Recent developments in commercial banking policy in the United States, **ECONOMIC WORLD**, September, 1922.

Pp. 3.

There has been a great increase in investment holdings of commercial banks as compared with loans and discounts. This makes it necessary for the present-day banker to study the investment market and to keep posted on international affairs in order to anticipate the world demand for capital. Abstract by N.M. Whitney, **AMERICAN ECONOMIC REVIEW**, XIII, March, 1923, p. 181.

**Commercial banking during the depression.
(In: Journal of the American statistical Assn.,
March, 1933, pp.59-74)**

The idea of relegating profit-making to a secondary position is not new in banking. This principle is embodied in the F.R.System, and can easily be extended to member banks by regulations to bring about a greater control and stabilization of business, with profits secondary.
