

ANDERSON, B. M.

Control of the Excess Reserves of Member
Banks of the Federal Reserve System, INVESTMENT
BANKING, November 12, 1935, pp. 24-28.

Urges action to decrease excess reserves by raising
reserve requirements by, first, 33 1/3% and
later perhaps by doubling them.

M

Reserves - Federal reserve system
Anderson, George E.

The growth of excess reserves. (In: Banking, Jr. of the A. B. A., Jan. 1939, p. 85-86)

With unemployed bank funds again at another high record action by the Reserve board is mooted and Mr. Anderson presents a tabulated "Excess Reserve calendar," from Jan. 1932-Dec. 14, 1938. With \$500,000,000 now considered by the Board as a reasonable volume of excess reserves it is unlikely that anything will be done about them at the present time.

Jones, Frederick W.

Banks under the Profit System. (In: Banking, Journal of the A.B.A. December 1934, p.34-37, and Jan.& Feb.1935)

Huge excess reserves add to the pressure exerted by low earnings upon bankers to seek unsuitable fields for their funds. The campaign now being carried on to induce banks to enlarge their loan operations is hazardous because the banks are really in need of more loans & investments as earnings are steadily declining.

Watkins, Leonard L.

The variable reserve ratio. (In: Jr. of
Political Economy, June 1936, p.339-373)

Suggests that ^{if} 1 1/2 billion dollars of excess
reserves were sterilized, the situation would be
simplified. He offers also the procedure for in-
creasing the ratio.
