### Public works

Angell, James W.

The Federal finances and the banking system,  
(In: Journal of the American Statistical Association,  
March 1935 supplement, p.169-74.)

Questions the favorable effects of governmental spending. Believes that net additional expenditures by government can at most increase the national money income by a limited amount, which is the original expenditure multiplied by the current "circular velocity" of money so-called.

M

v.f.                    Public works  
Public    Axley, Seth  
works

The spending cure for depression. (In:  
Barron's Feb.12, 1934,p.3)

Public works expenditures are really converted into non-income categories, are made possible only by conscripting private capital and since they are non-productive launch the economic set-up into a self-consuming tailspin.

Clipped and filed in v.f.

Public works

Hawtrey, R. G.

Public expenditure and trade depression, with discussion. (In: Journal of the Royal statistical society, pt.3, 1933, p.488-477)

Suggests that currency depreciation is the most satisfactory measure of revival; when cheap money fails to bring about revival, there is more to be hoped from an open market policy. Suggests that Reserve bank open market policies in 1932 were never sufficiently appreciated.
