

ACHINSTEIN, Asher

INTRODUCTION TO BUSINESS CYCLES. New York:  
Thomas Y. Crowell Co., 1950. Pp. xvi, 496.

Review: by John Lintner, *American Economic Review*, vol.  
40, Dec., 1950, pp. 942-44.

population, capital formation, productivity, residen-  
tial construction, patterns of consumption, and money,  
prices, and over-all production (Burns, Kuznets, Fabri-  
cant, Mills and Shaw of N.B.E.R. to Cassels' and  
C. Snyder's studies of money and prices and production,  
Paul Douglas' laws of production, Colin Clark on terti-  
ary inds; chap. on Hansen, Kondratieff, Schumpeter

---

- Part I - survey of theoretical literature on business  
cycles (about 1/2 on Keynes' General Theory  
and modern analyses closely related to it).
- Part II - summary of empirical work of National Bureau  
of Economic Research
- problem of defining and identifying business  
cycles
  - measurement of cycles - aid of business annals  
and indices
  - statistical methods of Bureau
  - Bureau's work on natl. income and its relation  
to their studies of the cycle
  - 2 chs. detailing Burns-Mitchell analyses, 1939-  
38

Part III: Theoretical and Empirical literature  
on secular trends and long term fluctuations in
