

3/4/46

Dear Sir:-

Your remarks noted.

Neither you nor one of you in Washington appear to have the political courage to put your finger on the cause (or one of them) of the post labor market.

Why don't you come out and declare that labor unions should be regulated by the government and pay taxes?

"Labor" leaders have you all in the hollow of their hands. They know this, you all know it, we all know it.

It is a filthy situation aided by a well known & politically cowardly government.
