assistance to States and communities for juvenile delinquency programs.*—Consultation is given to States, communities and organizations, both public and voluntary, on standards and methods for care and treatment of juvenile delinquents, on content of State or local programs, and on problems of organization and coordination on a statewide or local basis; assistance is given to State agencies and educational institutions in planning for training of professional and nonprofessional personnel in the field of juvenile delinquency.

4. *Research in child life and services for children.*—Studies on child health and welfare, particularly social and economic problems, are conducted, and the programs and services for children are evaluated. The results are interpreted to the public through pamphlets and bulletins.

5. *Information for parents and others working with children.*—Publications are prepared and distributed on child health and welfare services. Upon request, assistance is given to States in interpreting their child health and welfare programs.

7. *Relation of costs to obligations.*—Year-end balance of unpaid undelivered orders are as follows: 1958, $23,028; 1959, $14,036; 1960, $16,000; 1961, $20,000.

Every 10 years since 1909 the President has called a White House Conference on Children and Youth. These conferences are joint undertakings of the Government, States, voluntary organizations, and individual citizens. Private financing is used to help support the Conference.

The 1960 appropriation provided for completion of Conference planning and for holding the Conference. The 1961 request will provide for postconference activity to make available to the public and Conference participants the results and to facilitate application of Conference findings.

Relation of costs to obligations.—Year-end balances of unpaid undelivered orders are as follows: 1959, $461; 1960, $1,500; 1961, $1,000.

GRANTS TO STATES FOR MATERNAL AND CHILD WELFARE

For grants to States for maternal and child-health services, services for crippled children, and child-welfare services as authorized in title V, parts 1, 2, and 3, of the Social Security Act, as amended (42 U.S.C. ch. 7, subch. V), [$46,500,000] *$48,500,000*, of which [$16,000,000] *$16,667,000* shall be available for services for crippled children, [$17,500,000] *$18,167,000* for maternal and child-health services, and [$13,000,000] *$13,666,000* for child-welfare services: *Provided*, That any allotment to a State pursuant to section 502(b) or 512(b) of such Act shall not be included in computing for the purposes of subsections (a) and (b) of sections 504 and 514 of such Act an amount expended or estimated to be expended by the State: *Provided further*, That $1,000,000 of the amount available under section 502(b) of such Act shall be used only for special projects for mentally retarded children. *(Department of Health, Eduaction, and Welfare Appropriation Act, 1960.)*

Appropriated 1960, **$46,500,000** Estimate 1961, **$48,500,000**

Program and Financing

	1959 actual	1960 estimate	1961 estimate
Program by activities:			
1. Maternal and child health services	$16,494,125	$17,500,000	$18,167,000
2. Crippled children's services	16,401,023	16,000,000	16,667,000
3. Child welfare services	11,833,298	13,000,000	13,666,000
Total program (costs—obligations) (object class 11)	44,728,446	46,500,000	48,500,000

Unobligated balance no longer available	271,554		
Appropriation (new obligational authority)	45,000,000	46,500,000	48,500,000

The States are required to match one-half of the amounts appropriated for maternal and child health services and crippled children's services, and the remaining funds are distributed to the States in proportion to their financial need. The States are required to match all appropriated funds for child welfare services, but the percent of matching required varies from 33⅓ to 66⅔.

1. *Maternal and child health services.*—Grants are provided to States for the extension and improvement of health services for mothers and children, especially in rural areas.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

2. *Crippled children's services.*—Grants are made to States to extend and improve services for crippled children including medical, surgical, corrective, and other care, especially in rural areas. A 1959 supplemental appropriation of $1,500,000 was provided to be used exclusively for services for children with congenital heart disease.

3. *Child welfare services.*—Grants aid States to establish, extend, and strengthen child welfare services for the protection and care of homeless, dependent, and neglected children, and children in danger of becoming delinquent, and for the return of runaway children to their homes in other States.

Cooperative Research or Demonstration Projects in Social Security

For grants, contracts, and jointly financed cooperative arrangements for research or demonstration projects under section 1110 of the Social Security Act, as amended (42 U.S.C. 1310), $700,000.

Estimate 1961, **$700,000**

Program and Financing

	1959 actual	1960 estimate	1961 estimate
Program by activities:			
Grants, contracts, and cooperative arrangements (total costs—obligations) (object class 11)			$700,000
Financing:			
Appropriation (new obligational authority)			700,000

The 1956 amendments to the Social Security Act authorize grants to States, to public and nonprofit organizations, and contracts or jointly financed cooperative arrangements for the conduct of research or demonstration projects in social security. To date, no funds have been appropriated for this purpose. The request for 1961 will provide: (*a*) a major demonstration project to explore bases for the coordinating of community services to help the needy become more self-sufficient; (*b*) for approximately 15 projects by public or nonprofit organizations to explore the causes of dependency and possible methods for its reduction or elimination; and (*c*) for exploration and review of existing knowledge and research in special aspects of social security.

Cooperative Research or Demonstration Projects in Social Security (Special Foreign Currency Program)

For purchase of foreign currencies which accrue under title I of the Agricultural Trade Development and Assistance Act of 1954, as amended (7 U.S.C. 1704), for the purposes authorized by section 104(k) of that Act, to remain available until expended, $25,650, of which not less than $13,100 shall be available to purchase currencies which the Treasury Department shall determine to be excess to the normal requirements of the United States: Provided, That this appropriation shall not be used for the purchase of currencies available in the Treasury for the purposes of section 104(f) of such Act, unless such currencies are excess to the normal requirements of the United States.

Estimate 1961, **$25,650**

Program and Financing

Program by activities:			
Foreign research projects (total costs—obligations)			$25,650
Financing:			
Appropriation (new obligational authority)			25,650

Use of foreign currencies derived through the sale abroad of surplus agricultural commodities under the Agricultural Trade Development and Assistance Act of 1954 by the Social Security Administration will permit (*a*) a research project in social welfare, in six foreign countries, to evaluate the technical training and experience obtained through exchange programs, and (*b*) a research project in Brazil to study the interrelationships of social insurance systems and social service programs. It is estimated that $1,000 will be used to administer these projects. However, these costs will be absorbed and, therefore, no additional funds are included in the regular appropriation.

The Office of the Commissioner directs and coordinates the social security program; and performs basic research covering the broader phases of social security.

1. *Direction and coordination of the social security program.*—This consists of (*a*) formulation of administrative policies; (*b*) certification of compliance of State laws, plans, and operations with Federal requirements and approval of grants to States; (*c*) coordinating interprogram activities; and (*d*) review of administrative management throughout the Social Security Administration.

2. *Appraisal and development of the social security program.*—Provision is made for (*a*) basic studies beyond the immediate scope of any bureau; (*b*) review and coordination of research and statistics work in the Administration; and (*c*) the development of ways of improving economic security through social insurance and related measures.

Federal credit unions are privately owned, cooperative associations organized for the purpose of promoting thrift among their members and creating a source of credit for provident or productive purposes, authorized by the Federal Credit Union Act (act of June 26, 1934), as amended.

The Bureau finances its activities out of fees charged for services performed. Additional working capital was provided in 1954 by the appropriation of an interest-bearing loan of $250,000. The final payment on this loan was made in July, 1959.

The Bureau's activities consist of (*a*) chartering new Federal credit unions, (*b*) supervising established Federal credit unions, (*c*) making periodic examinations of their financial condition and operating practices, and (*d*) administrative services. Data relating to activities are shown below.

	1958 actual	*1960 estimate*	*1961 estimate*
Number Federal credit unions chartered	635	600	600
Number regular examinations	9,371	9,580	9,880
Number operating Federal credit unions as of December 31 of the previous calendar year	9,030	9,330	9,630
Assets of Federal credit unions as of December 31 of the previous calendar year	$2,034,866,000	$2,242,110,000	$2,625,729,000

Operating results.—Fees from receipts cover the costs of operations. Retained earnings are expected to show an increase to $883,860 through June 30, 1961.

8. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources as reflected in the following table:

GRANTS TO STATES FOR PUBLIC ASSISTANCE

Program and Financing

	1959 actual	1960 estimate	1961 estimate
Program by activities:			
State expenditures:			
1. Payments to recipients:			
(a) Old-age assistance		$7,800,000	
(b) Aid to dependent children		13,300,000	
(c) Aid to the blind		−900,000	
(d) Aid to the permanently and totally disabled		−8,200,000	
Total, payments to recipients		12,000,000	
2. State and local administration:			
(a) Old-age assistance		−1,000,000	
(b) Aid to dependent children		−600,000	
(c) Aid to the blind		−200,000	
(d) Aid to the permanently and totally disabled		−200,000	
Total, State and local administration		−2,000,000	
Total program (costs—obligations)		10,000,000	
Financing:			
Proposed supplemental appropriation		10,000,000	

Under existing legislation, 1960.—It is estimated that a supplemental appropriation of $10,000,000 will be required for 1960 because, based on current trends, the estimated number of recipients in all programs, except aid to the permanently and totally disabled, and the Federal share of the average old-age assistance payment are larger than was anticipated when the appropriation request was approved by the Congress. Most of the additional amount is required for aid to dependent children.

SPECIAL INSTITUTIONS

Current authorizations:

AMERICAN PRINTING HOUSE FOR THE BLIND

EDUCATION OF THE BLIND

For carrying out the Act of March 3, 1879, as amended (20 U.S.C. 101–105), $400,000. (*Department of Health, Education, and Welfare Appropriation Act, 1960.*)

Appropriation (new obligational authority)	123,000	325,000	2,432,000

A building program, designed to replace aging buildings and provide modern facilities to accommodate increased enrollments, was begun in 1956. The table below shows the appropriations through 1960 for the building program and the estimate for 1961. The construction projects provided for through 1958 are substantially complete except for the classroom-science building, for which laboratory equipment is needed. The 1959 appropriation provided for plans and specifications for athletic fields and stands and remaining projects in the building program, including an auditorium, maintenance buildings, and Kendall School facilities. For 1960, $325,000 was provided for construction of athletic fields, completion of the cafeteria-service building, and major repairs and renovation of older buildings on the campus.

The 1961 estimate of $2,432,000 is for the remainder of the new construction program, for equipment for the classroom-science building, and for additional major repairs and renovation.

Project	*1956–58*	*1959*	*1960*	*1961*

NOTE.—Reimbursements from non-Federal sources above are from tuition, other student fees, gifts and grants, endowment income, and sales by auxiliary enterprises.

The University consists of an undergraduate college, a graduate school offering the master's degree and the degree of doctor of philosophy (in chemistry, physics, zoology, and physiology), and eight professional schools. Federal funds will provide approximately 54.8% of the operating costs in 1961.

1. *General administration.*—The University is administered by a private board of trustees and staff of officers.

A master development plan and plans and specifications for 11 building projects and 1 alteration project have been authorized and completed. Plans and specifications for a home economics building and a physical education building are underway and are expected to be completed during 1960. A survey of the steam and electrical production and distribution system has been started and will also be completed during 1960. The 1961 estimate provides for the planning of a classroom building and a women's dormitory.

CONSTRUCTION PROGRAM

Since 1945 the Federal Government has undertaken to finance a major construction program at Howard University which includes the erection of a number of new buildings and alterations and repairs to the existing physical plant. Both direct appropriations and contract authorizations have been available. The following table sets forth the construction program through 1961 and the estimated obligational authority available. Appropriations of $12,183,004 have been made to liquidate $12,718,004 in contract authorizations, leaving a balance of $535,000, which is not expected to be needed, for the auditorium-fine arts building.

Project	*Total obligational authority*	*Status of project*
Home economics building	$1,105,000	To be completed in 1962.
Powerplant facilities	328,000	To be completed in 1961.
Auditorium-fine arts building	4,127,985	To be completed in 1960.
Preclinical medical building	4,436,000	Completed.[1]
Dental building	3,257,680	Do.[1]
Men's dormitory	1,898,200	Do.[1]
Engineering building	2,118,860	Completed.
Biology-greenhouse building	1,770,500	Do.
Women's dormitory	1,750,400	Do.
Administration building	1,534,500	Do.
Law school building	1,302,100	Do.
Pharmacy building	904,500	Do.
Other	1,221,240	Do.
Total	25,754,965	

[1] Except for equipment.

The 1961 estimate provides for the construction of a home economics building and for powerplant facilities.

1. *Executive direction and program coordination.*—Overall direction and coordination are given to all activities of the Department. Staff assistance is provided to develop the Department's legislative program; to analyze the Department's programs and goals, including identification of current and emerging problems; to appraise Federal-State relationships; to coordinate Department activities and stimulate action in the States and local communities concerning problems affecting the aging population; and to aid the Secretary in carrying out the Department's responsibilities with respect to international activities and the special institutions. Services are also provided for defense emergency operations plans of the Department and for internal security functions.

2. *Publications and reports.*—This Office directs the Department's public information activities, providing serv-

ices to press, radio, and other media and specific information to those interested.

3. *Administrative and financial management.*—Staff advice is provided to the Secretary and guidance is furnished to the operating agencies with regard to administrative management, personnel, property and records management, office services, organization, staffing, and control problems. This activity includes the Department library which supplies headquarters staff with library materials and related services. Financial management includes analyses of departmental program budgets, development of fiscal policies and procedures, and conduct of internal audits. In addition, certain direct administrative and financial services are provided the operating agencies as well as to the Office of the Secretary.

4. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources and applicable adjustment as reflected in the following table:

The Secretary is represented in each of the regions by a regional director who is responsible for carrying out departmental policies and for leadership, coordination, evaluation, and administrative supervision of all program representatives from the various operating agencies who are located in the regional offices.

1. *Field administration.*—This activity includes review, evaluation, and coordination of Department program operations conducted through the regional offices as well as personnel, fiscal, and office services for approximately 14,700 regional employees.

2. *Grant-in-aid audits.*—The division audits 36 grant-in-aid programs to determine whether these grants were expended by the States and local subdivisions for the purposes for which they were appropriated. In addition, it audits State activities in the utilization of Federal surplus property. There will be an incoming current workload of approximately 2,290 audits in 1961 compared with 2,210 in 1960 and 1,921 in 1959. Grant programs requiring more staff time in 1961 are construction projects, National Defense Education Act, and library services in rural areas.

3. *State merit systems.*—Seventeen various grants-in-aid are made to States contingent upon compliance with Federal regulations and standards relating to State personnel administration. The division reviews 70 State merit systems in 290 State agencies administering grant programs and also renders technical services concerning increased efficiency of personnel administration to requesting States.

4. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources and applicable adjustment as reflected in the following table:

The Office of the General Counsel acts as legal adviser to the Secretary, the regional office staffs, and the operating agencies of the Department. The estimate for 1961 reflects an increased workload occasioned by recently enacted legislation and the continued expansion and growth of many of the programs of the Department. The increase is related to expansion of the old-age and survivors insurance program and to public health, education, and patent and invention right activities.

4. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources and applicable adjustment as reflected in the following table:

OFFICE OF THE SECRETARY—Continued

Current authorizations—Continued

SURPLUS PROPERTY UTILIZATION—Continued

The following table shows actual and anticipated property allocations to schools, hospitals, and civil defense agencies through operation of the program:

ACQUISITION COST OF PROPERTY IN MILLIONS

	1958 actual	*1959 actual*	*1960 estimate*	*1961 estimate*
Personal property allocations	$302.5	$363.0	$425.0	$540.0
Real property transfers	9.4	21.0	25.0	30.0

Collections are estimated from sales, abrogations, and penalties on compliance cases at $500,000 in 1960 and 1961, compared to $574,000 in 1959.

2. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources and applicable adjustment as reflected in the following table:

	1958 actual	*1959 actual*	*1960 estimate*	*1961 estimate*
Selected resources at end of year: Unpaid undelivered orders (appropriation balances obligated for goods and services on order not yet received)	$3,763	$3,148	$555	$555
Selected resources at start of year (−)		−3,763	−3,148	−555
Adjustment of selected resources reported at start of year		842		
Costs financed from obligations of other years, net (−)			−2,593	
Obligations incurred for costs of other years, net		227

Intragovernmental funds:

WORKING CAPITAL FUND

The Working capital fund established under this head in the Federal Security Agency Appropriation Act, 1953, shall also be available for expenses necessary for a central laborers' service, and such other administrative services, common to two or more operating agencies of the Department, as the Secretary may, with the approval of the Bureau of the Budget, determine can be performed more advantageously on a centralized basis: Provided, That said fund may hereafter be credited in advance or reimbursed for services performed or supplies and equipment furnished.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

The Working capital fund provides departmental headquarters offices with selected centralized administrative services, as authorized by 42 U.S.C. 905.

Budget program—1. *Reproduction.*—Consists of offset printing, mimeographing, photographic, visual aids, microfilming, and addressograph services for the Department's headquarters and for other Government agencies as required. This activity also includes procurement of printing from Government Printing Office and other sources and procurement and distribution of congressional materials.

2. *Tabulating.*—Provides tabulating services on a centralized basis for all of the headquarters units of the Department. The services performed cover fiscal, payroll, and statistical data processing.

3. *Supply services.*—Includes purchasing and supply functions on a centralized basis for the headquarters units of the Department. In 1961, authorization is requested to provide laboring services.

Operating results and financial conditions.—Government investment at end of 1961 is expected to consist of donated assets and retained earnings. The earnings are retained to meet future needs.

Under existing legislation, 1960.—A supplemental appropriation for $50,000 is anticipated for 1960 to stimulate more effective citizen awareness, and participation in the various conference programs.

GENERAL PROVISIONS

SEC. 202. Appropriations under this title available for salaries and expenses shall be available for payment in advance for dues or fees for library membership in organizations whose publications are available to members only or to members at a price lower than to the general public and for payment in advance for publications available only upon that basis or available at a reduced price on prepublication orders.

SEC. 203. Appropriations under this title available for salaries and expenses shall be available for uniforms or allowances therefor as authorized by the Act of September 1, 1954, as amended (5 U.S.C. 2131).

SEC. 204. None of the funds appropriated by this title to the Social Security Administration for grants-in-aid of State agencies to cover, in whole or in part, the cost of operation of said agencies including the salaries and expenses of officers and employees of said agencies, shall be withheld from the said agencies of any States which have established by legislative enactment and have in operation a merit system and classification and compensation plan covering the selection, tenure in office, and compensation of their employees, because of any disapproval of their personnel or the manner of their selection by the agencies of the said States, or the rates of pay of said officers or employees.

SEC. 205. The Secretary is authorized to make such transfers of motor vehicles, between bureaus and offices, without transfer of funds, as may be required in carrying out the operations of the Department.

[SEC. 206. None of the funds provided herein shall be used to pay any recipient of a grant for the conduct of a research project an amount for indirect expenses in connection with such project in excess of 15 per centum of the direct costs.]

[SEC. 207. Hereafter any appropriation available for the pay and allowances of commissioned officers of the Public Health Service may be utilized for the payment of claims as authorized by the Act of September 2, 1957 (71 Stat 575).]

[SEC. 208. Any] *SEC. 206. Except as otherwise provided under the appropriation to the Public Health Service for "Buildings and facilities", any* obligational authority for planning or construction of any building made available to the Department of Health, Education, and Welfare, which otherwise expires for obligation on June 30, [1959] *1960*, shall remain available until June 30, [1960] *1961*.

SEC. [209] *207*. The Secretary is authorized to make available not to exceed [$1,500] *$5,000* from funds available for salaries and expenses under this title for entertainment, not otherwise provided for, of officials, visiting scientists, and other experts of other countries.

SEC. [210] *208*. Appropriations to the Public Health Service available for research grants pursuant to the Public Health Service Act shall also be available, on the same terms and conditions as apply to non-Federal institutions, for research grants to hospitals of the Service or to Saint Elizabeths Hospital.

SEC. [211] *209*. Appropriations under this title available for salaries and expenses shall be available for expenses of attendance at meetings which are concerned with the functions or activities for which the appropriation is made or which will contribute to improved conduct, supervision, or management of those functions or activities. (*Department of Health, Education, and Welfare Appropriation Act, 1960.*)

DEPARTMENT OF THE INTERIOR

The 1961 recommendations for new obligational authority for the Department of the Interior total $771 million. Approximately 90% of this total will be for the development of the Nation's natural resources.

The recommended new obligational authority is $18 million above the total for 1960. An increase of $54 million is recommended for the Bureau of Reclamation, mainly for continuing work on construction projects underway and for starting six new projects and making loans to local groups for five small reclamation projects. This increase also includes $5 million to purchase foreign currencies for engineering research in foreign countries, which will supplement domestic research. The increase for the Bureau of Reclamation is offset to a large extent by decreases of $43 million for the Bureau of Indian Affairs and the National Park Service. The construction of roads and parkways by these agencies will be financed in 1961 from contract authority made available in 1960, and thus requires no new obligational authority in 1961.

Expenditures by the Department of the Interior are estimated at $809 million, an increase of $65 million over the 1960 estimated total. The major increase is for the Bureau of Reclamation.

The programs of the Department of the Interior are largely investment programs for development and operation of water and related land resources, range and forest lands, minerals, national parks, and fish and wildlife resources. Expenditures for public works construction in 1961 total $382 million—almost half of the Department's total expenditures. The Department also carries on other developmental programs such as reforestation and soil and moisture conservation, research on production and utilization of minerals, and collection of basic data including topographic surveys and mapping, geologic and mineral resources surveys, and water resources investigations. Other expenditures are mainly for maintenance and operation activities and for the education and welfare programs of the Bureau of Indian Affairs.

In addition to providing long-range economic benefits, many of these programs result in direct financial returns. This revenue, estimated at $520 million in 1961, arises mostly from the sale of power generated at Government dams, collections from water users on irrigation projects, grazing fees, park permits, timber sales, and mineral leases on public lands, including the Outer Continental Shelf. Some of the revenue is used to repay earlier investments of the Government in irrigation and power facilities. Other revenue is shared with States and counties as provided by law, appropriated or placed in revolving funds to finance Federal programs, or added to the general revenue of the Treasury. Expenditures of the Department in 1961 include $57 million for payments of shared revenue to States and counties. They also include $22 million in payments to States from appropriations equal to excise tax revenue from sale of hunting and fishing gear, to be used in restoration of wildlife and fish resources.

New obligational authority and expenditures of the Department are shown by function in the following table:

DEPARTMENTAL OFFICES

Current authorizations:

Office of Saline Water

SALARIES AND EXPENSES

For expenses necessary to carry out provisions of the Act of July 3, 1952, as amended (42 U.S.C. 1951–1958), authorizing studies of the conversion of saline water for beneficial consumptive uses, $1,355,000. (*Department of the Interior and Related Agencies Appropriation Act, 1960.*)

Appropriated 1960, [a] **$1,755,000** Estimate 1961, **$1,355,000**

[a] Includes $400,000 appropriated in Supplemental Appropriation Act, 1960.

Program and Financing

	1959 actual	1960 estimate	1961 estimate
Program by activities:			
1. Administration and coordination:			
(a) Research and development	$175,964	$220,000	$220,000
(b) Demonstration plants	29,865		
2. Research and development:			
(a) Contracts and grants (non-Federal)	900,489	1,385,000	985,000
(b) Federal laboratories	102,950	150,000	150,000
(c) Contracts for engineering designs and demonstration plant site analysis	32,700		
Total obligations	1,241,968	1,755,000	1,355,000
Financing:			
Unobligated balance no longer available	3,738		
New obligational authority	1,245,706	1,755,000	1,355,000
New obligational authority:			
Appropriation	$1,182,960	$1,755,000	$1,355,000
Reappropriation	62,746		

This program provides for research to develop low-cost processes for converting saline water to fresh water in quantities sufficient for municipal, industrial, and agricultural use.

1. *Administration and coordination.*—This activity covers departmental administration of federally sponsored research, coordination of 100 known Federal and non-Federal research projects, and stimulation of private and public saline water research.

2. *Research and development.*—This activity relates to the federally sponsored research and evaluation work accomplished by means of contract or grant to Federal or non-Federal agencies, institutions, and consultants.

CONSTRUCTION

For construction of demonstration plants for the production of water suitable for agricultural, industrial, municipal, and other beneficial consumptive uses, as authorized by the Act of September 2, 1958 (72 Stat. 1706), [$300,000] *$2,040,000*, to remain available until September 3, 1965. (*Department of the Interior and Related Agencies Appropriation Act, 1960.*)

Appropriated 1960, [a] **$1,850,000** Estimate 1961, **$2,040,000**

[a] Includes $1,550,000 appropriated in Supplemental Appropriation Act, 1960.

Program and Financing

	1959 actual	1960 estimate	1961 estimate
Program by activities:			
1. Engineering and design		$215,000	$200,000
2. Construction		1,500,000	1,500,000
3. Operation and maintenance			150,000
4. Administration		135,000	190,000
Total obligations		1,850,000	2,040,000
Financing:			
Appropriation (new obligational authority)		1,850,000	2,040,000

This appropriation provides for the practical application of research in the conversion of saline water to fresh water.

1. *Engineering and design.*—Preconstruction planning will be completed on three demonstration plants in 1960 and on two in 1961.

2. *Construction.*—Construction is being started on a sea water plant at Freeport, Tex., in 1960; the 1961 funds will be used to start a brackish water plant and a second sea water plant. It is anticipated that the State of California will contribute $750,000 toward the second sea water plant.

3. *Operation and maintenance.*—The first two demonstration projects will go into operation in 1961; the cost of operation and maintenance will be borne by the Federal Government for a limited period until sufficient operational data has been secured.

Unobligated balance no longer available	40,584		
Appropriation (new obligational authority)	577,700	480,000	480,000

1. *Coordination of oil and gas activities.*—This office provides coordination and advice to the Federal Government on all phases of petroleum and gas. Studies, domestic and worldwide, are made to maintain data on adequacy of petroleum and gas, to define deficient areas or elements, and to develop ways to alleviate actual or potential deficiencies.

2. *Administration of oil import program.*—This appropriation finances the Oil Import Administration established March 13, 1959, pursuant to Presidential Proclamation No. 3279. The Administration establishes quotas for importers of crude oil and oil products under the mandatory quota system.

3. *Oil import appeals.*—The Oil Import Appeals Board has been established to conduct hearings on appeals from importers who request a change in their quota or who do not qualify for a quota.

Office of Minerals Exploration

SALARIES AND EXPENSES

For expenses necessary to provide a program for the discovery of the minerals reserves of the United States, its Territories and possessions, by encouraging exploration for minerals, including administration of contracts entered into prior to June 30, 1958, under section 303 of the Defense Production Act of 1950, as amended, $1,100,000, to remain available until expended. *(72 Stat. 700; Department of the Interior and Related Agencies Appropriation Act, 1960.)*

Appropriated 1960, **$1,100,000** Estimate 1961, **$1,100,000**

Program and Financing

	1959 actual	1960 estimate	1961 estimate
Program by activities:			
1. Financial assistance for exploration projects	$90,295	$620,000	$700,000
2. Administrative and technical services	853,696	480,000	400,000
Total obligations	943,991	1,100,000	1,100,000
Financing:			
Unobligated balance no longer available	1,678,309		
New obligational authority	2,622,300	1,100,000	1,100,000
New obligational authority:			
Appropriation	$4,000,000	$1,100,000	$1,100,000
Transferred to "Salaries and expenses," Office of the Solicitor (72 Stat. 874)	−37,000		
Transferred (73 Stat. 45 and 57) to—			
"Management of lands and resources," Bureau of Land Management	−100,000		
"Conservation and development of mineral resources," Bureau of Mines	−1,240,700		
Appropriation (adjusted)	2,622,300	1,100,000	1,100,000

This program provides for the discovery of the mineral reserves of the United States and its possessions, by encouraging exploration for minerals, excluding organic fuels, by private individuals.

1. *Financial assistance for exploration projects.*—This is the Government's share of the cost of accepted projects for the exploration of strategic and critical minerals. The Government contributes not more than 50% of the cost. If the exploration is successful the advance is subject to repayment with interest.

2. *Administrative and technical services.*—This activity finances the Office of Minerals Exploration and the technical and clerical staffs of the Bureau of Mines and the Geological Survey assigned to it.

COMMISSION OF FINE ARTS

Current authorizations:

SALARIES AND EXPENSES

For expenses made necessary by the Act establishing a Commission of Fine Arts (40 U.S.C. 104), including payment of actual traveling expenses of the members and secretary of the Commission in attending meetings and committee meetings of the Commission either within or outside the District of Columbia, to be disbursed on vouchers approved by the Commission, [$37,800] *$69,000. (Department of the Interior and Related Agencies Appropriation Act, 1960.)*

Appropriated 1960, [a] **$42,300** Estimate 1961, **$69,000**

[a] Includes $4,500 appropriated in Supplemental Appropriation Act, 1960.

Program and Financing

	1959 actual	1960 estimate	1961 estimate
Program by activities:			
Administration (total obligations)	$37,633	$42,300	$69,000
Financing:			
Unobligated balance no longer available	67		
Appropriation (new obligational authority)	37,700	42,300	69,000

The Commission advises the President, Congress, and department heads on matters of architecture, sculpture, painting, and other fine arts. Additional personnel and the printing of the 17th annual report are provided for in 1961.

(a) Operation and maintenance	935,288	953,000	1,046,000
(b) Other accounts	373,168	426,000	425,000
(c) Non-Federal sources	66,119	14,000	15,000
Total reimbursable obligations	1,374,575	1,393,000	1,486,000
Total obligations	21,955,402	22,851,124	22,128,000
Financing:			
Unobligated balance brought forward	−76,951	−430,124	−422,000
Advances and reimbursements from—			
Other accounts	−1,308,456	−1,379,000	−1,471,000
Non-Federal sources (16 U.S.C. 832(a), (h))	−66,119	−14,000	−15,000
Unobligated balance carried forward	430,124	422,000	
Appropriation (new obligational authority)	20,934,000	21,450,000	20,220,000

The Administration is responsible for the marketing of electric power produced at 17 Federal hydroelectric generating plants in service or under construction and wheels power from certain non-Federal plants in the Pacific Northwest.

Transmission facilities programed are associated with generating capacity at Federal plants shown on the following schedule:

	First generation (fiscal year)	*Installed capacity (kilowatts—nameplate rating)*
Projects in operation		5,070,250
Additional generation under construction:		
The Dalles	1958	1,119,000
Hills Creek	1962	30,000
Ice Harbor	1962	270,000
Cougar	1963	25,000
Total		6,514,250

In addition, other transmission facilities are included which will enable the Administration to wheel power over the Federal grid from the non-Federal Priest Rapids, Rocky Reach, and Wanapum Dams.

The amounts of peak generating capacity on the Federal system at the beginning and end of the 1961 budget construction period follow:

KILOWATTS	*July 1, 1960*	*July 1, 1964*
Federal projects	6,958,600	7,511,800
Power wheeled from non-Federal projects	614,200	1,933,200
Total	7,572,800	9,445,000

1. *Construction in progress.*—Amounts are included to continue work on transmission facilities started in prior years.

2. *New construction.*—Amounts in 1961 provide for starting construction of new transmission and substation capacity to carry to load centers the power production of Federal and non-Federal generating installations scheduled to be in operation by July 1964 and to meet service requirements of power customers.

3. *General plant.*—Provision is made for acquisition of items such as tools; office, shop, laboratory, and transportation equipment; and portable communication equipment used in the construction and operation of the Federal power system.

Program costs to this appropriation are presented in the following table:

Digitized for FRASER

This program provides for the operation and maintenance of the Administration's high-voltage electric grid system, and for commercial and administrative expenses in marketing wholesale electric power from Federal dams, and in wheeling power from non-Federal dams in the Pacific Northwest.

1. *System operation and maintenance.*—This activity consists of the scheduling and dispatching of power; the operation of substations; the maintenance of transmission lines, substations, and other electrical facilities; load estimating; the integration of resources; and system engineering.

Transmission facilities of the Administration are expanded as increased generating capacity becomes available. The system will be operated and maintained at a level which will insure safe and continuous operation and provide a reliable grade of service to customers. Power resources and requirements work will be continued to obtain the fullest utilization of generating capacity, streamflows, and stored water. The following table shows the rising trend in several of the more important indexes of the operation and maintenance activity:

	1959 actual	*1960 estimate*	*1961 estimate*
Transmission plant in service	$431,300,000	$449,000,000	$470,000,000
Transmission lines (structure miles)	7,208	7,462	7,542
Number of substations	186	193	200
Transformer capacity (kilovolt-amperes)	13,033,000	14,005,000	14,450,000
Energy sales (millions of kilowatt-hours)	28,700	30,700	31,900
Points of delivery	349	360	372

Federal Reserve Bank of St. Louis

BONNEVILLE POWER ADMINISTRATION—Con.

Current authorizations—Continued

OPERATION AND MAINTENANCE—Continued

2. *Power contracts and rates.*—This activity provides for the negotiation of power sales and wheeling contracts, the billing and servicing of contracts, including the development of service plans, and the establishment of wholesale rate schedules. Receipts which are deposited in the Treasury amounted to $66,264,850 in 1959, and are estimated at $74,100,000 and $78,700,000 for 1960 and 1961.

4. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources and applicable adjustment as reflected in the following table:

	1958 actual	*1959 actual*	*1960 estimate*	*1961 estimate*
Selected resources at end of year: Unpaid undelivered orders (appropriation balances obligated for goods and services on order not yet delivered)	$114,694	$132,587	$132,587	$132,587
Selected resources at start of year (−)		−114,694	−132,587	−132,587
Adjustment of selected resources reported at start of year		3,046		
Obligations incurred for costs of other years, net		20,939		

A supplemental appropriation of $195,000 is anticipated for 1960 under Proposed for later transmission.

ADMINISTRATIVE PROVISIONS

Appropriations of the Bonneville Power Administration shall be available to carry out all the duties imposed upon the Administrator pursuant to law, including purchase of one aircraft for replacement only. Appropriations made herein to the Bonneville Power Administration shall be available in one fund, except that the appropriation herein made for operation and maintenance shall be available only for the service of the current fiscal year.

Other than as may be necessary to meet local emergencies, not to exceed 12 per centum of the appropriation for construction herein made for the Bonneville Power Administration shall be available for construction work by force account or on a hired-labor basis. (*16 U.S.C. 825s, 832–832l; Executive Order 8526; 43 U.S.C. 389, 485h, 593–A; 59 Stat. 10, 21–22; 62 Stat. 382; Public Works Appropriation Act, 1960.*)

1. System operation and maintenance	$73,353	$81,000	$80,000
2. Purchase of energy and wheeling charges	2,107,128	2,679,625	2,789,000
3. Power contracts and rates	104,757	96,000	96,000
4. General administration	81,428	85,000	85,000
Total program costs [1]	2,366,666	2,941,625	3,050,000
5. Relation of costs to obligations: Costs financed from obligations of other years, net (−)	−7,163	−1,000	
Total program (obligations)	2,359,503	2,940,625	3,050,000
Financing:			
Advances and reimbursements from non-Federal sources	−1,959,240	−2,224,000	−2,250,000
Unobligated balance no longer available	334,737		
Appropriation (new obligational authority)	735,000	716,625	800,000

[1] Includes capital outlay as follows: June 30, 1959, $10,995; 1960, $3,500; 1961, $2,500.

NOTE.—Reimbursements from non-Federal sources result from sale of power and are applied against charges for purchase of energy and wheeling by customers of the Administration.

Power generated at 14 Corps of Engineers hydroelectric generating plants in a 10-State area of the Southeast is marketed by the Administration through transmission facilities owned by others. A schedule of generation through 1964 of projects in operation or under construction follows:

	First generation (fiscal year)	*Installed capacity (kilowatts—nameplate rating)*
Projects in operation		1,283,600
Projects under construction:		
Hartwell	1962	330,000
Walter F. George	1963	130,000
Barkley	1965	130,000
Total		1,873,600

1. *System operation and maintenance.*—Provision is made for scheduling and dispatching power generation; scheduling storage and release of water; administering contractual operation requirements; and determining methods of operating generating plants individually and in coordination with others to obtain maximum utilization of resources.

2. *Purchase of power and wheeling charges.*—Funds are provided for the payment of wheeling fees and for the purchase of firming energy in connection with disposal of power from the Kerr and Jim Woodruff projects under contracts with utility companies.

3. *Power contracts and rates.*—Provision is made for negotiation and administration of power contracts, collection of revenue, development of wholesale power rates, and the determination of adequate provisions for the amortization of the power investment. Receipts which are deposited in the Treasury amounted to $15,850,268 in 1959 and are estimated at $16,820,000 and $16,810,000 for 1960 and 1961.
