2. FEDERAL PROGRAMS BY AGENCY AND ACCOUNT

EXPLANATORY NOTE

This tabulation contains information on budget authority (BA), outlays (O), and subfunctional code number(s) for each appropriation and fund account. Budget authority amounts reflect transfers of budget authority between appropriations. All budget authority items are definite appropriations except where otherwise indicated.

Congressional action on appropriations occasionally results in the establishment of a limitation on the use of a trust fund or other fund, or an appropriation to liquidate contract authority. Amounts for these and other such items, which do not affect budget authority, are included here in parentheses and identified in the stub column, but are not included in the totals.

NOTE. Amounts shown in this tabulation are in millions of dollars. Amounts of $500 thousand or less are identified by an asterisk. The detailed program and financing schedules contained in Appendix One, "Detailed Budget Estimates," of the budget present the estimates in thousands of dollars.

[1] For the purposes of this table FAC lending is assumed to equal borrowing. It is netted out under loans (or borrowing) between GSEs. FAC is estimated to be reclassified from a GSE to a Federal agency as of October 1, 1992. Its loans and debt are accordingly reclassified as Federal loans and Federal debt. This reclassification does not constitute repayment of GSE loans or GSE debt.

[2] All SLMA lending financed through the FFB is counted in Table 3–6 as direct loans. All SLMA loans shown in the table above are guaranteed by the Federal Government and therefore the portion not financed by the FFB is counted in Table 3–7 as guaranteed loans. To avoid double counting, two deductions were made in this table: one for the amount financed through the FFB, and the other for the remainder.

4. FEDERAL EMPLOYMENT

This chapter provides data on civilian employment in the executive branch, the employment ceilings used to control growth in the number of personnel, and personnel compensation and benefits. It also provides comparisons between the Federal workforce, other government employment, and United States population.

Total Federal Employment in the Executive Branch

The budget proposes to freeze civilian employment in the executive branch during 1993 at the 1992 levels as one of the measures to bring the growth of the Federal budget and deficit under control. As shown on Table 4–1, after excluding the Federal Deposit Insurance Corporation's and the Resolution Trust Corporation's employment, which has temporarily increased as a result of the deposit insurance situation, total civilian employment is frozen at 1,170,960. Moreover, after including the employees of FDIC, RTC, and the civilian employees of the Department of Defense (DOD) and the military personnel of DOD and other agencies, total executive branch employment will decrease by 162,095, or nearly four percent, between 1992 and 1993.

Civilian employment in the executive branch is controlled on a full-time equivalent (FTE) or workyear basis. Postal Service and Department of Defense employment, and some Veterans Affairs employees, have been exempted by law from full-time equivalent controls. The estimates in Table 4–1 for 1992 and 1993 constitute upper limits on agency FTE employment for agencies subject to FTE controls.

Total Federal Employment Levels

Table 4–2 shows total Federal civilian employment. Unlike Table 4–1, Table 4–2 measures employment in numbers of full-time perment and other employees as of the end of fiscal years 1989, 1990, and 1991. Postal Service employment (including the Postal Rate Commission) is also shown, together with data for the legislative and judicial branches and for active duty military personnel.

Personnel Compensation and Benefits

Table 4–3 displays personnel compensation and benefits for all branches of government, as well as for military personnel.

Direct compensation of the Federal work force includes base pay, merit pay, and premium pay. In addition, it includes other cash components such as interim geographic adjustments, recruitment and relocation bonuses, retention allowances, performance awards, and cost-of-living and overseas allowances.

In the case of military personnel, compensation includes basic pay, special and incentive pay (including enlistment and reenlistment bonuses), and allowances for clothing, housing, and subsistence.

Related compensation in the form of personnel benefits for current personnel consists primarily of the Government's share (as employer) of health insurance, life insurance, old-age survivors' disability and health insurance, and payments to the Department of Defense's DOD Military Retirement Fund and the Civil Service Retirement and Disability Fund to finance future retirement benefits.

Government Employment and Population Comparisons

As illustrated in Table 4–4, the Federal share of total government employment has declined significantly over the last three decades, from 27.7 percent in 1961 to 16.2 percent in 1991. Employment for all government has risen steadily over the period mostly due to increases in State and local government.

The ratio of Federal civilian employment to the total U.S. population was 12.0 per thousand in 1991, down from a high of 14.7 in 1968 and 1969. A further decline, to 11.3 per thousand, is projected for 1993.

5. RELATIONSHIP OF BUDGET AUTHORITY TO OUTLAYS

The Congress must usually provide budget authority, which is generally in the form of appropriations, before Federal agencies can obligate the Government to make outlays. For 1993, the Administration proposes $1,502.0 billion of new budget authority for the Federal Government. Of this amount, $1,232.4 billion is for agencies included in the budget and $269.6 billion is for off-budget Federal entities.

Of this total new budget authority, both on-budget and off-budget, $723.2 billion will require congressional action. New budget authority of $1,060.5 billion will be available through permanent appropriations under existing law. This consists mainly of trust fund receipts, which in most trust fund programs are automatically appropriated under existing law; interest on the public debt, for which budget authority is automatically provided under a permanent appropriation enacted in 1847; and the authority to spend offsetting collections credited to appropriation or fund accounts. Budget authority for the medicare, railroad retirement, and unemployment insurance trust funds was changed by statute in 1990, so that it equals estimated obligations of the funds rather than the funds' receipts. Conforming changes were made administratively in 1991 for many other fund accounts subject to obligation limits or benefit formulas, including the military and civil service retirement trust funds and the highway trust fund. The gross amount of new budget authority is partially offset by $281.7 billion of deductions for offsetting collections, which consist of proprietary receipts and collections from the public and collections of one Government account from another.

Not all of the new budget authority for 1993 will be obligated or spent in that year: [1]

- Budget authority for most trust funds comes from the authority of these funds to spend their receipts. Any balances remain available to these trust funds indefinitely in order to finance benefits and other purposes specified by law.
- Budget authority for most major construction and procurement projects covers the entire cost estimated when the projects are initiated, even though work will take place and outlays will be made over a period extending beyond the year for which the budget authority is enacted. The law provides some exceptions to this legal requirement, notably for water resource programs.

[1] This subject is also discussed in a separate OMB report, "Balances of Budget Authority," which can be purchased from the National Technical Information Service shortly after the budget is transmitted.

- Budget authority for large portions of the subsidized housing programs is equal to the Government's estimated obligation to pay subsidies under contracts, which may extend for periods of up to 20 years.
- Budget authority for most other long-term contracts also covers the estimated maximum obligation of the Government.
- Budget authority for most education and job training activity is appropriated for school or program years that begin with the fourth quarter of the fiscal year. Most of these funds result in outlays in the year after the year of appropriation.
- Prior to the effective date of credit reform in 1992, budget authority for many direct loan and loan guarantee programs was not closely related to outlays in any particular year. Under credit reform the budget authority for new direct loans and new loan guarantees is the amount required to finance the anticipated subsidy calculated on a net present value basis.
- The budget proposes shifting accounting for deposit insurance and pension insurance (budget authority and outlays) to an accrual basis.
- Government enterprises are occasionally given budget authority for standby reserves that will be used only in the event of special circumstances.

As a result of these factors, a substantial amount of budget authority carries over from one year to the next. Most of this is earmarked for specific uses and is not available for new programs. A small part may never be obligated or spent, primarily the amount for contingencies that do not occur or reserves that never have to be used.

As shown in the following chart, $315.5 billion of the outlays in 1993 (21 percent of the total) will be made from budget authority enacted in previous years. At the same time, $319.2 billion of the new budget authority proposed for 1993 (21 percent of the total amount proposed) will not lead to outlays until future years. Thus, although outlays in 1993 are, coincidentally, very nearly equal to budget authority for that year (99.8 percent), the total budget authority for a particular year is not, in general, very useful for the analysis of that year's outlays, since it combines various types of budget authority that have different short-term and long-term implications for budget obligations and outlays.

6. COMPARISON OF ACTUAL AND ESTIMATED TOTALS FOR 1991

The first three sections of this chapter compare the actual 1991 total receipts, outlays, and deficit with the adjusted baseline estimates transmitted in the 1991 Budget in January 1990. The most significant legislation enacted affecting the 1991 Budget was the Omnibus Budget Reconciliation Act of 1990 (OBRA). Negotiations leading to enactment of OBRA began from the adjusted baseline, and most scorekeeping records use the requirements of OBRA as a starting point. For purposes of comparison, the following table shows both the initial policy amounts proposed in the 1991 Budget in January 1990 and the adjusted baseline estimates at that time.

(In billions of dollars)

	Budget proposal	Change	Adjusted baseline
Receipts	1,170.2	−13.9	1,156.3
Outlays	1,233.3	23.5	1,256.8
Deficit	−63.1	−37.4	−100.5

A final section compares actual 1991 outlays for mandatory programs with the original estimates under laws in effect in January 1990.

The data in these sections are for the fiscal year that ended September 30, 1991.

Receipts

Receipts in 1991 were $1,054.3 billion, which is $102.1 billion less than the January 1990 baseline estimate of $1,156.3 billion. As shown in Table 6–1, this decrease was the net effect of legislative and administrative changes, economic conditions that differed from what had been expected, and different collection patterns and effective tax rates than had been assumed.

Policy differences.—OBRA was the only major law enacted after January 1990 that affected 1991 receipts. This law, together with several minor administrative changes, increased 1991 receipts by a net $21.8 billion.

Economic differences.—Differences between the economic assumptions upon which the original receipts estimates were made and actual economic performance accounted for a net decrease in 1991 receipts of $65.5 billion. Because of substantial reductions in personal income and corporate profits relative to what had been assumed in the 1991 budget, individual and corporation income taxes fell below the budget estimates by $22.7 billion and $26.0 billion, respectively. Shortfalls in social insurance taxes and contributions, attributable to lower than anticipated levels of wages and salaries, reduced receipts by an additional $14.3 billion. Lower than expected imports reduced customs duties by $3.0 billion and lower than previously assumed increases in the value of assets, largely real estate and stocks, reduced estate and gift taxes by $0.7 billion. Higher than anticipated interest rates increased deposits of earnings by the Federal Reserve system, which are classified as miscellaneous receipts, by $1.5 billion.

Technical reestimates.—Different collection patterns and effective tax rates than had been assumed in January 1990 reduced 1991 receipts by a net $58.4 billion. These are attributable in large part to the difficulty in accurately assessing the effect of the interaction of various legislated tax changes on taxpayer behavior and the timing of collections.

Outlays

Outlays for 1991 were $1,323.0 billion, which is $66.2 billion higher than the adjusted baseline estimate of $1,256.8 billion in the 1991 Budget (January 1990).

Table 6–2 compares the adjusted baseline estimate with the actual outlay total and shows both as a percentage of GNP. Total outlays were 5.3 percent above the initial baseline estimate. Actual outlays for defense were $33.2 billion or 10.8 percent lower than the initial baseline estimate primarily because collections exceeded gross outlays for Desert Shield/Desert Storm and because appropriations were lower than initially

assumed. Nondefense outlays were $99.3 billion or 10.5 percent higher due largely to increases for deposit insurance.

(Dollar amounts in billions)

	January 1990 estimate	Actual	Change	
			Amount	Percent

Nondefense	950.4	1,049.7	99.3	10.5%
Total outlays as a percent of GNP	21.3%	23.4%	2.1	9.9%

Major causes of the increase.—Table 6–3 distributes the $66.2 billion increase in outlays according to four categories: ; (1) policy changes; (2) cap adjustments and Desert Shield/Desert Storm; (3) economic conditions; and (4) technical estimating differences.

Policy changes to the 1991 baseline of $17.6 billion were a result of congressional action.

Outlays for defense discretionary programs were $11.1 billion lower than initially proposed because actual defense appropriations were lower than originally estimated.

Policy changes for nondefense discretionary programs added an estimated $3.4 billion to outlays. This included increases in regular and supplemental appropriations bills above the original request.

Policy changes for mandatory programs decreased outlays by an estimated $8.4 billion. (Mandatory programs are mostly formula benefit or entitlement programs not normally controlled by annual appropriations.) The largest decreases were for medicare ($3.1 billion), user fees ($2.0 billion), farm price support programs ($0.9 billion), and Federal employee retirement ($0.8 billion), due to changes enacted as part of OBRA.

The remaining decrease was $1.5 billion for the debt service on policy changes affecting both outlays and receipts.

Cap adjustments and Desert Shield/Desert Storm for 1991 produced a net decrease in outlays of $19.4 billion. The Department of Defense had gross disbursements of $19.7 billion for Desert Shield/Desert Storm, more than offset by $43.2 billion of contributions from other countries. Although in 1991 the net effect of Desert Shield/ Desert Storm was to reduce outlays and the deficit, disbursements for the replacement of equipment lost in the conflict will continue in later years as will some other costs, and in those years the net effect of Desert Shield/Desert Storm will increase net outlays and the deficit.

Nondefense outlays increased $4.1 billion due to $0.2 billion for Desert Shield/Desert Storm and to $3.9 billion for legislation and other adjustments that increased the caps. (Discretionary caps were enacted in OBRA and are discussed in Appendix Two, Chapter 36, "Budget Enforcement Act Preview Report.")

Economic conditions that differed from those forecast in January 1990 resulted in an estimated net outlay increase of $19.5 billion for 1991.

The effect of higher than forecast unemployment increased unemployment compensation and related outlays by an estimated $6.2 billion. Higher inflation in 1990, as measured by the Consumer Price Index, increased outlays by $5.0 billion primarily due to higher cost-of-living adjustments for social security and other programs linked to this index. Outlays increased by $8.6 billion due to interest differences, with net interest outlays increasing $3.7 billion due to higher interest rates and increasing a further $4.7 billion due to the net effect of differences in economic conditions on the deficit and the level of borrowing.

Technical estimating differences and other changes account for a net $83.7 billion increase in 1991 outlays. The major increases were for deposit insurance ($60.3 billion), and medicare and medicaid ($10.5 billion). Outlays for deposit insurance increased because there were more failures of savings and loan institutions and banks than originally expected. Medicaid and medicare increased for technical reasons because of different initial assumptions regarding the number of beneficiaries and other factors.

Deficit

The preceding two sections discuss the differences between the baseline estimates in the January 1990 budget for 1991 and the actual amounts of Federal Government receipts and outlays. This section combines these effects in order to show the net impact of these differences on the deficit.

As shown in Table 6–4, the baseline deficit for 1991 was originally estimated to be $100.5 billion. The actual deficit was $268.7 billion, $168.2 billion more than the original baseline estimate. Receipts were $102.1 billion less than the original baseline estimate and outlays

were $66.2 billion more than the original baseline estimate. Table 6–4 also shows the distribution of the difference according to the categories used in the preceding sections.

Policy changes (e.g., the enactment of OBRA) decreased the deficit by an estimated $39.4 billion, as a result of both increases in receipts ($21.8 billion) and decreases in outlays ($17.6 billion). Changes for cap adjustments and Desert Shield/Desert Storm reduced outlays and the deficit $19.4 billion.

Changes in economic conditions accounted for an estimated $85.0 billion increase in the deficit as a result of both decreases in receipts ($65.5 billion) and increases in outlays ($19.5 billion). Technical estimating differences and other changes increased the deficit an estimated $142.1 billion from the original estimate, $58.4 billion in receipts and $83.7 billion in outlays.

Comparison of the Actual and Estimated Outlays for Nondefense Mandatory and Related Programs for 1991

This section compares the original 1991 outlay estimates for nondefense mandatory and related programs under current law in the 1991 Budget (January 1990) with the actual outlays. Mandatory and related programs are programs with spending generally controlled by authorizing legislation rather than by annual appropriations. Outlays for these programs depend on eligibility criteria established in law, such as social security and medicare benefits for the elderly, agricultural price support payments to farmers, or deposit insurance for banks and thrift institutions. This category also includes net interest outlays and undistributed offsetting receipts.

A number of factors may cause differences between the amounts estimated in the budget and the actual outlays. For example, legislation may change benefit rates or coverage; the actual number of beneficiaries may differ from the number estimated; or economic conditions (such as inflation or interest rates) may differ from what was assumed in making the original estimates.

Table 6–5 shows the differences between actual outlays for these programs in 1991 and the amounts originally estimated in the 1991 Budget, based on laws in effect at that time. (The list of programs is similar to the list in Table 37–10 in Chapter 37, "Current Services Estimates," which provides the estimates through 1997 for total mandatory programs under current law, including national defense.)

Actual outlays for nondefense mandatory and related programs in 1991 were $834.6 billion, which is $111.9 billion more than the initial estimate of $722.7 billion, based on existing law in January 1990.

Outlays for nondefense mandatory programs were $679.5 billion in 1991, $93.9 billion more than estimated in January 1990.

Mandatory human resources programs, which are almost entirely income transfers, accounted for 88 percent of all nondefense mandatory program outlays in 1991. Actual outlays for these programs were $26.5 billion higher than originally estimated. This increase was the net effect of legislative action, differences between actual and assumed economic conditions, differences between the anticipated and actual number of beneficiaries, and other technical differences. Outlays for social security, the largest of the mandatory human resources programs, increased $4.5 billion largely due to higher than expected inflation. Outlays for medicaid were $52.5 billion, $7.5 billion more than the original estimate, also due primarily to technical factors such as changes in the number of beneficiaries from the number assumed in the original budget. Outlays for unemployment compensation were $8.3 billion more than originally estimated due largely to the slowdown in the economy.

Outlays for other mandatory programs were $80.7 billion, $67.3 billion more than originally estimated. The largest increase was for deposit insurance, which increased $59.2 billion, because there were more failures of savings and loan institutions and banks than originally assumed.

Outlays for net interest were $194.5 billion or $19.0 billion higher than the original estimate. This increase was largely the effect of higher than expected interest rates, higher than expected borrowing, and technical reestimates.

7. OFF-BUDGET FEDERAL ENTITIES

The Federal Government has used the unified or consolidated budget concept as the foundation for its budgetary analysis and presentation since the 1969 budget. This concept was developed by the President's Commission on Budget Concepts in 1967. It calls for the budget to include all of the Federal Government's programs and all of the fiscal transactions of these programs with the public.

Since 1971, however, a number of off-budget Federal entities have been created. Off-budget Federal entities are federally owned and controlled, but their transactions are excluded from the budget totals by law. When a Federal entity is off-budget, its receipts, outlays, and deficit or surplus are not included in budget receipts, budget outlays, or the budget deficit; and its budget authority is not included in the totals of budget authority for the budget.

Some of the off-budget entities were removed from the budget; others were created outside the budget. Most of the earlier off-budget entities made direct loans to the public. After a few years, some were moved onto the budget under subsequent law, while others were newly created. The Gramm-Rudman-Hollings Act of 1985 placed on-budget all of the Federal entities that were then off-budget but moved off-budget the two social security trust funds, old-age and survivors insurance and disability insurance. This Act nevertheless included them in calculating the deficit target. The Budget Enforcement Act of 1990 excluded the social security trust funds except their administrative expenses from the deficit targets set for 1991 to 1995 and from other sequester calculations. The administrative expenses are included under the domestic discretionary cap and therefore are included in calculating the deficit targets.

The other off-budget Federal entity is the Postal Service fund, which was removed from the budget by the Omnibus Budget Reconciliation Act of 1989. It is also excluded from the deficit targets.

The following table compares the total Federal Government receipts, outlays, and deficit with the amounts that are on-budget and off-budget. Social security is classified as off-budget for all years, in order to provide consistent comparisons over time. The much smaller Postal Service transactions are classified as off-budget starting in 1989. Entities that are now on-budget are classified as on-budget for all years. Some of the tables in this budget show the on-budget and off-budget amounts separately but also add them together to arrive at the total Federal receipts, outlays, and deficit. Other tables show the on-budget and off-budget amounts only in combination in order to focus on the consolidated amounts of the Federal Government.

In 1993 the off-budget receipts are an estimated 28 percent of total receipts, and the off-budget outlays are an estimated 18 percent of total outlays. The 1993 total deficit of $333.5 billion consists of an off-budget surplus of $61.8 billion and an on-budget deficit of $395.3 billion. The off-budget entities have had growing surpluses since the middle 1980s and are estimated to continue to have growing surpluses throughout most of the projection period.

The off-budget Federal entities conduct the same types of programs as those included in the budget, and the social security and Postal Service outlays measure Government costs. In contrast, the net disbursements of the "financing accounts," which were established outside the budget for credit programs beginning in 1992, do not measure costs and do not represent a reallocation of resources caused by Federal policy. Therefore, although they are federally owned and controlled, they are not classified as off-budget Federal entities.

The Federal Credit Reform Act of 1990 changed the budgetary treatment of credit programs by distinguishing between costs and cash transactions. The costs of direct loans and loan guarantees are estimated as the present value of expected cash outflows from the Government less the present value of expected cash inflows to the Government. These costs are equivalent to the outlays of other Federal programs and are included in the budget as outlays of credit program accounts when a loan is made or guaranteed. The cash transactions with the public—the disbursement and repayment of loans, the payment of default claims, the collection of interest and fees, and so forth—are recorded in separate financing accounts. The transactions of the financing accounts do not represent costs to the Government in addition to those costs that are already included in the credit program accounts. Therefore, they are non-budgetary in concept, and the Act excludes them from the budget.

Because the financing accounts are excluded, the outlays of credit programs reflect only the cost or resource reallocation of Government decisions; and they reflect this cost when the Federal credit assistance is provided. This enables the budget to better fulfill its purpose of being a financial plan for allocating resources among alternative uses: comparing the cost of a program with its benefits, comparing the cost of credit programs with the cost of other spending programs, and comparing the cost of one type of credit assistance with the cost of another type. Since the financing accounts do affect the Government's cash position, they are a means of financing the deficit as explained in Part One, Chapter 14, "Accounting for Federal Borrowing and Debt." [1]

Insurance programs in general, like loan guarantees, have economic effects and pose a financial risk to the Government, but under present budgetary accounting

[1] Credit reform is explained in Part One, Chapter 13, and in Chapter VIII.A of the 1992 *Budget*, Part Two, pp. 223–26.

[1] Off-budget transactions consist of the social security trust funds for all years and the Postal Service fund as of 1989.

they do not result in budget outlays unless the insured event occurs and the Government pays a claim. As discussed in Chapter 13, "Identifying Long-Term Obligations and Reducing Underwriting Risks," this budget proposes to apply credit reform principles to deposit insurance and pension guarantees beginning in 1992 and to the other insurance programs beginning in 1993. The cost would be recorded as a budget outlay; the cash flows would be recorded in separate financing accounts outside the budget. For the same reason as for the direct loan and guaranteed loan financing accounts, the insurance financing accounts are non-budgetary in concept and are not off-budget Federal entities.

Other activities related to the Federal Government are also outside the scope of budget outlays either because of their inherent nature or because budgetary accounting has not been developed to include them. The outlays of the Government-sponsored enterprises, which are mostly financial intermediaries, are excluded from the budget on the grounds that they are private. They are discussed in Chapter 13, and detailed estimates of their activities are reported in Appendix One, Chapter 35.

Taxation provides the Government with income, which is included in the budget as "receipts" and which withdraws purchasing power from the private sector in order to finance Government expenditure. In addition to this principal effect, the tax system has important effects on the allocation of resources among private uses and the distribution of income among individuals. These effects are caused by the choice of taxes and by the structural characteristics of each tax chosen. The effects of taxation on resource allocation and income distribution are analogous to the effects of outlays. Some of these effects have been defined as "tax expenditures" and are discussed in Chapter 24, "Tax Expenditures."

Some types of regulation have economic effects that are similar to budget outlays by requiring the private sector to make expenditures for specified purposes such as safety and pollution control. The concept of a regulatory budget and the steps that have been taken toward its development are discussed in Chapter 17, "Reforming Regulation and Managing Risk Reduction."

8. EXPLANATION OF ESTIMATES

This chapter contains various tables and schedules in support of the budget. It includes explanations of the work to be performed and the money needed. It includes the language proposed for enactment by Congress on each item for which congressional action in an appropriations bill is required. It also contains the language proposed for the general provisions of appropriations acts that apply to entire agencies or groups of agencies.

ARRANGEMENT

The sections in this chapter reflect the branches of Government, and the cabinet departments, selected independent agencies, and other activities of the executive branch. The smaller agencies in the executive branch are grouped alphabetically in one section—"Other independent agencies."

Each section is organized by major subordinate organizations within the agency (usually bureaus) or by major program area. For each bureau or major program area, *Federal funds,* covering the funds that are not set aside in "trust," precede *trust funds,* covering moneys that are held by the Government in accounts established by law or by trust agreement for specific purposes and designated by law as being trust funds. Within each fund group, accounts with new budget authority in 1993 generally will precede those without such an entry. By law, the Old-Age and Survivors Insurance and Disability Insurance trust funds are outside the budget totals. These accounts are presented in a separate section, Health and Human Services, Social Security. Also, by law the Postal Service Fund is outside the budget totals. A presentation for the Fund is included in the "Other independent agencies" section. Financing accounts presenting non-budgetary cash flows of credit and insurance programs are included for each affected agency.

The general provisions that are Government-wide in scope (identified "Departments, Agencies, and Corporations"), normally contained in the Treasury, Postal Service, and General Government Appropriations Act appear after this introductory section. The proposed language for general provisions of appropriations acts that are only applicable to the agency in each section appear at the end of that section. In some instances general provisions in an appropriations act may apply to two or more agencies. The first column of the following table lists the most recently enacted appropriations and the major agencies responsible for programs funded by each act. The second column provides the location of the general provisions that apply to the agencies listed in the first column.

FORM OF DETAILED MATERIAL

APPROPRIATIONS LANGUAGE

The language proposed for inclusion in the 1993 appropriations acts is printed following the account title. Language for 1992 appropriations, printed in roman type, is used as a base. Brackets enclose material that is proposed for deletion; italic type indicates proposed new language. At the end of the final language paragraph, and printed in italic within parentheses, are citations to any relevant authorizing legislation and to the specific appropriations act from which the basic text of the 1992 language is taken. Where appropriate, a note follows the language indicating that the budget authority proposed is for continuing activities for which additional appropriations authorization is or has been proposed. An illustration of proposed appropriations language for 1993 follows:

OPERATING EXPENSES

For necessary expenses of the Office of Climate Information, [$30,290,000] *$28,870,000* of which [$150,000] *$400,000* shall remain available until expended. (*34 U.S.C. 218 et seq.; Department of Government Appropriation Act, 1992.*)

The language proposed for general provisions is presented in the same fashion, except that the previously enacted language is not shown where whole sections or subsections of language are proposed for deletion.

BASIS FOR SCHEDULES

The 1991 column of this budget presents the actual transactions and balances for that year, as recorded in agency accounts.

For 1992, the regular schedules include enacted appropriations. In addition, indefinite appropriations are included on the basis of amounts likely to be required.

The 1993 column of the regular schedules includes proposed appropriations for all programs under existing legislation, including those that require extension or renewal of expiring laws.

Amounts for proposed new legislation are shown generally in separate schedules, following the regular schedules or in budget sequence in the respective bureau. These schedules are headed "Proposed for later transmittal under proposed legislation." Appropriations language is included with the regular schedules, but not with the separate schedules for proposed legislation. Necessary appropriations language will be transmitted later upon enactment of the proposed legislation. In some cases, when the amount requested in the budget is less than the amount required for the program level mandated in existing authorizing legislation (as in the case of certain entitlement programs), the reduced amount is reflected in the proposed apprcpriations language and the regular schedules.

PROGRAM AND FINANCING SCHEDULE

This schedule consists of several parts.

In the "Program by activities" section, obligations generally are shown for specific activities or projects. The activity structure is developed individually for each appropriation or fund account to provide a meaningful presentation of information for the program being financed. That structure is tailored to the individual account and is not uniform across the Government. When the amounts of obligations that are financed from collections credited to an account (reimbursements and repayments) are significant, "Reimbursable program" obligations are shown separately from "Direct program" obligations. When the amounts are significant, "Capital investments" are shown separately from "Operating expenses." The last entry "Total obligations," indicates the minimum amount of budgetary resources that must be available to the appropriation or fund account in that year.

The "Financing" section shows the budgetary resources available or estimated to be available to finance the total obligations. First are unobligated balances of budgetary resources (that have not expired) brought forward from the end of the prior year. Next, those amounts that were available for obligation during the year and were not used, but continue to be available, are shown as an unobligated balance available, end of year. That balance is carried forward and usually obligated in a subsequent year. Other adjusting entries may be included. The residual is the amount of new budget authority required to finance the program. Where more than one kind of budget authority is provided, that information is shown. In some cases, provisions of law other than the appropriations language for the account increase or reduce the budget authority provided. In such cases, the public law number is usually indicated in the stub entry. For example, P.L. 99–177 refers to the Balanced Budget and Emergency Deficit Control Act of 1985, as amended, also known as the Gramm-Rudman-Hollings Act. In some cases, the availability of budgetary resources may be restrained by legally binding limitations on obligations. Such limitations are usually included in appropriations language.

The "Relation of obligations to outlays" section shows the difference between obligations, which may not be liquidated in the same year in which they are incurred, and outlays. The amount of obligations that were incurred in previous years but not liquidated, are entered as an obligated balance, start of year. Similarly, an end of year obligated balance is entered. Certain adjusting entries may be included. The residual is the amount of outlays resulting from the liquidation of obligations incurred in that year and previous years.

The "Adjustments to budget authority and outlays" section shows deductions for offsetting collections for those accounts that are credited with such collections. The amounts are listed by source—Federal funds, trust funds, non-Federal sources, or off-budget Federal accounts. The total amount of collections is deducted from gross budget authority and from gross outlays to derive net budget authority and outlays. For accounts with limitations on the authority to spend offsetting collections, the balance of any amount of that is unavailable for obligation is shown in a separate "Schedule on Unavailable Collections."

NARRATIVE STATEMENT OF PROGRAM AND PERFORMANCE

Narrative statements present briefly the objectives of the program and the work to be financed primarily for 1993. Measures of expected performance may be included, and the relationship to the financial estimates is described.

SCHEDULE OF OBJECT CLASSIFICATION AND PERSONNEL SUMMARY

There is shown for each account a schedule of obligations, according to the following uniform list of object classifications:

10 PERSONAL SERVICES AND BENEFITS
11 Personnel compensation
12 Personnel benefits
13 Benefits for former personnel
20 CONTRACTUAL SERVICES AND SUPPLIES
21 Travel and transportation of persons
22 Transportation of things
23.1 Rental payment to GSA
23.2 Rental payments to others
23.3 Communications, utilities, and miscellaneous charges
24 Printing and reproduction
25 Other services
26 Supplies and materials
30 ACQUISITION OF CAPITAL ASSETS
31 Equipment
32 Lands and structures
33 Investments and loans
40 GRANTS AND FIXED CHARGES
41 Grants, subsidies, and contributions
42 Insurance claims and indemnities
43 Interest and dividends
44 Refunds

These object classes reflect the nature of the things or services purchased, regardless of the purpose of the program for which they are used.

Several of the object classes are divided into subclasses—personnel compensation, for example, is shown separately for full-time permanent employees, for other than full-time employees, and for certain other payments.

Except for revolving funds, reimbursable obligations are aggregated in a single line and not identified by object class. Data, classified by object, are illustrated in the following schedule:

Control of Federal civilian employment generally is on a full-time equivalent (FTE) or workyear basis for the executive branch.

BUSINESS-TYPE BUDGET STATEMENTS

Business-type budget statements are presented for activities specifically required by the Government Corporation Control Act and generally for other revolving and trust revolving funds conducting business with the public. They are occasionally presented for funds conducting business within the Government.

Statement of Revenue and Expense

For many revolving funds there is a statement of revenue and expense that shows the resulting net income or loss for the year. This statement usually includes accrued revenue (e.g., revenue earned) and accrued expenditures (e.g., including costs incurred but not yet paid), whether funded or unfunded.

Statement of Financial Condition

The statements of financial condition (referred to as "statements of portfolio condition" for credit financing accounts) show assets, liabilities, and equity for the fund at the close of each fiscal year. In addition to this information, which is similar to commercial balance sheet data, budget needs also require additional information, shown in the equity section. A disclosure is made of obligations incurred that have not yet accrued into liabilities (undelivered orders) and of budgetary resources for which no funding has been received (unfinanced budgetary resources). Unfinanced budgetary resources include orders from Federal customers that have not been filled (unfilled orders), and unfinanced budget authority in the form of authority to borrow for which borrowing has not taken place, and contract authority for which liquidating cash has not been received. Orders received from the public must be accompanied by advance payment. The amounts in the 1991 column are unaudited and subject to change at the end of June 1992.

FEDERAL CREDIT SCHEDULES

Federal credit programs provide benefits to the public in the form of direct loans and loan guarantees. The Federal Credit Reform Act of 1990 made significant changes in the methods of budgeting and accounting for Federal credit programs. Beginning in 1992, the estimated subsidy costs arising from the direct and guaranteed loans of a program must be calculated. The subsidy cost is the estimated long-term cost to the Government of a direct loan or a loan guarantee, calculated on a net present value basis, excluding administrative costs. For most programs, direct loan obligations and loan guarantee commitments cannot be made unless appropriations for the subsidy cost have been provided in advance in annual appropriations acts. In addition, annual limitations on the amount of obligations for direct loans and commitments for guaranteed loans may be enacted in appropriations language.

Subsidy appropriations are recorded as budget authority in credit program accounts. In addition, the administrative expenses associated with a credit program are financed in the program account. All cash flows arising from direct loan obligations and loan guarantee commitments are recorded in separate financing accounts. The transactions of the financing accounts are not included in the budget totals. The program accounts make subsidy payments, recorded as on-budget outlays, to the financing accounts at the time of the disbursement of the direct or guaranteed loans.

The transactions associated with direct loan obligations and loan guarantee commitments made prior to 1992 continue to be accounted for on a cash flow basis and are recorded in liquidating accounts. In most cases, the liquidating account is the account that was used for the program prior to the enactment of the 1990 requirements.

Program and Financing schedules (described above) are shown for program, financing, and liquidating accounts. In addition, a Summary of Loan Levels, Subsidy Budget Authority, and Outlays by Program schedule is shown for program accounts. Status of Direct Loans and Status of Guaranteed Loans schedules (as applicable) are shown for liquidating accounts and financing accounts. Examples of these schedules are shown below. Summary information on Federal credit programs is provided in Appendix One, Chapter 3.

ALLOCATIONS BETWEEN AGENCIES

In some cases, funds appropriated to the President or to an agency are allocated to one or more agencies that help to carry out a program. Obligations incurred under such allocations are included in the data for the account to which the appropriation is made in the allocating agency. The object classification schedule for such accounts identifies the amount of such obligations by performing agency. A note at the end of a bureau or equivalent grouping identifies allocations received from other agencies.

BUDGETS NOT SUBJECT TO REVIEW

In accordance with law or established practice, the presentations for the Legislative Branch, the Judiciary, the Milk Market Orders Assessment Fund of the Department of Agriculture, the Farm Credit Administration, and the International Trade Commission have been included, without review, in the amounts submitted by the agencies.

The Legislative Branch has proposed an overall increase of 13.9 percent over 1992 enacted amounts. Over the past several years, Congress has not funded the full request. This budget includes an adjustment to reflect the average year-to-year rate of growth in enacted Legislative Branch appropriations for the period 1988 through 1992. This adjustment was not provided by the Legislative Branch.

The budgets of the privately owned Government-sponsored enterprises and the Board of Governors of the Federal Reserve System, are not subject to review; they are included for information purposes only.

RECONCILIATION OF DIFFERENCES WITH AMOUNTS PUBLISHED BY TREASURY FOR 1991

The following table provides a reconciliation of the receipts, outlays, and deficit totals published by Treasury and those published in this budget. The deficit total for 1991 in this budget is higher than previously reported by the Department of the Treasury by $18 million. The differences are due to misclassifications and reporting errors by the agencies that were not found in time to be included in the reports by Treasury.

SEC. 601. Funds appropriated in this or any other Act may be used to pay travel to the United States for the immediate family of employees serving abroad in cases of death or life threatening illness of said employee.

SEC. 602. No department, agency, or instrumentality of the United States receiving appropriated funds under this or any other Act for fiscal year [1992] *1993* shall obligate or expend any such funds, unless such department, agency, or instrumentality has in place, and will continue to administer in good faith, a written policy designed to ensure that all of its workplaces are free from the illegal use, possession, or distribution of controlled substances (as defined in the Controlled Substances Act) by the officers and employees of such department, agency, or instrumentality.

SEC. 603. Notwithstanding any other provision of law, a Federal employing agency shall make the deposit from existing appropriations into the Federal Employees Compensation Account of the Unemployment Trust Fund, as required by section 8509 of title 5, United States Code, not later than thirty days after the Department of Labor has billed the agency for the amount to be deposited.

SEC. 604. Notwithstanding the provisions of the Act of September 13, 1982 (Public Law 97-258, 31 U.S.C. 1345), any agency, department or instrumentality of the United States which provides or proposes to provide child care services for Federal employees may reimburse any Federal employee or any person employed to provide such services for travel, transportation, and subsistence expenses incurred for training classes, conferences or other meetings in connection with the provision of such services: *Provided,* That any per diem allowance made pursuant to this section shall not exceed the rate specified in regulations prescribed pursuant to section 5707 of title 5, United States Code.

SEC. 605. Unless otherwise specifically provided, the maximum amount allowable during the current fiscal year in accordance with section 16 of the Act of August 2, 1946 (60 Stat. 810), for the purchase of any passenger motor vehicle (exclusive of buses and ambulances), is hereby fixed at $7,100 except station wagons for which the maximum shall be $8,100: *Provided,* That these limits may be exceeded by not to exceed $3,700 for police-type vehicles, and by not to exceed $4,000 for special heavy-duty vehicles: *Provided further,* That the limits set forth in this section may not be exceeded by more than five percent for electric or hybrid vehicles purchased for demonstration under the provisions of the Electric and Hybrid Vehicle Research, Development, and Demonstration Act of 1976: *Provided further,* That the limits set forth in this section may be exceeded by the incremental cost of clean alternative fuels vehicles acquired pursuant to Public Law 101-549 over the cost of comparable conventionally fueled vehicles.

SEC. 606. Appropriations of the executive departments and independent establishments for the current fiscal year available for expenses of travel or for the expenses of the activity concerned, are hereby made available for quarters allowances and cost-of-living allowances, in accordance with 5 U.S.C. 5922-24.

SEC. 607. Unless otherwise specified during the current fiscal year no part of any appropriation contained in this or any other Act shall be used to pay the compensation of any officer or employee of the Government of the United States (including any agency the majority of the stock of which is owned by the Government of the United States) whose post of duty is in the continental United States unless such person (1) is a citizen of the United States, (2) is a person in the service of the United States on the date of enactment of this Act, who, being eligible for citizenship, has filed a declaration of intention to become a citizen of the United States prior to such date and is actually residing in the United States, (3) is a person who owes allegiance to the United States, (4) is an alien from Cuba, Poland, South Vietnam, or the Baltic countries lawfully admitted to the United States for permanent residence, or (5) South Vietnamese, Cambodian, and Laotian refugees paroled in the United States after January 1, 1975, or (6) nationals of the People's Republic of China protected by Executive Order Number 12711 of April 11, 1990: *Provided,* That for the purpose of this section, an affidavit signed by any such person shall be considered prima facie evidence that the requirements of this section with respect to his or her status have been complied with: *Provided further,* That any person making a false affidavit shall be guilty of a felony, and, upon conviction, shall be fined no more than $4,000 or imprisoned for not more than one year, or both: *Provided further,* That the above penal clause shall be in addition to, and not in substitution for any other provisions of existing law: *Provided further,* That any payment made to any officer or employee contrary to the provisions of this section shall be recoverable in action by the Federal Government. This section shall not apply to citizens of Ireland, Israel, the Republic of the Philippines or to nationals of those countries allied with the United States in the current defense effort, or to temporary employment of translators, or to temporary employment in the field service (not to exceed sixty days) as a result of emergencies.

SEC. 608. Appropriations available to any department or agency during the current fiscal year for necessary expenses, including maintenance or operating expenses, shall also be available for payment to the General Services Administration for charges for space and services and those expenses of renovation and alteration of buildings and facilities which constitute public improvements performed in accordance with the Public Buildings Act of 1959 (73 Stat. 749), the Public Buildings Amendments of 1972 (86 Stat. 216), or other applicable law.

SEC. 609. Funds made available by this or any other Act for administrative expenses in the current fiscal year of the corporations and agencies subject to chapter 91 of title 31, United States Code, shall be available, in addition to objects for which such funds are otherwise available, for rent in the District of Columbia; services in accordance with 5 U.S.C. 3109; and the objects specified under this head, all the provisions of which shall be applicable to the expenditure of such

funds unless otherwise specified in the Act by which they are made available: *Provided,* That in the event any functions budgeted as administrative expenses are subsequently transferred to or paid from other funds, the limitations on administrative expenses shall be correspondingly reduced.

SEC. [611] *610.* Pursuant to section 1415 of the Act of July 15, 1952 (66 Stat. 662), foreign credits (including currencies) owed to or owned by the United States may be used by Federal agencies for any purpose for which appropriations are made for the current fiscal year (including the carrying out of Acts requiring or authorizing the use of such credits), only when reimbursement therefor is made to the Treasury from applicable appropriations of the agency concerned: *Provided,* That such credits received as exchanged allowances or proceeds of sales of personal property may be used in whole or part payment for acquisition of similar items, to the extent and in the manner authorized by law, without reimbursement to the Treasury.

SEC. [612] *611.* No part of any appropriation contained in this or any other Act shall be available for interagency financing of boards, commissions, councils, committees, or similar groups (whether or not they are interagency entities) which do not have a prior and specific statutory approval to receive financial support from more than one agency or instrumentality.

SEC. [613] *612.* Funds made available by this or any other Act to the "Postal Service Fund" (39 U.S.C. 2003) shall be available for employment of guards for all buildings and areas owned or occupied by the Postal Service and under the charge and control of the Postal Service, and such guards shall have, with respect to such property, the powers of special policemen provided by the first section of the Act of June 1, 1948, as amended (62 Stat. 281; 40 U.S.C. 318), and, as to property owned or occupied by the Postal Service, the Postmaster General may take the same actions as the Administrator of General Services may take under the provisions of sections 2 and 3 of the Act of June 1, 1948, as amended (62 Stat. 281; 40 U.S.C. 318a, 318b), attaching thereto penal consequences under the authority and within the limits provided in section 4 of the Act of June 1, 1948, as amended (62 Stat. 281; 40 U.S.C. 318c)

SEC. [615] *613.* No part of any appropriation contained in, or funds made available by, this or any other Act, shall be available for any agency to pay to the Administrator of the General Services Administration a higher rate per square foot for rental of space and services (established pursuant to section 210(j) of the Federal Property and Administrative Services Act of 1949, as amended) than the rate per square foot established for the space and services by the General Services Administration for the fiscal year for which appropriations were granted.

SEC. [616] *614.* (a) Notwithstanding any other provision of law, and except as otherwise provided in this section, no part of any of the funds appropriated for the fiscal years ending September 30, [1992] *1993,* or September 30, [1993] *1994,* by this or any other Act, may be used to pay any prevailing rate employee described in section 5342(a)(2)(A) of title 5, United States Code, or any employee covered by section 5348 of that title—

(1) during the period from the date of expiration of the limitation imposed by section [612] *616* of the Treasury, Postal Service, and General Government Appropriations Act, [1991] *1992,* until the first day of the first applicable pay period that begins not less than ninety days after that date, in an amount that exceeds the rate payable for the applicable grade and step of the applicable wage schedule in accordance with such section [612] *616;* and

(2) during the period consisting of the remainder, if any, of fiscal year [1992] *1993,* and that portion of fiscal year [1993] *1994,* that precedes the normal effective date of the applicable wage survey adjustment that is to be effective in fiscal year [1993] *1994,* in an amount that exceeds, as a result of a wage survey adjustment, the rate payable under paragraph (1) of this subsection by more than the overall average percentage adjustment in the General Schedule during fiscal year [1992] *1993,* under section 5303 of title 5, United States Code.

(b) Notwithstanding the provisions of section 9(b) of Public Law 92–392 or section 704(b) of Public Law 95–454, the provisions of subsection (a) of this section shall apply (in such manner as the Office of Personnel Management shall prescribe) to any prevailing rate employee to whom such section 9(b) applies, except that the provisions of subsection (a) may not apply to any increase in a wage schedule or rate that is required by the terms of a contract entered into before the date of enactment of the Act.

[(b)] *(c)* Notwithstanding any other provision of law, no prevailing rate employee described in subparagraph (B) or (C) of section 5342(a)(2) of title 5, United States Code, may be paid during the periods for which subsection (a) of this section is in effect at a rate that exceeds the rates that would be payable under subsection (a) were subsection (a) applicable to such employee.

[(c)] *(d)* For the purpose of this section, the rates payable to an employee who is covered by this section and who is paid from a schedule that was not in existence on September 30, [1991] *1992,* shall be determined under regulations prescribed by the Office of Personnel Management.

[(d)] *(e)* Notwithstanding any other provision of law, rates of premium pay for employees subject to this section may not be changed from the rates in effect on September 30, [1991] *1992,* except to the extent determined by the Office of Personnel Management to be consistent with the purpose of this section.

[(e)] *(f)* The provisions of this section shall apply with respect to pay for services performed by any affected employee on or after October 1, [1991] *1992.*

[(f)] *(g)* For the purpose of administering any provision of law, including section 8431 of title 5, United States Code, or any rule or regulation that provides premium pay, retirement, life insurance, or any other employee benefit, that requires any deduction or contribution, or that imposes any requirement or limitation, on the basis of a rate of salary or basic pay, the rate of salary or basic pay payable after the application of this section shall be treated as the rate of salary or basic pay.

[(g)] *(h)* Nothing in this section may be construed to permit or require the payment to any employee covered by this section at a rate in excess of the rate that would be payable were this section not in effect.

[(h)] *(i)* The Office of Personnel Management may provide for exceptions to the limitations imposed by this section if the Office determines that such exceptions are necessary to ensure the recruitment or retention of qualified employees.

SEC. [619] *615.* (a) Notwithstanding the provisions of sections 112 and 113 of title 3, United States Code, each Executive agency detailing any personnel shall submit a report on an annual basis in each fiscal year to the Senate and House Committees on Appropriations on all employees or members of the armed services detailed to Executive agencies, listing the grade, position, and offices of each person detailed and the agency to which each such person is detailed.

(b) The provisions of this section shall not apply to Federal employees or members of the armed services detailed to or from—

(1) the Central Intelligence Agency;

(2) the National Security Agency;

(3) the Defense Intelligence Agency;

(4) the offices within the Department of Defense for the collection of specialized national foreign intelligence through reconnaissance programs;

(5) the Bureau of Intelligence and Research of the Department of State;

(6) any agency, office, or unit of the Army, Navy, Air Force, and Marine Corps, the Federal Bureau of Investigation and the Drug Enforcement Administration of the Department of Justice, the Department of the Treasury, and the Department of Energy performing intelligence functions; and

(7) the Director of Central Intelligence.

(c) The exemptions in part (b) of this section are not intended to apply to information on the use of personnel detailed to or from the intelligence agencies which is currently being supplied to the Senate and House Intelligence and Appropriations Committees by the executive branch through budget justification materials and other reports.

(d) For the purposes of this section, the term "Executive agency" has the same meaning as defined under section 105 of title 5, United States Code (except that the provisions of section 104(2) of title 5, United States Code, shall not apply) and includes the White House Office, the Executive Residence, and any office, council, or organizational unit of the Executive Office of the President.

SEC. [622] *616(a).* None of the funds appropriated by this or any other Act may be expended by any Federal agency to procure any product or service that is subject to the provisions of Public Law 89–306 and that will be available under the procurement by the Administrator of General Services known as "FTS2000" unless—

(1) such product or service is procured by the Administrator of General Services as part of the procurement known as "FTS2000"; or

(2) that agency establishes to the satisfaction of the Administrator of General Services that—

(A) the agency's requirements for such procurement are unique and cannot be satisfied by property and service procured by the Administrator of General Services as part of the procurement known as "FTS2000"; and

(B) the agency procurement, pursuant to such delegation, would be cost-effective and would not adversely affect the cost-effectiveness of the FTS2000 procurement.

(b) After March 1, 1993, subsection (a) shall apply only if the Administrator of General Services has reported that the FTS 2000 procurement is producing prices that allow the government to satisfy its requirements for such procurement in the most cost-effective manner.

SEC. [623] *617.* (a) No amount of any grant made by a Federal agency shall be used to finance the acquisition of goods or services (including construction services) unless the recipient of the grant agrees, as a condition for the receipt of such grant, to—

(1) specify in any announcement of the awarding of the contract for the procurement of the goods and services involved (including construction services) the amount of Federal funds that will be used to finance the acquisition; and

(2) express the amount announced pursuant to paragraph (1) as a percentage of the total costs of the planned acquisition.

(b) The requirements of subsection (a) shall not apply to a procurement for goods or services (including construction services) that has an aggregate value of less than $500,000.

SEC. [624] *618.* Notwithstanding section 1346 of title 31, United States Code, or section [607] *611* of this Act, funds made available for fiscal year [1992] *1993* by this or any other Act shall be available for the interagency funding of national security and emergency preparedness telecommunications initiatives which benefit multiple Federal departments, agencies, or entities, as provided by Executive Order Numbered 12472 (April 3, 1984).

SEC. [625] *619.* Notwithstanding any provisions of this or any other Act, during the fiscal year ending September 30, [1992] *1993*, any department, division, bureau, or office participating in the Federal Flexiplace Project may use funds appropriated by this or any other Act to install telephone lines, necessary equipment, and to pay monthly charges, in any private residence or private apartment: *Provided,* That the head of the department, division, bureau, or office certifies that adequate safeguards against private misuse exist, and that the service is necessary for direct support of the agency's mission. *(Treasury, Postal Service and General Government Appropriations Act, 1992.)*

The Judiciary Office Building Development Act, Public Law 100–480, among other purposes, authorizes the Architect of the Capitol to contract for the design and construction of a building adjacent to Union Station in the District of Columbia to be leased to the Judicial Branch of the United States. This schedule reflects the transfer of funds authorized by the Act and the costs associated with the construction of the building. Costs of construction are financed by an initial $125,392 thousand of Federal agency debt (accrual value) issued in 1989.

Estimates prepared by the Legislative Branch assumed the financial arrangements to be a lease-purchase, which would distribute outlays associated with acquisition of the building over a period of thirty years. However, the arrangements involve federally guaranteed financing and other characteristics that make them substantively the same as direct federal construction, financed by direct federal borrowing. Because estimated expenditures of the Legislative Branch are required to be included in the budget as submitted and without change, this separate schedule is included as an adjustment to reflect direct construction costs and associated interest costs, consistent with standard budget concepts and scoring conventions.

[ADMINISTRATIVE PROVISIONS]

[SEC. 104. (a) Section 108(b)(1) of the Legislative Branch Appropriations Act, 1991 (40 U.S.C. 166b–3b(b)(1)) is amended—

(1) in subparagraph (A), by striking "the rate payable" through the semicolon and inserting "90 percent of the maximum rate allowable for the Senior Executive Service;";

(2) in subparagraph (B), by striking "the rate payable" through the period and inserting "85 percent of the maximum rate allowable for the Senior Executive Service."; and

(3) by adding at the end, as a flush left sentence, the following: "For purposes of the preceding sentence, 'the maximum rate allowable for the Senior Executive Service' means the highest rate of basic pay that may be set for the Senior Executive Service under section 5382(b) of title 5, United States Code.".

(b) Section 108 of the Legislative Branch Appropriations Act, 1991 (40 U.S.C. 166b–3b) is amended by adding at the end the following:

"(c) Effective beginning with any pay period beginning on or after the date of enactment of the Legislative Branch Appropriations Act, 1992, the rate of basic pay for up to 8 positions under the jurisdiction of the Architect of the Capitol may be fixed at such rate as the Architect considers appropriate for each, not to exceed 135 percent of the minimum rate payable for grade GS–15 of the General Schedule.".]

[SEC. 105. The Legislative Branch Appropriations Act, 1989 is amended in the matter under "House Office Buildings", under the paragraph headed "Architect of the Capitol" (40 U.S.C. 175 note)—

(1) by striking "5 U.S.C. 5307(a)(1)(B)" and inserting "section 5306(a)(1)(B) of title 5, United States Code,"; and

(2) by striking "policy." and inserting "policy, and subject to any increase which may be allowed by the Committee on House Administration based on performance exceeding an acceptable level of competence over a 52-week period (except that no such performance-based increase shall affect the waiting period or effective date of any longevity step-increase or increase under such section 5306(a)(1)(B)).".] *(Congressional Operations Appropriations Act, 1992.)*

Note.—Includes $289 thousand in budget authority in 1993 for activities transferred from Library of Congress, furniture and furnishing account.

Personal services and necessary expenses to provide support for the basic operations of the Library are financed from this appropriation.

Collections services.—The largest administrative unit of the Library of Congress, both in budget and in staff, has as its mission the acquisition of materials; the cataloging, classification, and preparation of materials for use; the preservation of materials for use now and in the future; and serving the public and managing the Library's universal collections, which are the largest in the world. Support services—network development, automation planning, in-service training activities, technical processes research, and, in conjunction with Constituent Services, the Library-wide collection development planning and operations—complement the mission work of the service unit. Collections Services provides many basic technical services to the Library of Congress as well as the world's research and library communities.

Constituent services.—This program serves the public by maintaining the general collections and the general reading rooms. It also develops, produces, markets, and distributes the printed catalog cards, cataloging data in machine-readable form, book catalogs, technical publications, and selected bibliographies made available from the automated data bases. In cooperation with the Collections Services program, this program sets collections policy. This program also coordinates Federal library and information resources.

Cultural affairs.—The Cultural Affairs Service Unit contributes to the nation's educational and intellectual life through programs that interpret the Library's resources and promote the use of its unparalleled collections. The public events, exhibitions, scholarly conferences, multi-media projects, lectures, and publications developed by Cultural Affairs encourage and celebrate creative achievement. These cultural and educational programs benefit librarians, educators, scholars, government officials, and citizens throughout the nation and the world. Ten organizational units are combined in Cultural Affairs: the Global Library Project, and the Offices of Communications (Public Affairs and Publishing), Development, Interpretive Programs, Scholarly Programs, and Special Events and Public Programs.

Law library.—The Law Library is responsible for the custody, development, and service of the law collection of the Library of Congress and functions as the foreign and international law research arm of the United States Congress.

Management services.—This activity supports budget and finance; human resources; contracts and logistics; buildings management; automation; and other centralized services. It also includes rental of space off Capitol Hill.

Special projects.—This activity supports the accomplishment of the mission of the Library as a whole by serving as a catalyst for innovative thinking and response to strategic and operational issues; by enhancing the skills of other Library staff by providing direct experience addressing such issues; and by providing a means of dealing with strategic and operational matters that affect more than one service unit of the Library.

Office of the Librarian.—This activity supports the staff of the Office of the Librarian including the offices of the Inspector General; General Counsel, and Legislative Liaison.

The Copyright Office is responsible for registering and recording copyright claims, assignments, and renewals, for supplying copyright information to the public, for collecting and accounting for copyright fees, and for publishing complete and indexed catalogs for each class of copyright entries. The Office is conducted for the most part on a self-sustaining basis. The amount requested is substantially counterbalanced by fees received for services rendered and the value of books and other library materials deposited in accordance with the Copyright Act and transferred to the Library of Congress. The income and obligations for 1991, and estimates for 1992 and 1993 are as follows:

Income:	*1991 actual*	*1992 est.*	*1993 est.*
Gross receipts	14,096,398	15,979,000	16,717,000
Estimated value of materials deposited and transferred to the Library of Congress	11,037,401	11,400,000	11,700,000
Total income	25,133,799	27,379,000	28,417,000
Obligations	22,688,000	26,040,000	27,363,000

The efforts described under each of the activities are predicated on an estimated 650,000 copyright registrations during 1993, an estimated 650,000 during 1992, and registrations of 663,684 during 1991.

Receiving and accounting for applications, fees, and correspondence.—Materials received by the Copyright Office are assembled and routed; accounts are maintained for all moneys received; records relating to the registration of copyrights are filed; and materials are deposited in accordance with the Copyright Act.

Examining copyright applications.—All applications and deposits are examined before issuance of registration certificates or recordings of documents to determine whether the provisions of the Copyright Act have been satisfied.

Indexing and cataloging materials received.—The Register of Copyrights is required to publish complete and indexed catalogs of all items registered. The catalog entries prepared by the Copyright Office are made available to the public and the Library. It is estimated that for 1993 the number of items to be cataloged will be 650,000.

Reference service.—The Copyright Office makes information available to the public concerning the provisions of the Copyright Act, including procedures, policies, and rulings. Information concerning registrations is furnished on a fee basis.

Publishing the catalog of copyright entries and bulletins of decisions.—Catalogs for each class of copyright entries and bulletins of copyright decisions are published and made available to the public.

General supervision and legal services.—The work of the Copyright Office includes legal supervision and research into the present copyright law and international copyright rela-

tions. It also involves a study of improvement of the domestic law and our international copyright relations.

Licensing Division.—The Licensing Division performs the responsibilities connected with the licensing activities of cable television stations and satellite carriers and the licensing of jukeboxes.

Acquisitions.—The Copyright Acquisitions Division is responsible for the acquisition of domestic and international materials in various formats for the collections of the Library of Congress through the enforcement of the mandatory deposit requirement as stated in section 407 of the Copyright Act of 1976 (Title 17, U.S.C.).

Policy analysis and research.—The Congressional Research Service provides objective, nonpartisan analytical and consultative services to the Members and committees of Congress, assisting them in the analysis, appraisal, and evaluation of any subject matter of legislative concern, including recommendations submitted to the Congress by the Executive Branch. Research services are also provided to assist Congress with its oversight, representative, and other responsibilities. Support takes the form of background studies, in-depth policy analyses, consultations, briefings, legal research, continuous liaison with committees, assistance with committee hearings, public policy seminars for Members and congressional staff, and related data and materials. In order to respond most effectively to the broad range of congressional inquiries, the Service supplements individually tailored products with Issue Briefs, Reports, Committee Prints, and "Info Packs", which are collections of both CRS products and carefully selected materials from outside sources that provide background material on issues of very high congressional interest. Lists of subjects and policy areas that a committee might profitably pursue are periodically made available to each congressional committee. As provided by statute, the Service prepares decennially the Constitution of the United States—Analysis and Interpretation, and supplements at 2-year intervals, prepares compendiums for the annual national high school and college debate topics, and provides assistance to the Congressional Budget Office, the Office of Technology Assessment, and the General Accounting Office.

Documentation and status of legislation.—The Service prepares and publishes for distribution to the Congress the Digest of Public General Bills and Resolutions, including summaries of all public bills and resolutions introduced in Congress, the status of bills receiving action, and various pertinent indexes. Upon request, the Service prepares legislative history memorandums on bills for which hearings have been announced, and compiles and makes available to each committee reports on legislatively authorized programs and activities within that committee's jurisdiction that are scheduled to terminate during the current Congress.

Information and reference service.—The Congressional Research Service provides extensive information and reference assistance to Members and committees. Reference files containing clippings, pamphlets, and documents and automated information services are maintained for rapid information retrieval. Lists of selected reports, prepared by CRS staff on legislative issues, are regularly distributed to congressional offices. To provide faster responses and in-person services, the Service also maintains reference centers in congressional

The National Library Service for the Blind and Physically Handicapped (NLS) is responsible for administering a national program to provide reading material for blind and physically handicapped residents of the United States and its outlying areas and for U.S. citizens residing abroad.

Direct service to users.—During the past 5-year period, 1987–91, the blind and physically handicapped readership throughout the country has grown from 691,440 to 757,000 and circulation from approximately 20,275,000 units (volumes and containers) to almost 21,725,000.

Support services.—A variety of professional, technical, and clerical functions are performed by NLS's staff. A combined total of 201,600 interlibrary loan searches or information concerning library and related services available to the blind and to other physically handicapped persons were received in 1991, and approximately 3,300 copyright permissions were granted.

The Oliver Wendell Holmes Devise Fund and the permanent committee for the Oliver Wendell Holmes devise to administer it were created by an act of Congress, approved August 5, 1955 (69 Stat. 533).

The current program is devoted primarily to the preparation of a History of the Supreme Court of the United States, of which the first two volumes were published by the Macmillan Co. in 1972. The third, fourth and fifth volumes were published in August 1974, September 1981, and August 1985, respectively. The sixth and seventh volumes were published in 1988. Additional volumes are nearing completion.

Acquisition of library materials.—This includes the procurement of manuscripts, maps, fine prints, rare books and other library materials for the Library of Congress, and the acquisition and distribution of Government documents for the Library of Congress and cooperating libraries. It also includes the acquisition of foreign research materials for participating libraries through the Library's overseas offices.

Reader and reference services.—These services include the preparation of bibliographies, indexes, digests, and checklists; surveys of bibliographic services; and providing photostats, photographs, microfilm, and other forms of photoduplication, to other Government agencies, libraries and other institutions, and to the general public.

Organization and control of the collections.—In 1991 this included the ongoing updating of the Dewey Decimal Classification System, and the organization of several specialized collections.

Public programs.—The Library sponsors lectures; poetry readings; musical concerts; the furtherance of musical research, composition, performance and appreciation; and the preparation of sound recordings of music and literature. This program also covers the distribution of recordings of the Library's literary programs and concerts to radio stations for public service broadcasts.

(b) For purposes of this section, the term "manager or supervisor" means any management official or supervisor, as such terms are defined in section 7103(a) (10) and (11) of title 5, United States Code.

SEC. 203. Appropriated funds received by the Library of Congress from other Federal agencies to cover general and administrative overhead costs generated by performing reimbursable work for other agencies under the authority of 31 U.S.C. 1535 and 1536 shall not be used to employ more than 65 employees and may be expended or obligated—

(1) in the case of a reimbursement, only to such extent or in such amounts as are provided in appropriations Acts; or

(2) in the case of an advance payment, only—

(A) to pay for such general or administrative overhead costs as are attributable to the work performed for such agency; or

(B) to such extent or in such amounts as are provided in appropriation Acts, with respect to any purpose not allowable under subparagraph (A).

SEC. 204. Not to exceed $5,000 of any funds appropriated to the Library of Congress may be expended, on the certification of the Librarian of Congress, in connection with official representation and reception expenses for the Library of Congress incentive awards program.

SEC. 205. Not to exceed $12,000 of funds appropriated to the Library of Congress may be expended, on the certification of the Librarian of Congress or his designee, in connection with official representation and reception expenses for the Overseas Field Offices. *(Legislative Branch Appropriations Act, 1992.)*

Program. These four functions are related to the publication activity of other agencies and to the demands of the public, Members of Congress, and depository libraries. Consequently, the Office of the Superintendent of Documents can exercise little control over the volume of work which it may be called upon to perform. A description of these four functions follows:

Distribution for other Government agencies and Members of Congress.—The Office of Superintendent of Documents maintains mailing lists and mails, at the request of Government agencies and Members of Congress, certain publications specified by public law.

Depository library distribution.—As required, Government publications are supplied to libraries which are designated as depositories for Government publications.

Cataloging and indexing.—The Office of Superintendent of Documents is charged with preparing catalogs and indexes of all publications issued by the Federal Government. The principal publication is the "Monthly Catalog of U.S. Government Publications."

International exchange.—The Office of Superintendent of Documents distributes Government publications to foreign governments which agree, as indicated by the Library of Congress, to send to the United States similar publications of their governments for delivery to the Library of Congress.

various agencies of the Federal Government, and furnishes on order, blank paper, inks, and similar supplies. The Government Printing Office also sells publications to the public through its sales of publications program and distributes publications to the public for other Government agencies.

All such work is financed through the Government Printing Office revolving fund (44 U.S.C. 309). The fund is reimbursed by the customer agencies, receipts from sales of publications to the general public, and, except for the excess of receipts over costs associated with the sale of publications to the public, net operating income is retained for reuse by the fund.

The U.S. Tax Court hears and decides cases involving deficiencies in Federal income, estate and gift taxes and in excise taxes relating to public charities, private foundations, qualified pension plans, and real estate investment trusts. The Tax Court also renders declaratory judgments regarding the qualification or continuing qualification (including revocation of rulings on the exemptions) of retirement plans.

The Tax Court has jurisdiction to render declaratory judgments with respect to exempt organization status determinations pursuant to section 501(c)(3), Internal Revenue Code, and to enter declaratory judgments on the tax treatment of interest on proposed issues of governmental obligations. In addition, the court has jurisdiction over actions to restrain disclosure and to obtain additional disclosure with respect to public inspection of written determinations issued by the Internal Revenue Service, and actions to compel the disclosure of the identity of third-party contacts relating to written determinations made by the Internal Revenue Service.

The Tax Court has jurisdiction to restrain the premature assessment and collection of any tax that is the subject of a petition before the Court, to review post-petition jeopardy levies and jeopardy assessments, to review Internal Revenue Service determinations to sell property seized pursuant to a jeopardy assessment, and to award administrative and litigation costs.

For 1993, the court proposes a trial program of 400 weeks consisting of 275 weeks of regular trial sessions and 125 weeks of small tax case sessions. Trials are held in approximately 80 cities throughout the United States.

Statistics on the actual and estimated number of cases before the court are presented in the following tabulation:

This fund, established pursuant to 26 U.S.C. 7448, is used to pay survivorship benefits to eligible surviving spouses and dependent children of deceased judges of the U.S. Tax Court. Participating judges pay 3.5 percent of their salaries or retired pay into the fund to cover creditable service for which payment is required. Additional funds, as are needed, are provided through the annual appropriation to the U.S. Tax Court.

On September 30, 1991, 25 judges of the court were participating in the fund, and 5 eligible widows were receiving survivorship annuity payments.

which reflect compliance with or violation of the articles of the Final Act of the Conference on Security and Cooperation in Europe, with particular regard to the provisions relating to Cooperation in Humanitarian Fields. The law establishing the Commission on Security and Cooperation in Europe also mandated it to monitor and encourage U.S. Government and private activities designed to expand East-West trade and the exchange of people and ideas. The Commission will receive semiannual reports from the President on the signatories' compliance with the Final Act and on U.S. activities in trade and cultural/humanitarian exchange and it will itself make advisory reports to the Congress on the progress of implementation.

The Commission is made up of nine Senators, nine Members of the House of Representatives and one Commissioner each from the Departments of State, Defense, and Commerce.

The Competitiveness Policy Council was established by Public Law 100–418, sections 5201–5210, as amended by Public Law 101–382, section 133.

The Council has twelve members, drawn from business, labor, academia, government and public interest activities. The Council's objectives are:

(1) to create a national forum for identifying problems, analyzing information and developing recommendations for long-range national strategies intended to enhance the productivity and international competitiveness of the U.S. economy;

(2) to monitor changes in savings and investment, education, trade and technology and evaluate Federal, State and local policies with respect to their impact on U.S. competitiveness;

(3) to establish subcouncils of public and private leaders to develop long range strategies on specific competitiveness issues, and to review any policy recommendations which derive from these subcouncils;

(4) to make reports to the President and the Congress on issues relating to U.S. competitiveness.

TITLE III—GENERAL PROVISIONS

SEC. 301. No part of the funds appropriated in this Act shall be used for the maintenance or care of private vehicles, except for emergency assistance and cleaning as may be provided under regulations relating to parking facilities for the House of Representatives issued by the Committee on House Administration and for the Senate issued by the Committee on Rules and Administration.

SEC. 302. No part of any appropriation contained in this Act shall remain available for obligation beyond the current fiscal year unless expressly so provided herein.

SEC. 303. Whenever any office or position not specifically established by the Legislative Pay Act of 1929 is appropriated for herein or whenever the rate of compensation or designation of any position appropriated for herein is different from that specifically established for such position by such Act, the rate of compensation and the designation of the position, or either, appropriated for or provided herein, shall be the permanent law with respect thereto: *Provided,* That the provisions herein for the various items of official expenses of Members, officers, and committees of the Senate and House, and clerk hire for Senators and Members shall be the permanent law with respect thereto.

SEC. 304. The expenditure of any appropriation under this Act for any consulting service through procurement contract, pursuant to 5 U.S.C. 3109, shall be limited to those contracts where such expenditures are a matter of public record and available for public inspection, except where otherwise provided under existing law, or under existing Executive order issued pursuant to existing law.

SEC. 305. (a) The Architect of the Capitol, in consultation with the heads of the agencies of the legislative branch, shall develop an overall plan for satisfying the telecommunications requirements of such agencies, using a common system architecture for maximum interconnection capability and engineering compatibility. The plan shall be subject to joint approval by the Committee on House Administration of the House of Representatives and the Committee on Rules and Administration of the Senate, and, upon approval, shall be communicated to the Committee on Appropriations of the House of Representatives and the Committee on Appropriations of the Senate. No part of any appropriation in this Act or any other Act shall be used for acquisition of any new or expanded telecommunications system for an agency of the legislative branch, unless, as determined by the Architect of the Capitol, the acquisition is in conformance with the plan, as approved.

(b) As used in this section—

(1) the term "agency of the legislative branch" means the Office of the Architect of the Capitol, the Botanic Garden, the General Accounting Office, the Government Printing Office, the Library of Congress, the Office of Technology Assessment, and the Congressional Budget Office; and

(2) the term "telecommunications system" means an electronic system for voice, data, or image communication, including any associated cable and switching equipment.

[SEC. 306. Section 3216(e)(2) of title 39, United States Code, is amended by striking "subsection (1) of this section" each place it appears and inserting "paragraph (1) of this subsection".]

SEC. [307] *306.* Notwithstanding any other provision of law, and subject to approval by the Committee on Appropriations of the House of Representatives and the Committee on Appropriations of the Senate, and subject to enactment of authorizing legislation, amounts may be transferred from the appropriation "Library of Congress, Salaries and expenses" to the appropriation "Architect of the Capitol, Library buildings and grounds, Structural and mechanical care" for the purpose of rental, lease, or other agreement, of temporary storage and warehouse space for use by the Library of Congress during fiscal year [1992] *1993*, and to incur incidental expenses in connection with such use.

[SEC. 308. Section 311(d)(2)(A) of the Legislative Branch Appropriations Act, 1988 (2 U.S.C. 60a-2a), as amended by section 308 of the Legislative Branch Appropriations Act, 1991 (Public Law 101-520; 104 Stat. 2277), and section 315(a) of the Legislative Branch Appropriations Act, 1991 (2 U.S.C. 60a-1b(a)) are each amended by striking "5305" and inserting "5303".]

[SEC. 309. Such sums as may be necessary for fiscal year 1992 pay raises for programs funded by this Act shall be absorbed within the levels appropriated in this Act.]

[SEC. 310. Section 316 of Public Law 101-302 is amended in the first sentence of subsection (a) by striking "1991" and inserting "1992".]

[SEC. 311. (a) The provisions of this section shall apply to any individual who is employed by the Senate day care center (known as the "Senate Employee Child Care Center" and hereafter in this section referred to as the "Center") established pursuant to Senate Resolution 269, Ninety-eighth Congress, and section 3 of the Act entitled "An Act to authorize appropriations for the American Folklife Center for fiscal years 1985 and 1986, and for other purposes", approved August 21, 1984 (40 U.S.C. 214b; Public Law 98-392; 98 Stat. 1362).

(b) Any individual described under subsection (a) who is employed by the Center on or after the date of the enactment of this Act shall be deemed an employee under section 8901(1) of title 5, United States Code, for purposes of health insurance coverage under chapter 89 of such title. An individual described under subsection (a) who is an employee of the Center on the date of the enactment of this Act may elect coverage under this subsection during the 31-day period beginning on the date of the enactment of this Act, and during such periods as determined by the Office of Personnel Management for employees of the Center employed after such date.

(c) The Center shall make such deductions and withholdings from the pay of an individual described under subsection (a) who is an employee of the Center in accordance with subsection (d) of this section.

(d) The Center shall—

(1) maintain records on all employees covered under this section in such manner as the Secretary of the Senate may require for administrative purposes; and

(2) after consultation with the Secretary of the Senate—

(A) make deductions from the pay of employees of amounts determined in accordance with section 8906 of title 5, United States Code; and

(B) transmit such deductions to the Secretary of the Senate for deposit and remittance to the Office of Personnel Management.

(e) Government contributions for individuals receiving benefits under this section, as computed under section 8906 of title 5, United States Code, shall be made by the Secretary of the Senate from the appropriations account, within the contingent fund of the Senate, "miscellaneous items".

(f) The Office of Personnel Management may prescribe regulations to carry out the provisions of this section.]

[SEC. 312. (a)(1) The Clerk of the House of Representatives shall maintain and operate a child care center (to be known as the "House of Representatives Child Care Center") to furnish pre-school child care—

(A) for children of individuals whose pay is disbursed by the Clerk of the House of Representatives or the Sergeant at Arms of the House of Representatives and children of support personnel of the House of Representatives; and

(B) if places are available after admission of all children who are eligible under subparagraph (A), for children of individuals whose pay is disbursed by the Secretary of the Senate and children of employees of agencies of the legislative branch.

(2) Children shall be admitted to the center on a nondiscriminatory basis and without regard to any office or position held by their parents.

(b)(1)(A) The Speaker of the House of Representatives shall appoint 15 individuals (of whom 7 shall be upon recommendation of the Minority Leader of the House of Representatives), to serve without pay, as members of an advisory board for the center. The board shall—

(i) provide advice to the Clerk on matters of policy relating to the administration and operation of the center (including the selection of the director of the center);

(ii) be chosen from among Members of the House of Representatives, spouses of Members, parents of children enrolled in the center, and other individuals with expertise in child care or interest in the center; and

(iii) serve during the Congress in which they are appointed, except that a member of the board may continue to serve after the expiration of a term until a successor is appointed.

(B) The director of the center shall serve as an additional member of the board, ex officio and without the right to vote.

(2) A vacancy on the board shall be filled in the manner in which the original appointment is made.

(3) The chairman of the board shall be elected by the members of the board.

(c) In carrying out subsection (a), the Clerk is authorized—

(1) to collect fees for child care services;

(2) to accept such gifts of money and property as may be approved by the Chairman and the ranking minority party member of the Committee on House Administration of the House of Representatives, acting jointly; and

(3) to employ a director and other employees for the center.

(d)(1) There is established in the contingent fund of the House of Representatives an account which, subject to appropriation, and except as provided in paragraph (2), shall be the exclusive source for all salaries and expenses for activities carried out under this section. The Clerk shall deposit in the account any amounts received under subsection (c).

(2) During fiscal year 1992, of the funds provided in this Act for the "HOUSE OF REPRESENTATIVES" under "SALARIES AND EXPENSES", not more than $45,000 may be expended to carry out this section, subject to approval of the Committee on Appropriations of the House of Representatives. Any amount under this paragraph shall be in addition to any amount made available under paragraph (1).

(e) As used in this section—

(1) the term "Member of the House of Representatives" means a Representative in, or a Delegate or Resident Commissioner to, the Congress;

(2) the term "agency of the legislative branch" means the Office of the Architect of the Capitol, the Botanic Garden, the General Accounting Office, the Government Printing Office, the Library of Congress, the Office of Technology Assessment, the Congressional Budget Office, and the Copyright Royalty Tribunal; and

(3) the term "support personnel" means, with respect to the House of Representatives, any employee of a credit union or of the Architect of the Capitol, whose principal duties are to support the functions of the House of Representatives.

(f) House Resolution 21, Ninety-ninth Congress, agreed to December 11, 1985, enacted into permanent law by section 103 of the Legislative Branch Appropriations Act, 1987 (as incorporated by reference in section 101(j) of Public Law 99–500 and Public Law 99–591) (40 U.S.C. 184b–184f) is repealed.]

SEC. 307. For salaries and expenses of the House of Representatives Child Care Center, the amounts deposited in the account established by section 312(d)(1) of the Legislative Branch Appropriations Act, 1992 (40 U.S.C. 184g(d)(1)), such amounts to be available until expended. This shall be the permanent law with respect thereto.

[SEC. 313. Technical Corrections to Ethics in Government Act of 1978. The Ethics in Government Act of 1978 (5 U.S.C. App.) is amended—

(1) in section 103(i) by striking "7-day" and inserting "30-day"; and

(2) in section 105(b)(1) by—

(A) striking "Each agency" and inserting "Except as provided in the second sentence of this subsection, each agency"; and

(B) inserting after the first sentence the following: "With respect to any report required to be filed by May 15 of any year, such report shall be made available for public inspection within 30 calendar days after May 15 of such year or within 30 days of the date of filing of such a report for which an extension is granted pursuant to section 101(g).".]

[SEC. 314. (a) Section 102(a)(2) of the Ethics in Government Act of 1978 is amended—

(1) by repealing subparagraph (A);

(2) by redesignating subparagraphs (B) through (D) as subparagraphs (A) through (C), respectively;

(3) by amending subparagraph (A) (as redesignated) to read as follows:

"(A) The identity of the source, a brief description, and the value of all gifts aggregating more than the minimal value as established by section 7342(a)(5) of title 5, United States Code, or $250, whichever is greater, received from any source other than a relative of the reporting individual during the preceding calendar year, except that any food, lodging, or entertainment received as personal hospitality of an individual need not be reported, and any gift with a fair market value of $100 or less, as adjusted at the same time and by the same percentage as the minimal value is adjusted, need not be aggregated for purposes of this subparagraph.";

(4) by striking "$250 or more in value" in subparagraph (B) (as redesignated) and inserting "more than the minimal value as established by section 7342(a)(5) of title 5, United States Code, or $250, whichever is greater"; and

(5) by striking "or (B)" in subparagraph (C) (as redesignated).

(b) Section 505(3) of the Ethics in Government Act of 1978 is amended by inserting "(including a series of appearances, speeches, or articles if the subject matter is directly related to the individual's official duties or the payment is made because of the individual's status with the Government)" before "by a Member".

(c) Section 901(a) of the Ethics Reform Act of 1989 is amended—

(1) by repealing paragraphs (1), (3), and (4);

(2) by redesignating paragraphs (2), (5), (6), (7), and (8) as paragraphs (1) through (5), respectively;

(3) in paragraph (1) (as redesignated), by striking "having an aggregate value exceeding $300 during a calendar year" and inserting "in any calendar year aggregating more than the minimal value as established by section 7342(a)(5) of title 5, United States Code, or $250, whichever is greater";

(4) in paragraph (2) (as redesignated) by striking "less than $75" and inserting "$100 or less, as adjusted under section 102(a)(2)(A) of the Ethics in Government Act of 1978"; and

(5) in paragraph (3) (as redesignated), by striking subparagraph (A) and redesignating subparagraphs (B) and (C) as subparagraphs (A) and (B), respectively.

(d) Clause 4 of rule XLIII of the Rules of the House of Representatives is amended—

(1) by striking "$75 or less" and inserting "$100 or less, as adjusted under section 102(a)(2)(A) of the Ethics in Government Act of 1978";

(2) by striking "paragraph (5) of section 7342" and inserting "section 7342(a)(5)"; and

(3) by inserting "or $250, whichever is greater" after "United States Code,".

(e) The last sentence of section 7701(k) of the Internal Revenue Code of 1986 is amended to read as follows: "For purposes of this subsection, a Senator, a Representative in, or a Delegate or Resident Commissioner to, the Congress shall be treated as an officer or employee of the Federal Government.".

(f) The provisions of this section that are applicable to Members, officers, or employees of the legislative branch are enacted by the Congress—

(1) as an exercise of the rulemaking power of the House of Representatives and the Senate, respectively, and as such they shall be considered as part of the rules of each House, respectively, or of that House to which they specifically apply, and such rules shall supersede other rules only to the extent that they are inconsistent therewith; and

(2) with full recognition of the constitutional right of either House to change such rules (so far as relating to such House) at any time, in the same manner, and to the same extent as in the case of any other rule of such House.

(g) The amendments made by this section shall take effect on January 1, 1992.]

[SEC. 315. Of the funds appropriated or otherwise made available under the heading "OFFICIAL MAIL COSTS" under the heading "SENATE" in the Legislative Branch Appropriations Act, 1991 and which would remain available until expended, $150,000 of the remaining balances are rescinded: *Provided*, That the amount rescinded by this section shall be deducted from the amount allocated by the Committee on Rules and Administration to the junior Senator from Pennsylvania for mass mail.]

SEC. 308. (a) Subject to subsection (b), those employees of the Architect of the Capitol engaged in operating elevators in that part of the United States Capitol Building and House Office Buildings under the control and jurisdiction of the House of Representatives, together with the elevator operating functions performed by such employees, effective October 1, 1992, shall be transferred to the jurisdiction of the Clerk of the House of Representatives.

(b) The Architect of the Capitol shall continue to provide day-to-day supervision over the Elevator Operators under the policy direction of the Democratic Personnel Committee. (Legislative Branch Appropriations Act, 1992.)

The United States Court of Appeals for the Federal Circuit has exclusive jurisdiction of appeals from final decisions of all Federal district courts in cases arising under 28 U.S.C. 1338, 35 U.S.C. sections 145 and 146, 28 U.S.C. 1346(a)(2), and in final decisions of the United States Court of International Trade; final decisions of the United States Court of Veterans Appeals; final decisions of the U.S. Claims Court; final determinations of the United States International Trade Commission relating to unfair practices in import trade made under 19 U.S.C. 1337; findings of the Secretary of Commerce under U.S. note 6 to Subchapter X of chapter 98 of the Harmonized Tariff Schedule of the United States relating to importation of educational or scientific instruments and apparatus; final orders or decisions of the Merit Systems Protection Board; final decisions of the General Accounting Office Personnel Appeals Board; final decisions of all agency Boards of Contract Appeals; final decisions of the Patent and Trademark Office tribunals on patent applications and interferences, trademark applications and interferences, cancellations, concurrent uses proceedings, and oppositions; appeals under section 71 of the Plant Variety Protection Act of 1970; certain actions of the Administrator of Veterans Appeals; final decisions of the Office of Senate Fair Employment Practices; and certain final orders of the Equal Employment Opportunity Commission.

The court also has exclusive jurisdiction of: (1) appeals from interlocutory orders or decrees in cases where the court would have jurisdiction of the appeal; (2) appeals from interlocutory orders granting or denying, in whole or in part, a motion to transfer an action to the U.S. Claims Court; and (3) appeals from judgments in civil actions for patent infringement otherwise appealable to the court and final except for accounting. The court may, in its discretion, permit an appeal from an interlocutory order of a judge who certifies that there is a controlling question of law and a substantial ground for difference of opinion thereon, and that an immediate appeal may materially advance the ultimate termination of the litigation.

The United States Court of International Trade, established under Article III of the Constitution of the United States, was created by the Act of October 10, 1980 (94 Stat. 1727), effective November 1, 1980, as successor to the former United States Customs Court. The court has original and exclusive jurisdiction of civil actions against the United States, its agencies and officers, and certain civil actions brought by the United States, arising out of import transactions and Federal statutes affecting international trade. The court possesses all the powers in law and equity of, or as conferred by statute upon, a district court of the United States, and is authorized to conduct jury trials. The geographical jurisdiction of the court is nationwide and trials before the court may be held at any place within the jurisdiction of the United States. The court also is authorized to hold hearings in foreign countries. The principal statutory provisions pertaining to the court are contained in the following sections of title 28 of the United States Code: Organization, sections 251 to 257; Jurisdiction, sections 1581 to 1585; and Procedures, sections 2631 to 2647.

The Judiciary Automation Fund is a stable and flexible funding vehicle for the expansion, management, and use of automation throughout the Judiciary in accordance with the Long Range Plan for Automation of the U.S. Courts. Funds are available without fiscal year limitation. The Fund consists of deposits from appropriations, reimbursements, user fees, and sale of surplus equipment. Appropriate automation costs are paid directly out of the Fund. In addition, the Administrative Office of the U.S. Courts is reimbursed from the Fund for certain positions dedicated to court automation.

This Office assists the President in the discharge of budgetary, management, and other executive responsibilities.

Budget review.—Budget instructions and procedures are developed, review of agency estimates is coordinated, budget data systems are maintained, agency financial management plans are reviewed, the budget document is prepared, and scorekeeping is accomplished.

National security and international affairs; Economics and government; Natural resources, energy, and science; and Human resources, veterans, and labor.—Agency programs, budget requests, and management activities are examined, appropriations are apportioned, proposed changes in agency functions are studied, and special studies aimed at establishing goals and objectives that would result in long- and short-range improvements in the agencies' financial, administrative, and operational management are conducted.

Director's office/OMB-wide offices.—Executive direction and coordination for all Office of Management and Budget activities is provided. This includes the Director's immediate office as well as staff support in the areas of administration, external affairs, legislative reference, legislative affairs, economic policy, and General Counsel.

General management.—Government-wide supply and facility acquisition and personnel management policies and budgets are evaluated. Also, leadership and support is provided for program evaluation, Federal-State-local relations, and privatization.

Financial management.—Policy guidance for implementing financial statements, financial systems, credit and cash management, and internal controls is provided to agencies; evaluation of agency performance and progress is carried out; and a Government-wide long term financial management plan is prepared.

Information and regulatory affairs.—Agency proposals to implement or revise Federal regulations and information collection requirements are reviewed and coordinated. Information resources management and statistical policies and practices are analyzed and developed.

The Anti-Drug Abuse Act of 1988 established the Special Forfeiture Fund, to be administered by the Director of the Office of National Drug Control Policy. The Special Forfeiture Fund supports high-priority drug control programs, such as the Counter-Drug Technology Assessment Center's research and development efforts, Community Partnership Grants of the Office of Substance Abuse Policy, and the Capacity Expansion Program of the Office of Treatment Improvement. In addition to these important prevention and treatment initiatives, the fund supports law enforcement efforts of the Department of Justice and Treasury by funding the purchase of equipment and vehicles needed to support drug-related activities. This Fund, which began operation in fiscal year 1990, receives deposits on a quarterly basis from the Department of Justice Assets Forfeiture Fund. The monies in the Fund are disbursed to the drug control agencies in accordance with the priorities articulated in the National Drug Control Strategy.

Direct loan subsidy outlays:			
1340 Subsidy outlays		1,593	10,370
1349 Total subsidy outlays		1,593	10,370

*Note.—The 1992 subsidy rate shown above was estimated using revised technical and interest rate assumptions from those used to estimate the subsidy rates in the President's 1992 budget. The subsidy rate for this program from the President's 1992 budget was 12.7 percent for direct loans.

As required by the Federal Credit Reform Act of 1990, this account records the subsidy costs associated with the direct loans obligated and loan guarantees for foreign military financing committed in 1992 and beyond, as well as the administrative expenses of this program. The foreign military financing credit program provides loans that finance sales of defense articles, defense services, and design and construction services to foreign countries and international organizations. The subsidy amounts are estimated on a present value basis; the administrative expenses are estimated on a cash basis.

The International Bank for Reconstruction and Development (World Bank) finances development projects in less developed countries. By applying banking principles to the achievement of development goals, it promotes increased economic productivity and helps developing economies meet more of the basic needs of their people. Since being founded in 1945, the Bank has made loan commitments of approximately $203 billion.

The Bank's 1991 lending program included new loan commitments of $16.4 billion. More than twice this amount was contributed to these projects by recipient countries, commercial lenders, and other multilateral or bilateral agencies.

The Administration's request for 1993 consists of: $70.1 million in budget authority for paid-in capital subscriptions and $2.3 billion in program limitations for callable capital subscriptions to make the fifth installment on the U.S. share of a $74.8 billion general capital increase.

CONTRIBUTION TO THE INTERNATIONAL DEVELOPMENT ASSOCIATION

For payment to the International Development Association by the Secretary of the Treasury, $1,060,000,000, for the United States contribution to the replenishment, to remain available until expended.

The International Development Association (IDA), a member of the World Bank Group, provides development financing on highly concessional terms to the world's poorest nations. IDA is the largest source of multilateral lending that is extended on concessional terms to developing countries. Projects have to meet the same economic, financial, and environmental standards as other World Bank projects.

By June 30, 1991, IDA had extended credits totaling $64.5 billion for development projects. IDA operations place special emphasis upon poverty alleviation, women in development, and the environment. During World Bank FY 1991, IDA made new commitments of almost $6.3 billion.

The Ninth Replenishment of IDA will provide resources of about $15.5 billion. The United States has pledged $3.180 billion (21.6 percent share of all donor contributions) to the replenishment. The $1.060 billion requested in 1993 would pay the third and final U.S. installment of the IDA–9 replenishment.

CONTRIBUTION TO THE INTERNATIONAL FINANCE CORPORATION

For payment to the International Finance Corporation by the Secretary of the Treasury, $50,000,000, for the United States share of the increase in subscriptions to capital stock, to remain available until expended. (Additional authorizing language has been proposed.)

The International Finance Corporation (IFC), a member of the World Bank Group, was established in 1956 to further economic development by encouraging the growth of private enterprise in developing countries. IFC provides and mobilizes loans and equity investments for promising ventures, and provides technical assistance. The IFC is now playing an important role in Eastern Europe's transition to free markets and private enterprise, due to the IFC's special expertise in foreign investment, capital markets development, and privatization. During World Bank FY 1991 the Corporation approved 152 new investments totalling $2.9 billion and net investments for the IFC's own account were $1.5 billion. For every dollar invested by the IFC, an average of nearly $6 was supplied by other lenders and investors. By the end of June 1991, IFC operations had resulted in cumulative gross commitments of $9.5 billion for the IFC's own account and $4.0 billion in syndications.

The 1993 request includes budget authority of $50.0 million for the second installment of the U.S. share of the $1.0 billion capital increase.

The Inter-American Development Bank (IDB) promotes the economic and social development of Latin America and the Caribbean through loans and technical assistance. In its 30 years of operation, the Bank has lent nearly $45.5 billion for projects that represent a total investment of more than $136 billion.

The Bank lends money through: (1) the ordinary capital window that lends at near-market rates; (2) the Fund for Special Operations (FSO) which makes loans on concessional terms to the region's poorest nations; and (3) the Inter-American Investment Corporation (IIC), which makes loans and equity investments for small and medium sized private enterprises.

The 1993 request includes: (1) budget authority of $57.3 million for paid-in capital subscriptions and $2.2 billion in program limitations for callable capital subscriptions for the third U.S. installment to the IDB's seventh general capital increase; and (2) budget authority of $20.6 million for the third U.S. payment to the Seventh Replenishment of the FSO.

The Asian Development Bank fosters economic growth and cooperation in the Asian and Pacific region. The Bank lends at near-market rates through its ordinary capital window, and on highly concessional terms to the region's poorer nations through the Asian Development Fund (ADF). In 1991, the Bank lent $3.5 billion of its ordinary capital resources and extended loans and grants of $1.3 billion from its ADF resources for development projects. Since its founding in 1966, the Bank has made loans totaling more than $32.5 billion, and equity investments of $139 million.

The 1993 request includes budget authority of $170.0 million for the first installment of the U.S. share of the sixth replenishment of ADF resources and $25 million for paid-in capital subscriptions and $187 million in program limitations for callable capital subscriptions for the second and final U.S. installment to a selected capital increase in the Bank's ordinary capital resources.

The African Development Fund (AFDF), the concessional lending affiliate of the African Development Bank, makes loans to the poorest African nations. More than 80 percent of its lending goes to countries with per capita GNP of $510 or less. During 1990, AFDF extended loans and grants totalling $1,093 million to 39 countries. By the end of 1990 and since its inception in 1974, cumulative AFDF lending totaled $7.1 billion for development projects.

The 1993 request includes $135 million for the second U.S. installment to the Sixth Replenishment.

The African Development Bank (AFDB) makes loans at near-market rates for the economic and social development of its African members. Membership in the Bank was restricted to African nations until 1982 when non-regional countries were allowed to join. The U.S. became a member of the Bank in 1983 with an initial subscription of $360 million of AFDB capital.

In 1990, the AFDB lent $2.2 billion for development projects in 21 countries. Since its foundation in 1967, the Bank has made loan commitments of more than $11.6 billion.

The European Bank for Reconstruction and Development (EBRD) supports market-oriented economic reform and democratic pluralism in the nations of Eastern Europe. The United States and other potential shareholders signed the articles of agreement of the EBRD on May 29, 1990, and the Bank officially began operating on April 15, 1991. The capitalization of the EBRD will be ECU 10 billion (approximately $12 billion equivalent at then-prevailing exchange rates). Paid-in contributions constitute 30 percent of total capital, with the remainder callable.

The 1993 request consists of $70 million in budget authority for paid in capital subscriptions and $163.4 million in program limitations for callable capital subscriptions to pay the third installment on the $1.2 billion U.S. share of the $11.7 billion initial capitalization.

The Enterprise for the Americas Investment Fund (EAIF) is an important component of the Enterprise for the Americas Initiative, a program to unlock the potential for domestic and foreign investment and encourage market-based capital flows. The EAIF, to be administered by the Inter-American Development Bank, will be a multilateral fund which provides grants and loans for investment regime reforms. Special consideration will be given to reforms that encourage private foreign direct investment and promote privatization. Grants and loans may be used for technical assistance to identify and resolve investment constraints, for investment in human capital, and for business infrastructure where such investments are directly supportive of privatization.

The 1993 request for the EAIF is $100 million for the second of five installments of the U.S. share of the fund.

This account provides funds for extraordinary assistance in countries undertaking economic reforms. The Special Assistance Initiatives were inaugurated in 1990 with $160 million for the initial U.S. contribution to the Philippines Multilateral Assistance Initiative (MAI). This initiative by multilateral and bilateral donors with the private sector will provide assistance to the Philippines to support democracy and economic restructuring. Obligation of U.S. resources is based on agreements with the Philippine government on specific programs, projects, and economic and administrative reforms.

The appropriation of funds under the Support for East European Democracy (SEED) Act was incorporated into this account in 1991. This program supports the efforts of Central and Eastern European countries, including the new Baltic republics, to restructure their economies, improve the environment and advance democratic reforms.

*Humanitarian and Technical Assistance to Former Republics of the Soviet Union**

Federal Funds

General and special funds:

* See Appendix One, Chapter 34 for additional information.

In recognition that instability or resurgent totalitarianism in the former Soviet Union could threaten United States national security, and in view of the substantial savings in defense made possible by changes in the former Soviet Union and the need to secure these changes in order to achieve continued savings, there is hereby appropriated $350,000,000, to remain available until expended, for the purpose of meeting the humanitarian needs of and providing technical assistance to the former republics of the Soviet Union: Provided, That funds appropriated under this section are in addition to amounts otherwise available for such purposes, and may be made available notwithstanding any other provision of law to carry out the purpose of this section: Provided further, That funds appropriated under this section shall be considered to be economic assistance under the Foreign Assistance Act of 1961 for purposes of making available the administrative authorites contained in that Act for the use of economic assistance. Such sums as may be necessary of the funds appropriated under this section may be used for administrative expenses of agencies of the United States Government in connection with administering programs under this section.

The Sub-Saharan Africa account is a single account resource designed to allow A.I.D. greater effectiveness in meeting Africa's development requirements. Resources are used in both project and non-project modes to address shared development program and policy commitments of reform-oriented African countries. The account ensures availability of resources for Africa, and provides greater flexibility in supporting the objective of growth with equity in Africa.

Legislation will be proposed to establish a new account to finance investments in services and facilities which support economic growth and development while concurrently enhancing U.S. technical leadership, business opportunities, and international competitiveness. The Fund will seek innovative ways to leverage the Agency's development programs in support of U.S. trade and investment opportunities, especially where other donor and external commercial resources can be shifted in favor of American jobs and workers.

Portions of the new Fund will be used to finance U.S. technical assistance in project development and program implementation. Such technical assistance will be used for a variety of development goals, including engineering services, where such services would improve the prospects for U.S. industry to be a legitimate competitor in follow-on procurements and construction. The Fund will work in collaboration with, and as an extension of, feasibility studies and project planning services financed by the U.S. Trade and Development Program.

DEBT RESTRUCTURING UNDER THE ENTERPRISE FOR THE AMERICAS INITIATIVE

For the cost, as defined in section 502 of the Congressional Budget Act of 1974, of modifying: (1) concessional loans authorized under Title I of the Agricultural Trade Development and Assistance Act of 1954, as amended; (2) concessional loans authorized by the Foreign Assistance Act of 1961, as amended, (or predecessor foreign economic assistance legislation); (3) loans made pursuant to the Export Import Bank Act of 1945, as amended; and (4) any asset which is acquired by the Commodity Credit Corporation as a result of its status as a guarantor of credits in connection with export sales to an eligible country in accordance with export credit guarantee programs authorized pursuant to the Commodity Credit Corporation Charter Act, as amended, section 4(b) of the Food for Peace Act of 1966, as amended, or section 202 of the Agricultural Trade Act of 1978, as amended, there is hereby appropriated an amount not to exceed $286,000,000, to remain available until expended.

Note.—A regular 1992 appropriation for this account had not been enacted at the time this budget was prepared. A continuing resolution (P.L. 102–145) provides funds under the authority and conditions provided in 1991. The following schedule assumes enactment of the pending 1992 request.

President Bush launched the Enterprise for the Americas Initiative (EAI) in an effort to build closer and more productive relations with Latin America and the Caribbean. The EAI aims to boost trade, investment, and growth throughout the hemisphere. One element of the Initiative involves the reduction of bilateral debt to the USG and the dedication of local currency interest payments to support environmental projects. Countries would become eligible for such debt reduction if they: (1) are pursuing economic reform programs with the IMF and World Bank; (2) are pursuing major investment reforms through an IDB loan or on their own; and, if appro-

priate, (3) have agreed with their commercial banks on a satisfactory financing program.

As required by the Federal Credit Reform Act of 1990, this account records, for this program, the subsidy costs associated with restructuring debt. Budget authority and outlays are calculated as the difference between the net present value of expected payments on existing loans and the net present value of payments after the debt has been reduced.

Note.—The 1992 subsidy rate shown above was estimated using revised technical and interest rate assumptions from those used to estimate the subsidy rates in the President's 1992 Budget. The subsidy rate for this program from the President's 1992 Budget was 2.5 percent.

The Housing Guaranty program extends guaranties to U.S. private investors who make loans to developing countries to assist them in formulating and executing sound housing and community development policies that meet the needs of lower income groups.

As required by the Federal Credit Reform Act of 1990, this account records, for the Housing Guaranty program, the subsidy costs associated with the loan guarantees committed in 1992 and beyond, as well as administrative expenses of this program. The subsidy amounts are estimated on a present value basis; the administrative expenses are estimated on a cash basis.

Note.—The 1992 subsidy rate shown above was estimated using revised technical and interest rate assumptions from those used to estimate the subsidy rates in the President's 1992 Budget. The subsidy rates for these programs from the President's 1992 Budget were zero percent for direct and guaranteed loans.

The private sector investment program supports private sector activities in developing countries through direct loans and guarantees to local private sector firms and credit institutions.

As required by the Federal Credit Reform Act of 1990, this account records, for this program, the subsidy costs associated with the loan guarantees committed in 1992 and beyond, as well as administrative expenses of this program. The subsidy amounts are estimated on a present value basis; the administrative expenses are estimated on a cash basis.

The Housing Guaranty program extends guaranties to U.S. private investors who make loans to developing countries to assist them in formulating and executing sound housing and community development policies that meet the needs of lower income groups.

As required by the Federal Credit Reform Act of 1990, this account records, for the Housing Guaranty program, all cash flows to and from the Government resulting from direct loans obligated and loan guarantees committed prior to 1992. This account is shown on a cash basis. All new activity in this program in 1992 and beyond is recorded in corresponding program and financing accounts.

The private sector investment program expands the A.I.D. private sector initiative through new financing mechanisms and support of business activities. Guarantees are made to local private sector firms and credit institutions in developing countries.

As required by the Federal Credit Reform Act of 1990, this account records, for the private sector revolving fund, all cash flows to and from the Government resulting from direct loans obligated and loan guarantees committed prior to 1992. This account is shown on a cash basis. All new activity in this program in 1992 and beyond is recorded in corresponding program and financing accounts.

Section 608 of the Foreign Assistance Act of 1961, as amended, created a revolving fund to finance the acquisition and rehabilitation at minimal cost of U.S. Government-owned excess property for purchase by friendly countries and eligible organizations, for use in conjunction with economic development programs. Excess property, most of it obtained from the Department of Defense, includes heavy construction equipment, vehicles, heavy machinery, electrical generating equipment, and medical equipment and supplies. The program is self-financed from service fees and reimbursements by equipment purchasers ultimately funded from development assistance appropriations to the Agency for International Development.

Peace Corps operating expenses provide direct and indirect support for approximately 7,200 Americans engaged in voluntary services in 95 countries worldwide. The volunteers help fill the trained manpower needs of developing countries and encourage self-sustaining development of skilled manpower. The Peace Corps promotes mutual understanding between the peoples of the developing world and the United States and focuses the attention of the American people on the concepts of voluntarism and self-help at the grassroots level.

Volunteer operations.—The financial resources associated with this budget activity provide for the placement, training and direct support of Peace Corps Volunteers overseas. These resources will fund nearly 5,950 volunteer years of service worldwide in 1993.

Recruitment and development education.—This activity provides for volunteer recruitment and selection, development education, and related activities of the Peace Corps. In 1993, approximately 3,960 trainees qualified to enter Peace Corps service will be selected.

Program development and support.—This activity funds the administrative expenses and general overhead costs associated

NONCREDIT PROGRAMS

The Overseas Private Investment Corporation is authorized to make, without regard to fiscal year limitations, as provided by 31 U.S.C. 9104, such noncredit expenditures and commitments within the limits of funds available to it and in accordance with law (including an amount for official reception and representation expenses which, when added to the amount provided for the Overseas Private Investment Corporation for official reception and representation expenses in connection with credit programs, shall not exceed $35,000) as may be necessary. During the fiscal year 1993, within the resources and authority available, gross obligations for the amount of equity investments shall not exceed $5,000,000. (Additional authorizing language to be proposed.)

Note.—A regular 1992 appropriation for this account had not been enacted at the time this budget was prepared. A continuing resolution (P.L. 102-145) provides funds under the authority and conditions provided in 1991. The following schedules assume enactment of the pending 1992 request.

Note.—The 1992 subsidy rate shown above was estimated using revised technical and interest rate assumptions from those used to estimate the subsidy rates in the President's 1992 Budget. The subsidy rates for these programs from the President's 1992 Budget were 9.6 percent for direct loans, and zero percent for loan guarantees.

The Overseas Private Investment Corporation encourages the participation of United States private capital and skills in the economic and social development of less-developed friendly countries. Its primary credit program is investment financing through loans and guaranteed loans.

As required by the Federal Credit Reform Act of 1990, the Program Account records, the subsidy costs associated with the direct loans obligated and loan guarantees committed in 1992 and beyond (including modifications of direct loans or loan guarantees that resulted from obligations or commitments in any year), as well as administrative expenses of this program. The subsidy amounts are estimated on a present value basis; the administrative expenses are estimated on a cash basis.

The Overseas Private Investment Corporation encourages the participation of United States private capital and skills in the economic and social development of less developed friendly countries. Its primary noncredit programs are: (1) political risk insurance against losses due to expropriation, inconvertibility, and war damage; (2) preinvestment services; and (3) a pilot equity investment program. All program activities were discharged out of the Liquidating Account in 1990 and 1991.

The Administration is proposing to shift the accounting for all insurance programs from a cash basis to an accrual basis. The proposal would be implemented in phases. This budget shows the conversion for deposit insurance and pension guarantees beginning with the transactions for 1992. The conversion of all other insurance programs is planned for 1993 and will be reflected in the 1994 budget.

Established by the 1969 Foreign Assistance Act, the Inter-American Foundation supports social processes in Latin America and the Caribbean with a direct impact on the lives of people at the lowest economic levels. In addition to appropriations and private gifts, the Foundation is funded by annual transfers from the Social Progress Trust Fund administered by the Inter-American Development Bank.

Development assistance.—This activity includes the cost of all grants made directly to grassroots membership and service organizations to carry out development projects in Latin America and the Caribbean. In 1993, the Foundation plans to award approximately 215 grants and 210 grant supplements in 30 countries.

In-country support.—Resources associated with this activity are used by local development professionals in Latin America

and the Caribbean to provide grantees with technical assistance and training when necessary to conduct their projects.

Development research and evaluation.—This activity funds grants and fellowships for grassroots development research and for the evaluation of the Foundation's projects.

Development education and dissemination.—Resources for this activity fund the travel expenses, publication costs and service contracts required to promote the lessons learned from the Foundation's project and research funding.

Program support.—This activity includes Foundation expenses for salaries and benefits, rent, and other support costs.

The African Development Foundation is a public corporation authorized to provide grants, loans, and loan guarantees directly to African organizations and individuals for self-help development activities aimed at improving the living standards and conditions of disadvantaged people. Organizations and individuals receiving support must demonstrate their commitment to self-help development programs by encouraging the substantive participation of the poor in all phases of the development process, particularly in the design, implementation, and management of projects. Grants range from $700 to $250,000 in the following project sectors—agriculture, cottage industry development, vocational skills training, resource conservation, education, credit, communications, and energy. The Foundation plans to fund development projects in 26 African countries in 1993.

Direct development assistance.—Funds associated with this activity are used to award grants to African grassroots organizations to fund development projects. In 1993, the Foundation plans to award 90 new grants in 26 countries.

Development studies and technical assistance.—This activity represents the cost of grants and cooperative agreements to individuals or organizations in Africa that provide technical assistance for recipients of Foundation funds. Grants and fellowships for African researchers and other funding for the study and evaluation of the Foundation's projects are also included in this activity.

Learning and dissemination.—Resources for this activity fund the travel expenses, printing costs and service contracts

As of September 30, 1991, the current dollar value of the U.S. quota denominated in Special Drawing Rights (SDR), the IMF's unit of account, was $24,512 million.

International negotiations on an increase in IMF quotas were concluded in May 1990. The IMF membership agreed to increase quotas by 50 percent, from about SDR 90 billion to SDR 135 billion, of which the U.S. increase amounts to SDR 8,608.5 million, approximately $12 billion. Under established procedures, an increase in the U.S. quota in the IMF requires budget authorization and appropriation for the full amount of the increase. Use by the IMF of the quota commitment does not result in net budget outlays, however, because the United States receives an increase in its international monetary reserves corresponding to any transfer of dollars under the U.S. quota subscription. The United States can use these interest-bearing reserves automatically to meet a balance of payments financing need. Legislation providing for U.S. participation in the IMF quota increase is being sought.

Members of the IMF are obligated to maintain the value of their currency, held by the IMF, in terms of the SDR—the unit of account of the IMF. When the dollar appreciates (depreciates) against the SDR, the cost of maintaining these holdings decreases (increases), and an appropriate adjustment is made in the U.S. account with the IMF. This valuation adjustment occurs at the end of the IMF fiscal year, April 30th. Budget authority is provided in years when the maintenance of value adjustment results in an increase in the value of IMF dollar holdings, but such adjustments do not result in any immediate cash transfers to the IMF. In fiscal year 1991, the maintenance of value adjustment resulted in an increase in the dollar value of IMF dollar holdings equivalent to $460 million.

The General Arrangements to Borrow (GAB) were established in 1962 by 10 industrial countries, including the United States, as a means of supplementing the IMF's resources when needed to forestall or cope with an impairment of the international monetary system. Each participant agreed to provide specific amounts of its currency to help finance drawings from the IMF by another GAB participant. GAB members agreed in early 1983 to increase their financial commitments to the GAB and to allow the IMF, in certain strictly defined circumstances, to activate the GAB to provide financing for any IMF member. Total GAB commitments were increased from SDR 6.3 billion to SDR 17 billion, with the U.S. share rising from $2.0 billion to SDR 4.250 billion, approximately $5.8 billion at the September 30, 1991 exchange rate. Financing extended by the United States under the GAB does not result in any net budget outlays because the United States receives an increase in its international reserve assets corresponding to any transfer to the IMF under the U.S. credit line.

During 1991, no calls were made on the U.S. commitment under the GAB, and no U.S. loans were outstanding at the end of the fiscal year.

The Enhanced Structural Adjustment Facility (ESAF) was created in 1987 to enable the International Monetary Fund to provide balance of payments assistance on concessional terms to low-income developing countries with protracted payments problems which are prepared to adopt multi-year economic and structural reform programs. It is a critical element of international efforts to address the serious economic problems confronting the poorest countries, particularly in Sub-Saharan Africa.

The resources of the ESAF are being provided through loans and special interest subsidy contributions by member countries. Loans will be disbursed over a three-year period with repayments in 10 equal semiannual installments beginning 5½ years and ending 10 years from the date of disbursement. It is envisaged that total loans will amount to SDR 6 billion (nearly $8 billion) and that interest subsidy contributions will help achieve a concessional interest rate of ½ of 1 percent.

The U.S. contribution of approximately $150 million is taking the form of a payment to the ESAF interest subsidy account. Actual disbursements from the U.S. contribution will occur over the period through fiscal year 2001, roughly the final period for interest payments on ESAF loans.

This revolving fund finances the acquisition of defense articles and defense services in anticipation of their transfer to foreign countries and international organizations. The fund enhances the ability of the United States to respond to urgent requirements of allied and friendly governments for military equipment, while minimizing the adverse impact on U.S. forces due to diversions from production or U.S. military stocks. The account was capitalized by foreign military sales receipts.

in part any assessments, arrearages, or dues of any member of the United Nations.

PROHIBITION ON FUNDING FOR INTERNATIONAL FINANCIAL INSTITUTIONS

SEC. 505. None of the funds provided in title II of this Act may be used to carry out the provisions of section 209(d) of the Foreign Assistance Act of 1961.

AID RESIDENCE EXPENSES

SEC. 506. Of the funds made available by this Act, not to exceed $126,500 shall be for official residence expenses of the Agency for International Development during the current fiscal year.

AID ENTERTAINMENT EXPENSES

SEC. 507. Of the funds made available by this Act, not to exceed $11,500 shall be for entertainment expenses of the Agency for International Development during the current fiscal year.

REPRESENTATIONAL ALLOWANCES

SEC. 508. Of the funds made available by this Act, not to exceed $115,000 shall be for representation allowances for the Agency for International Development during the current fiscal year: Provided, That of the funds made available by this Act for general costs of administering military assistance and sales under the heading "Foreign Military Financing Grants", not to exceed $2,875 shall be available for entertainment expenses and not to exceed $75,000 shall be available for representation allowances: Provided further, That of the funds made available by this Act under the heading "International Military Education and Training", not to exceed $125,000 shall be for entertainment allowances: Provided further, That of the funds made available by this Act for the Inter-American Foundation, not to exceed $2,875 shall be for entertainment and representation allowances: Provided further, That of the funds made available by this Act for the Peace Corps, not to exceed $4,600 shall be for entertainment expenses: Provided further, That of the funds made available by this Act under the heading "Trade and Development Program", not to exceed $2,300 shall be for representation and entertainment allowances.

PROHIBITION ON FINANCING NUCLEAR GOODS

SEC. 509. None of the funds made available by this Act for carrying out the Foreign Assistance Act of 1961 (other than funds for "International Organizations and Programs") may be used to finance the export of nuclear equipment, fuel, or technology.

HUMAN RIGHTS

SEC. 510. Funds appropriated by this Act may not be obligated or expended to provide assistance to any country for the purpose of aiding the efforts of the government of such country to repress the legitimate rights of the population of such country to the Universal Declaration of Human Rights.

PROHIBITION AGAINST DIRECT FUNDING FOR CERTAIN COUNTRIES

SEC. 511. None of the funds made available by this Act shall be obligated or expended to finance directly any assistance or reparations to Cuba, Iraq, Libya, the Socialist Republic of Vietnam, Iran, or Syria: Provided, That such prohibition shall not apply to the extent that in the judgment of the President its application is not in the national interest of the United States and so reports to the Congress.

MILITARY COUPS

SEC. 512. None of the funds made available by this Act shall be obligated or expended to finance directly any assistance to any country whose duly elected Head of Government is deposed by military coup or decree: Provided, That assistance may be resumed to such country if the President determines and reports to the Committees on Appropriations that (1) subsequent to the termination of assistance a democratically elected government has taken office, or (2) it is in the national interest of the United States to do so.

TRANSFERS BETWEEN ACCOUNTS

SEC. 513. None of the funds made available by this Act may be obligated under an appropriation account to which they were not appropriated, unless the President, prior to the exercise of any authority contained in the Foreign Assistance Act of 1961 to transfer funds, consults with and provides a written policy justification to the Committees on Appropriations of the House of Representatives and the Senate: Provided, That the exercise of such authority shall be subject to the regular notification procedures of the Committees on Appropriations.

DEOBLIGATION/REOBLIGATION AUTHORITY

SEC. 514. (a) Amounts certified pursuant to 31 U.S.C. 1108(c) as having been obligated against appropriations heretofore made under the authority of the Foreign Assistance Act of 1961 for the same general purpose of any of the headings under the "Agency for International Development" are, if deobligated, hereby continued available for the same period as the respective appropriation under such headings or until September 30, 1993, whichever is later: Provided, That the Appropriations Committees of both Houses of the Congress are notified fifteen days in advance of the deobligation and reobligation of such funds in accordance with regular notification procedures of the Committees on Appropriations.

(b) Obligated balances of funds appropriated to carry out section 23 of the Arms Export Control Act and section 503 of the Foreign Assistance Act of 1961 as of the end of the fiscal year immediately preceding the current fiscal year are, if deobligated, hereby continued available during the current fiscal year for the same purpose under any authority applicable to such appropriations under this Act: Provided, That the Appropriations Committees of both Houses of Congress are notified fifteen days in advance of the deobligation and reobligation of such funds in accordance with regular notification procedures of the Committees on Appropriations.

(c) If the President at any time during the current fiscal year notifies the Congress that no further sales will be made pursuant to the Arms Export Control Act after the date of such notification to a specified country under circumstances then prevailing, any uncommitted funds allocated for such country that had previously been transferred to the foreign military sales trust fund under the former authority of section 503(a)(3) of the Foreign Assistance Act of 1961 or section 23 of the Arms Export Control Act for the purpose of financing such sales may be committed to finance such sales to other eligible countries subject to advance notification to the Committees on Appropriations and Foreign Relations of the Senate and the Committees on Appropriations and Foreign Affairs of the House of Representatives.

AVAILABILITY OF FUNDS

SEC. 515. No part of any appropriation contained in this Act shall remain available for obligation after the expiration of the current fiscal year unless expressly so provided in this Act: Provided, That funds appropriated for the purposes of chapters 1 and 10 of part I, section 667, and chapter 4 of part II of the Foreign Assistance Act of 1961, as amended, shall remain available until expended if such funds are initially obligated before the expiration of their respective periods of availability contained in this Act: Provided further, That notwithstanding any other provision of this Act, any funds made available for the purposes of chapters 1 and 10 of part I and chapter 4 of part II of the Foreign Assistance Act of 1961 which are allocated or obligated for cash disbursements in order to address balance of payments or economic policy reform objectives, shall remain available until expended.

LIMITATION ON ASSISTANCE TO COUNTRIES IN DEFAULT

SEC. 516. No part of any appropriation contained in this Act shall be used to furnish assistance to any country which is in default during a period in excess of one calendar year in payment to the United States of principal or interest on any loan made to such country by the United States pursuant to a program for which funds are appropriated under this Act: Provided, That this section and section 620(q) of the Foreign Assistance Act of 1961 shall not apply to funds made available during the current fiscal year for Nicaragua and for any narcotics-related assistance for Colombia, Bolivia, and Peru authorized by the Foreign Assistance Act of 1961, as amended, or the Arms Export Control Act.

FINANCIAL INSTITUTIONS—NAMES OF BORROWERS

SEC. 517. None of the funds made available by this Act shall be available to any international financial institution whose United States governor or representative cannot upon request obtain the amounts and the names of borrowers for all loans of the international financial institution, including loans to employees of the institution, or the compensation and related benefits of employees of the institution.

FINANCIAL INSTITUTIONS—DOCUMENTATION

SEC. 518. None of the funds made available by this Act shall be available to any international financial institution whose United

States governor or representative cannot upon request obtain any document developed by or in the possession of the management of the international financial institution, unless the United States governor or representative of the institution certifies that the confidentiality of the information is essential to the operation of the institution.

NOTIFICATION REQUIREMENTS

SEC. 519. For the purposes of providing the Executive Branch with the necessary administrative flexibility, none of the funds made available under this Act to carry out chapter 1 of part I of the Foreign Assistance Act of 1961, as amended, or for "Sub-Saharan Africa, Development Assistance", "International organizations and programs", "American schools and hospitals abroad", "Trade and development program", "International Narcotics Control", "Economic Support Fund", "Peacekeeping operations", "Operating Expenses of the Agency for International Development", "Operating Expenses of the Agency for International Development Office of Inspector General", "Anti-terrorism assistance", "Foreign Military Financing Grants", the "Foreign Military Financing Program Account", "International Military Education and Training", "Inter-American Foundation", "African Development Foundation", "Peace Corps", or "Migration and Refugee Assistance", shall be available for obligation for activities, programs, projects, type of material assistance, countries, or other operation not justified or in excess of the amount justified to the Appropriations Committees for obligation for the current fiscal year unless the Appropriations Committees of both Houses of Congress are previously notified fifteen days in advance: Provided, That the President shall not enter into any commitment of funds appropriated for the purposes of section 23 of the Arms Export Control Act for the provision of major defense equipment, other than conventional ammunition, or other major defense items (defined to be aircraft, ships, missiles, or combat vehicles), not previously justified to Congress or 20 percent in excess of the quantities justified to Congress unless the Committees on Appropriations are notified fifteen days in advance of such commitment: Provided further, That with respect to assistance provided under chapters 1 and 10 of part I of the Foreign Assistance Act of 1961, as amended, the requirements of this section for notification prior to reprogramming funds shall apply only for (1) a project, program, or activity which was not justified in Congressional presentation documents for the current fiscal year and for which assistance was not provided in the preceding fiscal year, or (2) the assistance would cause the total amount allocated for a country from such chapter to exceed the amount allocated for that country from such chapter (or would be in excess of the total amount allocated from such chapter) in the report required by section 653(a) of the Foreign Assistance Act of 1961: Provided further, That any requirement to provide advance notification to the Congress, or any congressional committees, under any provision of this Act, or of any act authorizing or appropriating funds for use under the Foreign Assistance Act of 1961 or the Arms Export Control Act, may be waived if doing so is necessitated by emergency circumstances: Provided further, That in case of any such waiver, notification to the Congress, or the appropriate congressional committees, shall be provided as early as practicable, but in no event later than three days after taking the action to which such notification requirement was applicable, in the context of the circumstances necessitating such waiver: Provided further, That any notification provided pursuant to such a waiver shall contain an explanation of the emergency circumstances.

CONSULTING SERVICES

SEC. 520. The obligation of any appropriation under this Act for any consulting service through procurement contract pursuant to 5 U.S.C. 3109, shall be limited to those contracts where expenditures for such purpose are a matter of public record and available for public inspection, except where otherwise provided under existing law or existing Executive order.

PROHIBITION ON ABORTION LOBBYING

SEC. 521. None of the funds appropriated under this Act may be used to lobby for abortion.

CEILINGS AND EARMARKS

SEC. 522. Ceilings and earmarks contained in this Act shall not be applicable to funds or authorities made available by any subsequent Act unless such Act specifically so directs.

PROHIBITION CONCERNING ABORTIONS AND INVOLUNTARY STERILIZATION

SEC. 523. None of the funds made available to carry out part I of the Foreign Assistance Act of 1961, as amended, may be used to pay for the performance of abortions as a method of family planning or to motivate or coerce any person to practice abortions. None of the funds made available to carry out such part may be used to pay for the performance of involuntary sterilization as a method of family planning or to coerce or provide any financial incentive to any person to undergo sterilizations. None of the funds made available to carry out such part may be used to pay for any biomedical research which relates in whole or in part, to methods of, or the performance of, abortions or involuntary sterilization as a means of family planning. None of the funds made available to carry out such part may be obligated or expended for any country or organization if the President certifies that the use of these funds by any such country or organization would violate any of the above provisions related to abortions and involuntary sterilizations. The Congress reaffirms its commitments to Population, Development Assistance and to the need for informed voluntary family planning.

AFGHANISTAN-HUMANITARIAN ASSISTANCE

SEC. 524. Funds appropriated to carry out the provisions of chapter 1 of part I of the Foreign Assistance Act of 1961, and chapter 4 of part II of that Act, may be made available for the provision of food, medicine, or other humanitarian assistance to the Afghan people, notwithstanding any other provision of law.

PRIVATE VOLUNTARY ORGANIZATIONS—DOCUMENTATION

SEC. 525. None of the funds made available by this Act shall be available to a private voluntary organization which fails to provide upon timely request any document, file, or record necessary to the auditing requirements of the Agency for International Development.

DEFINITION OF PROGRAM, PROJECT, AND ACTIVITY

SEC. 526. For the purpose of this Act, "program, project, and activity" shall be defined as the aggregate of funds made available for each title of this Act: Provided, That in carrying out reductions in programs, projects, and activities as may be required under the Balanced Budget and Emergency Deficit Control Act of 1985, as amended, the President may reduce statutory earmarks, ceilings, and limitations by a percentage not to exceed the percentage reductions required under such Act.

EARMARKS

SEC. 527. Funds appropriated by this Act which are earmarked may be reprogrammed for other programs within the same account notwithstanding the earmark if compliance with the earmark is made impossible by operation of any provision of this or any other Act or, with respect to a country with which the United States has an agreement providing the United States with base rights or base access in that country, if the President determines that the recipient for which funds are earmarked has significantly reduced its military or economic cooperation with the United States since enactment of the Foreign Operations, Export Financing, and Related Programs Appropriations Act, 1991; however, before exercising the authority of this section with regard to a base rights or base access country which has significantly reduced its military or economic cooperation with the United States, the President shall consult with, and shall provide a written policy justification to, the Committees on Appropriations: Provided, That any such reprogramming shall be subject to the regular notification procedures of the Committees on Appropriations: Provided further, That assistance that is reprogrammed pursuant to this section shall be made available under the same terms and conditions as originally provided.

ASSISTANCE FOR CAMBODIAN DEMOCRACY

SEC. 528. Funds appropriated by this Act for development assistance and under the heading "Economic Support Fund" may be made available for humanitarian and development assistance for Cambodians, including the Cambodian non-Communist resistance, along the Thai-Cambodian border and throughout Cambodia, notwithstanding any other provision of law.

DEBT FOR DEVELOPMENT

SEC. 529. In order to enhance the continued participation of nongovernmental organizations in economic assistance activities under the Foreign Assistance Act of 1961, including debt-for-development and

debt-for-nature exchanges, a nongovernmental organization may invest local currencies which accrue to that organization as a result of economic assistance provided under the heading "Agency for International Development" and any interest earned on such investment may be used, including for the establishment of an endowment for the purpose for which the assistance was provided to that organization.

STOCKPILES

SEC. 530. Section 514(b)(2) of the Foreign Assistance Act of 1961 is amended by striking out "$378,000,000 for fiscal year 1991, of which amount not less than $300,000,000 shall be for stockpiles in Israel" and inserting in lieu thereof "$129,000,000 for fiscal year 1992 and $60,000,000 for fiscal year 1993".

ASSISTANCE FOR PAKISTAN

SEC. 531. Section 620E(d) of the Foreign Assistance Act of 1961 is amended by striking out "April 1, 1992" and inserting in lieu thereof "April 1, 1994".

EUROPE

SEC. 532. The authorities made available under title IV of this Act for the Export-Import Bank Act of 1945 may be used by the Bank, notwithstanding section 2(b)(2) of the Export-Import Bank Act of 1945, in connection with the purchase or lease of any product by any European country, or former republics of the Soviet Union, or any agency or national thereof.

AVAILABILITY FOR EXPENDITURE

SEC. 533. (a) In accordance with 31 U.S.C. 1557, amounts made available in Acts making appropriations for foreign assistance and related programs for the fiscal year and under the headings identified in subsection (b) shall be exempt from the provisions of subchapter IV of chapter 15 of title 31, United States Code, until September 30, 1994.

(b) Subsection (a) shall apply to funds appropriated under the following headings for the fiscal year 1986: "International Organizations and Programs" only for funds made available for the International Fund for Agricultural Development, "Agriculture, rural development, and nutrition, Development Assistance", "Population, Development Assistance", "Health, Development Assistance", "Child Survival Fund", "Education and human resources development, Development Assistance", "Energy and selected development activities, Development Assistance", "Science and Technology, Development Assistance", "American Schools and Hospitals Abroad", "Trade and Development Program", "Economic Support Fund", and "Peacekeeping Operations".

LEBANON

SEC. 534. Funds appropriated by this Act to carry out chapter 1 of part I and chapter 4 of part II of the Foreign Assistance Act of 1961 may be made available for Lebanon and may be provided in accordance with the general authorities contained in section 491 of such Act.

ENVIRONMENT AND AIDS ASSISTANCE

SEC. 535. Funds appropriated by title II of this Act that are made available for (1) activities relating to research on, and the treatment and control of, acquired immune deficiency syndrome, or (2) supporting tropical forestry and energy programs aimed at reducing emissions of greenhouse gases, may be obligated and expended notwithstanding any provision of law that restricts assistance to foreign countries.

Funds support programs authorized by the Alternative Agricultural Research and Commercialization Act of 1990 (7 U.S.C. 5901 et seq.). This Act authorizes the provision of assistance on a competitive basis to foster the development and commercialization of new nonfood, nonfeed products derived from agricultural and forestry commodities. Development of nontraditional uses for farm, ranch and forestry products provides an opportunity to improve U.S. competitiveness in foreign markets, create development and employment opportunities in rural areas, address environmental concerns and lower farm program costs. Programs are managed by the Alternative Agricultural Research and Commercialization Center. Program policy and oversight is provided by a Board which is composed of Federal and private sector scientists, producers and business experts.

Personnel.—This activity provides direction and leadership in formulating and issuing Department policy, standards, rules, and regulations relating to all personnel functions. Personnel develops and implements management plans and programs responsive to Departmental needs. In addition, operational services are provided to the Office of the Secretary, Office of the General Counsel, Office of Public Affairs, Office of Budget and Program Analysis, and those staff offices under Departmental Administration reporting to the Assistant Secretary for Administration.

Finance and management.—This activity provides Departmental leadership, development, and evaluation of programs in finance, accounting, travel, management control, Federal assistance, occupational safety and health, management and productivity improvement, metrication, audit follow up activities, and for the management and operation of the National Finance Center. The Director serves as the Department's chief financial officer, management improvement officer, and comptroller of the Working Capital Fund. Finance and Management also provides budget, accounting, and fiscal services for the Departmental staff offices, Office of the General Counsel, Office of Public Affairs, and the Office of the Secretary.

Operations.—This activity provides leadership, oversight, and policy development in the areas of real and personal property, procurement, contracts, transportation, supplies, motor vehicles, and internal energy conservation to the USDA agencies, including those in the Washington, D.C., complex. Operations also provides procurement, contracting, and other administrative support services to the Office of the Secretary, Departmental Staff Offices, and USDA agencies.

Information resources management.—This activity designs, implements, and revises systems, processes, work methods, and techniques to improve the management of information resources and the operational effectiveness of USDA. The Director serves as the Department's clearance officer for statistical reporting and information collection. This activity also provides telecommunications and ADP services to USDA agencies and staff offices, including the operation of computer centers in Fort Collins, Colorado and Kansas City, Missouri.

Advocacy and enterprise.—This activity provides overall guidance, leadership, direction, and coordination for the Department's programs for equal opportunity and civil rights, which include program delivery, compliance and equal employment opportunity, and for efforts to further participation of minority colleges and universities in Departmental programs. It provides oversight of all procurement activities to ensure maximum participation of small and disadvantaged businesses in the process, and directs and monitors agency compliance in promoting full and open competition in procurement.

Administrative law judges and judicial officer.—The administrative law judges hold hearings on new regulations and orders and on disciplinary complaints filed by the Department or on some petitions filed by private parties. The Judicial Officer serves as final decision officer in regulatory proceedings.

National communications system.—This item provides funding for USDA's proportional share of the communications system being developed as part of the National Security and Emergency Preparedness Program. Participation in the NCS is required under National Security Directive 201 of December 1985.

Under the Comprehensive Environmental Response, Compensation, and Liability Act and the Resource Conservation and Recovery Act, the Department has the responsibility to meet the same standards for storage and disposition of hazardous wastes as private businesses. Since the Department has substantial commitments under these Acts, a central fund has been established so that resources may be allocated to the Department's agencies. Allocations are made according to objective criteria.

Agricultural estimates.—The Service provides the official National and State estimates of acreage, yield, and production of crops, stocks, and value of farm commodities, and numbers of inventory values of livestock items. Data on approximately 120 crops and 45 livestock products are covered in nearly 400 reports issued each year. Detailed data are also collected on agricultural chemical use, labor, and expenditures. Data collected and published on prices paid and received by farmers are basic to computation of farm program payments.

The work under this activity is conducted through 45 State offices serving the 50 States; most of these offices are operated as joint State and Federal services. Cooperative arrangements with State agencies provide additional State and county data. Program modifications in 1993 are increases of $849,000 to offset increased costs for data collection; $2,500,000 for the pesticide data initiative; $1,000,000 to improve the area sampling frame; and $900,000 for restricted use pesticide data.

Statistical research and service.—This activity is designed to improve agricultural estimating techniques by improving sample survey designs and procedures and by testing new forecasting and estimating techniques, such as the use of satellite data.

The World Agricultural Outlook Board (WAOB) was established to provide a single focal point for the Nation's economic intelligence related to domestic and international food and agriculture.

The objectives of the WAOB are to improve the consistency, objectivity, and reliability of outlook and situation material being disseminated to the public, and to integrate and coordinate USDA domestic and international economic information assistance.

The WAOB carries out these objectives through daily market surveillance and special analyses of international and domestic agricultural developments, direct participation in the planning of research programs supporting outlook and situation activities, and coordination of all departmental activities relating to weather and climate and remote sensing. The 1993 budget includes funds to develop an automated data system for supply and demand estimates.

The Agricultural Research Service conducts research to provide the means for a safer, more economical supply of agricultural products for the Nation and to provide producers with technologies to competitively supply these products. The Service uses coordinated, interdisciplinary approaches to perform basic and applied research on soil and water conservation, plant and animal sciences, commodity conversion and delivery, human nutrition, and integrated agricultural systems. The 1993 budget proposes expanded research for the development of: advanced integrated pest management (IPM) pest control systems; effective control of infestations of whitefly; effective preservation of plant germplasm collections; new and diversified uses of agricultural products; economically derived fuels from biomass; and for support of the Secretary's initiative on human nutrition research.

Research on soil and water conservation.—Research is conducted to improve soil and water management, irrigation, and conservation practices; to protect natural resources from harmful effects of soil, air, and water pollutants and to minimize certain agricultural pollution problems; and to determine the relation of soil types and water to plant, animal, and human nutrition.

Research on plant science.—Research is conducted to increase plant productivity by improving plant varieties, developing new crop resources, and improving crop production practices, including methods to control plant diseases, nematodes, insects, and weeds. Increases proposed in 1993 will pro-

vide for research to develop advanced IPM systems, for improved chemical and non-chemical control of whitefly infestation, and for development of new technologies required for the long term preservation of appropriate plant germplasm collections.

Research on animal science.—Research is conducted to increase livestock productivity (including poultry) through improved breeding, feeding, and management practices, and to develop methods for controlling diseases, parasites, and insect pests affecting these animals.

Research on commodity conversion and delivery.—Research is conducted to develop new and improved foods, feeds, products, and processes for agricultural commodities and to improve the processing, transportation, storage, wholesaling, and retailing of products. Research is also conducted on means to ensure the safety of food and feed supplies, control insect pests of man and his belongings, and reduce the hazards to human life resulting from pesticide residues and other causes. The increases proposed in 1993 are aimed at enhancing the global competitiveness of U.S. agriculture in terms of devising new uses for agriculture-based products, including the use of agricultural waste and by-products as a source of value-added products, novel means to produce biocontrol agents as substitutes to chemicals, and research on biofuels with emphasis on high-value co-products to improve the economics of producing alcohol by fermentation.

Human nutrition research.—Research is conducted on subjects such as human nutritional requirements and the composition and nutritive value of foods, to promote optimum human health through improved nutrition. The increases proposed in 1993 will provide for the research needed to better understand nutrient, fat, and fiber interactions and functions including more precise definition of the mechanisms of nutrient and food components to reduce risk of chronic diseases.

Integration of agricultural systems.—Research is conducted to develop integrated systems for efficiently producing, processing, and marketing agricultural products, and to develop alternative agricultural systems that are less dependent upon nonrenewable resources and that are productive, efficient, and sustainable in the long term.

Repair and maintenance of facilities.—Funds are used to restore, upgrade, and maintain Federal facilities to meet OSHA and EPA requirements, provide suitable workspace for in-house research programs, and to retrofit existing structures for better energy utilization.

Contingencies.—Funds available to meet urgent needs that develop unexpectedly during the year when such needs cannot be met by redirection of resources from other projects.

Construction of facilities.—Unobligated balances are used for this purpose. Construction proposals for 1993 are included under Buildings and Facilities.

Reimbursements.—Agricultural Research Service performs program research activities and services for other USDA, Federal, and non-Federal agencies. These activities and services are paid for on a reimbursable basis.

Cooperative State Research Service participates in a nationwide system of agricultural research and education program planning and coordination between State institutions and the U.S. Department of Agriculture. It assists in maintaining cooperation among the State institutions, and between the State institutions and their Federal research partners. The Agency administers grants and payments to State institutions to supplement State and local funding for agricultural research and higher education.

Payments under the Hatch Act.—Funds under the Hatch Act are allocated on a formula basis to agricultural experiment stations of the land-grant colleges in the 50 States, the District of Columbia, Puerto Rico, Guam, the Virgin Islands, American Samoa, Micronesia, and Northern Mariana Islands.

Cooperative forestry research.—These funds are allocated by formula to land-grant colleges or agricultural experiment stations in the 50 States, Puerto Rico, Guam, the Virgin Islands, and other State-supported colleges and universities having a forestry school and offering graduate training in forestry sciences.

Payments to 1890 colleges and Tuskegee University.—Funds allocated on a formula basis support agricultural research at the 1890 land-grant colleges, including Tuskegee University.

Special research grants.—This program addresses research areas of national interest. A grant program for water quality is the university research component of a coordinated Federal initiative in water quality and will provide funds to focus on agriculture-related water quality concerns in the Midwest Corn Belt and other regions. Funding is proposed for related grants in pesticide impact assessment and integrated pest management/biological control. A grant program for global change is requested for research at universities as part of a coordinated Federal initiative. Funding proposed for pesticide clearance and minor use animal drugs (IR-4 program) will address the growing need for registration of safe pesticides and drugs for minor crops and animals. Funding is proposed for the National Biological Impact Assessment Program and sustainable agriculture research and education.

National research initiative competitive grants.—Funding is being proposed for the National Initiative for Research on Agriculture, Food, and the Environment (NRI). Research scientists throughout the U.S. scientific community compete for funding under this program. These grants support research in plant and animal systems; natural resources and the environment; nutrition, food quality, and health; markets, trade and policy; and processes antecedent to adding value and developing new products. This Initiative includes funding for a plant genome mapping program for which the Agricultural Research Service will serve as lead agency. Global change research being carried out through the NRI is part of a government-wide program developed by the Committee on Earth and Environmental Sciences.

Animal health and disease research.—Funds, distributed by formula, support livestock and poultry disease research in colleges of veterinary medicine and in eligible agricultural experiment stations. No funding is proposed for 1993.

Federal administration.—A coordinating and review staff assists in maintaining cooperation within and among the States, and between the States and their Federal research partners. This staff also administers research and education grants and payments to States. Federal administration is funded from a combination of program set-asides from formula and grant programs and from direct appropriation for administration. Funding is proposed for a capacity building program at the 1890 institutions as part of a USDA initiative to strengthen these institutions.

Higher education.—Funding is proposed for graduate fellowships grants and competitive challenge grants.

Buildings and facilities.—Funds support the acquisition of land, construction, repair, improvement, extension, alteration, and purchase of fixed equipment or facilities and grants to States and other eligible recipients as necessary to carry out the agricultural research, extension, and teaching programs of the Department of Agriculture. Funding is provided in a separate account in 1992. No funding is proposed for 1993.

Reimbursable program.—Funds support basic and applied agriculture research and activities performed for other USDA, Federal, and non-Federal agencies.

The Extension Service-USDA, States, and localities comprise the Cooperative Extension System. This nationwide system provides out-of-school, applied education, information, and technology transfer to the public on national issues and concerns.

Federal funds are distributed primarily by formula to States, Puerto Rico, Guam, the Virgin Islands, Micronesia, Northern Marianas and American Samoa, on the basis of population and other factors. Funds are used primarily for the employment of State, area, and county extension workers and paraprofessionals who work with individuals, families, community organizations, marketing concerns, and others by providing educational programs in the application of improved methods for agricultural production, marketing, nutrition, family living, youth programs, and community development. Most of these funds are matched by the States and provide the Federal share of costs associated with program activities specifically undertaken with these matched funds.

Initiatives proposed for 1993 will provide resources to assist Extension professionals to address priority National concerns in nutrition education, water quality, youth-at-risk, and food safety. Increased funding is proposed for extension programs in nutrition education as part of an initiative to assist children, low-income adults, and others at nutritional risk. Increased funding for water quality education is part of a coordinated Federal initiative and will allow Extension to assist agricultural producers and others adopt new technologies to minimize adverse impacts on water resources. Funding for youth-at-risk programs will be developed to assist communities and families in the areas of high-risk youth and school-age children. Food safety will target education programs to producers and cooperative efforts with other Federal Agencies. Increases are proposed for the 1890 institutions and Tuskegee University to strengthen the capabilities of those institutions to address priority issues. Funds are also proposed for the Integrated Pest Management Program. Funds are requested to address farm safety and rural health issues for farmers and persons in farm-related occupations.

The Extension Service provides leadership and assistance to States, Puerto Rico, Guam, the Virgin Islands, the District of Columbia, American Samoa, Northern Marianas and Micronesia, in developing extension programs, improving teaching methods, efficient use of available resources, evaluation of programs, and administrative services. These responsibilities are funded from a combination of program set-asides for administering payments to States and from direct appropriations for the Extension Service-USDA.

The primary purpose of the National Agricultural Library (NAL) is to acquire, preserve, and disseminate a comprehensive collection of reliable information in all phases of the agricultural and allied sciences.

Agricultural information and library services.—The NAL provides a variety of information products and services through: (1) the administration of a unique collection of books, journals, and other information materials about food and agriculture to ensure accessibility to their contents; (2) the development and maintenance of cooperative efforts in the library and related information areas, with other Federal agencies and with educational institutions in each State; and (3) an active program of information dissemination. Increases are proposed for 1993 for additional networking to improve library services, and to provide funds for nutrition education.

Repairs and maintenance of facilities.—These funds are used for maintaining the library building.

The major objectives of the Animal and Plant Health Inspection Service are to protect the animal and plant resources of the Nation from destructive pests and diseases. This mission is carried out under the five major areas of activity, as follows:

Pest and disease exclusion.—The agency conducts inspection and quarantine activities at U.S. ports-of-entry to prevent the introduction of exotic animal and plant diseases and pests. APHIS develops and conducts preclearance programs to ensure that agricultural products destined for U.S. ports-of-entry do not present a risk to U.S. agriculture. APHIS engages in cooperative programs in foreign countries to control pests of imminent concern to the United States. APHIS also certifies plants and plant products for export and regulates imports and exports of designated endangered plant species. User fees have been implanted to recover the cost of certain agricultural quarantine inspection services.

Plant and animal health monitoring.—The Agency conducts programs to assess animal and plant health and to detect endemic and exotic diseases and pests. The plant and animal health monitoring programs are primarily cooperative efforts of the Federal and State governments, and industry. The Agency also carries out surveys in cooperation with the States to detect harmful plant and animal pests and diseases and to determine if there is a need for pest eradication programs.

Pest and disease management programs.—The Agency carries out programs to control and eradicate infestations and animal diseases that threaten the United States; to reduce agricultural losses caused by predatory animals, birds, and rodents; to provide technical assistance to States, counties, farmer or rancher groups, and foundations; and to ensure compliance with interstate movement and disease control regulations. Interstate shipments of plants, livestock, and related materials are monitored and regulated to prevent the spread of disease. APHIS protects agriculture from detrimental animal predators through identification, demonstration, and application of the most appropriate methods of control.

Animal care.—The Agency conducts regulatory activities which ensure the humane care and handling of animals used in research, exhibition, or the wholesale pet trade. The Agency is also responsible for administering the Horse Protection Act, which prohibits the showing, selling, or exhibition of sore horses.

Scientific and technical services.—APHIS develops methods to control animals and pests that are detrimental to agriculture, other wildlife, and public safety. The agency regulates genetic research to guard against the release of potentially harmful organisms into the environment. APHIS also conducts veterinary diagnostic laboratory activities and biologic regulatory enforcement to ensure that the products developed for combatting disease are potent, safe, and pure. It also provides and directs technology development in coordination with other groups in APHIS and Plant Protection and Quarantine (PPQ) officials to support PPQ programs of the Agency and its cooperators at the State, national, and international levels.

The following services are financed by fees and miscellaneous contributions advanced by importers, manufacturers, States, organizations, individuals, and others:

Expenses and refunds, inspection, certification, and quarantine of animal products.—This includes inspection of animal hides and other animal materials to be exported. Fees are paid in advance for services to be rendered (7 U.S.C. 1621-1627) (21 U.S.C. 111).

Expenses, feed, and attendants for animals in quarantine.—All costs associated with the quarantine of animals are paid from fees advanced by importers (21 U.S.C. 102).

Miscellaneous contributed funds.—Funds are received from States, local organizations, individuals, and others and are available for plant and animal quarantine inspection and cooperative plant and animal disease and pest control activities (7 U.S.C. 450b, 2220). Commencing in 1979, fees were collected for the importation of commercial birds.

The major objectives of the Food Safety and Inspection Service are to ensure that meat and poultry products are wholesome, unadulterated, and properly labeled and packaged, as required by the Federal Meat Inspection Act and the Poultry Products Inspection Act.

The Meat and Poultry Inspection program of the Food Safety and Inspection Service provides inplant inspection of all domestic plants preparing meat or poultry products for sale or distribution; reviews foreign inspection systems and establishments that prepare meat or poultry products for export to the United States; and provides technical and financial assistance to States which maintain meat and poultry inspection programs.

The Federal Grain Inspection Service (FGIS) establishes official United States standards for grain, promotes the uniform application thereof by official inspection personnel, provides for an official inspection system for grain, and regulates the weighing and certification of the weight of grain shipped in interstate or foreign commerce as authorized by the U.S. Grain Standards Act (USGSA), as amended, and the regulations thereof, and the Agricultural Marketing Act of 1946 (AMA).

Standardization activities include establishing and updating U.S. grain standards, research, and developing and improving methods to ensure the accurate and uniform application of the standards.

The compliance activities ensure the accurate and uniform application of the USGSA and applicable provisions of the AMA. The compliance program functions include: (1) evaluating alleged violations and initiating preliminary investigations; (2) initiating the implementation of corrective actions; (3) conducting management and technical reviews; (4) administering the designations and delegations of State and private agencies to perform official functions and monitoring the performance of the agencies; (5) identifying and, where appropriate, waiving and monitoring conflicts of interest; (6) licensing personnel of delegated States and designated agencies; (7) registering persons/firms engaged in the business of buying grain for sale in foreign commerce, and in the business of handling, weighing, or transporting of grain for sale in foreign commerce; (8) responding to audits of FGIS programs; and (9) reviewing and, when appropriate, approving official agencies' fee schedules.

The International Monitoring Staff briefs foreign buyers, assesses foreign inspection and weighing techniques, and responds to foreign quality and quantity complaints.

An advisory committee consisting of members from the grain industry exists to advise the Agency regarding efficient and economical implementation of the USGSA.

The Grain Quality Improvement Act of 1986 was enacted on November 10, 1986, to improve the quality of U.S. grain by prohibiting the introduction and reintroduction of dockage and foreign material to grain.

The Federal Grain Inspection Service provides a uniform system for the inspection and weighing of grain. Services provided under this system are financed through a fee supported revolving fund. This authority has been extended through September 1993.

Fee supported programs include direct services, supervision activities and administrative functions. Direct services include official grain inspection and weighing by FGIS employees at certain export ports as well as the inspection of U.S. grain shipped through Canada. FGIS supervises the inspection and weighing activities performed by its own employees. The agency also oversees the inspection and weighing of grain performed by employees of 8 delegated States and 77 designated State and private agencies. FGIS provides an appeal service of original grain inspections and a registration system for grain exporting firms. Through support from the Association of American Railroads and user fees, FGIS conducts a railroad track scale testing program. In addition, the agency provides grading services, on request, for rice and grain related products under the authority of the Agricultural Marketing Act of 1946 (AMA).

The Agricultural Cooperative Service provides the Secretary with research relating to agricultural cooperatives. The agency provides cooperatives with research studies on economic, financial, organizational, managerial, legal, social, and policy related issues that affect cooperatives. Data on membership, business volume, and financial condition are collected to detect changes in the structure, operation, and growth trends of cooperatives.

User fees are proposed for technical assistance provided to larger cooperatives with $1.0 million or more in annual revenues.

Agricultural Marketing Service activities assist producers and handlers of agricultural commodities by providing a variety of marketing services. These services continue to become more complex as the volume of agricultural commodities increases, as a greater number of new processed commodities are developed, and as the agricultural market structure undergoes extensive changes. Marketing changes include increased concentration in food retailing, direct buying, decentralization of processing, growth of interregional competition, vertical integration, and contract farming. The individual activities include:

Market news service.—The market news program provides the agricultural community with information pertaining to the movement of agricultural products. This nationwide service provides daily reports on the supply, demand, and price of over 700 commodities throughout the country.

Inspection, grading and standardization.—Nationally uniform standards of quality for agricultural products are established and applied to specific lots of products to: promote confidence between buyers and sellers; reduce hazards in marketing due to misunderstandings and disputes arising from the use of nonstandard descriptions; and encourage better preparation of uniform quality products for market. Grading services are provided for cotton and domestic and imported tobacco.

Continuous in-plant inspection of all plants manufacturing liquid, frozen, or dried egg products is provided, with quarterly inspection of egg handlers and hatcheries to ensure the proper disposition of shell eggs unfit for human consumption. Imported egg products are controlled to make certain that the inspection systems in exporting countries have standards equal to those of the United States.

Market protection and promotion.—This program consists of: (1) the research and promotion programs which are designed to improve the competitive position and expand markets for cotton, eggs and egg products, honey, pork, beef, milk and dairy products, mohair, potatoes, and watermelons; (2) the Federal Seed Act; and (3) the administration of the Capper-Volstead Act and the Agricultural Fair Practices Act.

The Agricultural Promotion Programs Act of 1990 provides legislative authority for the establishment of research and promotion programs for pecans, mushrooms, limes, and soybeans, and for a fluid milk promotion program. An order implementing the soybean research and promotion program was issued July 1991 and the collection of assessments began September 1991.

Federal seed inspectors conduct tests on seed samples to help ensure truthful labeling of agricultural and vegetable seeds sold in interstate commerce.

The Capper-Volstead Act and the Agricultural Fair Practices Act protect producers against discriminatory practices by handlers, permit producers to engage in cooperative efforts, and ensure that such cooperatives do not engage in practices that monopolize or restrain trade.

Wholesale market development.—This program is designed to enhance the marketing of agricultural commodities in the United States by conducting research into more efficient marketing methods for agricultural commodities and by providing technical assistance to urban areas interested in improving their food distribution facilities.

Transportation Services.—The activities are designed to ensure that the Nation's transportation systems will adequately serve the needs of agriculture and rural areas of the United States.

License fees are deposited in this special fund and are used to meet the costs of administering the Perishable Agricultural Commodities and the Produce Agency Acts (7 U.S.C. 491–497, 499a–499s).

The Acts are intended to ensure equitable treatment to farmers and others in the marketing of fresh and frozen fruits and vegetables. Commission merchants, dealers, and brokers handling these products in interstate and foreign commerce are licensed. Complaints of violations are investigated and violations dealt with by (a) informal agreements between the two parties, (b) formal decisions involving payment of reparation awards, and/or (c) suspension or revocation of license and/or publication of the facts.

A 1984 amendment to the Perishable Agricultural Commodities Act requires traders to have trust assets on hand to meet their obligations to fruit and vegetable suppliers. To preserve their trust and establish their rights ahead of other creditors, unpaid suppliers file notice with both the Department and their debtors that payment is due.

Under section 32 of the act of August 24, 1935, as amended (7 U.S.C. 612c), an amount equal to 30 percent of customs receipts collected during each calendar year is automatically appropriated for expanding outlets for nonbasic commodities. An amount equal to 30 percent of receipts collected on fishery products is transferred to the Department of Commerce. Most of the funds are transferred to the Food and Nutrition Service and are used to purchase commodities under section 6 of the National School Lunch Act and other authorities specified in the child nutrition appropriation. If unforeseen commodity surpluses should develop, unobligated reserve balances are available for surplus removal.

Expenses and refunds, inspection and grading of farm products.—The commodity inspection and grading programs provide grading, examination, and certification services for a wide variety of fresh and processed food commodities using federally approved grade standards and purchase specifications. Commodities graded include poultry, livestock, meat, dairy products, and fresh and processed fruits and vegetables. These programs use official grade standards which reflect the relative quality of a particular food commodity based on laboratory testing and characteristics such as taste, color, weight, and physical condition. Producers voluntarily request grading and certification services which are provided on a fee for service basis.

Note.—The administration fund totals are comprised of 42 separate independent order accounts in 1991. The Marketing Service fund totals are comprised of 40 separate independent order accounts in 1991.

The Secretary of Agriculture is authorized by the Agricultural Marketing Agreement Act of 1937, as amended—under certain conditions—to issue Federal milk marketing orders establishing minimum prices which handlers are required to pay for milk purchased from producers.

Market administrators are appointed by the Secretary and are responsible for carrying out the terms of specific marketing orders. Their operating expenses, partly financed by assessments on regulated handlers and partly by deductions from producers, are reported in these schedules. These funds are collected locally, deposited in local banks, and disbursed directly by the market administrator.

Expenses of local offices are met from an administrative fund and a marketing service fund, which are prescribed in each order. The administrative fund is derived from prorated handler assessments. The marketing service fund of the individual order disseminates market information to producers who are not members of a qualified cooperative. It also provides for the verification of the weights, sampling, and testing of milk from these producers. The cost of these services is borne by such producers.

The maximum rates for administrative assessment and for marketing services are set forth in each order and adjustments below these rates are made from time to time upon recommendations by the market administrator and upon approval of the Agricultural Marketing Service to provide reserves at about a 6-month operating level. Upon termination of any order, the statute provides for distributing the proceeds from net assets pro rata to contributing handlers or producers, as the case may be.

The goal of this program is to ensure the integrity of the livestock, meat, and poultry markets and the marketplace in order to protect producers against unfair, deceptive, or discriminatory practices as well as those that are predatory or monopolistic in nature. Consumers and members of the livestock, poultry, and meat industries are also protected against unfair business practices in the marketing of livestock, meat and poultry, and from restrictions on competition which could unduly affect prices. The Agency also carries out the Secretary's responsibilities under Section 1324 of the Food Security Act of 1985 covering "central filing systems" established by States for pre-notification of security interests against farm products.

Technical assistance.—Technical assistance is provided through 2,955 conservation districts or special districts to land users and decisionmakers, including individual landowners and operators, community groups, units of government, Indian tribes, and others for the planning of conservation programs and installation of needed conservation systems on the land, including design, layout, installation, and consultation services.

Combinations of needed soil and water conservation systems are planned in relation to each other to achieve well-balanced conservation programs. Technicians of the Soil Conservation Service explain the various soil conditions, develop alternative uses and treatments, help to evaluate the costs and returns of conservation work, and furnish onsite assistance to farmers, ranchers, and others in applying the needed treatments. About 70 percent of the total annual investment in conservation practices applied through the conservation technical assistance program is made by private landusers. During 1993, personnel funded within this account will continue to provide technical assistance to implement the Conservation Reserve Program and the highly erodible land and wetland conservation provisions of the Food Security Act of 1985 as amended by the Food, Agriculture, Conservation and Trade Act of 1990.

MAIN WORKLOAD FACTORS

	1991 actual	*1992 est.*	*1993 est.*
Decisionmakers receiving technical services	1,245,256	1,250,000	1,260,000
Acres treated with conservation technical assistance	59,698,287	62,050,000	62,900,000
Tons of soil erosion reduced	282,553,920	293,700,000	297,700,000

Also included in this item are the inventory and monitoring, resource appraisal, and program development activities carried out by the Service. Resource inventories are conducted to provide soil, water, and related resource data for evaluating land-use changes and trends; and for guidance in the development and implementation of Federal, State, and local resource conservation programs. Resource appraisal and program development provides for periodic reports to the public and Congress as required by the Soil and Water Resources Conservation Act of 1977 as amended.

Soil surveys.—Soil surveys and investigations are made of the Nation's soil resources, with interpretations and publications that provide physical land facts needed for program development, resource conservation planning, installation of planned practices, and for use by other Federal, State, and local agencies in making land-use decisions. National leadership is provided for digitizing soil surveys in cooperation with States, and other users of soil survey data.

Acres mapped annually	37,509,502	32,400,000	32,400,000
Soil surveys ready for publication (number)	70	60	60

Snow survey water forecasting.—Water supply forecasts prepared from snow surveys in western states are used in making efficient seasonal use of water for irrigation, flood control, fish and wildlife, recreation, power generation, municipal and industrial water supply, and water quality management.

Operation of plant materials centers.—The selection and evaluation of plant materials are made at 25 plant materials centers through field trials to determine their suitability for erosion control, conservation, and other environmental improvements.

The Department makes surveys of proposed small watershed project and work plans are prepared in cooperation with local sponsors. These plans outline the soil and water management problems in the watershed, the steps that have been or are authorized to be taken to alleviate these problems, the proposed works of improvement to be installed, the estimated benefits and costs, cost sharing, operation and maintenance arrangements, and other information necessary to justify Federal participation in project development.

These programs provide for cooperation between the Federal Government and States and their political subdivisions to reduce damage from floodwater, sediment, and erosion, for the conservation, development, utilization, and disposal of water, and for the conservation and proper utilization of land.

Watershed operations authorized by Public Law 534.—The Department cooperates with soil conservation districts and other local organizations in planning and installing works of improvement for flood prevention in 11 watersheds authorized by the Flood Control Act of 1944. The Federal Government shares the cost of works of improvement for flood prevention, agricultural water management, recreation, and fish and wildlife development.

Within the 11 authorized projects, 403 subwatershed areas have been identified for planning purposes. Installation progress in these subwatersheds is as follows:

MAIN WORKLOAD FACTORS

	1991 actual	*1992 est.*	*1993 est.*
Projects in preconstruction, end of year	19	19	10
Projects in construction, start of year	91	91	100
Projects in preconstruction and construction, end of year	110	110	110
Projects continuing land treatment, end of year	65	65	65
Projects completed, end of year	160	160	160
Projects not started, end of year	68	68	68
Total subwatershed projects	403	403	403

Emergency watershed protection operations.—This program authorizes the Secretary of Agriculture to undertake such emergency measures for runoff retardation and soil erosion prevention as may be needed to safeguard life and property from floods and the products of erosion on any watershed whenever natural elements or forces cause a sudden impairment of that watershed. An emergency is considered to exist when a watershed is suddenly impaired by flood, fire, wind, earthquake, or other natural cause and consequently life and property are endangered by floodwater, erosion, or sediment discharge. The emergency area need not be declared a national disaster area to be eligible for emergency watershed protection. Emergency watershed protection is applicable to small scale, localized disasters as well as large scale disasters. State environmental, natural resource, fish and game, and other agencies participate in planning and coordinating emergency work.

Small watershed operations authorized by Public Law 566.—The Department provides technical and financial assistance to local organizations to install measures for watershed protection, flood prevention, agricultural water management, recreation, and fish and wildlife enhancement.

Watershed work plans are prepared by sponsoring local organizations with the Department's assistance or through State and local resources. After work plans are approved by the Department or Congress (projects where the estimated Federal contribution will exceed $5 million require congressional approval), technical services and financial assistance are provided for specific works of improvements.

The following tabulation shows the status of Public Law 566 projects:

MAIN WORKLOAD FACTORS

Status of projects approved for operations:	*1991 actual*	*1992 est.*	*1993 est.*
Projects in preconstruction	240	250	269
Projects under construction, start of year	346	328	340
New construction starts	2	20	1
Projects completed during year	13	10	5
Projects land treatment continuing	36	42	45
Subtotal projects requiring funds	637	650	660
Projects not requiring funds	166	170	170
Projects completed in prior years	720	733	743
Total approved projects	1,523	1,553	1,573

Loan services.—Loans are made to local sponsoring organizations to finance the local cost of installing works of improvement in Public Law 534 and approved Public Law 566 watershed projects. Repayment with interest is required within 50 years after the principal benefits of improvements first become available. Loans are made from funds available for this purpose from the Agricultural Credit Insurance Fund of the Farmers Home Administration. Loan services related to processing and making loans are financed from this appropriation.

The 1993 budget proposes no new Agricultural Credit Insurance Fund loans for watershed projects.

This program provides cost-share and technical services to participating landowners or operators in the Great Plains area in the development and installation of long-term conservation plans and practices for their land under contracts entered into in prior years. It is a voluntary program in 556 designated counties of 10 Great Plains States. Contracts with individual landowners range in time from 3 to 10 years.

MAIN WORKLOAD FACTORS

Program participants:	*1991 actual*	*1992 est.*	*1993 est.*
Number of new contracts during year	1,044	1,190	1,040
Number of contracts serviced during year	6,487	6,970	7,310
Number of acres under contracts	17,597,400	19,067,400	20,087,400

As of September 30, 1991, there were 5,780 active contracts on hand. Co-landowners or operators finance the entire cost of installing recurring management-type practices and pay a specified part of the cost-shared practices installed on their land. Program regulations provide that cost-share rates offered in any contract shall not exceed 80 percent of the cost of installing eligible practices within the designated county. There is a cost-sharing limitation of $35 thousand for any contract.

Under this program, the Department assists States, local units of government, groups and individuals in developing area plans for resource conservation and development (RC&D). It will play a supportive role in the Department's Rural Revitalization Program.

RC&D areas are provided technical and financial assistance to help States and local units of government prepare plans for resource development and economic improvement and to plan and install community-type conservation projects or measures. Financial contributions, loans, and other Federal assistance are used to help carry out measures specified in RC&D area plans. Loans have previously been made through the Farmers Home Administration to qualified local organizations to help finance their share of the costs of installing the measures.

The RC&D program would be continued in 1993. Technical assistance would be provided through RC&D coordinators, but their would be no RC&D funded cost-sharing, and no new Farmers Home Administration Loans from the Agricultural Credit Insurance Fund.

The following tabulation shows the status of RC&D areas authorized to receive technical and financial assistance.

This account includes funds to cover expenses of programs administered by, and functions assigned to, the Service. The funds consist of transfers from the Commodity Credit Corporation (CCC), user fees, and miscellaneous advances from other sources. This is a consolidated account for administrative expenses of national, commodity, State, and county offices.

Program formulation and appraisal.—The supply adjustment, conservation, and commodity support programs, and the management and merchandising of commodities acquired under the support program, have a tremendous impact on the national and (to a lesser extent) the international economy. This activity provides for constant review of the effectiveness of these programs. It also provides for the analysis of data to formulate more effective programs.

Operation of supply adjustment, conservation, and price support programs.—This activity includes all functions dealing with the administration of programs carried out through the farmer committee system, including: (a) developing program regulations and procedures; (b) holding meetings with employees and producers to discuss new programs or changes in existing programs; (c) collecting and compiling basic data for individual farms; (d) establishing individual farm allotments, bases, and yields; (e) notifying producers of established allotments, bases, and yields; (f) determining farm marketing quotas; (g) handling appeals; (h) conducting referendums and certifying results; (i) accepting farmer certifications and checking compliance; (j) accepting producer applications for participation in commodity price stabilizing programs; (k) issuing marketing cards so that production from the allotted acreage can be marketed without penalty; (l) processing producer requests for conservation cost-sharing and issuing conservation reserve rental payments; (m) processing commodity loan and storage facility loan documents and issuing checks; (n) processing disaster, deficiency, and diversion payments and issuing checks and commodity certificates; and (o) certifying payment eligibility and monitoring payment limitations.

Inventory management and merchandising.—This activity includes: (a) overall management of CCC-owned commodities; (b) purchasing commodities; (c) donating commodities; (d) selling commodities; (e) processing the redemption of commodity certificates for CCC inventory; and (f) accounting for loans and commodities.

Warehouse examination.—This activity provides for the examination of warehouses licensed under the U.S. Warehouse Act and non-licensed warehouses storing CCC-owned or pledged commodities. ASCS examiners perform periodic examinations of the facilities and the warehouse records to ensure protection of depositors against potential losses of the stored commodities and to ensure compliance with the U.S. Warehouse Act and any CCC storage agreements.

Automation.—Most farm and producer data are currently maintained on ASCS county office computers and are automatically accessed, used, and updated while servicing producers. This platform is reaching the end of its system life. The agency is in the process of identifying technologies that can be used to extend the system life of this platform until updated technology can be acquired and implemented.

ASCS is in the process of identifying agency needs and the technologies required to meet those needs into the early 2000's. A separate staff has been organized to coordinate this effort and manage a series of long-term technology and telecommunications acquisitions that will replace the current technology and support our long-term operating and management objectives. This effort has been titled the "System Technology and Telecommunications Enhancement Program (STEP)." Acquisitions under this program will be conducted within the guidelines of GSA's Trail Boss Program. Proposed ADP equipment acquisitions will occur after 1993 and will be funded under the statutory authority of the Commodity Credit Corporation.

This experimental Rural Clean Water Program, authorized by Public Law 96–108 and Public Law 96–528, is a cooperative endeavor among farmers, various USDA agencies, and other organizations to develop and test means of controlling agricultural nonpoint source water pollution in rural areas.

Recommended project areas were developed by local and State committees and approved by the Secretary of Agriculture in consultation with the Administrator of the Environmental Protection Agency. Full funding has been provided in previous budgets for all approved projects.

The 1993 budget requires no additional funding for implementing this program.

The primary objectives of the program are to conserve soil and water resources. Along with annual agreements, cost sharing is authorized for long-term agreements of 3–10 years.

The program is administered by ASC county committees, with review and approval by State ASC committees and the Secretary. Technical assistance is provided by the Soil Conservation Service and the Forest Service.

The 1992 program level of $194,435 thousand will be allocated to States based on the highest priority soil and water resource problems, and is expected to serve 9.0 million acres. Practices are expected to prevent approximately 27.9 million tons of soil erosion and save 549,000 acre-feet of water.

The 1993 budget proposes funding for activities consistent with the Government-wide water quality initiative as well as practices that help solve soil and water conservation problems identified in State and county ACP plans. The 1993 budget also includes $10 million for funding water quality protection practices on eligible lands to meet water quality standards or goals.

COLORADO RIVER BASIN SALINITY CONTROL PROGRAM

For necessary expenses for carrying out a voluntary cooperative salinity control program pursuant to section 202(c) of title II of the Colorado River Basin Salinity Control Act, as amended (43 U.S.C. 1592(c)), to be used to reduce salinity in the Colorado River and to enhance the supply and quality of water available for use in the United States and the Republic of Mexico, $14,783,000, to be used for investigations and surveys, for technical assistance in developing conservation practices and in the preparation of salinity control plans, for the establishment of on-farm irrigation management systems, including related lateral improvement measures, for making cost-share payments to agricultural landowners and operators, Indian tribes, irrigation districts and associations, local governmental and nongovernmental entities, and other landowners to aid them in carrying out approved conservation practices as determined and recommended by the county ASC committees, approved by the State ASC committees and the Secretary, and for associated costs of program planning, information and education, and program monitoring and evaluation: *Provided,* That the Soil Conservation Service shall provide technical assistance and the Agricultural Stabilization and Conservation Service shall provide administrative services for the program, including but not limited to, the negotiation and administration of agreements and the disbursement of payments: *Provided further,* That such program shall be coordinated with the regular Agricultural Conservation Program and with research programs of other agencies. *(Agriculture, Rural Development, Food and Drug Administration, and Related Agencies Appropriations Act, 1992.)*

This program carries out the purposes of section 202(c) of title II of the Colorado River Basin Salinity Control Act (43 U.S.C. 1592(c)), as amended, by providing cost-share assistance to landowners and others in the Colorado River Basin. The main objective is to enhance the supply and quality of water in the Colorado River for delivery to downstream users in the U.S. and Mexico.

Practices are recommended by the ASC county committees and approved by the State committees and the Secretary of Agriculture. Technical assistance is provided by the Soil Conservation Service. Education and information activities are provided by the Extension Service.

The 1992 program will focus on eight project areas in Colorado, Utah, and Wyoming.

The 1993 budget will provide financial assistance in promoting the Government-wide water quality initiative. The funding level of $14.8 million will fund eight existing projects and three additional projects.

Under this program, 30 percent of ASCS cost-share funds will be reimbursed to the U.S. Treasury by the Colorado River Basin States.

The Conservation Reserve Program (CRP) was mandated by sections 1231-1244 of the Food Security Act of 1985 (Public Law 99-198), as amended by sections 1411-1499 of the Food, Agriculture, Conservation, and Trade Act of 1990 (Public Law 101-624), to establish permanent cover on highly erodible cropland and on cropland posing environmental threats. The primary objectives of the CRP are to help farmers control critical soil erosion that occurs on about a third of America's cropland and to decrease production of some surplus agricultural commodities.

The CRP is authorized in all 50 States, Puerto Rico, and the Virgin Islands, on all croplands meeting the eligibility criteria of eroding at three times the soil loss tolerance or higher, or twice the soil loss tolerance with serious gully erosion or with an erosion predominance of 66⅔ percent of the field if planted to grass or an erosion predominance of 33⅓ percent if the area is planted to trees. In addition to cropland in areas adjacent to lakes and streams that can be devoted to filter strips, and cropland subject to overflow and suffering from scour erosion, eligible land may include shelterbelts, windbreaks, cropland contributing to water quality problems, and other lands posing environmental threats. Also eligible for the CRP are water quality impaired areas that do not meet the highly erodible land (HEL) criteria, such as the Chesapeake Bay, Great Lakes, and Long Island Sound watershed regions.

The program is administered through the Commodity Credit Corporation (CCC) by State and local ASC committees working under the general direction of ASCS. Technical assistance is provided by the Soil Conservation Service, the Forest Service, the Cooperative Extension Service, and others.

As a component of technical assistance provided to producers, the Federal Government will pay fair and reasonable easement overhead costs on useful life easements for land within a State-approved wellhead protection area that requires a useful life easement, and on land established to certain priority practices.

Under the Food Security Act, as amended by Public Law 101-624, authority is provided to enter into CRP contracts through the 1995 crop year. Appropriations needed to make annual payments on 10- to 15-year contracts and for useful life easements will be requested through 2011.

From program inception in 1986 through 1991, approximately 35.5 million acres were enrolled. During 1992, a signup will be held to enroll an estimated 1.1 million acres of highly erodible and environmentally sensitive cropland, bringing total enrollment to approximately 36.6 million acres. The signup is expected to enroll crop year 1993 acres.

The 1993 program is expected to enroll approximately 400 thousand additional acres of highly erodible and environmentally sensitive cropland. These 1994-crop acres, together with acres enrolled through 1992, would bring total enrollment to approximately 37 million acres.

The appropriation requested for 1993 would be used for annual rental payments due on all contracts, for cost-sharing assistance on 1993 and prior crop years' contracts, and for 1993 technical assistance payments.

The Wetlands Reserve Program is authorized by Title XIV, Section 1438 of the Food, Agriculture, Conservation, and Trade Act of 1990 (P.L. 101-624). The primary objectives of the program are to preserve and restore wetlands, improve wildlife habitat, and protect migratory waterfowl.

The Secretary of Agriculture, through designated ASCS county offices, uses program funds to enter into contracts with landowners that operate farmed or converted wetlands, farmed wetlands, or prior converted wetlands and adjoining land or riparian corridors. The contracts are permanent easements or easements of thirty years or the maximum allowable under State law. Technical assistance is provided by the Soil Conservation Service and Fish and Wildlife Service.

The 1993 budget will provide funding for enrolling an estimated 200,000 acres. The President's Budget recommends total enrollment through 1995 of 1 million acres. Program participants will receive payments for wetlands easements, either in a lump sum or over a period of 5 to 20 years for permanent easements, or over a period of 5 to 20 years for wetlands easements which are not permanent but are for 30 years or the maximum duration allowed under applicable State law. Compensation will be in cash as specified in the contract, but not to exceed the fair market value of the land. The program provides for cost-share assistance to landowners for carrying out the establishment of conservation measures and practices. The program cost-shares 50 percent to 75 percent of eligible costs of an easement which is not permanent, and 75 percent to 100 percent of eligible costs of a permanent easement.

The objectives of the Water Bank Program are to conserve water; preserve, maintain, and improve the Nation's wetlands; increase waterfowl habitat in migratory waterfowl nesting, breeding, and feeding areas in the United States; and secure recreational and environmental benefits for the Nation. The program was authorized by the Water Bank Act of 1970, as amended by Public Law 96-182, approved January 2, 1980.

The Secretary of Agriculture, through designated ASCS county offices, uses program funds to enter into 10-year agreements with landowners and operators for the conservation of specified wetlands. Provisions exist to renew agreements for additional periods, to make annual payments on agreements, and under certain conditions to increase payment rates in the fifth year of a contract or at the time of renewal.

In 1993, the Administration proposes to allow the purchase of conservation easements from Water Bank Program participants. A one-time payment would be made to Water Bank Program participants in exchange for easements on wetlands or adjacent lands.

This proposal would enable the Department to operate a dual program and to assess the costs of and producer interest in easements while ensuring that the Nation's wetlands continue to be preserved. Participants could choose either option within the total program level proposed for 1993.

This program was authorized by the Agricultural Credit Act of 1978 (16 U.S.C. 2201–05). It provides funds for sharing the cost of emergency measures to deal with cases of severe damage to farms and rangelands resulting from natural disasters.

Under the 1991 program, cost-sharing assistance was provided in 36 States to treat farmlands damaged by floods, tornadoes, hurricanes, and drought. The 1992 program is expected to rehabilitate approximately 748,000 acres of farmland damaged by natural disaster.

The 1993 budget proposes no funding for this program.

The Dairy Indemnity Program was authorized under 78 Stat. 508 in 1964, and has been extended through September 30, 1995, by the Food, Agriculture, Conservation, and Trade Act of 1990 (Public Law 101–624). Payments are made to farmers and manufacturers who are directed to remove their milk or milk products from commercial markets because they contain residues of: chemicals that have been registered and approved for use by the Federal Government; other chemicals; nuclear radiation; or nuclear fallout. The authority also provides that indemnification may be paid for cows producing such milk.

In 1992, an estimated $100 thousand will be paid to producers and manufacturers who file claims under the program.

Due to the emergency nature of this program, funding is requested as needs arise. Since sufficient carryover funds are available to operate a program in a normal year, the 1993 budget requests no additional funding for this program.

This program was authorized by the Cooperative Forestry Assistance Act of 1978 (16 U.S.C. 2101). The objectives of the program are to bring private, nonindustrial forest land under intensified management, to increase timber production, to ensure adequate supplies of timber products, and to enhance other forest resources.

The Forestry Incentives Program shares up to 65 percent of the cost of tree planting and timberstand improvement. The percentage cost-shared depends on the rate set in a particular State and county by the Agricultural Stabilization and Conservation Committee, after consulting with the State forester. The program is available in designated counties based on a Forest Service survey of total eligible private timberland available for production of timber products. The program is administered by ASCS. Technical assistance is provided by Forest Service.

The Foreign Agricultural Service mission is to help American farmers and traders take maximum advantage of increased opportunities to sell U.S. agricultural commodities abroad and to help increase U.S. farm income.

Activities are conducted within three program areas:

Foreign agricultural affairs.—The Service maintains agricultural counselors, attachés, or trade officers at 78 foreign posts to assist overseas development of markets for U.S. farm commodities. They work closely with numerous U.S. agricultural trade groups and maintain significant contacts with foreign governments and traders to promote market access for U.S. farm products. They also file annually about 5,000 comprehensive reports regarding foreign agricultural production, supply, demand, marketing, and trade policy developments to keep U.S. agriculture, industry, and Government currently informed.

Foreign market information and access.—Under this broad program heading, the Service initiates, directs, and coordinates the Department's formulation of trade policies and programs with the goal of maintaining and expanding world markets for U.S. agricultural products. The Service is responsible for the development and maintenance of the USDA statistical data base encompassing foreign production estimates, trade data, export forecasts, economic indicators, price data and export sales reporting. These data are collected, analyzed, and disseminated to U.S. farm and trade groups providing ready access to reliable information to assess short-term changes in world agricultural supply and demand conditions by commodity.

The analyses of world commodity conditions provide the information necessary to develop export marketing strategies that can be used by the Department not only to gain market access but to enhance the long term market development plans for major U.S. commodities.

Foreign market development.—This program provides funding support to 41 commodity associations (cooperators), 5 regional groups (representing 47 State departments of agriculture) and the National Association of State Departments of Agriculture. Under FAS guidance and supervision, these organizations conduct an extensive worldwide market develop-

ment program on behalf of the U.S. farm sector. In addition, the Service develops and operates a worldwide system of multicommodity promotional programs utilizing product exhibits, trade teams, trade services, market information programs, and trade referral services to expand overseas markets. Historically, FAS contributes approximately one-third of the total annual cost of this program.

FOREIGN ASSISTANCE PROGRAMS

The funds and facilities of the Commodity Credit Corporation may, by law, be used in carrying out programs to encourage the export of agricultural commodities.

Included in this category are the following activities carried out under the Agricultural Trade Development and Assistance Act of 1954, Public Law 480, 83rd Congress, as amended (P.L. 480): Financing sales of agricultural commodities to developing countries for dollars on credit terms, or for local currencies (including for local currencies on credit terms) for use under sec. 104 (title I); for dispositions abroad (titles II and III); and for furnishing commodities to carry out The Food for Progress Act of 1985, as amended. Agreements may provide for commodities to be made available on a multi-year basis.

No agreements to finance sales under the authority of title I or programs of assistance under titles II or III may be entered into after December 31, 1995.

Financing sales of agricultural commodities to developing countries for dollars on credit terms, or for local currencies (including for local currencies on credit terms) for use under sec. 104; and for furnishing commodities to carry out the Food for Progress Act of 1985, as amended (title I).—Funds appropriated for P.L. 480 are used to finance all sales made pursuant to agreements concluded under the authority of Title I. The Corporation may serve as the purchasing or shipping agent, or both, for the importing country or may award contracts for freight agent services on behalf of the Corporation to handle shipping of commodities under P.L. 480.

Sales are made to developing countries as defined in section 402(4) of P.L. 480 and must not displace expected commercial sales (secs. 403(e) and (h)). Agreements are made with developing countries for delivery in accordance with the terms of the agreement.

When U.S.-flag vessels are required to ship commodities under this title, the Corporation will pay the difference between U.S.-flag rates and foreign-flag rates. In limited cases, full transportation costs to port-of-entry or point-of-entry abroad may be included along with the cost of the commodity in the amount financed by CCC in order to ensure that U.S. food aid can reach the most needy recipients.

Financing sales of agricultural commodities for dollars on credit terms (title I).—Payment by recipient countries may be made over a period of not less than 10 nor more than 30 years with a deferral of principal payments for up to 7 years. Interest accrues at a concessional rate as determined appropriate.

Section 411 of P.L. 480 authorizes the President to waive payments of principal and interest under dollar credit sales agreements for countries that meet certain enumerated requirements. Such debt relief may be provided only if the President notifies Congress and may not exceed the amount approved for such purpose in an Act appropriating funds to carry out P.L. 480.

Financing sales of agricultural commodities for local currency, including for local currency on credit terms.—Payment by a recipient country may be made in local currencies for use in carrying out activities under section 104 of P.L. 480.

Foreign currency received in payment for credit extended may be used for payment of U.S. obligations abroad, subject to the appropriation process. The P.L. 480 program is reimbursed for the dollar value of currencies so used.

The financing of sales of agricultural commodities for local currencies on credit terms is subject to the same terms that are applicable to dollar credit financing.

Furnishing commodities to carry out the Food for Progress Act of 1985, as amended (title I).—Funds appropriated to carry out title I may be used to furnish commodities to carry out the Food for Progress Act of 1985. Such commodities may be furnished on credit terms or on a grant basis in order to assist developing countries and countries that are emerging democ-

racies that have made a commitment to introduce and expand free enterprise elements in their agricultural economies.

Total title I agreements made since inception of the program to September 30, 1991 amount to $19,487.0 million cost value, including ocean freight for shipments on U.S. flagships. Major commodities are wheat, cotton, oils, rice and feed grains. Payments received during the period amount to $6,234.3 million, of which $3,672.2 million was applied to principal and $2,562.1 million to interest. The following table reflects the composition of the combined appropriations (in thousands of dollars):

Commodities supplied in connection with dispositions abroad (title II).—Under title II, agricultural commodities are furnished to meet famine or other emergency relief needs, combat malnutrition, carry out activities to alleviate the causes of hunger, mortality and morbidity, promote economic and community development, promote sound environmental practices, and carry out feeding programs. Agricultural commodities are provided through governments for emergencies only, and for non-emergencies through public and private agencies, including intergovernmental organizations.

The Corporation is authorized to pay the costs of acquisition, packaging, processing, enrichment, preservation, fortification, transportation, handling, and other incidental costs incurred up to the time of delivery at U.S. ports. The Corporation also pays ocean freight charges, and pays transportation costs to points of entry other than ports in the case of landlocked countries, where carriers to a specific country are not available, where ports cannot be used effectively, or where a substantial savings in costs or time can be effected, and pays general average contributions arising from ocean transport. In addition, transportation costs from designated points of entry or ports of entry abroad to storage and distribution sites and associated storage and distribution costs may be paid for commodities made available to meet urgent and extraordinary relief requirements.

Through September 30, 1991, appropriations totaling $22,850 million were authorized. Any incidental sales proceeds and proceeds from loss, damage, and other claims are applied against costs to reflect a reduction in appropriation requests. The following table reflects the composition of the appropriations (in thousands of dollars):

They are provided through foreign governments for direct feeding, development of emergency food reserves or may be sold with the proceeds of such sale used by the recipient country for specific economic development purposes.

The Corporation may pay, in connection with furnishing commodities under title III, the same cost items as authorized under title II. The following table reflects the composition of the appropriations (in thousands of dollars):

The mission of the Office of International Cooperation and Development (OICD) is to promote U.S. agriculture and to advance the agriculture of developing countries as parts of a complementary global agricultural system capable of providing ample food and fiber for all people.

International agricultural development.—OICD analyzes agricultural policy issues related to USDA's international agricultural development efforts, reviews food aid development activities supported by Public Law 480, and provides food industry training to senior and mid-level professionals from the public and private sectors of selected middle-income countries.

International scientific and technical cooperation.—OICD manages the Department's bilateral exchange and cooperative research programs with foreign governments and institutions in order to strengthen the role of science and technology in the ongoing effort to stabilize world food supplies and to increase the efficiency with which world resources are used. Priorities and criteria for these programs are based on domestic research priorities, potential benefits to U.S. agricultural production, and the availability of desired technologies. OICD coordinates USDA's and the U.S. Government's participation in approximately 30 international organizations concerned with food, agriculture, and rural development.

Reimbursable program.—OICD, using USDA and university expertise, provides technical assistance and training to developing countries at the request of the Agency for International Development and international organizations. OICD manages technical assistance projects in over 80 countries, focusing on land and water management, crop and livestock production and marketing, forestry, pest control, resource conservation and other areas. OICD offers a technical and management training program in agriculture and rural development to

These funds are used to administer the direct loan, loan guarantee, and grant programs of the Farmers Home Administration. Activities include reviewing applications, servicing the loan portfolio, and providing technical assistance and guidance to borrowers; and to assist in extending other Federal programs to people in rural areas.

In 1992, Congress separately funded the administrative costs for the Office of the Administrator. Separate funding is eliminated in 1993 and the Administrator's costs once again are funded from the Salaries and Expenses appropriation.

The 1990 Farm Bill directed Farmers Home Administration to transfer the community and business programs to a new Rural Development Administration. A total of 925 staff years and $72,605,000 have been deducted from Farmers Home Administration's funding and like amounts are being requested for the Rural Development Administration.

This grant program is authorized by subtitle A of the Consolidated Farm and Rural Development Act, as amended. Grants are authorized to be made to associations, including nonprofit corporations, public and quasi-public agencies, and certain Indian tribes to finance storage, treatment, purification, or distribution of water or the collection, treatment, or disposal of waste in rural areas. The amount of any development grant may not exceed 75 percent of the eligible development cost of the project.

The major objectives of the rural water and waste disposal grant program are: (1) to provide assistance to attain basic human amenities; (2) to alleviate health hazards; (3) to promote stability of rural areas by meeting the need for new and improved rural water and waste disposal systems; and (4) to meet national safe drinking water and clean water standards.

This is a new program proposed for implementation in 1993. Funding under this proposal will help 5,895 rural, very low-income households to obtain adequate housing for a 5-year period.

Prior year outlays reflect funding for rental assistance for newly constructed units provided in limited amounts in 1984 and 1985. From 1986 through 1991 rental assistance for newly constructed units, as well as existing rental assistance contract renewals and additional servicing assistance for existing projects, had been funded under the Rural Housing Insurance Fund. Beginning in 1992, pursuant to Credit Reform, a separate grant account was established for the Rental Assistance Program.

Legislation currently is being proposed to authorize a rural housing voucher program as an amendment to Title V of the Housing Act of 1949. The program would be based on the same payment standards as section 521(a)(2)(A) of Title V of the Housing Act of 1949, as amended. The benefits of this voucher program accrue to the renting household. With vouchers, families have the opportunity to choose from any apartment or house that is suitable to their needs. To help pay for housing, the government will cover the difference between 30 percent of the recipient's income and the median rental cost in that residential area.

Rural Development Grants.—These grants enable public and private nonprofit organizations to operate rural economic development projects. In general, these grants are an investment in the human and physical resources of rural communities. Past projects have enabled rural communities to acquire and develop land, create technical assistance programs, and encourage small business growth. As part of the President's initiative on rural economic development, program guidelines will be revised so that projects are selected on a competitive basis. This will ensure that grants are targeted to innovative projects that may be duplicated elsewhere in the region or nation.

The rental assistance program is authorized under section 521(a)(2) of the Housing Act of 1949, as amended, and is designed to reduce rents paid by very low-income and low-income families living in FmHA financed rural rental and farm labor housing projects. Funding under this account is provided for renewals of existing rental assistance contracts, assistance for newly constructed units financed by the section 515 rural rental and cooperative housing program or the 514/516 farm labor housing loan and grant programs, and for additional servicing assistance for existing projects. In 1993, the rental assistance to assist new construction units has been incorporated into the section 515 rural rental and cooperative housing program subsidy rate calculation, where funding is provided under the Rural Housing Insurance Fund Program Account. Assistance is also provided in lieu of debt forgiveness or payments for eligible households to subsidize tenant rents in projects purchased by eligible nonprofit organizations or public agencies as authorized by section 502(c)(5)(D) of the Act.

From 1978 through 1991, the rental assistance program was funded under the Rural Housing Insurance Fund. Beginning in 1992, pursuant to Credit Reform, a separate grant account was established for this program.

The Agricultural Credit Insurance Fund and its associated loan programs are authorized by title III of the consolidated Farm and Rural Development Act, as amended. The state mediation grant program is authorized by title V of the Agricultural Credit Act of 1987.

The Agricultural Credit Insurance Fund is used to insure or guarantee farm ownership, soil and water, farm operating, and emergency loans to individuals. Associations, Indian tribes and tribal corporations are eligible for the following types of loans: Indian land acquisition, watershed protection, flood prevention, and resource conservation and development.

As required by the Federal Credit Reform Act of 1990, this account records, for this program, all cash flows to and from the Government resulting from direct loans obligated, loan guarantees committed, and grants prior to 1992. New loan activity in 1992 and beyond (including credit sales of acquired property that resulted from obligations or commitments in any year) is recorded in corresponding program and financing accounts.

The Budget reflects the assets and authorizations applicable to the Farmers Home Administration's Agricultural Credit Insurance Fund (7 U.S.C. 1929) for the loan programs identi-

Rural housing insurance fund.—This fund was established in 1965 (Public Law 89-117) pursuant to section 517 of title V of the Housing Act of 1949, as amended. This fund may be used to insure or guarantee rural housing loans for single family homes, rental and cooperative housing, farm labor housing, and rural housing sites and to make rental assistance payments authorized by section 521(a). Loan programs are limited to rural areas that include towns, villages, and other places which are not part of an urban area and that have a population not in excess of 2,500 inhabitants, or is in excess of 2,500 but not in excess of 10,000 if rural in character, or has a population in excess of 10,000 but not more than 20,000 and is not within a standard metropolitan statistical area and has a serious lack of mortgage credit for low- and moderate-income borrowers.

The major programs currently funded through the Rural housing insurance fund are: section 502 very low and low to moderate income home ownership loans; section 504 very low-income housing repair loans; section 514 domestic farm labor housing loans; section 515 rural rental housing loans; section 521 rural rental assistance; section 502(c)(5)(D) rental assistance; and section 524 rural housing site loans.

As required by the Federal Credit Reform Act of 1990, this account records, for this program, all cash flows to and from the Government resulting from direct loans obligated and loan guarantees committed prior to 1992. New loan activity in 1992 and beyond (including credit sales of acquired property that resulted from obligations or commitments in any year) is recorded in corresponding program and financing accounts.

[1] Includes advances on behalf of borrowers.

As required by the Federal Credit Reform Act of 1990, this non-budgetary account records all cash flows to and from the Government resulting from direct loans obligated in 1992 and beyond including credit sales of acquired property. The amounts in this account are a means of financing and are not included in the budget totals.

This account finances direct rural housing loans for: section 502 very low- and low-to-moderate-income home ownership loan program; section 504 very low income housing repair loan program; section 514 domestic farm labor housing loan program; section 515 rural rental housing loan program; section 524 site development loans; and credit sales of acquired property.

Loan programs are limited to rural areas that include towns, villages and other places which are not part of an urban area and that have a population not in excess of 2,500 inhabitants, or is in excess of 2,500 but not in excess of 10,000 if rural in character, or has a population in excess of 10,000 but not more than 20,000 and is not within a standard metropolitan statistical area and has a serious lack of mortgage credit for low and moderate-income borrowers.

As required by the Federal Credit Reform Act of 1990, this non-budgetary account records all cash flows to and from the Government resulting from guaranteed loan commitments made in 1992 and beyond. The amounts in this account are a means of financing and are not included in the budget totals.

This account finances the subsidized and nonsubsidized guaranteed section 502 very low and low-to-moderate-income home ownership loan program. The guaranteed program enables FmHA to utilize private sector resources for the making and servicing of loans while the Agency provides a financial guarantee to encourage private sector activity, plus an interest subsidy where it is required to enhance affordability for low and very low-income borrowers.

[2] Amounts shown are based on purchase of loans from investors, loans sold to investors, assumption agreements, and acquired property.

The Rural Development Insurance Fund (RDIF) was established on October 1, 1972, pursuant to section 116 of the Rural Development Act of 1972 (Public Law 92-419).

The fund is used to insure or guarantee loans for water systems and waste disposal facilities, community facilities, and industrial development in rural areas. Communities unable to afford low interest loans for water and waste disposal facilities are also able to obtain FmHA grants.

As required by the Federal Credit Reform Act of 1990, this account records, for this program, all cash flows to and from the Government resulting from direct loans obligated and loan guarantees committed prior to the 1992. New loan activity in 1992 and beyond is recorded in corresponding program and financing accounts.

The Budget reflects the assets and authorizations applicable to the Farmers Home Administration's Agricultural Credit Insurance Fund (7 U.S.C. 1929) for the loan programs identified below that are transferred to the Rural Development Insurance Fund (7 U.S.C. 1929a). The assets and authorizations transferred are Grazing, Recreation, Irrigation, Forestry, Indian Land Acquisition, Watershed, Flood Prevention, Resource Conservation and Development and Water Facility Loans.

Loans from the Rural Development Loan Fund are made to intermediary borrowers (i.e., small investment groups), who in turn relend the funds to small rural businesses, community development corporations, or other organizations for the purpose of improving economic opportunities in rural areas. Through the use of local intermediaries, this program is able to serve small-scale enterprises and give preference to those communities with the greatest need.

As required by the Federal Credit Reform Act of 1990, this account records, for this program, all cash flows to and from the Government resulting from direct loans obligated prior to 1992. New loan activity in 1992 and beyond is recorded in corresponding program and financing accounts.

The Rural Electrification Administration (REA), under authority of the Rural Electrification Act of 1936, as amended, makes direct loans and guarantees loans made by other qualified lenders to suppliers of electric and telephone service in rural areas. REA also makes grants and loans for the purpose of promoting rural economic development and job creation projects and grants to provide access to advanced telecommunications services and computer networks.

In order to administer the REA loan programs and to ensure that construction and operation projects conform to approved standards, REA furnishes, without cost to the borrower, business management and technical assistance on a regular basis. This objective is carried out through regulations, personal visits to the borrowers, and training. REA has personnel in the Washington office and a field staff who have expertise in the electric or telephone industry and who are available to assist borrowers in specialized areas including rural development.

The Administration proposes to maintain the OBRA loan levels for the electric program and include a direct Treasury rate program to provide assistance to financially stable electric borrowers. Consistent with commercial bank practices, a loan origination fee will be charged on Rural Telephone Bank loans and deposited in the Salaries and Expenses account to offset Bank administrative expenses. All telephone loans will be made by the Rural Telephone Bank.

[1] Represents the discretionary savings from eliminating the mandatory telephone loans under the Omnibus Budget Reconciliation Act of 1990. As noted below, telephone loans will made by the Rural Telephone Bank beginning in 1993.

The Rural Electrification Administration conducts the following loan programs: (1) the rural electrification program; (2) the rural telephone program; (3) the rural economic development program. The rural electrification loan program is financed through REA direct and guaranteed loans for the operation of generating plants, electric transmission, and distribution lines or systems. The rural telephone loan program is financed through REA direct and guaranteed loans for construction, expansion, acquisition, and operation of telephone lines and facilities or systems. Beginning in 1993, all telephone loans will be made by the Rural Telephone Bank. Rural economic development loans are made for the purpose of promoting rural economic development and job creation projects.

As required by the Federal Credit Reform Act of 1990, this account records, for Rural Electrification and Telephone program, the subsidy costs associated with the direct loans obligated and the loan guarantees committed in 1992 and beyond (including modifications of direct loans or loan guarantees that resulted from obligations or commitments in any year), as well as administrative expenses of this program. The subsidy amounts are estimated on a present value basis; the administrative expenses are estimated on a cash basis.

RURAL ECONOMIC DEVELOPMENT [SUBACCOUNT] LOANS PROGRAM ACCOUNT

[For loans authorized under section 313 of the Rural Electrification Act, for the purpose of promoting rural economic development and job creation projects, $8,406,000.]

[For the cost, as defined in section 13201 of the Budget Enforcement Act of 1990, of direct loans, $2,546,000] *For the cost of direct loans, not to exceed $4,300,000 generated by the interest differential on voluntary cushion of credit payments made by REA borrowers, shall be used to provide the necessary loan subsidies; Provided, That such costs, including the cost of modifying such loans, shall be as defined in section 502 of the Congressional Budget Act of 1974: Provided further, That these funds are available to subsidize gross obligations for the principal amount of direct loans not to exceed $15,563,000. As required by the Federal Credit Reform Act of 1990, this account records, for the Rural Telephone Bank, all cash flows to and from the Government resulting from direct loans obligated prior to 1992. This account is shown on a cash basis. All new activity in this program in 1992 and beyond (including modifications of direct loans or loan guarantees that resulted from obligations or commitments in any year) is recorded in corresponding program and financing accounts.

The Rural Telephone Bank (RTB) provides a supplemental source of financing for rural telephone borrowers. The Bank charges an interest rate based on the cost of money to the Bank, as prescribed by law, but not less than 5 percent per annum. The composite interest rate on cumulative loans through September 30, 1991, was 7.48 percent. The long-term interest rate on advances made during FY 1991 for loans approved after October 1, 1987, is 5.43 percent.

Equity capital of the Bank consists of class A stock purchased by the United States of $592 million with a 2 percent dividend and classes B and C stock purchased by bank borrowers, organizations eligible to become borrowers and organizations controlled by borrowers. The Bank has borrowed $759 million from the Treasury. The $592 million purchase of capital stock has been financed through appropriations.

Administrative support is provided for the general operations of the Bank by REA employees and the Office of the General Counsel.

Bank loans totaled $177 million in 1991. After almost 19 years in operation, loans to 603 borrowers have been approved, totaling over $2.777 billion.

A portion of this account's unobligated balances would establish a funded reserve for eventual redemption of fifty-one percent of Class A Stock and the privatization of the Rural Telephone Bank. The amount funded would be equivalent to borrowers' total equity from Class B Stock purchases and 50 percent of net margins realized beginning in fiscal year 1993. This reserve would be merged with the Class B Stock proceeds derived from loans made after 1991.

This appropriation finances the administrative and operating expenses of the Corporation to provide funds to establish and maintain rates and coverages for 21,085 county programs in over 3,000 counties.

The major portion of administrative and operating expenses is to support delivery systems that rely heavily on the private sector as provided by the Federal Crop Insurance Act of 1980 under section 507(c). The delivery systems are:

(a) Reinsured companies that enable insurance companies to provide the insurance marketing, distribution, servicing, training, quality control, and loss adjustment functions. The companies also share with the Federal Crop Insurance Corporation, to a limited extent, in both profits and losses;

(b) Agency sales and service agreement, also known as the "master marketing agreement." Under this type of agreement, private insurance companies and associations are offered the opportunity to contract with FCIC to provide insurance sales and services. They are compensated on a commission basis; and

(c) ASCS county offices will continue to assist in FCIC's marketing efforts by selling and servicing crop insurance.

In addition, in areas where an adequate private sales and service force is not available, FCIC may ask other USDA agencies to sell and service multiple peril crop insurance through existing county offices.

The Federal Crop Insurance Corporation, a wholly owned Government corporation, was created on February 16, 1938 (7 U.S.C. 1501-1520), to carry out the provisions of the Federal Crop Insurance Act, as amended. The purpose of this Act is to promote the national welfare by improving the economic stability of agriculture through a sound system of crop insurance, and to provide the means for the research and experience helpful in devising and establishing such insurance.

Crop insurance offered to agricultural producers by the Corporation provides protection from losses caused by natural hazards, such as insect and wildlife damage, plant diseases, fire, drought, flood, wind, and other weather conditions. It does not indemnify producers for losses resulting from negligence or failure to observe good farming practices.

Budget program.—The program for crop year 1993 will provide crop insurance protection to farmers amounting to approximately $12.8 billion on the following commodities: Almonds, apples, barley, beans (dry and C&P), citrus, citrus trees, corn, cotton, ELS cotton, cranberries, figs, flax, forage production, forage seeding, grain sorghum, grapes, table grapes, hybrid seeding, macadamia nuts, macadamia trees, nursery stock, oats, onions, peaches, peanuts, pears, peas (dry and green), peppers, plums, popcorn, potatoes, prevented planting, prunes, raisins, rice, rye, safflower, soybeans, stonefruit (CA only—apricots, nectarines and peaches), sugar beets, sugarcane, sunflowers, C&P sweet corn, sweet corn (fresh), tobacco, tomatoes (fresh), C&P tomatoes, walnuts, and wheat.

The 1992 appropriation provided sufficient funding for crop year 1992 to insure 95.9 million acres with an estimated $886.0 million in total premium income, including $221.5 million in premium subsidy.

The following table compares the scope of the insurance operations planned for 1992 and projected for 1993, as compared with 1991. Amounts in the 1991 column are as of September 30, 1991, and pertain to the 1991 crop year.

The Corporation's budget is presented in accordance with generally accepted accounting principles, the Financial Accounting Standards Board (FASB) Statement No. 60, "Accounting and Reporting by Insurance Enterprises," and Statement No. 5, "Accounting for Contingencies."

Financing.—The Corporation is authorized under the Federal Crop Insurance Act, as amended, to use funds from the issuance of capital stock which provides working capital for the Corporation.

Receipts, which are for deposit to this fund, come mainly from premiums paid by farmers. The principal payments from this fund are for indemnities to insured farmers, the direct cost of adjusting crop losses, and agents' commissions. However, an appropriation will be requested in subsequent years for payments made from premium income used for loss adjustment costs and/or agents' commissions as provided by section 516(a) of the Federal Crop Insurance Act, as amended.

Premium subsidies are authorized by section 508(b) of the Federal Crop Insurance Act, as amended. The purpose of the subsidy is to encourage the broadest possible participation of farm producers in the crop insurance program. Subsidies are paid by the Corporation based upon 30 percent of each producer's premium (reduced, where applicable, for hail and fire exclusion or State agency subsidy) on any coverage, under the Corporation's policy of insurance of up to a maximum of 65 percent of the recorded or appraised average yield, as adjusted.

In 1991, the Corporation received a transfer of $150 million from the Commodity Credit Corporation as a reserve against losses in excess of premium in crop years 1990 and 1991.

[1] These amounts will appear on the books of the reinsured companies. The Corporation records will only reflect the net reinsurance income and net reinsurance losses.

The annual appropriation for the administrative and operating expenses of the Corporation is presented earlier in the budget.

Operating results and financial condition.—As of September 30, 1991, the Corporation reflected a deficit of $2,979.5 million. This compares with a deficit of $2,892.6 million at September 30, 1990.

For crop years 1948 through 1990, indemnities ($8,694.8 million) exceeded premium income ($6,208.8 million) by $2,485.9 million; the loss ratio for the period was 1.40. Indemnity costs exceeded premiums in 24 of the 42 years.

The following table summarizes the insurance operations for fiscal years 1991, 1992 and 1993:

The Administration is proposing to shift the accounting for all insurance programs from a cash basis to an accrual basis. The proposal would be implemented in phases. This budget shows the conversion for deposit insurance and pension guarantees beginning with the transactions for 1992. The conversion of all other insurance programs is planned for 1993 and will be reflected in the 1994 budget.

Commodity Credit Corporation Fund

REIMBURSEMENT FOR NET REALIZED LOSSES

For fiscal year [1992], *1993* such sums as may be necessary to reimburse the Commodity Credit Corporation for net realized losses sustained, but not previously reimbursed [(estimated to be $9,000,000,000 in the President's fiscal year 1992 Budget Request (H. Doc. 102-3)), but not to exceed $8,450,000,000], pursuant to section 2 of the Act of August 17, 1961, as amended (15 U.S.C. 713a-11).

[Such funds are appropriated to reimburse the Corporation to restore losses incurred during prior fiscal years. Such losses for fiscal years 1990 and 1991 include $900,000,000 in connection with carrying out the Export Enhancement Program (EEP), $200,000,000 in connection with carrying out the Market Promotion Program (MPP), formerly the Targeted Export Assistance Program (TEA), $300,000,000 in connection with carrying out the Federal Crop Insurance Program,

$445,773,000 in connection with domestic donations, $281,605,000 in connection with export donations, and $6,322,622,000 in connection with carrying out the commodity programs.

Notwithstanding the foregoing provisions of this Act, the reimbursement to the Commodity Credit Corporation for net realized losses sustained, but not previously reimbursed, in fiscal year 1992 shall not exceed $7,250,000,000.]

OPERATIONS AND MAINTENANCE FOR HAZARDOUS WASTE MANAGEMENT

For fiscal year [1992] *1993*, CCC shall not expend more than $3,000,000 for expenses to comply with the requirement of section 107(g) of the Comprehensive Environmental Response, Compensation, and Liability Act, as amended, 42 U.S.C. 9607(g), and section 6001 of the Resource Conservation and Recovery Act, as amended, 42 U.S.C. 6961: *Provided,* That expenses shall be for operations and maintenance costs only and that other hazardous waste management costs shall be paid for by the USDA Hazardous Waste Management appropriation.

[SHORT-TERM EXPORT CREDIT]

[The Commodity Credit Corporation shall make available not less than $5,000,000,000 in credit guarantees under its export credit guarantee program for short-term credit extended to finance the export sales of United States agricultural commodities and the products thereof, as authorized by section 211(b)(1) of the Agricultural Trade Act of 1978 (7 U.S.C. 5641).]

[INTERMEDIATE EXPORT CREDIT]

[The Commodity Credit Corporation shall make available not less than $500,000,000 in credit guarantees under its export guarantee program for intermediate-term credit extended to finance the export sales of United States agricultural commodities and the products thereof, as authorized by section 211(b)(2) of the Agricultural Trade Act of 1978 (7 U.S.C. 5641).]

[EMERGING DEMOCRACIES EXPORT CREDIT]

[The Commodity Credit Corporation shall make available not less than $200,000,000 in credit guarantees under its Export Guarantee Program for credit expended to finance the export sales of United States agricultural commodities and the products thereof to emerging democracies, as authorized by section 1542 of Public Law 101-624 (7 U.S.C. 5622 note).] *(Agriculture, Rural Development, Food and Drug Administration, and Related Agencies Appropriations Act, 1992.)*

[COMMODITY CREDIT CORPORATION]

[In view of the occurrence of recent natural disasters—similar to the volcano eruption of 1980, the earthquake of 1989, and the hurricane of 1989—droughts, floods, freezes, tornadoes, and other catastrophes which resulted in billions of dollars in damages, and in an effort to restore the economy and to alleviate the effects of the disasters, an additional $1,750,000,000, to remain available until expended, is hereby made available for losses associated with 1990 crops as authorized by Public Law 101-624, and for losses associated with 1991 and 1992 crops under the same terms and conditions: *Provided,* That $995,000,000 of this amount is available for payments to producers for losses on either 1990 or 1991 crops, at the producer's option: *Provided further,* That the remaining $755,000,000 shall be available only to the extent an official budget request, for a specific dollar amount, that includes designation of the entire amount of the request as an emergency requirement as defined in the Balanced Budget and Emergency Deficit Control Act of 1985, is transmitted to the Congress: *Provided further,* That this $755,000,000 shall be available for crop losses for one of the years 1990, 1991 or 1992, at the producer's option, but shall not be for a year for which disaster payments were previously provided to the producer: *Provided further,* That $100,000,000 of the $755,000,000 is set aside for program crops planted in 1991 for harvest in 1992: *Provided further,* That, consistent with the amounts made available above, emergency loans made with respect to damage to an annual crop planted for harvest in 1991 under subtitle C of the Consolidated Farm and Rural Development Act shall be made available without regard to the purchase of crop insurance under the Federal Crop Insurance Act by the producer who requests such a loan.] *(Dire Emergency Supplemental Appropriations Act, 1992.)*

[1] This entry reflects write-off of Polish debt.

[2] This entry includes commodities received as the result of loan forfeitures valued at $1.0 billion for fiscal year 1991. It also includes adjustments for loans to peanut associations.

The Corporation was created to: stabilize, support, and protect farm income and prices; help maintain balanced and adequate supplies of agricultural commodities, their products, foods, feeds, and fibers; and help in their orderly distribution. It may make available materials and facilities required in connection with the production and marketing of agricultural commodities and it may be used to administer and to temporarily finance numerous special activities.

The Corporation's capital stock of $100 million is held by the United States Treasury. Under present law, up to $30 billion may be borrowed from the U.S. Treasury to finance operations.

The 1993 estimate includes savings from improving the control and timing of disbursements and handling of cash collections as part of continuing budget management reforms. Current, indefinite appropriation authority is requested to cover all net realized losses. Appropriations to the Corporation for net realized losses have no effect on budget authority as they are used to repay debt directly with the Treasury.

Budget assumptions.—The following general assumptions form the basis for the Corporation's 1992 and 1993 budget estimates: (a) National income will rise both in 1992 and 1993 from the present level; (b) 1992 crop production will rise from 1991 crop levels; (c) generally, exports of agricultural commodities in 1993 are expected to be slightly higher than 1992 levels; (d) yields for the 1992 crops are based on recent averages adjusted for trend; (e) acreage allotments and marketing quotas will be in effect for the 1992 crops of certain kinds of

tobacco; (f) poundage quotas will be in effect for the 1992 crop of peanuts.

It is difficult to forecast with accuracy requirements for the year ending September 30, 1993, since the projections are subject to complex and unpredictable factors such as weather, other factors which affect the volume of production of crops not yet planted, feed and food needs here and overseas, and available dollar exchange.

Since passage of The Omnibus Budget Reconciliation Act of 1990 (OBRA) and the 1990 farm bill, the Administration has assumed the completion of a General Agreement on Tariffs and Trade (GATT) treaty by June 1992. However, in the event that the Uruguay Round of the GATT does not reach a successful conclusion, certain adjustments in the Federal commodity programs would be made. OBRA authorizes and in some cases directs the Administration to modify various agricultural commodity programs in the event an agreement is not concluded by June 1992, or is not entered into force by June 1993, if appropriate and to the extent needed to remain internationally competitive. As of January 1992, the outcome of the Uruguay Round is not known with absolute certainty. Accordingly, the 1993 budget reflects some possibility that an unsuccessful outcome may occur. Estimates of the levels of Federal spending in 1993–95 on domestic and export commodity programs are being increased to accommodate that eventuality.

An assumption of increased outlays is included in the FY 1993 budget to respond to the OBRA provisions. First, the amount required to finance necessary increases in various export and other programs was calculated. This amount was then adjusted using a probabilistic assessment of the likelihood of an agreement being concluded or entered into force by the dates set forth in OBRA. Should the GATT agreement be successfully concluded by June 1992, the assumed increases could be prevented by entering the agreement into force and thus would be available as "pay as you go" savings associated with the implementation of the agreement.

Appropriations are made to reimburse the Corporation for net realized losses sustained in carrying out its operations:

PROGRAMS OF THE CORPORATION

Price support and related stabilization programs.—The Corporation conducts programs to support farm income and prices and stabilize the market for agricultural commodities. Price support is provided to producers of agricultural commodities through loans, purchases, payments, and other means. This is done mainly under the Commodity Credit Corporation Charter Act, as amended, the Agricultural Act of 1949, as amended, and the Agricultural Adjustment Act of 1938, as amended.

Price support is mandatory for the basic commodities—corn, cotton, wheat, rice, peanuts, and tobacco. The Agricultural Act of 1949, as amended, also requires support of the following nonbasic commodities: honey, milk, barley, oats, rye, grain sorghum, sugar and oilseeds. The National Wool Act of 1954, as amended requires support for wool and mohair. Support for other nonbasic commodities is discretionary. The support program may also include operations to remove and dispose of surplus agricultural commodities in order to stabilize prices at levels not in excess of those permissible by law.

The principal methods of providing support are loans to and purchases from producers. With limited exceptions, loans made on commodities are nonrecourse. The commodities serve as collateral for the loan and on maturity the producer may deliver or forfeit such collateral to satisfy the loan obligation without further payment.

Direct purchases are also made from processors as well as producers, depending on the commodity involved. Also, special purchases are made under various laws for the removal of surpluses; for example, the Act of August 19, 1958, as amended and section 416 of the Agricultural Act of 1949, as amended.

Acreage limitation program.—The Agricultural Act of 1949, as amended, authorizes the Secretary to establish, through the Corporation, acreage limitation programs for the 1991 through 1995 crops of wheat, feed grains, upland cotton, extra long staple cotton, and rice.

Marketing Assessments/Loan Origination Fees.—The Omnibus Budget Reconciliation Act of 1990 and the Food, Agriculture, Conservation, and Trade Act of 1990 amended the National Wool Act of 1954 and the Agricultural Act of 1949 to require marketing assessments for wool and mohair, malting barley, peanuts, tobacco, honey, dairy, and sugar. A two percent loan origination fee is required for oilseeds.

Land diversion payments.—The Secretary is authorized to establish paid land diversion programs for wheat, feed grains, upland cotton, extra long staple cotton, and rice.

Producer eligibility.—Producers of wheat, feed grains, upland cotton, extra long staple cotton, and rice, must comply with acreage limitation provisions in order to be eligible for price support loans and purchases and deficiency payments.

Deficiency payments.—The Agricultural Act of 1949, as amended, establishes: (1) minimum established "target" prices for the 1991 through 1995 crops of the following commodities—wheat, corn, upland cotton, rice, and ELS cotton; (2) minimum price support loan and purchase levels for wheat, feed grains, and rice; and (3) minimum price support loan levels for upland cotton and ELS cotton. Deficiency payments for each of the commodities are required when the target price for the commodity exceeds the national average market price or the price support loan level, whichever is higher. The target prices for grain sorghum and oats and, if designated by the Secretary, barley, are established at a level which is fair and reasonable in relation to the target prices established for corn. These payments may be paid by cash or on a non-cash basis, including payments in the form of commodities or commodity certificates that may be exchanged for commodities owned by CCC.

Disaster payments.—A $1,400,000 direct appropriation was provided to the Commodity Credit Corporation by the Dire Emergency Supplemental Appropriations Act for FY 1991 to provide disaster assistance for producers who suffered 1989 crop damages as a result of Hurricane Hugo. The act specified that payments be made under authority of the Disaster Assister Act of 1989, as amended.

The Food, Agriculture, Conservation, and Trade Act of 1990 (P.L. 101–624) amended the Disaster Assistance Act of 1989 to provide assistance to producers of any crop of valencia oranges affected by a freeze in 1988 or 1989 if the producer on the farm incurred a loss of at least 50 percent of the crop.

The Food, Agriculture, Conservation, and Trade Act of 1990 also amended the Disaster Assistance Act of 1989 to provide assistance to producers on the Wind River Indian Reserva-

tion, Wyoming, who suffered losses due to lack of water as the result of Indian Tribal Water adjudication.

The Dire Emergency Supplemental Appropriations Act for FY 1992 made an additional $1,750,000,000 available for 1990 crop losses as authorized by the Food, Agriculture, Conservation, and Trade Act of 1990 and for 1991 and 1992 crop losses under the same terms and conditions. The act specified that $995,000,000 be made available for 1990 or 1991 crop payments, at the producer's option, and that an additional $755,000,000 for 1990, 1991, or 1992 crop payments, at the producer's option, would be available if and only to the extent that the President declares such funds to be an "emergency requirement" under the BEA and submits a budget request. The act further specified that $100,000,000 of this $755,000,000 be made available for 1991 crop payments.

Marketing loan and certificate programs.—The Agricultural Act of 1949, as amended, provides for a mandatory marketing loan program for each of the 1991 through 1995 crops of rice, upland cotton, and oilseeds and a discretionary marketing loan program for each of the 1991 through 1995 crops of wheat, feed grains, and honey. Under a marketing loan program, a producer may repay a price support loan at a level that is lower than the original loan rate. The Agricultural Act of 1949, as amended, also provides that the Secretary may allow honey producers to repay price support loans at a level that is lower than the original loan rate. The Agricultural Act of 1949, as amended, provides for payments, in the form of negotiable marketing certificates, to first handlers of upland cotton (persons regularly engaged in buying or selling upland cotton) and also provides for a marketing certificate program for rice producers.

The Food Security Act of 1985, as amended, authorizes the Dairy Export Incentive Program (DEIP) through calendar year 1995. DEIP provides subsidies to exporters of U.S. dairy products to help them compete with other subsidizing nations. Fiscal year 1991 payment were made in CCC certificates.

The following table itemizes CCC certificate payments by program:

Grain reserves.—The Agricultural Act of 1949, as amended, authorizes a producer-owned grain reserve program for wheat and feed grains that provides 27 month extended loans to producers. Producers receive quarterly storage payments under the contract. Program provisions establish when interest is charged and storage payments are earned.

Dairy.—The Agricultural Act of 1949, as amended, provides for a dairy price support program which sets the minimum support price for milk at $10.00 per hundredweight through December 1995. If, on January 1 of each year, a milk surplus is estimated at less than 3.5 billion pounds, milk equivalent, the support price will be increased by 25 cents per hundredweight. If the surplus is estimated to be more than 5.0 billion pounds, milk equivalent, the support price will be decreased by 25 to 50 cents per hundredweight. The support price will be unchanged if the estimated surplus is estimated to be between 3.5 and 5.0 billion pounds, milk equivalent.

Payment limitations.—The Food, Agriculture, Conservation, and Trade Act of 1990 amended the Food Security Act of 1985 to provide that the total amount of deficiency and land diversion payments, excluding any deficiency payment received as the result of a reduction of the wheat or feed grain price support loan level, that a person is entitled to receive under one or more annual programs for feed grains, wheat, upland cotton, ELS cotton, and rice for each of the 1991 through 1995 crops of these commodities shall not exceed $50 thousand. For each of the 1991 through 1995 crops of wheat, feed grains, upland cotton, rice, and oilseeds, gains from repaying a loan at a lower level than the original loan level, loan deficiency payments, and any deficiency payment received as a result of a reduction of the wheat or feed grain price support level shall not exceed $75 thousand. For each of the 1991 through 1995 crops the total amount of: (1) deficiency payments, land diversion payments, payments for resource adjustment (excluding diversion payments) or public access for recreation, disaster payments, loan deficiency payments, inventory reduction payments and gains realized from a marketing loan repayment with respect to wheat, feed grains, upland cotton, ELS cotton, rice, and oilseeds; and (2) gains realized by a producer from repaying a loan less than the original loan level with respect to other commodities, that a person shall be entitled to receive under one or more of the annual programs for such commodities shall not exceed $250 thousand, except as otherwise may be authorized by the Secretary. Annual rental payments made under the Conservation Reserve Program are limited to $50,000 per person. The Agricultural Act of 1949, as amended, limits the total amount of benefits that a person may receive annually under one or more of the emergency livestock assistance programs to $50,000. Starting with the 1991 crop, the total amount of benefits that a person may receive under one or more of the emergency livestock assistance programs will be $50,000 per crop year rather than calendar year.

The Food, Agriculture, Conservation, and Trade Act of 1990 also amended the National Wool Act of 1954 to establish payment limitation provisions for the 1991 through 1995 marketing years of wool and mohair and also amended the Agricultural Act of 1949 to establish payment limitation provisions for the 1991 through 1995 crops of honey. The annual payment limitations for these commodities are: $200,000 in 1991; $175,000 in 1992; $150,000 in 1993; and $125,000 in 1994 and 1995.

Supply and foreign purchases.—The Corporation can procure from domestic and foreign sources food, agriculture commodities, and products and related materials to supply the needs of Federal agencies, foreign governments, and private and international relief agencies, under section 5(b) and (c) of the Commodity Credit Corporation Charter Act, as amended.

Commodity exports.—The Corporation promotes the export of agricultural commodities and products through sales for dollars or foreign currency, payments, extension of credit, assumption of certain risks, and conduct of other operations with respect to the exportation of commodities. Such commodities and products may be those held in private trade channels as well as those acquired by the Corporation. These programs are carried out under the authority of the CCC Chapter Act and other specific legislation.

Foreign donations.—Under the authority of section 416(b) of the Agricultural Act of 1949, as amended, the Corporation may furnish eligible commodities for carrying out programs of assistance in developing and friendly countries under the Food for Progress Act of 1985 and titles II and III of the Agricultural Trade Development Act of 1954, as amended. CCC may pay costs associated with making the commodities

Operating expenses.—The Corporation carries out its functions through utilization of employees and facilities of other Government agencies. Administrative expenses are incurred for the services of: the Agricultural Stabilization and Conservation Service; General Sales Manager; other agencies of the Department engaged in the Corporation's activities; and the General Accounting Office for audit. Additional expenses are incurred for ASCS county offices for work related to programs of the Corporation, other ASCS expenses offset by revenue, custodian, and agency expenses of the Federal Reserve banks and lending agencies, and miscellaneous costs.

Expenses are incurred for acquisition, operation, maintenance, improvement, or disposition of property that the Corporation owns or in which it has an interest. These expenses are treated as program expenses. Such program expenses include inspection, classing, and grading work performed on a fee basis by Federal employees or Federal- or State-licensed inspectors; work relating to Commodity Credit Corporation programs performed on a contract or fee basis by Agricultural Stabilization and Conservation Service; and special services performed by other Federal agencies within and outside this Department. Most of these general expenses, including storage and handling, transportation, inspection, classing and grading, and producer storage payments, are included in program costs. They are shown in the program and financing schedule in the entries entitled "Storage, transportation, and other obligations not included above," and "Producer storage payments."

The Corporation receives reimbursement for grain requisitioned pursuant to Public Law 87-152 by the States from Corporation stocks to feed resident wildlife threatened with starvation through the appropriation reimbursement for net realized losses. There have been no requisitions in recent years, however.

SPECIAL ACTIVITIES

These activities are carried out under authority of section 5(g) of the Corporation's charter act and specific statutory authorizations or directives with respect thereto that are currently in effect or which may subsequently be enacted.

A summary of such current activities not included under other designated activities is as follows:

Item	*1993 estimate* [In thousands of dollars]	
	Gross obligations	*Outlays (reimbursable)*
(1) Financing sales of agricultural commodities for foreign currencies or for dollars on credit terms	491,600	41,594

(4) National Wool Act	186,322	184,516
Total	1,644,422	1,228,113

The Corporation receives appropriations or reimbursement for the cost of these activities as described under each.

Activities currently being carried out are as follows (see Foreign Assistance programs for details of items (1), (2) and (3)).

(1) Financing the sale and exportation of agricultural commodities for foreign currencies or for dollars (title I, of P.L. 480).

Total payments made under the National Wool Act cannot at any time exceed an amount equal to 70 percent of the accumulated totals, as of the same date, of the gross receipts from import duties collected on and after January 1, 1953, on wool and wool manufactures. Actual or estimated payments compared with this limitation are as follows:

[In thousands of dollars]

Item	1991 actual	1992 est.	1993 est.
70% of customs receipts on wool and wool manufactures, cumulative from Jan. 1, 1953, to end of preceding calendar year	4,937,110	5,217,589	5,501,568
Cumulative incentive payments on marketings to end of preceding calendar year	2,150,283	2,324,783	2,505,383
Balance of limitation available for payments in succeeding marketing years	2,786,827	2,892,806	2,996,185

Funds of the Corporation are used to carry on this program. For the purpose of reimbursing the Corporation, section 705 of the act appropriates each fiscal year an amount equal to amounts expended by the Corporation during the preceding year and to amounts expended in prior fiscal years not previously reimbursed, but not to exceed an amount equal to 70 percent of the gross receipts from duties collected on wool and wool manufactures during the calendar year preceding the fiscal year.

FINANCING

Borrowing authority.—The Corporation has an authorized capital stock of $100 million held by the United States and, effective in 1988, authority to have outstanding borrowings up to $30 billion at any one time.

Funds are borrowed from Treasury and may also be borrowed from private lending agencies and others. The Corporation reserves a sufficient amount of its borrowing authority to purchase at any time all notes and other obligations evidencing loans made to the Corporation by such agencies and others. All bonds, notes, debentures, and similar obligations issued by the Corporation are subject to approval by the Secretary of the Treasury as required by the Act of March 8, 1938.

Interest on borrowings from the Treasury (and on capital stock) is paid at a rate based upon the average interest rate of all outstanding marketable obligations (of comparable maturity date) of the United States as of the preceding month. Interest is also paid on other notes and obligations at a rate prescribed by the Corporation and approved by the Secretary of Treasury.

The Department of Agriculture and Related Agencies Appropriation Act, 1966, made provision for terminating interest after June 30, 1964 on the portion of the Corporation's borrowings from the Treasury equal to the unreimbursed realized losses recorded on the books of the Corporation after the end of the fiscal year in which such losses are realized.

POSITION WITH RESPECT TO BORROWING AUTHORITY, END OF YEAR

[In thousands of dollars]

Net statutory borrowing authority available	8,206,322	7,479,930	4,970,232

Note.—Accounts payable, accrued liabilities and other outstanding obligations not reflected on this table do not become charges against the statutory borrowing authority until they result in borrowings from the Treasury.

Contract authority.—Price support and other programs required by statute may result in the Corporation incurring obligations in excess of available funds and borrowing authority. Such obligations are liquidated from subsequent appropriations and other funds that may become available to the Corporation. Any increase in obligations in excess of available fund resources is reported as contract authority in the year involved; a decrease is reported as the application of appropriations and other funds to liquidate the authority.

Appropriations.—Under section 2 of Public Law 87-155 annual appropriations are authorized for each fiscal year to reimburse the Corporation for net realized losses incurred as of the close of each year.

The special activities are financed as indicated in the program descriptions above. In addition to certain reimbursements from other agencies, appropriations are made for the National Wool Act (see above) and foreign assistance programs.

Deficit.—The net realized losses of the Corporation have previously been reimbursed as follows:

As part of a Governmentwide effort to distribute Federal resources more fairly, legislation will be needed to exclude from CCC price support and related programs individuals with adjusted gross incomes from off-farm sources exceeding $100,000 per annum, reducing CCC outlays $150 million per crop year by preliminary estimate.

Proposed legislation would improve the efficiency and targeting of school lunch and breakfast subsidies by (1) increasing per meal subsidies for lunches and breakfasts served to children from households with incomes between 130 and 185 percent of poverty by 25 cents in lunches and 20 cents in breakfasts, decreasing the maximum price that could be charged from 40 cents to 15 cents in lunches and 30 cents to 10 cents in breakfasts; and (2) decreasing per meal subsidies for lunches and breakfasts served to children from households above 185 percent of poverty by 6 cents in lunches and 3.75 cents in breakfasts. Schools and institutions will continue to receive the current commodity subsidies for all meals.

The Human Nutrition Information Service (HNIS) plans and conducts nutritional and dietary intake assessment surveys of the total U.S. population and selected groups; provides consultative assistance and sound guidance material to assist people in selecting adequate diets within different budget limitations; maintains and expands the Nutrient Data Bank and revises sections of Agriculture Handbook No. 8, "Composition of Foods"; responds to many different requests for guidance on practical food-related problems as well as on national and international food programs; conducts nutrition education research and performs technical clearance of nutrition information for the Department. In 1993, HNIS will continue nutrition monitoring and other activities required by Public Law 101–445, the National Nutrition Monitoring and Related Research Act of 1990.

The 156 National Forests, 19 National Grasslands, and 13 land utilization projects located in 44 States, Puerto Rico and the Virgin Islands are managed under multiple use and sustained yield principles. The natural resources of timber, minerals, range, wildlife, outdoor recreation, watershed, and soil are utilized in a planned combination that will best meet the needs of the Nation, without impairing productivity of the land or damaging the environment. These management and utilization principles are recognized in the Multiple-Use Sustained-Yield Act of 1960 (16 U.S.C. 528–531).

Land and resource protection.—Provides for the protection and/or maintenance of National Forest System users, resources, lands and facilities, including roads and trails.

Renewable resource management and utilization.—Provides for the management and utilization of the timber, mineral, range, recreation, wildlife, fisheries, watershed, and soil resources on National Forest System lands.

General administration.—This activity provides line managerial and administrative support to programs financed from National forest system, Construction, Forest research, State and private forestry, Forest Service fire protection, Emergency Forest Service firefighting fund and Land acquisition appropriations.

Construction of facilities—

Recreation facilities.—Provides facilities necessary to safely meet recreation demand while protecting environmental values and other resource uses of the National Forests.

Other facilities.—Provides for construction and acquisition of fire, administrative, and other improvements and related facilities necessary to carry out National Forest and State and private forestry programs. Includes fire lookouts, offices, dwellings and barracks for employee housing, service, and storage buildings, insectories, tree nursery buildings, dams, and other forest resource management projects. Efforts to make buildings more energy efficient (retrofit) will be continued.

Research construction.—Provides for construction, alteration, and improvement of research laboratories and related facilities, and for procurement and installation of necessary initial equipment needed to put the facility into operating condition. Efforts to make research facilities more energy efficient (retrofit) will be continued.

Road and trail construction—

Road and trail construction.—Roads and trails are essential to the protection and management of the National Forest System, as well as providing access to National Forest System areas for recreation and utilization of their resources. Of the revenues received annually from National Forest activities, 10 percent is being transferred to the General Fund with a comparable amount appropriated to the construction program for road and trail construction activities.

Timber purchaser construction.—Roads may be constructed and/or reconstructed by a timber purchaser who in turn receives credit against timber value as a reimbursement. These roads are those required within a timber sale area specifically for the removal of the timber, but which will remain on the National Forest development road system for resource management purposes after the timber sale contract is completed. (16 U.S.C. 535, 1608.)

Research is conducted and disseminated through eight regional forest experiment stations and the Forest Products Laboratory, and includes both in-house and extramural programs.

Forest management research.—Research is conducted to develop improved silvicultural alternatives and management guidelines to increase the productivity and multiple-use benefits of forest lands, maximize tree growth and quality, and maintain land productivity.

Forest products and harvesting research.—Research is conducted to provide technology to harvest and utilize timber more efficiently and in ways that are environmentally acceptable, to improve the performance of wood products, and to expand opportunities for wood products exports.

Forest protection research.—Research is conducted to understand the impact of forest fires, atmospheric factors, insects, and diseases on forest and range ecosystems; to improve methods for preventing, predicting, controlling, and reducing the effects of wildfire, insects, and diseases, and for using fire for resource management; and to acquire basic knowledge to monitor and predict atmospheric effects on forests.

Resource analysis research.—Research is conducted to provide inventory information on forest resources; to determine the effects of economic and institutional forces on forest product markets and forest management strategies; and to improve methods of managing outdoor recreation and wilderness.

Forest environment research.—Research is conducted to provide knowledge needed to manage forests and range nontimber resources; including wildlife and fish habitats, watersheds, and forage.

For 1993, forest research will focus on basic research thus allowing the private sector to concentrate on developmental and applied research.

Cooperative forestry assistance is provided to all the States, Puerto Rico, the Virgin Islands, Guam, the Northern Mariana Islands and the Trust Territory of the Pacific to promote protection and management of forest lands.

Forest pest management.—Protects forest resources and processed wood from insects and diseases directly on National Forests and other Federal lands and in cooperation with States on non-Federal lands.

Fire protection.—Helps State forestry organizations to achieve fire protection efficiency through activities of national interest on non-Federal wildlands.

Forest management and utilization.—Improves management of non-industrial private forest resources; increases wood utilization; increases seedling production and nursery capacity of State tree nurseries; expands State tree improvement programs; and provides management and planning assistance.

Fire Management and Presuppression.—Provides on a discretionary basis for management, program planning, and presuppression costs for the Forest Service's fire program. The program management subactivity includes all permanent, full-time staff; automatic detection and other systems; communications; and fire prevention, training and interagency coordination. Presuppression includes activities associated with preparing for the annual fire season (e.g., hiring seasonal firefighters and purchasing equipment), and with reducing hazardous conditions (including costs of eliminating unnatural or hazardous levels of accumulated fuel, either by controlled fire or other means).

Emergency Operations.—Provides for the emergency and unpredictable aspects of the Forest Service's firefighting programs, wildfire suppression and emergency rehabilitation. Suppression includes the costs of emergency suppression of wildfires or for escalated presuppression funding based on abnormally extreme fire potential, and of monitoring natural fires permitted to burn within preestablished fire prescription criteria. Rehabilitation includes the costs incurred to prevent land degradation, resource losses, and other situations caused by damage by fire (e.g., reseeding, felling damaged trees).

Outdoor recreation occurs throughout National Forest System lands. The America The Beautiful (ATB) Program expands the Land and Water Conservation Fund Act fee authority, provides for the ATB Passport and makes recreation revenues available for appropriation to support program operations. Recreationists who enjoy National Forest System lands will receive direct benefits from the revenues collected. Revenues collected in 1993 will be available for appropriation beginning in 1994.

Range Betterment Fund

For necessary expenses of range rehabilitation, protection, and improvement, 50 per centum of all moneys received during the prior fiscal year, as fees for grazing domestic livestock on lands in National Forests in the sixteen Western States, pursuant to section 401(b)(1) of Public Law 94-579, as amended, to remain available until expended, of which not to exceed 6 per centum shall be available for administrative expenses associated with on-the-ground range rehabilitation, protection, and improvements. *(43 U.S.C. 1751, 1901-1908; Department of the Interior and Related Agencies Appropriations Act, 1992.)*

Expenses, brush disposal.—Funds from payments by purchasers of National Forest timber to dispose of or treat slash and other debris that result from cutting operations (16 U.S.C. 490).

Licensee programs, Forest Service.—Funds from fees for the use of characters by private enterprises are collected under regulations promulgated by the Secretary as follows:

Smokey Bear.—For furthering the nationwide forest fire prevention campaign (16 U.S.C. 580(2)).

Woodsy Owl.—For promoting wise use of the environment and programs which foster maintenance and improvement of environmental quality (16 U.S.C. 580(1)).

Restoration of forest lands and improvements.—Funds from claim settlements involving damage to lands or improvements and from forfeiture of deposits and bonds by permittees and timber purchasers are used for the restoration made necessary by the action which led to the settlement of forfeiture (16 U.S.C. 579c).

Timber purchaser roads constructed by Forest Service.—Funds from timber receipts for Government constructed permanent roads for purchasers of timber who qualify as small businesses and elect to have the Forest Service construct the roads designated under the timber sale contract where costs exceed $20,000 (16 U.S.C. 472a(i)).

Timber salvage sales.—Funds to begin salvage of insect-infested, dead, damaged, or down timber, and to remove associated trees for stand improvement (16 U.S.C. 472a(h)); and, for preparation of timber sales to replace sales lost to fire or other causes, and for preparation activities to replace sales inventory of the shelf, including timber support.

Tongass timber supply fund.—Funds from sales of Alaska timber to maintain the timber supply from the Tongass National Forest at a specified level (16 U.S.C. 539d). The Tongass Timber Reform Act, P.L. 101-626, terminated the authorization for the "Tongass Timber Supply Fund (TTSF)" in 1991. Activities formerly were funded in "Forest Research," "Construction," and "National Forest System."

Payment to Minnesota.—At the close of each fiscal year, the State of Minnesota is paid 0.75 percent of the appraised value of certain Superior National Forest lands in the counties of Cook, Lake, and St. Louis for distribution to these counties (16 U.S.C. 577g).

Payments to counties, National Grasslands.—Of the revenues received in a calendar year from the use of National Grasslands, 25 percent is paid to the counties in which such land is situated for funding local schools and roads (7 U.S.C. 1012).

Payments to States, National Forests Fund.—With minor exceptions, 25 percent of the money received from the National Forests, including all the collections under *16 U.S.C. 576b,* and all amounts allowed any timber purchaser for construction of roads, is paid at the end of each fiscal year to the States for funding local schools and roads of the county in which such forests are situated (16 U.S.C. 500 and 97 Stat. 1123).

The Working Capital Fund is a self-sustaining revolving fund that provides services to National Forests, to research experiment stations, to other Federal agencies when necessary, to State and private agencies as provided by law, and to persons who cooperate with the Forest Service in fire control and other authorized programs.

The forestry related supply and support services include:

Equipment Services.—The fund owns, operates, maintains, replaces, and repairs common use motor driven and similar equipment. This equipment is rented to administrative units, that is, National Forests, research experiment stations, and other units, and, in some cases, to other agencies, at rates which recover the cost of operation, repair and maintenance, management, and depreciation. The rates also include an increment which provides additional cash which, when added to depreciation earnings and the residual value of equipment, provides sufficient funds to replace the equipment.

Aircraft Services.—The fund operates, maintains, and repairs Forest Service owned aircraft used in fire surveillance and suppression and in other Forest Service programs. The aircraft are rented to National Forests, research experiment stations, and in some cases to other agencies, at rates which recover the cost of depreciation, operation, maintenance, repair, and improvements in the airworthiness of the aircraft. Aircraft replacement costs are financed from either appropriated funds or the Forest Service Working Capital Fund, or a combination of both.

Supply Services.—The fund operates the following common services:

Photo reproduction laboratories that store, reproduce, and supply aerial photographs, aerial maps, and other photographs of National Forest lands. The photographic reproductions are sold to National Forests, experiment stations, and others at cost.

Sign shops that manufacture and supply special signs for the National Forests for use in regulating traffic and as information to the public and other users of the National Forests. The signs are sold to National Forests and experiment stations at cost.

ADMINISTRATIVE PROVISIONS, FOREST SERVICE

Appropriations to the Forest Service for the current fiscal year shall be available for: (a) purchase of not to exceed [207] *127* passenger motor vehicles of which [17] *31* will be used primarily for law enforcement purposes and of which [176] *101* shall be for replacement only, of which acquisition of [137] *81* passenger motor vehicles shall be from excess sources, and hire of such vehicles; operation and maintenance of aircraft, the purchase of not to exceed two for replacement only, and acquisition of [68] *47* aircraft from excess sources; notwithstanding other provisions of law, existing aircraft being replaced may be sold, with proceeds derived or trade-in value used to offset the purchase price for the replacement aircraft; (b) services pursuant to the second sentence of section 706(a) of the Organic Act of 1944 (7 U.S.C. 2225), and not to exceed $100,000 for employment under 5 U.S.C. 3109; (c) purchase, erection, and alteration of buildings and other public improvements (7 U.S.C. 2250); (d) acquisition of land, waters, and interests therein, pursuant to the Act of August 3, 1956 (7 U.S.C. 428a); (e) for expenses pursuant to the Volunteers in the National Forest Act of 1972 (16 U.S.C. 558a, 558d, 558a note); and (f) for debt collection contracts in accordance with 31 U.S.C. 3718(c).

[None of the funds made available under this Act shall be obligated or expended to change the boundaries of any region, to abolish any region, to move or close any regional office for research, State and private forestry, or National Forest System administration of the Forest Service, Department of Agriculture, without the consent of the House and Senate Committees on Appropriations and the Committee on Agriculture, Nutrition, and Forestry in the United States Senate and the Committee on Agriculture in the United States House of Representatives.]

Any appropriations or funds available to the Forest Service may be advanced to the Forest Service Firefighting appropriation and may be used for forest firefighting and the emergency rehabilitation of burned-over lands under its jurisdiction[: *Provided,* That no funds shall be made available under this authority until funds appropriated to the "Emergency Forest Service Firefighting Fund" shall have been exhausted].

[The appropriation structure for the Forest Service may not be altered without advance approval of the House and Senate Committees on Appropriations.]

Notwithstanding any other provision of law, any appropriations or funds available to the Forest Service may be used to reimburse employees for the cost of State licenses and certification fees pursuant to their Forest Service position and that are necessary to comply with State laws, regulations, and requirements.

Funds appropriated to the Forest Service shall be available for assistance to or through the Agency for International Development and the Office of International Cooperation and Development in connection with forest and rangeland research, technical information, and assistance in foreign countries, and shall be available to support forestry and related natural resource activities outside the United States and its territories and possessions, including technical assistance, education and training, and cooperation with United States and international organizations.

All funds received for timber salvage sales may be credited to the Forest Service Permanent Appropriations to be expended for timber salvage sales from any national forest, and for timber sales preparation to replace sales lost to fire or other causes, and sales preparation to replace sales inventory on the shelf for any national forest to a level sufficient to maintain new sales availability equal to a rolling five-year average of the total sales offerings, and for design, engineering, and supervision of construction of roads lost to fire or other causes associated with the timber sales programs described above: *Provided,* That notwithstanding any other provision of law, moneys received from the timber salvage sales program in fiscal year [1992] *1993* shall be considered as money received for purposes of computing and distributing 25 per centum payments to local governments under 16 U.S.C. 500, as amended.

[None of the funds made available to the Forest Service under this Act shall be subject to transfer under the provisions of section 702(b) of the Department of Agriculture Organic Act of 1944 (7 U.S.C. 2257) or 7 U.S.C. 147b unless the proposed transfer is approved in advance by the House and Senate Committees on Appropriations in compliance with the reprogramming procedures contained in House Report 102-116.]

No funds appropriated to the Forest Service shall be transferred to the Working Capital Fund of the Department of Agriculture without the approval of the Chief of the Forest Service.

Notwithstanding any other provision of law, any appropriations or funds available to the Forest Service may be used to disseminate program information to private and public individuals and organizations through the use of nonmonetary items of nominal value and to provide nonmonetary awards of nominal value and to incur necessary expenses for the nonmonetary recognition of private individuals and organizations that make contributions to Forest Service programs.

[Notwithstanding any other provision of law, money collected, in advance or otherwise, by the Forest Service under authority of section

101 of Public Law 93-153 (30 U.S.C. 185(1)) as reimbursement of administrative and other costs incurred in processing pipeline right-of-way or permit applications and for costs incurred in monitoring the construction, operation, maintenance, and termination of any pipeline and related facilities, may be used to reimburese the applicable appropriation to which such costs were originally charged.]

[Funds available to the Forest Service shall be available to conduct a program of not less than $1,000,000 for high priority projects within the scope of the approved budget which shall be carried out by the Youth Conservation Corps as if authorized by the Act of August 13, 1970, as amended by Public Law 93-408.]

Notwithstanding the provisions of the Federal Grant and Cooperative Agreements Act of 1977 (31 U.S.C. 6301-6308), the Forest Service is authorized hereafter to negotiate and enter into cooperative arrangements with public and private agencies, organizations, institutions, and individuals to continue the Challenge Cost-Share Program.

[None of the funds available in this Act shall be used for timber sale preparation using clearcutting in hardwood stands in excess of 25 percent of the fiscal year 1989 harvested volume in the Wayne National Forest, Ohio: *Provided,* That this limitation shall not apply to hardwood stands damaged by natural disaster: *Provided further,* That landscape architects shall be used to maintain a visually pleasing forest.]

[None of the funds made available to the Forest Service in this Act shall be expended for the purpose of issuing a special use authorization permitting land use and occupancy and surface disturbing activities for any project to be constructed on Lewis Fork Creek in Madera County, California, at the site above, and adjacent to, Corlieu Falls bordering the Lewis Fork Creek National Recreation Trail until the studies required in Public Law 100-202 have been submitted to the Congress: *Provided,* That any special use authorization shall not be executed prior to the expiration of thirty calendar days (not including any day in which either House of Congress is not in session because of adjournment of more than three calendar days to a day certain) from the receipt of the required studies by the Speaker of the House of Representatives and the President of the Senate.]

[None of the funds made available to the Forest Service in this Act shall be expended for the purpose of administering a special use authorization permitting land use and occupancy and surface disturbing activities for any project to be constructed on Rock Creek, Madera County, California, until a study has been completed and submitted to the Congress by the Forest Service in consultation with the United States Fish and Wildlife, the United States Army Corps of Engineers, the California State Water Resources Control Board, the California Department of Fish and Game and other interested public parties regarding the project's potential cumulative impacts on the environment, together with a finding that there will be no substantial adverse impact on the environment. Findings from the study must be presented at no less than three public meetings.]

Any money collected from the States for fire suppression assistance rendered by the Forest Service on non-Federal lands not in the vicinity of National Forest System lands shall be used to reimburse the applicable appropriation and shall remain available until expended as the Secretary may direct in conducting activities authorized by 16 U.S.C. 2101 (note), 2101-2110, 1606, and 2111.

Of the funds available to the Forest Service, $1,500 is available to the Chief of the Forest Service for official reception and representation expenses.

Notwithstanding any other provision of law, the Forest Service is authorized to employ or otherwise contract with persons at regular rates of pay, as determined by the Service, to perform work occasioned by emergencies such as fires, storms, floods, earthquakes or any other unavoidable cause without regard to Sundays, Federal holidays, and the regular workweek.

[As a pilot effort, for the purpose of achieving ecologically defensible management practices, the Kaibab and Dixie National Forests are authorized to apply the value or a reasonable portion of the value of timber removed under a stewardship end result contract as an offset against the cost of stewardship services received including, but not limited to, site preparation, replanting, silviculture programs, recreation, wildlife habitat enhancement, and other multiple-use enhancements on selected projects. Timber removed shall count toward meeting the Congressional expectations for the annual timber harvest.]

[The Forest Service shall conduct a below-cost timber sales study on the Shawnee National Forest, Illinois, in fiscal year 1992.]

[The Forest Service shall work with the purchasers of sales already under contract on the Shawnee National Forest to achieve mutually acceptable modifications to said contracts so that the harvest of timber under such contracts may occur consistent with the expected management prescriptions and/or practices envisioned in the Draft Amendment to the Forest Plan for the Shawnee National Forest issued in 1991.]

[To the greatest extent possible, and pending final approval of the Draft Amendment to the Shawnee National Forest Plan, none of the funds available in this Act shall be used for preparation of timber sales using clearcutting or other forms of even aged management in hardwood stands in the Shawnee National Forest, Illinois.] *(Department of the Interior and Related Agencies Appropriations Act, 1992.)*

TITLE VII—GENERAL PROVISIONS

The following sections are proposed for deletion and do not appear below:

Sec. 701 ..... Hereafter, limits expenditures on consulting services obtained through procurement contracts of public record.

Sec. 706 ..... Hereafter, permits the Secretary to make advances of money to chiefs of field parties.

Sec. 711 ..... Hereafter, permits USDA employees to be loaned out to other agencies of the Department, without reimbursement, when not otherwise fully utilized; and staff year ceilings shall exclude overtime and staff years expended as a result of carrying out programs associated with natural disasters.

Sec. 712 ..... Limitation on the obligation of funds for personnel compensation and benefits.

Sec. 713 ..... Prohibition on the obligation of funds for services by contract unless a contract has been awarded and entered into, as provided by law.

Sec. 714 ..... Prohibition against implementing any regulation that has been disapproved pursuant to a resolution of disapproval.

Sec. 716 ..... Prohibition on the phase out of the Resource Conservation and Development Program.

Sec. 717 ..... Prevents prohibition of the Commodity Credit Corporation from selling commodities at below market prices.

Sec. 719 ..... Restrictions on payment to the General Services Administration for space rental and related costs.

Sec. 720 ..... Requirement that the Secretary of Agriculture shall construct not less than a specified number of new projects under Public Laws 566 and 534.

Sec. 721 ..... Hereafter, provides that funds may be used for translating USDA publications into foreign languages.

Sec. 722 ..... Prohibition on the use of funds to relocate the Hawaii State Office of the Farmers Homes Administration from Hilo, Hawaii, to Honolulu, Hawaii.

Sec. 723 ..... Hereafter, exempts veterinarians from constraints on personal services contracts under existing law.

Sec. 724 ..... Establishment of a floor for FTE levels at specific agencies and prohibition of program reduction below those levels.

Sec. 725 ..... Hereafter, permits funds appropriated in this Act may be used for one-year contracts which are to be performed in two fiscal years.

Sec. 728 ..... Prohibition on the use of funds to release information provided under the Agricultural Marketing Agreement Act subject to certain exceptions.

Sec. 729 ..... Prohibition on the use of funds by the Farmers Home Administration to employ or contract private debt collection agencies to collect delinquent loans, unless otherwise specified.

Sec. 730 ..... Prohibition on the use of funds to sell Agricultural Credit Insurance Fund loans. Requirement that borrowers shall have first refusal on sales of Rural Development Insurance Fund loans.

Sec. 731 ..... Prohibition on the use of funds to regulate the order or sequence of advances under approved telephone loans from the Rural Electrification Administration, the Rural Telephone Bank, or the Federal Financing Bank.

Sec. 739 ..... Hereafter, permits the use of funds to pay incidental expenses of volunteers engaged in the work of the Department.

Sec. 740 ..... Hereafter, requires that the Secretary shall complete sales of Farmers Home Administration inventory farms in accordance with rules and regulations in effect before November 28, 1990, and where a selection of a buyer is made before such date. Such sales will be completed as soon as the selection decision is administratively final, and priority shall be given to the former owner and members of the immediate family.

Sec. 741 ..... Requirement that coverage under section 2244 of the 1990 Authorization Act shall not exclude any crop of valencia oranges that was destroyed or damaged by freeze in 1990.

Sec. 742 ..... Limits loan subsidy rates to a level not to exceed those estimated by OMB in the President's Budget for fiscal year 1992.

Sec. 743 ..... Extends housing program authorities, and conforms the language of the guaranteed section 502 program to the direct loan program.

Sec. 744 ..... Requirement that the Secretary shall continue timely-processing and approval of section 515 loans for which low-income housing credits have been allocated, according to practices that were in effect on July 1, 1991.

SEC. [702] *701.* Within the unit limit of cost fixed by law, appropriations and authorizations made for the Department of Agriculture for the fiscal year [1992] *1993* under this Act shall be available for the purchase, in addition to those specifically provided for, of not to exceed [442] *659* passenger motor vehicles, of which [439] *654* shall be for replacement only, and for the hire of such vehicles.

SEC. [703] *702.* Funds in this Act available to the Department of Agriculture shall be available for uniforms or allowances therefore as authorized by law (5 U.S.C. 5901–5902).

SEC. [704] *703.* Not less than $1,500,000 of the appropriations of the Department of Agriculture in this Act for research and service work authorized by the Acts of August 14, 1946 and July 28, 1954, and (7 U.S.C. 427, 1621–1629), and by chapter 63 of title 31, United States Code, shall be available for contracting in accordance with said Acts and chapter.

SEC. [705] *704.* No part of the funds contained in this Act may be used to make production or other payments to a person, persons, or corporations upon a final finding by court of competent jurisdiction that such party is guilty of growing, cultivating, harvesting, processing or storing marijuana, or other such prohibited drug-producing plants on any part of lands owned or controlled by such persons or corporations.

SEC. [707] *705.* The cumulative total of transfers to the Working Capital Fund for the purpose of accumulating growth capital for data services and National Finance Center operations shall not exceed $2,000,000: *Provided,* That no funds in this Act appropriated to an agency of the Department shall be transferred to the Working Capital Fund without the approval of the agency administrator.

SEC. [708] *706.* New obligational authority provided for the following appropriation items in this Act shall remain available until expended: Public Law 480; [Mutual and Self-Help Housing;] Watershed and Flood Prevention Operations; Resource Conservation and Development; Colorado River Basin Salinity Control Program; Animal and Plant Health Inspection Service, *Boll weevil, and up to 10 percent of the Screwworm Program,* the contingency fund to meet emergency conditions, Integrated Systems Acquisition Project, [the reserve fund for the Grasshopper and Mormon Cricket Control Programs,] and buildings and facilities; Agricultural Stabilization and Conservation Service, salaries and expenses funds made available to county committees; the Federal Crop Insurance Corporation Fund; Agricultural Research Service, buildings and facilities; [Cooperative State Research Service, buildings and facilities;] Office of International Cooperation and Development, Middle-Income Country Training Program; [Dairy Indemnity Program;] higher education graduate fellowships grants under section 1417(b)(6) of the National Agricultural Research, Extension, and Teaching Policy Act of 1977, as amended (7 U.S.C. 3152(b)(6)); capacity building grants to colleges eligible to receive funds under the Act of August 30, 1890, including Tuskegee University; and buildings and facilities, Food and Drug Administration: *Provided,* That, hereafter, such appropriations are authorized to remain available until expended.

SEC. [709] *707.* No part of any appropriation contained in this Act shall remain available for obligation beyond the current fiscal year unless expressly so provided herein.

SEC. [710] *708.* Not to exceed $50,000 of the appropriations available to the Department of Agriculture in this Act shall be available to provide appropriate orientation and language training pursuant to Public Law 94–449.

SEC. [715] *709.* No funds appropriated by this Act may be used to pay negotiated indirect cost rates on cooperative agreements or similar arrangements between the United States Department of Agriculture and nonprofit institutions in excess of 10 per centum of the total direct cost of the agreement when the purpose of such cooperative arrangements is to carry out programs of mutual interest between the two parties. This does not preclude appropriate payment of indirect costs on grants and contracts with such institutions when such indirect costs are computed on a similar basis for all agencies for which appropriations are provided in this Act.

SEC. [718] *710.* Notwithstanding any other provision of this Act, commodities acquired by the Department in connection with Commodity Credit Corporation and section 32 price support operations may be used, as authorized by law (15 U.S.C. 714c and 7 U.S.C. 612c), to provide commodities to individuals in cases of hardship as determined by the Secretary of Agriculture.

SEC. [726] *711.* Funds appropriated by this Act shall be applied only to the objects for which appropriations were made except as otherwise provided by law, as required by 31 U.S.C. 1301.

SEC. [727] *712.* None of the funds in this Act shall be available to restrict the authority of the Commodity Credit Corporation to lease space for its own use or to lease space on behalf of other agencies of the Department of Agriculture when such space will be jointly occupied.

SEC. [714] *713.* From funds appropriated under this Act, not to exceed $4,000,000 may be used to implement international agricultural science, education, and development programs pursuant to section 1458(a) of the National Agricultural Research, Extension, and Teaching Policy Act of 1977, as amended. *(Agriculture, Rural Development, Food and Drug Administration, and Related Agencies Appropriations Act, 1992.)*

OFFICE OF INSPECTOR GENERAL—Continued

This appropriation provides agency-wide audit and investigative functions to identify and recommend corrections for management and administrative deficiencies that create conditions for existing or potential instances of fraud, waste, and mismanagement. The audits function provides internal audit, contract audit, and inspections services. Contract audits provide professional advice to agency contracting officials on accounting and financial matters relative to negotiation, award, administration, repricing, and settlement of contracts. Internal audits review and evaluate all facets of agency operations. Inspections services provide detailed technical evaluations of agency operations. The investigative function provides for the detection and investigation of improper and illegal activities involving programs, personnel, and operations.

Interest on loans; principal repayments from loans made under the Area Redevelopment Act, the Public Works and Economic Development Act of 1965, and the Trade Act of 1974; and proceeds from the sale of collateral are deposited in this fund. Interest payments on the amounts receivable on outstanding loans are made to the Treasury from the fund. Repurchases of loans guaranteed by EDA that have been terminated for default are made from this fund. Consistent with the Credit Reform Act of 1990, the Fund will now only be used for credit activities begun prior to 1992.

No new loan or guarantee activity is proposed for 1993. At present, the agency is reviewing its portfolio to determine the cost-effectiveness of conducting a major loan-asset sale.

The activities of this appropriation provide for the collection, compilation, and publication of a broad range of current statistics dealing with economic, demographic, and social data. The Economic Statistics Initiative will make fundamental improvements in the quality of economic statistics.

Current surveys and statistics—

Current economic statistics.—The business statistics program provides current information on sales and related measures of retail and wholesale trade and selected service industries. The 1993 increase for business statistics will im-

prove and expand service statistics by improving the measurement of services purchased by industry, improving small company financial data, expanding corporate financial data, and extending the coverage of the Service Annual Survey to include industries previously included only in the quinquennial Census of Service Industries. The collection of agriculture statistics on cotton ginning was transferred to the Department of Agriculture in FY 1992.

Construction statistics reports are provided on significant construction activity such as housing permits and starts, value of new construction, residential alterations and repairs, and quarterly price indexes for new single-family houses. The 1993 initiative will improve coverage of nonresidential additions and alterations; and will improve the quality of industrial plant construction data. The initiative will also allow the development of new methodologies to measure construction price changes.

Manufacturing statistics survey key industrial commodities and manufacturing activity, providing current statistics on the quantity and value of industrial output. The Census Bureau will reduce from monthly to quarterly the frequency of three Census reports relating to cotton fiber and soybean, cotton, and other fats and oils—M22P, M20J, and M20K reports. General economic statistics provide a Standard Statistical Establishment List (SSEL) of all U.S. business firms and their establishments, uniform classification data, annual county business data, participation in the development and operation of the National Trade Data Bank, and corporate financial data. The 1993 initiatives will expand available statistics and foster economic research on environmental practices; and allow the Census Bureau to perform comparison studies with the Bureau of Labor Statistics' list of establishments.

Foreign trade statistics provide for publication of monthly, cumulative, and annual reports on the quantity, shipping weight, and dollar value of imports and exports, by mode of transportation, detailed commodity category, customs districts, and country of origin or destination. The Census Bureau will improve commodity classifications for comparability and other activities in support of the Trade Act of 1974. The 1993 initiative will enhance the quality of foreign trade statistics through follow-up programs designed to reduce under-reporting in exports.

Government statistics reports are published annually regarding the revenue, expenditures, indebtedness and debt transactions, financial assets, employment, and payrolls of State and local governments. The Census Bureau provides quarterly information on State and local tax revenue on the national level by type of tax and governmental level, and provide information on financial assistance programs of the Federal government.

Current demographic statistics.—Household surveys provide information on the number, geographic distribution, and the social and economic characteristics of the population.

Population and housing analyses provide current demographic reports on the geographic distribution and on the demographic, social, and economic characteristics of the population, as well as current estimates and future projections of the population of the United States, and special analyses of demographic, social and economic trends. International statistics provide estimates of population, labor force, and economic activity, including spatial distribution, and analyses concerning aspects of demographic policies, economic policies, and trends for various countries. The Census Bureau compiles housing statistics on the Nation's housing inventory and provides national and regional estimates of housing vacancy rates.

Survey development and data services.—The *Statistical Abstract* that the Census Bureau prepares annually summarizes Government and private statistics of the industrial, social, political, and economic activities of the United States. The Bureau conducts general research on survey methods and techniques to find ways of improving the efficiency, accuracy, and timeliness of statistical programs. Data systems development provides advanced data capture, data processing, and information retrieval technology to meet Census Bureau program requirements.

Reimbursable program.—The Bureau of the Census undertakes work for other governmental agencies when it is more appropriate or efficient to have the work performed by the Bureau. Significant work includes collection of labor force and consumer expenditure data for the Bureau of Labor Statistics, national education and health program data for the Department of Education and the Department of Health and Human Services, and annual housing data for the Department of Housing and Urban Development.

This appropriation funds legislatively mandated censuses of economic and demographic areas once or twice each decade and other authorized periodic activities.

Economic statistics programs—

Economic censuses.—The economic censuses provide data on manufactures, mineral industries, retail and wholesale trade and service industries, construction, and transportation. The censuses are taken every fifth year, covering calendar years ending in two and seven.

FY 1993 is the fourth year in the six-year cycle of the 1992 Economic Censuses. Funds provide for the data collection year, which is the most important year in the processing cycle.

Census of governments.—This census collects State and local government data on taxes, tax valuations, governmental receipts, expenditures, indebtedness, and number of employees. This census is taken every fifth year for calendar years ending in two and seven.

The FY 1993 budget provides for collection and processing of data for the government finance, public employment, governmental organization, and taxable property value phases of the 1992 Census of Governments.

Census of agriculture.—This census covers the agricultural sector of the economy and includes the census of irrigation.

FY 1993 is the fourth year in the six-year funding cycle for the 1992 Census of Agriculture. The funding provides for the completion of the preparation of the Census mailing list; data collections and processing; and censuses of Puerto Rico, Guam, and the Virgin Islands.

Demographic statistics programs—

Intercensal demographic estimates.—This program provides updated population estimates for general purpose governmental units for use in the equitable allocation of funds by various Federal programs and for other purposes.

Decennial census.—FY 1993 is the last year of funding for the 1990 decennial census. We will complete many activities necessary to meet our goal to expedite the availability of the census data to users, and to finish releasing 1990 census data products. Also, we will continue our analysis of the Post-Enumeration Survey, the evaluation of 1990 coverage improvement programs, and the findings of other procedural, content, and coverage-related studies.

2000 Decennial Census.—Planning for the 2000 Decennial Census is an important priority in FY 1993. Social, demographic, and economic changes, such as shifts in the composition of the Nation's labor force, changing living arrangements, and new technology will necessarily call for changes in the conduct of the next census. The FY 1993 request is an estimate of funding needed to conduct a research and development effort (R&D) which will explore fundamental changes to the decennial census design that has been in place since mail-out/mail-back methods were introduced in 1970. This R&D effort will identify what changes are needed to adapt the census taking process to the needs and character of our Nation's society in 2000.

Sample redesign.—

This program provides for revisions to the statistical samples used for monthly, quarterly and annual household surveys.

Geographic support.—

This activity provides for the geographic requirements of the various periodic programs and involves accurate identification of both political and statistical areas, preparation of maps, and maintenance of geographic data base files. The program initiative provides for continued planning to enhance the power of the Topologically Integrated Geographic Encoding and Referencing (TIGER) system in cooperation with the U.S. Postal Service, and to investigate ways to ensure the portability of all TIGER software.

Data processing systems.—

This program provides the resources necessary to improve the data processing installation of the Bureau of the Census.

Economic analysis.—The objective of this activity is to provide a clear picture of the state of the economy through the preparation, development, and interpretation of the economic accounts of the United States. The Economic Statistics Initiative will make fundamental improvements in the quality of economic statistics. The principal programs are:

National economic accounts.—The national income and product accounts, summarized by the gross domestic product (GDP), provide an up-to-date overall view of national production, its distribution, and its use as shown by the interrelated receipts and expenditures of producers, consumers, investors, government, and the foreign customers of the United States. In 1993, increases are provided to maintain the quality of the GDP estimates and to modernize and extend the U.S. national economic accounts focusing on improvements recommended by the Economic Policy Council's Working Group on Economic Statistics.

International economic accounts.—The balance of payments accounts provide a comprehensive and detailed view of economic transactions between the United States and foreign countries. Work on international investment consists of the preparation, development, and analysis of estimates of U.S. direct investment abroad and foreign direct investment in the United States. In 1993, increases are provided to upgrade the international accounts focusing on improvements recommended by the Economic Policy Council's Working Group on Economic Statistics.

Regional economic accounts.—Regional economic measurement consists of the preparation, development, and analysis of economic accounts that show detail by region, State, metropolitan area, and county. Work on regional economic analysis consists of the preparation of analyses and projections of States and local areas.

Analysis of economic trends.—This work includes a system of leading, coincident, and lagging business cycle indicators and analyses of the economic situation.

Develop and acquire source data.—This work consists of upgrading the national and international economic accounts by the development and acquisition of new and improved source data, as called for in the Economic Statistics Initiative. The funds would be used to address high priority quality issues—accuracy, reliability, and timeliness.

Bureau of Economic Analysis (BEA) relocation.—BEA must relocate following the expiration of the current lease in August, 1993.

Policy support.—The objective of this activity is to support the Secretary, Under Secretary for Economic Affairs, and other Government officials in interpreting the state of the economy, and on matters relating to economic policy.

Reimbursable.—ESA provides economic and statistical data and analyses on a reimbursable and advance payment basis to other Federal agencies, individuals, and firms requesting such information. Funds received for these services cover the cost of performing this work.

The activities of the International Trade Administration in the Department of Commerce are intended to develop the export potential of U.S. firms in a manner consistent with national security and foreign and economic policy and to promote an improved trade posture for U.S. industry.

Trade development.—The trade development program assesses the competitiveness of various U.S. industries; performs trade and investment analyses in support of industry programs and trade policy; and conducts export promotion programs directed toward industry sectors.

International economic policy.—This program develops regional and multilateral economic policies; provides marketing services directly and through the Foreign Commercial Service which assist U.S. businesses in expanding exports; identifies long range trade and investment problems and develops remedial strategies. In 1993, increases are requested to begin a Japan Business Outreach Program, to provide and disseminate policy determining information related to U.S. Government initiatives in Latin America and the Caribbean, and to administer agreements arising from the proposed North American Free Trade Agreement and a new U.S.-Canada Free Trade Agreement.

Import Administration.—Import Administration investigates antidumping and countervailing duty cases to ensure compliance with applicable U.S. statutes and administers certain other statutory programs relating to imports and foreign trade zones. In 1993, an increase is requested for Import Administration to eliminate the backlog of administrative review and to cover an increase in the number of new cases. Additionally, an increase is requested to enable the timely processing of Foreign Trade Zone applications.

U.S. and foreign commercial service.—The U.S. and foreign commercial service counsels U.S. businesses on exporting through 47 District Offices in the United States and overseas offices in 67 countries. The program's goals are to increase the number of U.S. firms that export and the number of foreign markets to which they export; to provide export market information; to promote and facilitate participation of U.S. firms in trade shows; and to encourage and sponsor additional involvement by private, State and local organizations. Furthermore, in 1993, ITA will continue its counseling services to U.S. businesses through its automated Commercial Information System (CIMS) that will provide customized and proactive export assistance to U.S. businesses. An increase is requested to improve this system and provide access to the National Trade Data Bank while improving this program's office automation technology base. An increase is requested to strengthen the domestic office staff in order to reach more clients and increase export facilitation activities.

Reimbursable program.—This account includes receipts for services rendered to other Federal agencies and receipts received on a cost recovery basis from private entities for trade events and export information services.

The activities of the Bureau of Export Administration are designed to enforce U.S. export trade laws consistent with national security, foreign policy, and short supply objectives. The program strives to achieve a balance between the interests of U.S. exporters, the U.S. economy and U.S. national security requirements.

Management and policy coordination.—The management and policy coordination program controls the development, analysis, coordination, and consolidation of policy initiatives and responses within the Bureau of Export Administration.

Export administration.—The export administration program assures that export activity is consistent with national security and foreign policy requirements. In 1993, resources are requested to fund the President's Enhanced Proliferation Control Initiative (EPCI) to stop the spread of missile technology, chemical and biological weapons.

Export enforcement.—The export enforcement program detects and prevents the illegal distribution of controlled U.S. goods and technical data in violation of the export administration provisions of the U.S. Code. Responsibilities also include enforcement of prohibitions against participating in unsanctioned boycotts against countries friendly to the United States. Resources are requested to increase Commerce's enforcement of the antiboycott compliance provisions of the Export Administration Act.

Industrial resource administration.—The industrial resource administration program ensures the availability of industrial resources for national defense under the authority of the Defense Production Act.

In its leadership role of coordinating the minority business development program, the Minority Business Development Agency (MBDA) seeks to create improved national conditions within which the minority people of the United States will have an equal opportunity to participate in the American business system. In 1993, increased emphasis will be placed on expanded private sector and Federal Government involvement in the promotion of minority business development.

Enterprise Development.—This activity provides direct, general business services to minority individuals and firms seeking business information, counseling, financial packaging assistance and assistance in identifying and exploiting business opportunities, new and/or expanded markets and selected growth industries. Increases are requested to fund Centers of Excellence. These Centers will provide expanded and improved services.

Resource Development.—This activity provides for the indirect business assistance programs conducted by MBDA. These programs encourage minority business development by identifying and developing private markets and capital sources; decreasing minority dependence on government programs; expanding business information and business services through trade associations; promoting and supporting the mobilization of resources of Federal agencies and State and local governments at the local level; and assisting minorities in entering new and growing markets.

Advocacy, Research, and Information.—Within this activity, MBDA provides advocacy efforts, a research program, and information systems for formulating policy decisions and for reducing information barriers to improve the participation rate of minority-owned businesses in the U.S. economy.

The FY 1993 budget proposes to fund USTTA from direct appropriations. However, in FY 1993 fees for services will be increased bringing in a minimum of $3 million in additional revenue to be deposited in the general fund of the U.S. Treasury. The activities to be supported by USTTA fall into two broad categories:

International tourism development.—These activities include planning, developing and executing tourism promotion programs designed to stimulate U.S. earnings through international tourism and to facilitate the entry of medium and small American travel businesses into the international market. Resources are requested to leverage significant regional, State, city and industry resources to undertake a visit USA promotional campaign in the major tourism generating countries.

Executive direction.—These activities include policy guidance, executive management, and administrative support in the areas of fiscal planning, program implementation, management and evaluation.

National Ocean Service.—The National Ocean Service programs provide scientific, technical, and management expertise to (1) promote safe and efficient marine and air navigation; (2) assess the health of coastal and marine resources; (3) monitor and predict the coastal ocean and global environments; and (4) protect and manage the Nation's coastal resources. An increase is proposed to continue the integrated NOAA program in coastal ocean science which will continue to improve the monitoring, prediction and understanding of the environmental degradation of the coastal oceans.

National Marine Fisheries Service.—These programs provide for the management and conservation of the Nation's living marine resources and their environment, including marine mammals and endangered species. Increases are proposed for new fisheries initiatives including rebuilding the nation's fisheries, recovery of protected species, and protection of coastal fisheries habitat.

Oceanic and Atmospheric Research.—These programs provide: the understanding and technique development necessary to improve NOAA services (weather warnings and forecasts, solar-terrestrial services, climate predictions, and marine services); and the understanding of environmental systems necessary for national policy formulation (e.g., acid rain and ozone issues) and the enhanced use of ocean resources (e.g., fisheries, and water quality). A proposed increase for an integrated NOAA program in Earth System Science will continue NOAA's coordinated approach begun to 1989 to conduct research to improve predictions of global climate. The NOAA program is part of the coordinated government-wide, U.S. Global Change Research program. Other program changes principally involve decreases in research activities which primarily support State, regional or private sector interests.

National Weather Service.—These programs provide timely and accurate meteorologic, hydrologic, and oceanographic warnings, forecasts, and planning information to ensure the safety of the population, mitigate property losses, and improve the economic efficiency of the Nation. Additional funding is proposed for acquisition of Doppler weather radars (NEXRADs), the automated surface observing system (ASOS), an information processing and distribution system (AWIPS), a class VII supercomputer, and for a demonstration project to prove the capabilities of the new field office structure prior to its implementation. These acquisitions are part of a comprehensive program to modernize the National Weather Service. This modernization effort will enable the National Weather Service to provide improved weather forecasts and severe weather warnings through a nationwide network of 115 enhanced Weather Forecast Offices. Specialized weather services which can be conducted by the private sector will be reduced or eliminated.

National Environmental Satellite, Data, and Information Service.—These programs provide for the: operation of environmental polar-orbiting and geostationary satellites; and global environmental data and information products and services to users in commerce, industry, agriculture, science and engineering, the general public and Federal, State and local agencies. The 1993 funding will support procurement of replacement satellites for the polar-orbiting and geostationary systems.

No funds are proposed for operation of Landsat 6 because these costs will be covered by the contractor, the Earth Observation Satellite Company.
