FEDERAL PROGRAMS BY AGENCY AND ACCOUNT

EXPLANATORY NOTE

This section includes: 1) summary tables of budget authority and outlays by agency; and 2) a detailed tabulation containing information on budget authority (BA), outlays (O), and subfunctional code number(s) for each appropriation and fund account. Budget authority amounts reflect transfers of budget authority between appropriations. All budget authority items are definite appropriations except where otherwise indicated.

Congressional action on appropriations occasionally results in the establishment of a limitation on the use of a trust fund or other fund, or an appropriation to liquidate contract authority. Amounts for these and other such items, which do not affect budget authority, are included here in parentheses and identified in the stub column, but are not included in the totals.

NOTE. Amounts shown in the detailed tabulation are in millions of dollars. Amounts of $500 thousand or less are identified by an asterisk.

EXPLANATION OF ESTIMATES

"DETAILED BUDGET ESTIMATES" contains various tables and schedules in support of the budget. It includes explanations of the work to be performed and the money needed. It includes the language proposed for enactment by Congress on each item for which congressional action in an appropriations bill is required. It also contains the language proposed for the general provisions of appropriations acts that apply to entire agencies or groups of agencies.

ARRANGEMENT

The sections in this chapter reflect the branches of Government, and the cabinet departments, selected independent agencies, and other activities of the executive branch. The smaller agencies in the executive branch are grouped alphabetically in one section—"Other independent agencies."

Each section is organized by major subordinate organizations within the agency (usually bureaus) or by major program area. For each bureau or major program area, *Federal funds,* covering the funds that are not included in trust funds, precede *trust funds,* covering moneys that are held by the Government in accounts established by law or by trust agreement for specific purposes and designated by law as being trust funds. Within each fund group, accounts with new budget authority in 1994 generally will precede those without such an entry. By law, the Old-Age and Survivors Insurance and Disability Insurance trust funds are outside the budget totals. These accounts are presented in a separate section, Health and Human Services, Social Security. Also, by law the Postal Service Fund is outside the budget totals. A presentation for the Fund is included in the "Other independent agencies" section. Financing accounts presenting non-budgetary cash flows of credit and insurance programs are included for each affected agency.

The general provisions that are Government-wide in scope (identified "Departments, Agencies, and Corporations"), normally contained in the Treasury, Postal Service, and General Government Appropriations Act appear in a separate section following this one. The proposed language for general provisions of appropriations acts that are only applicable to the agency in each section appear at the end of that section. In some instances general provisions in an appropriations act may apply to two or more agencies. The first column of the following table lists the most recently enacted appropriations and the major agencies responsible for programs funded by each act. The second column provides the location of the general provisions that apply to the agencies listed in the first column.

FORM OF DETAILED MATERIAL

APPROPRIATIONS LANGUAGE

The language proposed for inclusion in the 1994 appropriations acts is printed following the account title. Language for 1993 appropriations, printed in roman type, is used as a base. Brackets enclose material that is proposed for deletion; italic type indicates proposed new language. At the end of the final language paragraph, and printed in italic within parentheses, are citations to any relevant authorizing legislation and to the specific appropriations act from which the basic text of the 1993 language is taken. Where appropriate, a note follows the language indicating that the budget authority proposed is for continuing activities for which additional appropriations authorization is or has been proposed. An illustration of proposed appropriations language for 1994 follows:

OPERATING EXPENSES

For necessary expenses of the Office of Climate Information, [$30,290,000] *$28,870,000* of which [$150,000] *$400,000* shall remain available until expended. (*34 U.S.C. 218 et seq.; Department of Government Appropriation Act, 1993.*)

The language proposed for general provisions is presented in the same fashion, except that the previously enacted language is not shown where whole sections or subsections of language are proposed for deletion.

BASIS FOR SCHEDULES

The 1992 column of this budget presents the actual transactions and balances for that year, as recorded in agency accounts.

For 1993, the regular schedules include enacted appropriations. In addition, indefinite appropriations are included on the basis of amounts likely to be required.

The 1994 column of the regular schedules includes proposed appropriations for all programs under existing legislation, including those that require extension or renewal of expiring laws.

Amounts for proposed new legislation are shown generally in separate schedules, following the regular schedules or in budget sequence in the respective bureau. These schedules are headed "Proposed for later transmittal under proposed legislation." Appropriations language is included with the regular schedules, but not with the separate schedules for proposed legislation. Necessary appropriations language will be transmitted later upon enactment of the proposed legislation. In some cases, when the amount requested in the budget is less than the amount required for the program level mandated in existing authorizing legislation (as in the case of certain entitlement programs), the reduced amount is reflected in the proposed appropriations language and the regular schedules.

PROGRAM AND FINANCING SCHEDULE

This schedule consists of several parts. In the "Program by activities" section, obligations generally are shown for specific activities or projects. The activity structure is developed individually for each appropriation or fund account to provide a meaningful presentation of information for the program being financed. That structure is tailored to the individual account and is not uniform across the Government. When the amounts of obligations that are financed from collections credited to an account (reimbursements and repayments) are significant, "Reimbursable program" obligations are shown separately from "Direct program" obligations. When the amounts are significant, "Capital investments" are shown separately from "Operating expenses." The last entry "Total obligations," indicates the minimum amount of budgetary resources that must be available to the appropriation or fund account in that year.

The "Financing" section shows the budgetary resources available or estimated to be available to finance the total obligations. First are unobligated balances of budgetary resources (that have not expired) brought forward from the end of the prior year. Next, those amounts that were available for obligation during the year and were not used, but continue to be available, are shown as an unobligated balance available, end of year. That balance is carried forward and usually obligated in a subsequent year. Other adjusting entries may be included. The residual is the amount of new budget authority required to finance the program. Where more than one kind of budget authority is provided, that information is shown. In some cases, provisions of law other than the appropriations language for the account increase or reduce the budget authority provided. In such cases, the public law number is usually indicated in the stub entry. For example, P.L. 99-177 refers to the Balanced Budget and Emergency Deficit Control Act of 1985, as amended, also known as the Gramm-Rudman-Hollings Act. In some cases, the availability of budgetary resources may be restrained by legally binding limitations on obligations. Such limitations are usually included in appropriations language.

The "Relation of obligations to outlays" section shows the difference between obligations, which may not be paid in the same year in which they are incurred, and outlays. The amount of obligations that were incurred in previous years but not paid are entered as an obligated balance, start of year. Similarly, an end of year obligated balance is entered. Certain adjusting entries may be included. The residual is the amount of outlays resulting from the payment of obligations incurred in that year and previous years.

The "Adjustments to budget authority and outlays" section shows deductions for offsetting collections for those accounts that are credited with such collections. The amounts are listed by source—Federal funds, trust funds, non-Federal sources, or off-budget Federal accounts. The total amount of collections is deducted from gross budget authority and from gross outlays to derive net budget authority and outlays. For accounts with limitations on the authority to spend offsetting collections, the balance of any amount of that is unavailable

for obligation is shown in a separate "Schedule on Unavailable Collections."

NARRATIVE STATEMENT OF PROGRAM AND PERFORMANCE

Narrative statements present briefly the objectives of the program and the work to be financed primarily for 1994. Measures of expected performance may be included, and the relationship to the financial estimates is described.

There is shown for each account a schedule of obligations, according to the following uniform list of object classifications:

10 PERSONAL SERVICES AND BENEFITS
- 11 Personnel compensation

These object classes reflect the nature of the things or services purchased, regardless of the purpose of the program for which they are used.

Several of the object classes are divided into subclasses—personnel compensation, for example, is shown separately for full-time permanent employees, for other than full-time employees, and for certain other payments.

Except for revolving funds, reimbursable obligations are aggregated in a single line and not identified by object class. Data, classified by object, are illustrated in the following schedule:

BUSINESS-TYPE BUDGET STATEMENTS

Business-type budget statements are presented for activities specifically required by the Government Corporation Control Act and generally for other revolving and trust revolving funds conducting business with the public. They are occasionally presented for funds conducting business within the Government.

Statement of Revenue and Expense

For many revolving funds there is a statement of revenue and expense that shows the resulting net income or loss for the year. This statement usually includes accrued revenue (e.g., revenue earned) and accrued expenditures (e.g., including costs incurred but not yet paid), whether funded or unfunded.

Statement of Financial Condition

The statements of financial condition show assets, liabilities, and equity for the fund at the close of each fiscal year. In addition to this information, which is similar to commercial balance sheet data, budget needs also require additional information, shown in the equity section. A disclosure is made of obligations incurred that have not yet accrued into liabilities (undelivered orders) and of budgetary resources for which no funding has been received (unfinanced budgetary resources). Unfinanced budgetary resources include orders from Federal customers that have not been filled (unfilled orders), and unfinanced budget authority in the form of authority to borrow for which borrowing has not taken place, and contract authority for which liquidating cash has not been received. Orders received from the public must be accompanied by advance payment. The amounts in the 1991 column are unaudited and subject to change at the end of June 1992.

FEDERAL CREDIT SCHEDULES

Federal credit programs provide benefits to the public in the form of direct loans and loan guarantees. The Federal Credit Reform Act of 1990 requires that the estimated costs arising from the direct and guaranteed loans of a program be calculated. The cost is the estimated long-term cost to the Government of a direct loan or a loan guarantee, calculated on a net present value basis, excluding administrative costs. For most programs, direct loan obligations and loan guarantee commitments cannot be made unless appropriations for the cost have been provided in advance in annual appropriations acts. In addition, annual limitations on the amount of obligations for direct loans and commitments for guaranteed loans may be enacted in appropriations language.

Appropriations for costs are recorded as budget authority in credit program accounts. In addition, the administrative expenses associated with a credit program are financed in the program account. All cash flows arising from direct loan obligations and loan guarantee commitments are recorded in separate financing accounts. The transactions of the financing accounts are not included in the budget totals. The program accounts make subsidy payments, recorded as on-budget outlays, to the financing accounts at the time of the disbursement of the direct or guaranteed loans.

The transactions associated with direct loan obligations and loan guarantee commitments made prior to 1992 continue to be accounted for on a cash flow basis and are recorded in liquidating accounts. In most cases, the liquidating account is the account that was used for the program prior to the enactment of the 1990 requirements.

Program and Financing schedules (described above) are shown for program, financing, and liquidating accounts. In addition, a Summary of Loan Levels, Subsidy Budget Authority, and Outlays by Program schedule is shown for program accounts. Status of Direct Loans and Status of Guaranteed Loans schedules (as applicable) are shown for liquidating accounts and financing accounts. Examples of these schedules are shown below. Summary information on Federal credit programs is provided in the section entitled "Federal Credit" in the chapter "Summary Information."

ALLOCATIONS BETWEEN AGENCIES

In some cases, funds appropriated to the President or to an agency are allocated to one or more agencies that help to carry out a program. Obligations incurred under such allocations are included in the data for the account to which the appropriation is made in the allocating agency. The object classification schedule for such accounts identifies the amount of such obligations by performing agency. A note at the end of a bureau or equivalent grouping identifies allocations received from other agencies.

BUDGETS NOT SUBJECT TO REVIEW

In accordance with law or established practice, the presentations for the Legislative Branch, the Judiciary, the Milk Market Orders Assessment Fund of the Department of Agriculture, the Farm Credit Administration, and the International Trade Commission have been included, without review, in the amounts submitted by the agencies.

The budgets of the privately owned Government-sponsored enterprises and the Board of Governors of the Federal Reserve System, are not subject to review; they are included for information purposes only.

The Judiciary Office Building Development Act, Public Law 100-480, among other purposes, authorizes the Architect of the Capitol to contract for the design and construction of a building adjacent to Union Station in the District of Columbia to be leased to the Judicial Branch of the United States. This schedule reflects the transfer of funds authorized by the Act and the costs associated with the construction of the building. Costs of construction are financed by an initial $125,392 thousand of Federal agency debt (accrual value) issued in 1989.

Estimates prepared by the Legislative Branch assumed the financial arrangements to be a lease-purchase, which would distribute outlays associated with acquisition of the building over a period of thirty years. However, the arrangements involve federally guaranteed financing and other characteristics that make them substantively the same as direct federal construction, financed by direct federal borrowing. Because estimated expenditures of the Legislative Branch are required to be included in the budget as submitted and without change, this separate schedule is included as an adjustment to reflect direct construction costs and associated interest costs, consistent with standard budget concepts and scoring conventions.

Personal services and necessary expenses to provide support for the basic operations of the Library are financed from this appropriation.

Collections services.—The largest administrative unit of the Library of Congress, both in budget and in staff, has as its mission the acquisition of materials; the cataloging, classification, and preparation of materials for use; the preservation of materials for use now and in the future; and serving the public and managing the Library's universal collections, which are the largest in the world. Support services—network development, automation planning, in-service training activities, technical processes research, and, in conjunction with Constituent Services, the Library-wide collection development planning and operations—complement the mission work of the service unit. Collections Services provides many basic technical services to the Library of Congress as well as the world's research and library communities.

Constituent services.—This program serves the public by maintaining the general collections and the general reading rooms. It also develops, produces, markets, and distributes the printed catalog cards, cataloging data in machine-readable form, book catalogs, technical publications, and selected bibliographies made available from the automated data bases. In cooperation with the Collections Services program, this program sets collections policy. This program also coordinates Federal library and information resources.

Cultural affairs.—The Cultural Affairs Service Unit contributes directly to the nation's educational and intellectual life through programs that interpret the Library's resources and promote the use of its unparalleled collections. Ten organizational units are combined to accomplish this purpose including the American Folklife Center, the Center for the Book, the Office of Education Services, the Global Library Project, and the Offices of Communications (Public Affairs and Publishing), Development, Interpretive Programs, Scholarly Programs, Poetry and Literature, and Special Events and Public Programs.

Law library.—The Law Library is responsible for the custody, development, and service of the law collection of the Library of Congress and functions as the foreign and international law research arm of the United States Congress.

Management support services.—This activity supports the executive staff of the Office of the Librarian: budget and finance; human resources; contracts and logistics; buildings management; automation; special projects; and other centralized services. It also includes rental of space off Capitol Hill.

The Copyright Office is responsible for registering and recording copyright claims, assignments, and renewals, for supplying copyright information to the public, for collecting and accounting for copyright fees, and for publishing complete and indexed catalogs for each class of copyright entries. The Office is conducted for the most part on a self-sustaining basis. The amount requested is substantially counterbalanced by fees received for services rendered and the value of books and other library materials deposited in accordance with the Copyright Act and transferred to the Library of Congress. The income and obligations for 1992, and estimates for 1993 and 1994 are as follows:

Income:	*1992 actual*	*1993 est.*	*1994 est.*
Gross receipts	$15,993,412	$16,717,000	$16,885,000
Estimated value of materials deposited and transferred to the Library of Congress	12,133,928	12,500,000	13,000,000
Total income	$28,127,340	$29,217,000	$29,885,000
Obligations	$25,842,000	$26,228,000	$27,771,000

The efforts described under each of the activities are predicated on an estimated 635,000 copyright registrations during 1994, an estimated 635,000 during 1993, and registrations of 655,000 during 1992.

Receiving and accounting for applications, fees, and correspondence.—Materials received by the Copyright Office are assembled and routed; accounts are maintained for all moneys received; records relating to the registration of copyrights are filed; and materials are deposited in accordance with the Copyright Act.

Examining copyright applications.—All applications and deposits are examined before issuance of registration certificates or recordings of documents to determine whether the provisions of the Copyright Act have been satisfied.

Indexing and cataloging materials received.—The Register of Copyrights is required to publish complete and indexed catalogs of all items registered. The catalog entries prepared by the Copyright Office are made available to the public and the Library. It is estimated that for 1994 the number of items to be cataloged will be 655,000.

Reference service.—The Copyright Office makes information available to the public concerning the provisions of the Copyright Act, including procedures, policies, and rulings. Information concerning registrations is furnished on a fee basis.

Publishing the catalog of copyright entries and bulletins of decisions.—Catalogs for each class of copyright entries and bulletins of copyright decisions are published and made available to the public.

General supervision and legal services.—The work of the Copyright Office includes legal supervision and research into the present copyright law and international copyright relations. It also involves a study of improvement of the domestic law and our international copyright relations.

Licensing Division.—The Licensing Division performs the responsibilities connected with the licensing activities of cable television stations and satellite carriers and the licensing of jukeboxes and the licensing of digital audio recording devices and media.

Acquisitions.—The Copyright Acquisitions Division is responsible for the acquisition of domestic and international materials in various formats for the collections of the Library of Congress through the enforcement of the mandatory deposit requirement as stated in section 407 of the Copyright Act of 1976 (Title 17, U.S.C.).

Policy analysis and research.—The Congressional Research Service provides objective, nonpartisan analytical and consultative services to the Members and committees of Congress, assisting them in the analysis, appraisal, and evaluation of any subject matter of legislative concern, including recommendations submitted to the Congress by the Executive Branch. Research services are also provided to assist Congress with its oversight, representative, and other responsibilities. Support takes the form of background studies, in-depth policy analyses, consultations, briefings, legal research, continuous liaison with committees, assistance with committee hearings, public policy seminars for Members and congressional staff, and related data and materials. In order to respond most effectively to the broad range of congressional inquiries, the Service supplements individually tailored products with Issue Briefs, Reports, Committee Prints, and "Info Packs", which are collections of both CRS products and carefully selected materials from outside sources that provide background material on issues of very high congressional interest. Lists of subjects and policy areas that a committee might profitably pursue are periodically made available to each congressional committee. As provided by statute, the Service prepares decennially the Constitution of the United States—Analysis and Interpretation, and supplements at 2-year intervals, prepares compendiums for the annual national high school and college debate topics, and provides assistance to the Congressional Budget Office, the Office of Technology Assessment, and the General Accounting Office.

Documentation and status of legislation.—The Service prepares summaries of all public bills and resolutions introduced in Congress, the status of bills receiving action, and various pertinent indexes. The information is made available to Congressional offices on SCORPIO, the Library's online system. Daily additions and changes keep the file current with the latest summaries and bill status. Upon request, the Service prepares legislative history memorandums on bills for which hearings have been announced, and compiles and makes available to each committee reports on legislatively authorized programs and activities within that committee's jurisdiction that are scheduled to terminate during the current Congress.

Information and reference service.—The Congressional Research Service provides extensive information and reference assistance to Members and committees. Reference files containing clippings, pamphlets, and documents and automated information services are maintained for rapid information retrieval. Lists of selected reports, prepared by CRS staff on legislative issues, are regularly distributed to congressional offices. To provide faster responses and in-person services, the Service also maintains reference centers in congressional office buildings and the Congressional Reading Rooms in the Madison and Jefferson Buildings of the Library of Congress.

Executive direction and support.—Providing overall supervision and administrative support to the entire Congressional Research Service is the responsibility of the Office of the Director and the administrative personnel.

The National Library Service for the Blind and Physically Handicapped (NLS) is responsible for administering a national program to provide reading material for blind and physically handicapped residents of the United States and its outlying areas and for U.S. citizens residing abroad.

Direct service to users.—During the past 5-year period, 1988–92, the blind and physically handicapped readership throughout the country has grown from 710,510 to 802,000 and circulation from approximately 19,742,000 units (volumes and containers) to almost 22,977,000.

Support services.—A variety of professional, technical, and clerical functions are performed by NLS's staff. A combined total of 17,100 interlibrary loan searches or information concerning library and related services available to the blind and to other physically handicapped persons were received in 1992, and approximately 3,300 copyright permissions were granted.

The Office of the Superintendent of Documents operates under a separate appropriation, which provides funds for: (1) the mailing for Members of Congress and other Government agencies of certain Government publications, as authorized by law; (2) the distribution of Government publications to designated depository libraries; (3) the compilation of catalogs and indexes of Government publications; and (4) the distribution of Government publications in the International Exchange Program. These four functions are related to the publication activity of other agencies and to the demands of the public, Members of Congress, and depository libraries. Consequently, the Office of the Superintendent of Documents can exercise little control over the volume of work which it may be called upon to perform. A description of these four functions follows:

Distribution for other Government agencies and Members of Congress.—The Office of Superintendent of Documents maintains mailing lists and mails, at the request of Government agencies and Members of Congress, certain publications specified by public law.

Depository library distribution.—As required, Government publications are supplied to libraries which are designated as depositories for Government publications.

Cataloging and indexing.—The Office of Superintendent of Documents is charged with preparing catalogs and indexes of all publications issued by the Federal Government. The principal publication is the "Monthly Catalog of U.S. Government Publications."

International exchange.—The Office of Superintendent of Documents distributes Government publications to foreign governments which agree, as indicated by the Library of Congress, to send to the United States similar publications of their governments for delivery to the Library of Congress.

The Government Printing Office executes orders for printing, binding, and blankbook work, placed by Congress and the various agencies of the Federal Government, and furnishes on order, blank paper, inks, and similar supplies. The Government Printing Office also sells publications to the public through its sales of publications program and distributes publications to the public for other Government agencies.

All such work is financed through the Government Printing Office revolving fund (44 U.S.C. 309). The fund is reimbursed by the customer agencies, receipts from sales of publications to the general public, and, except for the excess of receipts over costs associated with the sale of publications to the public, net operating income is retained for reuse by the fund.

The U.S. Tax Court hears and decides cases involving deficiencies in Federal income, estate and gift taxes and in excise taxes relating to public charities, private foundations, qualified pension plans, and real estate investment trusts. The Tax Court also renders declaratory judgments regarding the qualification or continuing qualification (including revocation of rulings on the exemptions) of retirement plans.

The Tax Court has jurisdiction to render declaratory judgments with respect to exempt organization status determinations pursuant to section 501(c)(3), Internal Revenue Code, and to enter declaratory judgments on the tax treatment of interest on proposed issues of governmental obligations. In addition, the court has jurisdiction over actions to restrain disclosure and to obtain additional disclosure with respect to public inspection of written determinations issued by the Internal Revenue Service, and actions to compel the disclosure of the identity of third-party contacts relating to written determinations made by the Internal Revenue Service.

The Tax Court has jurisdiction to restrain the premature assessment and collection of any tax that is the subject of a petition before the Court, to review post-petition jeopardy levies and jeopardy assessments, to review Internal Revenue Service determinations to sell property seized pursuant to a jeopardy assessment, and to award administrative and litigation costs.

For 1994, the court proposes a trial program of 390 weeks consisting of 250 weeks of regular trial sessions and 140 weeks of small tax case sessions. Trials are held in approximately 80 cities throughout the United States.

Statistics on the actual and estimated number of cases before the court are presented in the following tabulation:

This appropriation provides for the statutory fees and allowances of jurors, refreshments of jurors, and compensation of land commissioners appointed in condemnation cases pursuant to Rule 71A(h) of the Federal Rules of Civil Procedure. Budgetary requirements depend largely on the volume and length of jury trials demanded by the parties to both civil and criminal actions and the number of grand juries being convened by the courts at the request of United States attorneys.

The United States Sentencing Commission was established pursuant to provisions of the Comprehensive Crime Control Act of 1984 (Public Law 98-473, Title II), as amended. The purposes of the Commission are to establish and amend sentencing guidelines for the United States district courts and other sentencing policies and practices for the Federal criminal justice system. The Commission is also charged with developing means of measuring the degree to which the sentencing, penal, and correctional practices are effective in meeting the purposes of sentencing as set forth in new section 3553(a)(2) of Title 18, United States Code, by section 212(a) of the Act.

This includes a broad spectrum of research related to prison impact, recidivism, deterrence, rehabilitation, just punishment, incapacitation, and other areas. The Commission has specific responsibilities to: develop and maintain a comprehensive data base in order to analyze court application of the guidelines; evaluate the effects of guideline implementation in meeting statutory goals; develop training programs and provide assistance to probation officers and others in the criminal justice system on the application of sentencing guidelines. Various other criminal statutes, such as the Crime Control Act of 1990 (Public Law 101-647), contain provisions which the Commission must implement.

The International Bank for Reconstruction and Development (World Bank) finances development projects in less developed countries. By applying banking principles to the achievement of development goals, it promotes increased economic productivity and helps developing economies meet more of the basic needs of their people. Since being founded in 1945, the Bank has made loan commitments of approximately $218 billion.

The Bank's FY 1992 lending program included new loan commitments of $15.2 billion to 43 countries. More than one-half of IBRD lending attracted some form of co-financing from official or private lenders.

The Global Environment Facility (GEF) was created as a three-year pilot collaboration among the World Bank, the United Nations Development Program and the United Nations Environment Program. Originally capitalized with approximately $1.3 billion in resources from both direct contributions to the Global Environment Trust Fund of the GEF and co-financing arrangements, the GEF provides concessional financing to developing countries to address the problems of global warming, ozone depletion, the loss of biodiversity and the pollution of international waters. The pilot phase of the GEF will expire in 1994.

International negotiations are underway to restructure the GEF as a permanent entity. The Administration is committed to the successful conclusion of these negotiations and to the creation of a transparent and accountable GEF that can serve as the funding source for achieving global environmental benefits, including those related to the Climate Change and Biodiversity conventions.

The Administration's request for 1994 consists of: $70.1 million in budget authority for paid-in capital subscriptions and $2.3 billion in program limitations for callable capital subscriptions to make the final installment on the U.S. share of a $74.8 billion general capital increase. For the GEF, the Administration requests $31 million in budget authority for a direct contribution.

The International Development Association (IDA), a member of the World Bank Group, provides development financing on highly concessional terms to the world's poorest and least creditworthy nations. IDA is the largest source of multilateral lending that is extended on concessional terms to developing countries. Projects have to meet the same economic, financial, and environmental standards as other World Bank projects.

By June 30, 1992, IDA had extended credits totaling $71 billion for development projects. IDA operations place special emphasis upon poverty alleviation, women in development, and the environment. During World Bank FY 1992, IDA made new commitments of almost $6.6 billion.

The International Finance Corporation (IFC), a member of the World Bank Group, was established in 1956 to further economic development by encouraging the growth of private enterprise in developing countries. IFC provides and mobilizes loans and equity investments for promising ventures, and provides technical assistance. The IFC is now playing an important role in the former Soviet Union and Eastern Europe's transition to free markets and private enterprise, due to the IFC's special expertise in foreign investment, capital markets development, and privatization.

During World Bank FY 1992 the Corporation approved 167 new investments totalling $3.2 billion and net investments for the IFC's own account were $1.8 billion. For every dollar invested by the IFC, an average of nearly $6 was supplied by other lenders and investors. Total project costs were $12 billion.

The 1994 request includes budget authority of $50.0 million for the third installment of the U.S. share of the $1.0 billion General Capital Increase.

The Special Assistance Initiatives were inaugurated in 1990 with $160 million for the initial U.S. contribution to the Philippines Multilateral Assistance Initiative (MAI). This initiative by multilateral and bilateral donors with the private sector will provide assistance to the Philippines to support democracy and economic restructuring. Obligation of U.S. resources is based on agreements with the Philippine government on specific programs, projects, and economic and administrative reforms.

The appropriation of funds under the Support for East European Democracy (SEED) Act was incorporated into this account in 1991. This program supports the efforts of Central and Eastern European countries, including the new Baltic republics, to restructure their economies, improve the environment and advance democratic reforms.

This proposal will provide funds for an expanded program of assistance to the independent states that emerged from the former Soviet Union. Continued progress toward democratic governments and market economies in these states is crucial to U.S. national security and is one of the highest objectives of U.S. foreign policy. These goals are also important to U.S. domestic economic health and strength. Reversals of progress in this region could lead to greater expenditures of scarce resources on defense in the future. Therefore, $703,820,000 is proposed for fiscal year 1994.

Section 608 of the Foreign Assistance Act of 1961, as amended, created a revolving fund to finance the acquisition and rehabilitation at minimal cost of U.S. Government-owned excess property for purchase by friendly countries and eligible organizations, for use in conjunction with economic development programs. Excess property, most of it obtained from the Department of Defense, includes heavy construction equipment, vehicles, heavy machinery, electrical generating equipment, and medical equipment and supplies. The program is self-financed from service fees and reimbursements by equipment purchasers ultimately funded from development assistance appropriations to the Agency for International Development.

President Bush launched the Enterprise for the Americas Initiative (EAI) in an effort to build closer and more productive relations with Latin America and the Caribbean. The EAI aims to boost trade, investment, and growth throughout the hemisphere. One element of the Initiative involves the reduction of bilateral debt to the USG and the dedication of local currency interest payments to support environmental projects. Countries would become eligible for such debt reduction if they: (1) are pursuing economic reform programs with the IMF and World Bank; (2) are pursuing major investment reforms through an IDB loan or on their own; and, if appropriate, (3) have agreed with their commercial banks on a satisfactory financing program.

As required by the Federal Credit Reform Act of 1990, this account records, for this program, the subsidy costs associated with restructuring debt. Budget authority and outlays are calculated as the difference between the net present value of expected payments on existing loans and the net present value of payments after the debt has been reduced.

Recruitment and development education.—This activity provides for volunteer recruitment and selection, development education, and related activities of the Peace Corps. In 1994, approximately 3,845 trainees qualified to enter Peace Corps service will be selected.

Program development and support.—This activity funds the administrative expenses and general overhead costs associated with the Peace Corps program, including reimbursements to the Department of State for administrative support overseas.

The Foundation plans to fund development projects in 22 African countries in 1994.

Direct development assistance.—Funds associated with this activity are used to award grants to African grassroots organizations to fund development projects. In 1994, the Foundation plans to award 90 new grants in 22 countries.

As part of a general increase in IMF quota resources, from SDR 97.4 billion (about $135 billion) to SDR 144.8 billion (about $201 billion), the U.S. quota was increased in December, 1992 by SDR 8,608.5 million (about $12 billion), from SDR 17,918.3 million (about $25 billion) to SDR 26,526.3 million (about $37 billion). As required by established procedures U.S. participation in the quota increase received budget authorization and appropriation for the full amount of the increase. The increase in the U.S. quota involved no net budget outlays. Similarly, use by the IMF of the quota commitment does not result in net budget outlays, because the United States receives an increase in its international monetary reserves corresponding to any transfer of dollars under the U.S. quota subscription. The United States can use these interest-bearing reserves automatically to meet a balance of payments financing need.

Members of the IMF are obligated to maintain the value of their currency, held by the IMF, in terms of the SDR—the unit of account of the IMF. When the dollar appreciates (depreciates) against the SDR, the cost of maintaining these holdings decreases (increases), and an appropriate adjustment is made in the U.S. account with the IMF. This valuation adjustment occurs at the end of the IMF fiscal year, April 30th. Budget authority is provided in years when the maintenance of value adjustment results in an increase in the value of IMF dollar holdings, but such adjustments do not result in any immediate cash transfers to the IMF. In fiscal year 1992, the maintenance of value adjustment resulted in an increase in the dollar value of IMF dollar holdings equivalent to $326 million.

The General Arrangements to Borrow (GAB) were established in 1962 by 10 industrial countries, including the United States, as a means of supplementing the IMF's resources when needed to forestall or cope with an impairment of the international monetary system. Each participant agreed to provide specific amounts of its currency to help finance drawings from the IMF by another GAB participant. GAB members agreed in early 1983 to increase their financial commitments to the GAB and to allow the IMF, in certain strictly defined circumstances, to activate the GAB to provide financing for any IMF member. Total GAB commitments were increased from approximately SDR 6.3 billion to SDR 17 billion, with the U.S. share rising from $2.0 billion to SDR 4.250 billion, approximately $6.26 billion at the September 30, 1992 exchange rate. Financing extended by the United States under the GAB does not result in any net budget outlays because the United States receives an increase in its international reserve assets corresponding to any transfer to the IMF under the U.S. credit line.

During 1992, no calls were made on the U.S. commitment under the GAB, and no U.S. loans were outstanding at the end of the fiscal year.

The Enhanced Structural Adjustment Facility (ESAF) was created in 1987 to enable the International Monetary Fund to provide balance of payments assistance on concessional terms to low-income developing countries with protracted payments problems which are prepared to adopt multi-year economic and structural reform programs. It is a critical element of international efforts to address the serious economic problems confronting the poorest countries, particularly in Sub-Saharan Africa.

The resources of the ESAF are being provided through loans and special interest subsidy contributions by member countries. Loans will be disbursed over a three-year period with repayments in 10 equal semiannual installments beginning 5½ years and ending 10 years from the date of disbursement. It is envisaged that total loans will amount to SDR 5.3 billion (nearly $7.5 billion) and that interest subsidy contributions will help achieve a concessional interest rate of ½ of 1 percent.

ECONOMIC SUPPORT FUND ASSISTANCE FOR ISRAEL

The Congress recognizes that, in fulfilling its obligations under the Treaty of Peace Between the Arab Republic of Egypt and the State of Israel, done at Washington on March 26, 1979, Israel incurred severe economic burdens. Furthermore, the Congress recognizes that an economically and militarily secure Israel serves the security interests of the United States, for a secure Israel is an Israel which has the incentive and confidence to continue pursuing the peace process. Therefore, the Congress declares that it is the policy and the intention of the United States that the funds provided in annual appropriations for the Economic Support Fund which are allocated to Israel shall not be less than the annual debt repayment (interest and principal) from Israel to the United States Government in recognition that such a principle serves United States interests in the region.

(b) During the current fiscal year, the Secretary of State shall promptly notify the committees designated in subsection (a) whenever any helicopters or other aircraft for military use are provided to any country in Central America by any foreign country.

ENVIRONMENT

SEC. 532. (a) It is the policy of the United States that sustainable economic growth must be predicated on the sustainable management of natural resources. The Secretary of the Treasury shall instruct the United States Executive Director of each multilateral development bank (MDB) to continue to promote vigorously the environmental and energy initiatives established in section 533(a) of the Foreign Operations, Export Financing, and Related Programs Appropriations Act, 1991 (Public Law 101-513). The Secretary of the Treasury, in cooperation with the Secretary of State, shall also undertake direct, bilateral discussions with appropriate officials of the governments of the member nations of the Organization for Economic Cooperation and Development with a goal of building greater international support for the environmental goals established in subsection (d) of this section. The Secretary of the Treasury shall submit a report to the Committees on Appropriations by March 1, 1993, which describes the progress of these bilateral discussions.

(b) The Secretary of the Treasury shall, not later than March 1, 1993, submit a report to the Congress containing the same information as requested in section 533(b) of Public Law 101-513.

(c)(1) In furtherance of the policies contained in section 533(a) of Public Law 101-513 and section 1308 of the International Development and Finance Act of 1989 (Public Law 101-240), and as a basis for measuring more effectively progress by the MDBs toward improved environmental performance, the Secretary of the Treasury shall instruct the United States Executive Directors of the MDBs to encourage each MDB, at a minimum, to meet the benchmarks established in paragraph (2) in the areas of sustainable energy development, forest conservation, forced displacement of populations, and environmental impact assessment. On March 1, 1993 and March 1, 1994, the Secretary of the Treasury shall submit a report to the Congress describing in detail the progress being made by the MDBs in meeting these benchmarks.

(2) For the purposes of paragraph (1), benchmarks are as follows:

(A) In the area of sustainable energy development—

(i) all loans in the energy sector should be based on, or support development of, "least-cost" integrated resource plans. Such plans shall include analyses of possible end-use energy efficiency measures and nonconventional renewable energy options, and such plans shall reflect the quantifiable environmental costs of proposed energy developments;

(ii) a substantial portion of loans and grants in the energy, industry, and transportation sectors shall be devoted to end-use energy efficiency improvements and nonconventional renewable energy development; and

(iii) all organizational units within the MDBs should create staff positions in a management role in end-use efficiency and renewable energy, which positions shall be staffed by individuals with professional experience in program design and management and educational degrees in relevant technical disciplines.

(B) In the area of forest conservation—

(i) forestry loans should not support commercial logging in relatively undisturbed primary forests, nor should loans result in any significant loss of tropical forests;

(ii) forestry loans should not be disbursed until legal, economic, land tenure, and other policy conditions needed to ensure sustainability are in place;

(iii) loans should not support mineral, petroleum, or other industrial development in, or construction or upgrading of roads through, relatively undisturbed primary forests unless adequate safeguards and monitoring systems, developed in consultation with local populations, are already in place to prevent degradation of the surrounding forests;

(iv) loans should be consistent with and support the needs and rights of indigenous peoples and other long-term forest inhabitants and should not be made to countries which have shown an unwillingness to resolve fairly the territorial claims of such people; and

(v) support for protection of biological diversity, in close consultation with local communities, should be increased to account for a larger proportion of MDB lending.

(C) In the area of forced displacement of populations—

(i) the World Bank, Inter-American Development Bank, and Asian Development Bank should maintain a listing, available to the Secretary of the Treasury, of all ongoing projects involving forced displacement of populations, including the number of people displaced and a report on the status of the implementation

of their resettlement policy guidelines for each such project, and obtain agreements with borrowers to ensure that all ongoing projects involving forced displacement will be in full compliance with their resettlement policy guidelines by mid-1993; and

(ii) the African Development Bank should adopt and implement policy guidelines on forced displacement similar to such guidelines of the other MDBs.

(D) In the area of procedures for environmental impact assessment (EIA)—

(i) each MDB should require that draft and final EIA reports be made available to the public in borrowing and donor countries and that the public be offered timely opportunities for comment on the EIA process, including initial scoping sessions, review of EIA categories assigned to individual projects, and opportunities to comment on draft and final EIA reports;

(ii) each MDB should apply EIA requirements to all sector loans and develop and apply the methodology for environmental assessment of structural adjustment loans;

(iii) each MDB should require that the EIA process include analyses of the potential impacts of proposed projects on the global environment; and

(iv) each MDB should require the head of the appropriate environmental unit, rather than project officers, determine the appropriate type of environmental analysis required under the bank's EIA procedures.

(d) The Administrator of the Agency for International Development shall instruct all Agency missions and bureaus to continue to implement all elements of the "Global Warming Initiative" as defined in, and which may continue under, the authorities of sections 533(c) (1) through (4) of Public Law 101-513. The Initiative shall continue to emphasize the need to reduce emissions of greenhouse gases through strategies consistent with continued economic development, such as forest conservation, end-use energy efficiency, least-cost energy planning, and renewable energy development. The Administrator shall direct Agency mission directors to incorporate these strategies in their country programs.

(e) Of the funds appropriated by this Act under the headings in title II of this Act under "Agency for International Development", not less than $650,000,000 shall be made available for environment and energy activities, including funds earmarked under section 533 of this Act, including the following—

(1) Not less than $20,000,000 of the aggregate of the funds appropriated to carry out the provisions of sections 103 through 106 and chapter 10 of part I of the Foreign Assistance Act of 1961 shall be made available for biological diversity activities, of which $5,000,000 shall be made available for the Parks in Peril project pursuant to the authority of section 119(b) of that Act; $1,500,000 shall be for the National Science Foundation's international biological diversity program; $750,000 shall be for the Neotropical Bird Conservation Initiative of the National Fish and Wildlife Foundation; and up to $2,000,000 shall be for Project Noah;

(2) Not less than $15,000,000 of the funds appropriated for the Development Assistance Fund and to carry out the provisions of chapter 10 of part I of the Foreign Assistance Act of 1961 shall be made available to support replicable renewable energy projects, and the Agency for International Development shall initiate at least five significant new activities in renewable energy during fiscal year 1993;

(3) Not less than $7,000,000 of the funds appropriated for the Development Assistance Fund and to carry out the provisions of chapter 10 of part I of the Foreign Assistance Act of 1961 shall be made available for assistance in support of elephant conservation and preservation;

(4) Not less than $25,000,000 of the funds appropriated for the Development Assistance Fund shall be made available for the Office of Energy of the Agency for International Development; and

(5) Up to $50,000,000 of the funds appropriated to carry out the provisions of chapter 4 of part II of the Foreign Assistance Act of 1961 may be made available to carry out the "Forests for the Future Initiative" and to achieve a Global Forest Agreement.

(f) Of the funds appropriated by this Act to carry out the provisions of part I and chapter 4 of part II of the Foreign Assistance Act of 1961, the Agency for International Development should, to the extent feasible and inclusive of funds earmarked under subsection (e) of this section, target assistance for the following activities:

NUCLEAR NON-PROLIFERATION POLICY IN SOUTH ASIA

SEC. 585. (a) The Foreign Assistance Act of 1961 is amended by inserting the following new section:

"SEC. 620F. NUCLEAR NON-PROLIFERATION POLICY IN SOUTH ASIA.

"(a) FINDINGS.—The Congress finds that—

"(1) the proliferation of weapons of mass destruction remains one of the most serious threats to international peace and stability;

"(2) South Asia, in particular, is an area where the threat of a regional nuclear exchange remains high due to continued Indo-Pakistani tensions over issues such as Kashmir;

"(3) to date, United States efforts to halt proliferation in South Asia have failed;

"(4) although global disarmament is a desirable goal which should be vigorously pursued, both regional and sub-regional security arrangements can serve to decrease tensions and promote non-proliferation in certain areas;

Digitized for FRASER

Federal Reserve Bank of St. Louis

"(5) thus far, there has been some success on a regional basis, such as the South Pacific Nuclear Weapons Free Zone and the Treaty of Tlatelolco in Latin America;

"(6) in particular, in Latin America, the Treaty of Tlatelolco has been signed by all the nuclear powers;

"(7) a critical part of this treaty is Protocol II which prohibits nuclear attacks by nuclear weapons states on signatories to the treaty;

"(8) in 1991, a proposal was made for a regional conference on non-proliferation in South Asia which would include Pakistan, India, the People's Republic of China, the Soviet Union, and the United States; and

"(9) thus far, Pakistan, China, Russia, and the United States have expressed interest in attending such a conference, whereas India has refused to attend.

"(b) POLICY.—It is the sense of the Congress that the President should pursue a policy which seeks a regional negotiated solution to the issue of nuclear non-proliferation in South Asia at the earliest possible time, including a protocol to be signed by all nuclear weapons states, prohibiting nuclear attacks by nuclear weapons states on countries in the region. Such a policy should have as its ultimate goal concurrent accession by Pakistan and India to the Nuclear Non-Proliferation Treaty, and should also include as needed a phased approach to that goal through a series of agreements among the parties on nuclear issues, such as the agreement reached by Pakistan and India not to attack one another's nuclear facilities.

"(c) REPORT ON PROGRESS TOWARD REGIONAL NON-PROLIFERATION.—Not later than April 1, 1993, and every six months thereafter, the President shall submit a report to the Committees on Appropriations, the Speaker of the House of Representatives, and the chairman of the Committee on Foreign Relations of the Senate, on nuclear proliferation in South Asia, including efforts taken by the United States to achieve a regional agreement on nuclear non-proliferation, and including a comprehensive list of the obstacles to concluding such a regional agreement.".

(b) REPORT ON SOUTH ASIAN NUCLEAR PROGRAMS.—Not later than six months after the enactment of this Act, the President shall submit a report with respect to the People's Republic of China, Pakistan, and India in writing to the Committees on Appropriations, the Speaker of the House of Representatives, the chairman of the Committee on Foreign Relations of the Senate, on those country's nuclear and ballistic missile programs, including, but not limited to—

(1) a determination as to whether that country possesses a nuclear explosive device or whether it possesses all the components necessary for the assembly of such a device;

(2) a complete report on the status of that country's missile development program, foreign assistance to that program, and foreign sales of missiles or missile components to that country and steps which the United States has taken in response to such sales; and

(3) a report on whether that country has agreed to fully adhere, and is adhering, to all peaceful nuclear cooperation agreements with the United States and has formally agreed to place all United States-supplied nuclear materials under international safeguards in perpetuity.

"(a)(1) LIMITATIONS ON PROCUREMENT OUTSIDE THE UNITED STATES.—Funds made available for assistance under this Act may be used by the President for procurement—

"(A) only in the United States, the recipient country, or developing countries; or

"(B) in any other country but only if—

"(i) the provision of such assistance requires commodities or services of a type that are not produced in and available for purchase in any country specified in subparagraph (A); or

"(I) to meet unforeseen circumstances, such as emergency situations, where it is important to permit procurement in a country not specified in subparagraph (A); or

"(II) to promote efficiency in the use of United States foreign assistance resources, including to avoid impairment of foreign assistance objectives.

"(2) For purposes of this subsection, the term 'developing countries' shall not include advanced developing countries.".

POLICY ON TERMINATING THE ARAB LEAGUE BOYCOTT OF ISRAEL

SEC. 598. (a) FINDINGS.—The Congress finds that—

(1) since 1948 the Arab countries have maintained a primary boycott against Israel, refusing to do business with Israel;

(2) since the early 1950s the Arab League has maintained a secondary and tertiary boycott against American and other companies that have commercial ties with Israel;

(3) the boycott seeks to coerce American firms by blacklisting those that do business with Israel and harm America's competitiveness;

(4) the United States has a longstanding policy opposing the Arab League boycott and United States law prohibits American firms from providing information to Arab countries to demonstrate compliance with the boycott;

(5) with real progress being made in the Middle East peace process and the serious confidence-building measures taken by the State of Israel, an end to the Arab boycott of Israel and of American companies that have commercial ties with Israel is long overdue and would represent a significant confidence-building measure;

(6) the President has proposed the sale of 72 advanced F-15 aircraft to Saudi Arabia despite its refusal to renounce publicly the Arab boycott of American firms that do business with or invest in Israel; and

(7) in the interest of Middle East peace and free commerce, the President must take more concrete steps to press the Arab states to end their practice of blacklisting and boycotting American companies that have trade ties with Israel.

(b) POLICY.—It is the sense of the Congress that—

(1) the Arab League countries should immediately and publicly renounce the primary boycott of Israel and the secondary and tertiary boycott of American firms that have commercial ties with Israel and

(2) the President should—

(A) take more concrete steps to encourage vigorously Arab League countries to renounce publicly the primary boycotts of Israel and the secondary and tertiary boycotts of American firms that have commercial relations with Israel as a confidence-building measure;

(B) take into consideration the participation of any recipient country in the primary boycott of Israel and the secondary and tertiary boycotts of American firms that have commerical relations with Israel when determining whether to sell weapons to said country;

(C) report to Congress on the specific steps being taken by the President to bring about a public renunciation of the Arab primary boycott of Israel and the secondary and tertiary boycotts of American firms that have commercial relations with Israel; and

(D) encourage the allies and trading partners of the United States to enact laws prohibiting businesses from complying with the boycott and penalizing businesses that do comply.

IMPACT ON JOBS IN THE UNITED STATES

SEC. 599. None of the funds appropriated by this Act may be obligated or expended to provide—

(a) any financial incentive to a business enterprise currently located in the United States for the purpose of inducing such an enterprise to relocate outside the United States if such incentive or inducement is likely to reduce the number of employees of such business enterprise in the United States because United States production is being replaced by such enterprise outside the United States;

(b) assistance for the purpose of establishing or developing in a foreign country any export processing zone or designated area in which the tax, tariff, labor, environment, and safety laws of that country do not apply, in part or in whole, to activities carried out within that zone or area, unless the President determines and certifies that such assistance is not likely to cause a loss of jobs within the United States; or

(c) assistance for any project or activity that contributes to the violation of internationally recognized workers rights, as defined in section 502(a)(4) of the Trade Act of 1974, of workers in the recipient country, including any designated zone or area in that country.

HUMANITARIAN ASSISTANCE FOR ARMENIA

SEC. 599A. (a) Of the aggregate of the funds appropriated by this Act to carry out chapter 1 of part I of the Foreign Assistance Act of 1961, not less than $5,000,000 shall be made available, notwithstanding any provision of law which restricts assistance to foreign countries, for refugee assistance to Armenia.

(b) It is the sense of Congress that the Administration should—

(1) encourage Japan or any oil exporting nation to provide fuel to Armenia for urgently needed humanitarian purposes, to include harvesting the autumn crop;

(2) renew its existing commitment to deliver this fuel by United States transport;

(3) ensure that safeguards are in place to guarantee that the fuel is used solely for the humanitarian purposes intended.

(c) The Congress finds that Armenia has entered into an aggressive program of economic reforms and land privatization that serves as a model for the former republics of the Soviet Union.

(d) It is further the sense of Congress that the President instruct United States representatives to the International Monetary Fund and the World Bank to support these important reforms by providing Armenia financial and technical assistance.

REPORT ON RUSSIAN MILITARY EXPORTS

SEC. 599B. (a) REPORT.—Beginning 120 days after the date of enactment of this Act and 180 days thereafter, the President shall report to the appropriate congressional committees that the United States has entered into serious and substantive discussions with Russia to reduce exports of sophisticated conventional weapons to Iran and to prevent sales to Iran of any destabilizing numbers and types of such weapons.

(b) PROHIBITION.—Beginning 120 days after the date of enactment of this Act none of the funds made available under this Act may be made available for United States assistance (other than humanitarian assistance) for Russia unless the report required under subsection (a) has been made, or the provision of assistance is determined to be in the national interest.

(c) DEFINITIONS.—As used in this section—

AUTHORITY TO ASSIST BOSNIA-HERCEGOVINA

SEC. 599D. (a) Congress finds as follows:

(2) the federated states of Serbia and Montenegro have a large supply of military equipment and ammunition and the Serbian forces fighting the government of Bosnia-Hercegovina have more than one thousand battle tanks, armored vehicles, and artillery pieces; and

(3) because the United Nations arms embargo is serving to sustain the military advantage of the aggressor, the United Nations should exempt the government of Bosnia-Hercegovina from its embargo.

(b) Pursuant to a lifting of the United Nations arms embargo against Bosnia-Hercegovina, the President is authorized to transfer to the government of that nation, without reimbursement, defense articles from the stocks of the Department of Defense of an aggregate value not to exceed $50,000,000 in fiscal year 1993: *Provided,* That the President certifies in a timely fashion to the Congress that—

(1) the transfer of such articles would assist that nation in self-defense and thereby promote the security and stability of the region; and

(2) United States allies are prepared to join in such a military assistance effort.

(c) Within 60 days of any transfer under the authority provided in subsection (b), and every 60 days thereafter, the President shall report in writing to the Speaker of the House of Representatives and the President pro tempore of the Senate concerning the articles transferred and the disposition thereof.

(d) There are authorized to be appropriated to the President such sums as may be necessary to reimburse the applicable appropriation, fund, or account for defense articles provided under this section.

TITLE VI—LOAN GUARANTEES TO ISRAEL

LOAN GUARANTEES TO ISRAEL PROGRAM

SEC. 601. Title III of Chapter 2 of Part I of the Foreign Assistance Act of 1961 is amended by adding at the end thereof the following new section:

"SEC. 226. LOAN GUARANTEES TO ISRAEL PROGRAM.

"(a) IN GENERAL.—Subject to the terms and conditions of this section, during the period beginning October 1, 1992, and ending September 30, 1997, the President is authorized to issue guarantees against losses incurred in connection with loans to Israel made as a result of Israel's extraordinary humanitarian effort to resettle and absorb immigrants into Israel from the republics of the former Soviet Union, Ethiopia and other countries. In the event that less than the full amount authorized to be issued under subsection (b) of this section is issued in such period, the authority to issue the balance of such guarantees shall be available in the fiscal year ending on September 30, 1998.

"(b) FISCAL YEAR LEVELS.—The President is authorized to issue guarantees in furtherance of the purposes of this section. Subject to subsection (d), the total principal amount of guarantees which may be issued by the President under this section shall be up to $10,000,000,000 which may be issued as follows:

"(1) in fiscal year 1993, up to $2,000,000,000 may be issued on October 1, 1992 or thereafter;

"(2) subject to subsection (d), in fiscal years 1994 through 1997, up to $2,000,000,000 in each fiscal year may be issued on October 1 or thereafter.

"(3) If less than the full amount of guarantees authorized to be made available in a fiscal year pursuant to paragraphs (1) and (2) of this subsection is issued to Israel during that fiscal year, the authority to issue the balance of such guarantees shall extend to any subsequent fiscal year ending on or before September 30, 1998.

"(4)(A) Not later than September 1 of each year during the period in which the President is authorized to issue loan guarantees under subsection (a), beginning in fiscal year 1993, the President shall notify the appropriate congressional committees in writing of his intentions regarding the exercise of that authority for the fiscal year beginning on October 1 of that year, including a statement of the total principal amount of guarantees, if any, that the President proposes to issue for that fiscal year.

"(B) For purposes of this paragraph, the term 'appropriate congressional committees' means the Committee on Appropriations and the Committee on Foreign Relations of the Senate and the Committee on Appropriations and the Committee on Foreign Affairs of the House of Representatives.

"(c) USE OF GUARANTEES.—Guarantees may be issued under this section only to support activities in the geographic areas which were subject to the administration of the Government of Israel before June 5, 1967.

"(d) LIMITATION ON GUARANTEE AMOUNT.—The amount of authorized but unissued guarantees that the President is authorized to issue as specified in subsection (b) shall be reduced by an amount equal to the amount extended or estimated to have been extended by the

Government of Israel during the previous year for activities which the President determines are inconsistent with the objectives of this section or understandings reached between the United States Government and the Government of Israel regarding the implementation of the loan program. The President shall submit a report to Congress no later than September 30 of each fiscal year during the pendency of the program specifying the amount calculated under this subsection and that will be deducted from the amount of guarantees authorized to be issued in the next fiscal year.

"(e) FEES.—

"(1) Fees charged for the loan guarantee program under this section each year shall be an aggregate annual origination fee equal to the estimated subsidy cost of the guarantees issued under this section for that year, calculated by the Office of Management and Budget for the Federal Credit Reform Act of 1990. This shall also include an amount for the administrative expenses of the Agency for International Development in administering the program under this section. All such fees shall be paid by the Government of Israel to the Government of the United States. Funds made available for Israel under chapter 4 of Part II of the Foreign Assistance Act of 1961, as amended, may be utilized by the Government of Israel to pay such fees to the United States Government. No further appropriations of subsidy cost are needed for the loan guarantee authorized hereunder for fiscal year 1993 and the four succeeding fiscal years.

"(2) The origination fee shall be payable to the United States Government on a pro rata basis as each guarantee for each loan or increment is issued.

"(f) AUTHORITY TO SUSPEND.—Except as provided in subsections (l) and (m) of this section, the President shall determine the terms and conditions for issuing guarantees. If the President determines that these terms and conditions have been breached, the President may suspend or terminate the provision of all or part of the additional loan guarantees not yet issued under this section. Upon making such a determination to suspend or terminate the provision of loan guarantees, the President shall submit to the Speaker of the House of Representatives and the President Pro Tempore of the Senate his determination to do so, including the basis for such suspension or termination.

"(g) PROCEDURES FOR SUSPENSION OR TERMINATION.—Any suspension or termination pursuant to subsection (f) shall be in accordance with the following procedures:

"(1) Upon making a determination to suspend or terminate the provision of loan guarantees, the President shall submit to the Speaker of the House of Representatives and the President Pro Tempore of the Senate his determination to do so, including the basis for such suspension or termination.

"(2) Such a suspension or termination shall cease to be effective if Congress enacts, within 30 days of submission, a joint resolution authorizing the assistance notwithstanding the suspension.

"(3) Any such joint resolution shall be considered in the Senate in accordance with the provisions of section 601(b) of the International Security Assistance and Arms Export Control Act of 1976.

"(4) For the purpose of expediting the consideration and enactment of joint resolutions under this subsection, a motion to proceed to the consideration of any such joint resolution after it has been reported by the appropriate committee shall be treated as highly privileged in the House of Representatives.

"(5) In the event that the President suspends the provision of additional loan guarantees under subsection (f) and Congress does not enact a joint resolution pursuant to this subsection, the provision of additional loan guarantees under the program established by this section may be resumed only if the President determines and so reports to Congress that the reasons for the suspension have been resolved or that the resumption is otherwise in the national interest.

"(h) ECONOMIC CONTEXT.—The effective absorption of immigrants into Israel from the republics of the former Soviet Union and Ethiopia within the private sector requires large investment and economic restructuring to promote market efficiency and thereby contribute to productive employment and sustainable growth. Congress recognizes that the Government of Israel is developing an economic strategy designed to achieve these goals, and that the Government of Israel intends to adopt a comprehensive, multi-year economic strategy based on prudent macroeconomic policies and structural reforms. Congress also recognizes that these policies are being designed to reduce direct involvement of the government in the economic system and to promote private enterprise, important prerequisites for economic stability and sustainable growth.

"(i) CONSULTATIONS.—It is the sense of the Congress that, as agreed between the two Governments and in order to further the policies specified in subsection (h), Israel and the United States should continue to engage in consultations concerning economic and financial measures, including structural and other reforms, that Israel should undertake during the pendency of this program to enable its economy to absorb and resettle immigrants and to accommodate the increased debt burden that will result from loans guaranteed pursuant to this section. It is the sense of the Congress that these consultations on economic measures should address progress and plans in the areas of budget policies, privatization, trade liberalization, financial and capital markets, labor markets, competition policy, and deregulation.

"(j) GOODS AND SERVICES.—During the pendency of the loan program authorized under this section, it is anticipated that, in the context of the economic reforms undertaken pursuant to subsections (h) and (i) of this section, Israel's increased population due to its absorption of immigrants, and the liberalization by the Government of Israel of its trade policy with the United States, the amount of United States investment goods and services purchased for use in or with respect to the country of Israel will substantially increase.

"(k) REPORTS.—The President shall report to Congress by December 31 of each fiscal year until December 31, 1999, regarding the implementation of this section.

"(l) APPLICABILITY OF FOREIGN ASSISTANCE ACT AUTHORITIES.—Section 223 of the Foreign Assistance Act shall apply to guarantees issued under subsection (a) in the same manner as such section applies to guarantees issued under section 222, except that subsections (a), (e)(1), (g), and (j) of section 223 shall not apply to such guarantees and except that, to the extent section 223 is inconsistent with the Federal Credit Reform Act of 1990, that Act shall apply. Loans shall be guaranteed under this section without regard to sections 221, 222, and 238(c). Notwithstanding section 223(f), the interest rate for loans guaranteed under this section may include a reasonable fee to cover the costs and fees incurred by the borrower in connection with this program or financing under this section in the event the borrower elects not to finance such costs or fees out of loan principal. Guarantees once issued hereunder shall be unconditional and fully and freely transferable.

"(m) TERMS AND CONDITIONS.—

"(1) Each loan guarantee issued under this section shall guarantee 100 percent of the principal and interest payable on such loans.

"(2) The standard terms of any loan or increment guaranteed under this section shall be 30 years with semiannual payments of interest only over the first 10 years, and with semiannual payments of principal and interest on a level payment basis, over the last 20 years thereof, except that the guaranteed loan or any increments issued in a single transaction may include obligations having different maturities, interest rates, and payment terms if the aggregate scheduled debt service for all obligations issued in a single transaction equals the debt service for a single loan or increment of like amount having the standard terms described in this sentence. The guarantor shall not have the right to accelerate any guaranteed loan or increment or to pay any amounts in respect of the guarantees issued other than in accordance with the original payment terms of the loan. For purposes of determining the maximum principal amount of any loan or increment to be guaranteed under this section, the principal amount of each such loan or increment shall be—

"(A) in the case of any loan issued on a discount basis, the original issue price (excluding any transaction costs) thereof; or

"(B) in the case of any loan issue on an interest-bearing basis, the stated principal amount thereof.".

This Act may be cited as the "Foreign Operations, Export Financing, and Related Programs Appropriations Act, 1993".

Funds support programs authorized by the Alternative Agricultural Research and Commercialization Act of 1990 (7 U.S.C. 5901 et seq.). This Act authorizes the provision of assistance on a competitive basis to foster the development and commercialization of new nonfood, nonfeed products derived from agricultural and forestry commodities. Development of nontraditional uses for farm, ranch and forestry products provides an opportunity to improve U.S. competitiveness in foreign markets, create development and employment opportunities in rural areas, address environmental concerns and lower farm program costs. Programs are managed by the Alternative Agricultural Research and Commercialization Center. Program policy and oversight is provided by a Board which is composed of Federal and private sector scientists, producers and business experts.

WORLD AGRICULTURAL OUTLOOK BOARD—Continued

The World Agricultural Outlook Board (WAOB) was established to provide a single focal point for the Nation's economic intelligence related to domestic and international food and agriculture.

The objectives of the WAOB are to improve the consistency, objectivity, and reliability of outlook and situation material being disseminated to the public, and to integrate and coordinate USDA domestic and international economic information assistance.

The WAOB carries out these objectives through daily market surveillance and special analyses of international and domestic agricultural developments, direct participation in the planning of research programs supporting outlook and situation activities, and coordination of all departmental activities relating to weather and climate and remote sensing.

The Agricultural Research Service conducts research to provide the means for a safer, more economical supply of agricultural products for the Nation and to provide producers with technologies to competitively supply these products. Technology needs of regulatory, technical assistance and education agencies of USDA and other Federal agencies are supported through ARS research. The Service uses coordinated, interdisciplinary approaches to perform basic and applied research on soil and water conservation, plant and animal sciences, commodity conversion and delivery, human nutrition, and integrated agricultural systems.

Research on soil and water conservation.—Research is conducted to improve soil and water management, irrigation, and conservation practices; to protect natural resources from harmful effects of soil, air, and water pollutants and to minimize certain agricultural pollution problems; and to determine the relation of soil types and water to plant, animal, and human nutrition.

Research on plant science.—Research is conducted to increase plant productivity by improving plant varieties, developing new crop resources, and improving crop production practices, including methods to control plant diseases, nematodes, insects, and weeds.

Research on animal science.—Research is conducted to increase livestock productivity (including poultry) through improved breeding, feeding, and management practices, and to develop methods for controlling diseases, parasites, and insect pests affecting these animals.

Research on commodity conversion and delivery.—Research is conducted to develop new and improved foods, feeds, products, and processes for agricultural commodities and to improve the processing, transportation, storage, wholesaling, and retailing of products. Research is also conducted on means to ensure the safety of food and feed supplies, control insect pests of man and his belongings, and reduce the hazards to human life resulting from pesticide residues and other causes.

Human nutrition research.—Research is conducted on subjects such as human nutritional requirements and the composition and nutritive value of foods, to promote optimum human health through improved nutrition.

Integration of agricultural systems.—Research is conducted to develop integrated systems for efficiently producing, processing, and marketing agricultural products, and to develop alternative agricultural systems that are less dependent upon nonrenewable resources and that are productive, efficient, and sustainable in the long term.

Repair and maintenance of facilities.—Funds are used to restore, upgrade, and maintain Federal facilities to meet OSHA and EPA requirements, provide suitable workspace for in-house research programs, and to retrofit existing structures for better energy utilization.

Contingencies.—Funds available to meet urgent needs that develop unexpectedly during the year when such needs cannot be met by redirection of resources from other projects.

Construction of facilities.—Unobligated balances are used for this purpose. Construction proposals for 1994 are included under Buildings and Facilities.

Reimbursements.—Agricultural Research Service performs program research activities and services for other USDA, Federal, and non-Federal agencies. These activities and services are paid for on a reimbursable basis.

Cooperative State Research Service participates in a nationwide system of agricultural research and education program planning and coordination between State institutions and the U.S. Department of Agriculture. It assists in maintaining cooperation among the State institutions, and between the State institutions and their Federal research partners. The Agency administers grants and payments to State institutions to supplement State and local funding for agricultural research and higher education.

Payments under the Hatch Act.—Funds under the Hatch Act are allocated on a formula basis to agricultural experiment stations of the land-grant colleges in the 50 States, the District of Columbia, Puerto Rico, Guam, the Virgin Islands, American Samoa, Micronesia, and Northern Mariana Islands.

Cooperative forestry research.—These funds are allocated by formula to land-grant colleges or agricultural experiment stations in the 50 States, Puerto Rico, Guam, the Virgin Islands, and other State-supported colleges and universities having a forestry school and offering graduate training in forestry sciences.

Payments to 1890 colleges and Tuskegee University.—Funds allocated on a formula basis support agricultural research at the 1890 land-grant colleges, including Tuskegee University.

Special research grants.—This program addresses research areas of national interest. A grant program for water quality is the university research component of a coordinated Federal initiative in water quality and will provide funds to focus on agriculture-related water quality concerns in the Midwest Corn Belt and other regions. Funding is proposed for related grants in pesticide impact assessment and integrated pest management/biological control. A grant program for global change is requested for research at universities as part of a coordinated Federal initiative. Funding proposed for pesticide clearance and minor use animal drugs (IR–4 program) will address the growing need for registration of safe pesticides and drugs for minor crops and animals. Funding is also proposed for the National Biological Impact Assessment Program, energy biomass/biofuels research, rural development centers, aquaculture centers, rangeland research, supplemental and alternative crops, and sustainable agriculture research and education.

National research initiative competitive grants.—Funding is being proposed for the National Initiative for Research on Agriculture, Food, and the Environment (NRI). Research scientists throughout the U.S. scientific community compete for funding under this program. These grants support research in plant and animal systems; natural resources and the environment; nutrition, food quality, and health; rural development, markets and trade; and processes antecedent to adding value and developing new products. This Initiative includes funding for a plant genome mapping program for which the Agricultural Research Service will serve as lead agency. Global change research being carried out through the NRI is part of a government-wide program developed by the Committee on Earth and Environmental Sciences.

Animal health and disease research.—Funds, distributed by formula, support livestock and poultry disease research in

colleges of veterinary medicine and in eligible agricultural experiment stations. No funding is proposed for 1994.

Federal administration.—A coordinating and review staff assists in maintaining cooperation within and among the States, and between the States and their Federal research partners. This staff also administers research and education grants and payments to States. Federal administration is funded from a combination of program set-aside from formula and grant programs and from direct appropriation for administration. Funding is proposed for a capacity building program at the 1890 institutions as part of a USDA initiative to strengthen these institutions.

Higher education.—Funding is proposed for graduate fellowships grants, competitive challenge grants, Morrill-Nelson permanent appropriation, and a new minority scholars program.

Reimbursable program.—Funds support basic and applied agriculture research and activities performed for other USDA, Federal, and non-Federal agencies.

The Cooperative Extension System, a national educational network, is a dynamic organization pledged to meeting the country's needs for research-based educational programs that will enable people to make practical decisions to improve their lives. To accomplish its mission, the Cooperative Extension System adjusts programs to meet the shifting needs and priorities of the people it serves.

The nonformal educational network combines the expertise and resources of federal, state, and local governments. The partners in this unique System are: (a) The Extension Service at the U.S. Department of Agriculture; (b) Extension professionals at land-grant universities throughout the United States and its territories; and (c) Extension professionals in nearly all of the Nation's 3,150 counties. Thousands of paraprofessionals and nearly 3 million volunteers support this partnership and magnify its impact. Strong linkages with both public and private external groups are also crucial to the Extension System's strength and vitality.

Base Programs are the major educational efforts central to the mission of the System and common to most Extension units. They are the ongoing priority efforts of the System, involving many discipline-based and multi-disciplinary programs. The System's base programs are the foundation of the Extension organization.

National initiatives are the System's commitment to respond to important societal problems of broad national concern with additional resources and significantly increased effort to achieve a major impact on national priorities. They are the current most significant and complex issues on which the Extension System has the potential to make a difference—usually in cooperation with other agencies, groups, and units of government.

Extension funds are provided to the States through formula grants and competitively awarded programs. Smith-Lever 3(b) and c funds and payments to the 1890 colleges and Tuskegee University provide funds to support the Extension infrastructure. Funds for designated programs provide support for the System to address identified priority issues.

Initiatives proposed in 1994 include funding for: sustainable agriculture education programs for farm operators in adopt-

The primary purpose of the National Agricultural Library (NAL) is to acquire, preserve, and disseminate a comprehensive collection of reliable information in all phases of the agricultural and allied sciences.

Agricultural information and library services.—The NAL provides a variety of information products and services through: (1) the administration of a unique collection of books, journals, and other information materials about food and agriculture to ensure accessibility to their contents; (2) the development and maintenance of cooperative efforts in the library and related information areas, with other Federal agencies and with educational institutions in each State; and (3) an active program of information dissemination.

Repairs and maintenance of facilities.—These funds are used for maintaining the library building.

The major objectives of the Animal and Plant Health Inspection Service are to protect the animal and plant resources of the Nation from destructive pests and diseases. This mission is carried out under the five major areas of activity, as follows:

Pest and disease exclusion.—The agency conducts inspection and quarantine activities at U.S. ports-of-entry to prevent the introduction of exotic animal and plant diseases and pests. APHIS develops and conducts preclearance programs to ensure that agricultural products destined for U.S. ports-of-entry do not present a risk to U.S. agriculture. APHIS engages in cooperative programs in foreign countries to control pests of imminent concern to the United States. APHIS also certifies plants and plant products for export and regulates imports and exports of designated endangered plant species.

SALARIES AND EXPENSES—Continued

(INCLUDING TRANSFERS OF FUNDS)—Continued

User fees have been implanted to recover the cost of certain agricultural quarantine inspection services.

Plant and animal health monitoring.—The Agency conducts programs to assess animal and plant health and to detect endemic and exotic diseases and pests. The plant and animal health monitoring programs are primarily cooperative efforts of the Federal and State governments, and industry. The Agency also carries out surveys in cooperation with the States to detect harmful plant and animal pests and diseases and to determine if there is a need for pest eradication programs.

Pest and disease management programs.—The Agency carries out programs to control and eradicate infestations and animal diseases that threaten the United States; to reduce agricultural losses caused by predatory animals, birds, and rodents; to provide technical assistance to States, counties, farmer or rancher groups, and foundations; and to ensure compliance with interstate movement and disease control regulations. Interstate shipments of plants, livestock, and related materials are monitored and regulated to prevent the spread of disease. APHIS protects agriculture from detrimental animal predators through identification, demonstration, and application of the most appropriate methods of control.

Animal care.—The Agency conducts regulatory activities which ensure the humane care and handling of animals used in research, exhibition, or the wholesale pet trade. The Agency is also responsible for administering the Horse Protection Act, which prohibits the showing, selling, or exhibition of sore horses.

Scientific and technical services.—APHIS develops methods to control animals and pests that are detrimental to agriculture, other wildlife, and public safety. The agency regulates genetic research to guard against the release of potentially harmful organisms into the environment. APHIS also conducts veterinary diagnostic laboratory activities and biologic regulatory enforcement to ensure that the products developed for combatting disease are potent, safe, and pure. It also provides and directs technology development in coordination with other groups in APHIS and Plant Protection and Quarantine (PPQ) officials to support PPQ programs of the Agency and its cooperators at the State, national, and international levels.

The major objectives of the Food Safety and Inspection Service are to ensure that meat and poultry products are wholesome, unadulterated, and properly labeled and packaged, as required by the Federal Meat Inspection Act and the Poultry Products Inspection Act.

The Meat and Poultry Inspection program of the Food Safety and Inspection Service provides inplant inspection of all domestic plants preparing meat or poultry products for sale or distribution; reviews foreign inspection systems and establishments that prepare meat or poultry products for export to the United States; and provides technical and financial assistance to States which maintain meat and poultry inspection programs.

The Federal Grain Inspection Service (FGIS) establishes official United States standards for grain, promotes the uniform application thereof by official inspection personnel, provides for an official inspection system for grain, and regulates the weighing and certification of the weight of grain shipped in interstate or foreign commerce as authorized by the U.S. Grain Standards Act (USGSA), as amended, and the regulations thereof, and the Agricultural Marketing Act of 1946 (AMA).

Standardization activities include establishing and updating U.S. grain standards, research, and developing and improving methods to ensure the accurate and uniform application of the standards.

The compliance activities ensure the accurate and uniform application of the USGSA and applicable provisions of the AMA. The compliance program functions include: (1) evaluating alleged violations and initiating preliminary investigations; (2) initiating the implementation of corrective actions; (3) conducting management and technical reviews; (4) administering the designations and delegations of State and private agencies to perform official functions and monitoring the performance of the agencies; (5) identifying and, where appropriate, waiving and monitoring conflicts of interest; (6) licensing personnel of delegated States and designated agencies; (7) registering persons/firms engaged in the business of buying grain for sale in foreign commerce, and in the business of handling, weighing, or transporting of grain for sale in foreign commerce; (8) responding to audits of FGIS programs; and (9) reviewing and, when appropriate, approving official agencies' fee schedules.

The International Monitoring Staff briefs foreign buyers, assesses foreign inspection and weighing techniques, and responds to foreign quality and quantity complaints.

An advisory committee consisting of members from the grain industry exists to advise the Agency regarding efficient and economical implementation of the USGSA.

The Grain Quality Improvement Act of 1986 was enacted on November 10, 1986, to improve the quality of U.S. grain by prohibiting the introduction and reintroduction of dockage and foreign material to grain.

The Federal Grain Inspection Service provides a uniform system for the inspection and weighing of grain. Services provided under this system are financed through a fee supported revolving fund. This authority has been extended through September 1993.

Fee supported programs include direct services, supervision activities and administrative functions. Direct services include official grain inspection and weighing by FGIS employees at certain export ports as well as the inspection of U.S. grain shipped through Canada. FGIS supervises the inspection and weighing activities performed by its own employees. The agency also oversees the inspection and weighing of grain performed by employees of 8 delegated States and 77 designated State and private agencies. FGIS provides an appeal service of original grain inspections and a registration system for grain exporting firms. Through support from the Association of American Railroads and user fees, FGIS conducts a railroad track scale testing program. In addition, the agency provides grading services, on request, for rice and grain related products under the authority of the Agricultural Marketing Act of 1946 (AMA).

Agricultural Marketing Service activities assist producers and handlers of agricultural commodities by providing a variety of marketing services. These services continue to become more complex as the volume of agricultural commodities increases, as a greater number of new processed commodities are developed, and as the agricultural market structure undergoes extensive changes. Marketing changes include increased concentration in food retailing, direct buying, decentralization of processing, growth of interregional competition, vertical integration, and contract farming. The individual activities include:

Market news service.—The market news program provides the agricultural community with information pertaining to the movement of agricultural products. This nationwide service provides daily reports on the supply, demand, and price of over 700 commodities throughout the country.

Inspection, grading and standardization.—Nationally uniform standards of quality for agricultural products are established and applied to specific lots of products to: promote confidence between buyers and sellers; reduce hazards in marketing due to misunderstandings and disputes arising from the use of nonstandard descriptions; and encourage better preparation of uniform quality products for market. Grading services are provided for cotton and domestic and imported tobacco.

Continuous in-plant inspection of all plants manufacturing liquid, frozen, or dried egg products is provided, with quarterly inspection of egg handlers and hatcheries to ensure the proper disposition of shell eggs unfit for human consumption. Imported egg products are controlled to make certain that the inspection systems in exporting countries have standards equal to those of the United States.

Market protection and promotion.—This program consists of: (1) the research and promotion programs which are designed to improve the competitive position and expand markets for cotton, eggs and egg products, honey, pork, beef, milk and dairy products, mohair, potatoes, and watermelons; (2) the Federal Seed Act; and (3) the administration of the Capper-Volstead Act and the Agricultural Fair Practices Act.

The Agricultural Promotion Programs Act of 1990 provides legislative authority for the establishment of research and promotion programs for pecans, mushrooms, limes, and soybeans, and for a fluid milk promotion program. Orders implementing the soybean, pecan, mushroom, and research and promotion programs have been issued and assessments are being collected from producers.

Federal seed inspectors conduct tests on seed samples to help ensure truthful labeling of agricultural and vegetable seeds sold in interstate commerce.

The Capper-Volstead Act and the Agricultural Fair Practices Act protect producers against discriminatory practices by handlers, permit producers to engage in cooperative efforts, and ensure that such cooperatives do not engage in practices that monopolize or restrain trade.

License fees are deposited in this special fund and are used to meet the costs of administering the Perishable Agricultural Commodities and the Produce Agency Acts (7 U.S.C. 491-497, 499a-499s).

The Acts are intended to ensure equitable treatment to farmers and others in the marketing of fresh and frozen fruits and vegetables. Commission merchants, dealers, and brokers handling these products in interstate and foreign commerce are licensed. Complaints of violations are investigated and violations dealt with by (a) informal agreements between the two parties, (b) formal decisions involving payment of reparation awards, and/or (c) suspension or revocation of license and/or publication of the facts.

A 1984 amendment to the Perishable Agricultural Commodities Act requires traders to have trust assets on hand to meet their obligations to fruit and vegetable suppliers. To preserve their trust and establish their rights ahead of other creditors, unpaid suppliers file notice with both the Department and their debtors that payment is due.

Under section 32 of the act of August 24, 1935, as amended (7 U.S.C. 612c), an amount equal to 30 percent of customs receipts collected during each calendar year is automatically appropriated for expanding outlets for nonbasic commodities. An amount equal to 30 percent of receipts collected on fishery products is transferred to the Department of Commerce. Most of the funds are transferred to the Food and Nutrition Service and are used to purchase commodities under section 6 of the National School Lunch Act and other authorities specified in the child nutrition appropriation. If unforeseen commodity surpluses should develop, unobligated reserve balances are available for surplus removal.

Expenses and refunds, inspection and grading of farm products.—The commodity inspection and grading programs provide grading, examination, and certification services for a wide variety of fresh and processed food commodities using federally approved grade standards and purchase specifications. Commodities graded include poultry, livestock, meat, dairy products, and fresh and processed fruits and vegetables. These programs use official grade standards which reflect the relative quality of a particular food commodity based on laboratory testing and characteristics such as taste, color, weight, and physical condition. Producers voluntarily request grading and certification services which are provided on a fee for service basis.

Note.—The administration fund totals are comprised of 40 separate independent order accounts in 1992. The Marketing Service fund totals are comprised of 38 separate independent order accounts in 1992.

The Secretary of Agriculture is authorized by the Agricultural Marketing Agreement Act of 1937, as amended—under certain conditions—to issue Federal milk marketing orders establishing minimum prices which handlers are required to pay for milk purchased from producers.

Market administrators are appointed by the Secretary and are responsible for carrying out the terms of specific marketing orders. Their operating expenses, partly financed by assessments on regulated handlers and partly by deductions from producers, are reported in these schedules. These funds are collected locally, deposited in local banks, and disbursed directly by the market administrator.

Expenses of local offices are met from an administrative fund and a marketing service fund, which are prescribed in each order. The administrative fund is derived from prorated handler assessments. The marketing service fund of the individual order disseminates market information to producers who are not members of a qualified cooperative. It also provides for the verification of the weights, sampling, and testing of milk from these producers. The cost of these services is borne by such producers.

The maximum rates for administrative assessment and for marketing services are set forth in each order and adjustments below these rates are made from time to time upon recommendations by the market administrator and upon approval of the Agricultural Marketing Service to provide reserves at about a 6-month operating level. Upon termination of any order, the statute provides for distributing the proceeds from net assets pro rata to contributing handlers or producers, as the case may be.

The goal of this program is to ensure the integrity of the livestock, meat, and poultry markets and the marketplace in order to protect producers against unfair, deceptive, or discriminatory practices as well as those that are predatory or monopolistic in nature. Consumers and members of the livestock, poultry, and meat industries are also protected against unfair business practices in the marketing of livestock, meat and poultry, and from restrictions on competition which could unduly affect prices. The Agency also carries out the Secretary's responsibilities under Section 1324 of the Food Security Act of 1985 covering "central filing systems" established by States for pre-notification of security interests against farm products.

Beginning in FY 1994, technical assistance in this account will be funded under the Farm Service Agency (FSA) Salaries and expenses account.

These programs provide for cooperation between the Federal Government and States and their political subdivisions to reduce damage from floodwater, sediment, and erosion, for the conservation, development, utilization, and disposal of water, and for the conservation and proper utilization of land.

Watershed operations authorized by Public Law 534.—The Department cooperates with soil conservation districts and other local organizations in planning and installing works of improvement for flood prevention in 11 watersheds authorized by the Flood Control Act of 1944. The Federal Government shares the cost of works of improvement for flood prevention, agricultural water management, recreation, and fish and wildlife development.

Within the 11 authorized projects, 403 subwatershed areas have been identified for planning purposes. Installation progress in these subwatersheds is as follows:

Emergency watershed protection operations.—This program authorizes the Secretary of Agriculture to undertake such emergency measures for runoff retardation and soil erosion prevention as may be needed to safeguard life and property from floods and the products of erosion on any watershed whenever natural elements or forces cause a sudden impairment of that watershed. An emergency is considered to exist when a watershed is suddenly impaired by flood, fire, wind, earthquake, or other natural cause and consequently life and property are endangered by floodwater, erosion, or sediment discharge. The emergency area need not be declared a national disaster area to be eligible for emergency watershed protection. Emergency watershed protection is applicable to small scale, localized disasters as well as large scale disasters. State environmental, natural resource, fish and game, and other agencies participate in planning and coordinating emergency work.

Small watershed operations authorized by Public Law 566.—The Department provides technical and financial assistance to local organizations to install measures for watershed protection, flood prevention, agricultural water management, recreation, and fish and wildlife enhancement.

Watershed work plans are prepared by sponsoring local organizations with the Department's assistance or through State and local resources. After work plans are approved by the Department or Congress (projects where the estimated Federal contribution will exceed $5 million require congressional approval), financial assistance is provided for specific works of improvements.

The following tabulation shows the status of Public Law 566 projects:

Loan services.—Loans are made to local sponsoring organizations to finance the local cost of installing works of improvement in Public Law 534 and approved Public Law 566 watershed projects. Repayment with interest is required within 50 years after the principal benefits of improvements first become available. Loans are made from funds available for this purpose from the Agricultural Credit Insurance Fund. Loan services related to processing and making loans are financed from this appropriation.

This program provides cost-share assistance to participating landowners or operators in the Great Plains area in the development and installation of long-term conservation plans and practices for their land under contracts entered into in prior years. It is a voluntary program in 556 designated counties of 10 Great Plains States. Contracts with individual landowners range in time from 3 to 10 years.

Program regulations provide that cost-share rates offered in any contract shall not exceed 80 percent of the cost of installing eligible practices within the designated county. There is a cost-sharing limitation of $35 thousand for any contract.

Beginning in FY 1994, technical assistance under this account will be funded under the Farm Service Agency (FSA), Salaries and expenses account.

The Conservation Reserve Program (CRP) was mandated by sections 1231-1244 of the Food Security Act of 1985 (Public Law 99-198), as amended by sections 1411-1499 of the Food, Agriculture, Conservation, and Trade Act of 1990 (Public Law 101-624), to establish permanent cover on highly erodible cropland and on cropland posing environmental threats. The primary objectives of the CRP are to help farmers control critical soil erosion that occurs on about a third of America's highly erodible and environmentally sensitive cropland and to decrease production of some surplus agricultural commodities.

The CRP is authorized in all 50 States, Puerto Rico, and the Virgin Islands, on all croplands meeting the eligibility criteria of eroding at three times the soil loss tolerance or higher, or twice the soil loss tolerance with serious gully erosion or with an erosion predominance of 66⅔ percent of the field if planted to grass or an erosion predominance of 33⅓ percent if the area is planted to trees. In addition to cropland in areas adjacent to lakes and streams that can be devoted to filter strips, and cropland subject to overflow and suffering from scour erosion, eligible land may include shelterbelts, windbreaks, cropland contributing to water quality problems, and other lands posing environmental threats. Also eligible for the CRP are water quality impaired areas that do not meet the highly erodible land (HEL) criteria, such as the Chesapeake Bay, Great Lakes, and Long Island Sound watershed regions.

The program is administered through the Commodity Credit Corporation (CCC) by State and local committees working under the general direction of the Secretary.

Under the Food Security Act, as amended by Public Law 101-624, authority is provided to enter into CRP contracts through the 1995 crop year. Appropriations needed to make annual payments on 10- to 15-year contracts and for useful life easements will be requested through 2011.

From program inception in 1986 through 1992, approximately 36.5 million acres were enrolled. During 1993, no funds were provided for new sign-ups.

The 1994 program is expected to enroll 1 million acres, leaving 1.5 million acres for enrollment in FY 1995 to meet the 39-million-acre goal.

The rental assistance program is authorized under section 521(a)(2) of the Housing Act of 1949, as amended, and is designed to reduce rents paid by very low-income and low-income families living in FmHA financed rural rental and farm labor housing projects. Funding under this account is provided for renewals of existing rental assistance contracts, assistance for newly constructed units financed by the section 515 rural rental and cooperative housing program or the 514/516 farm labor housing loan and grant programs, and for additional servicing assistance for existing projects. Assistance is also provided in lieu of debt forgiveness or payments for eligible households to subsidize tenant rents in projects purchased by eligible nonprofit organizations or public agencies as authorized by section 502(c)(5)(D) of the Act.

From 1978 through 1991, the rental assistance program was funded under the Rural Housing Insurance Fund. Beginning in 1992, pursuant to Credit Reform, a separate grant account was established for this program.

Beginning in FY 1994, technical assistance under this account will be funded in the Farm Service Agency (FSA), salaries and expenses account.

The Wetlands Reserve Program is authorized by Title XIV, Section 1438 of the Food, Agriculture, Conservation, and Trade Act of 1990 (P.L. 101-624). The primary objectives of the program are to preserve and restore wetlands, improve wildlife habitat, and protect migratory waterfowl.

The Secretary of Agriculture, through designated county offices, uses program funds to enter into contracts with landowners that operate farmed or converted wetlands, farmed wetlands, or prior converted wetlands and adjoining land or riparian corridors. The contracts are permanent easements or easements of thirty years or the maximum allowable under State law. Technical assistance will be provided by the Farm Service Agency and Fish and Wildlife Service.

Under the 1992 program, 49,988 acres were tentatively accepted in 9 pilot States. No funding was provided for operating a fiscal year 1993 program.

The 1994 budget will provide funding for enrolling an estimated 450,000 acres. The President's Budget recommends total enrollment through 1995 of 1 million acres. Program participants will receive payments for wetlands easements, either in a lump sum or over a period of 5 to 20 years for permanent easements, or over a period of 5 to 20 years for wetlands easements which are not permanent but are for 30 years or the maximum duration allowed under applicable State law. Compensation will be in cash as specified in the contract, but not to exceed the fair market value of the land. The program provides cost-share assistance to landowners for carrying out the establishment of conservation measures and practices. The program cost-shares 50 percent to 75 percent of eligible costs of an easement which is not permanent, and 75 percent to 100 percent of eligible costs of a permanent easement. The program also provides reimbursement to the landowner for overhead costs associated with acquiring an easement.

Beginning in FY 1994, technical assistance in this account will be funded under the Farm Service Agency (FSA), salaries and expenses account.

The primary objectives of the program are to conserve soil and water resources. Along with annual agreements, cost sharing is authorized for long-term agreements of 3-10 years.

The program is administered by county committees, with review and approval by State committees and the Secretary.

The 1993 program level of $194,435 thousand will be allocated to States based on the highest priority soil and water resource problems, and is expected to serve 8.4 million acres.

AGRICULTURAL CONSERVATION PROGRAM—Continued

(INCLUDING TRANSFERS OF FUNDS)—Continued

Practices are expected to prevent approximately 30.9 million tons of soil erosion and save 618,000 acre-feet of water.

The 1994 budget proposes funding for activities consistent with the Government-wide water quality initiative as well as practices that help solve soil and water conservation problems identified in State and county ACP plans. The 1994 budget also includes funding for water quality incentive projects on eligible lands to meet water quality standards or goals.

Beginning in FY 1994, the technical assistance under this account will be funded under the Farm Service Agency (FSA) salaries and expenses account.

Under this program, the Department assists States, local units of government, groups and individuals in developing area plans for resource conservation and development (RC&D).

RC&D areas are provided technical and financial assistance to help States and local units of government prepare plans for resource development and economic improvement and to plan and install community-type conservation projects or measures. Financial contributions, loans, and other Federal assistance are used to help carry out measures specified in RC&D area plans. Loans have previously been made through the Farmers Home Administration to qualified local organizations to help finance their share of the costs of installing the measures.

The following tabulation shows the status of RC&D areas authorized to receive technical and financial assistance.

From 1986 through 1991 rental assistance for newly constructed units, as well as existing rental assistance contract renewals and additional servicing assistance for existing projects, had been funded under the Rural Housing Insurance Fund. Beginning in 1992, pursuant to Credit Reform, a separate grant account was established for the Rental Assistance Program.

The objectives of the Water Bank Program are to conserve water; preserve, maintain, and improve the Nation's wetlands; increase waterfowl habitat in migratory waterfowl nesting, breeding, and feeding areas in the United States; and secure recreational and environmental benefits for the Nation. The program was authorized by the Water Bank Act of 1970, as amended by Public Law 96-182, approved January 2, 1980.

The Secretary of Agriculture, through designated county offices, uses program funds to enter into 10-year agreements with landowners and operators for the conservation of specified wetlands. Provisions exist to renew agreements for additional periods, to make annual payments on agreements, and under certain conditions to increase payment rates in the fifth year of a contract or at the time of renewal. During the period of the agreement, the landowner agrees not to drain, burn, fill, or otherwise destroy the wetland character of such areas.

In fiscal year 1994, USDA plans to enter into approximately 1,000 agreements on about 106,000 acres of wetlands.

U.S.C. 1592(c)), as amended, by providing cost-share assistance to landowners and others in the Colorado River Basin. The main objective is to enhance the supply and quality of water in the Colorado River for delivery to downstream users in the U.S. and Mexico.

Practices are recommended by the county committees and approved by the State committees and the Secretary of Agriculture.

The 1993 program will focus on nine project areas in Colorado, Utah, and Wyoming.

The 1994 budget will provide financial assistance in promoting the Government-wide water quality initiative. The funding level of $8.5 million will fund six existing projects and three additional projects.

Under this program, 30 percent of cost-share funds will be reimbursed to the U.S. Treasury by the Colorado River Basin States.

Beginning in FY 1994, technical assistance under this account will be funded under the Farm Service Agency (FSA), salaries and expenses.

This program was authorized by the Cooperative Forestry Assistance Act of 1978 (16 U.S.C. 2101). The objectives of the program are to bring private, nonindustrial forest land under intensified management, to increase timber production, to ensure adequate supplies of timber products, and to enhance other forest resources.

The Forestry Incentives Program shares up to 65 percent of the cost of tree planting and timberstand improvement. The percentage cost-shared depends on the rate set in a particular State and county by the Agricultural Stabilization and Conservation Committee, after consulting with the State forester. The program is available in designated counties based on a Forest Service survey of total eligible private timberland available for production of timber products. The program is administered by ASCS. Technical assistance is provided by Forest Service.

Under the 1993 program, cost-sharing will be provided to farmers for planting trees on 156,600 acres and improving the timberstand on 32,300 acres of forest.

The 1994 program will provide cost-sharing for tree planting on 156,600 acres and timberstand improvement on 32,300 acres.

Beginning in FY 1994, the technical assistance under this account will be funded under the Farm Service Agency (FSA) salaries and expenses account.

This program was authorized by the Agricultural Credit Act of 1978 (16 U.S.C. 2201-05). It provides funds for sharing the cost of emergency measures to deal with cases of severe damage to farms and rangelands resulting from natural disasters.

Under the 1992 program, cost-sharing assistance was provided in 41 States to treat farmlands damaged by floods, tornadoes, wildfires, earthquakes, and drought. In addition, to meet emergency needs in five States damaged by Hurricanes Andrew and Iniki and Typhoon Omar, supplemental funding was provided. Rehabilitation of the affected farmland is expected in fiscal year 1993. The 1993 program is expected to rehabilitate approximately 748,000 acres of farmland damaged by natural disaster.

The 1994 budget will provide cost-sharing to farmers and ranchers to rehabilitate approximately 219,570 acres of damaged farmland.

The Dairy Indemnity Program was authorized under 78 Stat. 508 in 1964, and has been extended through September 30, 1995, by the Food, Agriculture, Conservation, and Trade Act of 1990 (Public Law 101-624). Payments are made to farmers and manufacturers who are directed to remove their milk or milk products from commercial markets because they contain residues of chemicals that have been registered and approved for use by the Federal Government; other chemicals, nuclear radiation, or nuclear fallout. The authority also provides that indemnification may be paid for cows producing such milk.

In 1993, an estimated $100 thousand will be paid to producers and manufacturers who file claims under the program.

The 1994 budget requests $5 thousand for this program.

This experimental Rural Clean Water Program, authorized by Public Law 96-108 and Public Law 96-528, is a cooperative endeavor among farmers, various USDA agencies, and other organizations to develop and test means of controlling agricultural nonpoint source water pollution in rural areas.

Recommended project areas were developed by local and State committees and approved by the Secretary of Agriculture in consultation with the Administrator of the Environmental Protection Agency. Full funding has been provided in previous budgets for all approved projects.

The 1994 budget requires no additional funding for implementing this program.

Note.—Excludes $767,270 thousands in budget authority in 1994 for activities transferred to: Farm Services Agency Salaries and Expenses comparable amounts for 1992 ($564,251 thousand) and 1993 ($576,517 thousand) are included above.

Beginning in FY 1994, activities in this account will be funded under the Farm Service Agency (FSA), Salaries and expenses account.

Technical assistance.—Technical assistance is provided through 2,955 conservation districts or special districts to land users and decisionmakers, including individual landowners and operators, community groups, units of government, Indian tribes, and others for the planning of conservation programs and installation of needed conservation systems on the land, including design, layout, installation, and consultation services.

Combinations of needed soil and water conservation systems are planned in relation to each other to achieve well-balanced conservation programs. Technicians explain the various soil conditions, develop alternative uses and treatments, help to evaluate the costs and returns of conservation work, and furnish onsite assistance to farmers, ranchers, and others in applying the needed treatments. About 70 percent of the total annual investment in conservation practices applied through the conservation technical assistance program is made by private landusers. During 1994, personnel funded within the Farm Service Agency will continue to provide technical assistance to implement the Conservation Reserve Program, the Wetlands Reserve Program, and the highly erodible land and wetland conservation provisions of the Food Security Act of 1985 as amended by the Food, Agriculture, Conservation and Trade Act of 1990.

MAIN WORKLOAD FACTORS

	1992 actual	*1993 est.*	*1994 est.*
Decisionmakers receiving technical services	1,213,343	12,500,000	
Acres treated with conservation technical assistance	60,258,261	60,300,000	
Tons of soil erosion reduced	299,369,675	314,300,000	

Also included in this item are the inventory and monitoring, resource appraisal, and program development activities. Resource inventories are conducted to provide soil, water, and related resource data for evaluating land-use changes and trends; and for guidance in the development and implementation of Federal, State, and local resource conservation programs. Resource appraisal and program development provides for periodic reports to the public and Congress as required by the Soil and Water Resources Conservation Act of 1977 as amended.

Soil surveys.—Soil surveys and investigations are made of the Nation's soil resources, with interpretations and publications that provide physical land facts needed for program development, resource conservation planning, installation of planned practices, and for use by other Federal, State, and local agencies in making land-use decisions. National leadership is provided for digitizing soil surveys in cooperation with States, and other users of soil survey data.

Acres mapped annually	30,442,139	29,100,000

Snow survey water forecasting.—Water supply forecasts prepared from snow surveys in western states are used in making efficient seasonal use of water for irrigation, flood control, fish and wildlife, recreation, power generation, municipal and industrial water supply, and water quality management.

Operation of plant materials centers.—The selection and evaluation of plant materials are made at 25 plant materials centers through field trials to determine their suitability for erosion control, conservation, and other environmental improvements.

Beginning in 1994 activities formerly carried out by the Agricultural Stabilization and Conservation Service will be covered by the Farm Service Agency.

This account includes funds to cover expenses of programs administered by, and functions assigned to, the Farm Service Agency. The funds consist of direct appropriations, user fees, and miscellaneous advances from other sources. This is a consolidated account for administrative expenses of national, commodity, State, and county offices.

Program formulation and appraisal.—The supply adjustment, conservation, and commodity support programs, and the management and merchandising of commodities acquired under the support program, have a tremendous impact on the national and (to a lesser extent) the international economy. This activity provides for constant review of the effectiveness of these programs. It also provides for the analysis of data to formulate more effective programs.

Operation of supply adjustment, conservation, and price support programs.—This activity includes all functions dealing with the administration of programs including: (a) developing program regulations and procedures; (b) holding meetings with employees and producers to discuss new programs or changes in existing programs; (c) collecting and compiling basic data for individual farms; (d) establishing individual farm allotments, bases, and yields; (e) notifying producers of established allotments, bases, and yields; (f) determining farm marketing quotas; (g) handling appeals; (h) conducting referendums and certifying results; (i) accepting farmer certifications and checking compliance; (j) accepting producer applications for participation in commodity price stabilizing programs; (k) issuing marketing cards so that production from the allotted acreage can be marketed without penalty; (l) processing producer requests for conservation cost-sharing and issuing conservation reserve rental payments; (m) processing commodity loan and storage facility loan documents and issuing checks; (n) processing disaster, deficiency, and diversion payments and issuing checks and commodity certificates; and (o) certifying payment eligibility and monitoring payment limitations.

Inventory management and merchandising.—This activity includes: (a) overall management of CCC-owned commodities; (b) purchasing commodities; (c) donating commodities; (d) selling commodities; (e) processing the redemption of commodity certificates for CCC inventory; and (f) accounting for loans and commodities.

Warehouse examination.—This activity provides for the examination of warehouses licensed under the U.S. Warehouse Act and non-licensed warehouses storing CCC-owned or pledged commodities. ASCS examiners perform periodic examinations of the facilities and the warehouse records to

ensure protection of depositors against potential losses of the stored commodities and to ensure compliance with the U.S. Warehouse Act and any CCC storage agreements.

Automation.—Most farm and producer data are currently maintained on ASCS county office computers and are automatically accessed, used, and updated while servicing producers.

In 1993, Congress separately funded the administrative costs for the Office of the Administrator. Separate funding is eliminated in 1994 and the Administrator's costs once again are funded from the Farm Service Agency's Salaries and Expenses appropriation.

The following tables show total administrative funding available to the former FmHA and personnel:

The Foreign Agricultural Service mission is to help American farmers and traders take maximum advantage of increased opportunities to sell U.S. agricultural commodities abroad and to help increase U.S. farm income.

Activities are conducted within three program areas:

Foreign agricultural affairs.—The Service maintains agricultural counselors, attachés, or trade officers at 75 foreign posts to assist overseas development of markets for U.S. farm commodities. They work closely with numerous U.S. agricultural trade groups and maintain significant contacts with foreign governments and traders to promote market access for U.S. farm products. They also file annually about 5,000 comprehensive reports regarding foreign agricultural production, supply, demand, marketing, and trade policy developments to keep U.S. agriculture, industry, and Government currently informed.

Foreign market information and access.—Under this broad program heading, the Service initiates, directs, and coordinates the Department's formulation of trade policies and programs with the goal of maintaining and expanding world markets for U.S. agricultural products. The Service is responsible for the development and maintenance of the USDA statistical data base encompassing foreign production estimates, trade data, export forecasts, economic indicators, price data and export sales reporting. These data are collected, analyzed, and disseminated to U.S. farm and trade groups providing ready access to reliable information to assess short-term changes in world agricultural supply and demand conditions by commodity.

The analyses of world commodity conditions provide the information necessary to develop export marketing strategies that can be used by the Department not only to gain market access but to enhance the long term market development plans for major U.S. commodities.

Foreign market development.—This program provides funding support to 41 commodity associations (cooperators), 5 regional groups (representing 47 State departments of agriculture) and the National Association of State Departments of Agriculture. Under FAS guidance and supervision, these organizations conduct an extensive worldwide market development program on behalf of the U.S. farm sector. In addition, the Service develops and operates a worldwide system of multicommodity promotional programs utilizing product exhibits, trade teams, trade services, market information programs, and trade referral services to expand overseas markets. Administrative expenses that previously were funded through CCC will be funded directly through the appropriation for this account.

The General Sales Manager was established pursuant to section 5(f) of the Charter Act of the Commodity Credit Corporation and 15 U.S.C. 714–714p. The funds allocated are used for conducting the following programs: (1) CCC Export Credit

Financing sales of agricultural commodities to developing countries for dollars on credit terms, or for local currencies (including for local currencies on credit terms) for use under sec. 104; and for furnishing commodities to carry out the Food for Progress Act of 1985, as amended (title I).—Funds appropriated for P.L. 480 are used to finance all sales made pursuant to agreements concluded under the authority of Title I. The Corporation may serve as the purchasing or shipping agent, or both, for the importing country or may award contracts for freight agent services on behalf of the Corporation to handle shipping of commodities under P.L. 480.

Sales are made to developing countries as defined in section 402(4) of P.L. 480 and must not displace expected commercial sales (secs. 403(e) and (h)). Agreements are made with developing countries for delivery in accordance with the terms of the agreement.

When U.S.-flag vessels are required to ship commodities under this title, the Corporation will pay the difference between U.S.-flag rates and foreign-flag rates. In limited cases, full transportation costs to port-of-entry or point-of-entry abroad may be included along with the cost of the commodity in the amount financed by CCC in order to ensure that U.S. food aid can reach the most needy recipients.

Financing sales of agricultural commodities for dollars on credit terms (title I).—Payment by recipient countries may be made over a period of not less than 10 nor more than 30 years with a deferral of principal payments for up to 7 years. Interest accrues at a concessional rate as determined appropriate.

Section 411 of P.L. 480 authorizes the President to waive payments of principal and interest under dollar credit sales agreements for countries that meet certain enumerated requirements. Such debt relief may be provided only if the President notifies Congress and may not exceed the amount approved for such purpose in an Act appropriating funds to carry out P.L. 480.

Financing sales of agricultural commodities for local currency, including for local currency on credit terms.—Payment by a recipient country may be made in local currencies for use in carrying out activities under section 104 of P.L. 480.

Foreign currency received in payment for credit extended may be used for payment of U.S. obligations abroad, subject to

the appropriation process. The P.L. 480 program is reimbursed for the dollar value of currencies so used.

The financing of sales of agricultural commodities for local currencies on credit terms is subject to the same terms that are applicable to dollar credit financing.

Furnishing commodities to carry out the Food for Progress Act of 1985, as amended (title I).—Funds appropriated to carry out title I may be used to furnish commodities to carry out the Food for Progress Act of 1985. Such commodities may be furnished on credit terms or on a grant basis in order to assist developing countries and countries that are emerging democracies that have made a commitment to introduce and expand free enterprise elements in their agricultural economies.

Total title I agreements made since inception of the program to September 30, 1992 amount to $19,980.8 million cost value, including ocean freight for shipments on U.S. flagships. Major commodities are wheat, cotton, oils, rice and feed grains. Payments received during the period amount to $6,708.6 million, of which $3,897.1 million was applied to principal and $2,811.5 million to interest. The following table reflects the composition of the combined appropriations (in thousands of dollars):

Commodities supplied in connection with dispositions abroad (title II).—Under title II, agricultural commodities are furnished to meet famine or other emergency relief needs, combat malnutrition, carry out activities to alleviate the causes of hunger, mortality and morbidity, promote economic and community development, promote sound environmental practices, and carry out feeding programs. Agricultural commodities are provided through governments for emergencies only, and for non-emergencies through public and private agencies, including intergovernmental organizations.

The Corporation is authorized to pay the costs of acquisition, packaging, processing, enrichment, preservation, fortification, transportation, handling, and other incidental costs incurred up to the time of delivery at U.S. ports. The Corporation also pays ocean freight charges, and pays transportation costs to points of entry other than ports in the case of landlocked countries, where carriers to a specific country are not available, where ports cannot be used effectively, or where a substantial savings in costs or time can be effected, and pays general average contributions arising from ocean transport. In addition, transportation costs from designated points of entry or ports of entry abroad to storage and distribution sites and associated storage and distribution costs may be paid for commodities made available to meet urgent and extraordinary relief requirements.

Through September 30, 1992, appropriations totaling $23,850 million were authorized. Any incidental sales proceeds and proceeds from loss, damage, and other claims are applied against costs to reflect a reduction in appropriation requests. The mission of the Office of International Cooperation and Development (OICD) is to promote U.S. agriculture and to advance the agriculture of developing countries as parts of a complementary global agricultural system capable of providing ample food and fiber for all people.

International agricultural development.—OICD analyzes agricultural policy issues related to USDA's international agricultural development efforts, reviews food aid development activities supported by Public Law 480, and provides food industry training to senior and mid-level professionals from the public and private sectors of selected middle-income countries.

International scientific and technical cooperation.—OICD manages the Department's bilateral exchange and cooperative research programs with foreign governments and institutions in order to strengthen the role of science and technology in the ongoing effort to stabilize world food supplies and to increase the efficiency with which world resources are used. Priorities and criteria for these programs are based on domestic research priorities, potential benefits to U.S. agricultural production, and the availability of desired technologies. OICD coordinates USDA's and the U.S. Government's participation in approximately 30 international organizations concerned with food, agriculture, and rural development.

Reimbursable program.—OICD, using USDA and university expertise, provides technical assistance and training to developing countries at the request of the Agency for International Development and international organizations. OICD manages technical assistance projects in over 80 countries, focusing on land and water management, crop and livestock production and marketing, forestry, pest control, resource conservation and other areas. OICD offers a technical and management training program in agriculture and rural development to participants from foreign countries and designees of international organizations.

This grant program is authorized under section 310(B)(c) of the Consolidated Farm and Rural Development Act, as amended. These grants enable public and private nonprofit organizations to operate rural economic development projects. In general, these grants are an investment in the human and physical resources of rural communities. Past projects have enabled rural communities to acquire and develop land, create technical assistance programs, and encourage small business growth. As part of the rural initiative on rural economic development, program guidelines will be revised so that projects are selected on a competitive basis. This will ensure that grants are targeted to innovative projects that may be duplicated elsewhere in the region or nation.

The fund is used to insure or guarantee loans for water systems and waste disposal facilities, community facilities, and industrial development in rural areas. Communities unable to afford low interest loans for water and waste disposal facilities are also able to obtain water and waste water disposal grants.

As required by the Federal Credit Reform Act of 1990, this account records, for this program, all cash flows to and from the Government resulting from direct loans obligated and loan guarantees committed prior to the 1992. New loan activity in 1992 and beyond is recorded in corresponding program and financing accounts.

The Rural Electrification Administration (REA), under authority of the Rural Electrification Act of 1936, as amended, makes direct loans and guarantees loans made by other qualified lenders to suppliers of electric and telephone service in rural areas. REA also makes grants and loans for the purpose of promoting rural economic development and job creation

projects and grants to provide access to advanced telecommunications services and computer networks for distance learning and medical link facilities.

In order to administer the REA loan programs and to ensure that construction and operation projects conform to approved standards, REA furnishes, without cost to the borrower, business management and technical assistance on a regular basis. This objective is carried out through regulations, personal visits to the borrowers, and training. REA has personnel in the Washington office and a field staff who have expertise in the electric or telephone industry and who are available to assist borrowers in specialized areas including rural development.

The Administration proposes to maintain the current loan levels for the electric and telephone programs. The interest rate charged to borrowers will increase to the cost of money rate for Treasury borrowings. A program will be maintained for direct electric borrowers who are financially unable to pay the Treasury interest rate. These loans will be available at 5%. New direct Federal Financing Bank electric loans will be charged a loan origination fee equal to the amount of the subsidy. This will eliminate the cost of the new loans.

The Rural Electrification Administration conducts the following loan programs: (1) the rural electrification program; (2) the rural telephone program. The rural electrification loan program is financed through REA direct loans for the operation of generating plants, electric transmission, and distribution lines or systems. The rural telephone loan program is financed through REA direct loans for construction, expansion, acquisition, and operation of telephone lines and facilities or systems. In 1994, REA will maintain $25 million in 5 percent direct electric loans. The remaining loans will be provided at the same interest rate that REA pays Treasury for borrowing.

As required by the Federal Credit Reform Act of 1990, this account records, for Rural Electrification and Telephone program, the subsidy costs associated with the direct loans obligated and the loan guarantees committed in 1992 and beyond (including modifications of direct loans or loan guarantees that resulted from obligations or commitments in any year), as well as administrative expenses of this program. The subsidy amounts are estimated on a present value basis; the administrative expenses are estimated on a cash basis.

As required by the Federal Credit Reform Act of 1990, this account records, for the Rural Telephone Bank, all cash flows to and from the Government resulting from direct loans obligated prior to 1992. This account is shown on a cash basis. All new activity in this program in 1992 and beyond (including modifications of direct loans or loan guarantees that resulted from obligations or commitments in any year) is recorded in corresponding program and financing accounts.

The Rural Telephone Bank (RTB) provides a supplemental source of financing for rural telephone borrowers. The Bank charges an interest rate based on the cost of money to the Bank, as prescribed by law, but not less than 5 percent per annum. The composite interest rate on cumulative loans through September 30, 1992, was 7.36 percent. The long-term interest rate on advances made during FY 1992 for loans approved after October 1, 1987, is 6.14 percent.

Equity capital of the Bank consists of class A stock purchased by the United States of $592 million with a 2 percent dividend and classes B and C stock purchased by bank borrowers, organizations eligible to become borrowers and organizations controlled by borrowers. The Bank has borrowed $759 million from the Treasury. The $592 million purchase of capital stock has been financed through appropriations.

Administrative support is provided for the general operations of the Bank by REA employees and the Office of the General Counsel.

Bank loans totaled $177 million in 1992. After almost 20 years in operation, loans to 603 borrowers have been approved, totaling over $2.720 billion.

The Rural Telephone Bank Equity Fund was established in Fiscal Year 1993. Class B Stock equity funds transferred to this account include: (1) five percent of each loan repayment received in the financing account and (2) current class B Stock purchases in the liquidating account. Redemption of Class A Stock will begin in Fiscal Year 1996, as allowed by law, and the funds accumulated in this account many would be used for that purpose.

This appropriation finances the administrative and operating expenses of the Corporation which provides crop insurance to farmers. The FY 1994 budget proposal reflects a decrease of $105.0 million in delivery expenses. This is due to the conversion of certain crop to "area-yield" coverage and reduces the Federal reimbursement to private reinsurance companies for delivery and loss adjustment expenses.

The major portion of administrative and operating expenses is to support delivery systems that rely heavily on the private sector as provided by the Federal Crop Insurance Act of 1980 under section 507(c). The delivery systems are:

(a) Reinsured companies that enable insurance companies to provide the insurance marketing, distribution, servicing, training, quality control, and loss adjustment functions. The companies also share with the Federal Crop Insurance Corporation, to a limited extent, in both profits and losses;

(b) Agency sales and service agreement, also known as the "master marketing agreement." Under this type of agreement, private insurance companies and associations are offered the opportunity to contract with FCIC to provide insurance sales and services. They are compensated on a commission basis; and

(c) ASCS county offices will continue to assist in FCIC's marketing efforts by selling and servicing crop insurance.

In addition, in areas where an adequate private sales and service force is not available, FCIC may ask other USDA agencies to sell and service multiple peril crop insurance through existing county offices.

The Federal Crop Insurance Corporation, a wholly owned Government corporation, was created on February 16, 1938 (7 U.S.C. 1501-1520), to carry out the provisions of the Federal Crop Insurance Act, as amended. The purpose of this Act is to promote the national welfare by improving the economic stability of agriculture through a sound system of crop insurance.

Crop insurance offered to agricultural producers by the Corporation provides protection from losses caused by natural hazards, such as insect and wildlife damage, plant diseases, fire, drought, flood, wind, and other weather conditions. It does not indemnify producers for losses resulting from negligence or failure to observe good farming practices.

Budget program.—The 1994 program will offer insurance based on an "area-yield" concept. Detailed plans for this new program are currently being developed. The program for crop year 1993 will provide crop insurance protection to farmers amounting to approximately $12.8 billion on the following commodities: Almonds, apples, barley, beans (dry and C&P), citrus, citrus trees, corn, cotton, ELS cotton, cranberries, figs, flax, forage production, forage seeding, grain sorghum, grapes, table grapes, hybrid seeding, macadamia nuts, macadamia trees, nursery stock, oats, onions, peaches, peanuts, pears, peas (dry and green), peppers, plums, popcorn, potatoes, prevented planting, prunes, raisins, rice, rye, safflower, soybeans, stonefruit (CA only—apricots, nectarines and peaches), sugar beets, sugarcane, sunflowers, C&P sweet corn, sweet corn (fresh), tobacco, tomatoes (fresh), C&P tomatoes, walnuts, and wheat.

The 1993 appropriation provided sufficient funding for crop year 1993 to insure 80.9 million acres with an estimated $784.7 million in total premium income, including $196.2 million in premium subsidy.

The following table compares the scope of the insurance operations planned for 1993. Amounts in the 1992 column are as of September 30, 1992, and pertain to the 1992 crop year.

The Corporation's budget is presented in accordance with generally accepted accounting principles, the Financial Accounting Standards Board (FASB) Statement No. 60, "Accounting and Reporting by Insurance Enterprises," and Statement No. 5, "Accounting for Contingencies."

Financing.—The Corporation is authorized under the Federal Crop Insurance Act, as amended, to use funds from the issuance of capital stock which provides working capital for the Corporation.

Receipts, which are for deposit to this fund, come mainly from premiums paid by farmers. The principal payments from this fund are for indemnities to insured farmers, and agents' commissions.

Premium subsidies are authorized by section 508(b) of the Federal Crop Insurance Act, as amended and are received from both those insured and through appropriations.

In 1992, the Corporation received a transfer of $338 million from the Commodity Credit Corporation as a reserve against losses in excess of premium in crop years 1991 and 1992.

Operating results and financial condition.—As of September 30, 1992, the Corporation reflected a deficit of $3,258.8 million. This compares with a deficit of $2,979.5 million at September 30, 1991.

For crop years 1948 through 1991, indemnities ($9,648.0 million) exceeded premium income ($6,945.9 million) by $2,702.1 million; the loss ratio for the period was 1.40. Indemnity costs exceeded premiums in 24 of the 43 years.

[1] This entry reflects write-off of Polish debt.

[2] This entry includes commodities received as the result of loan forfeitures valued at $9.6 million for fiscal year 1992. It also includes adjustments for loans to peanut associations.

The Corporation was created to: stabilize, support, and protect farm income and prices; help maintain balanced and adequate supplies of agricultural commodities, their products, foods, feeds, and fibers; and help in their orderly distribution.

The Corporation's capital stock of $100 million is held by the United States Treasury. Under present law, up to $30 billion may be borrowed from the U.S. Treasury to finance operations.

Current, indefinite appropriation authority is requested to cover all net realized losses. Appropriations to the Corporation for net realized losses have no effect on budget authority as they are used to repay debt directly with the Treasury.

Budget assumptions.—The following general assumptions form the basis for the Corporation's 1993 and 1994 budget estimates: (a) National income will rise both in 1993 and 1994 from the present level; (b) 1993 crop production will decrease slightly from 1992 crop levels; (c) generally, exports of agricultural commodities in 1994 are expected to be slightly higher than 1993 levels; (d) yields for the 1993 crops are based on recent averages adjusted for trend; (e) acreage allotments and marketing quotas will be in effect for the 1993 crops of certain kinds of tobacco; (f) poundage quotas will be in effect for the 1993 crop of peanuts.

It is difficult to forecast with accuracy requirements for the year ending September 30, 1994, since the projections are subject to complex and unpredictable factors such as weather, other factors which affect the volume of production of crops not yet planted, feed and food needs here and overseas, and available dollar exchange.

The Omnibus Budget Reconciliation Act of 1990 (OBRA) authorizes and in some cases directs the Administration to modify various agricultural commodity programs in the event that a General Agreement on Tariffs Trade (GATT) treaty is not concluded by June 1992, or is not entered into force by June 1993, if appropriate and to the extent needed to remain internationally competitive. A Uruguay Round agreement will not be in force by June 1993. Accordingly, CCC estimates include an allowance for increased spending in 1993–95 on domestic and export commodity programs to accommodate possible costs of certain adjustments in the Federal commodity programs.

Appropriations are made to reimburse the Corporation for net realized losses sustained in carrying out its operations:

PROGRAMS OF THE CORPORATION

Price support and related stabilization programs.—The Corporation conducts programs to support farm income and prices and stabilize the market for agricultural commodities. Price support is provided to producers of agricultural commodities through loans, purchases, payments, and other means. This is done mainly under the Commodity Credit Corporation Charter Act, as amended, the Agricultural Act of 1949, as amended, and the Agricultural Adjustment Act of 1938, as amended.

Price support is mandatory for the basic commodities—corn, cotton, wheat, rice, peanuts, and tobacco. The Agricultural Act of 1949, as amended, also requires support of the following nonbasic commodities: honey, milk, barley, oats, rye, grain sorghum, sugar and oilseeds. The National Wool Act of 1954, as amended requires support for wool and mohair. Support for other nonbasic commodities is discretionary. The support program may also include operations to remove and dispose of surplus agricultural commodities in order to stabilize prices at levels not in excess of those permissible by law.

One method of providing support is loans to and purchases from producers. With limited exceptions, loans made on commodities are nonrecourse. The commodities serve as collateral for the loan and on maturity the producer may deliver or

forfeit such collateral to satisfy the loan obligation without further payment.

Direct purchases are also made from processors as well as producers, depending on the commodity involved. Also, special purchases are made under various laws for the removal of surpluses; for example, the Act of August 19, 1958, as amended and section 416 of the Agricultural Act of 1949, as amended.

Acreage limitation program.—The Agricultural Act of 1949, as amended, authorizes the Secretary to establish, through the Corporation, acreage limitation programs for the 1991 through 1995 crops of wheat, feed grains, upland cotton, extra long staple cotton, and rice.

Marketing Assessments/Loan Origination Fees.—The Omnibus Budget Reconciliation Act of 1990 and the Food, Agriculture, Conservation, and Trade Act of 1990 amended the National Wool Act of 1954 and the Agricultural Act of 1949 to require marketing assessments for wool and mohair, malting barley, peanuts, tobacco, honey, dairy, and sugar. A two percent loan origination fee is required for oilseeds.

Options Pilot Program.—The Food, Agriculture, Conservation, and Trade Act of 1990 (P.L. 101-624), as amended, authorizes the Secretary to conduct a pilot program for the 1991 through 1995 crops of corn and for the 1993 through 1995 crops of wheat and soybeans to determine whether options trading can be used by producers to obtain protection from price fluctuations and the impact of such trading on market prices of the commodities. An Options Pilot Program was implemented for the 1993 crops of corn, wheat, and soybeans.

Land diversion payments.—The Secretary is authorized to establish paid land diversion programs for wheat, feed grains, upland cotton, extra long staple cotton, and rice.

Producer eligibility.—Producers of wheat, feed grains, upland cotton, extra long staple cotton, and rice, must comply with acreage limitation provisions in order to be eligible for price support loans and purchases and deficiency payments.

Deficiency payments.—The Agricultural Act of 1949, as amended, establishes: (1) minimum established "target" prices for the 1991 through 1995 crops of the following commodities—wheat, corn, upland cotton, rice, and ELS cotton; (2) minimum price support loan and purchase levels for wheat, feed grains, and rice; and (3) minimum price support loan levels for upland cotton and ELS cotton. Deficiency payments for each of the commodities are required when the target price for the commodity exceeds the national average market price or the price support loan level, whichever is higher. The target prices for grain sorghum and oats and, if designated by the Secretary, barley, are established at a level which is fair and reasonable in relation to the target prices established for corn. These payments may be paid by cash or on a non-cash basis, including payments in the form of commodities or commodity certificates that may be exchanged for commodities owned by CCC.

Disaster payments.—

The Dire Emergency Supplemental Appropriations Act for FY 1992 (P.L. 102-229) made an additional $1,750,000,000 available for 1990 crop losses as authorized by the Food, Agriculture, Conservation, and Trade Act of 1990 and for 1991 and 1992 crop losses under the same terms and conditions. The act specified that $995,000,000 be made available for 1990 or 1991 crop payments, at the producer's option, and that an additional $755,000,000 for 1990, 1991, or 1992 crop payments, at the producer's option, would be available if and only to the extent that the President declares such funds to be an "emergency requirement" under the Balanced Budget and Emergency Deficit Control Act of 1985 and submits a budget request. The act further specified that $100,000,000 of this $755,000,000 be made available for 1991 crop payments. The President submitted a budget request for the additional $755,000,000 on September 2, 1992.

The second Dire Emergency Supplemental Appropriations Act for FY 1992 (P.L. 102-368), enacted September 23, 1992, provided additional funding for eligible crop losses associated with natural disasters such as Hurricanes Andrew and Iniki and Typhoon Omar. An amount of $382,000,000 was made available immediately, with an additional amount of $100,000,000 to be made available only to the extent the President declares such funds to be an "emergency requirement" under the Balanced Budget and Emergency Deficit Control Act of 1985 and submits a budget request. P.L. 102-368 also provided a separate appropriation of $48,000,000 for the Tree Assistance Program.

Marketing loan and certificate programs.—The Agricultural Act of 1949, as amended, provides for a mandatory marketing loan program for each of the 1991 through 1995 crops of rice, upland cotton, and oilseeds and a discretionary marketing loan program for each of the 1991 through 1995 crops of wheat, feed grains, and honey. Under a marketing loan program, a producer may repay a price support loan at a level that is lower than the original loan rate. Section 1302 of the Omnibus Budget Reconciliation Act of 1990 (P.L. 101-508) provides that the Secretary shall permit producers to repay price support loans for 1993 through 1995 crops of wheat and feed grains at such a lower level under certain circumstances relating to achievement of an agricultural trade agreement in connection with the Uruguay Round of miltilateral trade negotiations under the General Agreement on Tariffs and Trade (GATT). The Agricultural Act of 1949, as amended, provides for payments, in the form of negotiable marketing certificates, to first handlers of upland cotton (persons regularly engaged in buying or selling upland cotton) and also provides for a marketing certificate program for rice producers.

The Food Security Act of 1985, as amended, authorizes the Dairy Export Incentive Program (DEIP) through calendar year 1995. DEIP provides subsidies to exporters of U.S. dairy products to help them compete with other subsidizing nations. Fiscal year 1991 payment were made in CCC certificates.

The following table itemizes CCC certificate payments by program:

Grain reserves.—The Agricultural Act of 1949, as amended, authorizes a producer-owned grain reserve program for wheat and feed grains that provides 27 month extended loans to producers. Producers receive quarterly storage payments under the contract. Program provisions establish when interest is charged and storage payments are earned.

Dairy.—The Agricultural Act of 1949, as amended, provides for a dairy price support program which sets the minimum

support price for milk at $10.00 per hundredweight through December 1995. If, on January 1 of each year, a milk surplus is estimated at less than 3.5 billion pounds, milk equivalent, the support price will be increased by 25 cents per hundredweight. If the surplus is estimated to be more than 5.0 billion pounds, milk equivalent, the support price will be decreased by 25 to 50 cents per hundredweight. The support price will be unchanged if the estimated surplus is estimated to be between 3.5 and 5.0 billion pounds, milk equivalent.

Payment limitations.—The Food, Agriculture, Conservation, and Trade Act of 1990 amended the Food Security Act of 1985 to provide that the total amount of deficiency and land diversion payments, excluding any deficiency payment received as the result of a reduction of the wheat or feed grain price support loan level, that a person is entitled to receive under one or more annual programs for feed grains, wheat, upland cotton, ELS cotton, and rice for each of the 1991 through 1995 crops of these commodities shall not exceed $50 thousand. For each of the 1991 through 1995 crops of wheat, feed grains, upland cotton, rice, and oilseeds, gains from repaying a loan at a lower level than the original loan level, loan deficiency payments, and any deficiency payment received as a result of a reduction of the wheat or feed grain price support level shall not exceed $75 thousand. For each of the 1991 through 1995 crops the total amount of: (1) deficiency payments, land diversion payments, payments for resource adjustment (excluding diversion payments) or public access for recreation, disaster payments, loan deficiency payments, inventory reduction payments and gains realized from a marketing loan repayment with respect to wheat, feed grains, upland cotton, ELS cotton, rice, and oilseeds; and (2) gains realized by a producer from repaying a loan less than the original loan level with respect to other commodities, that a person shall be entitled to receive under one or more of the annual programs for such commodities shall not exceed $250 thousand, except as otherwise may be authorized by the Secretary. Annual rental payments made under the Conservation Reserve Program are limited to $50,000 per person. The Agricultural Act of 1949, as amended, limits the total amount of benefits that a person may receive annually under one or more of the emergency livestock assistance programs to $50,000. Starting with the 1991 crop, the total amount of benefits that a person may receive under one or more of the emergency livestock assistance programs will be $50,000 per crop year rather than calendar year.

The Food, Agriculture, Conservation, and Trade Act of 1990 also amended the National Wool Act of 1954 to establish payment limitation provisions for the 1991 through 1995 marketing years of wool and mohair and also amended the Agricultural Act of 1949 to establish payment limitation provisions for the 1991 through 1995 crops of honey. The annual payment limitations for these commodities are: $200,000 in 1991; $175,000 in 1992; $150,000 in 1993; and $125,000 in 1994 and 1995. In 1994 the payment limits for wool and mohair are proposed to be amended to permit payments of not more than $50,000, similar to the limits for wheat, feed grains, rice, cotton, and oilseeds. Price support loans for honey are proposed to be eliminated.

Supply and foreign purchases.—The Corporation can procure from domestic and foreign sources food, agriculture commodities, and products and related materials to supply the needs of Federal agencies, foreign governments, and private and international relief agencies, under section 5(b) and (c) of the Commodity Credit Corporation Charter Act, as amended.

Commodity exports.—The Corporation promotes the export of agricultural commodities and products through sales for dollars or foreign currency, payments, extension of credit, assumption of certain risks, and conduct of other operations with respect to the exportation of commodities. Such commodities and products may be those held in private trade channels as well as those acquired by the Corporation. These programs are carried out under the authority of the CCC Chapter Act and other specific legislation.

Foreign donations.—Under the authority of section 416(b) of the Agricultural Act of 1949, as amended, the Corporation may furnish eligible commodities for carrying out programs of assistance in developing and friendly countries under the Food for Progress Act of 1985 and titles II and III of the Agricultural Trade Development Act of 1954, as amended. CCC may pay costs associated with making the commodities available. Not to exceed $10 million of CCC funds or commodities may be used each fiscal year to enhance the development of private sector agriculture in countries receiving commodities under the Food for Progress Act of 1985.

Operating expenses.—The Corporation carries out its functions through utilization of employees and facilities of other Government agencies. Administrative expenses are incurred by: the proposed Farm Service Agency; General Sales Manager; other agencies of the Department engaged in the Corporation's activities; and the Office of Inspector General for audit. Additional expenses are incurred by the Farm Service Agency county offices for work related to programs of the Corporation, other Farm Service Agency expenses offset by revenue, custodian, and agency expenses of the Federal Reserve banks and lending agencies, and miscellaneous costs. Beginning in 1994 administrative expenses of the Foreign Agricultural Service that previously were funded by transfers from CCC will be funded directly through the FAS appropriation, excepting credit program account transfers.

Expenses are incurred for acquisition, operation, maintenance, improvement, or disposition of existing property that the Corporation owns or in which it has an interest. These expenses are treated as program expenses. Such program expenses include inspection, classing, and grading work performed on a fee basis by Federal employees or Federal- or State-licensed inspectors; and special services performed by Federal agencies within and outside this Department. Most of these general expenses, including storage and handling, transportation, inspection, classing and grading, and producer storage payments, are included in program costs. They are shown in the program and financing schedule in the entries entitled "Storage, transportation, and other obligations not included above," and "Producer storage payments." In 1994, administrative equipment will be funded by the proposed Farm Service Agency.

The Corporation receives reimbursement for grain requisitioned pursuant to Public Law 87-152 by the States from Corporation stocks to feed resident wildlife threatened with starvation through the appropriation reimbursement for net realized losses. There have been no requisitions in recent years, however.

SPECIAL ACTIVITIES

These activities are carried out under authority of section 5(g) of the Corporation's charter act and specific statutory authorizations or directives with respect thereto that are currently in effect or which may subsequently be enacted.

A summary of such current activities not included under other designated activities is as follows:

Total payments made under the National Wool Act cannot at any time exceed an amount equal to 70 percent of the accumulated totals, as of the same date, of the gross receipts from import duties collected on and after January 1, 1953, on wool and wool manufactures. Actual or estimated payments compared with this limitation are as follows:

[In thousands of dollars]

Item	1992 actual	1993 est.	1994 est.
70% of customs receipts on wool and wool manufactures, cumulative from Jan. 1, 1953, to end of preceding calendar year	5,216,591	5,499,572	5,786,053

Balance of limitation available for payments in succeeding marketing years	2,879,260	2,981,141	3,080,022

Funds of the Corporation are used to carry on this program. Section 705 of the act appropriates each fiscal year an amount equal to amounts expended by the Corporation during the preceding year and to amounts expended in all prior fiscal years not previously reimbursed, but not to exceed an amount equal to 70 percent of the gross receipts from total duties collected on wool and wool manufactures during the calendar year preceding the fiscal year.

FINANCING

Borrowing authority.—The Corporation has an authorized capital stock of $100 million held by the United States and, effective in 1988, authority to have outstanding borrowings up to $30 billion at any one time.

Funds are borrowed from Treasury and may also be borrowed from private lending agencies and others. The Corpora-

tion reserves a sufficient amount of its borrowing authority to purchase at any time all notes and other obligations evidencing loans made to the Corporation by such agencies and others. All bonds, notes, debentures, and similar obligations issued by the Corporation are subject to approval by the Secretary of the Treasury as required by the Act of March 8, 1938.

Interest on borrowings from the Treasury (and on capital stock) is paid at a rate based upon the average interest rate of all outstanding marketable obligations (of comparable maturity date) of the United States as of the preceding month. Interest is also paid on other notes and obligations at a rate prescribed by the Corporation and approved by the Secretary of Treasury.

The Department of Agriculture and Related Agencies Appropriation Act, 1966, made provision for terminating interest after June 30, 1964 on the portion of the Corporation's borrowings from the Treasury equal to the unreimbursed realized losses recorded on the books of the Corporation after the end of the fiscal year in which such losses are realized.

POSITION WITH RESPECT TO BORROWING AUTHORITY, END OF YEAR

[In thousands of dollars]

Item	*1992 actual*	*1993 est.*	*1994 est.*
Statutory borrowing authority	30,000,000	30,000,000	30,000,000
Deduct: Borrowings from Treasury	20,038,425	26,151,579	19,992,650
Net statutory borrowing authority available	9,961,575	3,848,421	10,007,350

Note.—Accounts payable, accrued liabilities and other outstanding obligations not reflected on this table do not become charges against the statutory borrowing authority until they result in borrowings from the Treasury.

Contract authority.—Price support and other programs required by statute may result in the Corporation incurring obligations in excess of available funds and borrowing authority. Such obligations are liquidated from subsequent appropriations and other funds that may become available to the Corporation. Any increase in obligations in excess of available fund resources is reported as contract authority in the year involved; a decrease is reported as the application of appropriations and other funds to liquidate the authority.

Appropriations.—Under section 2 of Public Law 87-155 annual appropriations are authorized for each fiscal year to reimburse the Corporation for net realized losses incurred as of the close of each year.

The special activities are financed as indicated in the program descriptions above. In addition to certain reimbursements from other agencies, appropriations are made for the National Wool Act (see above) and foreign assistance programs.

Deficit.—The net realized losses of the Corporation have previously been reimbursed as follows:

The wool and mohair program is proposed to be reformed in FY 1994, by applying the common $50,000 payment limitation (the same as wheat, feed grains, cotton, rice, oilseeds and rice), rather than the $125,000 limit. Price support loans for the honey program are proposed to be discontinued in 1994. Also, individuals with adjusted gross incomes from off-farm sources exceeding $100,000 per annum would not be eligible to receive Federal agricultural income-support payments and other related Federal agricultural benefits. Funding for the Market Promotion Program is proposed to remain at the FY 1993 appropriation level for FY 1994.

The Administration is also proposing, starting in FY 1996, to extend the "triple base" reforms begun in the Omnibus Budget Reconciliation Act of 1990 to include an additional 10 percent of farm acreage, bringing the total unpaid acreage up to 25 percent. On all of this acreage, farmers would be entitled to grow almost any commodity desired, allowing greater planting and market flexibility. Accompanying this measure is a matching change in the assessment for "non-Treasury" crops to preserve the equity in treatment among crops. The 0/92 and 50/92 programs that allow producers to idle land for pay are also proposed for elimination starting in FY 1996.
