# CONDITION OF MEMBER BANKS, SEPTEMBER 30, 1953 ELEVENTH FEDERAL RESERVE DISTRICT 

To the Member Banks of the<br>Eleventh Federal Reserve District:

The consolidated statement of condition of all member banks in the Eleventh Federal Reserve District as of September 30, 1953, is presented on the reverse of this letter. Similar statements for June 30, 1953, and September 5, 1952, are shown. These data reflect substantial increases in most of the principal assets and liabilities between September 5, 1952, and September 30, 1953. In more recent months, between June 30 and September 30, loans and investments rose while total resources, cash assets, and deposits declined.

Loans of the District's member banks expanded to a record total of $\$ 2,891,503,000$ on September 30, reflecting increases of $\$ 165,404,000$ (or 6.1 percent) over September 5, 1952, and $\$ 8,132,000$ (or substantially less than 1 percent) over June 30. The nominal loan expansion from June 30 to the end of September compares with the rise of $\$ 77,530,000$, or 2.9 percent, between June 30 and September 5 of last year. The increase in loans during recent months reflects principally the rise in Commodity Credit Corporation guaranteed loans in connection with price support operations for the 1953 cotton crop and a further expansion of consumer-type credits. Decreases occurred in commercial and industrial loans, loans for financing security transactions, nonguaranteed loans to farmers, and real estate loans.

On September 30, total investments of member banks amounted to $\$ 2,780,331,000$, reflecting an increase of $\$ 76,654,000$, or 2.8 percent, during the 3 months ended September 30 . Partly because of a general easing in reserve positions and a somewhat slackened loan demand, member banks increased their holdings of Government securities by $\$ 66,566,000$, or 2.9 percent, and their investments in the securities of states and political subdivisions by $\$ 4,739,000$, or 1.3 percent.

Deposits of member banks in the District rose $\$ 199,541,000$, or 2.7 percent, between September 5, 1952, and September 30, 1953, to a total of $\$ 7,583,669,000$. Approximately 58 percent of this expansion represents growth in time deposits of individuals and businesses. On September 30, however, total deposits were $\$ 78,603,000$, or 1.0 percent, below the June 30 level, due principally to a reduction in interbank deposits and in deposits of states and political subdivisions. Partly because of the contraction in deposits but reflecting also the increase in investments, member banks drew down their cash assets in the amount of $\$ 136,763,000$, or 5.4 percent, between June 30 and September 30.

Reflecting generally favorable earnings, conservative dividend policies, and the sale of capital stock, total capital accounts of the District's member banks increased $\$ 47,414,000$, or 9.2 percent, from September 5, 1952, to September 30, 1953. Capital accounts totaling \$564,771,000 on September 30 were 7.4 percent of total deposits.

Yours very truly,
W. D. GENTRY

First Vice President
