

Prefatory Note

The attached document represents the most complete and accurate version available based on original copies culled from the files of the FOMC Secretariat at the Board of Governors of the Federal Reserve System. This electronic document was created through a comprehensive digitization process which included identifying the best-preserved paper copies, scanning those copies,¹ and then making the scanned versions text-searchable.² Though a stringent quality assurance process was employed, some imperfections may remain.

Please note that some material may have been redacted from this document if that material was received on a confidential basis. Redacted material is indicated by occasional gaps in the text or by gray boxes around non-text content. All redacted passages are exempt from disclosure under applicable provisions of the Freedom of Information Act.

¹ In some cases, original copies needed to be photocopied before being scanned into electronic format. All scanned images were deskewed (to remove the effects of printer- and scanner-introduced tilting) and lightly cleaned (to remove dark spots caused by staple holes, hole punches, and other blemishes caused after initial printing).

² A two-step process was used. An advanced optical character recognition computer program (OCR) first created electronic text from the document image. Where the OCR results were inconclusive, staff checked and corrected the text as necessary. Please note that the numbers and text in charts and tables were not reliably recognized by the OCR process and were not checked or corrected by staff.

SUPPLEMENTAL NOTES

The Domestic Nonfinancial Economy

No textual addendums to the Greenbook were required.

The Domestic Financial Economy

No textual addendums to the Greenbook were required, but the usual updating of interest rate developments is contained in the table on page 2.

ERRATA - PART II:

Appendix A - page A-1, line 16: change 3 per cent to 2 per cent.

Addendum - page III-4 (footnote): The estimated excess of individuals' nonwithheld Federal income tax payments over last year's was revised downward from \$2.5 billion to \$1.5 billion. As a consequence, the impact of that source as a special factor stimulating demand deposits is reduced commensurately.
