204. Current Policy Problems of American Agriculture
Fall, 1 Credit

T. Roy Reid and
Special Lecturers

A lecture course designed to give clerical and junior professional personnel a review of some of the major problems of American agriculture. Conditions giving rise to these problems will be surveyed and current proposals for meeting them will be critically studied. Outstanding men from both the executive and legislative branches of the Government and from outside the Federal Service will participate in the lectures.

716. Seminar in Economic and Social Implications of Current Agricultural Policies

Fall, 2 Credits

William A. Minor
Robert H. Shields and
Special Lecturers

Designed to bring before students some of the outstanding economists of the country with from one-third to one-half of the meetings led by guest instructors. The seminar is devoted to a continuing analysis and evaluation of the major components of current agricultural policies. Prerequisite: Master's degree in economics or permission of the instructors.
