M

Money - Regulation

Barber, A. V.

The gold question. (In: The Banker, August 1937, p.139-43)

The world suffers from a palpable flaw in so-called "currency management" which having sought to raise commodity prices by monetary means when they were low shrinks from corrective monetary action when prices rise.

COLE, G. D. H.

The 'worship of par.'" BANKERS' MAGAZINE
[London], September, 1924.

Describes the 'worship of par' and the attempt to restore the gold standard in England as hindering the development of industry and the lessening of unemployment. Moderate bank inflation would be desirable. Mr. Hartley Withers answers Mr. Cole, pointing out the manner in which fluctuating exchanges interfere with the development of industry.

LOMBARD, L.

Role of gold as a monetary standard. Author holds opinion world's monetary gold stock insufficient to support volume of credit necessary to finance interchange of commodities both natl. and internatl. As a remedy he advocates use of warehouse ctf's for other metals (silver, zinc, copper, tin, aluminum) to supplement gold as basis for credit. Author overlooks fact that under present conditions gold has ceased to be a basis for credit in many countries--volume of credit bearing little relation to monetary gold stocks.

The problem of stabilization. (In: Lloyds Bank Ltd., Monthly Review, April 1935, p.207-218.)

British authorities should peg the pound at some figure in the present neighbourhood preferably chosen in agreement with the French and American authorities, and should try the experiment of keeping it there for sufficient time for us to see whether we can hold it. Stabilization is absolutely necessary for the world to get out of the present impasse.

International aspects of recovery. (In:Proceedings of the Academy of Political Science, Apr. 1934, p.117-124)

A world currency, or a reasonably stable relation between national currencies, is indispensable as a medium for world trade; is impossible except with an equilibrium in world trade; and is useless except for the purposes of world trade.
