Dear Sir:

I see by the A. P. that you made a statement that if Congress fails to make the loan to Britain we drift towards a Third World War. Also that the United Nations organization may collapse.

I recall that another very prominent Banker from California made a similar statement a few weeks ago. If this is Good Business why don't you Banker's loan Britain the money.

(over)

Do you feel we Americans have
to buy piece.

Do you feel that Totalitarian
development through out the World
depends on our ability to give
or loan as some people put it.

Should it be possible that the
Banking system of England
could control our Banking
system.

yours.
