# CONDITION OF MEMBER BANKS, APRIL 20, 1953 ELEVENTH FEDERAL RESERVE DISTRICT 

## To the Member Banks of the

## Eleventh Federal Reserve District:

The consolidated statement of condition of all member banks in the Eleventh Federal Reserve District as of April 20, 1953, is presented on the reverse of this letter. For purposes of comparison, statements for March 31 and December 31, 1952, are shown. These data reflect a substantial expansion in practically all major categories of assets and liabilities between March 31, 1952, and April 20, 1953. In more recent months (between December 31, 1952, and April 20, 1953), cash and balances due from banks, investments in United States Government securities, and deposits declined, reflecting in part seasonal factors. In contrast with these changes, loans increased.

Loans of the District's member banks expanded $\$ 308,563,000$, or almost 12 percent, between March 31, 1952, and April 20, 1953, rising to a record total of $\$ 2,890,996,000$. A sharp expansion in consumer lending represents one of the more notable features of the increase in loans during the period. Expansion in the category which includes consumer-type loans was greater than in any other category and accounted for approximately 45 percent of the increase in total loans. The remaining rise reflects principally the rather strong demand for commercial and industrial loans which prevailed in the second half of 1952. From December 31, 1952, to April 20, 1953, there was a continued strong demand for consumer loans, a seasonal expansion of loans to farmers at country member banks, and a seasonal reduction of commodity loans at reserve city member banks. Total loans rose $\$ 34,065,000$, or 1.2 percent.

On April 20, 1953, total investments of the member banks amounted to $\$ 2,715,974,000$, reflecting an increase of $\$ 28,776,000$ over holdings on March 31, 1952, but a reduction of $\$ 156,902,000$ from December 31, 1952. Contraction of investments during the more recent period is attributable principally to a decrease in holdings of Government securities. Holdings of municipal securities were practically unchanged.

Deposits of the member banks declined rather sharply between December 31, 1952, and April 20,1953 , with the total reduction amounting to $\$ 614,999,000$, or 7.5 percent. Interbank deposits accounted for somewhat more than one-half of the decrease. Demand deposits of individuals and businesses declined $\$ 256,930,000$, or almost 5 percent, reflecting in part corporate and individual income tax payments during the first $21 / 3$ months of the year and a net outflow of funds from the District. In contrast with the trend of demand deposits, time deposits of individuals and businesses rose $\$ 49,339,000$, continuing the expansion in these accounts which has prevailed for many months. Partly because of deposit withdrawals, member banks drew down cash and balances in the amount of $\$ 467,485,000$, or 16.1 percent, between December 31, 1952, and April 20, 1953.

Capital accounts of the District's member banks amounted to $\$ 538,307,000$ on April 20, 1953, an increase of 8 percent over the total reported March 31, 1952.
