SCHOOL OF ECONOMIC AND SOCIAL STUDIES,

No. 3, September, 1954, pp. 229-258.

Imperfect capital market in the theory of rate of
interest.

Hicks's explanation of long-term rates of interest in terms of speculation on the future course of the short rate in order to escape from idea that rate of interest on perfectly safe securities is determined by uncertainty of future interest rates. Proposition to assume away the existence of short-term securities. Interest rate and price level of securities in a given state of expectation of profit. The elasticity of demand for money. Difficulties in distinguishing precautionary and speculation motives. The demand for money is complicated outcome of the interplay of these motives. Implications for the elasticity of liquidity preference curve and particularly the interest responsiveness of the amount of money held on account of these motives. Impossibility of representing the liquidity preference by a well-defined curve. Imper-
