QUARTERLY JOURNAL OF ECONOMICS,
Nov. 1923.

Reviewer reaches conclusions that federal reserve banks, save only as they do not discount or invest their funds, have no control of their note issues, the volume of issues being dependent upon the demands of their member banks for currency.

Abstract by W.O. Weyforth, AMERICAN ECONOMIC REVIEW, XIV, March, 1924, p. 178.

"Inflation in relation to the bank reserve and
the business cycle," **ECONOMIC WORLD**,
June 30, 1923.

The limits of credit extension must be under the control of the central bank if it is really to be the custodian of the ultimate banking reserves of the country. The central bank can make a distinct contribution by preventing, through fluctuations in the discount rate, the volume of credit from exceeding sound proportions. Abstract by W.O. Weyforth, **AMERICAN ECONOMIC REVIEW**, XIII, Dec. 1923, p. 767.
