### FOREWORD

The Federal Reserve Agent submits an Annual Report to the Federal Reserve Board at the close of each year. This report, however, is not given general circulation until after the larger and more comprehensive report of the Federal Reserve Board has been issued.

The following pages contain the text of the report for the Seventh Federal Reserve District in practically the same form in which it was submitted to the Federal Reserve Board.

The first part of this report is general in its nature and embodies such discussion and forecast as the Agent deemed himself qualified to offer. The second section, or appendix, is statistical and consists of the following Exhibits:

1. A comparative yearly statement for 1916 and 1917 respectively;

2. A statement of earnings and expenses for 1917;

3. A list of member banks in the Seventh Federal Reserve District to whom permits have been granted for the exercise of trust powers;

4. A list of State member banks in the Seventh Federal Reserve District;

5. A statement in detail of the issues of Federal Reserve Notes;

6. A statement of transactions through the Gold Settlement Fund;

7. A list of the principal committees having in charge the first and second Liberty Loan campaigns;

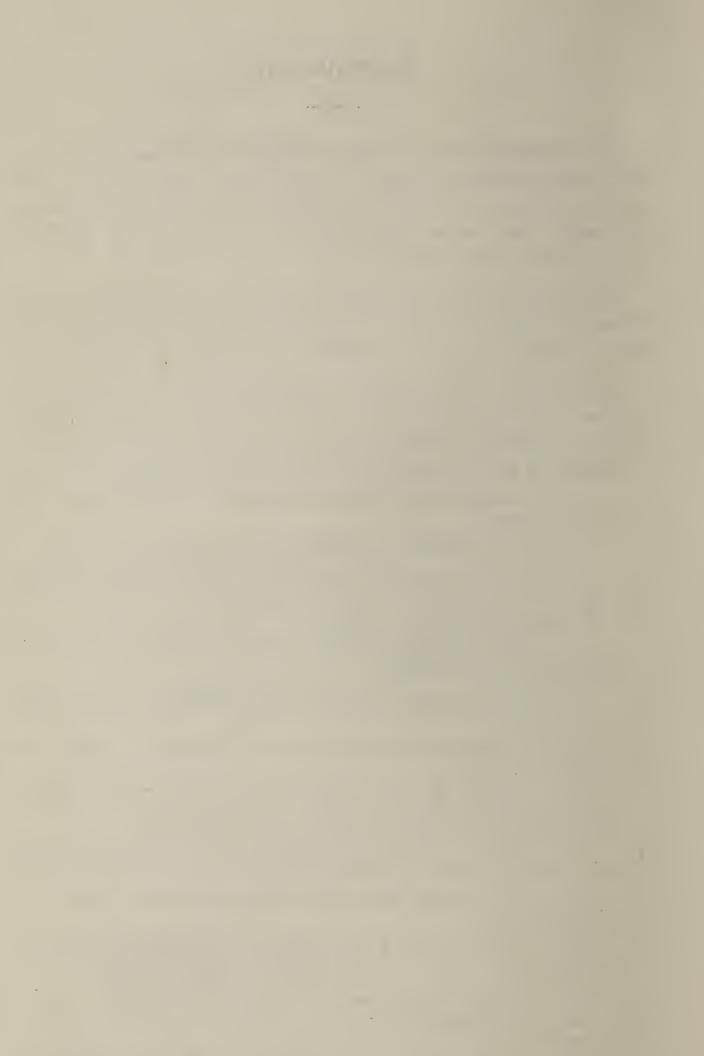

8. A list of Securities Committees and Custodians for the several states in this District;

9. A statement covering subscriptions to the first Liberty Loan;

10. A statement of subscriptions, allotments, and subscribers, by states, to the Second Liberty Loan;

11. A statement covering sales of Treasury Certificates of Indebtedness;

12. A statement of expenses incurred in connection with the First and Second Liberty Loans and Certificates of Indebtedness.

# 1917

### THIRD ANNUAL REPORT TO THE FEDERAL RESERVE BOARD

### GENERAL BUSINESS CONDITIONS

The beginning of 1917 found generally satisfactory business conditions in the Seventh Federal Reserve District, with some indications of increasing activity and a plentiful supply of money at low rates. The entrance of the United States into the war constituted a factor which up to that time had not been taken into serious consideration and necessarily brought about a great deal of readjustment.

The promotion of new enterprises was, of course, greatly curtailed and as the year advanced it was increasingly evident that expansion of already existing activities should be carefully guarded, except as necessitated by the demands of the Government in connection with carrying on the conflict.

Some lines of commercial operation have suffered greatly. The distilling business, because of legislation enacted by the last Congress, has greatly diminished. The Seventh Federal Reserve District has felt this for the reason that a large amount of such business was conducted within its bounds, perhaps the largest internal revenue-producing district in the country being located within its limits. Building, construction, and engineering lines have also been very quiet and their operations much reduced.

Those lines of business, however, which have been directly affected through Government contracts for food, clothing, munitions, and other supplies have seen greatly increased activity. Bank clearings have increased and indications are that the current year will show largely increased profits for banking institutions in general, except along the line of investment banking. Legitimate business, except as above noted, has, of course, felt the effects of the war; but it is becoming increasingly evident that the business public is adjusting itself to the situation and that the people are learning that commerce and trade may, notwithstanding such conditions, be transacted, if not as usual, at least on a sane and conservative basis.

Notwithstanding the fact that some of the greatest industrial centers of this country are located within its borders the District, as a whole, is largely an agricultural one. The rural communities have been the last to appreciate that the country was really and actually in war and to comprehend the seriousness of the situation which confronts the nation.

In the northerly States of the District beans, potatoes, and other vegetables constitute this year a large part of the farm product, and these suffered from early frosts. The wheat crop for the district was probably not more than two-thirds of an average yield. The prices for the above-mentioned articles, however, were so satisfactory that the financial return will probably equal that of the ordinary one hundred per cent. crop. The hay crop was somewhat below normal but prices were good. The oats crop was the largest on record all over the district and prices were more than satisfactory. While the corn crop is rated as the largest on record the quality cannot yet be determined. Much of it is not fully matured owing to unseasonable summer conditions and early frosts. Much of that which is at present unmarketable can, however, by proper handling and treatment be made of commercial value, but a goodly proportion of the crop is available only for stock feeding purposes, and within the last month or two a very strong demand has arisen in the country districts for funds for purchasing cattle and hogs to thus utilize this otherwise useless product. Prices are such, however, that notwithstanding the poor quality of much of the crop the returns will be very satisfactory and all kinds of live stock are selling at high figures.

Whatever the complete returns may demonstrate, the impression is general that money paid out on account of the war is slow in returning to this district; and with the value of our great staple, corn, yet undetermined, it is evident that a comprehensive forecast of conditions in the district might widely miss the mark. Winning the war is the thing uppermost in our minds, and to that end, and, until it is accomplished, the Seventh District will be found ready, as it has been, to sacrifice to the utmost of its abundance and of its best blood.

### OFFICERS AND DIRECTORS

An amendment to the Act was passed during the current year abolishing the office of Deputy Federal Reserve Agent and authorizing the Federal Reserve Agent to appoint one or more assistants. Mr. W. F. McLallen, who held the office of Deputy Federal Reserve Agent, was at once appointed "Assistant Federal Reserve Agent" for the remainder of the calendar year. Toward the close of the year Mr. Mark A. Lies was appointed an additional Assistant Federal Reserve Agent. Mr. McLallen was also designated by the Federal Reserve Board Deputy Chairman of the Board of Directors.

Additional Assistant Cashiers were appointed during the year as follows: Mr. F. J. Carr, Mr. Clarke Washburne and Mr. D. A. Jones.

At the annual election for Directors in December, 1917, Mr. E. L. Johnson was elected to succeed himself for the full three-year term as a Director of Class "A", Group 3, and Mr. M. B. Hutchison was elected to succeed himself for the full three-year term as a Director of Class "B", Group 2.

On December nineteenth the Federal Reserve Board elected Mr. James Simpson of Chicago Class "C" Director for three years and designated him Deputy Chairman for one year.

On December twenty-first the Federal Reserve Board redesignated the present incumbent as Chairman and Federal Reserve Agent of the Federal Reserve Bank of Chicago for a period of one year, dating from January 1st, 1918.

### MEETINGS

### Directors:

The board of Directors has held twelve regular meetings during the year.

### Committees:

First—**Executive:** The Executive Committee is composed of Governor McDougal, Mr. W. F. McLallen, Mr. J. B. Forgan, Mr. G. M. Reynolds and the Federal Reserve Agent. This Committee has held regular meetings once each week, but the great increase of business toward the close of the year has necessitated two regular meetings each week.

Second—**Membership:** This Committee is composed of Governor McDougal, Mr. A. H. Vogel and the Federal Reserve Agent.

### Officers:

Early in the year the plan was inaugurated of holding informal meetings of the officers daily before business hours. This plan has been followed throughout the year except as it has been interfered with to some extent through unusual activities in connection with the Liberty Loan campaigns and other emergencies.

### **MEMBERSHIP**

Seven national banks have surrendered their charters during the year, the total reduction of Federal Reserve Bank stock from this source amounting to \$45,400.00.

Twelve new national banks have been organized during the year. Applications for membership from sixty-three State Banks have been approved during the same period. Of these fifty-one have paid in their capital stock and reserve. Three have paid in their capital only. The remaining nine were approved so recently that their payments could not be made before the first of the year.

Fifty-two banks were transferred to this District from the Minneapolis District at the beginning of the year. Membership December 31, 1916, 993; December 1, 1917, 1,100.

The net increase in the stock of the Federal Reserve Bank of Chicago, from all sources, during the year has been \$2,408,150.

A complete list of State Bank members will be found in the appendix. The prospect for a branch of the Federal Reserve Bank at Detroit, Michigan, has had a stimulating effect on State Bank membership in that City. In November a special session of the Michigan Bankers' Association was held at Lansing, Michigan, at the instance of the Governor of the State, the Bank Commissioner and the President of the Bankers' Association, for the special purpose of arousing interest amongst State Banks concerning membership in the Federal Reserve System. Addresses were made at this session by the abovenamed officials and also by Mr. Frederick R. Fenton, Federal Reserve Chairman for Michigan, and the results were most gratifying as will be seen by the increased membership from that State.

The appeal of the President of the United States urging State Banks to join the System has not up to this time met with a generous response.

Two or three of the larger State institutions in Chicago, and a few scattering banks throughout the district, came in as a direct result of that appeal. There are, however, approximately 2,000 State Banks in the district which are eligible for membership and less than 100 applications all told have been received up to this time. It is nevertheless evident that greater interest in this subject is being manifested throughout the district than heretofore. Many of the larger State institutions are seriously considering the matter and some of them have signified their intention of applying for membership in the near future.

### **BANKING QUARTERS**

The Federal Reserve Bank of Chicago has very inadequate quarters, both as to working space and vault capacity. At the present time the bank is occupying space in four different buildings in Chicago. The Executive Committee has been instructed to investigate the question of new and adequate quarters for the bank, but there is nothing available in Chicago at the present time and no one seems willing to take the responsibility of constructing an entirely new building until after the war is over.

### BRANCHES

The Board of Directors at its regular meeting on November 27 authorized the establishment of a branch of the Federal Reserve Bank of Chicago, to be located in the City of Detroit, Michigan.

The following named have been chosen as Directors of said branch:

Mr. Robert B. Locke, at present Manager of the Detroit Clearing House Association;

Mr. John Ballantyne, President of the Merchants' National Bank, Detroit;

Mr. Charles H. Hodges, President, Detroit Lubricator Co., Detroit;

Mr. Emory W. Clark, President of the First & Old Detroit National Bank;

Mr. Julius H. Haass, President of the Wayne County & Home Savings Bank, Detroit;

Mr. Robert B. Locke will be Manager of the branch.

It is the expectation that this branch will be formally opened for business shortly after the first of the year.

### PUBLICITY WORK

The publicity work of the bank during the past year has been conducted through personal interviews, correspondence and attendance by the bank's officers at many bankers' conventions and group meetings. The monthly business reports of the bank have been circulated as Bulletins. A special pamphlet on "Trade Acceptances," has been printed and widely circulated, and Mr. Clarke Washburne, Assistant Cashier, has made a number of informal talks to various trade organizations on that subject.

### VISIT OF THE GOVERNOR OF THE BANK OF ENGLAND

On May 8th, Chicago and the Federal Reserve Bank were honored by a visit from Lord Cunliffe, Governor of the Bank of England. He attended one of the regular meetings of the Board of Directors and expressed himself as greatly interested in our methods.

18 . 4

### OPERATIONS OF THE FEDERAL RESERVE COLLEC-TION SYSTEM, JAN. 1, 1917, TO DEC. 31, 1917.

7,532,366 items have been handled during the year as follows:

				$\mathbf{Cost}$	Cost Charge	
	Items	Amount	Total Cost	per Item	per per \$1,000 Item	
Items on banks in Chicago Items on banks in District	1,807,728	\$3,985,878,000	\$ 7,200.00	\$.004	\$ .0018 \$ .0	
outside of Chicago Items on banks in other dis-	4,362,436	987,821,000	60,885.87	.0125	.0518 .015	
tricts	511,438 850,764	187,450,000 202,461,000	4,800.00	$\begin{smallmatrix}&&0125\\&&0056\end{smallmatrix}$	.0518 $)$ $.0237$ $.0$	
	7,532,366	\$5,363,610,000	\$72,885.87	\$ .00967	\$ .0136	

The disbursements or expenses of the Transit Department made necessary by and in connection with the handling of items drawn on "banks in district outside of Chicago," and "items on banks on other districts," total \$60,885.87, while the net service charges at one and one-half cents per item assessed against the member banks and other Federal Reserve Banks covering same, total \$62,449.87, a net profit in handling these two classes of Transit items during the year of \$1,564.00.

Adding, however, the cost of handling items on banks in Chicago (\$7,200) and Government checks (\$4,800) it increases the total expenses (\$12,000) to a total of \$72,885.87, or a net cost for the year in handling the above four classifications of \$10,436.

The bank has handled a small amount of collections, drafts, notes, etc., for its customers during the year on a basis of actual cost.

But one non-member bank carrying an account with the Federal Reserve Bank is making use of its collection system.

### FEDERAL RESERVE TRANSFER AND EXCHANGE DRAFTS

During the year five banks in this district have ordered a supply of Federal Reserve transfer and exchange drafts. But one of the banks is using the plan.

Twelve member banks in other districts have drawn Federal reserve transfer drafts on this bank. The total transactions have been small.

Service

### GOLD SETTLEMENT FUND

A complete statement showing the volume of transactions through this fund on a basis of weekly averages appears in the appendix.

### FEDERAL RESERVE NOTES

The Federal Reserve Agent maintains in Chicago constantly a reserve supply of Federal Reserve Notes amounting to \$41,500,000. There is held in the Sub-treasury in Chicago an additional reserve supply of Federal Reserve Notes amounting to \$26,160,000, and in Washington, printed or in process of printing, in round numbers, \$185,000,000, it being the desire of the Board of Directors to keep always in sight a total reserve stock of over \$250,000,000. In addition to the above, there are \$5,000,000 of Federal Reserve Bank Notes printed and held in stock in Washington. Detail of these issues is given in the appendix.

### NON-MEMBER BALANCES—CHICAGO CLEARINGS

During the summer a plan was agreed upon whereby all non-member banks belonging to the Chicago Clearing House should open accounts with the Federal Reserve Bank, and Clearing House balances be settled by certified check on the Federal Reserve Bank. This plan became operative September 1st, and seems to have worked to the satisfaction of all concerned. Eleven non-member banks at that time opened accounts with the Federal Reserve Bank. Four of these have since that date entered the Federal Reserve System, leaving seven non-member banks still carrying balances with us. These balances total about \$5,000,000, on the average. One of the non-member banks is using the Federal Reserve Collection System.

### PERMITS TO ACCEPT UP TO 100%

During the current year the Federal Reserve Board has granted to The National Bank of the Republic of Chicago, and the Continental and Commercial National Bank of Chicago, the right to accept up to one hundred per cent. of their capital and surplus.

### FIDUCIARY POWERS

Permits have been issued during the year to a number of institutions for the exercise of various trust functions which are permitted under the Federal Reserve Act. A detailed list of these permits appears in the appendix.

### RESERVES

Fluctuation in reserves during the year is indicated as follows:

Against Deposits:

GoldHigh	81.5% on February	2, 1917.
GoldLow	50.9% on June	20, 1917.
Gold and Lawful MoneyHigh	83.2% on February	2, 1917.
Gold and Lawful MoneyLow	52.2% on June	20, 1917.
Against Federal Reserve Notes:	•	
GoldHigh	157.0% on January	2, 1917.
GoldLow	59.5% on Nov.	23, 1917.
Against Combined Note and Deposit Lis	ability:	
Cash Reserve	85.9% on February	2, 1917.
Cash ReserveLow	60.6% on Nov.	23, 1917.

### DIVIDENDS AND EARNINGS

During the year dividends amounting, in all, to 12 per cent. (12%) have been paid. All dividends accrued to December 31, 1917, are therefore paid in full. Also payment to the U. S. Treasury of its pro-rata of surplus earnings has been made, amounting to \$215,799.18.

Furniture and fixtures, depreciation on bonds and the cost of Federal Reserve Notes issued to the bank have all been charged off in full. A detailed statement of Profit and Loss appears in the appendix.

### LOANS AND REDISCOUNT OPERATIONS

3,747 applications for loans and rediscount approved amounting to \$524,377,167.01 at 3% to  $5\frac{1}{2}$ % basis from 541 banks as follows:

Illinois	.156 banks	\$287,515,277.88
Indiana	. 88 banks	28,124,689.39
Iowa	.198 banks	$\dots$ 53,912,233.29
Michigan	. 51 banks	92,127,979.10
	. 48 banks	

### 541 banks

### \$524,377,167.01

Trade Acceptances amounting to \$429,845.19 are included in the above total.

Loans and Rediscounts secured by Liberty Bonds and Treasury Certificates of Indebtedness amounting to a total of \$191,757,389.66 are also included in the above figures.

### OPEN MARKET OPERATIONS

### Investments

Municipal warrants amounting to \$2,164,488.64, representing the obligations of seven municipalities, all maturing within six months, were purchased during the year at  $2\frac{5}{8}\%$  to 4%.

Acceptances

\$66,714,060.14 in Bankers' Acceptances and Foreign Trade Acceptances were purchased during the year at  $2\frac{1}{4}\%$  to 4%, all represented by bills drawn in connection with imports or exports; these being acceptances by eighty-nine institutions of known responsibility and purchased in the open market.

### U. S. Government Bonds

\$1,461,500 2% Consols and Panamas were purchased and converted during the year.

\$39,524,260  $3\frac{1}{2}$ % Liberty Loan Bonds were purchased and sold by the bank during the year.

### Treasury Certificates of Indebtedness Purchased by the Bank

Date	Amount	Rate
March 31	\$ 5,000,000	2 %
April 25	785,000	3 %
May 10		3 %
August 9	1,000,000	$3\frac{1}{2}\%$
August 28		$3\frac{1}{2}\%$
September 17		$3\frac{1}{2}\%$
September 26	5,150,000	$4^{-6}$
October 18	250,000	4 %
	\$ 16,497,000	

The above figures include the bank's own direct subscriptions to the various issues.

### FISCAL AGENCY OPERATIONS

### FIRST LIBERTY LOAN

When the Secretary of the Treasury offered the first issue of two billion dollars of  $3\frac{1}{2}\%$  bonds, a meeting of representatives of prominent banks, trust companies and bond houses was called to consider ways and means for its sale. There

12

were present at this meeting some fifty or sixty representatives. This body appointed an **Executive Committee**, which committee in turn organized itself into a

### Publicity Committee.

The Publicity Committee took charge of the selling campaign and appointed an assistant to the Chairman, a corresponding secretary and a recording secretary. The assistant to the Chairman was the active officer in the conduct of the campaign.

Another important committee appointed was the

### Distribution Committee,

which consisted of a Chairman and six other members, one being named for each state in the district and one for the Chicago territory.

These chairmen for the various sections secured the services of several hundred experienced bond salesmen and sent them out all over the District, building up working organizations in every section. These organizations were by counties, cities and towns. The Chairman for Chicago organized a flying squadron of several hundred volunteers and these men made an office-to-office canvass within the "loop district."

Amongst other committees covering District-wide activities were the following: Public speakers, advertising, foreign language papers, posters, insurance companies, churches, moving pictures and Four-Minute men, fraternal societies, public utilities, etc.

The Governors of all five states united in issuing proclamations making one week "Liberty Loan Week".

Partial payment plans were devised for banks and other organizations to carry those subscribers who were not prepared to meet their subscriptions in full.

Secretary McAdoo visited the District during the campaign and spoke in several cities.

The District's quota of bonds was over-subscribed.

### SECOND LIBERTY LOAN

This campaign was organized by an executive committee composed of the same members as the former executive and publicity committees and with the same chairman as the old publicity committee. Several additions were made, however, to the membership before the campaign began. An Executive Secretary was chosen and placed in active charge of the campaign.

The active work of the campaign was carried on under the following divisions:

Department of Sales Department of Publicity Department of Public Speaking Woman's Work.

Additional committees covering District-wide activities were appointed as in the first campaign, and the same chairmen served as before for Chicago and the various states. The unit of organization for the second campaign was the county, and this organization was subdivided so as to reach down to the city, the town, the school district, and in some cases the voting precinct. In addition thereto, all of the larger cities formed their own organizations. Volunteer workers from banks, bond houses, stock exchange firms, commercial paper houses, insurance companies, and so on, canvassed the entire District, encouraging local workers and doing pioneer work in indifferent communities.

In each State an Advisory Committee was formed, consisting of the Governor, the State Superintendent of Banks, the President of the State Bankers Association and representatives of labor, religion, agriculture, commerce, industry, State Council of Defense and others.

The District's quota of the four billions of bonds offered was over-subscribed.

The work of the Second Liberty Loan campaign was much better organized and more efficiently conducted than that of the first.

It is a matter of regret that space forbids personal recognition of the many workers and instrumentalities co-operating toward the success of the two campaigns. They are numbered by the thousands. Their names are on file with the Federal Reserve Bank and the result of their effective labors will not be forgotten. A list of officers and executive committees is given in the appendix.

### GOVERNMENT BOND DEPARTMENT

The Federal Reserve Bank organized a Government Bond Department through which the actual accounting for and distribution of Liberty Bonds has been handled. A statement of the expenses of this department appears in the appendix.

In the appendix will also be found an exhibit of the result of both the first and second Liberty Loan campaigns.

### TREASURY CERTIFICATES OF INDEBTEDNESS

A table showing the sales of the different issues of these certificates will be found in the appendix.

### WAR SAVINGS CERTIFICATES

The Secretary of the Treasury has designated the Federal Reserve Banks as fiscal agents for the distribution of War Savings Certificates and Stamps. The Federal Reserve Banks become the warehouses to which banks, express companies, railways, and other authorized agents go to receive their supplies and to whom they account for the proceeds.

Up to and including December 31 the Federal Reserve Bank of Chicago has accounted for \$915,725.00 par value from the proceeds of these certificates.

### DEPOSITORIES FOR PROCEEDS OF LIBERTY BONDS AND TREASURY CERTIFICATES

Many banks throughout the District qualified as depositories under the regulations prescribed by the Treasury Department. In order to accommodate the various sections of the District, securities committees and custodians for collateral were appointed in each state, serving without compensation.

A list of such securities committees and custodians appears in the appendix.

### IN CONCLUSION

The Federal Reserve System has already justified the expectation of those who were instrumental in framing the Act and responsible for its enactment. Through it, the reserves of the country have been largely mobilized and much of the free gold brought into its coffers. As a result of its establishment public confidence exists and the integrity of our business fabric has been maintained, although our country has entered upon what is perhaps the most momentous epoch in its history.

In all this, the Federal Reserve Bank of Chicago has borne its part. With all other Federal Reserve Banks, its note issues have largely increased during the year. Much of this increase has been directly against gold, and the greater demands of business have necessitated the remainder.

The Board of Directors of this bank, slow in the beginning to make use of this issue power, have not hesitated to avail themselves of it when the situation demanded, and yet further use of it will be inevitable during the continuance of the war. The problem of differentiating between necessary expansion on the one hand and dangerous inflation on the other is yet to be solved. The wise conservatism which has thus far directed the operation of the Federal Reserve Banks and the administration of the System may be trusted to handle this situation in a satisfactory manner when it is presented for solution.
