

The Obama Administration's Efforts To Stabilize The Housing Market and Help American Homeowners

March 2012

U.S. Department of Housing and Urban Development | U.S. Department of the Treasury

The Administration's goal is to stabilize the housing market and provide security for homeowners. To meet these objectives in the context of a very challenging market, the Administration developed a broad approach implementing state and local housing agency initiatives, tax credits for homebuyers, neighborhood stabilization and community development programs, mortgage modifications and refinancing, housing counseling, continued Federal Housing Administration (FHA) engagement, support for Fannie Mae and Freddie Mac and increased consumer protections. In addition, Federal Reserve and Treasury Mortgage-Backed Securities purchase programs have helped to keep mortgage interest rates at record lows over the past year. More detail on the Administration's efforts can be found in the Appendix.

March 2012 Scorecard on Administration's Comprehensive Housing Initiative

The President's housing market recovery efforts began immediately after taking office in February 2009. The March 2012 housing scorecard includes the following key indicators of market health and results of the Administration's comprehensive response, as outlined above:

- **Market data show progress on home sales and mortgage delinquencies, but continued fragility overall.** Sales of existing homes remained high in February and – with newly revised data on January sales – mark the strongest start to a year since 2007. Mortgage delinquency rates continued a downward trend and are substantially below year ago levels. Finally, foreclosure completions ticked downward last month, although increased activity is expected in the coming months as firms lift processing delays following the landmark mortgage servicing settlement reached with the five largest banks in early February.

- **The Administration's recovery efforts continue to help millions of families deal with the worst economic crisis since the Great Depression.** More than 5.8 million modification arrangements were started between April 2009 and the end of February 2012 – including more than 1.8 million HAMP trial modification starts and nearly 1.3 million FHA loss mitigation and early delinquency interventions. The Administration's programs continue to encourage improved standards and processes in the industry, with HOPE Now lenders offering families and individuals nearly 2.8 million proprietary mortgage modifications through January.
- **Eligible homeowners entering HAMP continue to demonstrate a high likelihood of long-term success in the program.** As of February, more than 970,000 homeowners received a permanent HAMP modification, saving more than \$530 on their mortgage payments each month. Eighty-five percent of homeowners entering the program in the last 20 months have received a permanent modification, with an average trial period of 3.5 months. Homeowners in HAMP permanent modifications have saved an estimated \$11.6 billion to date. The February Monthly Report can be found at: <http://www.treasury.gov/initiatives/financial-stability/results/MHA-Reports/Pages/default.aspx>

Given the current fragility and recognizing that recovery will take place over time, the Administration remains committed to its efforts to prevent avoidable foreclosures and stabilize the housing market.

Appendix

The Administration has taken a broad set of actions to stabilize the housing market and help American homeowners. Two years ago, stress in the financial system had severely reduced the supply of mortgage credit, limiting the ability of Americans to buy homes or refinance mortgages. Millions of responsible families who had made their monthly payments and had fulfilled their obligations saw their property values fall. They also found themselves unable to refinance at lower mortgage rates.

In February 2009, less than one month after taking office, President Obama announced the Homeowner Affordability and Stability Plan. As part of this plan and through other housing initiatives, the Administration has taken the following actions to strengthen the housing market:

- Supported Fannie Mae and Freddie Mac to ensure continued access to affordable mortgage credit;
- The Federal Reserve and the U.S. Treasury purchased more than \$1.4 trillion in agency mortgage backed securities through independent MBS purchase programs, helping to keep mortgage rates at historic lows;
- Launched a modification initiative to help homeowners reduce mortgage payments to affordable levels and to prevent avoidable foreclosures;
- Launched a \$23.5 billion Housing Finance Agencies Initiative to increase sustainable homeownership and rental resources;
- Supported the First Time Homebuyer Tax Credit, which helped more than 2.5 million American families purchase homes;
- Provided more than \$5 billion in support for affordable rental housing through low income housing tax credit programs and \$6.92 billion in support for the Neighborhood Stabilization Program to restore neighborhoods hardest hit by the concentrated foreclosures;
- Created the \$7.6 billion HFA Hardest Hit Fund for innovative foreclosure prevention programs in the nation's hardest hit housing markets.
- Launched the \$1 billion Emergency Homeowners Loan Program, as part of the Dodd-Frank Wall Street Reform and Consumer Protection Act, to help unemployed and underemployed homeowners pay a portion of their monthly mortgage.
- Created an FHA Short Refinance Option that helps underwater borrowers refinance into a new, stable, FHA-insured mortgage that is more aligned with actual property values.
- Supported home purchase and refinance activity through the FHA to provide access to affordable mortgage capital and help homeowners prevent foreclosures.
