Subject: The Goldenweiser Papers

From: Miss Adams

The Goldenweiser Papers are in a storage warehouse in Princeton, New Jersey. They are described as being in one big box, not classified nor organized. The story is that Mr. Goldenweiser died on the day when the family was about to move from the Princeton house to Washington. Under those circumstances all his papers were bundled together and put into a box and into the storage warehouse with the rest of the family's goods. Mrs. Goldenweiser whose name is Anne, is now living with her daughter Mrs. Andrew M. Karmarck at 6403 Meadow Lane, Chevy Chase, Washington; the telephone is OLiver 4-4298. At the present moment Mrs. Goldenweiser is extremely occupied with her mother, in the hospital and very ill. She is said to be eager that the papers should come to Washington; possibly to the Federal Reserve Board, but that some funds would have to be provided to get them out of the storage warehouse and properly handled. It appears to me that this might be something which the committee could and should undertake.

Before any action is taken on this, Mr. Walter Stewart should be consulted.

This is a partial memo and further information will be added as it is gained.

It has thus far been impossible to get any trace of the rumoured diary which Mr. Goldenweiser was said to have left. I am told that he did leave copious notes on certain phases of Federal Reserve Board developments and on episodes which played an important part. He also is said to have worked with Mr. Carl Parry.

~~Mr. Goldenweiser's widow's name is Pearl. This can certainly be checked in Who's Who.~~

Subject: Parts of the 1923 Annual Report of  
the Federal Reserve Board - Memorandum  
by Mr. Stewart on Monetary Theory.

From: Miss Adams

This memorandum would be valuable to us. Also Mr. Goldenweiser's testimony for the Congressional Hearings on the Banking Act of 1935 would be valuable. I think we must get track of hearings that were held on various bills and amendments to the Act as they are essential in a list of source materials. I also understand the Mr. Carpenter wrote a thesis on Open Market Operation Mechanics for perhaps a Masters Degree. This was in 1940 and there should be a copy in the library in the New York Bank
