

**FEDERAL RESERVE BANK  
OF DALLAS**

Dallas, Texas, March 20, 1930.

**To all Banks and Trust Companies in the  
Eleventh Federal Reserve District:**

**SUBJECT: Long Distance Telephone Calls**

For your convenience in placing long distance telephone calls the telephone numbers of our offices are as follows:

Dallas.....	LD	337
El Paso .....	Main	2040
Houston .....	LD	173
San Antonio.....	LD	173

It is suggested that, when placing calls for any of our offices, wherever practicable "station to station" service be used. Station to station calls are those on which the party placing the call agrees to talk to anyone who answers the called telephone. Features of station to station calls are that they are completed more quickly, the rates are less than on person to person calls and there are no report charges. In placing a station to station call say, for example, to the long distance operator, "I want Dallas LD 337," or "El Paso Main 2040," and when our operator at the office called answers ask for the person or department to whom you wish to talk. Long distance calls can be completed more quickly by using these numbers, even though it is necessary that some particular one of our officers be called. Should it be necessary to place a person to person call say, for example, to your long distance operator, "I want to talk to Mr. .... at Dallas LD 337."

Yours very truly,

Governor.
