---

The change in the business of member banks in recent years has been characterized by an increased use of their resources in long-time investments and in loans not arising out of the current requirements of trade and industry and by an increase in the proportion of their liabilities in the form of time deposits. There has been a tendency toward a continuous decrease in the proportion of paper eligible for rediscount.

Abstract, by W.O. Weyforth, A.E.R., Sept. 1927,  
p. 566.

### Loans

Currie, Laughlin

The decline of the commercial loan. (In: The Quarterly Journal of Economics, August, 1931, p.698-709.)

The usual process by which bank loans have been reduced is through excess of earnings over dividends, or through new stock issues...There is strong possibility that commercial loans will represent a still smaller proportion of bank assets.

CURRIE, LAUCHLIN

"The Decline of the Commercial Loan"  
Q.J.E. Vol. XLV No. 4, August, 1931,  
pp. 698-709.

---

Analysis of causes of relative decline in commercial loans; offers grounds for doubting such loans will continue to increase, at least to a degree commensurate with the desirable secular expansion of demand deposits.
