GREGORY, T. E.

THE PRESENT POSITION OF BANKING IN AMERICA.

Introduction by Walter Leaf. New York: Oxford University Press, 1925. Pp. 40.

The author's observations are based upon a personal investigation. In particular, he discusses the branch banking controversy, par clearance, inelasticity of note issues, guarantee of bank deposits, the federal reserves in relation to farmers, and the 'open market' policy. His concluding judgment is that 'the tone of the American banker is overwhelmingly provincial, even in New York,' He also notes that the prestige of the Federal Reserve System is much greater abroad than at home.

Note in THE AMERICAN ECONOMIC REVIEW, March, 1926,
p. 139.

"Two dangers threatening the Federal Reserve System," ~~SOUTH~~ ATLANTIC QUARTERLY, April, 1926.

The loss of membership and state domination of our banking system are the dangers. The McFadden bill affords only a partial relief from these. As a remedy for the dangers, it is suggested that a tax be imposed upon the checks of state banks, as formerly upon the notes of state banks, with the view to forcing such banks to take out national charters. Abstract by G.H. Evans, AMERICAN ECONOMIC REVIEW, Sept. 1926, p. 543.

QUESTIONS AND ANSWERS ON THE FEDERAL RESERVE
SYSTEM. Richmond, Va.: Federal Reserve Bank of
Richmond, 2d ed., 1926. Pp. xi, 178.

This is an amplification of 1st ed., published in 1920. It is based upon correspondence which 5th F.R. District has had with bankers and also with teachers of banking in various schools in different parts of the country. A considerable amount of new material has been added to the 1st ed.; and, 'while the book of necessity still deals more particularly with the F.R. Bank of Richmond, an attempt has been made to make it descriptive of the F.R. System as a whole than was the 1st ed.'" AER, June 1927.

Wells, Oscar.

A plea for sound economics. (In A.B.A. journal. v.19, Aug. 1926. p.75, 112-13.)

Perhaps greatest economic achievement in our time was passage of Federal reserve act.

Economic wisdom of today, so far as Mr. Wells is able to interpret it, is in favor of an early enactment looking toward extension of these charters.
