List of Exhibits

Individual income tax

- 1. Individual income tax: Number of individual income tax returns, 1938 1943.
- 2. Individual net income tax: Estimated number of taxpayers for 1942 and 1943, by surtax net income and type of income.
- 3. Individual income tax: Estimated number of taxpayers for 1943, by change in amount of income since 1942 and type of income.

Victory tax

- 4. (1) Number of taxpayers and revenue for 1943, by taxable status under net income tax.
 - (2) Surtax rate increase for 1943 needed to replace Victory tax revenue, by exemption level.
- 5. Amount of Victory tax for persons not subject to net income tax, for selected net incomes.

Sales tax

- 6. Federal Retail Sales Tax 1/Estimates: Net tax base and yields, and number of taxpayers, calendar year 1943.
- 7. Total Consumer Expenditures Classified by Taxable and Nontaxable Groups Under Federal Retail Bales Tax, Calendar 1943.
- 8. Estimated yield from a graduated retail sales tax with exemptions, calendar 1943.
- 9. Estimated average tax payment under specified sales tax plans, by money income groups, calendar year 1943.
- 10. State and local sales taxes: Rates applicable to retail sales as of January 1, 1943, and total collections for the fiscal year 1942.

Spendings tax

- 11. Spendings tax schedule to raise \$4 billion, assuming total expenditure of \$70 billion.
- 12. The Individual Spendings Tax Schedule.

Treasury Department, Division of Tax Research January 27, 1943

- 1/ The type of retail sales tar being considered would tax the following:
 - A. All retail sales of tangible personal property except sales of the following:

(Note: Retail sales consist of all sales except those made for resale. Sales for resale consist of sales of articles to be resold in the form in which purchased or as ingredients or component parts of other tangible personal property.)

- 1. Commercial, industrial, and agricultural machinery
 (Note: It is intended that the concept of machinery be
 interpreted broadly to include not only those classes of
 goods which are ordinarily considered to be machinery,
 but also such items as trucks (but not automobiles),
 truck trailers, railroad cars, and other similar items
 specifically designed for commercial, industrial, and
 agricultural use.)
- 2. Military machinery and ordnance
- Feed, seed, and fertilizer
- 4. All kinds of fuel
- B. The following types of services:
 - 1. All repair, renovation, etc., of taxable property
 - 2. Laundry, dry cleaning, barber shops, and beauty parlors
 - 3. Rental of taxable property
- 2/ The net tax base and net revenue yields exclude taxable sales to the Federal Government.
- 3/ As estimated, foods include retail sales for home consumption and restaurant meals.
- 4/ It is estimated that the number of taxpayers under a manufacturers' sales tax would be about 157,000 and under a wholesale sales tax about 306,000, assuming that manufacturers and wholesalers with annual sales of less than \$5,000 would be exempted.

Total Consumer Expenditures Classified by Taxable and Montaxable Groups Under Federal Retail Sales Tax, Calendar 1943

(In billions)

-	TOTA	l of taxable group\$47.8 1

Treasury Department
Division of Tax Research

January 25, 1943

Mot included in taxable consumer expenditures are taxable retail sales to State and local governments and to business concerns, estimated to aggregate \$4 billion.

^{2/} Includes retail sales for home consumption and restaurant meals, but excludes foodstuffs produced and consumed on farms.

^{3/} Excludes fuels and machinery items classified as exempt.

Estimated yield from a graduated retail sales tax with exemptions, calendar 1943

PRELIMINARY NOT FOR RELEASE

Structure of tax

Taxable expenditures

Taxable expenditures are to be defined as indicated in footnote 1 of Exhibit 6. It is assumed that an effective method could be devised to exempt sales to the Federal Government, State and local governments, and business concerns, without providing a loophole for tax-free sales of goods intended for individual consumption.

Annual exemption

Each adult \$200 Each dependent \$100

Rates

Amount Adu				itures :	Rate
0 -	200	0	_	100	0 %
200 -	400	100	_	200	5
400 -	600	200	_	300	10
Over 6	00	Over	3	00	15

Method of providing exemption and graduation

Stamps or coupons would be used as a means of granting the exemption, and as a means of enabling individuals to make purchase at less than the maximum rate. It is assumed that stamps or coupons would not be transferable except within family groups, and that a method could be devised to prevent black markets in the stamps or coupons.

Yield

At calendar 1943 levels of expenditure, it is estimated that taxable consumer expenditures will be \$47.8 billion, and the yield of the above tax will be approximately \$2 billion. This implies an effective rate of approximately 8 percent on expenditures in excess of the exemptions.

The exemptions will account for almost half of aggregate taxable expenditures, and the first bracket for almost a third. The maximum rate of 15 percent will apply to only about one-tenth of aggregate taxable expenditures, and the 10 percent rate, to only a little more than this.

Somewhat less than a quarter of the population would have all of their expenditures exempt from tax.

Treasury Department, Division of Tax Research

January 28, 1943

Source: Estimated on the basis of confidential data supplied by Division of Research, Office of Price Administration, and Division of Research and Statistics, Treasury Department.

- 1/ For scope of sales tax and yields of the specified plans, see page 2.
- 2/ Income is money income only, excluding all imputed items, such as the value of home-produced food, the rental value of owned homes, and wages paid in kind.
- 3/ Estimated to yield the same amount of revenue as a 10-percent rate including food.
- The 10-percent rate with the yearly per capita exemption of \$186 for an adult and \$93 for each dependent is estimated to yield the same revenue as a 10-percent rate excluding food.

Page 2

The type of retail sales tax being considered would tax the following:

A. All retail sales of tangible personal property except sales of the following: (Note: Retail sales consist of all sales except those

made for resale. Sales for mesale consist of sales of articles to be resold in the form in which purchased or as ingredients or component parts of other tangible

- personal property.)
- Commercial, industrial, and agricultural machinery (Note: It is intended that the concept of machinery be interpreted broadly to include not only those classes of goods which are ordinarily considered to be machinery, but also such items as trucks (but not automobiles), truck trailers, railroad cars, and other similar items specifically designed for commercial, industrial, and agricultural use.)
- 2. Military machinery and ordnance
- 3. Feed, seed, and fertilizer
- 4. All kinds of fuel
- B. The following types of services:
 - 1. All repair, renovation, etc., of taxable property
 - 2. Laundry, dry cleaning, barber shops, and beauty parlors
 - 3. Rental of taxable property

In addition to the taxable consumer expenditures (\$47.8 billions including food and \$29.2 billions excluding food) used in estimating the distribution of tax payments, the net retail sales tar base would also cover \$4 billions of sales to State and local governments and to business concerns. Taxable sales to the Federal Government are excluded from the net tax base.

The net yields of the specified sales tax plans, insofar as they apply to consumer expenditures, are estimated as follows:

	(In billions of dollars)
10% rate including food	\$4.8
16.4% rate excluding food	4.8
10% rate excluding food	2.9
10% rate with per capita exemption	2.9
