The Obama Administration’s Efforts To Stabilize The Housing Market and Help American Homeowners

May 2014

The Administration’s goal remains to stabilize the housing market and provide security for homeowners. To meet these objectives in a challenging market, the Administration developed a broad approach implementing state and local housing agency initiatives, tax credits for homebuyers, neighborhood stabilization and community development programs, mortgage modifications and refinancing, housing counseling, continued Federal Housing Administration (FHA) engagement, support for Fannie Mae and Freddie Mac and increased consumer protections. In addition, Federal Reserve and Treasury Mortgage-Backed Securities purchase programs have helped to keep mortgage interest rates at record lows for more than a year. More detail on the Administration’s efforts can be found in the Appendix.

May 2014 Scorecard on Administration’s Comprehensive Housing Initiative

The President’s housing market recovery efforts began immediately after taking office in 2009. The May 2014 housing scorecard includes key indicators of market health and results of the Administration’s comprehensive response, as outlined above:

- **Homeowners’ equity shows another strong gain.** According to the Federal Reserve, homeowners’ equity was up nearly $795 billion in the first quarter of 2014, reaching more than $10.8 trillion, the highest level since the second quarter of 2007. The change in home equity since April 1, 2009 now stands at more than $4.7 trillion.

- **In the first quarter of 2014, more than 300,000 borrowers returned to a position of positive equity in their homes.** According to CoreLogic, the number of underwater borrowers (those who owe more on their mortgage than the value of their home) has fallen 48 percent—from 12.108 million to 6.284 million—lifting more than 5.8 million homeowners above water from the beginning of 2012 through the 1st quarter of 2014.

- **Foreclosure starts and completions continue their downward trend.** Lenders started the foreclosure process on 49,240 properties in May, down 10 percent from the previous month and down 32 percent from one year ago to the lowest level since December 2005. Lenders completed the foreclosure process on 28,373 properties in May, down 6 percent from the previous month and down 27 percent from one year ago to the lowest level since July 2007. (Source: Realty Trac)

- **Purchases of new homes rebounded in April after declining for four out of the previous five months.** New home sales were up 6.4 percent to a seasonally adjusted annual rate of 433,000 in April, following a 407,000 pace in March, but were down 4.2 percent from one year ago. (Source: HUD and Census Bureau).

- **Sales of previously owned (existing) homes rose in April for the first time this year.** The National Association of Realtors® (NAR) reported that existing homes sold at a seasonally adjusted annual rate of 4.65 million in April, up 1.3 percent from March but still 6.8 percent below the 4.99 million pace a year-earlier.

- **The Administration’s foreclosure mitigation programs continue to provide relief for millions of homeowners as the recovery from the housing crisis continues.** In all, more than 8.3 million mortgage modification and other forms of mortgage assistance arrangements were completed between April 2009 and the end of April 2014. More than 2.0 million homeowner assistance actions have taken place through the Making Home Affordable Program, including nearly 1.4 million permanent modifications through the Home Affordable Modification Program (HAMP), while the FHA has offered 2.3 million loss mitigation and early delinquency interventions through April. The Administration’s programs continue to encourage improved standards and processes in the industry, with HOPE Now lenders offering families and individuals more than 4.0 million proprietary modifications through March (data are reported with a 2-month lag). You can read Treasury’s MHA report here.

- **The Neighborhood Stabilization Program continues to help communities across all 50 states to address foreclosed and abandoned homes.** During the first quarter of 2014, grantees report cumulative completions of newly constructed or rehabilitated housing units under NSP topping 33,800 units, while direct assistance to homeowners reached the 11,000 mark, signaling strong progress toward achieving projected activity under the NSP1, NSP2, and NSP3 programs.

Encouraging news notwithstanding, there is a need to continue with recovery efforts as too many homeowners remain underwater, and mortgage delinquencies rates remain elevated. There is also considerable geographic variation in market conditions not captured in the national statistics, which suggests some markets are improving at different rates than others. Given the current state of the market and recognizing that recovery will take place over time, the Administration remains committed to its efforts to prevent avoidable foreclosures and stabilize the housing market.

# SOURCES AND METHODOLOGY

## B. Notes on Charts.

1. Monthly house price trends shown as changes in respective house price indices applied to a common base price set equal to the median price of an existing home sold in January 2003 as reported by the National Association of Realtors. Indices shown: S&P/Case Shiller 20-metro composite index (NSA), January 2000 = 100, FHFA monthly (purchase-only) index for US (SA), January 1991 = 100, and CoreLogic-Distressed Sales Excluded (Monthly) for US (NSA), January 2000 = 100.

2. S&P/Case-Shiller 10-metro composite index (NSA) as reported monthly. Implied Case-Shiller futures index figures report forward expectations for the level of the S&P/Case Shiller index as of the date indicated, estimated from prices of futures purchased on the Chicago Mercantile Exchange reported by CME Group. The January 2009 market trend projection reports forward expectations estimated from prices of futures contracts reported by Radar Logic. Also see additional note in Section C below.

3. Reported seasonally adjusted annual rates for new and existing home sales divided by 12.

4. HUD estimate of refinance originations based on MBA estimate of dollar volume of refinance originations.

5. Cumulative HAMP permanent modifications started, FHA loss mitigation and early delinquency interventions, plus proprietary modifications completed as reported by HOPE Now Alliance. Some homeowners may be counted in more than one category. Foreclosure completions are properties entering Real Estate Owned (REO) as reported by Realty Trac. Also see additional note in Section C below on HAMP Tier 2.

6. Beginning with the September 2012 release, filings of a notice of default or scheduled foreclosure auction, depending on which action starts the foreclosure process in a state, are reported for foreclosure starts. Foreclosure defaults previously had been reported as a proxy for foreclosure starts. Foreclosure completions are properties entering REO. Both as reported by Realty Trac.

7. See “Borrower Annual Savings” above.

8. FHA market shares as FHA purchase and refinance originations divided by HUD estimates of purchase and refinance mortgage originations as noted in “Mortgage Originations” above. See additional note below on FHA market share.

## C. Additional Notes.

Beginning with the February 2013 release, the House Price Expectations Chart was updated by replacing market expectations as they existed in January 2009 with expectations as of December 2011. Prices of futures purchased for the S&P/Case-Shiller 10-metro composite index, available on the web from CME Group, were used to estimate expectations for December 2011 and for the current month. Market trend as of January 2009 is estimated from percentage changes in house price futures based on a different house price index: RadarLogic RPX. This trend has been added back to the chart because it imparts important information on how house price expectations have changed over time.

Beginning with the January 2013 release, mortgage aid under HAMP Tier 2 is included in the totals. Effective June 2012, HAMP Tier 2 expanded eligibility requirements to further reduce foreclosures and help stabilize neighborhoods. For non-GSE loans, eligibility was expanded to allow for more flexible debt-to-income criteria and to include properties currently occupied by a tenant, as well as vacant properties which a borrower intends to rent.

FHA market share estimates are based on new methodology beginning with the October 2013 report; estimates were revised back through Q1 2013. See the FHA Market Share report on their website for an explanation of the new methodology: [http://portal.hud.gov/hudportal/HUD?src=/program_offices/housing/rmra/oe/rpts/fhamktsh/fhamktqtrly](http://portal.hud.gov/hudportal/HUD?src=/program_offices/housing/rmra/oe/rpts/fhamktsh/fhamktqtrly).
Appendix

The Administration has taken a broad set of actions to stabilize the housing market and help American homeowners. Three years ago, stress in the financial system had severely reduced the supply of mortgage credit, limiting the ability of Americans to buy homes or refinance mortgages. Millions of responsible families who had made their monthly payments and had fulfilled their obligations saw their property values fall. They also found themselves unable to refinance at lower mortgage rates.

In February 2009, less than one month after taking office, President Obama announced the Homeowner Affordability and Stability Plan. As part of this plan and through other housing initiatives, the Administration has taken the following actions to strengthen the housing market:

- Supported Fannie Mae and Freddie Mac to ensure continued access to affordable mortgage credit;
- The Federal Reserve and the U.S. Treasury purchased more than $1.4 trillion in agency mortgage backed securities through independent MBS purchase programs, helping to keep mortgage rates at historic lows;
- Launched a modification initiative to help homeowners reduce mortgage payments to affordable levels and to prevent avoidable foreclosures;
- Launched a $23.5 billion Housing Finance Agencies Initiative to increase sustainable homeownership and rental resources;
- Supported the First Time Homebuyer Tax Credit, which helped more than 2.5 million American families purchase homes;
- Provided more than $5 billion in support for affordable rental housing through low income housing tax credit programs and $6.92 billion in support for the Neighborhood Stabilization Program to restore neighborhoods hardest hit by the concentrated foreclosures;
- Created the $7.6 billion HFA Hardest Hit Fund for innovative foreclosure prevention programs in the nation’s hardest hit housing markets;
- Launched the $1 billion Emergency Homeowners Loan Program, as part of the Dodd-Frank Wall Street Reform and Consumer Protection Act, to help unemployed and underemployed homeowners pay a portion of their monthly mortgage.
- Created an FHA Short Refinance Option that helps underwater borrowers refinance into a new, stable, FHA-insured mortgage that is more aligned with actual property values.
- Supported home purchase and refinance activity through the FHA to provide access to affordable mortgage capital and help homeowners prevent foreclosures.
- Implemented a series of changes to the Home Affordable Refinance Program (HARP) in an effort to attract more eligible borrowers who can benefit from refinancing their home mortgages during this time of historically low mortgage rates.
