THE PRACTICAL WORK OF A BANK. New York:
Bankers Publishing Co., 1915. Pp. vii, 621.

Best work so far published on subject of practical banking. Organization and bookkeeping have not been allowed to overshadow other equally vital and far more difficult topics. More than 100 pp. are devoted to the subject of credit analysis and a prominent place is given to cost accounting. The book is largely a product of the education work of the American Institute of Banking, liberal use having been made of papers prepared by various members of that organization.
