Development of idea re importance of changes in the rate of interest as an instrument of monetary policy since 1930. The Fed. Res. policy in U.S. since 1940. The question of whether the volume of reserves and the amount of balances held by the public are the best criteria of the monetary influence being exerted at a given time. Different views of Federal Reserve and the Treasury. Renewed popularity of the discount mechanism. Disagreement within the System itself: Should the Open Market Committee confine operations to short maturities, preferably treasury bills? Federal Reserve and Treasury reasons for tighter money.
