-
- Study falls in 4 sections: 1) relations between currency and deposits and certain ec. variables;
- (ii) Some regional comparisons and interregional relations — relative changes in banking importance of 12 F.R. districts, 1919-34; problem of the impact and diffusion of foreign gold thru N.Y. to inland, and response to NY to domestic gold and deposit movements.
 - (iii) statistical studies of "The exchange velocity of bank deposits".
 - (iv) "Circular Velocity" of money

Underemployment Equilibrium

An article tracing the development of Mr. Keynes' economic theories, in part on the lines of the author's discussion in his work on THE VALUE OF MONEY. The article stresses the increasing departure from the teaching of Marshall, and is throughout critical, especially with regard to the theory of interest (liquidity preference)
