

Prefatory Note

The attached document represents the most complete and accurate version available based on original copies culled from the files of the FOMC Secretariat at the Board of Governors of the Federal Reserve System. This electronic document was created through a comprehensive digitization process which included identifying the best-preserved paper copies, scanning those copies,¹ and then making the scanned versions text-searchable.² Though a stringent quality assurance process was employed, some imperfections may remain.

Please note that this document may contain occasional gaps in the text. These gaps are the result of a redaction process that removed information obtained on a confidential basis. All redacted passages are exempt from disclosure under applicable provisions of the Freedom of Information Act.

¹ In some cases, original copies needed to be photocopied before being scanned into electronic format. All scanned images were deskewed (to remove the effects of printer- and scanner-introduced tilting) and lightly cleaned (to remove dark spots caused by staple holes, hole punches, and other blemishes caused after initial printing).

² A two-step process was used. An advanced optimal character recognition computer program (OCR) first created electronic text from the document image. Where the OCR results were inconclusive, staff checked and corrected the text as necessary. Please note that the numbers and text in charts and tables were not reliably recognized by the OCR process and were not checked or corrected by staff.

SUPPLEMENTAL NOTES

Producer prices increased sharply in July at all stages of production. Prices of finished goods rose at a 1.1 percent, more than twice the rates in May and June. Prices of consumer foods were unchanged after three months of decline, while prices of consumer finished goods excluding foods rose 1.9 percent. Excluding energy items from these goods the increase was 0.8 percent. Capital equipment prices rose 0.8 percent rate, up from the increases in the two preceding months but about the same as the average monthly increase over the first half of the year. Prices of materials, both intermediate and crude, rose sharply again in July, particularly prices of foodstuffs.

Sales of single-family homes fell sharply in June and prices continued to rise rapidly. Existing home sales--by far the largest part of the market--fell almost 8 percent in June to the lowest level in two years. At the same time, merchant-builder sales of new homes were down 5 percent with declines experienced in all regions of the country. Conversely, the average prices of both new and existing units sold rose sharply in June. The average price for a new home sold in June was \$74,200, 17 percent above a year earlier; the average price for an existing home sold, \$66,100, was 20 percent higher than in June 1978.

The stock of unsold new homes continued at relatively high levels in June. The number of units on the market at the end of the month was down slightly from a month earlier, but it was within the range experienced during the past year. However, lower sales pushed the stock of units for sale to 7.5 months' supply--a figure well above recent levels.

The book value of wholesale trade inventories rose at an \$8.1 billion annual rate in June, well above the downward revised May increase of \$3.4 billion but substantially below the average during the first four months of the year. For the second quarter as a whole, stocks rose at a \$7.4 billion rate, about half the first quarter pace. In June the moderate rise in stocks was accompanied by only a modest gain in sales (0.5 percent). As a result, the inventory to sale ratio for all wholesale trade remained at the May level of 1.17, somewhat below average in the basis of recent historical experience.

Inventories held by wholesalers of durable products increased at a \$4.4 billion rate in June, following the \$5.7 billion pace in the previous month. The increase for the second quarter was just below that during the first three months of the year. In June, the largest increase was at wholesalers of hardware, plumbing, and heating equipment. Stocks rose at motor vehicle suppliers, mostly importers of foreign cars and also some truck distributors; these stocks had fallen for the three consecutive months preceding June. The book value of nondurable inventories rose at a \$3.7 billion rate in June, following a decline now shown for May. In the second quarter as a whole, these stocks rose less than 1/3 as much as in the first quarter. All of the June increase in nondurable inventories was in raw farm products and "other" wholesale goods, all other published categories reported declines, with the largest decline at wholesalers of petroleum and petroleum products.

The Domestic Financial Economy

Revision of business loan figures, Table III-6.

Due to revisions of business loan estimates in one district, some of the seasonally adjusted annual rates of change for 1979 reported in the Greenbook have been revised. Where numbers have been changed, previous figures are shown in parentheses.

	1979				12 months ending July e
	Q1	Q2	June	July e	
6. Business loans	22.6 (21.8)	19.4 (19.5)	16.9	(16.7)	17.0
Memoranda:					
11. Sum of items 6 ÷ 10 (Business loans plus commercial paper)	22.8 (22.0)	22.1	19.8 (20.3)	18.3 (20.0)	18.8
12. Memo item 11 plus business loans from finance companies	21.1 (20.5)	21.5	20.1 (20.2)	n.a.	n.a.

Commercial paper outstanding increased \$900 million in July, sharply below the record \$5.4 billion gain in June and the smallest monthly advance since October 1978 (see table). Bank-related issuers allowed a \$300 million run-off in July after increasing their commercial paper outstandings in each of the four previous months. Nonbank-related financial issuers, as a group, increased their outstandings by only \$100 million, partly because Chrysler Financial Corporation tapped its bank credit lines

to redeem maturing paper. In the nonfinancial sector, public utilities and several foreign corporations were active issuers in July as outstandings climbed \$1.2 billion, well above the monthly average in the first half of this year.

Commercial paper rates have increased somewhat further in recent days. Dealers report that this upward movement mostly reflected delayed reaction to recent increases in other money market interest rates as well as large sales by several major issuers. These individuals indicate also that the current problems of Chrysler Corporation have had very little impact on the market and that spreads between high- and lower-rated commercial paper have not widened.

Business credit at finance companies climbed by \$1.0 billion during June (latest available data). Retail automotive loans on commercial vehicles decreased slightly reflecting in part the reduced pace of truck sales in June, but wholesale automotive credit expanded by \$600 million as dealer inventories of cars and trucks continued to increase (see table). The equipment and all other loan category expanded by \$800 million in June. Industry representatives reported strong sales of agricultural equipment accounted for a major portion of this increase.

Weaker than anticipated deposit flows at sampled savings and loan associations in the last 10 days of July have led to a downward revision in the estimated combined growth rate for S&Ls and MSBs to about 5-1/4 percent from the 6-3/4 percent reported in the Greenbook (end-of-month basis).

CHANGE IN COMMERCIAL PAPER OUTSTANDING
(monthly totals or monthly averages, sea. adj., billions of dollars)

p--preliminary

1/ Quarterly growth rates are computed on a quarterly average basis.

2/ Savings deposits held by individuals and nonprofit organizations.

3/ Savings deposits of business, government, and others, not seasonally adjusted.

4/ Small time deposits are time deposits in denominations less than \$100,000. Large time deposits are time deposits in denominations of \$100,000 and above excluding negotiable CDs at weekly reporting banks.

5/ Growth rates computed from monthly levels are based on average of current and preceding end-of-month data.

6/ Includes Treasury demand deposits at commercial banks and Federal Reserve Banks and Treasury note balances.

7/ All large time certificates, negotiable and nonnegotiable, at all CBs.

8/ Nondeposit borrowings of commercial banks from nonbank sources include Federal funds purchased and security RPs plus other liabilities for borrowed money (including borrowings from the Federal Reserve), gross Eurodollar borrowings, and loans sold, less interbank borrowings.

9/ Based on data through July 25, 1979.
