

U.S Department of Housing and Urban Development 1 U.S. Department of the Treasury

The Administration's goal is to stabilize the housing market and provide security for homeowners. To meet these objectives in the context of a very challenging market, the Administration developed a broad approach implementing state and local housing agency initiatives, tax credits for homebuyers, neighborhood stabilization and community development programs, mortgage modifications and refinancing, housing counseling, continued Federal Housing Administration (FHA) engagement, support for Fannie Mae and Freddie Mac and increased consumer protections. In addition, Federal Reserve and Treasury Mortgage-Backed Securities purchase programs have helped to keep mortgage interest rates at record lows over the past year. More detail on the Administration's efforts can be found in the Appendix.

January 2013 Scorecard on Administration's Comprehensive Housing Initiative

The President's housing market recovery efforts began immediately after taking office in February 2009. The January 2013 housing scorecard includes the following key indicators of market health and results of the Administration's comprehensive response, as outlined above:

- This month's indicators suggest the market recovery is progressing. Sales of new and existing homes are up by 8.8 percent, and 12.8 percent, respectively from last December; home prices are up more than 5 percent from one year ago, and the number of underwater homeowners, while still at elevated levels, continues to fall.
- The Administration's foreclosure prevention programs are providing relief for millions of homeowners as we continue to recover from an unprecedented housing crisis. Nearly 1.5 million

homeowner assistance actions have taken place through the Making Home Affordable Program, while the FHA has offered more than 1.5 million loss mitigation and early delinquency interventions. The Administration's programs continue to encourage improved standards and processes in the industry, with HOPE Now lenders offering families and individuals more than 3 million proprietary mortgage modifications through November.

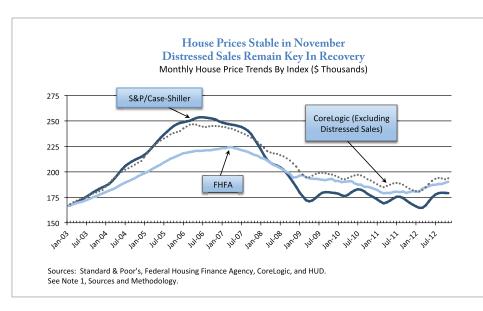

Homeowners in HAMP continue to benefit from deep payment relief, helping them sustain their mortgage payments over time. As of December, more than 1.1 million homeowners have received a permanent modification through the Home Affordable Modification Program (HAMP), saving approximately \$545 on their mortgage payments each month, and an estimated \$17.3 billion to date. Eighty-seven percent of homeowners starting the program in the last two and a half years have received a permanent modification of their mortgage through HAMP. Payment relief is strongly correlated to sustainability of modified payments over time. As a result, after six months in the program, more than 94 percent of homeowners remain in their permanent HAMP modification. HAMP modifications continue to exhibit lower delinquency and re-default rates than industry modifications as reported by the Office of the Comptroller of the Currency. View the Making Home Affordable Program Report with data

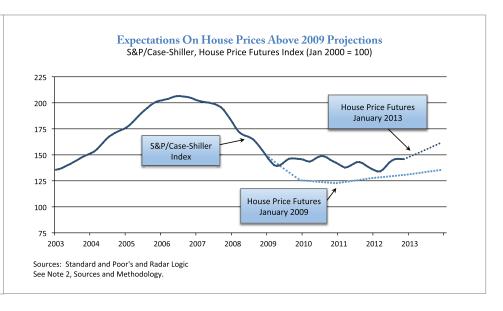

through December 2012.

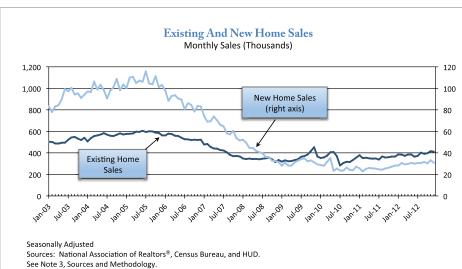

Given the current fragility and recognizing that recovery will take place over time, the Administration remains committed to its efforts to prevent avoidable foreclosures and stabilize the housing market.

Mortgages 90+ days delinquent or in foreclosure, scaled up to market. Mortgages 90+ days delinquent or in foreclosure.				
Underwater Borrowers	Quarterly	CoreLogic	As reported.				
Foreclosure Actions							
Foreclosure Starts Foreclosure Completions Short sales REO Sales	Monthly Monthly Monthly Monthly	Realty Trac Realty Trac CoreLogic CoreLogic	Foreclosure starts are reported counts of notice of default or scheduled foreclosure auction, depending on which action starts the foreclosure process in a state. Real Estate Owned (REO). Count of Short Sales for the month as reported (current month subject to revision). Count of REO (Real Estate Owned) Sales for the month as reported (current month subject to revision).				

SOURCES AND METHODOLOGY

B. Notes on Charts.

- 1. Monthly house price trends shown as changes in respective house price indices applied to a common base price set equal to the median price of an existing home sold in January 2003 as reported by the National Association of Realtors. Indices shown: S&P/Case Shiller 20-metro composite index (NSA), January 2000 = 100, FHFA monthly (purchase-only) index for US (SA), January 1991 = 100, and CoreLogic-Distressed Sales Excluded (Monthly) for US (NSA), January 2000 = 100.
- 2. S&P/Case-Shiller 20 metro composite index (NSA) as reported monthly. Futures index figures report forward expectations of the level of the S&P/Case Shiller index as of the date indicated, estimated from prices of futures purchased on the Chicago Board of Exchange reported by Radar Logic.
- 3. Reported seasonally adjusted annual rates for new and existing home sales divided by 12.
- 4. HUD estimate of refinance originations based on MBA estimate of dollar volume of refinance originations.
- 5. Cumulative HAMP permanent modifications started, FHA loss mitigation and early delinquency interventions, plus proprietary modifications completed as reported by HOPE Now Alliance. Some homeowners may be counted in more than one category. Foreclosure completions are properties entering Real Estate Owned (REO) as reported by Realty Trac. Also see additional note in Section C below on HAMP Tier 2.
- 6. Beginning with the September 2012 release, filings of a notice of default or scheduled foreclosure auction, depending on which action starts the foreclosure process in a state, are reported for foreclosure starts. Foreclosure defaults previously had been reported as a proxy for foreclosure starts. Foreclosure completions are properties entering REO. Both as reported by Realty Trac.
- 7. See "Borrower Annual Savings" above.
- 8. FHA market shares as FHA purchase and refinance originations divided by HUD estimates of purchase and refinance mortgage originations as noted in "Mortgage Originations" above. Data for 2010 and 2011 have been revised.

C. Additional Notes.

The Q1 2011 NSP counts for Direct Homeownership Assistance were revised with the Q2 2012 data. Also, the Q2 2012 NSP counts for Demolition were revised with the Q3 2012 data.

Beginning with the January 2013 release, mortgage aid under HAMP Tier 2 is included in the totals. Effective June 2012, HAMP Tier 2 expanded eligibility requirements to further reduce foreclosures and help stabilize neighborhoods. For non-GSE loans, eligibility was expanded to allow for more flexible debt-toincome criteria and to include properties currently occupied by a tenant, as well as vacant properties which a borrower intends to rent.

Appendix

The Administration has taken a broad set of actions to stabilize the housing market and help American homeowners. Three years ago, stress in the financial system had severely reduced the supply of mortgage credit, limiting the ability of Americans to buy homes or refinance mortgages. Millions of responsible families who had made their monthly payments and had fulfilled their obligations saw their property values fall. They also found themselves unable to refinance at lower mortgage rates.

In February 2009, less than one month after taking office, President Obama announced the Homeowner Affordability and Stability Plan. As part of this plan and through other housing initiatives, the Administration has taken the following actions to strengthen the housing market:

- Supported Fannie Mae and Freddie Mac to ensure continued access to affordable mortgage credit;
- The Federal Reserve and the U.S. Treasury purchased more than \$1.4 trillion in agency mortgage backed securities through independent MBS purchase programs, helping to keep mortgage rates at historic lows;
- Launched a modification initiative to help homeowners reduce mortgage payments to affordable levels and to prevent avoidable foreclosures;
- Launched a \$23.5 billion Housing Finance Agencies Initiative to increase sustainable homeownership and rental resources;
- Supported the First Time Homebuyer Tax Credit, which helped more than 2.5 million American families purchase homes;
- Provided more than \$5 billion in support for affordable rental housing through low income housing tax credit programs and \$6.92 billion in support for the Neighborhood Stabilization Program to restore neighborhoods hardest hit by the concentrated foreclosures:
- Created the \$7.6 billion HFA Hardest Hit Fund for innovative foreclosure prevention programs in the nation's hardest hit housing markets;
- Launched the \$1 billion Emergency Homeowners Loan Program, as part of the Dodd-Frank Wall Street Reform and Consumer Protection Act, to help unemployed and underemployed homeowners pay a portion of their monthly mortgage.
- Created an FHA Short Refinance Option that helps underwater borrowers refinance into a new, stable, FHA-insured mortgage that is more aligned with actual property values.
- Supported home purchase and refinance activity through the FHA to provide access to affordable mortgage capital and help homeowners prevent foreclosures.
- Implemented a series of changes to the Home Affordable Refinance Program (HARP) in an effort to attract more eligible borrowers who can benefit from refinancing their home mortgages during this time of historically low mortgage rates.
