

EDWARD FASSIG.
REAL ESTATE.

252 WEST 8-AV.
COLUMBUS OHIO.

January 9-1939-

Honorable Marriner S. Eccles,
Chairman Board Of Governors,
Federal Reserve System.

Washington D.C.

Dear Mr. Eccles--:

It was with very much interest and approval that I read your letter to Senator Bryd, in the ~~December~~ 3rd issue of The United States News. January

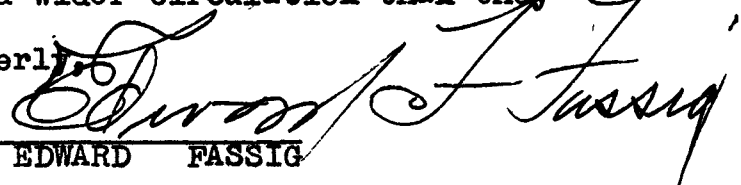

If you have not already done so I wish you would read the article in the December 27th number of the same paper by Representative Wade Kitchens of Arkansas. If your economic philosophy will permit you to endorse that article also, I hereby suggest that you be nominated for President of The United States of America in 1940. Being a banker with sensible economic thoughts you should be a winner--

Who am I? Just an ordinary man of the street celebrating my 72nd birthday to day. I, am a registered Republican who thinks as a party they have gone hay wire. I am a strong supporter of Roosevelt, as I am one of those independent fellows who votes as I think best even though the laws of this state do not allow me to be as independent at the primaries.

If the members of Congress could only know how strong many voters feel in favor of such ideas and as far as I can learn even many actual members of Congress have the same thoughts, they would do something worth while on this subject.

I wish copies of both could receive a wider circulation than they now have .

Thank you sincerely,

EDWARD FASSIG

P.S. ---It is ridiculous that the Government should pay interest. You admit they owe this debt to themselves. Money should be issued by the Government on a two way basis Viz: With each issue of money, an equal amount of taxation should be levied payable by the people within a fixed period of years, so as to prevent an everinflation of money, unless there is a better way advocated. People should become tax conscious. Bonds should never be issued by the Government or any political subdivision.
