The whole period of American banking is told in a continuous, non-technical narrative. For purposes of illustration, events in the history of a number of individual banks have been cited, but particularly those connected with the Chemical National Bank of New York. ... After discussing the early history of American banking, the author leads up to the causes which brought about the establishment of the Fed. Res. System. He concludes with a critical explanation of financing World War I and problems of subsequent development.
