About 1/2 devoted to an analysis of the statistical record of failures of both national and state banks, 1865-1934.

One chap. on Guaranty of deposits.

Heart of book: discussion of responsibility for failures and of the operations of commercial banks in the security markets.

(a) lack of unified govt. control and restrictions on extension of branch banking = fundamental causes of excessive bank mortality.
About one-half book devoted to analysis of the statistical record of failures of both national and state banks, 1865–1934. Real center of book is discussion of responsibility for failures and of the operations of commercial banks in the security markets.
