STANDARDIZED OR INDEX MONEY? A DEFENSE OF TESTED MONETARY STANDARDS. New York: The Author (92 William Street), 1924. Pp. 52.

The author denies that there was forced deflation in the U.S. after the war. The present large gold fund is not only a cover for our own monetary needs, but also for the financial and monetary structure of other countries which have deposits here. He takes issue with Keynes and holds that prices cannot be stabilized without control of the rates of exchange. Moreover, stabilization of prices is not necessarily desirable.
