v.f. Johnston, Horace

PAR Again - the "non-par" problem! (In: Credit  
COLLECTION and financial management, May 1938, p.6,7)

The N.A.C.M. does not regard the practice of clearing checks at less than par, by making an exchange deduction from the face value of the checks, as a legitimate method of obtaining revenue by banks. It favors the collection system of the Federal Reserve System, with par clearance of checks, as an aid to business.
