

BOARD OF GOVERNORS
OF THE
FEDERAL RESERVE SYSTEM

W. E. Eccles -

Office Correspondence

Date October 26, 1940.

To Board of Governors
(individual copies)
From Chester Morrill, Secretary

Subject: _____

For your information in connection with your consideration of the preliminary plans submitted by the Architect for the proposed Addition on the north side of "C" Street there is attached a folder containing photographs, on greatly reduced scale, of these drawings. I have in my office sets of the large drawings from which these photographs were made.

I wish to call your attention particularly to the fact that the last three drawings in this folder are alternate plans for the first, the fifth and the sixth floors, which the Architect has submitted as substitutes for the plans for these floors in the earlier part of the folder. The alternate plans for the first and sixth floors contain only minor changes which are incidental to the major change that would be involved in the fifth floor plan.

The alternate plan for the fifth floor was submitted by the Architect as the result of suggestions made by Mr. McKee at the meeting at which the earlier plans were laid before the Board. Special consideration should be given to the question what should be done with the fifth floor plan if the work is to be continued.

Chester Morrill, Esq., Secretary,
Federal Reserve Board,
Washington, D. C.

Dear Mr. Morrill :

In connection with the enclosed invoice for services, we wish to bring your attention to a mathematical error in the setup of October 17th, copy of which was left with you. Under Architect's commission for the Addition of the New Building (item B), the figure given was \$135,830; this was an error, and is shown correctly on the appended statement, as \$145,930.46.

Very sincerely yours,

PAUL P. CRET

By - (Signed) Wm. H. Livingston
